Book 1 of 2 Books

Pages 4875–5450

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 85 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Presidential Documents

Title 3—

The President

Executive Order 13974 of January 13, 2021

Amending Executive Order 13959—Addressing the Threat From Securities Investments That Finance Communist Chinese Military Companies

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), and section 301 of title 3, United States Code,

I, DONALD J. TRUMP, President of the United States of America, in order to take additional steps with respect to the national emergency declared in Executive Order 13959 of November 12, 2020 (Addressing the Threat from Securities Investments that Finance Communist Chinese Military Companies), to address the threat posed by the People's Republic of China's military-industrial complex, hereby order as follows:

Section 1. Section 1(b) and (c) of Executive Order 13959 are amended to read as follows:

''(b) Notwithstanding subsection (a)(i) of this section, any transaction entered into on or before 11:59 p.m. eastern standard time on November 11, 2021, solely to divest, in whole or in part, from securities that any United States person held as of 9:30 a.m. eastern standard time on January 11, 2021, in a Communist Chinese military company as defined in section 4(a)(i) of this order, is permitted. Effective at 11:59 p.m. eastern standard time on November 11, 2021, possession of any such securities by a United States person is prohibited.

(c) Notwithstanding subsection (a)(ii) of this section, for a person determined to be a Communist Chinese military company pursuant to section 4(a)(ii) or (iii) of this order, any transaction entered into on or before 365 days from the date of such determination, solely to divest, in whole or in part, from securities that any United States person held in such person, as of the date 60 days from the date of such determination, is permitted. Effective at 11:59 p.m. eastern standard time on the date 365 days after the date of such determination, possession of any such securities by a United States person is prohibited.''

Sec. 2. Subsections (a)(ii) and (iii) of section 4 of Executive Order 13959 are amended to read as follows:

''(ii) any person that the Secretary of Defense, in consultation with the Secretary of the Treasury, publicly lists as a Communist Chinese military company meeting the criteria in section 1237(b)(4)(B) of Public Law 105–261, as amended by section 1233 of Public Law 106–398 and section 1222 of Public Law 108–375, and that operates directly or indirectly in the United States or any of its possessions, until such time as the Secretary of Defense removes such person from such list. This definition shall apply regardless of whether the Secretary of Defense must provide the report described in section 1237(b)(2) of Public Law 105–261, as amended by section 1233 of Public Law 106–398 and section 1222 of Public Law 108–375; or

(iii) any person that the Secretary of the Treasury publicly lists as meeting the criteria described in section (a)(ii) of this section, or publicly lists as a subsidiary of a person already determined to be a Communist Chinese

military company, until the Secretary of the Treasury determines that such person no longer meets that criteria and removes such person from such list.''

Sec. 3. Section 4(e) of Executive Order 13959 is amended to read as follows:

''(e) the term ''transaction'' means the purchase for value, or sale, of any publicly traded security; and''.

Sec. 4. *General Provisions.* (a) Nothing in this order shall be construed to impair or otherwise affect:

(i) the authority granted by law to an executive department or agency, or the head thereof; or

(ii) the functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This order shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This order is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 9

[Docket ID: FSA–2020–0006]

RIN 0503–AA65

Coronavirus Food Assistance Program; Additional Assistance

AGENCY: Office of the Secretary, Department of Agriculture (USDA).

ACTION: Final rule.

SUMMARY: The Coronavirus Food Assistance Program (CFAP) provides assistance to agricultural producers impacted by the effects of the COVID–19 outbreak. The Secretary of Agriculture implemented CFAP through two rounds of payments (CFAP 1 and CFAP 2). This rule amends the CFAP 1 provisions to provide additional assistance for swine producers who previously applied for assistance during the CFAP 1 application period. This rule also amends the CFAP 2 provisions to provide assistance for certain swine and poultry contract producers, clarify eligible sales-based commodities, add additional commodities that are eligible for payment, change the payment calculation for sales-based commodities, and change the yield used to calculate payment for price-trigger crops for certain applicants. The change to the payment calculation for sales-based commodities is being made to implement a change required by the recently enacted Consolidated Appropriations Act, 2021. Other changes to CFAP in this rule are discretionary changes being made in response to ongoing evaluation of CFAP and the need to provide additional assistance.

DATES: Effective January 19, 2021.

FOR FURTHER INFORMATION CONTACT: Kimberly Graham; telephone: (202) 720–6825; email: *Kimberly.Graham@usda.gov*. Persons with disabilities who require alternative means for communication should contact the USDA Target Center at (202) 720–2600 (voice).

SUPPLEMENTARY INFORMATION:

Background

USDA established CFAP to assist producers of agricultural commodities marketed in 2020 who face continuing market disruptions, reduced farm-level prices, and increased production and marketing costs due to COVID–19 under authority provided by the Coronavirus Aid, Relief, and Economic Security Act (CARES Act; Pub. L. 116–136) and sections 5(b), (d), and (e) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c(b), (d), and (e)). USDA implemented CFAP through two rounds of payments (CFAP 1 and CFAP 2). CFAP 1 was implemented through a final rule published in the **Federal Register** on May 21, 2020 (85 FR 30825–30835), with corrections published in the **Federal Register** on June 12, 2020 (85 FR 35799–35800), July 10, 2020 (85 FR 41328–41330), August 14, 2020 (85 FR 49593–49594), and September 21, 2020 (85 FR 59174–59175), and documents published in the **Federal Register** on May 22, 2020 (85 FR 31062–31065), June 12, 2020 (85 FR 35812), July 10, 2020 (85 FR 41321–41323), and August 14, 2020 (85 FR 49589–49593). USDA implemented CFAP 2 through a final rule published in the **Federal Register** on September 22, 2020 (85 FR 59380–59388).

The Consolidated Appropriations Act, 2021 (Pub. L. 116–260), signed on December 27, 2020, provided additional funding and made several changes to CFAP. This rule implements a provision of the Consolidated Appropriations Act, 2021, to amend the payment calculation for sales commodities as described below.[1] Other changes to CFAP in this rule are discretionary changes being made in response to ongoing evaluation of CFAP and the need to provide additional assistance.

CFAP is administered by USDA's Farm Service Agency (FSA). FSA accepted CFAP 1 applications from May 26, 2020, through September 11, 2020,[2] and CFAP 2 applications from September 21, 2020, through December 11, 2020. This rule amends the provisions for CFAP 1 and CFAP 2 as described below.

CFAP 1

For eligible producers of hogs and pigs, CFAP 1 provided financial assistance in an amount equal to the sum of the following two calculations:

- Unpriced livestock sold between January 15, 2020, to April 15, 2020, multiplied by the applicable Coronavirus Aid, Relief, and Economic Stability Act (CARES Act) payment rate in 7 CFR 9.102; and
- Livestock inventory owned between April 16, 2020, to May 14, 2020, multiplied by the applicable Commodity Credit Corporation (CCC) payment rate in § 9.102.

This rule provides additional CFAP 1 payments for hog and pig inventory owned between April 16, 2020, and May 14, 2020, based on a rate of $17 per head (which results in a total CFAP 1 payment rate of $34 per head for that inventory including the prior $17 per head payment for CFAP 1). For the swine (hog and pig) sector, the inventory payment rates were determined to be insufficient to alleviate ongoing market price losses in the sector.

This additional assistance is also intended to help swine producers who face continuing market disruptions from changes in U.S. meat consumption due to the pandemic. These disruptions are reflected in futures prices. Generic lean hog futures prices at the end of November 2020 were 5.4 percent lower than on January 2, 2020. In contrast, futures prices for commodities such as soybeans and corn have been increasing in the second half of 2020 to levels above those in early January of 2020.

FSA is not reopening the CFAP 1 application period. Only producers who previously applied for CFAP 1 are eligible to receive this additional assistance. Eligible producers do not need to submit a new CFAP 1 application form or take any action to receive the additional payment. Producers are subject to a payment limitation of $250,000 for all CFAP 1

[1] Other changes to CFAP included in the Consolidated Appropriations Act, 2021, not made in this final rule will be addressed in a subsequent rulemaking.

[2] Certain producers in Louisiana, Oregon, and Texas had through October 9 to apply due to natural disasters.

payments,[3] including this additional assistance, as provided in § 9.7(e).

CFAP 2

In this final rule, USDA is also including certain producers that raise swine and poultry (including broilers, pullets, layers, chicken eggs, and turkeys) under a production contract that sustained revenue losses due to market disruptions and reduced harvesting facility output resulting from the COVID–19 outbreak. A swine or poultry contract producer is one who produces swine or poultry owned by someone else under a production contract. Not all production contracts operate the same way, so not all contract producers will be eligible. Only those producers who grow or produce an eligible commodity under contract for or on behalf of another person or entity and are not entitled to a share from sales proceeds of the commodity are eligible. For example, a farmer who raises chickens pursuant to a production contract where such chickens are owned by a company that produces chicken products could be an eligible contract grower if such farmer does not receive payment for chickens that die before reaching maturity or when young animals are not supplied to the farmer by the company, or whose income is reduced when fewer young animals than normal are provided by the company.

USDA did not include swine and poultry contract producers in CFAP 1 because the impacts to these producers from COVID–19 was not known at the time the rule was published in the **Federal Register** on May 21, 2020. The impacts from COVID–19 on contract producers such as delayed delivery of young poultry and hogs to contract producers, decreased housing densities, additional costs for keeping animals longer than typical durations, and damage caused by animals too large for housing, were known when USDA published the rule implementing CFAP 2 in the **Federal Register** on September 22, 2020. However, those producers could not be included since CFAP 2 payments were issued using funds authorized under CCC Charter Act (15 U.S.C. 714c(b), (d), and (e)) to assist with the transition to a more orderly marketing system, and swine and poultry contract producers do not ordinarily market the animals they raise. CARES funding, as authorized, remains available until expended to support agricultural producers impacted by COVID–19, including producers of specialty crops, producers that supply local food systems (including farmers markets, restaurants, and schools), and livestock producers. This remaining CARES Act funding will assist contract producers facing reduced revenue due to the impacts noted above.

Certain contract producers have been eligible for assistance under the Livestock Indemnity Program (LIP); Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP); and the Livestock Forage Disaster Program (LFP) since these permanent supplemental disaster programs were authorized in the 2008 Farm Bill (Pub. L. 110–234; 7 U.S.C. 9081, see also 7 CFR parts 760 and 1416). These programs provide financial assistance to contract producers who are impacted by adverse weather events such as hurricane, flood, blizzard, disease, drought, or extreme cold or heat. Including certain swine and poultry contract producers in CFAP 2 parallels their inclusion in these permanent supplemental disaster programs that provide financial assistance to contract producers due to weather events that are not expected. The impacts of a global pandemic are beyond normal production conditions and have had a negative financial impact on swine and poultry producers including those raising animals under a production contract.

USDA is including this subset of contract producers because the COVID–19 global pandemic not only disrupted protein markets as consumer consumption abruptly shifted from food service to home preparation, but also reduced harvesting facility output because of COVID–19 outbreaks among the workforce and when facilities reduced processing capacity to ensure worker health. Swine and poultry contract producers provided data and other information to USDA to illustrate the impact of these coronavirus disruptions on their operations. The impacts of slowdowns and shutdowns at processing facilities in late spring and early summer are still being felt in the poultry and swine industry. In some instances, companies managed and continue to manage the lack of harvest capacity by reducing or eliminating new production, which means that contract producers had fewer animals to produce under contract per cycle or did not have young animals delivered by the company for some periods. In other situations, companies required some contract producers to keep animals longer than they typically keep them before shipping them to the harvesting facility, which actions increased costs such as producer labor, and for additional wear and tear and water use associated with larger animals. In addition, swine and poultry contract producers cannot use their specialized growing facilities for other purposes to generate revenue as the sector works through the supply chain bottlenecks.

Contract producers are eligible for payments if they produced swine or poultry (including broilers, pullets, layers, chicken eggs, turkeys) under a contract in both the 2019 and 2020 calendar years, suffered a loss in eligible revenue for the period from January 1, 2020, through December 27, 2020, as compared to the period from January 1, 2019, through December 27, 2019, and meet all other requirements for CFAP eligibility. Eligible revenue is the revenue received by a contract producer for contract production of the eligible commodity, as reported on Internal Revenue Service Form 1099. Payments to eligible contract producers will be calculated by subtracting the contract producer's eligible revenue for the period from January 1, 2020, through December 27, 2020, from their eligible revenue for the period from January 1, 2019, through December 27, 2019, and multiplying the result by 80 percent. This calculation is subject to the availability of funds and will be factored, if needed. Contract producers must submit a complete CFAP 2 application between January 19, 2021, and February 26, 2021. Contract producers are subject to a payment limitation of $250,000 for all CFAP 2 payments,[4] including any CFAP 2 payments received for other commodities not grown under a contract, as provided in § 9.7(e).

USDA has determined that producers of pullets, water buffalo, yak, and turfgrass sod face continuing market disruptions, low farm-level prices, and significant marketing costs associated with the COVID–19 outbreak, similar to producers of commodities that were previously determined to be eligible for CFAP 2 assistance. As a result, USDA is amending the definitions of ''Other livestock'' and ''Sales-based commodities'' in § 9.201 to include those commodities. USDA will reopen signup specifically for pullets, turfgrass sod, and contract growers on January 19, 2021. through February 26, 2021. The change to accept applications for water buffalo and yak was previously implemented by USDA; therefore, the

[3] Corporations, limited liability companies, limited partnerships, trusts, and estates may qualify for an increased CFAP 1 payment limitation. See 7 CFR 9.7(e).

[4] Corporations, limited liability companies, limited partnerships, trusts, and estates may qualify for an increased CFAP 2 payment limitation. See 7 CFR 9.7(e).

deadline is not extended for those livestock types. USDA is also amending the definition of ''Other livestock'' to clarify that reptiles and bees are ineligible.

This rule also amends the definition of ''Other livestock'' in § 9.201 to clarify that by-products of live animals included as ''Other livestock'' are eligible for CFAP 2. As provided in § 9.203(i)(1), the payment calculation for sales-based commodities is based on sales of raw commodities; the portion of sales derived from adding value to the commodity, such as processing and packaging, is not included when calculating a payment. For example, sales of alpaca fleece would be included for payment calculation; however, if the alpaca fleece is further processed into alpaca yarn prior to sale, the portion of the sale price derived from that processing is not included. Eligible by-products of other livestock do not include eggs that are sold to be hatched for breeding stock. This change was previously implemented by USDA; therefore, the deadline is not extended for by-products of ''Other livestock.''

USDA is amending the payment calculation for sales-based commodities to include the amount of crop insurance indemnities received and payments made under the Noninsured Crop Disaster Assistance Program (NAP) and the Wildfires and Hurricanes Indemnity Program Plus (WHIP+) payments for crop year 2019 in addition to the amount of the producer's 2019 sales, as required by the Consolidated Appropriations Act, 2021. CFAP 2 uses a producer's 2019 sales as an approximation of the amount of what the producer would expect to market in 2020. This change is intended to more accurately represent what a producer would expect to have marketed in 2020 by taking into account commodities that would have been marketed in 2019 if not for losses covered by crop insurance, NAP or WHIP+. For producers who began farming in 2020 and had no sales in 2019, CFAP 2 payments will continue to be based on the farmer's actual 2020 sales, without inclusion of crop insurance indemnities or NAP or WHIP+ payments, since payments are based on the actual crop that incurred marketing costs and was impacted by market disruptions and low farm-level prices. Producers of eligible sales-based commodities who applied for CFAP 2 before the December 11, 2020, application deadline and received crop insurance indemnities or NAP or WHIP+ payments for the 2019 crop year may amend their CFAP 2 applications from January 19, 2021, through February 26, 2021, to include those amounts. This rule is not extending the CFAP 2 deadline for producers of sales-based commodities who did not previously apply for CFAP 2, except for producers of pullets and turfgrass sod as described above.

USDA is also amending the calculation for price-trigger commodities. As published on September 22, 2020, payments are calculated using the 2019 Agriculture Risk Coverage-County Option (ARC–CO) benchmark yield multiplied by 85 percent when FSA is unable to obtain a 2020 actual production history (APH) approved yield. This rule amends the calculation to use 100 percent of the ARC–CO benchmark yield when the applicant:

- Has coverage for the crop under an Area Risk Protection Insurance Plan, Margin Protection Plan, Stacked Income Protection Plan, Supplemental Coverage Option, or Whole-Farm Revenue Protection Plan under the Federal Crop Insurance Act (7 U.S.C. 1501–1524);
- Is a landlord of the applicable acreage and their share of the crop is insured by the tenant under a policy or plan of insurance under the Federal Crop Insurance Act;
- Is a tenant of the applicable acreage and their share of the crop is insured by the landlord under a policy or plan of insurance under the Federal Crop Insurance Act; or
- Is a joint venture and the crop is insured by one of the members under a policy or plan of insurance under the Federal Crop Insurance Act.

In these situations, FSA does not have 2020 APH approved yield for the CFAP 2 applicant because the insurance plan does not require calculation of an APH approved yield or because the record of the APH approved yield would not be associated with the CFAP 2 applicant. However, the crop was insured in these situations and using 100 percent of the ARC–CO benchmark yield is intended to treat producers with crop insurance coverage but without an available 2020 APH approved yield in a more favorable way to other producers who had crop insurance. All applicants affected by this change were previously eligible under the original rule; therefore, this rule is not extending the CFAP 2 deadline for those producers who did not previously apply for CFAP 2. Applicants affected by this change must contact FSA to have their payment recalculated using 100 percent of the ARC–CO benchmark yield.

This document also makes minor corrections to the definitions of ''fruits'' and ''tree nuts'' in § 9.201 and to the calculation in § 9.202(c). In § 9.1, it adds the applicable date that livestock must have been physically located in the United States for CFAP 2, which was inadvertently omitted from the previous final rule. These corrections do not affect administration of CFAP 2.

The changes in this document are consistent with our original intent in creating and administering CFAP 2 and are not expected to increase expected costs beyond the original approved amount.

Notice and Comment and Effective Date

The Administrative Procedure Act (APA, 5 U.S.C. 553(a)(2)) provides that the notice and comment and 30-day delay in the effective date provisions do not apply when the rule involves specified actions, including matters relating to benefits. This rule governs CFAP for payments to certain commodity producers and therefore falls within the benefits exemption.

The Office of Management and Budget (OMB) designated this rule as major under the Congressional Review Act (CRA), as defined by 5 U.S.C. 804(2). Section 808 of the CRA allows an agency to make a major regulation effective immediately if the agency finds there is good cause to do so. The beneficiaries of this rule have been significantly impacted by the COVID–19 outbreak, which has resulted in significant declines in demand and market disruptions. USDA finds that notice and public procedure are contrary to the public interest. Therefore, even though this rule is a major rule for purposes of the Congressional Review Act, USDA is not required to delay the effective date for 60 days from the date of publication to allow for Congressional review. Accordingly, this rule is effective upon publication in the **Federal Register**.

Executive Orders 12866, 13563, and 13777

Executive Order 12866, ''Regulatory Planning and Review,'' and Executive Order 13563, ''Improving Regulation and Regulatory Review,'' direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasized the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The requirements in Executive Orders 12866 and 13573 for the analysis of costs and benefits apply to rules that are determined to be significant. Executive

Order 13777, ''Enforcing the Regulatory Reform Agenda,'' established a federal policy to alleviate unnecessary regulatory burdens on the American people.

The Office of Management and Budget (OMB) designated this rule as economically significant under Executive Order 12866 and therefore, OMB has reviewed this rule.

In general response to the requirements of Executive Order 13777, USDA created a Regulatory Reform Task Forces, and USDA agencies were directed to remove barriers, reduce burdens, and provide better customer service both as part of the regulatory reform of existing regulations and as an on-going approach. USDA reviewed this regulation and made changes to provide better customer service. The costs and benefits of this rule are summarized below. The full cost benefit analysis is available on *regulations.gov.*

Cost Benefit Analysis Summary

CFAP 1 and CFAP 2 assist producers of agricultural commodities marketed in 2020 who face continuing market disruptions, reduced farm-level prices, and increased production and marketing costs due to COVID–19. These additional costs are associated with declines in demand, surplus production, or disruptions to shipping patterns and marketing channels.

As mentioned above, in implementing the CFAP 1 and CFAP 2, FSA received feedback from local office staff and the agricultural industry. As a result, additional CFAP assistance and other changes are being made to provide assistance to additional growers that suffered COVID-related revenue losses, to ensure that calculations most accurately reflect sales, to provide equitable producer treatment, and to clarify certain provisions appearing in CFAP 2.

These changes (referred to as ''CFAP Additional Assistance''), along with the associated gross and net estimated outlays, are shown in Table 1 (at the end of this section). Payments for item 1 (the ''top up'' for swine producers) and item 2 (payments to contract livestock producers) will draw on CARES funding. Payments for items 3, 4, and 5 in Table 1 (all payments referenced as CFAP 2 payments or modified CFAP 2 payments) draw on CCC funding that remains given CFAP 1 and CFAP 2 payments. These payments are authorized by the CCC Charter Act (section 5 (b), (d) and (e)).

Estimated gross outlays for CFAP Additional Assistance are estimated at $3.10 billion (see Table 1). After taking into account payment limitations, net outlays are estimated at $2.28 billion. Payments to contract swine, chicken, egg, and turkey producers account for 87 percent of the total.

FSA, which implemented CFAP 1 and 2, will start accepting CFAP Additional Assistance applications for contract producers and turfgrass sod and pullet producers on January 19, 2021. Producers who did not apply by the CFAP 1 deadline (September 11, 2020) are not eligible for the swine top-up payment.

Net payments represent benefits to producers, which is the government cost of the program. Outlays shown in Table 1 are estimated at expected maximum levels. Some producers must take additional actions under this rule if they are interested in receiving benefits. These producers realize administrative costs associated with participation, which are estimated at $4.15 million.

TABLE 1—SUMMARY OF CFAP ADDITIONAL ASSISTANCE REGULATORY CHANGES AND ESTIMATED COSTS

Item	Gross estimated outlays (in billion $)	Net estimated outlays (in billion $)
Item 1—Provide a ''top up'' inventory payment to swine producers eligible for CFAP 1	$0.81	$0.15.
Item 2—Assist contract producers of swine, chickens, eggs, and turkeys	$1.98	$1.98.
Item 3—Include turfgrass sod, pullets, and by-products of live animals as ''sales-based commodities'' for CFAP 2 eligibility.	$0.21	$0.10.
Item 4—Include 2019 crop insurance indemnities and 2019 NAP WHIP+ payments to the producer's 2019 sales to compute CFAP 2 payments.	$0.08	$0.03.
Item 5—Change the calculation for price-trigger commodities with respect to ARC–CO	$0.02	$0.02.
Item 6—Clarify that reptiles and bees are ineligible for CFAP 2	No change in outlays	No change in outlays.
Item 7—Make minor corrections to the definitions of ''fruits'' and ''tree nuts'' in §§ 9.201 and 9.202(c).	No change in outlays	No change in outlays.
Total	$3.10	$2.28.

Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601–612), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), generally requires an agency to prepare a regulatory analysis of any rule whenever an agency is required by APA or any other law to publish a proposed rule, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. This rule is not subject to the Regulatory Flexibility Act because as noted above, this rule is exempt from notice and comment rulemaking requirements of the APA and no other law requires that a proposed rule be published for this rulemaking initiative.

Environmental Review

The environmental impacts of this final rule have been considered in a manner consistent with the provisions of the National Environmental Policy Act (NEPA, 42 U.S.C. 4321–4347), the regulations of the Council on Environmental Quality (40 CFR parts 1500–1508), and because USDA will be making the payments to producers the USDA regulations for compliance with NEPA (7 CFR part 1b).

Although OMB has designated this rule as ''economically significant'' under Executive Order 12866, ''. . . economic or social effects are not intended by themselves to require preparation of an environmental impact statement'' when not interrelated to natural or physical environmental effects (see 40 CFR 1502.16(b)). CFAP was designed to avoid skewing planting decisions. Producers continue to make their planting and production decisions with the market signals in mind, rather than any expectation of what a new USDA program might look like. The discretionary aspects of CFAP (for example, determining AGI and payment limitations) were designed to be consistent with established USDA and the CCC programs and are not expected to have any impact on the human

environment, as CFAP payments will only be made after the commodity has been produced. Accordingly, the following Categorical Exclusion in 7 CFR part 1b applies: § 1b.3(a)(2), which applies to activities that deal solely with the funding of programs, such as program budget proposals, disbursements, and the transfer or reprogramming of funds. As such, the implementation of and participation in CFAP do not constitute major Federal actions that would significantly affect the quality of the human environment. Therefore, an environmental assessment or environmental impact statement for this regulatory action, will not be prepared; this rule serves as documentation of the programmatic environmental compliance decision for this Federal action.

Executive Order 12372

Executive Order 12372, ''Intergovernmental Review of Federal Programs,'' requires consultation with State and local officials that would be directly affected by proposed Federal financial assistance. The objectives of the Executive order are to foster an intergovernmental partnership and a strengthened federalism, by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance and direct Federal development. For reasons specified in the final rule related notice regarding 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), the programs and activities in this rule are excluded from the scope of Executive Order 12372.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, ''Civil Justice Reform.'' This rule will not preempt State or local laws, regulations, or policies unless they represent an irreconcilable conflict with this rule. Before any judicial actions may be brought regarding the provisions of this rule, the administrative appeal provisions of 7 CFR parts 11 and 780 are to be exhausted.

Executive Order 13132

This rule has been reviewed under Executive Order 13132, ''Federalism.'' The policies contained in this rule do not have any substantial direct effect on States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government, except as required by law. Nor does this rule impose substantial direct compliance costs on State and local governments. Therefore, consultation with the States is not required.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments.'' Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on policies that have Tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

USDA has assessed the impact of this rule on Indian Tribes and determined that this rule does not, to our knowledge, have Tribal implications that required Tribal consultation under Executive Order 13175 at this time. If a Tribe requests consultation, the USDA Office of Tribal Relations (OTR) will ensure meaningful consultation is provided where changes, additions, and modifications are not expressly mandated by law. Outside of Tribal consultation, USDA is working with Tribes to provide information about CFAP additional assistance and other issues.

Unfunded Mandates

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA, Pub. L. 104–4) requires Federal agencies to assess the effects of their regulatory actions of State, local, and Tribal governments or the private sector. Agencies generally must prepare a written statement, including cost benefits analysis, for proposed and final rules with Federal mandates that may result in expenditures of $100 million or more in any 1 year for State, local or Tribal governments, in the aggregate, or to the private sector. UMRA generally requires agencies to consider alternatives and adopt the more cost effective or least burdensome alternative that achieves the objectives of the rule. This rule contains no Federal mandates, as defined in Title II of UMRA, for State, local and Tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of UMRA.

Federal Assistance Programs

The titles and numbers of the Federal Domestic Assistance Programs found in the Catalog of Federal Domestic Assistance to which this rule applies are:

10.130—Coronavirus Food Assistance Program 1

10.132—Coronavirus Food Assistance Program 2

Paperwork Reduction Act

FSA is requesting emergency approval on the additional information collection required for this rule for CFAP to provide assistance for contract producers of chickens, eggs, turkeys, and swine and to provide additional assistance for other commodities as clarified in this rule. The additional assistance for swine producers who previously applied for assistance under 0560–0297 does not require any new information collection. All of the information collection uses forms currently approved under 0560–0297.

E-Government Act Compliance

USDA is committed to complying with the E-Government Act to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects in 7 CFR Part 9

Agricultural commodities, Agriculture, Disaster assistance, Indemnity payments.

For the reasons discussed above, this final rule amends 7 CFR part 9 as follows:

PART 9—CORONAVIRUS FOOD ASSISTANCE PROGRAM

■ 1. Revise the authority citation for part 9 to read as follows:

Authority: 15 U.S.C. 714b and 714c; Division B, Title I, Pub. L. 116–136, 134 Stat. 505; and Division N, Title VII, Subtitle B, Chapter 1, Pub. L. 116–260.

Subpart A—General Provisions

■ 2. In § 9.1, revise paragraphs (a)(1) and (2) to read as follows:

§ 9.1 Applicability and administration.

(a) * * *

(1) For assistance under subpart B of this part:

(i) On January 15, 2020, and remaining in the United States until sold, for livestock sold between January 15, 2020, and April 15, 2020; or

(ii) On the applicable date selected for livestock in inventory between April 16, 2020, and May 14, 2020; and

(2) For assistance under subpart C of this part, on the applicable date selected

for livestock in inventory between April 16, 2020, and August 31, 2020.

* * * * *

■ 3. Amend § 9.4 as follows:
■ a. In paragraph (a)(1), remove ''of this part; and'' and add a semicolon in its place;
■ b. Revise paragraph (a)(2);
■ c. Add paragraph (a)(3); and
■ d. In paragraph (d), remove the reference to ''§ 9.202(a) or (b)'' and add ''§ 9.203(a) or (b)'' in its place.

The revision and addition read as follows:

§ 9.4 Time and method of application.

(a) * * *

(2) December 11, 2020, for payments issued under § 9.203, except for applications for pullets, turfgrass sod, and contract producers; and

(3) February 26, 2021, for payments issued under § 9.203 for applications for pullets, turfgrass sod, and contract producers.

* * * * *

Subpart C—CFAP 1

■ 4. Amend § 9.102 as follows:
■ a. In paragraph (d) introductory text, remove the word ''two'' and add the word ''three'' in its place;
■ b. In paragraph (d)(1), remove the word ''and'';
■ c. In paragraph (d)(2), remove the period and add ''; and'' in its place;
■ d. Add paragraph (d)(3).

The addition reads as follows:

§ 9.102 Calculation of payments.

* * * * *

(d) * * *

(3) Hog and pig inventory owned between April 16, 2020, to May 14, 2020, multiplied by a payment rate of $17 per head.

* * * * *

Subpart C—CFAP 2

■ 5. Amend § 9.201 as follows:
■ a. Add the definitions of ''Contract producer'', ''Crop insurance'', and ''Eligible revenue'' in alphabetical order;
■ b. Revise the definition of ''Fruits'';
■ c. Add the definitions of ''Layer'' and ''NAP'' in alphabetical order;
■ d. Revise the definition of ''Other livestock'';
■ e. In the definition of ''Producer'', remove the second sentence;
■ f. Add the definition of ''Pullet'' in alphabetical order;
■ g. In the definition of ''Sales-based commodities'', remove the words ''and wool'' and add the words ''wool, and turfgrass sod'' in their place;
■ h. Revise the definition of ''Tree nuts''; and
■ i. Add the definition of ''WHIP+'' in alphabetical order.

The additions and revisions read as follows.

§ 9.201 Definitions.

* * * * *

Contract producer means a producer who grows or produces an eligible commodity under contract for or on behalf of another person or entity. The contract producer does not have ownership in the commodity and is not entitled to a share from sales proceeds of the commodity.

Crop insurance means an insurance policy reinsured by Federal Crop Insurance Corporation under the provisions of the Federal Crop Insurance Act, as amended. It does not include private plans of insurance.

* * * * *

Eligible revenue means the revenue received by a contract producer for contract production of broilers, pullets, layers, chicken eggs, turkeys, hogs, or pigs, as reported on Internal Revenue Service Form 1099.

* * * * *

Fruits means any of the following fruits: Abiu, acerola (Barbados cherry), achachairu, antidesma, apples, apricots, aronia (chokeberry), atemoya (custard apple), avocados, bananas, blueberries, breadfruit, cacao, caimito, calabaza melon, canary melon, canary seed, caneberries, canistel, cantaloupes, carambola (star fruit), casaba melon, cherimoya (sugar apple), cherries, Chinese bitter melon, citron, citron melon, coconuts, cranberries, crenshaw melon, dates, donaqua (winter melon), durian, elderberries, figs, genip, gooseberries, grapefruit, grapes, ground cherry, guamabana (soursop), guava, guavaberry, honeyberries, honeydew, huckleberries, Israel melons, jack fruit, jujube, juneberries, kiwiberry, kiwifruit, Korean golden melon, kumquats, langsat, lemons, limequats, limes, longan, loquats, lychee, mangos, mangosteen, mayhaw berries, mesple, mulberries, nectarines, noni, olives, oranges, papaya, passion fruits, pawpaw, peaches, pears, persimmons, pineapple, pitaya (dragon fruit), plantain, plumcots, plums, pomegranates, prunes, pummelo, quinces, raisins, rambutan, sapodilla, sapote, schizandra berries, sprite melon, star gooseberry, strawberries, tangelos, tangerines, tangors, wampee, watermelon, wax jamboo fruit, and wolfberry (goji).

* * * * *

Layer means a chicken producing table or commercial type shell eggs.

NAP means the Noninsured Crop Disaster Assistance Program under section 196 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7333) and part 1437 of this title.

* * * * *

Other livestock means any of the following livestock: Animals commercially raised for food, fur, fiber, or feathers, including alpacas, bison, buffalo, beefalo, deer, ducks, elk, emus, geese, goats, guinea pigs, llamas, mink, ostrich, pheasants, pullets, quail, rabbits, reindeer, turkey, water buffalo, and yak. It includes by-products of those live animals (such as fleece). It excludes all equine, reptiles, bees, breeding stock (including eggs to be hatched for breeding stock), companion or comfort animals, pets, and animals raised for hunting or game purposes.

* * * * *

Pullet means a young female chicken that has not laid an egg.

* * * * *

Tree nuts means any of the following tree nuts: Almonds, carob, cashew, chestnuts, coffee, hazel nuts, jojoba, macadamia nuts, pecans, pine nuts, pistachios, and walnuts.

* * * * *

WHIP+ means the Wildfires and Hurricanes Indemnity Program Plus (WHIP+) under part 760, subpart O, of this title.

§ 9.202 [Redesignated as § 9.203]

■ 6. Redesignate § 9.202 as § 9.203.
■ 7. Add new § 9.202 to read as follows:

§ 9.202 Eligibility.

(a) Producers, excluding contract producers, are eligible for payment under § 9.203(a) through (i) if they meet all other requirements for eligibility under this part.

(b) Contract producers are not eligible for payment under § 9.203(a) through (i). Contract producers are eligible for payment under § 9.203(l) if they:

(1) Produced broilers, pullets, layers, chicken eggs, turkeys, hogs, or pigs under a contract in both the 2019 and 2020 calendar years and received revenue under such a contract during the period from January 1, 2020, through December 27, 2020;

(2) Had a loss in eligible revenue for the period from January 1, 2020, through December 27, 2020, as compared to the period from January 1, 2019, through December 27, 2019; and

(3) Meet all other requirements for eligibility under this part.

(c) Contract producers must provide a copy of their contract pursuant to which they raised an eligible commodity as specified in paragraph (b)(1) of this section and provide documentation to

support the information provided on their application if requested by FSA.

■ 8. Amend newly redesignated § 9.203 as follows:

■ a. Revise paragraph (a)(3);

■ b. Add paragraph (a)(4);

■ c. In paragraph (c), remove the words ''producer multiplied'' and add the words ''producer, multiplied'' in their place;

■ d. Revise paragraph (i)(1);

■ e. In paragraph (i)(2), remove the words ''sales as'' and add the words ''sales, without crop insurance indemnities and NAP and WHIP+ payments, as'' in their place;

■ f. In the heading of the first column of Table 2 to paragraph (j), add ''(including crop insurance indemnities and NAP and WHIP+ payments)'' immediately after ''2019 Sales range''; and

■ g. Add paragraph (l).

The additions and revision read as follows:

§ 9.203 Calculation of payments.

(a) * * *

(3) Under paragraph (a) of this section, eligible acres include the producer's share of the determined acres, or reported acres if determined acres are not present, of the crop planted for the 2020 crop year, excluding prevented planted and experimental acres. For producers who insured acres of the crop under a policy or plan of insurance under the Federal Crop Insurance Act (7 U.S.C. 1501–1524), the yield will be the average of the producer's 2020 actual production history (APH) approved yield from all of the producer's insured acres nationwide. For producers for whom FSA is unable to obtain a 2020 APH approved yield, the yield will be:

(i) The 2019 Agriculture Risk Coverage-County Option (ARC–CO) benchmark yield if the applicant:

(A) Has coverage for the crop under an Area Risk Protection Insurance Plan, Margin Protection Plan, Stacked Income Protection Plan, Supplemental Coverage Option, or Whole-Farm Revenue Protection Plan under the Federal Crop Insurance Act;

(B) Is a landlord of the applicable acreage and their share is insured by the tenant under a policy or plan of insurance under the Federal Crop Insurance Act;

(C) Is a tenant of the applicable acreage and their share is insured by the landlord under a policy or plan of insurance under the Federal Crop Insurance Act; or

(D) Is a joint venture and the crop is insured by one of the members under a policy or plan of insurance under the Federal Crop Insurance Act; or

(ii) The 2019 Agriculture Risk Coverage-County Option (ARC–CO) benchmark yield multiplied by 85 percent for all other applicants.

(4) ARC–CO yields in paragraph (a)(3) of this section for producers growing a crop in multiple counties will be weighted based on the producer's crop acreage physically located in each county.

* * * * *

(i)(1) Payments for sales commodities will be equal to the sum of the results for the following calculation for each 2019 sales range in Table 2 of paragraph (j) of this section: The sum of the amount of the producer's eligible sales for the sales commodities in calendar year 2019 and the producer's crop insurance indemnities and NAP and WHIP+ payments for the sales commodities for the 2019 crop year within the specified range, multiplied by the payment rate for that range in Table 2 of paragraph (j) of this section. Eligible sales only includes sales of raw commodities grown by the producer; the portion of sales derived from adding value to the commodity, such as processing and packaging, and from sales of products purchased for resale is not included in the payment calculation unless determined eligible by the Secretary.

* * * * *

(l) For eligible contract producers of broilers, pullets, layers, chicken eggs, turkeys, hogs, or pigs, if eligible revenue for the period from January 1, 2020, through December 27, 2020, decreased compared to eligible revenue for the period from January 1, 2019, through December 27, 2019, then payments will be equal to:

(1) Eligible revenue received from January 1, 2019, through December 27, 2019, minus eligible revenue received from January 1, 2020, through December 27, 2020; multiplied by

(2) 80 percent.

(3) This calculation is subject to the availability of funds and will be factored, if needed.

William Northey,

Under Secretary, U.S. Department of Agriculture.

[FR Doc. 2021–01077 Filed 1–15–21; 8:45 am]

BILLING CODE 3410–05–P

DEPARTMENT OF ENERGY

10 CFR Part 430

[EERE–2020–BT–STD–0001]

RIN 1904–AE86

Energy Conservation Program: Establishment of New Product Classes for Residential Clothes Washers and Consumer Clothes Dryers; Correction

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule; correction.

SUMMARY: On December 16, 2020, the U.S. Department of Energy (''DOE'') published a final rule establishing separate product classes for top-loading consumer clothes washers and consumer clothes dryers that offer cycle times for a normal cycle of less than 30 minutes, and for front-loading residential clothes washers that offer cycle times for a normal cycle of less than 45 minutes. This correction responds to specific comments submitted by the Pacific Gas and Electric Company (''PG&E''), San Diego Gas and Electric (''SDG&E''), and Southern California Edison (''SCE'') in response to DOE's notice of proposed rulemaking (''NOPR''), which were inadvertently omitted from the final rule. DOE has considered the comments and determined that in most instances, these comments raise issues substantially similar to those raised by other commenters that DOE previously considered and addressed in the final rule. To the extent these comments raise issues not explicitly addressed in the preamble of the final rule, DOE determined that the comments submitted by PG&E, SDG&E, and SCE do not alter any of the conclusions reached in support of the final rule and would not have resulted in an outcome different than as set forth in the final rule.

DATES: Effective January 15, 2021.

FOR FURTHER INFORMATION CONTACT: Ms. Kathryn McIntosh, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585. Telephone: (202) 586–2002. Email: *Kathryn.McIntosh@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: DOE published a final rule in the **Federal Register** on December 16, 2020 (the ''December 2020 final rule''), establishing separate product classes for top-loading consumer clothes washers and consumer clothes dryers that offer cycle times for a normal cycle of less

than 30 minutes, and for front-loading residential clothes washers that offer cycle times for a normal cycle of less than 45 minutes. 85 FR 81359. This document responds to comments unintentionally omitted from the final rule.

Correction

DOE received a submission from the Pacific Gas and Electric Company (''PG&E''), San Diego Gas and Electric (''SDG&E''), and Southern California Edison (''SCE'') (collectively referred to as the ''CA IOUs'') in response to the notice of proposed rulemaking to establish separate product classes for consumer clothes washers and consumer clothes dryers, 85 FR 49297 (Aug. 13, 2020). Through an unintentional oversight, DOE did not make specific reference to the CA IOUs comments submitted in response to the notice of proposed rulemaking in the final rule. DOE considered the comments and determined that many of the substantive issues the CA IOUs comment brought to DOE's attention were also raised by the other commenters and addressed by DOE in the final rule.

Like other commenters, CA IOUs opposed the rulemaking and expressed various arguments regarding DOE's determination that cycle time was a performance related feature under the Energy Policy and Conservation Act (''EPCA''), 42 U.S.C. 6295(q), that justified the creation of the new product classes. Like other commenters, the CA IOUs also argued that, if finalized, the product classes would result in illegal backsliding of the applicable energy conservation standards under 42 U.S.C. 6295(o)(1). (No. 0036, pp. 6–8) Commenters, including the CA IOUs, stated that the notice of proposed rulemaking (''NOPR''), 85 FR 68724 (Oct. 30, 2020), failed to provide evidence that the current energy and water conservation standards were precluding the shorter normal cycle products from being made available. (No. 0036, p. 1) Like other commenters, CA IOUs also noted that DOE's data implied that multiple clothes washers on the market already met the proposed requirements for the new product classes while also meeting the current energy and water conservation standards. (No. 0036, at p. 3; see also NEEA, No. 0044, pp. 2–5) Commenters, including the CA IOUs, also challenged DOE's determination regarding the environmental impact of the new product classes and urged DOE to conduct and publicly release the analysis to confirm that the proposed product classes should be granted an A5 Categorical Exclusion under the National Environmental Policy Act (''NEPA'') of 1969. (No. 0036, p. 11) Like other commenters, CA IOUs also opposed establishing the new product classes without accompanying test procedures and standards, explaining that the new product classes introduce potential market uncertainties and distortions. They continue that because cycle time is not a factor recorded in the current test procedure for either product and the NOPR lacked reference to reporting requirements, DOE should delay finalizing the rule until greater clarity is provided. (No. 0036, p. 5)

DOE responded to these concerns in the December 2020 final rule, concluding that cycle time was a performance related feature and that the establishment of the new product classes would not result in a violation of EPCA's anti-backsliding provision, *see* 85 FR 81359, 81362–81368, 81368–81370. DOE maintains that the concerns raised by commenters regarding the overall applicability of EPCA's anti-backsliding provision to clothes washers is too broad and ignores the limitations that EPCA itself places on the scope of the anti-backsliding provision, 42 U.S.C. 6295(o)(1). 85 FR 81369–81370.

DOE responded to those comments discussing the necessity of the new product classes in the final rule. 85 FR 81359, 81365–81366. DOE concluded that even if products with comparable cycle times were already on the market, products under the new product classes would be distinguishable because they are specifically characterized as offering short normal cycles and would be subject to manufacturer testing.

Additionally, DOE stated in the December 2020 final rule that the rulemaking, once finalized, would only establish new product classes, and would not cause adverse environmental impacts, therefore, leaving the rulemaking within the scope of the A5 Categorical Exclusion. 85 FR 81359, 81370.

DOE explained in the final rule that the product class provision under EPCA, 42 U.S.C. 6295(q)(1)(B), does not require the Department to simultaneously establish energy conservation standards in the same rulemaking as the determination of a new product class. The establishment of a new product class is functionally equivalent to the finalization of a coverage determination where a covered product would then exist without an applicable standard until the Department completes a test procedure rulemaking for that product. 42 U.S.C. 6292(b); 85 FR 81359, 81367.

Here, DOE is not acting inconsistently with past practices by establishing the new product classes without accompanying test procedures or standards. Commenters can look to the Department's 2009 beverage vending machines energy conservations standard rulemaking and the 2007 distribution transformer energy conservation standards rulemaking as examples of prior instances where DOE established a new product class without simultaneously prescribing an associated conservation standard. 81 FR 44914, 44920 (Aug. 31, 2009); 72 FR 58190, 58197 (Oct. 12, 2007). See 85 FR 81359, 81367–81368. DOE intends, as these commenters requested, to conduct the necessary rulemakings to consider and evaluate the energy and water consumption limits for the new product classes and determine the applicable standards that provide the maximum energy efficiency that is technologically feasible and economically justified, and will result in a significant conservation of energy, 42 U.S.C. 6295(o)(2)(A). DOE will conduct these rulemakings following EPCA's requirements and the procedures set out in the Process Rule,[1] which will provide the clarity these commenters requested regarding the implementation of this rulemaking. 85 FR 81359, 81368, 81372.

In addition to these shared concerns, the CA IOUs also raised unique comments that DOE addresses in the following paragraphs.

The CA IOUs, in challenging the validity of the short cycle thresholds, noted that DOE tested the 14 consumer clothes dryers for which data was presented according to the Appendix D2 test procedure, which is the optional test procedure for those products. The CA IOUs argued that Appendix D1, which is available for product certification, allows for shorter cycle times while maintaining compliance with the energy efficiency standard according to data produced through DOE-sponsored research at the Oak Ridge National Laboratory. To support their assertion of the unreasonableness of cycle thresholds proposed, CA IOUs continued that this research demonstrated that five products tested under Appendix D1 already offered a cycle time of less than 30 minutes (high temperature setting) while meeting the

[1] Procedures for Use in New or Revised Energy Conservation Standards and Test Procedures for Consumer Products and Commercial/Industrial Equipment (''Process Rule''), 85 FR 8626 (Feb. 14, 2020); Appendix A to Subpart C of Part 430—Procedures, Interpretations and Policies for Consideration of New or Revised Energy Conservation Standards and Test Procedures for Consumer Products and Certain Commercial/Industrial Equipment.

current standard, in addition to the one product that also had a cycle time of 30 minutes (high temperature setting) and met the standard when tested under Appendix D2. The CA IOUs also conducted independent testing, using Appendix D1, that showed there were multiple clothes dryers on the market offering a 30 minute or less cycle time (high temperature setting) that also met the current energy conservation standard. (No. 0036, pp. 3–4) These commenters concluded that based on this data, short cycle time was not a feature justifying a different a standard and the proposed product classes were not warranted for clothes washers and clothes dryers. (No. 0036, p. 5)

DOE testing presented in the NOPR was conducted according to the Appendix D2 methodology because, unlike Appendix D1, it produces a cycle time that is representative of an average use cycle (even though cycle time is not currently recorded in either test procedure). The methodology in Appendix D1 will not allow for the measurement of a cycle time that is representative of average use, because the cycle is interrupted before completion. While cycle time measured using Appendix D1 would be shorter than the cycle time measured under Appendix D2, DOE maintains that this is not an accurate representation of how consumers would use these products.

As DOE explained in the December 2020 final rule, even if clothes washers and clothes dryers with short normal cycle times for were available, the product class provision, 42 U.S.C. 6295(q), would still be appropriately applied in this rulemaking. While there are some products on the market that may complete a cycle within the time thresholds, DOE is establishing these short cycle product classes to facilitate the development of products design to complete a normal cycle within the threshold times and be subject to testing by the manufacturer. DOE notes that the impact of this rulemaking is to establish product classes based on short normal wash or dry cycles, therefore incentivizing manufacturers to develop such products that can meet consumer needs. 85 FR 81359, 81367.

The CA IOUs reliance on the Oak Ridge study, and the CA IOUs own data, are also out of place in the context of this rulemaking because these data were generated using the test method set forth in Appendix D1. As DOE explained in the NOPR, Appendix D1 does not provide data that can be used to determine a ''cycle time'' as experienced by the consumer. This is because Appendix D1 requires manually stopping operation at a specified moisture content, normalizing, and applying a field use factor, therefore, the length of time that a clothes dryer is operated during an Appendix D1 test does not necessarily correspond to the length of time that a consumer would operate the clothes dryers (in contrast to the calculated energy use, which is representative of the energy use experienced by the consumer). 85 FR 49297, 49303. This means that while testing under Appendix D1 may identify products on the market that could dry clothes in 30 minutes, it is not an accurate representation of how consumers would use these products because the cycle is manually stopped at the target remaining moisture content. DOE established these short cycle product classes so that consumers would have access to products that accomplish normal washing or drying within the specified cycle time, not just in control room settings.

The CA IOUs also present their review of 111 products in the Consumer Reports database that showed ''no clear relationship between normal cycle time and consumer satisfaction'' and requested DOE provide evidence of consumer demand. (No. 0036, p. 7) Comments submitted by the Competitive Enterprise Institute (''CEI'') and the 60 Plus Association demonstrated that consumers want and desire these faster products. CEI shared feedback it received from consumers that expressed a need for faster appliances and identified growing consumer dissatisfaction with the current length of cycles. 85 FR 81359, 81366 referencing No. 0031, pp. 2–3. The 60 Plus Association submitted comments, arguing on behalf of its senior citizen members, that the rulemaking offers a significant benefit to individuals looking to make the most of their time. This commenter noted that the time saved by utilizing future, short normal cycle products would make a noticeable difference in the lives of its underrepresented members. 85 FR 81363, referencing No. 0043, p. 1.

The CA IOUs also worried that some manufacturers may easily modify their current products to meet the requirements of the new product classes at the expense of the consumer. (No. 0036, p. 5) While DOE acknowledges these concerns, DOE has no information to support the contention, and does not anticipate that manufacturers would reengineer products already on the market in response to this rulemaking. Further, it remains the consumer's choice ultimately to decide which product on the market that they will choose to purchase. The creation of the new product classes does not set a mandate that consumers must purchase products from these product classes.

DOE thanks the CA IOUs for their comments and directs them to the responses provided in the December 2020 final rule for the shared issues they raised. After considering the unique comments provided by the CA IOUs, DOE affirms the conclusions reached in the December 2020 final rule.

Signing Authority

This document of the Department of Energy was signed on January 11, 2021, by Daniel R. Simmons, Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 12, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

10 CFR Part 431

[EERE–2019–BT–STD–0008]

RIN 1904–AD29

Energy Conservation Program: Energy Conservation Standards for Small Electric Motors

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final determination.

SUMMARY: The Energy Policy and Conservation Act, as amended (''EPCA''), prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including small electric motors (''SEMs''). EPCA also requires the U.S. Department of Energy (''DOE'') to periodically determine whether more-stringent standards would be technologically feasible and

economically justified, and would result in significant conservation of energy. In this final determination, DOE has determined that more stringent SEMs standards would not be cost effective, and thus has determined that standards for SEMs should not be amended.

DATES: The effective date of this final determination is January 19, 2021.

ADDRESSES: The docket for this rulemaking, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at *http://www.regulations.gov.* All documents in the docket are listed in the *http://www.regulations.gov* index. However, not all documents listed in the index may be publicly available, such as information that is exempt from public disclosure.

The docket web page can be found at: *https://www.regulations.gov/docket?D=EERE-2019-BT-STD-0008.* The docket web page contains instructions on how to access all documents, including public comments, in the docket.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Dommu, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Mr. Michael Kido, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 586–8145. Email: *Michael.Kido@hq.doe.gov.*

For further information on how to review the docket, contact the Appliance and Equipment Standards Program staff at (202) 287–1445 or by email: *ApplianceStandardsQuestions@ee.doe.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Synopsis of the Final Determination

Title III, Part C [1] of the Energy Policy and Conservation Act, as amended (''EPCA''),[2] established the Energy Conservation Program for Certain Industrial Equipment, (42 U.S.C. 6311–6317), which includes small electric motors (''SEMs''), the subject of this final determination.

Pursuant to the EPCA requirement that not later than 6 years after issuance of any final rule establishing or amending an energy conservation standard for covered equipment, DOE must publish either a notice of determination that standards for the equipment do not need to be amended, or a notice of proposed rulemaking (''NOPR'') including new proposed energy conservation standards. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m))

DOE analyzed the SEMs currently subject to the standards found at title 10 of the Code of Federal Regulations (''CFR'') part 431. See 10 CFR 431.446. Of these motors, DOE first analyzed the technological feasibility of more efficient SEMs. For currently available SEMs with efficiencies exceeding the levels of the current energy conservation standards, DOE determined that more stringent standards would be technologically feasible. For these SEMs, DOE evaluated whether more stringent standards would also be cost effective by conducting preliminary life-cycle cost (''LCC'') and payback period (''PBP'') analyses.

Based on these analyses, as summarized in section V of this document, DOE has determined that more stringent energy conservation standards would not be cost effective. Therefore, DOE has determined that the current standards for SEMs do not need to be amended.

II. Introduction

The following section briefly discusses the statutory authority underlying this final determination, as well as some of the relevant historical background related to the establishment of standards for SEMs.

A. Authority and Background

EPCA authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. Title III, Part C of EPCA includes the small electric motors that are the subject of this final determination. (42 U.S.C. 6311(13)(G)) As discussed in the following paragraphs, EPCA directed DOE to establish test procedures and prescribe energy conservation standards for SEMs. (42 U.S.C. 6317(b))

The energy conservation program under EPCA consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of the Act specifically include definitions (42 U.S.C. 6311), energy conservation standards (42 U.S.C. 6313), test procedures (42 U.S.C. 6314), labeling provisions (42 U.S.C. 6315), and the authority to require information and

[1] For editorial reasons, upon codification in the U.S. Code, Part C was re-designated Part A–1.

[2] All references to EPCA in this document refer to the statute as amended through America's Water Infrastructure Act of 2018, Public Law 115–270 (October 23, 2018).

reports from manufacturers (42 U.S.C. 6316).

EPCA directed DOE to establish a test procedure for those SEMs for which DOE determined that energy conservation standards would (1) be technologically feasible and economically justified and (2) result in significant energy savings. (42 U.S.C. 6317(b)(1)) Manufacturers of covered equipment must use the Federal test procedures as the basis for: (1) Certifying to DOE that their equipment complies with the applicable energy conservation standards adopted pursuant to EPCA (42 U.S.C. 6316(a); 42 U.S.C. 6295(s)), and (2) making representations about the efficiency of that equipment (42 U.S.C. 6314(d)). The DOE test procedures for SEMs appear at 10 CFR part 431, subpart X.

EPCA further directed DOE to prescribe energy conservation standards for those SEMs for which test procedures were established. (42 U.S.C. 6317(b)(2)) Additionally, EPCA prescribed that any such standards shall not apply to any SEM which is a component of a covered product under 42 U.S.C. 6292(a) or covered equipment under 42 U.S.C. 6311 of EPCA. (42 U.S.C. 6317(b)(3)) Federal energy efficiency requirements for covered equipment established under EPCA generally supersede State laws and regulations concerning energy conservation testing, labeling, and standards. (See 42 U.S.C. 6316(a) and (b); 42 U.S.C. 6297(a)–(c)).

EPCA requires that, not later than 6 years after the issuance of any final rule establishing or amending a standard, DOE evaluate the energy conservation standards for each type of covered equipment, including those at issue here, and publish either a notice of determination that the standards do not need to be amended, or a NOPR that includes new proposed energy conservation standards (proceeding to a final rule, as appropriate). (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)). EPCA further provides that, not later than 3 years after the issuance of a final determination not to amend standards, DOE must make a new determination not to amend the standards or issue a NOPR including new proposed energy conservation standards. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(3)(B)) DOE must make the analysis on which a determination is based publicly available and provide an opportunity for written comment. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(2))

In making a determination that the standards do not need to be amended, DOE must evaluate under the criteria of 42 U.S.C. 6295(n)(2) whether amended standards (1) will result in significant conservation of energy, (2) are technologically feasible, and (3) are cost effective as described under 42 U.S.C. 6295(o)(2)(B)(i)(II). (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A) and 42 U.S.C. 6295(n)(2)) Under 42 U.S.C. 6295(o)(2)(B)(i)(II), an evaluation of cost effectiveness requires DOE to consider savings in operating costs throughout the estimated average life of the covered product in the type (or class) compared to any increase in the price of, or in the initial charges for, or maintenance expenses of, the covered products which are likely to result from the imposition of the standard.

DOE is publishing this document in accordance with its authority under EPCA, and in satisfaction of its statutory requirement under EPCA.

1. Current Standards

The current energy conservation standards for SEMs are located in title 10 CFR 431.446, and are presented in Table II–1 and Table II–2.

TABLE II–1—FEDERAL ENERGY CONSERVATION STANDARDS FOR POLYPHASE SMALL ELECTRIC MOTORS

Motor horsepower/ standard kilowatt equivalent	Average full load efficiency		
	Open motors (number of poles)		
	6	4	2
0.25/0.18	67.5	69.5	65.6
0.33/0.25	71.4	73.4	69.5
0.5/0.37	75.3	78.2	73.4
0.75/0.55	81.7	81.1	76.8
1/0.75	82.5	83.5	77.0
1.5/1.1	83.8	86.5	84.0
2/1.5	N/A	86.5	85.5
3/2.2	N/A	86.9	85.5

TABLE II–2—FEDERAL ENERGY CONSERVATION STANDARDS FOR CAPACITOR-START INDUCTION-RUN AND CAPACITOR-START CAPACITOR-RUN SMALL ELECTRIC MOTORS

Motor horsepower/ standard kilowatt equivalent	Average full load efficiency		
	Open motors (number of poles)		
	6	4	2
0.25/0.18	62.2	68.5	66.6
0.33/0.25	66.6	72.4	70.5
0.5/0.37	76.2	76.2	72.4
0.75/0.55	80.2	81.8	76.2
1/0.75	81.1	82.6	80.4
1.5/1.1	N/A	83.8	81.5
2/1.5	N/A	84.5	82.9
3/2.2	N/A	N/A	84.1

2. History of Standards Rulemakings for Small Electric Motors

In 2006, DOE determined that energy conservation standards for certain single-phase, capacitor-start, induction-run, SEMs are technologically feasible and economically justified, and would result in significant energy savings. 71 FR 38799 (July 10, 2006). Later, in 2010, DOE issued a final rule (the ''March 2010 Final Rule'') establishing energy conservation standards for SEMs manufactured starting on March 9, 2015.[3] 75 FR 10874 (March 9, 2010).

In April 2019, DOE published a request for information (''April 2019 ECS RFI'') to solicit input and data from interested parties to aid in the development of the technical analyses for the determination of whether new and/or amended standards for SEMs are warranted. 84 FR 14027 (April 9, 2019). The comment period was re-opened in response to a request from an interested party, see NEMA, No. 4 at p. 1, until June 7, 2019. See 84 FR 25203 (May 31, 2019).

In April 2020, DOE published a notice of proposed determination (''April 2020 NOPD'') with the tentative determination that energy conservation standards for SEMs do not need to be amended. 85 FR 24146 (April 30, 2020). The comment period for this notice closed on June 29, 2020. On September 18, 2020, DOE published a notification of webinar public meeting and a limited reopening of the comment period (''September 2020 Notice''), which extended the comment period to October 20, 2020. 85 FR 58299. On October 6, 2020, DOE held a webinar to present the results from the April 2020 NOPD.

DOE received nine relevant comments from interested parties in response to the April 2020 NOPD and the September 2020 Notice. These comments are listed in Table II–3.[4] NEMA and CA IOUs each had two separate comment submissions: One in response to the April 2020 NOPD and another as a follow up to the September 2020 Notice.

TABLE II–3—APRIL 2020 NOPD AND SEPTEMBER 2020 NOTICE WRITTEN COMMENTS

Commenter/organization(s)	Reference in this NOPD	Organization type
Air-Conditioning, Heating, and Refrigeration Institute (''AHRI'') and Association of Home Appliance Manufacturers (''AHAM'').	AHRI and AHAM	Trade Associations.
Appliance Standards Awareness Project (''ASAP''), Alliance to Save Energy, American Council for an Energy-Efficient Economy, the California Energy Commission, and Northwest Energy Efficiency Alliance.	ASAP, et al	Advocacy Groups and State Governmental Agency.
California Investor-Owned Utilities (''CA IOUs'')—Pacific Gas and Electric Company, San Diego Gas and Electric, and Southern California Edison.	CA IOUs	Utilities.
General Electric Appliances (''GEA'')	GEA	Manufacturer.
Lennox International Inc	Lennox	Manufacturer.
National Electrical Manufacturers Association (''NEMA'')	NEMA	Trade Association.

DOE also notes that NEMA submitted a comment related to certification, compliance and enforcement issues, but this comment fell outside the scope of this rulemaking and is not addressed in this document. Additionally, DOE received a comment from an individual commenter (Tyler Crosby) who noted the potential impact of small electric motors standards to increase the number electric bicycle users—an outcome that the commenter supported. While DOE appreciates this feedback, it also falls outside of the specific issues raised in the NOPD. The remaining relevant comments and DOE's responses are provided in the appropriate sections of this document.

III. General Discussion

A. Scope of Coverage and Equipment Classes

This document covers equipment meeting the definition of ''small electric motor,'' as codified in 10 CFR 431.442 and consistent with the statutory definition set by Congress for this term. ''Small electric motor'' means a ''NEMA general purpose alternating current single-speed induction motor, built in a two-digit frame number series in accordance with NEMA Standards Publication MG1–1987, including IEC metric equivalent motors.'' 10 CFR 431.442.[5] The scope of coverage for these motors is discussed in further detail in section IV.A.1 of this document.

When evaluating and establishing energy conservation standards, DOE divides covered equipment into equipment classes by the type of energy used, or by capacity or other performance-related features that justify a different standard. (42 U.S.C. 6316(a); 42 U.S.C. 6295(q)) In determining whether capacity or another performance-related feature justifies a different standard, DOE must consider such factors as the utility of the feature to the consumer and other factors DOE deems appropriate. (*Id.*) The equipment classes for this final determination are discussed further in section IV.A.2 of this document.

B. Test Procedure

As noted, EPCA directed DOE to establish a test procedure for those SEMs for which DOE determined that energy conservation standards would (1) be technologically feasible and economically justified and (2) result in significant energy savings. (42 U.S.C. 6317(b)(1))

In April 2019, DOE proposed amending its test procedure for SEMs (''April 2019 NOPR''). 84 FR 17004 (April 23, 2019). In the April 2019 NOPR, DOE proposed to harmonize its procedure with industry practice by incorporating a new industry standard that manufacturers would be permitted to use in addition to the three industry standards currently incorporated by reference as options for use when testing SEM efficiency. 84 FR 17004, 17012–17014. The proposed industry standards from the Institute of Electrical

[3] In a technical correction, DOE revised the compliance date for energy conservation standards to March 9, 2015, for each small electric motor manufactured (alone or as a component of another piece of non-covered equipment), or March 9, 2017, in the case of a small electric motor which requires listing or certification by a nationally recognized safety testing laboratory. 75 FR 17036 (April 5, 2010).

[4] DOE received two comments unrelated to the issues raised by the Notice of Proposed Determination (See Crosby, No. 30 and Crosby, No. 31).

[5] The term ''IEC'' refers to the International Electrotechnical Commission.

and Electronics Engineers (''IEEE''), Canadian Standards Association (''CSA''), and the International Electrotechnical Commission (''IEC'') are listed in Table III–1. In addition, DOE proposed to adopt industry provisions related to the test conditions used to ensure the comparability of test results for SEMs. 84 FR 17004, 17014–17018.

TABLE III–1—APRIL 2019 NOPR PROPOSED INDUSTRY STANDARDS FOR SMALL ELECTRIC MOTORS

Equipment description	Industry test procedure
Single-phase small electric motors	IEEE 114–2010. CSA C747–09. IEC 60034–2–1:2014 Method 2–1–1A.
Polyphase small electric motors less than or equal to 1 horsepower	IEEE 112–2017 Test Method A. CSA C747–09. IEC 60034–2–1:2014 Method 2–1–1A.
Polyphase small electric motors greater than 1 horsepower	IEEE 112–2017 Test Method B. CSA C390–10. IEC 60034–2–1:2014 Method 2–1–1B.

C. Technological Feasibility

1. General

In evaluating potential amendments to energy conservation standards, DOE conducts a screening analysis based on information gathered on all current technology options and prototype designs that could improve the efficiency of the product or equipment at issue. As the first step in such an analysis, DOE develops a list of technology options for consideration in consultation with manufacturers, design engineers, and other interested parties. DOE then determines which of those means for improving efficiency are technologically feasible. DOE considers technologies incorporated in commercially available equipment or in working prototypes to be technologically feasible. See 10 CFR part 430, subpart C, appendix A, sections 6(c)(3)(i) and 7(b)(1); 10 CFR 431.4.

After DOE has determined that particular options are technologically feasible, it further evaluates each technology option in light of the following additional screening criteria: (1) Practicability to manufacture, install, and service; (2) adverse impacts on equipment utility or availability; (3) adverse impacts on health or safety; and (4) unique-pathway proprietary technologies. 10 CFR part 430, subpart C, appendix A, sections 6(c)(3)(ii)–(v) and 7(b)(2)–(5); 10 CFR 431.4.

Section IV.B of this final determination discusses the results of the screening analysis for SEMs, particularly the designs DOE considered, those it screened out, and those that are the basis for the final determination. In this final determination, based on its review of the market and comments received in response to the April 2020 NOPD and September 2020 Notice, DOE has determined that no significant technical advancements in induction motor technology within the scope of SEMs have been made since publication of the March 2010 Final Rule.

2. Maximum Technologically Feasible Levels

When DOE evaluates the potential for new or amended standards, DOE must determine the maximum improvement in energy efficiency or maximum reduction in energy use that is technologically feasible for such equipment. (42 U.S.C. 6316(a); 42 U.S.C. 6295(p)(1)) Accordingly, in the engineering analysis, DOE determined the maximum technologically feasible (''max tech'') improvements in energy efficiency for SEMs using the design parameters for the most efficient equipment available on the market or in working prototypes. The max-tech levels that DOE has determined are described in section IV.C of this final determination.

D. Significance of Energy Savings

In determining whether to amend the current energy conservation standards for SEMs, DOE must assess whether amended standards will result in significant conservation of energy. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A). See also 42 U.S.C. 6295(n)(2).) While the term ''significant'' is not defined in EPCA, DOE has established a significance threshold for energy savings. See 10 CFR part 430, subpart C, appendix A, section 6(b); 10 CFR 431.4. In evaluating the significance of energy savings, DOE conducts a two-step approach that considers both an absolute site energy savings threshold and a threshold that is percent reduction in the covered equipment energy use. *Id.* DOE first evaluates the projected energy savings from a potential maximum technologically feasible (''max-tech'') standard over a 30-year period against a 0.3 quads of site energy threshold. 10 CFR 431.4; 10 CFR part 430, subpart C, appendix A, section 6(b)(2). If the 0.3 quad-threshold is not met, DOE then compares the max-tech savings to the total energy usage of the covered equipment to calculate a percentage reduction in energy usage. 10 CFR 431.4; 10 CFR part 430, subpart C, appendix A, section 6(b)(3). If this comparison does not yield a reduction in site energy use of at least 10 percent over a 30-year period, the analysis ends and DOE proposes that no significant energy savings would likely result from setting new or amended standards. 10 CFR 431.4; 10 CFR part 430, subpart C, appendix A, section 6(b)(3). The two-step approach allows DOE to ascertain whether a potential standard satisfies EPCA's significant energy savings requirements in EPCA to ensure that DOE avoids setting a standard that ''will not result in significant conservation of energy.''

EPCA defines ''energy efficiency'' as the ratio of the useful output of services from an article of industrial equipment to the energy use of such article, measured according to the Federal test procedures. (42 U.S.C. 6311(3)) EPCA defines ''energy use'' as the quantity of energy directly consumed by an article of industrial equipment at the point of use, as measured by the Federal test procedures. (42 U.S.C. 6311(4))

As discussed in section V.B of this document, DOE has determined that amended standards would not satisfy the cost-effectiveness criterion as required by EPCA when determining whether to amend its standards for a given covered product or equipment. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A) and 42 U.S.C. 6295(n)(2)(C)) See also sections IV.F and V.B (discussing in greater detail DOE's analysis of the available data in reaching this determination). Consequently, DOE did not separately determine whether

the potential energy savings would be significant for the purpose of 42 U.S.C. 6295(n)(2).

E. Cost Effectiveness

In making a determination of whether amended energy conservation standards are needed, EPCA requires DOE to consider the cost effectiveness of amended standards in the context of the savings in operating costs throughout the estimated average life of the covered equipment class compared to any increase in the price of, or in the initial charges for, or maintenance expenses of, the covered equipment that are likely to result from a standard. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A); 42 U.S.C. 6295(n)(2))

In determining cost effectiveness, DOE conducted LCC and PBP analyses that estimate the costs and benefits to users from standards. The LCC is the sum of the initial price of equipment (including its installation) and the operating expense (including energy, maintenance, and repair expenditures) discounted over the lifetime of the equipment. The LCC analysis requires a variety of inputs, such as equipment prices, equipment energy consumption, energy prices, maintenance and repair costs, equipment lifetime, and discount rates appropriate for consumers. To account for uncertainty and variability in specific inputs, such as equipment lifetime and discount rate, DOE uses a distribution of values, with probabilities attached to each value.

The PBP is the estimated amount of time (in years) it takes consumers to recover the increased purchase cost (including installation) of more-efficient equipment through lower operating costs. DOE calculates the PBP by dividing the change in purchase cost due to a more-stringent standard by the change in annual operating cost for the year that standards are assumed to take effect.

For its LCC and PBP analyses, DOE assumes that consumers would purchase the covered equipment in the first year of compliance with any amended standards. The LCC savings for the considered efficiency levels are calculated relative to the case that reflects projected market trends in the absence of amended standards. DOE's LCC and PBP analysis is discussed in further detail in section IV.F of this final determination.

IV. Methodology and Discussion of Related Comments

This section addresses the analyses DOE performed for this final determination regarding SEMs. Separate subsections address each component of DOE's analyses and responses to related comments. DOE used a spreadsheet tool that calculates the LCC savings and PBP of potential energy conservation standards. This spreadsheet tool is available on the website: *https://www.regulations.gov/docket?EERE-2019-BT-STD-0008.*

Lennox supported DOE's proposed determination not to amend energy conservation standards for SEMs. (Lennox, No. 21 at p. 1) NEMA concurred with DOE that it is not cost effective to increase the stringency of SEM energy conservation standards. (NEMA, No. 22 at p. 5; NEMA, No. 32 at p. 2–3) CA IOUs also concurred with DOE that there is limited opportunity for additional energy efficiency in the current scope of regulation for SEMs. (CA IOUs, No. 24 at p. 2; CA IOUs, No. 33 at p. 2) As discussed previously, based on the analyses summarized in section V of this document, DOE has determined that more stringent energy conservation standards would not be cost effective. Therefore, DOE has determined that the current standards for SEMs do not need to be amended under the relevant criteria in 42 U.S.C. 6295(m)(1)(A) and 42 U.S.C. 6295(n)(2). See also 42 U.S.C. 6316(a) (applying 42 U.S.C. 6295(m) and 42 U.S.C. 6295(n) to small electric motors).

A. Market and Technology Assessment

DOE has conducted a market and technology assessment in support of the final determination for SEMs. DOE develops information in the market and technology assessment that provides an overall picture of the market for the equipment concerned, including the purpose of the equipment, the industry structure, manufacturers, market characteristics, and technologies used in the equipment. This activity includes both quantitative and qualitative assessments, based primarily on publicly available information. The subjects addressed in the market and technology assessment for this final determination include (1) a determination of the scope and equipment classes, (2) manufacturers and industry structure, (3) existing efficiency programs, (4) shipments information, (5) market and industry trends, and (6) technologies or design options that could improve the energy efficiency of SEMs. The key findings of DOE's market assessment are summarized in the following sections. See chapter 3 of the final determination technical support document (''TSD'') for further discussion of the market and technology assessment.

1. Scope of Coverage

By statute, a ''small electric motor'' is ''a NEMA general purpose alternating-current single-speed induction motor, built in a two-digit frame number series in accordance with NEMA Standards Publication MG 1–1987.'' (42 U.S.C. 6311(13)(G)) DOE later clarified by regulation that this definition also includes IEC metric equivalent motors—*i.e.,* those motors that otherwise satisfy the statutory definition of ''small electric motor'' but that happen to be built in accordance with metric units. See 10 CFR 431.442. Equipment meeting this definition are within DOE's scope of coverage but not all may be subject to DOE's current standards.

DOE's standards regulate the energy efficiency of those SEMs that fall within three topologies (*i.e.,* arrangements of component parts): Capacitor-start induction-run (''CSIR''), capacitor-start capacitor-run (''CSCR''), and polyphase motors. See 10 CFR 431.446. EPCA prescribes that standards for SEMs do not apply to any SEM which is a component of a covered product or covered equipment under EPCA. (42 U.S.C. 6317(b)(3)) DOE's current energy conservation standards only apply to SEMs manufactured alone or as a component of another piece of non-covered equipment. 10 CFR 431.446(a).

Subpart X of part 431 includes energy conservation standards and test procedures for the SEMs listed in Table IV–1. In the April 2020 NOPD, DOE did not propose any changes to the scope of SEMs subject to energy conservation standards (*i.e.,* ''scope of applicability'').

TABLE IV–1—SMALL ELECTRIC MOTORS CURRENTLY SUBJECT TO ENERGY CONSERVATION STANDARDS

[Manufactured alone or as a component of another piece of non-covered equipment]

Motor topology	Pole configuration	Motor output power
Single-phase:		
CSIR	2, 4, 6	0.25–3 hp. (0.18–2.2 kW).*

TABLE IV–1—SMALL ELECTRIC MOTORS CURRENTLY SUBJECT TO ENERGY CONSERVATION STANDARDS—Continued

[Manufactured alone or as a component of another piece of non-covered equipment]

Motor topology	Pole configuration	Motor output power
CSCR	2, 4, 6	0.25–3 hp. (0.18–2.2 kW).
Polyphase	2, 4, 6	0.25–3 hp. (0.18–2.2 kW).

Certain motor categories are not currently subject to standards. These include:
- Polyphase, 6-pole, 2 and 3 hp motors;
- CSCR and CSIR, 6-pole, 1.5, 2, and 3 hp motors;
- CSCR and CSIR, 4-pole, 3 hp motors.

* The values in parentheses are the equivalent metric ratings.

In response to the April 2020 NOPD and September 2020 Notice, DOE received a number of comments relevant to the scope of applicability of energy conservation standards for SEMs. Lennox, AHRI and AHAM supported maintaining the existing standards scope for SEMs. (Lennox, No. 21 at p. 2; AHRI and AHAM, No. 25 at p. 2) In addition, NEMA stated that motor efficiency has reached its peak of practicality, and that system efficiency in applications must be the focus. NEMA commented in support of DOE's efforts investigating or already establishing Extended Product Rulemakings (*e.g.,* pumps) which set a system efficiency, rather than continue to focus on components (*i.e,.* the motor). (NEMA, No. 32 at p. 2)

The Efficiency Advocates asserted that given DOE's mandate to carry out the energy conservation purposes of the Energy Policy and Conservation Act, DOE must consider expanding the scope of its motor standards, either in this docket or the electric motors docket. (Efficiency Advocates, No. 23 at p. 2) Similarly, the CA IOUs commented that there is limited opportunity for additional energy efficiency gains in the current scope of regulation for SEMs and added that the industry technical standards on which the current SEM definition is based—NEMA MG1–1987—is no longer representative of the market. (CA IOUs, No. 24 at p. 2; No. 33 at p. 2)

In the view of the CA IOUs, DOE should expand the scope of the SEM rulemaking to consider advances in motor technology and incorporate brushless direct current (DC) and synchronous permanent magnet AC (''PMAC'') motors, irrespective of the limits already defined by Congress. See 42 U.S.C. 6311(13)(G) (defining the term ''small electric motor'') and 10 CFR 431.442 (incorporating motors meeting the statutory definition that are built in metric units). The CA IOUs provided an analysis and market data and technical information as to the energy savings potential, cost, and technical feasibility of brushless DC motors such as electronically commutated motors (''ECMs'') and PMAC motors compared to other available motor technologies such as permanent-split capacitor (''PSC'') motors. The CA IOUs further commented that motor consumers and regulators in other markets are already considering advanced motor technologies as substitutes for SEMs within the current scope of DOE's energy conservation standards. (CA IOUs, No. 24 at p. 2–7; No. 33 at p. 2–8)

In addition, the CA IOUs recommended that DOE consider expanding the definition of SEMs beyond the ''general purpose motor'' definition included in NEMA MG1–1987 (and as specified in the statute) to include additional motors used in general purpose applications such as split-phase, shaded pole, and PSC motors. In cases where the application requirements rely on part-load operation, the CA IOUs recommended that these motors be compared in a technology-neutral manner against other motor designs optimized for part load operation (*i.e.,* brushless DC, synchronous PMAC/Q-Sync). (CA IOUs, No. 24 at p. 7; No. 33 at p. 8–9)

Regarding the potential coverage of ECMs, NEMA commented that ECMs were not squirrel cage induction motors but instead are permanent magnet synchronous motors with electronic controls/drives integral to the machine and were not included in the scope of SEMs (NEMA, No. 32 at p. 2).[6] In addition, NEMA commented that ECMs tend to be more expensive than single-speed SEMs, and typically installed as components in appliances that DOE already regulates. In these instances, strict energy efficiency requirements on those appliances and the use of better motor controls outweigh the increased expense of using ECMs. NEMA added that making ECMs more efficient would not make regulated appliances more efficient because of component efficiency tradeoffs in satisfying efficiency requirements and protections from double-regulation. (NEMA, No. 32 at p. 2–3) NEMA commented that bringing ECMs into scope could have significant impacts on Original Equipment Manufacturers (''OEMs''). NEMA added that ECMs are not drop-in fit replacements for SEMs and that DOE has not sufficiently examined the downstream impacts of adding such motors in scope on OEMs. (NEMA, No. 32 at p. 2) Regarding PMAC/Q-sync designs, NEMA noted that such PMAC/Q-sync motors did not meet NEMA MG–1–1987 torque requirements and were not effective substitutes for SEMs, as indicated by their small market share. (NEMA, No. 32 at p. 3)

As previously stated in section III.A, this document pertains only to equipment meeting the definition of small electric motor, as codified in 10 CFR 431.442, which includes general purpose single speed induction motors. *See* 42 U.S.C. 6311(13)(G) and 10 CFR 431.442. Single-speed induction motors, as delineated and described in MG1–1987, fall into five categories: Split-phase, shaded-pole, capacitor-start (both CSIR and CSCR), PSC, and polyphase. Of these five motor categories, DOE determined in the March 2010 Final Rule that only CSIR, CSCR, and polyphase motors were able to meet the relevant performance requirements in NEMA MG1–1987 and fell within the general purpose alternating current motor category, as indicated by the listings found in manufacturers' catalogs. 75 FR 10874, 10882–10883. Therefore, for this determination, DOE only considered the regulated SEMs currently subject to energy conservation standards.[7]

[6] DOE notes that the definition of a SEM only includes single speed induction motors.

[7] DOE also notes that were it to determine that expansion of the scope is warranted and permissible, it would first need to establish test methods for any such motors. See 10 CFR 431.4; 10 CFR part 430 subpart C appendix A section 8(d). Nothing DOE has reviewed—or that commenters have submitted—suggests that the existing test procedures for SEM are appropriate for motors that fall outside of the already prescribed small electric motor scope set by Congress and the definition of

Continued

AHAM and AHRI referenced the statutory exemption regarding the application of energy conservation standards for SEMs that are components of covered products (42 U.S.C. 6317(b)(3)) and requested that DOE interpret the exemption to apply to all SEMs destined for or used in covered products or equipment. (AHAM and AHRI, No. 25 at p. 4) Lennox commented that it opposes regulating components used in products and equipment already regulated by DOE, instead it supports a finished-product approach to energy efficiency regulation. (Lennox, No. 21 at p. 2) GEA commented that any regulation of individual components in products whose energy consumption is regulated on a product level will provide little to no energy savings for consumers, will disrupt the complex balance of component selection and design, and will likely increase cost for consumers for no benefit to consumers. (GEA, No. 26 at p. 2) NEMA commented that because SEMs are always used as a component in larger product systems that consume electricity, there already exist dozens of appliance- and device-level regulations that address energy consumption of those end-use products. NEMA suggested examining and measuring energy savings at the end-use device makes the most sense, as system dynamics can vary for designs within each product class and from class to class. (NEMA, No. 22 at p. 2)

As noted, EPCA directs DOE to establish test procedures and energy conservation standards for SEMs, see 42 U.S.C. 6317(b), both of which DOE has already done. EPCA further provides that standards shall not apply to any SEM which is a component of a covered product or covered equipment. (42 U.S.C. 6317(b)(3)) DOE has evaluated the scope of the SEM standards in this final determination in accordance with EPCA.

2. Equipment Classes

When evaluating and establishing energy conservation standards, DOE divides covered equipment into equipment classes by the type of energy used, or by capacity or other performance-related features that justify a different standard. (42 U.S.C. 6316(a); 42 U.S.C. 6295(q)) In determining whether capacity or another performance-related feature justifies a different standard, DOE must consider such factors as the utility of the feature to the consumer and other factors DOE deems appropriate. (*Id.*) For the April 2020 NOPD, DOE assessed the 62 equipment classes currently established based on phase count (*i.e.,* single-phase versus polyphase), topology of single-phase motors, number of poles, and horsepower. This section reviews the motor characteristics used to delineate equipment classes for SEMs.

The first characteristic used to establish equipment classes is phase count. Polyphase and single-phase equipment classes are used to differentiate motors based on the fundamental differences in how the two types of motors operate. 10 CFR 431.446(a). For a rotor to move, the stator (*i.e.,* the stationary part of the motor) must produce a rotating magnetic field. To operate on single-phase alternating current (''AC'') power, the single-phase motor uses an auxiliary winding (or start winding) with current and voltage out of phase with the original (main) winding to produce a net rotating magnetic field. To operate on three-phase power, the polyphase motor uses windings arranged such that when supplied by three-phase alternating current, a rotating magnetic field is produced. In short, three-phase power in a polyphase motor naturally produces rotation, whereas a single-phase motor requires the auxiliary winding to ''engineer'' the conditions for rotation. Due to these differences, polyphase motors are inherently more efficient but require use of a three-phase power source. Based on the differences in efficiency and consumer utility, DOE separated equipment classes based on phase count in the March 2010 Final Rule. 75 FR 10874, 10886. DOE relied on the same approach for the proposed determination. See 85 FR 24146, 24153.

In addition to differentiating equipment classes by phase count, equipment classes are differentiated by the topology of single-phase motors. 10 CFR 431.446(a). DOE identified two topologies of single-phase motors meeting the statutory definition of SEMs: CSIR and CSCR. CSIR and CSCR motors both utilize a capacitor (''start-capacitor'') and two windings (''start-winding'' and ''run-winding''). The difference between the two motors occurs when reaching operating speed; while CSIR motors run on the run-winding alone with no capacitor, CSCR motors run using an additional ''run-capacitor'' and both windings. While this additional capacitor can boost CSCR motor efficiency to levels higher than those exhibited by CSIR motor designs, it usually constitutes dimensional changes due to the need to mount the run-capacitor externally on the motor housing. This additional spatial requirement could potentially limit the use of CSCR motors in space-constrained applications, and would cause motor topology to directly impact consumer utility. Given that motor topology can affect motor performance and consumer utility, DOE differentiated single-phase equipment classes by topology in the March 2010 Final Rule. 75 FR 10886. DOE proposed to use the same approach in the April 2020 NOPD. See 85 FR 24146, 24153.

The current energy conservation standards also differentiate classes based on the number of poles in a motor. 10 CFR 431.446(a). The number of poles in an induction motor determines the synchronous speed (*i.e.,* revolutions per minute). There is an inverse relationship between the number of poles and speed: As a motor design increases from two to eight poles, the synchronous speed drops from 3,600 to 900 revolutions per minute. The desired synchronous speed varies by end use application, making the number of poles in a motor a factor directly impacting consumer utility. By examining the efficiency ratings for 1–200 horsepower polyphase electric motors (10 CFR 431.25),[8] motors meeting the NEMA Premium Motor standard, and manufacturer catalogs, DOE observed that full-load efficiency percentages tend to decrease with the number of poles. Therefore, DOE determined that the number of poles has a direct impact on the motor's performance and consumer utility, and consequently, the number of poles is a further means of differentiating among equipment classes. 75 FR 10886. DOE relied on the same approach for the proposed determination. See 85 FR 24146, 24153.

Finally, DOE employs motor horsepower as an equipment class setting factor under the current energy conservation standards. 10 CFR 431.446(a). Average full load efficiency generally correlates with motor horsepower (*e.g.,* a 3-horsepower motor is usually more efficient than a ¼-horsepower motor). DOE found that motor efficiency varies with motor horsepower by evaluating manufacturers' catalog data, the efficiency ratings of the established SEM energy conservation standards (10 CFR 431.446), and the efficiency

small electric motor. Comments related to the scope of applicability of the DOE test procedure for small electric motors were discussed as part of DOE's test procedure NOPR. 84 FR 17004, 17009 (April 23, 2019).

[8] While there is no overlap between the scope of applicability for electric motor standards at 10 CFR 431.25 and small electric motors standards at 10 CFR 431.446, the pole-efficiency relationships observed in the electric motor standards from 1 to 3 horsepower can be considered when determining appropriate pole-efficiency relationships for small electric motors in this horsepower range.

requirements of the NEMA Premium Motor program. Additionally, motor horsepower dictates the maximum load that a motor can drive, which means that a motor's rated horsepower can influence and limit the end use applications where that motor can be used. Horsepower is a critical performance attribute of a small electric motor, and since horsepower has a direct relationship with average full load efficiency and consumer utility, DOE used this element as a criterion for distinguishing among equipment classes in the March 2010 Final Rule. 75 FR 10886. DOE relied on the same approach for the proposed determination. See 85 FR 24146, 24153.

DOE did not receive any comments on the current structure of the equipment classes as assessed in the April 2020 NOPD. Accordingly, in this final determination DOE continues to assess the SEM equipment classes as currently established. Table IV–2 summarizes the structure of the equipment classes identified for this final determination and as designated by the current standards at 10 CFR 431.446.

TABLE IV–2—SUMMARY OF SMALL ELECTRIC MOTOR EQUIPMENT CLASSES

Motor topology	Pole configuration	Motor output power *hp*
Single-phase:		
CSIR	2, 4, 6	0.25–3
CSCR	2, 4, 6	0.25–3
Polyphase	2, 4, 6	0.25–3

See chapter 3 of the final determination TSD for further discussion of the equipment classes.

3. Technology Options for Efficiency Improvement

The purpose of the technology assessment is to develop a list of technology options that could improve the efficiency of SEMs. For the motors covered in this determination, energy efficiency losses are grouped into four main categories: I^2R losses,[9] core losses, friction and windage losses, and stray load losses. The technology options considered in this section are categorized by these four categories of losses.

The SEMs evaluated in this determination are all AC induction motors. Induction motors have two core components: A stator and a rotor. The components work together to convert electrical energy into rotational mechanical energy. This is done by creating a rotating magnetic field in the stator, which induces a current flow in the rotor. This current flow creates an opposing magnetic field in the rotor, which creates rotational forces. Because of the orientation of these fields, the rotor field follows the stator field. The rotor is connected to a shaft that also rotates and provides the mechanical energy output.

Table IV–3 summarizes the technology options identified in the April 2020 NOPD.

TABLE IV–3—SUMMARY OF TECHNOLOGY OPTIONS FOR IMPROVING EFFICIENCY

Type of loss to reduce	Technology option applied
I^2R Losses	Use a copper die-cast rotor cage.
	Reduce skew on conductor cage.
	Increase cross-sectional area of rotor conductor bars.
	Increase end ring size.
	Changing gauges of copper wire in stator.
	Manipulate stator slot size.
	Decrease radial air gap.
	Change run-capacitor rating.
Core Losses	Improve grades of electrical steel.
	Use thinner steel laminations.
	Anneal steel laminations.
	Add stack height (*i.e.,* add electrical steel laminations).
	Use high-efficiency lamination materials.
	Use plastic bonded iron powder.
Friction and Windage Losses	Use better bearings and lubricant.
	Install a more efficient cooling system.

85 FR 24146, 24155.

DOE did not receive comments on the technology options identified in the April 2020 NOPD. Accordingly, DOE continued to consider the technology options identified in the April 2020 NOPD in developing this final determination. Chapter 3 of the TSD provides details on the DOE's market and technology assessment for SEMs.

B. Screening Analysis

DOE uses the following five screening criteria to determine which technology options are suitable [10] for further consideration of new or amended energy conservation standards:

(1) *Technological feasibility.* Technologies that are not incorporated in commercial products or in working prototypes will not be considered further.

(2) *Practicability to manufacture, install, and service.* If it is determined that mass production and reliable installation and servicing of a technology in commercial products could not be achieved on the scale necessary to serve the relevant market at the time of the projected compliance date of the standard, then that

[9] I^2R losses refer to conductor losses. In AC circuits, these losses are computed as the square of the current ("I") multiplied by the conductor resistance ("R").

[10] DOE refers to the technology options that pass the screening criteria as "design options."

technology will not be considered further.

(3) *Impacts on product utility or product availability.* If it is determined that a technology would have a significant adverse impact on the utility of the product to significant subgroups of consumers or would result in the unavailability of any covered product type with performance characteristics (including reliability), features, sizes, capacities, and volumes that are substantially the same as products generally available in the United States at the time, it will not be considered further.

(4) *Adverse impacts on health or safety.* If it is determined that a technology would have significant adverse impacts on health or safety, it will not be considered further.

(5) *Unique-Pathway Proprietary Technologies.* If a design option utilizes proprietary technology that represents a unique pathway to achieving a given efficiency level, that technology will not be considered further due to the potential for monopolistic concerns.

10 CFR part 430, subpart C, appendix A, 6(c)(3) and 7(b); 10 CFR 431.4.

In summary, if DOE determines that a technology, or a combination of technologies, fails to meet one or more of the above five criteria, it will be excluded from further consideration in the engineering analysis.

Table IV–3 provides a summary of all the technology options DOE considered for improving SEM efficiency. For a description of how each of these technology options improves SEM efficiency, see final determination TSD chapter 3. For the April 2020 NOPD, DOE initially screened out three of the identified technology options: Reducing the air gap below .0125 inches, amorphous metal laminations, and plastic bonded iron powder (''PBIP'').

Reducing the air gap between the rotor and stator can improve motor efficiency. For SEMs, the air gap is commonly set at 15 thousandths of an inch. A reduction in air gaps is technologically feasible and DOE is unaware of any adverse impacts on health or safety associated with reducing the radial air gap below 12.5 thousandths of an inch. However, this technology option fails the screening criterion of being practicable to manufacture, install, and service. Such a tight air gap may cause problems in manufacturing and service, with the rotor potentially coming into contact with the stator. This technology option also fails the screening criterion of avoiding adverse impacts on consumer utility and reliability, because the motor may experience higher failure rates in service when the manufactured air gaps are less than 12.5 thousandths of an inch.

Using amorphous metals in the rotor laminations is another potential technology option to improve the efficiency of SEMs. Amorphous metal is extremely thin, has high electrical resistivity, and has little or no magnetic domain definition. Because of amorphous steel's high resistance, it exhibits a reduction in hysteresis and eddy current losses, which in turn reduces overall losses in SEMs. However, amorphous steel is a very brittle material which makes it difficult to punch into motor laminations.[11]

Although amorphous metals have the potential to improve efficiency, DOE does not consider this technology option technologically feasible, because it has not been incorporated into a working prototype of a small electric motor. Furthermore, DOE is uncertain whether amorphous metals are practicable to manufacture, install, and service, because a prototype amorphous metal-based SEM has not been made and little information is available on the feasibility of adapting this technology for manufacturing SEMs to reach any conclusions regarding the practicability of using this option. DOE is not aware of any adverse impacts on consumer utility, reliability, health, or safety associated with amorphous metal laminations.

Using PBIP to manufacture SEMs could cut production costs while increasing production output. Although other researchers may be working on this technology option, DOE notes that a research team at Lund University in Sweden published a paper in 2007 about using PBIP in manufacturing, which is the most recent applicable paper on the subject. This technology option is based on an iron powder alloy that is suspended in plastic, and is used in certain motor applications such as fans, pumps, and household appliances.[12] The compound is then shaped into motor components using a centrifugal mold, reducing the number of manufacturing steps. Researchers claim that this technology option could cut losses by as much as 50 percent. The Lund University study, which is the most recent research paper to address the use of PBIP in the production context, indicated that its study team already produced inductors, transformers, and induction heating coils using PBIP, but had not yet produced a small electric motor. In addition, it appears that PBIP technology is aimed at torus, claw-pole, and transversal flux motors, none of which are with in the regulatory definition of SEMs at 10 CFR 431.442. DOE has found no evidence of any significant research or technical advancement in PBIP methodologies that could be applied to SEMs since publication of the March 2010 Final Rule or the April 2020 NOPD.

Although PBIP has the potential to improve efficiency while reducing manufacturing costs, DOE does not consider this technology option technologically feasible because it has not been incorporated into a working prototype of a small electric motor. Also, DOE is uncertain whether the material has the structural integrity to form into the necessary shape of a SEM steel frame. Specifically, properties of PBIP can differ depending on the processing. If the metal particles are too closely compacted and begin to touch, the material will gain electrical conductivity, counteracting one of its most important features of preventing electric current from developing, which is critical because this essentially eliminates losses in the core due to eddy currents. If the metal particles are not compacted closely enough, its structural integrity could be compromised because the resulting material will be very porous.

Furthermore, DOE is uncertain whether PBIP is practicable to manufacture, install, and service, because a prototype PBIP SEM has not yet been made and little information is available on the feasibility of adapting this option for manufacturing SEMs. DOE continues to be unaware of any adverse impacts on product utility, product availability, health, or safety that may arise from the use of PBIP in SEMs.

In the April 2020 NOPD, DOE tentatively determined that the remaining technology options listed in Table IV–2 are technologically feasible. The evaluated technologies all have been used (or are being used) in commercially available products or working prototypes. These technologies all incorporate materials and components that are commercially available in today's supply markets for the SEMs that are the subject of this document.

DOE did not receive comments on the screening analysis in the April 2020 NOPD. Accordingly, DOE considered the same screening analysis from the

[11] 1 S.R. Ning, J. Gao, and Y.G. Wang. Review on Applications of Low Loss Amorphous Metals in Motors. 2010. ShanDong University. Weihai, China.

[12] Horrdin, H., and E. Olsson. Technology Shifts in Power Electronics and Electric Motors for Hybrid Electric Vehicles: A Study of Silicon Carbide and Iron Powder Materials. 2007. Chalmers University of Technology. Göteborg, Sweden.

April 2020 NOPD in this final determination and is screening out the following technology options: Reducing the air gap below .0125 inches, amorphous metal laminations, and plastic bonded iron powder (''PBIP''). DOE also finds that all of the remaining technology options meet the other screening criteria (*i.e.,* practicable to manufacture, install, and service and do not result in adverse impacts on consumer utility, product availability, health, or safety, and do not represent unique pathway proprietary technologies). Chapter 4 of the TSD provides details on the DOE's screening analysis for SEMs.

C. Engineering Analysis

The engineering analysis establishes the relationship between the efficiency and cost of an SEM. There are two elements to consider in the engineering analysis; the selection of efficiency levels to analyze (*i.e.,* the ''efficiency analysis'') and the determination of product cost at each efficiency level (*i.e.,* the ''cost analysis''). In determining the performance of higher-efficiency equipment, DOE considers technologies and design option combinations not eliminated by the screening analysis. For each equipment class, DOE estimates the baseline cost, as well as the incremental cost for the equipment at efficiency levels above the baseline. The output of the engineering analysis is a set of cost-efficiency ''curves'' that are used in downstream analyses (*i.e.,* the LCC and PBP analyses). The following sections provide further details on the engineering analysis methodology.

1. Summary of Significant Data Sources

DOE utilized two principal data sources for the engineering analysis: (1) The database of SEM manufacturer suggested retail price (''MSRP'') and performance data based on the current market (as evaluated in the April 2020 NOPD), and (2) motor modeling data, test data, and performance specifications from the March 2010 Final Rule. DOE determined that relying on the data from the March 2010 Final Rule was reasonable because a review of the catalog data suggested that there were no significant technological advancements in the motor industry that could lead to more efficient or lower cost motor designs relative to the motors modeled for the March 2010 Final Rule. In response to the April 2020 NOPD, NEMA also commented that the motor designs and associated efficiency levels adopted from the March 2010 Final Rule analysis are appropriate. (NEMA, No. 22 at p. 3) Accordingly, in preparing this determination, DOE continued to evaluate the motor designs that were modeled for the March 2010 Final Rule analysis.

DOE collected MSRP and performance data from product literature and catalogs distributed by four major motor manufacturers: ABB (which includes the manufacturer formerly known as Baldor Electric Company), Nidec Motor Corporation (which includes the US Motors brand), Regal-Beloit Corporation (which includes the Marathon and Leeson brands), and WEG Electric Motors Corporation.[13] Based on market information from the Low-Voltage Motors World Market Report,[14] DOE estimates that the four major motor manufacturers noted comprise the majority of the U.S. SEM market and are consistent with the motor brands considered in the March 2010 Final Rule. (Throughout this document this data will be referred to as the ''manufacturer catalog data.'')

2. Representative Equipment Classes

Due to the large number of equipment classes, DOE did not directly analyze all 62 equipment classes of SEMs considered under this final determination. Instead, DOE selected representative classes based on two factors: (1) The quantity of motor models available within an equipment class and (2) the ability to scale to other equipment classes.

DOE notes that the minimum energy conservation standards adopted in the March 2010 Final Rule correspond to the efficiency level that represented the maximum technologically feasible efficiency for CSIR motors. As discussed previously, DOE was unable to identify any additional design options that passed the screening criteria that would indicate that a motor design meeting a higher efficiency level is technologically feasible and commercially viable. In addition, DOE was unable to identify any CSIR motors in the manufacturer catalog data that exhibited efficiency levels exceeding the current energy conservation standards for CSIR motors. From this information, DOE proposed in the April 2020 NOPD that more stringent energy conservation standards for CSIR motors do not appear to be technologically feasible. Consequently, DOE did not include a representative CSIR equipment class as part of the engineering analysis.

The minimum energy conservation standards adopted in the March 2010 Final Rule corresponded to efficiency levels below the maximum technologically feasible levels for the CSCR and polyphase topologies, and therefore DOE elected to analyze one representative equipment class for each of these motor topologies. Equipment classes in both the polyphase and CSCR topologies were directly analyzed due to the fundamental differences in their starting and running electrical characteristics. These differences in operation have a direct impact on performance and indicate that polyphase motors are typically more efficient than single-phase motors. In addition, the efficiency relationships across horsepower and pole configuration are different between single-phase and polyphase motors.

DOE did not vary the pole configuration of the representative classes it analyzed because analyzing the same pole configuration provided the strongest relationship upon which to base its scaling. See section IV.C.5 of this document for details on DOE's scaling methodology. Keeping as many design characteristics constant as possible enabled DOE to more accurately identify how design changes affect efficiency across horsepower ratings. For each motor topology, DOE directly analyzed the most common pole-configuration. For both motor topologies analyzed, 4-pole motors constitute the largest fraction of motor models on the market.

When DOE selected its representative equipment classes, DOE chose the horsepower ratings that constitute a high volume of motor models and approximate the middle of the range of covered horsepower ratings so that DOE could develop a reasonable scaling methodology. DOE notes that the representative equipment classes for polyphase and CSCR motors that were selected for the engineering analysis align with the representative classes that were directly analyzed in the March

[14] Based on the Low-Voltage Motors, World Market Report (IHS Markit Report September 2017, Edition 2017–2018) Table 5.15: Market Share Estimates for Low-voltage Motors: Americas; Suppliers 'share of the Market in 2015 and 2016.

2010 Final Rule. 75 FR 10874, 10888. The proposed representative equipment classes from the April 2020 NOPD are outlined in Table IV–4.

TABLE IV–4—REPRESENTATIVE EQUIPMENT CLASSES

Motor topology	Pole configuration	Motor output power *hp*
Polyphase	4	1.00
Single-phase CSCR	4	0.75

NEMA commented that the selected representative equipment classes are appropriate because there have not been any significant changes to design practices which might warrant modification. (NEMA, No. 22 at p. 2) DOE did not receive any other comments regarding the representative equipment classes. Accordingly, DOE continued to analyze the same representative equipment classes from the April 2020 NOPD in preparing this final determination.

3. Efficiency Analysis

DOE typically uses one of two approaches to develop energy efficiency levels for the engineering analysis: (1) Relying on observed efficiency levels in the market (*i.e.,* the efficiency-level approach), or (2) determining the incremental efficiency improvements associated with incorporating specific design options to a baseline model (*i.e.,* the design-option approach). Using the efficiency-level approach, the efficiency levels established for the analysis are determined based on the market distribution of existing products (in other words, based on the range of efficiencies and efficiency level ''clusters'' that already exist on the market). Using the design option approach, the efficiency levels established for the analysis are determined through detailed engineering calculations and/or computer simulations of the efficiency improvements from implementing specific design options that have been identified in the technology assessment. DOE may also rely on a combination of these two approaches. For example, the efficiency-level approach (based on actual products on the market) may be extended using the design option approach to interpolate to define ''gap fill'' levels (to bridge large gaps between other identified efficiency levels) and/or to extrapolate to the ''max-tech'' level (particularly in cases where the ''max tech'' level exceeds the maximum efficiency level currently available on the market).

In the March 2010 Final Rule DOE and in the April 2020 NOPD, DOE relied on the design option approach. DOE maintained the design option approach for this final determination. In this design option approach, DOE considers efficiency levels corresponding to motor designs that meet or exceed the efficiency requirements of the current energy conservation standards at 10 CFR 431.446. DOE has determined that there are no additional technology options that pass the screening criteria that would enable the consideration of any additional efficiency levels representing higher efficiency levels than the maximum technologically feasible level analyzed in the March 2010 Final Rule.

For each equipment class, DOE generally selects a baseline model as a reference point, and measures changes resulting from potential energy conservation standards against the baseline. The baseline model in each equipment class represents the characteristics of a product/equipment typical of that class (*e.g.,* capacity, physical size). Generally, a baseline model is one that just meets current energy conservation standards, or, if no standards are in place, the baseline is typically the most common or least efficient unit on the market.

DOE considered the current minimum energy conservation standards to establish the baseline efficiency levels for each representative equipment class. As discussed previously, DOE selected representative equipment classes that align with the classes analyzed in the March 2010 Final Rule. See March 2010 Final Rule TSD, sec. 5.2.1. DOE identified specific motor designs from the March 2010 Final Rule engineering analysis that exhibit full-load efficiency ratings that are representative of the minimum energy conservation standards for SEMs. DOE used these motor designs to form the baseline against which to compare improved efficiency design options in DOE's analysis. Each increase in efficiency over the baseline level that DOE analyzed was assigned an efficiency level (''EL'') number.

For the March 2010 Final Rule engineering analysis, DOE purchased and tested motors with the lowest catalog efficiency rating available in the market for each representative equipment class. DOE's technical expert tore down each motor to obtain dimensions, a BOM, and other pertinent design information. DOE worked with a subcontractor to reproduce these motor designs using modeling software and then applied design options to a modeled motor that would increase that motor's efficiency to develop a series of motor designs spanning a range of efficiency levels. For the current evaluation, DOE continued to base its analysis on the modeled motor designs. In light of its catalog review, DOE discerned no significant technological advancements in the motor industry that could lead to more efficient or lower cost motor designs relative to the motors modeled for the March 2010 Final Rule. In addition, DOE did not receive any contrasting comments suggesting any significant technological advancements for small electric motors within current scope.

In developing the modeled motor designs and associated costs, DOE also considered both space-constrained and non-space-constrained scenarios. DOE prepared designs of increased efficiency covering both scenarios for each representative equipment class. The design levels prepared for the space-constrained scenario included baseline and intermediate levels, a level for a design using a copper rotor, and a max-tech level with a design using a copper rotor and exotic core steel. The high-efficiency space-constrained designs incorporate copper rotors and exotic core steel in order to meet comparable levels of efficiency to the high-efficiency non-space-constrained designs while meeting the parameters for minimally increased stack length. The design levels created for the non-space-constrained scenario corresponded to the same efficiency levels created for the space-constrained scenario. Further information on the development of modeled motor designs is available in section 5.3 of the March 2010 Final Rule TSD.

NEMA commented that improving efficiency in SEMs may not always result in overall equipment-level efficiency improvements. It noted that any modification to energy conservation standards or scope of regulated SEMs would require a revised analysis of the downstream impact of SEM design changes on OEM devices and appliances. NEMA asserted that changes in motor size, weight, rotational speed, slip,[15] and other factors due to more stringent energy conservation standards have not been sufficiently evaluated. It added that because of the potential increase in the speed of the motor due to increases in efficiency, more stringent energy conservation standards could have significant downstream impacts in OEM devices which use these motors and would not always guarantee higher efficiency or better performance by that end-use device. (NEMA, No. 22 at pp. 1–2, 5; No. 32 at p. 2)

DOE continued to use the designs analyzed for the March 2010 Final Rule in preparing this final determination. The designs analyzed in the engineering analysis did not show a significant (less than 2 percent) and consistent increase in speed with increasing efficiency (some more efficient designs had slightly lower speeds) across all ELs (See Final Determination TSD Chapter 5). In addition, as discussed previously, to account for motor size and weight limitations, DOE also analyzed both space-constrained and non-space-constrained scenarios. However, in this final determination, DOE is not considering amending the current energy conservation standards for this equipment.

Given that DOE was unable to identify any additional design options for improving efficiency that passed the screening criteria and were not already considered in the March 2010 Final Rule engineering analysis, DOE analyzed the same motor designs that were developed for the March 2010 Final Rule except for CSIR motors (which, as indicated earlier, did not appear to have any technologically-feasible options available to improve their efficiency). For each representative equipment class, DOE established an efficiency level for each motor design that exhibited improved efficiency over the baseline design. As discussed previously, DOE considered the current minimum energy conservation standards as the baseline efficiency levels for each representative equipment class. These April 2020 NOPD efficiency levels are summarized in Table IV–5.

TABLE IV–5—SUMMARY OF EFFICIENCY LEVELS

Representative equipment class	EL	Efficiency (%)
Single-phase CSCR, 4-pole, 0.75-hp	0	81.8
	1	82.8
	2	84.0
	3	84.6
	4	86.7
	5	87.9
Polyphase, 4-pole, 1-hp	0	83.5
	1	85.2
	2	86.3
	3	87.8

As mentioned previously, NEMA commented that the motor designs and associated efficiency levels adopted into this analysis from the March 2010 Final Rule analysis are appropriate. (NEMA, No. 22 at p. 3) Accordingly, similar to the April 2020 NOPD, DOE adopted the motor modeling approach used in support of the March 2010 Final Rule to analyze and establish efficiency levels and incremental motor MSPs. DOE did not identify any additional design options in the market for improving efficiency that were not already considered in the March 2010 Final Rule.

4. Cost Analysis

The cost analysis portion of the Engineering Analysis is conducted using one or a combination of cost approaches. The selection of cost approach depends on a suite of factors, including the availability and reliability of public information, characteristics of the regulated product and the availability and timeliness of purchasing the equipment on the market. The cost approaches are summarized as follows:

- *Physical teardowns:* Under this approach, DOE physically dismantles a commercially available product, component-by-component, to develop a detailed bill of materials for the product.
- *Catalog teardowns:* In lieu of physically deconstructing a product, DOE identifies each component using parts diagrams (available from manufacturer websites or appliance repair websites, for example) to develop the bill of materials (''BOM'') for the product.
- *Price surveys:* If neither a physical nor catalog teardown is feasible (for example, for tightly integrated products such as fluorescent lamps, which are infeasible to disassemble and for which parts diagrams are unavailable) or cost-prohibitive and otherwise impractical (*e.g.* large commercial boilers), DOE conducts price surveys using publicly available pricing data published on major online retailer websites and/or by soliciting prices from distributors and other commercial channels.

In the present case, a standard BOM was constructed for each motor design that includes direct material costs and labor time estimates along with costs. DOE notes that the costs established for direct material costs and labor time were initially determined in terms of $2009 for the March 2010 Final Rule. For the April 2020 NOPD, DOE updated these material and labor costs to be representative of the market in 2018. DOE adjusted historical material prices to $2018 using the historical Bureau of Labor Statistics Producer Price Indices (''PPI'') [16] for each commodity's industry. In addition, DOE updated labor costs and markups based on the most recent and complete version (*i.e.*

[15] ''Motor slip'' is the difference between the speed of the rotor (operating speed) and the speed of the rotating magnetic field of the stator (synchronous speed). When net rotor resistance of a motor design is reduced, efficiency of the motor increases but slip decreases, resulting in higher operating speeds.

[16] *www.bls.gov/ppi/.*

2012) of the Economic Census of Industry by the U.S. Census Bureau.[17]

DOE did not receive comments on the cost analysis presented in the April 2020 NOPD. Accordingly, using the same methodology presented in the April 2020 NOPD, in this final determination DOE updated the material and labor costs to be representative of the market in 2019$.

5. Scaling Relationships

In analyzing the equipment classes, DOE developed a systematic approach to scaling efficiency across horsepower ratings and pole configurations, while retaining reasonable levels of accuracy, in a manner similar to the March 2010 Final Rule. DOE's current energy conservation standards for SEMs found at 10 CFR 431.446 list minimum required efficiencies over a range of horsepower and pole configurations, providing a basis for scaling efficiency across horsepower and pole configurations for polyphase and single-phase motors. The efficiency relationships in the established standards are based on a combination of NEMA recommended efficiency standards, NEMA premium designations, catalog data, and test data for individual manufacturer motor product lines.

In the April 2020 NOPD, DOE proposed to apply the same scaling methodologies used to support the March 2010 Final Rule to the engineering analysis. This includes scaling to two additional representative units needed in the energy use and life-cycle cost analyses to separately analyze consumers of integral (*i.e.,* with horsepower greater than or equal to 1 hp) single-phase CSCR SEMs and fractional (*i.e.,* with horsepower less than 1 hp) polyphase SEMs. This scaling approach has been presented previously to stakeholders and has been updated based on stakeholder input. Additionally, the approach has the added advantage of reducing the analytical complexity associated with conducting a detailed engineering analysis of the cost-efficiency relationship on all 62 equipment classes. 75 FR 10874, 10894–10895.

NEMA commented that the previously developed scaling methodologies remain effective and appropriate. (NEMA, No. 22 at p. 3) DOE did not receive any other comments on the scaling analysis methodology proposed in the April 2020 NOPD. DOE continues to apply the scaling analysis methodology from the April 2020 NOPD in this final determination. Chapter 5 of the TSD provides details on the DOE's engineering analysis for SEMs.

D. Markups Analysis

To account for manufacturers' non-production costs and profit margin, DOE applies a non-production cost multiplier (the manufacturer markup) to the MPC. The resulting manufacturer selling price (''MSP'') is the price at which the manufacturer distributes a unit into commerce. DOE developed an average manufacturer markup by examining the annual Securities and Exchange Commission 10–K reports filed by publicly-traded manufacturers primarily engaged in appliance manufacturing and whose combined product range includes SEM.

The markups analysis develops appropriate markups (*e.g.,* retailer markups, distributor markups, contractor markups) in the distribution chain to convert the MSP estimates derived in the engineering analysis to consumer prices, which are then used in the LCC and PBP analysis. At each step in the distribution channel, companies mark up the price of the equipment to cover business costs and profit margin. For SEMs, the main parties in the distribution chain are manufacturers, distributors, contractors or installers, OEMs of equipment incorporating SEMs, and consumers.

DOE relied on estimates provided by NEMA during the March 2010 Final Rule to establish the proportion of shipments through each distribution channel.[18] In response to the April 2020 NOPD, DOE did not receive any comments or data to support alternative distribution channels for SEMs. In this final determination, DOE relied on the same distributions of shipments by distribution channels as in the April 2020 NOPD. Further, DOE did not receive any comments on the approach used to develop markups. DOE continued to rely on the same methodology for developing markups and updated relevant data sources to the most recent information available in preparation of this final determination. DOE used data from the U.S. Census Bureau and US Economic Census [19] and the Sales Tax Clearinghouse [20] to develop distribution channel markups and sales tax estimates.

DOE used the same approach as in the April 2020 NOPD and developed baseline and incremental markups for each actor in the distribution chain. Baseline markups are applied to the price of equipment with baseline efficiency, while incremental markups are applied to the difference in price between baseline and higher-efficiency models (the incremental cost increase). The incremental markup is typically less than the baseline markup and is designed to maintain similar per-unit operating profit before and after new or amended standards.[21] DOE relied on economic data from the U.S. Census Bureau to estimate average baseline and incremental markups.

Further, in the space-constrained scenario, DOE developed a modified OEM markup to account for the costs faced by those OEMs of equipment incorporating SEMs needing to redesign their products in order to incorporate SEMs of different, including larger, sizes. Nationally, businesses spend about 2.7 percent of U.S. gross domestic product on research and development (''R&D'').[22] DOE estimates that R&D by equipment OEMs, including the design of new products, approximately represents at most 2.7 percent of company revenue. DOE followed the same approach used in the March 2010

[21] Because the projected price of standards-compliant products (and equipment) is typically higher than the price of baseline products (and equipment), using the same markup for the incremental cost and the baseline cost would result in higher per-unit operating profit. While such an outcome is possible, DOE maintains that in markets that are reasonably competitive it is unlikely that imposing more stringent standards would lead to a sustainable increase in profitability in the long run.

Final Rule and accounted for the additional costs to redesign products and incorporate differently-shaped motors by adding 2.7 percent to the OEM markups.[23]

Table IV–6 summarizes the overall baseline and incremental markups for each distribution channel considered for SEMs. These markups were updated since the April 2020 NOPD to reflect updates to relevant data sources to the most recent information available.

TABLE IV–6—SMALL ELECTRIC MOTORS DISTRIBUTION CHANNEL MARKUPS

Distribution channel (from manufacturer)	Direct to OEMs (65%)		Via wholesalers to OEMs (30%)		Via wholesalers to end-users (5%)	
Main party	Baseline	Incremental	Baseline	Incremental	Baseline	Incremental
Motor Wholesaler	.....	.....	1.35	1.20	1.35	1.20
Original Equipment Manufacturer (OEM) *	1.45/1.48	1.20/1.23	1.45/1.48	1.20/1.23	.....	.....
Equipment Wholesaler	1.41	1.20	1.41	1.20	.....	.....
Retailer	.....	.....	.....	.....	1.53	1.27
Contractor	1.1	1.1	1.1	1.1	1.1	1.1
Sales Tax	1.0727		1.0727		1.0727	
Overall	2.42/2.47	1.69/1.73	3.26/3.33	2.04/2.08	2.44	1.80

* Non-space-constrained scenario/space-constrained scenario.

Chapter 6 of the TSD provides details on the DOE's markup analysis for SEMs.

E. Energy Use Analysis

The purpose of the energy use analysis is to determine the annual energy consumption of SEMs at different efficiency levels and to assess the energy savings potential of increased efficiency. The analysis estimates the range of energy use of SEMs in the field (*i.e.,* as they are actually used by consumers). The energy use analysis provides the basis for other analyses DOE performed, particularly assessments of the energy savings and the savings in consumer operating costs that could result from adoption of amended or new standards.

The analysis focuses on the two representative units identified in the engineering analysis (see section IV.C) for which engineering analysis results were obtained at levels at and above the baseline. Two additional representative units were included to separately analyze consumers of integral (*i.e.,* with horsepower greater than or equal to 1 hp) single-phase CSCR SEMs and fractional (*i.e.,* with horsepower less than 1 hp) polyphase SEMs (see Table IV–7).[24] For each representative unit, DOE determined the annual energy consumption value by multiplying the motor input power by the annual operating hours for a representative sample of motor consumers.

TABLE IV–7—REPRESENTATIVE UNITS ANALYZED IN THE ENERGY USE AND LIFE-CYCLE COST ANALYSES

Representative unit	Equipment class group	Pole configuration	Rated horsepower
1	Single-phase, CSCR	4-pole	0.75
2	Polyphase	4-pole	1
3	Single-phase, CSCR	4-pole	1
4	Polyphase	4-pole	0.5

In response to the April 2020 NOPD, NEMA commented that the inputs used to characterize the energy use of SEMs were appropriate. (NEMA, No. 22 at p. 3) Additionally, NEMA commented that improving SEM efficiency may not always result in overall equipment-level efficiency improvements. NEMA commented that any modification to energy conservation standards or scope of regulated SEMs would require a revised analysis of the downstream impact of SEM design changes on OEM devices and appliances, before proceeding to modify energy savings methodology and estimates. (NEMA, No. 22 at p. 5)

As discussed previously, to account for motor size and weight limitations (including in OEM devices and appliances), DOE analyzed both space-constrained and non-space-constrained scenarios. DOE did not modify the scope or amend the current energy conservation standards for this equipment. Chapter 7 of the TSD provides details on the DOE's energy use analysis for SEMs.

1. Consumer Sample

DOE used the same approach as in the April 2020 NOPD and created consumer samples for each representative unit, including three individual sectors: Residential, commercial, and industrial. DOE used the samples to determine SEM annual energy consumption as well as for conducting the LCC and PBP analyses. Each consumer in the sample was assigned a sector and an application. DOE used data from the March 2010 Final Rule to establish distributions of SEMs by sector. Five

[23] Fore more details see chapter 7 of the 2010 small electric motors final rule TSD, at *https://www.regulations.gov/document?D=EERE-2007-BT-STD-0007-0036.*

[24] Similar to the approach used in the engineering analysis when selecting representative units, DOE reviewed model counts from the manufacturer online catalog data to identify these additional units. DOE reviewed counts of CSCR, 4-poles small electric motors and polyphase, 4-poles, small electric motors models. For CSCR motors, the 1 horsepower value had the most counts and DOE selected a unit at 1 horsepower. For polyphase motors, the 0.33, 0.5, and 0.75 horsepower values had the most counts (and similar counts) and DOE selected a unit at 0.5 horsepower (*i.e.* the mid-range of these horsepower values).

main motor applications were selected as representative applications (compressors, fans, pumps, material handling, and others). In order to characterize the distributions of SEMs across applications in the industrial sector, DOE used data from hundreds of field assessments aggregated in two databases: (1) A database of motor nameplate and field data and;[25] (2) a database of motor nameplate and field data compiled by the Industrial Assessment Center at Oregon University (''field assessment data'').[26] For the commercial and residential sectors, DOE used data from a previous DOE publication to estimate distribution of SEMs by application.[27] DOE also assumed that 20 percent of consumers had space-constraints and 80 percent were non-space-constrained based on data from the March 2010 Final Rule. In response to the April 2020 NOPD, NEMA commented that the inputs used to characterize the distributions of consumers across sectors and applications were appropriate. (NEMA, No. 22 at p. 3) DOE used the same consumer sample as in the April 2020 NOPD for this final determination.

See Chapter 7 of the TSD for more details on the resulting distribution of consumers by sector and applications.

2. Motor Input Power

DOE used the same approach as in the April 2020 NOPD and calculated the motor input power as the sum of the motor rated horsepower multiplied by the motor operating load (*i.e.,* the motor output power) and of the losses at the operating load (*i.e.,* part-load losses). DOE determined the part-load losses using outputs from the engineering analysis (full-load efficiency at each efficiency level) and published part-load efficiency information from manufacturer catalogs to model motor part-load losses as a function of the motor's operating load. DOE estimated the operating load using operating load data specific to motors in the 0.25–3 hp range, which was based on additional field assessments data collected since the publication of the March 2010 Final Rule.[28]

In response to the April 2020 NOPD, NEMA commented that an upcoming publication from DOE's Advanced Manufacturing Office ''Motor System Market Assessment'' may provide additional information regarding load. (NEMA, No. 22 at p. 4) DOE is aware of this upcoming report but notes that it is not yet available. Accordingly, DOE used the same load distributions as in the April 2020 NOPD for this final determination.

See chapter 7 of the TSD for the resulting distribution of load for each application.

3. Annual Operating Hours

DOE used the same approach as in the April 2020 NOPD and DOE developed distributions of operating hours by application and sector. For the industrial sector, DOE used data specific to motors in the 0.25–3 hp range from the field assessment data to establish distributions of annual operating hours by application.[29] For the commercial and residential sectors, DOE used operating hours data from the March 2010 Final Rule.[30] In response to the April 2020 NOPD, NEMA commented in support of the annual operating hours values used in the NOPD. NEMA commented that if DOE were to consider standards for a different scope, these assumptions would no longer be adequate. (NEMA, No. 22 at p. 4) As discussed previously, DOE is not modifying the scope of the energy conservation standards for SEMs. Accordingly, DOE used the same operating hour distributions as in the April 2020 NOPD for this final determination. Table IV–8 shows the estimated average annual energy use at each efficiency level analyzed.

The annual energy use values are calculated as an intermediate result in the LCC and PBP analysis. As further discussed section IV.F, the computer model DOE uses to calculate the LCC and PBP relies on a Monte Carlo simulation to incorporate uncertainty and variability into the analysis. Although the energy use calculation performed in preparation of this final rule relied on the same probability distributions as used in the April 2020 NOPD, each Monte Carlo simulation run randomly samples input values from the probability distributions and consumer samples, which resulted in updated annual energy use results.

TABLE IV–8—SMALL ELECTRIC MOTORS ANNUAL ENERGY USE RESULTS

Rep. Unit	Description	Kilowatt-hours per year					
		EL 0	EL 1	EL 2	EL 3	EL 4	EL 5
1	Single-phase, CSCR, 4-pole, 0.75 hp	1,653.6	1,628.2	1,598.5	1,583.8	1,536.0	1,509.0
2	Polyphase, 4-pole, 1 hp	2,092.8	2,047.7	2,020.8	1,983.8	.....	.....
3	Single-phase, CSCR, 4-pole, 1 hp	2,191.9	2,159.1	2,122.7	2,103.9	2,043.2	2,008.0
4	Polyphase, 4-pole, 0.5 hp	1,152.6	1,117.9	1,096.7	1,068.1	.....	.....

See Chapter 7 of the TSD for more details on the distributions of annual operating hours by application and sector.

F. Life-Cycle Cost and Payback Period Analysis

DOE conducted LCC and PBP analyses to evaluate the economic impacts on individual consumers of potential energy conservation standards for SEMs. The effect of new or amended energy conservation standards on individual consumers usually involves a reduction in operating cost and an increase in purchase price. DOE used

the following two metrics to measure consumer impacts:

- The LCC is the total consumer expense of equipment over the life of that equipment, consisting of total installed cost (MSP, distribution chain markups, sales tax, and installation costs) plus operating costs (expenses for energy use, maintenance, and repair). To compute the operating costs, DOE discounts future operating costs to the time of purchase and sums them over the lifetime of the equipment.
- The simple PBP is the estimated amount of time (in years) it takes consumers to recover the increased purchase cost (including installation) of more-efficient equipment through lower operating costs. DOE calculates the simple PBP by dividing the change in purchase cost at higher efficiency levels by the change in annual operating cost for the year that amended or new standards are assumed to take effect.

For any given efficiency level, DOE measures the change in LCC relative to the LCC in the no-new-standards case, which reflects the estimated efficiency distribution of SEMs in the absence of new or amended energy conservation standards. In contrast, the simple PBP for a given efficiency level is measured relative to the baseline equipment. The analysis focuses on the four representative units identified in Table IV–7.

For each considered efficiency level in each equipment class, DOE calculated the LCC and PBP for a nationally representative set of consumers. As stated previously, DOE developed a sample based on distributions of consumers across sectors and applications, as well as across efficiency levels. For each sample consumer, DOE determined the unit energy consumption and appropriate energy price. By developing a representative sample of consumers, the analysis captured the variability in energy consumption and energy prices associated with the use of SEMs.

Inputs to the calculation of total installed cost include the cost of the equipment—which includes MSPs, retailer markups, and sales taxes—and installation costs. Inputs to the calculation of operating expenses include annual energy consumption, energy prices and price projections, repair and maintenance costs, equipment lifetimes, and discount rates. DOE created distributions of values for equipment lifetime, discount rates, and sales taxes, with probabilities attached to each value, to account for their uncertainty and variability.

The computer model DOE uses to calculate the LCC and PBP relies on a Monte Carlo simulation to incorporate uncertainty and variability into the analysis. The Monte Carlo simulations randomly sample input values from the probability distributions and consumer samples. The model calculated the LCC and PBP for equipment at each efficiency level for 10,000 consumers per representative unit per simulation run. The analytical results include a distribution of 10,000 data points showing the range of LCC savings for a given efficiency level relative to the no-new-standards case efficiency distribution. In performing an iteration of the Monte Carlo simulation for a given consumer, equipment efficiency is chosen based on its probability. If the chosen equipment efficiency is greater than or equal to the efficiency of the standard level under consideration, the LCC and PBP calculation reveals that a consumer is not impacted by the standard level. By accounting for consumers who already purchase more-efficient equipment, DOE avoids overstating the potential benefits from increasing equipment efficiency.

DOE calculated the LCC and PBP for all consumers as if each were to purchase a new motor in the expected year of compliance with amended standards. For purposes of its analysis, DOE estimated that any amended standards would apply to SEMs manufactured 5 years after the date on which the amended standard is published. DOE estimated publication of a final rule in the first half of 2023. Therefore, for purposes of its analysis, DOE used 2028 as the first full year of compliance.

Table IV–9 summarizes the approach and data DOE used to derive inputs to the LCC and PBP calculations. DOE updated relevant data sources to the most recent information available in preparation of this final determination. The subsections that follow provide further discussion.

TABLE IV–9—SUMMARY OF INPUTS AND METHODS FOR THE LCC AND PBP ANALYSIS *

Inputs	Source/method
Equipment Cost	Derived by multiplying MSPs by distribution channel markups and sales tax, as appropriate.
Installation Costs	Assumed no change with efficiency level other than shipping costs.
Annual Energy Use	Motor input power multiplied by annual operating hours per year. Variability: Based on plant surveys and previous DOE study.
Energy Prices	Electricity: Used average and marginal prices methodology from (Coughlin and Beraki) and updated data from Edison Electric Institute Typical Bill and Average Rates Reports Winter 2019, Summer 2019.
Energy Price Trends	Based on *AEO 2020* price projections.
Repair and Maintenance Costs	Assumed no change with efficiency level.
Equipment Lifetime	Estimated using information from March 2010 Final Rule and from DOE's Advanced Manufacturing Office.
Discount Rates	Residential: Approach involves identifying all possible debt or asset classes that might be used to purchase the considered appliances, or might be affected indirectly. Primary data source was the Federal Reserve Board's Survey of Consumer Finances. Commercial: Calculated as the weighted average cost of capital for entities purchasing small electric motors. Primary data source was Damodaran Online.
Compliance Date	2028.

* References for the data sources mentioned in this table are provided in the sections following the table.

1. Equipment Cost

To calculate consumer equipment costs, DOE multiplied the MSPs developed in the engineering analysis by the distribution channel markups described in section IV.D (along with sales taxes). DOE used different markups for baseline motors and higher-efficiency motors, because DOE applies an incremental markup to the increase in MSP associated with higher-efficiency equipment. Further, in this final determination, DOE assumed the prices of SEMs would remain constant over time (no decrease in price).

2. Installation Cost

Installation cost includes labor, overhead, and any miscellaneous materials and parts needed to install the equipment. In response to the April 2020 NOPD, DOE did not receive any information on SEM consumer installation costs and has relied on the same approach to estimate installations costs for this final determination. Based on information from the March 2010 Final Rule and installation cost data from RS Means Electrical Cost Data 2020,[31] DOE estimated that installation costs do not increase with equipment efficiency except in terms of shipping costs depending on the weight of the more efficient motor.[32] To arrive at total installed costs, DOE included shipping costs as part of the installation costs. These were based on weight data from the engineering analysis, which accounted for updated manufacturer catalog data collected by DOE.

See Chapter 8 of the TSD for more information on the installation costs for SEMs.

3. Annual Energy Consumption

For each sampled consumer, DOE determined the energy consumption for SEMs in each standards case analyzed using the approach described in section IV.E of this final determination.

4. Energy Prices

In response to the April 2020 NOPD, DOE did not receive any comments on electricity prices and relied on the same approach to develop national annual marginal and average prices and estimate energy prices in future years. DOE updated data sources to the most recent information available. For electricity prices, DOE used average and marginal electricity prices. As in the April 2020 NOPD, DOE estimated these prices using the methodology provided in two Lawrence Berkeley National Laboratory reports (Coughlin and Beraki).[33] In addition, in preparation for this final determination, DOE used updated data published from the Edison Electric Institute Typical Bills and Average Rates reports for summer and winter 2019 to reflect the latest electricity price information available. To estimate energy prices in future years, DOE multiplied the energy prices by a projection of annual change in average price consistent with the projections in the Energy Information Administration's (EIA's) Annual Energy Outlook 2020 (*AEO 2020*),[34] which has an end year of 2050. To estimate price trends after 2050, DOE used the average annual rate of change in prices from 2028 to 2050.

5. Maintenance and Repair Costs

Repair costs are associated with repairing or replacing SEM components that have failed; maintenance costs are associated with maintaining the operation of the equipment. SEMs are usually not repaired. Most small motors are mass produced and are not constructed or designed to be repaired because the manufacturing process uses spot welding welds and rivets to fasten or secure the frame and assembled components, not nuts and bolts—meaning that the SEM cannot be readily disassembled and reassembled. In addition, during the rulemaking for the March 2010 Final Rule, DOE found no evidence that repair or maintenance costs, if any, would increase with higher motor energy efficiency.[35] DOE reviewed more recent motor repair cost data for SEMs and found no evidence that maintenance and repair costs increase with efficiency for SEMs in scope.[36] In response to the April 2020 NOPD, NEMA supported DOE's finding that SEMs are generally not repaired. (NEMA, No. 22 at p. 4)

Accordingly, similar to what was done in the April 2020 NOPD, DOE did not account for any repair costs in the LCC calculation.

See Chapter 8 of the TSD for more information on the repair and maintenance costs for SEMs.

6. Motor Lifetime

To characterize lifetimes in a manner to reflect that this factor depends on an SEM's application, DOE used two Weibull distributions.[37] One characterizes the motor lifetime in total operating hours (*i.e.,* mechanical lifetime), while the other characterizes the lifetime in years of use in the application (*e.g.,* a pump).

In response to the April 2020 NOPD, NEMA commented in support of the lifetime distributions developed by DOE. (NEMA, No. 22 at pp. 4–5) Consistent with the approach used in the April 2020 NOPD, DOE used mechanical lifetime data from the March 2010 Final Rule analysis and from a 2012 report from DOE's Advanced Manufacturing Office[38] to derive an estimated average mechanical lifetime of 30,000 hours for CSCR motors and 40,000 hours for polyphase motors. The Weibull parameters from the March 2010 Final Rule were used to derive these lifetime distributions.[39] In the course of the LCC analysis, DOE's current analysis further combines these two distributions with OEM application lifetimes to estimate the distribution of SEM lifetimes. DOE determined the mechanical lifetime of each motor in years by dividing its mechanical lifetime in hours by its annual hours of operation. DOE then compared this mechanical lifetime (in years) with the sampled application lifetime (also in years), and assumed that the motor would be retired at the younger of these two ages. In the March 2010 Final Rule, this approach resulted in projected average lifetimes of 7 years for single-phase CSCR motors and 9 years for polyphase motors. Because of updates made to the annual operating hours (see section IV.E.3) and calculation rounding, the updated analysis for this final determination yielded average lifetimes of 7.0 years for single-phase CSCR motors and 8.7 years for polyphase motors.

See Chapter 8 of the TSD for more information on the lifetime of SEMs.

7. Discount Rates

In calculating LCC, DOE applies discount rates appropriate to commercial, industrial, and residential consumers to estimate the present value

of future operating costs. DOE estimated a distribution of discount rates for SEMs based on the cost of capital of publicly traded firms in the sectors that purchase SEMs.

As part of its analysis, DOE also applies weighted average discount rates calculated from consumer debt and asset data, rather than marginal or implicit discount rates.[40] DOE notes that the LCC does not analyze the equipment purchase decision, so the implicit discount rate is not relevant in this model. The LCC estimates net present value over the lifetime of the equipment, so the appropriate discount rate will reflect the general opportunity cost of household funds, taking this time scale into account. Given the long time horizon modeled in the LCC, the application of a marginal interest rate associated with an initial source of funds is inaccurate. Regardless of the method of purchase, consumers are expected to continue to rebalance their debt and asset holdings over the LCC analysis period, based on the restrictions consumers face in their debt payment requirements and the relative size of the interest rates available on debts and assets. DOE estimates the aggregate impact of this rebalancing using the historical distribution of debts and assets.

To establish residential discount rates for the LCC analysis, DOE identified all relevant household debt or asset classes in order to approximate a consumer's opportunity cost of funds related to appliance energy cost savings. It estimated the average percentage shares of the various types of debt and equity by household income group using data from the Federal Reserve Board's Survey of Consumer Finances[41] (''SCF'') for 1995, 1998, 2001, 2004, 2007, 2010, 2013, and 2016. Using the SCF and other sources, DOE developed a distribution of rates for each type of debt and asset by income group to represent the rates that may apply in the year in which amended standards would take effect.

For commercial and industrial consumers, DOE used the cost of capital to estimate the present value of cash flows to be derived from a typical company project or investment. Most companies use both debt and equity capital to fund investments, so the cost of capital is the weighted-average cost to the firm of equity and debt financing. This corporate finance approach is referred to as the weighted-average cost of capital. DOE used currently available economic data in developing discount rates. In response to the April 2020 NOPD, DOE did not receive any comments on discount rates. DOE used the same approach for developing discount rates as in the April 2020 NOPD for this final determination. DOE updated data sources to the most recent information available. See chapter 8 of the TSD for details on the development of end-user discount rates.

8. Efficiency Distribution in the No-New-Standards Case

To accurately estimate the share of consumers that would be affected by a potential energy conservation standard at a particular efficiency level, DOE's LCC analysis considered the projected distribution (market shares) of equipment efficiencies in the ''no-new-standards'' case (*i.e.,* the case without amended or new energy conservation standards) in the compliance year. In its analysis for the March 2010 Final Rule, DOE developed no-new standards case efficiency distributions based on the distributions of then currently available models for which SEM efficiency is included in catalog listings. In preparation for the April 2020 NOPD, DOE collected updated catalog data and analyzed the distribution of SEMs in the manufacturer catalog data for CSCR and polyphase SEMs.[42] DOE projected that these efficiency distributions would remain constant throughout 2028. In response to the April 2020 NOPD, DOE did not receive any comments related to efficiency distributions and efficiency trends. Accordingly, DOE retained the same efficiency distributions used in the April 2020 NOPD in preparing this final determination. See chapter 8 of the TSD for the estimated efficiency distributions.

9. Payback Period Analysis

The PBP is the amount of time it takes the consumer to recover the additional installed cost of more-efficient equipment, compared to baseline equipment, through energy cost savings. PBPs are expressed in years. PBPs that exceed the life of the equipment mean that the increased total installed cost is not recovered in reduced operating expenses.

The inputs to the simple PBP calculation for each efficiency level are the change in total installed cost of the equipment and the change in the first-year annual operating expenditures relative to the baseline. The simple PBP calculation uses the same inputs as the LCC analysis, except that discount rates are not needed.

V. Analytical Results and Conclusions

The following section addresses the results from DOE's analyses with respect to the considered energy conservation standards for SEMs examined by DOE. It addresses the ELs examined by DOE and the projected impacts of each of these levels. Additional details regarding DOE's analyses are contained in the NOPD TSD supporting this document.

A. Energy Savings

For each standards case considered, DOE estimated the per unit lifetime energy savings for SEMs purchased in the expected compliance year of any potential standards. The per unit energy savings were used in the calculation of the LCC and PBP values. DOE did not separately evaluate the significance of the potential energy conservation under the considered amended standards because it has determined that the potential standards would not be cost-effective as defined in EPCA.[43] (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A); 42 U.S.C. 6295(n)(2))

B. Cost Effectiveness

In general, higher-efficiency equipment affects consumers in two ways: (1) Purchase price increases and (2) annual operating cost decreases. Inputs used for calculating the LCC and PBP include total installed costs (*i.e.,* equipment price plus installation costs),

[40] The implicit discount rate is inferred from a consumer purchase decision between two otherwise identical goods with different first cost and operating cost. It is the interest rate that equates the increment of first cost to the difference in net present value of lifetime operating cost, incorporating the influence of several factors: Transaction costs; risk premiums and response to uncertainty; time preferences; interest rates at which a consumer is able to borrow or lend.

[41] Board of Governors of the Federal Reserve System. *Survey of Consumer Finances.* 1995, 1998, 2001, 2004, 2007, 2010, 2013, and 2016. Available at: *http://www.federalreserve.gov/econresdata/scf/scfindex.htm.*

[42] DOE relied on 140 models of CSCR small electric motors and 229 models of polyphase small electric motors identified in the manufacturer catalog data. More details on the distributions of currently available models for which motor catalog list efficiency is available in Chapter 8 of the TSD.

[43] The March 2010 Final Rule estimated the national energy savings achieved by the current energy conservation standards to be 2.2 quads of primary energy savings (*i.e.,* 0.29 quad at TSL 4b for polyphase SEMs and 1.91 quad at TSL 7 for single phase SEMs). The March 2010 Final Rule also estimated that the TSL resulting in the maximum national energy savings would provide a total of 2.7 quads of primary energy savings (*i.e.,* 0.37 quad at TSL 7 for polyphase SEMs and 2.33 quad at TSL 8 for single phase SEMs). 75 FR 10874, 10916 (March 9, 2010) Although DOE did not separately evaluate the significance of the potential energy conservation under the considered amended standards, this previous analysis indicates an upper limit of 0.5 quad of primary energy savings (2.7 − 2.2 = 0.5) which corresponds to 0.2 quad site national energy savings and is below the 0.3 quad threshold for determining whether energy savings would be significant.

and operating costs (*i.e.,* annual energy and water use, energy and water prices, energy and water price trends, repair costs, and maintenance costs). The LCC calculation also uses equipment lifetime and a discount rate. Chapter 8 of the final determination TSD provides detailed information on the LCC and PBP analyses.

Table V–1 through Table V–7 show the LCC and PBP results for the ELs considered for each equipment class. These results were updated since the April 2020 NOPD to reflect updates of relevant data sources to the most recent information available. Results for each representative unit are presented by two tables: In the first of each pair of tables, the simple payback is measured relative to the baseline equipment. In the second table, the impacts are measured relative to the efficiency distribution in the no-new-standards case in the expected compliance year for the potential standards considered. Because some consumers purchase equipment with higher efficiency in the no-new-standards case, the average savings are greater than the difference between the average LCC of the baseline equipment and the average LCC at each EL. The savings refer only to consumers who are affected by a standard at a given EL. Those who already purchase SEMs with an efficiency at or above a given EL are not affected. Consumers for whom the LCC-increases at a given EL experience a net cost.

TABLE V–1—AVERAGE LCC AND PBP RESULTS BY EFFICIENCY LEVEL FOR REPRESENTATIVE UNIT 1: SINGLE-PHASE, CSCR, 4-POLE, 0.75 hp

Efficiency level	Average costs 2019$				Simple payback *years* total installed cost	Average lifetime years first year's operating cost
	Total installed cost	First *year's* operating cost	Lifetime operating cost	LCC		
0	488.1	156.8	631.5	1,119.5	.....	6.97
1	504.4	154.4	621.8	1,126.2	6.8	6.97
2	525.7	151.6	610.6	1,136.3	7.3	6.97
3	567.1	150.3	605.0	1,172.0	12.0	6.97
4	594.7	145.8	586.8	1,181.5	9.6	6.97
5	1,411.4	143.2	576.6	1,988.0	67.9	6.97

Note: The results for each EL represent the average value if all purchasers in the sample use equipment with that efficiency level. The PBP is measured relative to the baseline equipment.

TABLE V–2—LCC SAVINGS RELATIVE TO THE NO-NEW STANDARDS CASE EFFICIENCY DISTRIBUTION FOR REPRESENTATIVE UNIT 1: SINGLE-PHASE, CSCR, 4-POLE, 0.75 hp

Efficiency level	Life-cycle cost savings	
	Percent of customers that experience	Average savings *
	Net cost (percent)	2019$
1	81.4	−6.4
2	83.3	−16.2
3	91.7	−51.4
4	88.8	−59.9
5	100.0	−855.0

* The savings represent the average LCC for affected consumers.

2	99.6	−77.9
3	100.0	−721.4

* The savings represent the average LCC for affected consumers.

C. Final Determination

For this final determination, DOE analyzed whether amended standards for SEMs would be technological feasible and cost effective. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A) and 42 U.S.C. 6295(n)(2)) EPCA mandates that DOE consider whether amended energy conservation standards for SEMs would be technologically feasible. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A) and 42 U.S.C. 6295(n)(2)(B)) DOE has determined that there are technology options that would improve the efficiency of SEMs. These technology options are being used in commercially available SEMs and therefore are technologically feasible. (See section IV.B for further information.) Hence, DOE has determined that amended energy conservation standards for SEMs are technologically feasible.

EPCA requires DOE to consider whether energy conservation standards for SEMs would be cost effective through an evaluation of the savings in operating costs throughout the estimated average life of the covered product/equipment compared to any increase in the price of, or in the initial charges for, or maintenance expenses of, the covered products/equipment which are/is likely to result from the imposition of an amended standard. (42 U.S.C. 63136(a); 42 U.S.C. 6295(m)(1)(A), 42 U.S.C. 6295(n)(2)(C), and 42 U.S.C. 6295(o)(2)(B)(i)(II)) As presented in the prior section, the average customer purchasing a representative SEM would experience an increase in LCC at each evaluated standards case as compared to the no new standards case. The simple PBP for the average of a representative SEM customer at each EL is projected to be generally longer than the mean lifetime of the equipment. Based on the above considerations, DOE has determined that more stringent amended energy conservation standards for SEMs cannot satisfy the relevant statutory requirements because such standards would not be cost effective as required under EPCA. (See 42 U.S.C. 6295(n)(2); 42 U.S.C. 6295(o)(2)(B)(II); 42 U.S.C. 6316(a))

Having determined that amended energy conservation standards for SEMs would not be cost-effective, DOE did not separately evaluate the significance of the amount of energy conservation under the considered amended standards because it has determined that the potential standards would not be cost-effective (and by extension, would not be economically justified) as required under EPCA. (42 U.S.C. 6316(a); 42 U.S.C. 6295(m)(1)(A); 42 U.S.C. 6295(n)(2); 42 U.S.C. 6295(o)(2)(B))

VI. Procedural Issues and Regulatory Review

A. Review Under Executive Orders 12866

This final determination has been determined to be not significant for purposes of Executive Order (''E.O.'') 12866, ''Regulatory Planning and Review.'' 58 FR 51735 (Oct. 4, 1993). As a result, the Office of Management and Budget (''OMB'') did not review this final determination.

B. Review Under Executive Orders 13771 and 13777

On January 30, 2017, the President issued E.O. 13771, ''Reducing Regulation and Controlling Regulatory Costs.'' E.O. 13771 stated the policy of the executive branch is to be prudent and financially responsible in the expenditure of funds, from both public and private sources. E.O. 13771 stated it is essential to manage the costs associated with the governmental imposition of private expenditures required to comply with Federal regulations.

Additionally, on February 24, 2017, the President issued E.O. 13777, ''Enforcing the Regulatory Reform Agenda.'' See 82 FR 12285 (March 1, 2017). E.O. 13777 required the head of each agency to designate an agency official as its Regulatory Reform Officer (''RRO''). Each RRO oversees the implementation of regulatory reform initiatives and policies to ensure that agencies effectively carry out regulatory reforms, consistent with applicable law. Further, E.O. 13777 requires the establishment of a regulatory task force at each agency. The regulatory task force is required to make recommendations to the agency head regarding the repeal, replacement, or modification of existing regulations, consistent with applicable law. At a minimum, each regulatory reform task force must attempt to identify regulations that:

(1) Eliminate jobs, or inhibit job creation;

(2) Are outdated, unnecessary, or ineffective;

(3) Impose costs that exceed benefits;

(4) Create a serious inconsistency or otherwise interfere with regulatory reform initiatives and policies;

(5) Are inconsistent with the requirements of the Information Quality Act, or the guidance issued pursuant to that Act, particularly those regulations that rely in whole or in part on data, information, or methods that are not publicly available or that are insufficiently transparent to meet the standard for reproducibility; or

(6) Derive from or implement Executive Orders or other Presidential directives that have been subsequently rescinded or substantially modified.

DOE concludes that this final determination is consistent with the directives set forth in these executive orders. As discussed in this document, DOE is not amending the current energy conservation standards for SEMs and will not have any cost impact on manufacturers of SEMs. Therefore, this determination is an E.O. 13771 Other Action.

C. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility

analysis (''IRFA'') and a final regulatory flexibility analysis (''FRFA'') for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' 67 FR 53461 (Aug. 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel's website (*http://energy.gov/gc/office-general-counsel*).

DOE reviewed this final determination pursuant to the Regulatory Flexibility Act and the procedures and policies discussed above. DOE has concluded that, based on the data and available information it has been able to review, amended energy conservation standards for SEMs would not be cost-effective. Therefore, DOE is not amending the current energy conservation standards for SEMs. On the basis of the foregoing, DOE certifies that this final determination will not have a significant economic impact on a substantial number of small entities. Accordingly, DOE has not prepared an FRFA for this final determination. DOE has transmitted its certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

D. Review Under the Paperwork Reduction Act

Manufacturers of SEMs must certify to DOE that their equipment comply with any applicable energy conservation standards. In certifying compliance, manufacturers must test their equipment according to the DOE test procedures, including any amendments adopted for those test procedures. DOE has established regulations for the certification and recordkeeping requirements for all covered consumer products and commercial equipment, including SEMs. 76 FR 12422 (March 7, 2011); 80 FR 5099 (Jan. 30, 2015). The collection-of-information requirement for the certification and recordkeeping is subject to review and approval by OMB under the Paperwork Reduction Act (''PRA''). This requirement has been approved by OMB under OMB control number 1910–1400. Public reporting burden for the certification is estimated to average 30 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number. This final determination, which concludes that amended energy conservation standards for SEMs would not be cost effective (and by extension, not economically justified) as required under the relevant statute, imposes no new information or recordkeeping requirements. Accordingly, clearance from the OMB is not required under the Paperwork Reduction Act. (44 U.S.C. 3501 *et seq.*)

E. Review Under the National Environmental Policy Act of 1969

DOE analyzed this final determination in accordance with the National Environmental Policy Act (''NEPA'') and DOE's NEPA implementing regulations (10 CFR part 1021). DOE's regulations include a categorical exclusion for actions which are interpretations or rulings with respect to existing regulations. 10 CFR part 1021, subpart D, Appendix A4. DOE has determined that this action qualifies for categorical exclusion A4 because it is an interpretation or ruling in regards to an existing regulation and otherwise meets the requirements for application of a categorical exclusion. See 10 CFR 1021.410.

F. Review Under Executive Order 13132

Executive Order 13132, ''Federalism,'' 64 FR 43255 (Aug. 10, 1999), imposes certain requirements on Federal agencies formulating and implementing policies or regulations that preempt State law or that have Federalism implications. The Executive Order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive Order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have Federalism implications. On March 14, 2000, DOE published a statement of policy describing the intergovernmental consultation process it will follow in the development of such regulations. 65 FR 13735. As this final determination does not amend the standards for SEMs, there is no impact on the policymaking discretion of the States. Therefore, no action is required by Executive Order 13132.

G. Review Under Executive Order 12988

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' imposes on Federal agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity, (2) write regulations to minimize litigation, (3) provide a clear legal standard for affected conduct rather than a general standard, and (4) promote simplification and burden reduction. 61 FR 4729 (Feb. 7, 1996). Regarding the review required by section 3(a), section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation (1) clearly specifies the preemptive effect, if any, (2) clearly specifies any effect on existing Federal law or regulation, (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction, (4) specifies the retroactive effect, if any, (5) adequately defines key terms, and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this final determination meets the relevant standards of Executive Order 12988.

H. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (''UMRA'') requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action likely to result in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. (2 U.S.C. 1532(a), (b)) The

UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a ''significant intergovernmental mandate,'' and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect them. On March 18, 1997, DOE published a statement of policy on its process for intergovernmental consultation under UMRA. 62 FR 12820. DOE's policy statement is also available at *http://energy.gov/sites/prod/files/gcprod/documents/umra_97.pdf.* This final determination does not contain a Federal intergovernmental mandate, nor is it expected to require expenditures of $100 million or more in any one year by State, local, and Tribal governments, in the aggregate, or by the private sector. As a result, the analytical requirements of UMRA do not apply.

I. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This final determination will not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

J. Review Under Executive Order 12630

Pursuant to Executive Order 12630, ''Governmental Actions and Interference with Constitutionally Protected Property Rights,'' 53 FR 8859 (March 18, 1988), DOE has determined that this final determination will not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

K. Review Under the Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516, note) provides for Federal agencies to review most disseminations of information to the public under information quality guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002). Pursuant to OMB Memorandum M–19–15, Improving Implementation of the Information Quality Act (April 24, 2019), DOE published updated guidelines which are available at *https://www.energy.gov/sites/prod/files/2019/12/f70/DOE%20Final%20Updated%20IQA%20Guidelines%20Dec%202019.pdf.* DOE has reviewed this final determination under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

L. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare and submit to the Office of Information and Regulatory Affairs (''OIRA'') at OMB, a Statement of Energy Effects for any significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgates or is expected to lead to promulgation of a final rule, and that (1) is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy, or (3) is designated by the Administrator of OIRA as a significant energy action. For any significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use.

Because this final determination does not amend the current standards for SEMs, it is not a significant energy action, nor has it been designated as such by the Administrator at OIRA. Accordingly, DOE has not prepared a Statement of Energy Effects.

M. Review Under the Information Quality Bulletin for Peer Review

On December 16, 2004, OMB, in consultation with the Office of Science and Technology Policy (''OSTP''), issued its Final Information Quality Bulletin for Peer Review (''the Bulletin''). 70 FR 2664 (Jan. 14, 2005). The Bulletin establishes that certain scientific information shall be peer reviewed by qualified specialists before it is disseminated by the Federal Government, including influential scientific information related to agency regulatory actions. The purpose of the bulletin is to enhance the quality and credibility of the Government's scientific information. Under the Bulletin, the energy conservation standards rulemaking analyses are ''influential scientific information,'' which the Bulletin defines as ''scientific information the agency reasonably can determine will have, or does have, a clear and substantial impact on important public policies or private sector decisions.'' 70 FR 2667.

In response to OMB's Bulletin, DOE conducted formal in-progress peer reviews of the energy conservation standards development process and analyses and has prepared a Peer Review Report pertaining to the energy conservation standards rulemaking analyses. Generation of this report involved a rigorous, formal, and documented evaluation using objective criteria and qualified and independent reviewers to make a judgment as to the technical/scientific/business merit, the actual or anticipated results, and the productivity and management effectiveness of programs and/or projects. The ''Energy Conservation Standards Rulemaking Peer Review Report'' dated February 2007 has been disseminated and is available at: *http://www.energy.gov/eere/buildings/peer-review.*

VII. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this final determination.

Signing Authority

This document of the Department of Energy was signed on January 5, 2021, by Daniel R Simmons, Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 6, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF COMMERCE

15 CFR Part 7

[Docket No. 210113–0009]

RIN 0605–AA51

Securing the Information and Communications Technology and Services Supply Chain

AGENCY: U.S. Department of Commerce.

ACTION: Interim final rule; request for comments.

SUMMARY: The Department of Commerce is promulgating regulations to implement provisions of Executive Order 13873, ''Executive Order on Securing the Information and Communications Technology and Services Supply Chain'' (May 15, 2019). These regulations create the processes and procedures that the Secretary of Commerce will use to identify, assess, and address certain transactions, including classes of transactions, between U.S. persons and foreign persons that involve information and communications technology or services designed, developed, manufactured, or supplied, by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary; and pose an undue or unacceptable risk. While this interim final rule will become effective on March 22, 2021, the Department of Commerce continues to welcome public input and is thus seeking additional public comment. Once any additional comments have been evaluated, the Department is committed to issuing a final rule.

DATES: Effective March 22, 2021.

Comments to the interim final rule must be received on or before March 22, 2021.

ADDRESSES: All comments must be submitted by one of the following methods:

- *By the Federal eRulemaking Portal: http://www.regulations.gov* at docket number [DOC–2019–0005].
- *By email directly to: ICTsupplychain@doc.gov.* Include ''RIN 0605–AA51'' in the subject line.
- *Instructions:* Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. For those seeking to submit confidential business information (CBI), please clearly mark such submissions as CBI and submit by email, mail, or hand delivery as instructed above. Each CBI submission must also contain a summary of the CBI, clearly marked as public, in sufficient detail to permit a reasonable understanding of the substance of the information for public consumption. Such summary information will be posted on *regulations.gov.*
- Supporting documents:
  - The Regulatory Impact Analysis is available at *http://www.regulations.gov* at docket number [DOC–2019–0005];
  - The Center for Strategic & International Studies, ''Significant Cyber Incidents 2020'' is available at *https://www.csis.org/programs/technology-policy-program/significant-cyber-incidents;*
  - The National Security Strategy of the United States is available at *https://www.whitehouse.gov/wp-content/uploads/2017/12/NSS-Final-12-18-2017-0905.pdf;*
  - ODNI's 2016–2019 Worldwide Threat Assessments of the U.S. Intelligence Community are available at *https://www.dni.gov/files/documents/Newsroom/Testimonies/SSCI%20Unclassified%20SFR%20-%20Final.pdf* (2017), *https://www.dni.gov/files/documents/Newsroom/Testimonies/2018-ATA---Unclassified-SSCI.pdf* (2018), *https://www.dni.gov/files/ODNI/documents/2019-ATA-SFR---SSCI.pdf* (2019); and
  - The 2018 National Cyber Strategy of the United States of America is available at *https://www.whitehouse.gov/wp-content/uploads/2018/09/National-Cyber-Strategy.pdf.*

FOR FURTHER INFORMATION CONTACT: Henry Young, U.S. Department of Commerce, telephone: (202) 482–0224. For media inquiries: Meghan Burris, Director, Office of Public Affairs, U.S. Department of Commerce, telephone: (202) 482–4883.

SUPPLEMENTARY INFORMATION:

I. Background

The information and communications technology and services (ICTS) supply chain is critical to nearly every aspect of U.S. national security. U.S. business and governments at all levels rely heavily on ICTS, which: Underpin our economy; support critical infrastructure and emergency services; and facilitate the Nation's ability to store, process, and transmit vast amounts of data, including sensitive information, that is used for personal, commercial, government, and national security purposes. The ICTS supply chain must be secure to protect our national security, including the economic strength that is an essential element of our national security. Ensuring the resilience of, and trust in, our ICTS supply chain is an issue that touches upon national security, including economic security, and public health and safety.

The purchase, incorporation, and use by U.S. persons of ICTS—such as network management or data storage—produced by any person owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary—can create multiple opportunities for those foreign adversaries to exploit potential vulnerabilities in the ICTS. That, in turn, could cause direct and indirect harm to both the immediate targets of the adverse action and to the United States as a whole. While attacks can originate from remote foreign sources, incorporating certain software, equipment, and products into U.S. domestic ICTS networks, as well as the use of certain cloud, network management, or other services, greatly increases the risk that potential vulnerabilities may be introduced, or that vulnerabilities may be present without being detected. These potential vulnerabilities, if exploited, could undermine the confidentiality, integrity, and availability of U.S. person data including personally identifiable information or other sensitive personal data.

Some foreign adversaries are known to exploit the sale of software and hardware to introduce vulnerabilities that can allow them to steal critical intellectual property, research results (*e.g.,* health data), or government or financial information from users of the software or hardware. Such vulnerabilities can be introduced in the network, cloud service, or individual product data; allow traffic monitoring or surveillance; and may be resistant to detection by private purchasers or telecommunications carriers. Once detected, such vulnerabilities may be extremely costly or impossible to remediate.

Vulnerabilities to data integrity can be created by including a foreign adversary's hardware and software into U.S. networks and systems. This incorporated hardware and software poses opportunities to add or remove important information, modify files or data streams, slow down, or otherwise modify the normal transmission or availability of data across U.S. networks. Such capabilities could be exercised in areas as diverse as financial market communications, satellite communications or control, or sensitive consumer information.

A foreign adversary could also exploit vulnerabilities provided by the incorporation of hardware and software into U.S. environments by fully or

partially closing down critical networks or functions at key times. These types of attacks are known as denial of service attacks. Such attacks could cause widespread problems, such as if they occur during periods of crisis, or they could be used selectively by targeting individual corporations or important infrastructure elements or functions. They could also be masked to make the source of the disruption difficult to attribute and, therefore, difficult to trace and stop.

These risks are not necessarily confined to infrastructure environments. They could, for example, be present in the use of cloud services, as well as in the widespread use of some consumer devices, networked surveillance cameras, drones, or interconnection via the internet of computing devices embedded in everyday objects, enabling them to send and receive data. For example, applications (''apps''), which may be downloaded from app stores or web browsers by a user to a mobile device, may automatically capture vast swaths of sensitive personal data from its users, including internet and other network activity information such as location data and browsing and search histories. This data exfiltration—supported by U.S. web data hosting and storage servers—threatens to allow foreign adversaries to exploit Americans' personal and proprietary information by allowing a foreign adversary to track the locations of Americans, build dossiers of sensitive personal data for blackmail, and conduct corporate espionage from inside the borders of the United States.

Multiple reported cybersecurity incidents in the United States and among major allies in 2020 illustrate the potential risk in permitting unrestricted access to U.S. ICTS supply chains, such as:

—In July 2020, two Chinese hackers working with the Chinese Ministry of State Security were indicted by the U.S. Department of Justice for conducting a global computer intrusion campaign targeting U.S. intellectual property and confidential business information, including COVID–19 vaccine research;

—German officials announced that a Russian hacking group associated with the Federal Security Bureau had compromised the networks of energy, water, and power companies in Germany by exploiting ICTS supply chains; and

—Japan's Defense Ministry announced it was investigating a large-scale cyber attack against Mitsubishi Electric that could have compromised details of new state-of-the-art missile designs.

See, e.g., Center for Strategic & International Studies, ''Significant Cyber Incidents 2020,'' available at *https://www.csis.org/programs/technology-policy-program/significant-cyber-incidents.*

Consequently, the President has determined that the unrestricted acquisition or use of ICTS that are designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary constitutes an unusual and extraordinary threat to the national security, foreign policy, and economy of the United States.

Executive Order 13873 of May 15, 2019, ''Securing the Information and Communications Technology and Services Supply Chain'' (84 FR 22689) (Executive Order), was issued pursuant to the President's authority under the Constitution and the laws of the United States, including the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*) (IEEPA), the National Emergencies Act (50 U.S.C. 1601 *et seq.*), and section 301 of Title 3, United States Code. IEEPA and the Executive Order grant the Secretary of Commerce (Secretary) the authority to prohibit any acquisition, importation, transfer, installation, dealing in, or use of any ICTS (an ''ICTS Transaction'') by any person, or with respect to any property, subject to United States jurisdiction, when such ICTS Transaction involves any property in which a foreign country or national has any interest, and the Secretary, in consultation with other agency heads (the Secretary of the Treasury, the Secretary of State, the Secretary of Defense, the Attorney General, the Secretary of Homeland Security, the United States Trade Representative, the Director of National Intelligence, the Administrator of General Services, the Chairman of the Federal Communications Commission, and the heads of any other executive departments and agencies as the Secretary determines is appropriate) determines that the ICTS Transaction: (1) Involves ICTS designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary; and (2) poses an undue or unacceptable risk. Executive Order, Section 1(a). The Executive Order further provides the Secretary with the authority to prohibit such an ICTS Transaction or ''design or negotiate measures to mitigate concerns'' about an ICTS Transaction's impact on national security. Executive Order, Section 1(b).

On November 27, 2019, the Department of Commerce (Department) published a proposed rule to implement the terms of the Executive Order. (84 FR 65316). The proposed rule set forth processes for (1) how the Secretary would evaluate and assess transactions involving ICTS to determine whether they pose an undue risk of sabotage to or subversion of the ICTS supply chain, or an unacceptable risk to the national security of the United States or the security and safety of U.S. persons; (2) how the Secretary would notify parties to transactions under review of the Secretary's decision regarding the ICTS Transaction, including whether the Secretary would prohibit or mitigate the transaction; and (3) how parties to transactions reviewed by the Secretary could comment on the Secretary's preliminary decisions. The proposed rule also provided that the Secretary could act without complying with the proposed procedures where required by national security. Finally, the Secretary would establish penalties for violations of mitigation agreements, the regulations, or the Executive Order.

In addition to seeking general public comment, the Department requested comments from the public on five specific questions: (1) Whether the Secretary should consider categorical exclusions or whether there are classes of persons whose use of ICTS cannot violate the Executive Order; (2) whether there are categories of uses or of risks that are always capable of being reliably and adequately mitigated; (3) how the Secretary should monitor and enforce any mitigation agreements applied to a transaction; (4) how the terms, ''transaction,'' ''dealing in,'' and ''use of'' should be clarified in the rule; and (5) whether the Department should add record-keeping requirements for information related to transactions.

In response to requests for additional time in which to comment on the proposed rule, the Department extended the initial comment period from December 27, 2019, until January 10, 2020. (84 FR 70445). As reflected herein, the Department has carefully considered and addressed the public's comments in promulgating this rule.

Nonetheless, because several commenters requested that the Department provide for an additional round of public comment, and in an effort to continue the Department's work to protect the national security while reducing the regulatory impact on the public, the Department is taking further public comment on the rule. However, mindful of the urgent need of the United States to address national security concerns related to ICTS Transactions,

this interim final rule will be effective March 22, 2021. The Department is committed to issuing a subsequent final rule in which the Department will consider and respond to additional comments received. In addition, the Department will implement and publish procedures for a licensing process by May 19, 2021.

II. Response to Comments

During the public comment period on the proposed rule, the Department received a number of written submissions reflecting a wide range of views. All comments received by the end of the comment period are available on the public rulemaking docket at *https://www.regulations.gov.* Additionally, the Department participated in a number of meetings with foreign governments and industry groups to discuss the proposed rule prior to the comment period ending. Summaries of those meetings are available at *https://www.regulations.gov.* Below, the Department addresses the comments as they pertain to each relevant provision of the regulation.

§ 7.2 Definitions

§ 7.2—Definition of ''appropriate agency heads''

Numerous comments addressed the extent to which the Department interacts with other agencies and department heads throughout the process for reviewing ICTS Transactions. Some commenters advocated for the rule to require interagency review of all parts of the investigations and final determinations, while other commenters noted that interagency review should only happen during certain parts of the review process. Other commenters requested that the Secretary notify the heads of relevant agencies when a review is initiated.

Requirements regarding interagency review are already contained within the Executive Order and, thus, are not subject to change.

Nevertheless, for clarification, the Department has replaced the term ''identified secretaries'' with ''appropriate agency heads,'' to address the fact that some of the individuals referenced are not Cabinet Secretaries, but rather are heads of agencies. For clarity, the term ''appropriate agency heads'' refers to the Secretary of the Treasury, the Secretary of State, the Secretary of Defense, the Attorney General, the Secretary of Homeland Security, the United States Trade Representative, the Director of National Intelligence, the Administrator of General Services, the Chairman of the Federal Communications Commission, and the heads of any other executive departments and agencies the Secretary of Commerce determines is appropriate. The Executive Order makes clear the Secretary of Commerce will confer with other agencies and departments as needed.

§ 7.2—Definition of ''Department''

Although it was not defined in the proposed rule, the Department has added a definition of the term ''Department'' to clarify that it refers to the United States Department of Commerce, rather than any other Cabinet-level agency.

§ 7.2—Definition of ''foreign adversary''

The rule grants the Secretary the authority to block or mitigate certain ICTS Transactions involving a foreign adversary. Commenters suggested limiting the definition of a ''foreign adversary'' to entities already identified in legislation. Some commenters recommended changing the concept of ''foreign adversary'' to focus on entities or persons instead of nation-states. Other commenters suggested that the Department create a list of adversaries and a list of exempt countries and distinguish between government and non-governmental entities. Commenters also recommended narrowing the scope of the term ''foreign adversary'' to situations where a foreign adversary has controlling interest in the company executing the covered transaction.

The rule makes no changes to the definition of ''foreign adversary,'' which is consistent with the Executive Order's definition. However, as discussed further below, the rule now includes a provision titled ''Determination of foreign adversaries'' in section 7.4. This provision sets out the list of foreign governments and foreign non-government persons that the Secretary has determined, solely for the purposes of the Executive Order, this rule, and any subsequent rules, are ''foreign adversaries.'' It also explains some of the factors that the Secretary considered, and will consider, when making any future determinations of whether a country is a ''foreign adversary.'' Pursuant to the Secretary's discretion, the list of foreign adversaries will be revised as determined to be necessary. Because the determination of foreign adversaries is subject solely to the Secretary's discretion, such revisions will be effective immediately upon publication in the **Federal Register** without prior notice or opportunity for public comment.

The list of ''foreign adversaries'' consists of the following foreign governments and non-government persons: The People's Republic of China, including the Hong Kong Special Administrative Region (China); the Republic of Cuba (Cuba); the Islamic Republic of Iran (Iran); the Democratic People's Republic of Korea (North Korea); the Russian Federation (Russia); and Venezuelan politician Nicolás Maduro (Maduro Regime). The provision clarifies that the Secretary's determination is based on multiple sources, including the National Security Strategy of the United States, the Office of the Director of National Intelligence's 2016–2019 Worldwide Threat Assessments of the U.S. Intelligence Community, and the 2018 National Cyber Strategy of the United States of America, as well as other reports and assessments from the U.S. Intelligence Community, the U.S. Departments of Justice, State and Homeland Security, and other relevant sources. Additionally, the provision notes that the Secretary will periodically review this list in consultation with appropriate agency heads and may add to, subtract from, supplement, or otherwise amend the list.

It is important to note that the list at section 7.4 identifies ''foreign adversaries'' solely for the purposes of the Executive Order, this rule, and any subsequent rules. It does not reflect a determination by the United States about the nature of such foreign governments or foreign non-government persons for any other purpose.

§ 7.2—Definition of ''ICTS Transaction''

The proposed rule defined the term ''transaction'' using terms from the Executive Order, to mean, ''any acquisition, importation, transfer, installation, dealing in, or use of any information and communications technology or service.'' It also noted that the term ''transaction'' ''includes a class of transactions.''

Some commenters requested the Department refine the definition of ''transaction'' in various ways. For example, some commenters suggested adopting language from the Securities Exchange Act of 1934 to define some of the terms in the definition, such as ''dealing in.'' Others urged the Department to further clarify the definition ''transaction'' to define the terms ''acquisition,'' or ''use'' in the definition.

The Department acknowledges that the terms ''transaction,'' ''acquisition,'' and ''use'' are broad, and retain their commonly-accepted meanings in the rule. The concerns raised by the

commenters are addressed by defining the term ''ICTS Transaction'' to include (1) ''ongoing activities, such as managed services, data transmission, software updates, repairs, or the platforming or data hosting of applications for consumer download;'' and (2) ''any other transaction, the structure of which is designed or intended to evade or circumvent the application of the Executive Order.'' The purpose of these additions is to clarify that the Secretary may review ICTS Transactions, including the provision of services, that occur on or after January 19, 2021, by any person owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary. Providing services, such as software updates, to U.S. persons may provide a foreign adversary an opportunity to engage in the types of activities that may threaten U.S. national security, as described above. Further, the definition of ICTS Transaction clarifies that attempting to structure a transaction in order to circumvent Secretarial review is nonetheless an ICTS Transaction subject to this rule.

§ 7.2—Definition of ''party or parties to a transaction''

Several commenters expressed an interest in the Department further clarifying what entities are covered by the rule. Further, in revising the proposed rule for finalization, the Department used the term ''party to a transaction'' in several instances and believes it would be beneficial to define that term. Accordingly, the rule adds a definition of ''party or parties to a transaction,'' to mean a person engaged in an ICTS Transaction, including the person acquiring the ICTS and the person from whom the ICTS is acquired. The term ''person'' is also defined by the rule and is unchanged from the proposed rule.

''Party or parties to a transaction'' include entities designed or intended to evade or circumvent application of the Executive Order. For purposes of this rule, this definition does not include common carriers that transport goods for a fee on behalf of the general public, except to the extent that a common carrier knows, or should have known (as the term ''knowledge'' is defined in 15 CFR 772.1), it was providing transportation services of ICTS to one or more of the parties to a transaction that has been prohibited in a final written determination made by the Department or permitted subject to mitigation measures.

This addition narrows the scope of the rule by adding clarity regarding which persons are responsible for a reviewable transaction. This also affects which parties will be notified by the Department regarding any potential review of a transaction.

§ 7.2—Definition of ''Person owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary''

In addition to defining ''party or parties to a transaction,'' the Department sought to add clarity to the rule by defining the phrase ''person owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary,'' as many commenters expressed concern that leaving such terms undefined might create confusion about the breadth of the rule's reach. The Department defines ''person owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary'' to mean ''any person, wherever located, who acts as an agent, representative, or employee, or any person who acts in any other capacity at the order, request, or under the direction or control, of a foreign adversary or of a person whose activities are directly or indirectly supervised, directed, controlled, financed, or subsidized in whole or in majority part by a foreign adversary; any person, wherever located, who is a citizen or resident of a nation-state controlled by a foreign adversary; any corporation, partnership, association, or other organization organized under the laws of a nation-state controlled by a foreign adversary; and any corporation, partnership, association, or other organization, wherever organized or doing business, that is owned or controlled by a foreign adversary.''

§ 7.2—Sensitive Personal Data

Many commenters requested additional clarity about the specific ICTS that is subject to this rule. While it is impossible to identify all of the ICTS that may present undue or unnecessary risks, the Department has defined the term, ''sensitive personal data,'' to identify, along with the information identified in section 7.3 of the rule, some of types of information or communications that might be involved in an ICTS Transaction reviewed under this rule where a party or parties to a transaction use, possess, or retain, or are expected to use, possess, or retain sensitive personal data.

The term ''sensitive personal data'' includes: (1) Personally Identifiable Information (*i.e.,* data that can identify individuals) that is maintained or collected by a U.S. business operating in specific areas, and that is maintained or collected on over one million people over a 12 month period; and (2) results of individual genetic testing.

The categories of identifiable data of concern to the Department are: Financial data that could be used to indicate an individual's financial distress or hardship; the set of data included in consumer reports; the set of data used for health and certain financial insurance applications; data relating to the physical, mental, or psychological health condition of an individual; non-public electronic communication information, such as personal emails; geolocation data used in certain technologies; biometric data; data stored and processed for generating Federal, State, Tribal, Territorial, or other government identification cards; data concerning U.S. Government personnel security clearance status; and data from security clearance or employment applications.

As indicated in section 7.3, Scope, the Department believes that ICTS Transactions involving sensitive personal data could create risks for the U.S. national security and also believes it is important to specifically identify these categories of data to provide the regulated community with additional specificity and certainty as to the scope of the rule's application.

§ 7.2—Definition of ''Undue or unacceptable risk''

Commenters recommended various alternative uses for and limits on this term. For example, some suggested that the Department identify certain industries or types of transactions that do not pose a risk to national security, and that the Department should exempt certain types of transactions from the rule.

Most of the suggestions could unnecessarily limit the United States' ability to determine its national security interests and, thus, could limit the ability to protect the Nation. However, the Department agrees the term requires definition, and in this rule adopts the definition of ''undue or unacceptable risks'' as those risks identified in Section 1(a)(ii) of the Executive Order. Section 1(a)(ii) of the Executive Order includes the following risks . . . an undue risk of sabotage to or subversion of the design, integrity, manufacturing, production, distribution, installation, operation, or maintenance of information and communications technology or services in the United States; . . . an undue risk of catastrophic effects on the security or resiliency of United States critical infrastructure or the digital economy of the United States; or . . . an unacceptable risk to the national

security of the United States or the security and safety of United States persons.

§ 7.3 Scope of Covered ICTS Transactions

Many commenters suggested ways the Department could narrow the scope of the rule to provide more guidance for the types of transactions the Department may review. For example, commenters noted the potential impact of the proposed rule on certain types of transactions, such as transportation services of ICTS, and argued the rule would harm commenters' industries. They also argued that the proposed rule was overly broad and that narrowing the scope would bring greater economic certainty to ICTS Transactions and the technology industry as a whole.

Other commenters sought to have the Department identify categorical exemptions for select industries, such as ICTS Transactions involving medical devices or services for air traffic control, while yet others sought to exempt transactions involving companies with their business headquarters in allied nations, such as Japan. Commenters also suggested that, provided appropriate cybersecurity mitigation techniques exist, transactions involving otherwise banned equipment should be exempted from this rule.

The Department concludes that categorical exemptions of specific industries or geographic locations are unwarranted at this time, although the Secretary may consider this possibility in the future. Wholesale exemptions of industries and geographic locations would not serve the rule's intended purpose of securing the ICTS supply chain because such exemptions would contradict the Department's evaluation method for ICTS Transactions. Such exemptions would indicate to foreign adversaries whole classes of ICTS Transactions outside the scope of evaluation under this rule. This would allow foreign adversaries to pinpoint certain types of ICTS Transactions that would more easily escape Departmental oversight and, therefore, threaten U.S. national security. By retaining broad authority across industries, the Department will be better able to mitigate identified risks.

While the rule does not contain categorical exemptions of specific industries or geographic locations, the rule now specifies that ICTS Transactions that involve certain technologies, hardware, or software will be considered to be covered ICTS Transactions. Additionally, the rule does make clear that, as further discussed below, the acquisition of ICTS items by a United States person as a party to a transaction authorized under a U.S. government-industrial security program, is not an ICTS Transaction. Additionally, the Department acknowledges that ICTS Transactions solely involving personal ICTS hardware devices, such as handsets, do not warrant particular scrutiny.

§ 7.3—Technology Sectors

Many commenters requested that the Department identify those technologies or products that the Department considers create the greatest risks to the national security of the United States. The Department understands the desire for additional certainty and broke down the scope of technologies included under the scope of this rule into six main types of ICTS Transactions involving: (1) ICTS that will be used by a party to a transaction in a sector designated as critical infrastructure by Presidential Policy Directive 21—Critical Infrastructure Security and Resilience, including any subsectors or subsequently designated sectors; (2) software, hardware, or any other product or service integral to wireless local area networks, mobile networks, satellite payloads, satellite operations and control, cable access points, wireline access points, core networking systems, or long- and short-haul systems; (3) software, hardware, or any other product or service integral to data hosting or computing services that uses, processes, or retains, or is expected to use, process, or retain, sensitive personal data on greater than one million U.S. persons at any point over the twelve months preceding an ICTS Transaction; (4) certain ICTS products which greater than one million units have been sold to U.S. persons at any point over the twelve months prior to an ICTS Transaction; (5) software designed primarily for connecting with and communicating via the internet that is in use by greater than one million U.S. persons at any point over the twelve months preceding an ICTS Transaction; (6) ICTS integral to artificial intelligence and machine learning, quantum key distribution, quantum computing, drones, autonomous systems, or advanced robotics.

§ 7.3—Licensing Process for Potential Transactions

Many commenters requested that the Department establish a process for entities to seek pre-approval of their ICTS Transactions, similar to the process by which entities may inform the Committee on Foreign Investment in the United States (CFIUS) of investments in U.S. businesses, and obtain ''safe harbor'' for those transactions. Commenters argued that such a process would help ease business uncertainty in specific cases.

To afford parties greater certainty, within 60 days of the publication date of this rule, the Department intends to publish procedures to allow a party or parties to a proposed, pending, or ongoing ICTS Transaction to seek a license, pursuant to Section 2(b) of the Executive Order, in a manner consistent with the national security of the United States. Within 120 days of the publication date of this rule, the Department intends to implement this licensing process. The published procedures will establish criteria by which persons may seek a license to enter into a proposed or pending ICTS Transaction or engage in an ongoing ICTS Transaction. Persons who may seek a license will include any parties to a proposed, pending, or ongoing ICTS Transaction as that term is defined in this rule. License application reviews will be conducted on a fixed timeline, not to exceed 120 days from accepting a license application, to enable qualifying parties to conclude permissible transactions without undue delay. If the Department does not issue a license decision within 120 days from accepting a license application, the application will be deemed granted. In no event, however, would the Department issue a license decision on an ICTS Transaction that would reveal sensitive information to foreign adversaries or others who may seek to undermine U.S. national security. Qualifying parties may voluntarily apply for a license, and a party's decision not to seek a license will not create a negative inference or unfavorable presumption with respect to a transaction.

§ 7.3—Presidential Policy Directive 21—Critical Infrastructure Security and Resilience

Regarding the Department's assessment of undue and unacceptable risk, commenters suggested that the Department create risk criticality categories for transactions, such as low, medium, and high, along with different assessment approaches. Other commenters advocated using risk scores or categories to determine the frequency and rigor of monitoring.

The Department agrees that the scope of the rule could be narrowed to indicate more specifically the types of ICTS Transactions that may be reviewed. Accordingly, the Department clarifies that ICTS Transactions include those that involve, among other aspects, a sector designated as critical

infrastructure by Presidential Policy Directive 21—Critical Infrastructure Security and Resilience, including any subsectors or subsequently designated sectors. As explained below, the Department has also clarified that transactions involving certain sensitive personal data, regardless of whether they involve a critical infrastructure sector, will be considered ICTS Transactions for the purposes of the rule.

§ 7.3—Exclusions

Many commenters sought clarity about the relationship of this rule to the rules relating to CFIUS's review of transactions. In response, the Department is clarifying that this rule does not apply to an ICTS Transaction that CFIUS is actively reviewing, or has reviewed, as a covered transaction or covered real estate transaction or as part of such a transaction under section 721 of the Defense Production Act of 1950, as amended, and its implementing regulations. Note, however, that a transaction involving ICTS that is separate from, and subsequent to, a transaction for which CFIUS has concluded action under section 721 may be subject to review under this rule, if and to the extent that such transactions are separate from the transaction reviewed by CFIUS. Parties should therefore be aware that CFIUS review related to a particular ICTS, by itself, does not present a safe harbor for future transactions involving the same ICTS that may present undue or unnecessary risks as determined by the Department.

§ 7.3—Exclusions of ICTS Transactions

Commenters requested categorical exclusions across many sectors, industries, functions, and nations. The Secretary recognizes the need to be judicious and deliberate in deciding what types of ICTS Transactions pose an undue or unacceptable risk. To that end, the rule excludes from the scope of the rule those transactions that involve the acquisition of ICTS items by a United States person as a party to a transaction authorized under a U.S. Government-industrial security program, because they are subject to continuous security oversight by, and contractual obligations to, other Federal agencies.

§ 7.3—Retroactivity of Rule's Applicability

Some commenters argued that the rule should not apply to transactions that took place prior to May 15, 2019, when the Executive Order was issued. Other commenters advocated for the complete elimination of the proposed rule's retroactivity provisions, and proposed the Department only evaluate potential transactions prospectively. Other commenters proposed grandfathering some ICTS equipment for a predetermined duration, potentially up to 10 years. In reviewing these comments and the proposed rule, the Department determined that the temporal limits of the rule's application could be clarified.

In response to these comments, the Department has clarified, in section 7.3(a)(3), that the rule applies to an ICTS Transactions that is initiated, pending, or completed on or after January 19, 2021. Further, any act or service with respect to an ICTS Transaction, such as execution of any provision of a managed services contract or installation of software updates, is an ICTS Transaction on the date that the service or update is provided. Thus, if a person that is owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary engages in an ICTS Transaction with a person subject to the jurisdiction of the United States on or after January 19, 2021, even if the service was provided pursuant to a contract initially entered into prior to January 19, 2021, that transaction is an ICTS Transaction that may be reviewed under this rule. The service is a new transaction separate from the underlying contract that will be subject to review by the Secretary.

§ 7.4 Determination of Foreign Adversaries

As noted above, many commenters requested the Department identify those countries that it considers to be ''foreign adversaries.'' Naming these countries, the commenters argued, would facilitate global trade by allowing U.S. businesses to assess the risks of certain types of ICTS Transactions from certain countries. It would also allow companies to adjust their supply chains to avoid the risks in such transactions, including the risk of an ICTS Transaction being reviewed, and possibly prohibited or modified, under this rule. Several commenters also noted that defining ''foreign adversaries'' would help determine, and possibly reduce, the adverse economic impact the rule may have on businesses through better business planning.

In response to these comments, the Department reconsidered its prior determination not to identify specific ''foreign adversaries.'' The Department has determined that it is beneficial for the clarity of the rule, as well as for persons with ICTS Transactions that may be subject to the rule, to identify certain foreign governments and foreign non-government persons that are considered, solely for the purposes of the Executive Order, this rule, and any subsequent rules, to be ''foreign adversaries.'' The list of foreign governments and foreign non-government persons this rule identifies as being ''foreign adversaries'' are: The People's Republic of China, including the Hong Kong Special Administrative Region (China); the Republic of Cuba (Cuba); the Islamic Republic of Iran (Iran); the Democratic People's Republic of Korea (North Korea); the Russian Federation (Russia); and Venezuelan politician Nicolás Maduro (Maduro Regime). The Secretary identified these foreign adversaries because they have engaged in a long-term pattern or serious instances of conduct significantly adverse to the national security of the United States or security and safety of United States persons, including taking actions and enacting policies that are inimical to the interests of the United States.

The determination to identify these ''foreign adversaries'' is based on multiple sources, including threat assessments and reports from the U.S. Intelligence Community, the U.S. Departments of Justice, State, and Homeland Security, and other relevant sources. Additionally, the Secretary will periodically review this list in consultation with appropriate agency heads and may add to, subtract from, supplement, or otherwise amend the list. Accordingly, this list may be revised at any time in the future. Any such changes will be announced in the **Federal Register**.

It is important to note that the list is solely for the purposes of the Executive Order, this rule, and any subsequent rules and does not reflect a determination by the United States about the nature of such foreign governments and foreign non-government persons for any purposes other than that ICTS Transactions with persons (as defined in this rule) owned by, controlled by, or subject to the jurisdiction or direction of an identified foreign adversary may pose an undue or unacceptable risk. Further, the rule states that any amendment to this list will apply to any ICTS Transaction that is initiated, pending, or completed on or after the date that the list is amended.

§ 7.5 Effect on Other Laws

Many commenters suggested that this rule should not apply if overlapping and existing U.S. authorities are in force, referencing in particular existing national security regulatory regimes. Specifically, commenters pointed to CFIUS; authorities under various National Defense Authorization Acts;

the Export Administration Regulations; the Committee for the Assessment of Foreign Participation in the United States Telecommunications Services Sector (*i.e.,* Team Telecom); and other programs under the authority of the Federal Communications Commission, the Department of Homeland Security, and the Office of the Director of National Intelligence. Other commenters recommended exempting equipment provided by companies involved in mitigation agreements with the Federal Government.

This rule does not alter or affect any of these existing authorities; it is intended to complement, not supplant, these existing regimes. However, the Department understands the need for regulatory and business certainty, and in the interest of not duplicating efforts by other parts of the U.S. Federal government, the rule states that it does not apply to ICTS Transactions that CFIUS is actively reviewing, or has reviewed, as a covered transaction or covered real estate transaction or as part of such a transaction under section 721 of the Defense Production Act of 1950, as amended, and its implementing regulations. However, this exclusion in no way precludes a review of a subsequent ICTS Transaction if distinct from the previously CFIUS-reviewed transaction or new information is discovered.

Other provisions of the rule provide additional means of ensuring that any action taken by the Secretary neither conflicts with nor frustrates the purposes of other existing laws, regulations or processes. Thus, there are two separate points during the review process at which the Secretary is expressly required to consult with appropriate agency heads: before making an initial determination that the transactions is an ICTS Transaction that poses an undue or unacceptable risk (section 7.104) and before making a final determination (section 7.108). In requiring that the Secretary consult with other agency heads, the rule provides for a coordination mechanism with other agencies and Departments that have potentially overlapping jurisdiction. For example, before making an initial determination concerning a transaction, the review of which might potentially overlap with a review under CFIUS, the Secretary is required to consult with, among others, the Secretary of the Treasury, who serves as the Chairperson of CFIUS, thereby helping to ensure coordination and avoid redundancy.

In addition, section 7.100(a) of the rule provides that the Secretary may consider all relevant information provided by any U.S. Government national security body or other Federal Government agency, department or regulatory body in determining what action may be necessary to ameliorate a threat posed by an ICTS Transaction.

Subpart B—Review of ICTS Transactions

Commenters largely recommended the final rule clarify the review process, requesting the specific criteria by which the Department will use to review transactions. As a whole, Subpart B adds a more detailed review process, as requested by commenters.

§ 7.100 General

§ 7.100(a)—Consideration of Relevant Information

Many commenters sought clarity as to the type of information on which the Secretary could base a determination to commence an evaluation of a transaction. In response to these comments, section 7.100(a) identifies sources or information, factors, and other variables related to a transaction that the Secretary may consider when reviewing a transaction. This list is non-exclusive and does not prevent the Secretary from reviewing any available information; the list is intended to provide parties to transactions with greater clarity about the types of materials on which the Secretary may rely when deciding whether to review (and during that review of) a transaction.

The rule states that the Secretary may consider information provided by any U.S. Government national security body or other Federal agencies. In addition, the rule clarifies that the Secretary, when making determinations about specific transactions, may also consider information that includes: (1) Relevant public information; (2) confidential business or proprietary information; (3) classified national security information; (4) information from State, local, tribal, or foreign governments; (5) information from parties to a transaction, including records related to such transaction that any party keeps or uses, or would be expected to keep or use, in their ordinary course of business for such a transaction; (6) information obtained through the authority granted under sections 2(a) and (c) of the Executive Order and IEEPA; and (7) information provided by any other U.S. Government agency, department, or other regulatory body.

The rule further revises section 7.100(a) to specify that information may be obtained through any administrative investigative or enforcement action undertaken pursuant to the authority granted under sections 2(a) and (c) of the Executive Order and IEEPA. The purpose of this clarification is to set out precisely the authorities that grant the Secretary the power to access and collect documents related to investigations and determinations of potentially prohibited transactions.

§ 7.100(c)—Determining Foreign Adversary Involvement

In order to provide industry with more clarity regarding the determination of whether an ICTS Transaction involves ICTS designed, developed, manufactured, or supplied, by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary, the Department added guidance about what information it will consider when making these decisions. These factors include: (1) Whether the party or its component suppliers have headquarters, research, development, manufacturing, test, distribution, or service facilities or other operations in a foreign country, including one controlled by a foreign adversary; (2) personal and professional ties between the party—including its officers, directors or similar officials, employees, consultants, or contractors—and any foreign adversary; (3) laws and regulations of the foreign adversary in which the party is headquartered or conducts operations, including research and development, manufacturing, packaging, and distribution; and (4) any other criteria that the Secretary deems appropriate.

§ 7.100(d)—Factors for Determining an Undue or Unacceptable Risk

Commenters also requested additional information from the Department about how it will determine whether an ICTS Transaction poses an undue or unacceptable risk. Along with listing factors to help determine the relationship between a foreign party to an ICTS Transaction and a foreign adversary, the Department has provided guidance on some of the information that the Secretary, in consultation with the appropriate agency heads, will consider when determining the impact of an ICTS Transaction on U.S. national security.

Specifically, when determining whether an ICTS Transaction poses an undue or unacceptable risk, the Secretary and the appropriate agency heads will consider factors such as: (1) Threat assessments and reports prepared by the Director of National Intelligence pursuant to section 5(a) of the Executive Order; (2) removal or exclusion orders issued by the Secretary

of Homeland Security, the Secretary of Defense, or the Director of National Intelligence (or their designee) pursuant to recommendations of the Federal Acquisition Security Council, under 41 U.S.C. 1323; (3) relevant provisions of the Defense Federal Acquisition Regulation and the Federal Acquisition Regulation, and their respective supplements; (4) entities, hardware, software, and services that present vulnerabilities in the United States as determined by the Secretary of Homeland Security pursuant to section 5(b) of the Executive Order, Department of Homeland Security Cybersecurity and Infrastructure Security Agency, ''Information and Communications Technology Supply Chain Risk Management Task Force: Interim Report,'' September 18, 2019; (5) actual and potential threats to execution of a ''National Critical Function'' identified by the Department of Homeland Security Cybersecurity and Infrastructure Security Agency; (6) the nature, degree, and likelihood of consequence to the United States public and private sectors that could occur if ICTS vulnerabilities were to be exploited; and (7) any other source or information that the Secretary deems appropriate.

§ 7.100(d)—Risk Management

The Department specifically requested comments on transactions that could present an undue or unacceptable risk, but where that risk could be reliably and adequately mitigated or prevented. Commenters suggested creating national security risk categories for transactions and providing assurance that the Secretary would impose the least intrusive measures to mitigate transactions in each category. Other commenters advocated creating risk categories or bands with different assessment approaches. The Department did not adopt these suggestions. ICTS Transaction reviews are made on a case-by-case basis. Therefore, categorically labeling transactions with pre-determined mitigation requirements would effectively counteract that individualized approach and may result in ICTS Transactions proceeding that otherwise should have been reviewed, and possibly prohibited or mitigated.

In determining whether an ICTS Transaction poses an undue or unacceptable risk, the rule clarifies the risk factors the Secretary, in consultation with the appropriate agency heads, may consider. Specifically, the Secretary may consider: (1) Threat assessments and reports prepared by the Director of National Intelligence pursuant to section 5(a) of the Executive Order; (2) removal or exclusion orders issued by the Secretary of Homeland Security, the Secretary of Defense, or the Director of National Intelligence (or their designee) pursuant to recommendations of the Federal Acquisition Security Council, under 41 U.S.C. 1323; (3) relevant provisions of the Defense Federal Acquisition Regulation and the Federal Acquisition Regulation, and their respective supplements; (4) entities, hardware, software, and services that present vulnerabilities in the United States as determined by the Secretary of Homeland Security pursuant to section 5(b) of the Executive Order, Department of Homeland Security Cybersecurity and Infrastructure Security Agency, ''Information and Communications Technology Supply Chain Risk Management Task Force: Interim Report,'' September 18, 2019; (5) actual and potential threats to execution of a ''National Critical Function'' identified by the Department of Homeland Security Cybersecurity and Infrastructure Security Agency; (6) the nature, degree, and likelihood of consequence to the United States public and private sectors that could occur if ICTS vulnerabilities were to be exploited; and (7) any other source or information that the Secretary deems appropriate.

§ 7.101 Information To Be Furnished on Demand

The proposed rule contemplated that individuals might be requested to furnish the Secretary with information related to a transaction under review. Section 7.101 in this rule clarifies that, under the Secretary's authority pursuant to IEEPA, persons may be required to furnish under oath complete information relative to any ICTS Transaction under review. The Secretary may require that such reports include the production of any books, contracts, letters, papers, or other hard copy or electronic documents relating to any such act, transaction, or property, in the custody or control of the persons required to make such reports. Reports may be required either before, during, or after an ICTS Transaction under review. Additionally, under the authorities provided by IEEPA, the Secretary may, through any person or agency, conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of any books, contracts, letters, papers, and other hard copy or electronic documents relating to any matter under investigation.

§ 7.102 Confidentiality of Information

The proposed rule requested comments and recommendations from stakeholders on additional recordkeeping requirements for information related to transactions. Most commenters focused on the confidentiality and the public availability of any information received. Commenters strongly advocated that the Department protect confidential or proprietary business information when making or publishing reports. Some commenters advocated for more open publication of these reports, and how each threat was mitigated or eliminated.

To address these concerns and provide additional certainty for entities required to produce documents related to transactions, the rule clarifies the Department's responsibility to preserve the confidentiality of information requested by the Department. Specifically, the rule provides that information or documentary materials that are not otherwise publicly or commercially available, submitted or filed with the Secretary under this part, will not be released publicly except to the extent required by law. However, the Secretary may disclose information or documentary materials, not otherwise publicly or commercially available: (1) Pursuant to any administrative or judicial proceeding; (2) pursuant to an act of Congress; (3) pursuant to a request from any duly authorized committee or subcommittee of Congress; (4) pursuant to a request to any domestic governmental entity, or to any foreign governmental entity of a United States ally or partner, information or documentary materials, not otherwise publicly or commercially available and important to the national security analysis or actions of the Secretary, but only to the extent necessary for national security purposes, and subject to appropriate confidentiality and classification requirements; (5) where the parties or a party to a transaction have consented the information or documentary materials not otherwise publicly or commercially available may be disclosed to third parties; and (6) any other purpose authorized by law. These provisions largely incorporate the record release requirements of the Freedom of Information Act, 5 U.S.C. 552. While the Department will, as always, seek to protect business and other confidential information provided by parties, parties providing such information in response to this rule must clearly mark those documents as business or other confidential.

§ 7.103 Initial Review of ICTS Transactions

Many commenters addressed the manner in which an ICTS Transaction could be identified to the Secretary as a transaction that should be reviewed. In particular, many commenters sought clarity on the proposed provision that the Secretary could commence evaluations of transactions based on information received from private parties ''that the Secretary determines to be credible.'' The commenters requested clear guidance on what types of information, or parties, the Secretary would deem credible. Additionally, several commenters noted that such a provision might incentivize parties to engage in anti-competitive behavior that would not necessarily lead to identifying transactions posing risks to national security. In light of these comments and concerns, the rule clarifies that the Secretary may consider any referral for review of a transaction (referral): (1) Upon receipt of any information identified in section 7.100(a); (2) upon written request of an appropriate agency head; or (3) at the Secretary's discretion. Following receipt of a referral, the Secretary will assess whether the referral falls within the scope of § 7.3(a) and involves ICTS designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction of direction of a foreign adversary, and determine whether to: (1) Accept the referral and commence an initial review of the transaction; (2) request additional information, as identified in § 7.100(a), including information from the referring entity regarding the referral; or (3) reject the referral.

Several commenters requested the rule establish clearer procedures for how the Secretary will review ICTS Transactions. Commenters also advocated for differing determination timeframes, deadlines, or milestones based on device nature, threat severity, equipment replacement risks, and other potential harms.

In response to these and other comments, the Department provides that, unless the Secretary determines in writing that additional time is necessary, the Secretary shall issue the final determination within 180 days of accepting a referral and commencing the initial review of the ICTS Transaction. Regarding the procedures for the Secretary's review of ICTS Transactions, the Executive Order provides a careful process for the Secretary's decision-making. The rule further sets out the factors that the Secretary will consider to assist the decision-making process. Specifically, the rule provides that the Secretary shall assess whether the ICTS Transaction: Falls within the scope of § 7.3(a) of the rule; involves ICTS designed, developed, manufactured, or supplied, by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary; and poses an undue or unacceptable risk. The Secretary will evaluate each transaction, on a case-by-case basis, based upon the particular facts and circumstances, including the identity of the parties involved.

The rule also further articulates what the Secretary will consider when determining whether an ICTS Transactions poses an undue or unacceptable risk. The Department has identified ten criteria for such determinations. Along with other factors, when determining if an ICTS Transaction poses an undue or unacceptable risk, the Secretary will consider the nature of the information and communications technology or services at issue in the ICTS Transaction, including technical capabilities, applications, and market share considerations; the nature and degree of the direction or jurisdiction exercised by the foreign adversary over the design, development, manufacture, or supply at issue in the ICTS Transaction; and the statements and actions of the foreign adversary at issue in the ICTS Transaction. Other considerations include whether the ICTS Transaction poses a discrete or persistent threat and the nature of the vulnerability implicated by the ICTS Transaction.

§ 7.104 First Interagency Consultation

The Department has clarified that the Secretary will consult with the appropriate agency heads after finding that an ICTS Transaction may fall within the scope of the Executive Order.

§ 7.105 Initial Determination

This rule clarifies that if, after review of an ICTS Transaction and consultation with the appropriate agency heads, the Secretary determines that such ICTS Transaction meets the criteria in section 7.103(c) of the rule, the Secretary shall then issue an initial written determination explaining the finding and whether the Secretary has determined to prohibit or propose mitigation measures to the ICTS Transaction at issue. The initial determination will contain no confidential information, even if such was relied upon to make the initial determination. Notice of this initial determination shall be served upon the parties to the ICTS Transaction known to the Secretary at the time of service. Service may be made by registered U.S. mail, facsimile, electronic transmission, or third-party commercial carrier, to an addressee's last known address or by personal delivery. Service of documents will be considered effective upon the date of postmark, facsimile transmission, delivery to third party commercial carrier, electronic transmission or upon personal delivery. Notice of the initial determination to the parties may also be accomplished by publication in the **Federal Register** where the Secretary determines that the initial determination concerns or could impact entities beyond the parties to the ICTS Transaction, where one or more of the parties to the ICTS Transaction are unknown to the Secretary, or in any other circumstance at the Secretary's discretion.

§ 7.106 Retention of Records

The proposed rule requested public comments on whether to require parties to undertake additional recordkeeping for information related to transactions. Some commenters argued that the Department should not impose additional recordkeeping requirements. Additionally, some commenters suggested that the recordkeeping requirement begin upon receipt of a transaction notice, rather than being an ongoing duty for any potentially prohibited ICTS Transaction.

After reviewing these comments, and consistent with IEEPA, the rule provides that, after receiving notification that an ICTS Transaction is under review or that an initial determination concerning an ICTS Transaction has been made, a notified person must immediately take steps to retain any and all records related to such transaction.

§ 7.107 Procedures Governing Response and Mitigation

Commenters requested that the final rule explain how the Secretary's determinations may be ''appealed'' and how mitigation agreements will be reached and enforced. Commenters also sought more robust procedures for waivers, appeals, and mitigation. The proposed rule had provided that, within 30 days of a preliminary determination by the Secretary that a transaction was an ICTS Transaction that would pose an undue or unacceptable risk to the U.S. national security, parties to that transaction could submit a response to the decision. The proposed rule also allowed the Secretary to require a transaction be mitigated to reduce the risks the Secretary identified in the preliminary determination.

In response to these comments, the Department has added provisions to enhance and clarify when and how parties to an ICTS Transaction that is the subject of an initial determination may engage with the Secretary about the initial determination. The rule establishes a clear process for responding to an initial determination concerning an ICTS Transaction and provides further guidance on how any identified risks may be mitigated so that an identified ICTS Transaction may proceed. Similar to the proposed rule, within 30 days of being notified of an initial determination, pursuant to section 7.105 of the rule, parties to that transaction may respond to the initial determination or assert that the circumstances leading to the initial determination no longer apply. A party may submit arguments or evidence in support of their response and may also propose remedial steps that the party believes would negate the basis for the Secretary's initial determination. The rule also allows parties to an ICTS Transaction that is subject to an initial determination to request a meeting with the Department, which may be granted at the Secretary's discretion. Additionally, the rule clarifies that if the parties to an ICTS Transaction do not submit a response to the Secretary's initial determination within 30 days following service of the initial determination, that initial determination will become final.

Other commenters recommended the adoption of an appeals process for parties notified of a final determination. The Department has adopted a process for reconsidering an initial determination by the Secretary. However, an administrative appeals process would hinder the Secretary's ability to move swiftly to prevent an undue or unacceptable risk.

Some commenters also requested that the Department establish a maximum life span for imposed mitigations, arguing that such a rule would reduce the inhibiting effects that mitigations would have on ICTS innovation. The Department disagrees with commenters, finding that such a clause would prevent the Department from evaluating the mitigations put in place on ICTS Transactions. Failing to reevaluate would effectively limit mitigation requirements and potentially reopen national security vulnerabilities.

§ 7.108 Second Interagency Consultation

The proposed rule set out the review process that must be followed before the Secretary issues a final determination that constitutes a final agency action. The process involved response periods, as well as possible extensions, given to any party affected by a preliminary determination. Commenters addressed communications regarding initial and final determinations within the context of this process. Some commenters suggested that the Secretary should collaborate with private industry when making determinations, similar to the process within the Department of Homeland Security's Supply Chain Risk Management Task Force. Similar comments were received advocating for the establishment of a mechanism for industry to seek guidance on specific work programs or participants involved.

The Department has declined to add specific provisions relating to collaborating with industry on ICTS Transaction determinations. However, in consideration of these comments there is now a provision explaining what factors and sources the Secretary will take into consideration during the second consultation. Specifically, the Secretary will take into account the views of the appropriate agency heads, through the interagency consultation processes. In providing their views, the appropriate agency heads may consider the perspective of relevant public-private working groups and advisory committees with which they convene or engage. For instance, DHS's views could incorporate input from the Supply Chain Risk Management Task Force. The Department also points out that it maintains a number of advisory committees that provide regular opportunities for industry and the regulated community to provide feedback to the Department on issues impacting their operations. Under the Secure and Trusted Communications Networks Act of 2020, the National Telecommunications and Information Administration is also charged with establishing a program to share supply chain risk information with telecommunication providers and manufacturers.

Commenters also requested that the Department explain whether and how the Secretary's determinations may be appealed or reviewed by another authority. This rule adds a provision that, should any appropriate agency head oppose the Secretary's proposed final determination, the Secretary shall notify the President of the Secretary's proposed final determination and such opposition. After receiving direction from the President regarding the Secretary's proposed final determination and any appropriate agency head's opposition thereto, the Secretary shall issue a final determination pursuant to § 7.109.

Additionally, the Department will implement, within 120 days of publishing this rule, procedures for how parties to a proposed, pending, or ongoing ICTS Transaction may seek a license, pursuant to Section 2(b) of the Executive Order, in a manner consistent with the national security of the United States.

As noted above, after reviewing an ICTS Transaction that the Secretary believes may pose an undue or unacceptable risk, the Secretary will engage in a first interagency consultation with the appropriate agency heads to discuss the ICTS Transaction and the Secretary's concerns. Following that consultation, the Secretary will make an initial determination and, if that decision includes a determination to prohibit an ICTS Transaction, will notify the parties to the transaction of the Secretary's initial determination. After the parties are afforded an opportunity to respond to the initial determination and propose mitigation measures, the Secretary will engage in a second interagency consultation with the appropriate agency heads, to discuss the transaction, the initial determination, and any response. This process will help ensure that all information regarding ICTS Transactions and the views of the appropriate agency head are considered when the Secretary makes a final determination.

§ 7.109 Final Determination

As noted above, the Department appreciates the comments requesting additional clarity on the process by which the Secretary will make decisions about ICTS Transactions. The rule now provides a specific step for issuing final determinations on ICTS Transactions. The outcome of a final determination remains unchanged from the proposed rule and will provide that an ICTS Transaction is either: (1) Prohibited; (2) not prohibited; or (3) permitted pursuant to the adoption of agreed-upon mitigation measures. Moreover, the rule clarifies that the written final determinations will include directions on the timing and manner of cessation of a prohibited ICTS Transaction, as applicable, along with the penalties, as authorized by IEEPA, for violations of applicable mitigation terms or other direction or prohibition issued under this rule. The final determination will provide a specific description of the prohibited ICTS Transaction and shall be limited in force to the circumstances described therein. Moreover, if the Secretary determines that an ICTS Transaction is prohibited, the final determination shall direct the least

restrictive means that the Secretary, in the Secretary's discretion, determines to be necessary to attenuate or alleviate the undue or unacceptable risk posed by the ICTS Transaction.

§ 7.109(c)—Notification of Final Determination

Commenters also provided a number of suggestions on how to further ensure the Secretary is held accountable for his or her actions under the authority of this rule. Recommendations include limiting the Secretary's ability to assign a designee with final decision-making authority and deleting the emergency action provision set forth in section 7.100(f) of the proposed rule. These suggestions are intended to ensure that Congress can hold the executive branch accountable for enforcement actions.

In response to these comments, the final rule enhances transparency by requiring final written determinations to be published in the **Federal Register**, where they are readily accessible to both the Congress and the public. Moreover, the rule now clarifies that the publication shall omit any confidential business information.

§ 7.200 Penalties

Commenters requested the final rule clarify the type and scope of penalties for noncompliance with the Secretary's prohibition or mitigation of a transaction. We agree with commenters that the type and scope of the penalties for noncompliance were unclear, and the section has been revised accordingly. The rule now clarifies that any person who commits a violation of any final determination, direction, or mitigation agreement may be liable to the United States for civil or criminal penalties under IEEPA.

Other Comments

The Department received other comments with which the Department disagrees. The Department responds to those comments below.

First, one commenter requested that the Department expand the meaning of the term ''electronic means'' within the definition of ICTS. While the Department cannot modify the definition of ICTS contained in the Executive Order, the Department clarifies that ''electronic means'' includes electromagnetic, magnetic, and photonic means. This change is not intended to widen the scope of the rule, but merely to clarify the means by which ICTS must function in order for the rule to apply.

Second, some commenters requested that the Department provide technical assistance for parties forced to alter ICTS infrastructure. However, the Department is unable to offer technical assistance at this time. Accordingly, the Department declines to implement any provision for technical assistance in the rule, and the parties to the transaction will bear the responsibility and cost of complying with any prohibition or mitigation measure.

Third, one commenter argued that the rule imposes an unfunded mandate on the private sector, within the meaning of the Unfunded Mandates Reform Act of 1995, Public Law 104–4 (UMRA), contrary to the determination made by the Department in the proposed rule. The commenter further argued that UMRA requires that before the rule becomes final, the Department must include in the rule a written statement assessing the costs and benefits of the rule, and estimates of future compliance costs, as required by UMRA. The Department continues to believe that the rule does not constitute a ''Federal private sector mandate'' as defined by UMRA, in that the rule does not impose ''an enforceable duty'' upon the private sector. *See* 2 U.S.C. 658(7). Rather, the rule sets out the processes and procedures that the Secretary of Commerce will use to identify, assess, and address certain transactions, including classes of transactions. However, as the commenter notes, when a rule does constitute a ''Federal private sector mandate,'' UMRA requires the agency prepare a written statement containing information about the costs and benefits of the mandate, including, where feasible, future compliance costs, 2 U.S.C. 1532, as well as that the agency identify and consider regulatory alternatives and select the least costly, most cost-effective, or least burdensome alternative that achieves the objectives of the rule, 2 U.S.C. 1535. Thus, even in the event that the rule were considered to constitute a federal private sector mandate, the Department has met these requirements in full through the preparation of the accompanying Regulatory Impact Analysis.

Changes From the Proposed Rule

Upon consideration of the public comments received, the Department makes several changes, as discussed in detail above, from the proposed rule in order to increase clarity and certainty for the public. First, the rule provides detail on the procedures the Secretary will follow when reviewing ICTS Transactions, including identifying the criteria and information the Secretary will consider. For example, the rule provides clarity as to when the Secretary will consult with the appropriate agency heads as part of the review and determination process. Second, the rule details the requirements for responding to initial determinations. Third, the rule clarifies that parties may respond to an initial determination or seek to negotiate a mitigation agreement with the Secretary. Fourth, the rule now provides that unless the Secretary determines in writing that additional time is necessary, the Secretary shall issue a final determination within 180 days of accepting a referral and commencing the initial review of an ICTS Transaction, eliminating the uncertainty of an open-ended review process. Fifth, the rule ensures transparency by specifically requiring the Secretary to publish the results of final determinations, absent any confidential business information, in the **Federal Register**. Sixth, the rule now specifies that an ICTS Transactions between parties outside of a sector designated as critical infrastructure must involve a clearly specified technology or service in order to be considered a covered ICTS Transactions.

Additionally, in response to commenters seeking clarity regarding the scope of the rule, including numerous requests for the identification of ''foreign adversaries,'' the Department defines certain terms. The added definitions help to clarify the scope of the rule by providing guidance on which entities may be subject to the rule, what constitutes an ICTS Transaction, and whether an ICTS Transaction involves a foreign adversary. This additional clarity will assist entities with making appropriate decisions regarding ICTS Transactions that may present risks to the national security, therefore helping to protect the United States' ICTS supply chain.

Classification

A. Executive Order 12866 (Regulatory Policies and Procedures)

Pursuant to the procedures established to implement Executive Order 12866, the Office of Management and Budget has determined that this rule is economically significant.

B. Executive Order 13771 (Reducing Regulation and Controlling Regulatory Costs)

This rule is not subject to the requirements of Executive Order 13771 because the benefit-cost analysis demonstrates that the regulation is anticipated to improve national security as its primary direct benefit.

ICTS has become integral to the daily operations and functionality of U.S. critical infrastructure, as well as much,

if not most, of U.S. industry. Moreover, ICTS accounts for a large part of the U.S. economy. Accordingly, if vulnerabilities in the ICTS supply chain—composed of hardware, software, and managed services from third-party vendors, suppliers, service providers, and contractors—are exploited, the consequences can affect all users of that technology or service, potentially causing serious harm to critical infrastructure, U.S. Government operations, and disrupting the United States and the global economy. These harms are already occurring. As noted in Executive Order 13873, ''foreign adversaries are increasingly creating and exploiting vulnerabilities in information and communications technology and services, which store and communicate vast amounts of sensitive information, facilitate the digital economy, and support critical infrastructure and vital emergency services.''

U.S. entities purchasing and incorporating ICTS equipment and using ICTS services, such as network management or data storage, provided by foreign adversaries can create multiple opportunities for foreign adversaries to exploit potential vulnerabilities in the ICTS. That, in turn, could cause direct and indirect harm to both the immediate targets of the adverse action and to the United States as a whole. Incorporation of a foreign adversary's software, equipment, and products into domestic ICTS networks, as well as the use of use of foreign cloud, network management, or other services, greatly increases the risk that potential vulnerabilities may be introduced, or that they may be present without being detected. These potential vulnerabilities are often categorized under the general concepts of threats to privacy, data integrity, and denial of service.

Some foreign actors are known to exploit the sale or lease of software and hardware to introduce vulnerabilities that can allow them to steal critical intellectual property, research results (*e.g.,* health data), or government or financial information from users of the software or hardware. Such vulnerabilities can be introduced at the network, cloud service or individual product data, allow traffic monitoring or surveillance, and may be resistant to detection by private purchasers or telecommunications carriers. Once detected, the existence of such vulnerabilities may be extremely costly or impossible to remediate.

Vulnerabilities to data integrity can be created by including an adversary's hardware and software into U.S. networks and systems. This incorporated hardware and software could then pose opportunities to add or remove important information, modify files or data streams, slow down, or otherwise modify the normal transmission or availability of data across U.S. networks. Such capabilities could be exercised in areas as diverse as financial market communications, satellite communications or control, or other sensitive consumer information. Privileged access to market movement and trends, or other manipulation, could disrupt and harm the operation of major exchanges.

A foreign adversary could also effectively deny access to critical services by exploiting vulnerabilities provided by the incorporation of hardware and software into U.S. environments, fully or partially shutting down critical networks or functions at key times. These types of attacks are known as denial of service attacks. Such attacks could cause widespread problems, such as if they occur during periods of crisis, or they could be used selectively by targeting individual corporations, infrastructure elements, or other important infrastructure functions. They could also be masked to make the source of the disruption difficult to attribute, and therefore be difficult to trace and terminate.

Such risks can be substantially increased by incorporating the software and equipment from unreliable adversaries into the U.S. telecommunications infrastructure. However, these risks are not necessarily confined to infrastructure environments. They could, for example, be present in the use of cloud services, as well as in the widespread use of some consumer devices, networked surveillance cameras, drones, or interconnection via the internet of computing devices embedded in everyday objects, enabling them to send and receive data.

The number of attacks by foreign adversaries on the ICTS supply chain are known to be increasing. The associated costs are borne by the U.S. Government as well as private industry. Given the ubiquity of ICTS in the modern economy and especially in critical infrastructure, the benefits of preventing significant disruptions or harms to the ICTS supply chain that could cause incalculable costs to U.S. firms, consumers, and the U.S. Government, would be very high.

This rule provides a process through which serious disruptions to the United States telecommunications infrastructure can be avoided or ameliorated. The rule provides the means of bringing to bear the information and analytical resources of the U.S. government to address ICTS supply chain issues before they arise, and which may be beyond the means of individual telecommunications carriers or other U.S. ICTS purchasers or users to address on their own. As noted above, the costs associated with the potential attacks, loss of service, or disruption to the ICTS supply chain are not known at this time, and are in actuality unknowable due to the generally clandestine nature of the attacks and the fact that they may or may not occur. However, by deterring, preventing, or mitigating these attacks, this rule will provide the United States with substantial, though unknowable, economic benefits as well as benefits to the national security of the United States.

C. Regulatory Flexibility Analysis

The Department has examined the economic implications of this final rule on small entities as required by the Regulatory Flexibility Act (RFA). The RFA requires an agency to describe the impact of a rule on small entities by providing a regulatory flexibility analysis. The Department published an initial regulatory flexibility analysis in the proposed rule issued on November 27, 2019 (84 FR 65316) and has posted a final regulatory flexibility analysis (FRFA) as part of the RIA (*see* **ADDRESSES**). This final rule is likely to have a significant economic impact on a substantial number of small entities. A summary of the FRFA follows.

A Statement of the Significant Issues Raised by Public Comments or by the Chief Counsel for Advocacy of the Small Business Administration in Response to the IRFA, a Statement of the Assessment of the Agency of Such Issues, and a Statement of Any Changes Made in the Proposed Rule as a Result of Such Comments

Many commenters discussed the possibility that this rule could present significant economic costs. For example, one commenter stated that ''Commerce's proposed rules would result in an extremely broad and unprecedented increase in regulatory jurisdiction over private ICT transactions. The notice of proposed rulemaking thus marks a watershed regulatory moment for companies in or adjacent to the ICT market—which is to say, virtually every company in United States—given the government's newfound stance that it can determine key terms of what ICT companies can buy, sell, or use. As a result, this proceeding and the rules that result from it inescapably will impose additional costs on ICT companies, such as the increased practical need—even

absent a legal requirement—to document supply chain risk management analysis in the event a transaction is investigated, along with related due diligence to consider the as-yet uncertain possibilities for government intervention.'' In the RIA, the Department estimated costs associated with developing and implementing a plan to conduct due diligence on potentially covered transactions, including estimating the number of small entities that could be affected by the rule and the economic impact on those small entities.

Statement of the Objectives of, and Legal Basis for, the Final Rule

A description of this final rule, why it is being implemented, the legal basis, and the purpose of this final rule are contained in the **SUMMARY** and **SUPPLEMENTARY INFORMATION** sections of this preamble, as well as in the preamble to the Notice of Proposed Rulemaking issued on November 27, 2019 (84 FR 65316), and are not repeated here.

A Description and, Where Feasible, Estimate of the Number of Small Entities to Which the Final Rule Applies

Small Business Administration (SBA) size standards for businesses are based on annual receipts and average employment. For the purpose of this analysis we define a small business as one employing fewer than 500 persons. This definition allows us to use 2017 Census data on firm employment by NAICS industry to estimate the number of affected small entities.

In the RIA, the Department identified 4,533,000 firms that imported significant amounts of goods and services potentially subject to review under the Rule. This formed our upper bound estimate for the total number of affected entities. By replicating this methodology with firm employment data, the Department finds that 4,516,000 of these firms, about 99.6 percent, have less than 500 employees. Assuming the lower bound estimate of 268,000 affected entities is also made up of 99.6 percent small businesses, the Department estimates that between 266,995 and 4,516,000 small businesses will be potentially affected by this rule.

Federal Rules That May Duplicate, Overlap or Conflict With the Final Rule

The Department did not identify any Federal rule that duplicates, overlaps, or conflicts with this final rule.

Description and Estimate of Economic Effects on Entities, by Entity Size and Industry

In the Costs section of the RIA, the Department estimates that costs to all affected entities will range between approximately $235 million and $20.2 billion, or about $2,800 to $6,300 per entity. The Department estimated the costs to small entities using the same methodology. All small entity calculations and assumptions can be found in Tables 10 through 14. These tables are analogous to Tables 5 through 9 in the RIA. While most of the assumptions below are identical to those found in the previous estimates, there are 3 important adjustments to assumptions in the small entity cost estimates:

1. Entities potentially impacted by the rule reduced by 0.4 percent to account for our finding that 99.6 percent of all affected entities have less than 500 employees.

2. Small entities are less likely to have the resources to develop and implement a compliance plan. This analysis thus reduces estimates of the share of small firms likely to engage in these activities accordingly.

3. Small entities engage in fewer transactions than large entities. This analysis reduces the estimates of the number of transactions subject to the rule per small firm accordingly.

As a result of these adjustments, the Department estimates that costs to affected small entities will range between approximately $109 million and $10.9 billion, or about $1,800 and $3,900 per small entity.

Potential Economic Impact of the Rule on Small Entities

Small businesses, as opposed to larger firms, may not have the same ability to deal with the burdens, both direct and indirect, associated with the rule. Faced with the various costs associated with compliance, firms will have to absorb those costs and/or pass them along to their consumers in the form of higher prices. Either action will reduce the profits of firms. Due to their lack of market power, and their lower profit margins, small firms may find it difficult to pursue either or both of those responses while remaining viable.

A similar situation will hold with respect to the indirect impacts of the rule. Small firms downstream of impacted industries are likely to face increases in the prices of ICT products they use as inputs and either absorb the increase in cost and/or raise their prices. Given this situation, it is possible that the rule will have a more substantial adverse impact on small firms relative to larger firms.

However, the changes made from the proposed rule benefit small businesses by limiting the scope of transactions subject to the rule. Small entities have fewer suppliers and engage in fewer transactions than large entities. As a result, by identifying specific foreign adversaries and providing guidance on which entities may be subject to the rule as well as additional criteria on what constitutes an ICTS Transaction, small entities will more readily be able to determine whether their transactions are subject to review under the rule—and may in some cases, find that none of their transaction are likely to be within the scope of the rule. Additionally, by specifically requiring the Secretary to publish the results of final determinations in the **Federal Register**, small businesses will be able to assess whether their transactions are substantially similar to those that have been prohibited. Finally, the rule reduces the potential burdens on small entities by emphasizing that (1) the Secretary will choose the least burdensome restriction that still allows for protection of the national security when deciding whether to prohibit or mitigate an ICTS Transaction, and (2) the Secretary shall issue a final determination within 180 of commencing an initial review.

A Description of, and an Explanation of the Basis for, Assumptions Used

SBA size standards for businesses are based on annual receipts and average employment. For the purpose of this analysis, the Department defines a small business as one employing fewer than 500 persons. This definition allows the Department to use 2017 Census data on firm employment by NAICS industry to estimate the number of affected small entities. The Department does not have access to sufficiently detailed data on firm employment and receipts to make use of the full set of SBA size standard thresholds.

The Department notes, however, that 84% of SBA employee thresholds are above 500, and 91% of SBA receipt thresholds are above $6 million. Census data show that average receipts for firms employing less than 500 employees are $2.2 million. Thus, using our threshold of 500 employees we estimate that 99.6% of affected entities are small businesses which is likely a slight underestimate.

Description of Any Significant Alternatives to the Final Rule That Accomplish the Stated Objectives of Applicable Statutes and That Minimize Any Significant Economic Impact of the Rule on Small Entities

This rule will allow the Secretary to review ICTS Transactions to determine whether they present an undue or unacceptable risk, a function which is currently not performed by any other private or public entity. As noted above, private industry often lacks the incentive, information, or resources to review their ICTS purchases for malicious suppliers or other potentially bad actors in the ICTS supply chain. The U.S. Government is uniquely situated to determine threats and protect the national security, including economic security.

The Department considered two regulatory alternatives to reduce the burden on small entities: (1) Excluding small entities with 5 or fewer employees, and (2) excluding certain industries and sectors. However, the Department determined that neither of these two alternatives would achieve the goal of protecting the national security, nor would they eliminate the rule's significant economic impact on a substantial number of small entities.

First, the Department considered providing an exemption for small entities that have 5 or fewer employees. (''smallest entities''). According to Census Bureau's most recent dataset of number of firms by employee count, about 61% of all firms have less than 5 employees.

Second, the Department examined the feasibility of eliminating the application of the rule to certain small entities involved in specific industries or sectors by excluding: (a) ICTS Transactions that involve only the acquisition of commercial items as defined by Federal Acquisition Regulation Part 2.101; (b) ICTS Transactions that are used solely for the purpose of cybersecurity mitigation or legitimate cybersecurity research; and (c) ICTS Transactions under which a United States person is subject to a security control agreement, special security agreement, or proxy agreement approved by a cognizant security agency to offset foreign ownership, control, or influence pursuant to the National Industrial Security Program regulations (32 CFR part 2004).

Ultimately, the Department decided against adopting either of these regulatory alternatives. Exempting certain industries or sectors or eliminating the application of the rule to smallest entities could inadvertently allow potentially problematic transactions that are substantially similar to those conducted by non-exempt entities to avoid review, undermining the rule's national security objectives. For example, a company that is headquartered in a foreign adversary country, regardless of its size or main industry sector, may be involved in legitimate cybersecurity research and development initiatives performed under the National Cooperative Research and Production Act, 15 U.S.C. 4301–06, and the foreign company may study foreign equipment to gain insights on new innovations or potential network security risks. However, that same company may also be conducting operations during other ICTS Transactions that could harm U.S. national security interests. By promulgating the chosen alternative for the rule, the Department sought to remove both the possibility for confusion as well as the ability for malicious actors to argue that some legitimate cybersecurity research performed by a company would exempt all cybersecurity research by a company, legitimate or otherwise. Thus, the rule applies to types of ICTS Transactions most affecting U.S. national security as opposed to exempting entire industries, sectors, or regulated smallest entities from review.

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules.

D. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA) provides that an agency generally cannot conduct or sponsor a collection of information, and no person is required to respond to nor be subject to a penalty for failure to comply with a collection of information, unless that collection has obtained Office of Management and Budget (OMB) approval and displays a currently valid OMB Control Number. This rulemaking does not contain a collection of information requirement subject to review and approval by OMB under the PRA.

E. Unfunded Mandates Reform Act of 1995

This rule would not produce a Federal mandate (under the regulatory provisions of Title II of the Unfunded Mandates Reform Act of 1995) for State, local, and tribal governments or the private sector.

F. Executive Order 13132 (Federalism)

This rule does not contain policies having federalism implications requiring preparations of a Federalism Summary Impact Statement.

G. Executive Order 12630 (Governmental Actions and Interference With Constitutionally Protected Property Rights)

This rule does not contain policies that have unconstitutional takings implications.

H. Executive Order 13175 (Consultation and Coordination With Indian Tribes)

The Department has analyzed this proposed rule under Executive Order 13175 and has determined that the action would not have a substantial direct effect on one or more Indian tribes, would not impose substantial direct compliance costs on Indian tribal governments, and would not preempt tribal law.

I. National Environmental Policy Act

The Department has reviewed this rulemaking action for the purposes of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*). It has determined that this final rule would not have a significant impact on the quality of the human environment.

List of Subjects in 15 CFR Part 7

Administrative practice and procedure, Business and industry, Communications, Computer technology, Critical infrastructure, Executive orders, Foreign persons, Investigations, National security, Penalties, Technology, Telecommunications.

This document of the Department of Commerce was signed on January 13, by Wilbur Ross, Secretary of Commerce. That document with the original signature and date is maintained by the Department of Commerce. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned Department of Commerce Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Commerce. This administrative process in no way alters

the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 13, 2021.

Asha Mathew,

Federal Register Liaison Officer, U.S. Department of Commerce.

■ For the reasons set out in the preamble, 15 CFR part 7 is added to read as follows:

PART 7—SECURING THE INFORMATION AND COMMUNICATIONS TECHNOLOGY AND SERVICES SUPPLY CHAIN

Subpart A—General

Subpart B—Review of ICTS Transactions

Subpart C—Enforcement

Authority: 50 U.S.C. 1701 *et seq.;* 50 U.S.C. 1601 *et seq.;* E.O. 13873, 84 FR 22689.

Subpart A—General

§ 7.1 Purpose.

These regulations set forth the procedures by which the Secretary may: (a) Determine whether any acquisition, importation, transfer, installation, dealing in, or use of any information and communications technology or service (ICTS Transaction) that has been designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction or direction of foreign adversaries poses certain undue or unacceptable risks as identified in the Executive Order; (b) issue a determination to prohibit an ICTS Transaction; (c) direct the timing and manner of the cessation of the ICTS Transaction; and (d) consider factors that may mitigate the risks posed by the ICTS Transaction. The Secretary will evaluate ICTS Transactions under this rule, which include classes of transactions, on a case-by-case basis. The Secretary, in consultation with appropriate agency heads specified in Executive Order 13873 and other relevant governmental bodies, as appropriate, shall make an initial determination as to whether to prohibit a given ICTS Transaction or propose mitigation measures, by which the ICTS Transaction may be permitted. Parties may submit information in response to the initial determination, including a response to the initial determination and any supporting materials and/or proposed measures to remediate or mitigate the risks identified in the initial determination as posed by the ICTS Transaction at issue. Upon consideration of the parties' submissions, the Secretary will issue a final determination prohibiting the transaction, not prohibiting the transaction, or permitting the transaction subject to the adoption of measures determined by the Secretary to sufficiently mitigate the risks associated with the ICTS Transaction. The Secretary shall also engage in coordination and information sharing, as appropriate, with international partners on the application of these regulations.

§ 7.2 Definitions.

Appropriate agency heads means the Secretary of the Treasury, the Secretary of State, the Secretary of Defense, the Attorney General, the Secretary of Homeland Security, the United States Trade Representative, the Director of National Intelligence, the Administrator of General Services, the Chairman of the Federal Communications Commission, and the heads of any other executive departments and agencies the Secretary determines is appropriate.

Commercial item has the same meaning given to it in Federal Acquisition Regulation (48 CFR part 2.101).

Department means the United States Department of Commerce.

Entity means a partnership, association, trust, joint venture, corporation, group, subgroup, or other non-U.S. governmental organization.

Executive Order means Executive Order 13873, May 15, 2019, ''Securing the Information and Communications Technology and Services Supply Chain''.

Foreign adversary means any foreign government or foreign non-government person determined by the Secretary to have engaged in a long-term pattern or serious instances of conduct significantly adverse to the national security of the United States or security and safety of United States persons.

ICTS Transaction means any acquisition, importation, transfer, installation, dealing in, or use of any information and communications technology or service, including ongoing activities, such as managed services, data transmission, software updates, repairs, or the platforming or data hosting of applications for consumer download. An ICTS Transaction includes any other transaction, the structure of which is designed or intended to evade or circumvent the application of the Executive Order. The term ICTS Transaction includes a class of ICTS Transactions.

IEEPA means the International Emergency Economic Powers Act (50 U.S.C. 1701, *et seq.*).

Information and communications technology or services or ICTS means any hardware, software, or other product or service, including cloud-computing services, primarily intended to fulfill or enable the function of information or data processing, storage, retrieval, or communication by electronic means (including electromagnetic, magnetic, and photonic), including through transmission, storage, or display.

Party or parties to a transaction means a person engaged in an ICTS Transaction, including the person acquiring the ICTS and the person from whom the ICTS is acquired. Party or parties to a transaction include entities designed, or otherwise used with the intention, to evade or circumvent application of the Executive Order. For purposes of this rule, this definition does not include common carriers, except to the extent that a common carrier knew or should have known (as the term ''knowledge'' is defined in 15 CFR 772.1) that it was providing transportation services of ICTS to one or more of the parties to a transaction that has been prohibited in a final written determination made by the Secretary or, if permitted subject to mitigation measures, in violation of such mitigation measures.

Person means an individual or entity.

Person owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary means any person, wherever located, who acts as an agent, representative, or employee, or any person who acts in any other capacity at the order, request, or under the direction or control, of a foreign adversary or of a person whose activities are directly or indirectly supervised, directed, controlled, financed, or subsidized in whole or in majority part

by a foreign adversary; any person, wherever located, who is a citizen or resident of a nation-state controlled by a foreign adversary; any corporation, partnership, association, or other organization organized under the laws of a nation-state controlled by a foreign adversary; and any corporation, partnership, association, or other organization, wherever organized or doing business, that is owned or controlled by a foreign adversary.

Secretary means the Secretary of Commerce or the Secretary's designee.

Sensitive personal data means:

(1) Personally-identifiable information, including:

(i) Financial data that could be used to analyze or determine an individual's financial distress or hardship;

(ii) The set of data in a consumer report, as defined under 15 U.S.C. 1681a, unless such data is obtained from a consumer reporting agency for one or more purposes identified in 15 U.S.C. 1681b(a);

(iii) The set of data in an application for health insurance, long-term care insurance, professional liability insurance, mortgage insurance, or life insurance;

(iv) Data relating to the physical, mental, or psychological health condition of an individual;

(v) Non-public electronic communications, including email, messaging, or chat communications, between or among users of a U.S. business's products or services if a primary purpose of such product or service is to facilitate third-party user communications;

(vi) Geolocation data collected using positioning systems, cell phone towers, or WiFi access points such as via a mobile application, vehicle GPS, other onboard mapping tool, or wearable electronic device;

(vii) Biometric enrollment data including facial, voice, retina/iris, and palm/fingerprint templates;

(viii) Data stored and processed for generating a Federal, State, Tribal, Territorial, or other government identification card;

(ix) Data concerning U.S. Government personnel security clearance status; or

(x) The set of data in an application for a U.S. Government personnel security clearance or an application for employment in a position of public trust; or

(2) Genetic information, which includes the results of an individual's genetic tests, including any related genetic sequencing data, whenever such results, in isolation or in combination with previously released or publicly available data, constitute identifiable data. Such results shall not include data derived from databases maintained by the U.S. Government and routinely provided to private parties for purposes of research. For purposes of this paragraph, ''genetic test'' shall have the meaning provided in 42 U.S.C. 300gg–91(d)(17).

Undue or unacceptable risk means those risks identified in Section 1(a)(ii) of the Executive Order.

United States person means any United States citizen; any permanent resident alien; or any entity organized under the laws of the United States or any jurisdiction within the United States (including such entity's foreign branches).

§ 7.3 Scope of Covered ICTS Transactions.

(a) This part applies only to an ICTS Transaction that:

(1) Is conducted by any person subject to the jurisdiction of the United States or involves property subject to the jurisdiction of the United States;

(2) Involves any property in which any foreign country or a national thereof has an interest (including through an interest in a contract for the provision of the technology or service);

(3) Is initiated, pending, or completed on or after January 19, 2021, regardless of when any contract applicable to the transaction is entered into, dated, or signed or when any license, permit, or authorization applicable to such transaction was granted. Any act or service with respect to an ICTS Transaction, such as execution of any provision of a managed services contract, installation of software updates, or the conducting of repairs, that occurs on or after January 19, 2021 may be deemed an ICTS Transaction within the scope of this part, even if the contract was initially entered into, or the activity commenced, prior to January 19, 2021; and

(4) Involves one of the following ICTS:

(i) ICTS that will be used by a party to a transaction in a sector designated as critical infrastructure by Presidential Policy Directive 21—Critical Infrastructure Security and Resilience, including any subsectors or subsequently designated sectors;

(ii) Software, hardware, or any other product or service integral to:

(A) Wireless local area networks, including:

(*1*) Distributed antenna systems; and

(*2*) Small-cell or micro-cell base stations;

(B) Mobile networks, including:

(*1*) eNodeB based stations;

(*2*) gNodeB or 5G new radio base stations;

(*3*) NodeB base stations;

(*4*) Home location register databases;

(*5*) Home subscriber servers;

(*6*) Mobile switching centers;

(*7*) Session border controllers; and

(*8*) Operation support systems;

(C) Satellite payloads, including:

(1) Satellite telecommunications systems;

(*2*) Satellite remote sensing systems; and

(*3*) Satellite position, navigation, and timing systems;

(D) Satellite operations and control, including:

(*1*) Telemetry, tracking, and control systems;

(*2*) Satellite control centers;

(*3*) Satellite network operations;

(*4*) Multi-terminal ground stations; and

(*5*) Satellite uplink centers;

(E) Cable access points, including:

(*1*) Core routers;

(*2*) Core networks; and

(*3*) Core switches;

(F) Wireline access points, including:

(*1*) Access infrastructure datalinks; and

(*2*) Access infrastructure digital loops;

(G) Core networking systems, including:

(*1*) Core infrastructure synchronous optical networks and synchronous digital hierarchy systems;

(*2*) Core infrastructure dense wavelength division multiplexing or optical transport network systems;

(*3*) Core infrastructure internet protocol and internet routing systems;

(*4*) Core infrastructure content delivery network systems;

(*5*) Core infrastructure internet protocol and multiprotocol label switching systems;

(*6*) Data center multiprotocol label switching routers; and

(*7*) Metropolitan multiprotocol label switching routers; or

(H) Long- and short-haul networks, including:

(*1*) Fiber optical cables; and

(*2*) Repeaters;

(iii) Software, hardware, or any other product or service integral to data hosting or computing services, to include software-defined services such as virtual private servers, that uses, processes, or retains, or is expected to use, process, or retain, sensitive personal data on greater than one million U.S. persons at any point over the twelve (12) months preceding an ICTS Transaction, including:

(A) Internet hosting services;

(B) Cloud-based or distributed computing and data storage;

(C) Managed services; and

(D) Content delivery services;

(iv) Any of the following ICTS products, if greater than one million units have been sold to U.S. persons at any point over the twelve (12) months prior to an ICTS Transaction:

(A) Internet-enabled sensors, webcams, and any other end-point surveillance or monitoring device;

(B) Routers, modems, and any other home networking device; or

(C) Drones or any other unmanned aerial system;

(v) Software designed primarily for connecting with and communicating via the internet that is in use by greater than one million U.S. persons at any point over the twelve (12) months preceding an ICTS Transaction, including:

(A) Desktop applications;

(B) Mobile applications;

(C) Gaming applications; and

(D) Web-based applications; or

(vi) ICTS integral to:

(A) Artificial intelligence and machine learning;

(B) Quantum key distribution;

(C) Quantum computing;

(D) Drones;

(E) Autonomous systems; or

(F) Advanced Robotics.

(b) This part does not apply to an ICTS Transaction that:

(1) Involves the acquisition of ICTS items by a United States person as a party to a transaction authorized under a U.S. government-industrial security program; or

(2) The Committee on Foreign Investment in the United States (CFIUS) is actively reviewing, or has reviewed, as a covered transaction or covered real estate transaction or as part of such a transaction under section 721 of the Defense Production Act of 1950, as amended, and its implementing regulations.

(c) (c) Notwithstanding the exemption in paragraph (b)(2) of this section, ICTS Transactions conducted by parties to transactions reviewed by CFIUS that were not part of the covered transaction or covered real estate transaction reviewed by CFIUS remain fully subject to this part.

§ 7.4 Determination of foreign adversaries.

(a) The Secretary has determined that the following foreign governments or foreign non-government persons have engaged in a long-term pattern or serious instances of conduct significantly adverse to the national security of the United States or security and safety of United States persons and, therefore, constitute foreign adversaries solely for the purposes of the Executive Order, this rule, and any subsequent rule:

(1) The People's Republic of China, including the Hong Kong Special Administrative Region (China);

(2) Republic of Cuba (Cuba);

(3) Islamic Republic of Iran (Iran);

(4) Democratic People's Republic of Korea (North Korea);

(5) Russian Federation (Russia); and

(6) Venezuelan politician Nicolás Maduro (Maduro Regime).

(b) The Secretary's determination of foreign adversaries is solely for the purposes of the Executive Order, this rule, and any subsequent rule promulgated pursuant to the Executive Order. Pursuant to the Secretary's discretion, the list of foreign adversaries will be revised as determined to be necessary. Such revisions will be effective immediately upon publication in the **Federal Register** without prior notice or opportunity for public comment.

(c) The Secretary's determination is based on multiple sources, including:

(1) National Security Strategy of the United States;

(2) The Director of National Intelligence's 2016–2019 Worldwide Threat Assessments of the U.S. Intelligence Community;

(3) The 2018 National Cyber Strategy of the United States of America; and

(4) Reports and assessments from the U.S. Intelligence Community, the U.S. Departments of Justice, State and Homeland Security, and other relevant sources.

(d) (d) The Secretary will periodically review this list in consultation with appropriate agency heads and may add to, subtract from, supplement, or otherwise amend this list. Any amendment to this list will apply to any ICTS Transaction that is initiated, pending, or completed on or after the date that the list is amended.

§ 7.5 Effect on other laws.

Nothing in this part shall be construed as altering or affecting any other authority, process, regulation, investigation, enforcement measure, or review provided by or established under any other provision of Federal law, including prohibitions under the National Defense Authorization Act of 2019, the Federal Acquisition Regulations, or IEEPA, or any other authority of the President or the Congress under the Constitution of the United States.

§ 7.6 Amendment, modification, or revocation.

Except as otherwise provided by law, any determinations, prohibitions, or decisions issued under this part may be amended, modified, or revoked, in whole or in part, at any time.

§ 7.7 Public disclosure of records.

Public requests for agency records related to this part will be processed in accordance with the Department of Commerce's Freedom of Information Act regulations, 15 CFR part 4, or other applicable law and regulation.

Subpart B—Review of ICTS Transactions

§ 7.100 General.

In implementing this part, the Secretary of Commerce may:

(a) Consider any and all relevant information held by, or otherwise made available to, the Federal Government that is not otherwise restricted by law for use for this purpose, including:

(1) Publicly available information;

(2) Confidential business information, as defined in 19 CFR 201.6, or proprietary information;

(3) Classified National Security Information, as defined in Executive Order 13526 (December 29, 2009) and its predecessor executive orders, and Controlled Unclassified Information, as defined in Executive Order 13556 (November 4, 2010);

(4) Information obtained from state, local, tribal, or foreign governments or authorities;

(5) Information obtained from parties to a transaction, including records related to such transaction that any party uses, processes, or retains, or would be expected to use, process, or retain, in their ordinary course of business for such a transaction;

(6) Information obtained through the authority granted under sections 2(a) and (c) of the Executive Order and IEEPA, as set forth in U.S.C. 7.101;

(7) Information provided by any other U.S. Government national security body, in each case only to the extent necessary for national security purposes, and subject to applicable confidentiality and classification requirements, including the Committee for the Assessment of Foreign Participation in the United States Telecommunications Services Sector and the Federal Acquisitions Security Council and its designated information-sharing bodies; and

(8) Information provided by any other U.S. Government agency, department, or other regulatory body, including the Federal Communications Commission, Department of Homeland Security, and Department of Justice;

(b) Consolidate the review of any ICTS Transactions with other transactions already under review where the Secretary determines that the transactions raise the same or similar issues, or that are otherwise properly consolidated;

(c) In consultation with the appropriate agency heads, in determining whether an ICTS Transaction involves ICTS designed, developed, manufactured, or supplied, by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary, consider the following:

(1) Whether the person or its suppliers have headquarters, research, development, manufacturing, test, distribution, or service facilities, or other operations in a foreign country, including one controlled by, or subject to the jurisdiction of, a foreign adversary;

(2) Ties between the person—including its officers, directors or similar officials, employees, consultants, or contractors—and a foreign adversary;

(3) Laws and regulations of any foreign adversary in which the person is headquartered or conducts operations, including research and development, manufacturing, packaging, and distribution; and

(4) Any other criteria that the Secretary deems appropriate;

(d) In consultation with the appropriate agency heads, in determining whether an ICTS Transaction poses an undue or unacceptable risk, consider the following:

(1) Threat assessments and reports prepared by the Director of National Intelligence pursuant to section 5(a) of the Executive Order;

(2) Removal or exclusion orders issued by the Secretary of Homeland Security, the Secretary of Defense, or the Director of National Intelligence (or their designee) pursuant to recommendations of the Federal Acquisition Security Council, under 41 U.S.C. 1323;

(3) Relevant provisions of the Defense Federal Acquisition Regulation (48 CFR ch. 2) and the Federal Acquisition Regulation (48 CFR ch. 1), and their respective supplements;

(4) The written assessment produced pursuant to section 5(b) of the Executive Order, as well as the entities, hardware, software, and services that present vulnerabilities in the United States as determined by the Secretary of Homeland Security pursuant to that section;

(5) Actual and potential threats to execution of a ''National Critical Function'' identified by the Department of Homeland Security Cybersecurity and Infrastructure Security Agency;

(6) The nature, degree, and likelihood of consequence to the United States public and private sectors that could occur if ICTS vulnerabilities were to be exploited; and

(7) Any other source or information that the Secretary deems appropriate; and

(e) In the event the Secretary finds that unusual and extraordinary harm to the national security of the United States is likely to occur if all of the procedures specified herein are followed, the Secretary may deviate from these procedures in a manner tailored to protect against that harm.

§ 7.101 Information to be furnished on demand.

(a) Pursuant to the authority granted to the Secretary under sections 2(a), 2(b), and 2(c) of the Executive Order and IEEPA, persons involved in an ICTS Transaction may be required to furnish under oath, in the form of reports or otherwise, at any time as may be required by the Secretary, complete information relative to any act or transaction, subject to the provisions of this part. The Secretary may require that such reports include the production of any books, contracts, letters, papers, or other hard copy or electronic documents relating to any such act, transaction, or property, in the custody or control of the persons required to make such reports. Reports with respect to transactions may be required either before, during, or after such transactions. The Secretary may, through any person or agency, conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of any books, contracts, letters, papers, and other hard copy or documents relating to any matter under investigation, regardless of whether any report has been required or filed in connection therewith.

(b) For purposes of paragraph (a) of this section, the term ''document'' includes any written, recorded, or graphic matter or other means of preserving thought or expression (including in electronic format), and all tangible things stored in any medium from which information can be processed, transcribed, or obtained directly or indirectly, including correspondence, memoranda, notes, messages, contemporaneous communications such as text and instant messages, letters, emails, spreadsheets, metadata, contracts, bulletins, diaries, chronological data, minutes, books, reports, examinations, charts, ledgers, books of account, invoices, air waybills, bills of lading, worksheets, receipts, printouts, papers, schedules, affidavits, presentations, transcripts, surveys, graphic representations of any kind, drawings, photographs, graphs, video or sound recordings, and motion pictures or other film.

(c) Persons providing documents to the Secretary pursuant to this section must produce documents in a format useable to the Department of Commerce, which may be detailed in the request for documents or otherwise agreed to by the parties.

§ 7.102 Confidentiality of information.

(a) Information or documentary materials, not otherwise publicly or commercially available, submitted or filed with the Secretary under this part will not be released publicly except to the extent required by law.

(b) The Secretary may disclose information or documentary materials that are not otherwise publicly or commercially available and referenced in paragraph (a) in the following circumstances:

(1) Pursuant to any administrative or judicial proceeding;

(2) Pursuant to an act of Congress;

(3) Pursuant to a request from any duly authorized committee or subcommittee of Congress;

(4) Pursuant to any domestic governmental entity, or to any foreign governmental entity of a United States ally or partner, information or documentary materials, not otherwise publicly or commercially available and important to the national security analysis or actions of the Secretary, but only to the extent necessary for national security purposes, and subject to appropriate confidentiality and classification requirements;

(5) Where the parties or a party to a transaction have consented, the information or documentary material that are not otherwise publicly or commercially available may be disclosed to third parties; and

(6) Any other purpose authorized by law.

(c) This section shall continue to apply with respect to information and documentary materials that are not otherwise publicly or commercially available and submitted to or obtained by the Secretary even after the Secretary issues a final determination pursuant to § 7.109 of this part.

(d) The provisions of 18 U.S.C. 1905, relating to fines and imprisonment and other penalties, shall apply with respect to the disclosure of information or documentary material provided to the Secretary under these regulations.

§ 7.103 Initial review of ICTS Transactions.

(a) Upon receipt of any information identified in § 7.100(a), upon written request of an appropriate agency head, or at the Secretary's discretion, the Secretary may consider any referral for review of a transaction (referral).

(b) In considering a referral pursuant to paragraph (a), the Secretary shall assess whether the referral falls within the scope of § 7.3(a) of this part and involves ICTS designed, developed, manufactured, or supplied by persons owned by, controlled by, or subject to the jurisdiction or direction of a foreign adversary, and determine whether to:

(1) Accept the referral and commence an initial review of the transaction;

(2) Request additional information, as identified in § 7.100(a), from the referring entity regarding the referral; or

(3) Reject the referral.

(c) Upon accepting a referral pursuant to paragraph (b) of this section, the Secretary shall conduct an initial review of the ICTS Transaction and assess whether the ICTS Transaction poses an undue or unacceptable risk, which may be determined by evaluating the following criteria:

(1) The nature and characteristics of the information and communications technology or services at issue in the ICTS Transaction, including technical capabilities, applications, and market share considerations;

(2) The nature and degree of the ownership, control, direction, or jurisdiction exercised by the foreign adversary over the design, development, manufacture, or supply at issue in the ICTS Transaction;

(3) The statements and actions of the foreign adversary at issue in the ICTS Transaction;

(4) The statements and actions of the persons involved in the design, development, manufacture, or supply at issue in the ICTS Transaction;

(5) The statements and actions of the parties to the ICTS Transaction;

(6) Whether the ICTS Transaction poses a discrete or persistent threat;

(7) The nature of the vulnerability implicated by the ICTS Transaction;

(8) Whether there is an ability to otherwise mitigate the risks posed by the ICTS Transaction;

(9) The severity of the harm posed by the ICTS Transaction on at least one of the following:

(i) Health, safety, and security;

(ii) Critical infrastructure;

(iii) Sensitive data;

(iv) The economy;

(v) Foreign policy;

(vi) The natural environment; and

(vii) National Essential Functions (as defined by Federal Continuity Directive-2 (FCD–2)); and

(10) The likelihood that the ICTS Transaction will in fact cause threatened harm.

(d) If the Secretary finds that an ICTS Transaction does not meet the criteria of paragraph (b) of this section:

(1) The transaction shall no longer be under review; and

(2) Future review of the transaction shall not be precluded, where additional information becomes available to the Secretary.

§ 7.104 First interagency consultation.

Upon finding that an ICTS Transaction likely meets the criteria set forth in § 7.103(c) during the initial review under § 7.103, the Secretary shall notify the appropriate agency heads and, in consultation with them, shall determine whether the ICTS Transaction meets the criteria set forth in § 7.103(c).

§ 7.105 Initial determination.

(a) If, after the consultation required by § 7.104, the Secretary determines that the ICTS Transaction does not meet the criteria set forth in § 7.103(c):

(1) The transaction shall no longer be under review; and

(2) Future review of the transaction shall not be precluded, where additional information becomes available to the Secretary.

(b) If, after the consultation required by § 7.104, the Secretary determines that the ICTS Transaction meets the criteria set forth in § 7.103(c), the Secretary shall:

(1) Make an initial written determination, which shall be dated and signed by the Secretary, that:

(i) Explains why the ICTS Transaction meets the criteria set forth in § 7.103(c); and

(ii) Sets forth whether the Secretary has initially determined to prohibit the ICTS Transaction or to propose mitigation measures, by which the ICTS Transaction may be permitted; and

(2) Notify the parties to the ICTS Transaction either through publication in the **Federal Register** or by serving a copy of the initial determination on the parties via registered U.S. mail, facsimile, and electronic transmission, or third-party commercial carrier, to an addressee's last known address or by personal delivery.

(c) Notwithstanding the fact that the initial determination to prohibit or propose mitigation measures on an ICTS Transaction may, in whole or in part, rely upon classified national security information, or sensitive but unclassified information, the initial determination will contain no classified national security information, nor reference thereto, and, at the Secretary's discretion, may not contain sensitive but unclassified information.

§ 7.106 Recordkeeping requirement.

Upon notification that an ICTS Transaction is under review or that an initial determination concerning an ICTS Transaction has been made, a notified person must immediately take steps to retain any and all records relating to such transaction.

§ 7.107 Procedures governing response and mitigation.

Within 30 days of service of the Secretary's notification pursuant to § 7.105, a party to an ICTS Transaction may respond to the Secretary's initial determination or assert that the circumstances resulting in the initial determination no longer apply, and thus seek to have the initial determination rescinded or mitigated pursuant to the following administrative procedures:

(a) A party may submit arguments or evidence that the party believes establishes that insufficient basis exists for the initial determination, including any prohibition of the ICTS Transaction;

(b) A party may propose remedial steps on the party's part, such as corporate reorganization, disgorgement of control of the foreign adversary, engagement of a compliance monitor, or similar steps, which the party believes would negate the basis for the initial determination;

(c) Any submission must be made in writing;

(d) A party responding to the Secretary's initial determination may request a meeting with the Department, and the Department may, at its discretion, agree or decline to conduct such meetings prior to making a final determination pursuant to § 7.109;

(e) This rule creates no right in any person to obtain access to information in the possession of the U.S. Government that was considered in making the initial determination to prohibit the ICTS Transaction, to include classified national security information or sensitive but unclassified information; and

(f) (f) If the Department receives no response from the parties within 30 days after service of the initial determination to the parties, the Secretary may determine to issue a final determination without the need to engage in the consultation process provided in section 7.108 of this rule.

§ 7.108 Second interagency consultation.

(a) Upon receipt of any submission by a party to an ICTS Transaction under § 7.107, the Secretary shall consider

whether and how any information provided—including proposed mitigation measures—affects an initial determination of whether the ICTS Transaction meets the criteria set forth in § 7.103(c).

(b) After considering the effect of any submission by a party to an ICTS Transaction under § 7.107 consistent with paragraph (a), the Secretary shall consult with and seek the consensus of all appropriate agency heads prior to issuing a final determination as to whether the ICTS Transaction shall be prohibited, not prohibited, or permitted pursuant to the adoption of negotiated mitigation measures.

(c) If consensus is unable to be reached, the Secretary shall notify the President of the Secretary's proposed final determination and any appropriate agency head's opposition thereto.

(d) After receiving direction from the President regarding the Secretary's proposed final determination and any appropriate agency head's opposition thereto, the Secretary shall issue a final determination pursuant to § 7.109.

§ 7.109 Final determination.

(a) For each transaction for which the Secretary issues an initial determination that an ICTS Transaction is prohibited, the Secretary shall issue a final determination as to whether the ICTS Transaction is:

(1) Prohibited;

(2) Not prohibited; or

(3) Permitted, at the Secretary's discretion, pursuant to the adoption of negotiated mitigation measures.

(b) Unless the Secretary determines in writing that additional time is necessary, the Secretary shall issue the final determination within 180 days of accepting a referral and commencing the initial review of the ICTS Transaction pursuant to § 7.103.

(c) If the Secretary determines that an ICTS Transaction is prohibited, the Secretary shall have the discretion to direct the least restrictive means necessary to tailor the prohibition to address the undue or unacceptable risk posed by the ICTS Transaction.

(d) The final determination shall:

(1) Be written, signed, and dated;

(2) Describe the Secretary's determination;

(3) Be unclassified and contain no reference to classified national security information;

(4) Consider and address any information received from a party to the ICTS Transaction;

(5) Direct, if applicable, the timing and manner of the cessation of the ICTS Transaction;

(6) Explain, if applicable, that a final determination that the ICTS Transaction is not prohibited does not preclude the future review of transactions related in any way to the ICTS Transaction;

(7) Include, if applicable, a description of the mitigation measures agreed upon by the party or parties to the ICTS Transaction and the Secretary; and

(8) State the penalties a party will face if it fails to comply fully with any mitigation agreement or direction, including violations of IEEPA, or other violations of law.

(e) The written, signed, and dated final determination shall be sent to:

(1) The parties to the ICTS Transaction via registered U.S. mail and electronic mail; and

(2) The appropriate agency heads.

(f) The results of final written determinations to prohibit an ICTS Transaction shall be published in the **Federal Register**. The publication shall omit any confidential business information.

§ 7.110 Classified national security information.

In any review of a determination made under this part, if the determination was based on classified national security information, such information may be submitted to the reviewing court *ex parte* and *in camera.* This section does not confer or imply any right to review in any tribunal, judicial or otherwise.

Subpart C—Enforcement

§ 7.200 Penalties.

(a) Maximum penalties.

(1) *Civil penalty.* A civil penalty not to exceed the amount set forth in Section 206 of IEEPA, 50 U.S.C. 1705, may be imposed on any person who violates, attempts to violate, conspires to violate, or causes any knowing violation of any final determination or direction issued pursuant to this part, including any violation of a mitigation agreement issued or other condition imposed under this part. IEEPA provides for a maximum civil penalty not to exceed the greater of $250,000, subject to inflationary adjustment, or an amount that is twice the amount of the transaction that is the basis of the violation with respect to which the penalty is imposed.

(2) *Criminal penalty.* A person who willfully commits, willfully attempts to commit, or willfully conspires to commit, or aids and abets in the commission of a violation of any final determination, direction, or mitigation agreement shall, upon conviction of a violation of IEEPA, be fined not more than $1,000,000, or if a natural person, may be imprisoned for not more than 20 years, or both.

(3) The Secretary may impose a civil penalty of not more than the maximum statutory penalty amount, which, when adjusted for inflation, is $307,922, or twice the amount of the transaction that is the basis of the violation, per violation on any person who violates any final determination, direction, or mitigation agreement issued pursuant to this part under IEEPA.

(i) Notice of the penalty, including a written explanation of the penalized conduct specifying the laws and regulations allegedly violated and the amount of the proposed penalty, and notifying the recipient of a right to make a written petition within 30 days as to why a penalty should not be imposed, shall be served on the notified party or parties.

(ii) The Secretary shall review any presentation and issue a final administrative decision within 30 days of receipt of the petition.

(4) Any civil penalties authorized in this section may be recovered in a civil action brought by the United States in U.S. district court.

(b) Adjustments to penalty amounts.

(1) The civil penalties provided in IEEPA are subject to adjustment pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101–410, as amended, 28 U.S.C. 2461 note).

(2) The criminal penalties provided in IEEPA are subject to adjustment pursuant to 18 U.S.C. 3571.

(c) The penalties available under this section are without prejudice to other penalties, civil or criminal, available under law. Attention is directed to 18 U.S.C. 1001, which provides that whoever, in any matter within the jurisdiction of any department or agency in the United States, knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact, or makes any false, fictitious, or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious, or fraudulent statement or entry, shall be fined under title 18, United States Code, or imprisoned not more than 5 years, or both.

[Docket No. 201221–0350]

RIN 0694–AI33

Implementation in the Export Administration Regulations of the United States' Rescission of Sudan's Designation as a State Sponsor of Terrorism

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: In this final rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) to implement the rescission of Sudan's designation as a State Sponsor of Terrorism (SSOT). The Secretary of State rescinded this designation effective December 14, 2020 in accordance with established statutory procedures, including the President's October 26, 2020 submission to Congress of a report justifying the rescission and certifying Sudan had not provided any support for acts of international terrorism during the preceding six month period and that Sudan had provided assurances that it would not support acts of international terrorism in the future. Accordingly, BIS amends the EAR by removing Anti-Terrorism (AT) controls on the country and by removing Sudan from Country Group E:1 (Terrorist supporting countries). These actions render the country eligible for a general 25 percent *de minimis* level. As a consequence of these actions, as well as the addition of the country to Country Group B, Sudan is also potentially eligible for several new license exceptions under the EAR. However, pursuant to this rule, two license exceptions will be unavailable for exports and reexports to Sudan. BIS also makes conforming amendments in other applicable EAR provisions as part of this rule.

DATES: This rule is effective January 14, 2021.

FOR FURTHER INFORMATION CONTACT: Foreign Policy Division, Office of Nonproliferation and Treaty Compliance, Bureau of Industry and Compliance, U.S. Department of Commerce, by email at *Foreign.Policy@bis.doc.gov,* or by phone at 202–482–4252.

SUPPLEMENTARY INFORMATION:

Background

I. Brief History of Anti-Terrorism Controls on Sudan

A. Overview

Sections 1753, 1754, and 1768 of the Export Control Reform Act of 2018 (ECRA), 50 U.S.C. Sections 4801–4852, provide the legal authority for BIS's AT controls on SSOT destinations. On August 12, 1993, in accordance with Section 6(j) of the Export Administration Act of 1979, then codified at 50 U.S.C. App. 2405(j), the Secretary of State designated Sudan as a SSOT, citing his determination that Sudan, then led by Omar al-Bashir, had repeatedly provided support for acts of international terrorism. *See* 58 FR 52523 (Oct. 8, 1993). Consistent with this designation, BIS imposed AT controls on Sudan in accordance with the Export Administration Act of 1979, as amended, formerly codified at 50 U.S.C. Sections 4601–4623, the legal authority at the time for BIS's export control regime. 61 FR 12714 (March 25, 1996). Pursuant to § 742.10 (Anti-Terrorism) of the EAR, a license was also required for the export or reexport to Sudan of nearly all items on the Commerce Control List (CCL), Supp. No. 1 to part 774 of the EAR. License applications for such exports and reexports were reviewed under a general policy of denial. Consistent with Sudan's designation as a SSOT, the country was also placed in Country Group E (now Country Group E:1): (terrorist-supporting countries) in Supplement No. 1 to part 740 of the EAR and made subject to a 10 percent *de minimis* threshold for controlled U.S.-origin content (*see* § 734.4 of the EAR). Most license exceptions were also unavailable for exports and reexports of CCL items destined for Sudan due to its status as an ''E:1'' country.

B. Changes to Certain Licensing Policies and License Exceptions

Notwithstanding the general policy of denial set forth in § 742.10 of the EAR, prior to the publication of this rule, BIS reviewed certain categories of CCL items proposed for export or reexport to Sudan under less stringent review policies. In particular, applications for the export and reexport of medical items to Sudan were subject to case-by-case review. Over time, consistent with U.S. foreign policy initiatives, BIS instituted case-by case review or a general policy of approval for additional categories of items. For example, acting in coordination with the Department of the Treasury's Office of Foreign Assets Control (OFAC), in order to promote the free flow of communications among the Sudanese people, in February 2015, BIS amended § 742.10 to establish a case-by-case review policy for telecommunication equipment and associated items for civil end use, including items useful for the development of civil telecommunications infrastructure. *See* 80 FR 8520 (Feb. 18, 2015). Two years later, in January 2017, in response to positive developments in the U.S.-Sudan bilateral relationship, BIS amended § 742.10, again in coordination with OFAC, to institute a general policy of approval for certain items, including parts, components, and equipment, that are controlled on the CCL solely for AT reasons and are intended to ensure the safety of civil aviation or the safe operation of fixed-wing commercial passenger aircraft, as well as items controlled on the CCL solely for AT reasons intended for use in the inspection and repair, among other activities, of railroads in Sudan. *See* 82 FR 4781 (Jan. 17, 2017).

BIS also made changes to license exception eligibility in connection with foreign policy considerations and developments. In February 2005, BIS amended License Exception Temporary imports, exports, reexports, and transfers (in-country) (TMP) to permit temporary exports to Sudan of certain computers, communication devices, and global positioning devices as ''tools of trade'' by employees and staff of certain organizations engaged in humanitarian work in Sudan. *See* 70 FR 8257 (Feb. 18, 2005) and 70 FR 9703 (Feb. 28, 2005). In February 2008, BIS amended TMP again in connection with exports and reexports destined for Sudan, including by expanding the number of activities and commodities eligible under the ''tools of trade'' category, an action taken in part to reflect the changing nature of humanitarian work undertaken in the country by nongovernmental organizations. *See* 73 FR 10668 (Feb. 28, 2008). In January 2017, as part of the same regulatory action described above that created a more favorable license review policy for certain items for use in civil aviation and railroad infrastructure in Sudan, BIS made License Exception Consumer Communications Devices (CCD) eligible for the export and reexport of certain consumer communications devices to Sudan.

C. Dual Licensing—BIS and OFAC

For nearly twenty years, licenses from both BIS and OFAC were required to export and reexport items on the CCL to Sudan as a consequence of broad trade restrictions imposed in November 1997,

including restrictions on U.S. persons' exports of U.S.-origin items to Sudan. Pursuant to Executive Order (E.O.) 13067 of November 3, 1997, the U.S. Government imposed a comprehensive trade embargo in response to the Government of Sudan's policies and activities, including its support for terrorism, efforts to destabilize neighboring governments, and the prevalence of human rights violations. Specifically, this E.O. blocked the property of the Government of Sudan subject to U.S. jurisdiction and imposed restrictions on U.S. persons' activities with respect to Sudan. On July 1, 1998, OFAC published the Sudanese Sanctions Regulations, 31 CFR part 538 (SSR), implementing these restrictions. *See* 63 FR 35809 (July 1, 1998). Notably, as implemented in the SSR, E.O. 13067 required the Department of the Treasury to restrict the export or reexport to Sudan of goods, technology, or services from the U.S. or by a U.S. person, wherever located, or ''requiring the issuance of a license by a Federal agency.'' *See* Section 2(b) of E.O. 13067 and 31 CFR 538.205 (2017). This language provided the basis for a dual licensing regime pursuant to which the export and reexport of CCL items to Sudan required authorization by both BIS and OFAC.

On October 13, 2006, President George W. Bush issued E.O. 13412 following the enactment of the Darfur Peace and Accountability Act of 2006, a response to continuing atrocities in Sudan's Darfur Region. This E.O. exempted certain regions in Sudan from several prohibitions established pursuant to E.O. 13067, including those applicable to exports, thereby effectively narrowing the scope of exports and reexports of CCL items subject to dual licensing.

D. Termination of the Embargo

In recognition of positive actions sustained by the Government of Sudan in several areas, including enhanced cooperation with the U.S. on counterterrorism efforts, effective October 12, 2017, President Donald J. Trump revoked Sections 1 and 2 of E.O. 13067, along with E.O. 13412 in its entirety, pursuant to E.O. 13761 of January 13, 2017, as amended by E.O. 13804 of July 11, 2017. Consequently, as of October 12, 2017, U.S. persons were no longer prohibited from engaging in transactions with respect to Sudan, including exports and reexports of items destined for Sudan, or with the Government of Sudan, that had been prohibited by the SSR. These actions generally established BIS as the sole licensing agency for exports and reexports of items subject to the EAR to Sudan. To reflect the revocation of these authorities, OFAC removed the SSR from the Code of Federal Regulations on June 29, 2018. OFAC only retained jurisdiction over certain exports and reexports of agricultural commodities, medicine, and medical devices destined for Sudan pursuant to the Trade Sanctions Reform and Export Enhancement Act of 2000, 22 U.S.C. Section 7201 *et seq.,* and authorized the export and reexport of such items through a general license incorporated into Section 596.506 of the Terrorism List Governments Sanctions Regulations, 31 CFR part 596.

II. Rescission-Related Developments

Once a country is designated a State Sponsor of Terrorism, the designation remains in effect until it is rescinded in accordance with applicable law. On October 26, 2020, the President submitted to Congress the statutorily-required report justifying the rescission, and certifying that Sudan had not provided any support for acts of international terrorism during the preceding six month period and that Sudan had provided assurances that it would not support acts of international terrorism in the future. Effective December 14, 2020, the Secretary of State rescinded Sudan's designation as a SSOT, in accordance with Sections 1754(c) and 1768(c) of the National Defense Authorization Act for Fiscal Year 2019 (50 U.S.C. 4813(c) and 4826(c)), and in satisfaction of the provisions of Section 620A(c) of the Foreign Assistance Act of 1961 (22. U.S.C. 2371(c)), Section 40(f) of the Arms Export Control Act of 1976 (22 U.S.C. 2708(f)), and, to the extent applicable, section 6(j) of the Export Administration Act of 1979 (50 U.S.C. App. 2405(j)), as continued in effect by Executive Order 13222 of August 17, 2001. BIS is publishing this rule amending the EAR to implement the rescission.

On October 23, 2020, the date that President Trump notified Congress of his intention to rescind the SSOT designation, the White House heralded the development as marking the advancement of the United States' bilateral relationship with Sudan and the ongoing efforts of the civilian-led Sudanese transitional government toward democracy and the achievement of regional peace. *See* October 23, 2020 Statement of the Press Secretary on Sudan, available at *https://www.whitehouse.gov/briefings-statements/statement-press-secretary-sudan/.* As noted by Secretary of State Michael R. Pompeo, President's Trump decision ''reflect[ed] the . . . transitional government's sustained efforts to make sure there is no support for acts of international terrorism.'' *See* November 2, 2020 State Department Press Statement, ''Sudan Making Progress,'' available at *https://www.state.gov/sudan-making-progress/.*

III. Specific Amendments in This Rule

A. Overview

Consistent with the Secretary of State's rescission of Sudan's designation as a SSOT, effective December 14, 2020, this rule removes AT controls on the country and makes conforming changes to various EAR provisions. First, this rule removes Sudan from Country Group E:1 in Supplement No. 1 to part 740, the Country Group placement for terrorist supporting countries. This action raises the *de minimis* level from 10 percent to 25 percent for most foreign-origin items located abroad that are destined for Sudan. These changes make Sudan potentially eligible for new license exceptions under the EAR. Second, this rule removes EAR § 742.10 (Anti-Terrorism: Sudan) in its entirety. Additionally, it adds Sudan to Country Group B in Supplement No. 1 to part 740. As a general matter, countries in Country Group B are eligible for a greater number of license exceptions, and they are subject to relatively less stringent license review policies. However, pursuant to this rule, two license exceptions, License Exception Shipments to Country Group B countries (GBS) (§ 740.4) and License Exception Technology and software under restriction (TSR) (§ 740.6), will be unavailable for exports and reexports to Sudan. Moreover, Sudan's continued placement in Country Group D:5 (U.S. Arms Embargoed Countries) impacts the availability of certain license exceptions in connection with items controlled under certain Export Control Classification Numbers (ECCNs). Finally, this rule makes conforming amendments to parts 734, 738, 748, 750, 772 and 774 of the EAR, and additional amendments to parts 740 and 742, consistent with the removal of AT controls, the country's removal from Country Group E:1, and addition to Country Group B. Other previously-existing license requirements remain intact.

Conforming changes include the removal of all references to Sudan from Supplement No. 2 to part 742, which specifies contract sanctity dates and related licensing review policies for certain items destined for countries subject to AT controls. This rule also amends License Exceptions GBS and

TSR set forth in part 740 (License Exceptions) to state that they are not available for Sudan. Additionally, it amends part 740 to remove references to Sudan from three license exceptions. As detailed below, these license exceptions had authorized exports and reexports of certain CCL items to Sudan notwithstanding the imposition of AT controls and the country's related placement in Country Group E:1.

B. Highlights of Key Changes

1. Changes to the Applicable De Minimis Level for Controlled U.S.-Origin Content

The EAR apply to foreign-made items located outside the United States that contain more than a *de minimis* amount of controlled U.S.-origin content by value. For most items, the *de minimis* level is 10 percent if the destination of the foreign-made item is in Country Group E:1 and 25 percent if the destination is in any other Country Group. The removal of Sudan from Country Group E:1 raises the *de minimis* level to 25 percent for most items destined for Sudan. Additionally, this 25 percent *de minimis* level will apply to certain foreign-made encryption items destined for Sudan that meet the criteria specified in § 734.4(b)(1) of the EAR. Foreign-made items destined for Sudan that incorporate U.S.-origin 9x515 or ''600 series'' paragraphs a. through .x content will continue to be subject to the EAR regardless of the level of U.S.-origin content, *i.e.,* there is no *de minimis* level for such items when they are destined for Sudan.

2. Applicable Controls and Related Licensing Policies

Sudan will be subject to licensing requirements that apply to the export and reexport of items on the multilateral export control regime lists (the Wassenaar Arrangement, the Nuclear Suppliers Group, the Australia Group and the Missile Technology Control Regime) and sensitive items controlled unilaterally for Crime Control (CC) or Regional Stability (RS) reasons. These license requirements are set forth in part 742 of the EAR and are reflected in the relevant columns of the Country Chart in Supplement No. 1 to part 738 of the EAR. (*See* ''Xs'' reflecting the applicability of various multilateral and unilateral controls on Sudan.) Other categories of items that are controlled for reasons not included on the Country Chart *(e.g.,* encryption (EI) and Chemical Weapons (CW)) will also require a license for export or reexport to Sudan. End User and End-Use-based controls set forth in part 744 of the EAR will also continue to apply. BIS will review license applications for exports or reexports to Sudan on a case-by-case basis pursuant to applicable licensing policies set forth in parts 742 and 744, or elsewhere in the EAR. Exporters should also be aware that the United States continues to maintain an arms embargo on Sudan, as implemented in Country Group D:5, which also implements the United Nations arms embargo, imposed in 2004, that applies to certain items controlled for United Nations (UN) reasons that are destined for the Darfur region in Sudan, as implemented in § 746.1 of the EAR.

3. Changes to License Exceptions

Consistent with the removal of AT controls on Sudan (and the related removal of the country from Country Group E:1), BIS is amending four license exceptions that make specific reference to Sudan or to Sudanese nationals. Through revising three of these license exceptions to reflect policy changes that occurred following Sudan's designation as a SSOT, BIS had authorized certain categories of transactions that were destined for Sudan notwithstanding the imposition of AT controls and the country's related placement in Country Group E:1. BIS also removes restrictions on releases to Sudanese nationals of technology and source code pertaining to computers from a fourth license exception.

License Exception Computers (APP)

Sudan is removed from § 740.7, paragraph (b)(2)(ii), which restricts technology and source code from release to nationals of Country Groups E:1 and E:2. The country is added to paragraph (d)(1) (Computer Tier 3 destinations), which will permit the release of technology and source code to Sudanese nationals up to the prescribed limit.

License Exception Temporary Imports, Exports, Reexports, and Transfers (In-Country) (TMP)

Paragraph (a)(2) of § 740.9, which referred to tools of the trade (as identified in § 740.19(b)) as exempted from paragraph (a)(1) restrictions on Country Group E:1 when destined for Sudan, is no longer applicable and is deleted.

License Exception Additional Permissive Reexports (APR)

Paragraph (i) of § 740.16, which authorized certain exports and reexports of Anti-Terrorism controlled items to Sudan, is no longer applicable and is deleted.

License Exception Consumer Communications Devices (CCD)

Section 740.19 (Consumer Communications Devices) no longer requires any reference to Sudan, as the eligible commodities and software specified therein may now be exported and reexported (barring end-use or end-user restrictions) to Sudan, including to the Sudanese Government. In light of the U.S. Government's ''unblocking'' of the Government of Sudan effective October 2017, the license exception's reference to restrictions on the Government of Sudan is inapplicable. This rule consequently removes the reference to Sudan in paragraph (a), and in the introductory text to paragraph (b), which identified Sudan as an eligible destination for this license exception. It also removes paragraph (c)(iii), which identified the Government of Sudan as an ineligible end-user for the license exception. Additionally, this rule removes altogether paragraph (b)(18), which permitted the export and reexport of items controlled under Export Control Classification Number 7A994 to Sudan only.

4. Availability of Other License Exceptions

As an E:1 country, Sudan was eligible for only a limited number of license exceptions. Many license exceptions contain restrictions that apply to countries in Country Group E:1 or to nationals of such countries. As a consequence of Sudan's removal from Country Group E:1, Sudan and/or Sudanese nationals are newly eligible for several license exceptions. No changes are required to the text of these license exceptions, as they do not refer specifically to Sudan or to Sudanese nationals. Additionally, as noted above, Sudan's addition to Country Group B by this rule makes the country potentially available for a broader range of license exceptions. However, BIS has determined that exports and reexports to Sudan are not eligible for License Exceptions GBS and TSR. This rule makes conforming changes in part 740 consistent with that policy. Specifically, amendments in §§ 740.4 and 740.6 clearly set forth that License Exceptions GBS and TSR, respectively, are unavailable for Sudan. As with all license exceptions, a specific transaction must meet all enumerated criteria, and persons should ensure that the restrictions set forth in § 740.2 (Restrictions on all license exceptions) do not apply. In particular, persons should be aware of limitations on the availability of license exceptions for exports and reexports to Sudan of items

in a 9x515 or ''600 series'' ECCN as set forth in paragraphs (a)(12) and (13) of § 740.2 that stem from Sudan's placement in Country Group D:5.

5. Other U.S. Government Regulatory Obligations

The amendments to the EAR made in this final rule do not apply to regulatory requirements administered by other U.S. Government agencies, such as OFAC and the Department of State's Directorate of Defense Trade Controls. In particular, U.S. persons should be aware of restrictions that may apply to transactions involving the Darfur region of Sudan. On October 30, 2020, President Trump continued in effect the national emergency initially declared with respect to the Government of Sudan in E.O. 13067, as expanded by subsequent E.O.s, including E.O. 13400 of April 26, 2006, due to violence in Sudan's Darfur region. *See* Presidential Notice, 85 FR 69463 (Nov. 2, 2020). OFAC administers sanctions on individuals and entities in connection with the conflict in Darfur based on this national emergency. *See* Darfur Sanctions Regulations, 31 CFR part 546. OFAC may also designate Sudanese persons under authorities apart from E.O. 13067 and E.O. 13400 and add such persons to the list of Specially Designated Nationals and Blocked Persons (SDN List), available at *https://www.treasury.gov/ofac.* Additional information regarding OFAC's sanctions programs may be located at *https://www.treasury.gov/ofac.*

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA), 50 U.S.C. Sections 4801–4852. ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distribute impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This final rule has been designated a ''significant regulatory action'' under section 3(f) of Executive Order 12866.

2. This final rule is not subject to the requirements of E.O. 13771 (82 FR 9339 (February 3, 2017)) because it is issued with respect to a national security function of the United States. In particular, this rule implements an important U.S. foreign policy change, the rescission of Sudan's designation as a State Sponsor of Terrorism, that is closely linked with U.S. national security and regional security objectives. The amendments to the EAR made by this rule are consistent with the rescission and therefore serve U.S. foreign policy and national security interests.

3. This rule does not contain policies with Federalism implications as that term is defined under Executive Order 13132.

4. Pursuant to section 1762 of the Export Control Reform Act of 2018 (50 U.S.C. 4821), this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation, and delay in effective date.

5. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by 5 U.S.C. 553, or by any other law, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* are not applicable. Accordingly, no regulatory flexibility analysis is required and none has been prepared.

6. Notwithstanding any other provision of law, no person may be required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves a collection currently approved by OMB under control number 0694–0088, Simplified Network Application Processing System. The collection includes, among other things, license applications, and carries a burden estimate of 42.5 minutes for a manual or electronic submission for a total burden estimate of 31,878 hours. BIS expects the burden hour estimates associated with this collection to decrease slightly, as the removal of Anti-terrorism controls on Sudan should result in the submission of fewer license applications. Any comments regarding the collection of information associated with this rule, including suggestions for reducing the burden, should be sent within 30 days of publication of this notice to *http://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

List of Subjects

15 CFR Part 734

Administrative practice and procedure, Exports, Inventions and patents, Research, Science and technology.

15 CFR Parts 738 and 772

Exports.

15 CFR Parts 740, 748 and 750

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 742

Exports, Terrorism.

15 CFR 746

Exports, Reporting and recordkeeping requirements.

15 CFR Parts 774

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, parts 734, 738, 740, 742, 748, 750, 772, 774 of the Export Administration Regulations (15 CFR parts 730 through 774) are amended as follows:

PART 734—SCOPE OF THE EXPORT ADMINISTRATION REGULATIONS

■ 1. The authority citation for part 734 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13020, 61 FR 54079, 3 CFR, 1996 Comp., p. 219; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2014 Comp., p. 223; Notice of November 12, 2019, 84 FR 61817, 3 CFR, 2019 Comp., p. 479.

§ 734.4 [Amended]

■ 2. Amend § 734.4 by removing ''Sudan,'' from paragraph (a)(1).

PART 738—COMMERCE CONTROL LIST OVERVIEW AND THE COUNTRY CHART

■ 3. The authority citation for part 738 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c; 22 U.S.C. 2151 note; 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824;

50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

Supplement No. 1 to Part 738 [Amended]

■ 4. In Supplement No. 1 to part 738, the entry for ''Sudan [1]'' is amended by removing the ''X'' from Anti-Terrorism Columns 1 and 2.

PART 740—LICENSE EXCEPTIONS

■ 5. The authority citation for part 740 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 7201 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 6. Section 740.4 is revised to read as follows:

§ 740.4 Shipments to Country Group B countries (GBS).

License Exception GBS authorizes exports and reexports to Country Group B (see Supplement No. 1 to part 740), except Sudan and Ukraine, of those commodities where the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) indicates a license requirement to the ultimate destination for national security reasons only and identified by ''GBS—Yes'' on the CCL. See § 743.1 of the EAR for reporting requirements for exports of certain commodities under License Exception GBS.

■ 7. Section 740.6 is amended by revising paragraph (a) introductory text to read as follows:

§ 740.6 Technology and software under restriction (TSR).

(a) *Scope.* License Exception TSR permits exports and reexports of technology and software where the Commerce Country Chart (Supplement No. 1 to part 738 of the EAR) indicates a license requirement to the ultimate destination for national security reasons only and identified by ''TSR—Yes'' in entries on the CCL, provided the software or technology is destined to Country Group B, except Sudan and Ukraine. (See Supplement No. 1 to part 740.) A written assurance is required from the consignee before exporting or reexporting under this License Exception.

* * * * *

§ 740.7 [Amended]

■ 8. Amend § 740.7 by

■ a. Removing ''Sudan,'' from paragraph (b)(2)(ii); and

■ b. Adding ''Sudan,'' between ''Serbia,'' and ''Tajikistan,'' in paragraph (d)(1).

§ 740.9 [Amended]

■ 9. Amend § 740.9 by

■ a. Removing and reserving paragraph (a)(2);

■ b. Removing ''Sudan,'' from paragraph (a)(9)(i); and

■ c. In paragraph (c)(2), removing the phrase '',and Sudan'' and adding ''and'' in front of ''Iran''.

§ 740.16 [Amended]

■ 10. Amend § 740.16 by removing and reserving paragraph (i).

§ 740.19 [Amended]

■ 11. Amend § 740.19 by

■ a. Removing ''or Sudan'' from paragraphs (a), (b), and (c)(i);

■ b. Removing paragraph (b)(18); and

■ c. Removing and reserving paragraph (c)(iii).

■ 12. Amend Supplement No. 1 to part 740 by:

■ a. Amending the ''Country Group B'' table, by adding Sudan in alphabetical order.

■ b. Revising the ''Country Group E [1]'' table.

The revision reads as follows:

Supplement No. 1 to Part 740

* * * * *

COUNTRY GROUP E [1]

Country	[E:1] Terrorist supporting countries [2]	[E:2] Unilateral embargo
Cuba	.....	X
Iran	X	.....
Korea, North	X	.....
Syria	X	.....

[1] In addition to the controls maintained by the Bureau of Industry and Security pursuant to the EAR, note that the Department of the Treasury administers:

(a) A *comprehensive embargo* against Cuba and Iran; and

(b) An *embargo against certain persons, e.g.,* Specially Designated Terrorists (SDT), Foreign Terrorist Organizations (FTO), Specially Designated Global Terrorists (SDGT), and Specially Designated Narcotics Traffickers (SDNT). Please see part 744 of the EAR for controls maintained by the Bureau of Industry and Security on these and other persons.

[2] The President made inapplicable with respect to Iraq provisions of law that apply to countries that have supported terrorism.

PART 742—CONTROL POLICY—CCL BASED CONTROLS

■ 13. The authority citation for part 742 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 3201 *et seq.;* 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320; Notice of November 12, 2019, 84 FR 61817, 3 CFR, 2019 Comp., p. 479.

■ 14. Amend § 742.1 by revising paragraph (d) to read as follows:

§ 742.1 Introduction.

* * * * *

(d) *Anti-terrorism Controls on Iran, North Korea, and Syria.* Commerce maintains anti-terrorism controls on Iran, North Korea, and Syria under section 6(a) of the Export Administration Act. Items controlled under section 6(a) to Iran, Syria, and North Korea are described in §§ 742.8, 742.9, 742.10, and 742.19, respectively, and in Supplement No. 2 to part 742. Commerce also maintains controls under section 6(j) of the EAA to Iran, North Korea, and Syria. Items controlled to these countries under EAA section 6(j) are also described in Supplement 2 to part 742. The Secretaries of Commerce and State are required to notify appropriate Committees of the Congress 30 days before issuing a license for an item controlled under section 6(j) to North Korea, Iran, or Syria. If you are exporting or reexporting to Iran, North Korea, or Syria, you should review part 746 of the EAR, Embargoes and Other Special Controls.

* * * * *

§ 742.10 [Removed and Reserved]

■ 15. Remove and reserve § 742.10.

■ 16. Amend Supplement No. 2 to Part 742 by:

■ a. Removing ''and Sudan'' from the heading;

■ b. Removing ''Sudan'' from paragraph (a);

■ c. Removing ''Sudan,'' from paragraph (b)(1);

■ d. Removing ''Sudan'' from paragraph (b)(3) introductory text;

■ e. Removing ''for Sudan, items in paragraphs (c)(6) through (c)(14) and (c)(16) through (c)(44) of this Supplement:'' from paragraph (b)(3)(ii);

■ f. Revising paragraph (c) introductory text;

■ g. Removing and reserving paragraph (c)(1)(iii);

■ h. Revising paragraphs (c)(2) and (3);

■ i. Removing paragraphs (c)(10)(iii), (c)(11)(iii), (c)(12)(iii), (c)(13)(iii),

(c)(14)(iii), (c)(16)(iii), (c)(17)(iii), (c)(18)(iii), (c)(19)(iii), (c)(20)(ii), (c)(21)(ii), (c)(22)(iii), (c)(23)(iii), (c)(24)(iii), (c)(25)(iv), (c)(26)(i)(C), (c)(27)(iii), (c)(28)(iii), (c)(29)(iii), (c)(30)(iii), (c)(31)(iii), (c)(32)(iii), (c)(33)(iii), (c)(34)(iii), (c)(35)(iii), (c)(36)(iii), (c)(37)(iii), (c)(38)(iii), (c)(39)(i)(C), (c)(40)(iii), (c)(41)(iii), (c)(42)(iii), (c)(43)(iii), (c)(44)(iii), (c)(46)(ii), (c)(47)(ii), and (c)(48)(ii).

Supplement No. 2 to Part 742—Anti-Terrorism Controls: North Korea and Syria

* * * * *

(c) The license requirements and licensing policies for items controlled for anti-terrorism reasons to Syria and North Korea are generally described in §§ 742.9 and 742.19 of this part, respectively. This Supplement provides guidance on licensing policies for North Korea and Syria and related contract sanctity dates that may be available for transactions benefiting from pre-existing contracts involving Syria.

* * * * *

(2) *All items subject to chemical and biological weapons proliferation controls.* Applications for all end-users in North Korea and Syria of these items will generally be denied. See Supplement No. 1 to part 742 for contract sanctity dates for Syria.

(3) *All items subject to missile proliferation controls (MTCR).* Applications for all end-users in North Korea and Syria will generally be denied. Contract sanctity provisions for Syria are not available.

* * * * *

PART 748—APPLICATIONS (CLASSIFICATION, ADVISORY, AND LICENSE) AND DOCUMENTATION

■ 17. The authority citation for part 748 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 13, 2020, 85 FR 49939 (August 14, 2020).

Supplement No. 2 to Part 748 [Amended]

■ 18. Amend Supplement No. 2 to part 748 by removing ''Sudan,'' from paragraph (c)(2).

§ 750.4 [Amended]

■ 19. Amend § 750.4 by removing ''Sudan,'' from paragraph (b)(6)(i).

PART 772—DEFINITIONS OF TERMS

■ 20. The authority citation for part 772 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

§ 772.1 [Amended]

■ 21. Amend § 772.1 by
■ a. Removing ''and Sudan'' from ''NOTE 3'' to the definition of '''Agricultural commodities''.';
■ b. Removing ''Sudan,'' from the definition of ''Countries supporting international terrorism.''.
■ c. Removing ''Sudan,'' from the definition of ''Medical devices''; and
■ d. Removing ''Sudan,'' from the definition of ''Medicines.''.

PART 774—THE COMMERCE CONTROL LIST

■ 22. The authority citation for part 774 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 23. Supplement 1 to part 774 is amended in category 1 by revising ECCN 1C350 and ECCN 1C355 to read as follows:

Supplement No. 1 to Part 774—The Commerce Control List

* * * * *

Category 1—Special Materials and Related Equipment, Chemicals, ''Microorganisms,'' and ''Toxins''

* * * * *

1C350 Chemicals that may be used as precursors for toxic chemical agents (see List of Items Controlled).

License Requirements

Reason for Control: CB, CW, AT.

Control(s)	*Country chart (see Supp. No. 1 to part 738)*
CB applies to entire entry.	CB Column 2

CW applies to 1C350 .b, and .c. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons. A license is required, for CW reasons, to export or reexport Schedule 2 chemicals and mixtures identified in 1C350.b to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR). A license is required, for CW reasons, to export Schedule 3 chemicals and mixtures identified in 1C350.c to States not Party to the CWC, unless an End-Use Certificate issued by the government of the importing country has been obtained by the exporter prior to export. A license is required, for CW reasons, to reexport Schedule 3 chemicals and mixtures identified in 1C350.c from a State not Party to the CWC to any other State not Party to the CWC. (See § 742.18 of the EAR for license requirements and policies for toxic and precursor chemicals controlled for CW reasons. See § 745.2 of the EAR for End-Use Certificate requirements that apply to exports of Schedule 3 chemicals to countries not listed in Supplement No. 2 to part 745 of the EAR.)

AT applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for AT reasons in 1C350. A license is required, for AT reasons, to export or reexport items controlled by 1C350 to a country in Country Group E:1 of Supplement No. 1 to part 740 of the EAR. (See part 742 of the EAR for additional information on the AT controls that apply to Iran, North Korea, and Syria. See part 746 of the EAR for additional information on sanctions that apply to Iran, North Korea, and Syria.)

License Requirement Notes

1. *SAMPLE SHIPMENTS: Subject to the following requirements and restrictions, a license is not required for sample shipments when the cumulative total of these shipments does not exceed a 55-gallon container or 200 kg of a single chemical to any one consignee during a calendar year. A consignee that receives a sample shipment under this exclusion may not resell, transfer, or reexport the sample shipment, but may use the sample shipment for any other legal purpose unrelated to chemical weapons.*

a. Chemicals Not Eligible:

A. [Reserved]

B. CWC Schedule 2 chemicals (States not Party to the CWC). No CWC Schedule 2 chemical or mixture identified in 1C350.b is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license.

b. Countries Not Eligible: Countries in Country Group E:1 of Supplement No. 1 to part 740 of the EAR are not eligible to receive sample shipments of any chemicals controlled by this ECCN without a license.

c. Sample shipments that require an End-Use Certificate for CW reasons: No CWC Schedule 3 chemical or mixture identified in 1C350.c is eligible for sample shipment to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR) without a license, unless an End-Use Certificate issued by the government of the importing country is obtained by the exporter prior to export (see § 745.2 of the EAR for End-Use Certificate requirements).

d. Sample shipments that require a license for reasons set forth elsewhere in the EAR: Sample shipments, as described in this Note 1, may require a license for reasons set forth elsewhere in the EAR. See, in particular, the end-use/end-user restrictions in part 744 of the EAR, and the restrictions that apply to embargoed countries in part 746 of the EAR.

e. Annual report requirement. The exporter is required to submit an annual written report for shipments of samples made under this Note 1. The report must be on company letterhead stationery (titled ''Report of

Sample Shipments of Chemical Precursors'' at the top of the first page) and identify the chemical(s), Chemical Abstract Service Registry (C.A.S.) number(s), quantity(ies), the ultimate consignee's name and address, and the date of export for all sample shipments that were made during the previous calendar year. The report must be submitted no later than February 28 of the year following the calendar year in which the sample shipments were made, to: U.S. Department of Commerce, Bureau of Industry and Security, 14th Street and Pennsylvania Ave., NW, Room 2099B, Washington, DC 20230, Attn: ''Report of Sample Shipments of Chemical Precursors.''

2. MIXTURES:

a. Mixtures that contain precursor chemicals identified in ECCN 1C350, in concentrations that are below the levels indicated in 1C350.b through .d, are controlled by ECCN 1C395 or 1C995 and are subject to the licensing requirements specified in those ECCNs.

b. A license is not required under this ECCN for a mixture, when the controlled chemical in the mixture is a normal ingredient in consumer goods packaged for retail sale for personal use. Such consumer goods are designated EAR99. However, a license may be required for reasons set forth elsewhere in the EAR.

Note to Mixtures: *Calculation of concentrations of AG-controlled chemicals:*

a. Exclusion. No chemical may be added to the mixture (solution) for the sole purpose of circumventing the Export Administration Regulations;

b. Percent Weight Calculation. When calculating the percentage, by weight, of ingredients in a chemical mixture, include all ingredients of the mixture, including those that act as solvents.

3. COMPOUNDS. Compounds created with any chemicals identified in this ECCN 1C350 may be shipped NLR (No License Required), without obtaining an End-Use Certificate, unless those compounds are also identified in this entry or require a license for reasons set forth elsewhere in the EAR.

4. TESTING KITS: Certain medical, analytical, diagnostic, and food testing kits containing small quantities of chemicals identified in this ECCN 1C350, are excluded from the scope of this ECCN and are controlled under ECCN 1C395 or 1C995. (Note that replacement reagents for such kits are controlled by this ECCN 1C350 if the reagents contain one or more of the precursor chemicals identified in 1C350 in concentrations equal to or greater than the control levels for mixtures indicated in 1C350.)

Technical Notes:

1. For purposes of this entry, a ''mixture'' is defined as a solid, liquid or gaseous product made up of two or more ingredients that do not react together under normal storage conditions.

2. The scope of this control applicable to Hydrogen Fluoride (see 1C350.d.14 in the List of Items Controlled) includes its liquid, gaseous, and aqueous phases, and hydrates.

3. Precursor chemicals in ECCN 1C350 are listed by name, Chemical Abstract Service (CAS) number and CWC Schedule (where applicable). Precursor chemicals of the same structural formula (e.g., hydrates) are controlled by ECCN 1C350, regardless of name or CAS number. CAS numbers are shown to assist in identifying whether a particular precursor chemical or mixture is controlled under ECCN 1C350, irrespective of nomenclature. However, CAS numbers cannot be used as unique identifiers in all situations because some forms of the listed precursor chemical have different CAS numbers, and mixtures containing a precursor chemical listed in ECCN 1C350 may also have different CAS numbers.

List Based License Exceptions (See Part 740 for a description of all license exceptions)

LVS: N/A
GBS: N/A

List of Items Controlled

Related Controls: See USML Category XIV(c) for related chemicals ''subject to the ITAR'' (see 22 CFR parts 120 through 130).
Related Definitions: See § 770.2(k) of the EAR for synonyms for the chemicals listed in this entry.
Items:

a. [Reserved]

b. Australia Group-controlled precursor chemicals also identified as Schedule 2 chemicals under the CWC, as follows, and mixtures in which at least one of the following chemicals constitutes 30 percent or more of the weight of the mixture:

b.1. (C.A.S. #7784–34–1) Arsenic trichloride;

b.2. (C.A.S. #76–93–7) Benzilic acid;

b.3. (C.A.S. #78–38–6) Diethyl ethylphosphonate;

b.4. (C.A.S. #683–08–9) Diethyl methylphosphonate;

b.5. (C.A.S. #15715–41–0) Diethyl methylphosphonite;

b.6. (C.A.S. #2404–03–7) Diethyl-N,N-dimethylphosphoroamidate;

b.7. (C.A.S. #41480–75–5) N,N-Diisopropylaminoethanethiol hydrochloride;

b.8. (C.A.S. #5842–07–9) N,N-Diisopropyl-beta-aminoethane thiol;

b.9. (C.A.S. #96–80–0) N,N-Diisopropyl-beta-aminoethanol;

b.10. (C.A.S. #96–79–7), N,N-Diisopropyl-beta-aminoethyl chloride;

b.11. (C.A.S. #4261–68–1) N,N-Diisopropyl-beta-aminoethyl chloride hydrochloride;

b.12. (C.A.S. #6163–75–3) Dimethyl ethylphosphonate;

b.13. (C.A.S. #756–79–6) Dimethyl methylphosphonate;

b.14. (C.A.S. #677–43–0) N,N-dimethylamino-phosphoryl dichloride;

b.15. (C.A.S. #1498–40–4) Ethyl phosphonous dichloride [Ethyl phosphinyl dichloride];

b.16. (C.A.S. #430–78–4) Ethyl phosphonus difluoride [Ethyl phosphinyl difluoride];

b.17. (C.A.S. #1066–50–8) Ethyl phosphonyl dichloride;

b.18. (C.A.S. #993–13–5) Methylphosphonic acid;

b.19. (C.A.S. #676–98–2) Methylphosphonothioic dichloride.

b.20. (C.A.S. #464–07–3) Pinacolyl alcohol;

b.21. (C.A.S. #1619–34–7) 3-Quinuclidinol;

b.22. (C.A.S. #111–48–8) Thiodiglycol.

c. Australia Group-controlled precursor chemicals also identified as Schedule 3 chemicals under the CWC, as follows, and mixtures in which at least one of the following chemicals constitutes 30 percent or more of the weight of the mixture:

c.1. (C.A.S. #762–04–9) Diethyl phosphite;

c.2. (C.A.S. #868–85–9) Dimethyl phosphite (dimethyl hydrogen phosphite);

c.3. (C.A.S. #139–87–7) Ethyldiethanolamine;

c.4. (C.A.S. #10025–87–3) Phosphorus oxychloride;

c.5. (C.A.S. #10026–13–8) Phosphorus pentachloride;

c.6. (C.A.S. #7719–12–2) Phosphorus trichloride;

c.7. (C.A.S. #10545–99–0) Sulfur dichloride;

c.8. (C.A.S. #10025–67–9) Sulfur monochloride;

c.9. (C.A.S. #7719–09–7) Thionyl chloride;

c.10. (C.A.S. #102–71–6) Triethanolamine;

c.11. (C.A.S. #122–52–1) Triethyl phosphite;

c.12. (C.A.S. #121–45–9) Trimethyl phosphite.

d. Other Australia Group-controlled precursor chemicals not also identified as Schedule 1, 2, or 3 chemicals under the CWC, as follows, and mixtures in which at least one of the following chemicals constitutes 30 percent or more of the weight of the mixture:

d.1. (C.A.S. #1341–49–7) Ammonium hydrogen fluoride;

d.2. (C.A.S. #107–07–3) 2-Chloroethanol;

d.3. (C.A.S. #109–89–7) Diethylamine;

d.4. (C.A.S. #100–37–8) N,N-Diethylaminoethanol;

d.5. (C.A.S. #589–57–1) Diethyl chlorophosphite;

d.6. (C.A.S. #298–06–6) O,O-Diethyl phosphorodithioate;

d.7. (C.A.S. #2465–65–8) O,O-Diethyl phosphorothioate;

d.8. (C.A.S. #108–18–9) Di-isopropylamine;

d.9. (C.A.S. #124–40–3) Dimethylamine;

d.10. (C.A.S. #506–59–2) Dimethylamine hydrochloride;

d.11. (C.A.S. #762–77–6) Ethyl chlorofluorophosphate;

d.12. (C.A.S. #1498–51–7) Ethyl dichlorophosphate;

d.13. (C.A.S. #460–52–6) Ethyl difluorophosphate;

d.14. (C.A.S. #7664–39–3) Hydrogen fluoride;

d.15. (C.A.S. #3554–74–3) 3-Hydroxyl-1-methylpiperidine;

d.16. (C.A.S. #76–89–1) Methyl benzilate;

d.17. (C.A.S. #754–01–8) Methyl chlorofluorophosphate;

d.18. (C.A.S. #677–24–7) Methyl dichlorophosphate;

d.19. (C.A.S. #22382–13–4) Methyl difluorophosphate;

d.20. (C.A.S. #14277–06–6) N,N Diethylacetamidine;

d.21. (C.A.S. #53510–30–8) N,N-Diethylbutanamidine;

d.22. (C.A.S. #90324–67–7) N,N-Diethylformamidine;

d.23. (C.A.S. #1342789–47–2) N,N Diethylisobutanamidine;

d.24. (C.A.S. #84764–73–8) N,N-Diethylpropanamidine;
d.25. (C.A.S. #1315467–17–4) N,N-Diisopropylbutanamidine;
d.26. (C.A.S. #857522–08–8) N,N-Diisopropylformamidine;
d.27. (C.A.S. #2909–14–0) N,N-Dimethylacetamidine;
d.28. (C.A.S. #1340437–35–5) N,N-Dimethylbutanamidine;
d.29. (C.A.S. #44205–42–7) N,N-Dimethylformamidine;
d.30. (C.A.S. #321881–25–8) N,N-Dimethylisobutanamidine;
d.31. (C.A.S. #56776–14–8) N,N-Dimethylpropanamidine;
d.32. (C.A.S. #1339586–99–0) N,N-Dipropylacetamidine;
d.33. C.A.S. #1342422–35–8) N,N-Dipropylbutanamidine;
d.34. (C.A.S. #48044–20–8) N,N-Dipropylformamidine;
d.35. (C.A.S. #1342700–45–1) N,N-Dipropylisobutanamidine;
d.36. (C.A.S. #1341496–89–6) N,N-Dipropylpropanamidine;
d.37. (C.A.S. #1314–80–3) Phosphorus pentasulfide;
d.38. (C.A.S. #75–97–8) Pinacolone;
d.39. (C.A.S. #7789–29–9) Potassium bifluoride;
d.40. (C.A.S. #151–50–8) Potassium cyanide;
d.41. (C.A.S. #7789–23–3) Potassium fluoride;
d.42. (C.A.S. #3731–38–2) 3-Quinuclidone;
d.43. (C.A.S. #1333–83–1) Sodium bifluoride;
d.44. (C.A.S. #143–33–9) Sodium cyanide;
d.45. (C.A.S. #7681–49–4) Sodium fluoride;
d.46. (C.A.S. #16893–85–9) Sodium hexafluorosilicate;
d.47. (C.A.S. #1313–82–2) Sodium sulfide;
d.48. (C.A.S. #637–39–8) Triethanolamine hydrochloride;
d.49. (C.A.S. #116–17–6) Tri-isopropyl phosphite.

* * * * *

1C355 Chemical Weapons Convention (CWC) Schedule 2 and 3 chemicals and families of chemicals not controlled by ECCN 1C350 or ''subject to the ITAR'' (see 22 CFR parts) (see List of Items Controlled).

License Requirements

Reason for Control: CW, AT.
Control(s)

CW applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for CW reasons. A license is required to export or reexport CWC Schedule 2 chemicals and mixtures identified in 1C355.a to States not Party to the CWC (destinations not listed in Supplement No. 2 to part 745 of the EAR). A license is required to export CWC Schedule 3 chemicals and mixtures identified in 1C355.b to States not Party to the CWC, unless an End Use Certificate issued by the government of the importing country is obtained by the exporter, prior to export. A license is required to reexport CWC Schedule 3 chemicals and mixtures identified in 1C355.b from a State not Party to the CWC to any other State not Party to the CWC. (See § 742.18 of the EAR for license requirements and policies for toxic and precursor chemicals controlled for CW reasons.)

AT applies to entire entry. The Commerce Country Chart is not designed to determine licensing requirements for items controlled for AT reasons in 1C350. A license is required, for AT reasons, to export or reexport items controlled by 1C350 to a country in Country Group E:1 of Supplement No. 1 to part 740 of the EAR. (See part 742 of the EAR for additional information on the AT controls that apply to Iran, North Korea, and Syria. See part 746 of the EAR for additional information on sanctions that apply to Iran, North Korea, and Syria.)

License Requirements Notes:

1. MIXTURES:

a. Mixtures containing toxic and precursor chemicals identified in ECCN 1C355, in concentrations that are below the control levels indicated in 1C355.a and .b, are controlled by ECCN 1C995 and are subject to the license requirements specified in that ECCN.

b. Mixtures containing chemicals identified in this entry are not controlled by ECCN 1C355 when the controlled chemical is a normal ingredient in consumer goods packaged for retail sale for personal use or packaged for individual use. Such consumer goods are classified as EAR99.

Note to mixtures: *Calculation of concentrations of CW-controlled chemicals:*

a. Exclusion. No chemical may be added to the mixture (solution) for the sole purpose of circumventing the Export Administration Regulations;

b. Percent Weight Calculation. When calculating the percentage, by weight, of ingredients in a chemical mixture, include all ingredients of the mixture, including those that act as solvents.

2. COMPOUNDS: Compounds created with any chemicals identified in this ECCN 1C355 may be shipped NLR (No License Required), without obtaining an End-Use Certificate, unless those compounds are also identified in this entry or require a license for reasons set forth elsewhere in the EAR.

Technical Notes: *For purposes of this entry, a ''mixture'' is defined as a solid, liquid or gaseous product made up of two or more ingredients that do not react together under normal storage conditions.*

List Based License Exceptions (See Part 740 for a description of all license exceptions)

LVS: N/A
GBS: N/A

List of Items Controlled

Related Controls: See also ECCNs *1C350 1C351, 1C395,* and *1C995.* See §§ 742.18 and 745.2 of the EAR for End-Use Certification requirements.
Related Definitions: N/A
Items:

a. CWC Schedule 2 chemicals and mixtures containing Schedule 2 chemicals:

a.1. Toxic chemicals, as follows, and mixtures containing toxic chemicals:

a.1.a. PFIB: 1,1,3,3,3-Pentafluoro-2-(trifluoromethyl)-1-propene (C.A.S. 382–21–8) and mixtures in which PFIB constitutes more than 1 percent of the weight of the mixture;

a.1.b. [Reserved]

a.2. Precursor chemicals, as follows, and mixtures in which at least one of the following precursor chemicals constitutes more than 10 percent of the weight of the mixture:

a.2.a. Chemicals, except for those listed in Schedule 1, containing a phosphorus atom to which is bonded one methyl, ethyl, or propyl (normal or iso) group but not further carbon atoms.

Note: *1C355.a.2.a does not control Fonofos: O-Ethyl S-phenyl ethylphosphonothiolothionate (C.A.S. 944–22–9).*

a.2.b. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) phosphoramidic dihalides;

a.2.c. FAMILY: Dialkyl (Me, Et, n-Pr or i-Pr) N,N-dialkyl (Me, Et, n-Pr, or i-Pr)-phosphoramidates;

a.2.d. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethyl-2-chlorides and corresponding protonated salts;

a.2.e. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-ols and corresponding protonated salts;

Note: *1C355.a.2.e. does not control N,N-Dimethylaminoethanol and corresponding protonated salts (C.A.S. 108–01–0) or N,N-Diethylaminoethanol and corresponding protonated salts (C.A.S. 100–37–8).*

a.2.f. FAMILY: N,N-Dialkyl (Me, Et, n-Pr or i-Pr) aminoethane-2-thiols and corresponding protonated salts.

b. CWC Schedule 3 chemicals and mixtures containing Schedule 3 chemicals:

b.1. Toxic chemicals, as follows, and mixtures in which at least one of the following toxic chemicals constitutes 30 percent or more of the weight of the mixture:

b.1.a. Phosgene: Carbonyl dichloride (C.A.S. 75–44–5);

b.1.b. Cyanogen chloride (C.A.S. 506–77–4);

b.1.c. Hydrogen cyanide (C.A.S. 74–90–8);

b.1.d. Chloropicrin: Trichloronitromethane (CAS 76–06–2).

b.2. Precursor chemicals, as follows, and mixtures in which at least one of the following precursor chemicals constitutes 30 percent or more of the weight of the mixture:

b.2.a. [Reserved];

b.2.b. Methyldiethanolamine (C.A.S. 105–59–9).

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 922

[Docket No. 210107–0004]

RIN 0648–BA21

Expansion of Flower Garden Banks National Marine Sanctuary

AGENCY: Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Final rule.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA) issues final regulations to implement the expansion of the boundaries of Flower Garden Banks National Marine Sanctuary (FGBNMS or sanctuary) and revise the sanctuary's terms of designation. The purpose of this action is to expand the sanctuary to include portions of 14 additional reefs and banks in the northwestern Gulf of Mexico, representing approximately a 104 square mile increase in area. With this action, the existing FGBNMS regulations will apply to the expanded locations.

DATES: *Effective Date:* Pursuant to section 304(b) of the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1434(b)), the designation and regulations shall take effect and become final after the close of a review period of forty-five days of continuous session of Congress, beginning on the date on which this document is published. The public can track the days of Congressional session at *https://www.congress.gov/days-in-session.* After the close of the forty-five days of continuous session of Congress, NOAA will publish a document announcing the effective date of the final regulations in the **Federal Register**.

ADDRESSES: Copies of the Final Environmental Impact Statement (FEIS) described in this rule and the record of decision (ROD) are available at *https://flowergarden.noaa.gov/management/sanctuaryexpansion.html.*

FOR FURTHER INFORMATION CONTACT: George P. Schmahl, Superintendent, Flower Garden Banks National Marine Sanctuary, 4700 Avenue U, Building 216, Galveston, Texas 77551, at 409–356–0383, or *fgbexpansion@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Introduction

1. Flower Garden Banks National Marine Sanctuary

Located in the northwestern Gulf of Mexico, 70 to 115 nautical miles (130 to 213 kilometers) off the coasts of Texas and Louisiana, FGBNMS encompasses approximately 56 square miles and includes three separate undersea features: East Flower Garden Bank, West Flower Garden Bank, and Stetson Bank. The banks range in depth from 55 feet (17 meters) to nearly 500 feet (152 meters), and are geological formations created by the movement of ancient salt deposits pushed up through overlying sedimentary layers.

The banks provide a wide range of habitat conditions that support several distinct biological communities, including the northernmost coral reefs in the continental United States and mesophotic coral habitats. These and similar formations throughout the northwestern Gulf of Mexico provide the foundation for essential habitat for numerous marine species, including a variety of fish species of commercial and recreational importance, and several endangered or threatened species, including sea turtles and mobula rays. The combination of location and geology makes the sanctuary an extremely productive and diverse ecosystem.

NOAA issued a final rule to implement the designation of FGBNMS on December 5, 1991 (56 FR 63634). Congress subsequently passed a law recognizing the designation on January 17, 1992 (Pub. L. 102–251, Title I, Sec. 101). At that time, the sanctuary consisted of two areas known as East and West Flower Garden Banks (56 FR 63634). Among other things, FGBNMS regulated a narrow range of activities, established permit and certification procedures, and exempted certain U.S. Department of Defense (DOD) activities from the sanctuary's prohibitions (56 FR 63634). Those regulations became effective on January 18, 1994 (58 FR 65664). In 1996, Congress added Stetson Bank to the sanctuary (Pub. L. 104–283). The boundaries of Stetson Bank and West Flower Garden Bank were later amended to improve administrative efficiencies and increase the precision of all boundary coordinates based on new positioning technology (65 FR 81175, Dec. 22, 2000). FGBNMS regulations can be found at 15 CFR part 922, subpart L, and the sanctuary management plan may be found on the FGBNMS website.[1] As a result of this action, FGBNMS is being expanded to a total of 160.4 square miles, with the existing regulations applying to the expansion area.

2. Need for Action

The NMSA authorizes the Secretary of Commerce (Secretary) to designate and protect, as national marine sanctuaries, areas of the marine environment that are of special national significance due to their conservation, recreational, ecological, historical, scientific, cultural, archeological, educational, or aesthetic qualities. Day-to-day management of national marine sanctuaries is delegated by the Secretary to ONMS. The primary objective of the NMSA is to protect nationally significant marine resources, including biological features such as coral reefs, and cultural resources, such as historic shipwrecks and archaeological sites. The mission of FGBNMS is to identify, protect, conserve, and enhance the natural and cultural resources, values, and qualities of the sanctuary and its regional environment for this and future generations.

This action responds to the need to provide comprehensive and coordinated management of, and additional regulatory protection for, sensitive underwater features and marine habitats associated with continental shelf-edge reefs and banks in the northwestern Gulf of Mexico. The current jurisdictional regime divides authority among several governmental entities that regulate offshore energy exploration (Bureau of Ocean Energy Management (BOEM)), fishing (Gulf of Mexico Fishery Management Council (GMFMC)), and water quality (Environmental Protection Agency (EPA)), but does not provide comprehensive and effective management for the full range of activities that impact the sensitive reefs and banks in the region. For example, BOEM has established No Activity Zones (NAZs) that prohibit anchoring only by vessels engaged in development activities and platform services specific to a particular lease, while anchoring by other vessels remains unregulated. Further, these anchoring regulations in the NAZs apply only on a lease-by-lease basis. Other vessel ground tackle (including anchors, chains, and cables) and marine salvage activities were unregulated and have caused significant injury to sensitive biological communities. Sanctuary designation will allow for additional protection of these reefs and banks from other bottom-disturbing activities, which are otherwise unregulated at this time.

[1] *https://flowergarden.noaa.gov/management/2012mgmtplan.html.*

The sanctuary expansion areas are recognized as hotspots of marine biodiversity that provide vital habitat for many important species in the Gulf of Mexico region. They are home to the most significant examples of coral and algal reefs, mesophotic and deepwater coral communities, and other biological assemblages in the Gulf of Mexico. Furthermore, these areas provide important habitat for vulnerable species such as mobula rays, sea turtles, and whale sharks, while serving as nurseries for numerous fish species of commercial and recreational importance. As such, most of these areas have also been identified as nationally significant through their designation as Habitat Areas of Particular Concern (HAPC) by the GMFMC and as NAZs by BOEM. These habitats are vulnerable to a variety of known and potential impacts, including large vessel anchoring, marine salvage operations, fishing techniques that may injure benthic habitat (*e.g.,* trawling, bottom-tending gear), and certain oil and gas exploration and development activities. These impacts will more effectively be addressed within the expanded areas through the comprehensive habitat conservation and management authorities under the NMSA. The protection of these ecologically significant sites would increase the resilience of marine ecosystems and enhance the sustainability of the region's thriving recreation, tourism, and commercial economies. Ultimately, expanding FGBNMS will help ensure that valuable marine resources remain available for the use and enjoyment of future generations of Americans.

This sanctuary expansion is the outcome of decades of scientific research and growing public recognition of the need for coordinated protection of significant offshore marine places in the northwestern Gulf of Mexico region. Protecting additional habitat in the northwestern Gulf of Mexico emerged as one of the highest priorities identified during a vigorous public review process of FGBNMS management issues. Subsequently, ''Sanctuary Expansion'' was incorporated as a discrete action plan in the 2012 revision of the sanctuary's management plan. The region is utilized for a variety of recreational, commercial, and industrial purposes, and there are ongoing impacts from bottom-disturbing activities, such as large vessel anchoring and marine salvage, on the sensitive biological resources and geological features associated with many reefs and banks in the area. Therefore, pursuant to the NMSA's purpose to ''facilitate to the extent compatible with the primary objective of resource protection, all public and private uses of the resources of these marine areas,'' FGBNMS can further resource protection while balancing multiple uses. This action will expand FGBNMS by incorporating portions of selected reefs and banks in the northwestern Gulf of Mexico. In doing so, this action will provide management of and protection for nationally significant areas with biological, ecological, and/or structural links to the existing sanctuary, including vulnerable mesophotic and deep benthic habitat sites, while providing important opportunities for research and recovery of resources from observed impacts. These areas contain the most significant examples of mesophotic coral communities in the United States, including some of the highest known densities (colonies per square meter) and species richness of mesophotic corals (Cairns et al. 2017). In addition, and as noted above, many banks in the expansion area have also been recognized by BOEM and GMFMC as nationally significant and designated as HAPCs and NAZs.

II. History of the FGBNMS Expansion Process

1. Management Plan Review

NOAA is required by NMSA Section 304(e) to periodically review sanctuary management plans to ensure that sanctuary management continues to effectively conserve, protect, and enhance the nationally significant living and cultural resources at each site. Management plans generally outline regulatory goals, describe boundaries, identify staffing and budgetary needs, and set priorities and performance measures for resource protection, research, and education programs. Management plans also guide the development of future management activities.

The FGBNMS management plan review process began in 2006 with a series of scoping meetings to obtain information about the public's interests and priorities for FGBNMS management (71 FR 52757; September 7, 2006). Subsequently, NOAA worked with the FGBNMS Advisory Council to prioritize issues and develop appropriate management strategies and activities for the preparation of a draft revised management plan. Protecting additional nationally significant habitat in the northwestern Gulf of Mexico emerged as one of the highest priority issues for the sanctuary during the FGBNMS management plan review process.

In 2007, the FGBNMS Advisory Council, using information developed by its Boundary Expansion Working Group (BEWG), recommended a range of sanctuary boundary expansion alternatives. Based on this input, and information obtained through a subsequent public process, NOAA prepared a revised management plan (77 FR 25060, April 27, 2012) that contained six action plans, including one that specifically addressed sanctuary expansion. The Sanctuary Expansion Action Plan outlined a strategy to expand the protected areas to include additional reefs and banks in the northwestern Gulf of Mexico, and to develop a Draft Environmental Impact Statement (DEIS) to evaluate appropriate expansion alternatives. The recommended expansion alternative, as identified by the FGBNMS Advisory Council in 2007, was included in the Sanctuary Expansion Action Plan. This recommendation included nine additional reefs and banks, encompassing approximately 281 square miles.

2. Boundary Expansion Notice of Intent

On February 3, 2015, NOAA published a Notice of Intent (NOI) to prepare a DEIS for expanding FGBNMS boundaries (80 FR 5699). The NOI solicited public input on the range and significance of issues related to sanctuary expansion, including potential boundary configurations, resources to be protected, other issues NOAA should consider, and any information that should be included in the resource analysis. The public scoping period was open through April 6, 2015, during which time ONMS held three public hearings and interested parties submitted both written and oral comments.

NOAA received approximately 200 comments during the scoping period. Most commenters were strongly supportive of the concept of sanctuary expansion. In addition to broad general support, some comments expressed conditional support while raising user concerns primarily relating to the potential impact of sanctuary expansion on the offshore oil and gas industry and historic fishing practices. Other commenters recommended that NOAA consider a broader geographical area than the Sanctuary Expansion Action Plan identified, especially in light of the 2010 BP/Deepwater Horizon oil spill and new information that became available since the 2007 FGBNMS Advisory Council recommendation. This information was considered during the development of the expansion alternatives in the DEIS.

3. Draft Environmental Impact Statement

In accordance with the National Environmental Policy Act (NEPA, 42 U.S.C. 4321 *et seq.*) and the NMSA (16 U.S.C. 1434), NOAA prepared and released a DEIS (81 FR 37576, June 10, 2016). The DEIS considered alternatives for the proposed expansion of boundaries at FGBNMS and application of the existing sanctuary regulations and management actions to the expanded area. The DEIS evaluated the environmental consequences of the alternatives and provided an in-depth resource assessment. The action alternatives in the DEIS would expand the network of protected areas within FGBNMS by incorporating selected reefs, banks, and other features throughout the north central Gulf of Mexico.

The DEIS evaluated five alternatives, ranging from ''no action'' (maintaining the current boundaries) to one that included a total of 45 discrete boundary units and encompassed approximately 935 square miles. The action discussed in this rulemaking falls within the bounds of the DEIS alternatives as discussed below in part II, section 5 of this final rule and in the supplemental information report which is available at the FGBNMS website.[2] NOAA's preferred alternative in the 2016 DEIS (Alternative 3) sought to expand the existing sanctuary from approximately 56 square miles to approximately 383 square miles, including additional important and sensitive marine habitat areas in the northwestern Gulf of Mexico. This alternative would have applied the existing sanctuary regulations and management actions to the expanded area. The 2016 preferred alternative included 15 reefs and banks (in addition to those contained within the existing 3 sanctuary units) encompassed within 11 discrete boundary polygons, including multi-bank complexes. No significant adverse impacts to the human environment were identified under any alternative considered in the DEIS.

In June 2016, NOAA opened a public comment period on the DEIS for sixty-nine (69) days, which closed on August 19, 2016. During this public comment period, NOAA also held five (5) in person public hearings in Galveston, TX; Houston, TX; New Orleans, LA; Lafayette, LA; and Mobile, AL. NOAA received 1,421 separate comments, including three letter campaigns and one petition, each with multiple signatories. All written comments on the DEIS are available at the *Regulations.gov* website.[3] NOAA's response to the public comments are set forth in Appendix A of the FEIS, which was made available to the public on December 11, 2020 (85 FR 80093).

4. NOAA's Revised Preferred Alternative and Supplemental Information Report

In response to concerns raised primarily by the oil and gas industry regarding the potential impacts to offshore energy operations arising from the Preferred Alternative presented in the 2016 DEIS, the FGBNMS Advisory Council (Advisory Council) established a new BEWG to review NOAA's expansion proposal and make a recommendation. Between July 2016 and May 2018, the BEWG met 21 times, and considered a variety of topics, including a range of boundary and regulatory issues. The BEWG recommended revised FGBNMS expansion boundaries that tracked the BOEM-designated NAZs. NAZs are areas within which no operations, anchoring, or structures are allowed for oil and gas operations. The NAZs were developed in the 1970–1980's to protect the shallowest portion of the reefs and banks. Based primarily on the May 2018 FGBNMS Advisory Council recommendation, along with input received from public comments and consultation with the GMFMC and various Federal agencies, NOAA revised the preferred alternative.

In the revised preferred alternative, NOAA reduced the size of the expansion areas proposed in the 2016 DEIS preferred alternative to promote compatibility with users and reduce potential economic impacts to the offshore energy and fishing industries. On March 22, 2019, NOAA evaluated changes to the 2016 DEIS preferred alternative in a Supplemental Information Report (SIR). Through this review, NOAA determined that preparing a supplement to the 2016 DEIS is neither required nor necessary under NEPA. The SIR is available on the FGBNMS website.[4] Pursuant to applicable Council on Environmental Quality (CEQ) guidance, NOAA's rationale for the revised preferred alternative is now presented as NOAA's Final Preferred Alternative in the FEIS and part II, section 7 of this final rule and the ROD.

5. The Proposed Rule

On May 1, 2020, NOAA published a proposed rule which would expand the boundaries of FGBNMS from approximately 56 square miles to 160 square miles (85 FR 25359 May 1, 2020). This action would add 14 banks, for a total of 17 banks, represented in 19 polygons (including 3 banks with multi-polygons), and apply the existing sanctuary regulations and management plan to the expanded sanctuary boundaries. Under the existing sanctuary regulations, only conventional hook and line gear would be permissible in the expanded sanctuary boundaries.

NOAA solicited public comment on the proposed rule from May 1, 2020 to July 3, 2020, including specifically on whether to provide exemptions for spearfishing and pelagic longline in the expanded area. NOAA accepted comments in the form of letters and written comments through electronic submissions to *http://regulations.gov,* letters submitted by mail, and public hearings. As a result of the Coronavirus global pandemic and restrictions on public gatherings, three virtual public hearings were held via Gotowebinar®.

NOAA received 485 separate comments, including four letter campaigns and four petitions, each with multiple signatories, for a total of 36,111 comments. All written public comments on the proposed expansion are available on the *Regulations.gov* website.[5] NOAA's responses to the public comments are available in Appendix A of the FEIS, and in section IV of this final rule.

III. Summary of Final Regulations

With this final rule, NOAA is revising the FGBNMS regulations at 15 CFR part 922, subpart L, as follows.

1. Sanctuary Boundary Expansion

NOAA is amending the sanctuary boundary descriptions at 15 CFR part 922, subpart L, and the terms of designation in order to expand the boundaries of FGBNMS to include portions of 14 additional reefs and banks in the sanctuary, adding approximately 104 square miles, bringing the total area to 160.4 square miles and encompassing 17 banks. The boundary changes were selected through a public process to identify and assess marine areas that could more effectively complement current management authorities or enhance natural and cultural resource values.

[2] *https://flowergarden.noaa.gov/management/expansionnpr.html.*

[3] *https://www.regulations.gov/docket?D=NOAA-NOS-2016-0059.*

[4] *https://nmsflowergarden.blob.core.windows.net/flowergarden-prod/media/archive/doc/expansion/deissupplementalinforeport.pdf.*

[5] *https://www.regulations.gov/docketBrowser?rpp=25&so=DESC&sb=commentDueDate&po=0&D=NOAA-NOS-2019-0033.*

Collectively, these new areas capture a greater diversity of habitats and biological resources than currently protected by FGBNMS. Inclusion of these areas within the sanctuary system will provide additional regulatory protection, additional management actions and initiatives, and improved public awareness of their natural resource values. Detailed maps of these boundary changes are available on the FGBNMS website.[6]

Under this action, NOAA is expanding the boundaries of the sanctuary by 104.2 square miles from 56.2 square miles to 160.4 square miles as follows:

a. Stetson Bank—increase of area by 0.6 square miles from 0.8 square miles to 1.4 square miles

b. West Flower Garden Bank—increase of area by 7.22 square miles from 29.94 square miles to 37.16 square miles

c. East Flower Garden Bank—increase of area by 2.4 square miles from 25.4 square miles to 27.8 square miles

d. Horseshoe Bank—28.7 square miles

e. MacNeil Bank—2.7 square miles

f. Rankin/28 Fathom Banks—5.6 square miles

g. Bright Bank—7.7 square miles

h. Geyer Bank—11.5 square miles

i. Elvers Bank—4.6 square miles

j. McGrail Bank—4.7 square miles

k. Sonnier Bank—3.1 square miles

l. Bouma Bank—7.7 square miles

m. Rezak Bank—3.7 square miles

n. Sidner Bank—2.0 square miles

o. Alderdice Bank—5.0 square miles

p. Parker Bank—7.0 square miles

2. Apply the Existing Sanctuary Regulations and Management Action to the Expanded Area

NOAA will apply the existing sanctuary regulations (including regulatory prohibitions set forth in § 922.122) and the existing management plan [7] to the expanded sanctuary boundary in order to provide for more comprehensive management and protection of sensitive underwater features and marine habitats associated with continental shelf-edge reefs and banks in the northwestern Gulf of Mexico. Accordingly, 15 CFR 922.122(e) will be updated to reflect the effective date of the sanctuary expansion, and no further amendments of the regulatory text in 15 CFR part 922 are necessary to implement this action.

[6] *https://flowergarden.noaa.gov/management/sanctuaryexpansion.html.*

[7] *https://flowergarden.noaa.gov/management/2012mgmtplan.html.*

3. Department of Defense Activities

NOAA's decision to amend the effective date in § 922.122(e) addresses concerns raised by the Department of the Navy (DON) during coordination in development of this final rule. In the final rule, NOAA clarifies that the prohibitions in § 922.122(a)(2) through (11) do not apply to the activities being carried out by the Department of Defense as of the date of sanctuary expansion.

4. Terms of Designation

Section 304(a)(4) of the NMSA requires that the terms of designation include the geographic area of the sanctuary; the characteristics of the area that give it conservation, recreational, ecological, historical, research, educational, or aesthetic value; and the types of activities that will be subject to regulation by the Secretary of Commerce to protect these characteristics. Section 304(a)(4) also specifies that the terms of designation may be modified only by the same procedures by which the original designation was made.

The terms of designation for FGBNMS was first published in 1991 (56 FR 63637), and became effective in 1994 (58 FR 65664). The terms of designation were not incorporated into the Code of Federal Regulations, and, whenever there was a proposed regulatory change, NOAA and the general public had to refer to the preamble of the 1991 final rule to understand the nature and scope of the terms of designation. With this final rule, NOAA is making the terms of designation more readily available to the general public by amending the FGBNMS regulations at 15 CFR part 922, subpart L, to incorporate the terms of designation as a new appendix B to the FGBNMS regulations. NOAA is amending Article II. Description of the Area to include Stetson Bank (added by Congress in 1996 pursuant to Pub. L. 104–283) and the additional reefs and banks included in this expansion, add a new section relating to the U.S. Department of Defense (DoD) exemption, and revising the ''Consistency with International Law'' section of the terms of designation in order to address comments raised by the U.S. Department of State during interagency consultation.

5. No Exemptions for Spearfishing and Pelagic Longline Fishing in the Expanded Sanctuary

Based on the public comments received on the proposed rule, NOAA has decided not to provide exemptions for spearfishing or pelagic longline fishing. The rationale for the decisions not to provide exemptions for spearfishing or pelagic longline fishing are addressed below in section IV. Responses to Comments.

IV. Response to Comments

NOAA received 1,421 individual (8,491 campaigns and petitions) public comments on the DEIS and 485 individual (36,111 including campaigns and petitions) public comments on the proposed rule. The majority of comments expressed general support for sanctuary expansion, others expressed concerns about the reduced size of the boundaries, and few comments were received opposing the expansion of FGBNMS. Of the comments received during this action, approximately one third supported the revised preferred alternative in the proposed rule (which is identified as NOAA's Final Preferred Alternative in the FEIS). Public comments identified specific geographic locations of concern that were not included in the revised preferred alternative. Comments raised concerns about boundary enforcement, essential fish habitat, preservation of biodiversity, connectivity between bank areas, mesophotic/deepwater coral ecosystems, mobula rays, whale sharks, sea turtles, sharks, marine mammals, and commercial and recreationally important fish. Many of the comments supportive of the proposed expansion referred to industrial, environmental, and global impacts.

In response to NOAA's request for public comment on fishery exemptions for pelagic longline fishing and spearfishing with sanctuary expansion, 25,641 comments opposed an exemption for pelagic longline fishing, 23,353 opposed an exemption for spearfishing, 2 comments supported allowing pelagic longline fishing, and 8 comments indicated conditional support for spearfishing. Conditional support for spearfishing included an exemption for breath-hold only spearfishing, establishing an initial limited capacity fishery that could be assessed at a reduced number of banks, and an exemption for lionfish only. NOAA analyzed comments received during this process and considered them in preparation of this FEIS, as well as developed agency responses. NOAA's responses to the public comments are included in Appendix A of the FEIS and in this document (Part IV).

NOAA has consolidated public comments from the DEIS and proposed rule and collectively responds to those comments here and in Appendix A of the FEIS.

General Support and Opposition of Proposed Sanctuary Expansion

1. *Comment:* NOAA received comments that supported the proposed expansion of the sanctuary and encouraged NOAA to proceed with the expansion process. Comments also supported the Revised Preferred Alternative (NOAA's Final Preferred Alternative).

Response: Comment accepted. NOAA has considered these comments in carrying the Revised Preferred Alternative forward to the Final Environmental Impact Statement (FEIS) and final rule as NOAA's Final Preferred Alternative.

2. *Comment:* NOAA received comments that opposed the overall sanctuary expansion process citing reasons including: (1) Existing protections for sensitive resources; (2) concern of restricting use/access to the public; (3) safety, budget, and management limitations; and (4) socioeconomic consequences to certain industries.

Response: NOAA determined the proposed action responds to the need to provide additional protection and management of sensitive underwater features and marine habitats associated with continental shelf-edge reefs and banks in the northwestern Gulf of Mexico. The current jurisdictional regime divides authority among several governmental entities that regulate offshore energy exploration (Bureau of Ocean and Energy Management (BOEM)), fishing (Gulf of Mexico Fishery Management Council (GMFMC)), and water quality (Environmental Protection Agency (EPA)). NOAA has determined the current jurisdictional regime does not provide comprehensive and effective management for the full range of activities that impact the sensitive reefs and banks in the region. Chapter 2 of the FEIS and Part I, Section 2 of the preamble to the final rule describe the purpose and need for this proposed expansion. Extending the sanctuary boundary to new reefs and banks in the northwestern Gulf of Mexico promotes ecological conservation and biodiversity, expands sanctuary management efforts in the region, and helps to balance multiple uses.

Boundaries

3. *Comment:* NOAA received comments that generally supported expansion, but opposed the boundaries in the Revised Preferred Alternative (NOAA's Final Preferred Alternative). These comments indicated that the proposed boundaries of the Revised Preferred Alternative were too small or would exclude some ''topographic highs'' and reduce migratory corridors, or that NOAA should select a larger boundary alternative. Additionally, comments noted the removal of buffer zones entirely in the Revised Preferred Alternative and that very small areas were created at some banks (*e.g.,* Elvers, McGrail), which results in fragmented connectivity and diminished ecological and species function. Comments also stated NOAA's Preferred Alternative in the DEIS (Alternative 3) excluded 39 nationally significant areas and 9 nationally significant shipwrecks.

Response: NOAA developed the Final Preferred Alternative in response to public comments and recommendations from the Sanctuary Advisory Council. NOAA's Final Preferred Alternative was based on boundary configurations developed by the Advisory Council's Boundary Expansion Working Group and the Advisory Council's 2018 recommendation. It was also based on research conducted by the Office of National Marine Sanctuaries, consultation with other Federal and state agencies, strong public support and comment during public meetings preceding this proposal, and extensive input from oil and gas, and fishing interests. The Final Preferred Alternative further follows the National Marine Sanctuaries Act's goal of facilitating, to the extent compatible with the primary objective of resource protection, all public and private uses of the resources.

NOAA modified DEIS Alternative 3 to develop the Final Preferred Alternative under which the boundaries were drawn more tightly around the shallowest portions of the geological features identified in Alternative 3. The new boundaries closely follow the BOEM No Activity Zones, which have prohibitions on oil and gas exploration and development, but allow other bottom-disturbing activities that can cause severe negative impacts to the benthic areas. NOAA's Final Preferred Alternative expands the sanctuary by approximately 104 square miles, to include additional important and sensitive marine habitat areas outside the current sanctuary boundary, which will offer additional protection not provided by BOEM's current regulations. NOAA has determined the Final Preferred Alternative minimizes the impact to offshore energy exploration and production while providing substantial protection to sensitive marine habitats of national significance and meeting the expansion objectives as identified in the 2012 FGBNMS management plan and 2016 DEIS. Refer also to FEIS Chapter 3, Section 3.2 for additional details on the development of NOAA's proposed action.

NOAA submits there were more environmentally preferable alternatives assessed in the DEIS; however, ONMS has identified the Final Preferred Alternative as one that, based on strong input from the public and the Sanctuary Advisory Council, provides a significant environmental benefit, can be managed with current FGBNMS operational capacity, and minimizes negative impact to industry activities.

NOAA has determined the Final Preferred Alternative remains within the range of alternatives and impacts analyzed in the 2016 DEIS. Also refer to NOAA's Supplemental Information Report and FEIS Chapter 3, Section 3.2 for additional details on the development of the Final Preferred Alternative.

4. *Comment:* NOAA received comments requesting additional areas and banks to be considered in the proposed expansion process, including: Coffee Lump, 32 Fathom, Claypile, Applebaum, 29 Fathom, Fishnet, Phleger, Sweet, and Jakkula Banks, Florida Middle Grounds, Madison/Swanson, and Alabama Pinnacles, north central Gulf of Mexico, Ewing Bank (whale shark aggregation), Bryant Bank, more of Bright Bank complex, and the Deep Water Horizon (Deepwater Horizon) rig/well area.

Response: NOAA rejects the requests to add these additional banks and areas for two primary reasons, (1) there was insufficient data to characterize these areas as nationally significant, or (2) they were too far from the existing sanctuary. NOAA considered including 32 Fathom Bank, Applebaum Bank, Coffee Lump Bank, Fishnet Bank, Phleger Bank, Sweet Bank, Diaphus Bank, and Sackett Bank but determined either insufficient data were available to adequately characterize the sites or available data does not indicate sufficiently unique, diverse, productive, or otherwise nationally significant biological communities or geologic features.

Sites in biogeographic regions other than the north central Gulf of Mexico were also eliminated from further consideration; areas to both the east and west of the area roughly defined by the 87th and 95th west meridians reflect geologic/sedimentary and hydrologic/oceanographic settings, as well as biological communities, that are distinctly different from those of the north central Gulf of Mexico and are faced with distinctly different threats or other conservation issues. Features

eliminated from further consideration based on this distinction include Big Dunn Bar, Small Dunn Bar, Blackfish Ridge, Mysterious Bank, the South Texas Banks (Dream Bank, Southern Bank, Hospital Bank, North Hospital Bank, Aransas Bank, Baker Bank, and South Baker Bank), Madison-Swanson, the Florida Middle Grounds, and Pulley Ridge. Bryant Bank and more areas of the Bright Bank Complex were primarily excluded from the Final Preferred Alternative because of concerns raised from the oil and gas industry.

Although these additional areas were rejected for consideration in the current FEIS, FGBNMS will consider extending sanctuary protection and management to these additional biogeographic regions and habitat types during the next management plan review.

For more information on how the Final Preferred Alternative was developed and selected, refer to FEIS Chapter 1, Sections 1.5 and Chapter 3, Sections 3.1 and 3.2.

5. *Comment:* NOAA received a comment that requested the agency identify areas to redraw boundaries to reduce impact on fishing (*i.e.,* northern boundary of MacNeil, northern boundary of Sonnier, and northeast boundary of Bouma).

Response: NOAA considered this request, and following the DEIS, slightly reduced the boundaries at these banks to more closely align with BOEM designated NAZs. The decrease in proposed expansion area in the Final Preferred Alternative was partly in response to requests, such as this, to reduce impacts to historical fishing activities. Moreover, ONMS has completed consultation with the GMFMC pursuant to NMSA section 304(a)(5) regarding the boundaries and fishing regulations in the Final Preferred Alternative, and GMFMC concurred with this action. See Appendix G of the FEIS for more details on the 304(a)(5) consultation.

6. *Comment:* NOAA received a comment that requested coordinates for all proposed alternatives be included.

Response: NOAA disagrees. NOAA provided the coordinates of NOAA's Final Preferred Alternative in Appendix H of the FEIS. Additionally, the coordinates of NOAA's Final Preferred Alternative are included as appendix A to the final rule which will be codified in 15 CFR part 922, subpart L. NOAA does not believe inclusion of coordinates for all other alternatives is necessary. However, maps of all alternatives can be reviewed in FEIS Chapter 3 and Appendix D.

7. *Comment:* NOAA received comments requesting an explanation of how the FGBNMS Advisory Council's recommendations were incorporated throughout the expansion process.

Response: The Sanctuary Advisory Council was involved in developing DEIS Alternative 2, reviewing DEIS Alternative 3, and providing recommendations to modify the alternative. Ultimately, NOAAs Final Preferred Alternative was largely developed by recommendations proposed by the Sanctuary Advisory Council. Refer to FEIS Chapter 1, Section 1.5, which provides background information on development of the DEIS alternatives and the process by which NOAA modified DEIS Alternative 3 to develop the Final Preferred Alternative, including information of the Sanctuary Advisory Council's involvement. See response to comment #3 pertaining to the Revised Preferred Alternative.

8. *Comment:* NOAA received comments that requested a buffer around reefs to enhance connectivity, compliance, and enforcement, as well as to keep out any structure that may act as a vector for invasive species spread.

Response: Buffers were considered during the FGBNMS Advisory Council's Boundary Expansion Working Group meetings and were rejected due to potential impacts to the oil and gas and fisheries industries. The 2018 Sanctuary Advisory Council recommendation for sanctuary expansion did not include buffers. Refer to FEIS Chapter 1, Section 1.5 for details regarding development of the Final Preferred Alternative and associated interagency consultations and coordination.

9. *Comment:* NOAA received comments suggesting the boundaries proposed in the Revised Preferred Alternative (NOAA's Final Preferred Alternative) were too complicated for enforcement purposes, stating that simpler boundaries make enforcement easier, which results in better compliance of user groups.

Response: Along with input for NOAA's Office of Law Enforcement (OLE), ONMS considered this concern and determined the expansion boundaries are enforceable as proposed in NOAA's Final Preferred Alternative. The boundaries achieve a polygonal configuration, which is recommended by the OLE, and closely follow the existing BOEM designated NAZ boundaries. This polygonal approach uses fewer vertices, simplifying the NAZ boundaries and allowing for heightened enforceability and user compliance.

ONMS believes that vessels visiting the sanctuary are likely to be equipped with onboard mapping technology (*e.g.,* Global Positioning System) that would inform operators of their vessel's position relative to the expanded sanctuary boundary. In light of the technological capabilities of onboard positioning systems, ONMS decided to continue with the boundary configuration of the Final Preferred Alternative, confident that user compliance and agency enforcement can be achieved.

Please refer to FEIS Chapter 3, Section 3.2 for more details regarding development of the Final Preferred Alternative boundaries.

10. *Comment:* NOAA received comments related to the influence of the oil and gas industry on the boundary configurations of the proposed expansion of banks and reefs, including a claim that the FGBNMS Advisory Council's Boundary Expansion Working Group was biased (towards the oil and gas industry).

Response: The BEWG included Advisory Council members representing multiple stakeholder groups including the oil and gas industry, commercial and recreational fishing industries, recreational diving, science, and conservation. The BEWG presented its revised FGBNMS expansion boundaries recommendation to the full FGBNMS Advisory Council, representing all user groups, on May 9, 2018, and the recommendation was accepted by the Advisory Council and subsequently by ONMS as proposed. Refer to responses to comments #3 and #7 and FEIS Chapter 3, Section 3.2, which details the Sanctuary Advisory Council's BEWG process for developing the Revised Preferred Alternative.

Purpose and Need for Proposed Expansion/Regulations

11. *Comment:* NOAA received comments suggesting that the purpose and/or need for the proposed expansion was not warranted, citing several reasons including: (1) Need for protection was not demonstrated; (2) expansion would offer no benefit of protection; (3) government overreach; (4) majority of sites are already protected from oil and gas development by the existing BOEM's No Activity Zones; and (5) proposed expansion areas are not nationally significant or unique.

Response: Pursuant to the National Environmental Policy Act (NEPA), NOAA has established a strong purpose and need to expand FGBNMS (See FEIS Chapter 2). Through the management plan review and scoping process, NOAA identified several gaps in management of reefs and banks near the current sanctuary where habitats were experiencing damage from anchoring

and fishing gear in addition to potential for further industrial development. NOAA determined that extending sanctuary management to these areas would assist in addressing these gaps in protections by supplementing and complementing existing authorities established by BOEM and the GMFMC. While BOEM-designated NAZ's protect from oil and gas development, without sanctuary management efforts, habitats would remain vulnerable to anchor damage, detrimental fishing impacts, and other threats.

NOAA disagrees with the comment that the expansion demonstrates government overreach. The NMSA provides NOAA with the authority to designate, as marine sanctuaries, areas of the marine environment, which are of special national significance that possess conservation, ecological, and scientific qualities. Through decades of scientific research and exploration, NOAA has determined that the sanctuary expansion areas contain some of the highest reported densities of corals in the U.S. and other unique deepwater habitats that are not found elsewhere in the world, making them nationally significant and worthwhile to protect.

Sanctuary Regulations and Enforcement

12. *Comment:* NOAA received comments requesting changes to existing regulations including: (1) Allow anchoring for fishing; (2) a reasonable range of alternative management actions; (3) allow spearfishing; and (4) an exemption for pelagic longline fishing.

Response: NOAA rejected these requests because it was determined that granting them would negate the overall effectiveness of the existing regulations in the expansion areas. Current sanctuary regulations will address gaps in protection of the expansion areas. In the NPRM for sanctuary expansion, NOAA requested public comments on two fishery exemption requests: to allow pelagic longlining and spearfishing. NOAA received very limited support for exempting these activities (see fishing section below) and has determined that extension of existing fishing regulations to the expansion area is appropriate. Refer to FEIS Chapter 3, Section 3.1.2 for alternatives considered but rejected.

13. *Comment:* NOAA received comments that suggested the agency should provide enforcement policies to enhance the effectiveness of sanctuary expansion.

Response: The FGBNMS management plan details the enforcement policy for the expansion areas. NOAA will continue to work with Federal and state enforcement partners to maintain water and aerial surveillance, update patrol guides and regulatory handbooks, and conduct interpretive/outreach patrols within all of FGBNMS.

Air Quality and Climate Change

14. *Comment:* NOAA received comments requesting that NOAA evaluate how the sanctuary expansion would affect the climate (*i.e.,* potential impacts to greenhouse gas emissions within sanctuary expansion areas).

Response: NOAA agrees with the need to evaluate the impacts of sanctuary expansion on the climate and has provided analysis of the potential beneficial effects of the expansion on physical and biological resources, including beneficial impacts derived from prohibiting harmful activities. NOAA also estimates that this action will help offset impacts of climate change (see FEIS Chapter 5, Section 5.3.1).

15. *Comment:* NOAA received comments requesting an assessment of how climate change affects FGBNMS, how it will affect proposed additions, and methods to reduce greenhouse gases with sanctuary expansion areas. One comment also requested a program-wide evaluation of climate adaption management gaps and needs.

Response: The management plan for FGBNMS contains Conservation Science Action Plans, which include goals to increase knowledge and understanding of the sanctuary's ecosystem, develop new and continue ongoing research and monitoring programs to identify and address specific resource management issues, and encourage information exchange, and cooperation. FGBNMS participated in development of the Ocean Acidification Action Plan [8] for national marine sanctuaries. The plan has numerous research recommendations for studying ocean acidification, a common consequence expected of future climate change. Please also visit NOAA's website [9] for program-wide climate change initiatives, data, observations, and outreach materials. ONMS is standing up a Focus Group on climate, with the goal to develop the ONMS Climate Strategic Plan. FGBNMS is an active participant in this initiative, and the sanctuary, including the expansion areas, will be integrated into the overall plan. Ocean Acidification, specifically, has been integrated into FGBNMS long-term monitoring programs.

16. *Comment:* NOAA received recommendations that the agency use newer emissions inventory for the analysis on air monitoring and pollutants.

Response: NOAA used the best available data for their environmental analysis of air emissions and pollutants when developing the FEIS. Please refer to FEIS Chapter 4, Section 4.2.1 for detailed information about the data and resources used for air quality and climate change.

17. *Comment:* NOAA received a comment that suggested the No Action Alternative (Alternative 1) does contribute to climate change over time as it does not prevent climate change from progressing, and requested the agency amend the analysis in DEIS Section 5.3.1.

Response: Since implementation of the No Action Alternative is expected to leave the existing environment unchanged except for continuation of existing impacts, including on-going impacts of climate change, the effect of this alternative is the same as described in Chapter 4. The ''No Action'' Alternative served as a baseline for the impact analysis to compare all other alternatives. As such, there would be no additional change to climate expected under this alternative. The text has been slightly amended in FEIS Chapter 5, Section 5.2 to offer clarification in response to this comment.

Biological Resources

18. *Comment:* NOAA received comments related to biological resource concerns. Biological comments focused on how sanctuary expansion would protect resources against damages (*e.g.,* anchoring, invasive species), the benefits sanctuary protection would provide (*e.g.,* improvements in fish stocks and productivity, preservation of biodiversity, continued discovery of new species), and requests for protection of specific species/groups (*e.g., Mobula* rays, sea turtles, sharks, coral).

Response: NOAA concurs with the importance of protecting vulnerable biological resources and believes that this action helps to address many of the remaining gaps that threaten biological resources in the expanded sanctuary. With this action, NOAA is prohibiting the following activities in the sanctuary: Anchoring; drilling into, dredging, or altering the seabed; discharging or depositing of material; any injury to coral, rays, or whale sharks; fishing except for with conventional hook and line gear; and take of marine mammals and turtles except when permitted under the Marine Mammal Protection Act (MMPA) and Endangered Species Act (ESA). Collectively, these

[8] *https://oceanacidification.noaa.gov/Home.aspx.*

[9] *https://www.noaa.gov/climate.*

prohibitions will help to protect fishes from unsustainable harvest by limiting fishing; help to maintain biodiversity of benthic habitats by protecting the seafloor; and allow further protection of many vulnerable living marine resources including rays, sea turtles and other ESA and MMPA-listed species. Please also refer to FEIS Chapter 5, Section 5.3.6 and 5.3.8 for additional details regarding impacts of sanctuary expansion to biological resources.

19. *Comment:* NOAA received comments requesting the sanctuary protect resources from negative impacts of fishing. Commenters noted the vulnerability of the expansion area to fishing injury, and urged protection of fish species in order to achieve fishing sustainability. Requests for fishery management included: (1) Limiting fishing locations; (2) prohibiting bottom-dragging gear; and (3) continuing to limit fishing to hook and line only. Some of the comments received in support of expansion were from members of the fishing sector.

Response: NOAA intends to extend the current sanctuary regulations to the proposed expansion areas, which includes restricting fishing activities to conventional hook and line techniques only (*i.e.,* any fishing apparatus operated aboard a vessel and composed of a single line terminated by a combination of sinkers and hooks or lures and spooled upon a reel that may be hand- or electrically-operated, hand-held or mounted). NOAA prohibits the use of any bottom tending fishing gear to protect delicate corals and important benthic habitat from fishing impacts, which will continue in the expansion areas. A detailed list of the current regulations can be reviewed in Table 1.1, Chapter 1, Section 1.4.

20. *Comment:* NOAA received a comment requesting projections of ecosystem services (*i.e.,* estimates for the increase in value of managing protected species and habitats such as hard and soft corals, fish, and mesophotic reefs) be included in the final analysis.

Response: Analysis of ecosystem services is beyond the scope of the environmental analysis necessary for this action, and thus, NOAA rejects this request. Instead, NOAA provided an economic analysis in the FEIS that estimated a passive economic value (*i.e.* non-use value) of the sanctuary expansion. For details on the economic analysis, please refer to Chapter 4, Section 4.4.7 of the FEIS or the peer-reviewed publication that resulted from this study, Stefanski and Shimshack (2016).

21. *Comment:* NOAA received a comment which indicated that the BEWG was informed that higher coral counts had been observed outside of the NAZs, than inside NAZs, and requested an explanation for why this was not considered during the boundary configuration of the Revised Preferred Alternative.

Response: Additional areas containing higher coral colony counts were quantified during remotely operated vehicle (ROV) surveys, and the data was considered during the National Centers for Coastal Ocean Sciences (NCCOS) collaboration with the FGBNMS Advisory Council's BEWG. The BEWG selected smaller boundaries, which closely follow the NAZs, primarily to reduce impacts to the oil and gas industry and to retain access for historical fishing practices. Outside of the expansion process, NOAA will provide the processed data and associated publication to both BOEM and NMFS, for consideration during review of regulations, and for future oil and gas, and fishing activities. While this will not provide blanket protection measures, it will be valuable in protections from potential major impacts.

22. *Comment:* NOAA received comments requesting an analysis of the impacts sustained to the environment from run-off of toxic and hazardous elements, sewage, pollution, and potential expansion of the Gulf of Mexico hypoxic zone, or 'dead zone', into the proposed sanctuary expansion areas.

Response: NOAA used the best available data to evaluate the environmental impacts to the expansion areas as required under NEPA and the Council of Environmental Quality's (CEQ's) 1978 NEPA regulations. NOAA, however, is studying these issues and plans to continue analyzing the impacts in its next management plan review process.

23. *Comment:* NOAA received comments regarding disturbances (vessel traffic) related to the noise environment, including a request to quantify the additional impact from an increased number of boaters.

Response: NOAA continues to study the issue of noise impacts on sanctuary resources. Sanctuary regulations prohibit the disturbance of marine mammals and turtles except when permitted under the MMPA and ESA. With respect to sonar testing, Section 304(d) of the NMSA provides for consultation with other federal agencies if their actions have the likelihood to injure sanctuary resources. NOAA has previously used this mechanism in consultations to minimize impacts of noise on marine mammals and other species. FGBNMS is actively engaged in a vessel traffic and noise assessment and monitoring program within the sanctuary, which will be expanded to the new areas.

Please refer to FEIS Chapter 4, Section 4.2.2 for detailed information about the noise environment in the current FGBNMS, as well as expansion areas. Additionally, refer to FEIS Chapter 5, Section 5.3.2 for NOAA's analysis of environmental consequences to marine resources with respect to noise disturbances.

24. *Comment:* NOAA received comments requesting protection for fish spawning aggregations with the expansion.

Response: NOAA concurs with commenters and believes the expansion of the sanctuary will assist in the protection of fish spawning aggregations in the northwestern Gulf of Mexico. With this action, NOAA will extend sanctuary regulations to the expansion areas which limit fishing activities to conventional hook and line techniques, prohibit bottom tending gear, and restrict the use of anchors within sanctuary boundaries. This action will thereby complement protections for fish spawning habitats provided under the Magnuson-Stevens Fishery Conservation and Management Act (MSA). Fish spawning aggregations have been observed and recorded during ROV explorations at reefs and banks included in the expansion areas. Therefore, NOAA determined that sanctuary designation will directly protect habitat where the aggregations occur. NOAA intends to consider further protection of spawning aggregations during the next management plan review.

25. *Comment:* NOAA received a comment requesting NOAA consider designating areas within the sanctuary as ''no take'' marine reserves.

Response: NOAA considered this request and does not intend to designate any ''no-take'' marine reserves within the sanctuary through this action. With this action, NOAA extends the current fishing regulations to the expansion areas which limit fishing activities to conventional hook and line techniques and exclude any bottom tending gear. Anchoring will also be prohibited in the expanded sanctuary, and mooring buoys will be installed so that fishers and vessels (<100 feet long) can safely moor within the sanctuary boundaries.

To evaluate the impact of conventional hook and line fishing to managed fish species in the sanctuary, NOAA conducted an environmental impact analysis on living marine

resources, including fish in relation to the different expansion alternatives (see FEIS Chapter 5, Section 5.36). Overall, NOAA determined none of these resources would sustain any significant adverse impacts with sanctuary designation. However, NOAA determined that this action will provide benefit to fish, given the added protection to critical habitat and restrictions to fishing techniques. Mesophotic and deep water reefs have been shown to have low resilience and slow recovery potential, and harbor greater fish biomass than their shallower counterparts, underlining the importance of their protection (Lindfield et al. 2016, Huvenne et al. 2016). By reducing fishing pressure through sanctuary protection, fish size, biomass, and abundance could increase, while also enhancing coral reef resiliency (Reed 2002, 2007, Bozec et al. 2016, Chirico et al. 2017). Impacts to the resources may be reduced due to limitations on fishing that can otherwise alter predator-prey relationships, disturb bottom habitats, and increase loss of fish biomass. The added prohibition of spearfishing further protects fish from direct extraction (Lindfield et al. 2014).

Sanctuary management actions could reduce marine debris and impacts of debris on corals and other organisms, such as entanglement in derelict fishing gear and incidental catch of fish in ''ghost'' fishing gears. Moreover, extending to the expansion areas the prohibition of bottom-tending fishing gear, limits on anchoring and the discharge of pollutants, removal of marine debris such as derelict fishing gear, and invasive species removal, would all improve habitat for benthic coral communities and fish communities.

Designating areas as a ''no take'' marine reserve is an important issue and NOAA plans to consider it in the next review of the FGBNMS management plan.

26. *Comment:* NOAA received a comment requesting that a Gulf Sperm Whale/Pelagic Ecosystem national marine sanctuary be established.

Response: NOAA does not intend to establish a Gulf Sperm Whale/Pelagic Ecosystem National Marine Sanctuary. The request is beyond the scope of this proposed action.

Visual Resources

27. *Comment:* NOAA received a comment on DEIS Section 5.3.2.3—Scenic and Visual Resources requesting that negative impacts to scenic and visual resources that could occur because of an increased number of boaters and/or increased use of fishing line be considered in the analysis.

Response: NOAA evaluated both beneficial and adverse impacts to each resource area and determined there would be no adverse impacts to scenic and visual resources. NOAA predicts beneficial impacts on the scenic and visual resources of the proposed expansion areas by reducing marine debris including derelict fishing gear, vessel traffic, and industrial infrastructure. Refer to FEIS Chapter 5, Section 5.3.3.

Fishing, Fishery Regulations, and Fishery Management

28. *Comment:* NOAA received a comment that requested the agency to analyze recreational fishing activities in the proposed expansion areas.

Response: NOAA addressed the request for this analysis by evaluating the level of recreational fishing activity expected to occur in the proposed expansion areas, using the best available data, to capture the socioeconomic impact to this industry. Ultimately, NOAA determined that there would be no significant adverse impacts to recreational fishers. For analysis of recreational fishing activities, please refer to FEIS Chapter 4, Section 4.4.1.2 for a description of the data used and Chapter 5, Section 5.3.9.2 for the expected environmental impact.

29. *Comment:* NOAA received a comment that requested the agency clarify benefits of the expansion to commercial fishers and improve the socioeconomic analysis of commercial fishers.

Response: NOAA updated FEIS Chapter 4, Section 4.4.1 to supplement the analysis on commercial fisheries with additional and current VMS data to assess socioeconomic impacts imposed by the expansion on commercial (Section 4.4.1.1) and recreational (Section 4.4.1.2) fishers. Overall, NOAA determined that no significant adverse impacts to fishers would result from the proposed expansion (See Chapter 5, Section 5.3.9.1 and 5.3.9.2). NOAA concluded minor benefits to commercial fishers may occur with the expansion of the sanctuary (see Chapter 5, Section 5.3.9.1) as fish production may increase in general with the decreased fishing pressure and habitat protections of specific locations.

Broadly, it is well documented by the scientific community that coral reef and mesophotic coral communities provide necessary habitat for a significant number of fish species, and the prevention of loss of these habitats will help to maintain and enhance fish populations dependent on these areas. More specifically, higher biomass and abundance of fish are often associated with greater habitat coverage and/or complexity, such that, protecting habitat has an increased likelihood to improve fish stocks (Jones et al. 2004, Coker et al. 2014, Lindfield et al. 2016, Komyakova et al. 2018, Carminatto et al. 2020, Russ et al. 2020). Additionally, reducing fishing pressure could lead to an increased monetary value of commercial fisheries, partly due to the presence of larger individuals (thus more valuable) and higher densities of high-value species (Chirico et al. 2017). Mesophotic reefs have been found to harbor greater biomass of fishery-targeted species than shallower reefs, suggesting these habitats are important to protect for the longevity of commercial harvests (Lindfield et al. 2016). In essence, sanctuary expansion is protecting critical habitat which may result in increased fish biomass (Edgar et al. 2011, Harborne et al. 2008) or abundance (Jeffrey et al. 2012), particularly where fishing pressure is reduced (Edgar et al. 2011, Kramer and Heck 2007), which could benefit commercial fishers.

30. *Comment:* NOAA received comments regarding spearfishing, with the majority requesting a prohibition on this activity. Some commenters offered conditional support of spearfishing, suggesting allowing the activity: (1) In a limited capacity with access at a limited number of banks and reefs in the expansion area; (2) only for the removal of lionfish, an invasive species present in the current and proposed sanctuary areas; or (3) by breath hold only.

Response: NOAA intends to extend the current sanctuary regulations to the expansion areas proposed in the Final Preferred Alternative. As such, NOAA will not be implementing any additional fishing regulations as part of the final rulemaking. NOAA prohibits spearfishing in the current boundary to protect delicate corals, including threatened species, and important benthic habitat from fishing impacts, which will continue in the expansion areas. Spearfishing for lionfish is not a permissible activity within sanctuary borders. However, spearfishing with pole spears has been performed opportunistically by research staff through permitted long-term monitoring activities at FGBNMS. Additionally, lionfish invitational research cruises have been a permitted activity since 2015 at FGBNMS to remove the invasive species with highly skilled, qualified recreational divers and contribute to a variety of research projects with external academic and agency partners. NOAA intends to continue to permit

lionfish removals, with restrictions and obligations to properly train divers in effective removal techniques that prioritize coral and ecosystem health. A detailed description of sanctuary regulations is described in FEIS Table 1.1, Chapter 1, Section 1.4.

31. *Comment:* NOAA received a comment that suggested the spearfishing community has been excluded from access to the sanctuary.

Response: NOAA solicited public comment to exempt spearfishing in the proposed sanctuary boundary with the release of the NPRM. In response, NOAA received overwhelming support to continue prohibition of this activity. Please see additional information provided in comment #30. This will restrict access to the sanctuary expansion areas for the spearfishing community.

32. *Comment:* In response to the DEIS, NOAA received a request seeking a pelagic longline exemption from the otherwise applicable sanctuary fishing prohibitions proposed for the expansion areas. NOAA also received a few similar comments in response to the NPRM. However, there were also a significant number of NPRM commenters that opposed this exemption.

Response: NOAA considered the request made during the public review of the DEIS for a pelagic longline exemption to the proposed fishing prohibitions in the expansion area. In response, NOAA solicited public comments pertaining to pelagic longline fishing in the NPRM. Based on strong public support to prohibit this activity, NOAA has rejected the request for an exemption for pelagic longlining and, instead, intends to extend the current sanctuary regulations to the expansion areas. Under existing regulations, fishing will only be allowed with conventional hook and line gear (*i.e.,* any fishing apparatus operated aboard a vessel and composed of a single line terminated by a combination of sinkers and hooks or lures and spooled upon a reel that may be hand- or electrically operated, hand-held or mounted). NOAA believes the expansion of FGBNMS to additional reefs and banks in the northwestern Gulf of Mexico will add critical protection for fish, marine mammals, threatened and endangered species, as well as their habitat. NOAA determined the existing regulations would best accomplish this protection and fulfill the NMSA obligation to protect nationally significant environmental features.

A detailed description of sanctuary regulations is described in the FEIS Table 1.1, Chapter 1, Section 1.4. NOAA has been in consultation with NMFS and GMFMC throughout the entire scoping process of sanctuary expansion, please refer to FEIS Chapter 1, Section 1.5.4.2, for additional details on these consultations.

33. *Comment:* NOAA received a comment requesting its fisheries analysis in the DEIS include more types of fishing gear and data to determine what areas were used by fishers and the value of these areas to those fisheries.

Response: NOAA provided a detailed list of the types of commercial vessel and recreation vessels that operate within the proposed sanctuary boundaries in the DEIS. NOAA has added a new table to the FEIS to include gear types used by commercial fishers that were observed in the vicinity of the Final Preferred Alternative. Please review Section 5.3.9.1 and 5.3.9.2 for a description of the commercial and recreational fishing vessels that operate within the proposed sanctuary boundaries based on permit or gear type. This analysis estimates the number of vessels within the vicinity of the boundaries under each alternative.

34. *Comment:* NOAA received a comment requesting an analysis of the potential impact(s) of weights used in bandit reel gear configurations on the benthic habitat and corals, as well as more information on the types of gear used in this type of fishing configuration.

Response: FGBNMS intends to continue investigating impacts of recreational and commercial fishing in the sanctuary, including bandit reel gear, and will address this in more detail during the next management plan review.

35. *Comment:* NOAA received a comment requesting a comprehensive commercial endorsement and certification program be developed to allow commercial fishers to continue to operate within the proposed boundaries. Additionally, there was a request to create an exemption for shrimpers in the Royal Red Shrimp industry to continue their historical practices.

Response: NOAA has considered this request, and following consultation with GMFMC pursuant to NMSA section 304(a)(5), decided not to establish a commercial endorsement and certification program or provide an exemption for shrimpers or other fishers in the sanctuary, based on the reduction in size of the new areas. Facilitating commercial fishing in the sanctuary, even through an endorsement and certification process, could make corals and other sensitive bottom habitats vulnerable to injury. NOAA believes that the reduction in boundaries between the 2016 original preferred alternative and the Final Preferred Alternative, in addition to allowing conventional hook and line fishing in the expanded sanctuary, facilitates an appropriate balance between environmental protection and user access dictated as mandated by the NMSA. A detailed description of sanctuary regulations is described in FEIS Table 1.1, Chapter 1, Section 1.4. FEIS Chapter 1, Section 1.5.2 provides additional details on this consultation.

36. *Comment:* NOAA received a comment that suggested specific language be added for the discharge of natural waste of farmed fish related to open gulf mariculture, stating that fish farming operations outside of sanctuary boundaries may discharge sinking organic material that deposit within the sanctuary with prevailing currents.

Response: NOAA determined this request is outside the scope of this action. While sanctuary regulations do not specifically prohibit aquaculture, some associated activities are prohibited such as discharge of certain material, alteration of the seabed, and injury to sanctuary resources. Furthermore, the suitability of the area for aquaculture is being separately considered under other authorities including E.O. 13921, (October 23, 2020; 85 FR 67519). FGBNMS will further consider aquaculture and its potential impacts during the next management plan review.

Military Uses

37. *Comment:* A comment related to the Department of the Navy's activities within the proposed sanctuary areas suggested to: (1) Include in the FEIS, Department of Defense (DoD) use of water space in the vicinity of proposed expansion and current sanctuary; (2) provide a map of the Gulf of Mexico warning areas for military use; (3) add military uses to marine-use categories; and (4) add an analysis of the potential impact to military uses.

Response: Homeland security and military uses of the expanded sanctuary are subject to compliance with NEPA and NMSA, in addition to all applicable environmental regulations. DoD would be required to consult with ONMS pursuant to NMSA section 304(d) on any new military activities in the expansion area that are likely to injure sanctuary resources. NOAA believes the existing regulatory framework sufficiently addresses DoD impacts on sanctuary resources. Existing military uses and an analysis of their environmental effects in the expansion area have been added to Chapter 4, Section 4.4.5 and Chapter 5, Section 5.3.9.7 of the FEIS.

NEPA Process

38. *Comment:* NOAA received comments regarding the NEPA process. Commenters requested NOAA conduct a new NEPA analysis because of: (1) The difference in methodologies used to configure the Final Preferred Alternative and Alternative 3 in the DEIS; and (2) new circumstances and/or information available (*e.g.,* fishing exemptions, removal of buffer zones).

Response: NOAA evaluated the changes made from the 2016 original preferred alternative (Alternative 3) to the Final Preferred Alternative presented in the NPRM and this FEIS. The Final Preferred Alternative revised Alternative 3 boundaries to be more tightly drawn near the shallowest portions of the geological features of interest, largely in response to existing fishing activity and oil and gas activity (see response to comment #3). The new polygons included all of the same reefs and banks, excluding Bryant Bank, which is not included in the Final Preferred Alternative. Ultimately, NOAA determined that the changes reflected in the Final Preferred Alternative were not ''substantial changes in the proposed action that are relevant to environmental concerns'' (40 CFR 1502.9(c)(1)(i)). NOAA further determined the comments received on the 2016 DEIS did not ''constitute significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts'' (40 CFR 1502.9(c)(1)(ii)). As such, NOAA concluded that preparing a supplemental environmental impact statement or new NEPA analysis is neither required nor necessary under NEPA. NOAA has documented the agency's rationale for revising the Final Preferred Alternative (see Chapter 3, Section 3.2) and provided updated information on the affected environment in FEIS Chapter 5, Section 5.3, and related Record of Decision. Please refer to NOAA's Supplemental Information Report that was provided with the release of the NPRM for further information.

39. *Comment:* NOAA received a comment that requested that the Protected Species analysis in Section 5.3.2.7 of the DEIS be public and open for review/comment.

Response: ONMS conducted an ESA Section 7 consultation with NMFS in conjunction with the development of both the DEIS and NPRM. In the DEIS, ONMS included a list of protected species which may be affected by the proposed action, and the DEIS was subsequently submitted for public comment. Additional species were included in the NPRM consultation. See FEIS Chapter 4, Section 4.3.4 for additional information on protected species with an updated list of protected species and Appendix G for a summary of how ONMS satisfied ESA consultation requirements including ONMS's ESA consultation correspondence.

40. *Comment:* NOAA received a comment stating that the Notices to Lessees are not simply guidance because they contain requirements for oil and gas.

Response: NOAA disagrees. Please refer to the Bureau of Safety and Environmental Enforcement Notice to Lessees 2009–G39,[10] which provides and consolidates guidance for oil and gas.

National Marine Sanctuaries Act

41. *Comment:* NOAA received comments that suggested the expansion of sanctuaries must be conducted through an act of Congress, otherwise it violates Congressional intent found in the NMSA.

Response: NOAA disagrees. NOAA can administratively designate and expand sanctuaries pursuant to Section 303 of the NMSA (16 U.S.C. 1433), using procedures set forth in section 304 (16 U.S.C. 1434). It is also possible for Congress to legislatively designate a sanctuary; Stetson Bank (Pub. L. 104–283) in the current FGBNMS serves as an example of a legislatively designated sanctuary.

42. *Comment:* NOAA received comments stating the NPRM did not comply with the NMSA and the FGBNMS 2012 management plan to prioritize conservation of surrounding reefs and banks.

Response: The proposed action responds to the need to provide additional protection of sensitive underwater features and marine habitats associated with continental shelf-edge reefs and banks in the northwestern Gulf of Mexico. NOAA adds 14 additional reefs and banks, for a total of 17 features to be protected, expanding the sanctuary by approximately three times its current spatial extent. In addition to prioritizing the conservation of nationally significant biological features, the NMSA section 301 (16 U.S.C. 1431) directs NOAA to facilitate, to the extent compatible with the primary objective of resource protection, all public and private uses of the resources of these marine areas not prohibited pursuant to other authorities. Thus, compliant with the NMSA, NOAA believes the current expansion in this FEIS and final rule, as proposed in the NPRM, maximizes conservation and user group interests to allow for greater protection of these areas.

Oil & Gas Exploration and Development

43. *Comment:* NOAA received comments from the oil and gas industry in response to the 2016 DEIS alternatives regarding recognition and inclusion of existing oil and gas leases. Commenters expressed concern that sanctuary expansion could be more costly or difficult for oil and gas production, new leases would be precluded, and the loss of oil and gas exploration may lead to reliance on foreign oil. Industry representatives noted their reliance on the 2007 Sanctuary Advisory Council recommendation for expansion (Alternative 2) to inform their investment in resources for the industry's development and growth, or their decision to relinquish certain lease blocks. Industry representatives requested oil and gas access, leasing, produced water discharge requirements, and seismic acquisition should remain as is, with no additional regulations.

Response: To address concerns from the oil and gas industry, the FGBNMS Sanctuary Advisory Council's BEWG underwent an extensive process to evaluate how protecting biologically significant areas may impact the oil and gas industry. They proposed modifying DEIS Alternative 3 to develop the Revised Preferred Alternative (see comment #3). This process also involved input from the Sanctuary Advisory Council, the GMFMC, and coordination within NOAA. The new boundaries closely follow BOEM's NAZs, encompassing the shallowest portions of the banks, which are already protected from oil and gas exploration and development. Furthermore, ONMS consulted with BOEM pursuant to E.O. 13795—Implementing an America-First Offshore Energy Strategy and determined that expanding the sanctuary would not have a significant economic impact on oil and gas exploration and development. BOEM's analysis is summarized in the NPRM and in FEIS Chapter 5, Section 5.3.9.5.

44. *Comment:* NOAA received a comment requesting an analysis of the inclusion of four oil and gas platforms within the expansion areas for advantages and disadvantages, especially in the context of Sanctuary Expansion Action Plan Objective 6C.

Response: NOAA's Final Preferred Alternative does not include any

[10] *https://www.bsee.gov/notices-to-lessees-ntl/notices-to-lessees/ntl-2009-g39-biologically-sensitive-underwater-features.*

additional oil and gas platforms within the existing or expanded sanctuary boundaries, thus, the requested analysis is not necessary. NOAA did, however, consider inclusion of certain oil and gas platforms as part of the alternatives considered in the NEPA analysis for this action. See Alternatives 4 and 5 of this FEIS. Please also refer to FEIS Chapter 5, Section 5.3.9.5 for analysis of impacts to offshore energy resources. Finally, NOAA intends to continue analyzing the advantages and disadvantages of oil and gas structure inclusion within FGBNMS as part of its ongoing management plan review process.

45. *Comment:* NOAA received a comment that requested an economic analysis of: (1) Impacts to oil and gas resources due to directional drilling; (2) affected lease blocks; and (3) a comparison in area between NAZs and proposed sanctuary expansion areas. There was also a request to identify any future management actions/mitigations which may affect oil and gas activities.

Response: BOEM analyzed potential impacts to oil and gas resources pursuant to E.O. 13795, and these results are available on the sanctuary website.[11] BOEM determined that expanding the sanctuary would not have significant economic impacts on the oil and gas industry, and NOAA accepted BOEM's findings. NOAA will continue to coordinate with BOEM to co-manage these resources and mitigate any impacts to oil and gas activities, including the 11 active Outer Continental Shelf (OCS) oil and gas leases that will lie wholly or partially within the boundaries of the expanded FGBNMS. For new leases, approvals or permits, licenses, or other authorizations in existence prior to the date in which the FGBNMS expansion is finalized, lessees or operators will be required to obtain from NOAA a certification to authorize the oil and gas activities within the FGBNMS. The certification will require compliance with the FGBNMFS regulations, as well as the permits or plan approvals issued by BOEM and/or BSEE, and the topographic features stipulation (as applicable) in the lease.

Refer to FEIS Section 5.3.9.5 for additional analysis of the impacts to oil and gas activities.

46. *Comment:* NOAA received a comment to incorporate BOEM lease sales and stipulations into BOEM's Record of Decision and Final Notice of Sale.

Response: As a non-voting member on the Sanctuary Advisory Council, and a cooperating agency in the preparation of the 2016 DEIS, BOEM has incorporated lease sales and stipulations into BOEM's Record of Decision and Final Notice. FEIS Chapter 5, Section 5.3.9.5 shows that there were 13 active lease blocks, as reported by BOEM in their 2019 report. However, since publication of that report, two leases were relinquished. There are currently 11 active leases in the expansion area, averaging approximately 17% of the lease blocks falling within the Final Preferred Alternative boundaries. Lease sales issued between 1996 and 2001 provided Information for Lessees indicating ''Minimizing Oil and Gas Structures near Flower Garden Banks''. Lease sales issued between 2002 through 2014 did not specifically mention FGBNMS, but the lease sales do refer to the Notice to Lessees outlining the topographic and live bottom stipulations. The sanctuary regulations track the operational requirements established by BOEM in those stipulations. Lease sales issued between 2015 to the present provide notice to prospective leaseholders of the proposed expansion. More information regarding BOEM lease sales may be found on BOEM's website.[12]

47. *Comment:* NOAA received a comment that requested the agency develop an appropriate regulatory ''firewall'' that will set a precedent for other sanctuaries to protect those areas from offshore drilling practices.

Response: NOAA believes this request is beyond the scope of this action but will continue to work toward balancing multiple user interests with the NMSA's primary goal of resource protection.

48. *Comment:* NOAA received comments related to environmental impacts of the oil and gas industry. Of these, nearly half requested the sanctuary update the regulations to prohibit oil and gas development and to ensure management protects against damages from this industry. Concerns raised included: (1) Oil spills and leaks; (2) extraction practices; (3) encroaching drilling and exploration; and (4) the vulnerability of biological resources to oil and gas activities. Comments also requested that NOAA prohibit fracking and analyze the potential for fracking fluids and directional hydraulic fracturing to impact the area in and near the sanctuary. A few comments related specifically to methane hydrate extraction.

Response: NOAA determined the Final Preferred Alternative balances protecting vulnerable habitats with multiple uses of the region. See FEIS Chapter 3, Section 3.2 for more details regarding the Final Preferred Alternative. NOAA intends to extend the current FGBNMS regulations to the new expansion areas. Please refer to FEIS Table 1.1 in Chapter 1, Section 1.4 for a list of current sanctuary regulations and management efforts from impacts of oil and gas activities. Additionally, sanctuary regulations prohibit discharge of any kind from oil and gas activities that may be harmful to the benthic environment.

BOEM assessed the potential for offshore energy resources including oil and gas and methane hydrate resources in the proposed expansion areas. BOEM determined that due to the shallow-water depth of the proposed expansion areas, the formation of methane hydrate in the subsurface is unlikely. BOEM's E.O. 13795 report is available on the sanctuary website.[13]

The FEIS describes damages related to oil and gas activities observed at banks proposed in the expansion, as well as potential impacts that could be sustained to these resources. Please review Chapter 4, Section 4.4.3 of the FEIS for additional information.

Furthermore, in 2016, the NOAA Office of Response and Restoration Gulf of Mexico Disaster Response Center convened with the Department of Interior and a variety of environmental, regulatory, and resource protection agencies to develop a document outlining ''Oil Spill Response Options for FGBNMS.'' This document may be found at the University of New Hampshire, Coastal Response Research Center and the Center for Spills and Environmental Hazards website.[14]

49. *Comment:* NOAA received comments related to the prohibition of oil and gas development. Specifically, NOAA was requested to prohibit: (1) New oil and gas directional drilling, infrastructure, and transport; (2) oil and gas leasing within new boundary areas; and (3) directional drilling under new boundary areas.

Response: With this action, NOAA intends to extend existing sanctuary prohibitions, which allow and regulate oil and gas exploration and development to the expansion areas. Directional drilling permits for oil and gas will continue to be considered for surface operations in the expansion

[11] *https://nmsflowergarden.blob.core.windows.net/flowergarden-prod/media/archive/doc/expansion/boemenergyanalysis.pdf.*

[13] *https://nmsflowergarden.blob.core.windows.net/flowergarden-prod/media/archive/doc/expansion/boemenergyanalysis.pdf.*

[14] *https://crrc.unh.edu/sites/crrc.unh.edu/files/nrpt_oil_spill_response_impacting_fgbnms_tx_report.pdf.*

areas, given existing prohibitions, outside of the BOEM-designated No Activity Zones. Pursuant to NMSA Section 301(b)(6), NOAA will continue ''to facilitate to the extent compatible with the primary objective of resource protection, all public and private uses of the resources of these marine areas not prohibited pursuant to other authorities''. Please also refer to comment #49 and FEIS Table 1.1, Section 1.4 for current sanctuary regulations.

50. *Comment:* NOAA received comments from oil and gas industry companies in support of this expansion that recognized the balance between conservation, extraction, and user groups achieved through the Sanctuary Advisory Council's process in developing the Revised Preferred Alternative (NOAA's Final Preferred Alternative).

Response: NOAA has carried forward the 2018 BEWG's recommendation, which is now NOAA's Final Preferred Alternative. Please refer above to the Boundaries section and to FEIS Chapter 3, Sections 3.1 and 3.2 for more information regarding the development of alternatives and selection of the Final Preferred Alternative.

Sanctuary Management and Administration, Funding, Education and Outreach, and Sanctuary Advisory Council

51. *Comment:* NOAA received comments requesting that FGBNMS develop a Resilient Habitat Plan, which seeks to enhance habitat resilience to uncertain and unpredictable effects of future change, such as climate change.

Response: The current FGBNMS management plan serves as a framework for addressing issues facing the sanctuary and lays the foundation for protecting, conserving, and enhancing FGBNMS and its regional environment in the Gulf of Mexico. Following this expansion, NOAA will begin the process to review and update the FGBNMS Management Plan as needed. NOAA acknowledges the growing need to integrate resiliency plans into their habitat management schemes and are beginning to implement sanctuary climate assessment and adaptations plans sitewide. As determined during management plan review, FGBNMS will aim to integrate adaptation and resiliency strategies into their habitat and resource management. Additionally, FGBNMS will begin development of a Condition Report describing the current status of sanctuary resources, including the expansion areas. As described in the FEIS Executive Summary, NOAA will be extending the existing sanctuary management plan and regulations to the newly expanded area.

52. *Comment:* NOAA received a comment on DEIS Section 5.3.6—Irreversible and Irretrievable Commitments of Resources requesting NOAA include costs of expansion and evaluate potential impacts to conservation and management activities.

Response: NEPA requires an analysis of the extent to which the proposed project's primary and secondary effects would commit nonrenewable resources to uses that future generations would be unable to reverse (42 U.S.C. 4332(C)(v); 40 CFR 1502.16). See FEIS Chapter 5, Section 5.6.4 which describes any impacts, or losses, to resources that cannot be recovered or reversed associated with the proposed action or alternatives. Alternatives 1–3 and the Final Preferred Alternative are within the current operational budget, and NOAA expects field operations to continue at current intensity in the expanded sanctuary. Also refer to the 2012 FGBNMS Management Plan for additional budgetary information.

53. *Comment:* NOAA received comments requesting the FEIS to clearly describe ''best diving practices'' in Section 5.3.9.4, how they will be implemented, how they will protect FGBNMS, and how NOAA will enforce their use.

Response: The existing sanctuary regulations (15 CFR 922.122(a)(2)(iii)) require any vessel moored in the sanctuary to exhibit the blue and white International Code flag ''A'' (''alpha'' dive flag) or red and white ''sports diver'' flag whenever a scuba diver from that vessel is in the water and remove the ''alpha'' dive flag or ''sports diver'' flag after all divers exit the water and return on board the vessel, consistent with U.S. Coast Guard guidelines relating to sports diving as contained within ''Special Notice to Mariners'' (00–2008) for the Gulf of Mexico. This final rule will apply that requirement to the expanded areas and must be followed. The FGBNMS Trip Prep web page [15] provides recreational divers with information to prepare for their trip to the sanctuary, information about the challenging diving conditions that can be experienced at FGBNMS, and how to safely prepare for these visits, and includes information on best diving and boating practices to ensure the safety of visitors. Additionally, the FGBNMS Trip Prep web page includes a link to reef etiquette, which provides information about the best diving practices to ensure the protection of the environment. A link to this reef etiquette web page [16] has been added to Section 5.3.6. NOAA believes when these practices are followed, reefs sustain very minimal, if any, damage. While compliance with the sanctuary regulations is mandatory, some of the best diving practices set forth on the FGBNMS Trip Prep web page are voluntary.

FGBNMS also has regulations prohibiting resources from being taken from the sanctuary (*e.g.,* shells, coral, invertebrates) and restricting harassment of marine wildlife (*e.g., Mobula* rays, whale sharks). A list of the regulations is provided in FEIS Chapter 1, Section 1.4, Table 1.1. The USCG and NOAA's OLE are jointly responsible for enforcing regulations at FGBNMS.

54. *Comment:* NOAA received comments regarding sharing its coral and habitat information with the GMFMC so the data could be included in the coral portal. Also, FGBNMS was asked to collaborate with NOAA's National Resource Damage Assessment's (NRDA) Trustee Council's Open Ocean Trustee Implementation Group to restore mesophotic and deep benthic communities (MDBC).

Response: NOAA welcomes the opportunity to collaborate with organizations to build community partnerships for education, outreach, research, monitoring, and resource protection. Before, during, and after the release of the DEIS and the NPRM, the FGBNMS Superintendent presented information to the GMFMC on the FGBNMS proposed sanctuary expansion. Additionally, FGBNMS provides benthic (*e.g.,* coral) data from the current and expanded FGBNMS, as well as other offshore banks and reefs in the northwestern Gulf of Mexico to GMFMC for its publicly accessible coral portal.[17] FGBNMS has been intently involved as an Active Management Project Partner with NRDA's Mesophotic Deepwater Benthic Community's planning projects. Project goals include: (1) Enhancing public awareness and performing active management and protection activities by undertaking education and outreach targeting MDBC resource users and the general public; (2) engaging stakeholders and developing socioeconomic analyses to evaluate potential impacts of management or protection actions; and (3) directly

[15] *https://flowergarden.noaa.gov/visiting/tripprep.html.*

[16] *https://flowergarden.noaa.gov/visiting/reefetiquette.html.*

[17] *https://portal.gulfcouncil.org/cp/.*

addressing threats to MDBC through management activities.

55. *Comment:* NOAA received a comment requesting a Critical Habitat Assessment of the banks be included in the proposed expansion as required in the International Finance Corporation (IFC) Performance Standard 6 (Biodiversity Conservation and Sustainable Management of Living Natural Resources).

Response: To develop each alternative, NOAA identified nationally significant coral habitats that are vulnerable to multiple threats as detailed in the FEIS and final rule's Need for Action sections. For more detail regarding how specific habitats were selected in the alternatives, refer to Chapter 3 of the FEIS. In summary, ONMS determined the selected habitats were most in need of protection based on the best available scientific information as well as through public comment and interagency coordination.

56. *Comment:* NOAA received a comment that requested the agency incorporate and address management of artificial reefs within sanctuary boundaries, specifically decommissioning of oil and gas platforms.

Response: NOAA's Final Preferred Alternative does not include any artificial reef structures. Federal policy on artificial reefs is discussed in the FEIS Appendix G and in the 2012 FGBNMS Management Plan.

57. *Comment:* NOAA received a comment requesting the use of collaborative, consensus-building, transparent processes for selection and management of sanctuary resources.

Response: ONMS uses several public, stakeholder-driven processes to ensure collaborative, transparent selection and management of resources. National marine sanctuaries have sanctuary advisory councils, composed of voting and non-voting members that represent a variety of government agencies; local user groups; and the general public, that advise sanctuary superintendents on priority issues. Sanctuary advisory councils may choose to establish committees and working groups to further delve into issues; working groups provide an opportunity to involve more stakeholders from the community in developing recommendations for consideration by the full sanctuary advisory councils. Additionally, through NEPA and the federal rulemaking processes, ONMS is required to solicit, consider, and respond to public comments during each stage in an expansion, designation, or regulatory update. All comments received are made available and considered by ONMS.

58. *Comment:* NOAA received comments requesting the use of British Petroleum (BP) restoration funds to justify expansion to Alternatives 4 and 5. One comment noted specific issues affecting FGBNMS' operational capacity to manage alternatives with greater environmental benefit had changed (*i.e.* substantial resources have since been dedicated to managing mesophotic and deep benthic communities in the Gulf of Mexico through the Deepwater Horizon NRDA).

Response: FGBNMS is engaged in collaborative efforts with NOAA Fisheries through the MDBC project funded through NRDA. NOAA has determined, for the purpose of this action, that Alternatives 4 and 5 are beyond the geographic scope that is feasible for the sanctuary to effectively manage (see comment #54 and refer to Chapter 3 of the FEIS).

59. *Comment:* NOAA received a comment requesting FGBNMS design, develop, and commission a research vessel dedicated to studying marine mammal population growth in the pelagic environment.

Response: FGBNMS currently operates the R/V *Manta,* a research vessel that can be used as a platform to research marine mammals, and thus rejects this request. NOAA Fisheries conducts marine mammal population studies and their Southeast Fisheries Science Center develops a report every 5 years. Further, the sanctuary collaborates with external organizations and partners to support marine mammal research.

60. *Comment:* NOAA received a comment requesting the creation of an interpretive center in support of the sanctuary.

Response: NOAA will evaluate opportunities for an interpretive center through the next FGBNMS management plan review process.

61. *Comment:* NOAA received a comment requesting inclusion of a user education and enforcement program to ensure the public is aware of new boundaries and requirements.

Response: Existing online and print materials created for the proposed action contain select maps and several photographs. When the proposed action becomes final, NOAA will work to update and distribute printed and online materials to reflect the features and boundaries of FGBNMS.

62. *Comment:* NOAA received comments regarding input from the FGBNMS Sanctuary Advisory Council and other stakeholders. More specifically, commenters asked why the FGBNMS Sanctuary Advisory Council was not informed of new information and proposed boundaries for NOAA's original preferred alternative in the DEIS (Alternative 3) prior to publication, and asked why NOAA selected Alternative 3 instead of the 2007 FGBNMS Advisory Council's recommendation (Alternative 2).

Response: FGBNMS received input from its Sanctuary Advisory Council through a Boundary Expansion Working Group comprised of stakeholders from varied constituent seats. In 2007, the working group presented its recommendation for sanctuary expansion to the full Advisory Council, after which the 2007 Sanctuary Advisory Council recommendation (Alternative 2) was approved, based on the criteria developed by the original BEWG. Their recommendation became the foundation for NOAA's original preferred alternative (Alternative 3), which also included additional research in the northwestern Gulf of Mexico. After the release of the DEIS, a Sanctuary Advisory Council working group reformed. Based on the Sanctuary Advisory Council recommendations in response to the DEIS, NOAA made a number of changes to the boundaries of the polygons surrounding the banks and submerged features. In 2018, the BEWG brought forth its recommendation for sanctuary expansion to the full Advisory Council, which was approved and became NOAA's Revised Preferred Alternative for the NPRM and the Final Preferred Alternative in this FEIS.

NOAA's Final Preferred Alternative represents the collaborative efforts between constituent/stakeholder groups and the sanctuary's multi-use management. Refer to FEIS Chapter 3, Sections 3.2 and 3.5 which details development of the Final Preferred Alternative and provides the rationale for the selection of Alternative 3 as the original preferred alternative in the DEIS, respectively.

63. *Comment:* NOAA received a comment suggesting FGBNMS form an Advisory Council working group on maritime shipping traffic regarding shipping routes.

Response: NOAA will consider this suggestion in the future.

64. *Comment:* NOAA received comments claiming science was disregarded during the development of the boundary configuration for the Revised Preferred Alternative presented in the NPRM.

Response: The bank boundaries of the Revised Preferred Alternative presented in the NPRM (NOAA's Final Preferred Alternative) closely follow BOEM's NAZs, which were based on information

available in 1970–1980's, and designated to protect active reef building benthic communities, associated with the shallowest portions of the geographic features. NOAA reduced the size of the expansion areas proposed in the 2016 DEIS original preferred alternative to minimize user conflicts and potential economic impacts to the offshore energy industry in accordance with NMSA section 301 (16 U.S.C. 1431), which supports establishing compatible uses with public and private resource users.

Socioeconomic Issues and Access

65. *Comment:* NOAA received comments stating that the economic impact analysis in the DEIS was insufficient and requested updates to data pertaining to scuba diving, commercial fishing, air emissions, and oil and gas.

Response: NOAA used the best available scientific information to conduct the economic analysis for the DEIS and incorporated updated data and analysis, if available, in the FEIS (see Chapter 5). Specifically, ONMS updated analyses of impacts to commercial and recreational fishing and impacts to oil and gas resources in the FEIS.

66. *Comment:* NOAA received comments related to the positive socioeconomic impacts resulting from sanctuary expansion on local tourism/businesses and the recreation industry. Commenters noted some fishing practices were harmful and therefore, fishing restrictions in the expansion areas would benefit the recreational fishing industry, the commercial fishing industry, and fisheries/seafood production.

Response: Potential positive and adverse impacts to socioeconomic resources (*e.g.,* recreation, fishing) are detailed in FEIS Chapter 5. NOAA does not anticipate any significant adverse impacts to be incurred on the commercial or recreational fishing industry as a result of this expansion. Rather, fishers may find a minor beneficial impact with an increase in fish production with the protection of these important areas. Please review FEIS Chapter 5, Section 5.3.9.1 and 5.3.9.2 for more details on the expected impact to commercial and recreational fishing industries, respectively.

67. *Comment:* NOAA received comments suggesting that the proposed action removes an asset from public use for both commercial and recreational purposes, restricts recreational diving access, and restricts recreational fishing opportunities. Commenters urged NOAA to allow for multiple use of the sanctuary, with reasonable access regulations and reasonable mitigation measures that directly address threats.

Response: By expanding the sanctuary's boundaries and extending existing regulations to the expansion areas, NOAA is not restricting access to divers or hook and line fishers in any part of the sanctuary as long as users do not injure or possess any sanctuaries resources (see FEIS regulations Table 1.1, Chapter 1, Section 1.4). NOAA determined through the Sanctuary Advisory Council process and through public input that the expansion would allow for multiple uses of the sanctuary while addressing threats to sanctuary resources, as is set forth in NMSA Section 301. For additional details pertaining to impacts to socioeconomic resources such as recreational diving, please refer to FEIS Chapter 5.

68. *Comment:* NOAA received comments from the diving industry and scuba divers supporting sanctuary expansion. Divers urged NOAA to install mooring buoys in the expansion areas to increase access and to provide better maintenance of the mooring buoys and longlines.

Response: NOAA intends to extend the current management regime to the expansion areas, under which the sanctuary would provide and maintain mooring buoys so that vessels (< 100 feet long) could safely moor in the sanctuary boundaries, as is logistically feasible. See the current FGBNMS Management Plan.

Regulatory Impact Review (RIR)

NOAA received eight comments on the Bureau of Ocean Management's (BOEM) analysis (the RIR) (85 FR 74630, November 23, 2020) and collectively responds to those comments here.

69. *Comment:* NOAA received comments expressing concern about the short length of the period provided for public comment, suggesting (1) it was not long enough to provide substantive feedback; (2) no similar National Marine Sanctuary System has offered a 15-day comment period; and (3) that it was not circulated with other documents prior to this period. NOAA also received a request to provide justification for the legality of the 15-day comment period, and further requested that NOAA extend the comment period for 60 days.

Response: The request to extend the comment period is denied. Prior to soliciting public comment for the RIR, a 60-day comment period was open for the proposed rule, including a fulsome summary of the RIR, which allowed the public to comment on the proposed action in its entirety (85 FR 25359, May 1, 2020). On November 23, 2020, NOAA acknowledged the oversight of not circulating the RIR, and reopened the public comment period (85 FR 74630). Given that NOAA provided 60 days for public comment period on the proposed rule, which contained a summary of the BOEM analysis, the additional comment period is reasonable.

70. *Comment:* NOAA received comments suggesting that the RIR was outdated and requesting a new analysis, suggesting that a decline in the current value of oil and gas and other hydrocarbon resources leads to mistaken assumptions in the current RIR. Additionally, commenters suggest that the RIR is no longer an accurate portrayal of expected impacts to the oil and gas industry. According to the commenters, lower oil and gas prices reduce the desire to explore and develop resources in the region and, thus, oil and gas resources cannot be considered economically recoverable.

Response: NOAA disagrees with this comment due to the uncertainty in determining future oil prices, and because BOEM's February 2019 report provides the best available economic information. NOAA summarized this analysis in the proposed rule for sanctuary expansion and further evaluated impacts of this action on the oil and gas industry in their Final Environmental Impact Statement (FEIS); see Chapter 5, Section 5.3.9.5.

71. *Comment:* NOAA received comments requesting the other alternatives be re-evaluated in light of the analysis presented in the RIR.

Response: NOAA updated the analyses of all alternatives in the FEIS; see Chapters 4 and 5. Ultimately, NOAA decided to move forward with the Revised Preferred Alternative, as presented in the proposed rule, as their Final Preferred Alternative.

VI. Classification

A. National Marine Sanctuaries Act

Section 301(b) of the NMSA (16 U.S.C. 1431) provides authority for comprehensive and coordinated conservation and management of national marine sanctuaries in coordination with other resource management authorities. Section 304(a)(4) of the NMSA (16 U.S.C. 1434) requires that the procedures specified in Section 304 for designating a national marine sanctuary be followed for modifying any term of designation. This action, in addition to expanding the sanctuary, is revising the terms of designation (*e.g.,* scope of regulations) for the FGBNMS. In accordance with Section 304, the documents relevant to the expansion of Flower Garden Banks

are being submitted to the House Resources Committee and the Senate Committee on Commerce, Science, and Transportation. Section 304(a)(5) of the NMSA also requires that NOAA consult with the appropriate Federal fishery management council on any action proposing to regulate fishing in federal waters. Consultation with the Gulf of Mexico Fishery Management Council (GMFMC) is discussed above in part II sections 4 and 5. NOAA solicited comments on potential exemptions for pelagic longline and spearfishing in the expanded area, and based on public comment and coordination with NOAA fisheries, determined to not grant these exemptions and to extend existing fishing regulations into the expansion areas.

B. National Environmental Policy Act

In accordance with Section 304(a)(2) of the NMSA (16 U.S.C. 1434(a)(2)), and the provisions of NEPA (42 U.S.C. 4321–4370), NOAA has prepared a FEIS to evaluate the impacts of this action. Because this environmental review began before September 14, 2020, which was the effective date of the amendments to the Council on Environmental Quality (CEQ) regulations implementing NEPA (85 FR 43372 (Jul. 16, 2020)), the FEIS was prepared using the 1978 CEQ NEPA regulations. The Notice of Availability (December 11, 2020, 85 FR 80093) of the FGBNMS FEIS is available on the FGBNMS website.[18] NEPA reviews initiated prior to the effective date of the 2020 revised CEQ regulations may be conducted using the 1978 version of the regulations. NOAA has also prepared a ROD. Copies of the FEIS and ROD are available at the address and website listed in the **ADDRESSES** section of this final rule.

C. Executive Order 12866: Regulatory Impact

This final rule has been determined to be ''significant'' within the meaning of Executive Order 12866. Details on the estimated costs of this rule are discussed in BOEM's E.O. 13795 report, which is available on *regulations.gov* at docket NOAA–NOS–2019–033, and serves as a substitute for the Regulatory Impact Review (RIR). NOAA inadvertently omitted this report in the public docket for this action when the NPRM was published. NOAA subsequently published a **Federal Register** notice on November 23, 2020 (85 FR 74630), making the RIR available for public comments. Refer to section V of this rule for comments received on the RIR. Details on the estimated benefits of this action are discussed in Chapter 5, section 5.3 of the FEIS.

D. Executive Order 13132: Federalism Assessment

NOAA has concluded this regulatory action does not have federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 13132. The area that is the subject of the final rule is located entirely within federal waters outside of state or local jurisdiction. This rule will not have a substantial or direct effect on states or local governments.

E. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This Executive Order reaffirms the Federal government's commitment to tribal sovereignty, self-determination, and self-government. Its purpose is to ensure that all Executive departments and agencies consult with Indian tribes and respect tribal sovereignty as they develop policies on issues that impact Indian communities. This action is not anticipated to have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibility between the Federal Government and Indian tribes.

F. Executive Order 13795: Implementing an America-First Offshore Energy Strategy

Executive Order 13795 directs the Secretary of Commerce to refrain from designating or expanding any national marine sanctuary unless the proposal includes a full accounting from the DOI of any energy or mineral resource potential (including offshore energy from wind, oil, natural gas, methane hydrates, and any other sources that the Secretary of Commerce deems appropriate) within the expansion area, and the potential impact of the expansion on energy or mineral resource potential within the designated area. On February 25, 2019, BOEM provided NOAA with a review of offshore energy and mineral resource potential located within the revised expansion areas in accordance with Executive Order 13795. BOEM's report is available at the Supporting Document section of the docket identified by NOAA–NOS–2019–033, and posted at *https://www.regulations.gov/document?D=NOAA-NOS-2019-0033-1630.*

G. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This final rule is not a significant energy action under the definition in E.O. 13211. It is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Moreover, the Administrator of OIRA has not otherwise designated this action as a significant energy action. A Statement of Energy Effects, therefore, is not required.

H. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) requires Federal agencies to prepare an analysis of a rule's impact on small entities whenever the agency is required to publish a rule, unless the head of the agency can certify, pursuant to 5 U.S.C. 605(b), that the action will not have a significant economic impact on a substantial number of small entities. Under section 605(b) of the RFA, if the head of an agency (or his or her designee) certifies that a rule will not have a significant impact on a substantial number of small entities, then the agency is not required to prepare a regulatory flexibility analysis.

Pursuant to section 605(b), the Chief Counsel for Regulations for the Department of Commerce, through delegation by the head of the agency, certified to the Office of Advocacy of the Small Business Administration during the proposed rule stage that the regulations would not have a significant economic impact on a substantial number of small entities. The factual basis for certification was published in the proposed rule (85 FR 25367). No public comments were received regarding this certification. Therefore, a regulatory flexibility analysis was not required and none was prepared.

I. Paperwork Reduction Act

The existing FGBNMS regulations contain a collection-of-information requirement subject to the Paperwork Reduction Act (PRA), approved by The Office of Management and Budget (OMB), under control number 0648–0141, for collection-of-information for reporting and recordkeeping requirements under 15 CFR part 922. This final rule would not increase or otherwise revise the existing paperwork burdens.

The public reporting burden for national marine sanctuary general permit applications is estimated to average 1 hour 30 minutes per application, including the time for reviewing the application instructions,

[18] *https://flowergarden.noaa.gov/management/sanctuaryexpansion.html.*

searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. For special use permits, a collection-of information requirement is necessary to determine whether the activities are consistent with the terms and conditions of special use permits prescribed by the NMSA. The public reporting burden for this collection of information is estimated to average twenty four (24) hours per response (application, annual report, and financial report), including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. This estimate does not include additional time that may be required should the applicant be required to provide information to NOAA for the preparation of documentation that may be required under NEPA (16 U.S.C. 1431 *et seq.*).

NOAA determined that this final rule would not appreciably change the average annual number of respondents or the reporting burden for the information requirements supporting special use or research permits because few activities requiring new permits are expected for the new areas. Much of the research is expected to be conducted by the sanctuary, and other uses that require permits are anticipated with very low intensity in the proposed expansion areas. NOAA also determined that these regulations do not necessitate a modification to its information collection approval by the Office of Management and Budget under the Paperwork Reduction Act. Comments on this determination were solicited in the proposed rule, and no public comments were received. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid OMB control number.

J. National Historic Preservation Act

The National Historic Preservation Act (NHPA; 16 U.S.C. 470 *et seq.*) is intended to preserve historical and archaeological sites in the United States of America. The act created the National Register of Historic Places, the list of National Historic Landmarks, and the State Historic Preservation Offices. Section 106 of the NHPA requires Federal agencies to take into account the effects of their undertakings on historic properties, and afford the Advisory Council on Historic Preservation (ACHP) a reasonable opportunity to comment. The historic preservation review process mandated by Section 106 is outlined in regulations issued by ACHP (36 CFR part 800). Pursuant to 36 CFR 800.16(l)(1), historic properties include: ''any prehistoric or historic district, site, building, structure or object included in, or eligible for inclusion in the National Register of Historic Places maintained by the Secretary of the Interior.'' The term includes artifacts, records, and remains that are related to and located within such properties. NOAA did not identify any known historic properties within the boundaries of the Final Preferred Alternative, and received no public comments regarding historic properties in the Final Preferred Alternative boundaries.

K. Coastal Zone Management Act

Section 307 of the Coastal Zone Management Act (CZMA; 16 U.S.C. 1456) requires Federal agencies carrying out an activity that would affect any land or water use or natural resource of the coastal zone to provide a consistency determination to the relevant state agencies before final approval of the agency action. Copies of the Draft Environmental Impact Statement were provided to five Gulf Coast States (Texas, Louisiana, Alabama, Florida, and Mississippi), soliciting feedback on reasonably foreseeable effects on coastal resources and uses. Responses were received from Mississippi Department of Marine Resources and the Texas General Land Office indicating no objection to the proposed boundary changes or the DEIS. With this information in addition to analysis provided in the FEIS, NOAA determined this action would have no effect on coastal resources. On November 16, 2020, NOAA prepared a consistency determination, which was submitted to the five Gulf Coast States along with the proposed rule. In response to this request, the five Gulf States of Alabama, Florida, Louisiana, Mississippi, and Texas concurred with NOAA's consistency determination.

List of Subjects in 15 CFR Part 922

Administrative practice and procedure, Coastal zone, Fishing gear, Marine resources, Natural resources, Penalties, Recreation and recreation areas, Wildlife.

Nicole R. LeBoeuf,

Acting Assistant Administrator for Ocean Services and Coastal Zone Management, National Ocean Service.

Accordingly, for the reasons set forth above, NOAA amends part 922, title 15 of the Code of Federal Regulations as follows:

PART 922—NATIONAL MARINE SANCTUARY PROGRAM REGULATIONS

■ 1. The authority citation for part 922 continues to read as follows:

Authority: 16 U.S.C. 1431 *et seq.*

Subpart L—Flower Garden Banks National Marine Sanctuary

■ 2. Revise § 922.120 to read as follows:

§ 922.120 Boundary.

The Flower Garden Banks National Marine Sanctuary (sanctuary) boundary encompasses a total area of approximately 121 square nautical miles (160.35 square miles) of offshore ocean waters, and submerged lands thereunder, along the continental shelf and shelf edge in the northwestern Gulf of Mexico. The entire sanctuary boundary is comprised of 19 unique polygons. The precise boundary coordinates for each polygon are listed in appendix A to this subpart.

■ 3. In § 922.121, revise the term ''No-activity zone'' to read as follows:

§ 922.121 Definitions.

* * * * *

No-activity zone (applicable only to oil and gas industry activities) means the geographic areas delineated by the Department of the Interior in Topographic Features Stipulations for Outer Continental Shelf (OCS) lease sales as defined by a bathymetric contour (isobath) ranging from 55–85m in depth, with the exception of Stetson Bank (52m) and East and West Flower Garden Banks (100m). The Notice to Lessees (NTL) No. 2009–G39 provides and consolidates guidance for the avoidance and protection of biologically sensitive features and areas (*i.e.* topographic features, pinnacles, live bottoms (low relief features)) and other potentially sensitive biological features (PSBFs) when conducting operations in water depths shallower than 980 feet (300 meters) in the Gulf of Mexico. NTL 2009–G39 remains in effect pursuant to NTL No. 2015–N02. The no-activity zones are based on depth contours as noted for the following Banks: Stetson Bank (52 meters), MacNeil Bank (82

meters), Rankin Banks (including 28 Fathom Bank) (85 meters), Bright Bank (85 meters), Geyer Bank (85 meters), Elvers Bank (85 meters), McGrail Bank (85 meters), Bouma Bank (85 meters), Rezak Bank (85 meters), Sidner Bank (85 meters), Sonnier Bank (55 meters), Alderdice Bank (80 meters), and Parker Bank (85 meters). For East and West Flower Garden Banks, the no-activity zones are based on the ''¼ ¼ ¼'' aliquot system formerly used by the Department of the Interior, a method that delineates a specific portion of a block rather than the actual underlying isobath. The precise aliquot part description of these areas around East and West Flower Garden Banks are provided in appendix A of this subpart.

■ 4. Revise § 922.122(e)(1) to read as follows:

§ 922.122 Prohibited or otherwise regulated activities.

* * * * *

(e)(1) The prohibitions in paragraphs (a)(2) through (11) of this section do not apply to activities being carried out by the Department of Defense as of the effective date of the revised terms of sanctuary designation. Such activities shall be carried out in a manner that minimizes any adverse impact on Sanctuary resources or qualities. The prohibitions in paragraphs (a)(2) through (11) of this section do not apply to any new activities carried out by the Department of Defense that do not have the potential for any significant adverse impact on Sanctuary resources or qualities. Such activities shall be carried out in a manner that minimizes any adverse impact on Sanctuary resources or qualities. New activities with the potential for significant adverse impact on Sanctuary resources or qualities may be exempted from the prohibitions in paragraphs (a)(2) through (11) of this section by the Director after consultation between the Director and the Department of Defense. If it is determined that an activity may be carried out, such activity shall be carried out in a manner that minimizes any adverse impact on Sanctuary resources or qualities.

* * * * *

■ 5. Revise appendix A to subpart L to read as follows:

Appendix A to Subpart L of Part 922—Flower Garden Banks National Marine Sanctuary Boundary Coordinates

Flower Garden Banks National Marine Sanctuary

Coordinates listed in this appendix are unprojected (Geographic Coordinate System) and based on the North American Datum of 1983 (NAD83).

Point ID No.	Polygon ID No.	Bank(s)	Latitude	Longitude

■ 6. Revise appendix B to subpart L to read as follows:

Appendix B to Subpart L of Part 922—Flower Garden Banks National Marine Sanctuary—Terms of Designation

Preamble

Under the authority of title III of the Marine Protection, Research, and Sanctuaries Act, as amended (''the Act''), 16 U.S.C. 1431 *et seq.,* 19 separate unique polygon areas of ocean waters and the submerged lands thereunder, along the continental shelf and shelf edge in the northwestern Gulf of Mexico, as described in Article II, are hereby designated as Flower Garden Banks National Marine Sanctuary for the purposes of protecting and managing the conservation, ecological, recreation, research, education, historic and aesthetic resources and qualities of these areas.

Article I—Effect of Designation

The Act authorizes the Secretary of Commerce to issue such final regulations as are necessary and reasonable to implement the designation, including managing and protecting the conservation, recreational, ecological, historical, research, educational, and esthetic resources and qualities of a sanctuary. Section 1 of Article IV of this Designation Document lists those activities that may be regulated on the effective date of designation or at some later date in order to protect Sanctuary resources and qualities. Thus, the act of designation empowers the Secretary of Commerce to regulate the activities listed in Section 1. Listing does not necessarily mean that an activity will be regulated. However, if an activity is not listed it may not be regulated, except on an emergency basis, unless Section 1 of Article IV is amended by the same procedures by which the original designation was made.

Article II—Description of the Area

The Flower Garden Banks National Marine Sanctuary (Sanctuary) boundary encompasses a total area of approximately 121 square nautical miles (160 square miles) of offshore ocean waters, and submerged lands thereunder, along the continental shelf and shelf edge in the northwestern Gulf of Mexico. The entire sanctuary boundary is composed of 19 unique polygons. The precise boundary coordinates for each polygon are listed in appendix A to this subpart.

The sanctuary boundary for Polygon 1 begins at Point 1 and continues in numerical order to Point 13 and contains the submerged feature of Stetson Bank with an area of approximately 1.1 square nautical miles (1.5 square miles), located approximately 71 nautical miles (82 miles) south-southeast of Galveston, Texas. The sanctuary boundary for Polygon 2 begins at Point 1 and continues in numerical order to Point 14 and contains the submerged feature of West Flower Garden Bank with an area of approximately 28.0 square nautical miles (37.1 square miles), located approximately 97 nautical miles (111 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 3 begins at Point 1 and continues in numerical order to Point 16 and contains the submerged feature of Horseshoe Bank with an area of approximately 21.7 square nautical miles (28.7 square miles), located approximately 102 nautical miles (117 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 4 begins at Point 1 and continues in numerical order to Point 12 and contains the submerged feature of East Flower Garden Bank with an area of approximately 21.0 square nautical miles (27.8 square miles), located approximately 101 nautical miles (116 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 5 begins at Point 1 and continues in numerical order to Point 12 and contains the submerged feature of MacNeil Bank with an area of approximately 2.1 square nautical miles (2.7 square miles), located approximately 103 nautical miles (118 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 6 begins at Point 1 and continues in numerical order to Point 21 and contains the submerged features of Rankin Bank and 28 Fathom Bank with an area of approximately 4.2 square nautical miles (5.6 square miles), located approximately 109 nautical miles (126 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 7 begins at Point 1 and continues in numerical order to Point 13 and contains the submerged features of Bright Bank with an area of approximately 5.8 square nautical miles (7.6 square miles), located approximately 115 nautical miles (133 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 8 begins at Point 1 and continues in numerical order to Point 15 and contains the submerged feature of Geyer Bank within an area of approximately 8.7 square nautical miles (11.5 square miles), located approximately 126 nautical miles (145 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 9A begins at Point 1 and continues in numerical order to Point 16 and contains part of the submerged feature of Elvers Bank within an area of approximately 3.3 square nautical miles (4.4 square miles), located approximately 134 nautical miles (154 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 9B begins at Point 1 and continues in numerical order to Point 7 and also contains part of the submerged feature of Elvers Bank within an area of approximately 0.1 square nautical miles (0.2 square miles), located approximately 133 nautical miles (153 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 10A begins at Point 1 and continues in numerical order to Point 16 and contains part of the submerged feature of McGrail Bank with an area of approximately 3.4 square nautical miles (4.5 square miles), located approximately 142 nautical miles (163 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 10B begins at Point 1 and continues in numerical order to Point 8 and also contains part of the submerged feature of McGrail Bank with an area of approximately 0.1 square nautical miles (0.2 square miles), located approximately 146 nautical miles (168 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 11 begins at Point 1 and continues in numerical order to Point 23 and contains the submerged feature of Bouma Bank with an area of approximately 5.8 square nautical miles (7.7 square miles), located approximately 145 nautical miles (167 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 12 begins at Point 1 and continues in numerical order to Point 18 and contains the submerged feature of Sonnier Bank with an area of approximately 2.3 square nautical miles (3.1 square miles), located approximately 138 nautical miles (159 miles) east-southeast of Galveston, Texas. The sanctuary boundary for Polygon 13 begins at Point 1 and continues in numerical order to Point 12 and contains the submerged feature of Rezak Bank with an area of approximately 2.8 square nautical miles (3.7 square miles), located approximately 151 nautical miles (174 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 14 begins at Point 1 and continues in numerical order to Point 9 and contains the submerged feature of Sidner Bank with an area of approximately 1.5 square nautical miles (2.0 square miles), located approximately 153 nautical miles (177 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 15A begins at Point 1 and continues in numerical order to Point 14 and contains part of the submerged feature of Parker Bank within an area of approximately 5.2 square nautical miles (6.8 square miles), located approximately 168 nautical miles (194 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 15B begins at Point 1 and continues in numerical order to Point 8 and also contains part of the submerged feature of Parker Bank within an area of approximately 0.1 square nautical miles (0.2 square miles), located approximately 171 nautical miles (197 miles) southeast of Galveston, Texas. The sanctuary boundary for Polygon 16 begins at Point 1 and continues in numerical order to Point 18 and contains the submerged feature of Alderdice Bank within an area of approximately 3.8 square nautical miles (5.0 square miles), located approximately 166 nautical miles (191 miles) east-southeast of Galveston, Texas.

Article III—Characteristics of Area That Give it Particular Value

The Sanctuary contains a series of underwater features located along the edge of the continental shelf in the northwestern Gulf of Mexico. These features are of interest from both a geological and biological perspective. Formed primarily as the result of the movement of underlying salt deposits (also called salt domes or salt diapirs), and bathed by waters of tropical origin, they contain important geological features, biological habitats and other marine resources of national significance. They contain highly productive marine ecosystems that support a variety of fish and invertebrate communities of biological and economic importance.

The reefs and banks of the northwestern Gulf of Mexico are structurally complex and contain a range of marine habitats, including coral reefs, coralline algal reefs, algal nodule beds, mesophotic and deepwater reefs, and soft bottom communities. The composition,

diversity and vertical distribution of benthic communities on the banks are strongly influenced by the physical environment, including water temperature, turbidity and current regime. Geological features of interest include brine seeps, exposed basalt, methane seeps, and mud volcanoes. East and West Flower Garden Banks, the most well-known of the features, sustain the northernmost living coral reefs on the U.S. continental shelf, considered among the healthiest coral reefs in the Caribbean and Western Atlantic region. A deeper water coral reef also exists at McGrail Bank, consisting primarily of large colonies of blushing star coral (*Stephanocoenia intersepta*) at depths between 140 and 160 feet. These coral reefs are isolated from other reef systems by over 300 nautical miles (342 miles) and exist under hydrographic conditions generally near the northern limit for tropical reef formation. Several other banks, including Stetson, Sonnier, Geyer, and Bright Banks, contain various combinations of non-reef building coral species known collectively as coral communities, comprised of sponges, stony corals, fire coral, leafy algae and coralline algae. The deeper portions of the banks host thriving mid-depth (or ''mesophotic'') coral habitats characterized by the presence of both light-dependent and deepwater corals, including black corals, gorgonian corals, and associated organisms. Biological communities are distributed among several interrelated biotic zones, including a coralline algae zone, deep reef rocky outcrops, and soft bottom communities. The complex and biologically productive ecological communities of the banks offer a combination of aesthetic appeal and recreational and research opportunity matched in few other ocean areas.

The following are qualitative descriptions of the individual reefs and banks within the Sanctuary; specific boundary coordinates can be found in appendix A to this subpart.

a. Stetson Bank, Depth Range 56ft–194ft

Boundaries encompass a claystone/siltstone ring feature of mesophotic coral habitat revealed by high resolution multibeam bathymetric surveys, and subsequently ground-truthed by remotely operated vehicle surveys. These features are surface expressions of the salt dome associated with the feature, and provide habitat for sponges, gorgonians, stony branching corals, black corals, and associated fish and mobile invertebrates.

b. West Flower Garden Bank, Depth Range 59ft–545ft

Boundaries encompass mesophotic coral patch reefs to the north, southwest, and east of the existing sanctuary. These reefs provide coralline algae reef habitat for black corals, gorgonians, stony branching corals, and associated fish and mobile invertebrates.

c. East Flower Garden Bank, Depth Range 52ft–446ft

Boundaries to encompass mesophotic coral patch reefs to the north and southeast of the existing sanctuary. These reefs provide deep coral habitat for dense populations of black corals, gorgonians, stony branching corals, and associated fish and mobile invertebrates.

d. Horseshoe Bank, Depth Range 243ft–614ft

Extensive deepwater habitat and coralline algae reefs in the form of hundreds of patchy outcroppings covering an area of approximately 1.9 miles (3km) wide and having 16.4–49.2ft (5–15m) of relief above the seafloor, with dense assemblages of mesophotic black coral, gorgonians, stony branching corals, sponges, algae invertebrates, and fish; several conical-shaped mud volcanoes clustered near the center of the feature, with one rising 328ft (100m) above the sea floor.

e. MacNeil Bank, Depth Range 210ft–315ft

Deep reef bedrock outcrops and coralline algae patch reefs harboring populations of black corals and gorgonians, sponges, fish, and mobile invertebrates.

f. Rankin/28 Fathom Banks, Depth Range 164ft–571ft

Rankin Bank is just north of 28 Fathom Bank, and separated from it by a long trough, approximately 1,640-foot (500 m) wide, approximately 6,070-foot (1,850 m) which extends to a depth of approximately 570ft (174 m). The boundaries encompass the shallowest portions of Rankin and 28 Fathom Banks, which harbor coral algae reefs and deep coral reefs with populations of gorgonians, black corals, sponges, and associated fish and mobile invertebrates.

g. Bright Bank, Depth Range 112ft–384ft

Bright Bank previously harbored a coral reef on the very shallowest portions of the bank, which sustained extensive damage from salvage and mining activities employing dynamite for excavation activities. The cap is now considered a coral community, and in spite of these impacts, nine species of shallow water scleractinian corals survive, along with two deeper water species. The feature also harbors extensive coralline algae reefs, providing habitat for populations of gorgonians, black corals, sponges, and associated fish and mobile invertebrates.

h. Geyer Bank, Depth Range 128ft–722ft

Geyer Bank is a broad, relatively flat fault-bounded structure situated on an active salt diaper. This feature supports a coral community, as well as extensive coralline algae reefs and fields of algal nodules including dense fields of macro-algae, black corals, gorgonians, sponges, and associated fish and mobile invertebrates. Seasonal spawning aggregations of fish are associated with this bank, including enormous numbers of reef butterflyfish.

i. Elvers Bank, Depth Range 213ft–686ft

Two discreet polygons have been developed to protect portions of Elvers Bank: A larger polygon encompassing 4.43 square miles on the south side of the feature, and a small polygon, encompassing 0.19 square miles on the north side of the feature. The shallow areas of the bank feature coralline algae reefs and algal nodule fields, and the deeper areas in the southern polygon harbor large deep reef outcroppings, both providing habitat for black corals, gorgonians, sponges, and associated fish and mobile invertebrates. The deep reefs also harbor glass sponge fields, a feature not documented in any other areas of the sanctuary, as well as a previously undescribed species of black coral.

j. McGrail Bank, Depth Range 144ft–512ft

Two discreet polygons have been developed to protect portions of McGrail Bank: A larger claw shaped polygon reaching from northwest to southeast, encompassing 4.54 square miles, and a smaller polygon, encompassing 0.17 square miles, situated on the southeast of the feature that wraps around a conical shaped mound. This bank features unique areas of coral reefs dominated by large colonies of the blushing star coral, *Stephanocoenia intersepta,* with 28% live coral cover in discrete areas (no other known coral reef is dominated by this species). Pinnacles varying in diameter from ~80 to 395 feet (24–120 m) and as tall as ~25 feet (8 m) are found on the southwest rim of the main feature, along east- and southeast-trending scarps leading away from the bank and in concentric fields to the south and southeast of the bank. A significant portion of the depth zone between 145 and 170 feet is dominated by coral colonies up to 5 feet tall, covering an area of approximately 37 acres. At least 14 species of stony corals have been recorded. Deeper portions of this site harbor mesophotic coral habitat for deep coral, coralline algae reefs, and fields of algal nodules. Dense populations of black corals, gorgonians, macro-algae fields, and associated fish and mobile invertebrates are present.

k. Sonnier Bank, Depth Range 62ft–210ft

Sonnier Bank consists of a series of isolated clusters of pinnacles comprised of uplifted siltstone and claystone, that rise mostly around the perimeter of a single, roughly circular ring 1.9 miles (3.2km) in diameter. Two peaks are accessible and popular with recreational scuba divers. The peaks are dominated by coral communities featuring fire coral, sponges, and algae. The deeper portions of the feature are fairly heavily silted, but provide habitat for black corals, gorgonians, and associated fish and mobile invertebrates.

l. Bouma Bank, Depth Range 187ft–322ft

Bouma Bank is dominated by coralline algae reefs and algal nodule fields, providing habitat for populations of black corals, gorgonians, algae, branching stony coral, clusters of cup coral, and associated fish and mobile invertebrates.

m. Rezak Bank, Depth Range 197ft–430ft

Rezak Bank is dominated by coralline algae reefs and extensive algal nodule fields, providing habitat for populations of black corals, gorgonians, algae, and associated fish and mobile invertebrates.

n. Sidner Bank, Depth Range 190ft–420ft

Dominated by coralline algae reefs and extensive algal nodule fields providing habitat for populations of black corals, gorgonians, algae, sponges, and associated fish and mobile invertebrates.

o. Alderdice Bank, Depth Range 200ft–322ft

This feature includes spectacular basalt outcrops of Late Cretaceous origin

(approximately 77 million years old) representing the oldest rock exposed on the continental shelf offshore of Louisiana and Texas. The outcrops at Alderdice Bank bear diverse, extremely dense assemblages of gorgonians and black corals, sponges, and swarms of reef fish. Mesophotic coralline algae reef habitats below the spires, silted over in areas, provide habitat for dense populations of black corals, gorgonians, sponges, branching stony corals, fields of macro-algae, and associated fish and mobile invertebrates.

p. Parker Bank, Depth Range 187ft–387ft

Two discreet polygons have been developed to protect portions of Parker Bank. A larger polygon bounding the central portion of the features, encompassing 6.82 square miles, and a smaller polygon to the east, encompassing 0.14 square miles. These boundaries protect the shallowest portions of the bank, which harbor coralline algae reefs and algal nodule fields and support populations of plating stony corals, black corals, gorgonians, sponges, macro-algae, and associated fish and mobile invertebrates.

Article IV—Scope of Regulations

Section 1. Activities Subject to Regulation

The following activities are subject to regulation, including prohibition, to the extent necessary and reasonable to ensure the protection and management of the conservation, recreational, ecological, historical, research, educational and esthetic resources and qualities of the area:

a. Anchoring or otherwise mooring within the Sanctuary;

b. Discharging or depositing, from within the boundaries of the Sanctuary, any material or other matter;

c. Discharging or depositing, from beyond the boundaries of the Sanctuary, any material or other matter;

d. Drilling into, dredging or otherwise altering the seabed of the Sanctuary; or constructing, placing or abandoning any structure, material or other matter on the seabed of the Sanctuary;

e. Exploring for, developing or producing oil, gas or minerals within the Sanctuary;

f. Taking, removing, catching, collecting, harvesting, feeding, injuring, destroying or causing the loss of, or attempting to take, remove, catch, collect, harvest, feed, injure, destroy or cause the loss of, a Sanctuary resource;

g. Possessing within the Sanctuary a Sanctuary resource or any other resource, regardless of where taken, removed, caught, collected or harvested, that, if it had been found within the Sanctuary, would be a Sanctuary resource.

h. Possessing or using within the Sanctuary any fishing gear, device, equipment or other apparatus.

i. Possessing or using airguns or explosives or releasing electrical charges within the Sanctuary.

j. Interfering with, obstructing, delaying or preventing an investigation, search, seizure or disposition of seized property in connection with enforcement of the Act or any regulation or permit issued under the Act.

Section 2. Consistency With International Law

Any regulation of activities listed in Section 1 of this Article will be applied and enforced as mandated by 16 U.S.C. 1435(a).[1]

Section 3. Emergency Regulations

Where necessary to prevent or minimize the destruction of, loss of, or injury to a Sanctuary resource or quality, or minimize the imminent risk of such destruction, loss or injury, any and all activities, including those not listed in section 1 of this Article, are subject to immediate temporary regulation, including prohibition.

Article V—Effect on Other Regulations, Leases, Permits, Licenses, and Rights

Section 1. Fishing Regulations, Licenses, and Permits

The regulation of fishing is authorized under Article IV. All regulatory programs pertaining to fishing, including fishery management plans promulgated under the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.,* shall remain in effect. Where a valid regulation promulgated under these programs conflicts with a Sanctuary regulation, the regulation deemed by the Secretary of Commerce or designee as more protective of Sanctuary resources and qualities shall govern.

Section 2. Other Licenses, Regulations, and Permits

If any valid regulation issued by any Federal authority of competent jurisdiction, regardless of when issued, conflicts with a Sanctuary regulation, the regulation deemed by the Secretary of Commerce or designee as more protective of Sanctuary resources and qualities shall govern.

Pursuant to section 304(c)(1) of the Act, 16 U.S.C. 1434(c)(1), no valid lease, permit, license, approval, or other authorization issued by any Federal authority of competent jurisdiction, or any valid right of subsistence use or access, may be terminated by the Secretary of Commerce or designee as a result of this designation or as a result of any Sanctuary regulation if such authorization or right was in existence on the effective date of this designation. However, the Secretary of Commerce or designee may regulate the exercise of such authorization or right consistent with the purposes for which the Sanctuary is designated.

Accordingly, the prohibitions set forth in the Sanctuary regulations shall not apply to any activity authorized by any valid lease, permit, license, approval, or other authorization in existence on the effective date of Sanctuary designation and issued by any Federal authority of competent jurisdiction, or by any valid right of subsistence use or access in existence on the effective date of Sanctuary designation, provided that the holder of such authorization or right complies with Sanctuary regulations regarding the certification of such authorizations and rights (*e.g.,* notifies the Secretary or designee of the existence of, requests certification of, and provides requested information regarding such authorization or right) and complies with any terms and conditions on the exercise of such authorization or right imposed as a condition of certification by the Secretary or designee as he or she deems necessary to achieve the purposes for which the Sanctuary was designated.

Pending final agency action on the certification request, such holder may exercise such authorization or right without being in violation of any prohibitions set forth in the Sanctuary regulations, provided the holder is in compliance with Sanctuary regulations regarding certifications.

The prohibitions set forth in the Sanctuary regulations shall not apply to any activity conducted in accordance with the scope, purpose, terms, and conditions of the National Marine Sanctuary permit issued by the Secretary or designee in accordance with the Sanctuary regulations. Such permits may only be issued if the Secretary or designee finds that the activity for which the permit is applied will: Further research related to Sanctuary resources; further the educational, natural or historical resource value of the Sanctuary; further salvage or recovery operations in or near the Sanctuary in connection with a recent air or marine casualty; or assist in managing the Sanctuary.

The prohibitions set forth in the sanctuary regulations shall not apply to any activity conducted in accordance with the scope, purpose, terms, and conditions of a Special Use permit issued by the Secretary or designee in accordance with section 310 of the Act. However, in areas where sanctuary regulations prohibit oil, gas, or mineral exploration, development or production, the Secretary or designee may in no event, permit or otherwise, approve such activities in that area. Any leases, licenses, permits, approvals, or other authorizations issued after the effective date of designation authorizing the exploration or production of oil, gas, or minerals in that area shall be invalid.

Section 3. Department of Defense Activities

The prohibitions in § 922.122(a)(2) through (11) do not apply to activities being carried out by the Department of Defense as of the effective date of designation. Such activities shall be carried out in a manner that minimizes any adverse impact on Sanctuary resources and qualities. The prohibitions in § 922.122(a)(2) through (11) do not apply to any new activities carried out by the Department of Defense that do not have the potential for any significant adverse impact on Sanctuary resources and qualities. Such activities shall be carried out in a manner that minimizes any adverse impact on Sanctuary resources and qualities. New activities with the potential for significant adverse impact on Sanctuary resources and qualities may be exempted from the prohibitions in § 922.122(a)(2) through (11) of this section by the Director after consultation between the Director and the Department of Defense. If it is determined that an activity may be carried out, such activity shall be

[1] Based on the legislative history of the NMSA, NOAA has long interpreted the text of 16 U.S.C. 1435(a) as encompassing international law, including customary international law.

carried out in a manner that minimizes any adverse impact on Sanctuary resources and qualities. In the event of threatened or actual destruction of, loss of, or injury to a Sanctuary resource or quality resulting from an untoward incident, including but not limited to spills and groundings, caused by a component of the Department of Defense, the cognizant component shall promptly coordinate with the Director for the purpose of taking appropriate actions to respond to and mitigate the harm and, if possible, restore or replace the Sanctuary resource or quality.

Article VI—Alterations to This Designation

The terms of designation may be modified only by the same procedures by which the original designation is made, including public hearings; consultation with any appropriate Federal, State, regional and local agencies; review by the appropriate Congressional committees; and approval by the Secretary of Commerce or designee.

BILLING CODE 3510–NK–P

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1223

[Docket No. CPSC–2013–0025]

Revisions to Safety Standard for Infant Swings

AGENCY: Consumer Product Safety Commission.

ACTION: Direct final rule.

SUMMARY: In November 2012, the U.S. Consumer Product Safety Commission (CPSC) published a consumer product safety standard for infant swings under section 104 of the Consumer Product Safety Improvement Act of 2008 (CPSIA). The standard incorporated by reference the ASTM voluntary standard that was in effect for infant swings at the time. The CPSIA sets forth a process for updating mandatory standards for durable infant or toddler products that are based on a voluntary standard, when a voluntary standards organization revises the standard. Consistent with the CPSIA update process, the Commission issued a direct final rule in October 2013, to revise the incorporation by reference for the mandatory swings standard, to reflect ASTM'S revised voluntary standard. Since 2013, ASTM has revised the voluntary standard for infant swings three times. This direct final rule updates the mandatory standard for infant swings to incorporate by reference ASTM's 2020 version of the voluntary standard.

DATES: The rule is effective on April 3, 2021, unless CPSC receives a significant adverse comment by February 18, 2021. If CPSC receives such a comment, it will publish a notice in the **Federal Register**, withdrawing this direct final rule before its effective date. The incorporation by reference of the publication listed in this rule is approved by the Director of the Federal Register as of April 3, 2021.

ADDRESSES: You can submit comments, identified by Docket No. CPSC–2013–0025, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. CPSC does not accept comments submitted by electronic mail (email), except through *https://www.regulations.gov.* CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Mail/hand delivery/courier Written Submissions: Submit comments by mail/hand delivery/courier to: Division of the Secretariat, Consumer Product Safety Commission, Room 820, 4330 East West Highway, Bethesda, MD 20814; telephone: (301) 504–7479. Alternatively, as a temporary option during the COVID–19 pandemic, you may email such submissions to: *cpsc-os@cpsc.gov.*

Instructions: All submissions must include the agency name and docket number for this notice. CPSC may post all comments without change, including any personal identifiers, contact information, or other personal information provided, to: *https://www.regulations.gov.* Do not submit electronically: Confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for mail/hand delivery/courier written submissions.

Docket: For access to the docket to read background documents or comments received, go to: *https://www.regulations.gov,* and insert the docket number, CPSC–2013–0025, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Keysha Walker, Compliance Officer, U.S. Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504–6820; email: *kwalker@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

1. Statutory Authority

Section 104(b)(1) of the CPSIA requires the Commission to assess the effectiveness of voluntary standards for durable infant or toddler products and adopt mandatory standards for these products. 15 U.S.C. 2056a(b)(1). The mandatory standard must be ''substantially the same as'' the voluntary standard, or may be ''more stringent than'' the voluntary standard, if the Commission determines that more stringent requirements would further reduce the risk of injury associated with the product. *Id.*

Section 104(b)(4)(B) of the CPSIA specifies the process for when a voluntary standards organization revises a standard that the Commission incorporated by reference under section 104(b)(1). First, the voluntary standards organization must notify the Commission of the revision. Once the Commission receives this notification, the Commission may reject or accept the revised standard. The Commission may reject the revised standard by notifying the voluntary standards organization that it has determined that the revised standard does not improve the safety of the consumer product and that it is retaining the existing standard. When rejecting a revision, the Commission must notify the voluntary standards organization of this determination within 90 days of receiving notice of the revision. If the Commission does not take this action to reject the revised standard, the revised voluntary standard will be considered a consumer product safety standard issued under section 9 of the Consumer Product Safety Act (15 U.S.C. 2058), effective 180 days after the Commission received notification of the revision (or a later date specified by the Commission in the **Federal Register**). 15 U.S.C. 2056a(b)(4)(B).

2. Safety Standard for Infant Swings

Under section 104(b)(1) of the CPSIA, the Commission adopted a mandatory rule for infant swings, codified in 16 CFR part 1223. The rule incorporated by reference ASTM F2088–12a, *Standard Consumer Safety Specification for Infant Swings,* with modifications to the labeling and test method requirements.[1] 77 FR 66703 (Nov. 7, 2012). At the time the Commission published the final rule, ASTM F2088–12a was the current version of the voluntary standard.

In April 2013, ASTM notified CPSC that it had issued a revised standard for infant swings, ASTM F2088–13. In accordance with the procedures set out in section 104(b)(4)(B) of the CPSIA, the revised standard became the new

[1] The modifications included changes to the required warning label content and a revised test method to address an omission in the voluntary standard for toy mobiles attached to swings.

mandatory standard for infant swings. The Commission published a direct final rule to update 16 CFR part 1223, incorporating by reference ASTM F2088–13, without modification. 78 FR 37706 (June 24, 2013). After the Commission issued the revised mandatory standard in 2013, ASTM approved two more revisions: ASTM F2088–15 and ASTM F2088–19. However, ASTM did not officially notify CPSC of these revisions under CPSIA section 104(b)(4)(B). Consequently, these revised standards did not become the mandatory standards by operation of law, and the Commission did not update the mandatory standard to incorporate by reference these revised ASTM standards. Therefore, ASTM F2088–13 remained the mandatory standard.

On October 5, 2020, ASTM notified CPSC that it had revised the voluntary standard for infant swings, approving ASTM F2088–20 on June 15, 2020.[2] As this preamble discusses, based on CPSC staff's review of ASTM F2088–20,[3] the Commission will allow the revised voluntary standard to become the mandatory standard because the revised requirements in the voluntary standard either improve the safety of infant swings, or are safety neutral. Accordingly, by operation of law under section 104(b)(4)(B) of the CPSIA, ASTM F2088–20 will become the mandatory consumer product safety standard for infant swings on April 3, 2021. 15 U.S.C. 2056a(b)(4)(B). This direct final rule updates 16 CFR part 1223 to incorporate by reference the revised voluntary standard, ASTM F2088–20.

B. Revisions to ASTM F2088

The ASTM standard for infant swings includes performance requirements, test methods, and requirements for warning labels and instructional literature, to address hazards to infants associated with infant swings. ASTM has revised the voluntary standard for infant swings three times since ASTM F2088–13, which is the current mandatory standard. This section describes the changes in these three editions of the standard—ASTM F2088–15, ASTM F2088–19, and ASTM F2088–20. The revisions that ASTM included in the 2015 and 2019 versions of the standard are also in the newly revised version, ASTM F2088–20, although some section and figure numbers have changed to accommodate other revisions.

1. ASTM F2088–15

On October 1, 2015, ASTM approved a revised version of the standard, ASTM F2088–15. ASTM did not notify the Commission of this revision. ASTM F2088–15 included one substantive change, several revisions to clarify existing requirements, and editorial revisions that did not alter substantive requirements in the standard or affect safety. The revisions that ASTM included in the 2015 version of the standard are also in the newly revised version, ASTM F2088–20.

a. Substantive Revisions

Section 6.5.2 of ASTM F2088–15 states: ''Swings with a maximum seat back angle greater than 50 degrees from horizontal measured in accordance with 7.13 shall include shoulder straps as part of the restraint system.'' This requirement was already in the standard in ASTM F2088–13. However, ASTM F2088–15 added revised procedures for measuring the seat back and bottom angles for seat designs without a defined intersection of the seat bottom and back (*i.e.,* curved seats), by adding a new figure to indicate how to determine the intersection for curved seats (Figure 11, sections 7.13–7.15). ASTM F2088–15 also added the word ''gently'' to the direction to ''gently place the Hinged Weight Gage—Infant'' in this procedure (sections 7.13–7.15).

ASTM F2088–13 did not address how to measure seat angles for curved seat designs. Without a defined method, test laboratories were left to interpret how to place the Hinged Weight Gauge—Infant in the seat, resulting in inconsistent measurements among test laboratories. Inconsistent measurements among test laboratories are problematic because these seat back angle measurements determine whether the product requires shoulder straps. Shoulder straps provide additional safety for infant swings, by preventing infant occupants from slumping forward when the seat back angle is greater than 50 degrees. Therefore, greater consistency in seat back measurements for curved seat designs improves the safety of infant swings, by ensuring that shoulder straps are included for infant swings with larger seat back angles.

b. Non-Substantive Revisions

ASTM F2088–15 also added information to provide greater clarity to consumers. ASTM F2088–13 already required a warning statement to ''discontinue use of swing when infant attempts to climb out.'' ASTM F2088–15 added ''(approximately 9 months)'' to this warning, to provide additional guidance to consumers on when to stop using the product (section 8.3.1.1(3)). ASTM F2088–15 also added minor formatting changes to align with ASTM form and style guidelines (*e.g.,* changed ''in'' to ''in.''). These revisions are neutral regarding the safety of infant swings because they do not change any substantive requirements.

2. ASTM F2088–19

On November 15, 2019, ASTM approved a revised version of the standard, ASTM F2088–19. ASTM did not notify the Commission of this revision. ASTM F2088–19 included one substantive change, as well as several editorial revisions that did not alter substantive requirements in the standard or affect safety. The revisions that ASTM included in the 2019 version of the standard are also in the newly revised version, ASTM F2088–20.

a. Substantive Revisions

ASTM F2088–19 added a definition for ''tethered strap'' (section 3.1.11), a performance requirement (section 6.9), and a test method (section 7.16) to address possible entanglement of non-occupant children in exposed tethered straps that connect the underside of the seat to the product frame or to other straps. The new requirements only apply to tethered straps, and not straps that are loose or hanging from the product (*i.e.,* not connected to other components). The new requirement limits the length of tethered straps to a maximum of 16 inches, when measured from the back of the seat to the first attachment point (*e.g.,* another strap or part of the product frame) in accordance with the test method in section 7.16.

ASTM based the 16-inch limit on the approximate perimeter of the small head probe described in ASTM F406–19, *Standard Consumer Safety Specification for Non-Full-Size Baby Cribs/Play Yards,* which is 16.3 inches (section X1.4). The small head probe represents a 5th percentile 6-month-old child, which is the youngest child with the developmental ability to become entrapped in a tethered strap.[4] The ASTM ballot that lead to these requirements stated that they were intended to prevent a 6-month-old or older child from becoming entangled if exposed tethered straps under the seat of an infant swing formed a loop.

[2] ASTM published ASTM F2088–20 in July 2020.

[3] CPSC staff's briefing memorandum regarding ASTM F2088–20 is available at: *https://cpsc.gov/s3fs-public/ASTMs-Revised-Safety-Standard-for-Infant-and-Cradle-Swings.pdf?dTN6hRTePdlXPZ8oDFUd8DGAFHvUmP5i.*

[4] ASTM F406–19, Section 5.15.3 states: ''The small head probe represents the 5th percentile 6-month-old child because that is the youngest child having the developmental abilities to become entrapped.''

The new test method regarding tethered straps first assesses whether, over the course of five attempts, the tethered straps separate from the seat using a pull force of 5 pounds. If the tethered straps separate in all five attempts, the tethered straps are exempt from the length limit. If the tethered straps remain attached in any one of the five attempts, the tethered straps under the seat are subject to the 16-inch maximum length limit. The test method also explains how to measure the length of the strap to determine whether it complies with the 16-inch limit, and refers to the new Figures 14 and 15 as examples. These figures illustrate how to measure the exposed length on two types of tethered strap configurations. For straps that attach to a rigid portion of the product, the length is measured from the point where the strap connects with the rigid surface (Figure 14). For straps that attach to another strap, the length is measured from the point where the strap first attaches to the other strap (Figure 15).

ASTM F2088–15 did not address the entanglement hazard for non-occupant children associated with tethered straps. As such, these added requirements improve the safety of infant swings by addressing this hazard for certain tethered strap designs.[5]

b. Non-Substantive Revisions

ASTM F2088–19 also included minor additions and revisions that did not affect the substantive requirements in the standard. The following revisions are neutral regarding the safety of infant swings because they do not change any substantive requirements:

- Section 1.5 says ''safety, health and environmental,'' instead of ''safety and health'';
- a new section 1.6 indicates that ASTM developed the standard in accordance with principles recognized by the World Trade Organization;
- in section 2.1, the list of referenced ASTM standards reflects a change to the title of ASTM D3359 and adds ASTM F406, *Standard Consumer Safety Specification for Non-Full-Size Baby Cribs/Play Yards;*
- revised unit expressions align with ASTM form and style guidelines (*e.g.,* changed ''hour'' to ''h''; changed ''73 ± 9 °F'' to ''73 °F ± 9 °F'');
- minor spelling changes (*e.g.,* changed ''a/c'' to ''AC''); and
- updated section numbers to reflect added sections.

3. ASTM F2088–20

On June 15, 2020, ASTM approved a revised version of the standard, ASTM F2088–20. In accordance with CPSIA section 104(b)(4)(B), ASTM notified CPSC of this revision on October 5, 2020. ASTM F2088–20 includes several substantive changes, several revisions to clarify existing requirements, and editorial revisions that do not alter substantive requirements in the standard or affect safety. The revisions that ASTM included in the 2015 and 2019 versions of the standard are also in the newly revised version, ASTM F2088–20.[6]

Several changes in ASTM F2088–20 are intended to align with wording changes ASTM initiated for all of its juvenile products standards. After publishing ASTM F2088–13, ASTM convened a task group, the ASTM Ad Hoc Wording Task Group (Ad Hoc TG) to harmonize the wording of common provisions (*e.g.,* introduction, scope, protective components), as well as warning label requirements, across durable infant and toddler product voluntary standards. The Ad Hoc TG consists of members of various durable nursery products voluntary standards committees, including CPSC staff. The final Ad Hoc TG recommendations are in a reference document, titled, ''Recommended Language Approved by Ad Hoc Task Group, Revision E, May 28, 2019,'' and are part of the F15 Committee Documents. ASTM F15 committees have used these recommendations to update juvenile products standards so that common provisions and requirements for warnings are consistent across the standards.[7] There are substantive and non-substantive revisions in ASTM F2088–20 that are intended to align with the Ad Hoc TG recommendations; these revisions are explained in more detail in subsections *a. Substantive Revisions* and *b. Non-Substantive Revisions,* below.

a. Substantive Revisions

ASTM F2088–20 includes revisions and additions to substantive requirements, as well as changes that make existing requirements clearer or more explicit.

Scope. A new section 1.3 specifies that the standard covers products with a powered mechanism that provides a swinging or gliding seat/cradle in any direction relative to the frame. Section 1.3 also notes that swinging or gliding mechanisms can be powered by batteries, AC adapters, wind-up mechanisms, or other means. These revisions do not expand or modify the scope of the standard. Other sections of the standard already addressed the listed features (*e.g.,* requirements regarding battery compartments and AC adapters), indicating that products with those features are within the scope of the standard. This revision merely highlights and clarifies that the standard covers this range of products. Accordingly, these changes to section 1.3 are neutral to the safety of infant swings because they do not alter any substantive requirements.

Section 1.3 also specifies that the standard does not cover products that are intended to provide sleeping accommodations for the occupant. This revision does not alter the scope of the standard. However, explicitly stating that the infant swing standard does not cover products intended for infant sleep will assist manufacturers to recognize that the swing standard is not applicable to products intended for sleep, which are subject to other standards. As such, this revision improves the safety of infant swings because it clarifies the types of products that are subject to the standard.

Referenced Documents. Section 2.1 includes a new reference to ASTM F2194, *Standard Consumer Safety Specification for Bassinets and Cradles,* because this standard is referenced as part of a new requirement (see *General Requirements,* below).

Terminology. ASTM F2088–20 updates two definitions and adds a third to align with the Ad Hoc TG recommendations. The terms ''conspicuous'' (Section 3.1.2) and ''static load'' (Section 3.1.11) were already defined in the standard; the revisions simply modify wording and do not alter the substantive meaning of the terms. ''Protective component'' (Section 3.1.10) was not previously defined in the standard, but there were already requirements for ''protective components'' in the standard, and those provisions described the meaning of the term. The revision moves that description to a formal definition.

ASTM F2088–20 also includes updated definitions for ''cradle swing'' (Section 3.1.3) and ''infant swing'' (Section 3.1.5) to specify the maximum developmental and age limit for each product. This information was already in the warning requirements; the revisions only add these details to the formal definitions.

[5] See staff's briefing memorandum, available at *https://cpsc.gov/s3fs-public/ASTMs-Revised-Safety-Standard-for-Infant-and-Cradle-Swings.pdf?dTN6hRTePdlXPZ8oDFUd8DGAFHvUmP5i,* for discussion of staff's assessment that these added requirements only address the hazard for certain tethered strap designs.

[6] Some section and figure numbers may differ in ASTM F2088–20 due to other revisions.

[7] This process is ongoing, and ASTM has not yet updated all of its juvenile products standards to reflect these changes.

ASTM also added a new definition for ''combination swing'' (Section 3.1.1.) to address products with both a cradle swing and infant swing use, mode, or position. The standard already addressed ''combination swings''—Section 8.5 describes them as products with both a cradle mode and a seated mode, and applies labeling requirements to them. However, the standard did not previously contain a formal definition of the term.

ASTM also revised the definition of ''travel swing'' (Section 3.1.14). Previously, ASTM defined ''travel swing'' as a ''low-profile, compact swing,'' grouping all compact swing products into a single term. The revised definition does the same, but because of the revised definitions of ''infant swing,'' ''cradle swing,'' and ''combination swing,'' the revised definition of ''travel swing'' lists the compact versions of each product type (*i.e.,* ''low-profile, compact infant, cradle, or combination swing'').

These revisions to the terminology in ASTM F2088–20 are neutral to the safety of infant swings because they do not alter the meaning of the terms or the substantive requirements that apply to these products.

General Requirements. ASTM F2088–20 includes revised requirements for protective components (Section 5.8). The standard already required testing to assess the potential removal of protective components. The revision specifies that all protective components that are accessible to a child in or around the product must be evaluated according to the requirements for protective components. As such, the revision clarifies which protective components to assess. This revision improves the safety of infant swings because it ensures that all accessible protective components are tested for potential removal.

The standard also includes a new requirement that cradle swings or combination swings in a cradle swing use, mode, or position, while in the rest (*i.e.,* non-rocking) position, comply with the requirements of ASTM F2194, *Standard Consumer Safety Specification for Bassinets and Cradles* (section 5.11). As a general matter, ASTM F2088–20 does not cover products that are intended as sleeping accommodations (section 1.3) and the standard requires swings to display warnings that the products are not safe for unattended sleep (section 8.5.1). However, cradle swings, when at rest, have characteristics that are consistent with a stationary bassinet or cradle, where the occupant is lying flat, and is not being rocked. As such, cradle swings, while at rest, may serve as a sleep surface, despite the on-product warnings. If used as a sleep surface, these swings may present hazards consistent with a bassinet or cradle. ASTM F2194 addresses these hazards, including requirements to provide a safe sleep environment. This addition improves the safety of infant swings because it requires swings that function like bassinets or cradles to meet the safety requirements for such products.

Performance Requirements. Section 6.5 already included requirements for restraint systems and specified that a restraint system is required to secure an occupant in the seated position in any manufacturer-recommended use positions. However, ASTM F2088–20 adds to this requirement that cradle swings and combination swings, when in all manufacturer's use positions as a cradle swing, shall not have a restraint system. This prevents occupants of cradle swings (which are intended for infants from birth to approximately 5 months old) from getting entangled in restraints while lying flat, and is consistent with the bassinet standard (ASTM F2194). This revision improves the safety of infant swings by addressing a potential entanglement hazard.

Marking and Labeling. ASTM F2088–20 does not include the previous requirement that manufacturers mark each product and its retail packaging with a model number and change the model number when they make changes to the product that affect conformance with the safety standard (previous Section 8.1.2). The ASTM ballot that led to removing this requirement suggested that the rationale was to provide consistency with other juvenile products standards, which do not contain this requirement. This requirement likely was intended to facilitate recalls, by providing a way to identify products made during a certain time. However, other remaining requirements accomplish this purpose. Section 8.1.2 still requires manufacturers to mark products with the month and year of manufacture, and 16 CFR 1130.4 requires manufacturers that use model names or numbers to permanently mark that identifying information on their infant or toddler products. Therefore, the revision is neutral with respect to the safety of infant swings because other requirements accomplish the same purpose.

ASTM F2088–20 also includes revised marking and labeling requirements, including warning formatting and wording, to align with the Ad Hoc TG recommendations.

Revised wording of warnings statements (Section 8.5) includes changing ''Always secure infant in the restraint system provided'' to ''ALWAYS use restraints. Adjust to fit snugly,'' and changing ''Never leave infant unattended in swing'' to ''Stay near and watch infant during use.'' This revised language more directly indicates to caregivers what actions to take.

The revised standard also includes two new warning subsections, for combination swings (Section 8.5.3) and travel swings (Section 8.5.4). The standard already included the warning requirements for these swing designs, but they were embedded in the general warning requirements. Moving them to individual sections based on product type highlights the importance of these warnings and clearly matches warnings with the corresponding product design.

The revised marking and labeling requirements in ASTM F2088–20 improve the safety of infant swings by providing clear, direct, and product-specific requirements, and providing consistency across juvenile product standards.

Instructional Literature. ASTM F2088–20 includes revised requirements for instructional literature (Section 9) for consistency with the Ad Hoc TG recommendations and the revised warning label requirements in Section 8. These revisions improve the safety of infant swings by providing clear warning information and instructional literature that is consistent with the corresponding on-product warnings and across juvenile product standards.

b. Non-Substantive Revisions

ASTM F2088–20 also includes minor additions and revisions that are editorial and do not alter any substantive requirements in the standard. Because they do not change any substantive requirements, these revisions are neutral regarding the safety of infant swings.

Title. ASTM F2088–20 revises the title for the standard, changing it from ''Standard Consumer Safety Specification for Infant Swings'' to ''Standard Consumer Safety Specification for Infant and Cradle Swings.'' This title change does not alter the scope of the standard; performance requirements and test methods for cradle swings have been in the standard since ASTM first adopted it. This revision makes it clear in the title that the standard applies to cradle swings.

Introduction. The revised standard includes updated introduction language to align with the Ad Hoc TG recommendations. This includes replacing the statements regarding reasonably foreseeable misuse or abuse

with a single statement that conveys the same information. Specifically, the revision retains the existing statement that the voluntary standard covers normal and reasonably foreseeable misuse or abuse of infant swings, and removes an additional sentence about careless or blatant misuse. This revision clarifies, and does not alter, the type of use covered by the standard. In addition, the introduction includes minor wording changes (*e.g.,* ''infant swing incidents'' changed to ''incidents associated with swings intended for infants'').

Scope. ASTM F2088–20 includes minor wording changes in the scope section (*e.g.,* deleting ''consumer safety'' from ''this consumer safety specification'') to harmonize with the Ad Hoc TG recommendations (Section 1.6).

Referenced Documents. ASTM F2088–20 includes a revised list of referenced documents. ASTM updated the title of Section 2.2 from ''Federal Standards'' to ''Federal Regulations,'' and added a new section 2.3 to include ANSI standards. These revisions are consistent with other ASTM standards and aligns with the Ad Hoc TG recommendations.

General Requirements. ASTM F2088–20 includes several revisions to section 5 to harmonize the wording with the Ad Hoc TG recommendations. These revisions include minor wording changes in the sections on ''Scissoring, Shearing, and Pinching'' (Section 5.5), ''Protective Components'' (Section 5.8), and ''Toys'' (Section 5.10) (*e.g.,* changing ''component'' to ''component(s),'' changing ''must meet'' to ''shall comply with'').

Test Methods. Minor editorial revisions in the test methods section (Section 7) maintain consistency with wording and unit expressions in the rest of the standard and other ASTM standards (*e.g.,* adding a space after the number to change ''68 °F ± 9 °F'' to ''68 °F ± 9 °F,'' changing ''0.040'' to ''0.04,'' and correcting the spelling of ''Gauge''). In addition, ASTM harmonized the ''*Removal of Protective Components Test*'' wording (Section 7.2) with the Ad Hoc TG recommendations. These revisions do not alter the substance of the requirements.

C. Incorporation by Reference

Section 1223.2 of the direct final rule incorporates by reference ASTM F2088–20. The Office of the Federal Register (OFR) has regulations regarding incorporation by reference. 1 CFR part 51. Under these regulations, agencies must discuss, in the preamble to a final rule, ways in which the material the agency incorporates by reference is reasonably available to interested parties, and how interested parties can obtain the material. In addition, the preamble to the final rule must summarize the material. 1 CFR 51.5(b).

In accordance with the OFR regulations, section B. Revisions to ASTM F2088, of this preamble summarizes the major provisions of ASTM F2088–20 that the Commission incorporates by reference into 16 CFR part 1223. The standard is reasonably available to interested parties and interested parties can purchase a copy of ASTM F2088–20 from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959 USA; phone; 610–832–9585; *www.astm.org.* Additionally, until the direct final rule takes effect, a read-only copy of ASTM F2088–20 is available for viewing on ASTM's website at: *https://www.astm.org/CPSC.htm.* Once the rule takes effect, a read-only copy of the standard will be available for viewing on the ASTM website at: *https://www.astm.org/READINGLIBRARY/.* Interested parties can also schedule an appointment to inspect a copy of the standard at CPSC's Division of the Secretariat, U.S. Consumer Product Safety Commission, Room 820, 4330 East West Highway, Bethesda, MD 20814, telephone: 301–504–7479; email: *cpsc-os@cpsc.gov.*

D. Certification

Section 14(a) of the Consumer Product Safety Act (CPSA; 15 U.S.C. 2051–2089) requires manufacturers of products subject to a consumer product safety rule under the CPSA, or to a similar rule, ban, standard, or regulation under any other act enforced by the Commission, to certify that the products comply with all applicable CPSC requirements. 15 U.S.C. 2063(a). Such certification must be based on a test of each product, or on a reasonable testing program, or, for children's products, on tests of a sufficient number of samples by a third party conformity assessment body accredited by CPSC to test according to the applicable requirements. As noted, standards issued under section 104(b)(1)(B) of the CPSIA are ''consumer product safety standards.'' Thus, they are subject to the testing and certification requirements of section 14 of the CPSA.

Because infant swings are children's products, a CPSC-accepted third party conformity assessment body must test samples of the products. Products subject to part 1223 also must comply with all other applicable CPSC requirements, such as the lead content requirements in section 101 of the CPSIA,[8] the phthalates prohibitions in section 108 of the CPSIA [9] and 16 CFR part 1307, the tracking label requirements in section 14(a)(5) of the CPSA,[10] and the consumer registration form requirements in section 104(d) of the CPSIA.[11]

E. Notice of Requirements

In accordance with section 14(a)(3)(B)(iv) of the CPSIA, the Commission previously published a notice of requirements (NOR) for accreditation of third party conformity assessment bodies for testing infant swings. 78 FR 15836 (Mar. 12, 2013). The NOR provided the criteria and process for CPSC to accept accreditation of third party conformity assessment bodies for testing infant swings to 16 CFR part 1223. The NORs for all mandatory standards for durable infant or toddler products are listed in the Commission's rule, ''Requirements Pertaining to Third Party Conformity Assessment Bodies,'' codified in 16 CFR part 1112. *Id.*

ASTM F2088–20 includes revised requirements for testing infant swings. However, these revisions to test requirements do not require additional equipment or test protocols beyond those that already exist in the standard. Accordingly, the revisions do not significantly change the way that third party conformity assessment bodies test these products for compliance with the infant swings standard. Laboratories will begin testing to the new standard when ASTM F2088–20 goes into effect, and the existing accreditations that the Commission has accepted for testing to this standard will cover testing to the revised standard. Therefore, the Commission considers the existing CPSC-accepted laboratories for testing to ASTM F2088–13 to be capable of testing to ASTM F2088–20 as well. Accordingly, the existing NOR for this standard will remain in place, and CPSC-accepted third party conformity assessment bodies are expected to update the scope of the testing laboratories' accreditations to reflect the revised standard in the normal course of renewing their accreditations.

F. Direct Final Rule Process

The Commission is issuing this rule as a direct final rule. Although the Administrative Procedure Act (APA; 5 U.S.C. 551–559) generally requires agencies to provide notice of a rule and

[8] 15 U.S.C. 1278a.

[9] 15 U.S.C. 2057c.

[10] 15 U.S.C. 2063(a)(5).

[11] 15 U.S.C. 2056a(d).

an opportunity for interested parties to comment on it, section 553 of the APA provides an exception when the agency, ''for good cause finds,'' that notice and comment are ''impracticable, unnecessary, or contrary to the public interest.'' *Id.* 553(b)(B). The Commission concludes that when it updates a reference to an ASTM standard that the Commission incorporated by reference under section 104(b) of the CPSIA, notice and comment are not necessary.

Under the process set out in section 104(b)(4)(B) of the CPSIA, when ASTM revises a standard that the Commission has previously incorporated by reference under section 104(b)(1)(B) of the CPSIA, that revision will become the new CPSC standard, unless the Commission determines that ASTM's revision does not improve the safety of the product. Thus, unless the Commission makes such a determination, the ASTM revision becomes CPSC's standard by operation of law. The Commission is allowing ASTM F2088–20 to become CPSC's new standard. The purpose of this direct final rule is to update the reference in the Code of Federal Regulations (CFR) so that it reflects the version of the standard that takes effect by statute. This rule updates the reference in the CFR, but under the terms of the CPSIA, ASTM F2088–20 takes effect as the new CPSC standard for infant swings, even if the Commission does not issue this rule. Thus, public comments would not alter substantive changes to the standard or the effect of the revised standard as a consumer product safety standard under section 104(b) of the CPSIA. Under these circumstances, notice and comment are unnecessary.

In Recommendation 95–4, the Administrative Conference of the United States (ACUS) endorses direct final rulemaking as an appropriate procedure to expedite rules that are noncontroversial and that are not expected to generate significant adverse comments. *See* 60 FR 43108 (Aug. 18, 1995). ACUS recommends that agencies use the direct final rule process when they act under the ''unnecessary'' prong of the good cause exemption in 5 U.S.C. 553(b)(B). Consistent with the ACUS recommendation, the Commission is publishing this rule as a direct final rule, because CPSC does not expect any significant adverse comments.

Unless CPSC receives a significant adverse comment within 30 days of this notification, the rule will become effective on April 3, 2021. In accordance with ACUS's recommendation, the Commission considers a significant adverse comment to be ''one where the commenter explains why the rule would be inappropriate,'' including an assertion challenging ''the rule's underlying premise or approach,'' or a claim that the rule ''would be ineffective or unacceptable without change.'' 60 FR 43108, 43111. As noted, this rule merely updates a reference in the CFR to reflect a change that occurs by statute.

If the Commission receives a significant adverse comment, the Commission will withdraw this direct final rule. Depending on the comment and other circumstances, the Commission may then incorporate the adverse comment into a subsequent direct final rule or publish a notice of proposed rulemaking, providing an opportunity for public comment.

G. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA; 5 U.S.C. 601–612) generally requires agencies to review proposed and final rules for their potential economic impact on small entities, including small businesses, and prepare regulatory flexibility analyses. 5 U.S.C. 603, 604. The RFA applies to any rule that is subject to notice and comment procedures under section 553 of the APA. *Id.* As discussed in section F. Direct Final Rule Process of this preamble, the Commission has determined that notice and the opportunity to comment are unnecessary for this rule. Therefore, the RFA does not apply. CPSC also notes the limited nature of this document, which merely updates the incorporation by reference to reflect the mandatory CPSC standard that takes effect under section 104 of the CPSIA.

H. Paperwork Reduction Act

The current mandatory standard for infant swings includes requirements for marking, labeling, and instructional literature that constitute a ''collection of information,'' as defined in the Paperwork Reduction Act (PRA; 44 U.S.C. 3501–3521). The revised mandatory standard does not alter these requirements. The Commission took the steps required by the PRA for information collections when it adopted 16 CFR part 1223, including obtaining approval and a control number. Because the information collection is unchanged, the revision does not affect the information collection requirements or approval related to the standard.

I. Environmental Considerations

The Commission's regulations provide a categorical exclusion for the Commission's rules from any requirement to prepare an environmental assessment or an environmental impact statement where they ''have little or no potential for affecting the human environment.'' 16 CFR 1021.5(c)(2). This rule falls within the categorical exclusion, so no environmental assessment or environmental impact statement is required.

J. Preemption

Section 26(a) of the CPSA provides that where a consumer product safety standard is in effect and applies to a product, no state or political subdivision of a state may either establish or continue in effect a requirement dealing with the same risk of injury unless the state requirement is identical to the Federal standard. 15 U.S.C. 2075(a). Section 26(c) of the CPSA also provides that states or political subdivisions of states may apply to CPSC for an exemption from this preemption under certain circumstances. Section 104(b) of the CPSIA deems rules issued under that provision ''consumer product safety standards.'' Therefore, once a rule issued under section 104 of the CPSIA takes effect, it will preempt in accordance with section 26(a) of the CPSA.

K. Effective Date

Under the procedure set forth in section 104(b)(4)(B) of the CPSIA, when a voluntary standards organization revises a standard that the Commission adopted as a mandatory standard, the revision becomes the CPSC standard within 180 days of notification to the Commission, unless the Commission determines that the revision does not improve the safety of the product, or the Commission sets a later date in the **Federal Register**. 15 U.S.C. 2056a(b)(4)(B). The Commission is taking neither of those actions with respect to the standard for infant swings. Therefore, ASTM F2088–20 automatically will take effect as the new mandatory standard for infant swings on April 3, 2021, 180 days after the Commission received notice of the revision on October 5, 2020. As a direct final rule, unless the Commission receives a significant adverse comment within 30 days of this notice, the rule will become effective on April 3, 2021.

L. Congressional Review Act

The Congressional Review Act (CRA; 5 U.S.C. 801–808) states that before a rule may take effect, the agency issuing the rule must submit the rule, and certain related information, to each House of Congress and the Comptroller General. 5 U.S.C. 801(a)(1). The CRA submission must indicate whether the rule is a ''major rule.'' The CRA states

that the Office of Information and Regulatory Affairs (OIRA) determines whether a rule qualifies as a ''major rule.''

Pursuant to the CRA, this rule does not qualify as a ''major rule,'' as defined in 5 U.S.C. 804(2). To comply with the CRA, CPSC will submit the required information to each House of Congress and the Comptroller General.

List of Subjects in 16 CFR Part 1223

Consumer protection, Imports, Incorporation by reference, Imports, Infants and children, Law enforcement, Safety, Toys.

For the reasons discussed in the preamble, the Commission amends 16 CFR chapter II as follows:

PART 1223—SAFETY STANDARD FOR INFANT SWINGS

■ 1. Revise the authority citation for part 1223 to read as follows:

Authority: Sec. 104, Pub. L. 110–314, 122 Stat. 3016 (15 U.S.C. 2056a); Sec 3, Pub. L. 112–28, 125 Stat. 273.

■ 2. Revise § 1223.2 to read as follows:

§ 1223.2 Requirements for infant swings.

Each infant swing shall comply with all applicable provisions of ASTM F2088–20, *Standard Consumer Safety Specification for Infant and Cradle Swings,* approved on June 15, 2020. The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain a copy from ASTM International, 100 Barr Harbor Drive, P.O. Box C700, West Conshohocken, PA 19428–2959; phone: (610) 832–9585; *www.astm.org.* A read-only copy of the standard is available for viewing on the ASTM website at *https://www.astm.org/READINGLIBRARY/.* You may inspect a copy at the Division of the Secretariat, U.S. Consumer Product Safety Commission, Room 820, 4330 East West Highway, Bethesda, MD 20814, telephone (301) 504–7479, email: *cpsc-os@cpsc.gov,* or at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

Notification of Temporary Travel Restrictions Applicable to Land Ports of Entry and Ferries Service Between the United States and Mexico

AGENCY: Office of the Secretary, U.S. Department of Homeland Security; U.S. Customs and Border Protection, U.S. Department of Homeland Security.

ACTION: Notification of continuation of temporary travel restrictions.

SUMMARY: This document announces the decision of the Secretary of Homeland Security (Secretary) to continue to temporarily limit the travel of individuals from Mexico into the United States at land ports of entry along the United States-Mexico border. Such travel will be limited to ''essential travel,'' as further defined in this document.

DATES: These restrictions go into effect at 12 a.m. Eastern Standard Time (EST) on January 22, 2021 and will remain in effect until 11:59 p.m. EST on February 21, 2021.

FOR FURTHER INFORMATION CONTACT: Stephanie Watson, Office of Field Operations Coronavirus Coordination Cell, U.S. Customs and Border Protection (CBP) at 202–325–0840.

SUPPLEMENTARY INFORMATION:

Background

On March 24, 2020, DHS published notice of the Secretary's decision to temporarily limit the travel of individuals from Mexico into the United States at land ports of entry along the United States-Mexico border to ''essential travel,'' as further defined in that document.[1] The document described the developing circumstances regarding the COVID–19 pandemic and stated that, given the outbreak and continued transmission and spread of the virus associated with COVID–19 within the United States and globally, the Secretary had determined that the risk of continued transmission and spread of the virus associated with COVID–19 between the United States and Mexico posed a ''specific threat to human life or national interests.'' The Secretary later published a series of notifications continuing such limitations on travel until 11:59 p.m. EST on January 21, 2021.[2]

The Secretary has continued to monitor and respond to the COVID–19 pandemic. As of the week of January 4, there have been over 83.3 million confirmed cases globally, with over 1.8 million confirmed deaths.[3] There have been over 20.7 million confirmed and probable cases within the United States,[4] over 587,000 confirmed cases in Canada,[5] and over 1.4 million confirmed cases in Mexico.[6]

Notice of Action

Given the outbreak and continued transmission and spread of COVID–19 within the United States and globally, the Secretary has determined that the risk of continued transmission and spread of the virus associated with COVID–19 between the United States and Mexico poses an ongoing ''specific threat to human life or national interests.''

U.S. and Mexican officials have mutually determined that non-essential travel between the United States and Mexico poses additional risk of transmission and spread of the virus associated with COVID–19 and places the populace of both nations at increased risk of contracting the virus associated with COVID–19. Moreover, given the sustained human-to-human transmission of the virus, returning to previous levels of travel between the two nations places the personnel staffing land ports of entry between the United States and Mexico, as well as the individuals traveling through these ports of entry, at increased risk of exposure to the virus associated with COVID–19. Accordingly, and consistent with the authority granted in 19 U.S.C. 1318(b)(1)(C) and (b)(2),[7] I have determined that land ports of entry along the U.S.-Mexico border will continue to suspend normal operations and will only allow processing for entry into the United States of those travelers engaged in ''essential travel,'' as defined below. Given the definition of ''essential travel'' below, this temporary alteration in land ports of entry operations should not interrupt legitimate trade between the two nations or disrupt critical supply chains that ensure food, fuel, medicine, and other critical materials reach individuals on both sides of the border.

For purposes of the temporary alteration in certain designated ports of entry operations authorized under 19 U.S.C. 1318(b)(1)(C) and (b)(2), travel through the land ports of entry and ferry terminals along the United States-Mexico border shall be limited to ''essential travel,'' which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the United States;
- Individuals traveling for medical purposes (*e.g.,* to receive medical treatment in the United States);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (*e.g.,* individuals working in the farming or agriculture industry who must travel between the United States and Mexico in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (*e.g.,* government officials or emergency responders entering the United States to support federal, state, local, tribal, or territorial government efforts to respond to COVID–19 or other emergencies);
- Individuals engaged in lawful cross-border trade (*e.g.,* truck drivers supporting the movement of cargo between the United States and Mexico);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the United States; and
- Individuals engaged in military-related travel or operations.

The following travel does not fall within the definition of ''essential travel'' for purposes of this Notification—

- Individuals traveling for tourism purposes (*e.g.,* sightseeing, recreation, gambling, or attending cultural events).

At this time, this Notification does not apply to air, freight rail, or sea travel between the United States and Mexico, but does apply to passenger rail, passenger ferry travel, and pleasure boat travel between the United States and Mexico. These restrictions are

[1] 85 FR 16547 (Mar. 24, 2020). That same day, DHS also published notice of the Secretary's decision to temporarily limit the travel of individuals from Canada into the United States at land ports of entry along the United States-Canada border to ''essential travel,'' as further defined in that document. 85 FR 16548 (Mar. 24, 2020).

[2] *See* 85 FR 83433 (Dec. 22, 2020); 85 FR 74604 (Nov. 23, 2020); 85 FR 67275 (Oct. 22, 2020); 85 FR 59669 (Sept. 23, 2020); 85 FR 51633 (Aug. 21, 2020); 85 FR 44183 (July 22, 2020); 85 FR 37745 (June 24, 2020); 85 FR 31057 (May 22, 2020); 85 FR 22353 (Apr. 22, 2020). DHS also published parallel notifications of the Secretary's decisions to continue temporarily limiting the travel of individuals from Canada into the United States at land ports of entry along the United States-Canada border to ''essential travel.'' *See* 85 FR 83432 (Dec. 22, 2020); 85 FR 74603 (Nov. 23, 2020); 85 FR 67276 (Oct. 22, 2020); 85 FR 59670 (Sept. 23, 2020); 85 FR 51634 (Aug. 21, 2020); 85 FR 44185 (July 22, 2020); 85 FR 37744 (June 24, 2020); 85 FR 31050 (May 22, 2020); 85 FR 22352 (Apr. 22, 2020). Both December notices contained typos with respect to the end date of the extension; as of December 23, 2020, correction notices were pending publication in the **Federal Register**.

[6] *Id.*

[7] 19 U.S.C. 1318(b)(1)(C) provides that ''[n]otwithstanding any other provision of law, the Secretary of the Treasury, when necessary to respond to a national emergency declared under the National Emergencies Act (50 U.S.C. 1601 *et seq.*) or to a specific threat to human life or national interests,'' is authorized to ''[t]ake any . . . action that may be necessary to respond directly to the national emergency or specific threat.'' On March 1, 2003, certain functions of the Secretary of the Treasury were transferred to the Secretary of Homeland Security. *See* 6 U.S.C. 202(2), 203(1). Under 6 U.S.C. 212(a)(1), authorities ''related to Customs revenue functions'' were reserved to the Secretary of the Treasury. To the extent that any authority under section 1318(b)(1) was reserved to the Secretary of the Treasury, it has been delegated to the Secretary of Homeland Security. *See* Treas. Dep't Order No. 100–16 (May 15, 2003), 68 FR 28322 (May 23, 2003). Additionally, 19 U.S.C. 1318(b)(2) provides that ''[n]otwithstanding any other provision of law, the Commissioner of U.S. Customs and Border Protection, when necessary to respond to a specific threat to human life or national interests, is authorized to close temporarily any Customs office or port of entry or take any other lesser action that may be necessary to respond to the specific threat.'' Congress has vested in the Secretary of Homeland Security the ''functions of all officers, employees, and organizational units of the Department,'' including the Commissioner of CBP. 6 U.S.C. 112(a)(3).

temporary in nature and shall remain in effect until 11:59 p.m. EST on February 21, 2021. This Notification may be amended or rescinded prior to that time, based on circumstances associated with the specific threat.[8]

The Commissioner of U.S. Customs and Border Protection (CBP) is hereby directed to prepare and distribute appropriate guidance to CBP personnel on the continued implementation of the temporary measures set forth in this Notification. The CBP Commissioner may determine that other forms of travel, such as travel in furtherance of economic stability or social order, constitute ''essential travel'' under this Notification. Further, the CBP Commissioner may, on an individualized basis and for humanitarian reasons or for other purposes in the national interest, permit the processing of travelers to the United States not engaged in ''essential travel.''

Peter T. Gaynor,

Acting Secretary, U.S. Department of Homeland Security.

19 CFR Chapter I

Notification of Temporary Travel Restrictions Applicable to Land Ports of Entry and Ferries Service Between the United States and Canada

AGENCY: Office of the Secretary, U.S. Department of Homeland Security; U.S. Customs and Border Protection, U.S. Department of Homeland Security.

ACTION: Notification of continuation of temporary travel restrictions.

SUMMARY: This document announces the decision of the Secretary of Homeland Security (Secretary) to continue to temporarily limit the travel of individuals from Canada into the United States at land ports of entry along the United States-Canada border. Such travel will be limited to ''essential travel,'' as further defined in this document.

DATES: These restrictions go into effect at 12 a.m. Eastern Standard Time (EST) on January 22, 2021 and will remain in effect until 11:59 p.m. EST on February 21, 2021.

FOR FURTHER INFORMATION CONTACT: Stephanie Watson, Office of Field Operations Coronavirus Coordination Cell, U.S. Customs and Border Protection (CBP) at 202–325–0840.

SUPPLEMENTARY INFORMATION:

Background

On March 24, 2020, DHS published notice of the Secretary's decision to temporarily limit the travel of individuals from Canada into the United States at land ports of entry along the United States-Canada border to ''essential travel,'' as further defined in that document.[1] The document described the developing circumstances regarding the COVID–19 pandemic and stated that, given the outbreak and continued transmission and spread of the virus associated with COVID–19 within the United States and globally, the Secretary had determined that the risk of continued transmission and spread of the virus associated with COVID–19 between the United States and Canada posed a ''specific threat to human life or national interests.'' The Secretary later published a series of notifications continuing such limitations on travel until 11:59 p.m. EST on January 21, 2021.[2]

The Secretary has continued to monitor and respond to the COVID–19 pandemic. As of the week of January 4, there have been over 83.3 million confirmed cases globally, with over 1.8 million confirmed deaths.[3] There have been over 20.7 million confirmed and probable cases within the United States,[4] over 587,000 confirmed cases in Canada,[5] and over 1.4 million confirmed cases in Mexico.[6]

Notice of Action

Given the outbreak and continued transmission and spread of COVID–19 within the United States and globally, the Secretary has determined that the risk of continued transmission and spread of the virus associated with COVID–19 between the United States and Canada poses an ongoing ''specific threat to human life or national interests.''

U.S. and Canadian officials have mutually determined that non-essential travel between the United States and Canada poses additional risk of transmission and spread of the virus associated with COVID–19 and places the populace of both nations at increased risk of contracting the virus associated with COVID–19. Moreover, given the sustained human-to-human transmission of the virus, returning to previous levels of travel between the two nations places the personnel staffing land ports of entry between the United States and Canada, as well as the individuals traveling through these ports of entry, at increased risk of exposure to the virus associated with COVID–19. Accordingly, and consistent with the authority granted in 19 U.S.C. 1318(b)(1)(C) and (b)(2),[7] I have

[7] 19 U.S.C. 1318(b)(1)(C) provides that ''[n]otwithstanding any other provision of law, the Secretary of the Treasury, when necessary to respond to a national emergency declared under the National Emergencies Act (50 U.S.C. 1601 *et seq.*) or to a specific threat to human life or national interests,'' is authorized to ''[t]ake any . . . action that may be necessary to respond directly to the national emergency or specific threat.'' On March 1, 2003, certain functions of the Secretary of the Treasury were transferred to the Secretary of Homeland Security. *See* 6 U.S.C. 202(2), 203(1). Under 6 U.S.C. 212(a)(1), authorities ''related to Customs revenue functions'' were reserved to the Secretary of the Treasury. To the extent that any authority under section 1318(b)(1) was reserved to the Secretary of the Treasury, it has been delegated to the Secretary of Homeland Security. *See* Treas. Dep't Order No. 100–16 (May 15, 2003), 68 FR 28322 (May 23, 2003). Additionally, 19 U.S.C. 1318(b)(2) provides that ''[n]otwithstanding any other provision of law, the Commissioner of U.S. Customs and Border Protection, when necessary to respond to a specific threat to human life or national interests, is authorized to close temporarily any Customs office or port of entry or take any other lesser action that may be necessary to respond to the specific threat.'' Congress has vested in the Secretary of Homeland Security the ''functions of all officers, employees, and organizational units of

Continued

determined that land ports of entry along the U.S.-Canada border will continue to suspend normal operations and will only allow processing for entry into the United States of those travelers engaged in ''essential travel,'' as defined below. Given the definition of ''essential travel'' below, this temporary alteration in land ports of entry operations should not interrupt legitimate trade between the two nations or disrupt critical supply chains that ensure food, fuel, medicine, and other critical materials reach individuals on both sides of the border.

For purposes of the temporary alteration in certain designated ports of entry operations authorized under 19 U.S.C. 1318(b)(1)(C) and (b)(2), travel through the land ports of entry and ferry terminals along the United States-Canada border shall be limited to ''essential travel,'' which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the United States;
- Individuals traveling for medical purposes (*e.g.,* to receive medical treatment in the United States);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (*e.g.,* individuals working in the farming or agriculture industry who must travel between the United States and Canada in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (*e.g.,* government officials or emergency responders entering the United States to support federal, state, local, tribal, or territorial government efforts to respond to COVID–19 or other emergencies);
- Individuals engaged in lawful cross-border trade (*e.g.,* truck drivers supporting the movement of cargo between the United States and Canada);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the United States; and
- Individuals engaged in military-related travel or operations.

The following travel does not fall within the definition of ''essential travel'' for purposes of this Notification—

- Individuals traveling for tourism purposes (*e.g.,* sightseeing, recreation, gambling, or attending cultural events).

At this time, this Notification does not apply to air, freight rail, or sea travel between the United States and Canada, but does apply to passenger rail, passenger ferry travel, and pleasure boat travel between the United States and Canada. These restrictions are temporary in nature and shall remain in effect until 11:59 p.m. EST on February 21, 2021. This Notification may be amended or rescinded prior to that time, based on circumstances associated with the specific threat.[8]

The Commissioner of U.S. Customs and Border Protection (CBP) is hereby directed to prepare and distribute appropriate guidance to CBP personnel on the continued implementation of the temporary measures set forth in this Notification. The CBP Commissioner may determine that other forms of travel, such as travel in furtherance of economic stability or social order, constitute ''essential travel'' under this Notification. Further, the CBP Commissioner may, on an individualized basis and for humanitarian reasons or for other purposes in the national interest, permit the processing of travelers to the United States not engaged in ''essential travel.''

[TD 9946]

RIN 1545–BO67

Denial of Deduction for Certain Fines, Penalties, and Other Amounts; Related Information Reporting Requirements

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations providing guidance on section 162(f) of the Internal Revenue Code (Code), as amended in 2017, concerning the deduction of certain fines, penalties, and other amounts. This document also contains final regulations providing guidance relating to the information reporting requirements under new section 6050X of the Code with respect to those fines, penalties, and other amounts. The final regulations affect taxpayers that pay or incur amounts to, or at the direction of, governments, governmental entities or certain nongovernmental entities treated as governmental entities relating to the violation of any law or investigations or inquiries by such governments, governmental entities, or nongovernmental entities into the potential violation of any law. The final regulations also affect governments, governmental entities, and nongovernmental entities subject to the related reporting requirements.

DATES:

Effective date: These regulations are effective on January 14, 2021.

Applicability dates: For dates of applicability, see §§ 1.162–21(g) and 1.6050X–1(g).

FOR FURTHER INFORMATION CONTACT: Concerning the regulations on amended section 162(f), Sharon Y. Horn (202) 317–4426; concerning the information reporting requirement, Nancy L. Rose (202) 317–5147. The phone numbers above may also be reached by individuals who are deaf or hard of hearing, or who have speech disabilities, through the Federal Relay Service toll-free at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

Background

Prior to its amendment in 2017, section 162(f) disallowed an ordinary and necessary business expense deduction under section 162(a) for any fine or similar penalty paid to a government for the violation of any law. On February 20, 1975, the Treasury Department and the IRS issued final regulations under the prior version of section 162(f) (TD 7345, 40 FR 7437), which were amended on July 11, 1975 (T.D. 7366, 40 FR 29290) (together the 1975 regulations).

Section 162(f) was amended by section 13306(a) of Public Law 115–97, 131 Stat. 2054 (2017), commonly referred to as the Tax Cuts and Jobs Act (TCJA). Section 6050X was added to the Code by section 13306(b) of the TCJA.

As amended by the TCJA, the general rule of section 162(f)(1) provides that no deduction otherwise allowable under chapter 1 of the Code (chapter 1) shall be allowed for any amount paid or incurred (whether by suit, agreement, or otherwise) to, or at the direction of, a government or governmental entity in relation to the violation of any law or the investigation or inquiry by such government or governmental entity into the potential violation of any law. Section 162(f)(5) describes certain self-regulating nongovernmental entities that are treated as governmental entities for

purposes of section 162(f). As used in this preamble, the term ''governmental entities'' includes nongovernmental entities treated as governmental entities under section 162(f)(5).

Section 162(f)(2) provides an exception to the general disallowance rule in section 162(f)(1) for certain amounts paid or incurred for restitution, remediation, or to come into compliance with a law. Under section 162(f)(2)(A)(i) and (ii), section 162(f)(1) does not apply to amounts that (i) the taxpayer establishes were paid or incurred as restitution (including remediation of property) or to come into compliance with a law (establishment requirement), and (ii) are identified in a court order (order) or settlement agreement (agreement) as restitution, remediation, or amounts paid or incurred to come into compliance with a law (identification requirement). Section 162(f)(2)(B) provides that amounts paid for restitution, remediation, and to come into compliance with a law do not include any amount paid or incurred as reimbursement to a government or governmental entity for the costs of any investigation or litigation.

Section 162(f)(3) provides an exception to the general rule for amounts paid or incurred related to private party suits and section 162(f)(4) provides an exception for certain taxes due.

Section 6050X(a)(1) and 6050X(a)(2)(A) requires the appropriate official of any government or governmental entity involved in a suit or agreement described in section 6050X(a)(2)(A)(i) to file an information return if the aggregate amount involved in all orders or agreements with respect to the violation, investigation, or inquiry is $600 or more. Section 6050X(a)(2)(B) authorizes the Secretary of the Treasury or his delegate (Secretary) to adjust the threshold amount for filing the information return as necessary to ensure the efficient administration of the internal revenue laws. Pursuant to section 6050X(a)(1), the information return must set forth (1) the amount required to be paid as a result of the order or agreement to which section 162(f)(1) applies; (2) any amount required to be paid as a result of the order or agreement that constitutes restitution or remediation of property; and (3) any amount required to be paid as a result of the order or agreement for the purpose of coming into compliance with a law that was violated or involved in the investigation or inquiry.

Section 6050X(a)(3) provides that the government or governmental entity shall file the information return at the time the agreement is entered into, as determined by the Secretary. Section 6050X(b) requires the government or governmental entity to furnish to each person who is a party to the suit or agreement a written statement, at the time the information return is filed with the IRS, that includes (1) the name of the government or entity and (2) the information submitted to the IRS.

Under section 13306(a)(2) and (b)(3) of the TCJA, the amendments to section 162(f) and new section 6050X apply to amounts paid or incurred on or after December 22, 2017, the date of enactment of the TCJA. However, they do not apply to amounts paid or incurred under any binding order issued or agreement entered into, before December 22, 2017, and, if such order or agreement requires court approval, the required approval is obtained before December 22, 2017.

On May 13, 2020, the Internal Revenue Service published a notice of proposed rulemaking (REG–104591–18) in the **Federal Register** (85 FR 28524) providing guidance on the deduction disallowance rules in section 162(f) and the associated reporting requirements in section 6050X. No public hearing on the proposed regulations was requested and accordingly no public hearing was held.

The Treasury Department and the IRS received written comments in response to the proposed regulations. All comments were considered and are available at *www.regulations.gov* or upon request. After full consideration of the comments received on the proposed regulations, this Treasury decision adopts the proposed regulations with modifications in response to such comments as described in the Summary of Comments and Explanation of Revisions.

Summary of Comments and Explanation of Revisions

Most of the comments addressing the proposed regulations are summarized in this Summary of Comments and Explanation of Revisions. However, comments merely summarizing or interpreting the proposed regulations, recommending statutory revisions, or addressing issues that are outside the scope of the final regulations are not discussed.

Part I of this Summary of Comments and Explanation of Revisions addresses § 1.162–21 and Part II addresses § 1.6050X–1.

I. Denial of Deduction for Certain Fines, Penalties, and Other Amounts

A. General Rule

The proposed regulations revise § 1.162–21 and provide operational and definitional guidance concerning the application of section 162(f), as amended by the TCJA. The proposed regulations provide generally that a taxpayer may not take a deduction under any provision of chapter 1 for amounts (1) paid or incurred by suit, agreement, or otherwise; (2) to, or at the direction of, a government or governmental entity; (3) in relation to the violation, or investigation or inquiry into the potential violation, of any civil or criminal law. The proposed regulations also describe an exception to the general rule, under section 162(f)(2), which allows a deduction for certain amounts identified in the order or agreement as restitution, remediation, or paid or incurred to come into compliance with a law and the taxpayer establishes that the amount was paid or incurred for the purpose identified.

The final regulations provide generally that a taxpayer may not take a deduction under any provision of chapter 1 for amounts (1) paid or incurred by suit, agreement, or otherwise; (2) to, or at the direction of, a government or governmental entity; (3) in relation to the violation, or investigation or inquiry by such government or governmental entity into the potential violation, of any civil or criminal law. This general rule applies whether or not the taxpayer admits guilt or liability or pays the amount imposed for any other reason, including to avoid the expense or uncertain outcome of an investigation or litigation. An admission of guilt or liability is not necessary because section 162(f)(1) contemplates a broader disallowance, as demonstrated by the disallowance of any amount paid or incurred, to, or at the direction of, a government or governmental entity in relation to the ''investigation or inquiry'' into the ''potential violation of any law.''

1. Suit, Agreement, or Otherwise

Under the proposed regulations, suit, agreement, or otherwise includes, but is not limited to, settlement agreements; non-prosecution agreements; deferred prosecution agreements; judicial proceedings; administrative adjudications; decisions issued by officials, committees, commissions, or boards of a government or governmental entity; and any legal actions or hearings in which a liability for the taxpayer is determined or pursuant to which the taxpayer assumes liability.

Commenters asked that the final regulations exclude administrative and certain other categories of proceedings from the definition of suit, agreement, or otherwise. The final regulations do not adopt this recommendation because the

statute's use of the phrase ''suit, agreement, or otherwise'' indicates that Congress intended for section 162(f)(1) to apply broadly to both formal legal proceedings as well as other less formal proceedings.

The preamble to the proposed regulations under section 6050X explains that an order or agreement is treated as binding under applicable law even if all appeals have not been exhausted with respect to the suit, agreement, or otherwise. A commenter recommended that the final regulations provide that the same meaning applies for the term ''binding'' order or agreement under section 162(f). The final regulations generally adopt this recommendation.

2. To, or at the Direction of, a Government or Governmental Entity

One commenter asked for clarification that, if a deduction is otherwise allowable under chapter 1, section 162(f)(1) does not disallow a deduction for amounts paid for the taxpayer's own legal fees and related expenses incurred in defending a prosecution or other action or proceeding, including an investigation or inquiry into a potential violation of any law. Legal fees and other expenses, such as stenographic and printing charges, paid or incurred in the defense of a prosecution or civil action arising from a violation of any law, or an investigation or inquiry into a potential violation of any law, are not amounts paid or incurred to, or at the direction of, a government or governmental entity. Thus it is clear that section 162(f)(1) does not disallow a deduction for such amounts, and there is no need to clarify this rule in final regulations.

The proposed regulations provide a definition of ''government or governmental entity.'' The definition in the final regulations has been reorganized to provide a definition of a government in § 1.162–21(e)(1) and to provide a definition of a ''governmental entity'' in § 1.162–21(e)(2). The definitions are based on the definition in the proposed regulations but clarify that a political subdivision of a government includes a local government unit. No comments were received on the definition of ''government or governmental entity'' in the proposed regulations.

The proposed regulations define a nongovernmental entity treated as a governmental entity as an entity that exercises self-regulatory powers (including imposing sanctions) in connection with a qualified board or exchange, as defined in section 1256(g)(7), or exercises self-regulatory powers, including adopting, administering, or enforcing laws and imposing sanctions, as part of performing an essential governmental function. The final regulations revise the definition to clarify that self-regulatory powers include enforcing rules, not laws. A commenter recommended that the definition of ''essential governmental function'' under section 115 should apply to section 162(f)(5). The final regulations do not adopt this recommendation because section 115 does not define the term ''essential governmental function.'' The final regulations clarify that a governmental entity includes a nongovernmental entity treated as a governmental entity.

3. Violation of Any Law

Commenters asked that the final regulations provide a definition of a ''violation of any law.'' The final regulations do not adopt this recommendation because they are intended to provide broad rules of general application based on the underlying principles of section 162(f) rather than narrow rules with limited application. The final regulations provide several examples to illustrate the application of section 162(f) to violations of any law.

Commenters also requested clarification that ''technical violations'' of any law, such as vendor overcharge errors remedied in the ordinary course of business, are not violations of any law. The commenters did not further define what constitutes a ''technical violation.'' Without a more comprehensive definition, the commenters' requests may be inconsistent with the general rule in the final regulations. Therefore, the final regulations do not adopt this comment.

Commenters recommended that the final regulations clarify that the phrase ''in relation to the violation of any law or the investigation or inquiry by such government or [governmental] entity into the potential violation of any law'' do not apply to a government or governmental entity enforcing its legal rights, including defending against claims, as a private party. The Treasury Department and the IRS agree that, in general, unless a government contracting or similar statute provides otherwise, a government's recovery of vendor overcharge errors are in the nature of private party recoveries and not payments made to, or at the direction of, a government or governmental entity in relation to the violation of any law or the investigation or inquiry in to the potential violation of any law. Similarly, as discussed with respect to private party suits in Part I.B.6 of this Summary of Comments and Explanation of Revisions, a violation of any law does not include any order or agreement in a suit in which a government or governmental entity enforces rights as a private party.

Commenters asked the Treasury Department and the IRS how section 162(f) applies to amounts paid or incurred pursuant to certain statutes that contain provisions that may apply without any finding of a violation of law, such as the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA). CERCLA contains cleanup requirements and reimbursement provisions that generally apply even though there has been no violation of law. CERCLA also contains penalty provisions for specific violations of law. Although section 162(f) and the final regulations generally will not apply to CERCLA cleanup requirements and reimbursements required to be paid or incurred by provisions that apply without any violation of law, section 162(f) and the final regulations will apply to penalties required to be paid or incurred for violations of law, including penalties required to be paid or incurred by reason of a violation of specific CERCLA provisions.

4. Investigation or Inquiry Into the Potential Violation of Any Law

The Treasury Department and the IRS received several requests for additional guidance concerning ''the investigation or inquiry by [a] government or [governmental] entity into the potential violation of any law.'' Commenters requested that the final regulations: (1) Provide that an investigation or inquiry by such government into the potential violation of any law does not include a routine investigation, inquiry, audit, review, or inspection; (2) clarify when a routine investigation, inquiry, audit, review, or inspection ends and a non-routine investigation or inquiry begins; (3) clarify whether payments related to an investigation or inquiry are deductible if the investigation or inquiry ends without a finding of a violation of any law; and (4) provide examples of routine investigations, inquiries, audits, reviews, or inspections that are not non-routine investigations or inquiries. In addition, some of the commenters requested guidance that is unique to an industry or a statute.

The Treasury Department and the IRS agree that, in general, section 162(f)(1) does not disallow a deduction for amounts paid or incurred in connection with investigations or inquiries of regulated businesses or industries

conducted in the ordinary course of business if the payment is otherwise deductible as an ordinary and necessary business expense. Accordingly, the final regulations provide, in general, that amounts paid or incurred for routine investigations or inquiries, such as audits or inspections, required to ensure compliance with rules and regulations applicable to the business or industry, which are not related to any evidence of wrongdoing or suspected wrongdoing, are not amounts paid or incurred relating to the potential violation of any law. Therefore, section 162(f)(1) will not apply to disallow an otherwise deductible ordinary and necessary business expense for amounts paid or incurred for these routine investigations or inquiries. Examples to illustrate the application of this rule are provided in the final regulations.

In contrast, section 162(f)(1) explicitly disallows a deduction for amounts paid or incurred for an investigation or inquiry by the government or governmental entity relating to the potential violation of any law. Therefore, the final regulations do not adopt the commenters' recommendation that section 162(f)(1) does not apply to amounts paid or incurred where, at the conclusion of the investigation or inquiry, there is no finding of wrongdoing, because the recommendation is inconsistent with section 162(f)(1).

The final regulations clarify that the investigation or inquiry must be one that is conducted by the government or governmental entity. Examples to illustrate the application of this rule are provided in the final regulations.

5. Fine or Penalty

The proposed regulations disallow a deduction for payments made, at the taxpayer's election, in lieu of a fine or penalty. No comments were received regarding this provision and it is retained in the final regulations. One commenter asked that the final regulations adopt a definition for ''fine or penalty,'' and expressly state that both are not deductible. Although the final regulations do not provide a definition of ''fine or penalty,'' they provide that an amount that is paid or incurred in relation to the violation of any civil or criminal law includes a fine or penalty.

B. Exception to General Rule

Section 162(f)(2) provides an exception to the general disallowance rule for certain amounts identified in the order or agreement as, and established by the taxpayer to be, paid or incurred for restitution or remediation, or to come into compliance with a law. The final regulations provide definitions and other guidance on the operation of this exception.

1. Restitution and Remediation

a. General

The proposed regulations provide that an amount is paid or incurred for restitution or remediation if it restores, in whole or in part, the person, as defined in section 7701(a)(1); the government; the governmental entity; or property harmed by the violation or potential violation of any law. Commenters requested clarification as to what comprises restitution or remediation and requested modifications to the proposed definitions. A commenter recommended that the final regulations distinguish between civil and criminal restitution and disallow the deduction for amounts paid as criminal restitution. The final regulations do not adopt this rule because section 162(f)(2) does not distinguish between civil and criminal restitution and applies to ''restitution (including remediation of property) for damage or harm which was or may be caused by the violation of *any* law or the potential violation of *any* law.'' Emphasis added. Nonetheless, it may be harder for a taxpayer to establish that an amount paid is restitution in the criminal context because of the punitive purpose underlying most criminal liability.

b. Restitution or Remediation of the Environment

One commenter asked whether the definition of ''property'' for which restitution or remediation may be provided includes the environment. Another commenter noted that restitution or remediation cannot redress irreparable harms to the environment or natural resources, such as, killing wildlife or destroying a species or an ecosystem caused by the violation of any law. The commenter recommended that the final regulations provide a special restitution and remediation rule to address amounts paid or incurred for irreparable harm to the environment, natural resources, or wildlife. The Treasury Department and the IRS agree, provided the identification and establishment requirements are met and the restitution or remediation has a strong nexus or connection to the harm to the environment, natural resources, or wildlife that the taxpayer has caused or is alleged to have caused. The final regulations revise the definition of ''*restitution, remediation of property, and amounts paid to come into compliance with a law*'' to clarify that, if otherwise deductible under chapter 1, an amount is paid or incurred for restitution or remediation of the environment, wildlife, or natural resources if it is paid or incurred for the purpose of conserving soil, air, or water resources, protecting or restoring the environment or an ecosystem, improving forests, or providing a habitat for fish, wildlife, or plants, and has the requisite nexus with the harm that the taxpayer has caused or is alleged to have caused. Such amounts may include payments described in § 1.162–21(e)(4)(A), to be used exclusively for the restitution or remediation of a harm to the environment, wildlife, or natural resources that the taxpayer has caused or is alleged to have caused or paid to a segregated fund or account established by, or at the direction of, the government or governmental entity for the restitution or remediation of harm to the environment, wildlife, or natural resources that the taxpayer has caused or is alleged to have caused, provided, pursuant to the order or agreement, the amounts are not disbursed to the general account of the government or governmental entity for general enforcement efforts or other discretionary purposes.

c. Disgorgement or Forfeiture

Under the proposed regulations, the section 162(f)(2) exception to the general deduction disallowance rule does not apply to forfeiture or disgorgement. Therefore, the proposed regulations treat any amount paid or incurred as forfeiture or disgorgement as, per se, disallowed under section 162(f)(1). To support excluding disgorgement from the definition of restitution, remediation, or amounts paid to come into compliance with a law, the preamble to the proposed regulations quote *Kokesh* v. *Securities and Exchange Commission,* 137 S. Ct. 1635, 1643 (2017) (''[t]he primary purpose of disgorgement orders is to deter violations of the securities laws by depriving violators of their ill-gotten gains' ''). In *Kokesh,* the Supreme Court determined that disgorgement, when imposed as a sanction for violating a Federal securities law, constitutes a penalty under the related five-year statute of limitations because disgorgement is imposed to deter violations of securities laws by depriving violators of their ill-gotten gains and because the funds are dispersed to the United States Treasury to redress a wrong to the public at large caused by the violation. *Kokesh,* 137 S. Ct. at 1642–44. However, in *Kokesh,* the

Supreme Court recognized that disgorgement may serve a compensatory purpose as well (''wrong sought to be redressed is . . . a wrong to the individual;'' ''[s]ome disgorged funds are paid to victims''). *Id.*

To support excluding forfeiture from the definition of restitution, remediation, or amounts paid to come into compliance with a law, the preamble to the proposed regulations quotes *Nacchio* v. *United States,* 824 F.3d 1370, 1379 (Fed. Cir. 2016) (''[w]hile restitution seeks to make victims whole by reimbursing them for their losses, forfeiture is meant to punish the defendant by transferring his ill-gotten gains to the United States Department of Justice.'') In *Nacchio,* the United States Court of Appeals for the Federal Circuit disallowed the taxpayer's deduction for the amount of mandatory forfeiture pursuant to a criminal conviction for insider trading, even though the government, in its discretion, subsequently used the forfeited funds to compensate victims.

Several commenters asked the Treasury Department and the IRS to reconsider the rule in the proposed regulations, which excludes disgorgement and forfeiture from the definition of ''restitution, remediation, and coming into compliance.'' One commenter explained the exclusion is contrary to the expressed intent of Congress because the statute provides an exception to the disallowance rule of section 162(f)(1) for restitution and that, in *Kokesh,* the Supreme Court stated, ''[g]enerally, disgorgement is a form of '[r]estitution measured by the defendant's wrongful gain.'' *Kokesh,* 137 S. Ct. at 1640. Commenters noted that, in *Liu* v. *Securities and Exchange Commission,* 140 S. Ct. 1936 (2020), which was decided after the publication of the proposed regulations, the Supreme Court recognized that, amounts paid through disgorgement that do not exceed the wrongdoer's net profits and that are awarded to individual victims may constitute an equitable remedy. Commenters also noted that, in *Liu,* the Supreme Court expressly declined to answer whether under *Kokesh* disgorgement necessarily constitutes a penalty. *Liu,* 140 S. Ct. at 1946.

In consideration of the comments submitted with respect to disgorgement and the Supreme Court's decision in *Liu,* the final regulations will not treat disgorgement of net profits as, per se, nondeductible under section 162(f)(1). Instead, taxpayer's claim for a deduction for amounts paid or incurred through disgorgement will not be disallowed if the amount is otherwise deductible under chapter 1; the order or agreement identifies the payment, not in excess of net profits, as restitution, remediation, or an amount paid to come into compliance with a law; the taxpayer establishes that the amount was paid as restitution, remediation, or an amount paid to come into compliance with a law; and the origin of the taxpayer's liability is restitution, remediation, or an amount paid to come into compliance with a law. However, amounts paid or incurred through disgorgement will be disallowed if, pursuant to the order or agreement, the amounts are disbursed to the general account of the government or governmental entity for general enforcement efforts or other discretionary purposes. The final regulations provide an example to illustrate the application of section 162(f) to disgorgement.

Commenters also requested that the Treasury Department and the IRS reconsider the rule in the proposed regulations that excludes forfeiture from the definition of ''restitution, remediation, and coming into compliance,'' but did not address forfeiture independently from their discussion of disgorgement. Virtually all states have some form of asset recovery legislation and the United States Code contains many forfeiture provisions. Because the final regulations cannot provide specific rules about the application of section 162(f) to every asset recovery statute, the final regulations will not treat forfeiture of net profits as, per se, nondeductible under section 162(f)(1). Instead, taxpayer's claim for a deduction for an amount paid or incurred through forfeiture will not be disallowed if the amount is otherwise deductible under chapter 1; the order or agreement identifies the payment, not in excess of net profits, as restitution, remediation, or an amount paid to come into compliance with a law; the taxpayer establishes that the amount was paid as restitution, remediation, or an amount paid to come into compliance with a law; and the origin of the taxpayer's liability is restitution, remediation, or an amount paid to come into compliance with a law. However, amounts paid or incurred through forfeiture will be disallowed if, pursuant to the order or agreement, the amounts are disbursed to the general account of the government or governmental entity for general enforcement efforts or other discretionary purposes. The final regulations provide an example to illustrate the application of section 162(f) to forfeiture.

d. Payment to a Fund

Under the proposed regulations, restitution, remediation, and amounts paid to come into compliance with a law do not include any amount paid or incurred to an entity; to a fund, including a restitution, remediation, or other fund; to a group; or to a government or governmental entity, to the extent it was not harmed by the taxpayer's violation or potential violation of a law. Commenters asked that the Treasury Department and the IRS reconsider this rule. In consideration of the comments, the final regulations remove the per se exclusion. However, the final regulations provide that restitution and remediation do not include amounts paid or incurred pursuant to an order or agreement to the general account or treasury of the government or governmental entity for general enforcement efforts or other discretionary purposes or amounts paid or incurred that do not meet the requirements of § 1.162–21(e)(4)(i). In addition, the final regulations provide that if amounts paid or incurred pursuant to an order or agreement to an entity, fund, group, or government or governmental entity are subsequently returned to the taxpayer, the taxpayer will be required to include those amounts in income under the tax benefit rule.

Several commenters noted that restitution funds may not be exhausted if, for example, there are unclaimed amounts or when less than the entire fund is required to be used to make harmed parties whole. One commenter recommended that the final regulations provide an example to illustrate that when unclaimed amounts revert to a government or governmental entity's general account the nature of those amounts does not change as long as it was reasonably expected, at the time the taxpayer made the payment to the fund, that the amount would be used for restitution payments to harmed parties. Although the final regulations do not provide this example, the Treasury Department and the IRS generally agree that, if the order or agreement identifies the payment to a fund, described in § 1.162–21(e)(4)(A) or (e)(4)(B), as restitution or remediation, and the taxpayer establishes that it made the payment to a fund for the purpose identified, for example, by providing the canceled check making the payment to the fund, a deduction will not be disallowed if, after the taxpayer makes the payment, the amount paid to the fund is not used for the purpose identified as long as the amount does

not revert to the taxpayer or for the benefit of the taxpayer.

2. Coming Into Compliance With a Law

The proposed regulations provide that an amount is paid or incurred to come into compliance with a law by performing specific services, taking a specific corrective action, providing specific property, or a combination thereof. The final regulations also list amounts that will not be treated as paid or incurred to come into compliance with a law. The final regulations clarify that the services performed, actions taken, and the provision of property must be done to come into compliance with the law that has been violated, or potentially violated.

One commenter requested that the final regulations treat amounts paid or incurred pursuant to an order or agreement to upgrade equipment or property to a higher standard than required by law as coming into compliance with a law. The final regulations modify an example in the proposed regulations to clarify that if an order or agreement requires a taxpayer to come into compliance with a law and the taxpayer elects to upgrade equipment or property to a higher than required standard, any amount paid or incurred in excess of the amount paid or incurred to come into compliance with a law will not be disallowed by section 162(f)(1) or the related final regulations because it is not an amount paid or incurred to, or at the direction of, a government or governmental entity in relation to the violation of any law or the investigation or inquiry into the potential violation of any law.

Another commenter requested that the final regulations define the class of services and actions that qualify as having been made to come into compliance with a law under section 162(f)(2)(A)(i)(II). The final regulations do not adopt this recommendation because they are intended to provide broad rules of general application based on the underlying principles of section 162(f) rather than narrow rules with limited application that risk excluding certain services or actions. The commenter also suggested that the government or governmental entity not be required to verify the accuracy of the amount expended by a taxpayer to perform the activities to come into compliance. The regulations do not require the government or governmental entity to verify the accuracy of the amount expended by a taxpayer to perform the activities to come into compliance.

3. Identification Requirement

Section 162(f)(2)(A)(ii) requires an order or agreement to identify an amount paid or incurred as restitution, remediation, or to come into compliance with a law. Under the proposed regulations, an order or agreement identifies a payment by stating the nature of, or purpose for, each payment each taxpayer is obligated to pay and the amount of each payment identified.

To satisfy the identification requirement, the proposed regulations require the order or agreement to specifically state the amount of the payment and that the payment constitutes restitution, remediation, or an amount paid to come into compliance with a law. The proposed rule provides that the identification requirement may be met if the order or agreement uses a different form of the requisite words, such as ''remediate'' or ''comply with a law.''

The Treasury Department and the IRS received several recommendations and requests for clarification regarding how orders or agreements may meet the identification requirement when the payment amount is not identified. One commenter suggested that, if the total amount to be paid is known at the time the agreement is entered into or the order is issued, the order or agreement must identify separately the amount to be paid as restitution, remediation, or to come into compliance with a law in order to meet the identification requirement. In contrast, several other commenters asked whether the identification requirement may be met if the order or agreement identifies the total payment as restitution, remediation, or paid to come into compliance with a law without allocating the payment amount among ''restitution,'' ''remediation,'' and ''coming into compliance.'' Some commenters expressed the concern that it may not be possible to satisfy the identification requirement in an order or agreement that imposes lump-sum judgments or settlements, involves multiple taxpayers, or multiple damage awards, because the order or agreement may not segregate the amounts to be paid as restitution, remediation, or to come into compliance with a law from the disallowed amounts, or allocate the payments among the multiple taxpayers.

The final regulations do not adopt a rule that a total payment amount must be allocated in an order or agreement among ''restitution,'' ''remediation,'' and/or ''coming into compliance'' in order to meet the identification requirement under section 162(f)(2)(A)(ii) because it could be burdensome on governments and governmental entities and taxpayers and would be difficult for the IRS to administer. Instead, the final regulations modify the proposed rule for payment amounts not identified so that it applies to orders or agreements that impose lump-sum payment judgments for ''restitution, remediation, and coming into compliance,'' or that involve multiple taxpayers or multiple damage awards. The payment amount not identified rule provides that the identification requirement may be met even if the order or agreement does not allocate the total lump-sum payment amount or multiple damage award among restitution, remediation, or to come into compliance or allocate the total payment among multiple taxpayers. The final regulations also clarify that the identification requirement may be met even if the order or agreement does not provide an estimated payment amount.

Several commenters asked for clarification about how a taxpayer may meet the identification requirement. Consistent with section 162(f)(2)(A)(ii), the final regulations provide that the order or agreement, not the taxpayer, must meet the identification requirement with language specifically stating, or describing, that the amount will be paid or incurred as restitution, remediation, or to come into compliance with a law.

Under the proposed regulations, the identification requirement is presumed to be met if an order or agreement specifically states that the payment, and the amount of the payment, constitutes restitution, remediation, or an amount paid to come into compliance with a law. Commenters requested that the final regulations adopt a more permissive rule pursuant to which the identification requirement is presumed to be met if the order or agreement uses words other than ''restitution,'' ''remediation'' or ''remediate,'' and ''come into compliance'', or ''comply.'' In addition, a commenter also asked for a more permissive rule if an order or agreement is in a foreign language. The final regulations provide that the identification requirement is met, not presumed to be met, if the order or agreement specifically states that the payment constitutes restitution, remediation, or an amount paid to come into compliance with a law. In response to the comments, the final regulations also provide a similar result if the order or agreement uses a different form of the required words, such as, ''remediate'' or ''comply with a law.'' An order or agreement in a foreign language may meet the identification requirement if

the taxpayer provides a complete and accurate certified English translation of the order or agreement that describes the nature and purpose of the payment using the foreign language equivalent of restitution, remediation, or coming into compliance with the law.

An order or agreement will also meet the identification requirement, despite not using the words ''restitution,'' ''remediation,'' ''remediate,'' ''come into compliance'', or ''comply,'' if the nature and purpose of the payment, as described in the order or agreement, are clearly and unambiguously to restore the injured party or property or to correct the non-compliance. The final regulations provide that an order or agreement will also meet the identification requirement if the order or agreement describes the damage done, harm suffered, or manner of noncompliance with a law, and describes the action required of the taxpayer to (i) restore, in whole or in part, the party, property, environment, wildlife, or natural resources harmed, injured, or damaged by the violation or potential violation of that law or (ii) to perform services, take action, provide property, or doing any combination thereof to come into compliance with that law.

The proposed regulations provide that the IRS may challenge an order or agreement's identification of the payment amount as restitution, remediation, or made to come into compliance with a law for the purposes of meeting the identification requirement. One commenter recommended that a substantive challenge to the characterization of a payment would more appropriately fit under the establishment requirement, rather than under the identification requirement. To address this comment, the identification requirement in the final regulations does not include a rebuttable presumption.

4. Establishment Requirement

Section 162(f)(2)(A)(i) requires that a taxpayer establish that an amount was paid as restitution or remediation, or that the amount was paid to come into compliance with a law. The proposed regulations provide that the taxpayer may satisfy the establishment requirement by providing documentary evidence (1) that the taxpayer was legally obligated to pay the amount the order or agreement identified as restitution, remediation, or to come into compliance with a law; (2) of the amount paid or incurred; and (3) of the date on which the amount was paid or incurred. A commenter recommended that the final regulations clarify what the taxpayer must prove to meet the establishment requirement. The commenter also advised that it would be more appropriate for the IRS to challenge the characterization of the payment amount as restitution, remediation, or made to come into compliance with a law under the establishment requirement rather than under the identification requirement. The final regulations clarify that the establishment requirement is met if the documentary evidence submitted by the taxpayer proves that the taxpayer was legally obligated to pay the amount identified in the order or agreement as restitution, remediation, or to come into compliance with a law and that it was paid or incurred for the nature and purpose identified.

If the order or agreement identifies a lump sum payment or a multiple damage award that includes some combination of restitution, remediation, and coming into compliance with a law, the taxpayer must establish the exact amount paid or incurred for each purpose. Likewise, if an order or agreement involves multiple taxpayers, each taxpayer must establish the amount that taxpayer paid or incurred as restitution, remediation, or to come into compliance.

The proposed regulations provided a non-exhaustive list of documents that taxpayers may use to satisfy the establishment requirement. Commenters requested that the final regulations include additional examples of such documents. The final regulations expand the list of documentary evidence that may be used to meet the establishment requirement. The taxpayer may be able to use documentary evidence in a foreign language to satisfy the establishment requirement if the taxpayer provides a complete and accurate certified English translation of the documentary evidence.

5. Information Return May Not Satisfy the Identification Requirement or the Establishment Requirement

The proposed regulations provide that reporting of the amount by a government or governmental entity under section 6050X does not satisfy the identification requirement or the establishment requirement. A commenter requested that the final regulations provide that a government or governmental entity's submission of an information return under section 6050X can satisfy the identification requirement under section 162(f)(2)(A)(ii) and/or the establishment requirement under section 162(f)(2)(A)(i). The final regulations do not adopt this recommendation. The reporting requirement imposed by section 6050X is for tax administration purposes and does not serve as documentation that the taxpayer has met the identification requirement or the establishment requirement. Therefore, the taxpayer may not use the information reported on the Form 1098–F to satisfy the identification requirement or the establishment requirement.

6. Private Party Suit

Under section 162(f)(3), the general rule that disallows a deduction does not apply to any amount paid or incurred pursuant to an order in a suit in which no government or governmental entity is a party. Like the proposed regulations, the final regulations clarify that section 162(f)(1) does not apply to any amount paid or incurred by reason of any order or agreement in a suit in which no government or governmental entity is a party. A commenter asked for clarification in the final regulations that section 162(f)(1) does not apply to any amount paid or incurred by reason of any order or agreement in a suit in which a government or governmental entity enforces rights as a private party. For example, payments pursuant to contract disputes that are not due to fraud or other potentially illegal activity wherein the government or governmental entity enforces its rights as a private party contracting for goods and/or services, and not in its enforcement, regulatory, or administrative capacity, generally are not payments made at the direction of a government or governmental entity. The final regulations generally adopt this recommendation. An example has been provided in the final regulations to illustrate the application of this rule.

A commenter asked for clarification about the application of section 162(f) to qui tam cases brought by private citizens on behalf of a government or governmental entity. The final regulations do not adopt a single rule concerning qui tam cases, but certain principles apply to determine whether a deduction for the amounts paid or incurred will be allowed. In general, a government or governmental entity is the real party in interest in the suit and receives any funds paid pursuant to the order or agreement, including any share ultimately paid by the government or governmental entity to the relator, whether or not the government or governmental entity intervenes in the suit. Accordingly, any amount paid or incurred to a government or governmental entity as a result of the

suit will likely be disallowed unless an exception to section 162(f)(1) applies.

7. Pre and Postjudgment Interest

A commenter asked whether section 162(f)(1) disallows a deduction for prejudgment and postjudgment interest. Section 162(f)(1) applies to prejudgment interest paid or incurred to, or at the direction of, a government or governmental entity for the violation of any law or for the investigation or inquiry into a violation or potential violation of any law. However, a deduction for prejudgment interest will not be disallowed if the prejudgment interest is identified as a component of the total amount identified in the order or agreement as restitution and the taxpayer establishes that it was paid for this purpose. In general, section 162(f)(1) applies to postjudgment interest on amounts to be paid or incurred to, or at the direction of, a government or governmental entity for the violation of any law or investigation or inquiry into a potential violation of any law. However, if postjudgment interest is paid on an amount to which an exception under section 162(f)(2) applies, the exception also applies to that postjudgment interest.

8. Failure To Pay Tax and Related Interest and Penalties

The proposed regulations provide that section 162(f)(1) does not apply to amounts paid or incurred as otherwise deductible taxes or related interest. In accordance with section 162(f)(2)(A)(iii), the final regulations provide that, in the case of any amount paid or incurred as restitution for failure to pay any tax imposed under Title 26, section 162(f)(1) does not disallow a deduction for an amount equal to or less than the amount otherwise allowed under chapter 1 if the tax had been timely paid. For example, section 162(f)(1) does not disallow a deduction of an amount paid or incurred as restitution for failure to pay a tax imposed under Title 26 of the Code, such as certain excise or employment taxes otherwise deductible under chapter 1. However, a deduction for amounts paid or incurred as restitution for failure to pay a Federal income tax is disallowed because Federal income taxes are not otherwise deductible under chapter 1. *See* section 275(a)(1).

The Treasury Department and the IRS received several comments about the application of section 162(f) to federal, state and local taxes, and any related interest and penalties. Under the proposed regulations, if penalties are imposed with respect to otherwise deductible taxes, a taxpayer may not deduct the interest paid with respect to such penalties. A commenter requested clarification that the taxpayer also may not deduct the penalties. The Treasury Department and the IRS agree and the final regulations are revised accordingly to provide that if penalties are imposed with respect to otherwise deductible taxes, a taxpayer may not deduct the penalties or the interest paid with respect to such penalties.

9. Material Change

The proposed regulations contained a material change rule under which some orders issued, or agreements entered, before December 22, 2017, were subject to section 162(f)(1) as amended by the TCJA. Several commenters considered the definition of ''material change'' in the proposed regulations as ''overly broad,'' and suggested it could cause unnecessary administrative disputes and discourage taxpayers from negotiating with governments or governmental entities to clarify the terms of an order or agreement, resulting in increased litigation and burdening taxpayers, governments and governmental entities, and courts. One commenter argued that section 13306(a)(2) of the TCJA (the transition rule for section 162(f)) precludes adopting a material change rule for any binding orders issued or agreements entered into before December 22, 2017. The commenter recommended that the final regulations provide that the amendment to section 162(f) applies only to orders issued or agreements entered into after December 22, 2017.

In response to this comment, the Treasury Department and the IRS have determined that section 162(f), as amended by TCJA, does not apply to any pre-December 22, 2017 binding order or agreement even if modified on or after December 22, 2017. In addition, material changes to an order or agreement will generally result in a new order or agreement subject to section 162(f). For these reasons, the final regulations do not include the material change rule included in the proposed regulations.

II. Reporting Information for Certain Fines, Penalties, and Other Amounts

A. General Rule

The purpose of the regulations under section 6050X is to provide appropriate officials of governments or governmental entities the operational, administrative, and definitional rules for complying with the statutory information reporting requirements for suits or agreements to which section 6050X(a)(1) applies.

In general, under the final regulations, if the aggregate amount a payor is required to pay pursuant to an order or agreement for a violation, investigation, or inquiry to which section 6050X(a)(1) and (a)(2) applies equals or exceeds the threshold amount, the appropriate official of a government or governmental entity that is a party to the order or agreement must file an information return with the IRS regarding certain amounts paid or incurred pursuant to the order or agreement, the payor's taxpayer identification number (TIN), and other information required by the information return and the related instructions. The appropriate official of a government or governmental entity that is a party to the order or agreement must also furnish a written statement with the same information to the payor.

1. Government, Governmental Entity, or Nongovernmental Entity Treated as a Governmental Entity

The proposed regulations provided a definition of ''government or governmental entity.'' No comments were received on the definition of ''government or governmental entity'' in the proposed regulations. The definition in the final regulations has been reorganized to provide a definition of a government in § 1.6050X–(f)(2) and to provide a definition of a ''governmental entity'' in § 1.162–21(f)(3). The definitions are based on the definition in the proposed regulations but clarify that a political subdivision of a government includes a local government unit. The final regulations also clarify that a governmental entity includes a nongovernmental entity treated as a governmental entity.

The proposed regulations under section 6050X incorporate the definition of a ''nongovernmental entity'' in the proposed regulations under section 162(f). The final regulations clarify that, for purposes of the information reporting requirements in section 6050X, a nongovernmental entity treated as a governmental entity does not include a nongovernmental entity of a territory of the United States, including American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the U.S. Virgin Islands, a foreign country, or an Indian tribe.

2. Suit or Agreement

The proposed regulations provided that the information reporting is required for a ''suit, agreement, or otherwise'' pursuant to section 162(f)(1). A commenter noted that this rule is inconsistent with the statutory language of section 6050X, which only concerns a ''suit or agreement.'' The final

regulations clarify that a government or governmental entity involved in a suit or agreement to which section 6050X(a)(2) applies must file an information return for payment amounts described in section 6050X(a)(1).

Another commenter recommended that the final regulations clarify that a suit or agreement is treated as binding under applicable law even if all appeals have not been exhausted. The final regulations generally adopt this recommendation.

3. Payor

The final regulations define ''payor'' as the person, as defined in section 7701(a)(1), which, pursuant to an order or agreement, has paid or incurred, or is liable to pay or incur, an amount to, or at the direction of, the government or governmental entity in relation to the violation or potential violation of any law. In general, the payor will be the person to which section 162(f) and § 1.162–21 apply.

One commenter recommended that the final regulations provide that governments and governmental entities do not have a reporting requirement, and do not need to furnish a written statement, pursuant to section 6050X for the amounts described in section 6050X(a)(1) that tax-exempt, non-profit payors are required to pay. Another commenter recommended that the final regulations provide that the information reporting requirement should apply only for civil, not criminal, cases. A third commenter recommended that the final regulations provide that the information reporting requirement applies only to payors involved in a trade or business and not to individual payors.

The final regulations do not adopt these recommendations because they are inconsistent with section 6050X. Section 6050X does not carve out an exception for criminal cases, individuals, including those not in a trade or business, and tax-exempt organizations.

The final regulations require the appropriate official to include the TIN of the payor on the information return filed regarding the payor. Commenters asked how the appropriate official of a government or governmental entity may secure a payor's TIN. If the appropriate official does not already have the payor's TIN, the appropriate official must request the TIN. The TIN may be requested in any manner. The appropriate official must notify the payor that the law requires the payor to furnish a TIN for inclusion on the information return and that failure to furnish the TIN may subject the payor to a penalty under section 6723. The payor may provide the TIN in any manner including orally, in writing, or electronically. If the payor furnishes the TIN in writing, no particular form is required.

4. Threshold Amount

Section 6050X(a)(2)(B) provides the Secretary with the authority to adjust the statutory reporting threshold of $600 as necessary to ensure the efficient administration of the internal revenue laws. Based on comments received prior to the publication of the proposed regulations from governments and governmental entities concerned about the burden of information reporting and to ensure the efficient administration of the internal revenue laws, the Treasury Department and the IRS determined that a threshold higher than $600 was appropriate to address these concerns. The proposed regulations provided that reporting is required if the aggregate amount of all orders and agreements for the violation, investigation, or inquiry equals or exceeds $50,000 (threshold amount). Anticipating possible compliance burdens on filers, the Treasury Department and the IRS requested comments about the proposed $50,000 threshold. In particular, the Treasury Department and the IRS requested data on the annual number of relevant orders issued, or agreements entered, by governments or governmental entities and the financial, time, and administrative burdens associated with different threshold amounts. After publication of the proposed regulations, the Treasury Department and the IRS received several requests from governments and governmental entities to raise the proposed $50,000 threshold amount, but none of the comments provided data to support those requests. As a result, the final regulations maintain the proposed threshold amount and provide that reporting is required for payment amounts equal to or in excess of $50,000.

Commenters described several situations in which the government or governmental entity may be uncertain about its reporting obligation because it is not clear that the suit or agreement requires the payor to make payments described in section 6050X(a)(1) that equal or exceed the threshold amount. In one situation, the order or agreement described in section 6050X(a)(1) requires the payor to make several payments for a violation, investigation, or inquiry, each described in section 6050X(a)(2) and each for less than the threshold amount, but the aggregate amount of all payments pursuant to the order or agreement equals or exceeds the threshold amount. In another situation, an order or agreement involving more than one violation, investigation, or inquiry, each described in section 6050X(a)(2), requires the payor to make several payments, each described in section 6050X(a)(1), and each for less than the threshold amount, but the aggregate amount of all payments pursuant to the order or agreement equals or exceeds the threshold amount.

The commenter recommended that, in these two situations, the final regulations should treat each payment amount separately to determine if the aggregate amount involved in the order or agreement equals or exceeds the threshold amount. The final regulations do not provide rules for every circumstance to which section 6050X(a)(2)(A)(ii) could apply. Form 1098–F and its instructions will contain additional guidance regarding the threshold amount.

Another commenter described a situation in which, pursuant to separate orders or agreements, the payor is required to pay separate amounts, all less than the threshold amount, for multiple acts or omissions in violation of the same law but the aggregate amount of the payments to be made pursuant to all orders and agreements equals or exceeds the threshold amount. The commenter requested that, in this situation, the final regulations treat each order and agreement separately. This situation is addressed by section 6050X(a)(2)(A)(ii), which provides that the government or governmental entity must file an information return for a suit or agreement if ''the aggregate amount involved in all court orders and agreements with respect to the violation, investigation, or inquiry'' equals or exceeds the threshold amount. Therefore, the final regulations do not adopt the rule proposed by the commenter. The final regulations also provide that in this situation, the appropriate official must file only one information return for all amounts the payor is required to pay pursuant to these orders or agreements.

5. Requirement To File Return

The appropriate official of a government or governmental entity must comply with the information reporting requirements of section 6050X and the related regulations by filing Form 1098–F, *Fines, Penalties, and Other Amounts,* or any successor form, as provided by the instructions, with Form 1096, *Annual Summary and Transmittal of U.S. Information Returns,* on or before the annual due date as

provided in the final regulations. Under the final regulations, the information return filed by the government or governmental entity with the IRS must provide the amount a payor is required to pay, pursuant to section 6050X(a)(1)(A) and § 1.6050X–1(b)(1)(i), as a result of the order or agreement, the separate amounts required to be paid as restitution, remediation, or to come into compliance with a law, pursuant to section 6050X(a)(1)(B) and (a)(1)(C) and § 1.6050X–1(b)(1)(ii), as a result of the order or agreement, the payor's TIN, and any additional information required by the information return and the related instructions.

The Treasury Department and the IRS received comments requesting that the final rules require information reporting only for amounts paid directly to a government or governmental entity. A commenter also requested final rules pursuant to which the government or governmental entity could provide the reporting information to the payor and require the payor to file the information return. None of these suggestions were adopted in the final regulations because they are inconsistent with the explicit language of section 6050X.

A commenter inquired whether the government or governmental entity reports the payment amount identified in the order or agreement, or only the amount the payor ultimately pays. Another commenter recommended that the reporting requirement apply only to payment amounts described in sections 162(f)(1) and 6050X(a)(1)(A) that are actually collected by governments and governmental entities. Section 6050X(a)(1) mandates reporting for ''the amount required to be paid as a result of the suit or agreement'' for a violation of any law, or an investigation or inquiry into the potential violation of any law, as well as for restitution, remediation, and to come into compliance with a law. Therefore, the final regulations do not adopt the commenter's recommendation. Instead, the final regulations clarify that governments and governmental entities have a reporting obligation for the amounts, described in section 6050X(a)(1) and § 1.6050X–1(b)(1)(i) and (ii), required to be paid pursuant to the order or agreement.

A commenter inquired whether the IRS would consider using website reporting instead of requiring reporting on a form. Section 6050X prescribes reporting that is more suitable on a form. Furthermore, section 6050X(b) also requires governments and governmental entities to furnish written statements to payors. Thus, even if the final regulations permitted governments and governmental entities to report information to the IRS via a website, they would still need to provide a written statement to payors, which could not be accomplished by a website. To minimize the burden on governments or governmental entities, the final regulations permit the appropriate official to comply with the requirements to furnish written statements to payors via the Form 1098–F or another document that contains the required information if the document conforms to applicable guidance relating to substitute statements.

A commenter expressed concerns about the information reporting requirements resulting from an order or agreement, pursuant to which payments are made over the course of several years. To minimize the burden on governments and governmental entities and to ensure the efficient administration of the internal revenue laws, the final regulations do not require an appropriate official to file information returns for each taxable year in which a payor makes a payment pursuant to a single order or agreement. Instead, the appropriate official must file only one information return to report the amounts required by section 6050X(a)(1).

Some commenters inquired about the application of the reporting obligation to governments and governmental entities for specific types of administrative and certain other categories of proceedings. The final regulations do not address the application of the reporting obligation to specific statutes or types of proceedings because the final regulations are intended to provide broad rules of general application based on the underlying principles of sections 162(f) and 6050X rather than narrow rules with limited application that risk excluding a certain ''violation of any law or the investigation or inquiry . . . into the potential violation of any law.''

One commenter observed that the payors and the governments and governmental entities may have incentives to enter into an agreement concerning the filing of information returns such that payors may improperly attempt to claim deductions to which they are not entitled and governments and governmental entities do not have to incur the burden of filing information returns and furnishing written statements. The commenter recommended that the final regulations treat any agreements between payors and governments or governmental entities not to file information returns as invalid and unenforceable. The final regulations do not adopt this recommendation because section 162(f) applies to the taxpayer regardless of whether the appropriate official files an information return with the IRS and furnishes a written statement to the payor.

6. Due Dates

Section 6050X(a)(3) provides that the information return shall be filed at the time the agreement is entered into, as determined by the Secretary, not at the time of payment, as recommended by a commenter. Further, section 6050X(b) requires the written statement to be furnished to the payor at the same time the information return is filed with the IRS. Under the proposed regulations, the information return was required to be filed on or before January 31 of the year following the calendar year in which the order or agreement, becomes binding under applicable law.

A commenter requested that appropriate officials of governments and governmental entities be given more time to comply with the requirement. As requested, the final regulations provide, pursuant to section 6071(a), that information returns filed with the IRS on paper are due on or before February 28 of the year following the calendar year in which the order or agreement, becomes binding under applicable law. In accordance with section 6071(b), information returns filed electronically are due on or before March 31 of such year. However, to increase the likelihood that payors have the information necessary to timely prepare their income tax returns and to avoid burdening governments and governmental entities with having to determine the tax year of each payor, the final regulations require the appropriate official to furnish the written statement on or before January 31 of such year.

7. Rules for Multiple Payors

The final regulations describe the application of the information reporting requirements if, pursuant to the order or agreement, the aggregate amount multiple payors are required to pay, or the costs to provide the property or the service, equals or exceeds the threshold amount. If, pursuant to the order or agreement, more than one payor is individually liable for some or all of the payment amount, the final regulations require the appropriate official to file an information return for the separate amount that each individually liable payor is required to pay, even if a payor's payment liability is less than the threshold amount, and to furnish a written statement containing this information to each payor. If more than one person, as defined in section

7701(a)(1), is a party to an order or agreement, there is no information reporting requirement, or requirement to furnish a written statement, with respect to any person who does not have a payment obligation or obligation for costs to provide services or to provide property.

The final regulations provide that, if an order or agreement, identifies multiple jointly and severally liable payors, the appropriate official must file an information return for each payor to report the information required by § 1.6050X–1(b)(1)(i) and (ii) on the amount to be paid by all jointly and severally liable payors. The appropriate official must furnish a written statement containing this information to each of those payors, regardless of which payor makes the payment.

A commenter wrote that the rules requiring reporting would be challenging to implement when multiple payors are required to make payments. However, under section 6050X(a)(1)(3), the appropriate official has an obligation to file an information return when an order or agreement becomes binding, not when the payments are made, so there is no need for governments or governmental entities to track the receipt of payments in order to comply with section 6050X or the related final regulations.

Another commenter recommended that the payment obligation of each payor be examined separately to determine whether the amount each payor is required to pay, or the costs to provide the property or the service, equals or exceeds the threshold amount. However, in the case of joint and several liability, each payor is responsible for the entire amount, which requires reporting of, and furnishing a statement to, each payor. In the case where a payor is individually liable for an amount below the threshold amount, the payor may still attempt to deduct some or all of the payment amount all of the payors are required to pay, so filing an information return for each of the payors' liabilities is useful for tax administration.

One commenter asked for clarification that the government or governmental entity is not obligated to file an information return with the IRS if, after an order or agreement has become binding under applicable law, the payor pursues another party for contribution. Because any payment the payor receives from another party in a subsequent proceeding will not be subject to section 162(f), the government or governmental entity will not have an obligation to file an information return for any payment made by the other party.

8. Payment Amount Not Identified

Commenters expressed concern that it is difficult for governments and governmental entities to estimate the payment amount pursuant to the order or agreement, and whether the aggregate amount equals or exceeds the information reporting threshold, when the order or agreement does not specify an amount. The Treasury Department and the IRS agree, which is why the regulations do not require governments or governmental entities to estimate payment amounts. Accordingly, if some or all of the payment amount is not identified in the order or agreement, the regulations direct governments and governmental entities to the instructions to Form 1098–F, or any successor form.

Some orders or agreements may identify a payment described in section 6050X(a)(1)(A) and identify a payment or an obligation to provide property or to provide services, as restitution, remediation, or an amount paid to come into compliance with a law, as described in section 6050X(a)(1)(B), but not identify some or all of the payment amounts the payor must pay, or some or all of the cost to provide property or services. The final regulations provide that, if the government or governmental entity reasonably expects that the aggregate amount the payor must pay, and the costs the payor will pay or incur to provide services or to provide property, pursuant to the order or agreement, will equal or exceed the threshold amount, the appropriate official of such government or governmental entity must file an information return on Form 1098–F, or any successor form, as provided in the instructions to the Form 1098–F, and furnish a written statement to the payor with the information supplied to the IRS on Form 1098–F.

Similarly, a commenter noted that some orders or agreements may require a payor to make payments described in section 6050X(a)(1) for which reporting is required and other payments for which reporting is not required under section 6050X. The commenter recommended that if it is not clear for which payment amount the government or governmental entity has a reporting requirement, the rule under the proposed regulations for a payment amount not identified should apply. The Treasury Department and the IRS generally agree with this recommendation. Therefore, if, under the circumstances described by the commenter, the government or governmental entity reasonably expects that the aggregate amount the payor must pay, and the costs the payor must pay to provide services or to provide property, will equal or exceed the threshold amount, the appropriate official of such government or governmental entity must file an information return.

9. Material Change

Under the proposed regulations, if there was a material change to the terms of an order or agreement for which an appropriate official of a government or governmental entity filed an information return, the appropriate official had to file a corrected information return with the IRS and furnish an amended written statement to the payor. The Treasury Department and the IRS have concluded that material changes to an order or agreement will generally result in a new order or agreement subject to the rules under section 6050X and § 1.6050X–1. For this reason, and because the final regulations under § 1.162–21 do not include a material change rule, the final regulations have removed the material change rule from § 1.6050X–1.

Applicability Dates

The rules of § 1.162–21 apply to taxable years beginning on or after the date of publication of this Treasury decision in the **Federal Register**, except that such rules do not apply to amounts paid or incurred under any order or agreement, pursuant to a suit, agreement, or otherwise, that became binding under applicable law before such date, determined without regard to whether all appeals have been exhausted or the time for filing an appeal has expired. The rules of § 1.6050X–1 apply only to orders and agreements, pursuant to suits and agreements, that become binding under applicable law on or after January 1, 2022, determined without regard to whether all appeals have been exhausted or the time for filing an appeal has expired.

Special Analyses

I. Regulatory Planning and Review—Economic Analysis

Executive Orders 12866 and 13563 direct agencies to assess costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

The regulations have been designated by the Office of Information and Regulatory Affairs (OIRA) as subject to review under Executive Order 12866 pursuant to the Memorandum of Agreement (April 11, 2018) between the Treasury Department and by the Office of Management and Budget (OMB) regarding review of tax regulations.

A. Background

Prior to the Tax Cuts and Jobs Act (TCJA), section 162(f) of the Code disallowed a deduction for any fine or similar penalty paid to a government for the violation of any law. This provision, enacted in 1969, codified existing case law that denied business deductions for fines or similar penalties. The general rule of section 162(f)(1), as amended by section 13306(a) of the TCJA, disallows any deduction for amounts paid or incurred (whether by suit, agreement, or otherwise) to, or at the direction of, a government or governmental entity or certain nongovernmental entities treated as governmental entities, in relation to the violation of any law or the investigation or inquiry by such government or entity into the potential violation of any law. Section 13306(a) also provides certain exceptions to this disallowance. Section 162(f)(2)(A)(i) and (ii) does not disallow deduction for amounts that (1) the taxpayer establishes were paid or incurred as restitution (including remediation of property) or to come into compliance with a law, and (2) are identified in the court order or settlement agreement as restitution, remediation, or to come into compliance with a law.

In addition, under prior law, the Treasury Department and the IRS did not receive information returns from governments or governmental entities that received fines or penalties. Section 6050X of the Code, enacted by section 13306(b) of the TCJA, requires appropriate officials to file an information return if the aggregate amount involved in all orders or agreements relating to the violation, investigation, or inquiry is $600 or more. The information return must include (1) the amount required to be paid as a result of the order or agreement; (2) any amount that constitutes restitution or remediation of property; and (3) any amount required to be paid for the purpose of coming into compliance with a law that was violated or involved in the investigation or inquiry. Section 6050X provides the Secretary with the authority to adjust the $600 reporting threshold in order to ensure efficient tax administration.

Proposed regulations regarding these provisions were previously issued on May 13, 2020 (REG–104591–18) (proposed regulations).

B. Need for the Regulations

Following the passage of the TCJA, the Treasury Department and the IRS received several questions and comments from Federal, state, local, and tribal governments, as well as the public, regarding the meaning of various provisions in each section and issues not explicitly addressed in the statute. The Treasury Department and the IRS have determined that such comments warrant the issuance of further guidance.

In addition, the Treasury Department and the IRS have determined that increasing the reporting threshold to reduce the reporting burden and to enhance the efficiency of tax administration is appropriate.

C. Overview of the Regulations

The regulations provide guidance regarding sections 162(f) and 6050X. The following analysis provides further detail regarding the anticipated impacts of the regulations. Part I.D specifies the baseline for the economic analysis. Part I.E.1. summarizes the economic effects of the rulemaking, relative to this baseline. Part I.E.2. describes the economic effects of specific provisions covering (1) the reporting threshold, (2) the timing of information reporting, and (3) information reporting requirements when payment amounts are not identified.

D. Baseline

In this analysis, the Treasury Department and the IRS assess the benefits and costs of the final regulations relative to a no-action baseline reflecting anticipated Federal income tax-related behavior in the absence of these regulations.

E. Economic Analysis of the Regulation

I. Summary of Economic Effects

The regulations under section 162(f) provide definitions for restitution, remediation, and amounts paid to come into compliance with the law. These definitions clarify for taxpayers which amounts paid or incurred may be deductible under the statute. The regulations also clarify (1) how the taxpayer meets the establishment requirement; and (2) how the order or agreement meets the identification requirement.

The Treasury Department and the IRS have determined that the burden reduction associated with the regulations for section 162(f) is modest. In addition, while the regulations reduce uncertainty for taxpayers, they are unlikely to affect economic decision-making because most of the amounts to be paid or incurred which are subject to section 162(f) are non-discretionary.

The regulations under section 6050X provide certainty and consistency for affected governments and governmental entities by defining and clarifying the statute's terms and rules. Further, the regulations use the authority provided by the statute to the Secretary to set information reporting requirements to minimize the burden on governments and governmental entities and to ensure the efficient administration of the internal revenue laws. Most importantly, the regulations increase the reporting threshold from $600 to $50,000, thereby eliminating information reporting requirements for approximately 1 to 5 million orders or agreements. Using the midpoint of this range (3 million), the estimated burden reduction from this exercise of regulatory discretion is $74 million (2018 dollars) per year relative to the no-action baseline.

This reduction in compliance burden is the only meaningful economic effect of the regulations. The regulations do not have meaningful effects on the tax liability of taxpayers, the deductibility of amounts paid to, or at the directions of, governments and governmental entities, or the incentive for individuals or businesses to engage in violations of the law.

II. Economic Analysis of Specific Provisions

A. Reporting Threshold

Section 6050X requires governments and governmental entities which enter orders or agreements to which section 162(f) applies to file an information return if the aggregate amount paid or incurred in all orders or agreements relating to the violation, investigation, or inquiry is equal to or exceeds a threshold of $600. Section 6050X also provides the Secretary with the authority to adjust the statutory reporting threshold as necessary to ensure efficient tax administration. In response to multiple comments received prior to the issuance of the proposed regulations from governments and governmental entities concerned about the burden of information reporting for smaller payments amounts pursuant to orders or agreements, the regulations raise the reporting threshold to $50,000. In the proposed regulations, the Treasury Department and the IRS solicited data on the annual number of orders or agreements by governments or governmental entities that could inform the determination of the appropriate

threshold amount. The Treasury Department and the IRS did not receive any such data.

The Treasury Department and the IRS considered a range of alternative thresholds including the statutory threshold of $600, along with much higher thresholds suggested by some commenters. Upon consideration of both the enforcement needs of the IRS and the reporting burden on governments and governmental entities, the Treasury Department and the IRS exercised the authority provided to the Secretary by the statute to set the reporting threshold amount at $50,000.

The Treasury Department and the IRS do not know of any data on the number of orders or agreements requiring taxpayers to pay amounts to, or at the direction of, governments or governmental entities, or the distribution of these amounts, such as the number that are above or below $600. Based on communications with stakeholders, the Treasury Department and the IRS estimate that the increase in reporting threshold from $600 to $50,000 will reduce the number of required information returns by approximately 1 to 5 million. The Treasury Department and the IRS further estimate that the average time to complete the information return is between 0.387 and 0.687 hours. Using the midpoint of each of these ranges (3 million information returns and .537 hours) and a labor cost of $46 per hour,[1] the Treasury Department and the IRS estimate that increasing the reporting threshold will reduce annual compliance burdens by $74 million dollars (2018 dollars) per year. It should be noted that many of the lower level fines and penalties are likely to be assessed on non-businesses that are not able to deduct business expenses so they would be unaffected by the extent to which governments or governmental entities are subject to reporting requirements.

Increasing the reporting threshold from $600 to $50,000 is unlikely to have a significant effect on revenues because fines over $50,000 likely account for the vast majority of fines and penalties in terms of dollar values. Based on financial reporting values disclosed on tax returns of C corporations, S corporations and partnerships, firms with over $50,000 in total fines and penalties account for 99 percent of all fines and penalties. However, these data should be interpreted with caution. Financial reporting of fines and penalties includes both international and domestic fines, and all fines and penalties are aggregated into yearly totals. Furthermore, firms with less than $10 million in assets are not required to provide financial reporting values with their tax returns.

B. Time of Reporting

Section 6050X provides that the government or governmental entity shall file the information return at the time the order is issued or the agreement is entered into, as determined by the Secretary. The Treasury Department and the IRS received comments from governments and governmental entities prior to the issuance of the proposed regulations observing that it would be burdensome and inefficient for them to file information returns each time an order or agreement becomes binding under applicable law. Several commenters suggested that annual filing of information returns would meaningfully reduce this reporting burden. The Treasury Department and the IRS agree with this comment and have adopted it in the regulations. The Treasury Department and the IRS have not estimated the difference in compliance burden between these two alternatives because they do not have suitable data or models to do so.

Several commenters also expressed uncertainty and concern about the information reporting requirements for an order or agreement pursuant to which payments are made over the course of several years. To reduce uncertainty, and to minimize the burden on governments and governmental entities, the regulations clarify that information reporting is required only for the year in which the order or agreement becomes binding under applicable law, and not required for each taxable year in which a payor makes a payment.

The Treasury Department and the IRS considered requiring information reporting at the time the order is issued or the agreement is entered. The Treasury Department and the IRS also considered requiring information reporting in each year in which an amount is paid or incurred pursuant to the order or agreement. However, both alternative approaches were determined to impose unnecessary burden for governments and governmental entities without creating accompanying benefits for tax administration or for taxpayers.

Under the proposed regulations, the information return was required to be filed with the IRS, and a written statement furnished to the payor, on or before January 31 of the year following the calendar year in which the order or agreement becomes binding under applicable law, even if all appeals have not been exhausted for the suit or agreement. In response to the proposed regulations, a commenter requested that governments and governmental entities be given more time to comply with the requirements. As requested, the final regulations are revised to provide that information returns filed with the IRS on paper are due on or before February 28 of the year following the calendar year in which the order or agreement becomes binding under applicable law and information returns filed electronically are due on or before March 31 of such year. However, to increase the likelihood that payors have the information necessary to timely prepare their income tax returns, the final regulations still require governments and governmental entities to furnish the written statements to payors on or before January 31 of such year.

C. Payment Amount Not Identified

When the expected amount paid or incurred pursuant to an order or agreement equals or exceeds the threshold amount, section 6050X requires governments or governmental entities to file an information return including: (1) The amount required to be paid as a result of the order or agreement; (2) any amount that constitutes restitution or remediation of property; and (3) any amount required to be paid for the purpose of coming into compliance with a law that was violated or involved in the investigation or inquiry. However, some orders or agreements may involve uncertain payments or costs to provide property or services without identifying some or all of the aggregate amount the payor must pay, or some or all of the aggregate cost to provide property or services. The Treasury Department and the IRS received comments expressing concern that amounts paid or incurred are often difficult to assess, and strict valuation requirements would impose undue burden on governments and governmental entities. For situations in which the amount is not identified, the regulations direct governments and governmental entities to the instructions to Form 1098–F. To address commenters' concerns, these instructions will permit governments and governmental entities to report the threshold amount of $50,000 when the amount is unknown but expected to equal or exceed $50,000. This rule is necessary to improve taxpayer compliance.

The Treasury Department and the IRS considered requiring governments and

[1] This data point is derived by the IRS as part of the burden analysis described in the Paperwork Reduction Act section below.

governmental entities to provide an estimate of each amount to be paid or incurred; however this approach was rejected because it would impose significant burden on governments and governmental entities. The Treasury Department and the IRS did not estimate the difference in compliance burden between the final regulation and this alternative approach because they do not have suitable data or models to do so.

Paperwork Reduction Act

Collection of Information—Form 1098–F

In general, the collection of information in the regulations is required under section 6050X of the Code. The collection of information in these regulations is set forth in § 1.6050X–1. The IRS intends that the collection of information pursuant to section 6050X will be conducted by way of Form 1098–F, *Fines, Penalties, and Other Amounts.* Form 1098–F will be used by all governments, governmental entities, and nongovernmental entities treated as governmental entities with a reporting requirement. The Treasury Department and the IRS request comments on all aspects of information collection burdens related to the regulations. In addition, when available, drafts of IRS forms are posted for comment at *www.irs.gov/draftforms.*

The current status of the PRA submissions related to section 6050X are provided in the following table.

Form	Type of filer	OMB No.	Status
1098–F	Governments, Governmental Entities, And Certain Non-governmental Entities.	1545–2284	Form 1098–F is approved through 1/31/2023.

RELATED NEW OR REVISED TAX FORMS

	New	Revision of existing form	Number of respondents (2018, estimated)
Form 1098–F	Yes	.....	90,100 (85,500 small governmental jurisdictions, 4,500 large governmental jurisdictions and 100 nongovernmental entities).

A reasonable burden estimate for the average time to complete Form 1098–F is between 0.387 and 0.687 hours (approximately 23 to 41 minutes). This estimate is based on survey data collected from similar information return filers. In addition, the increase in the reporting threshold under section 6050X will lead to a decrease in the number of information returns filed by approximately 1 million to 5 million returns. Using the midpoint of these ranges, or 3 million and 0.537 hours, the estimated burden reduction is $74 million per year.

Estimated average time per form: .537 hours.

Estimated number of respondents: 90,100.

Estimated total annual burden hours: 48,383.70.

Estimated change in number of information returns resulting from increased reporting threshold: (3,000,000).

Estimated change in burden (hours): (1,611,150).

Estimated change in burden (Dollars): ($74,161,235).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. chapter 6) requires agencies to ''prepare and make available for public comment an initial regulatory flexibility analysis,'' which will ''describe the impact of the rule on small entities.'' 5 U.S.C. 603(a). Section 605(b) of the RFA allows an agency to certify a rule if the rulemaking is not expected to have a significant economic impact on a substantial number of small entities.

Pursuant to the RFA, the Secretary of the Treasury hereby certifies that these regulations will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the RFA.

The RFA generally applies to regulations that affect small businesses, small organizations, and small governmental jurisdictions. For purposes of the RFA, small governmental jurisdictions are governments of cities, counties, towns, townships, villages, school districts, or special districts with a population of less than 50,000. This rule would affect States, as well as local governments, some of which may meet the definition of small governmental jurisdiction. Approximately 90,100 governments, governmental entities, and nongovernmental entities treated as governmental entities may be subject to the reporting requirements of section 6050X. Of those governments and governmental entities, approximately 85,500 (or 95%) are small governmental jurisdictions.

Although the regulations may affect a substantial number of small governmental jurisdictions, the economic impact of the regulations is not expected to be significant. The regulations set a reporting threshold that is higher than the minimum required by statute and also provide for governments and governmental entities to file annual returns. Both of these provisions reduce the potential burden on small governmental jurisdictions. In particular, the increase in the reporting threshold will lead to a decrease in the number of information returns filed by approximately 1 million to 5 million returns. Using the midpoint of this range, or 3 million, the estimated burden reduction is $74 million per year (2018 dollars). It is estimated that after reading and learning about the requirements of the regulations, the burden associated with filing the annual form is approximately 23 to 41 minutes and the average cost per information return is approximately $24.72, which would not result in a significant economic impact on small entities.

Pursuant to section 7805(f) of the Code, the proposed rule preceding this rulemaking was submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration for comment on its impact on small entities and no comments were received.

Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA)

requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a state, local, or tribal government, in the aggregate, or by the private sector, of $100 million in 1995 dollars, updated annually for inflation. This rule does not include any Federal mandate that may result in expenditures by state, local, or tribal governments, or by the private sector in excess of that threshold.

Executive Order 13132: Federalism

Executive Order 13132 (entitled *Federalism*) prohibits an agency from publishing any rule that has Federalism implications if the rule either imposes substantial direct compliance costs on state and local governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. These rules do not have Federalism implications, and do not impose substantial direct compliance costs on state and local governments or preempt state law, within the meaning of the Executive Order. The compliance costs, if any, are imposed on state and local governments by section 6050X, as enacted by the TCJA. Notwithstanding, the Treasury Department and the IRS consulted with the National League of Cities and the National Governors Association prior to the issuance of the proposed regulations. Pursuant to the requirements set forth in section 8(a) of Executive Order 13132, the Treasury Department and the IRS certify that they have complied with the requirements of Executive Order 13132.

Congressional Review Act

The Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget has determined that this is a major rule for purposes of the Congressional Review Act (5 U.S.C. 801 *et seq.*) (CRA)). Under 5 U.S.C. 801(3), a major rule takes effect 60 days after the rule is published in the **Federal Register**.

Notwithstanding this requirement, 5 U.S.C. 808(2) allows agencies to dispense with the requirements of 5 U.S.C. 801 when the agency for good cause finds that such procedure would be impracticable, unnecessary, or contrary to the public interest and the rule shall take effect at such time as the agency promulgating the rule determines. Pursuant to 5 U.S.C. 808(2), the Treasury Department and the IRS find, for good cause, that a 60-day delay in the effective date is unnecessary and contrary to the public interest.

Following the amendments to section 162(f) and enactment of section 6050X by the TCJA, the Treasury Department and the IRS published IRS published Notice 2018–23, 2018–15 I.R.B. 474, to provide transitional guidance on the identification requirement of section 162(f) and the information reporting requirement under section 6050X and to solicit comments from the public and affected governments and governmental entities on issues related to the implementation of section 162(f) and section 6050X. Subsequently, on May 13, 2020, the Treasury Department and the IRS published a notice of proposed rulemaking (REG–104591–18) in the **Federal Register** (85 FR 28524) providing additional guidance for taxpayers and governments and governmental entities on the deduction disallowance rules in section 162(f) and the associated reporting requirements in section 6050X. However, as demonstrated by the wide variety of public comments in response to the proposed regulations received, taxpayers and governments and governmental entities continue to express uncertainty regarding the proper application of the relevant statutory rules under section 162(f) and section 6050X. These final regulations provide crucial guidance for taxpayers and governments and governmental entities on how to apply the relevant statutory rules. In certain cases, failure to comprehend the proper application of the requirements of section 162(f) can prevent taxpayers from claiming appropriate deductions, resulting in them paying potentially higher taxes than required during a time of economic difficulty.[2] In addition, governments and governmental entities will require several months to update or develop data collection and reporting systems to comply with the rules under section 6050X. However, governments and governmental entities will need to know that the final regulations are effective before incurring necessary costs to timely comply with the final regulations. Accordingly, the Treasury Department and the IRS have determined that the rules in this Treasury decision will take effect on the date of filing for public inspection in the **Federal Register**.

Statement of Availability of IRS Documents

IRS Revenue Procedures, Revenue Rulings, Notices and other guidance cited in this document are published in the Internal Revenue Bulletin and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *http://www.irs.gov.*

Drafting Information

The principal author of these regulations is Sharon Y. Horn of Associate Chief Counsel (Income Tax and Accounting), IRS. However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes; Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding entries in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

* * * * *

Section 1.6050X–1 also issued under 26 U.S.C. 6050X(a), (b).

* * * * *

■ **Par. 2.** Section 1.162–21 is revised to read as follows:

§ 1.162 –21 Denial of deduction for certain fines, penalties, and other amounts.

(a) *Deduction Disallowed.* Except as otherwise provided in this section, no deduction is allowed under chapter 1 of the Internal Revenue Code (Code) for any amount that is paid or incurred—

(1) By suit, settlement agreement (agreement), or otherwise, as defined in paragraph (e)(5) of this section;

(2) To, or at the direction of, a government, as defined in paragraph (e)(1) of this section, or a governmental entity, as defined in paragraph (e)(2) of this section; and

(3) In relation to the violation, or investigation or inquiry by such government or governmental entity into the potential violation, of any civil or criminal law.

(i) An amount that is paid or incurred in relation to the violation of any civil or criminal law includes a fine or penalty.

(ii) An investigation or inquiry into the potential violation of any law does not include routine investigations or inquiries, such as audits or inspections, of regulated businesses that are not related to any evidence of wrongdoing

[2] See Executive Order 13924 (May 19, 2020) 85 FR 31,353–54.

or suspected wrongdoing, but are conducted to ensure compliance with the rules and regulations applicable to those businesses.

(b) *Exception for restitution, remediation, and amounts paid to come into compliance with a law*—(1) *In general.* Paragraph (a) of this section does not apply to amounts paid or incurred for restitution (including remediation) or to come into compliance with a law, as defined in paragraphs (e)(4) of this section, provided that both the identification and the establishment requirements of paragraphs (b)(2) and (b)(3) of this section are met.

(2) *Identification requirement*—(i) *In general.* A court order (order) or an agreement, as defined in paragraph (e)(5) of this section, identifies a payment by stating the nature of, or purpose for, each payment each taxpayer is obligated to pay and the amount of each payment identified.

(ii) *Meeting the identification requirement.* The identification requirement is met if an order or agreement specifically states the amount of the payment described in paragraph (b)(2)(i) of this section and that the payment constitutes restitution, remediation, or an amount paid to come into compliance with a law. If the order or agreement uses a different form of the required words (such as ''remediate'' or ''comply with a law'') and describes the purpose for which restitution or remediation will be paid or the law with which the taxpayer must comply, the order or agreement will be treated as stating that the payment constitutes restitution, remediation, or an amount paid to come into compliance with a law. Similarly, if an order or agreement specifically describes the damage done, harm suffered, or manner of noncompliance with a law and describes the action required of the taxpayer to provide restitution, remediation, or to come into compliance with any law, as defined in paragraph (e)(4) of this section, the order or agreement will be treated as stating that the payment constitutes restitution, remediation, or an amount paid to come into compliance with any law. Meeting the establishment requirement of paragraph (b)(3) of this section alone is not sufficient to meet the identification requirement of paragraph (b)(2) of this section.

(iii) *Payment amount not identified.* (A) If the order or agreement identifies a payment as restitution, remediation, or to come into compliance with a law but does not identify some or all of the amount the taxpayer must pay or incur, the identification requirement may be met for any payment amount not identified if the order or agreement describes the damage done, harm suffered, or manner of noncompliance with a law, and describes the action required of the taxpayer, such as paying or incurring costs to provide services or to provide property.

(B) If the order or agreement identifies a lump-sum payment or multiple damages award as restitution, remediation, or to come into compliance with a law but does not allocate some or all of the amount the taxpayer must pay or incur among restitution, remediation, or to come into compliance with a law, or does not allocate the total payment amount among multiple taxpayers, the identification requirement may be met for any payment amount not specifically allocated if the order or agreement describes the damage done, harm suffered, or manner of noncompliance with a law, and describes the action required of the taxpayer, such as paying or incurring costs to provide services or to provide property.

(3) *Establishment requirement*—(i) *Meeting the establishment requirement.* The establishment requirement is met if the taxpayer, using documentary evidence, proves the taxpayer's legal obligation, pursuant to the order or agreement, to pay the amount identified as restitution, remediation, or to come into compliance with a law; the amount paid or incurred; the date the amount was paid or incurred; and that, based on the origin of the liability and the nature and purpose of the amount paid or incurred, the amount the taxpayer paid or incurred was for restitution or remediation, as defined in paragraph (e)(4)(i) of this section or to come into compliance with any law, as defined in paragraph (e)(4)(ii) of this section. If the amount is paid or incurred to a segregated fund or account, as described in paragraphs (e)(4)(i)(A)(*2*) and (*3*), (e)(4)(i)(B), or (e)(4)(i)(C) of this section, the taxpayer may meet the establishment requirement even if each ultimate recipient, or each ultimate use, of the payment is not designated or is unknown. A taxpayer will not meet the establishment requirement if the taxpayer fails to prove that the taxpayer paid or incurred the amount identified as restitution, remediation, or to come into compliance with a law; the amount paid; the date the amount was paid or incurred; or that the amount the taxpayer paid or incurred was for the nature and purpose identified in the order or agreement as required by paragraph (b)(2)(i) of this section, or was made for the damage done, harm suffered, noncompliance, or to provide property or services as described in (b)(2)(iii) of this section. Meeting the identification requirement of paragraph (b)(2) of this section is not sufficient to meet the establishment requirement of paragraph (b)(3) of this section.

(ii) *Substantiating the establishment requirement.* The documentary evidence described in paragraph (b)(3)(i) of this section includes, but is not limited to, receipts; the legal or regulatory provision related to the violation or potential violation of any law; documents issued by the government or governmental entity relating to the investigation or inquiry, including court pleadings filed by the government or governmental entity requesting restitution, remediation, or demanding that defendant take action to come into compliance with the law; judgment; decree; documents describing how the amount to be paid was determined; and correspondence exchanged between the taxpayer and the government or governmental entity before the order or agreement became binding under applicable law, determined without regard to whether all appeals have been exhausted or the time for filing an appeal has expired.

(c) *Other exceptions*—(1) *Suits between private parties.* Paragraph (a) of this section does not apply to any amount paid or incurred by reason of any order or agreement in a suit in which no government or governmental entity is a party or any order or agreement in a suit pursuant to which a government or governmental entity enforces its rights as a private party.

(2) *Taxes and related interest.* Paragraph (a) of this section does not apply to amounts paid or incurred as otherwise deductible taxes or related interest. However, if penalties are imposed relating to such taxes, paragraph (a) of this section applies to disallow a deduction for such penalties and interest payments related to such penalties.

(3) *Failure to pay title 26 tax.* In the case of any amount paid or incurred as restitution for failure to pay tax imposed under title 26 of the United States Code, paragraph (a) of this section does not disallow a deduction for title 26 taxes, such as excise and employment taxes, which are equal to or less than the deduction otherwise allowed under chapter 1 of the Code if the tax had been timely paid.

(d) *Application of general principles of Federal income tax law*—(1) *Taxable year of deduction.* If, under paragraph (b) or (c) of this section, the taxpayer is allowed a deduction for the amount paid or incurred pursuant to an order or agreement, the deduction is taken into

account under the rules of section 461 and the related regulations, or under a provision specifically applicable to the allowed deduction, such as § 1.468B–3(c).

(2) *Tax benefit rule applies.* If the deduction allowed under paragraphs (b) or (c) of this section results in a tax benefit to the taxpayer, the taxpayer must include in income, under sections 61 and 111, the recovery of any amount deducted in a prior taxable year to the extent the prior year's deduction reduced the taxpayer's tax liability.

(i) A tax benefit to the taxpayer includes a reduction in the taxpayer's tax liability for a prior taxable year or the creation of a net operating loss carryback or carryover.

(ii) A taxpayer's recovery of any amount deducted in a prior taxable year includes, but is not limited to—

(A) Receiving a refund, recoupment, rebate, reimbursement, or otherwise recovering some or all of the amount the taxpayer paid or incurred, or

(B) Being relieved of some or all of the payment liability under the order or agreement.

(e) *Definitions.* For section 162(f) and § 1.162–21, the following definitions apply:

(1) *Government.* A *government* means—

(i) The government of the United States, a State, or the District of Columbia;

(ii) The government of a territory of the United States, including American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the U.S. Virgin Islands;

(iii) The government of a foreign country;

(iv) An Indian tribal government, as defined in section 7701(a)(40), or a subdivision of an Indian tribal government, as determined in accordance with section 7871(d); or

(v) A political subdivision (such as a local government unit) of a government described in paragraph (e)(1)(i), (ii), or (iii) of this section.

(2) *Governmental entity.* A *governmental entity* means—

(i) A corporation or other entity serving as an agency or instrumentality of a government (as defined in paragraph (e)(1) of this section), or

(ii) A nongovernmental entity treated as a governmental entity as described in paragraph (e)(3) of this section.

(3) *Nongovernmental entity treated as a governmental entity.* A *nongovernmental entity treated as a governmental entity* is an entity that—

(i) Exercises self-regulatory powers (including imposing sanctions) in connection with a qualified board or exchange, as defined in section 1256(g)(7); or

(ii) Exercises self-regulatory powers, including adopting, administering, or enforcing rules and imposing sanctions, as part of performing an essential governmental function.

(4) *Restitution, remediation of property, and amounts paid to come into compliance with a law*—(i) *Amounts for restitution or remediation.* An amount is paid or incurred for restitution or remediation pursuant to paragraph (b)(1) of this section if it is paid or incurred to restore, in whole or in part, the person, as defined in section 7701(a)(1); government; governmental entity; property; environment; wildlife; or natural resources harmed, injured, or damaged by the violation or potential violation of any law described in paragraph (a)(3) of this section to the same or substantially similar position or condition as existed prior to such harm, injury or damage.

(A) *Environment, wildlife, or natural resources.* Restitution or remediation of the environment, wildlife, or natural resources includes amounts paid or incurred for the purpose of conserving soil, air, or water resources, protecting or restoring the environment or an ecosystem, improving forests, or providing a habitat for fish, wildlife, or plants. The amounts must be paid or incurred—

(*1*) To, or at the direction of, a government or governmental entity to be used exclusively for the restitution or remediation of a harm to the environment, wildlife, or natural resources;

(*2*) To a segregated fund or account established by a government or governmental entity and, pursuant to the order or agreement, the amounts are not disbursed to the general account of the government or governmental entity for general enforcement efforts or other discretionary purposes; or

(*3*) To a segregated fund or account established at the direction of a government or governmental entity.

(*4*) Paragraph (e)(4)(i)(A) of this section applies only if there is a strong nexus or connection between the purpose of the payment and the harm to the environment, natural resources, or wildlife that the taxpayer has caused or is alleged to have caused.

(B) *Disgorgement or forfeiture.* Provided the identification and establishment requirements of paragraphs (b)(2) and (b)(3) of this section are met, restitution may include amounts paid or incurred as disgorgement or forfeiture, if paid or incurred at the direction of a government or governmental entity directly to the person, as defined in section 7701(a)(1), harmed by the violation or potential violation of any law or to, or at the direction of, the government or governmental entity, to establish a segregated fund or account for the benefit of such harmed person. This paragraph (e)(4)(i)(B) does not apply if the order or agreement identifies the payment amount as in excess of the taxpayer's net profits or, pursuant to the order or agreement, the amounts are disbursed to the general account of the government or governmental entity for general enforcement efforts or other discretionary purposes.

(C) *Segregated funds or accounts.* Provided the identification and establishment requirements of paragraphs (b)(2) and (b)(3) of this section are met, restitution or remediation may include amounts paid or incurred, pursuant to an order or agreement, to a segregated fund or account to restore, in whole or in part, the person, as defined in section 7701(a)(1); government; governmental entity; property; environment; wildlife; or natural resources harmed, injured, or damaged by the violation or potential violation of any law described in paragraph (a)(3) of this section. This paragraph (e)(4)(i)(C) does not apply if, pursuant to the order or agreement, the amounts are disbursed to the general account of the government or governmental entity for general enforcement efforts or other discretionary purposes.

(ii) *Amounts to come into compliance with a law.* An amount is paid or incurred to come into compliance with a law that the taxpayer has violated, or is alleged to have violated, by performing services; taking action, such as modifying equipment; providing property; or doing any combination thereof to come into compliance with that law.

(iii) *Amounts not included.* Regardless of whether the order or agreement identifies them as such, restitution, remediation, and amounts paid to come into compliance with a law do not include any amount paid or incurred—

(A) As reimbursement to a government or governmental entity for investigation costs or litigation costs incurred in such government or governmental entity's investigation into, or litigation concerning, the violation or potential violation of any law; or

(B) At the taxpayer's election, in lieu of a fine or penalty.

(5) *Suit, agreement, or otherwise.* A suit, agreement, or otherwise includes,

but is not limited to, suits; settlement agreements; orders; non-prosecution agreements; deferred prosecution agreements; judicial proceedings; administrative adjudications; decisions issued by officials, committees, commissions, or boards of a government or governmental entity; and any legal actions or hearings which impose a liability on the taxpayer or pursuant to which the taxpayer assumes liability.

(f) *Examples.* The application of this section is illustrated by the following examples.

(1) *Example 1.* (i) *Facts.* Corp. A enters into an agreement with State Y's environmental enforcement agency (Agency) for violating state environmental laws. Pursuant to the agreement, Corp. A pays $40X to the Agency in civil penalties, $80X in restitution for the environmental harm that the taxpayer has caused, $50X for remediation of contaminated sites, and $60X to conduct comprehensive upgrades to Corp. A's operations to come into compliance with the state environmental laws.

(ii) *Analysis.* The identification requirement is satisfied for those amounts the agreement identifies as restitution, remediation, or to come into compliance with a law. If Corp. A meets the establishment requirement, as provided in paragraph (b)(3), paragraph (a) of this section will not disallow Corp. A's deduction for $80X in restitution and $50X for remediation. Under paragraph (a) of this section, Corp. A may not deduct the $40X in civil penalties. Paragraph (a) of this section will not disallow Corp. A's deduction for the $60X paid to come into compliance with the state environmental laws. See section 161, concerning items allowed as deductions, and section 261, concerning items for which no deduction is allowed, and the regulations related to sections 161 and 261.

(2) *Example 2.* (i) *Facts.* Corp. A enters into an agreement with State T's securities agency (Agency) for violating a securities law by inducing B to make a $100X investment in Corp. C stock, which B lost when the Corp. C stock became worthless. As part of the agreement, Corp. A agrees to pay $100X to B as restitution for B's investment loss, incurred as a result of Corp. A's actions. The agreement specifically states that the $100X payment by Corp. A to B is restitution. The agreement also requires Corp. A to pay a $40X penalty for violating Agency law. Corp. A pays the $140X.

(ii) *Analysis.* Corp. A's $100X payment to B is identified in the agreement as restitution. If Corp. A establishes, as provided in paragraph (b)(3) of this section, that the amount paid was for that purpose, paragraph (a) of this section will not disallow Corp. A's deduction for the $100X payment. Under paragraph (a) of this section, Corp. A may not deduct its $40X payment to the Agency because it was paid for Corp. A's violation of Agency law.

(3) *Example 3.* (i) *Facts.* Corp. B is under investigation by State X's environmental enforcement agency for a potential violation of State X's law governing emissions standards. Corp. B enters into an agreement with State X under which it agrees to upgrade the engines in a fleet of vehicles that Corp. B operates to come into compliance with State X's law. Although the agreement does not provide the specific amount Corp. B will incur to upgrade the engines to come into compliance with State X's law, it identifies that Corp. B must upgrade existing engines to lower certain emissions. Under the agreement, Corp. B also agrees to construct a nature center in a local park for the benefit of the community. Instead of paying $12X, to come into compliance with State X's law, Corp. B pays $15X to upgrade the engines to a standard higher than that which the law requires. Corp. B presents evidence to establish that it would cost $12X to upgrade the engines to come into compliance with State X's law.

(ii) *Analysis.* Because the agreement describes the specific action Corp. B must take to come into compliance with State X's law, and Corp. B provides evidence, as described in paragraph (b)(3)(ii) of this section, to establish that the agreement obligates it to incur costs to come into compliance with a law, paragraph (a) of this section will not disallow Corp. B's deduction for the $12X Corp. B incurs to come into compliance. Corp. B may also deduct the $3X if it is otherwise deductible under chapter 1 of the Code. However, Corp. B may not deduct the amounts paid to construct the nature center because no facts exist to establish that the amount was paid either to come into compliance with a law or as restitution or remediation.

(4) *Example 4.* (i) *Facts.* Corp. D enters into an agreement with governmental entity, Trade Agency, for engaging in unfair trade practices in violation of Trade Agency laws. The agreement requires Corp. D to pay $80X to a Trade Agency fund, through disgorgement of net profits, to be used exclusively to pay restitution to the consumers harmed by Corp. D's violation of Trade Agency law. Corp. D pays $80X to Trade Agency fund and Trade Agency disburses all amounts in the restitution fund to the harmed consumers.

(ii) *Analysis.* The agreement identifies the $80X payment to the fund as restitution. Trade Agency uses the funds exclusively to provide restitution to the harmed consumers and does not use it for discretionary or general enforcement purposes. If Corp. D establishes, as provided in paragraph (b)(3) of this section, that the $80X constitutes restitution under paragraph (e)(4)(i)(B) of this section, paragraph (a) of this section does not apply.

(5) *Example 5.* (i) *Facts.* B, a regulated banking institution, is subject to the supervision of, and annual examinations by governmental entity, R. In the ordinary course of its business, B is required to pay annual assessment fees to R, which fees are used to support R in supervising and examining banking institutions to ensure a safe and sound banking system. Following an annual examination conducted in the ordinary course of B's business, R issues a letter to B identifying concerns with B's internal compliance functions. B takes corrective action to address R's concerns by investing in its internal compliance functions. R does not conduct an investigation or inquiry into B's potential violation of any law.

(ii) *Analysis.* The payment of annual assessment fees by B to R in the ordinary course of business is not related to the violation of any law or the investigation or inquiry into the potential violation of any law. In addition, B's costs of taking the corrective action are not related to the violation of any law or the investigation or inquiry into the potential violation of any law as described in section 162(f)(1). Paragraph (a) of this section will not disallow the deduction of the annual assessment fees and the cost of the corrective actions.

(6) *Example 6.* (i) *Facts.* B, a regulated banking institution, is subject to the supervision of, and annual examinations by governmental entity, R. Following an annual examination conducted in the ordinary course of B's business, R pursues an enforcement action against B for violation of banking laws. B and R enter a settlement agreement, pursuant to which B agrees to undertake certain improvements to come into compliance with banking laws and to pay R $20X for violation of banking laws. B pays the $20X.

(ii) *Analysis.* If the agreement meets the identification requirement of paragraph (b)(2) of this section and B meets the establishment requirement of paragraph (b)(3) of this section, paragraph (a) of this section will not

disallow the deduction of the costs of the corrective actions to come into compliance with banking laws. However, B may not deduct the $20X paid to R because the amount was not paid to come into compliance with a law or as restitution or remediation.

(7) *Example 7.* (i) *Facts.* Corp. C contracts with governmental entity, Q, to design and build a rail project within five years. Corp. C does not complete the project. Q sues Corp. C for breach of contract and damages of $10X. A jury finds Corp. C breached the contract and Corp. C pays $10X to Q.

(ii) *Analysis.* The suit arose out of a proprietary contract, wherein Q enforced its rights as a private party. Paragraph (a) of this section will not disallow Corp. C's deduction of the payment of $10X pursuant to this suit.

(8) *Example 8.* (i) *Facts.* Corp. C contracts with governmental entity, Q, to design and build a rail project within five years. Site conditions cause construction delays and Corp. C asks Q to pay $50X in excess of the contracted amount to complete the project. After Q pays for the work, it learns that, at the time it entered the contract with Corp. C, Corp. C knew that certain conditions at the project site would make it challenging to complete the project within five years. Q sues Corp. C for withholding critical information during contract negotiations in violation of the False Claims Act (FCA). The court enters a judgment in favor of Q pursuant to which Corp. C will pay Q $50X in restitution and $150X in treble damages. Corp. C pays the $200X.

(ii) *Analysis.* The suit pertains to Corp. C's violation of the FCA. The order identifies the $50X Corp. C is required to pay as restitution, as described in paragraph (b)(2) of this section. If Corp. C establishes, as provided in paragraph (b)(3) of this section, that the amount paid was for restitution, paragraph (a) of this section will not disallow Corp. C's deduction for the $50X payment. Under paragraph (a) of this section, Corp. C may not deduct the $150X paid for the treble damages imposed for violation of the FCA because the order did not identify all or part of the payment as restitution.

(9) *Example 9.* (i) *Facts.* Corp. T operates a truck fleet company incorporated in State A. State A requires that all vehicles registered in State A have a vehicle emissions test every two years. Corp. T's 40 trucks take the emissions test on March 1 for which it pays the $15 per vehicle. Under State A law, if a vehicle fails the emissions test, the vehicle owner has 30 days to certify to State A that the vehicle has been repaired and has passed the emissions test. State A imposes a $1X penalty per vehicle for failure to comply with this 30-day rule. Twenty trucks pass; twenty trucks fail. Corp. T does not submit the required certification to State A for the twenty trucks that failed the emissions test. State A imposes a $40X penalty against Corp. T. Corp. T pays the $40X.

(ii) *Analysis.* Emissions tests are conducted in the ordinary course of operating a truck fleet company and, therefore, paragraph (a) of this section does not apply to the $600 Corp. T pays for the emissions tests. However, Corp. T may not deduct the $40X penalty for failure to comply with State A requirements because the amount is required to be paid to a government in relation to the violation of a law.

(10) *Example 10.* (i) *Facts.* Corp. G operates a chain of 20 grocery stores in County X. Under County X health and food safety code and regulations, Corp. G is subject to annual inspections for which Corp. G is required to pay an inspection fee of $40 per store. Pursuant to the annual inspection, the County X health inspector finds violations of County X's health and food safety code and regulations in three of Corp. G's 20 stores. County X bills Corp. G $800 for the annual inspection fees for the 20 stores and a $1,000 fine for each of the three stores, for a total fine of $3,000, for violations of the health and food safety code. Corp. G pays the fees and fines.

(ii) *Analysis.* Paragraph (a) of this section will not disallow Corp. G's deduction for the $800 inspection fees paid in the ordinary course of a regulated business. Under paragraph (a) of this section, Corp. G may not deduct the $3,000 fine for violation of the County X health code and food safety ordinances because it was paid to a government in relation to the violation of a law.

(11) *Example 11.* (i) *Facts.* Corp. G operates a chain of grocery stores in County X. Under County X health and food safety code and regulations, Corp. G is subject to annual inspections. Pursuant to an annual inspection, the County X health inspector finds that the refrigeration system in one of Corp. G's stores does not keep food at the temperature required by the health and food safety code and regulations. The County X health inspector issues a warning letter instructing Corp. G to correct the violation and bring the refrigeration system into compliance with the law before a reinspection in 60 days or face the imposition of fines if it fails to comply. Corp. G pays $10,000 to bring its refrigeration system into compliance with the law.

(ii) *Analysis.* Provided the identification and establishment requirements of paragraphs (b)(2) and (b)(3), respectively, of this section are met, paragraph (a) of this section will not disallow Corp. G's deduction for the $10,000 it pays to bring its refrigeration system into compliance with the law.

(12) *Example 12.* (i) *Facts.* Corp. G operates a chain of grocery stores in County X. Under County X health and food safety code and regulations, Corp. G is subject to annual inspections. Pursuant to an annual inspection, the County X health inspector finds that the refrigeration system in one of Corp. G's stores does not keep food at the temperature required by the health and food safety code and regulations. The County X health inspector issues a warning letter instructing Corp. G to correct the violation and bring the refrigeration system into compliance with the law before a reinspection in 60 days or face the imposition of fines if it fails to comply. The County X health inspector later reinspects the refrigeration system. Corp. G pays a reinspection fee of $80. During the reinspection, the health inspector finds that Corp. G did not bring its refrigeration system into compliance with the law. The health inspector issues a citation imposing a $250 fine on Corp. G. Corp. G pays the $250 fine.

(ii) *Analysis.* Paragraph (a) of this section will disallow Corp. G's deduction for the $80 inspection fee because it is paid in relation to the investigation or inquiry by County X into the potential violation of a law. Paragraph (a) of this section will also disallow Corp. G's deduction for the $250 fine paid for violation of the law.

(13) *Example 13.* (i) *Facts.* Accounting Firm was convicted of embezzling $500X from Bank in violation of State X law. The court issued an order requiring Accounting Firm to pay $100X in restitution to Bank. The court also issued an order of forfeiture and restitution for $400X, which was seized by the State X officials. Accounting Firm paid $100X to Bank. The $400X seized was deposited with Fund within the State X treasury and, at the discretion of the State X Attorney General, was used to support law enforcement programs.

(ii) *Analysis.* Although the order identified the amount forfeited as restitution, paragraph (a) of this section will disallow Accounting Firm's deduction for the $400X forfeited because, under paragraph (e)(4)(i)(B)(I) of this section, it does not constitute restitution. If Accounting Firm establishes, as provided in paragraph (b)(3) of this section, that the $100X constitutes restitution under paragraph (e)(4)(i), paragraph (a) of this section

will not disallow Accounting Firm's deduction for the $100X paid, provided the $100X is otherwise deductible under chapter 1.

(g) *Applicability date.* The rules of this section apply to taxable years beginning on or after January 19, 2021, except that such rules do not apply to amounts paid or incurred under any order or agreement pursuant to a suit, agreement, or otherwise, which became binding under applicable law before such date, determined without regard to whether all appeals have been exhausted or the time for filing appeals has expired.

■ **Par. 3.** Add § 1.6050X–1 to read as follows:

§ 1.6050X–1 Information reporting for fines, penalties, and other amounts by governments, governmental entities, and nongovernmental entities treated as governmental entities.

(a) *Information reporting requirement.* The appropriate official, as defined in paragraph (f)(1) of this section, of a government, as defined in paragraph (f)(2) of this section, a governmental entity, as defined in paragraph (f)(3) of this section, or nongovernmental entity treated as a governmental entity, as defined in paragraph (f)(4) of this section, that is a party to a suit or agreement to which section 6050X(a)(1) and (a)(2) applies, must—

(1) File an information return, as described in paragraph (b) of this section, if the aggregate amount the payor, as defined in paragraph (f)(5) of this section, is required to pay pursuant to all court orders (orders) and settlement agreements (agreements), relating to the violation of any law, or the investigation or inquiry into the potential violation of any law, equals or exceeds the threshold amount provided in paragraph (f)(6) of this section;

(2) Furnish a written statement as described in paragraph (c) of this section to each payor; and

(3) Request the payor's taxpayer identification number (TIN) if it is not already known, and notify the payor that the law requires the payor to furnish a TIN for inclusion on the information return and that the payor may be subject to a penalty for failure to furnish the TIN. See sections 6723, 6724(d)(3), and § 301.6723–1 of this chapter. The TIN may be requested in any manner, and the payor may provide the TIN in any manner, including orally, in writing, or electronically. If the TIN is furnished in writing, no particular form is required. Form W–9, Request for Taxpayer Identification Number and Certification, may be used, or the request may be incorporated into documents related to the order or agreement.

(b) *Requirement to file return*—(1) *Content of information return.* The information return must provide the following:

(i) The amount required to be paid to, or at the direction of, a government or governmental entity, pursuant to section 6050X(a)(1)(A), as a result of the orders and/or agreements;

(ii) The separate amounts required to be paid as restitution, remediation, or to come into compliance with a law, as described in section 6050X(a)(1)(B) and (C), as a result of the orders and/or agreements;

(iii) The payor's TIN; and

(iv) Any additional information required by the information return and the related instructions.

(2) *Form and manner of reporting.* The appropriate official required to file an information return, under paragraph (a)(1) of this section, must file Form 1098–F, Fines, Penalties, and Other Amounts, or any successor form, as provided by the instructions, with Form 1096, Annual Summary and Transmittal of U.S. Information Returns.

(3) *Multiple orders and/or agreements.* The appropriate official must file only one Form 1098–F for amounts required to be paid as a result of multiple orders and/or agreements with respect to the violation, investigation, or inquiry.

(4) *Time of reporting.* Returns required to be made under paragraph (a) of this section must be filed with the Internal Revenue Service (IRS) on or before February 28 (March 31 if filed electronically) of the year following the calendar year in which the orders and/or agreements become binding under applicable law, determined without regard to whether all appeals have been exhausted or the time for filing an appeal has expired.

(c) *Requirement to furnish written statement*—(1) *In general.* The appropriate official must furnish a written statement to each payor for which it is required to file an information return under paragraphs (a)(1) and (b) of this section. The written statement must include:

(i) The information that was reported to the IRS relating to such payor; and

(ii) A legend that identifies the statement as important tax information that is being furnished to the IRS.

(2) *Copy of the Form 1098–F.* The appropriate official may satisfy the requirement of this paragraph (c) by furnishing a copy of the Form 1098–F, or any successor form, filed regarding the payor, or another document that contains the information required by paragraph (c)(1) of this section if the document conforms to applicable revenue procedures or other guidance relating to substitute statements. See § 601.601 of this chapter.

(3) *Time for furnishing written statement.* The appropriate official must furnish the written statement to the payor on or before January 31 of the year following the calendar year in which the order or agreement becomes binding under applicable law, determined without regard to whether all appeals have been exhausted or the time for filing an appeal has expired.

(d) *Rules for multiple payors*—(1) *Multiple payors—individual liability.* If, pursuant to an order or agreement, multiple individually liable payors are liable to pay, for the violation of any law, or the investigation or inquiry into the potential violation of any law, an amount that, in the aggregate, equals, or exceeds, the threshold amount under paragraph (f)(6) of this section, the appropriate official must file an information return under paragraphs (a)(1) and (b) of this section to report the amount required to be paid by each payor, even if a payor's payment liability is less than the threshold amount. The appropriate official must furnish a written statement, under paragraph (c) of this section, to each payor. If more than one person, as defined in section 7701(a)(1), is a party to an order or agreement, there is no information reporting requirement, or requirement to furnish a written statement, with respect to any person who does not have a payment obligation or obligation for costs to provide services or to provide property.

(2) *Multiple payors—joint and several liability.* If, pursuant to an order or agreement, multiple payors are jointly and severally liable to pay, for the violation of any law, or the investigation or inquiry into the potential violation of any law, an amount that, in the aggregate, equals or exceeds the threshold amount under paragraph (f)(6) of this section, the appropriate official must file an information return, under paragraphs (a)(1) and (b) of this section for each of the jointly and severally liable payors. Each information return must report all amounts required to be paid by all of the payors pursuant to the order or agreement. The appropriate official must furnish a written statement, under paragraph (c) of this section, to each of the jointly and severally liable payors.

(e) *Payment amount not identified.* If some or all of the payment amount is not identified, as described in § 1.162–21(b)(2)(iii), for paragraphs (a), (b), and (c) of this section, the appropriate

official must file an information return, and furnish the written statement to the payor, as provided by the instructions to Form 1098–F, or any successor form, including instructions as to the amounts (if any) to include on Form 1098–F, only if the government or governmental entity reasonably expects that the aggregate amount required to be paid or incurred pursuant to the order or agreement, relating to the violation of any law, or the investigation or inquiry into the potential violation of any law, will equal or exceed the threshold amount under paragraph (f)(6) of this section.

(f) *Definitions.* The following definitions apply under this section:

(1) *Appropriate official*—(i) *One government or governmental entity.* If the government or governmental entity has not assigned one of its officers or employees to comply with the reporting requirements of paragraph (a), (b), and (c) of this section, the term *appropriate official* means the officer or employee of a government or governmental entity having control of the suit, investigation, or inquiry. If the government or governmental entity has assigned one of its officers or employees to comply with the reporting requirements of paragraph (a), (b), and (c) of this section, such officer or employee is the appropriate official.

(ii) *More than one government or governmental entity*—(A) *In general.* If more than one government or governmental entity is a party to an order or agreement, only the appropriate official of the government or governmental entity listed first on the most recently executed order or agreement is responsible for complying with all reporting requirements under paragraphs (a), (b), and (c) of this section, unless another appropriate official is appointed by agreement under paragraph (f)(1)(ii)(B) of this section.

(B) *By agreement.* The governments or governmental entities that are parties to an order or agreement may agree to appoint one or more other appropriate officials to be responsible for complying with the information reporting requirements of paragraphs (a), (b), and (c) of this section.

(2) *Government.* For purposes of this section, *government* means the government of the United States, a State, the District of Columbia, or a political subdivision (such as a local government unit) of any of the foregoing.

(3) *Governmental entity.* For purposes of this section, *governmental entity* means—

(i) A corporation or other entity serving as an agency or instrumentality of a government (as defined in paragraph (f)(2) of this section), or

(ii) A nongovernmental entity treated as a governmental entity as described in paragraph (f)(4) of this section.

(4) *Nongovernmental entity treated as governmental entity.* For purposes of this section, the definition of nongovernmental entity treated as a governmental entity as set forth in § 1.162–21(e)(3) applies but does not include a nongovernmental entity of a territory of the United States, including American Samoa, Guam, the Northern Mariana Islands, Puerto Rico, or the U.S. Virgin Islands, a foreign country, or an Indian tribe.

(5) *Payor.* The payor is the person, as defined in section 7701(a)(1), which, pursuant to an order or agreement, has paid or incurred, or is liable to pay or incur, an amount to, or at the direction of, a government or governmental entity in relation to the violation or potential violation of any law. In general, the payor will be the person to which section 162(f) and § 1.162–21 of the regulations apply.

(6) *Threshold amount.* The *threshold amount* is $50,000.

(g) *Applicability date.* The rules of this section apply only to orders and agreements, pursuant to suits and agreements, which become binding under applicable law on or after January 1, 2022, determined without regard to whether all appeals have been exhausted or the time for filing an appeal has expired.

Sunita Lough,

Deputy Commissioner for Services and Enforcement.

Approved: January 7, 2021.

David J. Kautter,

Assistant Secretary of the Treasury (Tax Policy).

Excise Taxes; Transportation of Persons by Air; Transportation of Property by Air; Aircraft Management Services

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the excise taxes imposed on certain amounts paid for transportation of persons and property by air. Specifically, the final regulations relate to the exemption for amounts paid for certain aircraft management services. The final regulations also amend, revise, redesignate, and remove provisions of existing regulations that are out-of-date or obsolete and generally update the existing regulations to incorporate statutory changes, case law, and other published guidance. The final regulations affect persons that provide air transportation of persons and property, and persons that pay for those services.

DATES:

Effective Date: These regulations are effective January 14, 2021.

Applicability Dates: For dates of applicability, see §§ 40.0–1(e), 49.4261–1(g), 49.4261–2(d), 49.4261–3(e), 49.4261–7(k), 49.4261–9(c), 49.4261–10(i), 49.4262–1(f), 49.4262–2(e), 49.4262–3(e), 49.4281–1(e), 49.4263–1(b), 49.4263–3(b), 49.4271–1(g), and 49.4721–2.

SUPPLEMENTARY INFORMATION:

Background

This document amends the Facilities and Services Excise Tax Regulations (26 CFR part 49) under sections 4261, 4262, 4263, 4264, 4271, 4281, and 4282 of the Internal Revenue Code (Code). This document also amends the Excise Tax Procedural Regulations (26 CFR part 40).

Sections 4261 and 4271 impose excise taxes on certain amounts paid for transportation of persons or property, respectively, by air, collectively referred to herein as ''air transportation excise tax.'' Section 13822 of Public Law 115–97, 131 Stat. 2054, 2182 (2017), commonly referred to as the Tax Cuts and Jobs Act (TCJA), added an exception to the air transportation excise tax in new section 4261(e)(5). Specifically, section 4261(e)(5)(A) provides that ''[n]o tax shall be imposed by [section 4261] or section 4271 on any amounts paid by an aircraft owner for aircraft management services related to—(i) maintenance and support of the aircraft owner's aircraft, or (ii) flights on the aircraft owner's aircraft.''

Section 4261(e)(5)(B) defines the term ''aircraft management services'' to include: (a) Assisting an aircraft owner with administrative and support services, such as scheduling, flight planning, and weather forecasting; (b)

obtaining insurance; (c) maintenance, storage, and fueling of aircraft; (d) hiring, training, and provision of pilots and crew; (e) establishing and complying with safety standards; and (f) such other services as are necessary to support flights operated by an aircraft owner.

Section 4261(e)(5)(C)(i) provides that the term ''aircraft owner'' includes a person who leases an aircraft other than under a ''disqualified lease.'' Section 4261(e)(5)(C)(ii) defines the term ''disqualified lease'' for purposes of section 4261(e)(5)(C)(i) as ''a lease from a person providing aircraft management services with respect to the aircraft (or a related person (within the meaning of section 465(b)(3)(C)) to the person providing such services), if the lease is for a term of 31 days or less.''

Finally, section 4261(e)(5)(D) provides that in the case of amounts paid to any person which (but for section 4261(e)(5)) are subject to air transportation excise tax, a portion of which consists of amounts described in section 4261(e)(5)(A), section 4261(e)(5) ''shall apply on a pro rata basis only to the portion which consists of amounts described in'' section 4261(e)(5)(A). The Conference Report accompanying the TCJA, H.R. Rep. No. 115–466, at 536 (2017) (Conference Report), provides that in the event that a monthly payment made to an aircraft management company is allocated in part to exempt services and flights on the aircraft owner's aircraft, and in part to flights on aircraft other than that of the aircraft owner, air transportation excise tax must be collected on that portion of the payment attributable to flights on aircraft not owned by the aircraft owner.

On July 31, 2020, a notice of proposed rulemaking (REG–112042–19) was published in the **Federal Register** (85 FR 46032) under sections 4261, 4262, 4263, 4264, 4271, 4281, and 4282 of the Code, and part 40 of the Excise Tax Procedural Regulations (proposed regulations). No public hearing was requested or held. The Department of the Treasury (Treasury Department) and the IRS received three comments in response to the proposed regulations. The comments addressing the proposed regulations are summarized in the Summary of Comments and Explanation of Revisions section of this preamble. All comments were considered and are available at *www.regulations.gov* or upon request. After full consideration of the comments received, this Treasury decision adopts as final regulations the proposed regulations with the modifications described in the Summary of Comments and Explanation of Revisions section of this preamble.

Summary of Comments and Explanation of Revisions

I. Overview

The final regulations retain the basic approach and structure of the proposed regulations, with certain revisions and modifications. This Summary of Comments and Explanation of Revisions discusses these revisions and modifications as well as the comments received in response to the proposed regulations. The final regulations provide guidance under sections 4261, 4262, 4263, 4264, 4271, 4281, and 4282 of the Code related to air transportation excise tax. The final regulations also provide guidance under part 40 of the Excise Tax Procedural Regulations.

Part II of this Summary of Comments and Explanation of Revisions discusses rules related to the exemption from air transportation excise tax for amounts paid for certain aircraft management services provided in section 4261(e)(5) of the Code (aircraft management services exemption). Part III of this Summary of Comments and Explanation of Revisions discusses § 49.4261–1 and other rules of general applicability related to the excise tax on amounts paid for the transportation of persons by air imposed by section 4261, as well as rules in § 49.4261–7(h)(2) related to aircraft charters. See the Explanation of Provisions section of the proposed regulations for a discussion of the rules under 26 CFR part 40 and 26 CFR part 49 that were included in the proposed regulations, for which no comments were received. Those proposed rules are adopted by this Treasury decision—except as discussed in parts II and III of this Summary of Comments and Explanation of Revisions—without change.

II. Aircraft Management Services Exemption Rules

a. Definition of Aircraft Management Services

Proposed § 49.4261–10(b)(1) defined the term ''aircraft management services'' to mean the services listed in section 4261(e)(5)(B), as well as ''other services.'' Proposed § 49.4261–10(b)(1)(ii) defined ''other services'' as any service (including, but not limited to, purchasing fuel, purchasing aircraft parts, and arranging for the fueling of an aircraft owner's aircraft) provided directly or indirectly by an aircraft management services provider to an aircraft owner, that is necessary to keep the aircraft owner's aircraft in an airworthy state or to provide air transportation to the aircraft owner on the aircraft owner's aircraft at a level and quality of service required under the agreement between the aircraft owner and the aircraft management services provider.

A commenter stated that the term ''airworthy'' generally indicates that an aircraft—or one or more of its component parts—meets its type design and is in a condition of safe operations. The commenter noted that some services provided by an aircraft management services provider in maintaining an aircraft do not directly pertain to the airworthiness of an aircraft. These services include, but are not limited to, upgrades in equipment, installation of optional equipment, optional modifications, refurbishment of an aircraft interior, and painting of an aircraft's exterior. The commenter suggested that the final regulations remove the phrase ''that is necessary to keep the aircraft owner's aircraft in an airworthy state'' from the definition of ''other services.''

The Treasury Department and the IRS agree with the commenter that the final regulations should clarify that the definition of aircraft management services is not limited to those services necessary to keep an owner's aircraft in an airworthy state. As a result, the final regulations adopt the change suggested by the commenter and remove the phrase ''that is necessary to keep the aircraft owner's aircraft in an airworthy state'' from final § 49.4261–10(b)(1)(ii).

b. Definition of Aircraft Owner

i. Leases

Proposed § 49.4261–10(b)(3)(i) provided that the term ''aircraft owner'' means an individual or entity that leases or owns (that is, holds title to or substantial incidents of ownership in) an aircraft managed by an aircraft management services provider, commonly referred to as a ''managed aircraft.'' Proposed § 49.4261–10(b)(3)(i) further provided that the term ''aircraft owner'' does not include a lessee of an aircraft under a disqualified lease, as defined in proposed § 49.4261–10(b)(4).

Regarding leases that qualify a person as an aircraft owner under proposed § 49.4261–10(b)(3)(i), a commenter noted that while many aircraft leases are in writing and contain provisions that make it clear that the arrangement constitutes a lease, that is not the case for all aircraft leasing arrangements. The commenter further noted that courts have found that the basic attributes of a lease are ''the right to possess, use, and control the aircraft'' (citing *Petit Jean Air Service, Inc* v. *U.S.,* 74–1 U.S.T.C.

16, 135 (E.D. Ark. 1974)). To this end, the commenter suggested that the final regulations add to the end of § 49.4261–10(b)(3)(i) the sentence ''An arrangement (whether written, oral, or implied) that transfers the right to possess, use, and control an aircraft to an individual or entity qualifies as a lease for the purposes of determining whether that individual or entity meets the definition of aircraft owner.''

The Treasury Department and the IRS note that the suggested ''right to possess, use, and control an aircraft'' language from the commenter is nearly identical to the possession, command, and control test created through existing published guidance. As described in the preamble to the proposed regulations, possession, command, and control is a facts-and-circumstances analytical framework that is used to determine whether a person is providing taxable transportation to another person in cases where each of the parties contribute some, but not all, of the elements necessary for complete air transportation services. The possession, command, and control test has caused confusion and uncertainty in the air transportation excise tax area for decades; in fact, it is partly for that reason—and disagreements between the IRS and taxpayers over the application of the possession, command, and control test to aircraft management services arrangements—that section 4261(e)(5) was added to the Code. *See, e.g.,* Conference Report at 535. As explained in the preamble to the proposed regulations, section 4261(e)(5) directly addresses a situation that, but for section 4261(e)(5), would be analyzed using the possession, command, and control test. The preamble to the proposed regulations further explained that in situations to which the aircraft management services exemption applies, the possession, command, and control test is not relevant.

As a result, the Treasury Department and the IRS decline to introduce into the final regulations a test that is similar to a test that has been the source of confusion, uncertainty, disagreement, and difficulties in administration. Therefore, the final regulations do not adopt the language the commenter proposed to be added to the end of § 49.4261–10(b)(3)(i) and do not provide a special definition of the term ''lease'' solely for purposes of the aircraft management services exemption.

ii. Owner Trusts

A commenter requested clarification regarding whether trustees and beneficiaries of ''owner trusts'' qualify as aircraft owners for purposes of the aircraft management services exemption. The commenter described an owner trust as an ownership structure used for the limited purpose of registering an aircraft in the U.S. with the Federal Aviation Administration (FAA). The structure, which is sanctioned by the FAA, is commonly used by non-U.S. persons to satisfy the U.S. citizenship requirements applicable to registering an aircraft with the FAA. Most owner trusts are established using one of a small number of U.S.-based aviation trust companies—which are not related to the trust beneficiary—as trustee. The trustee holds legal title to the aircraft and satisfies the U.S. citizenship requirement for purposes of registering the aircraft with the FAA, thereby permitting registration in the U.S. of an aircraft that would otherwise be ineligible for such registration.

The commenter stated that an owner trust agreement works in conjunction with an operating agreement that, generally, is separate from, but closely related to, the trust agreement. The operating agreement may contain explicit lease language or may instead use the term ''license to use'' and provides that the beneficiary holds the exclusive right to lease or license and to possess, use, and operate the aircraft (typically requiring a nominal rent or license payment to the trustee, or in some cases, no payment at all). Regardless of how the transfer of control is described in the operating agreement, the result is that the beneficiary holds the exclusive right to lease or license the aircraft, and to possess, use, and operate the aircraft. An operating agreement will usually require that the beneficiary retain the crew and maintain the aircraft per FAA guidance and manufacturer's recommendations. The commenter stated that the relationship created through the operating agreement is consistent with the trustee's status as a holder of only bare legal title, sometimes referred to as ''nominal title,'' to the aircraft.

In addition, the commenter explained that the beneficiary of an owner trust holds many of the attributes of aircraft ownership, other than legal title. The attributes of aircraft ownership that the beneficiary possesses include: The right to any income generated by—and obligation to pay all expenses associated with—the aircraft; the upside benefit or downside risk as to the aircraft's value; bearing the risk of loss; being considered the owner of the aircraft for Federal income tax purposes; and discretion as to when to sell the aircraft. The commenter noted that since both the trustee and the beneficiary of an owner trust are owners of interests in the aircraft, payments for aircraft management services from either party should be eligible for the aircraft management services exemption. The commenter further noted that regardless of whether the operating agreement is written in terms of a lease or a license, the arrangement is not a disqualified lease (as that term was defined in proposed § 49.4261–10(b)(4)).

For purposes of section 4261(e)(5), such an operating agreement between the trustee and the beneficiary of an owner trust is treated as a lease, regardless of whether the document expressly refers to the arrangement as a lease. Therefore, under the terms of the operating agreement, the beneficiary of an owner trust is the lessee of the aircraft held in trust. Both section 4261(e)(5)(C) and proposed § 49.4261–10(b)(3) recognize lessees, other than lessees under a disqualified lease, as an aircraft owner.

Based on the foregoing, the final regulations include a definition of ''owner trust.'' The final regulations also clarify that the beneficiary of an owner trust is an ''aircraft owner'' so long as the lease is not a disqualified lease.

iii. Affiliated Groups, Disregarded Entities, and Other Close Relationships

As discussed in the preamble to the proposed regulations, the proposed regulations applied the principle of statutory interpretation that, as matters of legislative grace, exemptions to tax should be narrowly construed. Therefore, the proposed regulations defined ''aircraft owner'' as an individual or entity that leases (other than under a disqualified lease) or owns (that is, holds title to or substantial incidents of ownership in) an aircraft managed by an aircraft management services provider. The proposed regulations did not include in the definition of ''aircraft owner'' persons that are related to the aircraft owner (for example, another member of the same affiliated group (as defined in section 4282 of the Code)), but are not the aircraft owner itself. As a result, under the proposed regulations, the aircraft management services exemption applied only to payments for aircraft management services that are made by the actual aircraft owner or lessee.

A commenter disagreed with the assertion in the preamble to the proposed regulations that treating payments from parties who are directly related to an aircraft owner as though they were from the aircraft owner, and thus exempt from air transportation excise tax, ''would effectively expand

the exemption [provided in section 4261(e)(5)] in a manner not authorized by Congress.'' The commenter claimed that this assertion is at odds with other Code provisions and implies an unduly narrow and formalistic interpretation of the statute that is inconsistent with the flexible approach otherwise evinced in the proposed regulations. The commenter further claimed that the assertion has no basis in the legislative history, but rather the legislative history implies that at least some related-party payments of aircraft management fees should be excluded from air transportation excise tax under section 4261(e)(5).

The commenter noted that while the statute and legislative history are relatively silent about who or what the term ''aircraft owner'' includes, the legislative history enumerates several examples of what the term *does not* include. Specifically, the legislative history states that the term ''aircraft owner'' does not include ownership of stock in a commercial airline or participation in a fractional aircraft ownership program. The commenter stated that the legislative history expresses Congress's concern about the use of the aircraft management services exemption to circumvent the ordinary application of air transportation excise tax as contemplated in other Code provisions. By negative inference, the commenter reasoned, Congress did not express any similar concerns if the aircraft management services exemption applied to payments made by a party related to the aircraft owner. The commenter asserted that the narrow interpretation of ''aircraft owner'' in the proposed regulations does nothing to further Congress's goal of preventing arrangements designed to circumvent the ordinary application of air transportation excise tax.

The commenter asserted that when an affiliated corporation in a corporate group pays for aircraft management services on behalf of an aircraft owning corporate entity within the group, there is no avoidance of air transportation excise tax. Further, the commenter asserted that there is statutory precedent for ignoring the distinction among corporate entities in the air transportation excise tax area; specifically, the commenter pointed to the affiliated group exemption provided in section 4282 of the Code. Under section 4282(a), if one member of an affiliated group is the owner or lessee of an aircraft, and such aircraft is not available for hire by persons who are not members of such group, air transportation excise tax does not apply to any payment received by one member of the affiliated group from another member of such group for services furnished to such other member in connection with the use of such aircraft. Citing the legislative history to section 4282 (*see* S. Rep. No. 91–706 at 17–18, 1970–1 C.B. 386), the commenter asserted that section 4282 captures Congress's general approach to related-party payments in the area of air transportation excise tax; that is, Congress decided to ignore nominal ownership of an aircraft by one member of an affiliated group and instead looked to the true economic ownership of the aircraft by the group. The commenter asserted that the final regulations should do the same and ignore the formalities of nominal ownership of an aircraft and apply the aircraft management services exemption to payments by any party that is the true economic owner of the aircraft.

The commenter requested that the Treasury Department and the IRS consider expanding the definition of ''aircraft owner'' to include disregarded entities, members of an affiliated group, and family members. The commenter also noted that it is not uncommon for an individual to operate an aircraft but place title to the aircraft in a single member limited liability company (SMLLC) and that such arrangement is, in effect, a constructive lease, but that state law concepts of constructive leases will result in needless and complex controversy.

Another commenter similarly requested that the Treasury Department and the IRS consider expanding the definition of ''aircraft owner'' to include the single member of a SMLLC that holds title to an aircraft. The commenter reasoned that if the member pays an aircraft management services provider for aircraft management services on behalf of the SMLLC, it is economically indistinguishable from a case in which the individual first transfers funds into the SMLLC and then the SMLLC pays the aircraft management services provider. In either situation, the commenter asserted, there is no circumvention of air transportation excise tax; the only difference is who writes the check paying the aircraft management services provider.

The Treasury Department and the IRS continue to have the concerns described in the preamble to the proposed regulations. Specifically, the Treasury Department and the IRS are concerned that extending the aircraft management services exemption to payments made by certain related parties—as suggested by the commenters—would effectively ignore the requirement that payments be made by the ''aircraft owner.'' Such an interpretation would be inconsistent with a plain reading of the statute and would violate a fundamental principle of statutory construction—that effect must be given, if possible, to every word Congress uses in the statute. *See U.S.* v. *Menasche,* 348 U.S. 528, 538–539 (1955).

Further, as described in the preamble to the proposed regulations, a fundamental aspect of administering the Federal excise tax laws is respecting each entity as an entity separate from its owner. *See* § 1.1361–4(a)(8) of the Income Tax Regulations and § 301.7701–2(c)(2)(v) of the Procedure and Administration Regulations. This longstanding treatment of a wholly-owned entity as an entity separate from its owner for Federal excise tax purposes applies even though the entity may not be viewed as separate from its owner for Federal income tax purposes. Consistent with this longstanding treatment, final § 40.0–1(d) of the Excise Tax Procedural Regulations makes it clear that each business unit that is required to have a separate Employer Identification Number is treated as a separate person. The Treasury Department and the IRS decline to create what would effectively be an exception to the way certain entities are treated for Federal excise tax purposes because this would create unnecessary confusion among taxpayers and IRS examiners. For example, it would not be appropriate to respect an entity for fuel excise tax liability and reporting purposes but then disregard the same entity for purposes of the aircraft management services exemption even though a transaction may involve the same aircraft.

Based on the foregoing, the final regulations do not generally incorporate the commenters' request to expand the definition of ''aircraft owner'' to include disregarded entities, members of an affiliated group, or family members of the owner. Instead, the final regulations clarify that amounts paid for aircraft management services by a party related to the aircraft owner (including members of an affiliated group, members of a limited liability company, disregarded entities, and family members) are not amounts paid by the aircraft owner solely by virtue of the relationship between the aircraft owner and the related party. The final regulations further clarify that if one related party leases an aircraft to another related party, amounts paid by the lessee to an aircraft management services provider for aircraft management services related to the leased aircraft qualify for the aircraft management services exemption,

provided the lease is not a disqualified lease and all other requirements of section 4261(e)(5) are satisfied.

v. Principal-Agent

Proposed § 49.4261–10(a)(1) provided, in relevant part, that the aircraft management services exemption does not apply to amounts paid to an aircraft management services provider on behalf of an aircraft owner (other than in a principal-agent scenario in which the aircraft owner is the principal).

A commenter requested that the final regulations clarify what relationships qualify as a ''principal-agent scenario'' for purposes of qualifying payments for the aircraft management services exemption. The commenter noted that all entities, depending on the type of entity formation, have one or more officers, directors, managers, members or partners that may be in a principal-agent relationship with an aircraft owner. Therefore, the commenter suggested that the final regulations clarify that for purposes of § 49.4261–10(a)(1), officers and directors of corporations, managers and members of limited liability companies (LLCs), and partners of a partnership are deemed agents when such corporations, LLCs, or partnerships are the aircraft owner. Alternatively, the commenter suggested that the final regulations clarify that the agency laws of the individual fifty states should be recognized for purposes of determining whether a principal-agent relationship exists between an aircraft owner and another person.

As a general matter, for Federal tax purposes, state agency law applies in determining whether a principal-agent relationship exists. Likewise, in the context of the aircraft management services exemption, state law applies in determining whether the relationship between the aircraft owner and another person is a principal-agent relationship. Therefore, the final regulations adopt the principal-agent language from the proposed regulations as written. The Treasury Department and the IRS will consider providing additional guidance on this issue and invite comments regarding whether a principal-agent rule that relates specifically to the aircraft management services exemption is necessary. Any comments that favor additional guidance should include suggestions for how a more detailed principal-agent rule should be structured. Unless and until the Treasury Department and the IRS provide additional guidance, state agency law applies in determining whether a principal-agent relationship exists between the aircraft owner and another person.

vi. Evidence That Payments Are Made by the Aircraft Owner

Regarding proposed § 49.4261–10(a)(3), a commenter requested that the final regulations clarify what facts or evidence are sufficient to show that the aircraft owner is the party making the payments to the aircraft management services provider so that those payments qualify for the aircraft management services exemption. The commenter suggested that the final regulations provide that ''reasonable documentation'' from the aircraft owner stating that payments for aircraft management services originate from a source covered by the aircraft management services exemption will satisfy the aircraft management services provider's obligation to determine whether a payment comes from a permissible source and constitutes adequate documentation thereof. The commenter believes that including this rule in the final regulations will improve administrability for both aircraft management services providers and the IRS.

The task of verifying the source of every payment received by an aircraft management services provider for services related to an aircraft owner's aircraft is a burdensome one for aircraft management services providers. Verification is important because if a payment is received from someone other than the aircraft owner (as that term is defined in the final regulations), the aircraft management services exemption does not apply and the aircraft management services provider must collect any applicable air transportation tax on the amount paid. If the aircraft management services provider fails to do so, section 4263(c) applies. *See also* § 49.4261–1(b)(2).

The Treasury Department and the IRS recognize that in the context of the aircraft management services exemption, it is important for aircraft management services providers to understand their obligations with regard to verifying that payments are made by aircraft owners and that failure to verify may trigger the application of section 4263(c). However, because section 4263(c) has broad implications for all members of the air transportation industry, issues related to section 4263(c) require additional study and input from a broader cross-section of stakeholders in the air transportation industry. Accordingly, these issues should be addressed in a separate published guidance project.

vii. Substantial Incidents of Ownership

Proposed § 49.4261–10(b)(3)(i) provided, in relevant part, that the term ''aircraft owner'' means an individual or entity that leases or owns (that is, holds title to or substantial incidents of ownership in) an aircraft managed by an aircraft management services provider, commonly referred to as a ''managed aircraft.'' The Treasury Department and IRS did not receive comments specifically relating to the ''substantial incidents of ownership'' language. However, the ''substantial incidents of ownership'' language is problematic because, among other things, it creates an opportunity for abuse by providing a mechanism by which parties can circumvent the disqualified lease rule in section 4261(e)(5)(C). For example, parties that wish to enter into an aircraft lease for 31 days or less could structure the transaction as a transfer of substantial incidents of ownership in the aircraft for a period of 31 days or less. By doing so, the parties could avoid creating a disqualified lease while still availing themselves of the exemption in section 4261(e)(5). Congress clearly did not intend for the aircraft management services exemption to apply in such situations as evidenced by the disqualified lease language in section 4261(e)(5)(C). Because of these concerns, the final regulations clarify that the phrase ''substantial incidents of ownership'' in § 49.4261–10(b)(3)(i) does not apply to an interest with a duration of 31 days or less.

viii. Other Changes Related to the Definition of Aircraft Owner

As stated earlier, proposed § 49.4261–10(b)(3)(i) defined ''aircraft owner'', in relevant part, in terms of ''an individual or entity.'' Final § 49.4261–10(b)(3)(i) replaces the phrase ''individual or entity'' with the word ''person.'' This change improves the precision of the aircraft owner definition because the Code provides a generally applicable definition of ''person'' in section 7701(a)(1). This change also makes § 49.4261–10(b)(3)(i) easier to read.

b. Fractional Ownership Aircraft and Other Arrangements

Proposed § 49.4261–10(b)(3)(ii) provided that a participant in a fractional aircraft ownership program, as defined in section 4043(c)(2) of the Code, does not qualify as an aircraft owner of the program's managed aircraft if the amount paid for such person's participation is exempt from air transportation excise tax by reason of section 4261(j). Proposed § 49.4261–10(b)(3)(ii), referred to herein as the

''other arrangements anti-abuse rule,'' further provided that a participant in a business arrangement that seeks to circumvent the surtax imposed by section 4043 by operating outside of subpart K of 14 CFR part 91, and that allows an aircraft owner the right to use any of a fleet of aircraft (through an aircraft interchange agreement, through holding nominal shares in a fleet of aircraft, or any other similar arrangement), is not an aircraft owner with respect to any of the aircraft owned or leased as part of that business arrangement.

A commenter observed that the other arrangements anti-abuse rule appears to be aimed at persons who create a structure providing access to a fleet of aircraft that fails to meet the definition of ''fractional ownership aircraft program'' in section 4043 in an effort to avoid the fuel surtax imposed by section 4043, while retaining the right to claim the aircraft management services exemption to also avoid paying air transportation excise tax. The commenter further observed that the phrase ''seeking to circumvent the surtax imposed by section 4043'' in the other arrangements anti-abuse rule indicates that for the rule to apply, the primary intent in creating the arrangement must be to avoid the section 4043 surtax. Thus, the commenter noted, if there is a legitimate non-tax business purpose for creating the structure, the other arrangements anti-abuse rule should not apply, and the aircraft management services exemption should apply to amounts paid for aircraft management services relating to the aircraft in the structure. The commenter also observed that the phrase ''right to use any of a fleet of aircraft (through an aircraft interchange agreement, through holding nominal shares in a fleet of aircraft, or any other similar arrangement)'' in the proposed rule appears to apply to structures that are akin to fractional programs, but do not meet the definition of a fractional program in section 4043(c)(2).

Based on the foregoing observations, the commenter disagreed with several aspects of the other arrangements anti-abuse rule. First, the commenter disagreed with the proposed rule as unclear regarding how it would apply to structures that provide access to a fleet of aircraft that exist for reasons unrelated to the applicability of the fuel surtax imposed by section 4043. The commenter further disagreed with the proposed rule for failing to define the point at which a structure becomes enough like a fractional ownership aircraft program for the rule to apply. Finally, the commenter disagreed with the proposed rule because the commenter believes that it can be misinterpreted to include various legitimate structures in which aircraft management services are provided, including (a) instances where a substitute aircraft is provided from the aircraft management services provider's charter fleet (which is addressed in proposed § 49.4261–10(c)); (b) leasing structures where a lessor is providing an insured and maintained aircraft but no pilots (which would not have previously been subject to the tax under the possession, command and control test); and (c) the routine use of interchange agreements between aircraft owners.

The Treasury Department and the IRS share the concerns of the commenter that the proposed other arrangements anti-abuse rule may capture aircraft ownership structures and leasing arrangements that are legitimate and not created for purposes of circumventing the fuel surtax imposed by section 4043. The Treasury Department and the IRS are further concerned that the other arrangements anti-abuse rule would create too much taxpayer uncertainty and confusion, which would be compounded by the similarly worded rule in proposed § 49.4261–10(i) (see later discussion of this rule). As a result, the final regulations in § 49.4261–10(b)(3)(ii) do not include the other arrangements anti-abuse rule. Therefore, the final regulations in § 49.4261–10(b)(3)(ii) merely clarify and confirm that a participant in a fractional ownership aircraft program is not an aircraft owner for purposes of the exemption in section 4261(e)(5) if the amount paid for such person's participation is exempt from the tax imposed by section 4261 by reason of section 4261(j).

c. Definition of Disqualified Lease

Proposed § 49.4261–10(b)(4) provided that the term ''disqualified lease'' has the meaning given to it by section 4261(e)(5)(C)(ii). Proposed § 49.4261–10(b)(4), referred to herein as the ''disqualified lease anti-abuse rule,'' further provided that a disqualified lease also includes any arrangement that seeks to circumvent the rule in section 4261(e)(5)(C)(ii) by providing a lease term that is greater than 31 days but does not provide the lessee with exclusive and uninterrupted access and use of the leased aircraft, as identified by the aircraft's airframe serial number and tail number. In addition, proposed § 49.4261–10(b)(4) provided that the fact that a lease permits the lessee to use the aircraft for for-hire flights, as defined in § 49.4261–10(b)(5), when the lessee is otherwise not using the aircraft does not, because of this fact alone, cause a lease with a term that is greater than 31 days to be a disqualified lease.

A commenter disagreed with the disqualified lease anti-abuse rule as a general matter, because, in the commenter's opinion, it significantly expands the definition of ''disqualified lease'' beyond the definition provided in the statute, ensnaring common non-abusive situations that should not be subject to the rule, and frustrating the intended purpose of the statute. The commenter also disagreed with several specific aspects of the disqualified lease anti-abuse rule. First, the commenter disagreed with the disqualified lease anti-abuse rule for not including language limiting its application to only a lease of an aircraft from a person providing aircraft management services for such aircraft.

Second, the commenter disagreed with the requirement in the disqualified lease anti-abuse rule that the lease should provide the lessee with exclusive and uninterrupted access and use of the leased aircraft as overly broad. The commenter stated that the problem with this aspect of the disqualified lease anti-abuse rule is that many aircraft are leased on a non-exclusive basis for valid business purposes, such as liability protection, state sales and use tax compliance, and FAA regulatory requirements.

Third, the commenter disagreed with the disqualified lease anti-abuse rule as improperly subjecting entity-based co-ownership structures to air transportation excise tax. To illustrate this concern, the commenter offered as an example a situation in which two pilots form a limited liability company to purchase an aircraft. For FAA regulatory compliance reasons, the LLC enters into non-exclusive aircraft dry leases with each of the pilots who will operate the aircraft. Since neither lessee in such an arrangement would have exclusive and uninterrupted use of the aircraft, the proposed disqualified lease anti-abuse rule would cause those otherwise qualified leases to be disqualified leases.

Fourth, the commenter observed that the ''for hire'' language in the disqualified lease anti-abuse rule allows a lessee to use the leased aircraft to provide ''for hire'' flights. The commenter disagreed with this aspect of the rule, stating that an aircraft must typically be leased to an on-demand air taxi operator to conduct such for-hire flights. Therefore, the commenter continued, an aircraft owner may lease its aircraft without a crew on a non-exclusive basis directly to an on-

demand air taxi operator in addition to leasing its aircraft without a crew pursuant to a separate non-exclusive lease to a related party for reasons unrelated to air transportation excise tax; in such a case, the aircraft will be leased to each lessee on a non-exclusive basis. The commenter concluded that, based on the language of the disqualified lease anti-abuse rule, these facts could cause the non-exclusive leases to be disqualified leases.

Finally, the commenter disagreed with the disqualified lease anti-abuse rule because the commenter believes that it is possible that an aircraft owner that provides limited services relating to the aircraft could be deemed an aircraft management services provider based on the broad definitions of the terms ''aircraft management services'' and ''aircraft management services provider.'' The commenter explained that most business aircraft owners provide at least some services, such as insurance, hangarage, or maintenance, when they lease their aircraft for valid business reasons such as liability protection planning, maintenance consistency, insurance requirements, and state sales and use tax compliance.

To illustrate the commenter's concern, the commenter offered the example of an entity that purchases an aircraft and enters into two non-exclusive leases to its parent company and to a sister company with a term greater than 31 days. The lessor may obtain the hangar and the insurance for the aircraft since there is typically one hangar and one insurance policy covering the aircraft even if there is more than one non-exclusive aircraft lessee. Applying the proposed disqualified lease anti-abuse rule to this situation, the commenter concluded that the lessor could be viewed as an aircraft management services provider and the arrangement would be subject to the disqualified lease anti-abuse rule. The commenter further concluded that this scenario would inappropriately broaden the scope of the disqualified lease anti-abuse rule since the statutory language was not meant to apply the disqualified lease provision to lessors that provide only partial or limited services.

The commenter suggested that final § 49.4261–10(b)(4) remove the disqualified lease anti-abuse rule in its entirety so that the regulatory definition of ''disqualified lease'' merely restates the statutory definition of the term.

The Treasury Department and the IRS share the concerns of the commenter, particularly that the disqualified lease anti-abuse rule may capture common, legitimate leasing arrangements. Therefore, the final regulations remove the disqualified lease anti-abuse language from the definition of ''disqualified lease'' in § 49.4261–10(b)(4). As a result, the final version of § 49.4261–10(b)(4) simply defines ''disqualified lease'' by reference to its statutory definition in section 4261(e)(5)(C)(ii).

d. Definition of Private Aviation

Proposed § 49.4261–10(a)(2) limited the aircraft management services exemption to aircraft management services related to aircraft used in private aviation. Proposed § 49.4261–10(b)(6) defined the term ''private aviation'' as the use of an aircraft for civilian flights except scheduled passenger service. A commenter observed that the apparent intent of proposed § 49.4261–10(a)(2), when read in combination with the definition of ''private aviation'' in proposed § 49.4261–10(b)(6), is to prevent the aircraft management services exemption from applying to amounts paid for aircraft management services related to scheduled commercial airline aircraft and flights. The commenter also observed that proposed § 49.4261–10(d) makes clear that the aircraft management services exemption is available for aircraft and flights operated under the charter services rules of part 135 of the FAA regulations (14 CFR part 135). The commenter suggested that the final regulations clarify that ''scheduled passenger service'' refers to flights conducted by airlines that sell tickets on an individual seat basis to the general public. The commenter also suggested that the final regulations further clarify that the term ''private aviation'' includes charter flights operated under part 135 of the FAA regulations.

The Treasury Department and the IRS agree with the commenter that the final regulations should clarify the types of flight operations permitted under the private aviation rule in § 49.4261–10(a)(2). Therefore, the final regulations incorporate the commenter's suggested changes to the definition of private aviation provided in § 49.4261–10(b)(8). Specifically, the final regulations clarify that ''scheduled passenger service'' refers to flights for which tickets are sold on an individual seat basis to the general public. In addition, the definition of private aviation is modified to explicitly include operations conducted under part 135 of the FAA regulations.

e. Section 4261(e)(5)(D)

Section 4261(e)(5)(D) provides that in the case of amounts paid to any person which (but for section 4261(e)(5)) are subject to air transportation excise tax, a portion of which consists of amounts described in section 4261(e)(5)(A), section 4261(e)(5) ''shall apply on a pro rata basis only to the portion which consists of amounts described in'' section 4261(e)(5)(A). The Conference Report provides that in the event that a monthly payment made to an aircraft management company is allocated in part to exempt services and flights on the aircraft owner's aircraft, and in part to flights on aircraft other than that of the aircraft owner, air transportation excise tax must be collected on that portion of the payment attributable to flights on aircraft not owned by the aircraft owner.

Proposed § 49.4261–10(c)(1), which generally tracked the pro rata allocation language in the Conference Report, provided that if an aircraft management services provider provides flight services to an aircraft owner on a substitute aircraft during a calendar quarter, air transportation excise tax applies to that portion of the amounts paid by the aircraft owner to the aircraft management services provider, determined on a pro rata basis, that are related to the flight services provided on the substitute aircraft. Stated differently, the proposed regulations provided that when an aircraft owner is provided flights on a substitute aircraft by an aircraft management services provider (for example, when the aircraft owner's aircraft is unavailable due to maintenance), a portion of the amounts paid by the aircraft owner to the aircraft management services provider is subject to air transportation excise tax.

Proposed § 49.4261–10(c)(2) proposed a method, based on the ratio of flight hours provided on a substitute aircraft compared to the total flight hours provided to the aircraft owner on the aircraft owner's aircraft and on substitute aircraft during a calendar quarter, for calculating the taxable portion of the amount paid to the aircraft management services provider.

A commenter objected to proposed § 49.4261–10(c) as unnecessary; the commenter reasoned that—assuming flights provided on a substitute aircraft are treated as charter flights provided by the aircraft management services provider to the aircraft owner and subject to air transportation excise tax—there is no need for a special calculation to determine the amount paid for such flights. Similarly, again assuming flights provided on a substitute aircraft are treated as charter flights provided by the aircraft management services provider to the aircraft owner and subject to air transportation excise tax, multiple commenters objected to proposed § 49.4261–10(c) because it could result

in air transportation excise tax being applied to the same air transportation twice—once on the amount paid for the charter on the substitute aircraft and then again on a portion of the amount paid for aircraft management services to the aircraft management services provider providing the substitute aircraft.

One commenter offered several comments regarding the allocation methodology in proposed § 49.4261–10(c)(2). First, the commenter disagreed with the proposed allocation methodology because it may result in air transportation excise tax being imposed on amounts paid for non-transportation items. Second, the commenter disagreed with the proposed allocation methodology because it may result in the application of air transportation excise tax to an amount disproportionate to the fair market value of the transportation services actually provided on the substitute aircraft. Third, the commenter disagreed with the proposed allocation methodology because it promotes a loss of revenue to aircraft management services providers. The commenter explained that to avoid having to pay air transportation excise tax on an allocated portion of the amount paid for aircraft management services, the aircraft owner need only hire the replacement aircraft from an operator different than the one that provides aircraft management services to the aircraft owner. Thus, the commenter asserted that the proposed rule incentivizes aircraft owner behavior that will result in lost revenue to the aircraft management services provider. Fourth, the commenter disagreed with the proposed allocation methodology as increasing taxpayer uncertainty because the amount of air transportation excise tax that results from the method will not be known at the time an aircraft management services provider would invoice an aircraft owner for services provided on a substitute aircraft.

A third commenter disagreed with the allocation methodology in proposed § 49.4261–10(c) because the calculation, in the commenter's view, will ordinarily produce nonsensical results since the cost profile of a substitute aircraft will likely be different from the cost profile for the aircraft owner's aircraft. The commenter asserted that averaging the costs of two aircraft with different cost profiles will produce an arbitrary result with no rational relationship to a reasonable, fair market charter rate for flights on the substitute aircraft. The commenter further asserted that the allocation methodology calculation will be further skewed if the aircraft owner-taxpayer owns multiple aircraft with varying flight hours from one quarter to the next, buys or sells aircraft during the quarter, or pays multiple aircraft management services providers rather than a single aircraft management services provider.

All three commenters suggested that the final regulations either completely remove § 49.4261–10(c), as drafted in the proposed regulations, or that the final regulations adopt a different approach than the proposed allocation methodology. All three commenters also suggested that in situations where a substitute aircraft is provided to an aircraft owner, air transportation excise tax should be calculated based on the amount paid by the aircraft owner for the substitute aircraft (that is, in a manner similar to how air transportation excise tax is calculated on amounts paid for charter flights). A commenter also suggested that if an aircraft owner pays less than fair market value for the use of the substitute aircraft, then air transportation excise tax should be calculated on the fair market value rather than the actual amount paid for the substitute aircraft.

In the alternative, if the proposed allocation methodology is incorporated into the final regulations, a commenter suggested that the final regulations provide that when an aircraft owner pays for a substitute aircraft, then the aircraft owner will receive a credit for any air transportation excise tax that it paid in relation to hiring a substitute aircraft against the amount of tax calculated under the allocation methodology. Another commenter suggested that if the proposed allocation methodology is incorporated into the final regulations, then the final regulations provide that an aircraft owner may elect to pay air transportation excise tax on the fair market value of the flight provided on the substitute aircraft rather than pay the air transportation excise tax calculated using the proposed methodology.

The comments prompted the Treasury Department and the IRS to reevaluate the approach taken in the proposed regulations with regard to section 4261(e)(5)(D). Based on this reevaluation, the Treasury Department and the IRS reached two conclusions.

First, section 4261(e)(5)(D) has broader applicability than just the provision of substitute aircraft as evidenced by the plain language of that provision.

Second, the allocation methodology in the proposed regulation is problematic. Specifically, the Treasury Department and the IRS share the concerns expressed by the commenters, particularly with regard to the potential for double taxation and uncertainty under the proposed rule.

For these reasons, the final regulations adopt the general approach suggested by the commenters. Specifically, final § 49.4261–10(c)(1) restates section 4261(e)(5)(D) as a generally applicable rule. Final § 49.4261–10(c)(1) further provides that the tax base for the portion that is subject to the tax imposed by section 4261(a) is the amount paid for such flights or services, provided the amount paid is separable and shown in exact amounts in the records pertaining to the charge. This rule is consistent with commenter suggestions and also reflects the general approach in the air transportation excise tax area that the section 4261(a) tax is imposed on the actual amount paid for taxable transportation. The separability element of the rule is consistent with the rule in § 49.4261–2(c) regarding situations in which a payment covers charges for transportation and nontransportation services. If the portion of the amount paid that is subject to the tax imposed by section 4261(a) is not separable and is not shown in exact amounts in the records pertaining to the charge, the tax base is the fair market value of the flights or services; however, the tax base does not exceed the total amount paid (that is, the sum of the portion that is subject to the tax imposed by section 4261(a) and the portion that consists of amounts described in section 4261(e)(5)(A)). For clarity, the final regulations also include a definition of ''fair market value'' that applies to allocations. The definition of ''fair market value'' is consistent with commenter suggestions.

In addition, final § 49.4261–10(c)(2) treats the provision of a flight on a substitute aircraft to the aircraft owner by an aircraft management services provider as an aircraft charter, with the aircraft owner as the charterer. The final regulations further provide that the allocation rule in final § 49.4261–10(c)(1) applies in determining the tax base.

The final regulations also provide guidance for situations in which a substitute aircraft is used to provide a for-hire flight. In that instance, the final regulations instruct taxpayers and collectors to follow the aircraft charter rules in § 49.4261–7(h)(2).

The final regulations update the first example and add a second example in § 49.4261–10(h) to illustrate these rules.

f. Aircraft Available for Hire

Proposed § 49.4261–10(e)(1) provided that whether an aircraft owner permits

an aircraft management services provider or other person to use its aircraft to provide for-hire flights (for example, when the aircraft is not being used by the aircraft owner or when the aircraft is being moved in deadhead service) does not affect the application of the aircraft management services exemption. Proposed § 49.4261–10(e)(1) further provided that an amount paid for for-hire flights on the aircraft owner's aircraft does not qualify for the aircraft management services exemption. Therefore, under proposed § 49.4261–10(e)(1), an amount paid for a for-hire flight on an aircraft owner's aircraft is subject to air transportation excise tax unless the amount paid is otherwise exempt from air transportation excise tax other than by reason of the aircraft management services exemption.

A commenter expressed concern that the wording of proposed § 49.4261–10(e)(1) may cause confusion and result in the misapplication of air transportation excise tax to amounts paid that should qualify for the aircraft management services exemption. Specifically, the commenter's concern relates to the second and third sentences of proposed § 49.4261–10(e)(1), which explain that amounts paid for for-hire flights are subject to air transportation excise tax. The commenter observed that under section 4261(e)(5), amounts paid by an aircraft owner for flights on the aircraft owner's aircraft are exempt from air transportation excise tax. The commenter further observed that under proposed § 49.4261–10(d), operating an aircraft owner's aircraft under part 135 of the FAA regulations does not affect the application of the aircraft management services exemption. The commenter's concern is that aircraft operations conducted under part 135 of the FAA regulations could arguably be considered for-hire flights; however, proposed § 49.4261–10(e)(1) does not provide a carve-out for part 135 flights paid for by the aircraft owner. Therefore, in order to clarify that amounts paid by an aircraft owner for flights operated under part 135 are not subject to air transportation excise tax, the commenter suggested that the final regulations incorporate a carve-out by modifying the second sentence of proposed § 49.4261–10(e)(1) to read: ''However, an amount paid for for-hire flights on the aircraft owner's aircraft, *except payments made by such aircraft owner,* does not qualify for the section 4261(e)(5) exemption.'' (emphasis added to denote new wording).

The Treasury Department and the IRS agree with the commenter. As a result, final § 49.4261–10(e) incorporates the commenter's suggested change.

g. Coordination With Fuel Tax Provisions

Proposed § 49.4261–10(g) provided that taxable fuel (as defined in section 4083(a)) or any liquid taxable under section 4041(c) that is used as fuel on a flight for which amounts paid are exempt from air transportation excise tax by reason of the aircraft management services exemption is not fuel used in commercial aviation, as that term is defined in section 4083(b). Thus, under the proposed rule, if the aircraft management services exemption applies to amounts paid in relation to a flight, then the higher noncommercial fuel tax rate (as compared to the commercial fuel tax rate) automatically applies to fuel used during such flight.

A commenter stated that proposed § 49.4261–10(g) is inconsistent with the air transportation excise tax-fuel tax statutory scheme and contrary to Congressional intent with regard to that scheme. The commenter asserted that if Congress had intended that all flights qualifying for the aircraft management services exemption be treated as non-commercial flights for fuel tax purposes, Congress could have adopted a corresponding code section to that effect as it did with other exemptions to air transportation excise tax. Specifically, the commenter pointed to the exemptions to air transportation excise tax provided in sections 4261(h) (skydiving), 4261(i) (seaplanes), 4281 (small aircraft on nonestablished lines), and 4282 (affiliated group members), each of which section 4083(b) explicitly excludes from the definition of ''commercial aviation'' for purposes of determining applicable fuel tax rates. By not providing a similar, explicit definitional exclusion in section 4083(b) (or other Code section) for the aircraft management services exemption, the commenter asserted, Congress left the determination of which fuel tax rate—commercial or non-commercial—applies to a particular flight to the application of the general definition of ''commercial aviation'' in section 4083(b). Therefore, the commenter suggested that the final regulations provide that if the aircraft management services exemption applies to amounts paid for a flight, the determination of whether fuel used during the flight is subject to commercial or non-commercial fuel tax rates is made simply through an application of the definition of commercial aviation provided in section 4083(b).

The Treasury Department and the IRS agree with the commenter that proposed § 49.4261–10(g) is inconsistent with the air transportation excise tax-fuel excise tax statutory scheme. As a result, the final regulations do not adopt the rule in proposed § 49.4261–10(g). The rule in proposed § 49.4261–10(e)(2) relating to fuel used in for-hire flights is similarly inconsistent with the air transportation excise tax-fuel excise tax statutory scheme. Therefore, the final regulations also do not adopt the rule proposed in § 49.4261–10(e)(2). Because final § 49.4261–10 does not provide fuel excise tax guidance related to the exemption in section 4261(e)(5), persons affected by the aircraft management services exemption should continue to follow current statutory, regulatory, and administrative guidance related to the rates of tax for aviation fuel.

h. Coordination With Fractional Ownership Aircraft Exemption; Anti-Abuse Rule

Proposed § 49.4261–10(i) provided, in relevant part, that the aircraft management services exemption does not apply to any amount paid for aircraft management services by a participant in any transaction or arrangement, or through other means, that seeks to circumvent the surtax imposed by section 4043. A commenter expressed concern that confusion could result from the phrasing of the first sentence of proposed § 49.4261–10(i) because it is essentially identical to the phrasing of the second sentence of proposed § 49.4261–10(b)(3)(ii) (excluding fractional aircraft ownership programs and similar arrangements from the definition of ''aircraft owner''). The commenter suggested that the first sentence in the final version of § 49.4261–10(i) simply cross-reference § 49.4261–10(b)(3)(ii), rather than repeating the similar language. Specifically, the commenter suggested the following language for the first sentence of final § 49.4261–10(i): ''The aircraft management services exemption does not apply to any amount paid for aircraft management services by a participant in the type of business arrangement described in [§ 49.4261–10(b)(3)(ii)] that does not qualify the participant as an aircraft owner.''

The Treasury Department and the IRS believe that the rule in proposed § 49.4261–10(i) is problematic for the same reasons as the other arrangements anti-abuse rule in proposed § 49.4261–10(b)(3)(ii) (discussed earlier); specifically, it may capture aircraft ownership structures that are legitimate and not created for purposes of circumventing the fuel surtax imposed by section 4043. The Treasury Department and the IRS further believe

that, like the other arrangements anti-abuse rule in proposed § 49.4261–10(b)(3)(ii), the rule in proposed § 49.4261–10(i) would have created taxpayer uncertainty and confusion. Because the final regulations in § 49.4261–10(b)(3)(ii) clarify that a participant in a fractional ownership aircraft program is not an aircraft owner for purposes of the exemption in section 4261(e)(5), an additional coordination rule is redundant. As a result, the final regulations do not adopt proposed § 49.4261–10(i).

i. Adequate Records

Proposed § 49.4261–10(a)(3) stated that in order to qualify for the aircraft management services exemption, an aircraft owner and aircraft management services provider must maintain adequate records to show that the amounts paid by the aircraft owner to the aircraft management services provider relate to aircraft management services for the aircraft owner's aircraft or for flights on the aircraft owner's aircraft.

A commenter requested that the final regulations provide guidance on the types of records required to satisfy this requirement. The Treasury Department and the IRS agree. Accordingly, the final regulations add language to § 49.4261–10(a)(3) stating that such records may include the agreement, if any, between the aircraft owner and the aircraft management services provider, evidence of aircraft ownership, evidence that amounts paid for aircraft management services came from the aircraft owner, the aircraft management services provider's fee schedule, and documents to support any allocations required under the pro rata allocation rule.

j. Examples

Proposed § 49.4261–10(j) included two examples illustrating certain aspects of the rules in proposed § 49.4261–10. Proposed § 49.4261–10(j)(1) (Example 1) illustrated the substitute aircraft allocation methodology in proposed § 49.4261–10(c)(1) and (2). Proposed § 49.4261–10(j)(1)(i) (presenting the facts of Example 1) stated, in relevant part, that:

A commenter stated that it interpreted proposed § 49.4261–10(j)(1)(i) (presenting the facts of Example 1) as saying that if a company hires an aircraft management company to provide only pilot services to the aircraft owner, then—but for the aircraft management services exemption—air transportation excise tax would apply to the amounts paid by the aircraft owner to the aircraft management services provider. Based on its interpretation, the commenter expressed its opinion that the example presents an extreme position with regard to the application of air transportation excise tax to an aircraft owner-aircraft management services provider relationship. The commenter further stated that the second sentence in proposed § 49.4261–10(j)(1)(i) may cause confusion regarding the application of the possession, command, and control test in cases that are not governed by section 4261(e)(5). In addition, the commenter stated that the second sentence in proposed § 49.4261–10(j)(1)(i) is irrelevant to the rest of the example, thereby compounding the other problems that the commenter mentioned. The commenter suggested that the final regulations remove the second sentence from § 49.4261–10(j)(1)(i).

As noted earlier, the final regulations include a revised pro rata allocation rule. The final regulations also revise the first example (including deletion of the second sentence) and add a second example to illustrate the revised pro rata allocation rule. In addition, the final regulations revise the third example (proposed § 49.4261–10(j)(2)) to remove the fuel references in light of the decision not to adopt proposed § 49.4261–10(e)(2) and (g) in the final regulations.

III. Generally Applicable Air Transportation Excise Tax Rules and Aircraft Charter Rules

a. Payment and Collection Obligations

Proposed § 49.4261–1(b)(1) restated, in general terms, statutory provisions and existing regulations related to the duties and obligations of a person that makes a payment subject to the taxes imposed by section 4261 (that is, the taxpayer) and a person that receives such payments (that is, the collector). The duties and obligations include those imposed on the collector to collect the applicable tax from the taxpayer, to report the tax on Form 720, *Quarterly Federal Excise Tax Return,* and to remit the tax to the IRS. The duties and obligations enumerated in the proposed regulations also include the requirement that the collector make semimonthly deposits of the taxes imposed by section 4261.

Proposed § 49.4261–1(b)(2) restated the rule in section 4263(c), which provides that if any tax imposed by section 4261 is not paid at the time payment for transportation is made, then, to the extent the tax is not collected under any other provision of subchapter C of chapter 33 of the Code, the tax must be paid by the carrier providing the initial segment of transportation that begins or ends in the United States.

Regarding proposed § 49.4261–1(b)(1), a commenter expressed concern that current published guidance (primarily in the form of revenue rulings) does not adequately address the duties and obligations of charter brokers with regard to collecting and reporting air transportation excise tax. The commenter described a charter broker as an intermediary that charters aircraft from a certificated air carrier (who actually provides the flight services), and that may act as an agent of the air carrier, an agent of the passengers, or as a principal in the chartering transaction. The commenter stated that the lack of guidance related to charter brokers has created considerable confusion in the charter broker industry. Further, the commenter stated that the need for clear and precise guidance is compounded by the aircraft charter rules provided in proposed § 49.4261–7(h) (discussed later) and section 4263(c), which imposes liability on the air carrier providing the initial segment of transportation that begins or ends in the U.S. in cases where any tax imposed by section 4261 is not paid at the time the payment for transportation is made. Therefore, the commenter requested that the final regulations provide guidance regarding the circumstances in which a charter broker (rather than an air carrier) is obligated to collect air transportation excise tax and file Forms 720. The commenter suggested that such guidance should be consistent with the approaches taken in Rev. Rul. 68–256, 1968–1 C.B. 489; Rev. Rul. 75–296, 1975–2 C.B. 440; and Rev. Rul. 2006–52, 2006–2 C.B. 761.

Regarding proposed § 49.4261–1(b)(2), a commenter stated that the obligation placed on the air carrier to pay the tax imposed by section 4261 if the party responsible for collecting it fails to do so creates confusion and unfair liability exposure for the air carrier. Further, the commenter stated, as an example, that an IRS examiner could assert tax liability on the air carrier for uncollected tax when the air carrier has no means to determine whether another responsible party, such as a charter broker, had collected and paid over the tax. To alleviate these concerns, the commenter suggested that the final regulations provide that if an air carrier documents that it informed the charter broker of its obligation to collect the taxes imposed by section 4261 and file Forms 720 (see the discussion of proposed § 49.4261–7(h) later), then the air carrier will not be liable for uncollected tax under section 4263(c).

The commenter also suggested that the final regulations provide that if the IRS asserts liability on an air carrier under section 4263(c) (irrespective of whether the air carrier can show that it informed the charter broker of its obligations to collect and report) during an examination, then the air carrier should be entitled to obtain information from the IRS on whether the tax was paid by the charter broker or any other party.

The Treasury Department and the IRS understand and share the commenters' concerns related to uncertainty and the possibility of surprise that may result from another party's IRS examination because of the rules in section 4263(c) and proposed § 49.4261–1(b)(2). Because the interactions between section 4263(c) and other air transportation excise tax rules are complex and have broad implications for other members of the air transportation industry, the Treasury Department and the IRS believe that these issues require additional study and input from a broader cross-section of the air transportation industry. Further, the Treasury Department and the IRS believe that section 4263(c) issues should be addressed in a separate published guidance project that could also potentially consider the interplay between section 4263(c) and the existing regulatory rules in § 49.4261–7(h) and § 49.4291–1.

However, because, as mentioned earlier, proposed § 49.4261–1(b)(1) merely restated currently applicable statutory and regulatory rules, the final regulations adopt proposed § 49.4261–1(b)(1) without change. In addition, the final regulations do not adopt the second sentence of proposed § 49.4261–1(b)(2) so that the final regulations simply track the language of section 4263(c), as currently written, without further comment. The Treasury Department and the IRS believe it is necessary to finalize these rules because the existing regulations related to section 4263(c) reflect prior law, which has created widespread confusion among taxpayers and collectors in the air transportation area.

b. Aircraft Charters

Proposed § 49.4261–7(h), which generally restated existing rules in § 49.4261–7(h), provided rules related to the application of the taxes imposed by section 4261 to situations in which a person provides air transportation services on an aircraft that was chartered from—and operated by—another party, commonly referred to as a ''wet lease.'' Proposed § 49.4261–7(h)(2) provided that the charterer of an aircraft who sells transportation to other persons must collect and account for the tax with respect to all amounts paid to the charterer by such other persons. The proposed rule further provided that, in such a case, no tax will be due on the amount paid by the charterer for the charter of the aircraft but that it is the duty of the owner of the aircraft to advise the charterer of the charterer's obligation for collecting, accounting for, and paying over the tax to the IRS. This requirement is intended to ensure the parties communicate with each other regarding air transportation excise tax and prevent misunderstandings about which party is responsible for collecting tax under the arrangement.

Two commenters requested clarification regarding the duty of the ''owner of the aircraft to advise the charterer of the charterer's obligations for collecting, accounting for, and paying over the tax'' to the IRS imposed under the proposed rule. A commenter stated that in the air charter industry, the air carrier does not typically own the aircraft used to provide charter flights. Because the proposed rule imposes on the aircraft owner the duty to advise the charterer of its obligations, the commenter stated that confusion about which party must advise the charterer may result from the phrasing of the proposed rule. The commenter suggested the proposed rule use the phrase ''air carrier'' rather than ''owner of the aircraft.''

A commenter also requested clarification about how and when the duty to advise the charterer of its obligations with regard to air transportation excise tax must be satisfied. Specifically, the commenter asked whether the duty to advise applies separately to each specific charter flight, or whether the duty may be satisfied as part of a long-term underlying agreement between the aircraft owner and the charterer such as a lease agreement for the aircraft owner's aircraft entered into by the aircraft owner and the charterer. The commenter also requested clarification regarding whether the duty to advise the charterer of its obligations with regard to air transportation excise tax creates an obligation on the part of the aircraft owner to collect the tax if the charterer fails to do so.

The Treasury Department and the IRS understand and share the commenters' concern that, because the owner of a chartered aircraft may not be the party that operates the aircraft, the phrasing of the proposed rule may cause confusion. In addition, the Treasury Department and the IRS understand the need for clarification regarding the duty of the aircraft owner to advise the charterer of its collection obligations. However, because these rules are complex and have broad applicability to the air transportation industry, additional study and stakeholder input is required. Accordingly, a separate published guidance project is necessary to address: (a) the possible shifting of the duty to advise the charterer about its obligations for collecting, accounting for, and paying over the tax to the IRS to the air carrier operating the chartered aircraft instead of the owner of the chartered aircraft; (b) whether the duty to advise applies separately to each specific charter flight, or whether the duty may be satisfied as part of a long-term agreement between the aircraft owner and the charterer; and (c) whether the duty to advise the charterer of its obligations with regard to air transportation excise tax creates an obligation on the part of the aircraft owner to collect the tax if the charterer fails to do so.

Because proposed § 49.4261–7(h) merely restated currently applicable rules, the final regulations adopt proposed § 49.4261–7(h) without change. Until additional guidance is issued, § 49.4261–7(h), as finalized, and other existing published guidance apply.

Effect on Other Documents

Revenue Ruling 67–414 (1967–2 C.B. 382), Revenue Ruling 72–309 (1972–1 C.B. 348), and Revenue Ruling 2002–34 (2002–1 C.B. 1150) are obsoleted on January 19, 2021.

Applicability Dates

For dates of applicability, see §§ 40.0–1(e), 49.4261–1(g), 49.4261–2(d), 49.4261–3(e), 49.4261–7(k), 49.4261–9(c), 49.4261–10(i), 49.4262–1(f), 49.4262–2(e), 49.4262–3(e), 49.4281–1(e), 49.4263–1(b), 49.4263–3(b), 49.4271–1(g), and 49.4721–2.

Special Analyses

This regulation is not subject to review under section 6(b) of Executive Order 12866 pursuant to the Memorandum of Agreement (April 11, 2018) between the Department of the Treasury and the Office of Management and Budget regarding review of tax regulations.

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that this final rule will not have a significant economic impact on a substantial number of small entities. Although the rule may affect a substantial number of small entities, the economic impact of the regulations is not likely to be significant. Data are not readily available about the number of

taxpayers affected, but the number is likely to be substantial for both large and small entities because the rule may affect entities that serve as holding companies for aircraft that do not have many revenues or employees. The economic impact of these regulations is not likely to be significant, however, because these final regulations primarily clarify the application of the aircraft management services exception added to the Code by the TCJA. These final regulations will assist taxpayers in understanding the rules to qualify for the exemption under section 4261(e)(5) and make it easier for taxpayers to comply and IRS examiners to administer the exemption. Accordingly, the Secretary of the Treasury's delegate certifies that the rule will not have a significant economic impact on a substantial number of small entities. Notwithstanding this certification, the Treasury Department and the IRS welcome comments on the impact of these regulations on small entities.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding this regulation was submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration for comment on its impact on small business. No comments were received from the Chief Counsel for the Office of Advocacy of the Small Business Administration.

Statement of Availability of IRS Documents

IRS Revenue Procedures, Revenue Rulings, Notices and other guidance cited in this document are published in the Internal Revenue Bulletin and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *http://www.irs.gov.*

Drafting Information

The principal author of these regulations is Michael H. Beker, Office of the Associate Chief Counsel (Passthroughs and Special Industries). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects

26 CFR Part 40

Excise taxes, Reporting and recordkeeping requirements.

26 CFR Part 49

Excise taxes, Reporting and recordkeeping requirements, Telephone, Transportation.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR parts 40 and 49 are amended as follows:

PART 40—EXCISE TAX PROCEDURAL REGULATIONS

■ **Paragraph 1.** The authority citation for part 40 is amended by removing the entry for § 40.6071(a)–3 to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 40.0–1 is amended by redesignating paragraph (d) as paragraph (e), adding a new paragraph (d), and revising newly redesignated paragraph (e) to read as follows:

§ 40.0–1 Introduction.

* * * * *

(d) *Person.* For purposes of this part, each business unit that has, or is required to have, a separate employer identification number is treated as a separate person. Thus, business units (for example, a parent corporation and a subsidiary corporation, a partner and the partner's partnership, or the various members of a consolidated group), each of which has, or is required to have, a different employer identification number, are separate persons.

(e) *Applicability date*—(1) *Paragraphs (a), (b), and (c) of this section.* Paragraphs (a), (b), and (c) of this section apply to returns for periods beginning after March 31, 2013. For rules that apply before that date, *see* 26 CFR part 40, revised as of April 1, 2012.

(2) *Paragraph (d) of this section.* Paragraph (d) of this section applies to returns for periods beginning on or after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 40, revised as of April 1, 2020.

§ 40.6071(a)–3 [Removed]

■ **Par. 3.** Section 40.6071(a)–3 is removed.

PART 49—FACILITIES AND SERVICES EXCISE TAX REGULATIONS

■ **Par. 4.** The authority citation for part 49 continues to read in part as follows:

Authority: 26 U.S.C. 7805. * * *

■ **Par. 5.** Section 49.4261–1 is revised to read as follows:

§ 49.4261–1 Imposition of tax; in general.

(a) *In general.* Section 4261 of the Internal Revenue Code (Code) imposes three separate taxes on amounts paid for certain transportation of persons by air. Tax attaches at the time of payment for any transportation taxable under section 4261. The applicability of each section 4261 tax is generally determined on a flight-by-flight basis.

(1) *Percentage tax.* Section 4261(a) imposes a 7.5 percent tax on the amount paid for the taxable transportation of any person. *See* section 4262(a) of the Code and § 49.4262–1(a) for the definition of the term *taxable transportation.*

(2) *Domestic segment tax.* Section 4261(b)(1) imposes a $3 tax (indexed annually for inflation pursuant to section 4261(e)(4)) on the amount paid for each domestic segment of taxable transportation. *See* section 4261(b)(2) for the definition of the term *domestic segment.* The domestic segment tax does not apply to a domestic segment beginning or ending at an airport that is a rural airport for the calendar year in which the segment begins or ends (as the case may be). *See* section 4261(e)(1)(B) for the definition of the term *rural airport.*

(3) *International travel facilities tax.* Section 4261(c) imposes a $12 tax (indexed annually for inflation pursuant to section 4261(e)(4)) on any amount paid (whether within or without the United States) for any transportation by air that begins or ends in the United States. The international travel facilities tax does not apply to any transportation that is entirely taxable under section 4261(a) (determined without regard to sections 4281 and 4282). *See* section 4261(c)(2). A special rule applies to Alaska and Hawaii flights. *See* section 4261(c)(3).

(b) *Payment and collection obligations*—(1) *In general.* The taxes imposed by section 4261 are collected taxes. In general, the person making the payment subject to tax is the *taxpayer. See* section 4261(d). The person receiving the payment is the *collector* (also commonly referred to as the collecting agent). *See* section 4291 of the Code. The collector must collect the applicable tax from the taxpayer, report the tax on Form 720, *Quarterly Federal Excise Tax Return,* and remit the tax to the Internal Revenue Service. *See* sections 4291, 6011, and 7501 of the Code. *See* § 40.6011(a)–1 of this chapter and § 49.4291–1. The collector must also make semimonthly deposits of the taxes imposed by section 4261. *See* section 6302(e) of the Code. *See* §§ 40.0–1(c), 40.6302(c)–1, and 40.6302(c)–3 of this chapter. *See* section 4263(a) and (c) of the Code for special rules relating to the payment and collection of tax.

(2) *Failure to collect tax.* If any tax imposed by section 4261 is not paid at the time payment for transportation is made, then, to the extent the tax is not collected under any other provision of subchapter C of chapter 33 of the Code,

the tax must be paid by the carrier providing the initial segment of transportation that begins or ends in the United States. *See* section 4263(c). *See* section 6672 of the Code for rules relating to the application of the trust fund recovery penalty.

(c) *Type of aircraft.* The taxes imposed by section 4261 generally apply regardless of the type of aircraft on which the transportation is provided, provided all of the other conditions for liability are present and no specific statutory exemption applies. *See* paragraph (f) of this section for a list of statutory exemptions from tax. Amounts paid for the transportation of persons by air cushion vehicles, also known as hovercraft, are not subject to the taxes imposed by section 4261.

(d) *Purpose of transportation.* The purpose of the transportation (for example, business or pleasure) is not a factor in determining taxability under section 4261.

(e) *Routes.* Amounts paid for transportation may be taxable even if the transportation is not between two definite points. Unless otherwise exempt, a payment for continuous transportation that begins and ends at the same point is subject to tax. *See* section 4281 of the Code and § 49.4281–1 for the exemption for small aircraft on nonestablished lines.

(f) *Exemptions from tax; cross-references*—(1) *Aircraft management services.* For the exemption for certain aircraft management services, see section 4261(e)(5) of the Code and § 49.4261–10.

(2) *Hard minerals, oil, and gas.* For the exemption for certain uses related to the exploration, development, or removal of hard minerals, oil, or gas, see section 4261(f)(1).

(3) *Trees and logging operations.* For the exemption for certain uses related to trees and logging operations, see section 4261(f)(2).

(4) *Air ambulances.* For the exemption for air ambulances providing certain emergency medical transportation, see section 4261(g).

(5) *Skydiving.* For the exemption for certain skydiving uses, see section 4261(h).

(6) *Seaplanes.* For the exemption for certain seaplane segments, see section 4261(i).

(7) *Fractionally-owned aircraft.* For the exemption for certain aircraft in fractional ownership aircraft programs, see section 4261(j).

(8) *Small aircraft on nonestablished lines.* For the exemption for certain small aircraft on nonestablished lines, see section 4281 of the Code and § 49.4281–1.

(9) *Affiliated groups.* For the exemption for certain transportation of members of an affiliated group, see section 4282.

(10) *United States and territories.* For exemptions authorized by the Secretary of the Treasury or his delegate for the exclusive use of the United States, see section 4293.

(g) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, see 26 CFR part 49, revised as of April 1, 2020.

■ **Par. 6.** Section 49.4261–2 is amended by:

■ 1. Revising paragraphs (a) and (b).

■ 2. Adding paragraph (d).

The revisions and addition read as follows:

§ 49.4261–2 Application of tax.

(a) *Tax on total amount paid.* The tax imposed by section 4261(a) of the Internal Revenue Code (Code) is measured by the total amount paid for taxable transportation, whether paid in cash or in kind.

(b) *Tax on transportation of each person.* The taxes imposed by section 4261(b) and (c) of the Code are head taxes and, therefore, apply on a per-passenger basis. The taxes apply to each passenger for whom an amount is paid, regardless of whether the payment is made as a single lump sum or is made individually for each passenger. In the case of charter flights for which a fixed amount is paid, the section 4261(b) and (c) taxes are computed by multiplying the applicable rate of tax by the number of passengers transported on the aircraft.

* * * * *

(d) *Applicability date.* Paragraphs (a) and (b) of this section apply to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

■ **Par. 7.** Section 49.4261–3 is amended by:

■ 1. Removing ''§ 49.4262(c)–1'' wherever it appears and adding ''§ 49.4262–3'' in its place.

■ 2. In the first sentence of paragraph (a), removing ''The tax imposed by section 4261(a)'' and adding ''The taxes imposed by section 4261(a) and (b) of the Internal Revenue Code (Code)'' in its place.

■ 3. In the second sentence of paragraph (a), adding ''under section 4261(a) and (b)'' at the end of the sentence.

■ 4. Revising paragraphs (b) and (c).

■ 5. In paragraph (d), removing ''section 4262(b) and § 49.4262(b)–1'' and adding ''section 4262(b) of the Code and § 49.4262–2'' in its place.

■ 6. Adding paragraph (e).

The revisions and additions read as follows:

§ 49.4261–3 Payments made within the United States.

* * * * *

(b) *Other transportation.* In the case of transportation, other than that described in paragraph (a) of this section, for which payment is made in the United States, the taxes imposed by section 4261(a) and (b) apply with respect to the amount paid for that portion of such transportation by air which is directly or indirectly from one port or station in the United States to another port or station in the United States, but only if such portion is not a part of uninterrupted international air transportation within the meaning of section 4262(c)(3) of the Code and § 49.4262–3(c). Transportation that:

(1) Begins in the United States or the 225–mile zone and ends outside such area,

(2) Begins outside the United States or the 225–mile zone and ends inside such area, or

(3) Begins outside the United States and ends outside such area, is taxable only with respect to the portion of the transportation by air which is directly or indirectly from one port or station in the United States to another port or station in the United States, but only if such portion is not a part of ''uninterrupted international air transportation'' within the meaning of section 4262(c)(3) and § 49.4262–3(c). Thus, on a trip by air from Chicago to London, England, with a stopover at New York, for which payment is made in the United States, if the portion from Chicago to New York is not a part of ''uninterrupted international air transportation'' within the meaning of section 4262(c)(3) and § 49.4262–3(c), the taxes would apply to the part of the payment which is applicable to the transportation from Chicago to New York. However, if the portion from Chicago to New York is a part of ''uninterrupted international air transportation'' within the meaning of section 4262(c)(3) and § 49.4262–3(c), the taxes would not apply.

(c) *Method of computing tax on taxable portion.* Where a payment is made for transportation which is partially taxable under paragraph (b) of this section, the tax imposed by section 4261(a) may be computed on that proportion of the total amount paid which the mileage of the taxable portion of the transportation bears to the mileage of the entire trip.

* * * * *

(e) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply

before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4261–4 [Amended]

■ **Par. 8.** Section 49.4261–4 is amended by:
■ 1. In paragraph (a), removing the first ''4261(a)'' and adding ''4261 of the Internal Revenue Code (Code)'' in its place.
■ 2. In paragraph (a), removing ''section 4261(a) (see section 4264(d))'' and adding ''section 4261 (see section 4263(d) of the Code)'' in its place.
■ 3. In paragraph (b), removing ''§ 49.4262(c)–1'' and adding ''§ 49.4262–3'' in its place.
■ 4. In the first sentence of paragraph (d), removing ''§ 49.4262(c)–1'' and adding ''§ 49.4262–3'' in its place.
■ 5. In the first sentence of paragraph (d), removing ''six-hour'' and adding ''12-hour'' in its place.

§ 49.4261–5 [Amended]

■ **Par. 9.** Section 49.4261–5 is amended as follows:
■ 1. In paragraph (a), removing ''4261(b)'' wherever it appears and adding ''4261(a) and (b)'' in its place.
■ 2. In paragraph (c), removing ''§ 49.4262(b)–1'' and adding ''§ 49.4262–2'' in its place.

■ **Par. 10.** Section 49.4261–7 is amended by:
■ 1. In the introductory paragraph, removing ''4263, 4292, 4293, or 4294'' and adding ''4261, 4281, 4282, or 4293 of the Internal Revenue Code,'' in its place.
■ 2. Removing and reserving paragraphs (b), (d), (e), and (g).
■ 3. Revising paragraph (h).
■ 4. In paragraph (i), removing ''paragraph (c) of § 49.4261–2 and paragraph (f)(4) of § 49.4261–8'' and adding ''§§ 49.4261–2(c) and 49.4261–8(f)(4)'' in its place.
■ 5. Adding paragraph (k).

The revision and addition read as follows:

§ 49.4261–7 Examples of payments subject to tax.

* * * * *

(h) *Aircraft charters*—(1) When no charge is made by the charterer of an aircraft to the persons transported, the amount paid by the charterer for the charter of the aircraft is subject to tax.

(2) The charterer of an aircraft who sells transportation to other persons must collect and account for the tax with respect to all amounts paid to the charterer by such other persons. In such case, no tax will be due on the amount paid by the charterer for the charter of the aircraft but it shall be the duty of the owner of the aircraft to advise the charterer of the charterer's obligation for collecting, accounting for, and paying over the tax to the Internal Revenue Service.

* * * * *

(k) *Applicability date.* Paragraph (h) of this section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4261–8 [Amended]

■ **Par. 11.** Section 49.4261–8 is amended as follows:
■ 1. In the introductory paragraph, removing ''4263, 4292, 4293, or 4294'' and adding ''4261, 4281, 4282, or 4293 of the Internal Revenue Code'' in its place.
■ 2. Paragraphs (f)(2), (3), and (5) are removed and reserved.

■ **Par. 12.** Section 49.4261–9 is revised to read as follows:

§ 49.4261–9 Mileage awards.

(a) *Tax imposed.* Any amount paid (and the value of any other benefit provided) to an air carrier (or any related person) for the right to provide mileage awards for or other reductions in the cost of any transportation of persons by air is an amount paid for taxable transportation and is therefore subject to the tax imposed by section 4261(a) of the Internal Revenue Code. *See* section 4261(e)(3)(A).

(b) *[Reserved]*

(c) *Applicability date.* This section applies to amounts paid on and after January 19, 2021.

■ **Par. 13.** Section 49.4261–10 is revised to read as follows:

§ 49.4261–10 Aircraft management services.

(a) *In general*—(1) *Overview.* This section prescribes rules relating to the exemption under section 4261(e)(5) of the Internal Revenue Code (Code) for amounts paid (in cash or in kind) by an aircraft owner to an aircraft management services provider for certain aircraft management services (aircraft management services exemption). Pursuant to section 4261(e)(5), the tax imposed by section 4261 of the Code does not apply to amounts paid by an aircraft owner to an aircraft management services provider for aircraft management services related to maintenance and support of the aircraft owner's aircraft; or related to flights on the aircraft owner's aircraft (flight services). The aircraft management services exemption applies to amounts paid by an aircraft owner to an aircraft management services provider for flight services on the aircraft owner's aircraft, even if the aircraft owner is not on the flight. The aircraft management services exemption does not apply to amounts paid to an aircraft management services provider by another person on behalf of an aircraft owner (other than in a principal-agent scenario in which the aircraft owner is the principal). In addition, amounts paid for aircraft management services by a party related to the aircraft owner are not amounts paid by the aircraft owner solely by virtue of the relationship between the aircraft owner and the related party. However, if an aircraft owner leases an aircraft to another person, including a related party, amounts paid by the lessee to an aircraft management services provider for aircraft management services related to the leased aircraft qualify for the aircraft management services exemption, provided the lease is not a disqualified lease and all other requirements of section 4261(e)(5) are satisfied. For example, amounts paid for aircraft management services by one member of an affiliated group (as that term is defined in section 4282 of the Code) for flights on an aircraft owned by another member of the affiliated group are not amounts paid by the aircraft owner unless the member owning the aircraft leases the aircraft to the member of the affiliated group that pays for the aircraft management services. *See* paragraph (b) of this section for definitions of terms used in this section.

(2) *Private aviation.* The aircraft management services exemption is limited to aircraft management services related to aircraft used in private aviation.

(3) *Adequate records required.* In order to qualify for the aircraft management services exemption, an aircraft owner and aircraft management services provider must maintain adequate records to show that the amounts paid by the aircraft owner to the aircraft management services provider relate to aircraft management services specifically for the aircraft owner's aircraft or for flights on the aircraft owner's aircraft and to support any allocations required under paragraph (c) under of this section. Such records may include the agreement, if any, between the aircraft owner and the aircraft management services provider, evidence of aircraft ownership, evidence that amounts paid for aircraft management services came from the aircraft owner, and the aircraft management services provider's fee schedule.

(b) *Definitions.* This paragraph provides definitions applicable to this section.

(1) *Aircraft management services.* The term *aircraft management services* means—

(i) *Statutory services.* The services listed in section 4261(e)(5)(B)(i)–(v); and

(ii) *Other services.* Any service (including, but not limited to, purchasing fuel, purchasing aircraft parts, and arranging for the fueling of an aircraft owner's aircraft) provided directly or indirectly to an aircraft owner in order to provide air transportation to the aircraft owner on the aircraft owner's aircraft at a level and quality of service required under the agreement between the aircraft owner and the aircraft management services provider.

(2) *Aircraft management services provider.* The term *aircraft management services provider* means a person that provides aircraft management services to an aircraft owner.

(3) *Aircraft owner*—(i) *In general.* Except as otherwise provided in this section, the term *aircraft owner* means a person that owns an aircraft managed by an aircraft management services provider (commonly referred to as a managed aircraft), or a person that leases a managed aircraft (lessee) pursuant to a lease that is not a disqualified lease. A person owns a managed aircraft if the person holds legal title to the aircraft, or if the person holds substantial incidents of ownership in the aircraft for a period of more than 31 days. A lessee includes the beneficiary of an owner trust that holds legal title to the managed aircraft.

(ii) *Persons not included in the definition of aircraft owner.* A lessee of an aircraft under a disqualified lease cannot be an aircraft owner with respect to the aircraft leased pursuant to the disqualified lease. A person that owns stock in a commercial airline does not qualify as an aircraft owner of that commercial airline's aircraft. A participant in a fractional aircraft ownership program, as defined in section 4043(c)(2) of the Code, does not qualify as an aircraft owner of the program's managed aircraft if the amount paid for such person's participation is exempt from the tax imposed by section 4261 reason of section 4261(j).

(4) *Disqualified lease.* The term *disqualified lease* has the meaning given to it by section 4261(e)(5)(C)(ii).

(5) *Fair market value.* The term *fair market value* means the value of comparable flights or services provided with respect to a comparable aircraft as of the date such flights or services are provided. The aircraft management services provider's published fee schedule in effect on the date(s) the flights or services are provided may be used as evidence of fair market value.

(6) *For-hire flight.* The term *for-hire flight* means the use of an aircraft to transport passengers for compensation that is paid in cash or in kind. The term includes, but is not limited to, charter flights, air taxi flights, and sightseeing flights (commonly referred to as flightseeing flights).

(7) *Owner trust.* The term *owner trust* means an arrangement in which legal title of an aircraft is held in the name of the trustee of the trust for the limited purpose of registering the aircraft in the United States with the Federal Aviation Administration pursuant to the registration requirements in 49 U.S.C. 40102(a) and 44102(a), and 14 CFR part 47.

(8) *Private aviation.* The term *private aviation* means the use of an aircraft for civilian flights, except scheduled passenger service for which tickets (or substitutes equivalent to tickets) are sold on a seat-by-seat basis to the general public. The term includes, but is not limited to, civilian flights operated under Part 135 (14 CFR part 135) of the Federal Aviation Regulations prescribed by the Federal Aviation Administration (FARs).

(9) *Substitute aircraft.* The term *substitute aircraft* means an aircraft, other than the aircraft owner's aircraft, that is provided by an aircraft management services provider to the aircraft owner when the aircraft owner's aircraft is not available, regardless of the reason for the unavailability.

(c) *Pro rata allocation*—(1) *In general.* Except as provided in paragraph (c)(2)(iii) of this section, when an amount paid to an aircraft management services provider includes a portion that is subject to the tax imposed by section 4261 and a portion that consists of amounts described in section 4261(e)(5)(A), the exception in section 4261(e)(5) applies on a pro rata basis only to the portion that consists of amounts described in section 4261(e)(5)(A). *See* section 4261(e)(5)(D). In such case, the tax base for the portion that is subject to the tax imposed by section 4261(a) is the amount paid for the flights or services, provided the amount paid is separable and shown in exact amounts in the records pertaining to the charge. If the portion of the amount paid that is subject to the tax imposed by section 4261(a) is not separable, the tax base is the fair market value of the flights or services. However, the tax base determined in the previous sentence may not exceed the total amount paid (that is, the sum of the portion that is subject to the tax imposed by section 4261(a) and the portion that consists of amounts described in section 4261(e)(5)(A)).

(2) *Substitute aircraft*—(i) *Flight treated as a charter.* If an aircraft management services provider provides a flight to an aircraft owner on a substitute aircraft, the flight is treated as a charter flight provided by the aircraft management services provider to the aircraft owner, regardless of whether the aircraft owner is on the flight, and the aircraft owner is treated as the charterer of such flight. If the flight constitutes taxable transportation, as defined in section 4262 of the Code, the tax imposed by section 4261(a) applies, unless the flight is exempt from such tax by reason of an exemption other than the aircraft management services exemption. See section 4261(b) and (c) for other taxes that may apply to flights provided by an aircraft management services provider to an aircraft owner on substitute aircraft.

(ii) *General rule for flights provided on substitute aircraft.* In cases where an aircraft management services provider provides a flight to an aircraft owner on a substitute aircraft and an allocation is required, the rule in paragraph (c)(1) of this section applies in determining the tax base. In all other cases, the tax base and the tax imposed by section 4261(a) thereon must be determined in accordance with the rules of § 49.4261–7(h)(1), unless the flight is otherwise exempt from such tax by reason of an exemption other than the aircraft management services exemption.

(iii) *Special rule for for-hire flights provided on substitute aircraft.* In cases where a substitute aircraft is used to provide a for-hire flight and an amount is paid for the flight by someone other than the aircraft owner, the tax base and the tax imposed by section 4261(a) thereon must be determined in accordance with the rules in § 49.4261–7(h)(2), unless the flight is otherwise exempt from such tax by reason of an exemption other than the aircraft management services exemption.

(d) *Choice of flight rules.* Whether a flight on an aircraft owner's aircraft operates pursuant to the rules under FARs Part 91 (14 CFR part 91) or pursuant to the rules under FARs Part 135 does not affect the application of section 4261(e)(5).

(e) *Aircraft available for hire.* Whether an aircraft owner permits an aircraft management services provider or other person to use its aircraft to provide for-hire flights (for example, when the aircraft is not being used by the aircraft owner or when the aircraft is being moved in deadhead service) does not affect the application of section 4261(e)(5). However, an amount paid for

for-hire flights on the aircraft owner's aircraft, except payments made by the aircraft owner, does not qualify for the aircraft management services exemption under section 4261(e)(5). Therefore, an amount paid by someone other than the aircraft owner for a for-hire flight on the aircraft owner's aircraft is subject to the tax imposed by section 4261 unless the flight is otherwise exempt from such tax by reason of an exemption other than the aircraft management services exemption. *See* § 49.4261–7(h) for rules relating to the application of the tax imposed by section 4261 on amounts paid for certain charter flights.

(f) *Billing methods.* Except as otherwise provided in this section, the method an aircraft management services provider bills, invoices, or otherwise charges an aircraft owner for aircraft management services, whether by specific itemization of costs, flat monthly or hourly fee, or otherwise, does not affect the application of section 4261(e)(5).

(g) *Multiple aircraft management services providers not disqualifying.* Whether an aircraft owner pays amounts to more than one aircraft management services provider for aircraft management services does not affect the application of section 4261(e)(5).

(h) *Examples.* The following examples illustrate the provisions of this section.

(1) *Example 1*—(i) *Facts.* During the first quarter of 2021, an aircraft owner pays a $3,000 monthly management fee to an aircraft management services provider for services related to operating the aircraft owner's aircraft. The aircraft owner used its own aircraft for all but one of the flights the owner took during the period. On the one occasion that the aircraft owner's aircraft was unavailable when the aircraft owner wanted to fly, the aircraft management services provider used a substitute aircraft to transport the aircraft owner. The flight was within the continental United States and the aircraft owner received no compensation for the transportation of other passengers on the flight. The aircraft owner paid $1,000 for the flight on the substitute aircraft. The aircraft management services provider included the $1,000 charge for the substitute aircraft as a separate line item on the monthly management fee invoice.

(ii) *Analysis.* The tax imposed by section 4261(a) applies to services that do not qualify for the section 4261(e)(5) exemption; in this case, the flight provided on the substitute aircraft. The flight provided on the substitute aircraft is treated as a charter flight for purposes of the tax imposed by section 4261(a), and the owner is treated as the charterer of the flight. The amount paid by the aircraft owner for the flight on the substitute aircraft is the section 4261(a) tax base. The monthly invoice from the aircraft management services provider to the aircraft owner included a line item in the amount of $1,000 for the charter flight. Because $1,000 is the actual amount paid for the flight, this amount is the section 4261(a) tax base. The tax imposed by section 4261(b) also applies to the flight on a per-passenger basis. *See* § 49.4261–2(b) for rules regarding the application of the tax imposed by section 4261(b).

(2) *Example 2*—(i) *Facts.* Same facts as in paragraph (h)(1) of this section (Example 1), except the invoice does not show the amount paid for the flight on the substitute aircraft and that amount is not otherwise separable from the monthly management fee. The fair market value of the flight on the substitute aircraft is $1,000.

(ii) *Analysis.* The tax imposed by section 4261(a) applies to the flight provided on the substitute aircraft. The amount paid for the flight on the substitute aircraft is not otherwise separable from the monthly management fee. Because $1,000 is the fair market value of the flight, and such amount does not exceed the $3,000 monthly management fee paid by the aircraft owner, this amount is the section 4261(a) tax base. The tax imposed by section 4261(b) also applies to the flight on a per-passenger basis. *See* § 49.4261–2(b) for rules regarding the application of the tax imposed by section 4261(b).

(3) *Example 3*—(i) *Facts.* An aircraft owner pays a monthly management fee to an aircraft management services provider for aircraft management services related to the aircraft owner's aircraft. When the aircraft is not being used by the owner, the owner sometimes permits a charter company to use the aircraft to provide charter flights. At other times when the aircraft is not being used by the owner, the owner permits a tour operator to use the aircraft for flightseeing tours. All charter and flightseeing flights on the aircraft constitute taxable transportation, as that term is defined in section 4262, and no exemptions (other than section 4261(e)(5)) apply. No charter or flightseeing flights are provided on a substitute aircraft. The aircraft's maximum certificated takeoff weight is 7,000 pounds.

(ii) *Analysis.* Amounts paid by the aircraft owner to the aircraft management services provider for aircraft management services related to the aircraft owner's aircraft are exempt under section 4261(e)(5). Amounts paid by the charterer or passengers for the charter flights are subject to tax under section 4261(a) and (b). *See* § 49.4261–7(h) for rules relating to the application of the tax imposed by section 4261 on amounts paid for charter flights. *See* § 49.4261–2(b) for rules regarding the application of the tax imposed by section 4261(b). Amounts paid by flightseeing customers for flightseeing tours are also subject to tax under section 4261(a) and (b). If a payment for a flightseeing tour includes charges for nontransportation services, the charges for the nontransportation services may be excluded in computing the tax payable provided the payments are separable and provided in exact amounts. *See* § 49.4261–2(c).

(i) *Applicability date.* This section applies to amounts paid on and after January 19, 2021.

§ 49.4262(a)–1 [Redesignated]

■ **Par. 14.** Section 49.4262(a)–1 is redesignated as § 49.4262–1.

■ **Par. 15.** Newly redesignated § 49.4262–1 is amended by:

■ 1. In paragraph (a) introductory text, removing ''section 4262(b) (see § 49.4262(b)–1)'' and adding ''section 4262(b) of the Internal Revenue Code (Code) (see § 49.4262–2)'' in its place.

■ 2. In the first sentence of paragraph (a)(1), removing ''Transportation'' and adding ''Transportation by air'' in its place.

■ 3. In the first sentence of paragraph (a)(1), removing ''(the ''225-mile zone'')'' and adding ''(225-mile zone)'' in its place.

■ 4. Revising paragraph (a)(2).

■ 5. In paragraph (b), removing ''subparagraphs (1) and (5) of this paragraph'' and adding ''paragraph (b)(1) and (5) of this section'' in its place.

■ 6. In paragraph (b), removing ''subject to the tax'' and adding ''subject to the taxes imposed by section 4261(a) and (b)'' in its place.

■ 7. Revising paragraph (b)(2).

■ 8. Removing and reserving paragraph (c).

■ 9. Revising introductory paragraph (d); designating *Example (1)* as paragraph (d)(1) and revising newly designated paragraph (d)(1).

■ 10. In paragraph (d):

■ a. Designating *Example (2)* as paragraph (d)(2) and removing and reserving newly designated paragraph (d)(2).

■ b. Designating *Example (3)* as paragraph (d)(3) and removing ''6 hours'' wherever it appears and adding ''12 hours'' in its place and also removing ''subject to tax'' wherever it appears and adding ''subject to the taxes

imposed by section 4261(a) and (b)'' in its place.

■ c. Designating *Example (4)* as paragraph (d)(4), and removing ''six hours'' wherever it appears and adding ''12 hours'' in its place and also removing ''subject to tax'' wherever it appears and adding ''subject to the taxes imposed by section 4261(a) and (b)'' in its place.

■ 11. Revising paragraph (e).

■ 12. Adding paragraph (f).

The revisions and addition read as follows:

§ 49.4262–1 Taxable transportation.

(a) * * *

(2) In the case of any other transportation by air, that portion of such transportation that is directly or indirectly from one port or station in the United States to another port or station in the United States, but only if such transportation is not part of *uninterrupted international air transportation* within the meaning of section 4262(c)(3) of the Code and § 49.4262–3(c). Transportation from one port or station in the United States occurs whenever a carrier, after leaving any port or station in the United States, makes a regularly scheduled stop at another port or station in the United States irrespective of whether stopovers are permitted or whether passengers disembark.

* * * * *

(b) * * *

(2) New York to Vancouver, Canada, with a stop at Toronto, Canada;

* * * * *

(d) *Examples.* The following examples illustrate the application of section 4262(a)(2) and the taxes imposed by section 4261(a) and (b) of the Code:

(1) *Example (1).* A purchases in New York a ticket for air transportation from New York to Nassau, Bahamas, with a scheduled stopover of 14 hours in Miami. The part of the transportation from New York to Miami is taxable transportation as defined in section 4262(a) because such transportation is from one station in the United States to another station in the United States and the trip is not uninterrupted international air transportation (because the scheduled stopover interval in Miami is greater than 12 hours). Therefore, the amount paid for the transportation from New York to Miami is subject to the taxes imposed by section 4261(a) and (b).

* * * * *

(e) *Examples of transportation that is not taxable transportation.* The following examples illustrate transportation that is not taxable transportation:

(1) New York to Trinidad with no intervening stops;

(2) Minneapolis to Edmonton, Canada, with a stop at Winnipeg, Canada;

(3) Los Angeles to Mexico City, Mexico, with stops at Tijuana and Guadalajara, Mexico;

(4) New York to Whitehorse, Yukon Territory, Canada, by air with a scheduled stopover in Chicago of five hours. Amounts paid for the transportation referred to in examples set forth in paragraphs (e)(1), (2), and (3) of this section are not subject to the tax regardless of where payment is made, since none of the trips:

(i) Begin in the United States or in the 225–mile zone and end in the United States or in the 225–mile zone, nor

(ii) Contain a portion of transportation which is directly or indirectly from one port or station in the United States to another port or station in the United States. The amount paid within the United States for the transportation referred to in the example set forth in paragraph (4) of this section is not subject to tax since the entire trip (including the domestic portion thereof) is *uninterrupted international air transportation* within the meaning of section 4262(c)(3) and § 49.4262–3(c). In the event the transportation is paid for outside the United States, no tax is due since the transportation does not begin and end in the United States.

* * * * *

(f) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4262(b)–1 [Redesignated]

■ **Par. 16.** Section 49.4262(b)–1 is redesignated as § 49.4262–2.

■ **Par. 17.** Newly redesignated § 49.4262–2 is amended as follows:

■ 1. In paragraph (a), ''section 4262(b)'' is removed and ''section 4262(b) of the Internal Revenue Code'' is added in its place.

■ 2. In paragraph (b)(2), *Example (2)* is removed and reserved.

■ 3. Revise paragraph (d).

■ 4. Add paragraph (e).

The revisions and additions read as follows:

§ 49.4262–2 Exclusion of certain travel.

* * * * *

(d) *Example.* The application of paragraph (c) of this section may be illustrated by the following example: A purchases in San Francisco a ticket for transportation by air to Honolulu, Hawaii. The portion of the transportation which is outside the continental United States and is outside Hawaii is excluded from taxable transportation. The tax applies to that part of the payment made by A which is applicable to the portion of the transportation between the airport in San Francisco and the three-mile limit off the coast of California (a distance of 15 miles) and between the three-mile limit off the coast of Hawaii and the airport in Honolulu (a distance of 5 miles). The part of the payment made by A which is applicable to the taxable portion of his transportation and the tax due thereon are computed in accordance with paragraph (c)(1) as follows:

TABLE 1 TO PARAGRAPH (d)

Mileage of entire trip (San Francisco airport to Honolulu airport) (miles)	2,400
Mileage in continental United States (miles)	15
Mileage in Hawaii (miles)	5
	20
Fare from San Francisco to Honolulu	$168.00
Payment for taxable portion (20/2400 × $168)	$1.40
Tax due (7.5% (rate in effect on date of payment) × $1.40)	$0.11

(All distances and fares assumed for purposes of this example. This example addresses only the computation of the tax imposed by section 4261(a). It does not address the computation of any other tax imposed by section 4261 that may apply to these facts.)

(e) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply

before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4262(c)–1 [Redesignated]

■ **Par. 18.** Section 49.4262(c)–1 is redesignated as § 49.4262–3.

■ **Par. 19.** Newly redesignated § 49.4262–3 is amended as follows:
■ 1. In the first sentence of paragraph (a), removing ''includes only the 48 States existing on July 25, 1956 (the date of the enactment of the Act of July 25, 1956 (Pub. L. 796, 84th Cong., 70 Stat. 644)) and the District of Columbia'' and adding ''means the District of Columbia and the States other than Alaska and Hawaii'' in its place.
■ 2. In paragraph (a), the last sentence is removed.
■ 3. In paragraph (c), removing ''six hours'' wherever it appears and adding ''12 hours'' in its place.
■ 4. In paragraph (c), removing ''6 hours'' wherever it appears and add ''12 hours'' in its place.
■ 5. In paragraph (c), removing ''six-hour'' wherever it appears and adding ''12-hour'' in its place.
■ 6. In paragraph (c)(2), removing ''paragraph (a)(2) of § 49.4264(c)–1'' and adding ''§ 49.4263–3(a)(2)'' in its place.
■ 7. Adding paragraphs (d) and (e).

The additions read as follows:

§ 49.4262–3 Definitions.

* * * * *

(d) *Transportation.* For purposes of the regulations in this subpart, the term *transportation* includes layover or waiting time and movement of the aircraft in deadhead service.

(e) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4263–5 [Redesignated]

■ **Par. 20.** Section 49.4263–5 is redesignated as § 49.4281–1.

■ **Par. 21.** Newly redesignated § 49.4281–1 is amended by:
■ 1. Revising paragraphs (a) and (b).
■ 2. In paragraph (c), adding a sentence at the end of the paragraph.
■ 3. Adding paragraphs (d) and (e).

The revisions and additions read as follows:

§ 49.4281–1 Small aircraft on nonestablished lines.

(a) *In general.* Amounts paid for the transportation of persons on a small aircraft of the type sometimes referred to as air taxis shall be exempt from the tax imposed under section 4261 of the Internal Revenue Code provided the aircraft has a maximum certificated takeoff weight of 6,000 pounds or less determined as provided in paragraph (b) of this section. The exemption does not apply, however, when the aircraft is operated on an established line or when the aircraft is a jet aircraft.

(b) *Maximum certificated takeoff weight.* The term *maximum certificated takeoff weight* means the maximum certificated takeoff weight shown in the type certificate or airworthiness certificate issued by the Federal Aviation Administration.

(c) * * * An aircraft is not considered as operated on an established line at any time during which the aircraft is being operated on a flight the sole purpose of which is sightseeing.

(d) *Jet aircraft.* For purposes of this section, the term *jet aircraft* does not include any aircraft which is a rotorcraft (such as a helicopter) or propeller aircraft.

(e) *Applicability date.* This section applies to amounts paid on and January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4264(a)–1 [Redesignated]

■ **Par. 22.** Section 49.4264(a)–1 is redesignated as § 49.4263–1.

■ **Par. 23.** Newly redesignated § 49.4263–1 is revised to read as follows:

§ 49.4263–1 Duty to collect the tax; payments made outside the United States.

(a) *Duty to collect tax.* Where payment upon which tax is imposed by section 4261 of the Internal Revenue Code is made outside the United States for a prepaid order, exchange order, or similar order, the person furnishing the initial transportation pursuant to such order must collect the applicable tax. *See* section 4291 and the regulations under section 4291 for cases where persons receiving payment must collect the tax. *See* section 6672 for rules relating to the application of the trust fund recovery penalty.

(b) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4264(b)–1 [Redesignated]

■ **Par. 24.** Section 49.4264(b)–1 is redesignated as § 49.4263–2.

§ 49.4263–2 [Amended]

■ **Par. 25.** Newly redesignated § 49.4263–2 is amended as follows:
■ 1. In the first sentence of paragraph (a), removing ''4264(b)'' and adding ''4263(b) of the Internal Revenue Code (Code)'' in its place.
■ 2. In the last sentence of paragraph (a), removing ''office of the district director for the district in which the person making the report is located,'' and adding ''Commissioner'' in its place.
■ 3. In paragraph (b), adding ''of the Code'' at the end of the paragraph.
■ 4. In paragraph (c), removing ''*Illustration.*'' and adding ''*Example.*'' in its place.
■ 5. In the last sentence of paragraph (c), removing ''office of the district director of internal revenue for the district in which the carrier is located,'' and adding in its place ''Commissioner''.

§ 49.4264(c)–1 [Redesignated]

■ **Par. 26.** Section 49.4264(c)–1 is redesignated as § 49.4263–3.

■ **Par. 27.** Newly redesignated § 49.4263–3 is amended by:
■ 1. Revising paragraph (a).
■ 2. In paragraph (b), removing the second sentence.
■ 3. In paragraph (b), removing ''4264'' wherever it appears and adding ''4263'' in its place.
■ 4. In paragraph (b), adding ''of the Code'' after ''4291'' in the first sentence.
■ 5. Removing and reserving paragraph (c).
■ 6. Adding paragraph (d).

The revisions and additions read as follows:

§ 49.4263–3 Special rule for the payment of tax.

(a) *In general.* For the rules applicable under section 4263(c) of the Internal Revenue Code, see § 49.4261–1(b)(2).

* * * * *

(d) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4264(d)–1 [Redesignated]

■ **Par. 28.** Section 49.4264(d)–1 is redesignated as § 49.4263–4.

§ 49.4263–4 [Amended]

■ **Par. 29.** Newly redesignated § 49.4263–4 is amended by removing ''4264(d)'' and adding ''4263(d)'' in its place.

§ 49.4264(e)–1 [Redesignated]

■ **Par. 30.** Section 49.4264(e)–1 is redesignated as § 49.4263–5.

§ 49.4264(f)–1 [Redesignated]

■ **Par. 31.** Section 49.4264(f)–1 is redesignated as § 49.4263–6.

§ 49.4263–6 [Amended]

■ **Par. 32.** Newly redesignated § 49.4263–6 is amended by removing and reserving paragraph (b).

■ **Par. 33.** Section 49.4271–1 is amended by revising paragraphs (a) and (b) and adding paragraph (g) to read as follows:

§ 49.4271–1 Tax on transportation of property by air.

(a) *Purpose of this section.* Section 4271 of the Internal Revenue Code (Code) imposes a 6.25 percent tax on amounts paid within or without the United States for the taxable transportation of property (as defined in section 4272 of the Code). This section sets forth rules as to the general applicability of the tax. This section also sets forth rules authorized by section 4272(b)(2) which exempt from tax payments for the transportation of property by air in the course of exportation (including shipment to a possession of the United States) by continuous movement, and in due course so exported.

(b) *Imposition of tax*—(1) The tax imposed by section 4271 applies only to amounts paid to persons engaged in the business of transporting property by air for hire.

(2) The tax imposed by section 4271 does not apply to amounts paid for the transportation of property by air if such transportation is furnished on an aircraft having a maximum certificated takeoff weight (as defined in section 4281(b) of the Code) of 6,000 pounds or less, unless such aircraft is operated on an established line or when such aircraft is a jet aircraft. The tax imposed by section 4271 also does not apply to any payment made by one member of an affiliated group (as defined in section 4282(b) of the Code) to another member of such group for services furnished in connection with the use of an aircraft if such aircraft is owned or leased by a member of the affiliated group and is not available for hire by persons who are not members of such group.

* * * * *

(g) *Applicability date.* This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

■ **Par. 34.** Section 49.4271–2 is added to read as follows:

§ 49.4271–2 Aircraft management services.

For rules regarding the exemption for certain amounts paid by aircraft owners for aircraft management services, see § 49.4261–10. This section applies to amounts paid on and after January 19, 2021. For rules that apply before that date, *see* 26 CFR part 49, revised as of April 1, 2020.

§ 49.4282–1 [Reserved]

■ **Par. 35.** Add and reserve § 49.4282–1.

Sunita Lough,

Deputy Commissioner for Services and Enforcement.

Approved: January 10, 2021.

David J. Kautter,

Assistant Secretary of the Treasury (Tax Policy).

Federal Student Aid Programs (Student Assistance General Provisions, Federal Perkins Loan Program, William D. Ford Federal Direct Loan Program, and Federal-Work Study Programs)

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Updated waivers and modifications of statutory and regulatory provisions; correction.

SUMMARY: On December 11, 2020, the Department of Education published in the **Federal Register** a notice updating waivers and modifications of statutory and regulatory provisions governing the Federal student financial aid programs under the authority of the Higher Education Relief Opportunities for Students Act of 2003 (HEROES Act). This document corrects the date through which certain waivers and modifications extend.

DATES: Effective January 19, 2021.

FOR FURTHER INFORMATION CONTACT: Barbara Hoblitzell, by telephone: (202) 453–7583 or by email: *Barbara.Hoblitzell@ed.gov,* or Gregory Martin, by telephone: (202) 453–7535 or by email: *Gregory.Martin@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Corrections: In FR document 2020–27042, appearing on page 79856 in the **Federal Register** of December 11, 2020, the following corrections are made:

1. On page 79857, in the third column, in the third paragraph, in the third sentence, remove the word ''further'', and add a new fourth sentence ''On December 4, 2020, the Secretary further extended those benefits through January 31, 2021.''

2. On page 79862, in the first column, in the section titled ''Repayment of a Loan (34 CFR 682.209)'', remove the fifth sentence and add in its place ''Following the President's Memorandum of August 8, 2020, and the Secretary's subsequent announcement on December 4, 2021, the Secretary is further extending until January 31, 2021, in accordance with the prior announcement, the waivers of the regulatory provisions in §§ 682.202 and 682.209 that require that interest be charged on FFEL loans held by the Department from March 13, 2020, through March 27, 2020, and from October 1, 2020 through January 31, 2021.''

3. On page 79862, in the second column, in the section titled ''Obligation to Repay (34 CFR 685.207)'', remove the fifth, sixth, and seventh sentences and add in their place ''The period of this benefit was extended to December 31, 2020 by the President's Memorandum of August 8, 2020. On December 4, 2020, the Secretary further extended the period of this benefit through January 31, 2021. Accordingly, Direct Loans are automatically placed in an administrative forbearance status that is currently scheduled to be in effect from March 13, 2020, through January 31, 2021.''

4. On page 79863, in the first column, in the section titled ''Capitalization of Interest Under the Income-Contingent Repayment Plan (34 CFR 685.209)'', in the second paragraph, remove ''January'' and add in its place ''February''.

5. On page 79863, in the first column, in the section titled ''Capitalization of Interest Under the Income-Contingent Repayment Plan (34 CFR 685.209)'', in the fourth paragraph, remove ''December 31, 2020'' and add in its place ''January 31, 2021''.

6. On page 79863, in the second column, in the section titled ''Section 3513 of the CARES Act'', remove the second paragraph and add in its place ''On August 8, 2020, the President issued a memorandum directing the Secretary to continue to waive interest and payments on such loans until December 31, 2020. On December 4, 2020, the Secretary further extended these benefits through January 31, 2021. Therefore, in accordance with the prior announcement, the Secretary is using her authority under the HEROES Act to modify the terms of the benefits provided under section 3513 of the CARES Act such that they will continue to be provided to borrowers until January 31, 2021.''

Accessible Format: On request to one of the program contact persons listed under **FOR FURTHER INFORMATION**

CONTACT, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. DEPARTMENT OF EDUCATION

34 CFR Chapter II

[Docket ID ED–2020–OESE–0037]

Final Priorities, Requirements, Definitions, And Selection Criteria—Promise Neighborhoods (PN) Program

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Final priorities, requirements, definitions, and selection criteria.

SUMMARY: The Assistant Secretary for the Office of Elementary and Secondary Education announces priorities, requirements, definitions, and selection criteria under the PN program, Assistance Listing Number 84.215N. The Assistant Secretary may use one or more of these priorities, requirements, definitions, and selection criteria for competitions in fiscal year (FY) 2021 and later years. We take this action to make program improvements based on lessons learned over the last decade and to improve program outcomes.

DATES: These priorities, requirements, definitions, and selection criteria are effective February 18, 2021.

FOR FURTHER INFORMATION CONTACT: Adrienne Hawkins, U.S. Department of Education, 400 Maryland Avenue SW, Room 4W220, Washington, DC 20202. Telephone: (202) 453–5638. Email: *Adrienne.Hawkins@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Purpose of Program: The PN program is authorized under the Elementary and Secondary Education Act of 1965, as amended (ESEA). The purpose of the PN program is to significantly improve the academic and developmental outcomes of children living in the most distressed communities of the United States, including ensuring school readiness, high school graduation, and access to a community-based continuum of high-quality services. The program serves neighborhoods with high concentrations of low-income individuals; multiple signs of distress, which may include high rates of poverty, childhood obesity, academic failure, and juvenile delinquency, adjudication, or incarceration; and schools implementing comprehensive support and improvement activities or targeted support and improvement activities under section 1111(d) of the ESEA. All strategies in the continuum of solutions must be accessible to children with disabilities and English learners.

Program Authority: 20 U.S.C. 7273–7274.

We published a notice of proposed priorities, requirements, definitions, and selection criteria (NPP) for this program in the **Federal Register** on June 29, 2020 (85 FR 38801). The NPP contained background information and our reasons for proposing the particular priorities, requirements, definitions, and selection criteria.

Except for minor editorial and technical revisions, there are no differences between the proposed priorities, requirements, definitions, and selection criteria and these final priorities, requirements, definitions, and selection criteria.

Public Comment: In response to our invitation in the NPP, eight comments were received, two of which were relevant to the proposed priorities, requirements, definitions, and selection criteria.

Generally, we do not address technical and other minor changes, or suggested changes the law does not authorize us to make under the applicable statutory authority. In addition, we do not address general comments that raised concerns not directly related to the NPP.

Analysis of Comments and Changes: An analysis of the comments and of any changes in the proposed priorities, requirements, definitions, and selection criteria follows.

Comment: One commenter noted the importance of child nutrition to successful outcomes and recommended that we include a focus on nutrition education.

Discussion: While we agree with the commenter that there is a need to focus on nutrition education, we do not believe that it is necessary to revise the proposed priorities, requirements, definitions, or selection criteria to address this specific need. Under the program statute, applicants already have flexibility to propose interventions or strategies to address nutrition needs for children, their families, and community members.

Changes: None.

Comment: One commenter asserted that the application requirements are too burdensome for applicants that are small entities. The commenter also contended that, by allowing projects to focus on different issues impacting low-income children, it may be difficult to fairly compare applications in the selection process. The commenter stated that applications should be evaluated to determine whether the proposed project would significantly improve the academic outcomes of the children proposed to be served and whether the proposed project is supported by a needs analysis and evidence-based practices.

Discussion: We appreciate the comment regarding the size of the applying entity and burden level. In recognition of this relationship we have established three priorities to level the playing field for all applicants. Two of the three priorities, Non-Rural and Non-Tribal Communities, and Tribal Communities, can be found elsewhere in this NFP. The Rural Communities priority can be found in the program statute.

Regarding the commenter's concern that applications be fairly considered during the selection process, the peer review process is designed for applications to be evaluated against selection criteria alone; we instruct our peer reviewers not to compare applications. Additionally, applicants should design projects that meet the needs of their respective communities, a key element of a successful PN project. Our peer reviewers rely on the

information provided in each application to determine whether an applicant's plan is appropriate for the context in which the project would operate.

Finally, we appreciate and agree with the comment that funded projects should improve academic outcomes of the students served and this can be achieved, in part, by ensuring that the proposed project is supported by a needs analysis and proposed interventions that are evidence-based. We maintained the requirement included in the NPP that the proposed project be supported by a needs analysis and that proposed interventions, to the extent possible, be evidence-based. We believe this requirement in addition to the evidence-based priority addresses the commenter's concern.

Changes: None.

Comment: None.

Discussion: In reviewing the proposed requirements further, we have decided to clarify that applicants must describe proposed activities to address needs and the extent to which activities are evidence-based. Additionally, an applicant must also describe its, or its partner organization's, if applicable, experience providing these activities, including any data demonstrating effectiveness. These two modifications are intended to strengthen projects and yield higher academic outcomes for students.

Changes: We have clarified the language to require applicants to provide a description of the proposed activities and to ensure that the proposed activities are in alignment with the applicant's identified needs. Also, the applicant must include the extent to which the proposed activities are evidence-based. Furthermore, the applicant must also describe its, or its partner organization's, if applicable, experience providing the proposed activities and any data demonstrating effectiveness in the application.

Final Priorities

Priority 1—Non-Rural and Non-Tribal Communities

To meet this priority, an applicant must propose to implement a PN strategy that serves one or more non-rural or non-Tribal communities.

Priority 2—Tribal Communities

To meet this priority, an applicant must propose to implement a PN strategy that serves one or more Indian Tribes.

Priority 3—Community-Level Opioid Abuse Prevention Efforts

To meet this priority, an applicant must: (1) Demonstrate how it will partner with an organization that conducts high-quality, community-level activities to prevent opioid abuse, such as an organization supported by an Office of National Drug Control Policy, Drug-Free Communities Support Program grant, in PN communities; (2) describe the partner organization's record of success in approaching opioid abuse prevention at the community level; and (3) provide, in its application, a memorandum of understanding between it and the partner organization responsible for managing the effort. The memorandum of understanding must indicate a commitment on the part of the applicant to coordinate implementation and align resources to the greatest extent practicable.

Priority 4—Evidence-Based Activities To Support Academic Achievement

Projects that propose to use evidence-based (as defined in 34 CFR 77.1(c)) activities, strategies, or interventions that support teaching practices that will lead to increased student achievement, graduation rates, and career readiness.

Priority 5—Community-Based Crime Reduction Efforts

To meet this priority, an applicant must: (1) Demonstrate how it will partner with an organization that conducts high-quality activities focused on the re-entry of formerly incarcerated individuals or on community-based crime reduction activities, such as an organization supported by a U.S. Department of Justice (DOJ) Innovations in Community-Based Crime Reduction Program grant, a grant authorized under the Second Chance Act, as reauthorized under the Formerly Incarcerated Reenter Society Transformed Safely Transitioning Every Person (FIRST STEP) Act, or DOJ Office of Justice Programs competitive grants related to juvenile justice and delinquency prevention; (2) describe the partner organization's record of success with supporting the re-entry of formerly incarcerated individuals or community-based crime reduction and how their efforts will be coordinated with the PN activities of this grant; and (3) provide, in its application, a memorandum of understanding between it and a partner organization managing the effort. The memorandum of understanding must indicate a commitment on the part of the applicant to coordinate implementation and align resources to the greatest extent practicable.

Types of Priorities

When inviting applications for a competition using one or more priorities, we designate the type of each priority as absolute, competitive preference, or invitational through a notice in the **Federal Register**. The effect of each type of priority follows:

Absolute priority: Under an absolute priority, we consider only applications that meet the priority (34 CFR 75.105(c)(3)).

Competitive preference priority: Under a competitive preference priority, we give competitive preference to an application by (1) awarding additional points, depending on the extent to which the application meets the priority (34 CFR 75.105(c)(2)(i)); or (2) selecting an application that meets the priority over an application of comparable merit that does not meet the priority (34 CFR 75.105(c)(2)(ii)).

Invitational priority: Under an invitational priority, we are particularly interested in applications that meet the priority. However, we do not give an application that meets the priority a preference over other applications (34 CFR 75.105(c)(1)).

Final Requirements

The Assistant Secretary establishes the following application requirements for this program. We may apply one or more of these requirements in any year in which this program is in effect.

To be considered for an award under this competition, an applicant must provide the following—

(1) In addressing the application requirements in sections 4624(a)(4), (5), and (7) of the ESEA, an applicant must clearly demonstrate needs, including a segmentation analysis, gaps in services, and any available data from within the last 3 years to demonstrate needs. The applicant must also describe proposed activities that address these needs and the extent to which these activities are evidence-based (as defined in 34 CFR 77.1(c)). The applicant must also describe its, or its partner organization's, if applicable, experience providing these activities, including any data demonstrating effectiveness.

(2) In addressing the requirement in section 4624(a)(6) of the ESEA, an applicant must provide a description of the process used to develop the application, which must include the involvement of an LEA(s) (including but not limited to the LEA's or LEAs' involvement in the creation and planning of the application and a signed Memorandum of Understanding) and at least one public elementary or secondary school that is located within

the identified geographic area that the grant will serve.

(3) An applicant must demonstrate that its proposed project—

(a) Is representative of the geographic area proposed to be served; and

(b) Would provide a majority of the solutions from the applicant's proposed pipeline services in the geographic area proposed to be served.

(4) In addressing the requirement in section 4624(a)(9) of the ESEA, an applicant must describe the process it will use to establish and maintain a family navigation system, including an explanation of the process the applicant will use to establish and maintain family and community engagement.

Final Definitions

The Assistant Secretary establishes the following definitions for this program. We may apply one or more of these definitions in any year in which this program is in effect.

Family navigation system means a service delivery model that includes coordinators who teach, mentor, and collaborate with students and their families, as well as community members, to choose interventions, treatments, or solutions provided by the grantee and that best meet the needs of students and their families. Students and their families can select services and supports based on available services and individual needs, as well as advocate for additional services.

Graduation rate means the four-year adjusted cohort graduation rate or extended-year adjusted cohort graduation rate as defined in section 8101(25) and (23) of the ESEA.

Indian Tribe means an Indian Tribe or Tribal Organization as defined in section 4 of the Indian Self-determination Act (25 U.S.C. 450b).

Indicators of need means currently available data that describe—

(a) Education need, which means—

(1) All or a portion of the neighborhood includes or is within the attendance zone of a low-performing school that is a high school, especially one in which the graduation rate is less than 60 percent or a school that can be characterized as low-performing based on another proxy indicator, such as students' on-time progression from grade to grade; and

(2) Other indicators, such as significant achievement gaps between subgroups of students (as identified in section 1111(b)(2)(B)(xi) of the ESEA), within a school or LEA, high teacher and principal turnover, or high student absenteeism; and

(b) Family and community support need, which means—

(1) Percentages of children with preventable chronic health conditions (*e.g.,* asthma, poor nutrition, dental problems, obesity) or avoidable developmental delays;

(2) Immunization rates;

(3) Rates of crime, including violent crime;

(4) Student mobility rates;

(5) Teenage birth rates;

(6) Percentage of children in single parent or no-parent families;

(7) Rates of vacant or substandard homes, including distressed public and assisted housing; or

(8) Percentage of the residents living at or below the Federal poverty threshold.

Regular high school diploma has the meaning set out in section 8101(43) of the ESEA.

Representative of the geographic area proposed to be served means that residents of the geographic area proposed to be served have an active role in decision-making and that at least one-third of the applicant's governing board or advisory board is made up of—

(a) Residents who live in the geographic area proposed to be served, which may include residents who are representative of the ethnic and racial composition of the neighborhood's residents and the languages they speak;

(b) Residents of the city or county in which the neighborhood is located but who live outside the geographic area proposed to be served, and who earn less than 80 percent of the area's median income as published by the U.S. Department of Housing and Urban Development;

(c) Public officials who serve the geographic area proposed to be served (although not more than one-half of the governing board or advisory board may be made up of public officials); or

(d) Some combination of individuals from the three groups listed in paragraphs (a), (b), and (c) of this definition.

Segmentation analysis means the process of grouping and analyzing data from children and families in the geographic area proposed to be served according to indicators of need or other relevant indicators to allow grantees to differentiate and more effectively target interventions based on the needs of different populations in the geographic area.

Student achievement means—

(a) For tested grades and subjects—

(1) A student's score on the State's assessments under the ESEA; and

(2) As appropriate, other measures of student learning, such as those described in paragraph (b) of this definition, provided they are rigorous and comparable across classrooms and programs; and

(b) For non-tested grades and subjects, alternative measures of student learning and performance, such as student scores on pre-tests and end-of-course tests; student performance on English language proficiency assessments; and other measures of student achievement that are rigorous and comparable across classrooms.

Student mobility rate is calculated by dividing the total number of new student entries and withdrawals at a school, from the day after the first official enrollment number is collected through the end of the academic year, by the first official enrollment number of the academic year.

Final Selection Criteria

The Assistant Secretary establishes the following selection criteria for evaluating an application under this program. We may apply one or more of these criteria in any year in which this program is in effect.

(a) *Need for project.* In determining the need for the proposed project, the Secretary considers one or more of the following factors—

(1) The magnitude or severity of the problems to be addressed by the proposed project as described by indicators of need and other relevant indicators identified in part by the needs assessment and segmentation analysis; and

(2) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including—

(i) The nature and magnitude of those gaps or weaknesses; and

(ii) A pipeline of solutions addressing the identified gaps and weaknesses, including solutions targeted to early childhood, K–12, family and community supports, and college and career.

(b) *Quality of project design.* In determining the quality of project design for the proposed project, the Secretary considers one or more of the following factors—

(1) The extent to which the applicant describes a plan to create a complete pipeline of services, without time and resource gaps, that is designed to prepare all children in the neighborhood to attain a high-quality education and successfully transition to college and a career;

(2) The extent to which the project will significantly increase the proportion of students in the neighborhood that are served by the

complete continuum of high-quality services; and

(3) The extent to which the proposed family navigation system is high-quality and provides students and their families sufficient services and supports based on available services and individual needs.

This document does not preclude us from proposing additional priorities, requirements, definitions, or selection criteria, subject to meeting applicable rulemaking requirements.

Note: This document does *not* solicit applications. In any year in which we choose to use these priorities, requirements, definitions, and selection criteria, we invite applications through a notice in the **Federal Register**.

Executive Orders 12866, 13563, and 13771

Regulatory Impact Analysis

Under Executive Order 12866, the Office of Management and Budget (OMB) must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive order and subject to review by OMB. Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive order.

This final regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

Under Executive Order 13771, for each new regulation that the Department proposes for notice and comment or otherwise promulgates that is a significant regulatory action under Executive Order 12866, and that imposes total costs greater than zero, it must identify two deregulatory actions. For FY 2021, any new incremental costs associated with a new regulation must be fully offset by the elimination of existing costs through deregulatory actions. Because these regulations are not a significant regulatory action, the requirements of Executive Order 13771 do not apply.

We have also reviewed this final regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only upon a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing these final priorities, requirements, definitions, and selection criteria only on a reasoned determination that their benefits justify their costs. In choosing among alternative regulatory approaches, we selected those approaches that maximize net benefits. Based on the analysis that follows, the Department believes that this regulatory action is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with these Executive orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. We have determined that these regulations will impose minimal costs on eligible applicants. Program participation is voluntary, and the costs imposed on applicants by these regulations will be limited to paperwork burden related to preparing an application. The potential benefits of implementing the programs—for example, expanding the choices available to parents and students, improving the academic and developmental outcomes of children living in the most distressed communities of the United States—will outweigh any costs incurred by applicants, and the costs of carrying out activities associated with the application will be paid for with program funds. For these reasons, we have determined that the costs of implementation will be minimal for eligible applicants.

Regulatory Flexibility Act Certification

The Secretary certifies that this regulatory action will not have a significant economic impact on a substantial number of small entities. The U.S. Small Business Administration Size Standards define ''small entities'' as for-profit or nonprofit institutions with total annual revenue below $7,000,000 or, if they are institutions controlled by small governmental jurisdictions (that are comprised of cities, counties, towns, townships, villages, school districts, or special districts), with a population of less than 50,000.

The small entities that this regulatory action will affect are State educational agencies; LEAs, including charter schools that operate as LEAs under State law; institutions of higher education; other public agencies; private nonprofit organizations; freely associated States and outlying areas; Indian Tribes or Tribal organizations; and for-profit organizations. We believe that the costs imposed on an applicant by the priorities, requirements, definitions, and selection criteria will be limited to paperwork burden related to preparing an application and that the benefits of the priorities, requirements, definitions, and selection criteria will outweigh any costs incurred by the applicant.

Participation in the PN program is voluntary. For this reason, the priorities,

requirements, definitions, and selection criteria will impose no burden on small entities unless they applied for funding under the program. We expect that in determining whether to apply for PN program funds, an applicant will evaluate the requirements of preparing an application and any associated costs, and weigh them against the benefits likely to be achieved by receiving a PN program grant. An applicant will probably apply only if it determines that the likely benefits exceed the costs of preparing an application.

We believe that the priorities, requirements, definitions, and selection criteria will not impose any additional burden on a small entity applying for a grant than the entity would face in the absence of this regulatory action. That is, the length of the applications those entities would submit in the absence of this regulatory action and the time needed to prepare an application would likely be the same.

This regulatory action will not have a significant economic impact on a small entity once it receives a grant because it will be able to meet the costs of compliance using the funds provided under this program.

Paperwork Reduction Act of 1995: The proposed priorities, requirements, definitions, and selection criteria contain information collection requirements that are approved by OMB under OMB control number 1894–0006; the proposed priorities, requirements, definitions, and selection criteria do not affect the currently approved data collection.

Intergovernmental Review: This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance. This document provides early notification of our specific plans and actions for this program.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at: *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register,** in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Frank T. Brogan,

Assistant Secretary for Elementary and Secondary Education.

RIN 2060–AU91

Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The U.S. Environmental Protection Agency (EPA) is finalizing amendments to the Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984. We are finalizing specific amendments that would allow owners or operators of storage vessels subject to the Standards of Performance for Volatile Organic Liquid Storage Vessels and equipped with either an external floating roof (EFR) or internal floating roof (IFR) to voluntarily elect to comply with the requirements specified in the National Emission Standards for Storage Vessels (Tanks)—Control Level 2, as an alternative standard, in lieu of the requirements specified in the Standards of Performance for Volatile Organic Liquid Storage Vessels, subject to certain caveats and exceptions for monitoring, recordkeeping, and reporting.

DATES: The final rule is effective on January 19, 2021.

ADDRESSES: The EPA has established a docket for this rulemaking under Docket ID No. EPA–HQ–OAR–2020–0372. All documents in the docket are listed on the *https://www.regulations.gov/* website. Although listed, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically on the *https://www.regulations.gov/* website. Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are closed to the public, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. For further information and updates on EPA Docket Center services, please visit us online at *https://www.epa.gov/dockets.* The EPA continues to carefully and continuously monitor information from the Center for Disease Control, local area health departments, and our federal partners so that we can respond rapidly as conditions change regarding COVID–19.

FOR FURTHER INFORMATION CONTACT: For questions about this final action, contact Mr. Neil Feinberg, Sector Policies and Programs Division (E143–01), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–2214; fax number: (919) 541–0516; and email address: *feinberg.stephen@epa.gov.*

SUPPLEMENTARY INFORMATION: *Preamble acronyms and abbreviations.* We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

CAA Clean Air Act
CFR Code of Federal Regulations
EFR external floating roof
EPA Environmental Protection Agency
ICR Information Collection Request
IFR internal floating roof
kPa kilopascals
m3 cubic meters

NAICS North American Industry Classification System
NESHAP national emission standards for hazardous air pollutants
NSPS new source performance standards
OMB Office of Management and Budget
PRA Paperwork Reduction Act
tpy tons per year
VOC volatile organic compound(s)

Background information. On October 16, 2020, the EPA proposed revisions to the Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984. 85 FR 65774. In this action, the EPA is finalizing decisions and revisions for the rule. We summarize the in-scope comments we timely received regarding the proposed rule and provide our responses in this preamble. A ''track changes'' version of the regulatory language that incorporates the changes in this action is available in the docket.

Organization of this document. The information in this preamble is organized as follows:

I. General Information

A. Does this action apply to me?

Regulated entities. Categories and entities potentially affected by this action are shown in Table 1 of this preamble.

TABLE 1—EXAMPLES OF POTENTIALLY AFFECTED ENTITIES BY CATEGORY

Category	NAICS code [1]	Examples of potentially regulated entities
Industrial	325	Chemical manufacturing facilities.
	324	Petroleum and coal products manufacturing facilities.
	422710	Petroleum bulk stations and terminals.

[1] North American Industry Classification System.

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. To determine whether your entity is affected by this action, you should carefully examine the applicability criteria found in the final rule. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this preamble, your delegated authority, or your EPA Regional representative listed in 40 CFR 60.4 (General Provisions).

B. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of this final action will be available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this final action at *https://www.epa.gov/stationary-sources-air-pollution/volatile-organic-liquid-storage-vessels-including-petroleum-storage.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of the final rule and key technical documents at this same website.

C. Judicial Review and Administrative Reconsideration

Under Clean Air Act (CAA) section 307(b)(1), judicial review of this final action is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit by March 22, 2021. Under CAA section 307(b)(2), the requirements established by this final rule may not be challenged separately in any civil or criminal proceedings brought by the EPA to enforce the requirements.

Section 307(d)(7)(B) of the CAA further provides that ''[o]nly an objection to a rule or procedure which was raised with reasonable specificity during the period for public comment (including any public hearing) may be raised during judicial review.'' This section also provides a mechanism for the EPA to convene a proceeding for reconsideration, ''[i]f the person raising an objection can demonstrate to the EPA that it was impracticable to raise such objection within [the period for public comment] or if the grounds for such objection arose after the period for public comment, (but within the time specified for judicial review) and if such objection is of central relevance to the outcome of the rule.'' Any person seeking to make such a demonstration to us should submit a Petition for Reconsideration to the Office of the Administrator, U.S. Environmental Protection Agency, Room 3000, WJC West Building, 1200 Pennsylvania Ave. NW, Washington, DC 20460, with a copy to both the person(s) listed in the preceding **FOR FURTHER INFORMATION CONTACT** section, and the Associate General Counsel for the Air and Radiation Law Office, Office of General Counsel (Mail Code 2344A), U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

II. Background and Final Amendments

Pursuant to the EPA's authority under CAA section 111, the Agency proposed (49 FR 29698, July 23, 1984) and promulgated (52 FR 11420, April 8, 1987) new source performance standards (NSPS) at 40 CFR part 60, subpart Kb, for Volatile Organic Liquid Storage Vessels, Including Petroleum Liquid Storage Vessels, for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984. To reduce volatile organic compound (VOC) emissions from storage vessels with a capacity of 75

cubic meters (m^3) or more that store organic liquids with a true vapor pressure over 27.6 kilopascals (kPa), and from storage vessels with a capacity of 151 m^3 or more that store organic liquids with a true vapor pressure over 5.2 kPa, NSPS subpart Kb requires the use of either an EFR, an IFR, or a closed vent system and a control device. See 40 CFR 60.110b(a) and 60.112b(a) and (b).[1] NSPS subpart Kb also specifies testing, monitoring, recordkeeping, reporting, and other requirements in 40 CFR 60.113b through 60.116b to ensure compliance with the standards. More specifically, 40 CFR 60.113b requires, among other things, that certain inspections for IFR and EFR occur at least once within certain defined timeframes (such as at least once every year, 5 years, or 10 years). Storage vessels with an EFR consist of an open-top cylindrical steel shell equipped with a deck that floats on the surface of the stored liquid (commonly referred to as a floating roof). Storage vessels with an IFR are fixed roof vessels [2] that also have a deck internal to the tank that floats on the liquid surface within the fixed roof vessel (commonly referred to as an internal floating roof).

The standards in NSPS subpart Kb for storage vessels with an EFR or IFR are a combination of a design, equipment, work practice, and operational standards set pursuant to CAA section 111(h). These standards require, among other things, that a rim seal be installed continuously around the circumference of the vessel (between the inner wall of the vessel and the floating roof) to prevent VOC from escaping to the atmosphere through gaps between the floating roof and the inner wall of the storage vessel. Similarly, NSPS subpart Kb requires deck fittings [3] on the floating roof to be equipped with a gasketed cover or lid that is kept in the closed position at all times (*i.e.,* no visible gap), except when the device (the deck fitting) is in actual use, to prevent VOC emissions from escaping through the deck fittings. In general, NSPS subpart Kb requires owners or operators to conduct visual inspections to check for defects in the floating roof, rim seals, and deck fittings (*e.g.,* holes, tears, or other openings in the rim seal, or covers and lids on deck fittings that no longer close properly) that could expose the liquid surface to the atmosphere and potentially result in VOC emission losses through rim seals and deck fittings.[4]

Since promulgation of NSPS subpart Kb, the EPA promulgated 40 CFR part 63, subpart WW, which is applicable to storage vessels containing organic materials, as part of the generic maximum achievable control technology standards program for setting national emission standards for hazardous air pollutants (NESHAP) under CAA section 112. See 64 FR 34854 (June 29, 1999). NESHAP subpart WW was developed for the purpose of providing consistent EFR and IFR requirements for storage vessels that could be referenced by multiple NESHAP subparts. Like the NSPS subpart Kb standards for floating roof tanks, NESHAP subpart WW is comprised of a combination of design, equipment, work practice, and operational standards. See proposed rule for NESHAP subpart WW (63 FR 55178, 55196 (October 14, 1998)). Both rules specify monitoring, recordkeeping, and reporting requirements for storage vessels equipped with EFR or IFR, and both include numerous requirements for inspections that occur at least once within certain defined timeframes. See 40 CFR 63.1063 for the IFR and EFR inspection requirements of NESHAP subpart WW. The inspections required by NESHAP subpart WW are intended to achieve the same goals as those inspections required by NSPS subpart Kb (*e.g.,* both rules require visual inspections to check for defects in the floating roof, rim seals, and deck fittings). Further, NESHAP subpart WW incorporates technical improvements based on the EPA's experience with implementation of other NESHAP. For storage vessels equipped with either an EFR or IFR, as long as there is visual access (as explained below), NESHAP subpart WW allows that the visual inspection of the floating roof deck, deck fittings, and rim seals may be conducted, while the tank remains in-service, from the top-side of the floating roof (meaning on top of the floating roof, and in the case of an IFR, under the fixed roof and internal to the tank); this is referred to as an in-service top-side of the floating roof visual inspection. In other words, in the case of an IFR, if an owner or operator has physical access to the inside of the tank above the floating roof and a floating roof design which allows inspectors to have visual access to all rim seals and deck fittings of the floating roof (meaning an inspector can see all the components required to be inspected) while the storage vessel is in-service, then NESHAP subpart WW does not require the owner or operator to take the storage vessel out of service to inspect the floating roof, rim seals, and deck fittings in accordance with 40 CFR 63.1063(d)(1).[5] This contrasts with NSPS subpart Kb, which, as explained in the proposed rule, requires that these inspections be conducted when the storage vessel is out-of-service (compare 40 CFR 63.1063(d)(1) with 40 CFR 60.113b(a)(4) and (b)(6)).

Pursuant to the EPA's authority under CAA section 111(h), we proposed amendments to NSPS subpart Kb in a new paragraph (see proposed 85 FR 65782—40 CFR 60.110b(e)(5)) that would allow owners or operators of storage vessels subject to NSPS subpart Kb, and equipped with either an EFR or IFR, the choice to elect to comply with the requirements specified in NESHAP subpart WW as an alternative standard, in lieu of the requirements specified in NSPS subpart Kb. 85 FR 65774 (October 16, 2020). Sources subject to NSPS subpart Kb that are equipped with either an EFR or IFR that elect to utilize the alternative standard would comply with all of the requirements in NESHAP subpart WW instead of the requirements in NSPS subpart Kb, 40 CFR 60.112b through 60.117b, subject to certain caveats and exceptions explained in the proposed rule and below. Among other things, this alternative allows owners or operators of storage vessels subject to NSPS subpart Kb that are equipped with an IFR, and that can meet the visual access requirement of NESHAP subpart WW explained above, to conduct the internal in-service top-side of the floating roof visual inspection pursuant to NESHAP subpart WW, thereby avoiding the need to empty and degas the vessel for the sole purpose of conducting the inspection. Further, we are not changing the underlying monitoring, reporting, or recordkeeping requirements in either NSPS subpart Kb or NESHAP subpart WW (with the

[1] All affected storage vessels storing organic liquids with a true vapor pressure of 76.6 kPa or more must use a closed vent system and a control device. 40 CFR 60.112b(b).

[2] A fixed roof storage vessel consists of a cylindrical steel shell with a permanently affixed roof, which may vary in design from cone or dome-shaped to flat.

[3] Numerous fittings pass through or are attached to floating roof decks to accommodate structural support components or to allow for operational functions. Typical deck fittings include, but are not limited to, the following: Access hatches, gauge floats, gauge-hatch/sample ports, rim vents, deck drains, deck legs, vacuum breakers, and guidepoles. IFR tanks may also have deck seams, fixed-roof support columns, ladders, and/or stub drains.

[4] For details about storage vessel emissions, refer to the Compilation of Air Pollutant Emission Factors, Volume 1: Stationary Point and Area Sources, AP–42, Fifth Edition, Chapter 7: Liquid Storage Tanks, dated June 2020, which is available at: *https://www.epa.gov/air-emissions-factors-and-quantification/ap-42-compilation-air-emissions-factors.*

[5] ''The inspection may be performed entirely from the top side of the floating roof, as long as there is visual access to all deck components specified in paragraph (a) of this section.'' 40 CFR 63.1063(d)(1).

exception of some conforming and referencing edits to recordkeeping and reporting as discussed in the proposed rule and below), nor are we changing the applicability criteria in NSPS subpart Kb or NESHAP subpart WW. We are requiring that owners or operators that choose to use this optional alternative standard continue to use the same NSPS subpart Kb procedures for all storage vessels when determining applicability of NSPS subpart Kb; thus, owners or operators that choose to use this alternative must continue to comply with the monitoring requirements of 40 CFR 60.116b(a), (c), (e), and (f)(1), and also must keep other records and furnish other reports (as discussed in the proposed rule and below) in addition to all of the requirements specified in 40 CFR 63.1060 through 63.1067 of NESHAP subpart WW. In addition, because NSPS subpart Kb applies to each single storage vessel (see 40 CFR 60.110b for NSPS subpart Kb applicability and definition of affected facility), this alternative standard would be available for each affected facility as defined in NSPS subpart Kb. In other words, an owner or operator with multiple affected facilities can choose to use (or not use) the alternative for each individual affected facility.

After considering the public comments received, the EPA is finalizing the amendments that were proposed with minimal changes as a result of comments. We are clarifying that the notification for switching to or from the alternative standard is only required for the initial inspection after the switch. We are also correcting typographical errors in NSPS subpart Kb that inadvertently referenced the wrong, nonexistent subparts.

III. Public Comments and Responses

This section presents a summary of the relevant public comments received on the proposed amendments and the EPA's responses. The EPA received five relevant public comments on the proposed amendments, some of which contained portions that were out of scope, and one comment that was entirely out of scope. The comments can be obtained online from the Federal Docket Management System at *https://www.regulations.gov/.*

Comment: One commenter stated that the EPA should consider increasing the required frequency of inspections under the alternative standard, and that the EPA did not offer strong evidence of equivalence between the NSPS subpart Kb requirements and the alternative standard.

Response: As discussed in section III.A of the preamble to the proposed rule, EPA determined that the alternative standard is appropriate because it will achieve a reduction in emissions at least equivalent to the reduction in emissions achieved under NSPS subpart Kb, and that the alternative standard is just as stringent as, if not more stringent than, the underlying standard. This determination was based upon the premise that the proposal would not change the underlying compliance schedule(s) for events (inspections) under NSPS subpart Kb or NESHAP subpart WW. The EPA did not solicit comment on, nor did we intend to make changes to, any other provisions of NSPS subpart Kb or NESHAP subpart WW, including the frequency of inspections required by each of those subparts. Further, the EPA referenced and provided background documentation in the docket to support this equivalency determination (see Docket Item No. EPA–HQ–OAR–2020–0372–0004). The commenter did not explain how the EPA's support of the proposed equivalency determination was inadequate or provide any evidence to support the claimed need of increased inspection frequency. While the commenter states that ''empty vessel inspections'' are ''potentially more comprehensive,'' they offer no explanation for this claim and do not dispute the EPA's explanation that ''[c]onducting the in-service top-side-of-the-floating-roof inspection per NESHAP subpart WW affords the inspector the same ability to examine all the listed components for all of the listed defects/inspection failures as if the storage vessel was emptied and degassed.'' 85 FR 65779. Therefore, the EPA does not find it necessary to increase the required frequency of inspections under the alternative standard in order to determine equivalency for the multiple reasons stated in section III.A of the proposal preamble which are not repeated here.

Comment: One commenter suggested that the EPA consider including additional context for the Agency's explanation regarding the emission reduction potential of allowing compliance with the alternative standard.

Response: The EPA has already included a document in the docket titled ''Impacts for Revision of Internal Floating Roof Storage Vessel (Tank) Inspection Requirements Subject to 40 CFR part 60 Subpart Kb'' (Docket Item No. EPA–HQ–OAR–2020–0372–0005) that explains the air quality impacts of the proposal. This document explains emission releases from tank emptying and degassing events and includes national impact estimates of the potential emissions avoided by the proposal in terms of tons per year (tpy) of VOC. This document already includes information that the commenter suggests should be added. Further, the commenter did not provide any explanation as to why it believes the documentation in the docket at proposal provided inadequate context for understanding the predicted emissions reductions associated with the proposed alternative standard. Therefore, the EPA does not find it necessary to conduct any additional analysis of the air quality impacts associated with the alternative standard.

Comment: Several commenters recommended clarifying that the proposed revisions (the alternative standard) can be used by sources subject to other regulations that reference NSPS subpart Kb, such as the National Emission Standard for Benzene Waste Operations and the Gasoline Distribution MACT. The commenters noted that some emission standards that reference NSPS subpart Kb do not have the same design capacity and vapor pressure thresholds for requiring control as NSPS subpart Kb yet still require compliance with NSPS subpart Kb. The commenter suggested that the language of the proposed revisions be changed to be inclusive of storage vessels subject to those referencing standards.

Response: The EPA did not propose to allow the alternative standard for any sources aside from those that meet the applicability criteria in 40 CFR 60.110b and which are equipped with either an IFR or EFR pursuant to 40 CFR 60.112b(a)(1) or (2). If the EPA were to make the alternative standard available to sources that comply with NSPS subpart Kb via a referencing subpart as commenters suggest, then the EPA would first need to conduct a detailed analysis of how each potential referencing subpart references NSPS subpart Kb. The EPA would then need to include conforming regulations in this rulemaking for recordkeeping, reporting, and applicability of general provisions as needed for those referencing subparts. These time-consuming analyses and associated regulatory amendments are outside the scope of this limited rulemaking. Therefore, we are not making changes to the criteria for storage vessels allowed to use the alternative standard at this time. However, the EPA will consider addressing the commenters' suggestion should the Agency decide to propose additional amendments to NSPS subpart

Kb in the future via a different rulemaking process.

Comment: Several commenters recommended clarifying the reporting requirements of the proposed revisions. The commenters stated that the proposed revisions at 40 CFR 60.110b(e)(5)(iv)(B) and (C) require that each affected facility using the alternative standard submit reports under 40 CFR 63.1066 of NESHAP subpart WW; however, it was unclear when these reports need to be submitted. The commenter stated that it was unclear whether these reports should be submitted only with the first inspection using the alternative standard or with every subsequent inspection as well. The commenter stated that if the report was only required for the first inspection, this would be redundant with the reporting requirement in 40 CFR 60.110b(e)(5)(iv)(A). Alternatively, if this requirement were for every inspection, this requirement would conflict with the requirement in 40 CFR 60.110b(e)(5)(iv)(F)(*2*) to submit inspection reports only when inspection failures occur.

Response: The EPA intended to require only the initial notification that occurs after electing to comply with the alternative standard under 40 CFR 60.110b(e)(5)(iv)(A). Therefore, we agree with the commenters' suggestion to remove the proposed provision that would have required inclusion of this notification with subsequent reports and have made the corresponding changes in the final rule language.

Comment: Several commenters suggested clarifying the reporting frequency in the proposed revisions. The commenters stated that maintaining the reporting frequency of NSPS subpart Kb ''could lead to inconsistent and duplicative reporting requirements which . . . EPA has repeatedly acknowledged impose unnecessary burden with no environmental benefit,'' and that the EPA should allow semi-annual reporting frequency. The commenters stated that a semi-annual reporting requirement would be more consistent with reporting requirements established after the promulgation of NSPS subpart Kb in 1987. They also stated that the EPA allows storage vessels subject to both NSPS subpart Kb and a NESHAP to submit compliance reports on a semi-annual basis.

Response: As the EPA explained in section V of the proposed amendments, the Agency did not solicit comment on, nor did we intend to make changes to, any other provisions of NSPS subpart Kb or NESHAP subpart WW aside from incorporating the proposed alternative standard. As such, the EPA is not modifying the reporting schedule for NSPS subpart Kb because such a change would be outside the scope of this limited rulemaking which was intended only to incorporate the proposed alternative standard. It was not the EPA's intent to make changes to the underlying reporting schedules in NSPS subpart Kb. However, the EPA will consider addressing the commenters' suggestion should the Agency decide to propose additional amendments to NSPS subpart Kb in the future via a different rulemaking process.

Comment: Several commenters recommended clarifying the inspection deadlines of the alternative standard. The commenters stated that the EPA should allow inspections to occur at any point within the specified calendar period (*e.g.,* within each calendar year rather than a specific 1-year interval), provided that a minimum amount of time has passed since the last inspection.

Response: As the EPA explained in section V of the proposed amendments, the Agency did not solicit comment on, nor did we intend to make changes to, any other provisions of NSPS subpart Kb or NESHAP subpart WW aside from incorporating the proposed alternative standard. As such, the EPA is not modifying the inspection schedule requirements for NSPS subpart Kb because such a modification would be outside the scope of this limited rulemaking which was intended only to incorporate the proposed alternative standard. It was not the EPA's intent to make changes to the underlying inspection schedules in NSPS subpart Kb. However, the EPA will consider addressing the commenters' suggestion should the Agency decide to propose additional amendments to NSPS subpart Kb in the future via a different rulemaking process.

Comment: One commenter suggested that the EPA make technical corrections to 40 CFR 60.115b(a)(4) and (b) to correct previous inadvertent errors in citations.

Response: The EPA agrees with the commenter and has corrected 40 CFR 60.115b(a)(4) to reference 40 CFR 60.112b(a)(1) and 40 CFR 60.115b(b) to reference 40 CFR 60.112b(a)(2). While this comment and the EPA's associated revisions do not fit squarely within the scope of the proposal to incorporate the alternative standard, and do address a separate provision of NSPS subpart Kb unrelated to the alternative standard, the EPA found it appropriate to make these changes because commenters identified a genuine typographical error. The EPA's revisions here will not alter how sources and/or the Agency have been implementing NSPS subpart Kb in any way. The EPA finds it appropriate and convenient to use this rulemaking to correct the inadvertent typographical error.

IV. Impacts of the Final Rule

A. What are the air quality impacts?

We estimate that nationwide VOC emissions reductions would range from 65.8 tpy to 83.3 tpy as a result of the amendments. As explained at proposal, the alternative standard allows owners or operators to avoid emptying and degassing storage vessels in order to perform certain inspections, thereby reducing emissions caused by degassing vapors which have historically been vented to the atmosphere or sent to control equipment. These emissions reductions were documented in the memorandum, *Impacts for Revision of Internal Floating Roof Storage Vessel (Tank) Inspection Requirements Subject to 40 CFR part 60 Subpart Kb* (see Docket ID No. EPA–HQ–OAR–0372–0005).

B. What are the cost impacts?

We estimate that the amendments will result in a nationwide net cost savings of between $768,000 and $1,091,000 per year (in 2019 dollars). For further information on the cost savings associated with the amendments, see the memorandum, *Impacts for Revision of Internal Floating Roof Storage Vessel (Tank) Inspection Requirements Subject to 40 CFR part 60 Subpart Kb* (see Docket ID No. EPA–HQ–OAR–0372–0005).

C. What are the economic impacts?

As noted earlier, we estimated a nationwide cost savings associated with the amendments. Therefore, we do not expect the actions in this rulemaking to result in business closures, significant price increases or decreases in affected output, or substantial profit loss. For more information, refer to the *Economic Impact Analysis for the Proposed Alternative Standard Available to Floating Roof Storage Vessels (Tanks) Subject to 40 CFR part 60 Subpart Kb,* which is in the docket for this rulemaking.

D. What are the benefits?

The EPA did not monetize the benefits from the estimated emission reductions of VOC associated with this action. However, we expect this action would provide benefits associated with VOC emission reductions.

V. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was, therefore, not submitted to the Office of Management and Budget (OMB) for review.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is considered an Executive Order 13771 deregulatory action. Details on the estimated cost savings of this rule can be found in the EPA's analysis of the potential costs and benefits associated with this action.

C. Paperwork Reduction Act (PRA)

The information collection activities in this rule have been submitted for approval to the OMB under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 1854.13. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here. The information collection requirements are not enforceable until OMB approves them.

See section III.A of the preamble for the proposed rule (''What actions are we proposing?'') for a description of the alternative standard. Information about inspection activities related to NSPS subpart Kb is collected to assure compliance with NSPS subpart Kb. Most of the costs associated with the alternative standard are associated with labor hours. The time needed to conduct an in-service top-side-of-the-floating-roof visual inspection pursuant to the requirements in NESHAP subpart WW is expected to be less than the time needed to complete an out-of-service inspection pursuant to NSPS subpart Kb. Therefore, we anticipate a cost savings. This ICR documents the incremental burden imposed by the final amendments only. In summary, there is a decrease in the burden (labor hours) documented in this ICR due a reduction in the number of respondents (storage vessels subject to NSPS subpart Kb) that would be required to empty and degas their storage vessels equipped with an IFR.

Respondents/affected entities: Owners or operators of storage vessels constructed after July 23, 1984, that have capacity greater than or equal to 75 m^3 used to store volatile organic liquids (including petroleum liquids) with a true vapor pressure greater than or equal to 3.5 kPa, and storage vessels constructed after July 23, 1984, that have capacity between 75 and 151 m^3 capacity for which the true vapor pressure of the stored liquid is greater than or equal to 15 kPa.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart Kb, and 40 CFR part 63, subpart WW).

Estimated number of respondents: 385 facilities.

Frequency of response: Variable (storage vessel specific).

Total estimated burden: A reduction of 6,210 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: A savings of $930,000 (per year), includes a savings of $466,000 annualized capital or operation and maintenance costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9. When OMB approves this ICR, the Agency will announce that approval in the **Federal Register** and publish a technical amendment to 40 CFR part 9 to display the OMB control number for the approved information collection activities contained in this final rule.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities. The alternative standard is optional; therefore, small entities are not required to comply with the alternative.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the National Government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. It will not have substantial direct effects on tribal governments, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this action.

Consistent with the EPA Policy on Consultation and Coordination with Indian Tribes, the EPA offered consultation with tribal officials during the development of this action; however, the Agency did not receive a request for consultation. The EPA held a webinar with communities on November 10, 2020, which included tribes during the public comment period to inform them of the content of the proposed rule and to encourage them to submit comments on the proposed rule.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order

12898 (59 FR 7629, February 16, 1994). Although the proposed alternative is optional, the alternative standard is at least as stringent as the current applicable requirements.

As discussed above in section V.G, a webinar was held for community groups which included environmental justice communities.

L. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 60

Environmental protection, Air pollution control, Reporting and recordkeeping requirements, Volatile organic compounds.

Andrew Wheeler,

Administrator.

For the reasons set forth in the preamble, the EPA is amending 40 CFR part 60 as follows:

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

■ 1. The authority citation for part 60 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart Kb—Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984

■ 2. Section 60.110b is amended by adding paragraph (e)(5) to read as follows:

§ 60.110b Applicability and designation of affected facility.

* * * * *

(e) * * *

(5) *Option to comply with part 63, subpart WW, of this chapter.* Except as specified in paragraphs (e)(5)(i) through (iv) of this section, owners or operators may choose to comply with 40 CFR part 63, subpart WW, to satisfy the requirements of §§ 60.112b through 60.117b for storage vessels either with a design capacity greater than or equal to 151 m^3 containing a VOL that, as stored, has a maximum true vapor pressure equal to or greater than 5.2 kPa but less than 76.6 kPa, or with a design capacity greater than or equal to 75 m^3 but less than 151 m^3 containing a VOL that, as stored, has a maximum true vapor pressure equal to or greater than 27.6 kPa but less than 76.6 kPa.

(i) The general provisions in subpart A of this part apply instead of the general provisions in subpart A of part 63 of this chapter.

(ii) Where terms are defined in both this subpart and 40 CFR part 63, subpart WW, the definitions in this subpart apply.

(iii) Owners or operators who choose to comply with 40 CFR part 63, subpart WW, also must comply with the monitoring requirements of § 60.116b(a), (c), (e), and (f)(1), except as specified in paragraphs (e)(5)(iii)(A) through (C) of this section.

(A) The reference to all records applies only to the records required by § 60.116b(c);

(B) The reference to § 60.116b(b) does not apply; and

(C) The reference to § 60.116b(g) does not apply.

(iv) Owners or operators who choose to comply with 40 CFR part 63, subpart WW, must also keep records and furnish reports as specified in paragraphs (e)(5)(iv)(A) through (F) of this section.

(A) For each affected facility, the owner or operator must notify the Administrator at least 30 days before the first inspection is conducted under 40 CFR part 63, subpart WW. After this notification is submitted to the Administrator, the owner or operator must continue to comply with the alternative standard described in this paragraph (e)(5) until the owner or operator submits another notification to the Administrator indicating the affected facility is using the requirements of §§ 60.112b through 60.117b instead of the alternative standard described in this paragraph (e)(5). The compliance schedule for events does not reset upon switching between compliance with this subpart and 40 CFR part 63, subpart WW.

(B) Keep a record of each affected facility using the alternative standard described in this paragraph (e)(5) when conducting an inspection required by § 63.1063(c)(1) of this chapter.

(C) Keep a record of each affected facility using the alternative standard described in this paragraph (e)(5) when conducting an inspection required by § 63.1063(c)(2) of this chapter.

(D) Copies of all records and reports kept pursuant to § 60.115b(a) and (b) that have not met the 2-year record retention required by the introductory text of § 60.115b must be kept for an additional 2 years after the date of submittal of the inspection notification specified in paragraph (e)(5)(iv)(A) of this section, indicating the affected facility is using the requirements of 40 CFR part 63, subpart WW.

(E) Copies of all records and reports kept pursuant to § 63.1065 of this chapter that have not met the 5-year record retention required by the introductory text of § 63.1065 must be kept for an additional 5 years after the date of submittal of the notification specified in paragraph (e)(5)(iv)(A) of this section, indicating the affected facility is using the requirements of §§ 60.112b through 60.117b.

(F) The following exceptions to the reporting requirements of § 63.1066 of this chapter apply:

(*1*) The notification of initial startup required under § 63.1066(a)(1) and (2) of this chapter must be submitted as an attachment to the notification required by §§ 60.7(a)(3) and 60.115b(a)(1);

(*2*) The reference in § 63.1066(b)(2) of this chapter to periodic reports ''when inspection failures occur'' means to submit inspections results within 60 days of the initial gap measurements required by § 63.1063(c)(2)(i) of this chapter and within 30 days of all other inspections required by § 63.1063(c)(1) and (2) of this chapter.

■ 3. Section 60.115b is amended by revising paragraph (a)(4) and the introductory text of paragraph (b) to read as follows:

§ 60.115b Reporting and recordkeeping requirements.

* * * * *

(a) * * *

(4) After each inspection required by § 60.113b(a)(3) that finds holes or tears in the seal or seal fabric, or defects in the internal floating roof, or other control equipment defects listed in § 60.113b(a)(3)(ii), a report shall be furnished to the Administrator within 30 days of the inspection. The report shall identify the storage vessel and the reason it did not meet the specifications of § 60.112b(a)(1) or § 60.113b(a)(3) and list each repair made.

(b) After installing control equipment in accordance with § 60.112b(a)(2) (external floating roof), the owner or operator shall meet the following requirements.

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule and interim final rule; Correction.

SUMMARY: This document corrects technical errors in the final rule that appeared in the December 28, 2020, **Federal Register** under the same as title above. Hereinafter, the December 28 rule is referred to as the CY 2021 PFS final rule.

DATES: This correction is effective January 19, 2021, and is applicable beginning January 1, 2021.

FOR FURTHER INFORMATION CONTACT: Cynthia Lambert-Lawson, (410) 786–1366, Gaysha Brooks, (410) 786–9649, or Annette Brewer (410) 786–6580.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2020–26815 of December 28, 2020, the CY 2021 PFS final rule (85 FR 84472), there were technical errors that are identified and corrected in this correcting document. These corrections are effective and applicable beginning January 1, 2021.

II. Summary of Errors

A. Summary of Errors in the Preamble

On page 84545 of the CY 2021 PFS final rule, third column, prior to the first full paragraph, in our discussion of clarifications and proposals related to digitally stored data services/remote physiologic monitoring/treatment management services, we inadvertently deleted, before publication, language summarizing and responding to two sets of public comments. We also inadvertently included language on page 84545 of the CY 2021 PFS final rule, third column, the first partial paragraph at the top of the column.

B. Summary of Errors in the Addenda

On page 85057, in Table B.2. Audiology, second column, second row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85069, in Table B.5. Clinical Social Work, second column, second row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85076, in Table B.8. Diagnostic Radiology, ninth column entry Measure Steward, third row, we inadvertently misidentified the measure steward.

On page 85083, in Table B.10. Endocrinology, second column, third row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85089, in Table B.11. Family Medicine, second column, sixth row, the entry NQF #/eCQM NQF # contains typographical errors.

On page 85110, in Table B.16. Infectious Disease, ninth column entry Measure Steward, fourth row, we inadvertently misidentified the measure steward.

On page 85114, in Table B.17. Internal Medicine, second column, first row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85124, in Table B.19. Mental/Behavioral Health, second column, fifth row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85130, in Table B.21. Neurology, second column, third row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85141, in Table B.24. Obstetrics/Gynecology, third column entry Quality # sixth row, we inadvertently omitted the Quality number.

On page 85146, in Table B.25a. Oncology/Hematology, third column entry Quality #, fifth row, we inadvertently omitted the Quality number.

On page 85157, in Table B.27. Orthopedic Surgery, second column, third row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85171, in Table B.30. Pediatrics, second column, fifth row, the entry NQF #/eCQM NQF # contains typographical errors.

On page 85171, in Table B.30. Pediatrics, ninth column entry Measure Steward, sixth row, we inadvertently misidentified the measure steward.

On page 85173, in Table B.30. Pediatrics, second column, sixth row, the entry NQF #/eCQM NQF # contains typographical errors.

On page 85179, in Table B.32. Physical Therapy/Occupational Therapy, second column, fifth row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85190, in Table B.35. Preventive Medicine, second column, third row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85199, in Table B.38. Skilled Nursing Facility, third column entry Quality #, fifth row, we inadvertently omitted the Quality number.

On page 85203, in Table B.39. Speech Language Pathology, second column, first row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85268, in Table D.26. Preventive Care and Screening: Screening for Depression and Follow-Up Plan, second column, first row, the entry NQF #/eCQM NQF # contains a typographical error.

On page 85333, in Table D.82. Immunizations for Adolescents, second column, first row, the entry NQF #/eCQM NQF # contains a typographical error.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (the APA), the agency is required to publish a notice of the proposed rule in the **Federal Register** before the provisions of a rule take effect. Similarly, section 1871(b)(1) of the Social Security Act (the Act) requires the Secretary to provide for notice of the proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment. In addition, section 553(d) of the APA and section 1871(e)(1)(B)(i) of the Act mandate a 30-day delay in effective date after issuance

or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the APA notice and comment, and delay in effective date requirements; in cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act provide exceptions from the notice and 60-day comment period and delay in effective date requirements of the Act as well. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize an agency to dispense with normal notice and comment rulemaking procedures for good cause if the agency makes a finding that the notice and comment process is impracticable, unnecessary, or contrary to the public interest, and includes a statement of the finding and the reasons for it in the rule. In addition, section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) allow the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and the agency includes in the rule a statement of the finding and the reasons for it.

In our view, this correcting document does not constitute a rulemaking that would be subject to these requirements. This document merely corrects technical errors in the CY 2021 PFS final rule. The corrections contained in this document are consistent with, and do not make substantive changes to, the policies and payment methodologies that were proposed, subject to notice and comment procedures, and adopted in the CY 2021 PFS final rule. As a result, the corrections made through this correcting document are intended to resolve inadvertent errors so that the CY 2021 PFS final rule accurately reflects the policies adopted in the final rule. Even if this were a rulemaking to which the notice and comment and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the CY 2021 PFS final rule or delaying the effective date of the corrections would be contrary to the public interest because it is in the public interest to ensure that the rule accurately reflects our policies as of the date they take effect. Further, such procedures would be unnecessary because we are not making any substantive revisions to the final rule, but rather, we are simply correcting the **Federal Register** document to reflect the policies that we previously proposed, received public comment on, and subsequently finalized in the CY 2021 PFS final rule. For these reasons, we believe there is good cause to waive the requirements for notice and comment and delay in effective date.

IV. Correction of Errors

In FR Doc. 2020–26815 (85 FR 84472), published December 28, 2020, make the following corrections:

A. Correction of Errors in the Preamble

1. On page 84545 of the CY 2021 PFS final rule, third column, the first partial paragraph at the top of the column is corrected by removing the following language:

The medically necessary services associated with all the medical devices for a single patient can be billed by only one practitioner, only once per patient per 30 day period, and only when at least 16 days of data have been collected.

2. On page 84545 of the CY 2021 PFS final rule, third column, prior to the first full paragraph, is corrected by adding the following language:

Comment: Commenters stated that for CPT codes 99457 and 99458, we interpreted ''interactive communication'' to mean ''real-time synchronous, two-way audio interaction that is capable of being enhanced with video or other kinds of data transmission'' and suggested that the required 20 minutes of time associated with CPT codes 99457 and 99458 should be only synchronous time, real-time between a practitioner and a patient. Commenters stated that these two codes include non-face-to-face time as well as real-time two-way audio interactions.

Response: We agree with commenters that our description of the required 20 minutes of time associated with CPT codes 99457 and 99458 should include care management services, as well as synchronous, real-time interactions. That is, we agree that ''interactive communication'' as we defined it in the CY 2021 PFS proposed rule contributes to the total time, but is not the only activity that should be included in the total time.

After considering comments, we are clarifying for purposes of this final rule, that the 20-minutes of intra-service work associated with CPT codes 99457 and 99458 includes a practitioner's time engaged in ''interactive communication'' as well as time engaged in non-face-to-face care management services during a calendar month.

Comment: Commenters disagreed with our statement that the services associated with CPT codes 99453 and 99454 should be billed only once per patient, per 30-day period, and wrote that CMS should clarify that CPT codes 99453 and 99454 can be billed once per provider, per patient, per 30-day period.

Response: We thank commenters for their insights related to billing CPT codes 99453 and 99454. As we stated in the proposed rule, we believe these two codes should be reported for a patient only once during a 30-day period and only when reasonable and necessary. In response to public commenters, we are clarifying that only one practitioner can bill CPT codes 99453 and 99454 during a 30-day period and only when at least 16 days of data have been collected on at least one medical device as defined in section 201(h) of the FFDCA. CPT language suggests that even when multiple medical devices are provided to a patient, the services associated with all the medical devices can be billed only once per patient per 30-day period and only when at least 16 days of data have been collected. We also note that when a more specific code is available to describe a service, CPT indicates that the more specific code should be billed. We believe that there are additional, more specific codes available for billing that allow remote monitoring (for example, CPT code 95250 for continuous glucose monitoring and CPT codes 99473 and 99474 for self-measured blood pressure monitoring). In summary, we are clarifying that CPT codes 99453 and 99454 should be reported only once during a 30-day period; that even when multiple medical devices are provided to a patient, the services associated with all the medical devices can be billed by only one practitioner, only once per patient, per 30-day period, and only when at least 16 days of data have been collected; and that the services must be reasonable and necessary.

B. Correction of Errors in the Addenda

1. On page 85057, in Table B.2. Audiology, second column, second row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

2. On page 85069, in Table B.5. Clinical Social Work, second column, second row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

3. On page 85076, in Table B.8. Diagnostic Radiology, ninth column, third row, the Measure Steward entry ''American College of Radiology/American Medical Association-Physician Consortium for Performance Improvement/National Committee for Quality Assurance'' is corrected to read ''American College of Radiology/National Committee for Quality Assurance''.

4. On page 85083, in Table B.10. Endocrinology, second column, third row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

5. On page 85089, in Table B.11. Family Medicine, second column, sixth row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e'', and in the second column, sixth row, the NQF #/eCQM NQF # entry ''1407/N/A'' is corrected to read ''N/A/N/A''.

6. On page 85110, in Table B.16. Infectious Disease, the ninth column, fourth row, the Measure Steward entry ''Health Resources and Services Administration'' is corrected to read ''National Committee for Quality Assurance''.

7. On page 85114, in Table B.17. Internal Medicine, second column, first row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

8. On page 85124, in Table B.19. Mental/Behavioral Health, second column, fifth row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

9. On page 85130, in Table B.21. Neurology, second column, third row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

10. On page 85141, in Table B.24. Obstetrics/Gynecology, third column, fifth row, the blank Quality # entry is corrected to read ''111''.

11. On page 85146, in Table B.25a. Oncology/Hematology, third column, fifth row, the blank Quality # entry is corrected to read ''110''.

12. On page 85157, in Table B.27. Orthopedic Surgery, second column, third row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

13. On page 85171, in Table B.30. Pediatrics, second column, fifth row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

14. On page 85171, in Table B.30. Pediatrics, ninth column, sixth row, the Measure Steward entry ''Health Resources and Services Administration'' is corrected to read ''National Committee for Quality Assurance''.

15. On page 85173, in Table B.30. Pediatrics, second column, sixth row, the NQF #/eCQM NQF # entry ''1407/N/A'' is corrected to read ''N/A/N/A''.

16. On page 85179, in Table B.32. Physical Therapy/Occupational Therapy, second column, fifth row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

17. On page 85190, in Table B.35. Preventive Medicine, second column, third row, the NQF #/eCQM NQF # ''entry 0418/0418e'' is corrected to read ''N/A/0418e''.

18. On page 85199, in Table B.38. Skilled Nursing Facility, third column, fifth row, the blank Quality # entry is corrected to read ''110''.

19. On page 85203, in Table B.39. Speech Language Pathology, second column, first row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

20. On page 85268, in Table D.26. Preventive Care and Screening: Screening for Depression and Follow-Up Plan, second column, first row, the NQF #/eCQM NQF # entry ''0418/0418e'' is corrected to read ''N/A/0418e''.

21. On page 85333, in Table D.82. Immunizations for Adolescents, second column, first row, the NQF #/eCQM NQF # entry ''1407/N/A'' is corrected to read ''N/A/N/A''.

Dated: January 11, 2021.

Wilma M. Robinson,

Deputy Executive Secretary to the Department, Department of Health and Human Services.

[FR Doc. 2021–00805 Filed 1–14–21; 8:45 am]

BILLING CODE 4120–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

46 CFR Part 67

[Docket No. USCG–2020–0215]

RIN 1625–AC26

Certificate of Documentation—5 Year Renewal Fees

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is issuing a final rule extending the validity of a recreational vessel endorsement on a Certificate of Documentation (COD) from 1 to 5 years. Congress passed and the President signed the Frank LoBiondo Coast Guard Authorization Act of 2018, which requires the Coast Guard to issue recreational vessel CODs for 5 years. By updating the Code of Federal Regulations to reflect this change, the Coast Guard anticipates this final rule to harmonize with the requirements of the 2018 Act that decreased the burden on recreational vessel owners by requiring COD renewals every 5 years rather than annually.

DATES: This final rule is effective February 18, 2021.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2020–0215 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: For information about this document, call or email Mr. Ronald Teague, Department of Homeland Security, U.S. Coast Guard, National Vessel Documentation Center, 792 T J Jackson Drive, Falling Waters, WV 25419; telephone 304 271–2506; email *ronald.s.teague@uscg.mil.*

§ Section
SME Subject matter expert
U.S.C. United States Code

II. Basis and Purpose, and Regulatory History

The legal basis for this final rule is found in Section 512 of the Frank LoBiondo Coast Guard Authorization Act of 2018 (2018 Act) (Pub. L. 115–282, 132 Stat. 4192) (the 2018 Act), which the President signed on December 4, 2018. The 2018 Act directed the Coast Guard to do the following: (1) Make Certificates of Documentation (CODs) for recreational vessels of at least five

net tons [1] effective for 5 years; and (2) require owners of recreational vessel of at least five net tons to notify the Coast Guard of each change in the information on which the issuance of the COD is based. Vessel owners must report each change of information that occurs before expiration of the certificate not later than 30 days after such change. This rulemaking is issued under authority found in Title 46 of the United States Code (U.S.C.) 2103.

The Coast Guard finds that good cause exists under the Administrative Procedure Act, 5 U.S.C. 553, to dispense with notice and comment procedures. Prior notice and opportunity to comment on this rule are unnecessary under 5 U.S.C. 553(b)(3)(B) because Section 512 of the 2018 Act provides the Coast Guard no discretion in adopting the specific time frames for renewal of recreational vessel CODs. The 2018 Act does not allow for alternatives. It does not permit the Coast Guard to decide upon a different time frame for renewal, choose to adopt a different renewal period, or respond to public comments by modifying the substance of the rule. Soliciting public comment on the correct time period for COD renewal for a recreational vessel, or on the decision to update the regulations to comport with the statutory mandate, is unnecessary and would in fact be futile.[2] It should be noted that the Coast Guard has already implemented the requirements of Section 512 of the 2018 Act and is presently issuing multi-year CODs to recreational vessels of at least 5 net tons.

III. Background

Section 512 of the 2018 Act directs how the Coast Guard must administer its certificate of documentation program, and this rule conforms sections in Title 46 of the Code of Federal Regulations (CFR) part 67 to reflect what is now the law. As described above, the Coast Guard finds that good cause exists to forego notice and comment rulemaking because the statute provides the Coast Guard with no discretion to exercise in response to comments. Accordingly, the Coast Guard did not issue a notice of proposed rulemaking. This final rule only amends the regulations so that they are in agreement with the requirements already in the law.

The purpose of this final rule is to meet the Congressional mandate contained in Section 512 of the 2018 Act, in which Congress requires the Coast Guard to issue recreational endorsements on CODs with a validity of 5 years. Additionally, the 2018 Act directs the Coast Guard to establish phased user fees for 5-, 4-, 3-, 2-, and 1-year recreational endorsements. After the phase-in period is complete, on December 31, 2021, applicants will only be able to apply for a 5-year recreational endorsement.

In accordance with 46 U.S.C. 12105(e)(2)(C), the cost of the user fee will be calculated by multiplying 5 years by the recently established $26 annual fee, for a total of $130.[3] The 5-year fee is consistent with statute and will ensure that the Coast Guard collects the appropriate user fees, consistent with the cost to provide the service. The new fee for a 5-year recreational endorsement will be in addition to the fee collected for initial and exchanges of CODs.

Lastly, this final rule repeats the requirement in the 2018 Act for vessel owners to notify the Coast Guard of each change in the information on which the issuance of the COD for the vessel is based, before the expiration of the COD and no later than 30 days after the change. The COD will terminate upon the expiration of the 30-day period if the owner has not notified the Coast Guard of changes within the 30-day timeframe.

IV. Discussion of the Rule

On March 3, 2015, the Coast Guard published a request for comments, specifically seeking input on increasing the validity period for renewing CODs, methods for doing so, and possibly updating the fee for services (80 FR 11361). We received 2,844 comments in response to our notice, largely in support of a multiyear registration option. However, our request for comments was superseded by section 311 of the Coast Guard Authorization Act of 2015 (Pub. L. 114–120), and again by the Frank LoBiondo Coast Guard Authorization Act of 2018 (Pub. L. 115–282), which specifically directed the Coast Guard to change the validity period of CODs for recreational vessels to a 5-year option only, after a 3-year phase-in period during which vessel owners could choose 1, 2, 3, 4, or 5 years.

There are no maritime safety or security reasons to change the recreational vessel COD validity from 1 year to 5. However, Congress determined that a change in the validity was in the best interest of recreational vessel owners, and the Coast Guard is required to recoup the costs of providing a service.[4] To ensure the appropriate user fees are collected for 5-year CODs, the Coast Guard will collect fees consistent with the annual cost multiplied by 5, as required by section 512 of the 2018 Act.

Currently, 46 CFR 67.163(a) states that all endorsements on a COD, including commercial vessel CODs, are valid for 1 year. In this final rule, the Coast Guard is amending this section to reflect what is already stated in the 2018 Act: That only commercial vessel CODs are valid for one 1 year, and that recreational endorsements are valid for 5 years. Additionally, the amendment clarifies that a vessel with both recreational and commercial endorsements must renew annually. The Coast Guard is also amending § 67.163(b) to reflect the appropriate renewal application, as the currently listed form no longer exists. Lastly, as the 2018 Act requires, the Coast Guard is adding paragraph (c) to § 67.163 to establish the 5-year renewal requirement and inform recreational vessel owners that they have the option to renew recreational endorsements for durations of 1, 2, 3, 4, or 5 years during the phase-in period. The ability for the owner to select validity is only in effect from January 1, 2019, to December 31, 2021.

The Coast Guard is amending § 67.317 to reflect that recreational endorsements must be renewed every 5 years. The Coast Guard is also amending § 67.319 to reflect that an owner of a vessel that has a change of information on which the issuance of the COD of the vessel is based must notify the Coast Guard of the change of information within 30 days, as is required by section 512 of the 2018 Act. Furthermore, the Coast Guard is amending this section to reflect that the vessel's COD will be terminated if the owner fails to notify the Coast Guard within 30 days of any changes on which the issuance of the COD is based. The Coast Guard is also amending § 67.515 to remove the word ''annual'' in describing endorsement renewals.

Finally, the Coast Guard is amending table 1 to § 67.550 to reflect the appropriate fee for a 5-year recreational endorsement, and the fees associated with the owner choosing to have a certificate issued or renewed for 1, 2, 3,

[1] 46 U.S.C. 12103 provides, in pertinent part, ''Except as otherwise provided, a certificate of documentation for a vessel may be issued under this chapter only if the vessel is—. . .(2) at least 5 net tons as measured under part J of this subtitle; . . .''

[2] *See Metzenbaum* v. *Federal Energy Regulatory Commission,* 675 F. 2d 1282, 1291 (D.C. Cir. 1982) (finding notice and comment unnecessary for nondiscretionary acts where notice and comment ''might even have been contrary to the public interest, given the expense that would have been involved in a futile gesture.'') (internal quotation marks omitted).

4, or 5 years from January 1, 2019, to December 31, 2021.

V. Regulatory Analyses

We developed this final rule to reflect current law, in accordance with numerous statutes and Executive orders related to rulemaking. Below, we summarize our analyses based on these statutes or Executive orders.

A. Regulatory Planning and Review

Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Executive Order 13771 (Reducing Regulation and Controlling Regulatory Costs) directs agencies to reduce regulation and control regulatory costs and provides that ''for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.''

The Office of Management and Budget (OMB) has not designated this rule a ''significant regulatory action'' under section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed it. DHS considers this rule to be an Executive Order 13771 deregulatory action. *See* the OMB Memorandum titled ''Guidance Implementing Executive Order 13771, titled 'Reducing Regulation and Controlling Regulatory Costs' '' (April 5, 2017). Details on the estimated cost savings of this final rule can be found in the rule's regulatory analysis (RA) that follows.

Following guidance in OMB Circular A–4, we assess the impacts of this rule against a no-action baseline as well as a pre-statutory baseline. The no-action baseline is an assessment against what the world would be like if the rule is not adopted. The pre-statutory baseline is an assessment against what the world would be like if the relevant statute had not been adopted.

This final rule will codify requirements in the 2018 Act that established a new schedule for the renewal of CODs for owners of recreational vessels of at least 5 net tons. Since the final rule does not add any new requirements beyond what is already required and implemented under the 2018 Act, under a no-action baseline, its total impacts on costs, cost savings, and benefits is zero.

We also present impacts of the final rule based on a pre-statutory baseline. In other words, in the analysis that follows, we present the impacts of the 2018 Act by comparing the requirements of this rule to a baseline prior to implementation of the 2018 Act.

Summary of Impacts (Pre-Statutory Baseline)

Prior to the 2018 Act, CODs were effective for one year. The 2018 Act, codified by this rule, creates savings due to a reduction in the time necessary for the submission and approval of COD renewals. We anticipate that approximately 165,309 recreational vessel owners will be affected annually. In addition, the Government will be affected because the number of annual renewals the Coast Guard processes will decline. We estimate that the industry for recreational vessel owners of vessels of at least 5 net tons will see a savings of $696,727 annualized over 10 years, and the Coast Guard will reduce spending on administrating COD renewals by an annualized amount of approximately $997,345. Both cost savings are in $2018, discounted at 7 percent. We estimate the annualized cost savings to industry and the Government combined to be approximately $1.7 million, discounted at 7 percent.

Table 1 presents a summary of the economic impacts. We provide a detailed description of the estimates in the next section of this analysis.

TABLE 1—SUMMARY OF THE ECONOMIC IMPACT

[Pre-statutory baseline]

Description	Affected population	Cost	Cost savings	Benefits
Require owners of recreational vessels of at least 5 net tons to renew CODs every 5 years, thereby making CODs effective for a 5-year term instead of a 1-year term.	Estimated average annual population over a 10-year period of analysis of owners of recreational vessels affected by the 2018 Act (and codified by this regulation) is 165,309 vessels.	The 2018 Act will not impose any cost burden on industry.	The affected industry will see a 10-year annualized savings of $696,727. In addition, the government will see a 10-year annualized savings of $997,345; both estimates are discounted at 7 percent.	The restructuring of CODs from an annual renewal to a 5-year renewal period will reduce the industry's annual time burden for submitting COD applications. In addition, the Government will benefit due to a reduction in the amount of applications processed annually.
Vessel owners are currently required to update changes that impact information attested to on the COD. Since the 2018 Act requires renewal every 5 years instead of annually, a provision within this final rule is clarifying that owners need to amend any changes to CODs within 30 days of said changes occurring.	Recreational vessel owners impacted by the 2018 Act would be affected by the provision in § 67.319 of this final rule.	No cost. This is clarifying a requirement to keep COD information current and will not impose any cost burden.	There are no savings associated with this provision.	There are no benefits associated with this provision, other than clarifying when changes to COD information must be addressed.
The fee schedule in Table 1 in § 67.550 provides owners with information about the applicable fees for obtaining the CODs for their vessels.	The affected population is those owners under 46 CFR part 67, subpart Y.	No cost. This clarifies information about the fees associated with CODs.	No savings. This is clarification only.	There are no benefits associated with the updated table. It is updating the cost schedule to account for the change to a 5-year renewal.

The 2018 Act requires owners of recreational vessels of at least 5 net tons to renew their CODs every 5 years. Owners were to begin phase-in starting January 1 of 2019.

Population

We estimate that there are an average of 162,647 recreational vessels in

service in a given year that have a COD. The certification and documentation of recreational vessels comes with rights as well as responsibilities that entitle vessel owners the protection under the U.S. flag.

There are two reasons for documenting a recreational vessel. The first reason is voluntary, for qualified recreational vessels that are at least 5 net tons, thereby granting them protection under the U.S. flag. The second reason is to satisfy mortgage lender requirements.

Documenting recreational vessels occurs according to five criteria:

(1) As a result of the initial documentation of a newly produced vessel (not documented);

(2) As a result of the initial documentation of a newly acquired existing vessel, not previously documented;

(3) As an exchange of the vessel from one party to another;

(4) As a reinstatement or replacement of a vessel; or

(5) As a return to documentation of a vessel.

The data used to formulate the affected population is provided by the Coast Guard's National Vessel Documentation Center (NVDC), which is the approving authority for the issuance of CODs. The NVDC provides CODs according to the criteria presented above. The information we present in this analysis uses NVDC data for the affected population over a 5-year period, from 2013 to 2017.[5] Based on this data, we estimate the average existing number of owners obtaining CODs in a given year to be 162,309, of which 7,402 (or 4.6 percent) are initial CODs. We assume this is the number of CODs that would have been renewed annually in the absence of the 2018 Act.

To estimate the number of CODs for new vessels entering into use each year, we use the NVDC data to estimate the number of new owners requesting initial CODs as a percent of total CODs. We base our estimate on 4.6 percent, as this represents the average increase of CODs (7,402 [average number of initial CODs] divided by 162,309 [average total number of CODs]).

The number of new vessels entering into use will vary slightly every year. However, based on historical data, we can expect their average annual rate to converge to a steady figure. Assuming this subset (new vessel CODs) of initial CODs is, on average, consistent with the average increase of the total COD population (4.6 percent annually), we can then assume that, on an annual basis, 338 new vessels owners will request CODs each year (7,402 average initial CODs multiplied by 4.6 percent). We then add 338 to 162,309 to obtain 162,647, the average total population of CODs. We use this total population estimate to derive the number of CODs that will not need to renew as a result of the 2018 Act (which is codified by this regulation). As is presented in the cost savings section below, this annual estimate varies per year according to the five different annual certification criteria and the 3-year phase-in period.

Cost Savings

Industry Assessment

As a result of the 2018 Act, the Coast Guard will no longer require owners of recreational vessels to renew their CODs annually. Therefore, the 2018 Act will not impose any cost; only cost savings will be realized by the affected population.

As of January 1, 2019, owners have been able to select a renewal period of multiple years, up to a limit of 5 years. This cost savings assessment outlines the Coast Guard's anticipated industry adaptation of moving to a 5-year renewal period.

The 2018 Act provides that vessel owners will have 3 years (starting January 1, 2019 and ending December 31, 2021) to select a timeframe for COD renewal that does not exceed 5 years. Hence, vessel owners can choose any timeframe from 1 to 5 years during this 3-year period. Beginning January 1, 2022, all recreational CODs will be renewed with a validity period of 5 years. Therefore, in order to formulate the best approximation of how owners will select their renewal periods during the phase-in period, we make the assumption that equal portions of the affected population selected a renewal period of 1 to 5 years in 2019.

Since the Coast Guard is unable to determine individual preferences regarding how owners will choose a renewal term during the phase-in period, our methodology anticipates cost savings throughout a 10-year period of analysis (2019–2028).[6] We begin by acknowledging that all active CODs had to be renewed in 2019. Therefore, when renewing or receiving an initial COD in 2019, all made a decision as to when they would renew their next COD. Accordingly, for the first year of the 10-year assessment period, 2019, no one within the affected population received any savings.[7] Therefore, savings begin in 2020.

[5] Information pertaining to the historical data can be found in the Appendix, under the supporting documents in the docket, where indicated in the **ADDRESSES** portion of the preamble. The data for 2013 to 2017 is as follows: 171,293; 160,669; 156,552; 155,221; 167,810.

[6] The Coast Guard has collected 2019 data about the behavior of owners towards selecting a new renewal period. However, the data was too incomplete to formulate an accurate representation of the affected population's choices in that year. In addition, because 2019 is the only year for which the Coast Guard has information, this data does not provide enough information (statistically) to develop a trend analysis to project actual changes in behavior. Therefore, we have elected to proceed with analyzing this regulatory assessment by equally dividing the affected population over a 5-year period, resulting in 80% of the annual population not renewing their CODs in a given year.

[7] Further information can be found in the Appendix, under supporting documents in the docket, where indicated in the **ADDRESSES** portion of the preamble.

To conduct this assessment, we create five subcategories (divided equally) of the affected population, and assign each category a specific year for renewal. Any owner who selects a timeframe for renewal greater than 2 years, or beyond 2021 (60 percent of the affected population), will have their follow-on renewals occurring every 5 years after their initial renewal choice. However, we assume that those who select a timeframe of 1 or 2 years (which we refer to as groups A and B), will not necessarily renew their CODs in 5 years. Since groups A and B have chosen the option of renewing in 1 or 2 years, which falls within the phase-in period, they will be given another opportunity to select a renewal period of 1 to 5 years at the time of their renewal.[8] Since groups A and B will, again, have the option of selecting a renewal period of 1 to 5 years, we again partition, within each group, equal portions of owners selecting 1 to 5 years renewal. Once an individual in group A and B selects a renewal period that goes beyond 2021, their follow-up renewal will occur on a 5-year renewal cycle. In Table 2 we present a summary outline as to how we estimate the number of non-renewals occurring during a 10-year period of analysis. Further details about how we estimated the number of renewals and avoided renewals can be found in the Appendix, under supporting documents in the docket, where indicated in the **ADDRESSES** portion of the preamble.

TABLE 2—SUMMARY OF POTENTIAL NON-RENEWING COD POPULATION OVER 10-YEAR PERIOD OF ANALYSIS[9]

[Pre-statutory baseline]

	Potential non-renewing population									
	Phase-in period			5-year renewal period						
	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028
COD applications under the baseline (A)	162,647	162,647	162,647	162,647	162,647	162,647	162,647	162,647	162,647	162,647
COD applications under the 2018 Act (B)	162,647	32,867	39,441	47,329	47,329	47,329	14,800	8,226	47,667	47,667
Avoided COD applications (A–B)	0	129,780	123,206	115,317	115,317	115,317	147,846	154,421	114,978	114,979

Note: Values may not add due to rounding.

The summary in Table 2 provides an approach as to how industry may react to the changes in the renewal process. In addition, it provides the affected population, which serves as a basis for cost savings throughout the 10-year period of analysis.

All savings realized will be administrative, from the perspective of vessel owners and the Government. Because the 2018 Act changed annual renewals to a 5-year renewal period, owners will spend less time submitting paperwork for renewing their CODs. In addition to the savings that owners will receive, the industry as a whole will see a reduction in paperwork (see Paperwork Reduction Act in section V. D of the preamble to this final rule).

In order to obtain a wage rate for our calculations, to determine the amount of savings incurred by this rulemaking, we first identify the individual(s) who submit the renewal form (CG–1280) to the Coast Guard. Using the 2018 wage rate data from the Bureau of Labor Statistics (BLS) website, we obtain the employee wage that most resembles the persons tasked with renewing CODs as Transportation Employment, Storage and Distribution Managers (OES code 11–3071). The mean hourly wage rate associated with this profession, as reported by BLS, is $49.45 per hour.[10] In order to account for employee benefits, we apply a load factor to the mean hourly wage rate. We calculate the load factor from BLS's Employer Cost for Employee Compensation survey and apply it to the mean hourly wage rate to obtain a fully loaded wage rate, which more accurately represents the employers' cost per hour for employees' work.[11] The load factor we used for this economic assessment is 1.52.[12] The loaded mean hourly wage rate we used to assess the savings estimates is calculated at $75.16 ($49.45 multiplied by 1.52).

From the Supporting Statement for Vessels Documentation collection of information (OMB Control No. 1625–0027), we obtain the amount of time (or time burden) necessary for filling out the renewal documentation as 5 minutes. Applicants may submit the renewal form CG 1280 through regular postal service or through the internet. For the proportion of those submitting form CG–1280 through the internet, annual renewal is about 28 percent[13] of the affected population, while the remaining 72 percent continue utilizing the postal service for their submissions. We estimate that the cost of submitting a renewal form via postal service is 0.55 cents (the cost of a first-class postage stamp), while those who submit the form through the internet incur no additional mailing costs. There are no associated savings with submitting the form online, as we assume that for those choosing that method, internet service is an established part of business operations.

[8] Because we are unable to determine how or why owners make their financial decisions, we assume that groups A and B are not inclined to make a long-term commitment (beyond year 2021) due to projected or un-projected future financial plans. Therefore, we assume that short-term financial decisions will direct them to select a shorter term of 1 or 2 years. For the years following 2021, we assume renewals will be conducted every 5 years. For this illustrative analysis, we break down the renewals in equal annual portions over the five-year period. However, the Coast Guard recognizes that renewal numbers could vary over the 5-year period for several reasons, including the possibility the owners could get rid of their vessels prior to the renewal term.

[9] An expanded population matrix appears in the appendix, which can be found in the supporting documents in the docket, where indicated under the **ADDRESSES** portion of this preamble.

[10] Information about the wage rates for Transportation, Storage and Distribution Managers (11–3071) can be found at *https://www.bls.gov/oes/2018/may/oes113071.htm.*

[11] A loaded wage rate is what a company pays per hour to employ a person, not the hourly wage the employee receives. The loaded wage rate includes the cost of benefits (health insurance, vacation, etc.).

[12] From the BLS, Employer Cost for Employee Compensation survey. The load factor for wages is calculated by dividing total compensation by wages and salaries. For this report, we used the Transportation and Materials Moving Occupations, Private Industry report (Series IDs, CMU2010000520000D and CMU2020000520000D for Total Compensation and Wages and Salaries, respectively, not seasonally adjusted) for all workers using the multi-screen data search. Using 2018 4th quarter data, we divide $29.53/$19.42 to obtain a load factor of 1.52. See *https://data.bls.gov/cgi-bin/dsrv?cm.*

[13] The NVDC provided their assessment on renewal submissions that will be received via internet.

TABLE 3—SUMMARY OF VALUES USED TO FORMULATE SAVINGS

[Pre-statutory baseline]

	Burden hours	HR equivalent
From collection of information	5 Min	0.08
YR–2018	Hourly Wage	$49.45
	Load Rate	1.52
	Total Wage Rate	$75.16
	Submission Cost	** $0.55
	Percent of Submission	100%
	Letter Carrier	72%
	Via Internet	28%

** This cost is only associated with submission of the renewal documentation via letter carrier.

We estimate the savings of this 10-year assessment by combining the information found in Tables 2 and 3. From Table 2, we anticipate how industry will react to changes in the certification renewal process. Therefore, the calculations for determining savings are as follows: Since the number of affected population throughout the 10-year assessment is not uniform, we utilize a sample year to explain how we obtain savings. From table 2, we use the year 2024 as an example. We estimate the number of the affected population for 2024 not renewing their CODs to be about 115,317. The amount of cost savings associated with not having to fill out the request for certification, per person, is estimated at $6.01 ($75.16 loaded wage rate multiplied by 0.08 time burden associated with filling out documentation). Multiplying the affected population in 2024 by the potential savings of $6.01 due to the reduction in time burden results in administrative savings for that year of $693,061. We then account for the cost of submitting the application, at $0.55 for 72 percent of the population in that year, adding an additional cost savings of about $45,666 (72 percent of 115,317 [the affected population in 2024] equals 83,029 multiplied by $0.55 [the cost of a first-class stamp]). The resulting total cost savings for year 2024 is approximately $738,723 (non-discounted). Table 4 provides a 10-year summary of cost savings that industry will realize.

TABLE 4—SUMMARY OF 10-YEAR ASSESSMENT OF INDUSTRY COST SAVINGS, IN $2018

[Pre-statutory baseline]

Year	Cost savings non-discounted	Cost savings discounted 3%	Cost savings discounted 7%
2019	No savings in first year		
2020	$831,371	$783,647	$726,151
2021	789,251	722,277	644,264
2022	738,721	656,344	563,566
2023	738,723	637,229	526,700
2024	738,723	618,669	492,243
2025	947,104	770,082	589,809
2026	989,211	780,892	575,730
2027	736,549	564,504	400,634
2028	736,558	548,069	374,429
Total	7,246,212	6,081,712	4,893,526
Annualized	.....	712,962	696,727

Note: Values may not add due to rounding.

Summarizing Table 4, we note that industry will not incur any cost savings during the first year of our assessment, since the entire affected population had to renew in 2019 and, in that year, make a determination regarding their next renewal date.[14] However, after the first year, industry will begin to realize savings due to the extended renewal period provided by the 2018 Act. We estimate that the total 10-year savings is $4.9 million, and the annualized savings is $0.697 million, both discounted at 7 percent.

Government Assessment

The 2018 Act also affects the Federal government by reducing the amount of renewal applications it will process in a given year. The anticipated reduction in the administration of renewal applications is correlated to the anticipated reduction in the number of the affected population renewing their CODs in a given year. The Government's reduction in approved certification will follow the data found in Table 2.

The COD approval is a two-phase process, in which the Government initiates, as a courtesy, the renewal process, and then, in the processing phase, issues the CODs to vessel owners. The first phase, initiating a request for vessel owners to renew their annual CODs, is accomplished by sending CG–1280 Vessel Renewal Notification Application for Renewal mailers to vessel owners approximately 45 days prior to the expiration date of their current CODs. The first step of this phase is to determine who is eligible for renewal and to remind current COD holders that their COD is expiring

[14] In 2019, all CODs were still affected by pre-mandated regulations, which means all CODs were renewed. For more information on the distribution of the population, please see the Appendix in the docket.

within 45 days. Once that is accomplished, all material relating to renewal notices, to include metered mail, is processed and sent to vessel owners. In the second step, the Government receives the application packet from owners, which is reviewed and approved prior to issuance of the COD.

The Government employees assigned the duties of initiating renewal notices are classified as GS–5 and GS–7-employees. Subject matter experts (SMEs) estimate the individual cost of sending a renewal notice at approximately $3.05.[15] To estimate the annual reduction in cost to the Government, we multiply the individual cost of annual notifications by the number of vessel owners not submitting annual renewals in a given year. Table 5 shows the estimated cost savings, per year, that the Government will realize from a reduction in the annual number of notifications sent out to owners of recreational vessels.

TABLE 5—ESTIMATED GOVERNMENT SAVINGS FOR INITIATING COD RENEWALS IN $2018

[Pre-statutory baseline]

Year	Estimated reduction in applications	Government savings non-discounted
2019	0	0
2020	129,780	$395,829
2021	123,205	375,775
2022	115,317	351,717
2023	115,317	351,718
2024	115,317	351,718
2025	147,846	450,932
2026	154,419	470,979
2027	114,978	350,683
2028	114,979	350,687
Total ..	.....	3,450,039

Note: Values may not add due to rounding.

The second phase of the process involves the Government receiving the renewal applications from vessel owners, processing those applications, and then issuing the CODs. The Government employees responsible for reviewing the applications and granting CODs are also classified as GS–5 and GS–7 employees. According to data provided by the SME, it takes a GS–5 9 minutes to process a renewal application, at a cost of $5.40 per renewal.[16] Additionally, it takes a GS–7 approximately 1 minute to approve a COD, at a cost of $0.72 per renewal request.[17] The individual cost of finalizing the renewal process, to include mailing the certificates, is estimated at $6.12 per renewal.[18] The savings that the Government will realize from approving and issuing CODs will be the number of owners not submitting COD renewals in a given year. Table 6 shows the estimated savings, annually, that the Government will realize from a reduction in processing renewal applications.

TABLE 6—ESTIMATED GOVERNMENT SAVING FOR PROCESSING AND GRANTING COD RENEWALS IN $2018

[Pre-statutory baseline]

Year	Estimated reduction in applications received	Cost savings non-discounted
2019	0	0
2020	129,780	$794,254
2021	123,205	754,015
2022	115,317	705,740
2023	115,317	705,743
2024	115,317	705,743
2025	147,846	904,820
2026	154,419	945,047
2027	114,978	703,665
2028	114,979	703,674
Total ..	.....	6,922,700

Note: Values may not add due to rounding.

We estimate the 10-year combined (initial phase and processing phase) cost savings that the Government will realize at $10,372,739 (non-discounted). We estimate the total discounted cost savings at $7,004,938, and annualized cost savings of $997,345, both discounted at 7 percent. Table 7 shows the total estimated Government cost savings over the 10-year period of analysis.

TABLE 7—ESTIMATED TOTAL GOVERNMENT COST SAVING, IN $2018

[Pre-statutory baseline]

Year	Non-discounted cost savings	3%	7%
2019	No savings first year		
2020	$1,190,083	$1,121,766	$1,039,464
2021	1,129,790	1,033,917	922,245
2022	1,057,457	939,536	806,729
2023	1,057,461	912,175	753,955
2024	1,057,461	885,606	704,631
2025	1,355,752	1,102,350	844,294
2026	1,416,026	1,117,824	824,140
2027	1,054,348	808,070	573,496
2028	1,054,361	784,543.93	535,984
Total	10,372,739	8,705,792	7,004,938
Annualized	.....	1,020,584	997,345

Note: Values may not add due to rounding.

[15] The NVDC provided the information pertaining to government expenditure from a draft study they commissioned through an independent third party. At the time of publishing this assessment, the document has not been made available to the public.

[16] The NVDC provided the information pertaining to government expenditure from a draft study they commissioned from an independent third party. At the time of publishing this assessment, the document has not been made available to the public.

[17] Ibid.

[18] The estimated cost was obtained by combining the administrative cost of a Clerk 1, $5.40 ($.60 wage per minute multiplied by 9 minutes of administrative time), and a Clerk 2, $.72 ($.72 wage rate per minute multiplied by 1 minute of administrative time). Total administrative cost burden is $6.12 ($5.40 plus $.72) per applicant.

The total 10-year combined (industry and Government) cost savings is estimated at $17,618,951, non-discounted, with an annualized savings of $1,694,073, discounted at 7 percent. Table 8 provides the total annual estimated cost savings that the Act will provide to the affected stakeholders.

TABLE 8—TOTAL COST SAVINGS IN $2018

[Pre-statutory baseline]

Year	Vessel owners not submitting renewals	Cost savings	3%	7%
2019	No savings in first year			
2020	129,780	$2,021,453	$1,905,414	$1,765,616
2021	123,205	1,919,041	1,756,194	1,566,509
2022	115,317	1,796,178	1,595,881	1,370,295
2023	115,317	1,796,184	1,549,404	1,280,655
2024	115,317	1,796,184	1,504,276	1,196,874
2025	147,846	2,302,856	1,872,433	1,434,103
2026	154,419	2,405,237	1,898,716	1,399,870
2027	114,978	1,790,897	1,372,574	974,129
2028	114,979	1,790,920	1,332,612	910,413
Total	.....	17,618,951	14,787,504	11,898,463
Annualized	.....	.....	1,733,546	1,694,073

Note: Values may not add due to rounding.

In addition to estimating the normal savings for this rule, we use the perpetual period of analysis for observing the long-term affect this assessment will have on the affected population. Therefore, we estimate the total annualized cost savings of the 2018 Act at $1.49 million in 2016 dollars, using a 7-percent discount rate.

Final Rule Regulatory Impacts

As previously stated, under a no-action baseline, this final rule produces no impact on the regulated industry. The rule is merely harmonizing current practices implemented by the 2018 Authorization Act with 46 CFR part 67. The impacts presented above are measured against a pre-statutory baseline and represent the result of the 2018 Act, which this rule codifies.

Alternatives

The Coast Guard did not examine any alternatives for this final rule as this rule is mandated by Congress under the Coast Guard Authorization Act of 2018. The 2018 Act requires that Coast Guard issue recreational Certificates of Documentation with a validity of 5 years, thereby reducing the amount of annual reporting burden vessel owners incur each year. The Coast Guard is promulgating this rule to comply with statute and may not adopt a different renewal period or pursue any other alternatives.

B. Small Entities

The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. This rule is not preceded by a notice of proposed rulemaking and is, therefore, exempt from the requirements of the Regulatory Flexibility Act (5 U.S.C. 601–612). The Regulatory Flexibility Act does not apply when notice and comment rulemaking is not required.

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, we want to assist small entities in understanding this rule so that they can better evaluate its effects on them and participate in the rulemaking. If the rule will affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this rule. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

D. Collection of Information

This final rule codifies the 2018 Act, which results in a change to an existing collection of information under the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3520. As defined in 5 CFR 1320.3(c), ''collection of information'' comprises reporting, recordkeeping, monitoring, posting, labeling, and other similar actions. The title and description of the information collections, a description of those who must collect the information, and an estimate of the total annual burden follow. The estimate covers the time for reviewing instructions, searching existing sources of data, gathering and maintaining the data needed, and completing and reviewing the collection.

Title: Vessel Documentation.

OMB Control Number: 1625–0027.

Summary of the Collection of Information: This final rule, by harmonizing with the 2018 Act, modifies the existing Certification of Documentation (COD) reporting and recordkeeping requirements in § 67.163(c), which will amend current reporting. The current regulation requires owners of recreational vessels of at least 5 net tons to renew their CODs annually. This final rule will codify current industry practice as of January 1, 2019 and will require

recreational vessel owners to convert from an annual renewal period to a 5-year renewal period.

Need for Information: The information is being collected for two reasons: (1) The documenting of a U.S. vessel comes with rights as well as responsibilities, which entitle the vessel owners protection under the U.S. flag; (2) vessel documentation is a requirement in satisfying mortgage lender requirements.

Proposed Use of Information: The collection of this information is maintained by the Coast Guard as a matter of record for identifying vessels that will be entitled to protection under U.S. flag. In addition, the certification of a vessel is an obligation to be performed by the vessel owners as part of a financial agreement they have entered into with a mortgage company.

Description of the Respondents: The respondents are the owners of recreational vessels of at least 5 net tons that choose to document their vessels or are required to document their vessels due to financial obligations, which a financial institution may require when a borrower takes out a loan for the purchase of a vessel.

Number of Respondents: The total number of respondents affected is estimated at 162,309, plus an estimated average of 338 new vessels obtaining CODs each year.

Frequency of Response: The final rule codifies the 2018 Act that converts the annual renewal of CODs to a 5-year renewal, reducing the frequency of responses in any given year. From January 1, 2019 to December 31, 2021, owners are allowed to choose their 1 to 5-year renewal period. As of January 1, 2022, owners will only be allowed to apply for 5-year CODs. However, during the first year (2019), 100 percent (162,647) of the affected population sought COD renewals for their vessels. From 2020 on, we take the anticipated annual 9-year average to estimate the potential reduction in frequency of responses required from this information collection request. Hence, we estimate the average number of responses annually will be reduced from 189,614 to 63,930.

Burden of Response: This final rule codifies the 2018 Act and, as a result, will reduce the burden of renewing annual CODs to a 5-year renewal period. Therefore, reduction in time for submitting renewal application forms will decrease by approximately 10,061 hours.

Estimate of Total Annual Burden: The annual reduction in burden is estimated as follows:

(a) *Annual reduction in burden resulting from converting annual reporting requirement for recreational vessel of at least 5 net tons to a 5-year renewal period:* The final rule codifies the 2018 Act that will reduce the number of CODs requested and approved annually. We estimate that it takes 5 min (0.08 equivalent hours) to send in a vessel documentation renewal. We estimate the total average annual burden or hour reduction for those vessel owners who will not be required to renew their documentation to be 10,054 hours (125,684 * 0.08 hours).

(b) *The total reduction in annual burden hours due to the conversion from an annual renewal to a 5-year renewal period:* This final rule will result in an estimated average annual reduction in total burden hours in the collection of information from 11,373 to 1,319.

As required by 44 U.S.C. 3507(d), we will submit a copy of this final rule to OMB for its review of the collection of information. You are not required to respond to a collection of information unless it displays a currently valid OMB control number.

E. Federalism

A rule has implications for federalism under Executive Order 13132 (Federalism) if it has a substantial direct effect on States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under Executive Order 13132 and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132. Our analysis follows.

As explained in Sections II and III above, this rulemaking is needed to conform the regulations to the existing law as amended by the 2018 Act. The 2018 Act requires the Coast Guard to issue CODs for recreational vessels with a period of validity of 5 years, following a phase-in period. The 2018 Act prescribes how the cost of the renewal of such a recreational endorsement must be calculated in both the phase-in period and thereafter. It also requires vessel owners to notify the Coast Guard of each change in the information on which the issuance of the COD for the vessel is based, before the expiration of the COD and no later than 30 days after the change. The 2018 Act also requires that a COD will terminate upon the expiration of the 30-day period if the owner has not notified the Coast Guard of changes within the 30-day timeframe.

Documentation under chapter 121 of title 46, United States Code, including under 46 U.S.C. 12105 as amended by the 2018 Act (see amendments described in the preceding paragraph), is the means by which the Federal government allows a vessel to operate in certain trades, establishes vessel nationality, and enables a vessel to be subject to preferred mortgages. It is well settled that States may not regulate in categories reserved by Congress for regulation by the Coast Guard. It also is well settled that all the categories regulated under 46 U.S.C. 2103, 3103, 3306, 3703, 4102, 4502, 7101, and 8101 (design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels), as well as any other category in which Congress intended the Coast Guard to be the sole source of a vessel's obligations, are within the field foreclosed from regulation by the States. *See* the Supreme Court's decision in *United States* v. *Locke* and *Intertanko* v. *Locke,* 529 U.S. 89, 120 S.Ct. 1135 (2000). This rule implements changes made by Congress to the comprehensive federal vessel documentation requirements of 46 U.S.C. ch. 121, over which Congress clearly has granted the Coast Guard, via delegation from the Secretary, exclusive authority. Therefore, because the States may not regulate within this category, this rule is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

While it is well settled that States may not regulate in categories in which Congress intended the Coast Guard to be the sole source of a vessel's obligations, the Coast Guard recognizes the key role that State and local governments may have in making regulatory determinations. The Coast Guard values the input of State and local governments in such matters.

F. Unfunded Mandates

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Although this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This rule will not cause a taking of private property or otherwise have

taking implications under Executive Order 12630 (Governmental Actions and Interference with Constitutionally Protected Property Rights).

H. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988 (Civil Justice Reform) to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this rule under Executive Order 13045 (Protection of Children from Environmental Health Risks and Safety Risks). This rule is not an economically significant rule and will not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), because it will not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this rule under Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use). We have determined that it is not a ''significant energy action'' under that order because it is not a ''significant regulatory action'' under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

L. Technical Standards

The National Technology Transfer and Advancement Act, codified as a note to 15 U.S.C. 272, directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through OMB, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. This rule is categorically excluded under paragraph L57 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev 1. Paragraph L56 pertains to documentation of vessels. This rule involves extending the validity of a recreational vessel endorsement on a Certificate of Documentation.

List of Subjects in 46 CFR Part 67

Reporting and recordkeeping requirements, Vessels.

For the reasons discussed in the preamble, the Coast Guard amends 46 CFR part 67 as follows:

PART 67—DOCUMENTATION OF VESSELS

■ 1. The authority citation for part 67 continues to read as follows:

Authority: 4 U.S.C. 664; 31 U.S.C. 9701; 42 U.S.C. 9118; 46 U.S.C. 2103, 2104, 2107, 12102, 12103, 12104, 12105, 12106, 12113, 12133, 12139; Department of Homeland Security Delegation No. 0170.1.

■ 2. Amend § 67.163 by:
■ a. Revising paragraph (a) introductory text;
■ b. Revising paragraph (b); and
■ c. Adding paragraph (c).

The revisions and addition read as follows:

§ 67.163 Renewal of endorsement.

(a) *Requirement for renewal of endorsement.* Endorsements on Certificates of Documentation are valid for 1 year, except for Recreational Endorsements on Certificates of Documentation, which are valid for 5 years. However, a Certificate of Documentation with a Recreational Endorsement and a Commercial Endorsement will only be valid for 1 year. Prior to the expiration of an endorsement, the owner of a vessel, which is not exempt from the requirement for documentation under paragraph (c) of § 67.9, must apply for renewal of the endorsement(s) by complying with paragraph (b) of this section. The owner of a vessel exempt from the requirement for documentation under paragraph (c) of § 67.9 must either:

* * * * *

(b) *Renewal application.* The owner of a vessel must apply for renewal of each endorsement by executing an original Vessel Renewal Notification, Application for Renewal (CG–1280) certifying that the information contained in the Certificate of Documentation and any endorsement(s) thereon remains accurate, and that the Certificate has not been lost, mutilated, or wrongfully withheld. The completed CG–1280 must be sent to the Director, National Vessel Documentation Center.

(c) *Requirement for renewal of recreational endorsements.* A certificate of documentation for a recreational vessel and the renewal of such a certificate shall be effective for a 5-year period. During the period beginning January 1, 2019, and ending December 31, 2021, the owner of a recreational vessel may choose a period of effectiveness of 1, 2, 3, 4, or 5 years for such a certificate of documentation for such vessel or the renewal thereof.

§ 67.317 [Amended]

■ 3. In § 67.317 amend paragraph (a) by adding, after the introductory phrase, ''Except as provided in paragraph (b) of this section,'' the text ''and except for recreational endorsements, which must be renewed every 5 years,''.

■ 4. Revise § 67.319 to read as follows:

§ 67.319 Requirement to report change in vessel status and surrender Certificate of Documentation.

(a) The owner of a vessel must notify the Coast Guard of each change in the information on which the issuance of the Certificate of Documentation for the vessel is based that occurs before the expiration of the certificate under this subsection, by no later than 30 days after such change.

(b) The Certificate of Documentation for a vessel is terminated upon the expiration of the 30-day period if the owner has not notified the Coast Guard of such change before the end of the period.

§ 67.515 [Amended]

■ 5. In § 67.515, remove the word ''annual''.

■ 6. Revise § 67.550 to read as follows:

§ 67.550 Fee table.

The fees charged under subpart Y are as set forth in Table 1 to 67.550.

TABLE 1 TO 67.550—FEES

Activity	Reference	Fee
Applications:		
Initial Certificate of Documentation	Subpart K	$133.00
Exchange of Certificate of Documentation	...do	84.00
Return of vessel to documentation	...do	84.00
Replacement of lost or mutilated Certificate of Documentation	...do	50.00
Approval of exchange of Certificate of Documentation requiring mortgagee consent	...do	24.00
Trade endorsement(s):		
Coastwise endorsement	Subpart B	29.00
Coastwise Boaters endorsement	46 CFR part 68	29.00
Fishery endorsement	...do	12.00
Registry endorsement	...do	none
Recreational endorsement	...do	.....
Recreational vessel endorsements (5-year)	.....	130.00
Through December 31, 2021:	.....	.....
4-year recreational vessel endorsement	.....	104.00
3-year recreational vessel endorsement	.....	78.00
2-year recreational vessel endorsement	.....	52.00
1-year recreational vessel endorsement	.....	26.00

Note 1: When multiple trade endorsements are requested on the same application, the single highest applicable endorsement fee will be charged, resulting in a maximum endorsement fee of $29.00. This does not apply to recreational endorsements.

Evidence of deletion from documentation	Subpart L	15.00
Renewal fee	...do	26.00
Commercial vessel endorsements (annual)	...do	26.00
Recreational vessel endorsements (5-year)	.....	130.00
Through December 31, 2021:		
4-year recreational vessel endorsement	.....	104.00
3-year recreational vessel endorsement	.....	78.00
2-year recreational vessel endorsement	.....	52.00
1-year recreational vessel endorsement	.....	26.00
Late renewal fee	...do	[1] 5.00
Waivers:		
Original build evidence	Subpart F	15.00
Bill of sale eligible for filing and recording	Subpart E	15.00
Miscellaneous applications:		
Wrecked vessel determination	Subpart J	555.00
New vessel determination	Subpart M	166.00
Rebuild determination—preliminary or final	...do	450.00
Filing and recording:		
Bills of sale and instruments in nature of bills of sale	Subpart P	[2] 8.00
Mortgages and related instruments	Subpart Q	[2] 4.00

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 300

[Docket No. 210112–0008]

RIN 0648–BK08

International Fisheries; Pacific Tuna Fisheries; Fishing Restrictions for Tropical Tuna in the Eastern Pacific Ocean for 2021

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Interim final rule; request for comments.

SUMMARY: NMFS is issuing regulations under the Tuna Conventions Act to implement Resolution C–20–05 (*Conservation of Tuna in the Eastern Pacific Ocean During 2021*), which was adopted by the Inter-American Tropical Tuna Commission (IATTC or Commission) on December 22, 2020. All of the provisions of Resolution C–20–05 are identical in content to the previous resolution on tropical tuna management that expired at the end of 2020. This interim final rule implements the C–20–05 fishing management measures for tropical tuna (*i.e.,* bigeye tuna (*Thunnus obesus*), yellowfin tuna (*Thunnus albacares*), and skipjack tuna (*Katsuwonus pelamis*)) in the eastern Pacific Ocean (EPO). The fishing restrictions in this interim final rule are applicable in 2021 only and apply to purse seine vessels of class sizes 4–6 (carrying capacity of 182 metric tons (mt) or greater) and longline vessels greater than 24 meters (m) in overall length that fish for tropical tuna in the EPO. This interim final rule is necessary for the conservation of tropical tuna stocks in the EPO and for the United States to satisfy its obligations as a member of the IATTC.

DATES: This interim final rule is effective January 19, 2021. Comments on the interim final rule must be submitted in writing by February 18, 2021.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2020–0122, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *http://www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2020-0122*, click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Rachael Wadsworth, NMFS West Coast Region Long Beach Office, 501 W Ocean Blvd., Suite 4200, Long Beach, CA 90802. Include the identifier ''NOAA–NMFS–2020–0122'' in the comments.

Instructions: Comments must be submitted by one of the above methods to ensure they are received, documented, and considered by NMFS. Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.) submitted voluntarily by the sender will be publicly accessible. Do not submit confidential business information, or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

ADDRESSES: Copies of supporting documents that were prepared for this interim final rule, including the regulatory impact review (RIR) are available via the Federal e-Rulemaking Portal: *http://www.regulations.gov,* docket NOAA–NMFS–2020–0122, or contact Rachael Wadsworth, NMFS WCR SFD, NMFS West Coast Region Long Beach Office, 501 W Ocean Blvd., Suite 4200, Long Beach, CA 90802, or *WCR.HMS@noaa.gov*.

FOR FURTHER INFORMATION CONTACT: Rachael Wadsworth, NMFS, at (206) 561–3457.

SUPPLEMENTARY INFORMATION:

Background on the IATTC

The United States is a member of the IATTC, which was established under the 1949 Convention for the Establishment of an Inter-American Tropical Tuna Commission. In 2003, the IATTC adopted the Convention for the Strengthening of the IATTC Established by the 1949 Convention between the United States of America and the Republic of Costa Rica (Antigua Convention). The Antigua Convention entered into force in 2010. The United States acceded to the Antigua Convention on February 24, 2016. The full text of the Antigua Convention is available at: *https://www.iattc.org/PDFFiles/IATTC-Instruments/_English/IATTC_Antigua_Convention%20Jun%202003.pdf.*

The IATTC consists of 21 member nations and 5 cooperating non-member nations and facilitates scientific research into, as well as the conservation and management of, tuna and tuna-like species in the IATTC Convention Area. The IATTC Convention Area is defined as waters of the EPO within the area bounded by the west coast of the Americas and by 50° N latitude, 150° W longitude, and 50° S latitude. The IATTC maintains a scientific research and fishery monitoring program and regularly assesses the status of tuna, sharks, and billfish stocks in the IATTC Convention Area to determine appropriate catch limits and other measures deemed necessary to promote sustainable fisheries and prevent the overexploitation of these stocks.

International Obligations of the United States Under the Antigua Convention

As a Party to the Antigua Convention and a member of the IATTC, the United States is legally bound to implement decisions of the IATTC. The Tuna Conventions Act (16 U.S.C. 951 *et seq.*) directs the Secretary of Commerce, in consultation with the Secretary of State and, with respect to enforcement measures, the U.S. Coast Guard, to promulgate such regulations as may be necessary to carry out the United States' obligations under the Antigua Convention, including recommendations and decisions adopted by the IATTC. The authority of the Secretary of Commerce to promulgate such regulations has been delegated to NMFS.

IATTC Resolution on Tropical Tuna Conservation

On November 30–December 4, 2020, the IATTC met virtually for the 95th IATTC meeting and was unable to reach consensus on management measures for tropical tuna in the EPO, which is unusual. This meeting, which is typically held in person during the summer months, had been delayed due to travel restrictions. The failure of the Commission to reach consensus at its meeting created an urgent situation because the tropical tuna management measures were set to expire at the end of the 2020 calendar year, and no measures would have been in place for the start of the 2021 fishing season. The IATTC ultimately adopted Resolution

C–20–05 (*Resolution on Conservation and Management Measures of Tropical Tunas in 2021*) by consensus at its 96th Extraordinary Meeting on December 22, 2020.

Applicable to 2021 only, the provisions of Resolution C–20–05 are identical in content to those contained in the previous IATTC Resolution (C–17–02; *Multiannual Program for the Conservation of Tuna in the Eastern Pacific Ocean During 2018–2020*) on tropical tuna management that were in place from 2018–2020. The provisions include a 72-day fishing closure period for purse seiners, provisions for exemptions from that closure period due to force majeure, a time/area closure in the EPO for 31 days for purse seiners, catch limits of bigeye tuna caught in the EPO for longline vessels greater than 24 m in overall length, catch limit transfer requirements for bigeye tuna, a requirement that all tropical tuna be retained and landed (with some exceptions), and restrictions on the use and design of fish aggregating devices (FADs).

As described further under the Classification section, due to the unforeseen circumstances of the delayed IATTC meeting, the late-adoption of Resolution C–20–05, and given that NMFS must implement regulations quickly to ensure conservation of tropical tuna stocks in the EPO and to comply with its international obligations, NMFS is implementing these regulations through an interim final rule without providing the public with advance notice in a proposed rule or the opportunity for comment. This interim final rule will be effective immediately upon publication. NMFS will, however, accept and consider public comments submitted on this interim final rule.

Final Regulations—Tuna Conservation Measures for 2021

This interim final rule is implemented under the Tuna Conventions Act of 1950 (16 U.S.C. 951 *et seq.*), as amended on November 5, 2015, by title II of Public Law 114–81. This interim final rule implements the provisions of Resolution C–20–05 and applies to U.S. commercial fishing vessels using purse seine and longline gear to catch tropical tuna in the IATTC Convention Area. Resolution C–20–05 continues for 2021 provisions that were included in the previous IATTC Resolution C–17–02 that were applicable to 2018–2020. Those provisions were implemented into regulation in a final rule published on April 11, 2018 (83 FR 15503). This interim final rule continues those regulations for 2021.

First, this rule maintains a 750 mt catch limit on bigeye tuna caught by longline vessels greater than 24 m in overall length in the IATTC Convention Area (50 CFR 300.25(a)(2)). Second, the rule maintains the prohibition on purse seine vessels of class size 4 to 6 (*i.e.,* vessels with a carrying capacity greater than 182 mt) from fishing for tropical tuna in the IATTC Convention Area for a period of 72 days (50 CFR 300.25(e)(1)). Specifically, vessels will continue to be prohibited from fishing in the EPO for 72 days during one of the following two periods: (1) From July 29 to October 8; or (2) from November 9 to January 19 of the following year (50 CFR 300.25(e)(1)(i) and (ii)). Third, the rule maintains a closure period (*i.e.,* Corralito closure) for the purse seine fishery for tropical tuna within the area of 96° and 110° W and between 4° N and 3° S from 0000 hours on October 9, 2021, to 2400 hours on November 8, 2021 (50 CFR 300.25(e)(5)). The three regulations described in this paragraph are amended by this interim final rule solely to specify that they apply in calendar year 2021.

This interim final rule also continues for 2021 several other regulations that were applicable in 2018–2020 but that do not need to be amended by this rulemaking because their regulatory text does not specify the calendar years to which they apply. Therefore, this interim final rule continues the effectiveness of those regulations in 2021 without amendment. Those regulations are included below:

- Provisions related to transferring longline catch limits for bigeye tuna between IATTC members (50 CFR 300.25(a)(5)).
- Provisions related to selection of a 72-day closure period (50 CFR 300.25(e)(2) and (3)).
- Provisions related to exemptions from the 72-day closure period requirement due to force majeure (50 CFR 300.25(e)(4)).
- Requirements related to stowing gear during time/area closure periods (50 CFR 300.25(e)(6)).
- A requirement for all tropical tuna to be retained on board and landed (with certain exceptions) (50 CFR 300.27(a)).
- A number of restrictions related to FADs for purse seine vessels in the IATTC Convention Area (50 CFR 300.22(a)(3); 50 CFR 300.28).

The definitions of ''Active FAD'' and ''Force majeure'' included in 50 CFR 300.21 and the prohibitions against failing to comply with gear-stowing restrictions, time/area closure restrictions, and FAD-related restrictions described in 50 CFR 300.24 also continue to apply.

Classification

The NMFS Assistant Administrator has determined that this interim final rule is consistent with the Tuna Conventions Act of 1950 and other applicable laws. This interim final rule has been determined to be not significant for purposes of Executive Order 12866.

This interim final rule does not contain a change to a collection of information requirement for the purposes of the Paperwork Reduction Act of 1995. The existing collection of information requirement would continue to apply under the following OMB Control Numbers 0648–0214 (Pacific Islands Region Logbook Family of Forms) and 0648–0148 (West Coast Region Pacific Tuna Fisheries Logbook and Fish Aggregating Device Form).

Notwithstanding any other provision of the law, no person is required to respond to, and no person shall be subject to penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB control number. All currently approved NOAA collections of information may be viewed at: *https://www.reginfo.gov/public/do/PRAMain*.

Good Cause for Immediate Adoption

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) authorizes agencies to dispense with notice and comment procedures for rules when the agency for ''good cause'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking. Under section 553(d) of the APA, an agency must delay the effective date of regulations for 30 days after publication, unless the agency finds good cause to make the regulations effective sooner.

The Assistant Administrator for Fisheries determined that good cause exists to issue this interim final rule without advance notice in a proposed rule or the opportunity for public comment and to make the rule effective immediately without providing a 30-day delay after publication. NMFS is obligated to implement these measures immediately to conserve tropical tuna stocks in the EPO and to comply with the international obligations of the United States under a binding resolution adopted by the IATTC under

the Antigua Convention, which constitute good cause. Given the IATTC's delay in convening its 2020 annual meeting (typically held in June or July), its failure to adopt a binding Resolution at a meeting held November 30–December 4, 2020, and its adoption of a binding Resolution in late December (less than 2 weeks before the existing regulations were set to expire), it would be impracticable and contrary to the public interest in conserving tropical tuna stocks in the EPO and in ensuring U.S. compliance with international obligations to proceed with further notice and comment or to delay the effective date for 30 days before implementing the rollover conservation measures contained in this rule.

Commercial purse seine and longline vessels are expected to begin fishing for tropical tuna in the EPO on January 1, 2021, under the fishing restrictions that apply in the same year. If this rule were delayed pending publication of a proposed rule and consideration of additional public comments, there is potential for U.S. purse seine and longline vessels to be out of compliance with IATTC management measures, and for the United States to be out of compliance with our international obligations. Owners and operators of U.S. purse seine and longline vessels operating in the EPO are familiar with this Resolution because it is identical to the resolution in place for the past 3 years that was implemented through notice and comment rulemaking. In addition, many of the affected individuals attended the 96th Extraordinary Meeting of the IATTC on December 22, 2020, where the Resolution was adopted. Industry representatives were also consulted in advance of the December meeting through a U.S. Delegation call and were involved in briefings and discussions with the U.S. Department of State and NOAA officials on the periphery of the December IATTC meeting. As soon as the rule is published, NMFS will send a notice of this rule to owners of vessels that are affected by this rule.

Ensuring conservation of tropical tuna stocks in the EPO and remaining in compliance with binding international obligations of the United States by expedient domestic implementation of Resolution C–20–05 through issuing this final rule now, rather than risking violation of our obligations or the health of tuna stocks, is in the public's interest and further supports the good cause for waiving the requirement to publish a notice of proposed rulemaking for public comment and for making the rule effective immediately upon publication. The IATTC will meet again in the upcoming months to discuss tropical tuna measures for 2022 and beyond.

NMFS encourages the public to participate in this rulemaking by submitting comments containing relevant information, data, or views. This interim final rule may be amended based on comments received.

Regulatory Flexibility Determination

The Regulatory Flexibility Act (RFA), 5 U.S.C. 603 and 604, requires an agency to prepare an initial and a final regulatory flexibility analysis whenever an agency is required by 5 U.S.C. 553 or any other law to publish a general notice of proposed rulemaking. Because NMFS found good cause under 5 U.S.C. 553(b)(3)(B) to forgo publication of a notice of proposed rulemaking, the regulatory flexibility analyses described in 5 U.S.C. 603 and 604 are not required for this rulemaking.

List of Subjects in 50 CFR Part 300

Administrative practice and procedure, Fish, Fisheries, Fishing, Marine resources, Reporting and recordkeeping requirements, Treaties.

Dated: January 12, 2021.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 300, subpart C is amended as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

■ 1. The authority citation for 50 CFR part 300, subpart C, continues to read as follows:

Authority: 16 U.S.C. 951 *et seq.*

■ 2. Amend § 300.25 by revising paragraphs (a)(2), (e)(1), and (e)(5) as follows:

§ 300.25 Fisheries management.

(a) * * *

(2) For calendar year 2021, there is a limit of 750 metric tons of bigeye tuna that may be caught by longline gear in the Convention Area by U.S. commercial fishing vessels that are over 24 meters in overall length. The catch limit within a calendar year is subject to increase if the United States receives a transfer of catch limit from another IATTC member or cooperating non-member, per paragraph (a)(5) of this section.

* * * * *

(e) * * * (1) *72-day closure.* A commercial purse seine fishing vessel of the United States that is of class size 4–6 (more than 182 metric tons carrying capacity) may not be used to fish with purse seine gear in the Convention Area for 72 days in calendar year 2021 during one of the following two periods:

(i) From 0000 hours Coordinated Universal Time (UTC) July 29 to 2400 hours UTC October 8, or

(ii) From 0000 hours UTC November 9 to 2400 hours UTC January 19 of the following year.

* * * * *

(5) *31-day area closure.* A fishing vessel of the United States of class size 4–6 (more than 182 metric tons carrying capacity) may not be used from 0000 hours on October 9, 2021, to 2400 hours on November 8, 2021, to fish with purse seine gear within the area bounded at the east and west by 96° and 110° W longitude and bounded at the north and south by 4° N and 3° S latitude.

Proposed Rules

Federal Register
Vol. 86, No. 11
Tuesday, January 19, 2021

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

SMALL BUSINESS ADMINISTRATION

13 CFR Parts 109, 120, and 123

[Docket Number SBA–2020–0057]

RIN 3245–AH60

Ensuring Equal Treatment for Faith-Based Organizations in SBA's Loan and Disaster Assistance Programs

AGENCY: U.S. Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The U.S. Small Business Administration (''SBA'' or ''Agency'') is proposing to remove five regulatory provisions that run afoul of the Free Exercise Clause of the First Amendment. All five provisions make certain faith-based organizations ineligible to participate in certain SBA business loan and disaster assistance programs because of their religious status. Because the provisions exclude a class of potential participants based solely on their religious status, the provisions violate the Free Exercise Clause of the First Amendment. SBA now proposes to remove the provisions to ensure in its business loan and disaster assistance programs the equal treatment for faith-based organizations that the Constitution requires.

DATES: Comments must be received on or before February 18, 2021.

ADDRESSES: You may submit comments, identified by RIN 3245–AH60, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail or Hand Delivery/Courier:* Valerie Mills, Executive Operations Officer, Office of General Counsel, U.S. Small Business Administration, 409 Third Street SW, Washington, DC 20416.

SBA will post all comments on *https://www.regulations.gov.* If you wish to submit confidential business information (''CBI''), as defined in the User Notice at *https://www.regulations.gov,* please submit the information to Valerie Mills, Executive Operations Officer, Office of General Counsel, U.S. Small Business Administration, 409 Third Street SW, Washington, DC 20416, or send an email to *Valerie.Mills@sba.gov.* Highlight the information that you consider to be CBI and explain why you believe SBA should hold this information as confidential. SBA will review the information and make the final determination on whether it will publish the information.

FOR FURTHER INFORMATION CONTACT: Valerie Mills, Executive Operations Officer, Office of General Counsel, (202) 619–0539, *Valerie.Mills@sba.gov.*

SUPPLEMENTARY INFORMATION:

I. Background Information

Consistent with its April 3, 2020, letter to Congress pursuant to 28 U.S.C. 530D (''530D letter''), SBA is proposing to remove from the Code of Federal Regulations (''CFR'') five provisions that run afoul of the Free Exercise Clause of the First Amendment. The provisions that SBA proposes to remove consist of the two provisions with which SBA's 530D letter was concerned and three other, substantially similar provisions. All five provisions make certain faith-based organizations ineligible to participate in certain SBA business loan and disaster assistance programs because of their religious status. Because the provisions exclude a class of potential participants solely based on their religious status, the provisions violate the Free Exercise Clause of the First Amendment, as construed in *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* 137 S. Ct. 2012 (2017), and *Espinoza* v. *Montana Department of Revenue,* 140 S. Ct. 2246 (2020). After consulting with the Department of Justice, in its 530D letter, SBA already has announced its decision not to enforce, apply, or administer two of the provisions, as well as its intention to propose amendments to conform those provisions to the Constitution. SBA now proposes such amendments, as well as amendments to three substantially similar provisions, to ensure in its business loan and disaster assistance programs the equal treatment for faith-based organizations that the Constitution requires.

A. The Subject Programs

Intermediary Lending Pilot Program (''ILP''). The Intermediary Lending Pilot (''ILP'') program was established as a pilot program authorized by the Small Business Jobs Act of 2010, Public Law 111–240 (2010), to provide loans of up to $1,000,000 to nonprofit intermediaries for the purpose of providing loans to small businesses. The program authorized SBA to select up to 20 nonprofit intermediaries each year to receive loans of up to $1,000,000, subject to the availability of funds. Selected ILP intermediaries, in turn, use the funds to make loans of up to $200,000 to eligible startup, newly established, or growing small businesses. ILP Intermediaries continue to relend a portion of the payments received on small business loans made under the program until they have fully repaid their loans to SBA.

Business Loan Programs. SBA provides financial assistance to small businesses under three business loan programs: its general business loan program authorized by section 7(a) of the Small Business Act, 15 U.S.C. 636(a) (''7(a) loans''), its microloan program authorized by section 7(m) of the Small Business Act, 15 U.S.C. 636(m) (''microloans''), and its development company program authorized by title V of the Small Business Investment Act, 15 U.S.C. 695–697f (''504 loans''). 7(a) loans provide financing to eligible small businesses for general business purposes and are guaranteed loans by which SBA guarantees a portion of a loan made by a lender. Through its microloans, SBA makes loans to non-profit intermediaries that in turn make short-term loans with a maximum amount of $50,000 to eligible small businesses for general business purposes, including the purchase of furniture, fixtures, supplies, materials, equipment, and for working capital. SBA also makes technical assistance grants to intermediaries for use in providing management assistance and counseling to microloan borrowers and prospective microloan borrowers. Projects involving 504 loans require long-term, fixed-asset financing for small businesses. A 504 project has three main partners: A Third Party Lender provides 50 percent or more of the financing; a Certified Development Company (CDC) provides up to 40 percent of the financing through a 504

debenture (guaranteed 100% by SBA); and an applicant (Borrower) injects at least 10 percent of the financing.

Economic Injury Disaster Loan Program (''EIDL''). The Economic Injury Disaster Loan (''EIDL'') program provides economic relief to eligible small businesses and private nonprofit organizations that experience substantial economic injury as a direct result of a declared disaster. Substantial economic injury is such that a business concern is unable to meet its obligations as they mature or to pay its ordinary and necessary operating expenses. EIDL loan proceeds may be used only for working capital necessary to carry on the business concern until resumption of normal operations and for expenditures necessary to alleviate the specific economic injury, but not to exceed that which the business concern could have provided had the injury not occurred.

Military Reservist Economic Injury Disaster Loan Program (''MREIDL''). The Military Reservist Economic Injury Disaster Loan (''MREIDL'') program provides loan funds to eligible small businesses to meet their ordinary and necessary operating expenses that they could have met, but are unable to meet, because an essential employee was called up to active service for a period of more than 30 consecutive days in his or her role as a military reservist. The loans provide the amount of working capital that eligible small businesses need to pay their necessary obligations as they mature until operations return to normal after the essential employee is released from active service. Loans can be provided for a maximum amount of $2,000,000 and a maximum term of 30 years.

Immediate Disaster Assistance Program (''IDAP''). The Immediate Disaster Assistance Program (''IDAP'') is a guaranteed disaster loan program for small businesses that have suffered physical damage or economic injury due to a declared disaster. An IDAP loan is an interim loan in an amount not to exceed $25,000 made by an IDAP lender to meet the immediate business needs of an IDAP borrower while approval of long-term financing from a disaster loan is pending with SBA. Currently, there is no funding available for IDAP loans.

B. Religious-Status-Based Exclusions in the Subject Programs and Conflict With Recent Supreme Court Decisions Construing the Free Exercise Clause

Current regulatory provisions governing the ILP, Business Loan programs, EIDL, MREIDL, and IDAP all render ineligible to participate businesses that are ''[p]rincipally engaged in''—or businesses whose ''principal activity'' is—''teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting.'' 13 CFR 109.400(b)(11), 120.110(k), 123.301(g), 123.502(n), 123.702(b)(6). Notably, these exclusions of otherwise-eligible participants are based not on any religious use of business loan funds or disaster assistance, but rather are based on the religious activities in which they generally engage, precluding them from even secular uses of business loan funds and disaster assistance. In short, they categorically disqualify otherwise-eligible faith-based organizations from receiving business loan funds and disaster assistance solely on account of their religious status.

In two recent decisions, the Supreme Court has made clear that such religious-status-based exclusions from a public benefit violate the Free Exercise Clause of the First Amendment.

In *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* 137 S. Ct. 2012 (2017), the Court examined a state's ''policy of categorically disqualifying churches and other religious organizations from receiving grants under its playground resurfacing program.'' *Id.* at 2017. The Court held that the policy violated the Free Exercise Clause. It explained that ''[t]he Free Exercise Clause 'protect[s] religious observers against unequal treatment' and subjects to the strictest scrutiny laws that target the religious for 'special disabilities' based on their 'religious status.' '' *Id.* at 2019 (quoting *Church of Lukumi Babulu Aye, Inc.* v. *Hialeah,* 508 U.S. 520, 533, 542 (1993)). The Court noted that it repeatedly had applied this ''basic principle'' to ''confirm[ ] that denying a generally available benefit solely on account of religious identity imposes a penalty on the free exercise of religion that can be justified only by a state interest 'of the highest order.' '' *Id.* (quoting *McDaniel* v. *Paty,* 435 U.S. 618, 628 (1978) (plurality opinion)). The state policy failed this stringent test. The Court concluded that, ''[i]n the face of the clear infringement on free exercise before us,'' the State's proffered interest—a ''policy preference for skating as far as possible from religious establishment concerns,'' even where the Establishment Clause did not prohibit the funding at issue—''cannot qualify as compelling.'' *Id.* at 2024.

Three years later, in *Espinoza* v. *Montana Department of Revenue,* 140 S. Ct. 2246 (2020), the Court examined a state-court decision that had applied a state constitutional provision to invalidate a tax-credit scholarships program solely on the ground that some scholarship recipients had sought to use their scholarships at religious schools. The question presented was ''whether the Free Exercise Clause precluded'' the state court ''from applying [the state constitutional] provision to bar religious schools from the scholarship program.'' *Id.* at 2254. The Court answered that question in the affirmative. The Court began by reiterating the basic principle that ''[t]he Free Exercise Clause . . . 'protects religious observers against unequal treatment' and against 'laws that impose special disabilities on the basis of religious status,''' *id.* (quoting *Trinity Lutheran,* 137 S. Ct. at 2019), and by noting *Trinity Lutheran's* '' 'unremarkable' conclusion that disqualifying otherwise eligible recipients from a public benefit 'solely because of their religious character' imposes 'a penalty on the free exercise of religion that triggers the most exacting scrutiny,' '' *id.* at 2255 (quoting *Trinity Lutheran,* 137 S. Ct. at 2021). The Court then observed that, as construed by the state court, the state constitutional provision ''bars religious schools from public benefits solely because of the religious character of the schools'' and ''also bars parents who wish to send their children to a religious school from those same benefits, again solely because of the religious character of the school.'' *Id.* at 2255. The Court was unpersuaded by the State's assertion that the status-based exclusion aimed to prevent religious uses of funds. ''Status-based discrimination,'' the Court concluded, ''remains status based even if one of its goals or effects is preventing religious organizations from putting aid to religious uses.'' *Id.* at 2256. Accordingly, the Court held ''that strict scrutiny applies under *Trinity Lutheran* because [the state constitutional] provision discriminates based on religious status,'' *id.* at 2257, and that, like the state policy it examined in *Trinity Lutheran,* the state constitutional provision under review failed that test, *id.* at 2260–63.

Like the state policy that the Court declared unconstitutional in *Trinity Lutheran* and the state constitutional provision that the Court declared unconstitutional in *Espinoza,* the five subject provisions deny a public benefit solely on account of religious status. Each categorically renders ineligible to participate in an SBA business loan or disaster assistance program all businesses that are ''[p]rincipally engaged in''—or businesses whose ''principal activity'' is—''teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting.'' 13 CFR 109.400(b)(11), 120.110(k), 123.301(g),

123.502(n), 123.702(b)(6). Notably, none of these exclusions concerns religious uses of business loan or disaster assistance funds. Instead, each prohibits an otherwise-eligible applicant from receiving such funds solely on account of its religious activities, even if it uses the funds for secular purposes. And any interest in prohibiting religious uses of funds cannot justify such a sweeping, status-based exclusion. As the Court held in *Espinoza,* ''[s]tatus-based discrimination remains status based even if one of its goals or effects is preventing religious organizations from putting aid to religious uses.'' 140 S. Ct. at 2256. Moreover, SBA cannot identify any other possible interest underlying the subject provisions, much less one that would pass muster under the '' 'strictest scrutiny,' '' *id.* at 2257 (quoting *Trinity Lutheran,* 137 S. Ct. at 2019), that the Court applies to such religious-status-based exclusions.

In addition, the five subject regulatory provisions cannot be justified under *Locke* v. *Davey,* 540 U.S. 712 (2004), because they are not restrictions on religious uses of business loans or disaster assistance. Rather, they exclude certain recipients from even secular uses of business loans and disaster assistance based solely on their religious status.

Therefore, the five subject provisions—13 CFR 109.400(b)(11), 120.110(k), 123.301(g), 123.502(n), and 123.702(b)(6)—are inconsistent with the Free Exercise Clause of the First Amendment, as construed by the Supreme Court in *Trinity Lutheran* and *Espinoza.*

C. SBA's 530D Letter and Subsequent Review of SBA Regulations

In light of the Supreme Court's decision in *Trinity Lutheran,* and after consultation with the U.S. Department of Justice, SBA determined that the religious-status-based exclusions in its Business Loan and EIDL programs—13 CFR 120.110(k) and 123.301(g)—are unconstitutional. In a letter submitted on April 3, 2020, pursuant to 28 U.S.C. 530D, SBA informed Congress of its determination. SBA explained that the provisions ''impermissibly exclude a class of potential recipients based solely on their religious identity, just like the State policy that was struck down in *Trinity Lutheran*''*;* that they ''categorically exclude religious organizations simply because they are religious''; and that ''[t]hese status-based prohibitions also cannot be justified under *Locke* v. *Davey,* 540 U.S. 712 (2004)'' because they ''are not limited to religious uses of business loans or economic disaster assistance, but rather exclude certain recipients from even secular uses based on their religious character.'' SBA notified Congress that it would ''refrain from enforcing, applying, or administering'' the subject provisions, and that it intended to ''propose amendments to 13 CFR 120.110 and 123.301 that will conform these provisions to the Constitution.''

Since submitting its 530D letter, SBA has reviewed its other regulations and identified three other substantially similar provisions—13 CFR 109.400(b)(11), 123.502(n), and 123.702(b)(6)—that suffer from the same constitutional defect identified in the 530D letter. Accordingly, SBA now proposes to remove all five of the invalid provisions to conform its regulations to the requirements of the Free Exercise Clause.

D. President Trump's Executive Order 13798 and the Attorney General's Memorandum on Religious Liberty

SBA's proposal not only follows from recent Supreme Court precedent and will ensure compliance with the Constitution, but also accords with Executive Branch policy. On May 4, 2017, President Trump issued Executive Order 13798, Presidential Executive Order Promoting Free Speech and Religious Liberty, 82 FR 21675 (May 9, 2017). Executive Order 13798 states that ''Federal law protects the freedom of Americans and their organizations to exercise religion and participate fully in civic life without undue interference by the Federal Government'' and further provides that the executive branch will honor and enforce those protections. It also directed the Attorney General to ''issue guidance interpreting religious liberty protections in Federal law.'' 82 FR at 21675. Pursuant to this instruction, the Attorney General, on October 6, 2017, issued the Memorandum for All Executive Departments and Agencies, ''Federal Law Protections for Religious Liberty,'' 82 FR 49668 (Oct. 26, 2017) (the ''Attorney General's Memorandum on Religious Liberty'').

Consistent with *Trinity Lutheran,* the Attorney General's Memorandum on Religious Liberty emphasized that individuals and organizations do not forfeit religious-liberty protections by receiving government grants or otherwise interacting with Federal, state, or local governments, and that ''government may not exclude religious organizations as such from secular aid programs . . . when the aid is not being used for explicitly religious activities such as worship or proselytization.'' 82 FR at 49669.

II. Section by Section Analysis

A. Section 109.400—Eligible Small Business Concerns

SBA is proposing to amend 13 CFR 109.400 to remove paragraphs (b)(11) and (b)(12) and redesignate the following paragraphs accordingly. 13 CFR 109.400(b) currently enumerates a list of ''types of businesses'' that ''are not eligible to receive a loan from an ILP Intermediary under'' the ILP. Included in this list is 13 CFR 109.400(b)(11), ''[b]usinesses principally engaged in teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting[.]'' This exclusion based on religious status violates the Free Exercise Clause of the First Amendment to the Constitution. Therefore, SBA proposes to remove it but leave intact the other exclusions listed in 13 CFR 109.400(b).

B. Section 120.110—What businesses are ineligible for SBA business loans?

SBA is proposing to amend 13 CFR 120.110 to remove paragraphs (k) and (l) and redesignate the following paragraphs accordingly. 13 CFR 120.110 currently enumerates a list of ''types of businesses'' that ''are ineligible for SBA business loans.'' Included in this list is 13 CFR 120.110(k), ''[b]usinesses principally engaged in teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting[.]'' This exclusion based on religious status violates the Free Exercise Clause of the First Amendment to the Constitution. Therefore, SBA proposes to remove it but leave intact the other exclusions listed in 13 CFR 120.110.

C. Section 123.301—When would my business not be eligible to apply for an Economic Injury Disaster Loan?

SBA is proposing to amend 13 CFR 123.301 to remove paragraph (g) and redesignate the following paragraph accordingly. 13 CFR 123.301 currently enumerates a list of types of businesses that ''are not eligible for an economic [injury] disaster loan.'' Included in this list is 13 CFR 123.301(g), businesses that are ''[p]rincipally engaged in teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting[.]'' This exclusion based on religious status violates the Free Exercise Clause of the First Amendment to the Constitution. Therefore, SBA proposes to remove it but leave intact the other exclusions listed in 13 CFR 123.301.

D. Section 123.502—Under what circumstances is your business ineligible to be considered for a Military Reservist Economic Injury Disaster loan?

SBA is proposing to amend 13 CFR 123.502 to remove paragraph (n) and redesignate the following paragraph accordingly. 13 CFR 123.502 currently enumerates a list of types of businesses that are ''ineligible for a Military Reservist EIDL.'' Included in this list is 13 CFR 123.502(n), listing businesses whose ''[p]rincipal activity is teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting[.]'' This exclusion based on religious status violates the Free Exercise Clause of the First Amendment to the Constitution. Therefore, SBA proposes to remove it but leave intact the other exclusions listed in 13 CFR 123.502.

E. Section 123.702—What are the eligibility requirements for an IDAP loan?

SBA is proposing to amend 13 CFR 123.702 to remove paragraph (b)(6) and redesignate the following paragraphs accordingly. 13 CFR 123.702(b) currently enumerates a list of types of businesses that are ''not eligible for an IDAP loan.'' Included in this list is 13 CFR 123.702(b)(6), businesses that are ''[p]rincipally engaged in teaching, instructing, counseling or indoctrinating religion or religious beliefs, whether in a religious or secular setting[.]'' This exclusion based on religious status violates the Free Exercise Clause of the First Amendment to the Constitution. Therefore, SBA proposes to remove it but leave intact the other exclusions listed in 13 CFR 123.702(b).

III. Compliance With Executive Orders 12866, 13771, 12988, and 13132, the Paperwork Reduction Act (44 U.S.C., Ch. 35), and the Regulatory Flexibility Act (5 U.S.C. 601–612)

A. Executive Order 12866

Under Executive Order 12866, the Office of Information and Regulatory Affairs (OIRA) must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the executive order and subject to review by the Office of Management and Budget (OMB). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a regulation that may (1) have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities (also referred to as an ''economically significant'' regulation); (2) create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) materially alter the budgetary impacts of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in Executive Order 12866.

OIRA has determined that this proposed rule is a significant, but not economically significant, regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

The proposed rule removes paragraphs that excluded from SBA's loan and disaster assistance programs types of businesses that were ''principally engaged in teaching, instructing, counseling or indoctrinating religion or religious beliefs . . . .''

Executive Order 12866 requires assessment of available alternatives. An alternative to the proposed rule's elimination of invalid provisions is to take no action regarding the invalid exclusions. This alternative is untenable as it would leave in place provisions that are invalid under the Free Exercise Clause. The other alternative to the proposed rule's elimination of the invalid provisions is to create new restrictions barring religious uses of business loans and disaster assistance. This alternative is unnecessary under the First Amendment; [1] would create unnecessary regulation as current regulations already specify—in secular terms—the permissible uses of funds; [2] and would thus be inconsistent with the Administration's deregulatory agenda, *see* Executive Order 13771, Presidential Executive Order on Reducing Regulation and Controlling Regulatory Costs, 82 FR 9,339 (Feb. 3, 2017).

In accordance with Executive Order 12866, SBA has assessed the potential costs and benefits of this regulatory action. SBA estimates that no quantifiable effects exist from this proposed rule relative to a baseline that represents the state of SBA's programs in the absence of this action. Because these exclusions are not enforceable (and, indeed, SBA has informed Congress of its determination not to enforce 13 CFR 120.110(k) and 123.301(g)), SBA expects the removal of these exclusions to impose no additional costs or significant benefits.

In terms of benefits, SBA recognizes a nonquantifiable benefit to religious liberty that comes from removing exclusions of faith-based organizations, in conflict with the Free Exercise Clause. SBA also recognizes a nonquantifiable benefit to participants in SBA's loan and disaster assistance programs that comes from increased clarity in the regulatory requirements that apply to faith-based organizations operating in these programs. Benefits may also accrue from the increased capacity of faith-based social-service providers to provide services, both because these providers will be able to allocate resources with less uncertainty and because more faith-based organizations may participate. The SBA does not expect the proposed rule to materially alter the budgetary impact of its loan programs or the rights and obligations of recipients.

B. Executive Order 13771

This proposed rule is not expected to be an Executive Order 13771 regulatory action.

C. Executive Order 12988

This action meets applicable standards set forth in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden. The action does not have retroactive or preemptive effect.

D. Executive Order 13132

This proposed rule does not have federalism implications as defined in Executive Order 13132. It would not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in the Executive Order. As such it does not warrant the preparation of a Federalism Assessment.

E. Paperwork Reduction Act, 44 U.S.C., Ch. 35

For the purpose of the Paperwork Reduction Act, 44 U.S.C. Ch. 35, SBA has determined that this rule will not

[1] *See Religious Restrictions on Capital Financing for Historically Black Colleges and Universities,* 43 Op. O.L.C.—**7–15 (Aug. 15, 2019) (slip op.) (analyzing a loan program substantially similar to SBA's business loan programs and concluding that the Establishment Clause did not require any use-of-funds restrictions); *Authority of FEMA to Provide Disaster Assistance to Seattle Hebrew Academy,* 26 Op. O.L.C. 114, 122–32 (2002) (analyzing a disaster assistance program substantially similar to SBA's disaster assistance programs and concluding that the Establishment Clause permitted the provision of disaster assistance to a religious school).

[2] *See* 13 CFR 109.430, 120.120, 120.130, 120.131, 123.303, 123.508, 123.509, and 123.704.

impose any new reporting or record keeping requirements.

F. Regulatory Flexibility Act, 5 U.S.C. 601–612

When an agency issues a rulemaking proposal, the Regulatory Flexibility Act (''RFA'') generally requires the agency to ''prepare and make available for public comment an initial regulatory flexibility analysis'' that will ''describe the impact of the proposed rule on small entities.'' 5 U.S.C. 603(a). But the RFA allows the head of an agency to certify a rule, in lieu of preparing an analysis, if the proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b).

The RFA defines ''small entity'' to include small businesses, small organizations, and small governmental jurisdictions. 5 U.S.C. 601(6). This proposed rule concerns participation in SBA's business loan and disaster assistance programs by certain faith-based organizations. As such, the rule relates to small organizations.

Small organizations that are the subject of this proposed rule include entities in NAICS Code 813110—Religious Organizations. According to the Census Bureau's Statistics of U.S. Businesses (SUSB), in 2012, approximately 182,000 organizations in this NAICS code met the definition for SBA's Small Business Size Standards, as updated in 2019.[3] The number of those organizations that meet the general requirements for eligibility to participate in SBA's business loan and disaster assistance programs is likely much smaller.

Considering that the proposed rule imposes no costs while ensuring that SBA's regulations conform with requirements of the Free Exercise Clause, SBA estimates that the proposed rulemaking will not have a significant economic impact on a substantial number of small entities. SBA does not believe that the impact will be significant within any size groupings because this proposed rule eliminates invalid provisions in its business loan and disaster assistance programs. Accordingly, the Administrator of the SBA hereby certifies that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities. SBA invites comment from members of the public who believe there will be a significant impact on any small entities, including small businesses.

[3] According to the SUSB, 183,411 establishments were under NAICS Code 813110 in 2012, the last year for which this data set is available. Of the total number of establishments, 181,298 have annual receipts under $7.5 million. SBA uses a revenue standard for determining small businesses in NAICS 813110. In the 2019 SBA Table of Size Standards, that revenue standard was $8 million and below. SUSB information is arranged in dollar ranges of receipt size, with the next category ranging from above $7.5 million to $9,999,999, which is in excess of SBA's small business standard. 660 establishments were in that category.

List of Subjects

13 CFR Part 109

Loan programs—business, Reporting and recordkeeping requirements, Small businesses.

13 CFR Part 120

Loan programs—business, Reporting and recordkeeping requirements, Small businesses.

13 CFR Part 123

Disaster assistance, Loan programs—business, Reporting and recordkeeping requirements, Small businesses.

Accordingly, for the reasons stated in the preamble, SBA proposes to amend 13 CFR parts 109, 120, and 123 as follows:

PART 109—INTERMEDIATE LENDING PILOT PROGRAM

■ 1. The authority citation for 13 CFR part 109 continues to read as follows:

Authority: 15 U.S.C. 634(b)(6), (b)(7), and 636(l).

§ 109.400 [Amended]

■ 2. Amend § 109.400 by removing paragraph (b)(11) and redesignating paragraphs (b)(13) through (23) as paragraphs (b)(11) through (21), respectively.

PART 120—BUSINESS LOANS

■ 3. The authority citation for 13 CFR part 120 continues to read as follows:

Authority: 15 U.S.C. 634(b) (6), (b) (7), (b) (14), (h), and note, 636(a), (h) and (m), and note, 650, 657t, and note, 657u, and note, 687(f), 696(3) and (7), and note, and 697(a) and (e), and note.

§ 120.110 [Amended]

■ 4. Amend § 120.110 by removing paragraph (k) and redesignating paragraphs (m) through (s) as paragraphs (k) through (q), respectively.

PART 123—DISASTER LOAN PROGRAM

■ 5. The authority citation for 13 CFR part 123 continues to read as follows:

Authority: 15 U.S.C. 632, 634(b)(6), 636(b), 636(d), and 657n.

§ 123.301 [Amended]

■ 6. Amend § 123.301 by:

■ a. Adding the word ''or'' to the end of paragraph (f); and

■ b. Removing paragraph (g) and redesignating paragraph (h) as paragraph (g).

§ 123.502 [Amended]

■ 7. Amend § 123.502 by:

■ a. Adding the word ''or'' to the end of paragraph (m); and

■ b. Removing paragraph (n) and redesignating paragraph (o) as paragraph (n).

§ 123.702 [Amended]

■ 8. Amend § 123.702 by removing paragraph (b)(6) and redesignating paragraphs (b)(7) through (25) as paragraphs (b)(6) through (24), respectively.

Signed in Washington, DC.

Jovita Carranza,

Administrator.

BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2020–1173; Project Identifier MCAI–2020–00299–R]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters Deutschland GmbH Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for Airbus Helicopters Deutschland GmbH Model EC135P1, EC135P2, EC135P2+, EC135P3, EC135T1, EC135T2, EC135T2+, and EC135T3 helicopters. This proposed AD was prompted by a reassessment of the flight control system. This proposed AD would require modification of the cyclic stick, as specified in a European Aviation Safety Agency (EASA) AD, which is proposed for incorporation by reference (IBR). The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by March 5, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

• *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
• *Fax:* 202–493–2251.
• *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
• *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material proposed for IBR in this proposed AD, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110. It is also available in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1173.

Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1173; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Kristin Bradley, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email *kristin.bradley@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2020–1173; Product Identifier MCAI–2020–00299–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposal.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Kristi Bradley, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email *kristin.bradley@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Discussion

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD No. 2018–0063, dated March 22, 2018 (EASA AD 2018–0063), to correct an unsafe condition for Airbus Helicopters Deutschland GmbH (AHD), formerly Eurocopter Deutschland GmbH (ECD), Eurocopter España S.A., Model EC135 P1, EC135 P2, EC135 P2+, EC135 P3, EC135 T1, EC135 T2, EC135 T2+, EC135 T3, EC635 P2+, EC635 P3, EC635 T1, EC635 T2+ and EC635 T3 helicopters, all variants, all serial numbers (S/Ns) up to 1263 inclusive and S/N 1265, if equipped with autopilot, and S/N 2001 up to 2024 inclusive, except S/N 2006, 2008, 2013, 2017, 2019, 2020 and 2022.

This proposed AD was prompted by a reassessment of the flight control system, which revealed that uncommanded disengagement of the main rotor trim actuators during flight with the autopilot engaged and hands-off controls could result in high roll and pitch rates, which would require pilot intervention within a reaction time below that required by current airworthiness standards. The FAA is proposing to require installing a cyclic stick weight compensation modification to correct this unsafe condition, which if not corrected, may lead to subsequent loss of control of the helicopter. See the EASA AD for additional background information.

Related Service Information Under 1 CFR Part 51

EASA AD 2018–0063 describes procedures for modifying the helicopter by retrofitting the cyclic stick weight compensation.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

These products have been approved by the aviation authority of another country, and are approved for operation in the United States. Pursuant to the bilateral agreement with the State of Design Authority, the FAA has been notified of the unsafe condition described in the EASA AD referenced above. The FAA is proposing this AD after evaluating all the relevant information and determining the unsafe condition described previously is likely to exist or develop in other products of the same type designs.

Proposed AD Requirements

This proposed AD would require accomplishing the actions specified in EASA AD 2018–0063, described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this proposed AD and except as discussed under ''Differences Between this Proposed AD and the EASA AD.''

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA initially worked with Airbus and EASA to develop a process to use certain EASA ADs as the primary source of information for compliance with requirements for corresponding

FAA ADs. The FAA has since coordinated with other manufacturers and civil aviation authorities (CAAs) to use this process. As a result, EASA AD 2018–0063 will be incorporated by reference in the FAA final rule. This proposed AD would, therefore, require compliance with EASA AD 2018–0063 in its entirety, through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Using common terms that are the same as the heading of a particular section in the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in the EASA AD. Service information specified in EASA AD 2018–0063 that is required for compliance with EASA AD 2018–0063 will be available on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1173 after the FAA final rule is published.

Differences Between This Proposed AD and the EASA AD

The EASA AD applies to certain serial-numbered EC635-series helicopters with an autopilot installed, whereas this proposed AD does not apply to the Model EC635-series helicopters because these models are not FAA type-certificated. The EASA AD requires a calendar compliance time, whereas this proposed AD would require using hours time-in-service.

Costs of Compliance

The FAA estimates that this proposed AD affects 331 helicopters of U.S. registry. Labor rates are estimated at $85 per work-hour. Based on these numbers, the FAA estimates that operators may incur the following costs in order to comply with this proposed AD.

Modifying the cyclic stick weight compensator would take about 8 work-hours and parts would cost about $1,300 for an estimated cost of about $1,980 per modification and $655,380 for the U.S. fleet.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus Helicopters Deutschland GmbH: Docket No. FAA–2020–1173; Project Identifier MCAI–2020–00299–R.

(a) Comments Due Date

The FAA must receive comments by March 5, 2021.

(b) Affected Airworthiness Directives (ADs)

None.

(c) Applicability

This AD applies to Airbus Helicopters Deutschland GmbH Model EC135P1, EC135P2, EC135P2+, EC135P3, EC135T1, EC135T2, EC135T2+, and EC135T3 helicopters, certificated in any category, with autopilot installed, having serial numbers (S/Ns) up to 1263 inclusive, 1265, and 2001 up to 2024 inclusive, but excluding S/N 2006, 2008, 2013, 2017, 2019, 2020, and 2022.

Note 1 to paragraph (c): Helicopters with an EC135P3H or EC135T3H designation are Model EC135P3 or EC135T3 helicopters, respectively.

(d) Subject

Joint Aircraft System Component (JASC) Code: 6700, Rotorcraft Flight Control.

(e) Reason

This AD was prompted by a reassessment of the flight control system, which revealed that uncommanded disengagement of the main rotor trim actuators during flight with the autopilot engaged and hands-off controls could result in high roll and pitch rates requiring pilot intervention within a reaction time below that required by current airworthiness standards. The FAA is issuing this AD to require installing a cyclic stick weight compensation modification to correct this unsafe condition, which if not corrected, could result in subsequent loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Aviation Safety Agency (now European Union Aviation Safety Agency) (EASA) AD No. 2018–0063, dated March 22, 2018 (EASA AD 2018–0063).

(h) Exceptions to EASA AD 2018–0063

(1) Where EASA AD 2018–0063 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where EASA AD 2018–0063 requires modifying the helicopter within 7 months, this AD requires modifying the helicopter within 200 hours time-in-service.

(3) Although the service information referenced in EASA AD 2018–0063 specifies to discard certain parts, this AD requires removing those parts from service instead.

(4) The ''Remarks'' section of EASA AD 2018–0063 does not apply to this AD.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2018–0063 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs):

(1) The Manager, Strategic Policy Rotorcraft Section, FAA, has the authority to approve AMOCs for this AD, if requested

using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. Send your proposal to: Manager, Strategic Policy Rotorcraft Section, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email *9-ASW-FTW-AMOC-Requests@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

(1) For EASA AD 2018–0063, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110. This material may be found in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1173.

(2) For more information about this AD, contact Kristi Bradley, Aviation Safety Engineer, General Aviation & Rotorcraft Section, International Validation Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email *kristin.bradley@faa.gov.*

Issued on January 8, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2020–1156; Airspace Docket No. 20–ANE–7]

RIN 2120–AA66

Proposed Establishment of Class E Airspace; Monhegan Island, ME

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to establish Class E airspace extending upward from 700 feet above the surface for Monhegan Island Heliport, Monhegan Island, ME, to accommodate new area navigation (RNAV) global positioning system (GPS) standard instrument approach procedures (SIAPs) serving this heliport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

DATES: Comments must be received on or before March 5, 2021.

ADDRESSES: Send comments on this proposal to: The U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; Telephone: (800) 647–5527, or (202) 366–9826. You must identify the Docket No. FAA–2020–1156; Airspace Docket No. 20–ANE–7, at the beginning of your comments. You may also submit comments through the internet at *https://www.regulations.gov.*

FAA Order 7400.11E Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *https://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; Telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email *fedreg.legal@nara.gov* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; Telephone (404) 305–6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would establish Class E airspace in Monhegan Island, ME, to support IFR operations in the area.

Comments Invited

Interested persons are invited to comment on this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (Docket No. FAA–2020–1156 and Airspace Docket No. 20–ANE–7) and be submitted in triplicate to DOT Docket Operations (see **ADDRESSES** section for the address and phone number). You may also submit comments through the internet at *https://www.regulations.gov.*

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2020–1156; Airspace Docket No. 20–ANE–7.'' The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this document may be changed in light of the comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *https://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *https://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays

at the office of the Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, Room 350, College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to Title 14 Code of Federal Regulations (14 CFR), part 71, to establish Class E airspace extending upward from 700 feet above the surface at Monhegan Island Heliport, Monhegan Island, ME, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for IFR operations at Monhegan Island Heliport.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'', prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANE ME E5 Monhegan Island, ME [New]

Monhegan Island Heliport, ME
(Lat. 43°45′16.41″ N, long. 69°18′52.78″ W)

That airspace extending upward from 700 feet above the surface of the earth within a 6-mile radius of Monhegan Island Heliport.

Issued in College Park, Georgia, on January 5, 2021.

Andreese C. Davis,

Manager, Airspace & Procedures Team South, Eastern Service Center, Air Traffic Organization.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would establish Class E airspace at MSP GHQ Heliport in Framingham, MA, to support IFR operations in the area.

Comments Invited

Interested persons are invited to comment on this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (Docket No. FAA–2020–1195 and Airspace Docket No. 20–ANE–11) and be submitted in triplicate to DOT Docket Operations (see **ADDRESSES** section for the address and phone number). You may also submit comments through the internet at *https://www.regulations.gov.*

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2020–1195; Airspace Docket No. 20–ANE–11.'' The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this document may be changed in light of the comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *https://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *https://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to establish Class E airspace extending upward from 700 feet above the surface at MSP GHQ Heliport (Massachusetts State Police HQ), Framingham, MA, providing the controlled airspace required to support the new RNAV (GPS) standard instrument approach procedures for IFR operations at this heliport.

Class E airspace designations are published in Paragraph 6005, of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'', prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANE MA E5 Framingham, MA [New]

MSP GHQ Heliport, MA
(Lat. 42°17′48″ N, long. 71°24′57″ W)

Proposed Establishment, Amendment, and Revocation of Air Traffic Service (ATS) Routes; Northeast United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend 11 VOR Federal airways, remove 10 VOR Federal airways; amend four low altitude RNAV routes (T-routes), establish seven T-routes; amend one high altitude RNAV route (Q-route), and establish one Q-route. This action would support the Northeast Corridor Atlantic Coast Route Project and the VOR Minimum Operational Network (VOR MON) Program to improve the efficiency of the National Airspace System (NAS) and reduce dependency on ground-based navigational systems.

DATES: Comments must be received on or before March 5, 2021.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: 1 (800) 647–5527 or (202) 366–9826. SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the airway route structure in the northeastern United States to maintain the efficient flow of air traffic.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2020–1146; Airspace Docket No. 20–AEA–10) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at *https://www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2020–1146; Airspace Docket No. 20–AEA–10''. The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

An electronic copy of this document may be downloaded through the internet at *https://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *https://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this proposed rule. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to amend 11 VOR Federal airways; remove 10 VOR Federal airways; amend four low altitude RNAV routes (T-routes); establish seven T-routes; amend one high altitude RNAV route (Q-route); and establish one Q-route. The proposed VOR Federal airway changes are described below.

The names listed in the VOR Federal airway descriptions are the names of the

VOR or VORTAC navigation facilities that form the route. This NPRM proposes changes to some VOR Federal airways having segments in Canadian airspace, and the extension of some Canadian RNAV routes into U.S. airspace. The FAA developed these proposed changes in cooperation with NAV CANADA (Canada's civil air navigation services provider).

The following section describes proposed VOR Federal airway changes.

V–2: V–2 extends, in two parts, between Seattle, WA, and Nodine, MN; and between Buffalo, NY, and Gardner, MA. The FAA proposes to remove the sections between Buffalo and Gardner. As amended, the route would extend between Seattle, WA, and Nodine, MN. Additional changes to other portions of the airway have been proposed in a separate NPRM.

V–3: V–3 extends between Key West, FL, and Quebec, PQ, Canada. The FAA proposes to remove the segments between the intersection of the Boston, MA, 014°, and the Pease, NH, 185° radials, and Houlton, ME. As amended, V–3 would consist of two parts: Between Key West, FL, and Boston, MA; and between Presque Isle, ME, and Quebec, Canada. The airspace within Restricted areas R–2916, R–2934, R–2935, and within Canada is excluded.

V–14: V–14 extends, in two parts, between Chisum, NM, and Flag City, OH; and between Buffalo, NY, and Norwich, CT. This action proposes to remove the sections between Buffalo and Norwich. As amended, V–14 would extend between Chisum, NM, and Flag City, OH. Additional changes to other portions of the airway have been proposed in a separate NPRM.

V–29: V–29 extends between Snow Hill, MD, and Massena, NY. This action would remove the sections between Watertown, NY, and Massena, NY. As amended, V–29 would extend between Snow Hill, MD, and Syracuse, NY.

V–39: V–39 extends between Sandhills, SC, and Mont Joli, PQ, Canada. This action would remove the sections between Chester, MA, and Augusta, ME. As amended, V–39 would consist of two parts: Between Sandhills, SC, and the intersection of the Barnes, MA, 265°, and the Chester, MA, 223° radials; and between Augusta, ME, and Mont Joli, PQ, Canada, excluding the portion within Canada.

V–93: V–93 consists of two parts: Extending between Patuxent River, MD, and the intersection of the Wilkes-Barre, PA, 037°, and the Sparta, NJ, 300° radials; and between the intersection of the Sparta, NJ, 018°, and the Kingston, NY, 270° radials, and Bangor, ME. This action would remove the sections between Chester, MA, and Bangor, ME. The amended route would extend between Patuxent River, MD, and the intersection of the Barnes, MA, 265°, and the Chester, MA, 223° radials.

V–106: V–106 consists of two parts: Between Johnstown, PA, and the intersection of the Wilkes-Barre, PA, 037°, and the Sparta, NJ, 300° radials; and between Barnes, MA, and Kennebunk, ME. This proposal would remove the sections between Barnes, MA, and Kennebunk, ME. The amended route would extend between Johnstown, PA, and the intersection of the Wilkes-Barre, PA, 037°, and the Sparta, NJ, 300° radials.

V–145: V–145 extends between Utica, NY, and the intersection of the Watertown, NY, 005°, and the Ottawa, ON, Canada 185° radials. The FAA proposes to remove the entire route.

V–196: V–196 extends between Utica, NY, and the intersection of the Saranac Lake, NY, 058°, and the Burlington, VT, 296° radials. The FAA proposes to remove the entire route.

V–203: V–203 extends between the intersection of the Chester, MA, 266°, and the Albany, NY, 134° radials, and Massena, NY. The FAA proposes to remove the entire route.

V–229: V–229 extends between Patuxent, MD, and Burlington, VT. This proposal would remove the segments between Hartford, CT, and Burlington, VT. As amended, V–229 would extend between Patuxent, MD, and Hartford, CT.

V–249: V–249 extends between Robbinsville, NJ, and Utica, NY. This action would remove the segments between DeLancey, NY, and Utica, NY. The amended route would extend between Robbinsville, NJ, and DeLancey, NY.

V–273: V–273 extends between the intersection of the Huguenot, NY, 134°, and the Solberg, NJ, 044° radials, and Syracuse, NY. The FAA proposes to remove the segments between Hancock, NY, and Syracuse, NY. As amended, the route would extend between the intersection of the above noted Huguenot and Solberg radials, and Hancock, NY.

V–282: V–282 extends between Saranac Lake, NY, and the intersection of the Saranac Lake, NY, 008° and the Massena, NY, 080° radials. The FAA proposes to remove the entire route.

V–318: V–318 extends between the intersection of the Beauce, PQ, Canada, 103°, and the Quebec, PQ Canada, 047° radials, through United States airspace, to St. John, NB, Canada. The FAA proposes to remove the entire route.

V–322: V–322 extends between Concord, NH, and the intersection of the Concord, NH, 022°, and the Augusta, ME, 265° radials. The FAA proposes to remove the entire route.

V–352: V–352 extends between the intersection of the Beauce, PQ, Canada 085° and the Bangor, ME, 336° radials, and Houlton, ME. The FAA proposes to remove the entire route.

V–428: V–428 extends between Georgetown, NY, and Utica, NY. The FAA proposes to remove the entire route.

V–471: V–471 extends between Bangor, ME, and the intersection of the Houlton, ME, 085° radial, and the United States Canadian border. This proposal would remove the segments between Millinocket, ME, and the above border intersection. As amended, the route would extend between Bangor, ME, and Millinocket, ME.

V–490: V–490 extends Utica, NY, and Manchester, NH. The FAA proposes to remove the entire route.

V–542: V–542 currently extends between Elmira, NY, and Lebanon, NH. A separate rulemaking action proposes to remove the route segments between Rockdale, NY, and Lebanon, NH. This NPRM proposes to remove the entire remaining route.

The following section describes proposed changes to U.S. low altitude RNAV routes.

T–295: T–295 extends between the LOUIE, MD, waypoint (WP), and the Bangor, ME, VORTAC. This action proposes to extend the route northeastward from Bangor, ME, to Presque Isle, ME. The Keene, NH (EEN) VORTAC is replaced by the KEYNN, NH, WP, which is located 60 feet north of the Keene VORTAC. The amended route would extend between LOUIE, MD, and Presque Isle, ME.

T–314: T–314 is a proposed new route that would extend between the Barnes, MA, VORTAC, and the Kennebunk, ME, VOR/DME.

T–315: T–315 is a proposed new route that would extend between the Hartford, CT, VOR/DME and the Burlington, VT, VOR/DME.

T–316: T–316 is a proposed new route that would extend between the LAMMS, NY, WP, and the MANCH, NH, WP.

T–391: T–391 extends between the TUMPS, NY, Fix, and the SSENA, NY, WP. This action proposes to remove the TUMPS Fix and extend the route southeast from the Syracuse, NY, VORTAC, to the Hancock, NY, VOR/DME. As amended, the route would extend between Hancock, NY, and SSENA, NY.

The following section describes proposed changes to Canadian low altitude RNAV routes.

T–608: T–608 is an existing Canadian route that was extended into U.S. airspace in 2014 (79 FR 57758, September 26, 2014). It currently extends between the HOCKE, MI, WP, through Canadian airspace, and ends at the WOZEE, NY, WP. This proposal would extend the route from the WOZEE WP eastward into U.S. airspace to the YANTC, CT, WP. The amended T–608 would overlie VOR Federal airway V–2 between the WOZEE, NY, WP and the Gardner, MA (GDM), VORTAC; and it would overlie V–14 between the Albany, NY (ALB), VORTAC and the YANTC, CT, WP. The YANTC, CT, WP replaces the Norwich, CT (ORW), VOR/DME. The LAMMS, NY, WP replaces the Utica, NY (UCA), VORTAC. As amended, T–608 would extend from the HOCKE, MI, WP, through Canadian airspace, to the WOZEE, NY, WP; and from the WOZEE WP, to the YANCT WP. The order of points listed in the route description is changed to read from ''west to east'' to comply with formatting requirements.

T–634: T–634 is an existing Canadian route that the FAA proposes to extend into U.S. airspace. The route currently ends at the VIBRU, Canada, WP (adjacent to the U.S./Canadian border). The VIBRU WP will be moved 0.55NM to the south of its current position to align it with the U.S./Canada border. It will be re-labled as ''VIBRU, NY.'' The FAA proposes to extend T–634 into U.S. airspace between the Syracuse, NY, VORTAC, and the VIBRU, NY, WP. The extended portion of the route would replace VOR Federal airway V–145 as described above.

T–662: T–662 is a Canadian route that would be extended into U.S. airspace between the DEPRI, ME, WP, and the HULTN, ME, WP. The HULTN WP would replace the Houlton, ME (HUL) VOR/DME. It is located 60 feet east of the Houlton VOR/DME. T–662 would extend across Maine from the DEPIR WP to the KATAH, ME, WP, to the HULTN, ME, WP. T–662 would replace VOR Federal airway V–352 as described above.

T–698: T–698 is a Canadian route that would be extended to cross the State of Maine from the EBGIX, ME, WP, to the HULTN, ME, WP, to the ACTON, ME, WP. The EBGIX WP is being moved 1.16NM east to coincide with the U.S./Canada border in western Maine. The ACTON WP is a new point to be added on the U.S./Canada border to the southeast of the Houlton, ME (HUL) VOR/DME.

T–705: T–705 is an existing Canadian route that was extended into U.S. airspace, between the U.S./Canadian border, and the Utica, NY, VORTAC, in 2018 (83 FR 31855, July 10, 2018). This proposal would extend T–705 further southward to the DANZI, NY, WP (near the Delancey, NY, VOR/DME). The Utica, NY, VORTAC, and the Saranac Lake, NY, VOR/DME would be removed from the route. The new LAMMS, NY, WP would replace the Utica VORTAC, and the new SRACK, NY, WP would replace the Saranac Lake VOR/DME in the route description. The MUTNA, Canada, WP would be moved 0.79NM southward to align with the U.S./Canada border. It would be re-labled as ''MUTNA, NY.'' As amended, the U.S. portion of T–705 would extend between the DANZI, NY, WP and MUTNA, NY, WP at the U.S./Canadian border.

T–781: T–781 is a Canadian route that was extended into U.S. airspace in 2014 (79 FR 57758, September 26, 2014). Currently, the U.S. portion of the route extends from the Flint, MI, VORTAC, eastward to the AXOBU, Canada, WP (in the vicinity of the U.S./Canadian border near Port Huron, MI). T–781 then continues eastward across Canada and terminates at the PINTE, Canada Fix (on the U.S./Canadian border). The PINTE Fix would be moved 0.07 NM east to the U.S./Canada border and would be converted to a WP. This proposal would extend T–781 eastward from the PINTE, ME, WP to terminate at the HULTN, ME WP. As amended, the U.S. portion of T–781 would extend between the Flint, MI, VORTAC, and the AXOBU, Canada, Fix; and between the PINTE, ME, WP, and the HULTN, ME, WP.

The following section describes proposed changes to Canadian high altitude RNAV routes.

Q–806: Q–806 is a Canadian route that was extended into U.S. airspace in 2014 (79 FR 57758, September 26, 2014). The U.S. portion currently extends from the MEKSO, Canada, WP, eastward through the Millinocket, ME, VOR/DME, to the CANME, ME, WP, and the VOGET, Canada, WP. Canada is realigning Q–806 by shifting the route segment from the MEKSO, Canada, WP, southward to the VINDI, Canada, WP. The VINDI WP would be moved 0.13NM eastward to align with the U.S./Canada border and listed as ''VINDI, ME.'' Consequently, this proposal would remove the route segment between the MEKSO WP and the Millinocket, ME, VOR/DME, and add the segment between the VINDI, ME, WP, and the Millinocket VOR/DME. The VIGDU, Canada, WP would be moved 0.50NM westward to align with the U.S./Canada border and listed as ''VIGDU, ME.'' The VIGDU, ME, WP added east of the CANME, ME, WP. As amended, the U.S. portion of Q–806 would extend from the VINDI, ME, WP, eastward to the Millinocket, ME, VOR/DME, to the CANME, ME, WP, to the VIGDU, ME, WP.

Q–864: Q–864 is an existing Canadian route that the FAA proposes to extend into U.S. airspace across northern Maine. The route currently ends at the EBGIX, Canada, WP (at the U.S./Canadian border in western Maine). This action would extend the route eastward from EBGIX, across the State of Maine, running north of the Millinocket, ME, VOR/DME, to the TUGUB, Canada, WP (located southeast of the Houlton, ME, VOR/DME) where it would rejoin the remainder of Q–864 into Canada. The EBGIX WP would be moved 1.16NM eastward to align with the U.S./Canadian border, and the TUGUB WP would be moved 1.23NM west to align with the U.S./Canada border. The amended Q–864 would extend between the EBGIX, ME, WP, and the TUGUB, ME, WP.

The proposed full descriptions of the above route changes are found in ''The Proposed Amendment'' section of this NPRM.

Domestic VOR Federal airways are published in paragraph 6010(a); United States area navigation routes are published in paragraph 6011; and Canadian area navigation routes are published in paragraphs 2007, and 6013; respectively, of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The VOR Federal airways and area navigation routes listed in this document would be subsequently published in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial

number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6010(a) Domestic VOR Federal Airways.

* * * * *

V–2 [Amended]

From Seattle, WA; Ellensburg, WA; Moses Lake, WA; Spokane, WA; Mulan Pass, ID; Missoula, MT; Helena, MT; INT Helena 119° and Livingston, MT, 322° radials; Livingston; Billings, MT; Miles City, MT; 24 miles, 90 miles 55 MSL, Dickinson, ND; 10 miles, 60 miles 38 MSL, Bismarck, ND; 14 miles, 62 miles 34 MSL, Jamestown, ND; Fargo, ND; Alexandria, MN; Gopher, MN; to Nodine, MN.

V–3 [Amended]

From Key West, FL; INT Key West 083° and Dolphin, FL, 191°radials; Dolphin; Ft. Lauderdale, FL; Palm Beach, FL; Treasure, FL; Melbourne, FL; Ormond Beach, FL; Brunswick, GA; INT Brunswick 014° and Savannah, GA, 177° radials; Savannah; INT Savannah 028° and Vance, SC, 203° radials; Vance; Florence, SC; Sandhills, SC; Raleigh-Durham, NC; INT Raleigh-Durham 016° and Flat Rock, VA, 214° radials; Flat Rock; Gordonsville, VA; INT Gordonsville 331° and Martinsburg, WV, 216° radials; Martinsburg; Westminster, MD; INT Westminster 048° and Modena, PA, 258° radials; Modena; Solberg, NJ; INT Solberg 044° and Carmel, NY, 243° radials; Carmel; Hartford, CT; INT Hartford 084° and Boston, MA, 224° radials; to Boston. From Presque Isle, ME; to Quebec, PQ, Canada. The airspace within R–2916, R–2934, R–2935, and within Canada is excluded.

* * * * *

V–14 [Amended]

From Chisum, NM; Lubbock, TX; Childress, TX; Hobart, OK; Will Rogers, OK; INT Will Rogers 052° and Tulsa, OK, 246° radials; Tulsa; Neosho, MO; Springfield, MO; Vichy, MO; INT Vichy 067° and St. Louis, MO, 225° radials; St. Louis; Vandalia, IL; Terre Haute, IN; Brickyard, IN; Muncie, IN; to Flag City, OH.

* * * * *

V–29 [Amended]

From Snow Hill, MD; Salisbury, MD; Smyrna, DE; DUPONT, DE; Modena, PA; Pottstown, PA; East Texas, PA; Wilkes-Barre, PA; Binghamton, NY; INT Binghamton 005° and Syracuse, NY, 169° radials; to Syracuse.

* * * * *

V–39 [Amended]

From Sandhills, NC, South Boston, VA; Gordonsville, VA; INT Gordonsville 331° and Martinsburg, WV, 216° radials; Martinsburg; Lancaster, PA; East Texas, PA; Sparta, NJ; Carmel, NY; INT Carmel 045° and Bridgeport, CT, 343° radials; INT Bridgeport 343° and Chester, MA, 223° radials; to INT Barnes, MA 265° and Chester 223° radials; From Augusta, ME; Millinocket, ME; Presque Isle, ME; Mont Joli, PQ, Canada, excluding the portion within Canada.

* * * * *

V–93 [Amended]

From Patuxent River, MD, INT Patuxent 013° and Baltimore, MD, 122° radials; Baltimore; INT Baltimore 004° and Lancaster, PA, 214° radials; Lancaster; Wilkes-Barre, PA; to INT Wilkes-Barre 037° and Sparta, NJ 300° radials. From INT Sparta 018° and Kingston, NY, 270° radials; Kingston; Pawling, NY; to INT Barnes, MA 265° and Chester 223° radials.

* * * * *

V–106 [Amended]

From Johnstown, PA; INT Johnstown 068° and Selinsgrove, PA, 259° radials; Selinsgrove; INT Selinsgrove 067° and Wilkes-Barre, PA, 237° radials; Wilkes-Barre; to INT Wilkes-Barre 037° and Sparta, NJ 300° radials.

George Gonzalez,

Acting Manager, Rules and Regulations Group.

[FR Doc. 2021–00655 Filed 1–15–21; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary of Transportation

14 CFR Parts 241 and 298

[Docket No. DOT–OST–2018–0132]

RIN 2105–AE45

Updates to the Origin—Destination Survey of Airline Passengers

AGENCY: Office of the Secretary of Transportation (OST), U.S. Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The Department is proposing to update the method of collecting and processing aviation traffic data in the Origin-Destination Survey of Airline Passenger Traffic (O&D Survey), as well as to expand the number of reporting air carriers, the sample size collected, and the scope of the data reported. These changes would align the current O&D Survey with modern industry business and accounting practices, enable cost savings, reduce burden through automation, and provide enhanced utility for users of the data. In addition, DOT is proposing to change the timing of the release of the Form 41, Schedule T–100(f) ''Foreign Air Carrier Traffic Data by Nonstop Segment and On-flight Market'' from a 6-month delay to a 3-month delay to match that of Form 41, Schedule T–100 ''Air Carrier Traffic and Capacity Data by Non-Stop Segment and On-Flight Market.''

DATES: Submit comments on or before March 19, 2021, 11:59 p.m. Eastern Time. The Department will consider late comments to the extent practicable.

ADDRESSES: To ensure that you do not duplicate your docket submissions, please submit all comments by only one of the following means:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* U.S. Department of Transportation, 1200 New Jersey Ave. SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001, between 9:00 a.m. and 5:00 p.m. ET, Monday through Friday, except Federal holidays.

Instructions: At the beginning of your comments, include the agency name, docket name, and docket number (DOT–OST–2018–0132) or Regulation Identifier Number (RIN) for this rulemaking (2105–AE45). All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Physical access to the Docket is available at the Hand Delivery address noted above.

Electronic Access and Filing: You can view this document by going to the Federal eRulemaking Portal: *http://www.regulations.gov* and search for docket DOT–OST–2018–0132. The website is available 24 hours each day, 365 days each year. Electronic submission and retrieval help and guidelines are available under the help section of the website. An electronic copy of this document is available for download from the Office of the Federal Register's home page at: *http://www.archives.gov/federal-register* and the U.S. Government Publishing Office's web page at: *https://www.gpo.gov/fdsys/.*

FOR FURTHER INFORMATION CONTACT: Mark Raggio, Office of Aviation Analysis, 1200 New Jersey Ave. SE, Room W86–470, Washington, DC 20590–0001, 202–366–1271 (phone) or *Mark.Raggio@dot.gov* (email).

SUPPLEMENTARY INFORMATION:

I. Background

A. Legal Authority

Section 429(b)(1) of Title 49, U.S.C., requires the Department to collect and disseminate information on the origin and destination of airline passengers including, at a minimum, information on: (1) The origin and destination of passengers in interstate air transportation, and (2) the number of passengers traveling by air between any two points in interstate air transportation. In addition, 49 U.S.C. 40101(a)(7) states that the Secretary shall respond to the needs of the public, including the airline industry, all levels of government, and airports, by disseminating information to foster a national air transportation system capable of meeting the present and future needs of U.S. commerce. In fulfillment of these responsibilities, DOT collects data submitted under:

- *14 CFR part 217:* Reporting Traffic Statistics by Foreign Air Carriers in Civilian Scheduled, Charter, and Nonscheduled Services, whereby foreign air carriers that are authorized by DOT to provide scheduled passenger services to or from the U.S. must file Form 41 Schedule T–100(f), accumulated in accordance with the data elements prescribed in § 217.5.
- *14 CFR part 241:* Uniform System of Accounts and Reports for Large Certificated Air Carriers, under which all large certificated air carriers must report their traffic movements by filing Form 41 Schedule T–100, Financials Information, and O&D fare information.
- *14 CFR part 298:* Exemptions for Air Taxi and Commuter Air Carriers, whereby air taxi operators and commuter air carriers, which are provided certain exemptions from some of the economic regulatory provisions of Subtitle VII of Title 49 of the United States Code, are required to submit simplified Financials and T–100 traffic.

In this rulemaking, the Department proposes to update its method of collecting and processing O&D fare information under part 241 to: (1) Allow full automation of the reporting of the O&D Survey by aligning it with current airline passenger accounting practices; and (2) enhance the accuracy and usefulness of DOT's collection of aviation traffic data.

B. Background on the O&D Survey

Currently, the O&D Survey, as outlined in 14 CFR part 241, Sec. 19–7, collects airline tickets from select air carriers,[1] ''O&D Survey Reporting Carriers,'' each quarter. The O&D Survey Reporting Carriers combine the information from tickets with the same itinerary and price into a summary record reported every 3 months. Under 49 U.S.C. 329(b)(1), the Department is obligated to collect and disseminate this information. There are many private and public stakeholders that depend on this data to make decisions on aviation business and policy. For example, this data is used by the industry to plan air services, develop commercial aviation

[1] 49 U.S.C. 40102(a)(2).

infrastructure, measure the economic impact of passenger flows, and create business plans for start-up airlines. The O&D Survey is also a primary source of information used to quantify and evaluate the effectiveness of Federal aviation policy and programs as well as to develop and implement new policies and infrastructure initiatives.

When the current rules for collection of the O&D Survey were established in the 1960s, the O&D Survey provided the best reasonably obtainable measure of passenger aviation activity. The mainframe technologies of the era dictated many aspects of the O&D survey business process and the elements selected for collection. A key driver of the process was that data storage was expensive in that era which resulted in a minimum of data elements being included. This meant more robust descriptive data, such as the time of arrival and departure, were not included in the collection. Because mainframes were centralized computing resources, the O&D Survey process was designed to route paper tickets to a centralized facility for processing and loading into the systems. In the intervening years, changes in airline business models and accounting practices enabled by technology improvements were not reflected in DOT's collection methodology, leading to a misalignment between the rules for reporting the information and current accounting practices that generally requires human intervention to reconcile differences and prevents O&D Survey Reporting Carriers from fully automating the system of data collection. The primary design issue that prevents current improvements is the regulatory requirement that the operating carrier that first touches the ticket is the carrier that has responsibility to report the ticket, known as the ''first reporting carrier rule.'' In the 1960s, this rule was selected because the most efficient process was physically to detach the ticket coupons as they were flown for each flight and send all the coupons to the centralized processing facility to be matched and combined with the relevant revenue information. Because the carrier that issued the ticket, which had all the necessary information on hand, often did not first touch the ticket, the carrier with the least amount of information was by rule responsible for reporting the ticket. Modern and decentralized E-ticket systems eliminate the need for a physical coupon matching process and enables more efficient reporting rules and access to more relevant data.

DOT has worked with representatives of the aviation industry trade association Airlines for America (A4A) to determine the best way to improve the methodology, collection, and utility of the O&D Survey. DOT is proposing this rule to reform and simplify the O&D Survey, principally by reorienting the reporting requirements so that air carriers report primarily information for tickets that they issue.

II. The Need To Modernize Current Data Collection Requirements

The data collected in the O&D Survey provides DOT with the information to help foster an air transportation system capable of meeting the present and future needs of commerce in the United States. However, the current O&D Survey methodology was designed based on accounting processes long abandoned by airlines, including manual accounting systems that often had handwritten records. As a result, the Survey's data collection methodology does not reflect today's decentralized and integrated industry-wide practices and technologies, and, in some cases, it is not capable of accurately documenting consumer behavior. For example, in today's environment, it is far more efficient for the carrier that issues the ticket to be responsible for reporting the ticket because it is the issuing carrier that has all the information about the ticket. Current process requires the operating carrier that flies the first coupon of the ticket to report and this is often not the issuing carrier. Because current reporting does not contain information about the length of stay at each intermediate point in a ticket, the system must impute the intended destination of round trip tickets. With the advent of large-scale connecting services, this has made the determination of intended destination less accurate. Though the Survey remains a unique and foundational pillar of industry economic analysis, its limitations create high levels of uncertainty in certain situations, such as identifying the true origin and destination of some passengers; the month of travel; and the portion of the total amount paid that is the revenue retained by the air carrier, as opposed to taxes and fees remitted to other government entities. By aligning the O&D Survey with current industry technology and integrated business process, this proposal would vastly simplify the reporting of appropriate data elements and increase the utility of the Survey to its users.

A. Changes in Airline and Consumer Behavior Since 1978

The way the airline industry markets and delivers air transportation services to the public changed significantly following the Airline Deregulation Act of 1978.[2] The 1978 Act enabled airlines to set their own fares, flight frequencies, and route structure. The current rules for the collection of ticket information were specifically designed to measure the relatively static air travel industry of the 1960s, when fares and flight frequencies were set by the Federal Civil Aeronautics Board and tended to be from a single point to a single point. The current O&D Survey data collection rules do not reflect the increasingly dynamic and complex business practices that have emerged since deregulation, including the development of hub-and-spoke systems, frequent flier programs, revenue management systems, internet distribution of tickets, and other industry-transforming innovations. For example, under the post-deregulation hub-and-spoke model developed by legacy air carriers, it became increasingly common to fly initially to a single, large ''hub airport'' where some passengers would change planes to complete their journey, while others remained on the same plane during intervening stop(s), known as a ''direct'' passenger flight. In the case of the ''direct'' passenger, the carriers would use a single ticket that identifies the origin and ultimate destination, but not the intermediate stop(s). Furthermore, in combination with these changes, new airline loyalty programs altered passenger ticket purchasing behavior; travelers in these programs were increasingly incentivized to take longer, indirect routes, often through an airline's large hub airport, that would allow them to accumulate more mileage-based loyalty points, exacerbating reporting issues, such as identification of the intended destination of travel, with the O&D Survey. The industry innovations forged after deregulation changed the fundamentals of airline competition, but the process used and the data DOT collects did not modernize concomitant with these changes.

B. Reevaluation of O&D Survey Burden and Data Quality

Considering these developments, DOT initiated a retrospective analysis of its aviation traffic reporting rules. The Department recognizes that there are concerns with the quality of the current O&D Survey, and that it is expensive

[2] Public Law 95–504.

and burdensome to collect, validate, and use. Collaborative discussion with A4A representatives revealed that there is a substantial hidden cost of compliance in reporting aviation statistics due to the difficulty in identifying and investigating problems that are often only revealed during post-submission quality control processing. The carriers are also often in the position of having to interpret how to stay in compliance with outdated rules that require them to deviate from their current accounting practices. For these reasons, the Department believes that the O&D Survey no longer meets the guidance outlined in OMB Circular A–130 [3] or the data collection standards of the Information Quality Act.[4] In addition, DOT identified instances in the reporting regulations that contribute to deficiencies in data quality. These deficiencies are often not observable until after the data from all the carrier submissions is combined during post-processing analysis. Moreover, ambiguity in the current regulation may lead O&D Survey Reporting Carriers to interpret reporting instructions differently, contributing to the degradation of the O&D Survey data quality and increasing the air carrier's reporting burden as they must review the suspected data and resubmit once the problem is found.

Furthermore, DOT determined that the collection and dissemination of the O&D Survey remains justified under the regulatory philosophy stated in Executive Order (E.O.) 12866, sec. 1(a) which is that ''the Federal Government should . . . promulgate regulations as required . . .'' It was also determined that, given its role and statutory duties, DOT is best positioned to collect uniform, accurate, and complete data on the Nation's civil aeronautics sector as well as ensure widespread dissemination of the collected data. Diverse public and private stakeholders, including air carriers, investors, and aircraft manufacturers, rely on this data to inform business decisions, infrastructure improvements, and aviation regulations or public policies. For example, the airline industry continues to use the O&D Survey to plan air services, develop commercial aviation infrastructure, measure the economic impact of passenger flows, and create business plans for start-up airlines. The data is also a primary source of information used to measure and evaluate the effectiveness of Federal aviation policy and programs, including by: (1) Improving international air services by seeking market liberalization, (2) ensuring the benefits of a deregulated, competitive domestic airline industry, and (3) developing policies to improve air service and access to the national air transportation system for small and rural communities. Furthermore, the Federal Aviation Administration (FAA) requires airports to use accurate aviation data for qualifying, planning, allocating, and monitoring of Airport Improvement Program (AIP) funds and to justify the need for Passenger Facility Charges (PFCs). The outdated and cumbersome O&D Survey methodologies impose excessive burdens on O&D Survey Reporting Carriers and diminish the data's utility to its users due to quality, objectivity, and completeness issues, and therefore requires modernization. In addition, ensuring universal participation across air carriers and collection of the best reasonably obtainable measurements of economic activity in the aviation sector requires updating the O&D Survey methodologies.

C. Meeting Reporting and Data Quality Demands

This proposed rule would modernize the O&D Survey to reflect current airline passenger behavior and revenue accounting practices, which allow air carriers to track the sale and the usage of every ticket sold, including through partner carriers. In doing so, the proposed rule would ensure that the O&D Survey meets the requirements and objectives of the Information Quality Act,[5] E.O. 12866, E.O. 13771, and OMB Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002.[6]

III. Development of the Proposed Rule

A. Prior Related Rulemakings

The Department initiated a retrospective analysis of its passenger traffic statistics on July 15, 1998, when DOT published an advance notice of proposed rulemaking (ANPRM),[7] requesting comment on a variety of issues related to aviation economic data collection.

On February 17, 2005, DOT published a notice of proposed rulemaking (NPRM) [8] as part of DOT's effort to revise the rules governing the nature, scope, source, and means for collecting and processing aviation traffic data as well as modernize the collection, processing, and dissemination of this data. While there was considerable support for these changes among stakeholders, the comments from the airlines indicated that the burdens of reporting the data would be unacceptably high relative to the current collection. The 2005 proposal to collect all relevant data on the ticket was overly broad and too costly to implement. The Department withdrew the proposal on June 1, 2011, stating that the proposed approach did not adequately address some issues, including measures that could both enhance the utility, integrity, and accuracy of the data and reduce the cost of reporting. The current proposal, by comparison, is more narrowly tailored to address specific well-known quality problems that have been identified by both producers and users of the data over a long period of time, maintains the same data structure of the current reporting allowing for reuse of as much of the existing infrastructure as possible, removes elements that are no longer required, adds new useful elements, and improves reporting rules.

B. Summary of Modifications Suggested by the Industry

This proposed rule renews DOT's effort to revise its aviation statistical reporting process. In an October 5, 2015, letter to DOT, A4A recommended changes to the reporting regulation that would increase the utility and accuracy of the data while simplifying reporting. Representatives of A4A notified DOT that their members favored updating the rule governing the collection of the O&D Survey under prescribed circumstances. A4A identified changes to reporting that would increase the utility of the data and, at the same time, simplify reporting. These proposed changes were reflective of numerous interactions related to the data collection between government and industry over many years. The series of ideas that stemmed from this collaboration are listed below.

Methodology Changes

(1) Change the responsibility of reporting tickets from the First Reporting Carrier Rule to the Issuing Carrier; [9]

[3] Circular A–130 requires DOT to take affirmative steps to ensure data quality objectivity and utility of Federal statistics before disseminating them and notes that public and private resources are allocated inefficiently when uncertainty is introduced due to inexact or incorrect data.

[4] Public Law 106–554 Section 515 charges Federal agencies with a responsibility to produce the best reasonably obtainable scientific and economic information available to measure the impact of their regulatory responsibilities.

[5] Public Law 106–554, sec. 515.

[6] 72 FR 33362 (June 15, 2007).

[7] 63 FR 28128.

[8] 70 FR 8140.

[9] The current regulation places the reporting responsibility on the first O&D Survey Reporting Carrier in the sequence of travel for a ticket. The

(2) Classify all Certificated air carriers and commuter air carriers holding out scheduled passenger service as O&D Survey Reporting Carriers by removing the exemptions from reporting given to U.S.-based air carriers and commuter air carriers with a business model that limits them to flying aircraft with fewer than 60 seats;

(3) Refrain from requiring foreign air carriers to report O&D Survey data, other than foreign air carriers granted anti-trust immunity under 49 U.S.C. 41308 and 41309; instead, the responsibility to report tickets issued by a foreign air carrier (that does not submit data under 49 U.S.C. 41308 and 41309) should remain with the O&D Survey Reporting Carrier that appears first in the travel sequence of the ticket;

(4) Change the period of reporting from quarterly to monthly;

(5) Increase the sample size to 40% of airline tickets so that the sample size is statistically valid for measuring travel to small and rural communities; and

(6) Shorten time lag for the release of T–100(f) data from the current 6 months to 3 months, consistent with the release of T–100 Domestic data. Historically this time lag has existed because of technological and business practice limitations.

New Data Items To Be Collected

(1) ''Dwell Time,'' an indication of the hours that the passenger spends at an airport between their arriving and departure flights;

(2) ''Via Airport,'' an entry for airlines to report hidden airports or ''via'' airports where a passenger lands, but does not necessarily deplane;

(3) ''Total Tax,'' a value of the total taxes and government-imposed fees collected for each ticket, to distinguish this value from the Total Amount of the fare collected;

(4) ''Travel Year and Month,'' to include a field detailing the year and month the passenger travels for each segment of travel;

(5) ''Exchanged Ticket Indicator,'' alerting data users that a reported fare may not comport with the reported itinerary; and

(6) ''Reporting Record Identifier,'' facilitating easier record identification by the O&D Survey Reporting Carrier when correcting tickets reported with errors.

proposed regulation will place the reporting responsibility on the carrier that issued the ticket. It is the carrier that issues the ticket that will have the most information about the ticket.

Data Items the Department Proposed No Longer Be Collected

(1) The fare class the passenger uses on each of the flights;

(2) The cabin class the passenger uses on each of the flights; and

(3) The date of ticket purchase.

In November 2015, the Airline Tariff Publishing Company (ATPCO), the leading distributor of airline fares and airline fare information for the industry notified DOT that it had the ability to report the proposed restructured O&D Survey as envisioned by A4A and DOT and that ATPCO could offer that capability as a third-party service to airlines.

C. Goals and Objectives of This Regulatory Action

The Department established the following objectives for this rulemaking: (1) Reduce the long-term reporting burden on the O&D Survey Reporting Carriers; (2) make the O&D Survey more relevant and useful to airlines, aviation policy makers, researchers, and stakeholders; (3) obtain more accurate ticket data from a broader group of air carriers and markets; (4) reduce the time it takes to disseminate the O&D Survey and the T–100(f); and (5) increase the statistical correlation between the O&D Survey and the T–100/T100(f) for data validation purposes. Taken together, this proposed rule would alleviate unnecessary regulatory burdens placed on the American people and businesses.

IV. Proposed Changes to the Collection of Data

The Department proposes the following modifications to its collection of scheduled passenger aviation data:

D. Altering the Reporting Framework

The general process for reporting O&D data is to collect the ticket information once there is an indication that the ticket has been flown, combine all the ticket coupons to determine all the points flown and the sequence of travel on the ticket, and integrate the flown information with revenue information related to the price the consumer paid for the ticket.

1. Selection of Tickets to Report

a. Making the Ticket the Basic Unit of Reporting

This proposed rule would give O&D Survey Reporting Carriers the responsibility for reporting a ticket when it is the Issuing Carrier for that ticket, relieving air carriers of the responsibility to report any ticket issued by another O&D Survey Reporting Carrier. Under the proposed rule, Issuing Carriers would know when a coupon from one of their tickets is used for transportation by any other air carrier on the ticket, triggering a Reporting Event. Moving the responsibility to report to the Issuing Carrier would simplify the reporting process by establishing one identifiable air carrier that has all the information on a ticket and is responsible for reporting the ticket. These types of tickets will account for the majority of reported tickets. Tickets issued by an O&D Survey Reporting Carrier would be referred to as ''Category One Tickets.''

In addition to Category One tickets, tickets may be issued by air carriers who would not fall under the new definition of O&D Survey Reporting Carriers; however, those tickets may still present information that should be recorded. The proposed rule would continue to require each O&D Survey Reporting Carrier to report these encountered tickets issued by Non-O&D Survey Reporting Carriers. These tickets would be referred to as ''Category Two Tickets.'' Category Two Tickets would require a process for recognizing a Reporting Event that is different than that for Category One Tickets. The proposed Category Two reporting process would be like the existing process, but the expected volume of Category Two Tickets will be significantly less under this proposed rule due to the expansion of the pool of O&D Survey Reporting Carriers and the Category One reporting rule, which will have primacy.[10]

The Department recognizes that it could eliminate Category Two Tickets, and therefore the associated burden of reporting these tickets, by requiring all foreign air carriers providing scheduled service to the United States to submit O&D Survey data. The Department, therefore, seeks comment on whether to require all foreign air carriers providing scheduled service to the United States submit O&D Survey data.

b. Increasing Sample Size to 40 Percent

This proposed rule would increase the number of passenger tickets air carriers are required to report, which would create a statistically valid sample for meaningful analysis of smaller markets that is not available under the current O&D Data collection. The current sample size of 10 percent is only sufficient for analyzing large markets and the national air transportation

[10] For evaluating Category 2 tickets, foreign air carriers that have been granted Antitrust Immunity under 49 U.S.C. 41308 and 41309 will be responsible for reporting Eligible Tickets they issue and U.S. air carriers will no longer have to report these.

system at a broad level. Studies indicate that a 40 percent sample is sufficient to allow proper evaluation of small aviation markets, and so the Department is proposing to increase the number of passenger tickets are required to report to 40 percent.[11] The ability to measure small markets is important to air carriers and to policy makers in order to monitor the effectiveness of Federal dollars spent in programs such as the Essential Air Service (EAS) and the Small Community Air Service Development Program (SCASDP), that are designed to ensure that small and rural communities have access to the national air transportation system. The 40 percent sample, in combination with expanding the universe of O&D Survey Reporting Carriers, would substantially improve the ability to measure smaller markets accurately.

c. Providing an Unbiased Sample Selection

The proposed rule would designate the final, right-most digit of the standard ticket document number as the basis for the new, random sample size. Analyses by DOT suggest that the final digit of a ticket number does not pertain directly to any particular type of passenger or journey, and every digit (0–9) has an equal probability of appearing. This method ensures that the random sampling of 40 percent of Eligible Tickets for the O&D Survey would be truly unbiased and random, protecting the validity and integrity of the data.

Any O&D Survey Reporting Carrier that does not assign ticket numbers to passenger journeys or does not assign ticket numbers such that the final, right-most digit is not randomly assigned would be required to develop an alternative method of creating a valid 40 percent sample. Those O&D Survey Reporting Carriers would need to submit their alternative sample methods to DOT for approval within 90 days of the date that the O&D Survey Reporting Carrier recognizes that it must make use of the alternative sample selection method to comply with the proposed reporting regulation for determining an Eligible Ticket.

2. Removing the Requirement for Summarization

Under the proposed rule, O&D Survey Reporting Carriers would report individual tickets as separate records, rather than aggregating tickets with identical characteristics into a single reporting record. Currently, the number of tickets in each grouping is tracked and reported as a passenger count. This process was initially instituted because the cost of data transmission and storage exceeded the cost of processing the records into summarized records. However, due to significant advances in data transmission and storage technology, any such savings are now minimal. The process of grouping and summarizing similar tickets into one summary reporting record creates an additional, unnecessary step for the O&D Survey Reporting Carriers, and is inconsistent with modern revenue accounting practices. Combining the tickets also increased the difficulty of correcting the occasional, inevitable mistakes that arise in reporting to the O&D Survey because the individual records that cause the problem are not identifiable in the summary record that is provided.

E. Modification to O&D Survey Reporting Carriers

The proposed rule would simplify the identification of the air carriers responsible for reporting a ticket, correcting the current onerous and burdensome process. It would also all but eliminate the need for an air carrier that may not have information on a ticket in its internal systems to obtain the information from other sources outside its normal business process.

1. U.S. Air Carriers[12] as O&D Survey Reporting Carriers

The proposed rule would require that all U.S. air carriers that hold either a certificate of public convenience and necessity for scheduled passenger air transportation pursuant to 49 U.S.C. 41102 or that hold a Commuter Air Carrier Authorization pursuant to 14 CFR part 298 and that hold out a schedule and issue tickets for scheduled passenger air transportation be considered O&D Survey Reporting Carriers for the O&D Survey. This proposed rule would require all O&D Survey Reporting Carrier to submit O&D Survey data to capture travel in markets served by all types of air carriers. However, by making the reporting regulation compatible with industry accounting structures, DOT expects this reporting would add minimal additional burden to affected air carriers. Carriers would only report tickets that satisfy the reporting criteria. In most cases, air carriers operating as contract lift providers (*i.e.,* code-share branded regional partners) would not have to report tickets. If necessary, DOT would work with outside third-party vendors, such as ATPCO, to make data collection and reporting services available to all O&D Survey Reporting Carriers. The Department seeks comment on whether any further accommodation is necessary for these smaller air carriers.

2. Foreign Air Carriers That Are Not O&D Survey Reporting Carriers

Under the proposed rule, foreign air carriers would not report passenger O&D data under 14 CFR part 241, Sec. 19–8, which is consistent with current reporting requirements. However, foreign air carriers would still need to report data as required by a grant of antitrust immunity under 49 U.S.C. 41308 and 41309, which represent a separate set of reporting regulations. O&D Survey Reporting Carriers will determine if a foreign air carrier that reports under 49 U.S.C. 41308 and 41309 issued a ticket, and if so, the O&D Survey Reporting Carrier will not be responsible for reporting the ticket.

3. O&D Survey Reporting Carriers List

The proposed rule would require that DOT post the O&D Survey Reporting Carriers List one month in advance of its monthly effective date to ensure that O&D Survey Reporting Carriers are aware of all updates and give the O&D Survey Reporting Carriers time to update their internal processes to comply with reporting requirements.[13] For example, an update to the list posted January 31st would be effective for reporting beginning in March. The O&D Survey Reporting Carriers List would be updated as soon as administratively possible when an O&D Survey Reporting Carrier becomes qualified or is disqualified as an O&D Survey Reporting Carrier.

F. Increasing the Frequency of Reporting

The proposed rule would require O&D Survey Reporting Carriers to report data monthly instead of the current quarterly reporting period. Information would have to be reported to the Department no later than 45 days after the last day of a reporting month. This would make the data available to stakeholders on an

[11] Statistical analyses by Michael Wittman (Michael D. Wittman, *A Note on the Use of U.S. DB1B Passenger Ticket Data for Estimating Airfares in Thin Airline Markets or Small Airports,* Massachusetts Institute of Technology), and Eric Amel (Eric Amel, *Report on the Results of Different Sampling Rates on the Reliability of the US DOT O&D Survey,* Compass Lexecon, May 18, 2015) are available in the Docket.

[12] 49 U.S.C. 40102(a)(2).

[13] Domestic air carriers may change their business model from one of only providing contract lift, not holding out scheduled air service and not issuing tickets, to selling their own services. When this occurs, the carrier will need to be added to the O&D Survey Reporting List. The same may happen in reverse requiring a carrier to be removed from the list. This same process applies to foreign air carriers immunized under 49 U.S.C. 41308 and 41309. They may also be added or removed from the list depending on their immunity status.

expedited basis compared to the existing quarterly reporting and enables users to validate it against other data disseminated monthly, such as the T–100.

G. Expanding Data Elements Collected

Through discussions with A4A, the Department determined the expanded data elements selected below are already collected and maintained by industry and therefore are minimally burdensome to collect. The Department may expand or change the regulatory language to include further definition of the requirements for submission, subject to the comments received for the final rulemaking.

1. Reporting Scheduled Year and Month of Travel

The proposed rule would require the O&D Survey Reporting Carriers to report the scheduled year and month of departure of each flight coupon. Providing this level of granularity would increase the utility of the O&D Survey by enabling users to, for example, better compare economic activity in the aviation sector against other measures of economic activity in the economy that are reported monthly, or with other aviation traffic data collected by DOT. Including month of travel also would make it easier to validate the submissions against other data sources, such as the T100 and T–100(f). Data in the O&D Survey currently cannot properly support a direct comparison to 3 months of T–100/T–100(f) data because the current survey reporting includes data with travel dates outside of the three months of the quarterly O&D reporting window that cannot be identified in the collected data; therefore, the data cannot be accurately segmented on specific time periods for comparison with the T–100 or T–100(f).

2. Reporting All Airports in the Itinerary Including Via Airports

The proposed rule would require reporting of Eligible Tickets to include all airports wherein the passenger is scheduled to travel, even when the passenger does not deplane. Whereas most tickets document travel that consists of flight coupons with one aircraft take-off and one aircraft landing, sometimes the passenger is on a flight that lands at an airport but the passenger remains on board. This airport is not expressly identified in the ticket, and is generally referred to as a ''via'' airport. The current rules of the O&D Survey do not allow for the reporting of ''via'' airports. Collecting this information would enable data users to understand better how passengers travel through various airline networks, and would provide the necessary information for relating T100/T100(f) segment data directly to O&D Survey information.

Identifying the ''via'' airports, currently hidden in an itinerary, requires knowledge of the flight number, because each flight number has its own unique routing, as well as the date of the scheduled travel, because schedules change within monthly boundaries and some flight number schedules change by day-of-week (*e.g.,* differing weekday and weekend flight itineraries). The Department is not proposing to require the reporting of flight number and flight date. Instead, DOT proposes that the O&D Survey Reporting Carriers report the ''via'' airport in a ''Via Airport'' field because the O&D Survey Reporting Carrier knows the flight number and flight date while the Department does not.

3. Reporting Dwell Time

The proposed rule would assist DOT in creating a more accurate record of the passenger's intended destination (*i.e.,* true O&D) by requiring O&D Survey Reporting Carriers to report the number of hours elapsed between the passenger's arrival at an airport on a flight and the passenger's departure from the next airport in the tickets travel sequence. The standard measure of continuity of a journey in the industry is time between flights at an airport, or ''dwell time.'' Reporting ''dwell time'' would enable users to make an accurate determination of when a passenger has reached a destination versus when the passenger is simply waiting for a connecting flight to the intended destination. For example, when a passenger stays only an hour or two at an airport, the airline assumes that this airport is not an intended destination but, instead, the passenger was only at that airport to travel onward to an intended destination.

As the O&D Survey Reporting Carrier knows the flight dates and flight times on an individual ticket, the Department proposes that the O&D Survey Reporting Carriers report in one hour increments the number of hours elapsed between a passenger's arrival and the passenger's departure from an Airport, rounding up to the nearest whole hour. This measure of time would be reported as a new element, ''Dwell Time.''

4. Reporting an Exchanged Ticket Indicator

The proposed rule adds a new element, the ''Exchanged Ticket Indicator,'' to notify O&D Survey data users that a ticket may warrant further examination. The proposed rule would continue to require that tickets issued in exchange for unused coupons of a previously issued ticket be reported. For Exchanged Tickets, the user of the data would be alerted that the value reported as the Total Amount may include a form of payment from unused coupons of a previously issued ticket.

5. Reporting a Frequent Flyer Program Ticket

The Department seeks comment on whether O&D Survey Reporting Carriers should report whether a ticket was purchased in part or in whole by redemption through a Frequent Flyer Program (FFP). The user of the data would be alerted that the value reported as the Total Amount may include a form of payment by redemption of FFP miles or points.

6. Reporting Total Amount and Tax Amount

The rule proposes adding a data element for the ''Tax Amount'' to understand the effect of government policy on aviation and allow data users the ability to separate taxes paid from the total fare. The rule also proposes to rename the currently reported element ''Total Dollar Value'' to ''Total Amount.''

a. Total Amount

The proposed rule would keep the reporting element ''Total Dollar Value'' but change the name of the reporting element to the industry standard term ''Total Amount'' and clarify the instructions for populating the data element. For all Eligible Tickets, the O&D Survey Reporting Carrier would report the Total Amount paid for the ticket that was mandatory for the passenger to board the aircraft. The Department proposes that the Total Amount would include all mandatory carrier-imposed charges and government-imposed fees and taxes. Carrier-imposed charges, which are variously described as fuel surcharges, ticketing, check-in, seat, or other fees or charges that are mandatory, that a passenger must pay to board the aircraft would be included. In addition, the amount of non-airline imposed taxes and fees for the ticket would be included. The Total Amount would not include charges for optional or ancillary services such as baggage fees, premium seat fees, or ticket change fees. For example, if a consumer can choose a no-cost seat or seating category, but chooses to purchase a particular seat or seating category, that fee should not be included. However, if a passenger has a

choice of seats or seating categories, but there is a cost associated with all the options and the consumer must pay a fee regardless of which option is chosen, the fee is mandatory and that fee should be included in the total cost of the ticket. Regarding mandatory ticket purchase fees, if the passenger must pay a fee the amount of which depends on the outlet from which the ticket is purchased (*e.g.,* one fee for online purchases, a slightly higher (or lower) fee for telephone purchases, and a slightly lower (or higher) fee for purchases at the ticket counter), payment of one of those fees is mandatory, and the fee paid by the passenger should be reported. However, if there is an outlet for which there is no ticket fee (*e.g.,* online purchases) and the only additional purchase fees are for tickets purchased via the airline's disfavored outlets, such as telephone or in-person sales, then the fee is not mandatory and would not need to be included in the ''Total Amount'' reported to the Department.

The Department seeks comment on whether an ''optional'' ticket purchase fee collected from most tickets sold by a carrier should be included in the Total Amount of the ticket. For example, if there is a disfavored outlet, such as in-person sales, for which there is no ticket fee, but a ticket fee is collected from tickets sold from the outlet a majority of passengers use (*e.g.,* online purchases), should this fee be included in the Total Amount of the ticket? If yes, what should the threshold be—greater than 50 percent of tickets sold?

When reporting Category Two Tickets, the O&D Survey Reporting Carrier may not have access to the accounting system of the Issuing Carrier. However, because ticket information is routinely shared between air carriers and foreign air carriers when transporting shared passengers, it can be expected that the O&D Survey Reporting Carrier would report as accurately as possible the Total Amount based on the information shared by the Issuing Carrier.

b. Tax Amount

The proposed rule would create a new reporting element, ''Tax Amount.'' Along with informing tax policy, this change would allow users of the data to determine the actual passenger revenue retained by an airline. For Category One Tickets, the O&D Survey Reporting Carrier would report the aggregate of fees and taxes imposed by external entities (*e.g.,* airport operating authorities and government jurisdictions) and paid by the passenger as the Tax Amount, and would exclude all carrier-imposed fees.

When reporting Category Two Tickets, the O&D Survey Reporting Carrier may not have access to the accounting system of the Issuing Carrier. However, since ticket information is routinely shared between air carriers and foreign air carriers in the normal course of business when transporting interline passengers, it can be expected that the O&D Survey Reporting Carrier would report as accurately as possible the Tax Amount based on the information shared by the Issuing Carrier.

An alternative approach would be to require that the O&D Survey Reporting Carrier report all taxes and non-carrier fees separately, instead of the current proposal to aggregate the taxes and fees into one lump sum. The Department seeks comment regarding the utility to users and additional burden to O&D Survey Reporting Carriers of reporting individual tax and fee amounts instead of reporting the aggregate amount of taxes and fees.

c. Currency and Fractions of a Dollar

The rule proposes all amounts would be reported in United States Dollars (USD), rounded to two decimal places. The rule does not propose to impose a uniform methodology for the conversion of foreign currency to USD. O&D Survey Reporting Carriers would, however, be expected to use a currency conversion methodology that is generally accepted within the industry.

7. Record Identification Number

The rule proposes the creation of a unique Record Identification Number (Record ID) generated by the O&D Survey Reporting Carrier for each Eligible Ticket submitted to the O&D Survey. This would allow the Department to communicate precisely to the O&D Survey Reporting Carrier any records that may have missing or incomplete data elements, or are otherwise flagged for review. The Department seeks comment on how to standardize the format of the Record ID by incorporating helpful elements, such as the month and year of travel, plate code of the O&D Survey Reporting Carrier, ticket number, or origin/destination, while at the same time preserving the number as a unique record identifier.

8. Removal of Fare Basis Code

The Department seeks comment on whether to cease reporting the Fare Basis Code as currently collected, the usefulness of such a data element, and how this data element could be revised to minimize the burden on O&D Survey Reporting Carriers. Currently, O&D Survey Reporting Carriers must map their fare types to a standard set of government-defined definitions that do not always match well with their business model-specific products, resulting in inconsistent fare basis codes being assigned across carriers. Ceasing to report Fare Basis Codes would also decrease the burden on the O&D Survey Reporting Carriers. Alternatively, the O&D Survey could collect fare class or a replacement data element instead, such as cabin class of ticket purchased. The Department believes that such a data element would prove useful to a variety of industry stakeholders, and would also allow users of the data to segment average fares.

V. Proposed Changes to Dissemination of Data

A. Changes to Dissemination of O&D Survey Data

By collecting data on a monthly basis, instead of quarterly, this proposed rule would allow DOT the ability to disseminate the O&D Survey statistics more frequently. The Department, however, must balance the value of providing timely information to stakeholders with the need to protect the business confidentiality of the air carriers. Currently, O&D Survey data is typically released 90 days from the end of the reporting quarter. The Department proposes withholding the O&D Survey monthly data for a minimum of 60 days from the end of the Reporting Year and Month. DOT seeks comment on the appropriate amount of time to withhold data from dissemination that would still protect the competitive interests of the air carriers.

Another data dissemination issue is the restrictions placed on the release of domestic carrier-submitted itineraries with foreign origin and destination points in the O&D Survey to non-U.S. citizens. Currently, because data covering the operations of foreign air carriers that is similar to the information collected in the O&D Survey is not available, international itinerary data in the Passenger Origin-Destination Survey is not generally disclosed because of the potential damaging competitive impact on U.S. carriers and the adverse effect upon the public interest that would result from unilateral disclosure of data related to foreign markets (14 CFR part 241, Sec. 19–7(d)). The disclosure policy identifies exceptions for government interests and for air carriers contributing data to the O&D Survey. The international travel data is available to persons upon a showing that the

release of the data will serve specifically identified needs of U.S. users which are consistent with U.S. interests (14 CFR part 241, Sec. 19–7(d)).

The Department is not contemplating a change to its policy regarding the release of international travel data; however, DOT proposes adding the descriptor ''citizens and non-citizens'' to the other persons offered an opportunity to receive the data based on specifically identified needs and consistency with U.S. interests. The Department seeks comment on the advisability of this clarification of language, and whether to grant non-citizens access to the O&D Survey data under these circumstances. Finally, DOT seeks comment on whether to replace the phrase ''specifically identified need'' with a defined list of permissible, specifically identified needs that would be codified in the regulation, and, if so, what that defined list should include.

All itineraries that contain a foreign point and involve a U.S. O&D Survey Reporting Carrier in the itinerary, regardless of whether a domestic or foreign air carrier reports it, would continue to be made available under the disclosure policy discussed above.

B. Changes to Dissemination of T–100/T–100(f)

The Department is considering shortening the time that it withholds public release of the T–100(f). Such a change would not only expedite public access to O&D Survey data, but it would also make the T–100(f) release more consistent with T–100 domestic data by having each released on the same schedule. This would simplify the process of using DOT's aviation data products by making it easier to harmonize domestic and international planning tasks. Considering the increased utility of the data in the O&D Survey, DOT is requesting comment on shortening the time that T–100(f) is withheld from the current 6 months to 3 months.

VI. Complete List of Elements To Report

Below is the proposed list of all elements that would be reported in the O&D Survey. Elements marked with an asterisk (*) indicate new or significantly changed elements. Elements for each submitted report would be submitted only once with each report; elements for each submitted ticket would be submitted once for each ticket; and elements submitted for each airport in the ticket sequence of travel would be submitted once for each airport in the sequence of travel.

A. Elements for Each Submitted Report

- *O&D Survey Reporting Carrier Identifier:* The two-character International Air Transport Association (IATA) identifier of the air carrier that reports the ticket.
- *Reporting Year:* Year in which a coupon in a ticket is used for air transportation for the first time.
- *Reporting Month:** Month in which a coupon in a ticket is used for air transportation for the first time.

B. Elements for Each Submitted Ticket

- *Record Identification Number:** A unique number assigned by the O&D Survey Reporting Carrier to each Eligible Ticket submitted to the O&D Survey, allowing DOT to precisely communicate to the O&D Survey Reporting Carrier any records that may have missing or incomplete data elements, or are otherwise flagged for review.
- *Issuing Carrier:** The two character IATA/DOT identifier of the air carrier or foreign air carrier that issued the ticket.
- *Total Amount:* The gross total of funds collected on a ticket by the Issuing Carrier for the transportation of a passenger, inclusive of taxes and fees imposed by non-carrier entities or air carriers, and exclusive of ancillary fees not required to board the plane charged by the air carrier.
- *Tax Amount:* The* portion of the Total Amount that is imposed by and remitted to a non-air carrier entity, such as a government. This value may also include airport-imposed taxes or fees assessed by privately operated airports.
- *Exchanged Ticket Indicator:** A record indicator when at least one form of payment for the ticket is one or more Coupons of a previously issued ticket.

C. Elements for Each Airport in the Ticket Sequence of Travel

- *Airport:* The IATA/DOT airport code of the station in the ticket's sequence of travel that represents the point of embarkation for the flight segment indicated by Operating Carrier, Marketing Carrier, Scheduled Flight Year, Scheduled Flight Month. The elements Dwell Time, and Via Airport would apply to this Airport.
- *Operating Carrier:* The IATA/DOT designator code for the air carrier or foreign air carrier whose aircraft are used to operate from the subject airport.
- *Marketing Carrier:* The IATA/DOT designator code for the air carrier or foreign air carrier which marketed the seat on the aircraft that is scheduled to depart that appears on the flight segment for the subject airport. In the case of a Franchise (contract lift) or Marketing Codeshare, the Operating Carrier would be different than the Marketing Carrier.
- *Scheduled Flight Year:** Departure year in which the flight is scheduled to depart the subject Airport.
- *Scheduled Flight Month:** Departure Month in which the flight is scheduled to depart the subject Airport.
- *Dwell Time:** A value that describes the time reported in one hour increments between the time a passenger arrived at the subject airport and departed from the subject airport. When an itinerary shows that the passenger arrives at an airport that is different from the departure airport (*i.e.,* there is a surface segment in the itinerary), the Dwell Time would still report the elapsed time between arrival and departure by air.
- *Via Airport(s):** Any points of scheduled stopover or connection at airports as part of a ''direct'' or ''through'' flight.

VII. Implementation and Compliance Date

The Department proposes that the compliance date for these improvements to the O&D Survey would be no earlier than one year from the publication of the final rule. The Department envisions the submission of 12 months of data under Sec. 19–8 for testing and validation as sufficient to resolve any problems that may arise in the submission and processing of data. DOT seeks comment on what a reasonable compliance date would be based on the scope of the proposal in this NPRM.

Carriers would continue to report under Sec. 19–7 until such a time that it is determined by DOT that testing and validation of data submitted under Sec. 19–8 is complete and suitable to replace data collected under Sec. 19–7 as the statistics of record. The Department seeks comment on this reporting requirement.

VIII. Regulatory Analysis and Notices

A. E.O. 12866 (Regulatory Planning and Review), E.O. 13563 (Improving Regulation and Regulatory Review), E.O. 13771 (Reducing Regulation and Controlling Regulatory Costs), and DOT Regulatory Policies and Procedures (49 CFR Part 5)

This rulemaking is not considered a significant regulatory action under section 3(f) of E.O. 12866,[14] as supplemented by E.O. 13563,[15] which define a significant regulatory action as one that is likely to result in a rule that may have an annual effect on the

[14] 58 FR 51735; September 30, 1993.

[15] 76 FR 3821; January 21, 2011.

economy of $100 million or more or adversely affect, in a material way, the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The impact on the economy would be less than $100 million; it would create no conflicts with actions taken by other agencies; it would not alter budgetary impacts of entitlements, grants, fees, or loans; nor would it raise any unusual legal or policy issues.

This proposed regulatory action would modify an existing regulation and is expected to result in cost savings to producers and users of the data as well as to the Federal government. The proposed action is also expected to result in benefits to users of the data, including the O&D Survey Reporting Carriers themselves.

1. Cost Savings

The net costs of the proposed rule were determined by comparing the costs of the existing system to the projected costs with the proposed modification. The Department's analysis identified three primary categories of potential cost reductions:

- Cost reductions to data producers: The reduction in the costs of producing information for government reporting, due to technological simplification of data processing and submission.
- Cost reductions to the government: The reduction in costs to edit, manipulate, and validate the O&D data for release.
- Cost reductions to the public/users of the data: The reduction in time that users must spend applying specialized analytical skills to manipulate and adjust the data to account for current deficiencies in the Origin and Destination Survey.

Cost reductions to data producers include costs for accounting and auditing clerks, computer systems analysts, and computer programming analysts that are part of the ongoing production of data by the air carriers. Labor rates were taken based on Bureau of Labor Statistic's Standard Occupational Classification (SOC) and hours were estimated based on industry input for current operations. Average cost per airline based on the labor rates and estimated hours was then calculated, and this was multiplied by the expected number of carriers that will report over a 10-year timeframe. The ''as is'' costs were then compared to the ''to be'' costs that would be achieved under the proposed rule. The ''to be'' costs include the transition costs from the current system to the new system as well as an ongoing cost estimate for the processing of the data by a third-party fee-for-service provider. ATPCO, the leading distributor of airline fares and airline fare information, notified DOT that it can create software to assemble the O&D Survey report for any air carrier that exchanges ticket information using their services. ATPCO is a non-profit industry consortium that provides tariff services and other ticket-related services to air carriers and foreign air carriers ''at-cost.'' ATPCO's shared software would relieve air carriers from the cost of maintaining separate systems, each of which carries attendant secondary expenses for training and technical maintenance. This option would not only simplify the information technology operations, but also amortize the cost of creating and maintaining the software. Therefore, upfront costs resulting from this proposed action are expected to include the expenses related to developing, installing, and maintaining an automated reporting system. These upfront costs have been accounted for as ongoing payments to a third-party provider.

Cost reductions to the government include systems investment costs and ongoing production costs. Labor rates were taken based on Bureau of Labor Statistic's Standard Occupational Classification (SOC) and hours were based on estimates provided by the Bureau of Transportation Statistics (BTS), the agency responsible for the current processing. The ''as is'' comparison assumed the use of existing infrastructure while the ''to be'' assumed a 2-year development and implementation window as well as ongoing production costs.

Cost reductions to the public/users estimated for the ''as is'' total hours users of the data spend on computer systems analysts to further prepare the data and the number of hours an analyst may take to perform final data quality procedures that must be done to ensure clean data for final analysis outputs. The comparison ''to be'' calculation includes an estimated investment cost for creating processes for the new data prior to its release to public/users.

All costs were estimated over 10 years and discounted at a 7 percent rate.

SUMMARY OF COST SAVINGS

Stakeholder	Costs under the current regulation	Costs under the proposed regulation	Cost savings
Regulated Entities (Data Producers)	$8,355,747	$7,458,801	$896,946
Government	18,127,583	10,912,800	7,214,783
Public (Data Users)	2,452,586	196,613	2,255,973
Total Cost Savings (10 years @7% Discount Rate)			*10,367,702*
Annualized Cost Savings			*1,476,128*

This analysis finds that the proposed modification would result in annualized cost savings of approximately $1.5 million at a 7 percent discount rate.

2. Implementation and Transition Costs

To comply with the proposed revised O&D Survey, a certain investment is likely necessary by data producers. The proposed modification would simplify the design of the O&D Survey sufficiently, allowing for third-party providers to create fee-for-service software that would produce the Survey reporting records for all air carriers.

3. Benefits to Users of the Data

Users of the data include both air carriers and industry-related entities, such as airports, manufacturers, researchers, and investors, who often cite the O&D Survey as one of the most critical datasets used to formulate short- and long-term business plans and forecast industry trends. Improving the quality of the O&D Survey data would also yield several other unquantified benefits to users of the data, including:

- Reporting the Dwell Time between flights would help reduce the

difficulties and potential errors associated with determining when a passenger has reached a destination (''Trip Break'') and when the passenger is simply waiting for a connecting flight to the intended destination.

• Reporting all the cities in the itinerary would better align O&D Survey data with the T–100, removing much of the uncertainty in market validation analysis. This would allow the T–100 to facilitate validation of O&D Survey data submissions.

• Reporting a larger sample size to capture small and rural markets with the statistically significant equivalence of larger markets would reduce the need to make much less accurate manual statistical adjustments as well as increase the accuracy of data available for the analysis of small markets.

• Differentiating the amount of tax collected from the amount of total fare collected would remove uncertainty in determining the actual passenger revenue retained by the airlines.

• Reporting the month and year of travel would enable determinations of market trends that are not discernable inside the quarterly data reports and would allow direct cross-validation to other datasets such as the T–100.

4. Cost-Benefit Analysis Summary

Major provisions of this regulatory action	Benefit	10-Year costs (discounted at 7%)
Change sample size to 40%	Would enable more effective oversight of Congressional programs designed to help small communities and provide more accurate market information for a wide variety of research and industry uses.	The estimated total reduction in cost over 10 years discounted at 7% for all the major provisions would provide a reduction of $10,367,702 from the cost of continuing the current methodology.*
Report each ticket as a single record.	Would simplify reporting and improves quality assurance.	
Designate all certificated air carriers and commuter air carriers holding out scheduled passenger service as O&D Survey Reporting Carriers and require them to report the tickets that they sell.	Would simplify the reporting procedures to enable full automation of reporting, which enhances efficiency and accuracy; and eliminate loopholes in collection secure integrity of the sample of tickets.	
Move to monthly reporting	Would create more useful and timely economic information; and align the reporting process with the corresponding industry accounting process.	
Report the month/year of travel	Would create more useful, timely economic information; and align reporting process with the corresponding industry accounting process.	
Report all airports in the itinerary.	Would provide clarity and completeness in passenger movements.	
Report Dwell Time as the number of hours between each arrival and next departure in the itinerary.	Would allow accurate determination of the passenger's intended destination based on industry standard practice.	
Report an Exchanged Ticket Indicator.	Would alert data users that the fare on a specific ticket may require further investigation.	
Elimination of Fare Basis Code reporting.	Would remove sensitive business information that is burdensome to report.	
Report taxes paid on the ticket	Would inform tax policy and allow data users to separate taxes paid from the total fare.	
Report a Record Identification Number.	Would enable communication between a O&D Survey Reporting Carrier and DOT regarding data quality.	

* The industry requests to align the regulation with current accounting practices, which means that the system is to be restructured, so all new provisions can be included in a one-time programming cost.

This proposed rule is expected to be an E.O. 13771 deregulatory action.[16] As is described above in the discussion of the benefit-cost analysis that was conducted for the proposed rule, this action is expected to result in annualized cost savings (to producers and users of the data and the Federal Government) of approximately $1.5 million per year, while also yielding additional unquantified benefits to users of the data through improved data quality and utility.

B. The Unfunded Mandates Reform Act of 1995.

The Unfunded Mandates Reform Act of 1995 [17] requires Federal agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in expenditures by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $100 million annually. The proposed changes we are considering making to the aviation data collections would not result in expenditures by State, local, or tribal governments.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act [18] requires an agency to assess the impacts of proposed and final rules on small entities unless the agency determines that a rule is not expected to have a significant economic impact on a substantial number of small entities. The Department has evaluated the effects of this action on small entities and anticipates that the action will not have a significant economic impact on a substantial number of small entities.

[16] 82 FR 9339; Feb. 3, 2017.

[17] 2 U.S.C. 1531–1538.

[18] 5 U.S.C. 601 *et seq.*

The small entities which will begin reporting the data collected under this proposed rule routinely collect this data as a normal course of business, as a necessity to common industry accounting practices. The Department hereby certifies that this action would not have a significant economic impact on a substantial number of small entities.

D. E.O. 13132 (Federalism)

E.O. 13132 [19] requires agencies to ensure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial, direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. The Department has analyzed this action in accordance with the principles and criteria contained in E.O. 13132. This rule does not include any provision that substantially directly affect the States, the relationship between the National Government and the States, or the distribution of power and responsibilities among the various levels of government. It imposes no direct compliance costs on State and local governments nor does it preempt State law. States are already preempted from regulating in this area by the Airline Deregulation Act.[20] Therefore, the consultation and funding requirements of E.O. 13132 do not apply.

E. E.O. 13175 (Consultation and Coordination With Indian Tribal Governments)

The proposed changes to the O&D Survey would not have tribal implications, impose substantial direct compliance costs on Indian tribal governments, or preempt tribal law. Therefore, this NPRM is exempt from the consultation requirements of E.O. 13175, ''Consultation and Coordination with Indian Tribal Governments.'' [21] If tribal implications are identified during the comment period, the Department will undertake appropriate consultations with the affected Indian tribal officials.

F. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) [22] requires that the Department consider the impact of paperwork and other information collection burdens imposed on the public and obtain approval from the Office of Management and Budget (OMB) for each collection of information it conducts, sponsors, or requires through regulations.

This action contains the following proposed amendments to the existing information collection requirements previously approved under OMB Control Number 2105–AE45. As required by the PRA, DOT has submitted these proposed information collection amendments to OMB for its review.

Summary: Origin-Destination Survey of Airline Passenger Traffic (O&D Survey), which collects information on the origin and destination of passengers including, at a minimum, information on: (1) The origin and destination of passengers in interstate air transportation, and (2) the number of passengers traveling by air between any two points in interstate air transportation. Modifications to the existing requirements would include making the air carrier that issues the ticket primarily the carrier responsible for submitting the ticket, reporting each ticket as a single record, expanding the O&D Survey Reporting Carrier threshold, changing the period of reporting to monthly, increasing the sample size to 40 percent, reducing the lag time for release of T–100(f), adding dwell time, adding a Via Airport data element, adding a Total Tax element, adding Travel Year and Travel Month as recorded elements, adding an Exchange Ticket Indicator, adding a Reporting Record Identifier, and removing the requirement to record the Fare Basis Code.

Use: The Department is obligated by statute to collect and disseminate this information. There are many private and public stakeholders that depend on this data to make decisions on aviation business and policy. For example, this data is used by the industry to plan air services, develop commercial aviation infrastructure, measure the economic impact of passenger flows, and create business plans for start-up airlines. The O&D Survey is also a primary source of information used to quantify and evaluate the effectiveness of Federal aviation policy and programs as well as develop and implement new policies and infrastructure initiatives.

Respondents (including number of): All certificated air carriers and commuter air carriers holding out scheduled passenger service. The Department currently estimates approximately 27 air carriers will qualify to submit data to the O&D Survey as envisioned by this rulemaking.

Frequency: Monthly.

Annual Burden Estimate: The Department is soliciting comments to—

(1) Evaluate whether the proposed information requirement is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of collecting information on those who are to respond, including by using appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Individuals and organizations may send comments on the information collection requirement by March 19, 2021, 11:59 p.m. Eastern Time, and should direct them to the address listed in the **ADDRESSES** section at the beginning of this preamble. Comments should also be submitted to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Desk Officer for OST, New Executive Building, Room 10202, 725 17th Street NW, Washington, DC 20053.

G. National Environmental Policy Act

The Department has analyzed the environmental impacts of this proposed action pursuant to the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*) and has preliminarily determined that it is categorically excluded pursuant to DOT Order 5610.1C, Procedures for Considering Environmental Impacts (44 FR 56420, Oct. 1, 1979). Categorical exclusions are actions identified in an agency's NEPA implementing procedures that do not normally have a significant impact on the environment and therefore do not require either an environmental assessment (EA) or environmental impact statement (EIS). The purpose of this rulemaking is to update the method of collecting and processing aviation traffic data as well as expanding the number of reporting air carriers, the sample size collected, and the scope of the data reported in the O&D Survey. The Department does not anticipate any environmental impacts, and there are no extraordinary circumstances present in connection with this rulemaking.

Air carriers, Reporting and recordkeeping requirements, Uniform system of accounts.

14 CFR Part 298

Air taxis, Reporting and recordkeeping requirements.

Issued in Washington, DC.

Elaine L. Chao,

Secretary of Transportation.

Proposed Rule

Accordingly, the Department proposes to amend 14 CFR parts 241 and 298 as follows:

PART 241—UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR LARGE CERTIFICATED AIR CARRIERS

■ 1. The authority citation for part 241 continues to read as follows:

Authority: 49 U.S.C. 329, 41101, 41708, and 41709.

Sec. 19–7 [Removed]

■ 2. Remove Sec. 19–7.

■ 3. Add Sec. 19–8 to read as follows:

Sec. 19–8 Passenger Origin—Destination Survey applicability.

(a) All U.S. certificated and commuter air carriers conducting scheduled passenger services (except helicopter carriers) shall participate in a Passenger Origin-Destination (O&D) Survey covering domestic and international air carrier operations, as prescribed by the Department's Bureau of Transportation Statistics (BTS), Office of Airline Information (OAI).

(b) A statistically valid sample of flight coupons shall be selected for reporting purposes. The sample shall consist of a selection of all Tickets involving a Reporting Carrier that meet the reporting criteria as defined in the Instructions, or further defined in Directives, except those participating O&D carriers with nonstandard ticketing procedures, or other special operating characteristics, may propose alternative procedures. Such departures from standard O&D Survey practices shall not be authorized unless approved in writing by the Director, Office of Airline Information under the procedures in Sec. 1–2. The data to be recorded and reported, as stipulated in the Instructions and Directives, shall include at a minimum the following data elements: Reporting Carrier, Reporting Month, Reporting Year, Record Identification Number, Issuing Carrier, Total Amount, Tax Amount, Exchanged Ticket Indicator, Airport, Operating Carrier, Marketing Carrier, Scheduled Flight Year, Scheduled Flight Month, Dwell Time and Via Airport(s).

(c) Any Ticket that is submitted that involves a O&D Survey Reporting Carrier providing service in whole or in part under this part or 49 U.S.C. 41308 or 41309 and any data covering the operations of foreign air carriers that are similar to the information collected in the Passenger Origin-Destination Survey are generally not available to the Department, the U.S. carriers, or U.S. interests. Therefore, because of the damaging competitive impact on U.S. carriers and the adverse effect upon the public interest that would result from unilateral disclosure of the U.S. survey data, the Department will not disclose the international data in the Passenger Origin-Destination Survey except:

(1) To an air carrier directly participating in and contributing input data to the Survey or to a legal or consulting firm designated by an air carrier to use on its behalf O&D data in connection with a specific assignment by such carrier;

(2) To parties to any proceeding before the Department to the extent that such data are relevant and material to the issues in the proceeding upon a determination to this effect by the Administrative Law Judge or by the Department's decision-maker. Any data to which access is granted pursuant to this section may be introduced into evidence subject to the normal rules of admissibility of evidence.

(3) To agencies and other components of the U.S. Government.

(4) To other persons upon a showing that the release of the data will serve specifically identified needs of U.S. users which are consistent with U.S. interests.

(5) To foreign governments and foreign users as provided in formal reciprocal arrangements between the foreign and U.S. Governments for the exchange of comparable O&D data.

(6) Or as otherwise determined by the Department as consistent with its regulatory functions and responsibilities.

(d) Each O&D Survey Reporting Carrier shall maintain its prescribed reportable records in a manner and at such locations as will permit ready accessibility for examination by representatives of DOT. The record retention requirements are prescribed in part 249 of this chapter.

PART 298—EXEMPTIONS FOR AIR TAXI AND COMMUTER AIR CARRIER OPERATIONS

■ 4. The authority citation for part 298 continues to read as follows:

Authority: 49 U.S.C. 329 and chapters 401, 411, and 417.

■ 5. In § 298.60, revise paragraph (a) to read as follows:

§ 298.60 General reporting instructions.

(a) Each commuter air carrier and each small certificated air carrier shall file the applicable schedules of Form 298–C, ''Report of Financial and Operating Statistics for Small Aircraft Operators'', Schedule T–100, ''U.S. Air Carrier Traffic and Capacity Data by Nonstop Segment and On-Flight Market'', and the ''Passenger Origin—Destination Survey'' prescribed in part 241, Sec. 19–8, of this subchapter.

Rule 144 Holding Period and Form 144 Filings

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule.

SUMMARY: The Securities and Exchange Commission (''Commission'') is proposing to amend Rule 144 to revise the holding period determination for securities acquired upon the conversion or exchange of certain market-adjustable securities of issuers that do not have securities listed on a national securities exchange. Under the proposed amendments, the holding period for those securities would not begin until the securities are acquired upon the conversion or exchange of the market-adjustable security. The Commission is also proposing to mandate electronic filing of Form 144 with respect to securities issued by issuers subject to Exchange Act reporting requirements, to amend the filing deadline for Form 144 to coincide with the filing deadline for Form 4, and to streamline the filing process in cases where both Form 4 and Form 144 are required to report the same transaction. Finally, the Commission is proposing to eliminate

the requirement to file a Form 144 for resales of securities of issuers that are not subject to Exchange Act reporting.

DATES: Comments should be received on or before March 22, 2021.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/submitcomments.htm*).

Paper Comments

- Send paper comments to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number S7–24–20. We will post all submitted comments, requests, other submissions and other materials on our internet website (*http://www.sec.gov/rules/proposed.shtml*). Typically, comments are also available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Due to pandemic conditions, however, access to the Commission's public reference room is not permitted at this time. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information. You should submit only information that you wish to make available publicly.

Studies, memoranda or other substantive items may be added by the Commission or staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any such materials will be made available on the Commission's website. To ensure direct electronic receipt of such notifications, sign up through the ''Stay Connected'' option at *www.sec.gov* to receive notifications by email.

FOR FURTHER INFORMATION CONTACT: John Fieldsend or Sean Harrison, at (202) 551–3430, in the Office of Rulemaking, Division of Corporation Finance, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: We are proposing amendments to:

Table of Contents

I. Discussion of the Proposed Amendments

A. Overview of the Proposed Amendments

We are proposing to amend Rule 144, Form 144, Form 4, Form 5 and Rule 101 of Regulation S–T. We propose to amend Rule 144(d)(3)(ii) to revise the holding period determination for securities acquired upon the conversion or exchange of certain market-adjustable securities of an issuer that does not have a class of securities listed, or approved to be listed, on a national securities exchange registered pursuant to Section 6 [1] of the Exchange Act (''unlisted issuer'') so that the holding period would not begin until the conversion or exchange. As used in this release, a ''market-adjustable security'' is a convertible or exchangeable security that provides for a conversion rate, conversion price, or other terms that, in each case, would have the effect of offsetting, in whole or in part, declines in value of the underlying securities that may occur prior to conversion or exchange.

We are proposing this amendment to mitigate the risk of unregistered distributions in connection with sales of market-adjustable securities. As

[1] 15 U.S.C. 78f.

discussed below, the application of the ''tacking'' provisions of Rule 144 to market-adjustable securities undermines one of the key premises of Rule 144, which is that holding securities at risk for an appropriate period of time prior to resale can demonstrate that the seller did not purchase the securities with a view to distribution [2] and, therefore, is not an underwriter for the purpose of Securities Act Section 4(a)(1).[3] Amending the Rule 144 holding period for the securities received on conversion or exchange of market-adjustable securities so that it will not commence until the time the underlying securities are acquired would help maintain the effectiveness of this key aspect of the Rule 144 safe harbor.

We are also proposing amendments to update and simplify the Form 144 filing requirements by mandating the electronic filing of all Form 144 notices related to the resale of securities of issuers that are subject to the reporting requirements of Section 13 or 15(d) of the Exchange Act, and eliminating the filing requirement for Form 144 notices related to the resale of securities of issuers that are not subject to Exchange Act reporting. Additionally, we are proposing to eliminate two unnecessary data fields and intend to create an online fillable document for entering the information required by Form 144. In connection with these amendments, we are planning to streamline filing procedures for individuals who are subject to notice filing requirements under Rule 144 and reporting requirements under Section 16 [4] of the Exchange Act. These amendments would also change the filing deadline for Form 144 to coincide with the filing deadline for Form 4. In addition, we are proposing to amend Forms 4 and 5 to add a check box to permit filers to indicate that a sale or purchase reported on the form was made pursuant to a transaction that satisfied 17 CFR 240.10b5–1(c) (''Rule 10b5–1(c)'').

We welcome feedback and encourage interested parties to submit comments on any or all aspects of the proposed rule amendments. When commenting, it would be most helpful if you include the reasoning behind your position or recommendation.

B. Proposed Amendment to Rule 144(d)(3)(ii)

1. Background

a. Rule 144 Safe Harbor

Securities Act Section 5 requires registration of all offers and sales of securities in interstate commerce or by use of the United States mails, unless an exemption from the registration requirement is available.[5] Securities Act Section 4(a)(1) provides an exemption for ''transactions by any person other than an issuer, underwriter, or dealer.'' Securities Act Section 2(a)(11) defines an ''underwriter'' to mean any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security or participates or has a direct or indirect participation in any such undertaking.[6]

In 1972,[7] the Commission adopted Rule 144 to provide a non-exclusive safe harbor from the statutory definition of ''underwriter'' to assist security holders in determining whether the Section 4(a)(1) exemption is available for their resale of restricted or control securities.[8] Rule 144 sets forth objective criteria on which security holders seeking to resell such securities may rely to be assured they would not be deemed to be engaged in a distribution and, therefore, not be considered an underwriter under Section 2(a)(11). A selling security holder that seeks to rely on the safe harbor for the resale of securities must satisfy the following conditions: [9]

- There must be adequate current public information available about the issuer if the selling security holder is an affiliate of the issuer; [10]
- The selling security holder must have held the securities for a specified holding period if the securities being sold are restricted securities; [11]
- The resale must be within specified sales volume limitations if the selling security holder is an affiliate of the issuer; [12]
- The resale must comply with the manner of sale requirements if the selling security holder is an affiliate of the issuer; [13] and
- The selling security holder must file a Form 144 if the selling security holder is an affiliate of the issuer and the amount of securities being sold exceeds specified thresholds.[14]

b. Rule 144 Holding Period Condition and Tacking

One of the conditions of Rule 144 for restricted securities is that a selling security holder must have held the securities for a specified period of time prior to resale. This condition helps to ensure that a holder who claims an exemption under Section 4(a)(1) has assumed the full economic risks of investment and, therefore, is not acting as a conduit, directly or indirectly, on behalf of the issuer for the sale of unregistered securities to the public.[15] Under Rule 144(d)(1)(i), restricted securities acquired from an issuer that has been subject to Exchange Act reporting for at least 90 days before the sale (a ''reporting issuer'') must be held for a minimum of six months. If the issuer is not subject to Exchange Act reporting, or has not been for a period of at least 90 days immediately before the sale (a ''non-reporting issuer''), the restricted securities must be held for a minimum of one year pursuant to Rule 144(d)(1)(ii).

As originally adopted, Rule 144 required a two-year holding period before a security holder could make

[2] The term ''underwriter'' is broadly defined to mean any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates, or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking. *See* Securities Act Section 2(a)(11) [15 U.S.C. 77b(a)(11)]. The interpretation of this definition traditionally has focused on the words ''with a view to'' in the phrase ''purchased from an issuer with a view to . . . distribution.'' For simplicity, in this release we often only refer to the ''with a view to'' prong of the underwriter definition.

[3] 15 U.S.C. 77d(a)(1).

[4] 15 U.S.C. 78p.

[5] 15 U.S.C. 77e.

[6] As used in Section 2(a)(11), the term ''issuer'' includes any person directly or indirectly controlling or controlled by the issuer, or any person under direct or indirect common control with the issuer. An affiliate of an issuer is a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, such issuer. *See* 17 CFR 230.405 and 17 CFR 230.144(a)(1).

[7] *See Definition of Terms* ''*Underwriter*'' *and* ''*Brokers' Transactions,*'' Release No. 33–5223 (Jan. 11, 1972) [37 FR 591 (Jan. 14, 1972)] (''1972 Adopting Release'').

[8] Restricted securities are securities acquired pursuant to one of the transactions listed in Securities Act Rule 144(a)(3), such as securities issued in a private placement. Although not defined in Rule 144, the term ''control securities'' commonly refers to securities held by an affiliate of the issuer, regardless of how the affiliate acquired the securities. *See* Rule 144(b)(2).

[9] In general, these are the conditions that a selling security holder must satisfy when seeking to rely on the safe harbor for the resale of securities. However, a person seeking to rely on the safe harbor when reselling securities of certain types of companies must satisfy different conditions. *See* 17 CFR 230.144(i).

[10] *See* 17 CFR 230.144(c). A sale by a non-affiliate also must satisfy the current public information condition if the non-affiliate is selling securities of a reporting issuer and has held the securities for less than one year.

[11] *See* 17 CFR 230.144(d).

[12] *See* 17 CFR 230.144(e).

[13] *See* 17 CFR 230.144(f) and (g).

[14] *See* Rule 144(h).

[15] *See* 1972 Adopting Release, *supra* note 7, at 594 (noting that the holding period condition in Rule 144 was designed to assure that the registration provisions of the Securities Act are not circumvented by persons acting, directly or indirectly, as conduits for an issuer in connection with resales of restricted securities and that to accomplish this, the rule provides that such persons be subject to the full economic risks of investment during the holding period).

limited sales of restricted securities.[16] Later changes to the rule established a separate three-year holding period for unlimited sales of restricted securities by non-affiliates of the issuer.[17] In 1997, the Commission shortened the holding periods for restricted securities to one-year and two-year periods, respectively.[18] In 2007, the Commission adopted the current holding periods of six months for reporting issuers and one year for non-reporting issuers based on its observations of Rule 144's application since 1997 and its desire that the holding period be no longer than necessary nor impose any unnecessary costs or restrictions on capital formation.[19] By reducing the holding periods for restricted securities, the Commission intended to help companies to raise capital more easily and less expensively.[20]

Rule 144 contains ''tacking'' provisions in specified situations that allow holders to count other holding periods—either of prior owners of the securities or of different securities owned by the holders—to satisfy their holding period requirement. One situation where Rule 144 permits tacking of the holding period involves convertible securities. Rule 144(d)(3)(ii) allows securities acquired solely in exchange for other securities of the same issuer to be deemed to have been acquired at the same time as the securities surrendered for conversion or exchange. A variation of this provision has existed since 1972,[21] and the current version of this provision was adopted in 2007.[22]

c. Market-Adjustable Securities Transactions

A typical convertible security, for example a convertible bond, a convertible promissory note, or convertible preferred stock, can be converted into a different security, such as shares of the issuer's common stock, under specified terms and conditions.[23] In a conventional convertible security transaction, the conversion formula is generally fixed, such that the convertible security converts into common stock based on a conversion price that is fixed at the time the convertible security is sold and remains at that fixed price through its conversion. Convertible securities may contain mechanical adjustments to the number of underlying shares and the conversion price upon the occurrence of events such as splits, dividends, or other distributions on the underlying securities. They also may contain anti-dilution provisions designed to protect the holder's economic interest if the issuer subsequently issues shares of the underlying securities at a price below their current market value or below the holder's original purchase price. The terms of market-adjustable securities, however, go beyond these typical adjustments and anti-dilution provisions to adjust for, and protect the holder against, general decreases in market value of the underlying securities.[24]

While the holder of a typical convertible security is at substantial economic risk upon conversion with respect to the underlying security if the underlying security fails to appreciate or declines in value, this is not the case in market-adjustable securities transactions where the conversion or exchange price and/or the amount of securities received on conversion are not fixed at the time of the initial transaction. In these transactions, holders have the right to convert the securities into the underlying securities (often shares of common stock) at a conversion price that yields a substantial discount to the market price of the underlying securities at the time of conversion or exchange. If the securities are converted or exchanged after the Rule 144 holding period is satisfied, the underlying securities may be sold quickly into the public market at prices above the price at which they were acquired. Accordingly, initial purchasers or subsequent holders have an incentive to purchase the market-adjustable securities with a view to distribution of the underlying securities following conversion to capture the difference between the built-in discount and the market value of the underlying securities. As noted above, when a holder purchases with a view to distribution, it is acting as an underwriter and is unable to rely on the Section 4(a)(1) exemption from registration.

A holding period is essential to assure that purchasers have assumed the economic risks of investment, and therefore, are not acting as conduits for sale to the public of unregistered securities, directly or indirectly, on behalf of an issuer.[25] The discounted conversion or exchange features in market-adjustable securities typically provide holders with protection against investment losses that would occur due to declines in the market value of the underlying securities prior to conversion or exchange. As a result, these holders are not exposed to the market risk associated with holding the underlying security prior to conversion or exchange;[26] they are only exposed to that market risk during the time that they hold the underlying security after the conversion or exchange.[27] In these circumstances, holders that convert and promptly resell the underlying security in order to secure a profit on the sale based on the built-in discount have not assumed the economic risks of investment of the underlying security. Therefore, under Rule 144's current

[18] *See Revision of Holding Period Requirements in Rules 144 and 145,* Release No. 33–7390 (Feb. 20, 1997) [62 FR 9242 (Feb. 28, 1997)]. In that adopting release, the Commission stated that it was shortening the holding to reduce the cost of capital, lower the illiquidity discount given by companies raising capital in private placements, and increase the usefulness of the Rule 144 safe harbor. *See id.* at 9242. Additionally, the Commission stated that it did not believe that the shorter holding periods would diminish investor protection because the holding periods were still sufficiently long to ensure that resales under Rule 144 would not facilitate indirect public distributions of unregistered securities by issuers or affiliates.

[19] *See Revisions to Rules 144 and 145,* Release No. 33–8869 (Dec. 6, 2007) [72 FR 71546 (Dec. 17, 2007)] (''2007 Adopting Release''). In the 2007 Adopting Release, the Commission eliminated the bifurcated holding periods for affiliates and non-affiliates, and added different holding periods for reporting and non-reporting issuers because non-reporting issuers are not obliged to file periodic reports with updated financial information that are publicly available on EDGAR.

[20] *See id.*

[21] *See* 1972 Adopting Release, *supra* note 7, at 597.

[22] *See* 2007 Adopting Release, *supra* note 19, at 71555.

[23] *See infra* Section II.B.1; *see also, Convertible Securities,* U.S. Sec. & Exchange Commission (last visited Dec. 18, 2020), available at *https://www.sec.gov/fast-answers/answersconvertibleshtm.html.*

[24] For example, the conversion or exchange rate of the overlying convertible securities into the underlying equity securities may be discounted from a weighted average price of the publicly traded class of securities, typically, common stock, calculated for a period leading up to the date of conversion or exchange. Therefore, the conversion price provides a discount from the recent market price that can be realized at the time sales of the underlying equity securities begin.

[25] *See* 1972 Adopting Release, *supra* note 7.

[26] Prior to conversion or exchange, a holder of market-adjustable securities is at risk of bankruptcy of the issuer. However, this risk is borne for a briefer duration currently than when Rule 144 was originally adopted because of the shortened holding periods.

[27] This period of time can be very limited because the discounted equity securities acquisition, through conversion or exchange, and the market-priced sales can occur almost simultaneously. For example, when the applicable holding period ends, the holder may demand that the issuer issue the required number of underlying securities at the discounted conversion or exchange price and concurrently sell those securities at market prices. The underlying securities are received from the issuer in time to settle the sales at market prices made earlier.

formulation, holders are able to purchase market-adjustable securities with a view to distribution while still satisfying the holding period requirements and tacking period provisions of Rule 144.

Permitting the holding period of the underlying securities to be ''tacked'' onto the holding period of the convertible or exchangeable security allows the initial holders of market-adjustable securities to structure transactions without significant economic risk prior to conversion. The structure of these transactions incentivizes purchases with a view to distribution because, by selling the underlying securities into the market promptly after conversion, holders of market-adjustable securities can capture the value of the built-in discount to the then-current market value. This is inconsistent with the purpose of Rule 144 to provide a safe harbor for transactions that are not distributions of securities. These unregistered transactions pose the risk that distributions of securities will reach the public markets without the same level of disclosure and liability protections that registration provides to investors.

2. Proposed Amendment

We are proposing to amend Rule 144(d)(3)(ii) to provide that the holding period for the securities acquired upon conversion or exchange of certain market-adjustable securities issued by unlisted issuers would not begin until conversion or exchange.[28] The proposed amendment would be limited to unlisted issuers because national securities exchanges registered pursuant to Section 6 of the Exchange Act have certain listing requirements, such as requiring shareholder approval of an issuance of 20 percent or more of a company's common stock. Because market-adjustable securities have the potential to result in highly dilutive issuances of large amounts of the issuer's securities, these required approvals are not likely to be granted in the situations the amendment is intended to address.[29]

We have also observed that issuers that are able to satisfy the listing criteria of these exchanges have generally not been engaging in these transactions. The proposed amendment is intended to avoid the potential under the current Rule 144 safe harbor for holders to acquire market-adjustable securities with a view to an unregistered distribution of the underlying securities acquired upon their conversion or exchange, resulting in significant resales of the underlying securities without investors having the benefit of registration.[30]

The proposed amendment would not affect the use of Rule 144 for most convertible or variable-rate securities transactions. The proposed amendment would apply only to market-adjustable securities transactions where:

- The newly acquired securities were acquired from an issuer that, at the time of the conversion or exchange, does not have a class of securities listed, or approved for listing, on a national securities exchange registered pursuant to Section 6 of the Exchange Act; and
- The convertible or exchangeable security contains terms, such as conversion rate or price adjustments, that offset, in whole or in part, declines in the market value of the underlying securities occurring prior to conversion or exchange, other than terms that adjust for stock splits, dividends, or other issuer-initiated changes in its capitalization.

We believe the proposed amendment would reduce the potential for unregistered distributions because after the conversion or exchange of the overlying convertible securities, the underlying securities would need to be held for the applicable Rule 144 holding period before they would be eligible for resale under the Rule 144 safe harbor. A holder who has held the underlying securities for the entire six months or one year, as applicable, during which period market adjustments are no longer available, is generally appropriately excluded from the definition of an underwriter.

While we believe the proposed amendment would mitigate the risk of unregistered distributions in connection with market-adjustable securities transactions, we also emphasize that the Rule 144 safe harbor is not available to any person with respect to any transaction or series of transactions that is part of a plan or scheme to evade the registration requirements of the Securities Act, as currently stated in the Preliminary Note to Rule 144. We propose to move this statement to new paragraph (b)(3) of Rule 144 so that the statement is explicitly included in the rule text.[31]

Request for Comment

1. Should we amend Rule 144(d)(3)(ii) as proposed?

2. Should the rule only apply if the issuer is an ''unlisted issuer'' at the time of conversion or exchange, as proposed? Or should the determination of whether an issuer is unlisted be made at the time the holder buys the market-adjustable security, the time of the resale of any of the underlying equity securities, or some other time? Should the determination be made both at the time of the purchase of the market-adjustable security and at the time of the conversion or exchange, or some other combination of times?

3. Is the description of market-adjustable securities in proposed Rule 144(d)(3)(ii) sufficient to achieve the purpose of the proposal? If not, how should we modify the description?

4. Should we define the securities that would be subject to the proposed rules more narrowly or more broadly? If so, how? We do not intend for adjustments for recapitalizations, stock or cash dividends, or other anti-dilution adjustments that apply to issuer-initiated actions, to be considered the type of adjustments that would cause a security to be considered a market-adjustable security. However, are there specific additional factors or clarification that we should provide in the rule to indicate when a transaction may be considered a market-adjustable securities transaction?

5. As an alternative to the proposed amendment to Rule 144(d)(3)(ii), should we amend Rule 144(d)(1)(i) to increase from six months to one year (or some other period) the holding period that would apply to the market-adjustable securities that are issued by reporting, unlisted issuers? Should we amend Rule 144(d)(1)(i) to increase the holding period to one year (or some other period) for these market-adjustable

[28] Nothing in this proposed amendment is intended to impact the availability of the Securities Act Section 3(a)(9), 15 U.S.C. 77c(a)(9), exemption from registration for such conversions or exchanges as long as the requirements of Section 3(a)(9) are otherwise met.

[29] *See, e.g.,* Section 312.03(c) of the New York Stock Exchange LLC Listed Company Manual (requiring shareholder approval of any issuance of securities in any transaction or related transactions relating to 20 percent or more of a listed company's stock before the issuance) and Nasdaq Stock Market LLC Listing Rule 5635(d) (requiring shareholder approval prior to an issuance or potential issuance by a company of common stock (or securities convertible into or exercisable for common stock), which alone or together with sales by officers, directors, or certain other shareholders equals 20 percent or more of the common stock or 20 percent or more of the voting power outstanding before the issuance at a price that is less than the certain, minimum price).

[30] In addition to lacking the disclosure and liability protections that registration provides, market-adjustable securities may result in extreme dilution to holders of the underlying securities, especially when the conversions or exchanges occur in tranches at subsequently lower market prices.

[31] In addition to this amendment, due to current **Federal Register** formatting requirements we are also proposing a technical change to move the rest of Rule 144's Preliminary Note to a note that immediately follows the rule. Neither new Rule 144(b)(3) nor this technical change would alter the substance of the Preliminary Note.

securities in addition to amending Rule 144(d)(3)(ii) as proposed?

6. Are there alternative approaches that we should consider that would better mitigate the risk of unregistered distributions of securities acquired upon the conversion or exchange of market-adjustable securities?

7. Should market-adjustable securities of both listed and unlisted issuers be covered by the amendment to Rule 144(d)(3)(ii) rather than only those of unlisted issuers, as proposed? Do an exchange's listing criteria provide sufficient safeguards against the type of transaction that the proposal seeks to address? If not, are there alternatives that we should consider?

8. Should the proposed amendment to Rule 144(d)(3)(ii) only apply to issuers that do not have a class of *equity* security listed on an exchange, rather than to issuers that do not have any class of security listed on an exchange, as proposed?

9. Are there any additional amendments or changes to the proposed amendments that we should consider that would help achieve the purposes of the proposal?

C. Proposed Amendment to the Form 144 Filing Requirements

1. Background

Form 144 is a notice form that must be filed with the Commission by an affiliate of an issuer who intends to resell restricted or control securities [32] of that issuer in reliance upon Securities Act Rule 144.[33] Under Securities Act Rule 144(h), an affiliate who intends to resell securities of the issuer during any three-month period in a transaction that exceeds either 5,000 shares or has an aggregate sales price of more than $50,000 must file a Form 144 concurrently with either the placing of an order with a broker to execute the sale or the execution of a sale directly with a market maker.

Rule 101(b) of Regulation S–T permits Form 144 to be filed electronically or in paper if the issuer of the securities is subject to Exchange Act reporting requirements. If the issuer of the securities is not subject to Exchange Act reporting requirements, Rule 101(c)(6) of Regulation S–T requires Form 144 to be filed in paper.[34] During the 2019 calendar year, the Commission received over 31,000 Form 144 filings. Based on an analysis of these filings, Commission staff estimates that approximately 99 percent related to the resale of securities of issuers subject to Exchange Act reporting requirements. Although most of these Form 144 filings can be made electronically, during the 2019 calendar year, only 221 Form 144 filings were made electronically and the vast majority were filed in paper.[35]

2. Proposed Amendments

a. Mandatory Electronic Filing of Form 144

Since the Commission's implementation of the Electronic Data Gathering, Analysis, and Retrieval system (''EDGAR''), we have sought to make the system more comprehensive by subjecting more filings to our mandated electronic filing requirements. The mandated electronic submission of documents required to be filed with the Commission has enabled investors, market participants, and other EDGAR users to access more quickly the information contained in registration statements, periodic reports, and other filings made with the Commission. We are proposing rule amendments that would mandate the electronic filing of Form 144 and eliminate the paper filing option. Specifically, we propose to amend Rules 101(a) and 101(b) of Regulation S–T to mandate the electronic filing of all Form 144 filings for the sale of securities of Exchange Act reporting companies.

Mandating the electronic filing of Form 144 would facilitate more efficient storage and retrieval of the transaction information and facilitate analysis of this information. In addition, as described in more detail below, Form 144 filers would benefit from the planned EDGAR changes to make the form an online fillable document that would make electronic filing easier. Under the proposed amendments, affiliates of an issuer that is subject to Exchange Act reporting who resell or expect to resell securities in reliance upon Rule 144 in an amount exceeding the Form 144 filing thresholds would be required to file a Form 144 electronically on EDGAR.[36] Any Form 144 filer who has not previously made an electronic filing on EDGAR would need to apply for EDGAR access in accordance with the EDGAR Filer Manual in order to file documents on EDGAR. We are also proposing to provide a six-month transition period after the effective date of the amendments to Regulation S–T to give Form 144 paper filers who would be first-time electronic filers sufficient time to apply for codes to make filings on EDGAR.

In addition, we propose to amend Rule 144(h)(1) to delete the requirement that an affiliate send one copy of the Form 144 notice to the principal exchange, if any, on which the restricted securities are admitted to trading. This provision was designed for Form 144 filings made in paper and will no longer be needed if we mandate the electronic filing of Form 144.[37]

We are also proposing minor changes to Form 144 to update the form and eliminate certain personally identifiable information (''PII'') and immaterial information fields that are unnecessary. Specifically, we propose to delete the fields requiring the home address of the person for whose account the securities are to be sold and the IRS identification number of the issuer of the securities.[38]

---

[32] *See* Rule 144(h).

[33] *See* Rule 144(a)(1) (defining ''affiliate of the issuer as a person who directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the issuer).

[34] In April 2020, in recognition of several logistical difficulties related to the submission of Form 144 in paper pursuant to Rules 101(b)(4) or 101(c)(6) of Regulation S–T, as well as ongoing health and safety concerns related to COVID–19, the Division of Corporation Finance provided temporary no-action relief that specified that it would not recommend enforcement action to the Commission if Forms 144 for the period from and including April 10, 2020 to June 30, 2020 were submitted as a complete PDF attachment and emailed to the Commission in lieu of filing the form in paper. Subsequently, on June 25, 2020, the Division of Corporation Finance updated this no-action relief by indefinitely extending it from the period beginning on April 10, 2020. *See Division of Corporation Finance Statement Regarding Requirements for Form 144 Paper Filings in Light of COVID–19 Concerns,* U.S. Sec. & Exchange Comm'n (June 25, 2020), available at *https://www.sec.gov/corpfin/announcement/form-144-paper-filings-email-option-update.*

[35] The paper filings of Form 144 are retained in the Commission's public reference room for a period of 90 days. Investors or other interested parties wishing to access and review a Form 144 filed in paper must do so in person at our public reference room or subscribe to a third party information service that records and distributes the information electronically after a paper Form 144 is filed. Due to pandemic conditions, prospective data users cannot, at this time, access the Commission's public reference room. Therefore, access to paper filings is limited to those records which have been obtained and incorporated by vendor databases.

[36] An affiliate, however, would be able to file the form in paper pursuant to a temporary hardship exemption under 17 CFR 232.201 (Rule 201 of Regulation S–T) if the affiliate experiences unanticipated technical difficulties preventing the timely preparation and submission of the electronic filing.

[37] Many exchanges have rules or guidance that specify that it is not necessary for a company listed on the exchange to provide it with physical copies of any documents that the company has filed on EDGAR. *See, e.g., New York Stock Exchange Listed Company Regulation Guidance Memo,* N.Y. Stock Exch. (Feb. 20, 2018), available at *https://www.nyse.com/publicdocs/nyse/regulation/nyse/2018_Listed_Company_Regulation_Guidance_Memo.pdf.*

[38] For purposes of Form 144, we have determined that we can achieve our regulatory objectives without the PII. Furthermore, the IRS identification number of the issuer is redundant as this information is required to be disclosed on the cover

We intend to provide an online fillable document on EDGAR for entering information required by Form 144 and to streamline the electronic filing process for those filing both a Form 144 and a Form 4 to report the same sale of equity securities, as discussed in more detail below. In connection with these changes, we are also proposing to amend the Form 144 filing deadline to coincide with the Form 4 filing deadline.[39] Specifically, we propose to amend Securities Act Rule 144(h)(2) to revise the filing deadline to require that a Form 144 be filed before the end of the second business day following the day on which the sale of securities has been executed or the deemed date of execution [40] rather than have it due concurrently with either the placing of an order with a broker to execute the sale or the execution of a sale directly with a market maker, as currently required.

The proposed amendment to the Form 144 filing deadline would facilitate this new filing process. This filing deadline would apply to all Forms 144, regardless of whether a Form 4 also needs to be filed for the same transaction.[41] The proposal therefore would provide all Form 144 filers more time to file the form, yet would generally result in the Form 144 becoming publicly available earlier than under the existing filing deadline because the Form 144 would be filed electronically rather than mailed to the Commission in paper at the time the sale is executed. The proposed filing deadline, however, would not preclude filers from filing a Form 144 concurrently with either the placing of an order to execute a sale with a broker, or the execution of a sale directly with a market maker.

Finally, we observe that the Commission considered Rule 144 to be in the nature of an experiment at the time of its adoption in 1972.[42] The Commission has used Form 144 filings to monitor the operation of the rule and as an enforcement tool to assist in the detection of abuses.[43] Since the Commission initially adopted the Rule 144 requirements, the Commission has amended the rule to eliminate certain Form 144 filing requirements.[44] While, at this time, we are not proposing the elimination of the current Form 144 filing requirement for sales of securities by affiliates of issuers that are subject to Exchange Act reporting, we are soliciting comment on the continued utility of Form 144 filings.

Request for Comment

10. Do investors or other market participants have an interest in the information provided by Form 144? Does Form 144 provide important information that would not otherwise be publicly available? Do investors or other market participants obtain benefits from this information? If so, please describe the benefits.

11. How do market participants and the public currently access Form 144 information? Should we mandate the electronic filing of Form 144 for affiliates' sales of securities of issuers that are subject to Exchange Act reporting and that exceed the thresholds in Rule 144(h), as proposed? Would electronic filing of Form 144 make those forms more readily accessible to the public? Would electronic filing result in cost savings? Given that the majority of Form 144 filings are made in paper, has the inability to access the paper Forms 144 filed during the pandemic had any effect on the usefulness of this information to market participants and the public?

12. Should we, as proposed, amend Rule 144(h)(1) to eliminate the requirement that an affiliate send one copy of the Form 144 notice to the principal exchange, if any, on which the restricted securities are admitted to trading?

13. Should we amend Form 144 to update the form and eliminate certain information, as proposed? Is there any other information in Form 144 that we should remove because it is unnecessary to further the purposes of Rule 144? Is there any other information that should be included in the form?

14. Should we instead continue to permit a Form 144 filer to have the option of filing in paper or electronically?

15. In the alternative, should we eliminate the Form 144 filing requirement altogether?

16. Is the proposed six-month transition period appropriate? Would a shorter or longer transition period be more appropriate (*e.g.,* three months, nine months)?

17. Is it common for Form 144 filers to use a filing agent or a third party such as a broker to prepare and submit the Form 144 filing? If so, would the proposed amendments create any difficulties in the filing process or add costs to the process?

18. Should we amend the Form 144 filing deadline to coincide with the Form 4 filing deadline, as proposed? If not, should we change the deadline in some other way?

19. If we mandate the electronic filing of Form 144 without amending the filing due date, the Form 144 disclosures would be available to investors and other EDGAR users more quickly than if we amend the Form 144 filing deadline to coincide with the Form 4 filing deadline. Should we maintain the existing Form 144 filing deadline that requires the form to be transmitted for filing concurrently with either the placing with a broker of an order to execute a sale of securities in reliance on the rule or execution of the sale directly with a market maker? Is there a benefit to having the Form 144 filed at an earlier date than a Form 4 that reports the same sale? If so, how does that benefit compare to the efficiencies that a filer subject to both the Form 144 and Form 4 requirements could realize from being able to file both forms simultaneously?

b. Eliminating Form 144 Filing Requirement for Investors Selling Securities of Non-Reporting Issuers

As noted above, the Commission staff estimates that approximately one percent of the Form 144 filings made during the 2019 calendar year related to the resale of securities of issuers that are not subject to Exchange Act reporting.[45] The proposed amendments discussed above that would mandate the electronic filing of a Form 144 notice for the securities of an Exchange Act

page of registration statements and periodic reports and would be available through these forms.

[39] We are proposing to amend the filing deadline for Form 144 to facilitate the simultaneous filing of Form 144 and Form 4. *See infra* Section II.B.2.c.

[40] Consistent with the exception to the Form 4 two-business day filing deadline provided in Exchange Act Rule 16a–3(g)(2)(i) [17 CFR 240.16a–3(g)(2)(i)], the proposed amendments provide that if the transaction is pursuant to a contract, instruction or written plan that satisfies the affirmative defense conditions of Exchange Act Rule 10b5–1(c), and the affiliate does not select the date of execution, the date on which the executing broker, dealer notifies the security holder of the execution of the transaction is deemed the date of execution for a transaction.

[41] To better reflect the proposed change to the Form 144 filing deadline, we also propose to revise the title of Form 144 to read: ''Notice of sale or proposed sale of securities pursuant to Rule 144 under the Securities Act of 1933.'' We are also proposing a conforming amendment to Instruction 3(d) to Form 144 to clarify that the filer should provide the total sales proceeds for completed sales rather than the aggregate market value for sales that have not yet been completed.

[42] *See* 1972 Adopting Release, *supra* note 7, at 595.

[43] *See Resales of Securities,* Release No. 33–6252 (Oct. 24, 1980) [45 FR 72685 (Nov. 3, 1980)] at 72686.

[44] *See, e.g.,* 1981 Adopting Release, *supra* note 17, at 12197 (amending Rule 144 to relieve non-affiliates from the Form 144 filing requirement and explaining that the ''costs and burdens of the requirement outweigh its usefulness, at least in this area'').

[45] *See infra* Section I.C.1.

reporting issuer would reduce a large majority of the paper Form 144 filings that the Commission receives. Although one of the primary goals of EDGAR is to facilitate the dissemination of financial and business information contained in Commission filings,[46] given the limited number of paper Form 144 filings related to non-reporting issuers that we receive, we believe that the benefits of having this information filed electronically would not justify the burdens on filers. For this reason, we are proposing to amend Rule 144 and Rule 101(c)(6) of Regulation S–T to require affiliates relying on Rule 144 to file a notice of sale on Form 144 only when the issuer of the securities is subject to the reporting requirements of Section 13 or 15(d) of the Exchange Act.

Form 144 provides the Commission, among other things, with information concerning the issuer, the person on whose behalf the securities are to be sold, the broker who will execute the sale order, the securities to be sold, the approximate date of sale, and other securities of the same issuer sold during the past three months. The form, however, is not the sole source of information available to the Commission regarding resale transactions under the rule. For example, brokers are generally required to make and maintain records, for a period of time, of all purchases and sales of securities [47] and to furnish promptly legible, true, complete, and current copies of those records upon request by a representative of the Commission.[48] In addition, brokers that execute a sale under Rule 144 must conduct a reasonable inquiry to determine that the person for whose account the securities are sold is not an underwriter or that the transaction is not part of a distribution of securities of the issuer.[49]

Although the Form 144 filing requirement would be eliminated for resales of securities by affiliates of issuers that are not subject to Exchange Act reporting, the proposed amendments to eliminate the Form 144 filing requirement would not change any of the other conditions of the Rule 144 safe harbor.

Request for Comment

20. Should we eliminate the Form 144 filing requirement for affiliates' sales of securities of non-reporting companies, as proposed? Does Form 144 provide important information concerning the resale of securities of non-reporting issuers that would not otherwise be publicly available to investors or other users of this information? Do investors or market participants currently rely on Form 144 for this information or do they rely on other publicly available sources? If so, which other public sources are relied upon?

21. Do investors have an interest in the information provided by Form 144 regarding the resale of securities of non-reporting issuers? Do investors or market participants obtain benefits from this information? If so, please describe the benefits.

22. We have received comments indicating that the information contained in Form 144 could be used to satisfy some of the public information requirements in Rule 144(c)(2),[50] in particular the information specified in Rule 15c2–11(b)(5)(i)(N) and (b)(5)(i)(P).[51] For the purpose of Rule 144(c)(2), is the Rule 15c2–11 information specified in paragraphs (b)(5)(i)(N) and (b)(5)(i)(P) publicly available from other sources? If so, which sources?

23. Rule 15c2–11 does not require that the information specified in paragraphs (b)(5)(i)(N) and (b)(5)(i)(P) of Rule 15c2–11 be publicly available but requires, in certain circumstances, that a broker-dealer make it available upon request of a person expressing an interest in a proposed transaction in the issuer's security. Rule 144(c)(2) requires the information specified in these paragraphs to be publicly available. Should we amend Rule 144(c)(2) to require the information in these paragraphs to be available upon request in accordance with the provisions of Rule 15c2–11(b)(5)(ii) instead of publicly available?

24. How do the costs of electronically filing a Form 144 notice related to the resale of securities of a non-reporting issuer compare with the benefits of having the form available on EDGAR?

c. Filing Options for Form 4 and Form 144

Section 16 of the Exchange Act applies to every person who is the beneficial owner of more than 10 percent of any class of equity security registered under Section 12 of the Exchange Act [52] and each officer and director (collectively, ''reporting persons'' or ''insiders'') of the issuer of the security. Upon becoming a reporting person, or upon the Section 12 registration of that class of securities, Section 16(a) requires a reporting person to file an initial report with the Commission disclosing the amount of his or her beneficial ownership of all equity securities of the issuer. To keep this information current, Section 16(a) also requires insiders to report changes in such ownership. Under Rule 16a–3 of the Exchange Act,[53] insiders are required to report most changes in beneficial ownership, including purchases and sales of securities, on Form 4.

As discussed above, Rule 144 requires an affiliate of an issuer to file a Form 144 concurrently with either the placing with a broker of an order to execute a sale of securities in reliance upon Rule 144 or the execution directly with a market maker of such a sale. Some of the disclosures required by Form 144 duplicate the disclosure requirements of Form 4. For example, both Form 144 and Form 4 require disclosure concerning the title of the class of securities being sold, the number of shares subject to sale, the aggregate market value of those shares, and the date of sale.

Many affiliates of an issuer under Rule 144 are also insiders of that issuer under Section 16 of the Exchange Act. Affiliates selling securities under Rule 144 often are required to file a Form 4 within two business days after they file a Form 144 to report information regarding the same sale of securities.[54]

[51] *See* 17 CFR 240.15c2–11. Rule 15c2–11(b)(5)(i)(N) requires information about whether the broker or dealer or any associated person of the broker or dealer is affiliated, directly or indirectly, with the issuer. Rule 15c2–11(b)(5)(i)(P) requires information about whether the quotation is being submitted or published, directly or indirectly, by or on behalf of the issuer or a company insider and, if so, the name of such person and the basis for any exemption under the Federal securities laws for any sales of such securities on behalf of such person. In the recently adopted amendments to Rule 15c2–11, the prior references to Rule 15c2–11(a)(5)(xiv) and (a)(5)(xvi) were changed to (b)(5)(i)(N) and (b)(5)(i)(P). *See Publication or Submission of Quotations Without Specified Information,* Release No. 33–10842 (Sept. 16, 2020) [85 FR 68124 (Oct. 27, 2020)].

[52] 15 U.S.C. 78*l.*

[53] 17 CFR 240.16a–3.

[54] The Sarbanes-Oxley Act of 2002 [Public Law 107–204, 116 Stat. 745] amended Section 16(a) to require insiders to file Form 4 before the end of the second business day following the day on which the subject transaction has been executed or at such other time as the Commission shall establish if the

In June 2007, the Commission issued a release proposing amendments to update Securities Act Rules 144 and 145.[55] In that release, the Commission discussed possible approaches to, and requested comment about, amending Form 144 and Form 4 in order to reduce duplicative requirements and coordinate the filing requirements of these two forms. The Commission ultimately did not adopt any amendments to the forms to reduce duplicative requirements.[56] The Commission also has received a rulemaking petition requesting that the Commission revise its rules and regulations so that Form 144 be combined into Form 4 for persons that need to file both forms.[57]

If we adopt the proposed amendments to Form 144 discussed above, we intend to modify EDGAR to provide filers with the option to file a Form 144 and a Form 4 through a single user interface. The system would use the information entered into the fields to create separate Form 4 and Form 144 filings. After the information is entered, a filer would have the opportunity to correct errors and verify the accuracy of the information before choosing to file one or both forms on EDGAR. Once the information is filed on EDGAR, the system would provide the filer with separate accession numbers for the Form 4 and Form 144 and also a return copy for both the Form 4 and Form 144 shortly after filing. We believe these changes would make the filing of these forms more efficient for filers subject to both reporting requirements. This filing option, however, would not be available for a Form 4 filing that is made on behalf of multiple insiders.[58]

In addition, we would make Form 144 available online as a fillable document that could be used by filers that do not have a corresponding Form 4 reporting obligation, as well as those who need to report the same sale on Form 4 and Form 144 but choose to enter the information separately for each form. An online fillable form would enable the convenient input of information, and support the electronic assembly of such information and transmission to EDGAR, without requiring a Form 144 filer to purchase or maintain additional software or technology. The fillable form would be similar to other fillable forms that are currently available to file Forms D,[59] 3, 4, and 5.

Request for Comment

25. If the Commission adopts the proposed rules, should we enable the filing of a Form 4 and Form 144 on EDGAR through a single user interface? Would this option make the filing of these documents more efficient for filers?

26. Are there alternative methods that we should consider that could reduce the duplicative requirements of Form 144 and Form 4?

d. Rule 10b5–1(c) Transaction Indication in Forms 4 and 5

Form 144 requires a selling security holder to represent, as of the date that the form is signed, that he or she does not know any material adverse information in regard to the current and prospective operations of the issuer of the securities to be sold which has not been publicly disclosed. In 2007, we amended Form 144 to allow filers who satisfy Rule 10b5–1(c) by adopting a written trading plan or providing trading instructions to make that representation as of the date they adopted the plan or gave instructions, rather than the date they signed the Form 144.[60]

Exchange Act Rule 16a–3(g) provides that a reporting person must report specified changes in beneficial ownership on Form 4 before the end of the second business day following the date of execution for the transaction. In addition, Rule 16a–3(f) provides that every person who at any time during an issuer's fiscal year was subject to Section 16 of the Exchange Act must file a Form 5 within 45 days after the issuer's fiscal year end to disclose certain beneficial ownership transactions and holdings not reported previously on Forms 3,[61] 4, or 5. For transactions executed pursuant to a contract, instruction, or written plan for the purchase or sale of equity securities that satisfies the affirmative defense conditions of Rule 10b5–1(c)[62] and for which the reporting person does not select the date of execution, the date on which the executing broker, dealer, or plan administrator notifies the reporting person of execution of the transaction is deemed the date of execution, so long as the notification date is not later than the third business day following the trade date.[63]

We propose to permit a Form 4 filer, at the filer's option, to indicate through a check box on the form that a sale or purchase reported on the form was made pursuant to Rule 10b5–1(c).We believe that the check box option would provide Form 4 filers with an efficient method to provide this disclosure. Consistent with current practice, filers could provide additional information, such as the date of a Rule 10b5–1 plan, in the ''Explanation of Responses'' portion of the form along with other relevant information about the transactions reported on the Form 4. We propose to add a similar checkbox to Form 5.[64]

2-day period is not feasible. On August 27, 2002, the Commission adopted rule and form amendments to implement this filing deadline. *See Ownership Reports and Trading by Officers, Directors and Principal Security Holders,* Release No. 34–46421 (Aug. 27, 2002) [67 FR 56462 (Sept. 3, 2002)].

[55] 17 CFR 230.145. *See Revisions to Rule 144 and Rule 145,* Release No. 33–8813 (June 22, 2007) [72 FR 36822 (July 5, 2007)].

[56] In the 2007 Adopting Release, the Commission stated that it expected to issue a separate release in the future to provide affiliates that are subject to both the Form 4 and Form 144 filing requirements with greater flexibility in satisfying their requirements. *See* 2007 Adopting Release, *supra* note 19, at 72 FR 71554 and 71555.

[57] *See Request for rulemaking to combine Form 144 into Form 4,* File No. 4–671 (Dec. 13, 2013) (requesting that the Commission amend its rules to combine Form 144 with Form 4), *https://www.sec.gov/rules/petitions/2013/petn4-671.pdf.* The proposal, if adopted, would achieve the objectives sought by the petitioner.

[58] Form 4 permits multiple insiders to file on a single form if they all have an interest in the transaction(s) being reported. Form 144, however, does not have a similar feature.

[59] 17 CFR 239.500.

[60] *See* 2007 Adopting Release, *supra* note 19. Exchange Act Rule 10b5–1 defines when a purchase or sale of a security constitutes trading ''on the basis of'' material nonpublic information in insider trading cases brought under Section 10(b) of the Exchange Act [15 U.S.C. 78j] and Rule 10b–5. Specifically, a purchase or sale of a security of an issuer is ''on the basis of'' material nonpublic information about that security or issuer if the person making the purchase or sale was aware of the material nonpublic information when the person made the purchase or sale. Rule 10b5–1(c) establishes affirmative defenses that permit a person to trade in circumstances where it is clear that the information was not a factor in the decision to trade.

[61] 17 CFR 249.103.

[62] Reporting persons sometimes provide additional disclosure in the ''Explanation of Responses'' portion of Form 4 indicating that a transaction satisfies the affirmative defenses conditions of Rule 10b5–1(c). For example, a reporting person may state that a transaction was made pursuant to a written trading plan and indicate the date the plan was adopted.

[63] *See* 17 CFR 240.16a–3(g)(2) (Exchange Act Rule 16a-3(g)(2)) and 17 CFR 240.16a–3(g)(4) (Exchange Act Rule 16a–3(g)(4)). If the notification date is later than the third business day following the trade date, the date of execution is deemed to be the third business day following the trade date.

[64] Under the proposal, the check boxes on Forms 4 and 5 would permit filers to indicate whether a transaction was made pursuant to a binding contract, instruction, or written trading plan for the purchase or sale of equity securities of the issuer that satisfies the conditions of Rule 10b5–1(c). This is broader than the representation on Form 144, which refers only to written trading plans and trading instructions, because the purpose of the proposed amendment is to simplify reporting for filers who provide Rule 10b5–1(c) transaction information in the ''Explanation of Responses'' portion of Forms 4 and 5, and some filers provide this information with respect to transactions made pursuant to binding contracts.

Request for Comment

27. Should we add a check box to Forms 4 and 5 to provide filers the option of disclosing that their sales or purchases were made pursuant to Rule 10b5–1(c)?

28. Should we instead require Form 4 and Form 5 to indicate via a check box whether any of their reported transactions were made pursuant to Rule 10b5–1(c) rather than provide it as an option for the filer?

29. Would a Rule 10b5–1(c) check box on Forms 4 and 5 provide useful information to investors and market participants?

II. Economic Analysis

A. Introduction

The Commission is proposing amendments to Rule 144, Form 144, Form 4, Form 5, and Regulation S–T. We are mindful of the costs imposed by and the benefits obtained from our rules and the proposed amendments.[65] The discussion below addresses the potential economic effects of the proposed amendments. These effects include the likely benefits and costs of the proposed amendments and reasonable alternatives thereto, as well as the potential effects on efficiency, competition, and capital formation. We attempt to quantify these economic effects whenever possible; however, due to data limitations, in many cases we are unable to do so. When we are unable to provide a quantitative assessment, we provide a qualitative discussion of the economic effects instead.

Due to the differing nature of the proposed amendments' baselines, affected parties, and anticipated economic effects, we provide separate analyses of the proposed changes. We first discuss the economic effects of the proposed amendments to the holding period for securities acquired upon conversion or exchange of certain market-adjustable securities issued by unlisted issuers, and then separately discuss the proposed amendments to Form 144, Form 4, Form 5, and Regulation S–T.

[65] Section 2(b) of the Securities Act, 15 U.S.C. 77b(b), and Section 3(f) of the Exchange Act, 15 U.S.C. 78c(f), require us, when engaging in rulemaking that requires us to consider or determine whether an action is necessary or appropriate in the public interest, to consider, in addition to the protection of investors, whether the action will promote efficiency, competition and capital formation. In addition, Section 23(a)(2) of the Exchange Act, 15 U.S.C. 78w(a)(2), requires us to consider the effects on competition of any rules that the Commission adopts under the Exchange Act and prohibits the Commission from adopting any rule that would impose a burden on competition not necessary or appropriate in furtherance of the purposes of the Exchange Act.

B. Proposed Amendments to Holding Period for Market-Adjustable Securities

1. Broad Economic Considerations

The size of the market for all U.S.-issued convertible securities has historically been slightly less than half the size of the seasoned equity market and just less than one-tenth the size of the regular bond market.[66] Despite this difference in size, it is generally understood that the market for convertible securities is an important and highly innovative market that can provide solutions to investment inefficiencies or barriers to capital formation that would otherwise occur if issuers were restricted to offerings of only non-hybrid securities.[67] Studies have suggested that because convertible securities can mitigate certain agency problems, forms of adverse selection, overinvestment, and misallocation of risk, they enable firms to make investments in business opportunities that would otherwise be infeasible for those firms.[68] Empirical evidence on the impact of these investments on longer-term firm value and shareholder wealth, however, is ambiguous on whether such investments represent efficient allocations of external financing.[69] Interpreting the value of convertible bond financing from market outcomes like short-term stock returns or long-term stock price performance is further complicated by the increase in arbitrage hedge fund activity and arbitrage-related short-selling.[70] Therefore, while there are a number of reasons why convertible securities can uniquely facilitate investments of economic value, it is difficult to generalize about their impact on shareholder wealth.

Market-adjustable securities[71] are an innovation in the market for convertible securities dating back to the 1990s.[72] By allowing the holder of the market-adjustable security to convert at discount to the market price (or a reference price based on recent market prices), the issuer can avoid the adverse selection problems it would face by offering equity or fixed-rate convertible securities instead. In practice, however, it does not appear that many issuers have taken advantage of this aspect of market-adjustable securities, and their use has been concentrated in the subpopulation of issuers who are unable to issue additional equity or fixed-rate convertibles, such as financially distressed firms, other low- or no-revenue firms, and those approaching bankruptcy.[73]

The main economic characteristic of market-adjustable securities is that they may provide protection to the holder against declines in market value from the time of purchase of the overlying security until the time of conversion or exchange.[74] Although the risk to investors from purchasing such a security is significantly lower than the risk associated with a convertible security with a fixed conversion rate, risks associated with the investment during the pre-conversion period still exist.[75]

We are proposing to amend Rule 144(d)(3)(ii) to provide that the holding period for certain securities acquired

[71] In the empirical literature cited in the Economic Analysis section, the term ''floating priced convertibles'' is often used to denote the ''market-adjustable securities'' referred to in this release. Other terms, such as ''floating rate convertibles'' or ''future-priced convertibles,'' also may be used in the literature referring to the same securities.

[72] *See* Dutordoir, *supra* note 66.

[73] *See* Austin Dwyer *et al., An Investigation of Death Spiral Convertible Bonds,* (Tenn. State Univ., Working Paper, 2018) (''Dwyer *et al.*''); Zachary T. Knepper, *Future-Priced Convertible Securities and the Outlook for Death Spiral Securities-Fraud Litigation,* 26 WHITTIER L. REV. 359 (2004); Pierre Hillion & Theo Vermaelen, *Death Spiral Convertibles,* 71 J. Fin. Econ. 381 (2004) (''Hillion & Vermaelen'') (examining 467 floating-priced convertibles issued over the 1994–1998 period and finding, among other things, that such convertibles are issued by younger, smaller, riskier issuers, for which adverse selection problems are potentially large.)

[74] One common method that may provide such protection is the inclusion of a floating conversion rate. When the amount of securities to be received upon conversion of a convertible security is conditioned on the stock price performance of the issuer prior to conversion, the conversion ratio is known as a floating conversion rate.

[75] For example, investors are exposed to risk during the pre-conversion period if the company becomes bankrupt and its stock price declines to zero value.

upon conversion or exchange of market-adjustable securities issued by unlisted issuers would not begin until the conversion or exchange occurs. The proposed amendment would expose the holder of the market-adjustable security to the economic risk of the underlying securities during the proposed corresponding holding period following the conversion or exchange.

We expect that exposing these investments to risk during the post-conversion or post-exchange period would limit market-adjustable security holders' ability to immediately resell converted or exchanged market-adjustable securities, which might otherwise constitute a public distribution of securities without the investor protections afforded by registration. However, the proposed holding period would reduce the liquidity of these investments, and thus could prevent some unlisted issuers from obtaining financing or increasing the costs of doing so, particularly since market-adjustable securities may constitute a ''last resort'' form of financing for issuers.[76] To the extent that such firms have presented attractive arbitrage opportunities, it is foreseeable that demand-side investors would hold significant bargaining power in the design of the securities' specific terms and could require additional compensation for limitations imposed upon that power or on final contract terms in future exchanges.

Overall, we believe that the net impact of the proposed amendments may depend on the relative significance of these two competing consequences.

2. Economic Baseline

The economic baseline for the proposed amendment includes unlisted issuers that issue, or may seek to issue, market-adjustable securities.[77] We estimate that as of the end of 2019, there were approximately 2,760 unlisted reporting issuers.[78] We find that during 2019, 106 of these issuers submitted a combined 207 disclosures regarding convertible securities issued that included a floating conversion rate feature.[79] Of the identified floating conversion rate issues, roughly 80 percent involved convertible debt and 20 percent involved convertible preferred stock. Issuers of these securities are predominantly non-accelerated filers[80] and smaller reporting companies (''SRCs'')[81] concentrated in pharmaceutical, biotechnology, and business technology industries.[82] Approximately 25 percent of these convertible issuers had no revenue in their most recent fiscal year, but had average net income and market capitalization of approximately −$5.3 million and $18.8 million, respectively. For the remaining 75 percent of issuers, average revenue, net income, and market capitalization values were $7.2 million, −$12.0 million, and $12.3 million for the most recent fiscal year reported in 2019. We are unable to assess such characteristics for the population of unlisted, non-reporting issuers given current limitations to data availability.

Of Form 144 filings submitted in calendar year 2019, approximately two percent pertained to transactions in reporting, unlisted issuances and only one percent to intended sales of non-reporting, unlisted issuances.

3. Benefits and Costs to Proposed Amendment to Rule 144(d)(3)(ii)

As observed, use of the current tacking provisions essentially eliminates the holding period that would otherwise apply to the underlying securities after conversion or exchange, enabling holders of the overlying securities to convert and then immediately sell the underlying securities received upon conversion or exchange to the open market.[83] Investments in such securities carry little risk given the floating conversion rate and the ability of holders to sell the stock to the open market immediately upon conversion.

The proposed amendment to Rule 144(d)(3)(ii) would require the holding period of the underlying securities to begin upon conversion or exchange of the overlying securities by the holder. Upon conversion or exchange, the amount or value of the underlying securities received by the holder would have been determined. The proposed restriction from selling the underlying securities in the open market during the holding period would put the value of the underlying securities and the holder's investment at risk because, upon conversion or exchange, any subsequent decline in the stock price of the underlying securities during the holding period would result in a decrease in the value of the investment to the holder.

The proposed amendment to Rule 144(d)(3)(ii) would likely have a number of benefits. We believe this proposed amendment would curb the occurrence of situations where purchasers of such instruments have a view to an unregistered public distribution. Restricting the underlying securities from being sold to the broader market during the proposed holding period would introduce greater risk to the holder of the market-adjustable securities. During the holding period, any decline in the price of the underlying securities would decrease the value of the investment. We expect that this proposed amendment would discourage parties from engaging in such transactions because they would no longer be able to immediately distribute the underlying securities on an unregistered basis to capture the discount feature of these instruments. Instead, such parties would now be exposed to economic risk for the requisite holding period following

[76] *See* Ming Dong *et al., Why Do Firms Issue Convertible Bonds?* 7 CRITICAL FIN. REV. 111 (2018) (''Dong *et al.*''). *See also* Hillion & Vermaelen, *supra* note 73; Helgi Walker *et al., Aggressive SEC Enforcement Actions Could Limit Small Business Recovery Resources,* NATIONAL LAW JOURNAL (Aug. 20, 2020, 1:08 p.m.), available at *https://www.gibsondunn.com/wp-content/uploads/2020/08/Walker-Goldsmith-Seibald-Richman-Aggressive-SEC-Enforcement-Actions-Could-Limit-Small-Business-Recovery-Resources-NLJ-08-20-2020.pdf.*

[77] *See* Section I.B.2

[78] This estimate is based upon staff review of all filers who submitted a 10–K, 20–F, 40–F, or an amendment thereto within calendar year 2019. Unlisted reporting issuers are identified by unique CIKs as those without a class of securities registered pursuant to Section 12(b) of the Exchange Act. Because of limitations in available data, we were unable to construct a reliable estimate of the number of unlisted, non-reporting issuers who may also be affected by the proposed amendments. We request information on such issuers in the Request for Comment. *See infra* Section II.B.6.

[79] This number is based on a search of Forms 8–K (17 CFR 249.308) filed by unlisted issuers that indicate the issuance of a convertible security that appears to have a floating conversion rate. If there are other issued securities by unlisted issuers that meet the definition of a market-adjustable security, the number reported represents a lower bound of the prevalence of such securities in the market.

[80] Although Rule 12b–2 defines the terms ''accelerated filer'' and ''large accelerated filer,'' it does not define the term ''non-accelerated filer.'' If an issuer does not meet the definition of accelerated filer or large accelerated filer, it is considered a non-accelerated filer. *See Accelerated Filer and Large Accelerated Filer Definitions,* Release No. 34–88365 (Mar. 12, 2020) [85 FR 17178 (Mar. 26, 2020)] (Accelerated Filer Adopting Release), *https://www.sec.gov/rules/final/2020/34-88365.pdf*

[81] ''Smaller reporting company'' is defined in 17 CFR 229.10(f) as an issuer that is not an investment company, an asset-backed issuer (as defined in 17 CFR 229.1101), or a majority-owned subsidiary of a parent that is not a smaller reporting company and that: (i) Had a public float of less than $250 million; or (ii) had annual revenues of less than $100 million and either no public float, or a public float of less than $700 million.

[82] In calendar year 2019, all 106 identified unlisted reporting issuers of floating-rate convertibles self-identified as either a non-accelerated filer, a smaller reporting company, or both. Insofar as recently adopted amendments to the definitions of accelerated filer and smaller reporting company will effect cost savings for issuers newly eligible as non-accelerated filers or smaller reporting companies, the ability to reinvest such savings in business operations may to some degree offset the potential increased costs of financing to issuers affected by the proposed amendment to Rule 144(d)(1)(ii).

[83] *See supra* Section I.B.1.

conversion. To the extent that this would lead to fewer instances of significant, unregistered but public distributions of the underlying securities, it would enhance investor protection.

However, we anticipate that the proposed amendment to Rule 144(d)(3)(ii) may also impose costs on some market participants including, but not limited to, an increase in the cost of financing and a decrease in total access to financing for unlisted issuers. The proposed post-conversion holding period would reduce the liquidity of these investments. As a consequence, investors are likely to demand additional compensation for providing capital through market-adjustable securities to these issuers. Academic literature links the issuance of convertibles with a floating conversion rate, such as market-adjustable securities, to smaller, potentially higher growth issuers with elevated likelihoods of bankruptcy and less diversified sources of potential revenue that are in need of immediate financing.[84] The same literature also suggests that such issuers have limited options to raise capital due to their characteristics and issue market-adjustable securities, as a ''last resort'' form of financing. To the extent that these issuers have limited options to raise capital, the proposed amendment may also trigger changes to the design of these contracts in order to provide additional compensation to investors for the increase in risk. For example, investors may demand a steeper upfront discount when investing in these securities.

The net effect of the proposed amendment on the affected issuers' other existing shareholders is unclear.[85] The proposed amendment could affect existing shareholders of affected issuers if it changes the propensity of such issuers to issue unregistered market-adjustable securities or if it changes the terms of those securities. Conversion of these unregistered securities may dilute the holdings of existing shareholders, which may lead to a significant decline in the value of existing shareholders' holdings. If the proposed amendment changes the propensity of issuers to issue unregistered market-adjustable securities, it could also affect the likelihood of such effects on existing shareholders.

Similarly, if as a result of the proposed amendment, potential buyers of unregistered market-adjustable securities demand a higher conversion rate, the proposed amendment may increase the potential dilutive effects of conversion. If shareholders are unaware of the existence of these contracts and plan of distribution, such as for non-reporting issuers, or if shareholders are aware but not able to infer the consequences of these contracts, they may experience the negative effects of these unregistered distributions. Because of uncertainty surrounding how the proposed amendment would affect the issuance of unregistered market-adjustable securities across issuer types and the terms of such securities, the net effect of the proposed amendment on the affected issuers' other existing shareholders is unclear. Below we request comment on the effects of the proposal on non-converting, existing shareholders.

4. Effects on Efficiency, Competition, and Capital Formation

As discussed above, the proposed amendment is likely to have an effect on capital formation. To the extent that the sales of underlying securities into the broader market following a conversion of market-adjustable securities constitute a distribution of securities, the proposed amendment is likely to reduce the number of instances in which existing shareholders and new investors would not have the disclosure and liability protections that registration provides. In addition, investors in the underlying securities may be more willing to increase their investments in the issuer because they are less concerned about potential dilution of their holdings and therefore capital formation may be improved.[86] However, if the costs to the issuers of these market-adjustable securities increase, issuers continuing to sell such securities may raise less capital. Other issuers may be required to seek other options for raising capital.

Because total effects on efficiency and competition would aggregate across issuers, industries, and markets that the proposed changes may impact differentially, we anticipate that the unique impact of the amendment to the holding period requirements would not be readily observable or reliably quantified. We invite commenters to submit data or studies that would facilitate estimating such effects.

5. Reasonable Alternatives

We could propose to amend the holding period for only a subset of unlisted issuers, either reporting or non-reporting. Such an alternative would create an asymmetry within the subset of unlisted issuers with regard to the required holding period, and accordingly provide a disincentive for transactions in market-adjustable securities that in effect may result in an unregistered distribution of securities for only a subset of unlisted issuers. Under such alternative, it is possible that currently observed unregistered distributions would continue to take place in the subset of unlisted issuers that would not be affected by the proposed amendments.

We could, in addition to amending the start of the holding period, propose to increase the holding period for market-adjustable securities that are issued by reporting unlisted issuers from six months to one year to align with the holding period for such securities issued by non-reporting unlisted issuers. Such alternative would reduce the liquidity of these investments to the holder, and accordingly increase the issuers' financing costs. To the extent that market-adjustable securities are issued by reporting unlisted issuers to replicate the distribution of securities, it is possible that increasing the holding period could provide disincentives for potentially abusive practices.

6. Request for Comment

30. What are the economic effects of the proposed amendments to Rule 144(d)(3)(ii)? To the extent possible, please provide any data, studies, or other evidence that would allow us to quantify or better qualitatively assess the costs and benefits of the proposed amendments to affected parties. In particular, have we assessed all of the costs and benefits to market participants who would be affected by the change in tacking provisions?

31. We seek information on the prevalence of market-adjustable securities issued by non-reporting unlisted issuers. Please provide any data, studies, or other evidence that would allow us to quantify this component of the industry baseline.

32. What is the impact of the proposed rule on efficiency, competition, and capital formation?

C. Proposed Amendments to Form 144, Form 4, and Regulation S–T

1. Broad Economic Considerations

Existing Commission rules require the filing in paper of Form 144 for securities of issuers not subject to Exchange Act reporting requirements, and allow for either paper or electronic filing of Form 144 for securities of issuers subject to

[84] *See* Hillion & Vermaelen, *supra* note 73; Dwyer *et al., supra* note 73; Dong *et al., supra* note 76.

[85] *See supra* note 66 and accompanying text.

[86] *See supra* at note 30; *see also supra* Section II.B.3.

Exchange Act reporting requirements.[87] By requiring the electronic filing of all Forms 144, the proposed amendments seek to lower the cost of access to Form 144 information and to enable investors, market participants and other EDGAR users to access that information more quickly.[88] The proposed amendments are expected to enable those filers that currently are permitted to file Form 144 either in paper or electronically to benefit from the technology and efficiency associated with electronic filing, thereby potentially lowering the cost and burden of existing compliance requirements. As discussed in more detail below, while some filers may incur an initial cost to transition to electronic filing, we expect that the proposed amendments to file Form 144 electronically on EDGAR would result in cost savings on an ongoing basis and over the long term. Because we are additionally proposing a six-month transition period, filers for whom the initial costs of transition might otherwise be highest might reduce their transition costs by availing themselves of the additional time to adopt requisite technological changes to their submissions processes.

Additionally, the proposed amendments would eliminate the filing requirement for affiliates of issuers not subject to Exchange Act reporting requirements, thus eliminating certain compliance costs for those affiliates.

Finally, we are proposing to allow Form 4 and Form 5 filers, at their discretion, to include a check box to indicate that a sale or purchase of securities was made pursuant to Rule 10b5–1(c). Because this would be discretionary, we expect that filers will elect to do so when the anticipated benefits of doing so exceed the related costs and that this additional information may provide benefits to Form 144 data users.

The discussion below addresses the potential economic effects of the proposed amendments, including their likely costs and benefits as well as the likely effects of the proposed amendments on efficiency, competition, and capital formation, relative to the economic baseline, which comprises the filing practices in existence today.

2. Economic Baseline

Existing Commission rules permit Form 144 to be submitted either electronically via EDGAR or in paper form only for forms reporting proposed sales of reporting issuers. Regulation S–T does not provide for the electronic filing of Form 144 to report proposed sales of securities of issuers not subject to Exchange Act reporting requirements. Recently, in response to COVID–19 conditions, Commission staff announced a no-action position that temporarily affords Form 144 filers a third option to submit paper Form 144s via email.[89] In the period following this announcement, the Commission received approximately 13,400 Form 144 submissions: 52.9 percent in paper form, 46.5 percent electronically via email, and 0.6 percent electronically on EDGAR.[90] Thus, while when given the option, many paper filers have elected to submit their forms electronically via email, very few filers have opted to file Form 144 electronically on EDGAR.

Figures 1 and 2 provide examples to illustrate the lag time between when Form 144 is received by the Commission and when that information becomes available in a commercial database. As seen in Figure 1, in one commercial database, pre-COVID–19, most Form 144 filings became available in commercial databases six days after being received by the Commission. We further observe that in 2020, while the six-day lag time for availability of the majority of the filings remains true for the year on aggregate, after the additional ability to file via email was introduced, the majority of Form 144 filings have been processed and posted in that commercial database in fewer than five days (Figure 2). Overall, the number of records available via that commercial database is considerably lower in 2020 than in 2019, which may reflect increased difficulty and delays in integrating the paper form submissions into such databases under COVID–19 conditions. Thus, while access to data from paper submissions has been significantly reduced by the pandemic, we observe in Figure 2 that for transactions disclosed via a Form 144 submitted electronically via email or EDGAR, data vendors and those who access Form 144 filing data from such sources now appear to receive that information with a shorter delay.

BILLING CODE 8011–01–P

[87] *See supra* Section I.C.1.

[88] *See id.; see also* 1972 Adopting Release, *supra* note 7, at 595.

[89] *See supra* note 34.

[90] Staff analysis is based on all Form 144 filings received by the Commission between April 13 and August 31, 2020. The average number of filings received during this same window of time in the four preceding years was approximately 11,800 Form 144s.

Figure 1.[91]

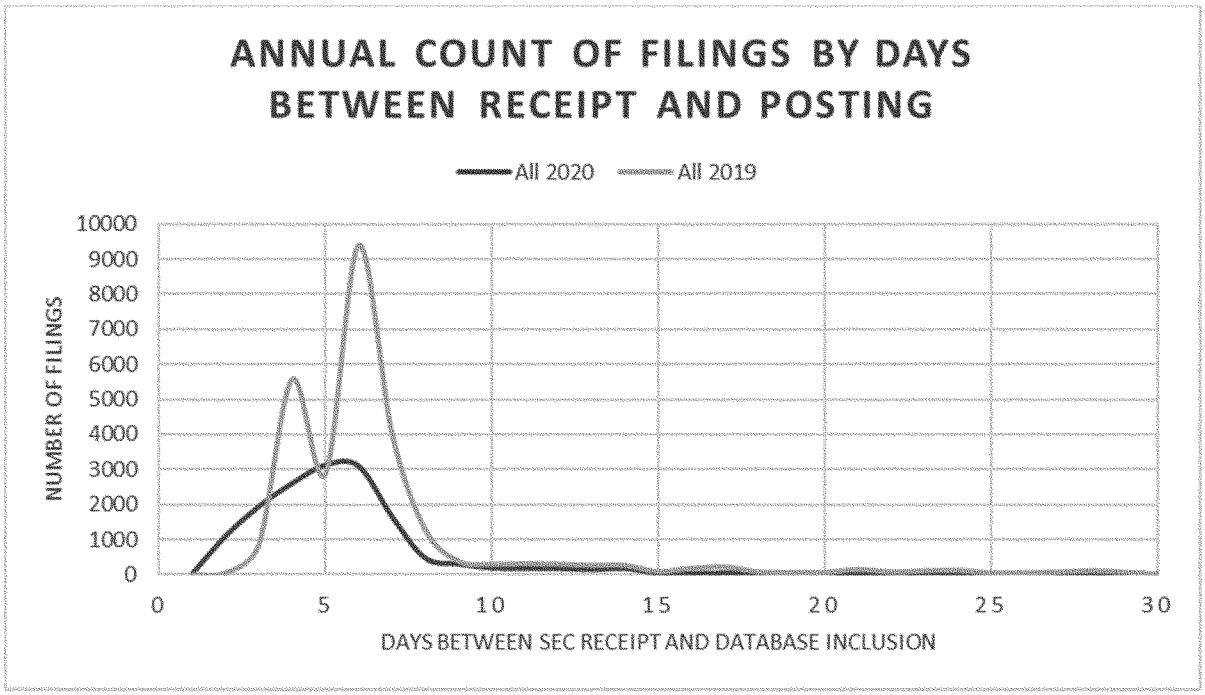

Figure 2.[92]

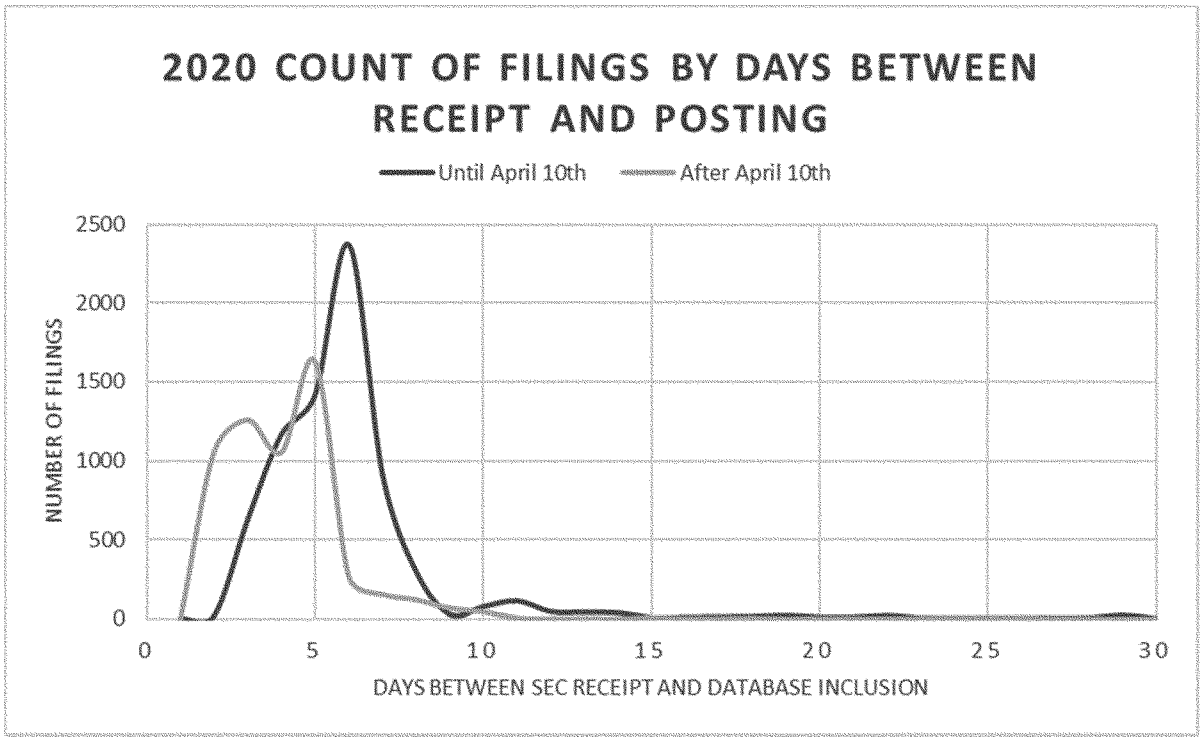

BILLING CODE 8011–01–C

a. Affected Parties [91] [92]

The main parties that would be affected by the proposed amendments are current and future filers of Form 144, specifically affiliates of an issuer subject to Exchange Act reporting requirements.[93] It is our understanding that the majority of affected filers currently prepare and file these forms individually or with the assistance of a broker or personal counsel.[94] Filings of Forms 144 from holders of securities of an issuer not subject to Exchange Act reporting requirements currently make up approximately one percent of all Form 144 filings.[95] As the majority of Form 144 filings are paper filings, most filers would have to modify their processes for submitting their Form 144 filings if the Commission adopts the proposed amendments. Based on past filings, we estimate that approximately 12,250 filers would be required to switch from paper filings to electronic filings and 313 filers would no longer be subject to filing Form 144.[96]

Additionally, the proposed change to electronic filing may affect the manner by which members of the public obtain these filings. Currently, the public can access these filings using EDGAR on the Commission's website or, for paper filings (under normal operating conditions), by visiting the Commission's public reference room in person, or, for either format, by subscribing to a third-party information vendor (such as private information aggregators that distribute the information obtained from EDGAR or the Commission's public reference room and records).[97] While the proposed amendments would not change the general public's ultimate access to the Form 144 information from affiliates selling securities of an issuer subject to Exchange Act reporting requirements, the public would no longer have access to similar information from the relatively small subpopulation of affiliates filing Form 144 to report sales (or potential sales) of securities of issuers not subject to Exchange Act reporting requirements.

b. EDGAR

From 2016 to 2019, an average of 30,000 Form 144 filings were made each year, of which an average of approximately 250 were submitted electronically via EDGAR. As EDGAR submissions thus constitute less than one percent of all Form 144 submissions per year, the proposed amendments could be anticipated to significantly increase the volume of Form 144 filings made electronically on EDGAR.[98]

3. Benefits and Costs of Proposed Amendments to Form 144, Form 4, and Regulation S–T

The proposed amendments would change some of the Commission's current practices related to making Form 144 information available to the public. First, holders of securities of an issuer subject to Exchange Act reporting requirements would be required to file Form 144 electronically. In contrast, holders of securities of an issuer not subject to Exchange Act reporting requirements would no longer be required to file Form 144. Second, the deadline for filing a Form 144 would be revised to coincide with the filing deadline of Form 4, which reports changes in beneficial ownership (purchases and sales of securities and derivatives and exercise of options) rather than have it due concurrently with either the placing of an order with a broker to execute the sale or the execution of a sale directly with a market maker, as currently required. As Form 4 is required to be submitted within two business days of a change in beneficial ownership, this could result in a delay of the reporting of an affiliate's sale of restricted or control securities on Form 144 by two business days.

This proposed change in the Form 144 filing deadline could result in the information on Form 144 sales being made available later than under the current rule. However, because currently most Form 144 filings are made in paper form and thus as a practical matter are generally accessible to most of the public only after a delay of a number of days (*e.g.,* after being uploaded into electronic databases for purchase as in Figure 1), it is likely that any delay due to changing the deadline of Form 144 to align with Form 4 submissions would be offset by the proposed change to require electronic filing. Under the proposal, the public would be able to access the filing electronically via EDGAR upon submission rather than needing to wait for electronic access via a commercial database.[99]

After initial transition costs, the proposed amendments are expected to benefit all Form 144 filers. Filers are expected to realize direct benefits in the form of reduced time required to file forms electronically, compared to a paper filing, and avoided copying and mailing expenses. Filers who make multiple submissions of Form 144 per year or longer submissions likely would benefit most. Electronic filing using EDGAR and the revised filing deadline are expected to make the filing process more efficient by making it easier and less costly for filers to assure timely receipt of the filing (*e.g.,* filers would have no reason to pay for premium services such as delivery confirmation).[100] We anticipate that the proposed amendments will also provide benefits to users of the Form 144 disclosures by significantly reducing both time and costs currently associated with obtaining the data contained in paper form submissions.[101]

The proposal would also modify the data format in which Form 144 would be electronically submitted. Form 144 would be available on EDGAR as a fillable document, similar to other fillable forms that filers can use such as Forms D, 3, 4, and 5.[102] An online fillable form would enable the convenient input of information and support the electronic assembly of such

[91] Based on Form 144 filings accessed via Thomson Reuters Insiders Data with the field ''SEC Receipt'' dated between January 1, 2019 and August 31, 2020.

[92] Based on Form 144 filings accessed via Thomson Reuters Insiders Data with the field ''SEC Receipt'' dated between January 1, 2020 and August 31, 2020.

[93] *See supra* Section I.C.1.

[94] *See* letter from Jesse Brill (dated Dec. 18, 2013), available at *https://www.sec.gov/rules/petitions/2013/petn4-671.pdf.*

[95] *See supra* Section I.C.2.b.

[96] These estimates assume that filers of Form 144 submissions in our data are not also affiliates of other issuers. Because we lack data on the holdings of filers in securities of issuers other than those disclosed in the Form 144, we are unable to identify any filers that are such affiliates.

[97] Paper filings submitted via email based on the staff's no-action position are available at *https://www.sec.gov/corpfin/form-144-email. See supra* note 34.

[98] A rate of change based on the current one percent EDGAR submission rate may slightly overestimate the changes in volume to the extent that the proposed removal of a filing requirement for securities not subject to Exchange Act reporting requirements may simultaneously decrease total submissions. Further, based on the observed EDGAR filing behavior of affiliates who use an issuer's existing access to EDGAR, the number of new Form IDs required to be processed could be reduced, but would not otherwise affect the increase in submission volume.

[99] Data users who continue to choose to access these filings via a commercial database rather than accessing EDGAR might also be able to access them more quickly than at present, depending on the interplay of the two-business-day-delay and the change from paper to electronic filing. We note that, as seen in Figure 2, electronic databases appear to incorporate email filings more quickly than paper submissions, which may indicate that electronic filings would also be processed more quickly.

[100] The proposed amendments also benefit filers by avoiding uncertainty about how to comply with paper filing obligations in events similar to the current COVID–19 pandemic.

[101] We estimate, for example, that annual subscription costs for access to Form 144 data from a third party vendor would approach $2,600 per person.

[102] *See supra* Section I.C.2.c.

information and transmission to EDGAR, without requiring a Form 144 filer to purchase or maintain additional software or technology, thus minimizing the compliance costs. This modification of the data format of Form 144 would also benefit data users by standardizing the inputted data into a structured, machine-readable custom XML format and thus making it easier to extract and process that data.

The fillable form would be similar to other fillable forms that are currently available to file Forms D, 3, 4, and 5.

We expect that filers who use EDGAR for purposes of complying with filing obligations under existing rules would not incur additional EDGAR access costs due to the proposed rules. If filers with EDGAR experience require time or specialized training to switch Form 144 from paper to EDGAR, then they may incur an additional initial transition cost. Given the experience of such filers with EDGAR filing, as well as the six-month transition period proposed, we expect such cost would be minimal.

The proposed amendments also would result in the direct costs of transitioning to filing electronically using EDGAR for the large subset of filers who do not currently file electronically on EDGAR. Currently, 52.9 percent of filers file paper forms and 46.5 percent file via email.[103] In particular, such filers would need to prepare a Form ID as required by Rule 10(b) of Regulation S–T and submit the Form ID following the processes detailed in Volume I of the EDGAR Filer Manual.[104] Once a Form ID has been successfully completed and processed, EDGAR establishes a Central Index Key (''CIK'') number, which permits each authorized user to create an EDGAR access code, enabling the filer to use EDGAR. We estimate that approximately 25 percent of Form 144 filers have already prepared a Form ID and obtained a CIK number through other EDGAR filing obligations.[105] Therefore, we estimate that at most 75 percent of Form 144 filers would need to file a Form ID as a result of the proposed amendments.[106] For purposes of the PRA, we estimate that respondents require 0.15 hours to complete the Form ID and that 100 percent of the burden of preparation for Form ID is carried by the respondent. For purposes of the Paperwork Reduction Act of 1995 (''PRA'') [107] discussed below, we estimate that the proposed amendments would result in an incremental increase of at 1,378 annual burden hours for Form ID.[108] We believe that such direct costs would be justified by the anticipated benefits from eliminating paper filing of Form 144.

The remaining costs of transitioning to EDGAR, which would apply to all Form 144 filers that do not currently file using EDGAR, would be mitigated by the ease of filing Form 144. The revised Form 144 would be an online fillable form with a similar user interface to Form 4, and for simultaneous filings of Forms 4 and 144, the same user interface could be used to file both forms.[109] Because current EDGAR filers represent such a small proportion of those who submit Form 144, our ability to generalize electronic filing behavior from this group to the full population of filers may be of limited reliability.[110] However to the extent that behavior may be similar, we estimate that up to one-third of affiliates submitting a Form 144 who do not currently access EDGAR may be able use an issuer's existing connection to EDGAR or rely upon other support by issuers in meeting their Form 144 electronic filing obligations. These filers likely will incur lower costs as a result of the proposed amendments than filers who cannot or will not use an issuer's existing connection to EDGAR. We lack the data to quantify the difference in costs.

In addition, we estimate that the proposed amendment to eliminate the requirement to file a Form 144 to report the resale of securities of issuers that are not subject to Exchange Act reporting requirements would result in a one percent reduction of current filings of Form 144.[111]

For Form 144 filers, we do not expect that the proposed custom XML format would impose any incremental costs, because filers would be able to enter their disclosures directly into the online fillable form. We expect that completing this XML-based fillable form would not require any more time than any other fillable form and would generally require the same time as completing the paper form. Some filers may choose to file directly in custom XML format (pursuant to the Commission's custom XML schema) integrated into their software because it enables greater automation of reporting. Other filers without XML experience or software could simply use the online fillable form and would not be required to license any XML-based filing preparation software or establish any XML-based filing processes.

The proposed amendments could reduce revenue for market information aggregators who currently aggregate the information from Form 144 fillings into databases and provide access to such databases to various users of this data for a fee.[112] The online filing of Form 144 may make it more cost-effective for some data users to extract the data themselves. The reduction in revenue could be mitigated by the lower cost of retrieving information from Form 144 filings that is filed in an electronic format. Data aggregators could sell fewer subscriptions to make the same profit or lower the fee that they charge which might make their services continue to be attractive even with the electronic availability of the filings.

We recognize that the potential costs and benefits of electronic filing are sensitive to various assumptions, including the number of affected filers; the effect of electronic filing using EDGAR on the time burden of filing Form 144; printing and mailing costs incurred today; and the type and cost of staff, if any, involved in the electronic filing of Form 144. The cost savings realized by individual filers may vary across all filers depending on variables such as filer size, number of filings submitted, existing filing practices (*e.g.,* current reliance on electronic document preparation; current experience with using EDGAR; use of in-house staff, brokers, or outside counsel for the filing of Form 144; number, types, and cost of in-house staff involved in the paper

[103] This estimate does not account for filers who previously filed via EDGAR but who currently submit via email pursuant to the staff no-action position, and may therefore include filers who would not incur new costs. Based on staff review of Form 144 submissions in 2020 by filers with filings both before and after April 10th, approximately 50 percent of filers who previously used EDGAR opted to submit their Form 144s via email after April 10, 2020.

[104] *See* 17 CFR 232.10(b); s*ee also supra* Section I.C.2.a.

[105] Specifically, we observe that approximately 23 percent of calendar year 2019 Form 144 filers also submitted Form 4 filings in EDGAR, while a remaining two percent without Form 4 filings in EDGAR submitted a miscellany of other forms related to beneficial ownership.

[106] This estimate represents an extreme upper bound because it assumes that each named individual who filed at least one Form 144 in calendar year 2019 who is not currently associated with a unique CIK would need to file a Form ID. To the extent that some Form 144 filers are affiliates of issuers who may use the issuer's CIK to file via EDGAR, the estimate likely overstates the required number of new Form IDs required and the burden hours associated with such applications.

[107] 44 U.S.C. 3501 *et seq.*

[108] *See infra* Section III.C.2.

[109] *See supra* Section I.C.2.c. Based on filings in calendar year 2019, we estimate that approximately 23 percent of Form 144 filers are also Form 4 filers.

[110] *See supra* Section II.B.2.

[111] This estimate is based upon the average number of Form 144s submitted pertaining to such securities as a proportion of total Form 144 submissions in each of the four prior calendar years (2016–2019).

[112] *See supra* Section II.C.2.a.

filing of Form 144; actual hours and printing and mailing costs required for paper filing today), and the amount of time required for filers to be trained in the use of EDGAR and any required related processes, and the amount of time to resolve any technical issues related to electronic filing on EDGAR.

4. Efficiency, Competition, and Capital Formation

The proposed amendments are expected to increase the efficiency and decrease the costs of filing Form 144 and retrieving information from Form 144 filings. Electronic filing and the revised filing deadline in the proposed amendments are expected to make the filing process more efficient by making it easier and less costly for filers to assure timely receipt of the filing. Likewise, for investors currently using information from paper filings, the costs of accessing these filings are expected to be significantly reduced. In addition, replacing paper filing with electronic filing is expected to result in filer savings of labor, printing, and mailing costs.

The proposed amendments should facilitate the efficient and rapid incorporation of price-relevant information in Form 144 filings into the market and enhance the sum of information available to investors. To the extent that there is value-relevant information in Form 144 filings, prices may become more efficient, which should help to facilitate capital formation (*e.g.,* by enhancing valuation quality).

However, the proposal may reduce some investors' or market information aggregators' competitive advantages. Particularly, market information aggregators whose present role includes converting paper filings of Form 144 to an electronic information source may find that this service is less attractive to data users due to those users' ability to access these filings directly due to the proposed rule changes. These information aggregators' loss of competitive advantage in converting paper filings of Form 144 to an electronic information source may reduce their revenue and thus may affect their ability to offer other ancillary services that are valuable to data users.

Aligning the reporting timeline of Form 144 with that of Form 4 could cause up to a two-day delay in reporting, and thereby potentially delay the incorporation of information into markets. However, at the same time, the proposed electronic filing mandate could accelerate the incorporation of that information into the markets compared with the current system. We do not have adequate data with which to estimate the net effect of these two proposed changes. Since data users currently observe this delay with respect to filings of Forms 144 and 4 that are both publicly available immediately upon submission, such as via EDGAR, we have limited data with which to form an expected value of having Form 144 information in advance of a Form 4 filing, and consequently what related costs might be incurred by synchronizing submissions. We are therefore requesting comments and the submission of data or other information that would inform our estimates.

We do not expect marked effects on either competition or capital formation as a result of allowing Forms 4 and 5 filers to check a box to indicate that a sale or purchase of securities was made pursuant to Rule 10b5–1(c). As discussed above, due to the discretionary nature of the checkbox inclusion, we expect filers to do so only when they perceive it will increase efficiency. As a result, there may be modest increases to efficiency for both such filers and data users who access their submissions.

5. Reasonable Alternatives

Eliminating the Form 144 Filing Requirement

One alternative that we could have proposed is the elimination of the current Form 144 filing requirement for sales of securities by affiliates of issuers that are subject to Exchange Act reporting. Such an alternative would eliminate compliance costs for such affiliates. However, such an alternative would also prevent investors and various other data users from obtaining any information on such sales of securities. We are soliciting comment on the continued utility of Form 144 filings.

Email Submissions

Given the significant number of submissions via email in response to the temporary staff no-action position, we could have proposed making this manner of filing a permanent option for Form 144 filers. Such an alternative would allow filers to avoid the direct costs of transitioning to filing electronically using EDGAR. Such an alternative, however, would result in issuers incurring expenses in scanning the forms and emailing them to the Commission. Additionally, issuers would forgo potential direct benefits in the form of reduced time required to file forms electronically. Such costs could be higher for filers who make multiple submissions of Form 144 per year and for Form 144 filings with multiple pages.

Data users might also incur higher costs under this alternative since the site used to access Form 144 email submissions is distinct from EDGAR.[113] Specifically, under this alternative, a data user interested in obtaining the information from all Form 144 filings pertaining to a given issuer would be required to search both EDGAR and the daily folders posted to the Form 144 website. Furthermore, Form 144 data submitted via email submissions is not structured, therefore analysis that would require aggregating data from multiple submissions would be more difficult or most costly to perform.

Format Requirements

While the proposed rule does not expressly prescribe a specific format for Form 144 that would be required for filing in EDGAR, Form 144 would be made available as an online fillable form, similar to other fillable forms such as Forms D, 3, 4, and 5.[114] As an alternative, we could require Form 144 to be filed in the Inline eXtensible Business Reporting Language (''Inline XBRL'') format, a derivation of XML that is designed for financial reporting and is both machine-readable and human-readable. Compared to the proposal, the Inline XBRL alternative for Form 144 would provide more sophisticated validation, presentation, and reference features for filers and data users. However, the Inline XBRL alternative would also impose initial implementation costs (*e.g.,* learning how to prepare filings in Inline XBRL, licensing Inline XBRL filing preparation software) upon filers that do not have prior experience structuring data in the Inline XBRL format. By contrast, because the proposal would allow filers to submit Form 144 using an online fillable Form, filers that lack experience structuring data in a custom XML format would not incur implementation costs.

D. Request for Comment

33. What are the economic effects of the proposed amendments to Form 144, Form 4, and Regulation S–T? To the extent possible, please provide any data, studies, or other evidence that would allow us to better quantify or otherwise qualitatively assess the costs and benefits of the proposed amendments to affected parties.

[113] *See supra* note 97.

[114] *See supra* Section I.B.2.c.

34. We expect that the proposed amendments may benefit Form 144 data users by facilitating easier access to Form 144 data, potentially reducing the incentive to purchase such data from third-party data providers. At the same time, the proposed changes may affect the timing of the availability of such information. What are the economic effects of the proposed timing and format changes to Form 144? To the extent possible, please provide any data, studies, or other evidence that would allow us to better quantify or otherwise qualitatively assess the impact of these proposed changes, including the benefits and costs.

35. We seek comment on the ways that Form 144 information is used by affected parties. In particular, what data uses of Form 144 data do not coincide with information available via Form 4? Are there currently any uses of Form 144 data in advance of Form 4 filings, and if so, would there be any costs incurred by losing such information in advance?

36. Are there other methods or databases by which Form 144 data users currently access such information? If so, please provide information about those methods, including how many Form 144 filings may be accessed via those methods and how soon they are made available after they are filed with the SEC. To what extent might the availability and use of these alternative databases affect our analysis of the anticipated benefits and costs to our proposed amendments? Please provide data, studies, or other evidence.

37. Should we adopt any of the alternative approaches outlined above instead of the proposed amendments, including requiring the use of XBRL for electronic submissions of Form 144? We considered requiring the use of XBRL as a possible alternative approach but have not proposed it for the reasons stated above. In addition or instead of XBRL, should the form provide for use of a format based on a new derivation of XML or another machine readable format that the Commission may determine is appropriate in the future? If so, what would be the attendant costs and benefits of such flexibility?

38. Are there any other potential alternative approaches we should consider and what are their economic effects?

39. Because we are proposing to allow Form 4 and Form 5 filers, at their discretion, to check a box to indicate that a sale or purchase of securities was made pursuant to Rule 10b5–1(c) we expect that filers will only elect to do so when their anticipated benefits of doing so exceed their related costs. Are there other anticipated benefits, costs, or economic effects related to this proposal that we should consider?

III. Paperwork Reduction Act

A. Summary of the Collections of Information

Certain provisions of our rules and forms that would be affected by the proposed amendments contain ''collection of information'' requirements within the meaning of the PRA.[115] We are submitting the proposal to the Office of Management and Budget (''OMB'') for review in accordance with the PRA.[116] An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information requirement unless it displays a currently valid OMB control number. Compliance with the information collections is mandatory. Responses to the information collections are not kept confidential and there is no mandatory retention period for the information disclosed. The titles for the collections of information are:

- Form ID (OMB Control Number 3235–0328);
- Form 144 (OMB Control Number 3235–0101);
- Form 4 (OMB Control Number 3235–0287);
- Form 5 (OMB Control Number 3235–0362) [117]

Form ID is used by registrants, individuals, third party filers, or their agents to request access codes that permit the filing of documents on EDGAR. Form 144 is used by security holders to disclose the proposed sale of securities by the holder and to indicate that the holder is not to be engaged in the distribution of the securities and therefore not an underwriter. Form 4 is used by an issuer's insiders to report the insider's changes in beneficial ownership of the issuer's equity securities. A description of the proposed amendments, including the need for the information and its proposed use, as well as a description of the likely respondents, can be found in Section I above, and a discussion of the economic effects of the proposed amendments can be found in Section II above.

As described in more detail above,[118] we are proposing to amend Rule 144 to provide that the holding period for securities acquired upon the conversion or exchange of certain, specific securities that are market adjustable and issued by unlisted issuers would not begin until the time of conversion or exchange.[119] Also, as described above,[120] we are proposing to mandate electronic filing of Form 144 with respect to securities issued by companies subject to Exchange Act reporting requirements, eliminate the requirement to file a Form 144 for resales of securities of issuers that are not subject to Exchange Act reporting, amend the filing deadline for Form 144 to coincide with the filing deadline for Form 4,[121] and amend Form 4 to include a check box that would provide the filer with the option to indicate if securities were sold or purchased pursuant to a plan intended to satisfy the affirmative defense conditions of Exchange Act Rule 10b5–1(c).

B. Summary of the Proposed Amendments' Effects on the Collections of Information

We anticipate that the proposed amendment to mandate the electronic filing of Form 144 would result in a number of filers using EDGAR to file their Form 144 electronically who do not currently do so. Filers who have not previously made an electronic filing on EDGAR are required to file a Form ID to obtain access codes that will enable them to file a document on EDGAR. As discussed above, we estimate that approximately 12,250 filers would be required to switch from paper filings of their Form 144 to electronic filings of

[115] *See supra* note 107.

[116] *See* 44 U.S.C. 3507(d); *see also* 5 CFR 1320.11.

[117] We do not believe that the proposed amendments to permit Form 4 and Form 5 filers to indicate through a check box on the forms that a sale or purchase reported on the forms was made pursuant to Rule 10b5–1(c) would affect an issuer's burden hours or costs for PRA purposes. Filers must already determine whether their sale or purchase reported on the forms was made pursuant to Rule 10b5–1(c), so adding a check a box on the forms would not substantively modify existing collection of information requirements or otherwise affect the overall burden estimates associated with Forms 4 or 5. Therefore, we are not adjusting any burden or cost estimates in connection with the check box for the proposed amendments.

[118] *See supra* Section I.B.

[119] Although the proposed amendments to the holding period are expected to reduce the number of market-adjustable securities transactions, we do not anticipate that these proposed amendments would affect the burdens and costs associated with Form 144. The requirement to file Form 144 only applies to affiliates of the issuer. The investors in these securities generally do not meet the definition of affiliate in our regulations and therefore are not required to file Form 144.

[120] *See supra* Section I.C.

[121] We do not believe that the proposed amendment to change the filing deadline for Form 144 to coincide with the filing deadline for Form 4 would affect an issuer's burden hours or costs for PRA purposes. The information in the form that must be filed would not change as a result of this amendment, so changing the filing deadline would not substantively modify existing collection of information requirements or otherwise affect the overall burden estimates associated with Form 144. Therefore, we are not adjusting any burden or cost estimates in connection with the deadline change for the proposed amendments.

that form.[122] Of those 12,250 filers, however, we estimate that 25 percent have already filed a Form ID through other EDGAR filing obligations,[123] so only approximately 75 percent of Form 144 filers would need to file a Form ID.[124] As a result, we estimate that approximately 9,188 filers would be required to file a Form ID because of the proposed amendment to mandate the electronic filing of Form 144.[125] We estimate that respondents require 0.15 hours to complete the Form ID and, for purposes of the PRA, that 100 percent of the burden of preparation for Form ID is carried by the respondent internally. Therefore, we estimate that this proposed amendment would result in an incremental increase of 1,378 annual burden hours for Form ID.[126]

We expect that the proposed amendment to eliminate the requirement to file a Form 144 to report the resale of securities of issuers that are not subject to the reporting requirements of Sections 13 or 15(d) of the Exchange Act would reduce the number of filings of the form. As discussed above, we estimate that 313 filers would no longer be subject to filing Form 144.[127] We estimate that each notice on Form 144 imposes a burden for PRA purposes of one hour and, for purposes of the PRA, that 100 percent of the burden of preparation for Form 144 is carried by the respondent internally. Therefore, we estimate that this proposed amendment would result in an incremental decrease of 313 annual burden hours for Form 144.

PRA Table 1 summarizes the estimated effects of the amendments on the paperwork burdens associated with the affected collections of information listed in Section III.A.

PRA Table 1—Estimated Paperwork Burden Effects of the Amendments

Proposed amendments and effects	Proposed affected collections of information	Estimated net effect
Form ID:		
• Amend Rules 101(a) and 101(b) of Regulation S–T to mandate the electronic filing of all Form 144 filings for the sale of securities of Exchange Act reporting companies.	• Form ID	• Increase of 0.15 hour compliance burden per response to the new collection of information.
Form 144:		
• Eliminate the requirement to file a Form 144 for resales of securities of issuers that are not subject to Exchange Act reporting.	• Form 144	• Decrease of 1.0 hour compliance burden per response to the new collection of information.

C. Incremental and Aggregate Burden and Cost Estimates

Below we estimate the incremental and aggregate changes in paperwork burden as a result of the amendments. These estimates represent the average burden for all issuers, both large and small. In deriving our estimates, we recognize that the burdens will likely vary among individual issuers based on a number of factors, including the nature of their business. We believe that the amendments will change the frequency of responses to the existing collections of information and the burden per response.

PRA Table 2 below illustrates the incremental change to the total annual compliance burden of affected forms, in hours and in costs, as a result of the amendments' estimated effect on the paperwork burden per response. The number of estimated affected responses shown in PRA Table 2 is based on the number of responses in the Commission's current OMB PRA filing inventory adjusted to reflect the change in the number of responses we estimate as a result of the proposed amendments.[128]

PRA Table 2—Calculation of the Incremental Change in Burden Estimates of Current Responses Resulting From the Amendments

	Current burden			Proposed burden change					
	Current annual responses	Current burden hours	Current cost burden	Proposed change in annual responses	Proposed change in burden hours	Proposed change in professional costs	Proposed annual affected responses	Proposed Burden Hours for Affected Responses	Proposed Cost Burden for Affected Responses
	(A)	(B)	(C)	(D)	(E)	(F)	(G) = (A) + (D)	(H) = (B) + (E)	(I) = (C) + (F)
Form ID	46,842	7,026	$0	9,188	1,378	$0	56,030	8,404	$0
Form 144	33,725	33,725	0	(313)	(313)	0	33,412	33,412	0

D. Request for Comment

We request comments in order to evaluate: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information would have practical utility; (2) the accuracy of our estimate of the burden of the proposed collection of information; (3) whether there are ways to enhance the quality, utility, and clarity of the information to be collected; and (4) whether there are ways to minimize the burden of the collection of information on those who are to respond, including through the use of automated collection techniques

[122] *See supra* note 96.

[123] *See supra* note 105.

[124] *See supra* note 106.

[125] $22,250 \times 0.75 = 9,187.5$.

[126] $9,188 \times 0.15 = 1,378.2$, which is rounded to 1,378.

[127] *See supra* note 96.

[128] The OMB PRA filing inventory represents a three-year average.

or other forms of information technology.[129]

Any member of the public may direct to us any comments concerning the accuracy of these burden estimates and any suggestions for reducing the burdens. Persons who desire to submit comments on the collection of information requirements should direct their comments to the Office of Management and Budget, Attention: Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Washington, DC 20503, and send a copy of the comments to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549, with reference to File No. S7–24–20. Requests for materials submitted to the OMB by us with regard to these collections of information should be in writing, refer to File No. S7–24–20 and be submitted to the Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington DC 20549. Because the OMB is required to make a decision concerning the collections of information between 30 and 60 days after publication, a comment to the OMB is best assured of having its full effect if the OMB receives it within 30 days of publication.

IV. Initial Regulatory Flexibility Act Analysis

This Initial Regulatory Flexibility Analysis (''IRFA'') has been prepared in accordance with the Regulatory Flexibility Act (''RFA'').[130] It relates to proposed amendments that would: (1) Amend Rule 144(d)(3)(ii) to provide that the holding period for securities acquired upon the conversion or exchange of certain, specific securities that are market adjustable and issued by unlisted issuers would not begin until the time of conversion or exchange; (2) mandate electronic filing of Form 144 with respect to securities issued by companies subject to Exchange Act reporting requirements; (3) eliminate the requirement to file a Form 144 for resales of securities of issuers that are not subject to Exchange Act reporting; (4) amend the filing deadline for Form 144 to coincide with the filing deadline for Form 4; and (5) amend Forms 4 and 5 to include a check box that would provide the filer with the option to indicate if a transaction intended to satisfy the affirmative defense conditions of Exchange Act Rule 10b5–1(c). In addition, if we adopt the proposed amendments, we plan to simplify and streamline the electronic filing of Form 144 and Form 4.

A. Reasons for, and Objectives of, the Proposed Action

One purpose of the proposed amendments is to mitigate the risk of unregistered distributions in connection with sales of market-adjustable securities. The proposed amendments are also intended to facilitate more efficient transmission, dissemination, and analysis, of certain forms, and to reduce the costs of storing and retrieving documents that are currently filed in paper.

B. Legal Basis

We are proposing the amendments under the authority set forth in Sections 4, 6, 7, 8, 10, 19(a) and 28 of the Securities Act, and Sections 3, 16, and 23(a) of the Exchange Act.

C. Small Entities Subject to the Proposed Rules

The proposed amendments would affect small entities that issue securities as well as those that hold securities. The RFA defines ''small entity'' to mean ''small business,'' ''small organization,'' or ''small governmental jurisdiction.'' [131] For purposes of the RFA, under our rules, a registrant, other than an investment company, is a ''small business'' or ''small organization'' if it had total assets of $5 million or less on the last day of its most recent fiscal year and is engaged or proposing to engage in an offering of securities that does not exceed $5 million.[132] An investment company, including a business development company,[133] is considered to be a ''small business'' if it, together with other investment companies in the same group of related investment companies, has net assets of $50 million or less as of the end of its most recent fiscal year.[134] We estimate that there are 1,056 issuers that file with the Commission, other than investment companies, which may be considered small entities and are potentially subject to the final amendments.[135] In addition, we estimate that there are 37 investment companies that would be subject to the proposed amendments that may be considered small entities.[136]

D. Proposed Reporting, Recordkeeping, and Other Compliance Requirements

As noted above, the proposed amendment to Rule 144(d)(3)(ii) would provide that the holding period for securities acquired upon the conversion or exchange of certain, specific securities that are market adjustable and issued by unlisted issuers would not begin until the time of conversion or exchange. We expect the proposed amendment to reduce the number of market-adjustable securities transactions. As noted in Section III, we do not anticipate that the proposed amendments would affect the reporting or compliance burdens associated with Form 144, including those for small entities, because the requirement to file the form only applies to affiliates of the issuer and the investors in these securities generally do not meet the definition of affiliate in our regulations. Affected parties may decide to adjust their recordkeeping methods if needed to account for the change in the start date for the holding period.

Additionally, the proposed amendments would mandate electronic filing of Form 144 with respect to securities issued by companies subject to Exchange Act reporting requirements. We anticipate that this proposed amendment would cause a number of filers, including small entities, using EDGAR to file their Form 144 electronically who do not currently do so, thereby modestly increasing their compliance obligations.

Further, the proposed amendments would eliminate the requirement to file a Form 144 to report the resale of securities of issuers that are not subject to the reporting requirements of Sections 13 or 15(d) of the Exchange Act. As a result, some filers, including small entities would no longer be required to file Form 144, which would reduce their compliance obligations.

The proposed amendments to revise the filing deadline for Form 144 and to include an optional check box in Forms 4 and 5 would not change the reporting, recordkeeping, or compliance requirements or otherwise affect the overall compliance burden for small entities.

Compliance with the proposed amendments may require the use of

---

[133] Business development companies are a category of closed-end investment company that are not registered under the Investment Company Act [15 U.S.C. 80a–2(a)(48) and 80a–53—64].

[134] 17 CFR 270.0–10(a).

[135] This estimate is based on staff analysis of issuers, excluding co-registrants, with EDGAR filings of Form 10–K, 20–F and 40–F, or amendments filed during the calendar year of January 1, 2019 to December 31, 2019. This analysis is based on data from XBRL filings, Compustat, and Ives Group Audit Analytics.

[136] This estimate is based on staff review of Forms N–CEN filed with the Commission as of November 5, 2020 and is based on the definition of small entity under Investment Company Act Rule 0–10. *See* 17 CFR 240.0–10.

professional skills, including legal skills.

Section I discusses the proposed amendments in detail. Sections II and III discuss the economic impact, including the estimated costs and benefits, of the proposed amendments to all affected entities.

E. Duplicative, Overlapping, or Conflicting Federal Rules

The proposed amendments would not duplicate, overlap, or conflict with other Federal rules.

F. Significant Alternatives

The RFA directs us to consider alternatives that would accomplish our stated objectives, while minimizing any significant adverse impact on small entities. In connection with the proposed amendments, we considered the following alternatives:

- Establishing different compliance or reporting requirements or timetables that take into account the resources available to small entities;
- Clarifying, consolidating or simplifying compliance and reporting requirements under the rules for small entities;
- Using performance rather than design standards; and
- Exempting small entities from all or part of the requirements.

We are proposing to amend Rule 144(d)(3)(ii) to provide that the holding period for the securities acquired upon conversion or exchange of certain market-adjustable securities issued by unlisted issuers would not begin until conversion or exchange. We recognize that the proposal could disproportionately affect small issuers because it is those entities that typically issue market-adjustable securities [137] but we believe this proposal would benefit issuers and investors by mitigating the risk of unregistered distributions in connection with sales of market-adjustable securities. The features of certain market-adjustable securities, combined with the tacking provisions of Rule 144, can undermine one of the key premises of Rule 144, which is that holding securities at risk for an appropriate period of time prior to resale can demonstrate that the seller did not purchase the securities with a view to distribution and, therefore, is not an underwriter. We could propose to exempt the securities of small entities from the proposed amendment or establish a different holding period for their securities, but doing so would not address the risk that holders may participate in unregistered distributions of the market-adjustable securities of these issuers.

The proposed amendments to mandate the electronic filing of Form 144 clarify and streamline the filing requirements for the form and should benefit all filers, as well as benefit users of the information in Form 144 by facilitating easier access to, and faster retrieval of such information. We do not believe that it is necessary to partially or completely exempt small entities from the proposed amendments to require the electronic filing of Form 144 because the amendments are expected to result in cost benefits on an ongoing basis compared to paper filing, and increased efficiencies for all filers who would be required to file Form 144, including small entities that are filers. We preliminarily believe that it is not necessary to establish different compliance timetables for small entities or to further clarify, consolidate, or simplify the proposed amendments' requirements. But we are proposing a six-month transition period after the effective date of the amendments to Regulation S–T to give Form 144 paper filers who would be first-time electronic filers, including any small entities, sufficient time to apply for codes to make filings on EDGAR. In addition, we solicit comment on whether we should provide a different timetable for paper Form 144 filers to transition to electronic filing.

We have used design rather than performance standards in connection with the proposed filing revisions to Form 144 in order to promote uniform filing requirements and also to facilitate a simpler and less costly filing method for Form 144 filers.

G. Request for Comment

We encourage the submission of comments with respect to any aspect of this Initial Regulatory Flexibility Analysis. In particular, we request comments regarding:

- The number of small entity issuers that may be affected by the proposed amendments;
- The existence or nature of the potential impact of the proposed amendments on small entity issuers discussed in the analysis;
- How the proposed amendments could further lower the burden on small entities; and
- How to quantify the impact of the proposed amendments.

Please describe the nature of any impact and provide empirical data supporting the extent of the impact. Such comments will be considered in the preparation of the Final Regulatory Flexibility Analysis, if the proposed amendments are adopted, and will be placed in the same public file as comments on the proposed amendments themselves.

V. Small Business Regulatory Enforcement Fairness Act

For purposes of the Small Business Regulatory Enforcement Fairness Act of 1996 (''SBREFA''),[138] the Commission must advise OMB as to whether the proposed amendments constitute a ''major'' rule. Under SBREFA, a rule is considered ''major'' where, if adopted, it results, or is likely to result, in:

- An annual effect on the economy of $100 million or more (either in the form of an increase or a decrease);
- A major increase in costs or prices for consumers or individual industries; or
- Significant adverse effects on competition, investment or innovation.

We request comment on whether the proposed amendments would be a ''major rule'' for purposes of SBREFA. We solicit comment and empirical data on: (a) The potential effect on the U.S. economy on an annual basis; (b) any potential increase in costs or prices for consumers or individual industries; and (c) any potential effect on competition, investment or innovation. Commenters are requested to provide empirical data and other factual support for their views to the extent possible.

VI. Statutory Authority

The amendments contained in this release are being proposed under the authority set forth in Sections 4, 6, 7, 8, 10, 19(a), and 28 of the Securities Act, and Sections 3, 16, and 23(a) of the Exchange Act.

List of Subjects in 17 CFR Parts 230, 232, 239, and 249

Reporting and recordkeeping requirements, Securities.

Text of the Proposed Amendments

For the reasons set out in the preamble, the Commission is proposing to amend Title 17, chapter II of the Code of Federal Regulations as follows:

PART 230—GENERAL RULES AND REGULATIONS, SECURITIES ACT OF 1933

■ 1. The authority citation for part 230 continues to read as follows:

Authority: 15 U.S.C. 77b, 77b note, 77c, 77d, 77f, 77g, 77h, 77j, 77r, 77s, 77z–3, 77sss, 78c, 78d, 78j, 78l, 78m, 78n, 78o, 78o–7 note, 78t, 78w, 78ll(d), 78mm, 80a–8, 80a–24, 80a–28, 80a–29, 80a–30, and 80a–37, and Pub. L.

[137] *See supra* note 73 and accompanying text.

[138] Public Law 104–121, Title II, 110 Stat. 857 (1996).

112–106, sec. 201(a), sec. 401, 126 Stat. 313 (2012), unless otherwise noted.

■ 2. Amend § 230.144 by:
■ a. Removing the Preliminary Note;
■ b. Adding introductory text and paragraph (b)(3);
■ c. Revising paragraphs (d)(3)(ii) and (h); and
■ d. Adding Notes 1 through 5 to § 230.144.

The additions and revisions to read as follows:

§ 230.144 Persons deemed not to be engaged in a distribution and therefore not underwriters.

A Notes section appears at the end of this rule to assist in understanding its provisions.

* * * * *

(b) * * *

(3) *Not part of a scheme to evade:* Section 230.144 (Rule 144) is not available to any person with respect to any transaction or series of transactions that, although in technical compliance with this § 230.144, is part of a plan or scheme to evade the registration requirements of the Act.

* * * * *

(d) * * *

(3) * * *

(ii) *Conversions and exchanges.* If the securities sold were acquired from the issuer solely in exchange for other securities of the same issuer, the newly acquired securities shall be deemed to have been acquired at the same time as the securities surrendered for conversion or exchange, even if the securities surrendered were not convertible or exchangeable by their terms, unless:

(A) The newly acquired securities were acquired from an issuer that, at the time of conversion or exchange, does not have a class of securities listed, or approved for listing, on a national securities exchange registered pursuant to Section 6 of the Exchange Act (15 U.S.C. 78f); and

(B) The convertible or exchangeable security contains terms, such as conversion rate or price adjustments, that offset, in whole or in part, declines in the market value of the underlying securities occurring prior to conversion or exchange, other than terms that adjust for stock splits, dividends or other issuer-initiated changes in its capitalization.

Note 1 to paragraph (d)(3)(ii). If the surrendered securities originally did not provide for cashless conversion or exchange by their terms and the holder provided consideration, other than solely securities of the same issuer, in connection with the amendment of the surrendered securities to permit cashless conversion or exchange, then the newly acquired securities shall be deemed to have been acquired at the same time as such amendment to the surrendered securities, so long as, in the conversion or exchange, the securities sold were acquired from the issuer solely in exchange for other securities of the same issuer.3

* * * * *

(h) *Notice of sale or proposed sale.* (1) If the issuer is, and has been for a period of at least 90 days immediately before the sale, subject to the reporting requirements of section 13 or 15(d) of the Exchange Act and the amount of securities to be sold in reliance upon this rule during any period of three months exceeds 5,000 shares or other units or has an aggregate sale price in excess of $50,000, a notice on Form 144 (§ 239.144 of this chapter) shall be filed electronically with the Commission.

(2) The Form 144 shall be signed by the security holder and shall be filed before the end of the second business day following the day on which the subject transaction has been executed. Provided however, if the transaction satisfies the affirmative defense conditions of § 240.10b5–1(c) of this chapter, and the security holder does not select the date of execution, the date on which the executing broker, dealer or plan administrator notifies the security holder of the execution of the transaction is deemed the date of execution for a transaction. Neither the filing of such notice nor the failure of the Commission to comment on such notice shall be deemed to preclude the Commission from taking any action that it deems necessary or appropriate with respect to the sale of the securities referred to in such notice. The security holder filing the notice required by this paragraph shall have sold or have a bona fide intention to sell the securities referred to in the notice within a reasonable time after the filing of such notice.

Note 1 to § 230.144. Certain basic principles are essential to an understanding of the registration requirements in the Securities Act of 1933 (the Act or the Securities Act) and the purposes underlying Rule 144. If any person sells a non-exempt security to any other person, the sale must be registered unless an exemption can be found for the transaction. Section 4(a)(1) of the Securities Act provides one such exemption for a transaction ''by a person other than an issuer, underwriter, or dealer.'' Therefore, an understanding of the term ''underwriter'' is important in determining whether or not the Section 4(a)(1) exemption from registration is available for the sale of the securities.

Note 2 to § 230.144. Section 2(a)(11) of the Securities Act defines the term ''underwriter'' broadly to mean any person who has purchased from an issuer with a view to, or offers or sells for an issuer in connection with, the distribution of any security, or participates, or has a direct or indirect participation in any such undertaking, or participates or has a participation in the direct or indirect underwriting of any such undertaking. The interpretation of this definition traditionally has focused on the words ''with a view to'' in the phrase ''purchased from an issuer with a view to . . . distribution.'' An investment banking firm which arranges with an issuer for the public sale of its securities is clearly an ''underwriter'' under that section. However, individual investors who are not professionals in the securities business also may be ''underwriters'' if they act as links in a chain of transactions through which securities move from an issuer to the public.

Note 3 to § 230.144. Since it is difficult to ascertain the mental state of the purchaser at the time of an acquisition of securities, prior to and since the adoption of Rule 144, subsequent acts and circumstances have been considered to determine whether the purchaser took the securities ''with a view to distribution'' at the time of the acquisition. Emphasis has been placed on factors such as the length of time the person held the securities and whether there has been an unforeseeable change in circumstances of the holder. Experience has shown, however, that reliance upon such factors alone has led to uncertainty in the application of the registration provisions of the Act.

Note 4 to § 230.144. The Commission adopted Rule 144 to establish specific criteria for determining whether a person is not engaged in a distribution. Rule 144 creates a safe harbor from the Section 2(a)(11) definition of ''underwriter.'' A person satisfying the applicable conditions of the Rule 144 safe harbor is deemed not to be engaged in a distribution of the securities and therefore not an underwriter of the securities for purposes of Section 2(a)(11). Therefore, such a person is deemed not to be an underwriter when determining whether a sale is eligible for the Section 4(a)(1) exemption for ''transactions by any person other than an issuer, underwriter, or dealer.'' If a sale of securities complies with all of the applicable conditions of Rule 144: Any affiliate or other person who sells

restricted securities will be deemed not to be engaged in a distribution and therefore not an underwriter for that transaction; any person who sells restricted or other securities on behalf of an affiliate of the issuer will be deemed not to be engaged in a distribution and therefore not an underwriter for that transaction; and the purchaser in such transaction will receive securities that are not restricted securities.

Note 5 to § 230.144. Rule 144 is not an exclusive safe harbor. A person who does not meet all of the applicable conditions of Rule 144 still may claim any other available exemption under the Act for the sale of the securities.

PART 232—REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

■ 3. The general authority citation for part 232 continues to read as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s(a), 77z–3, 77sss(a), 78c(b), 78*l,* 78m, 78n, 78o(d), 78w(a), 78*ll,* 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–37, 7201 *et seq.;* and 18 U.S.C. 1350, unless otherwise noted.

■ 4. Amend § 232.101 by adding paragraph (a)(1)(xxii), and removing and reserving paragraphs (b)(4) and (c)(6), to read as follows:

§ 232.101 Mandated electronic submissions and exceptions.

(a) * * *

(1) * * *

(xxii) Form 144 (§ 239.144 of this chapter), where the issuer of the securities is subject to the reporting requirements of Section 13 or 15(d) of the Exchange Act (15 U.S.C. 78m or 78o(d), respectively).

* * * * *

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

■ 5. The general authority citation for part 239 continues to read as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s, 77z–2, 77z–3, 77sss, 78c, 78l, 78m, 78n, 78o(d), 78o–7 note, 78u–5, 78w(a), 78ll, 78mm, 80a–2(a), 80a–3, 80a–8, 80a–9, 80a–10, 80a–13, 80a–24, 80a–26, 80a–29, 80a–30, and 80a–37; and sec. 107, Pub. L. 112–106, 126 Stat. 312, unless otherwise noted.

■ 6. Amend § 239.144 by revising paragraphs (a) and (b) to read as follows:

(a) Except as indicated in paragraph (b) of this section, each person who intends to sell securities in reliance upon § 230.144 of this chapter shall file this form in electronic format by means of the Commission's Electronic Data, Gathering, Analysis, and Retrieval system (EDGAR) in accordance with the EDGAR rules set forth in Regulation S–T (17 CFR part 232 of this chapter).

(b) This form need not be filed if the amount of securities to be sold during any period of three months does not exceed 5,000 shares or other units and the aggregate sale price does not exceed $50,000.

* * * * *

■ 7. Amend Form 144 (referenced in § 239.144) by:

■ a. Removing the title text ''NOTICE OF PROPOSED SALE OF SECURITIES PURSUANT TO RULE 144 UNDER THE SECURITIES ACT OF 1933'' and add in its place ''NOTICE OF SALE OR PROPOSED SALE OF SECURITIES PURSUANT TO RULE 144 UNDER THE SECURITIES ACT OF 1933'';

■ b. Removing the text ''ATTENTION: Transmit for filing 3 copies of this form concurrently with either placing an order with a broker to execute sale or executing a sale directly with a market maker.'' and add in its place ''ATTENTION: This form must be filed in electronic format by means of the Commission's Electronic Data Gathering, Analysis, and Retrieval system (EDGAR) in accordance with the EDGAR rules set forth in Regulation S–T (17 CFR part 232). For assistance with technical questions about EDGAR or to request an access code, call the EDGAR Filer Support Office at (202) 551–8900.'';

■ c. Removing the text ''INSTRUCTION: The person filing this notice should contact the issuer to obtain the I.R.S. Identification Number and the SEC. File Number.'' and add in its place ''INSTRUCTION: The filer should contact the issuer to obtain the SEC. File Number.'';

■ d. Removing the data field box ''1(b)'';

■ e. Redesignating the data field boxes 1(c) through 1(e) as 1(b) through 1(d);

■ f. Removing the data field box ''2(c)'';

■ g. Removing Instructions 1(b) and 2(c);

■ h. Redesignating Instructions 1(c) through 1(e) as 1(b) through 1(d); and

■ i. Removing ''(d) Aggregate market value of the securities to be sold as of a specified date within 10 days prior to the filing of this notice'' and add in its place ''(d) Aggregate market value of the securities to be sold as of a specified date within 10 days prior to the filing of this notice. For completed sales, provide instead the total sales proceeds (amount of securities sold multiplied by the price per share)''.

Note: The text of Form 144 does not and this amendment will not appear in the Code of Federal Regulations.

PART 249—FORMS, SECURITIES EXCHANGE ACT OF 1934

■ 8. The general authority citation for part 249 continues to read as follows:

Authority: 15 U.S.C. 78a *et seq.* and 7201 *et seq.;* 12 U.S.C. 5461 et seq.; 18 U.S.C. 1350; Sec. 953(b) Pub. L. 111–203, 124 Stat. 1904; Sec. 102(a)(3) Pub. L. 112–106, 126 Stat. 309 (2012), Sec. 107, Pub. L. 112–106, 126 Stat. 313 (2012), and Sec. 72001 Pub. L. 114–94, 129 Stat. 1312 (2015), unless otherwise noted.

* * * * *

■ 9. Amend Form 4 (referenced in § 249.104) by:

■ a. Adding new General Instruction 10; and

■ b. Adding text and a check box at the top of the first page immediately below the text ''Check this box if no longer subject to Section 16. Form 4 or Form 5 obligations may continue. *See* Instruction 1(b).''

The additions to read as follows:

Note: The text of Form 4 does not, and this amendment will not, appear in the Code of Federal Regulations.

BILLING CODE 8011–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2020–0523; FRL–10017–10–Region 9]

Air Plan Approval; California; Feather River Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a revision to the Feather River Air Quality Management District (FRAQMD or ''District'') portion of the California State Implementation Plan (SIP). This revision concerns emissions of volatile organic compounds (VOCs) from surface preparation and clean-up operations. We are proposing to approve a local rule to regulate these emission sources under the Clean Air Act (CAA or the ''Act''). We are taking comments on this proposal and plan to follow with a final action.

DATES: Comments must be received on or before February 18, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. is EPA–R09–OAR–2020–0523 at *https://www.regulations.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Christine Vineyard, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4125 or by email at *vineyard.christine@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

Table of Contents

I. The State's Submittal

A. What rule did the State submit?

Table 1 lists the rule addressed by this proposal with the date that it was adopted by the local air agency and submitted by the California Air Resources Board (CARB).

TABLE 1—SUBMITTED RULE

Local agency	Rule No.	Rule title	Amended	Submitted
FRAQMD	3.14	Surface Preparation and Clean-up	08/01/16	01/24/17

On April 17, 2017, the EPA determined that the submittal for FRAQMD Rule 3.14 met the completeness criteria in 40 CFR part 51, appendix V, which must be met before formal EPA review.

B. Are there other versions of this rule?

We approved an earlier version of Rule 3.14 into the SIP on April 23, 2015 (80 FR 22646). The FRAQMD adopted revisions to the SIP-approved version on August 1, 2016, and CARB submitted them to us on January 24, 2017.

C. What is the purpose of the submitted rule revision?

Emissions of VOCs contribute to the production of ground-level ozone, (or ''smog'') and particulate matter, which harm human health and the environment. Section 110(a) of the CAA requires states to submit regulations that control VOC emissions. Rule 3.14 was

revised to be consistent with the CARB Suggested Control Measure (SCM) for Automotive Coatings and Components by simplifying coating categories, lowering VOC limits and modifying recordkeeping and labeling requirements. The EPA's technical support document (TSD) has more information about this rule.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the rule?

Rules in the SIP must be enforceable (see CAA section 110(a)(2)), must not interfere with applicable requirements concerning attainment and reasonable further progress or other CAA requirements (see CAA section 110(l)), and must not modify certain SIP control requirements in nonattainment areas without ensuring equivalent or greater emissions reductions (see CAA section 193).

Generally, SIP rules must require reasonably available control technology (RACT) for each category of sources covered by a Control Techniques Guidelines (CTG) document as well as each major source of VOCs in ozone nonattainment areas classified as Moderate or above (see CAA section 182(b)(2)).

CAA Guidance and policy documents that we used to evaluate enforceability, revision/relaxation and rule stringency requirements for the applicable criteria pollutants include the following:

1. ''State Implementation Plans; General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990,'' 57 FR 13498 (April 16, 1992); 57 FR 18070 (April 28, 1992).
2. ''Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations,'' EPA, May 25, 1988 (the Bluebook, revised January 11, 1990).
3. ''Guidance Document for Correcting Common VOC & Other Rule Deficiencies,'' EPA Region 9, August 21, 2001 (the Little Bluebook).
4. ''Control of Volatile Organic Emissions from Solvent Metal Cleaning,'' EPA–450/2–77–022, November 1977 (*http://www.epa.gov/ozonepollution/SIPToolkit/ctgs.html*)
5. ''Control Techniques Guidelines for Industrial Cleaning Solvents,'' EPA–453/R–06–001, September 2006 (*http://www.epa.gov/ozonepollution/SIPToolkit/ctgs.html*)

B. Does the rule meet the evaluation criteria?

The FRAQMD regulates an ozone nonattainment area classified as Severe nonattainment. The District is a bi-county agency that administers local, state, and federal air quality management programs for Yuba and Sutter Counties. Portions of the District have been designated as Moderate or above nonattainment for failure to meet the federal 8-hour ground-level ozone standard. The submitted SIP rule does not fully meet RACT because the rule contains an exemption for any solvent degreasing operations subject to the National Emission Standards for Hazardous Air Pollutants (NESHAP) requirements of 40 CFR part 63, subpart T—National Emission Standards for Halogenated Solvent Cleaning. However, EPA approved a negative declaration for this category in the FRAQMD's 2008 ozone standard RACT SIP. (80 FR 38959, July 8, 2015). Therefore, Rule 3.14 does not need to meet RACT requirements. Despite this, we believe it is helpful, for informational purposes, to compare Rule 3.14 to other RACT rules in effect in other California districts. This comparison is set forth in our TSD and we believe Rule 3.14 contains RACT-level control requirements, except for the NESHAP exemption, that will strengthen the SIP. In addition, the District has submitted a negative declaration for this source category in the FRAQMD's 2015 ozone standard RACT SIP. We will evaluate the FRAQMD's 2015 ozone standard RACT SIP in a future rulemaking.

C. The EPA's Recommendations to Further Improve the Rule

The TSD also includes recommendations for the next time the local agency modifies the rule.

D. Public Comment and Proposed Action

As authorized in section 110(k)(3) of the Act, the EPA proposes to fully approve the submitted rule because it fulfills all relevant requirements. We will accept comments from the public on this proposal until February 18, 2021. If we take final action to approve the submitted rule, our final action will incorporate this rule into the federally enforceable SIP.

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the FRAQMD Rule described in Table 1 of this preamble. The EPA has made, and will continue to make, these materials available through *https://www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible

methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: November 23, 2020.

John Busterud,

Regional Administrator, EPA Region IX.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R07–OAR–2020–0711; FRL–10019–24–Region 7]

Air Plan Approval; Kansas; Removal of Kansas City, Kansas Reid Vapor Pressure Fuel Requirement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing approval of revision to the Kansas State Implementation Plan (SIP), submitted by the Kansas Department of Health and the Environment (KDHE) on December 9, 2020. The proposed revision removes the Kansas City, Kansas seven pounds per square inch Reid Vapor Pressure (RVP) Fuel requirement which required gasoline sold in the Kansas City, Kansas area to have a seven pounds per square inch Reid Vapor Pressure from June 1 to September 15. The rest of the state is subject to the Clean Air Act (CAA) nine pounds per square inch Reid Vapor Pressure from June 1 to September 15. If approved the Kansas City, Kansas area would be subject to the Clean Air Act Reid Vapor Pressure Fuel requirement. In addition, EPA anticipates issuing a separate proposal for the Missouri side of the Kansas City metro area.

DATES: Comments must be received on or before February 18, 2021.

ADDRESSES: You may send comments, identified by Docket ID No. EPA–R07–OAR–2020–0711 to *https://www.regulations.gov.* Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received will be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Written Comments'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Jed Wolkins, Environmental Protection Agency, Region 7 Office, Air Quality Planning Branch, 11201 Renner Boulevard, Lenexa, Kansas 66219; telephone number: (913) 551–7588; email address: *wolkins.jed@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. Written Comments

Submit your comments, identified by Docket ID No. EPA–R07–OAR–2020–0711, at *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

II. What is being addressed in this document?

The EPA is proposing to approve a revision to the Kansas SIP, submitted by the KDHE on December 9, 2020. The proposed revision removes the Kansas City, Kansas; Johnson and Wyandotte Counties; 7.0 Reid Vapor Pressure (RVP) Fuel requirement. The approved SIP, K.A.R. 28–19–719, requires gasoline sold in the two counties to have a RVP of seven pounds per square inch (psi) or less from June 1 through September 15.[1] If the SIP revision is approved, the Kansas City, Kansas area would be subject to the CAA RVP requirement of nine psi or less from June 1 through September 15.[2] Kansas has asked EPA to remove K.A.R. 28–19–719 Fuel Volatility from the SIP.

III. Have the requirements for approval of a SIP revision been met?

The State submission has met the public notice requirements for SIP submissions in accordance with 40 CFR 51.102. The submission also satisfied the completeness criteria of 40 CFR part 51, appendix V. The State provided public notice on this SIP revision from August 27, 2020 to November 4, 2020 and received eight comments. Kansas adequately responded to all eight comments, as noted in the State submission included in the docket for this action, but did not make any changes to the removal based on the comments received.

In addition, as explained below, the revision meets the substantive SIP requirements of the CAA, including section 110 and implementing regulations.

IV. Background

The EPA established a 1-hour ozone NAAQS in 1971.[3] 36 FR 8186 (April 30, 1971). On March 3, 1978, the EPA designated Johnson and Wyandotte counties (hereinafter referred to in this document as the ''Kanas City area'') in nonattainment of the 1971 1-hour ozone

[1] The Kansas rule allows an additional one psi for gasoline containing 9 to 10% ethanol.

[2] The CAA allows an additional one psi for gasoline containing up to 15% ethanol.

[3] The 1-hour ozone NAAQS was originally promulgated as a photochemical oxidant standard. See 36 FR 8186 (April 30, 1971). In 1979, the EPA substituted the word ''ozone'' for ''photochemical oxidant''. See 44 FR 8202 (February 8, 1979). In doing so, the EPA stated that ''(t)he intent of the standard (total-oxidant reduction), the control strategies, and the index of progress toward attainment (measured ozone levels) remain unchanged.'' Id. at 8203.

NAAQS, as required by the CAA Amendments of 1977. 43 FR 8996 (March 3, 1978). On February 8, 1979, the EPA revised the 1-hour ozone NAAQS, referred to as the 1979 ozone NAAQS. 44 FR 8202 (February 8, 1979).

The EPA redesignated the Kansas City area to attainment of the 1979 1-hour ozone standard and approved the ozone maintenance plan on July 23, 1992. 57 FR 27936 (June 23, 1992). Pursuant to section 175A of the CAA, the first 10-year maintenance period for the 1-hour ozone standard began on July 23, 1992, the effective date of the redesignation approval.

In 1995, the Kansas City area violated the 1979 1-hour ozone standard. Kansas revised the control strategy and contingency measures in the maintenance plan, which was approved on December 30, 2002. 67 FR 66058 (October 30, 2002). The revised control strategy included K.A.R. 28–19–719, *Fuel Volatility.*

On May 2, 1997, Kansas adopted the seven and two tenths (7.2) pounds per square inch (psi) Reid Vapor Pressure (RVP) limit from June 1 to September 15.[4] EPA approved this rule into the SIP on July 7, 1997. 62 FR 36212 (July 7, 1997). Following a violation of the ozone standard for the three-year period of 1995–1997, on April 3, 2001, Kansas revised the rule to seven (7.0) psi limit from June 1 to September 15.[5] EPA approved this rule into the SIP on February 13, 2002. 67 FR 6655 (February 13, 2002.

On April 30, 2004, the EPA published a final rule in the **Federal Register** stating the 1979 ozone NAAQS would no longer apply (*i.e.,* would be revoked) for an area one year after the effective date of the area's designation for the 8-hour ozone NAAQS. 69 FR 23951 (April 30, 2004). The Kansas City Area was designated as an unclassifiable area for the 1997 8-hour ozone NAAQS, effective June 15, 2004. *See id.* However, on May 3, 2005, EPA published a final rule designating the Kansas City area as an attainment area for the 1997 8-hour ozone NAAQS based on new monitoring data. *See* 70 FR 22801 (May 3, 2005). The effective date of the revocation of the 1979 1-hour ozone standard for the Kansas City area was June 15, 2005. *See* 70 FR 44470 (August 3, 2005). Kansas achieved the required maintenance of the 1979 1-hour ozone standard in 2014.

On, December 9, 2020, Kansas requested that the EPA remove K.A.R. 28–19–719 from the SIP. Section 110(l) of the CAA prohibits EPA from approving a SIP revision that interferes with any applicable requirement concerning attainment and reasonable further progress (RFP), or any other applicable requirement of the CAA.

V. What is the EPA's analysis of Kansas' SIP request

EPA is making the preliminary determination that the ozone NAAQS is the primary focus for the noninterference demonstration required by section 110(l) of the CAA because the RVP requirements results primarily in emissions benefits for VOCs and NO_X. VOCs and NO_X emissions are precursors for ozone. NO_X emissions are precursors for particulate matter. NO_2 is a component of NO_X. There are no emissions reductions attributable to the emissions of carbon monoxide (CO), lead and sulfur dioxide (SO_2) from RVP requirements.

In Kansas' December 9, 2020 submission the State provided a technical demonstration to support the request to remove Kansas' 7.0 psi RVP requirement from the active measures portions of the Kansas SIP. In that technical demonstration, Kansas provided Motor Vehicle Emissions Simulator (MOVES) results, modeling the emissions of VOCs and NO_X associated with changing the high ozone season RVP requirements from the state-level requirement of 7.0 psi to the federal requirement of 9.0 psi. EPA evaluated the state's assumptions and inputs used in MOVES, and EPA finds the state analysis is appropriate. Specifically, KDHE compared what the projected emissions in the year 2020 (the year the program is requested to be rescinded) would be, assuming a RVP level of 7.0 psi and 9.0 psi, respectively, in two separate modeling simulations. The comparison revealed an increase in emissions of 0.07 tons for NO_X and 0.37 tons for VOC, per ozone season day, would result from the change to the federal requirement from June 1 through September 15. While the modeling showed a slight increase in NO_X and VOC emissions resulting from the use of 9.0 psi RVP as opposed to 7.0 psi, the most appropriate analysis is whether emissions in the future years would increase and potentially interfere with maintenance of the NAAQS. The State compared actual emissions from 2017 using a RVP of 7.0 psi to emissions modelled for the years 2020 using a RVP of 9.0 psi. Table 1 below provides the results of this analysis.

TABLE 1—COMPARATIVE EMISSIONS FOR CHANGE TO RVP

	2017 7.0 psi RVP (tons per ozone season day)	2020 7.0 psi RVP (tons per ozone season day)	2020 9.0 psi RVP (tons per ozone season day)	Decrease in 2020 9.0 psi RVP compared to 2017 7.0 psi RVP (tons per ozone season day)
NO_X	29.42	22.42	22.49	6.93
VOC	19.26	16.88	17.25	2.01

As Table 1 indicates, NO_X and VOC emissions in the Kansas City Area would decrease from 2017 to 2020, even with the increase due to ozone season fuel RVP of 9.0 psi. The modeling demonstration shows the slight increase in emissions is being mitigated area-wide by a steady decrease in tailpipe emissions. This is the result of a cleaner new vehicle fleet replacing the older fleet[6] and the decrease in the sulfur content in gasoline as required by EPA's Tier 3 motor vehicle emission and fuel standards, which were implemented beginning on January 1, 2017.[7]

[4] The Kansas rule allowed an additional one psi for gasoline containing 9 to 10% ethanol. See 62 FR 36212 (July 7, 1997).

[5] The Kansas rule allows an additional one psi for gasoline containing 9 to 10% ethanol. See 67 FR 6655 (February 13, 2002).

[6] As vehicle owners purchase new vehicles, the older vehicles slowly are removed from the vehicles on the road. A used vehicle maybe purchased and driven by several owners, but eventually the older, more polluting vehicles are removed from the road. Manufacturers' fleets in 1994 are allowed 0.6 gram/mile NO_X emissions. Manufacturers' fleets in 2004 are allowed 0.07 gram/mile No_X emissions. Manufacturers' fleets in 2025 will be allowed 0.03 gram/mile NO_X emissions.

[7] Control of Air Pollution From Motor Vehicles: Tier 3 Motor Vehicle Emission and Fuel Standards (See 79 FR 23414, April 28, 2014.)

The Kansas City, Kansas area is designated attainment/unclassifiable or attainment for the 1979, 1997, 2008, and 2015 ozone standards. While the 1979 maintenance plan is approved into the SIP, the 1979 NAAQS has been revoked for the Kansas City area. There are no other ozone maintenance plans for the Kansas City area in the SIP. The highest monitor design value in the Kansas City area is 68 parts per billion (ppb), which is below the 2015 ozone NAAQS of 70 ppb.[8] Based on the state's modeling analysis, along with air quality data, EPA is making the preliminary determination that the slight increase in NO_X and VOC emissions resulting from the use of 9.0 psi RVP fuel will not interfere with the Kansas City area's ability to maintain the ozone NAAQS, or any other applicable requirement. The EPA is making this determination based on MOVES modeling that indicates that on-road VOC and NO_X emissions in 2020 with gasoline meeting the 9.0 psi RVP requirement remain below the emissions levels in 2017, a year in which the area's design value was also below the 2015 ozone standard of 70 ppb.

The Kansas City area is designated as attainment or unclassifiable for the 2006 24-hour $PM_{2.5}$, 2012 annual $PM_{2.5}$, 1971 annual NO_2, and 2010 1-hour NO_2 standards. There are no maintenance plans for any of these standards. The highest $PM_{2.5}$ design value is 79% of the standard. The highest NO_2 design value is 42% of the standard. As discussed above the area has a decrease from 2017 to 2020 NO_X and VOC emissions. Based on this data together with air quality data, EPA is making the preliminary determination that the slight increase in NO_X and VOC emissions in 2020 and the downward trend in on-road VOC and NO_X emissions resulting from this change will not interfere with the Area's ability to maintain the any $PM_{2.5}$ or NO_2 NAAQS, or any other applicable requirement.

The Kansas City area is designated as attainment or unclassifiable for the SO_2 standards. There are no maintenance plans for any of these standards. The most recent (2017–2019) highest SO_2 design value is less than 8% of the standard. The RVP standard has no effect on SO_2 emissions. Based on this data together with air quality data, EPA is making the preliminary determination that the change will not interfere with the Area's ability to attain or maintain the SO_2 NAAQS, or any other applicable requirement.

The Kansas City area is designated as attainment or unclassifiable for the CO and lead standards. There are no maintenance plans for any of these standards. The highest CO design value is less than 18% of the standard. There is no lead monitoring in the area. The RVP standard has no effect on CO or lead emissions. Based on this data together with air quality data, EPA is making the preliminary determination that the change will not interfere with the area's ability to maintain the CO or lead NAAQS, or any other applicable requirement.

Kansas has no federal Class I areas. EPA is making the preliminary determination that the small emission increase will not interfere with reasonable progress towards natural visibility in surrounding states Class I areas that Kansas might impact due to the small magnitude of emissions increase.

VI. What action is the EPA taking?

We are proposing to approve Kansas' removal of the state RVP requirement from the SIP for the Kansas City, Kansas area. As discussed above the removal of the RVP requirement will not affect the area's ability to attain or maintain any air quality standard. We are processing this as a proposed action because we are soliciting comments on this proposed action. Final rulemaking will occur after consideration of any comments.

VII. Incorporation by Reference

In this document, the EPA is proposing to amend regulatory text that includes incorporation by reference. As described in the proposed amendments to 40 CFR part 52 set forth below, the EPA is proposing to remove provisions of the EPA-Approved Kansas Regulations from the Kansas State Implementation Plan, which is incorporated by reference in accordance with the requirements of 1 CFR part 51.

VIII. Statutory and Executive Order Reviews

Under the Clean Air Act (CAA), the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866.
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of the National Technology Transfer and Advancement Act (NTTA) because this rulemaking does not involve technical standards; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping

[8] Based on the most recent quality assured data design values (2017–2019). The monitor in question is on the Missouri side of the Kansas City. The highest 4th high value on the Kansas side of Kansas City was 62 ppb.

requirements, Sulfur oxides, Volatile organic compounds.

Dated: December 21, 2020.

James Gulliford,

Regional Administrator, Region 7.

For the reasons stated in the preamble, the EPA proposes to amend 40 CFR part 52 as set forth below:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart R—Kansas

§ 52.870 [Amended]

■ 2. In § 52.870, the table in paragraph (c) is amended by removing the entry ''K.A.R. 28–19–719'' under the heading ''Volatile Organic Compound Emissions''.

■ 3. In § 52.873, paragraph (a) is revised to read as follows:

§ 52.873 Approval status.

(a) Kansas rule K.A.R. 28–19–719 was rescinded on February 18, 2021.

[EPA–R04–OAR–2020–0187; FRL–10016–71–Region 4]

Air Plan Approval; North Carolina; Revisions to Exclusionary Rules and Permit Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve portions of revisions to a State Implementation Plan (SIP) submitted by the State of North Carolina through the North Carolina Department of Environmental Quality, Division of Air Quality (DAQ), on September 18, 2009, and July 10, 2019. These SIP revisions seek to modify the State's rules that define the categories of facilities that are exempted from Title V permitting requirements by limiting their potential emissions (''exclusionary rules'') and the categories of facilities that are exempted from the State's rules that address the permitting requirements for non-Title V facilities (''permit exemption rules''). EPA is proposing to approve this revision pursuant to the Clean Air Act (CAA or Act).

DATES: Comments must be received on or before February 18, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2020–0187 at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Pearlene Williams, Air Regulatory Management Section, Air Planning and Implementation Branch, Air and Radiation Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Ms. Williams can be reached via telephone at (404) 562–9144, or via electronic mail at *williams.pearlene@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

A. Submittal—September 18, 2009

On September 18, 2009, DAQ submitted revisions to 15A North Carolina Administrative Code (NCAC) Subchapter 02Q, Section .0902, *Temporary Crushers,*[1] for review and approval into the SIP. These changes are part of North Carolina's permit exemption rules at Section .0900 that define the categories of facilities that are exempted from the State's regulations that address the permitting requirements for non-Title V facilities. These changes are discussed in more detail in Section II.

B. Submittal—July 10, 2019

On July 10, 2019, DAQ submitted SIP revisions to EPA with changes to the following rules in 15A NCAC 02Q Section .0800 that define the categories of facilities that are exempted from Title V permitting requirements by limiting their potential emissions: Section .0801, *Purpose and Scope;* Section .0802, *Gasoline Service Stations and Dispensing Facilities;* Section .0803, *Coating, Solvent Cleaning, Graphic Arts Operations;* Section .0804, *Dry Cleaning Facilities;* Section .0805, *Grain Elevators;* Section .0806, *Cotton Gins;* and Section .0807, *Emergency Generators;* and Section .0809, *Concrete Batch Plants.*[2] The July 10, 2019, SIP revisions also contain changes to the following permit exemption rules: Section .0901, *Purpose and Scope;* and Section .0902, *Temporary Crushers.* These changes are discussed in more detail in Section II.

II. Analysis of the State Submittals

The revisions that are the subject of this proposed rulemaking make changes to exclusionary rules and permit exemption rules under Subchapter 2Q[3] of the North Carolina SIP. These changes revise the recordkeeping and reporting requirements of the exclusionary rules; remove Section .0809, *Concrete Batch Plants;* revise the provisions of Section .0902, *Temporary Crushers;* and revise language and reformat the regulatory citations contained in the exclusionary and permit exemption rules. Detailed descriptions of the changes are provided below.

Section .0801, *Purpose and Scope,* is revised to modify language and reformat the regulatory citations of this section. In addition, the recordkeeping and reporting requirement exemptions are removed. New paragraphs have been created using the existing text of this section. The language changes in this section pertain to updates to subject-verb agreements and word tense. EPA is proposing to approve these changes to these rules because they are grammatical and organizational in

[1] DAQ supplemented the September 18, 2009, submittal in a letter dated June 7, 2019, which includes the correct redline/strikeout of the regulatory changes and final regulations that became state effective on January 1, 2009. This letter is available in the docket for this proposed rulemaking.

[2] The State submitted the revisions following the readoption of several air regulations. These include: .0801, .0802, .0803, .0804, .0805, .0806, .0807, .0809, .0901, and .0902, and were submitted pursuant to North Carolina's 10-year regulatory readoption process at North Carolina General Statute 150B–21.3A.

[3] In the table of North Carolina regulations federally approved into the SIP at 40 CFR 52.1770(c), 15A NCAC 02Q is referred to as ''Subchapter 2Q Air Quality Permits.''

nature and therefore do not interfere with any applicable requirement concerning attainment or any other applicable requirement of the Act.

North Carolina submitted changes to several rules within Section .0800 which do not alter the meaning or make significant changes to those rules. Specifically, the following rules are submitted with changes to update a cross-reference to where the ''responsible official'' at a facility is defined in the North Carolina regulations, reformat regulatory citations, make minor language edits, and correct typographical errors, where applicable: Sections .0802, *Gasoline Service Stations and Dispensing Facilities;*[4] .0803, *Coating, Solvent Cleaning,*[5] *Graphic Arts Operations;* .0804, *Dry Cleaning Facilities;* .0805, *Grain Elevators;* .0806, *Cotton Gins;* .0807, *Emergency Generators;* and Section .0901, *Purpose and Scope.* EPA is proposing to approve these changes to these rules because they do not alter the meaning of the regulations. . . .

DAQ has repealed Section .0809, *Concrete Batch Plans* and is proposing to remove it from the SIP. This rule covered certain sizes of concrete batch plants that use fabric filters or equivalently effective control devices to control particulate emissions to limit production such that the potential to emit (PTE) would remain below applicable Title V thresholds as determined by the State. Under the rule, these facilities were not required to obtain major source operating permits pursuant to 02Q .0500, *Title V Procedures.* Section .0809 functioned as a flexible permitting mechanism to cover certain types of concrete batch plants that wished to avoid Title V permitting. Sources previously covered by this rule can elect to obtain synthetic minor operating permits pursuant to 02Q .0315, *Synthetic Minor Facilities,* or otherwise have the option to obtain a Title V permit pursuant to 02Q .0500 if their PTE is above the Title V thresholds. EPA has preliminarily determined that repealing Section .0809 does not interfere with any applicable requirement concerning attainment or any other applicable requirement of the Act because it simply removes a mechanism sources could use to avoid Title V permitting. Accordingly, EPA is proposing to remove Section .0809 from the SIP.

Section .0902, *Temporary Crushers,* is revised with edits from the September 18, 2009,[6] and July 10, 2019, submittals that include clarifying edits, changes to formatting, minor modifications to language, correction of typographical errors, and renumbering.[7] First, the permit exemption regarding temporary crushers is revised to remove language related to the diesel fuel burning equipment at these facilities. Previously, to qualify for the exemption from 02Q .0300, *Construction and Operating Permits,* temporary crushers that used a diesel-fired generator or diesel engine to drive the crusher could not burn more than 17,000 gallons of diesel at the facility. North Carolina explains that removing this language is necessary because DAQ does not regulate engines such as these, which are subject to Title II of the CAA, *Emissions Standards for Moving Sources.* Any associated engines at such temporary sources would be defined as portable and, as such, not considered part of a stationary source. Therefore, the effect of removing these engines from the rule exempting temporary crushers is clarifying in nature and does not alter existing permitting requirements. The edits also add a new paragraph (i), which requires an owner or operator of a crusher to apply for and receive an air quality permit before beginning operations (should they plan to operate for more than twelve months). Other revisions include updated cross-references to applicable rules and updated recordkeeping and reporting requirements to reflect the removal of these engines from the exemption. Remaining edits include updates to numbering, minor changes to existing language, and correction of typographical errors. EPA is proposing to approve these minor and clarifying changes to Section .0902 because they do not interfere with any applicable requirement concerning attainment or any other applicable requirement of the Act.

III. Incorporation by Reference

In this notice, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference the following sections of 15A NCAC Subchapter 02Q with a state-effective date of April 1, 2018: Section .0801, *Purpose and Scope;* Section .0802, *Gasoline Service Stations and Dispensing Facilities;* Section .0803, *Coating, Solvent Cleaning, Graphic Arts Operations;* Section .0804, *Dry Cleaning Facilities;* Section .0805, *Grain Elevators;* Section .0806, *Cotton Gins;* Section .0807, *Emergency Generators;* Section .0901, *Purpose and Scope* and Section .0902, *Temporary Crushers* (with the exception of .0902(d)). EPA is also proposing to remove North Carolina regulation 15A NCAC Subchapter 02Q Section .0809, *Concrete Batch Plants,* from the North Carolina SIP, which is incorporated by reference in accordance with the requirements of 1 CFR part 51. These changes are proposed to revise the recordkeeping and reporting requirements of the permitting exclusionary rules, remove the ''Concrete Batch Plants'' regulation, revise language, and reformat the regulatory citations contained in these regulations. EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 4 office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Proposed Action

EPA is proposing to approve the changes described above to the North Carolina SIP submitted by the State of North Carolina on September 18, 2009, and July 10, 2019. The changes under Subchapter 02Q Section .0801, *Purpose and Scope;* Section .0802, *Gasoline Service Stations and Dispensing*

[4] 15 NCAC 02Q .0802(c) includes a typographical error that inadvertently changed the word ''for'' to ''form'' instead of the correct word ''from.''

[5] EPA previously approved changes to .0803, *Coating Solvent Cleaning,* state effective April 1, 2001 (as transmitted in an April 16, 2001, SIP revision), on August 8, 2002 (67 FR 51461). EPA inadvertently reverted the state effective date included in Table (c) of 40 CFR 52.1770 to April 1, 1999, in a subsequent action on October 22, 2002 (67 FR 64990). The April 1, 2001 change to the reporting date in paragraph (i), now recodified as paragraph (j), is included and superseded in the April 1, 2018, state effective version of 15A NCAC 02Q .0803.

[6] EPA has already taken action on the following portions of the September 18, 2009 submittal: 02D .0901—approved at 78 FR 27065 (May 9, 2013); 02D .0902—approved at 78 FR 44890 (July 25, 2013); 02D .0909—approved at 78 FR 58184 (September 23, 2013); and 02Q .0304—approved at 85 FR 43461 (June 24, 2020). Rules 02D .0953 and .0954 were repealed, state effective September 18, 2009, and removed from the SIP at 78 FR 58184 (September 23, 2013). DAQ withdrew the following portions of the September 18, 2009 submittal: 02D .0521 (withdrawn June 7, 2019) and 02D .0952 (Withdrawn November 30, 2012). Additionally, DAQ withdrew paragraph (d) of 02Q .0902 (as renumbered from paragraph (c)) in the September 18, 2009, submittal and carried forward in the July 10, 2019, submittal, from EPA consideration in a letter dated on June 1, 2020. The June 1, 2020, withdrawal letter is available in the docket for this proposed rulemaking.

[7] Except for the change to Section .0902(d) in the July 10, 2019 and September 18, 2009 SIP revisions which was withdrawn from EPA consideration in a letter dated June 1, 2020. Additionally, the withdrawal of paragraph (d) from section 02Q .0902, leaves the section with two paragraphs (c), one state effective on January 1, 2001 and one state effective on January 1, 2009. DAQ plans to submit revisions to address the two paragraphs (c) in a future submission.

Facilities; Section .0803, *Coating, Solvent Cleaning, Graphic Arts Operations;* Section .0804, *Dry Cleaning Facilities;* Section .0805, *Grain Elevators;* Section .0806, *Cotton Gins;* Section .0807, *Emergency Generators;* Section .0901, *Purpose and Scope;* and *Section* .0902, *Temporary Crushers,* are proposed to revise the recordkeeping and reporting requirements of the permitting exclusionary rules, remove Section .0809, the *Concrete Batch Plants* regulation, revise language, and reformat the regulatory citations contained in these regulations. The proposed changes are consistent with the CAA.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: November 16, 2020.

National Emission Standards for Hazardous Air Pollutants: Polyvinyl Chloride and Copolymers Production Reconsideration; Reopening of a Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; reopening of public comment period.

SUMMARY: On November 9, 2020, the U.S. Environmental Protection Agency (EPA) proposed a rule titled ''National Emission Standards for Hazardous Air Pollutants: Polyvinyl Chloride and Copolymers Production Reconsideration.'' The EPA is reopening the comment period on the proposed rule that closed on January 8, 2021. The comment period will reopen until February 8, 2021, to allow additional time for stakeholders to review and comment on the proposal.

DATES: The public comment period for the proposed rule published in the **Federal Register** on November 9, 2020 (85 FR 71490), which ended on January 8, 2021, is being reopened. Written comments may now be received on or before February 8, 2021.

ADDRESSES:

Comments. Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2002–0037, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov/* (our preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2002–0037 in the subject line of the message.
- *Fax:* (202) 566–9744. Attention Docket ID No. EPA–HQ–OAR–2002–0037.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA–HQ–OAR–2002–0037, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand/Courier Delivery (by scheduled appointment only):* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operation are 8:30 a.m.–4:30 p.m., Monday through Friday (except federal holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. The EPA's policy is that all comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided, unless the comment includes information claimed to be confidential business information (CBI) or other information whose disclosure is restricted by statue.

Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit

https://www.epa.gov/dockets/commenting-epa-dockets.

The *https://www.regulations.gov/* website allows you to submit your comment anonymously, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *https://www.regulations.gov/,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA's Docket Center homepage at *https://www.epa.gov/dockets.*

Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are closed to the public, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov/* or email, as there may be a delay in processing mail and faxes. For further information on EPA Docket Center services and the current status, please visit us online at *https://www.epa.gov/dockets.* Hand deliveries or couriers will be received by scheduled appointment only. For further information and updates on EPA Docket Center services, please visit us online at *https://www.epa.gov/dockets.* The EPA continues to carefully and continuously monitor information from the Centers for Disease Control and Prevention, local area health departments, and our federal partners so that we can respond rapidly as conditions change regarding COVID–19.

Submitting CBI. Do not submit information containing CBI to the EPA through *https://www.regulations.gov/* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, mark the outside of the digital storage media as CBI and then identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI directly to the public docket through the procedures outlined in *Instructions* above. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations part 2. Send or deliver information identified as CBI only to the following address: OAQPS Document Control Officer (C404–02), OAQPS, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2002–0037.

FOR FURTHER INFORMATION CONTACT: For questions about this proposed action, contact Ms. Jennifer Caparoso, Sector Policies and Programs Division (E143–01), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–4063; fax number: (919) 541–0516; and email address: *caparoso.jennifer@epa.gov.*

SUPPLEMENTARY INFORMATION: To allow for additional time for stakeholders to provide comments, the EPA has decided to reopen the public comment period until February 8, 2021.

Dated: December 16, 2020.

Panagiotis Tsirigotis,

Director, Office of Air Quality Planning and Standards.

E15 Fuel Dispenser Labeling and Compatibility With Underground Storage Tanks

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA currently requires fuel dispenser labels for gasoline-ethanol blends of greater than 10 volume percent (vol%) ethanol and up to 15 vol% ethanol (E15). The label was designed to alert consumers to the appropriate and lawful use of the fuel. EPA is co-proposing to either modify the E15 label or remove the label requirement entirely and seeking comment on whether state and local governments may be preempted from requiring different labels on fuel dispensers. To facilitate the proper storage of E15 in underground storage tank systems (USTs), EPA is proposing to modify the UST regulations to grant certain allowances for compatibility demonstration for storage of ethanol blends. EPA is also proposing compatibility requirements for future UST installations or component replacements that would ensure compatibility with higher blends of ethanol.

DATES:

Comments: Comments must be received on or before April 19, 2021. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of consideration if the Office of Management and Budget (OMB) receives a copy of your comments on or before February 18, 2021.

Public Hearing: EPA will announce the public hearing information for this proposal in a supplemental **Federal Register** document.

ADDRESSES: You may send your comments, identified by Docket ID No. EPA–HQ–OAR–2020–0448, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov* (our preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-Docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2020–0448 in the subject line of the message.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Air Docket, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand Delivery or Courier (by scheduled appointment only):* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operations are 8:30 a.m.–4:30 p.m., Monday–Friday (except Federal Holidays).

Instructions: All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://*

www.regulations.gov, including any personal information provided. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www.epa.gov/dockets/commenting-epa-dockets.*

Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are closed to the public, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov* or email, as there may be a delay in processing mail and faxes. Hand deliveries and couriers may be received by scheduled appointment only. EPA continues to carefully and continuously monitor information from the Centers for Disease Control and Prevention (CDC), local area health departments, and our Federal partners so that we can respond rapidly as conditions change regarding COVID–19.

FOR FURTHER INFORMATION CONTACT: For questions regarding the E15 fuel dispenser labeling provisions of this proposed action, contact Lauren Michaels, Office of Transportation and Air Quality, Assessment and Standards Division, Environmental Protection Agency, 2000 Traverwood Drive, Ann Arbor, MI 48105; telephone number: (734) 214–4640; email address: *michaels.lauren@epa.gov.* For questions regarding the E15 compatibility with underground storage tanks provisions of this proposed action, contact Elizabeth McDermott, Office of Underground Storage Tanks, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–0646; email address: *mcdermott.elizabeth@epa.gov.*

SUPPLEMENTARY INFORMATION:

Does this action apply to me?

Entities potentially affected by this proposed rule are those involved with the sale of gasoline. Potentially affected categories include:

Category	NAICS [1] code	Examples of potentially affected entities
Industry	111, 112	Agriculture (crop and animal production).
Industry	31–33	Manufacturing.
Industry	42, 44–45, 72 (excluding 447)	Commercial (wholesale trade, retail trade, accommodation, and food services).
Industry	447	Retail motor fuel sales.
Industry	481, 483–486, 48811	Transportation (air, water, truck, transit, pipeline, and airport operations).
Industry	5171, 2211	Communications and Utilities (wired telecommunications carriers, electric power generation, transmission, and distribution).

[1] North American Industry Classification System (NAICS).

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this proposed action. This table lists the types of entities that EPA is now aware could potentially be affected by this proposed action. Other types of entities not listed in the table could also be affected. To determine whether your entity would be affected by this proposed action, you should carefully examine the applicability criteria in 40 CFR part 80. If you have any questions regarding the applicability of this proposed action to a particular entity, consult the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Outline of This Preamble

I. Purpose of This Action

This action proposes modifications to EPA regulations under the Clean Air Act (CAA) and the Resource Conservation and Recovery Act (RCRA) relating to the sale and distribution of gasoline-ethanol blends containing greater than 10 volume percent (vol%) ethanol and up to 15 vol% ethanol (E15). Recently, EPA has taken actions to provide additional opportunity for E15 within the fuels marketplace. We are proposing two sets of regulatory changes to further that end. The first proposes modifications to EPA's E15 fuel dispenser labeling requirement. The second proposes changes to EPA's Underground Storage Tank (UST) regulations regarding compatibility with gasoline-ethanol blends.

II. E15 Fuel Dispenser Labeling Revisions

This section discusses our proposed revisions to the E15 label, under the CAA.

A . Background on the E15 Label

In 2010 and 2011, in response to requests for a waiver from CAA section 211(f)(1), EPA granted two partial waivers for use of E15 [1] under CAA section 211(f)(4).[2] These waivers were

[1] For purposes of this preamble, E15 refers to gasoline-ethanol blended fuels that contain greater than 10 vol% and no more than 15 vol% ethanol content.

[2] These partial waivers are collectively referred to as ''the E15 partial waivers.'' 75 FR 68094 (November 4, 2010), 76 FR 4662 (January 26, 2011). The 2010 waiver applied to MY2007 and newer light duty motor vehicles. The 2011 waiver applied to MY2001–2006 light duty motor vehicles.

partial in that they apply to model year (MY) 2001 and newer light-duty motor vehicles and do not apply to MY2000 and older light-duty motor vehicles, all heavy-duty gasoline engines and vehicles, all highway and off-highway motorcycles, and all nonroad products. Per CAA section 211(f)(4), EPA evaluated whether the use of E15 would cause or contribute to emissions failures over the useful life of all vehicles, engines, and nonroad equipment, and determined that the use of E15 in MY2000 and older vehicles, heavy-duty gasoline engines and vehicles, and highway and off-highway motorcycles could cause these motor vehicles to exceed their emissions standards. EPA also found that the use of E15 in nonroad products could cause emissions exceedances as well as durability and materials compatibility issues.

Because the partial waivers apply only to MY2001 and newer light-duty motor vehicles, EPA promulgated regulations under CAA section 211(c) (referred to as the Misfueling Mitigation Rule or MMR) to mitigate the potential for E15 to be used to fuel vehicles, engines, and equipment for which E15 has not been approved for introduction into commerce.[3] Those regulations were needed to implement EPA's affirmative determinations that the use of E15 in MY2000 and older light-duty motor vehicles, all heavy-duty gasoline engines and vehicles, all on- and off-highway motorcycles, and all nonroad products would cause or contribute to the impairment of those vehicles' and engines' emission controls and harm public health from increases in regulated emissions. The regulations include a prohibition on the use of E15 in MY2000 and older light-duty motor vehicles, all heavy-duty gasoline engines and vehicles, all on- and off-highway motorcycles, and all nonroad products. To implement this prohibition, EPA promulgated several misfueling mitigation requirements in the MMR, a key aspect being that E15 fuel dispensers must have a specific label when a retail station or wholesale-purchaser consumer chooses to sell E15. The label was designed to alert consumers to the appropriate and lawful use of the fuel.

The E15 label was designed in coordination with consumer labeling experts at the Federal Trade Commission (FTC); FTC also requires the labeling of fuel dispensers in certain circumstances.[4] EPA worked with FTC to develop the E15 label and to ensure consistency between EPA's and FTC's labels for higher level gasoline-ethanol blends such as E85 (gasoline ethanol blends containing up to 83 percent ethanol). By regulation, EPA's current E15 label can be used in lieu of FTC's label for E15.[5]

The E15 label requirement was implemented as an integral component of EPA's misfueling mitigation program. First, the E15 partial waivers include a waiver condition that fuel and fuel additive manufacturers must submit a misfueling mitigation plan (MMP) with provisions to implement all reasonable precautions to address potential misfueling, including ensuring the use of a fuel dispenser label.[6] The waiver conditions articulated in the E15 partial waivers provide that the label must convey the following information:

- The fuel being dispensed contains 15% ethanol maximum;
- The fuel is for use in only MY2001 and newer gasoline cars, MY2001 and newer light-duty trucks, and all flex-fuel vehicles;
- Federal law prohibits the use of the fuel in other vehicles and engines; and
- Using E15 in vehicles and engines not approved for use might damage those vehicles and engines.

As discussed above, the MMR also implements a label requirement for retailers and wholesale purchaser-consumers, in addition to the requirements under the waiver conditions for fuel and fuel additive manufacturers. The MMR label requirement is specified in 40 CFR 80.1501 and requires the same basic elements as required under the E15 partial waivers' label requirement. Most recently, the 2019 E15 ''substantially similar'' definition for E15 requires that fuel and fuel additive manufacturers must submit a misfueling mitigation plan with provisions to implement all reasonable precautions to address potential misfueling.[7] Thus, the E15 label is currently incorporated and required under 40 CFR 80.1501, our CAA section 211(f)(1) ''substantially similar'' definition for E15, and the CAA section 211(f)(4) E15 partial waivers.

B. E15 in the Market

In 2019, EPA extended the CAA section 211(h)(4) 1-psi volatility waiver to gasoline-ethanol blends containing between 9 and 15 percent ethanol. This has expanded the opportunity for E15 to be sold during the summer season.

In the years since the 2010 and 2011 E15 partial CAA section 211(f)(4) waivers were granted, the number of retail stations offering E15 has grown, spurred in part by the United States Department of Agriculture (USDA) biofuel infrastructure partnership (BIP) program in 2016–18[8] and the industry-sponsored Prime the Pump program, that helped provide funding for retail station upgrades. As of October 2019, there are an estimated 1,809 stations registered as selling E15 (representing only about one percent of all retail stations).[9] Figure III–1 shows the growth of E15 stations since 2012, as well as the percentage of E15 stations of all retail stations in the United States.

[3] 76 FR 44406 (July 25, 2011).

[4] FTC's regulations found at 16 CFR 306.10 (Automotive Fuel Rating Posting) require fuel dispenser labels for gasoline-ethanol fuel blends containing greater than 10 percent ethanol. The FTC regulations provide for an exemption for retailers that utilize EPA's label under 40 CFR 80.1501. See 16 CFR 306.10(a).

[5] As described later in this proposal, if we were to remove our label requirement under 40 CFR 80.1501, absent additional action from FTC, retailers would be required to use FTC's label for ethanol blends containing between 10 and 15 percent ethanol, per 16 CFR part 306.

[6] 75 FR 68094 (November 4, 2010), 76 FR 4662 (January 26, 2011).

[7] 84 FR 26980, 27021 (June 10, 2019).

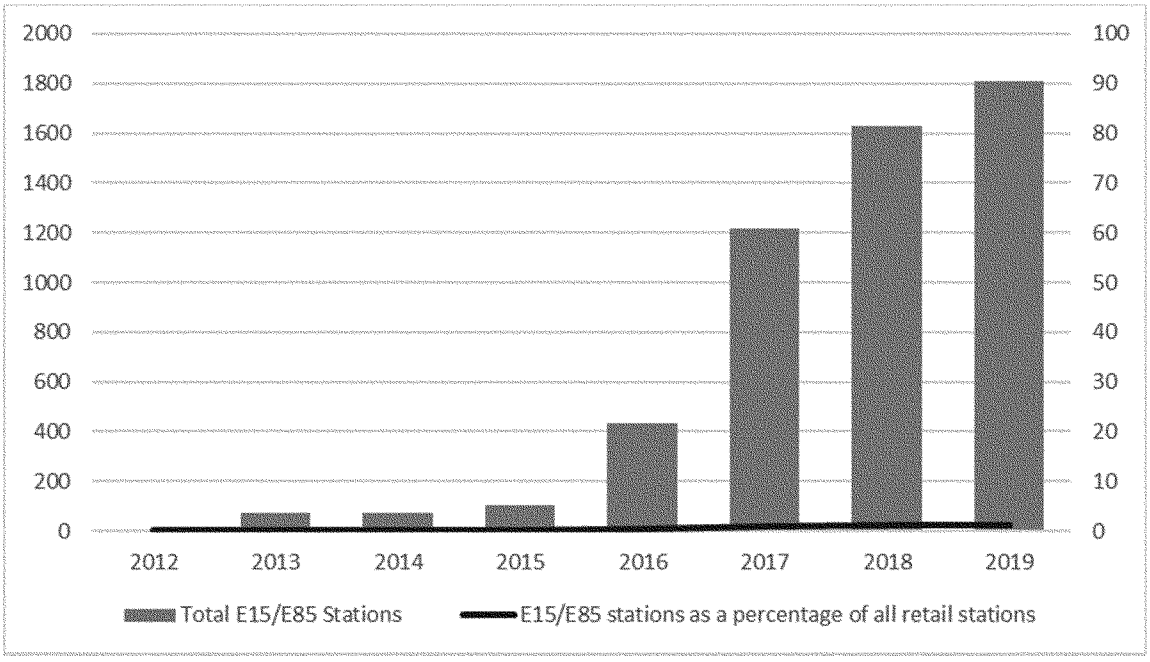
[9] Email from Growth Energy to EPA, October 9, 2019, ''Growth Energy Higher Blend Infrastructure.'' Available in the docket for this action.

Figure II.B-1: Growth in E15 Retail Stations Over Time



The opportunities for misfueling have changed since 2011 as well. Over time, the number of light-duty vehicles on the road that are older than MY2001 have decreased due to normal fleet turnover, resulting in a corresponding decrease in the number of miles traveled by those light-duty vehicles.[10] At the same time, we have no indication that anything has changed for the other sectors (*i.e.,* nonroad vehicles, engines, and equipment, motorcycles, and heavy-duty vehicles). We continue to believe there are millions of such products in use that could potentially be misfueled on E15.

C. Proposed Changes to the E15 Labeling Requirement

EPA has received comments from some stakeholders on other actions suggesting that the existing E15 label is no longer necessary and simply interferes with additional growth of E15 in the marketplace.[11] These commenters suggest that removal of the label or changes to the color of the label or language used on the label would increase lawful use of E15 in MY2001 and newer light-duty vehicles. Other stakeholders have suggested that the growth in E15 at retail stations exacerbates concerns over misfueling of vehicles and equipment not designed for it, and suggest that the current label is no longer explicit enough about what vehicles and engines cannot use E15 making it insufficient to protect against misfueling.[12] These commenters suggested that EPA should solicit input on the size, design, and placement of the label on the dispenser, and other characteristics of the label to more clearly communicate the fuel's ethanol content to consumers.[13]

Our proposed action to modify or eliminate the E15 label requirement would rely on our CAA section 211(c) authority to control or prohibit fuel. Under CAA section 211(c)(1), EPA may issue regulations to ''control or prohibit the manufacture, introduction into commerce, offering for sale, or sale'' of any fuel or fuel additive whose emissions products may cause or contribute to air pollution ''which may be reasonably anticipated to endanger public health or welfare,'' or whose emissions products ''will impair to a significant degree the performance of any emission control device or system which is in general use.'' In the MMR, we found that E15 would significantly impair the emission control systems used in MY2000 and older light-duty motor vehicles, all heavy-duty gasoline engines and vehicles, all highway and off-highway motorcycles, and all nonroad products. This misfueling could result in increases in hydrocarbon, carbon monoxide, nitrous oxide, particulate matter, and air toxics emissions. Any action EPA takes to modify or remove the label would need to consider this finding.

We currently have no information before us that would indicate that E15, if used in MY2000 and older light-duty motor vehicles, all heavy-duty gasoline engines and vehicles, all highway and off-highway motorcycles, and all nonroad products, would no longer cause such damage to emission control systems. However, in the intervening years since the promulgation of the MMR and the label requirement, the vehicle fleet turnover toward newer light-duty vehicles, and the feedback

[10] We received comments in rulemakings suggesting that there are still vehicles newer than MY2000 for which manufacturers' owner's manuals continue to include warnings against E15 use despite E15 being allowable for introduction into commerce in those vehicles under EPA's regulations. See discussion at 84 FR 26980, 27010 (June 10, 2019).

[11] See, *e.g.,* Comments from Growth Energy (Docket Item No. EPA–HQ–OAR–2018–0227–0053) and Renewable Fuels Association (Docket Item No. EPA–HQ–OAR–2018–0227–0037). While these represent the most recent comments received on this issue, we have included all relevant comments in the docket for this action. While these comments often include many aspects of E15 use, only comments relating to the label are considered relevant for this NPRM.

[12] See, *e.g.,* Comments from National Marine Manufacturers Association (Docket Item No. EPA–HQ–OAR–2018–0775–0534) and Petroleum Marketers Association of America (Docket Item No. EPA–HQ–OAR–2018–0227–0083). While these represent the most recent comments received on this issue, we have included all relevant comments in the docket for this action. While the comments often address many aspects of E15 use, only those comments related to the label requirement are considered relevant for this NPRM.

[13] See, *e.g.,* Comments from National Marine Manufacturers Association (Docket Item No. EPA–HQ–OAR–2018–0775–0534).

from stakeholders have led us to reevaluate the E15 label at this time.

The current label is 3 inches by 5 inches in black text on an orange background and includes the following language:

- The word ''ATTENTION,'' diagonally across the upper right corner of the label;
- The word ''E15'' at the top of the label;
- The ethanol content: ''Up to 15% ethanol'' below the word E15;
- The words and symbols ''Use only in • 2001 and newer passenger vehicles • Flex-fuel vehicles''; and
- The final two sentences: ''Don't use in other vehicles, boats, or gasoline-powered equipment. It may cause damage and is prohibited by Federal law.'' [14]

In this action, we are co-proposing two options with respect to the E15 label. Under the first option, we are proposing modifications to the label intended to provide additional clarity to consumers and decrease confusion. Under the second option, we are proposing to remove the label entirely.

1. Potential Modifications to the E15 Label

Our first co-proposal is to modify the existing E15 label, including:

- Removing the ''Attention'' stripe along the upper right corner of the label.
- Removing the phrase ''E15'' from the label, while including the language ''contains up to 15% percent ethanol''.
- Revising the language ''Use only in'' to ''Safe for use in''.
- Revising the language ''Don't use in'' to ''Avoid use in''.
- Revising the format of the word ''prohibited'' such that it is not in bold and italicized type.

We additionally propose modifications to the label in accordance with our existing alternative labels. At this time, there are two approved alternative labels for E15. One label includes the term ''or'' in between ''2001 and newer passenger vehicles'' and ''flex fuel vehicles.'' We believe the inclusion of ''or'' clarifies that both MY2001 and newer light-duty motor vehicles and flex fuel vehicles can permissibly use E15. The other approved alternative label includes ''motorcycles'' in the list of vehicles and engines in which E15 use is prohibited. Our first co-proposal proposes these modifications to the E15 label as well since we believe they more clearly convey which vehicles and engines can lawfully use E15.

We believe these modifications to the label would reduce confusion about the vehicles in which E15 can be used while also alerting consumers to the vehicles and engines in which E15 should not be used. We note that these modifications would also continue to comply with the requirements under the existing E15 partial waivers and thus would not require modifications to them.

Finally, we propose a modification to the colors utilized on the label. Consistent with the FTC fuel labels, we selected the orange color for our E15 label requirement in 2011; however, we recognize that another color may be better suited for the label. Some stakeholders [15] have suggested a blue and white label, instead of the orange label we currently use. The proposed regulatory text modifies the color of the label to a blue header, with white text, and white body with black text.[16] We alternatively propose to maintain the current orange and black label color design.

We seek comment on the proposed changes to the label, and specifically request input on what combination of modifications to the label would improve clarity regarding which vehicles can use E15 while protecting vehicles and engines for which E15 use is inappropriate. We recognize that the modifications proposed may be best implemented together, or in some alternative combination that does not include all of the proposed modifications. We specifically request information on any studies (*e.g.,* public survey or focus group studies) or information on consumer interaction with the label.

2. Potential Removal of the E15 Label Requirement

In the alternative, our second co-proposal is to remove the E15 label entirely. Selection of this option could also result in the elimination of the E15 survey requirement because it is currently required in order to verify that E15 fuel dispensers are labeled consistent with EPA's regulatory requirements, and would arguably no longer be necessary if the labeling requirement were removed.[17] Some stakeholders have suggested that removing the label would encourage the use of E15 by consumers who can lawfully use E15 but who do not do so because they are confused by the label.[18]

We note that, regardless of our proposal to remove the E15 label, the prohibition on the use of E15 in MY2000 and older light duty vehicles and all nonroad engines and equipment as codified at 40 CFR 80.1504 would remain in place. We continue to believe that E15, when used in those vehicles or engines, would cause or contribute to the impairment of emission control systems which would, in turn, result in negative effects on human health and welfare.

Were EPA's E15 label requirement to be removed, we believe that FTC's regulations would require that E15 dispensers be labeled according to FTC's label requirements.[19] We seek comment on the interaction between EPA and FTC's labels, recognizing that we cannot modify FTC's regulations in this action.

In order to completely remove the E15 label, we would need to also remove it from the requirements under the CAA section 211(f)(4) waiver, and likely clarify under the CAA section 211(f)(1) ''substantially similar'' determination that the fuel dispenser label would no longer be required. We seek comment on how to address the requirements under the CAA section 211(f) provisions.

3. Modification to Regulations

We note that we intend to finalize the proposed Fuels Regulatory Streamlining Rule (''Streamlining Rule'') with an implementation date of January 1, 2021, for most provisions, including the E15 label requirement. Under the Streamlining Rule, we proposed to transpose unchanged the current E15 misfueling mitigation measures from 40 CFR part 80, subpart N, into the new 40 CFR part 1090. Since the effective date of any final rulemaking for this action would likely be after January 1, 2021, we would effectuate the proposed E15 label modifications or removal of the E15 labeling requirement in 40 CFR part 1090.

[14] An image of the existing label is available in the memorandum ''Potential Label Changes,'' available in the docket for this action.

[15] See, *e.g.,* Comments from Growth Energy (Docket Item No. EPA–HQ–OAR–2010–0448–0083).

[16] We have provided mock-ups showing potential modifications to the label that might result from this proposal in the memorandum, ''E15 Label Revisions,'' available in the docket for this action.

[17] If we do remove the E15 label, we are not proposing to remove the Product Transfer Document (PTD) language requirements around ethanol content in gasoline-ethanol blended fuels. In addition to informing retailers of ethanol content for purposes of labeling E15 fuel dispensers, the PTD language requirements for ethanol are also necessary to identify which gasoline-ethanol blends can take advantage of the 1-psi waiver for RVP compliance.

[18] See Comments from Growth Energy (Docket Item No. EPA–HQ–OAR–2015–0202–0129).

[19] See 16 CFR part 306 and supra notes 4&5.

D. Request for Public Comment on E15 Labeling Preemption Considerations

Since promulgation of the MMR in 2011, EPA has also received information from some stakeholders that confusion is caused when there is more than one label displayed on some fuel dispensers. For this reason, EPA additionally seeks comment regarding the ability of state or local governments to require labeling of E15 pump dispensers.

As stated in the MMR,[20] EPA's authority to ''control or prohibit'' specifications for E15 pump dispenser labels is provided by CAA section 211(c)(1). Under CAA section 211(c)(4)(A), a state or local government may not adopt or enforce differing controls or prohibitions respecting labeling of E15 fuel dispensers if ''for purposes of motor vehicle emission control.'' [21] In the MMR, we also stated that we would evaluate questions regarding potential E15 pump dispenser labels preemption matters on a case-specific basis.[22]

Aside from the express preemption provided by CAA section 211(c)(4)(A), a state or local control for fuels or fuel additives may be implicitly preempted under the supremacy clause of the U.S. Constitution where the state requirement conflicts with Federal law by preventing compliance with the federal requirement, or by standing as an obstacle to accomplishment of the Federal objectives. Therefore, a state or local requirement respecting E15 pump label dispensers that is not expressly preempted under CAA section 211(c)(4)(A) nevertheless may be preempted if it meets the criteria for this constitutional conflict preemption.

In this action, we seek comment on whether there are certain types of labels that may be conflict-preempted from use. We encourage commenters to include examples of other labels they have observed that may raise such preemption questions and legal analysis to support their positions, to the extent feasible.

III. E15 Compatibility With Underground Storage Tanks

This section discusses our proposed revisions regarding compatibility with USTs.

A. Background on Underground Storage Tank Compatibility

As of 2020, EPA regulates over half-a-million UST systems that contain petroleum or hazardous substances. EPA's Office of Underground Storage Tanks was formed in response to the discovery in the early 1980s that thousands of USTs had leaked and contaminated groundwater supplies in the U.S. USTs form a crucial part of our country's fueling infrastructure. It is important for USTs to be constructed, maintained, and operated in a manner so that petroleum and other regulated substances are stored safely. We developed the UST regulation in 1988 to help owners and operators meet those goals, and a critical part of the regulation included the requirement for UST systems to be compatible with the substance stored. Incompatibility between fuels stored and UST system materials can result in equipment or components such as tanks, piping, gaskets, or seals becoming brittle, elongated, thinner, or swollen when compared with their condition when first installed. When this occurs, the UST system may fail to contain the regulated substance resulting in a release to the environment and possibly a failure to detect the release.

The U.S. fuel supply has changed significantly since 1988 and use of biofuels has grown rapidly. We understand that the chemical and physical properties of biobased fuels, such as ethanol and biodiesel, can be more degrading to certain UST system materials than petroleum alone. Changes in the fuel supply have caused unintended consequences to UST systems, including equipment failure and releases to the environment. As a result, in 2015 we revised the UST regulation and required owners and operators to provide additional notification, demonstration, and recordkeeping when storing fuel blends, such as those with more than 10 percent ethanol or more than 20 percent biodiesel.[23]

The use of biofuels has continued to grow since 2015. As described in Section II.B, in June 2019, we modified fuel regulations that allow E15 to utilize the 1-psi volatility waiver, which allows for increased E15 sale in the summer. That final rule means more UST owners and operators may opt to store and sell E15 at gas stations and other fueling facilities. E15 is now used in 30 states at 1,809 stations. Because of this continued growth of biofuels in the U.S., this action proposes to revise the 2015 UST regulation to grant certain allowances for compatibility demonstration and make it less burdensome for UST owners and operators to meet the current requirements. In addition, this action proposes a requirement that UST systems installed, or UST equipment and components replaced, must be constructed with equipment and components compatible with ethanol blends up to 100 percent. This requirement would become effective one year after the effective date of the final rule.

This proposal will make it easier for owners and operators to meet compatibility requirements with their current infrastructure, if unable to demonstrate compatibility. The proposal will also help ensure the future national UST infrastructure is compatible with a broad range of biofuels that come to market so service station owners can offer more choices to consumers. The fuel supply in the U.S. is constantly evolving; because future needs are somewhat unknown, we see value in promoting UST systems that can safely store a broad range of potential emerging fuels such as higher-level ethanol blends.

B. Proposed Changes to the UST Compatibility Requirements

1. Allowance—For Secondary Containment When Unableo To Demonstrate Compatibility

In the preamble to the 2015 UST regulation, we clarified that implementing agencies could allow use of secondary containment in lieu of being able to demonstrate compatibility of all UST system equipment and components required by the regulation. EPA had not previously allowed this but is proposing to do so now in this action. Owners and operators of UST systems already in existence one year after the effective date of this rule who cannot determine compatibility (*e.g.,* cannot find installation documentation) for all equipment and components are not required to demonstrate compatibility if the UST systems have secondarily contained tanks and piping (including safe suction piping) and use interstitial monitoring. This will still sufficiently protect the environment because secondary containment will contain a leak from the primary containment of the tank and piping, and interstitial monitoring will likely detect a leak before regulated substances reach the environment.

[20] See 74 FR 44406, 44431–32 (July 25, 2011).

[21] Except that under CAA section 211(c)(4)(C)(i), states other than California may prescribe and enforce non-identical measures if they seek and obtain EPA approval of State Implementation Plan revisions containing such control measures.

[22] See 74 FR 44432 (July 25, 2011).

[23] See 80 FR 41566 (July 15, 2015).

As of 2020, all states [24] require secondary containment for new and replaced UST systems, along with the requirement for interstitial monitoring to detect potential releases. Most states' requirements target new and replaced UST systems, which avoids added expenses for owners and operators to retrofit or replace existing systems to meet the requirements. Many states, including those in New England, New York, California, and Florida, required full or partial secondary containment prior to Congress passing Title XV, Section B of the Energy Policy Act of 2005 (EPAct). This act required states receiving Federal money under Subtitle I of the Solid Waste Disposal Act to require either secondary containment and under-dispenser containment for new and replaced underground storage tank systems or evidence of manufacturer and installer financial responsibility and installer certification. By 2008, 31 states had adopted the EPAct requirement. However, states' requirements for secondary containment and interstitial monitoring can differ, including when required and allowances for use of other release detection options when owners and operators chose to install secondary containment prior to it being required.

EPA's database, populated with publicly available information gathered from the individual state UST programs, helped us understand the number of UST systems nationally that are secondarily contained and where owners and operators are using interstitial monitoring to detect releases from their UST systems. Using state-supplied data, we identified 23 states that provide data on the number of UST systems with both double-wall tanks and double-wall piping. These secondarily contained systems should generally be capable of using interstitial monitoring for release detection, although some may currently use another method. This means that approximately 24 percent of the 225,000 USTs in these 23 states should be able to use secondary containment with interstitial monitoring, if they have compatible equipment but are currently unable to demonstrate it. The percentage is likely similar across the nation, but we seek comment on this issue.

Owners and operators should be aware that only leaks from equipment or components inside secondary containment will be contained. Fuel spills may still occur if other UST system components become non-functioning due to incompatibility since the equipment or component is not inside secondary containment. For example, if spill prevention equipment (*i.e.,* spill bucket) fails due to incompatibility, small spills from the delivery hose will not be contained by the tank and piping secondary containment. We encourage owners and operators to replace equipment that they cannot demonstrate as compatible if the equipment is accessible from ground level and replaceable with minimal investment.

2. Allowance—For Already Compatible Tanks and Piping

We identified equipment for which UST owners and operators would not need to demonstrate compatibility. Based on manufacturer statements and certification by independent testing laboratories, certain categories of equipment are known to be compatible with higher blends of ethanol. We believe that steel and fiberglass tanks manufactured after July 2005 are compatible with higher blends of ethanol fuels. This means that owners and operators will not need to demonstrate compatibility for these tanks. Likewise, we understand that all fiberglass reinforced plastic (FRP) piping is compatible with higher blends of ethanol fuel, so owners will not need to demonstrate compatibility for any FRP piping.

For other equipment, we are unaware of a fixed date or fixed category in which all equipment by any manufacturer is known to be compatible. As such, other than for the tank and piping items identified earlier in this section, owners and operators must adhere to the requirement in 40 CFR 280.32 to demonstrate compatibility.

However, we understand that some models of many equipment and components that must be demonstrated compatible were already compatible with higher blends of ethanol decades before these blends became common. UST owners and operators may already have this equipment installed. If they can demonstrate compatibility of certain existing equipment, they will not need to replace all of their equipment to demonstrate compatibility with higher blends of ethanol.[25]

For example, we understand that the following UST system equipment and components were available after the 1988 UST regulation and are compatible with higher blends of ethanol:

- Unlined steel single-wall tanks
- Unlined steel double-wall tanks

In addition, we understand that the following UST system equipment and components were available in a higher ethanol compatible version from at least one manufacturer as early as the years listed below. Many owners and operators might have a compatible piece of equipment, which can be confirmed and demonstrated as compatible by verifying documentation associated with the equipment manufacturer and installation.

- Single-wall fiberglass tanks: 1995
- Double-wall fiberglass tanks: 1990
- Flexible piping: 2011
- Fiberglass containment sumps: 1995
- Pumping equipment: 2010
- Spill equipment: 2015
- Release detection equipment: 2006
- Overfill equipment: 2006

We are requesting comment on the accuracy of this information and seek additional information on this matter.

3. Compatibility Requirements for New Installations and Replacements

We are proposing that owners and operators storing motor fuel used in over-the-road vehicles must ensure that new or replaced UST system equipment and components, including pipe dopes and sealants, are compatible with ethanol blends up to 100 percent. This applies regardless of whether the UST system currently stores or will store ethanol blends. This includes UST systems storing over-the-road diesel because service stations may in the future change to storing gasoline with higher blends of ethanol. However, we believe USTs storing fuel for emergency power generators and other off-road fuel used (such as fuel for construction equipment) should be exempt from this requirement. We seek comment on other potentially applicable exemptions. If an owner or operator is replacing specific equipment or components, such as a submersible turbine pump or containment sump, then only that replacement must be compatible with ethanol blends up to 100 percent. For entirely new UST system installations or replacements, the entire system must be compatible with ethanol blends up to 100 percent. We would require UST owners and operators to retain compatibility documentation for all new system equipment and components, including pipe dope, sealants, and gaskets, which are a common source of incompatibility.

This proposed requirement would become effective one year after the effective date of the final regulation. Since UST systems typically stay in the ground for decades—40 percent of active USTs are more than 30 years old—transitioning to compatible UST

[24] States includes all 50 states, 5 territories, and the District of Columbia.

[25] See *https://flexfuelforward.com/flexcheck.*

systems for emerging fuels can be very difficult. Implementing this requirement now will help ensure future fuel storage infrastructure can reliably store a larger variety of fuels. One hundred percent ethanol compatible material is readily available on the market today for all UST system equipment and components. The additional cost of a fully ethanol compatible system would be relatively minimal as a percentage of total cost of installation. This additional up-front investment would also avoid potentially significant upgrade costs, if future fuels contain greater volumes of ethanol or other alcohols.

C. Updates to State Program Approval Requirements

EPA has long recognized that, because of the size and diversity of the regulated community, state and local governments are in the best position to oversee USTs. State and local authorities are closer to the situation in their domain and are in the best position to set priorities. The 2015 state program approval (SPA) regulation in 40 CFR part 281 sets criteria state UST programs must meet to receive EPA's approval to operate in lieu of the Federal UST program. The SPA regulation sets performance criteria states must meet to be considered no less stringent than the Federal UST regulation and provides requirements for states to have adequate enforcement.

Much of the responsibility for implementing these proposed changes falls to state agencies. EPA will work with states to update their UST regulations and will support them in achieving state program approval. These proposed changes to the 2015 UST regulation, when final, will initially only apply to UST facilities in Indian country and in states that do not have SPA (owners and operators in states that do not have SPA must comply with the Federal UST regulation and their state regulations). For states that do have SPA these proposed changes will not apply until each state undertakes its own rulemaking. As of the date of publication of this notice, 15 [26] states do not have state program approval. For a list of states with state program approval, see *www.epa.gov/ust/state-underground-storage-tank-ust-programs.*

EPA is proposing to change the 2015 SPA regulation (40 CFR part 281) and make it consistent with these proposed revisions of the compatibility requirements of the 2015 UST regulation (40 CFR part 280). Specifically, EPA proposes that states require UST systems that store motor fuel for use in over-the-road vehicles be compatible with ethanol blends up to 100 percent when a new system is installed or when equipment and components are replaced. Since this is a more stringent requirement than what EPA required in its 2015 UST regulation, states would need to have or adopt this additional provision to be considered no less stringent than the corresponding Federal requirements.

States will have three years from the effective date of a final rule to submit to EPA a revised SPA application, including this change to their states' UST regulations. Since many states have recently been through this SPA application approval process for the 2015 UST regulation, EPA intends to make this additional modification to SPA an expedited process. EPA welcomes additional feedback on this.

D. Overview of Estimated Costs

The regulatory changes proposed today would provide cost savings to UST owners and operators as well as impose costs, and EPA is seeking comments on both.

1. Allowances—For Secondary Containment When Unable To Demonstrate Compatibility and for Already Compatible Tanks and Piping

The allowance described in this proposal for UST systems with secondary containment using interstitial monitoring when unable to demonstrate compatibility will provide owners and operators cost savings. Under this allowance, UST system owners and operators seeking to store ethanol blends up to 100 percent will not have to upgrade certain equipment and components simply because they are unable to demonstrate compatibility for that equipment and those components. As described in this preamble it is EPA's understanding that approximately 24 percent of all UST systems should be able to use secondary containment with interstitial monitoring, if they have compatible equipment but are currently unable to demonstrate it. This could mean that a significant portion of all facilities that seek to store higher blends of ethanol but are unable to demonstrate may not have to replace certain equipment. A rough estimate of replacement cost avoidance from this allowance can be made from informal estimates EPA has gathered from industry and regulators:

- Replacing tanks: $150,000 per tank.
- Replacing piping: $150,000 per facility.
- Ancillary equipment upgrades (most variable and configuration dependent): $1,000 $10,000 per UST system.

In addition, the other allowance proposed in this regulation to eliminate the requirement to demonstrate compatibility for all steel and fiberglass tanks manufactured after July 2005, and all FRP piping should provide some additional cost savings. EPA is seeking to verify this understanding and is looking for additional information or data to better understand the cost implications of today's proposal.

2. Compatibility Requirements for New Installations and Replacements

This proposal imposes compatibility requirements for up to 100 percent ethanol for certain (*i.e.,* storing motor fuel used in over-the road-vehicles) new installations and replacements of UST system equipment and components regardless of whether the UST system currently stores or will store ethanol blends. This means, for example that an UST owner and operator needing to replace equipment such as a containment sump or spill bucket must make that replacement with equipment that is compatible with up to 100 percent ethanol. EPA understands that the marginal cost for any new UST system equipment or components compatible with up to 100 percent ethanol is minimal compared with the overall project costs (*i.e.,* design, construction, installation etc). EPA estimates the additional costs for purchasing up to 100 percent compatible equipment or components could be significantly less than 5% of the overall project costs and is seeking comment on this estimate. Some major UST components and equipment manufactured today (*e.g.,* tanks, piping) are all already compatible with up to 100 percent ethanol so there is no cost increase to accommodate the higher blends for those purchases. However, there is certain equipment where the cost of the up to 100 percent ethanol compatible model may be higher (*e.g.,* overfill device).

EPA is seeking to verify this understanding and is looking for additional information or data to better understand the cost implications of this action.

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *http://www.epa.gov/laws-regulations/laws-and-executive-orders.*

[26] States and territories without SPA—AK, AZ, CA, FL, IL, MI, NJ, NY, OH, WI, WY and AS, GU, CNMI, VI.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is a significant regulatory action because it raises novel legal or policy issues. Nevertheless, after reviewing information regarding this action, the Office of Management and Budget waived review of this action.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is not expected to be an Executive Order 13771 regulatory action. We seek comment on any burdens and costs associated with this rulemaking.

C. Paperwork Reduction Act (PRA)

The information collection activities in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the PRA. The Information Collection Request (ICR) document that EPA prepared has been assigned EPA ICR number 2655.01. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here.

This proposed regulation would either change the existing, approved E15 label (approved under OMB Control Number 2060–0675)—or remove it entirely. Should the E15 label be modified, then there would be a cost associated with affixing the amended label to pumps from which fuel is dispensed. We have also allowed that some parties may need to purchase labels. Parties required to affix labels are typically parties who own or operate retail stations or wholesale-purchases consumer facilities. Should the E15 labeling requirement be removed entirely, then there would no longer be any E15 label required and we would anticipate a cost savings to industry.

This proposed regulation would also require owners and operators of underground storage tanks (UST) to maintain records of compatibility at new UST installations and replacements storing motor fuels used in over the road transportation. This new requirement is only intended for UST systems storing motor fuel used in over-the-road transportation, not for UST systems fueling emergency power generators nor other UST systems used for off-road purposes such as construction equipment. In the existing regulation, owners and operators of USTs storing product containing more than 10 percent ethanol or more than 20 percent biodiesel are required to maintain records to demonstrate compatibility with the product stored. This action proposes to grant certain allowances for this current UST system compatibility demonstration requirement, which reduces information collection burden for some UST systems. The existing requirements for owners and operators of USTs are under OMB Control Number 2060–0068.

Respondents/affected entities: Retailers and wholesale purchaser-consumers who dispense E15; owners and operators of UST systems.

Respondent's obligation to respond: Mandatory under 40 CFR part 80, subpart N, (E15 labeling)—and 40 CFR part 280, subparts B and C; and 40 CFR part 281, subpart C (UST).

Estimated number of respondents: 1,801 retail and wholesale purchaser-consumers for the E15 labeling provisions and 10,331 owners and operators for the UST provisions.

Frequency of response: Once, as needed and on occasion.

Total estimated burden: 37 hours (per year) for the E15 labeling and 2,799 hours (per year) for USTs. Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $3,785 (per year) for E15 labeling, which includes $2,952 annualized capital or operation & maintenance costs; and $65,515 for UST, which includes $0 annualized capital or operation & maintenance costs.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Submit your comments on EPA's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden to EPA using the docket for this action. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs at *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after receipt, OMB must receive comments no later than February 18, 2021. EPA will respond to any ICR-related comments in the final rule.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. The small entities subject to the requirements of this action are retail motor fuels firms and small government jurisdictions.

With respect to the E15 fuel dispenser label portion of this action, the proposed changes to the E15 label under option 1 of this action do not substantively alter the regulatory requirements on parties that make and distribute E15. The removal of the E15 label under option 2 of this action would reduce burden on all regulated parties that sell E15, including small entities, and therefore would not impose any requirements on small entities.

With respect to the E15 compatibility with underground storage tanks provisions of this action, in EPA's 2015 UST rulemaking we determined that less than 1 percent of potentially affected small firms in the retail motor sector (NAICS 447) would experience an impact over 1 percent of revenues, but less than 3 percent of revenues and that no small firms would have impacts above 3 percent of revenues.[27] In the 2015 rulemaking we also determined that no small government jurisdictions would be impacted at 1 percent or 3 percent of revenues.[28] Since this action proposes a small change to the 2015 regulation, we do not expect any significant impacts to small entities. EPA seeks comment on any cost impacts.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any state, local or tribal governments. Requirements for the private sector do not exceed $100 million in any one year.

F. Executive Order 13132: Federalism

This proposed action does not have federalism implications. The E15 label portion of this action will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. For the E15 compatibility with underground storage tanks portion of this action, the total costs of this proposed rule (direct compliance costs, notification costs and

[27] See 80 FR 41620–21 (July 15, 2015) and Section 5.4 of the Regulatory Impact Analysis (RIA) for that action, ''Assessment Of The Potential Costs, Benefits, And Other Impacts Of The Final Revisions To EPA's Underground Storage Tank Regulations.''

[28] Id.

state program costs) will be small. In our much larger rule in 2015 these total costs were only $9 million which is not considered to be a substantial compliance costs under Federal requirements. Therefore, we believe Executive Order 13132 will not apply to this rule which we expect to have lower costs than the 2015 rule. EPA is requesting comment on the expected costs of this proposed rule. In the spirit of Executive Order 13132 and consistent with EPA policy to promote communications between EPA and State and local governments, EPA will specifically solicit comment from state and local government during the comment period.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175. Thus, Executive Order 13175 does not apply to this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not concern an environmental health risk or safety risk.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a ''significant energy action'' because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. This action proposes to either change EPA's existing E15 label or remove the labeling requirement entirely. There are no additional costs for sources in the energy supply, distribution, or use sectors.

J. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51

This proposed action does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994). For the E15 label portion of this action, this proposed rule maintains the prohibition on the use of E15 in 2000 and older light duty vehicles, as well as all motorcycles, and nonroad vehicles, engines, and equipment, which could result in increases in emissions. For the E15 compatibility with underground storage tanks portion of this action, EPA has determined that this action will not have disproportionately high and adverse human health or environmental effects on minority or low-income populations because it increases the level of environmental protection for all affected populations without having any disproportionately high and adverse human health or environmental effects on any population, including any minority or low-income population.

V. Statutory Authority

Statutory authority for the E15 label portion of this action comes from section 211 of the Clean Air Act, 42 U.S.C. 7545. Statutory authority for the E15 compatibility with underground storage tanks section of this action comes from the Resource Conservation and Recovery Act sections 9001 *et seq.,* 42 U.S.C. 6991 *et seq.*

List of Subjects

40 CFR Part 80

Environmental protection, Administrative practice and procedure, Air pollution control, Fuel additives, Gasoline, Labeling, Motor vehicle pollution, Penalties, Reporting and recordkeeping requirements.

40 CFR Parts 280 and 281

Environmental protection, Administrative practice and procedure, Hazardous substances, Petroleum, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Andrew Wheeler,

Administrator.

For the reasons set forth in the preamble, EPA proposes to amend 40 CFR parts 80, 280, and 281 as follows:

PART 80—REGISTRATION OF FUELS AND FUEL ADDITIVES

■ 1. The authority citation for part 80 continues to read as follows:

Authority: 42 U.S.C. 7414, 7521, 7542, 7545, and 7601(a).

■ 2. Revise § 80.1501 to read as follows:

§ 80.1501 Labeling requirements that apply to retailers and wholesale purchaser-consumers of gasoline that contains greater than 10 volume percent ethanol and not more than 15 volume percent ethanol.

(a) Any retailer or wholesale purchaser-consumer who sells, dispenses, or offers for sale or dispensing E15 must affix the following conspicuous and legible label to the fuel dispenser:

Contains up to 15% ethanol
Safe for use in

- 2001 and newer passenger vehicles; or
- Flex-fuel vehicles

Avoid use in other vehicles, motorcycles, boats, or gasoline-powered equipment. It may cause damage and is prohibited by Federal law.

(b) Labels under this section must meet the following requirements for appearance and placement:

(1) *Dimensions.* The label must measure 3 and 5/8 inches wide by 3 and 1/8 inches high.

(2) *Placement.* The label must be placed on the upper two-thirds of each fuel dispenser where the consumer will see the label when selecting a fuel to purchase. For dispensers with one nozzle, the label must be placed above the button or other control used for selecting E15, or in any other manner which clearly indicates which control is used to select E15. For dispensers with multiple nozzles, the label must be placed in the location that is most likely to be seen by the consumer at the time of selection of E15.

(3) *Text.* The text must be justified and the fonts and backgrounds must be as described in paragraphs (b)(3)(i) through (vi) and (b)(4)(i) through (iv) of this section.

(i) The ethanol content: ''Contains up to 15% ethanol'' must be in 18-point, center-justified, white, Helvetica Black font in the top 1.25 inches of the label.

(ii) The words ''Safe for use in'' must be in 20-point, left-justified, black, Helvetica Bold font in the bottom 1.875 inches of the label.

(iii) The words, and symbols ''• 2001 and newer passenger vehicles; or • Flex-fuel vehicles'' must be in 14-point, left-justified, black, Helvetica Bold font.

(iv) The remaining two sentences must be in 12-point, left-justified, Helvetica Bold font.

(4) *Color.* (i) The background of the top 1.25 inches of the label must be blue.

(ii) The background of the bottom 1.875 inches of the label must be white.

(5) *Alternative labels.* (i) Alternative labels to those specified in this section may be used if approved by EPA in advance. Such labels must contain all of the informational elements specified in paragraph (a) of this section, and must use colors and other design elements similar in substance and appearance to the label required by this section. Such labels may differ in size and shape from the label required by this section only to a small degree, except to the extent a larger label is necessary to accommodate additional information or translation of label information.

(ii) A request for approval of an alternative label must be sent to the attention of ''E15 Alternative Label Request'' to the address in § 80.10(a).

PART 280—TECHNICAL STANDARDS AND CORRECTIVE ACTION REQUIREMENTS FOR OWNERS AND OPERATORS OF UNDERGROUND STORAGE TANKS (UST)

■ 3. The authority citation for part 280 continues to read as follows:

Authority: 42 U.S.C. 6912, 6991, 6991(a), 6991(b), 6991(c), 6991(d), 6991(e), 6991(f), 6991(g), 6991(h), 6991(i).

■ 4. Amend § 280.20 by adding a sentence after the first sentence in the introductory text to read as follows:

§ 280.20 Performance standards for new UST systems.

* * * Owners and operators must also comply with the requirement of § 280.32(b) when equipment or components are installed or replaced, as applicable. * * *

* * * * *

■ 5. Amend § 280.32 by revising paragraph (b) and adding paragraphs (c) and (d) to read as follows:

§ 280.32 Compatibility

* * * * *

(b) In addition to the requirements at § 280.20, owners and operators of UST systems which will store motor fuel used in over-the-road vehicles must ensure that equipment and components, including pipe dopes and sealants, that are installed or replaced on or after [1 year after effective date of final regulations] are compatible with ethanol blends up to 100 percent. Owners and operators must keep documentation of compatibility in accordance with paragraph (c)(1) of this section and keep documentation on compatibility of pipe dopes and sealants.

(c) Owners and operators must notify the implementing agency at least 30 days prior to switching to a regulated substance containing greater than 10 percent ethanol, greater than 20 percent biodiesel, or any other regulated substance identified by the implementing agency. In addition, owners and operators with UST systems storing these regulated substances must meet one of the following:

(1) Demonstrate compatibility of the UST system (including the tank, piping, containment sumps, pumping equipment, release detection equipment, spill equipment, and overfill equipment). Owners and operators may demonstrate compatibility of the UST system by using one of the following options, though no demonstration is required for tanks manufactured on or after July 2005 or for any fiberglass piping:

(i) Certification or listing of UST system equipment or components by a nationally recognized, independent testing laboratory for use with the regulated substance stored; or

(ii) Equipment or component manufacturer approval. The manufacturer's approval must be in writing, indicate an affirmative statement of compatibility, specify the range of biofuel blends the equipment or component is compatible with, and be from the equipment or component manufacturer.

(2) All UST systems must be compatible with the substance stored in accordance with paragraph (a) of this section but for any UST system installed prior to 1 year after the date of publication of the final rule in the **Federal Register** for which compatibility cannot be demonstrated in accordance with paragraph (c)(1) of this section, the regulated substance may be stored if the tank and piping are secondarily contained and use interstitial monitoring in accordance with § 280.43(g). Secondary containment must be able to contain regulated substances leaked from the primary containment until they are detected and removed and prevent the release of regulated substances to the environment at any time during the operational life of the UST system.

(3) Use another option determined by the implementing agency to be no less protective of human health and the environment than the options listed in paragraph (c)(1) of this section.

(d) Owners and operators must maintain records in accordance with § 280.34(b) documenting compliance with paragraph (b) *of this section* for the life of the UST system and paragraph (c) of this section for as long as the UST system is used to store the regulated substance.

§ 280.34 [Amended]

■ 6. Amend § 280.34 paragraph (a)(2) by removing ''(§ 280.32(b))'' and adding ''(§ 280.32(c))'' in its place; and in paragraph (b)(3) by removing ''(§ 280.32(c))'' and adding ''(§ 280.32(b) and (c))'' in its place.

PART 281—APPROVAL OF STATE UNDERGROUND STORAGE TANK PROGRAMS

■ 7. The authority citation for part 281 continues to read as follows:

Authority: 42 U.S.C. 6912, 6991(c), 6991(d), 6991(e), 6991(i), 6991(k).

■ 8. Amend § 281.32 by revising paragraph (c) and the first sentence of paragraph (g) to read as follows:

§ 281.32 General operating requirements

* * * * *

(c) Be made of or lined with materials that are compatible with the substance stored; in order to ensure compatibility, the state requirements must also include provisions for demonstrating compatibility with new and innovative regulated substances or other regulated substances identified by the implementing agency or include other provisions determined by the implementing agency to be no less protective of human health and the environment than the provisions for demonstrating compatibility; for UST systems that will store motor fuel used in over-the-road vehicles, all newly installed or replaced equipment or components, including pipe dopes and sealants, must be compatible with ethanol blends up to 100 percent;

* * * * *

(g) Have records of monitoring, testing, repairs, compatibility demonstration, and inspections. * * *

Medicaid Program; Medicaid Fiscal Accountability Regulation

ACTION: Withdrawal of proposed rule.

SUMMARY: This document withdraws a proposed rule that was published in the **Federal Register** on November 18, 2019. The proposed rule would have established new reporting requirements and codified other Medicaid financing requirements, including related to permissible sources for non-federal share financing.

DATES: The proposed rule on Medicaid Fiscal Accountability Regulation, published on November 18, 2019 at 84 FR 63722 is withdrawn January 21, 2021.

ADDRESSES: In commenting, please refer to file code CMS–2393–WN.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS-*2393–WN,* P.O. Box 8016, Baltimore, MD 21244–8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–2393–WN, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

FOR FURTHER INFORMATION CONTACT:

Andrew Badaracco, (410) 786–4589, Richard Kimball, (410) 786–2278, and Daniil Yablochnikov, (410) 786–8912, for Medicaid Provider Payments, Supplemental Payments, Upper Payment Limits, Provider Categories, Intergovernmental Transfers, and Certified Public Expenditures.

Timothy Davidson, (410) 786–1167, Jonathan Endelman, (410) 786–4738, and Stuart Goldstein, (410) 786–0694, for Health Care-Related Taxes, Provider-Related Donations, and Disallowances.

Lia Adams, (410) 786–8258, Charlie Arnold, (404) 562–7425, Richard Cuno, (410) 786–1111, and Charles Hines, (410) 786–0252, for Medicaid Disproportionate Share Hospital Payments and Overpayments.

Jennifer Clark, (410) 786–2013, and Deborah McClure, (410) 786–3128, for Children's Health Insurance Program (CHIP).

SUPPLEMENTARY INFORMATION: On November 18, 2019, we published a proposed rule that proposed to amend our regulations dealing with grants to states for medical assistance programs, state fiscal administration, payments for services, Medicaid program integrity, and allotments to states and grants. (84 FR 63722). After an internal review of the proposed rule, CMS has decided to withdraw the proposed rule.

The proposed rule sought to promote accountability and transparency for Medicaid payments by establishing new reporting requirements for states to provide CMS with certain information on supplemental payments to Medicaid providers, including supplemental payments approved under either Medicaid state plan or demonstration authority, codification of parameters for Medicaid upper payment limit calculations, provider definitions associated with data reporting and Medicaid financing, Medicaid disproportionate share hospital audit requirements and changes to some existing operational processes to better align with technology improvements. This proposed rule also sought to establish additional requirements to ensure that state plan amendments proposing new supplemental payments are consistent with the proper and efficient operation of the state plan and with efficiency, economy, and quality of care. Finally, this proposed rule sought to address the non-federal share financing of supplemental and base Medicaid payments, including states' uses of health care-related taxes and provider-related donations, and other requirements for sources of the non-federal share.

We received approximately 10,188 individual comments (4,225 unduplicated comment submissions) through the extended comment period.[1] We received significant comments on the proposed rule regarding its potential impact on states and their budgets, Medicaid providers and Medicaid beneficiary access to needed services. Many commenters stated their belief that the proposed rule did not include adequate analysis of these matters. Numerous commenters indicated that CMS, in some instances, lacked statutory authority for its proposals and was creating regulatory provisions that were ambiguous or unclear and subject to excessive Agency discretion.

While we continue to support the intent and purpose of the rule to increase fiscal accountability and improve transparency in the Medicaid program, based on the considerable feedback we received through the public comment process, we have determined it appropriate to withdraw the proposed provisions at this time. Moving forward, we want to ensure agency flexibility in re-examining these important issues and exploring options and possible alternative approaches that best implement the requirements of the Medicaid statute. We also believe it is important to re-examine and fully analyze the proposed Medicaid reporting requirements in consideration of the recent Congressional action through the Consolidated Appropriations Act of 2021 (H.R. 116–133, Pub. L. 116–260) which establishes new statutory requirements for Medicaid supplemental payment reporting. This withdrawal action does not limit our prerogative to make new regulatory proposals in the areas addressed by the withdrawn proposed rule, including new proposals that may be substantially identical or similar to those described therein.

Finally, the withdrawal of this proposed rule does not affect existing federal legal requirements or policy that were merely proposed to be codified in regulation, including certain provisions related to Medicaid financing and Medicaid Upper Payment Limit (UPL) requirements. For example, without limitation, this includes guidance in State Medicaid Director Letter (SMDL) #13–003, which discussed a submission process to comply with the UPL requirements; SMDL #14–004, which discussed Medicaid financing and provider-related donations; as well as State Health Officials (SHO) Letter #14–001, which addressed health care-related taxes. This withdrawal action does not affect CMS' ongoing application of existing statutory and regulatory requirements or its

[1] On December 30, 2019, CMS extended the comment period for the November 18, 2019, proposed rule by 15 days, from January 17, 2020, to February 1, 2020, in response to feedback from stakeholders indicating additional time was needed to review the proposed rule in light of several holidays and the complexity of the rule.

responsibility to faithfully administer the Medicaid program.

Dated: January 12, 2021.

FEDERAL MARITIME COMMISSION

46 CFR Part 530

[Docket No. 20–22]

RIN 3072–AC84

Service Contracts

AGENCY: Federal Maritime Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Federal Maritime Commission proposes to amend its service contract filing requirements to permit ocean common carriers to file original service contracts up to 30 days after the contract goes into effect.

DATES: Submit comments on or before March 5, 2021.

In compliance with the Paperwork Reduction Act (PRA), the Commission is also seeking comment on revisions to an information collection. See the Paperwork Reduction Act section under Rulemaking Analyses and Notices below. Please submit all comments relating to the revised information collection requirements to the FMC and to the Office of Management and Budget (OMB) at the address listed below under **ADDRESSES** on or before March 22, 2021. Comments to OMB are most useful if submitted within 30 days after publication.

ADDRESSES: You may submit comments, identified by Docket No. 20–22, by the following methods:

• *Email: secretary@fmc.gov.* For comments, include in the subject line: ''Docket No. 20–22, Comments on Service Contract Rulemaking.'' Comments should be attached to the email as a Microsoft Word or text-searchable PDF document.

Comments regarding the proposed revisions to the relevant information collection should be submitted to the FMC through one of the preceding methods and a copy should also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Federal Maritime Commission, 725 17th Street NW, Washington, DC 20503; by Fax: (202) 395–5167; or by email: *OIRA_Submission@OMB.EOP.GOV.*

Instructions: For detailed instructions on submitting comments, including requesting confidential treatment of comments, and additional information on the rulemaking process, see the Public Participation heading of the Supplementary Information section of this document. Note that all comments received will be posted without change to the Commission's website, unless the commenter has requested confidential treatment.

Docket: For access to the docket to read background documents or comments received, go to the Commission's Electronic Reading Room at: *https://www2.fmc.gov/readingroom/proceeding/20-22/.*

FOR FURTHER INFORMATION CONTACT: Rachel E. Dickon, Secretary; Phone: (202) 523–5725; Email: *secretary@fmc.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

The Shipping Act of 1984, as amended (46 U.S.C. 40101–41309) (Shipping Act or Act) permits ocean common carriers and shippers to enter into individual, confidential service contracts for the international transportation of cargo, and requires that these contracts be filed with the Federal Maritime Commission. Under the current regulations in 46 CFR part 530, original service contracts must be filed on or before their effective date, while service contract amendments must be filed within 30 days *after* they go into effect. The disparate treatment of original service contracts versus amendments was the result of a 2016–2017 rulemaking in which the Commission determined to allow delayed filing for amendments while retaining the requirement that original service contracts be filed on or before their effective date.

In response to the COVID–19 pandemic and its impact on service contract negotiation and filing, the Commission recently granted a temporary exemption permitting original service contracts, like amendments, to be filed up to 30 days after their effective date. Based on the Commission's experience during the exemption period and the perceived benefits of allowing delayed filing for original service contracts, the Commission has tentatively determined to make the status quo permanent. Accordingly, the Commission is proposing to revise its service contract regulations in part 530 to allow original service contracts, like amendments, to be filed up to 30 days after they go into effect. The Commission is also proposing several technical amendments to the service contract regulations.

The Commission requests comments on these proposed amendments and any other amendments necessary to implement delayed filing for original service contracts.

II. Background

A. Service Contract Requirements

The Shipping Act permits ocean common carriers and shippers to enter into individual, confidential service contracts for the international transportation of cargo, and requires that these contracts be filed with the Federal Maritime Commission.[1] For many years, the Commission's implementing regulations required that ocean common carriers file all service contracts and amendments with the Commission before the contract or amendment could go into effect.[2]

B. 2016–2018 Rulemakings

In 2016, the Commission published an advanced notice of proposed rulemaking (ANPRM) to revise its regulations governing service contracts and non-vessel-operating common carrier (NVOCC) negotiated service arrangements (NSAs).[3] The rulemaking was based on the Commission's retrospective review of its regulations and feedback from the industry and shippers. One suggestion from ocean common carriers was to allow service contract amendments to go into effect

[1] *See* 46 U.S.C. 40502.

[2] *See, e.g.,* 46 CFR 530.8(a) (2016).

[3] ANPRM: Service Contracts and NVOCC Service Arrangements, 81 FR 10198 (Feb. 29, 2016).

before filing with the Commission, provided that the amendment was filed within 30 days after the earlier of: (1) The date the parties agreed to the amendment; or (2) the date the carrier received cargo to which the amendment applied.[4] Beneficial cargo owners and NVOCCs that provided feedback to the Commission, however, indicated that filing amendments prior to the acceptance of cargo protected rate and contract commitments, and these shippers were confident ocean common carriers would honor the rates and contract commitments knowing that the contracts were filed with the Commission.[5] Notwithstanding these concerns, the Commission requested comment on the carriers' proposal.[6]

The Commission subsequently published an NPRM in 2016 that proposed, among other things, to allow service contract amendments to be filed up to 30 days after the effective date.[7] The Commission noted that the majority of commenters to the ANPRM supported the change and some advocated extending the same relief to the filing of original service contracts.[8] Responding to the these comments, the Commission initially discussed how the existing requirements protected shipper interests by demonstrating agreement among the parties prior to the movement of cargo, and that shippers had expressed confidence in this process knowing that both the shipper and carrier would honor the commitment of their service contract filed with the Commission.[9] The Commission moved on to distinguish original service contracts from service contract amendments, describing an original service contract as ''a comprehensive agreement between the parties that encompasses the commodities that are to be shipped, the origins and destinations between which cargo is to move, the rates for the transportation of that cargo, as well as terms and conditions governing the transportation of goods for the shipper.'' [10] The Commission described service contract amendments, on the other hand, as ''more limited in scope, generally adding new commodities and/or rates.'' [11] The Commission therefore proposed to allow filing of service contract amendments up to 30 days after going into effect, but declined to propose extending the same treatment to original service contracts ''given their nature and the Commission's belief that doing so would diminish its oversight abilities.'' [12]

The Commission published a final rule in 2017 adopting, among other changes, the proposed change to permit filing of service contract amendments up to 30 days after the effective date.[13] Carriers and shippers had asserted in their comments that the service contract effective date requirement was overly restrictive, particularly with respect to service contract amendments, and stated that the majority of amendments were for minor revisions to commercial terms, such as a revised rate or the addition of a new origin/destination or commodity.[14] The Commission also cited carrier claims that, in certain instances, parties had agreed to amend a service contract, but the cargo was received before the carrier filed the amendment with the Commission, meaning that the rates and terms in the amendment could not be applied to the cargo under the Commission's regulations.[15] The Commission concluded that permitting delayed filing was warranted because: (1) It would reduce the filing burdens on the industry by allowing carriers to file multiple amendments made within a 30-day period at the same time rather than on a piecemeal basis; (2) it would avoid the commercial harm associated with failing to timely file an amendment and allow the parties to apply the agreed rates and terms to the intended shipments; and (3) the Commission would maintain the ability to protect the shipping public.[16]

In discussing a related proposal that the service contract correction process be amended to permit carriers to submit inadvertently unfiled original service contracts and amendments to the Commission within 180 days, the Commission determined that ''[i]n the case of original service contracts, shipper protections at the time of contracting and for the ensuing contract term are best assured by requiring that the agreement be contemporaneously filed as the best evidence of the actual agreement between the parties when first reached.'' [17] The Commission expressed concern that delayed filing of service contracts could negatively affect its ability to investigate and enforce the Shipping Act because ''[u]nlike those limited and modest revisions to accommodate industry needs for correction of contract amendments, failure to file the original contract may conceal the very existence of a contractual arrangement in a given trade lane or lanes, avoiding early detection of market-distorting practices by individual carriers.'' [18]

Following publication of the 2017 service contract/NSA final rule, the Commission initiated a separate rulemaking in 2017 to address regulatory revisions proposed by the National Customs Brokers and Forwarders Association of America in a 2015 petition.[19] Although this rulemaking focused on NSAs and NVOCC Negotiated Rate Arrangements (NRAs), the Commission discussed the World Shipping Council's (WSC) comments on the 2015 petition regarding the implementation of similar changes to the service contract requirements.[20] The Commission noted that these comments predated the 2016–2017 service contract/NSA rulemaking, and with the publication of the final rule in that proceeding, the Commission had substantially met the WSC's request for regulatory relief for ocean common carriers.[21] The Commission stated that any further relief related to service contracts could be undertaken after the Commission had an opportunity to analyze the impact of the recent changes on carrier operations and shippers.[22]

C. 2018 World Shipping Council Petition for Exemption

In 2018, the WSC petitioned the Commission for an exemption from the service contract filing and essential terms publication requirements.[23] The Commission denied the request for exemption from the service contract filing requirements but granted the request for exemption from the essential terms publication requirements.[24] Although the petition and subsequent Commission decision were focused on eliminating the service contract filing requirement entirely, delayed filing was discussed. For example, as part of the Commission's analysis of the potential economic harm that could result from

eliminating the filing requirement, the Commission pointed to the shipper comments discussed in the 2016–2017 service contract/NSA rulemaking indicating that the filing requirement encouraged ocean common carriers to adhere to contract terms and deterred them from introducing unreasonable terms into service contract boilerplate language.[25] The Commission also stated that delayed filing for service contract amendments addressed a number of the issues raised by commenters.[26] Finally, in response to WSC's argument that maintaining the filing requirement would negatively impact the ability of NVOCCs to use the expedited contract acceptance and effective date provisions implemented by the Commission in the recent 2017–2018 NSA/NRA rulemaking, the Commission pointed out that WSC's assertion was based on the premise that service contract filing delays the effectiveness of service contracts.[27] The Commission noted that WSC had not alleged that such a delay existed nor had Commission experience shown such a delay, and in the absence of such a showing, the Commission did not believe that granting WSC's petition was necessary to give full effect to the changes made in the 2018 NSA/NRA final rule.[28]

D. 2020 Exemptions

The spread of coronavirus disease 2019 (COVID–19) in 2020 had a significant effect on the global freight delivery system, including service contract negotiation and implementation.[29] Many businesses began working remotely because of social distancing guidance and stay-at-home orders.[30] For some entities, this situation, combined with other COVID–19-related disruptions to commercial operations, made complying with service contract filing requirements difficult.

To allow parties time to adapt to the increased pressures from COVID–19 and minimize disruptions to the contracting process, the Commission issued a temporary blanket exemption on April 27, 2020, extending the filing flexibilities for service contract amendments to original service contracts.[31] The exemption is conditioned on carriers continuing to file original service contracts, subject to the same delayed filing requirements as service contract amendments (*i.e.,* original service contracts must be filed within 30 days after the effective date). The exemption was originally set to expire December 31, 2020, but the Commission recently extended it until June 1, 2021.[32]

On October 7, 2020, CMA CGM, S.A. and its corporate affiliates petitioned the Commission for an exemption from the service contract filing and tariff publishing requirements to mitigate the effects of a cyberattack on their information systems.[33] While the carriers stated that they appreciated the flexibility afforded by the temporary exemption, they requested further exemption from the filing requirements with respect to original service contracts and amendments to permit them to be filed more than 30 days after they went into effect. The Commission granted the exemption on October 20, 2020, and the exemption expired on November 26, 2020.

III. Proposed Changes

As discussed above, the Commission expressed concern during the 2016–2017 rulemaking about permitting original service contracts to be filed after their effective date, and decided to limit delayed filing to amendments. But the Commission did not permanently foreclose future changes to the service contract requirements, stating in the 2017 NSA/NRA NPRM that further relief related to service contracts could be undertaken after the Commission had an opportunity to analyze the impact of the 2017 final rule on carriers and shippers.[34] In line with this statement, the Commission has reexamined the issue of allowing delayed filing for original service contracts after considering both the agency's experience over the last three years with delayed filing of amendments and the recent experience with delayed filing of original service contracts under the current temporary exemption.

The Commission has tentatively concluded that permanently allowing delayed filing of original service contracts will provide the same type of benefits as delayed filing of service contract amendments, namely avoiding the commercial harm associated with situations in which cargo is received after the parties have agreed to a service contract but before the service contract is filed with the Commission. The need for this flexibility has been amply demonstrated by recent events, including the commercial disruption, social distancing, and stay-at-home orders stemming from COVID–19, which has impacted carriers' ability to file service contracts and prompted the Commission to grant a temporary exemption. And in CMA CGM's recent exemption petition in response to a cyberattack, the carrier cited with appreciation the flexibility afforded by the ability to file service contracts and amendments after their effective date. These recent events demonstrate that, in certain circumstances, requiring that service contracts be filed before they go into effect can potentially delay performance under the contract to the detriment of shippers.

The Commission has also tentatively concluded that allowing original service contracts to be filed up to 30 days after the effective date will not materially impact the agency's ability to provide oversight and protect the shipping public. Of particular importance, the Commission has not received any shipper complaints regarding delayed filing of amendments or the recent exemption allowing delayed filing of original service contracts. The Commission believes that the service contract filing requirement will continue to ensure adherence to service contract terms and deter the introduction of unreasonable terms, regardless of whether original service contracts are filed before, on, or after the effective date.[35] And the proposed amendments make clear that original service contracts and amendments will continue to be prospective in nature, ensuring that the parties have reached agreement *before* cargo moves under the contract.

Although the Commission continues to recognize that original service contracts are more comprehensive in scope than amendments, the Commission has tentatively concluded that this difference does not support different filing requirements. Under the proposed rule, the Commission would continue to monitor filed service contracts, and delayed filing would not negatively impact the Commission's ability to investigate potential Shipping Act violations given the relatively short

filing period being proposed (30 days after the effective date).[36]

Based on the foregoing, the Commission is proposing to revise its service contract regulations in part 530 to allow original service contracts, like amendments, to be filed up to 30 days after the effective date. The proposed revisions are also intended to clarify that the trigger for the 30-day filing period is the effective date of the service contract or amendment.

In addition, the Commission is proposing technical amendments to the service contract regulations following the Commission order and subsequent rulemaking to exempt ocean common carriers from the requirement to publish service contract essential terms.[37] These amendments would: (1) Remove a reference to essential terms publication that was inadvertently retained; and (2) add language describing the exemption to ensure that ocean common carriers and other stakeholders that may not know the history of the matter are aware of the exemption.

The Commission requests comments on these proposed amendments and any other amendments necessary to implement delayed filing for original service contracts.

A. Delayed Filing for Original Service Contracts

1. Definition of ''Effective Date'' (§ 530.3)

The current definition of ''Effective date'' describes: (1) What an effective date is; (2) the relationship between the effective date and the filing date for both original service contracts and amendments (*i.e.,* the effective date may not be before the filing date for original service contracts or more than 30 days prior to the filing date for amendments); and (3) the specific time on the effective date when an original service contract or amendment is effective (12:01 a.m. Eastern Standard Time).

The Commission is proposing to amend the definition of ''Effective date'' by removing the language tying the effective date to the filing date. As described above, the Commission is proposing to extend delayed filing to original service contracts and is therefore deleting the sentence stating that the effective date for original service contracts cannot be prior to the filing date. The Commission is also proposing to delete the sentence stating that the effective date of an amendment can be no more than 30 days prior to the filing date. This sentence, in essence, simply repeats the filing requirement in § 530.8(a)(2). As described below, § 530.8(a), as amended by the proposed revisions, would adequately describe the filing requirement and the deadline for filing, and repeating the requirement in § 530.3(i) is therefore unnecessary.

The Commission is also proposing to clarify the time on the effective date when a service contract or amendment goes into effect. Currently, § 530.3(i) provides that a service contract or amendment is effective at 12:01 a.m. Eastern Standard Time. The proposed revision would add the equivalent time zone relative to Coordinated Universal Time (UTC) for added clarity (*i.e.,* UTC–05:00).

Finally, the Commission is proposing to add language to the definition to clarify that although service contracts and amendments may be filed after the effective date, the Commission is retaining the requirement that service contracts and amendments must be prospective in nature and cannot have retroactive effect. Under the current regulations, service contract amendments may only have prospective effect.[38] And, prior to the recent temporary exemption, original service contracts could not become effective prior to being filed with the Commission and were therefore also limited to having prospective effect. Because the Commission is proposing to allow original service contracts to be filed after they go into effect, the Commission is also adding language to the definition of ''Effective date'' to reflect the continuing requirement that service contracts and amendments may only have prospective effect. The added language specifies that the effective date cannot be earlier than the date on which all the parties have signed the service contract or amendment.

2. Service Contract Filing Requirements (§ 530.8)

Section 530.8 sets forth the filing requirements for service contracts and amendments. Under the current regulations, amendments must be filed no later than 30 days after cargo moves pursuant to the amendment, and, prior to the temporary exemption, original service contracts had to be filed before any cargo moved pursuant to the service contract.[39] The Commission is proposing to allow a 30-day filing period for both original service contracts and amendments and is therefore combining § 530.8(a)(1) and (2) into a single provision at § 530.8(a). The revised § 530.8(a) would require that ocean common carriers file service contracts and amendments no later than 30 days after the effective date.

The trigger for the filing period under the proposed revisions thus differs from the current requirement for service contract amendments in § 530.8(a)(2). The current regulations include two trigger events. Current § 530.3(i) requires that the effective date for the amendment be no more than 30 days prior to the filing date, while current § 530.8(a)(2) requires that an amendment be filed no later than 30 days after cargo moves pursuant to the amendment. In accordance with § 530.14(a), performance under an original service contract or amendment may not begin until the effective date, and therefore the effective date will always be earlier than the date cargo moves under the contract or amendment. Accordingly, in order to comply with both §§ 530.3(i) and 530.8(a)(2), ocean common carriers must file service contract amendments no later than 30 days after the effective date. Based on this interpretation, the Commission published guidance on its website shortly after the 2017 final rule was issued to make clear that service contract amendments must be filed no later than 30 days after their effective date.[40] The Commission is thus proposing a single trigger (effective date) for the 30-day filing period for both original service contract and amendments. This will make clear when service contracts must be filed and allow the Commission to readily assess compliance.

The Commission is also proposing amendments to § 530.8(e) to reflect the 30-day filing period for original service contracts. Section 530.8(e) currently provides that if the Commission's service contract filing system is unable to receive filings for 24 hours or more, affected parties are not subject to the requirements in §§ 530.8(a) and 530.14(a) that a service contract must be filed before cargo is shipped under the contract. This exception is conditioned on the affected service contracts being filed within 24 hours after the Commission filing system returns to service.

[36] The Commission's stated concerns in the 2017 service contract/NSA final rule regarding the impact of delayed filing on enforcement were made in response to comments stating that the correction process should allow carriers to submit inadvertently unfiled service contracts with the Commission within a much longer period (180 days).

[37] *Pet. of World Shipping Council,* 1 F.M.C.2d at 515–516. *See* Final Rule: Service Contracts, 85 FR 38086 (June 25, 2020).

[38] § 530.10(a)(1).

[39] § 530.8(a)(1), (2).

[40] *https://web.archive.org/web/20190321030253/https://www.fmc.gov/resources/amended_service_contract*_nsas_rule.aspx (last visited Nov. 24, 2020).

The proposed amendments to §§ 530.8(a) and 530.14(a) require corresponding changes to § 530.8(e). The proposed changes to § 530.8(e) would provide that if the Commission's service contract filing system is down for 24 hours or more, any service contract or amendment that must be filed during that period (*i.e.,* because the 30-day filing period concludes while the system is down) will be considered timely filed so long as the contract or amendment is filed no later than 24 hours after the Commission filing system returns to service. As explained below, the Commission is proposing to remove references to the filing date in § 530.14(a), and therefore the proposed revisions to § 530.8(e) also delete the reference to § 530.14(a).

3. Service Contract Implementation Requirements (§ 530.14)

Section 530.14 provides that performance under a service contract or amendment may not begin until the effective date and conditions performance on compliance with the relevant filing requirements, *i.e.,* performance under an original service contract may not begin until the contract is filed while performance under an amendment may begin on the effective date provided that the amendment is filed no later than 30 days after the effective date.

Given the proposed changes to § 530.8(a) would prescribe the same filing period for original service contracts and amendments (30 days after the effective date), the Commission is proposing to replace the separate requirements for original service contracts and amendments in § 530.14(a) with a single requirement that performance under either may not begin until the effective date. The Commission is also proposing to remove the language tying performance to the filing date as it simply repeats the filing requirement in § 530.8(a). As described above, § 530.8(a), as amended by the proposed revisions, would adequately describe the filing requirement and the deadline for filing, and repeating the requirement in § 530.14(a) is therefore unnecessary.

The Commission is also proposing to add an additional sentence to § 530.14(a) to clarify that original service contracts and amendments may apply only to cargo received by the carrier on or after the effective date. This is implied by the current language of §§ 530.8(a) (describing when a service contract or amendment must be filed in relation to when cargo moves under the contract) and 530.14(a) (prohibiting performance under a service contract or amendment until the effective date) and has been stated in previous rulemakings.[41] Because the Commission is proposing to amend § 530.8(a) so that the filing period is tied to the effective date rather than the date cargo moves, the Commission is proposing to include language in § 530.14(a) clearly stating that service contracts and amendments may only apply to cargo received on or after the effective date.

B. Technical Amendments

In order to implement the Commission's December 2019 decision to grant in part WSC's petition and exempt ocean common carriers from the essential terms publication requirements,[42] the Commission recently issued a final rule removing those requirements from part 530.[43] Since then, the Commission has tentatively determined that additional minor technical amendments are warranted.

1. Definition of ''Authorized Person'' (§ 530.3)

The definition of ''Authorized person'' in § 530.3(c) includes a reference to publishing statements of essential terms. The definition also cross-references a nonexistent paragraph (§ 530.5(d)) when referring to the registration requirements for filing service contracts. The Commission is proposing to amend the definition by removing the reference to essential terms publication and including the correct citation for the registration requirements (§ 530.5(c)).

2. Exceptions and Exemptions (§ 530.13)

The Commission is proposing to add a new paragraph (e) to § 530.13 to reflect the exemption granted by the Commission from the essential terms publication requirements. Although the Commission recently eliminated the essential terms publication requirements in part 530, ocean common carriers that are not aware of the exemption may be confused as to whether the statutory requirement in 46 U.S.C. 40502(d) continues to apply. Accordingly, the Commission has tentatively determined to include a new provision reflecting the exemption from section 40502(d).

IV. Public Participation

How do I prepare and submit comments?

Your comments must be written and in English. To ensure that your comments are correctly filed in the docket, please include the docket number of this document in your comments.

You may submit your comments via email to the email address listed above under **ADDRESSES**. Please include the docket number associated with this document and the subject matter in the subject line of the email. Comments should be attached to the email as a Microsoft Word or text-searchable PDF document.

How do I submit confidential business information?

The Commission will provide confidential treatment for identified confidential information to the extent allowed by law. If your comments contain confidential information, you must submit the following by email to the address listed above under **ADDRESSES**:

- A transmittal letter requesting confidential treatment that identifies the specific information in the comments for which protection is sought and demonstrates that the information is a trade secret or other confidential research, development, or commercial information.
- A confidential copy of your comments, consisting of the complete filing with a cover page marked ''Confidential-Restricted,'' and the confidential material clearly marked on each page.
- A public version of your comments with the confidential information excluded. The public version must state ''Public Version—confidential materials excluded'' on the cover page and on each affected page, and must clearly indicate any information withheld.

Will the Commission consider late comments?

The Commission will consider all comments received before the close of business on the comment closing date indicated above under **DATES**. To the extent possible, we will also consider comments received after that date.

How can I read comments submitted by other people?

You may read the comments received by the Commission at the Commission's Electronic Reading Room at the

[41] *See, e.g.,* 82 FR at 16290 (noting that because of the previous requirement that amendments had to filed before cargo could move under the terms of the amendment, ''[c]arriers have cited instances in which the parties have agreed to amend the contract, however, due to unavoidable circumstances, the cargo was received before the carrier filed the amendment with the Commission'' and ''[i]n such cases, the amendment's rates and terms may not be applied to that cargo pursuant to the Commission's rules.'').

V. Rulemaking Analyses and Notices

Regulatory Flexibility Act

The Regulatory Flexibility Act (codified as amended at 5 U.S.C. 601–612) provides that whenever an agency is required to publish a notice of proposed rulemaking under the Administrative Procedure Act (APA) (5 U.S.C. 553), the agency must prepare and make available for public comment an initial regulatory flexibility analysis (IRFA) describing the impact of the proposed rule on small entities, unless the head of the agency certifies that the rulemaking will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 603, 605. Based on the analysis below, the Chairman of the Federal Maritime Commission certifies that this proposed rule will not have a significant economic impact on a substantial number of small entities. The regulated business entities that would be impacted by the rule are ocean common carriers (*i.e.,* vessel-operating common carriers). The Commission has determined that ocean common carriers generally do not qualify as small entities under the guidelines of the Small Business Administration (SBA). *See FMC Policy and Procedures Regarding Proper Consideration of Small Entities in Rulemakings* (Feb. 7, 2003), available at *https://www.fmc.gov/wp-content/uploads/2018/10/SBREFA_Guidelines_2003.pdf.*

National Environmental Policy Act

The Commission's regulations categorically exclude certain rulemakings from any requirement to prepare an environmental assessment or an environmental impact statement because they do not increase or decrease air, water or noise pollution or the use of fossil fuels, recyclables, or energy. 46 CFR 504.4. The proposed rule would allow ocean common carriers to file original service contracts up to 30 days after their effective date. This rulemaking thus falls within the categorical exclusion for actions related to the receipt of service contracts (§ 540.4(a)(5)). Therefore, no environmental assessment or environmental impact statement is required.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) (PRA) requires an agency to seek and receive approval from the Office of Management and Budget (OMB) before collecting information from the public. 44 U.S.C. 3507. The agency must submit collections of information in proposed rules to OMB in conjunction with the publication of the notice of proposed rulemaking. 5 CFR 1320.11.

The information collection requirements associated with the service contract filing requirements in part 530 are currently authorized under OMB Control Number 3072–0065. In compliance with the PRA, the Commission has submitted the proposed revised information collection to the Office of Management and Budget and is requesting comment on the proposed revision.

Title: 46 CFR part 530—Service Contracts and Related Form FMC–83.

OMB Control Number: 3072–0065.

Abstract: 46 U.S.C. 40502 and 46 CFR part 530 require ocean common carriers to file certain service contracts confidentially with the Commission.

Current Action: The proposed rule would amend the service contract filing requirements and allow ocean common carriers to file original service contracts up to 30 days after the effective date. Currently, part 530 requires that ocean common carriers file original service contracts on or before the effective date, while amendments must be filed within 30 days after the effective date.

Type of Request: Revision of a previously approved collection.

Needs and Uses: The Commission monitors service contract filings to ensure compliance with the Shipping Act of 1984.

Frequency: Frequency of filings is determined by the ocean common carrier and its customers. When parties enter into a service contract or amend the contract, the service contract or amendment must be filed with the Commission.

Type of Respondents: Ocean common carriers or their duly appointed agents are required to file service contracts and amendments with the Commission.

Number of Annual Respondents: The Commission does not anticipate that the proposed revisions would affect the number of respondents. As a general matter, however, the number of respondents has decreased since the last revision to the information collection. The Commission estimates an annual respondent universe of 86 ocean common carriers.

Estimated Time per Response: The Commission does not anticipate that the proposed revisions would affect the estimated time per response, which would continue to range from 0.0166 to 1 person-hours for reporting and recordkeeping requirements contained in the regulations, and 0.1 person-hours for completing Form FMC–83.

Total Annual Burden: The Commission does not anticipate that the proposed revisions would affect the number of service contracts filed or the burden associated with each filing and, therefore, would not affect the total annual burden. Due to the decrease in the number of respondents since the last revision, however, the Commission expects that the total annual burden will decrease. The Commission estimates the total person-hour burden at 30,448 person-hours.

Comments are invited on:

- Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility;
- Whether the Commission's estimate for the burden of the information collection is accurate;
- Ways to enhance the quality, utility, and clarity of the information to be collected;
- Ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Please submit any comments, identified by the docket number in the heading of this document, by the methods described in the **ADDRESSES** section of this document.

Executive Order 12988 (Civil Justice Reform)

This proposed rule meets the applicable standards in E.O. 12988 titled, ''Civil Justice Reform,'' to minimize litigation, eliminate ambiguity, and reduce burden. Section 3(b) of E.O. 12988 requires agencies to make every reasonable effort to ensure that each new regulation: (1) Clearly specifies the preemptive effect; (2) clearly specifies the effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct, while promoting simplification and burden reduction; (4) clearly specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. This document is consistent with that requirement.

Regulation Identifier Number

The Commission assigns a regulation identifier number (RIN) to each regulatory action listed in the Unified Agenda of Federal Regulatory and Deregulatory Actions (Unified Agenda).

The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. You may use the RIN contained in the heading at the beginning of this document to find this action in the Unified Agenda, available at *http://www.reginfo.gov/public/do/eAgendaMain.*

List of Subjects in 46 CFR Part 530

Freight, Maritime carriers, Report and recordkeeping requirements.

For the reasons set forth above, the Federal Maritime Commission is proposing to amend 46 CFR part 530 as follows:

PART 530–SERVICE CONTRACTS

■ 1. The authority citation for part 530 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. 305, 40301–40306, 40501–40503, 41307.

■ 2. Amend § 530.3 by revising paragraphs (c) and (i) to read as follows:

§ 530.3 Definitions.

* * * * *

(c) *Authorized person* means a carrier or a duly appointed agent who is authorized to file service contracts on behalf of the carrier party to a service contract and is registered by the Commission to file under § 530.5(c) and appendix A to this part.

* * * * *

(i) *Effective date* means the date upon which a service contract or amendment is scheduled to go into effect by the parties to the contract. A service contract or amendment becomes effective at 12:01 a.m. Eastern Standard Time (Coordinated Universal Time (UTC)-05:00) on the effective date. The effective date may not be earlier than the date on which all parties have signed the service contract or amendment.

* * * * *

■ 3. Amend § 530.8 by:
■ a. Revising paragraph (a);
■ b. Adding a subject heading to paragraph (b); and
■ c. Revising paragraph (e).

The revisions and addition read as follows:

§ 530.8 Service Contracts.

(a) *Filing.* Authorized persons shall file with BTA, in the manner set forth in appendix A of this part, a true and complete copy of every service contract and every amendment to a service contract no later than thirty (30) days after the effective date.

(b) *Required terms.* * * *

* * * * *

(e) *Exception in case of malfunction of Commission filing system.* In the event that the Commission's filing systems are not functioning and cannot receive service contract filings for twenty-four (24) continuous hours or more, an original service contract or amendment that must be filed during that period in accordance with paragraph (a) of this section will be considered timely filed so long as the service contract or amendment is filed no later than twenty-four (24) hours after the Commission's filing systems return to service.

■ 4. Amend § 530.13 by adding paragraph (e) to read as follows:

§ 530.13 Exceptions and exemptions.

* * * * *

(e) *Essential terms publication exemption.* Ocean common carriers are exempt from the requirement in 46 U.S.C. 40502(d) to publish and make available to the general public in tariff format a concise statement of certain essential terms when a service contract is filed with the Commission.

■ 5. Amend § 530.14 by revising paragraph (a) to read as follows:

§ 530.14 Implementation.

(a) *Generally.* Performance under an original service contract or amendment may not begin until the effective date. An original service contract or amendment may apply only to cargo received on or after the effective date by the ocean common carrier or its agent, including originating carriers in the case of through transportation.

* * * * *

By the Commission.

Rachel E. Dickon,

Secretary.

BILLING CODE P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–HQ–IA–2021–0004; FF09A30000–212–FXIA16710900000]

RIN 1018–BF60

Endangered and Threatened Wildlife and Plants; Regulations Pertaining to the American Alligator (*Alligator mississippiensis*)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (FWS or Service), are proposing to amend regulations concerning American alligators (*Alligator mississippiensis*) by revising provisions pertaining to interstate and foreign commerce. We are proposing these changes to increase clarity and eliminate unnecessary regulation while at the same time maintaining what is necessary and advisable for the conservation of this and other endangered or threatened crocodilian species under section 4(d) of the Endangered Species Act of 1973, as amended.

DATES: You may comment on this proposed rule until March 22, 2021.

ADDRESSES: You may submit written comments by one of the following methods:

- *Electronically Using the Federal eRulemaking Portal: http://www.regulations.gov* in Docket No. FWS–HQ–IA–2021–0004 (the docket number for this rulemaking).
- *U.S. Mail:* Public Comments Processing, Attn: FWS–HQ–IA–2020–XXXX; U.S. Fish and Wildlife Service Headquarters, MS: PRB (JAO/3W), 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We will not accept email or faxes. Comments and materials we receive, as well as supporting documentation, will be available for public inspection on *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Pamela Hall Scruggs, Chief, Division of Management Authority, U.S. Fish and Wildlife Service, 5275 Leesburg Pike, MS: IA, Falls Church, VA 22041–3803; telephone 703–358–2095 or email: *managementauthority@fws.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

The American alligator (*Alligator mississippiensis*) is an iconic U.S. animal with a history of both drastic decline and complete recovery. As a result of State and Federal cooperation, its recovery is one of the most prominent successes of the Nation's endangered species program.

The American alligator is a large, semi-aquatic, armored reptile that is related to crocodiles. Alligators can be distinguished from crocodiles by head shape and color. Adult alligators, which are almost black in color, have a broad, large, long head with visible upper teeth along the edge of the jaws. Crocodiles, which are brownish in color, have a narrower snout and have lower jaw teeth that are visible even when its mouth is shut. The American alligator has a large, slightly rounded body,

which ranges for adult alligators from 6 to 14 feet long, as well as thick limbs and a very powerful tail that it uses to propel itself through water. The tail accounts for half the alligator's length. Its front feet have five toes, while the rear feet have four toes that are webbed. In the wild, the American alligator often lives to 50 years of age and possibly over 70 years of age (Wilkinson *et al.* 2016, p. 843).

The breeding range of the American alligator is distributed in the southeastern United States in Arkansas, North Carolina, South Carolina, Georgia, Florida, Louisiana, Alabama, Mississippi, Oklahoma, and Texas. Within this range, American alligators inhabit freshwater swamps, lakes, marshes, and streams (Elsey *et al.* 2019, p. 1). They also inhabit brackish water habitats and, although they have a low tolerance for salt water, will occasionally use marine environments for feeding (Rosenblatt and Heithaus 2011, p. 786).

In the late 1860s, the leather industry's demand for exotic hides led to widespread commercial hunting of the American alligator. The demand in Europe and the United States for luxury leather products was so rapacious that, within a few years, large American alligators became extremely rare. This situation created a market for exported crocodile hides from Mexico and Central America. Tens of thousands of alligator and crocodile skins entered world markets, making their way from swamps to tanneries to exclusive department stores and boutiques. The precipitous decrease in size and numbers of American alligators taken for trade reflected a species in decline.

Today, American alligator populations thrive, as a result of creative partnerships between Federal and State governments. The States led the way in providing legal protection. Alabama adopted protective legislation for its American alligator population in 1941, followed by Florida (1961), Louisiana (1962), and Texas (1970). The wild American alligator population trend is increasing and is estimated to be 3–4 million non-hatchling individuals, of which approximately 750,000–1,060,000 are mature individuals (Elsey *et al.* 2019, p. 3).

Alligator farming and ranching played a role in the conservation success. American alligator ''farming'' involves captive breeding of American alligators. American alligator ''ranching'' involves gathering eggs from the wild, returning some juveniles to the wild, and raising the remainder to market size. For example, to ensure wild alligators are not depleted as a result of egg collections, and to ensure future recruitment of subadult alligators to the breeding population, the Louisiana Department of Wildlife and Fisheries currently requires a quantity of juvenile alligators equal to 10 percent of the eggs hatched by the rancher be returned to the wild within 2 years of hatching (Louisiana's Alligator Management Program 2017–2018 Annual Report, page 5). Alligator ranching has minimal adverse effects on the environment, and it has direct positive effects on alligator conservation. It may reduce demand for poached wild alligator skins and likely creates an incentive for ranchers to contribute to maintenance of wild populations and their habitats (Nickum *et al.* 2018, p. 87). Practiced primarily in Louisiana, Florida, Georgia, and Texas, American alligator farming and ranching is an aquaculture industry worth tens of millions of dollars (Nickum *et al.* 2018, p. 88). Particularly in Louisiana and Florida, farming and ranching are now being carried out on a large scale; stocks in over 100 commercial farms and ranches throughout the country are high, with more than 923,000 American alligators on farms in Louisiana alone in 2016 (Elsey *et al.* 2019, p. 3).

The American alligator first received protection under Federal law in 1967 when it was listed as endangered throughout its range under the Endangered Species Preservation Act of 1966 (32 FR 4001, March 11, 1967), a predecessor to the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.* (Act, ESA)). Its endangered classification was transferred to the Act effective December 28, 1973, (Pub. L. 93–205, 1, Dec. 28, 1973, 87 Stat. 884).

Under the ESA, species may be listed either as ''threatened'' or as ''endangered'' (16 U.S.C. 1532(6) (defining ''endangered''); 16 U.S.C. 1532(20) (defining ''threatened'')). ESA regulations are set forth in title 50 of the Code of Federal Regulations in parts 17 and 424. Section 4(e) of the Act (16 U.S.C. 1533(e); 50 CFR 17.50–17.51) gives the Secretary of the Interior authority to list a species, subspecies, or distinct population segment as endangered or threatened by reason of similarity of appearance if: (A) Such species so closely resembles in appearance, at the point in question, an ESA-listed endangered or threatened species that enforcement personnel would have substantial difficulty in attempting to differentiate between the listed and unlisted species; (B) the effect of this substantial difficulty is an additional threat to an endangered or threatened species; and (C) such treatment of an unlisted species will substantially facilitate the enforcement and further the policy of the Act. All applicable prohibitions and exceptions for species treated as threatened under section 4(e) of the Act due to similarity of appearance to a threatened or endangered species are provided in a rule issued under section 4(d) of the Act (16 U.S.C. 1533(d)), as discussed further below.

When a fish or wildlife species is listed as endangered under the ESA, certain actions are prohibited under section 9 (16 U.S.C. 1538(a)(1)), as specified at 50 CFR 17.21. These include prohibitions on ''take'' (16 U.S.C. 1532(19) (defining ''take'' to mean ''harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct''); 50 CFR 17.3 (defining ''harm'' and ''harass'')) within the United States, within the territorial seas of the United States, or upon the high seas; possession, sale, delivery, carrying, transport, or shipment of unlawfully taken specimens; import; export; sale and offer for sale in interstate or foreign commerce; and delivery, receipt, carrying, transport, or shipment in interstate or foreign commerce in the course of a commercial activity. It is also unlawful to attempt to commit, solicit another to commit, or cause to be committed, any of these offenses (16 U.S.C. 1538(g)).

The ESA does not specify particular prohibitions and exceptions to those prohibitions for threatened species. Instead, under section 4(d) of the ESA (16 U.S.C. 1533(d)), the Secretary of the Interior is given the discretion to issue such regulations as deemed necessary and advisable to provide for the conservation of the species. The Secretary also has the discretion to prohibit by regulation, with respect to any threatened species, any act prohibited under section 9(a)(1) of the ESA for endangered species of fish or wildlife. Accordingly, under section 4(d) of the ESA, the Service may develop specific prohibitions and exceptions tailored to the particular conservation needs of a threatened species (50 CFR 17.31(c)).

We have gained considerable experience in developing species-specific rules over the years. Where we have developed species-specific 4(d) rules, we have seen many benefits, including removing redundant permitting requirements, facilitating implementation of beneficial conservation actions, and making better use of our limited personnel and fiscal resources by focusing prohibitions on the stressors contributing to the threatened status of the species. This

proposed rule will allow us to capitalize on these benefits in tailoring the regulations to species conservation needs by eliminating unnecessary regulation while at the same time maintaining what is necessary and advisable for the conservation of this and other crocodilian species under section 4(d) of the ESA.

Section 4(d) of the Act states that the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of species listed as threatened. The U.S. Supreme Court has noted that statutory language very similar to ''necessary and advisable'' demonstrates a large degree of deference to the agency (see *Webster* v. *Doe,* 486 U.S. 592 (1988)). ''Conservation'' is defined in the Act to mean the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary (16 U.S.C. 1532(3)). Additionally, section 4(d) states that the Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or 9(a)(2), in the case of plants. Thus, regulations promulgated under section 4(d) of the Act provide the Secretary with broad discretion to select appropriate provisions tailored to the specific conservation needs of the threatened species. The statute grants particularly broad discretion to the Service when adopting the prohibitions under section 9. The Service also has discretion to revise or promulgate species-specific rules at any time after the final listing or reclassification determination.

The section 4(d) rule at 50 CFR 17.42(a), which currently pertains to any specimen of the American alligator, first became effective in 1975 (40 FR 44412, September 26, 1975). In 1975, American alligators in certain parts of Louisiana were reclassified from endangered to threatened because of recovery of these populations of the species and their similarity of appearance with endangered American alligators in Louisiana and elsewhere in the American alligator range (40 FR 44412, September 26, 1975). The preamble to the 1975 rule explained that the primary threat to American alligators in certain areas was the absence of adequate regulatory and enforcement mechanisms ''to prevent malicious and illicit commercially oriented killing'' and ''to control illegal commerce in products.'' To address concerns that once a legal market was established it could provide a ''screen'' for American alligator products from endangered populations, the 1975 rule established a marking and tagging regime for American alligator hides and included permitting requirements for fabricators, buyers, and tanners to allow identification throughout the marketing and processing chain. The 1975 rule allowed take of American alligators from threatened populations and captive alligators provided the take was in accordance with State of Louisiana laws and regulations, including marking and tagging requirements, and allowed sale of hides only to persons holding a valid Federal license as buyers. Sale of meat and other parts was prohibited under the 1975 section 4(d) rule. In the years that followed, the species continued to improve. See the following rulemaking documents:

- 42 FR 2071 (January 10, 1977) (reclassifying the American alligator from ''endangered'' to ''threatened'' in all of Florida and certain coastal areas of Georgia, Louisiana, South Carolina, and Texas);
- 44 FR 37130 (June 25, 1979) (expanding ''threatened due to similarity of appearance'' classification from 3 to 12 Louisiana parishes);
- 46 FR 40664 (Aug. 10, 1981) (expanding ''threatened due to similarity of appearance'' classification to all of Louisiana);
- 48 FR 46332 (Oct. 12, 1983) (all of Texas); and
- 50 FR 25672 (June 20, 1985) (all of Florida).

The American alligator 4(d) rule was also amended several times during these years:

- 42 FR 2071, January 10, 1977;
- 44 FR 51980, September 6, 1979;
- 44 FR 59080, October 12, 1979;
- 45 FR 78153, November 25, 1980;
- 46 FR 40664, August 10, 1981;
- 48 FR 46332, October 12, 1983;
- 50 FR 25672, June 20, 1985;
- 50 FR 45407, October 31, 1985;
- 52 FR 21059, June 4, 1987;
- 72 FR 48402, August 23, 2007.

For example, in 1979 (44 FR 51980, September 6, 1979), a final rule amending the 4(d) rule noted that the ''consistent intent'' throughout these rulemakings has been to authorize controlled harvest of American alligators in specified areas, subject to State and Federal law. The final rule reclassified the American alligator populations in nine additional parishes in Louisiana from endangered to threatened due to similarity of appearance to endangered American alligators in the remainder of the species' range and, among other things, authorized sale of meat and other parts, except hides, only within the State of Louisiana and subject to the laws and regulations of the State of Louisiana. Although some commenters had recommended also allowing sale of meat and parts in other States, the Service did not adopt that recommendation and explained that licensing and recordkeeping requirements imposed by the State of Louisiana had facilitated effective enforcement with respect to sale of meat and other parts in Louisiana but that no regulatory scheme existed to provide effective enforcement outside of Louisiana. On October 12, 1979 (44 FR 59080), another rulemaking revised the section 4(d) rule to allow limited commercial export and import of lawfully taken American alligator hides and products manufactured from those hides in accordance with the requirements of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), after the transfer of American alligator from CITES Appendix I to CITES Appendix II, effective June 28, 1979, allowed for international trade in American alligator for commercial purposes.

Revisions to the section 4(d) rule in 1980 (45 FR 78153, November 25, 1980) removed the requirement for fabricators to obtain Federal permits, but to ensure that fabricators only received lawfully taken hides, maintained the requirement limiting sale of raw (untanned) hides to a person holding a valid Federal permit to buy hides. The 1980 revisions also allowed interstate commerce of fully tanned hides that had been tagged by the State where the taking occurred and allowed sale or transfer of meat and other parts except hides, provided these parts were sold or otherwise transferred only in accordance with the laws and regulations of the State in which the taking occurred and the State in which the sale or transfer occurred. The 1980 section 4(d) rule also allowed interstate commerce in manufactured products.

By 1987, the American alligator had recovered enough so that it did not qualify as endangered or threatened based on its own conservation status. However, it was reclassified under the Act as ''threatened due to similarity of appearance'' throughout its range (52 FR 21063, June 4, 1987) based on its resemblance to the American crocodile and other threatened crocodilian species. As noted above, populations in Florida, Louisiana, and Texas and portions of other States had already been reclassified. This rule reclassified the remaining endangered populations in Alabama, Arkansas, Georgia, Mississippi, North Carolina, and South Carolina. The preamble to the final rule

explained that the rule ''supports a need for continued Federal controls on taking and commerce to ensure against excessive taking and to continue necessary protections for the American crocodile (*Crocodylus acutus*) in the U.S. and foreign countries, and other endangered crocodilians in foreign countries'' (52 FR 21060, June 4, 1987).

The classification of the American alligator as threatened due to similarity of appearance is intended to protect other listed species that bear a resemblance to the American alligator. Take of American alligators is regulated by States and Tribes and section 4(d) regulations at 50 CFR 17.42, Special rules—reptiles. Under 50 CFR 17.42(a), the Service regulates the harvest of American alligators, and subsequent interstate commerce and international trade in the legally harvested animals, their skins, and products made from them, as part of efforts to prevent the illegal take and trafficking of threatened and endangered reptiles that are similar in appearance to American alligators. Illegally harvested alligators cannot legally be entered into commerce or trade under the 4(d) rule.

As noted above, currently, the American alligator is listed under the Act as threatened due to similarity of appearance to the American crocodile (*Crocodylus acutus*) in the United States and foreign countries, and other ESA-listed crocodilians (50 CFR 17.11). The Service recognizes that some populations of crocodilians that are managed as a sustainable resource can be utilized for commercial purposes without adversely affecting the survival of those populations, when scientifically based management plans are implemented. When certain positive conservation conditions have been met, the Service has allowed utilization and trade from managed populations of the American alligator, and other crocodilians. For example, we have allowed the importation of commercial shipments of Nile crocodile (*Crocodylus niloticus*) from several southern and eastern African countries, and allowed for similar shipments of saltwater crocodile *(Crocodylus porosus*) specimens from Australia (61 FR 32356, June 24, 1996). In each of these examples, the species or population is not an ESA-listed endangered species, and also is not included in CITES Appendix I.

We are aware that there have been questions raised regarding proposed or recently enacted State laws that would prohibit commercial activities involving American alligator and concerns that such laws may result in a reduction in proceeds from lawful interstate commerce in alligators that is used to fund important conservation efforts for alligators and their habitat. See Section II below regarding *Petition to Amend Endangered Species Act Section 4(d) Rule Actions Concerning the American Alligator.* This proposed rule would amend the 4(d) rule to remove the requirement at 50 CFR 17.42(a)(2)(ii)(B) that ''[a]ny American alligator specimen may be sold or otherwise transferred only in accordance with the laws and regulations of . . . the State or Tribe in which the sale or transfer occurs.'' This amendment clarifies that any State law regulating commercial sale or transfer that effectively prohibits interstate commerce or foreign commerce authorized by the 4(d) rule would be preempted by section 6(f) of the ESA and would be void to the extent of the conflict (16 U.S.C. 1535(f)(2); the Supremacy Clause of the U.S. Constitution). We also explained the preemptive effect of 4(d) rules and section 6(f) in the most recent prior rulemaking amending the American alligator 4(d) rule. See 72 FR 48402, 48406 (Aug. 23, 2007) (relying on *Man Hing Ivory & Imports, Inc.* v. *Deukmejian,* 702 F.2d 760 (9th Cir. 1983)). By amending the 4(d) rule to remove the provision relating to the State or Tribe in which a sale or transfer occurs, we intend to eliminate the potential tension between those State laws and the well-regulated American alligator management regime that has been established through decades of cooperation between the Service, States in the alligator's range, and the alligator industry, and which is facilitated by the regulation of interstate commerce and international trade through the 4(d) rule.

Although it can be difficult to identify the species in products manufactured from crocodilian species, and this situation can pose a problem for law enforcement, over the more than 30 years that the provision in question has been in place, we have no reason to believe that this provision at 50 CFR 17.42(a)(2)(ii)(B) has added to the conservation benefits provided by other provisions in the current American alligator 4(d) rule. Further, the first phrase in the sentence at 50 CFR 17.42(a)(2)(ii)(B) pertaining to ''the laws and regulations of the State or Tribe in which the taking occurs'' is largely redundant, as it restates what is already stated earlier in 50 CFR 17.42(a)(2)(ii).

The conditional language in 50 CFR 17.42 (a)(2)(ii)(B) may be inhibiting interstate commerce that has developed since the American alligator was first reclassified under the Act and which provides funding to support crocodilian conservation and helps States and Tribes address threats to these populations. Confusion caused by this provision concerning the interaction between Federal, State, and Tribal rules and regulations could deter protection of American alligator habitat, upsetting regulatory protocols that have been in place for decades, and thereby undermining the conservation of this and other crocodilian species under section 4(d) of the Act.

Quotas for controlled hunting of adults, and collection of eggs and hatchlings on both private and public lands are based on annual monitoring of nests and local population densities and occur in accordance with the laws and regulations of the State or Tribe in which the taking of American alligators occurs. Commercial production of skins and meat is highly regulated by State agencies through a system of permits, licenses, periodic stock inventories, ranch inspections, and tagging requirements, which occur in accordance with the laws and regulations of the State or Tribe in which the taking of American alligators occurs. Fees collected through State and Tribal regulatory systems (also in accordance with the laws and regulations of the State or Tribe in which the taking of American alligators occurs) provide funding for management, regulation, enforcement, and research programs for the American alligator. Conservation of American alligators has succeeded by sustainable regulated harvests, protecting important alligator habitat, and providing economic incentives for private landowners to maintain alligator habitat (Elsey *et al.* 2019, p. 5). For these reasons, we reaffirm the need to ensure that take of, and interstate commerce in, American alligators may only be in accordance with the laws and regulations of the State or Tribe of taking but propose to remove as unnecessary and confusing the provision that sale or transfer may only be in accordance with the laws and regulations of the State or Tribe where the sale or transfer occurs.

Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)

Separate from its listing and conservation status under the ESA, the American alligator is protected under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), a treaty that regulates international trade in species included in one of three Appendices. In 1975, the American alligator was included in Appendix I of CITES. CITES Appendix I includes species threatened with

extinction that are or may be affected by trade.

In 1979, the American alligator was transferred from CITES Appendix I to Appendix II. Appendix II includes species that are not presently threatened with extinction, but may become so if their trade is not regulated. It also includes species that need to be regulated so that trade in certain other Appendix-I or -II species may be effectively controlled (due to similarity of appearance to other CITES species). Commercial international trade of Appendix-II species is allowed under CITES export permits issued by the Management Authority of the exporting country, provided specific determinations have been made, including that the Management Authority of the exporting country has determined that the specimens involved have been legally acquired and the Scientific Authority of the exporting country has determined that the trade will not be detrimental to the survival of the species. In the United States, the ESA (16 U.S.C. 1537a) designates the Secretary of the Interior as the CITES Management Authority and Scientific Authority and requires the functions of each shall be carried out by the Service.

The Parties to CITES reviewed management activities prior to transferring the American alligator from CITES Appendix I to Appendix II (thereby allowing commercial trade), reviewed assessments of population status, reviewed determinations of sustainable harvest quotas (or approval of ranching programs), and reviewed the control of the illegal harvest. Management regulations imposed after harvest included the tagging of skins and issuance of permits to satisfy the requirements for CITES Appendix-II species. As a Party to CITES, in addition to ESA requirements, the United States implements CITES requirements for trade in American alligators. The United States implements CITES through the ESA (16 U.S.C. 1537a; 16 U.S.C. 1538(c)(1)) and the Service's CITES implementing regulations (50 CFR part 23). CITES requirements for international trade specific to American alligator are found at 50 CFR 23.70.

II. Petition To Amend Endangered Species Act Section 4(d) Rule Actions Concerning the American Alligator

Petition

The Secretary of the Interior received a petition in the form of a letter dated December 9, 2019, from the State of Louisiana, titled, *Petition for Rulemaking to Correct the American Alligator Regulations at 50 CFR 17.42(a) Pertaining to the Sale of Hides.* The petition requests ''the repeal of those regulations which limit the sale or transfer of alligator hides to compliance with the State in which the sale or transfer occurs.'' The petition asserts that the language in the regulation imposing this requirement may have been included or retained as the result of administrative error or confusion. The petition asserts that, as the result of a series of proposed rules and final rules issued between 1980 and 1987, the Service inadvertently added alligator hides to the list of products required to be sold or transferred in interstate commerce only in accordance with the law of the State in which the sale or transfer occurs.

The petition requests a new rulemaking to amend 50 CFR 17.42(a)(2)(ii)(B) to eliminate the change that included alligator hides in the group of parts and products that may only be sold or transferred in interstate commerce in accordance with the law of the State or Tribe in which the sale or transfer occurs. The petition requests that the Service amend the rule to revert back to the regime set out in the 1980 alligator section 4(d) regulations, which allowed for take of American alligators wherever listed as threatened due to similarity of appearance, in accordance with the laws in the State of taking subject to certain conditions including that ''any meat or other part except the hide is sold or otherwise transferred only in accordance with the laws and regulations of the State in which the taking occurs and the State in which the sale or transfer occurs;'' (45 FR 78153, November 25, 1980).

It is true that earlier versions of the section 4(d) rule did not, in the phrase in question, include hides in the group of parts and products that could only be sold in accordance with the laws of the State or Tribe in which the sale or transfer occurred. However, those earlier versions also strictly regulated the sale and transfer of hides, including by requiring that hides could only be sold or transferred to a person holding a valid buyer permit (issued under the section 4(d) rule) and that the hides must be tagged by the State where they were taken. Tanners and, for a time, fabricators also had to obtain permits under the section 4(d) rule, and buyer, tanner, and fabricator permittees were prohibited from violating any State, Federal, or foreign laws concerning hides and other parts and products. Tagging of alligator hides by the State or Tribe of taking is still required under the current section 4(d) rule and forms the basis of the traceability regime that allows us to ensure that hides in trade (including those to be exported) have been legally acquired under an approved State or Tribal program. The current section 4(d) rule for the American alligator does not require hide buyers, tanners, or fabricators to obtain permits.

Service Response to the Petition

The ESA section 4(d) rule concerning the American alligator became effective over 45 years ago. More than 33 years have passed since publication of the 1987 revision to the rule that included the provision that the petition seeks to amend. In reviewing the conservation success story related to the alligator, we find that the requirement for interstate commerce in American alligator to adhere to laws of the States and Tribes where the sale or transfer occurs is not necessary. Under the Administrative Procedure Act (APA), any person may petition for the issuance, amendment, or repeal of a rule (5 U.S.C. 553(e)). In considering the petition, we follow Department of the Interior regulations concerning petitions for APA rulemakings, found at 43 CFR part 14 (43 CFR 14.2, Filing of petitions.). To that end, interested persons may obtain a copy of the petition on the internet at *http://www.regulations.gov,* in the docket supporting materials section provided above in **ADDRESSES**. This proposed rule addresses the petition.

III. This Proposed Rule

As a result of the petition received from the State of Louisiana, we conducted a review of our regulations at 50 CFR 17.42(a) and have determined that this proposed rulemaking action is necessary and advisable for the conservation of this and other crocodilian species under section 4(d) of the Act. The Service has the responsibility to periodically update and clarify our implementing regulations when it is necessary to do so. With this proposed rule, we reflect the outcome of our review.

We have evaluated the petition received from the State of Louisiana concerning the requested amendment to our regulations at 50 CFR 17.42(a). We have also conducted our own evaluation of our regulations at 50 CFR 17.42(a), and have concluded that there is sufficient reason for a new rulemaking that removes the requirement in the 4(d) rule's authorization of interstate or foreign commerce that American alligators, including hides and other parts and products, may only be sold or transferred in accordance with the law of the State or Tribe in which the sale or transfer occurs. As noted above, the section 4(d) rule for the American

alligator has been revised a number of times since it was first promulgated in 1975. Changes to the section 4(d) rule were adopted in response to changes in the conservation status of various populations of the species (and the reclassification of those populations) and to the related and evolving need for Federal control of taking and commerce in American alligators and American alligator parts and products, as well as for the effective protection and enforcement of requirements for other ESA-listed crocodilians.

We believe the requirement at 50 CFR 17.42(a)(2)(ii)(B) that any American alligator specimen may be sold or otherwise transferred only in accordance with the laws and regulations of the State or Tribe in which the sale or transfer occurs is unnecessary and can be removed as a condition of the 4(d) rule's authorization of interstate and foreign commerce. Through this amendment, any State law regulating commercial sale or transfer that effectively prohibits interstate or foreign commerce authorized by the 4(d) rule would be preempted by section 6(f) of the ESA and would be void to the extent of the conflict (16 U.S.C. 1535(f)(2); the Supremacy Clause of the U.S. Constitution). Further, the first phrase in the sentence at 50 CFR 17.42(a)(2)(ii)(B) is largely redundant, as it restates what is already stated in 50 CFR 17.42(a)(2)(ii), and therefore can also be removed along with conforming amendments. We believe that this proposed amendment could reduce confusion concerning the interaction between Federal, State, and Tribal rules and regulations and clarify the activities that are authorized by Federal regulation. We believe that the requirement at 50 CFR 17.42(a)(2)(ii)(B) that any American alligator specimen may be sold or otherwise transferred only in accordance with the laws and regulations of the State or Tribe in which the sale or transfer occurs, is not necessary for the conservation of the American alligator and for other crocodilian species to which the American alligator bears similarity of appearance.

IV. Public Comments Solicited

We invite interested organizations and the public to comment on this proposed rule. We analyzed the 4(d) rule in response to the petition from Louisiana and have drafted this proposed amendment to 50 CFR 17.42(a)(2)(ii)(B) following our review and analysis. We are seeking comments related to any proposed revisions to the ESA section 4(d) rule concerning the American alligator at 50 CFR 17.42(a). We will not consider comments regarding this proposed rule sent by email or fax or to an address not listed in **ADDRESSES**. If you submit a comment via *http://www.regulations.gov,* your entire comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy comments on *http://www.regulations.gov.*

Because we will consider all comments and information we receive during the comment period, our final 4(d) rule may differ from this proposal. Based on the new information we receive (and any comments on that new information), we may change the parameters of the prohibitions or the exceptions to those prohibitions if we conclude it is appropriate in light of comments and new information received. For example, we may expand the prohibitions to include prohibiting additional activities if we conclude that those additional activities are not compatible with conservation of the listed crocodilians that are similar in appearance to the American alligator. Conversely, we may establish additional exceptions to the prohibitions in the final rule if we conclude that the activities would facilitate or are compatible with the conservation and recovery of the listed crocodilians that are similar in appearance to the American alligator.

V. Required Determinations

Clarity of the Proposed Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;

(2) Use the active voice to address readers directly;

(3) Use clear language rather than jargon;

(4) Be divided into short sections and sentences; and

(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We are required under the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) to assess the impact of any Federal action significantly affecting the quality of the human environment, health, and safety. This proposed rule is being analyzed under the criteria of NEPA, the Department of the Interior procedures for compliance with NEPA (Departmental Manual (DM) and 43 CFR part 46), and Council on Environmental Quality regulations for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508). We are preparing a draft environmental assessment to determine whether this proposed rule will have a significant impact on the quality of the human environment under NEPA. We will announce the availability of the draft environmental assessment as soon as it is completed. When completed, the draft environmental assessment will be available on the internet at *http://www.regulations.gov* in the docket provided above in **ADDRESSES**.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

Under the Regulatory Flexibility Act (RFA) (as amended by the Small Business Regulatory Enforcement Fairness Act [SBREFA] of 1996) (5 U.S.C. 601 *et seq.*), whenever a Federal agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.,* small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of an agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Thus, for a regulatory flexibility analysis to be required, impacts must exceed a threshold for ''significant impact'' and a threshold for a ''substantial number of small entities.''

The Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA; 5 U.S.C. 801 *et seq.*) amended the RFA to require Federal agencies to provide a certification statement of the factual basis for certifying that the rule will not have a significant economic impact on a substantial number of small entities. According to the Small Business Administration (SBA), small

entities include small organizations such as independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201).

The SBA has developed size standards to carry out the purposes of the Small Business Act. These standards can be found in 13 CFR 121.201. For a specific industry identified by the North American Industry Classification System (NAICS), small entities are defined by the SBA as an individual, limited partnership, or small company considered at ''arm's length'' from the control of any parent company, which meet certain size standards. The size standards are expressed either in number of employees or annual receipts. This proposed rule is most likely to affect entities nationwide that sell alligator products such as hides, eggs, and meat. The industries most likely to be directly affected are listed in the table below along with the relevant SBA size standards.

TABLE 1—INDUSTRIES POTENTIALLY AFFECTED BY THE PROPOSED RULE

Industry	NAICS code	Size standards in millions of dollars or employees
Full-Service Restaurants	722511	$8.0
Limited-Service Restaurants	722513	12.0
Supermarkets and Other Grocery (except Convenience) Stores	445110	35.0
Other Aquaculture	112519	1.0
Leather and Hide Tanning and Finishing	316110	* 500

* Employees.

Based on these thresholds, the proposed rule may affect small entities. In addition to determining whether a substantial number of small entities are likely to be affected by this proposed rule, the Service must also determine whether the proposed rule is anticipated to have a significant economic impact on those small entities. This rule would not significantly impact interstate commerce, as the proposed changes would not change the fact that interstate commerce is allowed under the provisions of this 4(d) rule. Therefore, we do not expect any significant impacts to these businesses because interstate commerce would continue as provisioned by the Endangered Species Act and the 4(d) regulations, and any potential positive economic impact from the preemption of any conflicting State or Tribal law is too speculative to estimate. The rule would not have a significant economic effect on a substantial number of small entities in any region or nationally.

Therefore, based on the information available to us at this time, we certify that this proposed rule would not have a significant economic effect on a substantial number of small entities as defined under the RFA. An initial regulatory flexibility analysis is not required. Accordingly, a small entity compliance guide is not required.

Small Business Regulatory Enforcement Fairness Act (SBREFA) (5 U.S.C. 801 et seq.)

This proposed rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule:

(a) Would not have an annual effect on the economy of $100 million or more.

(b) Would not cause a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions.

(c) Would not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises.

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs (OIRA) will review all significant rules. OIRA has determined that this rule is not significant.

E.O. 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this proposed rule in a manner consistent with these requirements.

This proposed rule would provide clarity regarding interstate commerce in alligators, whether alive or dead, including any skin, part, product, egg, or offspring thereof held in captivity or from the wild. It would reaffirm current, longstanding provisions that allow interstate commerce in lawfully harvested American alligators but would remove text conditioning sale or transfer in accordance with the law of the State or Tribe in which sale or transfer occurs. Therefore, we do not anticipate significant economic impacts because interstate commerce would continue as provisioned by the Endangered Species Act and the section 4(d) regulations and any potential economic impact from the preemption of any conflicting State or Tribal law is too speculative to estimate.

Executive Order 13771

This rule is not an Executive Order (E.O.) 13771 (''Reducing Regulation and Controlling Regulatory Costs'') (82 FR 9339, February 3, 2017) regulatory action because this rule is not significant under E.O. 12866.

Energy Supply, Distribution, or Use—Executive Order 13211

Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) requires agencies to prepare statements of energy effects when undertaking certain actions. This rule is not a significant energy action under the definition in Executive Order 13211. A statement of Energy Effects is not required. This proposed rule would revise the current regulations in 50 CFR part 17 that pertain to the harvest of American alligators and regulate legal trade in the animals, their skins, and products made from them, as part of efforts to prevent the illegal take and

trafficking of endangered reptiles that are similar in appearance to American alligators. This proposed rule will not significantly affect energy supplies, distribution, and use.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 *et seq.*), we make the following findings:

(1) This proposed rule would not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or Tribal governments, or the private sector, and includes both Federal intergovernmental mandates and Federal private sector mandates. These terms are defined in 2 U.S.C. 658(5)–(7).

''Federal intergovernmental mandate'' includes a regulation that would impose an enforceable duty upon State, local, or Tribal governments with two exceptions. It excludes a condition of Federal assistance. It also excludes a duty arising from participation in a voluntary Federal program, unless the regulation relates to a then-existing Federal program under which $500,000,000 or more is provided annually to State, local, and Tribal governments under entitlement authority, if the provision would increase the stringency of conditions of assistance or place caps upon, or otherwise decrease, the Federal Government's responsibility to provide funding, and the State, local, or Tribal governments lack authority to adjust accordingly. At the time of enactment, these entitlement programs were: Medicaid; Aid to Families with Dependent Children work programs; Child Nutrition; Food Stamps; Social Services Block Grants; Vocational Rehabilitation State Grants; Foster Care, Adoption Assistance, and Independent Living; Family Support Welfare Services; and Child Support Enforcement. ''Federal private sector mandate'' includes a regulation that ''would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance or (ii) a duty arising from participation in a voluntary Federal program.''

(2) This proposed rule will not impose an unfunded mandate on State, local, or Tribal governments or the private sector of more than $100 million per year. The rule will not have a significant or unique effect on State, local, or Tribal governments or the private sector. A statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*) is not required.

Takings—Executive Order 12630

In accordance with E.O. 12630 (Government Actions and Interference with Constitutionally Protected Private Property Rights), we have analyzed the potential takings implications of this proposed rule.

This rule does not affect a taking of private property or otherwise have taking implications under Executive Order 12630. This proposed rule would update and clarify the regulations concerning the harvest of American alligators and regulate legal trade in the animals, their skins, and products made from them, as part of efforts to prevent the illegal take and trafficking of endangered reptiles that are similar in appearance to American alligators. A takings implication assessment is not required.

Federalism—Executive Order 13132

In accordance with E.O. 13132 (Federalism), this proposed rule does not have significant federalism effects. A federalism summary impact statement is not required. These proposed revisions to 50 CFR part 17 do not contain significant federalism implications.

Civil Justice Reform—Executive Order 12988

In accordance with Executive Order 12988 (Civil Justice Reform), this rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Order. Specifically, this proposed rule:

(a) Meets the criteria of section 3(a) requiring that all regulations be reviewed to eliminate errors and ambiguity and be written to minimize litigation; and

(b) Meets the criteria of section 3(b)(2) requiring that all regulations be written in clear language and contain clear legal standards.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This proposed rule does not contain any new collections of information that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2 (Department of the Interior Manual, Series 30, Part 512, Chapter 2: *Departmental Responsibilities for Indian Trust Resources*), we readily acknowledge our responsibility to communicate meaningfully with recognized Federal Tribes on a government-to-government basis. In accordance with Secretarial Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes. We have evaluated this proposed rule under the criteria in Executive Order 13175 under the Department's consultation policy and are not aware of any substantial effects to federally recognized Indian Tribes but will consider comments from Tribes on this proposed rule. We will consult and solicit comments from Tribes. Individual Tribal members must meet the same regulatory requirements as other individuals under our regulations at 50 CFR 17.42 (Special rules—reptiles).

References Cited

A complete list of references cited in this rulemaking is available on the internet at *http://www.regulations.gov* in the docket provided above in **ADDRESSES.**

Authority

The authority for this action is the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

List of Subjects in 50 CFR Part 17

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Proposed Regulation Promulgation

Therefore, for the reasons discussed in the preamble, we hereby propose to amend part 17 of title 50, Code of Federal Regulations, as set forth below.

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

AUTHORITY: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. Section 17.42 is amended by revising paragraph (a)(2)(ii) to read as follows:

§ 17.42 Special rules—reptiles.

* * * * *

(a) * * *

(2) * * *

(ii) Any person may take an American alligator in the wild, or one which was born in captivity or lawfully placed in captivity, and may deliver, receive, carry, transport, ship, sell, offer to sell, purchase, or offer to purchase such alligator in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity, if such activities are in accordance with the laws and regulations of the State or Tribe in which taking occurs, and subject to the following condition: Any skin of an American alligator may be sold or otherwise transferred only if the State or Tribe of taking requires skins to be tagged by State or Tribal officials or under State or Tribal supervision with a Service-approved tag in accordance with the requirements in part 23 of this subchapter.

RIN 1018–BD78

Streamlining U.S. Fish and Wildlife Service Permitting of Rights-of-Way

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (FWS), propose to revise and streamline FWS regulations for permitting of rights-of-way by aligning FWS processes more closely with those of other Department of the Interior bureaus, consistent with applicable law and to the extent practicable. The proposed rule would require a pre-application meeting and use of a standard application, the SF–299, Application for Transportation and Utility Systems and Facilities on Federal Lands; allow electronic submission of applications; and provide FWS with additional flexibility, as appropriate, to determine the fair market value or fair market rental value of rights-of-way across FWS-managed lands. This proposed rule would reduce the time and cost necessary to determine a right-of-way's fair market value or fair market rental value, and also reduce an applicant's time and cost to obtain a right-of-way permit. The proposed rule would also simplify the procedures that applicants must follow to reimburse the United States for costs that FWS incurs while processing right-of-way applications and monitoring permitted rights-of-way.

DATES: We will accept comments on this proposed rule that are received or postmarked on or before March 22, 2021. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date.

ADDRESSES: You may submit comments on this proposed rule by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: *http://www.regulations.gov.* In the Search box, enter FWS–HQ–NWRS–2019–0017, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the Search panel on the left side of the screen, under the Document Type heading, click on the Proposed Rule box to locate this document. You may submit a comment by clicking on ''Comment Now!''

(2) *By hard copy:* Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: Docket No. FWS–HQ–NWRS–2019–0017, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send comments only by the methods described above. We will post all comments on *http://www.regulations.gov.* This generally means that we will post any personal information you provide us (see Public Comments, below, for more information).

FOR FURTHER INFORMATION CONTACT: Ken Fowler, U.S. Fish and Wildlife Service, MS: NWRS, 5275 Leesburg Pike, Falls Church, VA 22041; (703) 358–1876.

SUPPLEMENTARY INFORMATION:

Public Comments

We request comments or information from other concerned government agencies, the scientific community, industry, or any other interested party concerning this proposed rule. You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

All comments submitted electronically via *http://www.regulations.gov* will be presented on the website in their entirety as submitted. For comments submitted via hard copy, we will post your entire comment—including your personal identifying information—on *http://www.regulations.gov.* You may request at the top of your document that we withhold personal information such as your street address, phone number, or email address from public review; however, we cannot guarantee that we will be able to do so.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on *http://www.regulations.gov.*

Background

FWS is the principal land manager and permitting authority for more than 89 million terrestrial acres of public lands, including 76.8 million acres in Alaska, 12.2 million acres in the lower 48 States, and 50,000 acres in Hawaii. The vast majority of the 89 million acres are part of the National Wildlife Refuge System (Refuge System), whose mission is to administer a national network of lands and waters for the conservation, management, and where appropriate, restoration of the fish, wildlife, and plant resources and their habitats within the United States for the benefit of present and future generations of Americans (16 U.S.C. 668dd(a)(2)). These acres include more than 20 million acres of designated wilderness that the Service manages to preserve the wilderness character in accordance with the Wilderness Act of 1964 (16 U.S.C. 1131 *et seq.*). Subject to existing private rights, and special provisions included in wilderness-designation statutes, the Wilderness Act prohibits commercial enterprises and permanent roads. The law also prohibits temporary roads; motor vehicles, motorized equipment, motorboats, landing of aircraft, and other forms of mechanical transport; structures; and installations, unless their use can be demonstrated to be necessary to meet minimum

requirements for the administration of the area for Wilderness Act purposes.

Refuge System lands and waters are managed according to the authorities of the National Wildlife Refuge System Administration Act of 1966 (Administration Act; 16 U.S.C. 668dd–668ee), as amended by the National Wildlife Refuge System Improvement Act of 1997 (Improvement Act; Pub. L. 105–57), which authorize FWS to permit a new use on a refuge when FWS determines it is a compatible use. The term ''compatible use'' means a wildlife-dependent recreational use or any other use of a refuge that, in the sound professional judgment of the FWS Director, will not materially interfere with or detract from the fulfillment of the mission of the Refuge System or the purpose(s) of the refuge.

A ''compatibility determination'' is a written determination, signed and dated by the Refuge Manager, that an existing or new use of a refuge is compatible or not compatible with the Refuge System mission or the purpose(s) of the refuge. Currently there are over 560 national wildlife refuges, and each refuge has different establishing authorities, purposes, habitat types, wildlife species, and public uses, which can result in different compatibility determinations for the same use. The Improvement Act required FWS to issue regulations establishing a process for determining whether a proposed use is a compatible use; these regulations are set forth in title 50 of the Code of Federal Regulations at 50 CFR 26.41.

The Improvement Act authorizes FWS to grant a right-of-way when the right-of-way is a compatible use. The regulations at 50 CFR 26.41 state that, for existing rights-of-way, FWS will not make a compatibility determination and will deny any request for maintenance of an existing right-of-way that will affect a unit of the National Wildlife Refuge System, unless ''the design adopts appropriate measures to avoid resource impacts and includes provisions to ensure no net loss of habitat quantity and quality; restored or replacement areas identified in the design are afforded permanent protection as part of the national wildlife refuge or wetland management district affected by the maintenance; and all restoration work is completed by the applicant prior to any title transfer or recording of the easement, if applicable.''

In instances where an existing use is authorized for more than 10 years (such as an electric utility right-of-way), the Improvement Act directs FWS to reevaluate the permitted use to determine compliance with the authorization terms and conditions. All right-of-way permits issued by FWS include language allowing FWS to terminate the right-of-way permit if the grantee's use violates the permit terms and conditions.

The Improvement Act's compatibility requirements do not apply to FWS permitting of rights-of-way across National Fish Hatchery System lands, nor do they apply to permitting of rights-of-way on or across FWS facilities that are not located on Refuge System lands. FWS processes applications for these rights-of-way under the applicable authority cited at 43 CFR part 2800, in accordance with the application procedures at 50 CFR 29.21–2.

Title XI of the Alaska National Interest Lands Conservation Act (ANILCA; Pub. L. 96–487; 16 U.S.C. 3101 *et seq.*) requires the Secretary to provide adequate and feasible access to inholdings within Alaska refuges. The proposed access is subject to a prescribed evaluation process that ensures that the route or method of access avoids or minimizes threats to public health and safety while providing adequate and feasible access to the inholding (see 43 CFR 36.10).

The Administration Act authorizes the Secretary, acting through the FWS Director, to issue a right-of-way permit across Refuge System lands only after the applicant pays FWS the fair market value or fair market rental value of the right-of-way, unless the applicant is exempt from such payment by any other provision of Federal law. In addition, before issuing a right-of-way permit, FWS must assess the effects of the proposed use, as required by the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*); the Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*), as amended; the National Historic Preservation Act of 1966 (NHPA; 54 U.S.C. 300101 *et seq.*); and other applicable laws and Executive Orders.

This Proposed Rule

Consistent with Executive Order (E.O.) 13783, ''Promoting Energy Independence and Economic Growth,'' dated March 28, 2017, and E.O. 13821, ''Streamlining and Expediting Requests to Locate Broadband Facilities in Rural America,'' dated January 8, 2018, FWS is streamlining its right-of-way permitting process for proposed uses on FWS-managed lands by aligning FWS processes more closely with those of other DOI bureaus, to the extent practicable and in a manner that is consistent with applicable law. Below, we summarize the substantive proposals included in this document.

The regulations at 50 CFR 29.21–2 currently state that applicants may submit applications for right-of-way permits in any format. However, E.O. 13821 directs Federal agencies to use the ''GSA Common Form Application,'' which refers to the Standard Form 299 (SF–299), Application for Transportation and Utility Systems and Facilities on Federal Lands. Therefore, we propose to revise 50 CFR 29.21–2 to require use of the SF–299 for all requests for right-of-way permits.

The regulations at 50 CFR 29.21–2 currently require applicants to submit applications to a FWS Regional office in hard copy, in triplicate. FWS proposes to require only one copy. Also, we propose to allow electronic application submissions, or E-Filing, as an alternative to hardcopy submissions. Improvements in technology enable FWS to process electronic application submissions more efficiently than hardcopy submissions, and accepting electronic submissions may reduce the amount of time FWS requires to issue a right-of-way permit.

Incomplete information is often the reason right-of-way application processing is delayed. The amount and type of documentation FWS requires to process an application varies depending on whether the request is for a renewal, limited additional use of an existing right-of-way with minimal or no new environmental impacts, or a new right-of-way where significant environmental disturbance may occur. We, therefore, propose to modify the right-of-way application procedures at 50 CFR 29.21–2 to require a standard, no-cost pre-application meeting (in-person or teleconference) for all new proposed rights-of-way and all modifications and renewals of existing rights-of-way, which will enable FWS to determine the documentation needed to process the application. We also propose to revise the application procedures at 50 CFR 29.21–2 to provide the FWS Regional Director more flexibility in determining the documentation required to process an application, and to reduce the documentation requirements for renewals. This change would reduce the regulatory burden on applicants by ensuring that FWS requests only the documentation that it requires to process each application.

We propose to eliminate the requirement at 50 CFR 29.21–7 for an appraisal to determine fair market value or fair market rental value, to reduce the amount of time FWS requires to issue right-of-way permits, by authorizing all Regional Directors to use any DOI-approved method to determine these values, including the use of fee

schedules. This change would reduce the time and cost necessary to determine the fair market value or fair market rental value of many rights-of-way, and, therefore, reduce an applicant's time and cost to obtain a right-of-way permit.

FWS cannot issue a right-of-way permit unless it can accurately locate the requested right-of-way. Aside from the time required to obtain appraisals, a missing or inadequately prepared legal description or survey plat, which FWS uses to accurately locate the requested right-of-way, is the most common cause of FWS delays in issuing a right-of-way permit. Therefore, we propose to clarify the requirements for the legal description and survey plat that applicants must provide with or after application submission but before FWS will issue a right-of-way permit.

FWS last updated the schedule of application fees and monitoring fees at 50 CFR 29.21–2 in 1977. FWS's cost to process applications routinely exceeds the 1977 fee amounts by a factor of five times or more. Currently, 50 CFR 29.21–2 requires applicants to pay a right-of-way application fee and then make periodic additional payments—beyond the initial application fee—to FWS for all additional application processing costs in advance of FWS incurring those costs. We propose to eliminate our application fee and require applicants to reimburse FWS for the costs it incurs while evaluating and processing right-of-way applications and monitoring permitted rights-of-way, and to waive reimbursement of these costs for all applications for rights-of-way from (a) State or local governments or agencies or instrumentalities thereof and (b) Federal Government agencies, as well as for (c) private individuals or organizations when a Regional Director has certified that the right-of-way will contribute to accomplishing the mission of the Refuge System, refuge purposes of the refuge the right-of-way will cross, or fish hatchery purposes of the fish hatchery the right-of-way will cross.

In this proposed rule, provisions for cost recovery associated with our application processing, and with our monitoring, are set forth in a separate section of the regulations. In addition, we are proposing to increase the charge for processing the transfer of a permit from $25 to $100. Finally, we are proposing to increase the amount of no-fault liability for injury and damage to the land and property of the United States from $1,000,000 to $5,000,000 to account for inflation and increased liability measures.

For clarity, we propose to establish separate sections in the regulations to set forth the requirements for pre-application meetings and our compatibility determinations.

In addition, we propose to make editorial changes for clarity and consistency in the regulations, such as removing the word ''easement'' where we simply mean ''permit,'' removing out-of-date and gender-specific references, updating and adding definitions for terms used in the regulations, and updating the amount of the FWS permit transfer fee and the maximum amount of no-fault liability for certain permits to account for the inflation since 1977.

The proposed changes to the right-of-way regulations are at the end of this document. While the proposed revisions to some sections are mostly minor updates as just described, we have set forth the sections in their entirety for the ease and convenience of the reader.

Required Determinations

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs (OIRA) will review all significant rules. The Office of Information and Regulatory Affairs has waived their review regarding their significance determination of this proposed rule.

Executive Order (E.O.) 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this proposed rule in a manner consistent with these requirements.

Executive Order 13771

We do not believe this proposed rule is an E.O. 13771 (''Reducing Regulation and Controlling Regulatory Costs'') (82 FR 9339, February 3, 2017) regulatory action because we believe this rule is not significant under E.O. 12866; however, the Office of Information and Regulatory Affairs has waived their review regarding their E.O. 12866 significance determination of this proposed rule.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires that Federal agencies prepare a regulatory flexibility analysis for rules subject to the notice-and-comment rulemaking requirements under the Administrative Procedure Act (5 U.S.C. 500 *et seq.*), if the rule would have a significant economic impact, whether detrimental or beneficial, on a substantial number of small entities. *See* 5 U.S.C. 601–612. Congress enacted the RFA to ensure that government regulations do not unnecessarily or disproportionately burden small entities. Small entities include small businesses, small governmental jurisdictions, and small not-for-profit enterprises.

FWS reviewed the Small Business Size standards for the affected industries. We determined that a large share of the entities in the affected industries are small businesses as defined by the Small Business Act. However, FWS believes that the impact on the small entities is not significant, as the proposed rule would impact a small number of small entities, and FWS does not believe that these effects would be economically significant.

The proposed rule would benefit small businesses by streamlining FWS regulations for permitting rights-of-way and thereby reduce the amount of time that FWS requires to issue many right-of-way permits. The proposed rule would implement a pre-application meeting to provide small businesses with information upfront about the FWS's estimated time and cost to evaluate and process a right-of-way application, increasing regulatory certainty. Additionally, the proposed rule would eliminate the FWS application fee and provide FWS the flexibility to request only the documents that it requires to process a right-of-way application, thereby reducing the regulatory burden.

In summary, we have considered whether this proposed rule would result in a significant economic impact on a substantial number of small entities. We certify that, if made final, this proposed rule would not have a significant economic impact on a substantial number of small business entities. Therefore, an initial regulatory flexibility analysis is not required.

Energy Supply, Distribution, or Use—Executive Order 13211

Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) requires agencies to prepare Statements of Energy Effects when undertaking certain actions. This proposed rule would streamline and expedite FWS processing of industry requests for rights-of-way and modifications to rights-of-way that cross FWS-managed lands, but it would not significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action, and no Statement of Energy Effects is required.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

Under the Unfunded Mandates Reform Act (2 U.S.C. 1501, *et seq.*):

a. This proposed rule would not significantly or uniquely affect small governments. A Small Government Agency Plan is not required.

b. This proposed rule would not produce a Federal requirement of $100 million or greater in any year and is not a ''significant regulatory action'' under the Unfunded Mandates Reform Act.

Takings—Executive Order 12630

Under Executive Order 12630, this proposed rule would not have significant takings implications as it applies only to FWS permitting of rights-of-way across lands, and interests in land, owned by the United States. A takings implication assessment is not required.

Federalism—Executive Order 13132

In accordance with E.O. 13132 (Federalism), this proposed rule does not have significant Federalism effects, as it waives right-of-way application processing costs and right-of-way monitoring costs for State or local governments when the right-of-way is for governmental purposes that benefit the general public, and all other application requirements are necessary for FWS to meet Improvement Act and NEPA requirements. A federalism summary impact statement is not required.

Civil Justice Reform—Executive Order 12988

In accordance with E.O. 12988 (Civil Justice Reform), the Office of the Solicitor has determined that the rule does not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the Order.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This rule does not contain any new collections of information that require approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). OMB has previously approved the information collection requirements associated with FWS use of Common Form SF–299 and assigned OMB Control Number 0596–0249 (expires 02/28/2023). You may view the information collection request(s) at *http://www.reginfo.gov/public/do/PRAMain.* An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with recognized Federal Tribes on a government-to-government basis. In accordance with Secretarial Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with tribes in developing programs for healthy ecosystems, to acknowledge that tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to tribes.

This proposed rule has no impact on Tribal lands, as it applies only to FWS permitting of rights-of-way across lands, and interests in land, owned by the United States.

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

(1) Be logically organized;

(2) Use the active voice to address readers directly;

(3) Use clear language rather than jargon;

(4) Be divided into short sections and sentences; and

(5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are not clearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

List of Subjects in 50 CFR Part 29

Public lands mineral resources, Public lands rights-of-way, Wildlife refuges.

Proposed Regulation Promulgation

For the reasons given in the preamble, we propose to amend part 29, subchapter C of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 29—LAND USE MANAGEMENT

■ 1. The authority citation for part 29 continues to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460k, 664, 668dd, 685, 690d, 715i, 725, 3161; 30 U.S.C. 185; 31 U.S.C. 3711, 9701; 40 U.S.C. 319; 43 U.S.C. 315a; 113 Stat. 1501A–140.

■ 2. Amend § 29.21 by revising the definition of ''*National Wildlife Refuge System land*'' and by adding a definition of ''*Right-of-way*'', in alphabetical order, to read as follows:

§ 29.21 What do these terms mean?

* * * * *

National Wildlife Refuge System land means lands and waters, and interests therein, administered by the Secretary under the National Wildlife Refuge System Administration Act (16 U.S.C. 668dd–668ee), as amended, including wildlife refuges, game ranges, wildlife management areas, conservation areas, waterfowl production areas, and other areas administered for the protection and conservation of fish, wildlife, and plant species.

* * * * *

Right-of-way means a use on, under, or over Federal lands that is authorized pursuant to a right-of-way permit issued by the U.S. Fish and Wildlife Service (Service), unless the use is included in a contract for services to a Service facility or if the use is requested by the Service to benefit the mission of the National Wildlife Refuge System or the National Fish Hatchery System.

■ 3. Amend § 29.21–1 by revising paragraphs (a) through (c) to read as follows:

§ 29.21–1 Purpose and scope.

* * * * *

(a) *National Wildlife Refuge System lands.* Applications for all forms of rights-of-way on or over such lands shall be submitted under authority of Public Law 89–669, (80 Stat. 926; 16 U.S.C. 668dd) as amended, or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), following application procedures set out in § 29.21–4. The Service will not permit a right-of-way unless it meets the compatibility determination requirement described in § 29.21–3. See § 29.21–12 for additional requirements applicable to rights-of-way for electric power transmission lines and § 29.21–13 for additional requirements applicable to rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom.

(b) *National Wildlife Refuge System lands—less than fee interest.* Applications for all forms of rights-of-way across lands in which the United States owns only a less than fee interest may be submitted to the Regional Director in letter form. No map exhibit is required; however, the affected land should be described in the letter or shown on a map sketch. If the requested right-of-way will not adversely affect the United States' interest, the Regional Director may issue a letter to the applicant stating that the proposed right-of-way would not affect the interest of the United States and the U.S. Fish and Wildlife Service has no objection to the fee owner granting the proposed right-of-way. If the interest of the United States will be affected, application for the right-of-way must be submitted in accordance with procedures set out in § 29.21–4.

(c) *Other lands outside the National Wildlife Refuge System.* Rights-of-way on or over other lands will be granted in accordance with controlling authorities cited in 43 CFR part 2800, or for oil and gas pipelines under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*). See § 29.21–12 for additional requirements applicable to rights-of-way for electric power transmission lines and § 29.21–13 for additional requirements applicable to rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any other refined product produced therefrom. Applications must be submitted in accordance with procedures set out in § 29.21–4.

■ 4. Revise § 29.21–2 to read as follows:

§ 29.21–2 Pre-application meeting.

Before submitting an application for a new right-of-way or a modification of an existing right-of-way across U.S. Fish and Wildlife Service-managed lands, an applicant must contact the Regional Director or his or her designee to schedule a pre-application meeting. The required pre-application meeting (*e.g.,* in-person, web-conference, teleconference, etc.) provides the applicant the opportunity to ask questions about the application process and obtain comments from the Regional Director or his or her designee about a proposed right-of-way and its location before submitting an application. The pre-application meeting helps the Regional Director or his or her designee to understand the scope of the request so that he or she may advise the applicant of the documentation the Service requires to process the application, and provide the applicant an estimated timeline and estimated cost for the Service to review and process the application. There is no fee for this required pre-application meeting. Contact information for scheduling pre-application meetings is set forth at § 29.21–4(c).

■ 5. Redesignate §§ 29.21–3 through 29.21–9 as §§ 29.21–7 through 29.21–13, respectively, and add new §§ 29.21–3 through 29.21–6, to read as follows:

Sec.

* * * * *

§ 29.21–3 Compatibility determination requirement.

§ 29.21–4 Application procedures.

§ 29.21–5 Survey plat and legal description.

§ 29.21–6 Reimbursement of costs.

* * * * *

§ 29.21–3 Compatibility determination requirement.

Consistent with the National Wildlife Refuge System Administration Act, as amended (16 U.S.C. 668dd–668ee), and the procedures set forth in § 26.41, the U.S. Fish and Wildlife Service will not permit or renew a right-of-way if the Service determines that the use is not compatible with the Refuge System mission or the purpose(s) of the refuge, except for uses related to the access of privately owned minerals and as required by any other provision of law, such as section 1110(b) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 *et seq.*) for inholdings within Alaska refuges. In the case of any right-of-way previously permitted for a period longer than 10 years (such as an electric utility right-of-way), the Service will, during the permit term, consider the permitted use to be compatible so long as the grantee is in compliance with all permit terms and conditions.

§ 29.21–4 Application procedures.

(a) *Application.* Applicants must use Standard Form 299 (SF–299), Application for Transportation and Utility Systems and Facilities on Federal Lands, to request new rights-of-way, modifications of existing rights-of-way, and renewals of existing rights-of-way. In addition to a completed and signed SF–299, each application must include the attachments described in paragraphs (a)(1) and (2) of this section. There is no application fee, but applicants must reimburse the Service for its costs to evaluate and process the application, as set forth at § 29.21–6(a). See paragraph (b) of this section for submission instructions.

(1) *Map.* The map must show a general view of the proposed right-of-way and a detailed view of the proposed project area in relationship to the Service boundary. If the proposed right-of-way is within a Public Land Survey System area, the map must show the section(s), township(s), and range(s) within which the proposed right-of-way would be located. See § 29.21–5 for requirements regarding a survey plat and legal description of the area.

(2) *Other attachments.* Following the pre-application meeting described in § 29.21–2, the Regional Director or his or her designee will determine any additional documentation the Service requires to process the application, such as:

(i) *Preliminary site and facility construction plans.* These plans must show all proposed construction work in detail. No site or facility construction plan is required for applications for renewals of existing rights-of-way that involve no changes to the permitted use.

(ii) *Environmental analysis.* The environmental analysis supplements the basic environmental information on the SF–299. It must include information concerning the impact of the proposed right-of-way on the environment, including, but not limited to, the impact on air and water quality; scenic and aesthetic features; historic, architectural, archeological, and cultural features; and wildlife, fish, and marine life.

(A) The environmental analysis must include sufficient data to enable the Service to prepare a compatibility determination; prepare an environmental assessment or environmental impact statement in accordance with section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*); and comply with the requirements of the Migratory Bird Treaty Act of 1918 (16

U.S.C. 703–712), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Wilderness Act of 1964 (16 U.S.C. 1131 *et seq.*), the Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 *et seq.*), and the National Historic Preservation Act of 1966 (54 U.S.C. 300101 *et seq.*). To comply with the National Environmental Policy Act, the Regional Director may, at his or her discretion, rely on an environmental assessment or environmental impact statement prepared by another Federal agency, the applicant, or their contractor; however, in all cases, this documentation must be prepared in consultation with the Regional Director or his or her designee.

(B) For applications for renewals of existing rights-of-way that involve no changes to the permitted use, the environmental analysis need address only the impacts of the ongoing operation and maintenance of the right-of-way, as well as any statutory requirements not in place and therefore not considered at the time of original permit issuance.

(iii) *Vegetation management plan.* The vegetation management plan must describe how the applicant would conduct the following activities:

(A) Vegetation clearing that may occur as part of construction and maintenance;

(B) Routine vegetation management, including all physical and mechanical methods;

(C) Any pesticides, herbicides, or other chemicals proposed for use; and

(D) Any revegetation and restoration activities.

(b) *Submission instructions.* Applicants may submit applications for rights-of-way through E-File or certified mail.

(1) *E-file.* Application submissions through E-file must include a digital copy of the SF–299, the map, and other attachments required by the Regional Director or his or her designee after the required pre-application meeting. Additional instructions will be provided at the pre-application meeting.

(2) *Certified mail.* Application submissions through certified mail must include one printed copy of the SF–299, the map, and other attachments required by the Regional Director or his or her designee after the required pre-application meeting. Applicants must send all documents by certified mail to the Regional Director for the region where the proposed right-of-way is located. Mailing envelopes should be clearly marked ''Attn: NWRS Realty Right-of-Way Permit Processing.''

(c) *Pre-application meeting.* To request a pre-application meeting, contact the Division of Realty at Service headquarters at (703) 358–1713. That division will put you in touch with the appropriate Service office, as determined by the location of the proposed right-of-way.

§ 29.21–5 Survey plat and legal description.

(a) Before the Service will issue a right-of-way permit, the applicant must provide a final survey plat and legal description that shows and describes the proposed right-of-way in such detail that the Service can accurately locate the proposed right-of-way.

(b) Survey plats and legal descriptions of the right-of-way area must be stamped and signed by a land surveyor or other professional licensed or authorized by the State to carry out land surveying activities.

(1) Survey plats must meet the following standards:

(i) Survey plats must be geodetically referenced to the current State or national datum. In some cases, new geodetic control points will need to be set within or near the right-of-way area.

(ii) Survey plats must show ties to the monuments marking the boundaries of the Service-owned land that is being impacted, or from which those boundaries are calculated. In cases such as road construction that involve granting full control of the right-of-way area, a boundary survey is required.

(iii) The points where the right-of-way enters and leaves Service project land must be annotated on the survey with distance ties to the nearest boundary monuments.

(iv) For a linear strip right-of-way, the courses and distances of the center line and the width of the right-of-way on each side of the center line must be annotated.

(v) If the right-of-way or site is located wholly within Service land, a minimum of two ties to boundary corners or geodetic control points that can be readily recovered must be shown.

(vi) Survey plats must show the existing or proposed facilities in sufficient detail that an average person can determine the nature and extent of the proposed use.

(vii) Survey plats must include all uses of Service-managed land required as part of the right-of-way, including access roads.

(viii) Survey plats must show the location of any other right-of-way areas in the vicinity.

(ix) Survey plats must show major natural or cultural features such as roads, rivers, fences, etc., required for orientation and intelligent interpretation.

(x) The acreage contained within the right-of-way area must be shown.

(xi) Letter-sized plats are preferred, but larger format plats, such as the Right-of-Way Plan sets prepared for highway and utility projects, are acceptable as long as they meet the other requirements.

(xii) A digital version of the plat in AutoCAD, ArcGIS, or similar format must be submitted along with a signed paper or Adobe Acrobat document.

(2) The legal description must:

(i) Be in metes-and-bounds, aliquot parts, or linear strip format;

(ii) Conform to and reference the survey plat;

(iii) Be tied to the controlling monuments shown on the plat;

(iv) Reference the geodetic coordinates of the Point of Beginning or Point of Commencement, and have a clearly documented basis of bearing; and

(v) For linear corridor projects, use a ''strip description'' format, based on a geometrically defined centerline. For example: ''All that portion of [land unit description] lying within the following described strip of land.''

§ 29.21–6 Reimbursement of costs.

(a) *Application evaluation and processing activities.* (1) An applicant for a right-of-way permit must reimburse the United States for the costs the U.S. Fish and Wildlife Service incurs in evaluating and processing the application before the Service will issue a right-of-way permit. These costs may include, but are not limited to, the Service's costs to review the application and related materials; conduct resource surveys of the proposed permit area; prepare a compatibility determination; prepare documentation to comply with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*); obtain an appraisal; draft correspondence; and draft the permit.

(2) If requested by the applicant during or after the required pre-application meeting, the Regional Director or his or her designee will, within ten business days of the pre-application meeting, provide the applicant a preliminary estimate of the Service's application evaluation and processing costs using the information provided by the applicant during the pre-application meeting.

(3) After receiving an application, the Regional Director or his or her designee will estimate the Service's application evaluation and processing costs using the information the applicant provided in the application and during the required pre-application meeting.

(4) The applicant must submit a payment to reimburse the Service for its estimated costs, before the Service will evaluate and process the right-of-way permit application.

(5) If the Service's cost to evaluate and process the right-of-way application exceeds the estimated amount, the Regional Director or his or her designee will promptly notify the applicant of the deficient amount, and the applicant must submit payment for the deficient amount before the Service will issue a right-of-way permit. Any overpayments may be refunded by the Regional Director as he or she deems appropriate.

(b) *Monitoring activities.* (1) By accepting a permit under this subpart, the holder agrees to reimburse the Service for the costs it incurs in monitoring the construction, operation, maintenance, and termination of facilities to ensure compliance with the terms, conditions, and stipulations of the right-of-way permit, referred to in this paragraph as ''monitoring activities.''

(2) The Regional Director or his or her designee will estimate the total costs the Service expects to incur for monitoring activities over the first 5 years of the permit term or the entire permit term, whichever is less. The applicant must pay the estimated amount before the Service will issue a right-of-way permit.

(3) The permit holder must make an additional payment every 5 years, or for the remainder of the permit term, whichever is less, to reimburse the Service for the costs the Service expects to incur for monitoring activities during that period.

(4) If the Service's cost of monitoring activities exceeds the Service's estimated amount, then the permit holder must submit payment to the United States for the deficient amount at the end of the 5 years or the remainder of the permit term, whichever is less. Any overpayments may be refunded by the Regional Director as he or she deems appropriate.

(c) *Waiver of reimbursement for Service costs.* (1) Except as provided under paragraph (c)(2) of this section, no reimbursement for Service costs for right-of-way application evaluation and processing activities and monitoring activities will be required of:

(i) State or local governments or agencies or instrumentalities thereof;

(ii) Federal Government agencies; or

(iii) Private individuals or organizations when a Regional Director has signed a statement certifying that the proposed right-of-way contributes to accomplishing refuge or fish hatchery purposes.

(2) Reimbursement of costs is required for any right-of-way permit issued under section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*).

■ 6. Amend newly redesignated § 29.21–7 by revising paragraph (a) to read as follows:

§ 29.21–7 Nature of interest granted.

(a) Where the land administered by the U.S. Fish and Wildlife Service is owned in fee by the United States and the right-of-way is compatible with the objectives of the area, a permit may be approved and granted by the Regional Director. Generally, a permit will be issued for a term of up to 50 years, or so long as it is used for the purpose granted, or for a lesser term when considered appropriate.

(1) For rights-of-way granted under authority of section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom, the permit may be for a term not to exceed 30 years.

(2) For a right-of-way issued per paragraph (a)(1) of this section, the right-of-way may not exceed 50 feet in width, plus the area occupied by the pipeline and its related facilities, unless the Regional Director finds, and records the reasons for the finding, that, in his or her judgment, a wider right-of-way is necessary for operation and maintenance after construction or to protect the environment or public safety. Related facilities include but are not limited to valves, pump stations, supporting structures, bridges, monitoring and communication devices, surge and storage tanks, terminals, etc.

(3) A temporary permit supplementing a right-of-way may be granted for additional land needed during construction, operation, maintenance, or termination of the pipeline, or to protect the natural environment or public safety.

* * * * *

■ 7. Revise newly redesignated § 29.21–8 to read as follows:

§ 29.21–8 Terms and conditions.

(a) Any right-of-way permit granted will be subject to rights reserved, if any, by a prior owner, and rights held, if any, by a third party.

(b) An applicant, by accepting a permit, agrees to such terms and conditions as may be prescribed by the Regional Director in the granting document, including special stipulations at his or her discretion. (See § 29.21–12 for special requirements for electric powerlines and § 29.21–13 for special requirements for oil and gas pipelines.) The applicant shall agree to the following terms and conditions, unless waived in all or part by the Regional Director:

(1) To comply with State and Federal laws applicable to the project within which the permit is granted, and to the lands that are included in the right-of-way, and lawful existing regulations thereunder.

(2) To clear and keep clear the lands within the permit area to the extent and in the manner directed by the project manager in charge; and to dispose of all vegetative and other material cut, uprooted, or otherwise accumulated during the construction and maintenance of the project in such a manner as to decrease the fire hazard and also in accordance with such instructions as the project manager may specify.

(3) To prevent the disturbance or removal of any public land survey monument or project boundary monument unless and until the applicant has requested and received from the Regional Director approval of measures the applicant will take to perpetuate the location of aforesaid monument.

(4) To take such soil and resource conservation and protection measures, including weed control, on the land covered by the permit as the project manager in charge may request.

(5) To do everything reasonably within his or her power, both independently and on request of any duly authorized representative of the United States, to prevent and suppress fires on or near lands to be occupied under the permit area, including making available such construction and maintenance forces as may be reasonably obtainable for the suppression of such fires.

(6) To rebuild and repair such roads, fences, structures, and trails as may be destroyed or injured by construction work and, upon request by the Regional Director, to build and maintain necessary and suitable crossings for all roads and trails that intersect the works constructed, maintained, or operated under the right-of-way.

(7) To pay the United States the full value for all damages to the lands or other property of the United States caused by him or her or by his or her employees, contractors, or agents of the contractors, and to indemnify the United States against any liability for damages to life, person, or property arising from the occupancy or use of the lands under the permit.

(i) Where the permit is granted hereunder to a State or other governmental agency that has no legal power to assume such a liability with respect to damages caused by it to lands or property, such agency in lieu thereof agrees to repair all such damages.

(ii) Where the permit involves lands that are under the exclusive jurisdiction of the United States, the holder or his or her employees, contractors, or agents of the contractors, shall be liable to third parties for injuries incurred in connection with the permit area.

(iii) Grants of permits involving special hazards will impose liability without fault for injury and damage to the land and property of the United States up to a specified maximum limit commensurate with the foreseeable risks or hazards presented. The amount of no-fault liability for each occurrence is hereby limited to no more than $5,000,000.

(8) To notify promptly the project manager in charge of the amount of merchantable timber, if any, that will be cut, removed, or destroyed in the construction and maintenance of the project, and to pay the United States in advance of construction such sum of money as the project manager may determine to be the full stumpage value of the timber to be so cut, removed, or destroyed.

(9) That all or any part of the permit granted may be terminated by the Regional Director, for failure to comply with any or all of the terms or conditions of the permit, or for abandonment.

(i) A rebuttable presumption of abandonment is raised by deliberate failure of the holder to use, for any continuous 2-year period, the permit for the purpose for which it was granted or renewed. In the event of noncompliance or abandonment, the Regional Director will notify in writing the holder of the permit of his or her intention to suspend or terminate such permit 60 days from the date of the notice, stating the reasons therefor, unless prior to that time the holder completes such corrective actions as are specified in the notice. The Regional Director may grant an extension of time within which to complete corrective actions when, in his or her judgment, extenuating circumstances not within the holder's control, such as adverse weather conditions, disturbance to wildlife during breeding periods or periods of peak concentration, or other compelling reasons, warrant.

(ii) Should the holder of a right-of-way issued under authority of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*), fail to take corrective action within the 60-day period, the Regional Director will provide for an administrative proceeding pursuant to 5 U.S.C. 554, prior to a final Departmental decision to suspend or terminate the permit. In the case of all other right-of-way holders, failure to take corrective action within the 60-day period will result in a determination by the Regional Director to suspend or terminate the permit.

(iii) No administrative proceeding shall be required where the permit terminates under its terms.

(10) To restore the land to the condition it was in prior to issuance of the permit, so far as it is reasonably possible to do so upon revocation and/or termination of the permit, unless this requirement is waived in writing by the Regional Director.

(11) To keep the project manager informed at all times of his or her address, and, in case of corporations, of the address of its principal place of business and the names and addresses of its principal officers.

(12) That in the construction, operation, and maintenance of the project, he or she must not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin and must require an identical provision to be included in all subcontracts.

(13) That the grant of the permit shall be subject to the express condition that the exercise thereof will not unduly interfere with the management, administration, or disposal by the United States of the land affected thereby. The applicant agrees and consents to the occupancy and use by the United States, its grantees, permittees, or lessees of any part of the permit area not actually occupied for the purpose of the granted rights to the extent that such use does not interfere with the full and safe utilization thereof by the holder. The holder of a permit also agrees that authorized representatives of the United States shall have the right of access to the permit area for the purpose of making inspections and monitoring the construction, operation, and maintenance of facilities.

(14) That the permit herein granted shall be subject to the express covenant that any facility constructed thereon will be modified or adapted, if such is found by the Regional Director to be necessary, without liability or expense to the United States, so that such facility will not conflict with the use and occupancy of the land for any authorized works that may hereafter be constructed thereon under the authority of the United States. Any such modification will be planned and scheduled so as not to interfere unduly with or to have minimal effect upon continuity of energy and delivery requirements.

(15) That the permit herein granted shall be for the specific use described and may not be construed to include the further right to authorize any other use within the permit area unless approved in writing by the Regional Director.

(16) The Regional Director may require permit modifications at any future date to ensure that the permitted use is compatible with the Refuge System mission and the purposes of the refuge. Required permit modifications may include changes to permit conditions and/or additional stipulations that a Regional Director deems necessary based on new information.

(17) The permittee will comply with the Archaeological Resources Protection Act (16 U.S.C. 470aa). The disturbance of archaeological or historical sites and the removal of artifacts from Federal land are prohibited. If such sites or artifacts are encountered, the permittee will immediately cease all work upon Federal land and notify the project manager.

(18) The permittee will comply with the applicable requirements of the Migratory Bird Treaty Act of 1918 (16 U.S.C. 703–712), the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*), the Wilderness Act of 1964 (16 U.S.C. 1131 *et seq.*), the Wild and Scenic Rivers Act of 1968 (16 U.S.C. 1271 *et seq.*), and the National Historic Preservation Act of 1966 (54 U.S.C. 300101 *et seq.*).

§ 29.21–9 [Amended]

■ 8. Amend newly redesignated § 29.21–9 by, in paragraph (a), adding the words ''or her'' after the word ''his''.

■ 9. Amend newly redesignated § 29.21–10 by:

■ a. Revising paragraph (b) to read as set forth below; and

■ b. In paragraph (c), adding the words ''or her'' after the word ''him''.

§ 29.21–10 Disposal, transfer or termination of interest.

* * * * *

(b) *Transfer of permit.* Any proposed transfer, by assignment, lease, operating agreement or otherwise, of a permit must be filed with the Regional Director and must be supported by a stipulation that the transferee agrees to comply with and be bound by the terms and conditions of the original grant. A $100 nonrefundable service fee must accompany the proposal. No transfer will be recognized unless and until

approved in writing by the Regional Director.

* * * * *

■ 10. Revise newly redesignated § 29.21–11 to read as follows:

§ 29.21–11 Required Payment for use and occupancy of national wildlife refuge lands.

(a) Payment for use and occupancy of lands under the regulations of this subpart is required for the fair market value or fair market rental value as determined by the Regional Director using any Department of the Interior-approved method to determine those values.

(1) At the discretion of the Regional Director, the payment may be a fair market rental payment, paid annually, or a lump sum payment, made in advance of permit issuance.

(2) If any Federal, State, or local agency is exempt from such payment under any other provision of Federal law, such agency shall inform the U.S. Fish and Wildlife Service of the applicable Federal law during the required pre-application meeting, and shall otherwise compensate the Service by any other means acceptable to the Regional Director, including, but not limited to, making other land available or loaning of equipment or personnel, except that any such compensation shall relate to, and be consistent with, the mission of the National Wildlife Refuge System. For these agencies exempted from payment by law, the Regional Director may waive such requirement for other compensation if he or she finds such requirement impracticable or unnecessary.

(b) When annual rental payments are used, such rates will be reviewed by the Regional Director not more than every 5 years after the issuance of the permit or the last revision of the permit, whichever is later. The Regional Director will furnish a notice in writing to the holder of a permit of intent to impose new charges to reflect fair market value commencing with the ensuing charge year. The revised charges will be effective unless the holder files an appeal in accordance with § 29.22.

§ 29.21–12 [Amended]

■ 11. Amend newly redesignated § 29.21–12 by:

■ a. In the introductory text, by removing the citation ''§ 29.21–4(b)'' and adding in its place the citation ''§ 29.21–8(b)'';

■ b. In paragraph (a), by adding the words ''or her'' after the word ''his'' both times that it appears; and

■ c. In paragraph (b), by adding the words ''or her'' after the word ''him'' both times that it appears.

■ 12. Revise newly redesignated § 29.21–13 to read as follows:

§ 29.21–13 Rights-of-way for pipelines for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom.

(a) *Application procedure.* (1) Applications for pipelines and related facilities under this section are to be filed in accordance with § 29.21–4 with the following exception: When the right-of-way or proposed facility will occupy Federal land under the control of more than one Federal agency and/or more than one bureau or office of the Department of the Interior, a single application shall be filed with the appropriate State Director of the Bureau of Land Management in accordance with regulations in 43 CFR part 2800.

(2) Any portion of the facility occupying land of the National Wildlife Refuge System will be subject to the provisions of the regulations in this part.

(b) *Right-of-way permits.* Right-of-way permits issued under this section will be subject to the special requirements of section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 181 *et seq.*). Gathering lines and associated structures used solely in the production of oil and gas under valid leases on the lands administered by the U.S. Fish and Wildlife Service are excepted from the provisions of this section.

(1) *Pipeline safety.* Rights-of-way permits issued under this section will include requirements that will protect the safety of workers and protect the public from sudden ruptures and slow degradation of the pipeline. An applicant must agree to design, construct, and operate all proposed facilities in accordance with the provisions of 49 CFR parts 192 or 195 and in accordance with the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 *et seq.*), including any amendments thereto.

(2) *Environmental protection.* An application for a right-of-way must contain environmental information required by § 29.21–4(a)(2). If the Regional Director determines that a proposed project will have a significant effect on the environment, there must also be furnished a plan of construction, operation, and rehabilitation of the proposed facilities. In addition to terms and conditions imposed under § 29.21–8, the Regional Director will impose such stipulations as may be required to ensure:

(i) Restoration, revegetation, and curtailment of erosion of the surface;

(ii) That activities in connection with the right-of-way or permit will not violate applicable air and water quality standards in related facilities siting standards established by law;

(iii) Control or prevention of damage to the environment including damage to fish and wildlife habitat, public or private property, and public health and safety; and

(iv) Protection of the interests of individuals living in the general area of the right-of-way who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes.

(c) *Disclosure.* Applicants that are a partnership, corporation, association, or other business entity must disclose the identity of the participants in the entity. Such disclosure shall include where applicable:

(1) The name and address of each partner;

(2) The name and address of each shareholder owning 3 percentum or more of the shares, together with the number and percentage of any class of voting shares of the entity that such shareholder is authorized to vote; and

(3) The name and address of each affiliate of the entity together with, in the case of an affiliate controlled by the entity, the number of shares and the percentage of any class of voting stock of that affiliate owned, directly or indirectly, by that entity, and in the case of an affiliate which controls that entity, the number of shares and the percentage of any class of voting stock of that entity owned, directly or indirectly, by the affiliate.

(d) *Technical and financial capability.* The Regional Director may grant or renew a right-of-way permit under this section only when he or she is satisfied that the applicant has the technical and financial capability to construct, operate, maintain, and terminate the facility. At the discretion of the Regional Director, a financial statement may be required.

(e) *Reimbursement of costs.* In accordance with § 29.21–6, the holder of a right-of-way permit must reimburse the Service for the cost incurred in monitoring the construction, operation, maintenance, and termination of any pipeline or related facilities as determined by the Regional Director.

(f) *Public hearing.* The Regional Director shall give notice to Federal, State, and local government agencies, and the public, and afford them the opportunity to comment on right-of-way applications under this section. A notice will be published in the **Federal**

Register, and a public hearing may be held where appropriate.

(g) *Bonding.* Where appropriate, the Regional Director may require the holder of a right-of-way permit to furnish a bond, or other security satisfactory to him, to secure all or any of the obligations imposed by the terms and conditions of the right-of-way permit or by any rule or regulation, not to exceed the period of construction plus 1 year or a longer period if necessary for the pipeline to stabilize.

(h) *Suspension of right-of-way.* If the project manager determines that an immediate temporary suspension of activities within a right-of-way permit area is necessary to protect public health and safety or the environment, he or she may issue an emergency suspension order to abate such activities prior to an administrative proceeding. The Regional Director must make a determination and notify the holder in writing within 15 days from the date of suspension as to whether the suspension should continue and list actions needed to terminate the suspension. Such suspension shall remain in effect for only so long as an emergency condition continues.

(i) *Joint use of rights-of-way.* Each right-of-way permit shall reserve to the Regional Director the right to grant additional rights-of-way permits for compatible uses on or adjacent to rights-of-way permit areas granted under this section after giving notice to the holder and an opportunity to comment.

(j) *Common carriers.* Pipelines and related facilities used for the transportation of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom shall be constructed, operated, and maintained as common carriers.

(1) The owners or operators of pipelines subject to this subpart shall accept, convey, transport, or purchase without discrimination all oil or gas delivered to the pipeline without regard to whether such oil or gas was produced on Federal or non-Federal lands.

(2) In the case of oil or gas produced from Federal lands or from the resources on the Federal lands in the vicinity of the pipelines, the Secretary may, after a full hearing with due notice thereof to the interested parties and a proper finding of facts, determine the proportionate amounts to be accepted, conveyed, transported, or purchased.

(3) The common carrier provisions of this section shall not apply to any natural gas pipeline operated by any person subject to regulation under the Natural Gas Act or by any public utility subject to regulation by a State or municipal regulatory agency having jurisdiction to regulate the rates and charges for the sale of natural gas to consumers within the State or municipality.

(4) Where natural gas not subject to State regulatory or conservation laws governing its purchase by pipelines is offered for sale, each such pipeline shall purchase, without discrimination, any such natural gas produced in the vicinity of the pipeline.

(k) *Required information.* The Regional Director shall require, prior to granting or renewing a right-of-way, that the applicant submit and disclose all plans, contracts, agreements, or other information or material that the Regional Director deems necessary to determine whether a right-of-way shall be granted or renewed and the terms and conditions that should be included in the right-of-way. Such information may include, but is not limited to:

(1) Conditions for, and agreements among owners or operators, regarding the addition of pumping facilities, looping, or otherwise increasing the pipeline or terminal's throughput capacity in response to actual or anticipated increases in demand;

(2) Conditions for adding or abandoning intake, offtake, or storage points or facilities; and

(3) Minimum shipment or purchase tenders.

(l) *State standards.* The Regional Director shall take into consideration, and to the extent practical comply with, applicable State standards for right-of-way construction, operation, and maintenance.

(m) *Congressional notification.* The Secretary shall promptly notify the Committee on Natural Resources of the United States House of Representatives and the Committee on Energy and Natural Resources of the United States Senate upon receipt of an application for a right-of-way for pipeline 24 inches or more in diameter, and no right-of-way for such a pipeline shall be granted until 60 days (not including days on which the House or Senate has adjourned for more than 3 days) after a notice of intention to grant the right-of-way, together with the Secretary's detailed findings as to the terms and conditions he or she proposes to impose, has been submitted to such committees.

George Wallace,

Assistant Secretary for Fish and Wildlife and Parks.

Notices

Federal Register

Vol. 86, No. 11

Tuesday, January 19, 2021

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2019–0050]

Monsanto Company; Determination of Nonregulated Status for Insect Resistant Cotton

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of our determination that the cotton event designated as MON 88702, which has been genetically engineered for resistance to certain insects, primarily *Lygus* spp., is no longer considered regulated under our regulations governing the introduction of certain genetically engineered organisms. Our determination is based on evaluation of information Monsanto Company submitted in its petition for a determination of nonregulated status, our analyses, and public comments received in response to previous notices announcing the availability of the petition for nonregulated status and our associated environmental assessment and plant pest risk assessment. This notice also announces the availability of our written determination and finding of no significant impact.

DATES: This change in regulatory status will be recognized January 19, 2021.

ADDRESSES: You may read the documents referenced in this notice and the comments we received at *http://www.regulations.gov/#!docketDetail;D=APHIS-2019-0050,* or in our reading room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

Supporting documents are also available on the APHIS website at *https://www.aphis.usda.gov/aphis/ourfocus/biotechnology/permits-notifications-petitions/petitions/petition-status.*

FOR FURTHER INFORMATION CONTACT: Ms. Cindy Eck, Biotechnology Regulatory Services, APHIS, 4700 River Road Unit 147, Riverdale, MD 20737–1236; (301) 851–3892; email: *cynthia.a.eck@usda.gov.*

SUPPLEMENTARY INFORMATION: Under the authority of the plant pest provisions of the Plant Protection Act (PPA) (7 U.S.C. 7701 *et seq.*), the regulations in 7 CFR part 340, regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products modified or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests.

Pursuant to the terms set forth in a final rule published in the **Federal Register** on May 18, 2020 (85 FR 29790–29838, Docket No. APHIS–2018–0034),[1] any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340.

APHIS received a petition (APHIS Petition Number 19–091–01p) from Monsanto Company (Monsanto) on May 28, 2019, seeking a determination of nonregulated status for a cotton event designated as MON 88702, which has been genetically engineered for resistance to certain insects, primarily *Lygus* spp. The Monsanto petition stated that this cotton is unlikely to pose a plant pest risk and, therefore, should not be regulated under APHIS' regulations in 7 CFR part 340.

According to our process[2] for soliciting public comment when considering petitions for determination of nonregulated status of organisms developed using genetic engineering, APHIS accepts written comments regarding a petition once APHIS deems it complete. On September 26, 2019, APHIS published a notice[3] in the **Federal Register** (84 FR 50818–50819, Docket No. APHIS–2019–0050) announcing the availability of the Monsanto petition for public comment. Thirty-five comments were received. Fifteen comments from the agricultural, academic, and private sector were in support of Monsanto's petition. Fourteen comments from individuals were opposed to approval of Monsanto's petition. Six comments provided input on analyses to be considered in the environmental assessment (EA), or comments on insect-resistant crops in general. APHIS evaluated the issues raised during the initial comment period and, where appropriate, incorporated a discussion of them within a draft EA.

A second opportunity for public involvement was provided on October 16, 2020, with a notice[4] published in the **Federal Register** (85 FR 65789–65790, Docket No. APHIS–2019–0050) announcing the availability of the draft EA and draft plant pest risk assessment (PPRA) for public review and comment. That comment period closed November 16, 2020. APHIS received 14 comments. Most were supportive of Monsanto's petition request; three were opposed. None of the comments identified new information or data regarding the draft EA or draft PPRA.

National Environmental Policy Act

After reviewing and evaluating the comments received during the comment period on the draft EA, draft PPRA, and other information, APHIS has prepared a final EA, which provides the public with documentation of APHIS' review and analysis of any potential environmental impacts associated with the determination of nonregulated status of MON 88702 cotton. The EA was prepared in accordance with: (1) the National Environmental Policy Act (NEPA), as amended (42 U.S.C. 4321 *et*

[1] Although this final rule (termed the SECURE rule) published revisions to 7 CFR part 340 with phased effective dates beginning August 17, 2020 (*https://www.aphis.usda.gov/brs/fedregister/BRS_2020518.pdf*), the SECURE rule stated that the petition evaluation process found in the previous regulations would continue to be used for a period of time following that August 17, 2020 effective date. This product was evaluated in accordance with that process.

[2] On March 6, 2012, APHIS published in the **Federal Register** (77 FR 13258–13260, Docket No. APHIS–2011–0129) a notice describing our public review process for soliciting public comments and information when considering petitions for determinations of nonregulated status for organisms developed using genetic engineering. To view the notice, go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2011-0129.*

[3] To view the notice, the petition, supporting documents, and the comments we received, go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2019-0050.*

[4] See footnote 3.

seq.), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372). Based on our EA, the response to public comments, and other pertinent scientific data, APHIS has reached a finding of no significant impact (FONSI) with regard to the preferred alternative identified in the EA (to make a determination of nonregulated status of MON 88702 cotton).

Determination

Based on APHIS' analysis of field and laboratory data submitted by Monsanto, references provided in the petition, peer-reviewed publications, information analyzed in the EA, the PPRA, the public comments, and information provided in APHIS' response to those public comments, APHIS has determined that MON 88702 cotton is unlikely to pose a plant pest risk and therefore is no longer subject to our regulations governing the introduction of certain organisms developed using genetic engineering.

Copies of the signed determination document, PPRA, final EA, and FONSI, as well as the previously published petition and supporting documents, are available as indicated under **ADDRESSES** and from the person listed under the **FOR FURTHER INFORMATION CONTACT** section in this notice.

Authority: 7 U.S.C. 7701–7772 and 7781–7786; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 12th day of January 2021.

Michael Watson,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meetings of the Nebraska Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of public meetings.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA) that the Nebraska State Advisory Committee to the Commission will hold virtual meetings on Monday, February 22, 2021 from 10:00 a.m.–11:00 a.m. (CT); Monday, March 1, 2021 from 9:00 a.m.–10:00 a.m. (CT); and Wednesday, March 10, 2021 from 10:00 a.m.–11:00 a.m. (CT). The purpose of these meetings is to review and approve the Committee's draft report to the Commission on the use of Native American symbols, names, and imagery in school mascots.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski at *mwojnaroski@usccr.gov,* or by phone at (202) 618–4158.

SUPPLEMENTARY INFORMATION:

Meeting Access: These meetings will be held on:

- Monday, February 22, 2021, at 10:00 a.m. to 11:00 a.m. (CT)
  - *Join online (audio/visual): https://tinyurl.com/y3h8xdo3*
  - *Join by phone (audio only):* 800–360–9505; Access code: 199 004 6752
- Monday, March 1, 2021, at 9:00 a.m. to 10:00 a.m. (CT)
  - *Join online (audio/visual): https://tinyurl.com/y6ctrto5*
  - *Join by phone (audio only):* 800–360–9505; Access code: 199 073 3890
- Wednesday, March 10, 2021 at 10:00 a.m. to 11:00 a.m. (CT)
  - *Join online (audio/visual): https://tinyurl.com/y6xucvps*
  - *Join by phone (audio only):* 800–360–9505; Access code: 199 518 6743

These meetings are available to the public through the registration links above. If joining only via phone, callers can expect to incur charges for calls they initiate over wireless lines, according to their wireless plans. The Commission will not refund any incurred charges. Individuals who are deaf, deafblind and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the call-in number found through registering at the web link provided for each meeting.

Members of the public are entitled to make comments during the open period at the end of each meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the respective meeting. Written comments may be emailed to Melissa Wojnaroski at *mojnaroski@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (202) 618–4158. Records and documents discussed during the meeting will be available for public viewing as they become available at *www.facadatabase.gov.* Persons interested in the work of this advisory committee are advised to go to the Commission's website, *www.usccr.gov,* or to contact the Regional Programs Unit at the above phone number or email address.

Agenda: Monday, February 22, 2021 from 10:00 a.m.–11:00 a.m. (CT); Monday, March 1, 2021 from 9:00 a.m.–10:00 a.m.; (CT) and Wednesday, March 10, 2021 from 10:00 a.m.–11:00 a.m. (CT).

I. Welcome and Roll Call
II. Announcements and Updates
III. Approval of Minutes
IV. Discussion of draft report
V. Public Comment
VI. Next Steps
VII. Adjournment

Dated: January 13, 2021.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

BILLING CODE 6335–01–P

DEPARTMENT OF COMMERCE

Office of the Under Secretary for Economic Affairs

Request for Comments for the Advisory Committee on Data for Evidence Building

AGENCY: Office of the Under Secretary for Economic Affairs, Department of Commerce.

ACTION: Request for comments.

SUMMARY: The Foundations for Evidence-Based Policymaking Act of 2018 requires federal agencies to modernize their data management practices to develop and support evidence-based policymaking. The Act requires the Director of the Office of Management and Budget (OMB), or the head of an agency designated by the Director, to establish the Advisory Committee on Data for Evidence Building (Advisory Committee). In a letter dated September 3, 2019, OMB delegated managerial and administrative responsibility for this Federal advisory committee to the Department of Commerce Office of Under Secretary for Economic Affairs (OUSEA).

DATES: Comments must be received by Tuesday, February 9, 2021.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Docket ID—EAB–2021–0001–0001.
- By email directly to *Evidence@bea.gov.* Begin with the phrase

''Comments for the Advisory Committee on Data for Evidence Building;'' and indicate which numbered questions described in the **SUPPLEMENTARY INFORMATION** of this notice your comments address. Comments by fax or paper delivery will not be accepted.

Privacy Note: Comments submitted in response to this notice may be made available to the public through relevant websites. Therefore, commenters should only include information they wish to make publicly available on the internet. Do not submit confidential business information or otherwise sensitive or protected information.

Please note the confidentiality of routine communication and responses to this public comment request are treated as public comments and may therefore be made publicly available, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Lucas Hitt, Designated Federal Official, Advisory Committee on Data for Evidence Building, 4600 Silver Hill Road, Washington, DC 20233 by email Gianna Marrone (*gianna.marrone@bea.gov*) or by phone (301) 278–9282.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Advisory Committee will review, analyze, and make recommendations on how to promote the use of data for evidence building. The Advisory Committee will evaluate and provide recommendations to the Director of the Office of Management and Budget on how to facilitate data sharing, data linkage, and privacy enhancing techniques in support of evidence building. As part of its evaluation, the Advisory Committee may consider best practices to improve the safe and appropriate access to data. The Advisory Committee will consider the coordination of data sharing and availability of data for evidence building across all agencies and levels of government. The FRN commentators may respond to any question and do not need to respond to all questions.

This request for comments offers researchers, evaluators, contractors, government entities, and other interested parties the opportunity to inform the Committee's work. This is a general solicitation of comments from the public. The Advisory Committee will consider all feedback and recommendations on core topics and central issues such as:

- Capacity needs for secure data access and record linkage.
- Areas for research and development on state-of-the-art data access and data protection methods.
- How to protect privacy when using personally identifiable information or confidential business information in support of evidence building.
- How to promote transparency and facilitate public engagement with the evidence building process.
- Agency needs for data management and data stewardship services.
- How to best facilitate the needs of researchers, evaluators, and other evidence builders through a national data service or similar approach.

Please clearly indicate which question(s) you address in your response and any evidence to support assertions, where practicable.

Round 1

Central Questions—

1. What are the main challenges faced by national, state/provincial, or local governments that are trying to build a basis for evidence-based policy? Briefly describe the bottlenecks and pain-points they face in the evidence-based decision-making process.

2. What are examples of high-impact data uses for evidence-based policy making that successfully effected change, reduced costs, or improved the welfare of citizens?

3. Which frameworks, policies, practices, or methods show promise in overcoming challenges experienced by governments in their evidence building?

4. The Commission on Evidence-Based Policymaking (See: *www.cep.gov*) recommended the creation of a National Secure Data Service (See Commission Report at *www.cep.gov*). Do you agree with this recommendation, and if so, what should be the essential features of a National Secure Data Service?

5. How can federal agencies protect individual and organizational privacy when using data for evidence building? Recommend specific actions the Office of Management and Budget and/or other federal agencies can take when using data for evidence building, as well as suggested changes to federal laws, policies, and procedures.

Secure Data Access—

6. If created, how should a data service be structured to best facilitate (1) research and development of secure data access and confidentiality technologies and methods, (2) and agency adoption of those technologies and techniques?

7. Government agencies have argued that secure data access has value because it (1) improves service delivery, (2) improves efficiency (lowers costs), (3) produces metrics for performance measurement, and (4) produces new learnings/insights from the data. Which of these propositions do you agree holds value and why? Do you have examples that demonstrate these benefits? Do you have other examples of the value of secure data access?

Data Services to Federal, State, Local Agencies and the Public—

8. What are the most pressing data needs of state and local decision makers and how would making data accessible from federal agencies help meet those needs? To share data, what guarantees do data owners (or data controllers) need regarding privacy, data stewardship, and retention?

9. What are the key problems and use cases where collaborative work between federal, state, and local authorities' data analysis can inform decisions? What are key decision support tools? How would greater communication about data and tools benefit expanded evidence building?

Infrastructure for Meeting Public and Evidence Building Needs—

10. What basic public data services are essential for a data service to address existing capacity gaps and needs? What infrastructure or incentives can the federal government create that locals and states cannot?

Dated: December 9, 2020.

Gianna Marrone,

Assistant Designated Federal Official, Advisory Committee on Data for Evidence Building.

BILLING CODE 3510–MN–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–533–843]

Certain Lined Paper Products From India: Preliminary Results of Antidumping Duty Administrative Review and Preliminary Determination of No Shipments; 2018–2019

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is conducting an administrative review of the antidumping duty order on certain lined paper products from India, covering the period of review (POR), September 1, 2018 through August 31, 2019. We preliminarily find that Navneet Education Ltd. (Navneet) and Super Impex did not make sales of subject merchandise at less than normal value during the POR. We invite interested

parties to comment on these preliminary results.

DATES: Applicable January 19, 2021.

FOR FURTHER INFORMATION CONTACT: Samuel Brummitt, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington DC 20230; telephone: (202) 482–7851.

SUPPLEMENTARY INFORMATION:

Background

On September 28, 2006, Commerce published the *Order* in the **Federal Register**.[1] On November 12, 2019, pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (the Act), Commerce initiated an administrative review of the *Order*.[2]

On April 24, 2020, Commerce tolled all deadlines in administrative reviews by 50 days.[3] On June 11, 2020, we extended the deadline for the preliminary results to November 18, 2020.[4] On July 21, 2020, Commerce tolled all deadlines in administrative reviews by an additional 60 days.[5] The deadline for the preliminary results of this review is now January 19, 2021.

Commerce initiated this administrative review covering the following 13 companies: Cellpage Ventures Private Limited (Cellpage); Goldenpalm Manufacturers PVT Limited (Goldenpalm); Kokuyo Riddhi Paper Products Pvt. Ltd. (Kokuyo); Lodha Offset Limited (Lodha); Lotus Global Private Limited (Lotus Global); Magic International Pvt. Ltd. (Magic); Marisa International (Marisa); Navneet; Pioneer Stationery Pvt. Ltd. (Pioneer); PP Bafna Ventures Private Limited (PP Bafna); SAB International (SAB); SGM Paper Products (SGM); and Super Impex.[6] This review covers two mandatory respondents, Navneet and Super Impex. The other 11 companies were not selected for individual examination and remain subject to this administrative review.

Scope of the Order

The merchandise covered by the *Order* is certain lined paper products. The merchandise subject to this order is currently classified under the following Harmonized Tariff Schedule of the United States (HTSUS) subheadings: 4811.90.9035, 4811.90.9080, 4820.30.0040, 4810.22.5044, 4811.90.9050, 4811.90.9090, 4820.10.2010, 4820.10.2020, 4820.10.2030, 4820.10.2040, 4820.10.2050, 4820.10.2060, and 4820.10.4000. Although the HTSUS numbers are provided for convenience and customs purposes, the written product description remains dispositive. A full description of the scope of the *Order* is contained in the Preliminary Decision Memorandum.[7]

Preliminary Determination of No Shipments

On November 19 and November 26, 2019, Lodha and Marisa, respectively, submitted responses to Commerce's quantity and value questionnaire which indicated that the companies had no exports or sales of subject merchandise into the United States during the POR.[8] To confirm Lodha and Marisa's no-shipment claims, on December 6, 2019, Commerce issued a no-shipment inquiry to U.S. Customs and Border Protection (CBP) concerning the two companies.[9] CBP reported that it had no information to contradict Marisa's no shipments claim during the POR, but it found certain inconsistencies with respect to Lodha's no shipment claim.[10]

Given that Marisa reported that it made no shipments of subject merchandise to the United States during the POR, and there is no information calling Marisa's claim into question, we preliminarily determine that Marisa did not have any reviewable transactions during the POR. Consistent with Commerce's practice, we will not rescind the review with respect to Marisa but, rather, will complete the review and issue instructions to CBP based on the final results.[11] Concerning Lodha, for these preliminary results, we have included it among the firms subject to the rate for non-selected respondents.

Methodology

Commerce is conducting this review in accordance with section 751(a)(2) of the Act. Export price is calculated in accordance with section 772 of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our preliminary results, *see* the Preliminary Decision Memorandum. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed Preliminary Decision Memorandum and the electronic version of the Preliminary Decision Memorandum are identical in content. A list of the topics discussed in the Preliminary Decision Memorandum is attached as an Appendix to this notice.

Rate for Non-Selected Respondents

The statute and Commerce's regulations do not address the establishment of a rate to be applied to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the

[1] *See Notice of Amended Final Determination of Sales at Less Than Fair Value: Certain Lined Paper Products from the People's Republic of China; Notice of Antidumping Duty Orders: Certain Lined Paper Products from India, Indonesia and the People's Republic of China; and Notice of Countervailing Duty Orders: Certain Lined Paper Products from India and Indonesia,* 71 FR 56949 (September 28, 2006) (*Order*).

[2] *Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 84 FR 61011 (November 12, 2019) (*Initiation Notice*).

[3] *See* Memorandum, ''Tolling of Deadlines for Antidumping and Countervailing Duty Administrative Reviews in Response to Operational Adjustments Due to COVID–19,'' dated April 24, 2020.

[4] *See* Memorandum, ''Certain Lined Paper Products from India: Extension of Time Limit for Preliminary Results of Antidumping Duty Administrative Review; 2018–2019,'' dated June 11, 2020.

[5] *See* Memorandum, ''Tolling of Deadlines for Antidumping and Countervailing Duty Administrative Reviews,'' dated July 21, 2020.

[6] *Initiation Notice,* 84 FR at 61012–61013.

[7] *See* Memorandum, ''Decision Memorandum for the Preliminary Results of Antidumping Duty Administrative Review: Certain Lined Paper Products from India; 2018–2019,'' dated concurrently and hereby adopted by this notice (Preliminary Decision Memorandum).

[8] *See* Lodha's Letter, ''Response to Quantity & Value Questionnaire,'' dated November 19, 2019; *see also* Marisa's Letter, ''Certain Lined Paper Products from India: Marisa International ('Marisa') No export or sales of subject merchandise,'' dated November 26, 2019.

[9] *See* Memorandum, ''No Shipment Inquiry,'' dated December 10, 2019.

[10] *See* Memorandum, ''Request for Entry Summary,'' dated January 27, 2020 at Attachment.

[11] Commerce determined not to rescind a review with respect to exporters that demonstrate that they had no knowledge of sales through resellers to the United States because we find it appropriate to instruct CBP to liquidate such entries at the all-others rate applicable to the proceeding. Further, Commerce explained that it is more consistent with the Automatic Assessment Clarification not to rescind a review in part under these circumstances but rather to complete the review and issue appropriate instructions to CBP based on the final results of the review. *See, e.g., Certain Frozen Warmwater Shrimp from Thailand; Preliminary Results of Antidumping Duty Administrative Review, Partial Rescission of Review, Preliminary Determination of No Shipments; 2012–2013,* 79 FR 15951, 15952 (March 24, 2014), unchanged in *Certain Frozen Warmwater Shrimp from Thailand: Final Results of Antidumping Duty Administrative Review, Final Determination of No Shipments, and Partial Rescission of* Review*; 2012–2013,* 79 FR 51306, 51307 (August 28, 2014) at 6–7 (citing *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties,* 68 FR 23954 (May 6, 2003) (*Automatic Assessment Clarification*)).

Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in a market economy investigation, for guidance when calculating the rate for companies which were not selected for individual examination in an administrative review. Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted-average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely.''

In this review, we have preliminarily calculated weighted-average dumping margins for Navneet and Super Impex that are zero. For the companies that were not selected for individual review, we preliminarily assigned a rate based on the rates for the respondents that were selected for individual review, excluding rates that are zero, *de minimis,* or based entirely on facts available.[12] In accordance with the U.S. Court of Appeals for the Federal Circuit's decision in *Albemarle Corp.* v. *United States,* we are applying to the ten companies that had reviewable transactions during the POR the zero percent rates calculated for Navneet and Super Impex.[13] These are the only rates determined in this review for individual respondents and, thus, should be applied to the ten firms not selected for individual review under section 735(c)(5)(B) of the Act.

Preliminary Results of the Review

As a result of this review, we preliminarily find that the following weighted-average dumping margins existed for the period September 1, 2018 through August 31, 2019.

Producer/Exporter	Weighted-Average Dumping Margin (percent)
Cellpage Ventures Private Limited	0.00
Goldenpalm Manufacturers PVT Limited	0.00
Kokuyo Riddhi Paper Products Pvt. Ltd.	0.00
Lodha Offset Limited	0.00
Lotus Global Private Limited	0.00
Magic International Pvt. Ltd.	0.00
Navneet Education Ltd.	0.00
PP Bafna Ventures Private Limited	0.00
Pioneer Stationery Pvt. Ltd.	0.00
SAB International	0.00
SGM Paper Products	0.00
Super Impex	0.00

Assessment Rates

Upon issuance of the final results, Commerce shall determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review. If the weighted-average dumping margin for Navneet or Super Impex is not zero or *de minimis* (*i.e.,* less than 0.5 percent), we will calculate importer-specific *ad valorem* antidumping duty assessment rates based on the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those same sales in accordance with 19 CFR 351.212(b)(1).[14] If the weighted-average dumping margin for the respondents listed above is zero or *de minimis* in the final results, or an importer-specific assessment rate is zero or *de minimis* in the final results, we will instruct CBP not to assess antidumping duties on any of their entries in accordance with the *Final Modification for Reviews.*[15]

In accordance with Commerce's assessment practice, for entries of subject merchandise during the POR produced by Navneet or Super Impex for which it did not know that its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate of 3.91 percent, as established in the less-than-fair-value investigation, if there is no rate for the intermediate company(ies) involved in the transaction.[16] For a full discussion of this practice, *see Assessment Policy Notice.*[17]

We intend to issue liquidation instructions to CBP 15 days after publication of the final results of this review.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of administrative review for all shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for respondents noted above will be the rates established in the final results of this administrative review; (2) for merchandise exported by producers or exporters not covered in this administrative review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation, but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 3.91 percent, the all-others rate established in the investigation. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Disclosure and Public Comment

We will disclose to parties to the proceeding any calculations performed in connection with these preliminary results of review within five days after the date of publication of this notice.[18] Interested parties may submit case briefs not later than 30 days after the date of publication of this notice in the **Federal Register**.[19] Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than seven days after the date for filing case briefs.[20] Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[21] All briefs must be filed electronically using ACCESS. An electronically filed document must be received successfully in its entirety by the established deadline.

Interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and

Compliance, within 30 days after the date of publication of this notice.[22] Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case and rebuttal briefs. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date and time of the hearing two days before the scheduled date.

We intend to issue the final results of this administrative review, including the results of our analysis of the issues raised in any written briefs, not later than 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) of the Act.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties and/or countervailing duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the presumption that reimbursement of antidumping and/or countervailing duties occurred and the subsequent assessment of doubled antidumping duties.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(h)(1).

Dated: January 7, 2021.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Light-Walled Rectangular Pipe and Tube from Mexico: Partial Rescission of Antidumping Duty Administrative Review: 2019–2020

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce

SUMMARY: The Department of Commerce (Commerce) is rescinding the administrative review, in part, of the antidumping duty order on light-walled rectangular pipe and tube (LWRPT) from Mexico for the period of review August 1, 2019, through July 31, 2020, based on timely withdrawals of the requests for review.

DATES: Applicable January 19, 2021.

FOR FURTHER INFORMATION CONTACT: Kyle Clahane, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5449.

SUPPLEMENTARY INFORMATION:

Background

On August 4, 2020, Commerce published a notice of opportunity to request an administrative review of the antidumping duty order on LWRPT from Mexico for the period of review August 1, 2019, through July 31, 2020.[1] On August 28, 2020, Regiomontana de Perfiles y Tubos S. de R.L. de C.V. (Regiopytsa) filed a timely request for a review of itself.[2] On August, 31, 2020, Nucor Tubular Products Inc. (Nucor Tubular), a domestic producer, filed a timely request for review with respect to 19 companies.[3] Maquilacero S.A. de C.V. (Maquilacero),[4] and Perfiles LM, S.A. de C.V. (Perfiles),[5] timely requested reviews of themselves. Based on these requests, on October 6, 2020, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.221(c)(1)(i), Commerce published in the **Federal Register** a notice of initiation of an administrative review of the antidumping duty order on LWRPT from Mexico covering the period August 1, 2019 through July 31, 2020.[6]

On January 4, 2021, Nucor Tubular withdrew its request for administrative review with respect to Aceros Cuatro Caminos S.A. de C.V.; Arco Metal S.A. de C.V.; Fabricaciones y Servicios de Mexico; Galvak, S.A. de C.V.; Grupo Estructuras y Perfiles, Industrias Monterrey S.A. de C.V.; Internacional de Aceros, S.A. de C.V.; PEASA-Productos Especializados de Acero; Talleres Acero Rey S.A. de C.V.; Tuberias Aspe S.A de C.V.; Tuberia Laguna, S.A. de C.V.; and Tuberias y Derivados S.A. de C.V.[7]

Partial Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party that requested the review withdraws its request within 90 days of the publication date of the notice of initiation of the requested review.

Because Nucor Tubular's request for review, for 12 companies, was withdrawn within the 90-day deadline, and no other interested party requested a review of these 12 companies, we are rescinding this review with respect to these 12 companies. The administrative review remains active with respect to the seven remaining companies for which a review was initiated, *i.e.,* Maquilacero S.A. de C.V.; Nacional de Acero S.A. de C.V.; Perfiles LM, S.A. de C.V.; Productos Laminados de Monterrey S.A. de C.V.; Regiomontana de Perfiles y Tubos S.A. de C.V.; Regiomontana de Perfiles y Tubos S. de R.L. de C.V.; and Ternium Mexico S.A. de C.V.[8]

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries of LWRPT from Mexico at a rate

equal to the cash deposit rate of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, during the period August 1, 2019 through July 31, 2020, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 15 days after publication of this notice in the **Federal Register**.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of the antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Order

This notice also serves as the only reminder to all parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act and 19 CFR 351.213(d)(4).

Dated: January 12, 2021.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[A–570–121]

Difluoromethane (R–32) From the People's Republic of China: Final Affirmative Determination of Sales at Less Than Fair Value

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that difluoromethane (R–32) from the People's Republic of China (China) is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is July 1, 2019 through December 31, 2019. The final dumping margins of sales at LTFV are listed below in the ''Final Determination'' section of this notice.

DATES: Applicable January 19, 2021.

FOR FURTHER INFORMATION CONTACT: Joshua Tucker or William Miller, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2044 or (202) 482–3906, respectively.

SUPPLEMENTARY INFORMATION:

Background

On August 27, 2020, Commerce published the *Preliminary Determination* of sales at LTFV of R–32 from China,[1] in which we also postponed the final determination to January 11, 2021. The petitioner in this investigation is Arkema Inc. The mandatory respondents in this investigation are Taizhou Qingsong Refrigerant New Material Co., Ltd. (Taizhou Qingsong) and Zibo Feiyuan Chemical Co., Ltd. (Zibo Feiyuan).

A summary of the events that occurred since Commerce published the *Preliminary Determination,* as well as a full discussion of the issues raised by the parties for this final determination are discussed in the Issues and Decision Memorandum.[2] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/index.html.* The signed and electronic versions of the Issues and Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is R–32 from China. For a complete description of the scope of this investigation, *see* Appendix I.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs by parties in this investigation are addressed in the Issues and Decision Memorandum. A list of the issues raised is attached to this notice as Appendix II.

Verification

Commerce normally verifies information relied upon in making its final determination, pursuant to section 782(i)(1) of the Tariff Act of 1930, as amended (the Act). However, due to current travel restrictions in response to the global COVID–19 pandemic, Commerce was unable to conduct on-site verification in this investigation.[3] Consistent with section 776(a)(2)(D) of the Act, Commerce relied on the information submitted on the record, which we used in making our *Preliminary Determination,* as facts available in making our final determination.

Changes Since the Preliminary Determination

Based on our review and analysis of the comments received from parties, we made no changes to the antidumping duty margin calculations for Taizhou Qingsong and Zibo Feiyuan.

China-Wide Entity and the Use of Adverse Facts Available

We continue to find that the use of adverse facts available (AFA), pursuant to sections 776(a) and (b) of the Act, is warranted in determining the rate for the China-wide entity.[4] In selecting the AFA rate for the China-wide entity, Commerce's practice is to select a rate that is sufficiently adverse to ensure that the uncooperative party does not obtain a more favorable result by failing to cooperate than if it had fully cooperated.[5] As AFA, we assigned the

[1] *See Difluoromethane (R–32) from the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value and Postponement of Final Determination,* 85 FR 52950 (August 27, 2020) (*Preliminary Determination*), and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum, ''Issues and Decision Memorandum for the Final Affirmative Determination in the Less-Than-Fair-Value Investigation of Difluoromethane (R–32) from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[3] *See* Memorandum, ''Cancelation of Verification and Briefing Schedule,'' dated October 21, 2020.

[4] The China-wide entity includes those companies who did not submit a separate rate application, and those companies Commerce determined were ineligible to receive a separate rate.

[5] *See, e.g., Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Purified Carboxymethyl Cellulose from Finland,* 69 FR 77216 (December 27, 2004), unchanged in *Notice of Final Determination of Sales at Less Than Fair Value: Purified*

China-wide entity a dumping margin of 221.06 percent, which is the highest calculated rate in this investigation. Because this constitutes primary information, the statutory corroboration requirement in section 776(c) of the Act does not apply.

Separate Rates

For the final determination, we continue to find that Taizhou Qingsong, Zibo Feiyuan, Icool International (Hong Kong) Limited, Ninhua Group Co., Ltd., Shandong Huaan New Material Co., Ltd., T.T. International Co., Ltd., and Zhejiang Sanmei Chemical Ind. Co. Ltd. are eligible for separate rates. Generally, Commerce looks to section 735(c)(5)(A) of the Act, which provides instructions for calculating the all-others rate in an investigation, for guidance when calculating the rate for separate rate respondents that we did not individually examine. Section 735(c)(5)(A) of the Act states that the estimated all-others rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding zero or *de minimis* margins, and any margins determined entirely under section 776 of Act.[6] In this proceeding, Commerce calculated above *de minimis* rates that are not based entirely on facts available for Taizhou Qingsong and Zibo Feiyuan, the two mandatory respondents under individual examination. Thus, looking to section 735(c)(5)(A) of the Act for guidance, and consistent with our practice,[7] based on publicly ranged sales data, we assigned the weighted-average of these mandatory respondents' rates as the rate for non-individually examined companies that have qualified for a separate rate.

Combination Rates

In the *Initiation Notice,*[8] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. For a list of the respondents that established eligibility for their own separate rates and the exporter/producer combination rates applicable to these respondents, *see* Appendix III.

Final Determination

The final estimated weighted-average dumping margins are as follows:

Producer	Exporter	Estimated weighted-average dumping margin (percent)
Taizhou Qingsong Refrigerant New Material Co., Ltd.	Taizhou Qingsong Refrigerant New Material Co., Ltd.	161.49
Zibo Feiyuan Chemical Co., Ltd.	Zibo Feiyuan Chemical Co., Ltd.	221.06
Zibo Feiyuan Chemical Co., Ltd.	T.T. International Co., Ltd.	221.06
Producers Supplying the Non-Individually—Examined Exporters Receiving Separate Rates (*see* Appendix III).	Non-Individually Examined Exporters Receiving Separate Rates (*see* Appendix III).	196.19
China-Wide Entity		221.06

Disclosure

Normally, Commerce discloses to interested parties the calculations performed in connection with a final determination, in accordance with 19 CFR 351.224(b). However, because Commerce made no changes to its *Preliminary Determination* margin calculations for the mandatory respondents in this investigation, there are no calculations to disclose.

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, Commerce will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all appropriate entries of R–32 from Taizhou Qingsong and Zibo Feiyuan, the separate rates companies, and the China-wide entity.

Pursuant to section 735(c)(1)(B)(ii) of the Act, upon the publication of this notice, Commerce will instruct CBP to require a cash deposit equal to the weighted-average amount by which NV exceeds U.S. price as follows: (1) The cash deposit rate for the exporter/producer combination listed in the table above or in Appendix III will be the rate identified for that combination in that table or Appendix III; (2) for all combinations of exporters/producers of merchandise under consideration that have not received their own separate rate, the cash deposit rate will be the cash deposit rate established for the China-wide entity; and (3) for all non-Chinese exporters of the merchandise under consideration which have not received their own separate rate, the cash deposit rate will be the cash deposit rate applicable to the Chinese exporter/producer combination that supplied that non-Chinese exporter. These suspension of liquidation instructions will remain in effect until further notice.

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the International Trade Commission (ITC) of our determination. Because the final determination in this proceeding is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will make its final determination as to whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of R–32 from China no later than 45 days after our final determination. If the ITC determines that material injury or threat of material injury does not exist, the proceeding will be terminated and all cash deposits will be refunded. If the ITC determines that such injury does exist, Commerce will issue an antidumping duty order directing CBP to assess, upon further instruction by Commerce, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, as discussed above in the ''Continuation of Suspension of Liquidation'' section.

Carboxymethyl Cellulose from Finland, 70 FR 28279 (May 17, 2005).

[8] *See Initiation Notice,* 84 FR at 7335.

Notification Regarding Administrative Protective Orders

In the event that the ITC issues a final negative injury determination, this notice will serve as the only reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

This determination is issued and published in accordance with sections 735(d) and 777(i)(1) of the Act, and 19 CFR 351.210(c).

Dated: January 11, 2021.

Joseph A. Laroski Jr.,

Deputy Assistant Secretary for Policy and Negotiations.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is difluoromethane (R–32), or its chemical equivalent, regardless of form, type or purity level. R–32 has the Chemical Abstracts Service (CAS) registry number of 75–10–5 and the chemical formula CH2 F2. R–32 is also referred to as difluoromethane, HFC–32, FC–32, Freon-32, methylene difluoride, methylene fluoride, carbon fluoride hydride, halocarbon R32, fluorocarbon R32, and UN 3252. Subject merchandise also includes R–32 and unpurified R–32 that are processed in a third country or the United States, including, but not limited to, purifying or any other processing that would not otherwise remove the merchandise from the scope of this investigation if performed in the country of manufacture of the in-scope R–32. R–32 that has been blended with products other than pentafluoroethane (R–125) is included within this scope if such blends contain 85% or more by volume on an actual percentage basis of R–32. In addition, R–32 that has been blended with any amount of R–125 is included within this scope if such blends contain more than 52% by volume on an actual percentage basis of R–32. Whether R–32 is blended with R–125 or other products, only the R–32 component of the mixture is covered by the scope of this investigation. The scope also includes R–32 that is commingled with R–32 from sources not subject to this investigation. Only the subject component of such commingled products is covered by the scope of this investigation.

Excluded from the current scope is merchandise covered by the scope of the antidumping order on hydrofluorocarbon blends from the People's Republic of China. *See Hydrofluorocarbon Blends from the People's Republic of China: Antidumping Duty Order,* 81 FR 55436 (August 19, 2016) (the *Blends Order*).

R–32 is classified under Harmonized Tariff Schedule of the United States (HTSUS) subheading 2903.39.2035. Other merchandise subject to the current scope, including the abovementioned blends that are outside the scope of the Blends Order, may be classified under 2903.39.2045 and 3824.78.0020. The HTSUS subheadings and CAS registry number are provided for convenience and customs purposes. The written description of the scope of the investigation is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

United States-Mexico-Canada Agreement (USMCA), Article 10.12: Binational Panel Review: Notice of Request for Panel Review

AGENCY: United States Section, USMCA Secretariat, International Trade Administration, Department of Commerce.

ACTION: Notice of USMCA request for panel review.

SUMMARY: A Request for Panel Review was filed on behalf of Resolute FP Canada Inc., the Conseil de l'Industrie forestière du Québec (''CIFQ''), and the Ontario Forest Industries Association (''OFIA'') (together, ''Central Canada'') with the United States Section of the USMCA Secretariat on December 22, 2020, pursuant to USMCA Article 10.12. Panel Review was requested of the U.S. International Trade Administration's Final Results of the Antidumping Duty Administrative Review (2017–2018) in Certain Softwood Lumber from Canada, which was published in the **Federal Register** on November 30, 2020. The USMCA Secretariat has assigned case number USA–CDA–2020–10.12–02 to this request.

FOR FURTHER INFORMATION CONTACT: Vidya Desai, Acting United States Secretary, USMCA Secretariat, Room 2061, 1401 Constitution Avenue NW, Washington, DC 20230, 202–482–5438.

SUPPLEMENTARY INFORMATION: Article 10.12 of Chapter 10 of USMCA provides a dispute settlement mechanism involving trade remedy determinations issued by the Government of the United States, the Government of Canada, and the Government of Mexico. Following a Request for Panel Review, a Binational Panel is composed to review the trade remedy determination being challenged and issue a binding Panel Decision. There are established USMCA *Rules of Procedure for Article 10.12 (Binational Panel Reviews),* which were adopted by the three governments for panels requested pursuant to Article 10.12(2) of USMCA which requires Requests for Panel Review to be published in accordance with Rule 40. For the complete Rules, please see *https://can-mex-usa-sec.org/secretariat/agreement-accord-acuerdo/usmca-aceum-tmec/rules-regles-reglas/article-article-articulo_10_12.aspx?lang=eng.*

The Rules provide that:

(a) A Party or interested person may challenge the final determination in whole or in part by filing a Complaint in accordance with Rule 44 no later than 30 days after the filing of the first Request for Panel Review (the deadline for filing a Complaint is January 21, 2021);

(b) A Party, an investigating authority or other interested person who does not file a Complaint but who intends to participate in the panel review shall file a Notice of Appearance in accordance with Rule 45 no later than 45 days after the filing of the first Request for Panel Review (the deadline for filing a Notice of Appearance is February 5, 2021);

(c) The panel review will be limited to the allegations of error of fact or law, including challenges to the jurisdiction of the investigating authority, that are set out in the Complaints filed in the panel review and to the procedural and substantive defenses raised in the panel review.

Dated: December 29, 2020.

Vidya Desai,

Acting U.S. Secretary, USMCA Secretariat.

[FR Doc. 2020–29126 Filed 1–15–21; 8:45 am]

BILLING CODE 3510–GT–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Generic Request for Customer Service-Related Data Collections

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before March 22, 2021.

ADDRESSES: Interested persons are invited to submit written comments by mail to Maureen O'Reilly, Management Analyst, NIST at *PRAcomments@doc.gov.* Please reference OMB Control Number 0693–0031 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Maureen O'Reilly, Management Analyst, NIST, via email *maureen.oreilly@nist.gov* or at 301–975–3189.

SUPPLEMENTARY INFORMATION:

I. Abstract

In accordance with Executive Order 12862, the National Institute of Standards and Technology (NIST), a non-regulatory agency of the Department of Commerce, proposes to conduct a number of individual information collections that are both quantitative and qualitative. The information collections will be designed to determine the type and quality of the products, services, and information our key customers want and expect, as well as their satisfaction with and awareness of existing products, services, and information. In addition, NIST proposes other customer service satisfaction data collections that include, but may not be limited to focus groups, reply cards that accompany product distributions, and Web-based surveys and dialog boxes that offer customers the opportunity to express their level of satisfaction with NIST products, services, and information and for ongoing dialogue with NIST. NIST will limit its inquiries to data collections that solicit voluntary options and will not collect information that is required or regulated. No assurances of confidentiality will be given. However, it will be completely optional for survey participants to provide their name or affiliation information if they wish to provide comments for which they elect to receive a response.

II. Method of Collection

NIST will collect this information by electronic means, as well as by mail, fax, telephone, and person-to-person interactions.

III. Data

OMB Control Number: 0693–0031.

Form Number(s): None.

Type of Review: Regular Submission, extension of a current information collection.

Affected Public: Business or other for-profit organizations, individuals, not-for-profit institution.

Estimated Number of Respondents: 120,000.

Estimated Time per Response: Less than 2 minutes for a response card, 2 hours for focus group participation. The average estimated response time for the completion of a collection instrument is expected to be less than 30 minutes per response(s).

Estimated Total Annual Burden Hours: 15,000.

Estimated Total Annual Cost to Public: None.

Respondent's Obligation: Voluntary.

Legal Authority:

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Small and Medium-Sized Business Complex Event COVID–19 Survey (Wave 3)

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before March 22, 2021.

ADDRESSES: Interested persons are invited to submit written comments by mail to Jennifer Helgeson, Research Economist, *Jennifer.helgeson@nist.gov* or *PRAcomments@doc.gov.* Please reference ''Small and Medium-Sized Business Complex Event COVID–19 Survey (Wave 3)'' in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Jennifer Helgeson, Research Economist, *Jennifer.helgeson@nist.gov,* or (240) 672–2575.

SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this research is to build a dataset that allows longitudinal documentation of (1) the novel resilience-based mitigation actions employed during the COVID–19 pandemic by small- and medium-sized enterprises (SMEs) by sector, (2) challenges in implementing resilience-based mitigation actions, (3) utilization of past strategies and approaches to provide assistance to the current situation, and (4) planned resilience actions and strategies. This is a cross-Department of Commerce (DOC) effort; the offices sponsoring the proposed data collection are the (1) Applied Economics Office (AEO), in NIST's Engineering Laboratory (EL) and (2) the Climate Program Office (CPO), National Oceanic and Atmospheric Association (NOAA). There has been considerable coordination on this effort with Federal agencies and other institutions that directly provide guidance to SMEs. NIST researchers have been actively engaged for over five years in understanding community resilience to natural hazard events and have developed expertise in that area of inquiry, especially as it relates to SME resilience.

A first wave of data collection took place July–August 2020 using the Wave 1 ''Compound Risks—SME Recovery from a Pandemic in the Face of Natural Hazard Risks'' electronic survey

instrument. A second wave of data collection using the Wave 2 ''Compound Risks—SME Recovery from a Pandemic in the Face of Natural Hazard Risks'' electronic survey instrument took place in December 2020–January 2021.

The Wave 3 semi-structured survey is planned for Spring 2021. This Small- and Medium-Sized Business Complex Event COVID–19 Survey (Wave 3) is critical to the overall data collection effort. As we strive to understand recovery trajectories of SMEs, understanding the mid-term recovery during a Wave 3 provides a detailed picture of how businesses cope with and adapt to disaster circumstances and which decisions may provide the greatest level of resilience across time periods. This collection is expected to provide insight as to how SME owners and managers make decisions in the face of disaster, especially when there is deep uncertainty surrounding their timing and impact, as well as limited resources available to the owner/manager.

There is minimal primary data on business interruption following a large-scale natural hazard event, especially in the period of mid-term recovery. Furthermore, to the best of our knowledge, there is no primary data on planning for natural hazard resilience during a pandemic, which is highly relevant at a time when much of the US faces potential natural disasters as SMEs recover from COVID–19. Furthermore, the opportunity to obtain this type of longitudinal data related to SMEs' complex event experiences is truly unique. There is critical value to this data, as we seek to better understand how SME managers and owners make decisions when facing complex events—both considering them as potential future events and addressing them when they occur.

II. Method of Collection

This collection will take place entirely remotely, using online technology. During the COVID–19 transmission period this is a safe way to collect data. This mode of collection is also cost-effective and allows the researchers to reach a larger audience and a greater geographic spread.

A subset of respondents will take the structured survey element of the semi-structured surveys, which will be conducted via an online survey platform.

Furthermore, renumeration will be offered to respondents. Renumeration is justified due to (1) complex study design and (2) burden on the respondent. (1) The complex study design of this collection requires ongoing participation of various respondents, each of whom is important to the achievement of study goals. Should attrition occur at a higher rate than expected the study goals will not be met. (2) There is burden on the respondent to take time out of their workday managing/operating an SME. There will be equity in the use of renumeration; all respondents will be treated equally with regard to incentives:

III. Data

OMB Control Number: 0693–XXXX.

Form Number(s): None.

Type of Review: New information collection.

Affected Public: Businesses—individual representatives of small and medium-sized enterprises (SMEs).

Estimated Number of Respondents: 1,800; 300 take the full semi-structured survey and 1,500 take the structured survey part of the full semi-structured survey.

Estimated Time per Response: 15 minutes per structured survey (n=1,800); additional 45 minutes for the semi-structured survey add-on (n=300).

Estimated Total Annual Burden Hours: 15 min. × 1,800 = 27,000; 45 min. × 300 = 13,500; Total = 40,500 min. = 675 hours.

Estimated Total Annual Cost to Public: $15 × 300 respondents = $4,500; $5 × 1,500 = $7,500 = Total upper bound expected cost is estimated at $12,000.

Respondent's Obligation: Voluntary.

Legal Authority: None.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA813]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Research Steering Committee (RSC) of the Mid-Atlantic Fishery Management Council (Council) will hold a meeting.

DATES: The meeting will be held on Thursday, March 18, 2021, beginning at 9 a.m. and conclude by 12 noon. For agenda details, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The meeting will be held via webinar. Details on the proposed agenda, webinar listen-in access, and briefing materials will be posted at the MAFMC's website: *www.mafmc.org.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The purpose of this RSC meeting is to discuss re-development of the research set-aside program. In doing so, the RSC will also discuss the outcomes of the April 2020 meeting, the Scientific and Statistical Committee Economic Working Group involvement, and detail workshop logistics.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for

sign language interpretation or other auxiliary aids should be directed to Kathy Collins at the Mid-Atlantic Council Office, (302) 526–5253, at least 5 days prior to the meeting date.

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: January 13, 2021.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Economic Impacts of Hawaii Reef Diving and Snorkeling

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before March 22, 2021.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *Adrienne.thomas@noaa.gov.* Please reference OMB Control Number 0648–0765 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Sabrina Lovell, Office of Science & Technology, NOAA Fisheries, 1315 East-West Highway, #12361, Silver Spring, Maryland 20910; 301–427–8153; *sabrina.lovell@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection. The objective of the survey will be to understand divers' and snorkelers' expenditures associated with recreational coral reef diving activities in Hawaii, American Samoa, CNMI, Guam, California, Florida and the Caribbean. The survey was previously implemented in Hawaii in 2019 and this revision proposes to make the survey national in scope. The survey will also collect information on divers' attitudes, preferences, and concerns about recreational diving and coral reefs health. This survey will help to improve our understanding of divers' and snorkelers' expenditure patterns and to estimate the economic impact of coral reef related spending. Results of the survey will be used to inform coastal resource management planning and establish a baseline for outreach and education. The expenditure survey is also expected to provide useful information for local economic and business interests.

II. Method of Collection

The survey will be conducted using two modes: Mail and internet.

III. Data

OMB Control Number: 0648–0765.

Form Number(s): None.

Type of Review: Regular submission. Revision of a current information collection.

Affected Public: Individuals or households.

Estimated Number of Respondents: 3,500.

Estimated Time per Response: 25 minutes.

Estimated Total Annual Burden Hours: 1,458 hours.

Estimated Total Annual Cost to Public: $0 in recordkeeping/reporting costs.

Respondent's Obligation: Voluntary.

Legal Authority: U.S. Code: 16 U.S.C. 6401 *et seq.* Name of Law: Coral Reef Conservation Act of 2000.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Alaska Crab Arbitration

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on September 14, 2020 (*85 FR 56583*) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Alaska Crab Arbitration.

OMB Control Number: 0648–0516.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 2.

Average Hours per Response: Annual Arbitration Organization Report, 6 hours; Cost Allocation Agreement, 16 hours.

Total Annual Burden Hours: 28.

Needs and Uses: The National Marine Fisheries Service (NMFS), Alaska Regional Office, is requesting renewal of a currently approved information collection. This information collection contains the reports for the Crab Rationalization Program Arbitration System.

The Crab Rationalization Program allocates Bering Sea and Aleutian Islands (BSAI) crab resources among harvesters, processors, and coastal communities through a limited access system that balances the interests of these groups who depend on these fisheries. Under the CR Program, eligible License Limitation Program license holders were issued crab quota shares (QS), which are long term shares, based on their qualifying harvest histories. The QS yield annual individual fishing quota (IFQ), which represent a privilege to receive a certain amount of crab harvested with IFQ. Processor quota shares (PQS) are long term shares issued to processors. The PQS yield annual individual processor quota (IPQ), which represent a privilege to receive a certain amount of crab harvested with Class A IFQ.

The Crab Rationalization Program Arbitration System is a series of steps that harvesters and processors can use to negotiate delivery and price contracts. The Arbitration System allows unaffiliated Class A IFQ holders to initiate an arbitration proceeding in the event of a dispute to allow an independent third party to provide a review of harvester and processor negotiation positions and provide an independent and binding resolution to issues under dispute. To use the Arbitration System, a harvester must commit deliveries to a processor and initiate a binding arbitration proceeding in advance of the season opening. The Arbitration System is designed to minimize antitrust risks for crab harvesters and processors and is intended to ensure that a reasonable price is paid for all landings.

The Arbitration System requires several information collections that are submitted annually in accordance with the regulations at 50 CFR 680.20. The Annual Arbitration Organization Report, the Market Report, and the Non-binding Price Formula Report are the primary reports submitted to NMFS each year. Also submitted are the Contract Arbitrator Report and the Cost Allocation Agreement.

An Annual Arbitration Organization Report is compiled by each of the two arbitration organizations; one represents the processors, and the second represents the harvesters. This report includes information on the arbitration organization and its management personnel, the crab QS fisheries to which the report applies, the ownership interest and the QS/IFQ or PQS/IPQ held by each member; and the arbitration process.

The Cost Allocation Agreement provides combined shared arbitration accounting costs. Federal regulations for the CR Program require that the crab arbitration costs are shared equally between IPQ holders and Class A IFQ holders—processors pay half and fishermen pay half.

The arbitration organizations use contracted parties to meet the requirements of the Market Report, Non-binding Price Formula Report, and Contractor Arbitrator Report.

The Non-binding Price Formula Report is a pre-season report that is designed to serve as a starting point for negotiations between fishermen and processors, or as a starting point for an arbitrator in evaluating offers in an arbitration process. This report documents how each formula was developed.

The Market Report provides an analysis of the market for products of a specific crab fishery and reports on activities occurring within three months prior to its generation. The purpose of this report is to provide background information on each crab fishery, the products generated by each fishery, and position of those products in the marketplace; discuss the historical division of wholesale revenue; and provide the methods for predicting wholesale prices before the fishery occurs.

The Contract Arbitrator Report documents arbitration proceedings if they occur within a fishery.

Affected Public: Individuals or households; Business or other for-profit organizations.

Frequency: Annually; On occasion.

Respondent's Obligation: Mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*).

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0516.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA784]

Pacific Fishery Management Council; Public Meetings and Hearings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of opportunities to submit public comments.

SUMMARY: The Pacific Fishery Management Council (Pacific Council) has begun its annual preseason management process for the 2021 ocean salmon fisheries off the U.S. West Coast. This notice informs the public of opportunities to provide comments on the development of 2021 ocean salmon management measures.

DATES: Written comments on the salmon management alternatives adopted by the Pacific Council at its March 2021 meeting, as described in its Preseason Report II, received electronically or in hard copy by 5 p.m. Pacific Time, April 5, 2021, will be considered in the Pacific Council's final recommendation for the 2021 management measures.

ADDRESSES: Documents will be available from the Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384, and will be posted on the Pacific Council website at *http://www.pcouncil.org.* You may submit comments by any one of the following methods:

- Written comments should be sent electronically to Mr. Marc Gorelnik, Chair, Pacific Fishery Management Council, via the Pacific Council's e-Portal by visiting *https://pfmc.psmfc.org.*
- Comments can also be submitted to NMFS via the Federal e-Rulemaking Portal. Go to *http://*

www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2021-0001, click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments. All comments received via the Federal e-Rulemaking Portal are a part of the public record and will generally be posted for public viewing on *http://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS and the Pacific Council will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Ms. Robin Ehlke, Pacific Council, telephone: 503–820–2280. For information on submitting comments via the Federal e-Rulemaking Portal, contact Peggy Mundy, NMFS West Coast Region, telephone: 206–526–4323; email: *peggy.mundy@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Pacific Council has announced the schedule of reports, public meetings, and hearings for the 2021 ocean salmon fisheries on its website (*http://www.pcouncil.org*) and in the **Federal Register** (85 FR 83896, December 23, 2020). The Pacific Council will adopt alternatives for 2021 ocean salmon fisheries at its March 2–11, 2021, meeting which will be conducted via webinar. Details of this meeting are available on the Pacific Council's website (*http://www.pcouncil.org*). On March 22, 2021, ''Preseason Report II—Proposed Alternatives and Environmental Assessment Part 2 for 2021 Ocean Salmon Fishery Regulations'' is scheduled to be posted on the Pacific Council website at *http://www.pcouncil.org.* The report will include a description of the salmon management alternatives and a summary of their biological and economic impacts. Public hearings will be held to receive comments on the proposed ocean salmon fishery management alternatives adopted by the Pacific Council. Written comments received at the public hearings and a summary of oral comments at the hearings will be provided to the Pacific Council at its April meeting.

All public hearings begin at 7 p.m. Public hearings focusing on Washington and California salmon fisheries will occur simultaneously on March 23, 2021, and the public hearing for Oregon salmon fisheries will occur on March 24, 2021. A summary of oral comments heard at the hearings will be provided to the Pacific Council at its April meeting. Specific meeting information, including instructions on how to join the meeting and system requirements will be provided in meeting announcements on the Pacific Council's website (see *www.pcouncil.org*).

Comments on the alternatives the Pacific Council adopts at its March 2021 meeting, and described in its Preseason Report II, may be submitted in writing or electronically as described under **ADDRESSES**, or verbally or in writing at any of the public hearings held on March 23–24, 2021, or at the Pacific Council's meeting, April 6–15, 2021, which will be conducted via webinar. Details of these meetings will be available on the Pacific Council's website (*http://www.pcouncil.org*) and will be published in the **Federal Register**. Written and electronically submitted comments must be received no later than 5 p.m. Pacific Time, April 5, 2021, in order to be included in the briefing book for the Pacific Council's April meeting, where they will be considered in the adoption of the Pacific Council's final recommendation for the 2021 salmon fishery management measures. All comments received accordingly will be reviewed and considered by the Pacific Council and NMFS.

[RTID 0648–XA820]

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of web conference.

SUMMARY: The North Pacific Fishery Management Council's (Council) Social Science Planning Team (SSPT) will meet March 4, 2021.

DATES: The meeting will be held on Thursday, March 4, 2021, from 8 a.m. to 4 p.m., Alaska Time.

ADDRESSES: The meeting will be a web conference. Join online through the link at *https://meetings.npfmc.org/Meeting/Details/1886.*

Council address: North Pacific Fishery Management Council, 1007 W 3rd Ave., Anchorage, AK 99501–2252; telephone: (907) 271–2809. Instructions for attending the meeting via video conference are given under **SUPPLEMENTARY INFORMATION**.

FOR FURTHER INFORMATION CONTACT: Sarah Marrinan, Council staff; phone: (907) 271–2809; email: *sarah.marrinan@noaa.gov.* For technical support please contact our admin Council staff, email: *npfmc.admin@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Agenda

Thursday, March 4, 2021

The SSPT agenda will meet to discuss the Economic Data Reporting (EDR) stakeholder meetings, propose alternatives for the Council to consider, and other business. The agenda is subject to change, and the latest version will be posted at *https://meetings.npfmc.org/Meeting/Details/1886* prior to the meeting, along with meeting materials.

Connection Information

You can attend the meeting online using a computer, tablet, or smart phone; or by phone only. Connection information will be posted online at: *https://meetings.npfmc.org/Meeting/Details/1886.*

Public Comment

Public comment letters will be accepted and should be submitted electronically to *https://meetings.npfmc.org/Meeting/Details/1886.*

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: January 13, 2021.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

U.S. Integrated Ocean Observing System (IOOS®) Advisory Committee

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: Notice is hereby given of a virtual meeting of the U.S. Integrated

Ocean Observing System (IOOS®) Advisory Committee (Committee).

DATES: The meeting will be held on Friday, February 5th, 2021 from 12:30 p.m. to 2 p.m. EST. These times and the agenda topics described below are subject to change. Refer to the web page listed below for the most up-to-date agenda and dial-in information.

ADDRESSES: The meeting will be held virtually. Refer to the U.S. IOOS Advisory Committee website at *http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/* for the most up-to-date information.

FOR FURTHER INFORMATION CONTACT: Krisa Arzayus, Designated Federal Official, U.S. IOOS Advisory Committee, U.S. IOOS Program, 1315 East-West Highway, Silver Spring, MD 20910; Phone 240–533–9455; Fax 301–713–3281; Email *krisa.arzayus@noaa.gov* or visit the U.S. IOOS Advisory Committee website at *http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/*. To register for the meeting, contact Laura Gewain, *laura.gewain@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Committee was established by the NOAA Administrator as directed by Section 12304 of the Integrated Coastal and Ocean Observation System Act, part of the Omnibus Public Land Management Act of 2009 (Pub. L. 111–11), and reauthorized under the Coordinated Ocean Observations and Research Act of 2020 (Pub. L. 116–271). The Committee advises the NOAA Administrator and the Interagency Ocean Observation Committee (IOOC) on matters related to the responsibilities and authorities set forth in section 12302 of the Integrated Coastal and Ocean Observation System Act of 2009 and other appropriate matters as the Under Secretary refers to the Committee for review and advice.

The Committee will provide advice on:

(A) Administration, operation, management, and maintenance of the System;

(B) expansion and periodic modernization and upgrade of technology components of the System;

(C) identification of end-user communities, their needs for information provided by the System, and the System's effectiveness in disseminating information to end-user communities and to the general public; and

(D) additional priorities, including—

(i) a national surface current mapping network designed to improve fine scale sea surface mapping using high frequency radar technology and other emerging technologies to address national priorities, including Coast Guard search and rescue operation planning and harmful algal bloom forecasting and detection that—

(I) is comprised of existing high frequency radar and other sea surface current mapping infrastructure operated by national programs and regional coastal observing systems;

(II) incorporates new high frequency radar assets or other fine scale sea surface mapping technology assets, and other assets needed to fill gaps in coverage on United States coastlines; and

(III) follows a deployment plan that prioritizes closing gaps in high frequency radar infrastructure in the United States, starting with areas demonstrating significant sea surface current data needs, especially in areas where additional data will improve Coast Guard search and rescue models;

(ii) fleet acquisition for unmanned maritime systems for deployment and data integration to fulfill the purposes of this subtitle;

(iii) an integrative survey program for application of unmanned maritime systems to the real-time or near real-time collection and transmission of sea floor, water column, and sea surface data on biology, chemistry, geology, physics, and hydrography;

(iv) remote sensing and data assimilation to develop new analytical methodologies to assimilate data from the System into hydrodynamic models;

(v) integrated, multi-State monitoring to assess sources, movement, and fate of sediments in coastal regions;

(vi) a multi-region marine sound monitoring system to be—

(I) planned in consultation with the Interagency Ocean Observation Committee, the National Oceanic and Atmospheric Administration, the Department of the Navy, and academic research institutions; and

(II) developed, installed, and operated in coordination with the National Oceanic and Atmospheric Administration, the Department of the Navy, and academic research institutions; and

(E) any other purpose identified by the Administrator or the Council.

The meeting will be open to public participation with a 10-minute public comment period on February 5th, 2021 from 1:50 p.m. to 2 p.m. EST (check agenda on website to confirm time). The Committee expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three (3) minutes. Written comments should be received by the Designated Federal Official by February 1, 2021, to provide sufficient time for Committee review. Written comments received after February 1, 2021, will be distributed to the Committee, but may not be reviewed prior to the meeting date. To submit written comments, please email your comments, your name as it appears on your driver's license, and the organization/company affiliation you represent to Krisa Arzayus, *Krisa.Arzayus@noaa.gov* and Laura Gewain, *Laura.Gewain@noaa.gov.*

Matters to be Considered: The meeting will focus on updates from committee working groups on ongoing committee priorities, including the role of ocean observations in forecasting, strategy and vision for the System, partnerships for a successful System, and requirements for the System, in order to develop the next set of recommendations to NOAA and the IOOC. The committee will also finalize language and messaging for a memo to be sent to the incoming Presidential Administration. The latest version of the agenda will be posted at *http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/.*

Special Accomodations: These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Krisa Arzayus, Designated Federal Official at *Krisa.Arzayus@noaa.gov* and *Laura.Gewain@noaa.gov* or 240–533–9455 by February 1, 2021.

Krisa M. Arzayus,

Deputy Director, U.S. Integrated Ocean Observing System Office, National Ocean Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA817]

Mid-Atlantic Fishery Management Council (MAFMC); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Mid-Atlantic Fishery Management Council's (Council) Scientific and Statistical Committee (SSC) will hold a meeting.

DATES: The meeting will be held on Tuesday, March 9, 2021, from 9:30 a.m. through 5:30 p.m. and Wednesday, March 10, 2021, from 8:30 a.m. through 12:30 p.m. See **SUPPLEMENTARY INFORMATION** for agenda details.

ADDRESSES: The meeting will take place over webinar with a telephone-only connection option. Details on how to connect to the webinar by computer and by telephone will be available at: *http://www.mafmc.org/ssc.*

Council address: Mid-Atlantic Fishery Management Council, 800 N State Street, Suite 201, Dover, DE 19901; telephone: (302) 674–2331; website: *www.mafmc.org.*

FOR FURTHER INFORMATION CONTACT: Christopher M. Moore, Ph.D., Executive Director, Mid-Atlantic Fishery Management Council, telephone: (302) 526–5255.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is to make multi-year acceptable biological catch (ABC) recommendations for Blueline tilefish for the 2022–24 fishing years. The SSC will review the results of the 2020 bottom longline survey for Golden tilefish and provide feedback on the future direction of the survey and upcoming management track assessment. The SSC Economic Work Group will update the full SSC on the Research Set-Aside economic case study the Council selected for development in 2021. The SSC will also review and provide feedback on the most recent Mid-Atlantic State of the Ecosystem report and other Ecosystem Approach to Fisheries Management (EAFM) related activities. The Northeast Fisheries Science Center will give a presentation on the results and findings from the recently completed research track assessment on Index Based Methods and Harvest Control Rules. The SSC will also receive an update on ongoing Council actions, including the Recreational Reform Initiative and discuss potential opportunities for SSC engagement. In addition, the SSC may take up any other business as necessary.

A detailed agenda and background documents will be made available on the Council's website (*www.mafmc.org*) prior to the meeting.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aid should be directed to Kathy Collins, (302) 526–5253, at least 5 days prior to the meeting date.

National Oceanic and Atmospheric Administration

[RTID 0648–XA818]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Groundfish Advisory Subpanel (GAP) will hold an online meeting, which is open to the public.

DATES: The meeting will be held Tuesday, February 16, 2021, from 9 a.m. to 12 p.m., Pacific Standard Time, or until business for each day is completed.

ADDRESSES: The meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Brett Wiedoff, Staff Officer, Pacific Council; *Brett.L.Wiedoff@noaa.gov;* telephone: (503) 820–2424.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is for the GAP to discuss potential fishery management changes regarding non-trawl rockfish conservation area management and future implementation of fishing gear used under the Emley/Platt exempted fishing permit. This discussion is in support of a tentatively scheduled agenda item for the April 2021 Pacific Council meeting. The GAP may also discuss other items on the Pacific Council's March or April agenda, particularly ecosystem or administrative matters.

Although nonemergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 business days prior to the meeting date.

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: January 13, 2021.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Patent Petitions Related to Application and Reexamination Processing Fees

The United States Patent and Trademark Office (USPTO) will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The USPTO invites comment on this information collection renewal, which helps the USPTO assess the impact of its information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on October 1, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: United States Patent and Trademark Office, Department of Commerce.

Title: Patent Petitions Related to Application and Reexamination Processing Fees.

OMB Control Number: 0651–0059.

Form Number(s): (AIA = American Invents; SB = Specimen Book).

- PTO/AIA/17P (Petition Fee Under 37 CFR 1.17(f), (g), and (h) Transmittal).
- PTO/AIA/24A (Petition for Express Abandonment to Avoid Publication Under 37 CFR 1.138(c)).
- PTO/SB/17P (Petition Fee Under 37 CFR 1.17(f), (g), and (h) Transmittal).
- PTO/SB/23 (Petition for Extension of Time Under 37 CFR 1.136(b)).
- PTO/SB24A, (Petition for Express Abandonment to Avoid Publication Under 37 CFR 1.138(c)).
- PTO/SB/28 (Petition to Make Special Under Accelerated Examination Program).
- PTO/SB/140 (Petition to Withdraw an Application from Issue 1.313).

Type of Request: Extension and revision of a currently approved information collection.

Number of Respondents: 40,922 respondents per year.

Average Hour per Response: The USPTO estimates that it will take the public between 5 minutes (0.08 hours) to 12 hours to complete a response, depending on the complexity of the particular item. This includes the time to gather the necessary information, prepare the appropriate documents, and submit the completed response to the USPTO.

Estimated Total Annual Respondent Burden Hours: 72,958 hours.

Estimated Total Annual Non-Hour Cost Burden: $3,195,134.

Needs and Uses: The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. 131 *et seq.* to examine an application for patent and, when appropriate, issue a patent. The USPTO also is required to publish patent applications, with certain exceptions, promptly after the expiration of a period of 18 months from the earliest filing date for which a benefit is sought under Title 35, U.S.C.

Many actions taken by the USPTO during its examination of an application for patent or for reissue of a patent, or during its reexamination of a patent, are subject to review by an appeal to the Patent Trial and Appeal Board. For other USPTO actions, review is in the form of administrative review obtained via submission of a petition to the USPTO. USPTO petitions practice also provides an opportunity for a patent applicant or owner to supply additional information that may be required in order for the USPTO to further process an application or patent.

This information collection covers petitions filed in patent applications and reexamination proceedings that, when submitted to the USPTO, must be accompanied by the fee set forth in 37 CFR 1.17(f), (g), or (h). This information collection also covers the transmittals for the petition fees.

Affected Public: Private sector; individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view Department of Commerce, USPTO information collections currently under review by OMB.

Written comments and recommendations for this information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the information collection or the OMB Control Number 0651–0059.

Further information can be obtained by:

- *Email: InformationCollection@uspto.gov.* Include ''0651–0059 information request'' in the subject line of the message.
- *Mail:* Kimberly Hardy, Office of the Chief Administrative Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

Kimberly Hardy,

Information Collections Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

BILLING CODE 3510–16–P

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities: Notice of Intent To Extend Collection 3038–0074: Core Principles and Other Requirements for Swap Execution Facilities

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: The Commodity Futures Trading Commission (CFTC) is announcing an opportunity for public comment on the proposed renewal of a collection of certain information by the agency. Under the Paperwork Reduction Act (''PRA''), Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including proposed extension of an existing collection of information, and to allow 60 days for public comment. This notice solicits comments, as described below, on the proposed Information Collection Requests (''ICR'') titled: OMB Control Number 3038–0074 and Part 37, Relating to Core Principles and Other Requirements for Swap Execution Facilities.

DATES: Comments must be submitted on or before March 22, 2021.

ADDRESSES: You may submit comments, and ''OMB Control No. 3038–0074'' by any of the following methods:

- The Agency's website, at *http://comments.cftc.gov/.* Follow the instructions for submitting comments through the website.
- *Mail:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.
- *Hand Delivery/Courier:* Same as Mail above.

Please submit your comments using only one method and identify that it is for the renewal of Collection Number 3038–0074. All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to *https://www.cftc.gov.*

FOR FURTHER INFORMATION CONTACT: Roger Smith, Associate Chief Counsel, Division of Market Oversight, Commodity Futures Trading Commission, (202) 418–5344; email: *rsmith@cftc.gov;* or Richard Mo, Assistant Chief Counsel, Division of Market Oversight, Commodity Futures Trading Commission, (202) 418–7637; email: *rmo@cftc.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA, 44 U.S.C. 3501 *et seq.,* Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of Information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the CFTC is publishing notice of the proposed amendment to

the collection listed below. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Title: Core Principles and Other Requirements for Swap Execution Facilities (OMB Control No. 3038–0074). This is a request for extension of a currently approved information collection.

Abstract: Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act'') added new section 5h to the Commodity Exchange Act (''CEA'') to impose requirements concerning the registration and operation of swap execution facilities (''SEFs''), which the Commission has incorporated in part 37 of its regulations. These information collections are needed for the Commission to ensure that SEFs comply with these requirements. Among other requirements, part 37 of the Commission's regulations imposes SEF registration requirements for a trading platform or system, obligates SEFs to provide transaction confirmations to swap counterparties, and requires SEFs to comply with 15 core principles. Collection 3038–0074 was created in response to the part 37 regulatory requirements for SEFs.

In April 2018, the Commission published a 30-Day Notice of Intent to Renew Collection 3038–0074 (30-Day Renewal Notice) and stated that 25 SEFs were registered with the Commission.[1] However, since publication of the 30-Day Renewal Notice, the Commission has granted permanent registration to several additional SEFs, while others SEFs have had their registrations vacated or have been deemed dormant under part 40 of the Commission regulations, for a total of 21 registered SEFs.[2] Therefore, the Commission is revising the below burden statement for OMB Control No. 3038–0074 to account for the decrease in the number of registered SEFs.

With respect to the collection of information, the CFTC invites comments on:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- The accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; *e.g.,* permitting electronic submission of responses.

You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission's regulations.[3]

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from *http://www.cftc.gov* that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the ICR will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

Burden Statement: The Commission is revising its estimate of the burden for this collection to account for the change in the number of SEFs currently registered with the Commission. The respondent burden for this collection is estimated to be as follows:

Estimated Number of Respondents: 21.

Estimated Average Burden Hours per Respondent: 21,000.

Estimated Total Annual Burden Hours: 21,000.[4]

Frequency of Collection: As applicable.

There are no capital costs or operating and maintenance costs associated with this collection.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: January 13, 2021.

Robert Sidman,

Deputy Secretary of the Commission.

[FR Doc. 2021–01081 Filed 1–15–21; 8:45 am]

BILLING CODE 6351–01–P

[1] 83 FR 15557 (Apr. 21, 2018).

[2] This includes 20 SEFs that are currently registered with the Commission and one dormant SEF that is in the process of filing for reinstatement in accordance with Commission regulation 37.3(d) and is currently operating under staff no-action relief. *See* CFTC Letter No. 20–29, available at *https://www.cftc.gov/csl/20-29/download.*

[3] 17 CFR 145.9.

[4] The Commission notes that collection 3038–0074 includes an additional 1,200 burden hours for SEF registration applicants that have not been affected by this amendment. Therefore, the total burden for this collection is 22,200 hours.

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2020–0021]

Agency Information Collection Activities; Submission for OMB Review; Comment Request—Child Strength Study

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act of 1995, the Consumer Product Safety Commission (CPSC or Commission) announces that CPSC has submitted to the Office of Management and Budget (OMB) a new proposed collection of information for a study that will assess the strength capabilities of children. On August 31, 2020, CPSC published a notice in the **Federal Register** announcing the agency's intent to seek approval of this collection of information. After reviewing and considering the comments CPSC received, by publication of this notice, the Commission announces that CPSC has submitted to OMB a request for approval of this collection of information.

DATES: Submit written comments on this request for approval of information collection requirements by February 18, 2021.

ADDRESSES: Send written comments and recommendations for the proposed information collection within 30 days of publication of this notice to: *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting, ''Currently under 30-day Review—Open for Public Comments,'' or by using the search function. In addition, written comments that are sent to OMB also should be submitted electronically at: *http://www.regulations.gov,* under Docket No. CPSC–2020–0021.

FOR FURTHER INFORMATION CONTACT: Cynthia Gillham, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; (301) 504–7791, or by email to: *CGillham@cpsc.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

Under the Paperwork Reduction Act of 1995 (PRA; 44 U.S.C. 3501–3520),

federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency data-collection studies. The PRA establishes procedures agencies must follow to obtain OMB approval for a collection of information, including notice and a review of comments, among others. Agencies must provide notice of the proposed collection of information in the **Federal Register**, and provide a 60-day comment period, before submitting the collection to OMB for approval. 44 U.S.C. 3506(c)(2)(A). Agencies then must evaluate any public comments and publish another notice in the **Federal Register**. *Id.* 3507(a)(1).

In accordance with these procedures, on August 31, 2020, CPSC published a notice in the **Federal Register** announcing the agency's intent to seek approval of a new collection of information on a CPSC Child Strength Study that will assess the strength capabilities of children. 85 FR 53800 (Aug. 31, 2020). Section C. Comments, below, summarizes and addresses the comments CPSC received.

B. Study

Section 5(a) of the Consumer Product Safety Act (CPSA; 15 U.S.C. 2051–2089) authorizes the Commission to conduct studies and investigations relating to the causes and prevention of deaths, accidents, injuries, illnesses, other health impairments, and economic losses associated with consumer products. 15 U.S.C. 2054(a). Section 5(b) of the CPSA further provides that the Commission may conduct research, studies, and investigations on the safety of consumer products or test consumer products and develop product safety test methods and testing devices. *Id.* 2054(b).

CPSC uses data on human strength capabilities to develop product safety standards and inform other CPSC staff activities. CPSC's product safety work includes developing mandatory standards, enforcing existing safety requirements, and working with voluntary standards organizations to improve the safety of consumer products, including children's products. Products that are intended for children, and products that are not intended for children, can pose a hazard to a child (*e.g.,* if the product or a component of it breaks, collapses, or liberates a small part). Information about children's strength capabilities is essential to improving product safety, because it can inform the development of performance requirements that consider children's interactions with product components. Manufacturers can also use this information when designing products.

In the 1970s, CPSC sponsored studies to conduct research on human size and strength; specifically, Snyder et al. (1975 [1] and 1977 [2]), studied child anthropometry and Owings *et al.* (1975 [3] and 1977 [4]), studied child strength. The research results were instrumental for many years in developing product safety standards; however, because the strength studies occurred more than 40 years ago, the information needs to be updated. Moreover, more recent studies lack information on younger children and additional strength measures, and only collected data from a very small number of children. CPSC expects that the proposed information-collection activity would provide CPSC staff with information that reflects more accurately the strength capabilities of children today, as well as data that are not available in literature currently, including data on younger children and additional strength measures.

The proposed study would collect data from a sample of up to approximately 800 children between the ages of 3 months and 5 years to assess children's strength capabilities. The proposed study would collect data on bite strength for children ages 3 months through 5 years, and strength data for children ages 6 months through 5 years. The information collected from the proposed study would provide CPSC staff with updated child strength measures, including upper and lower extremities and bite strength for expanded age ranges. With this information, CPSC would have more accurate and current data for developing voluntary and mandatory safety standards. This information will also help staff to analyze injuries and deaths of children interacting with consumer products and determine whether a product presents a safety hazard.

CPSC has contracted with the University of Michigan to conduct the proposed study and collect the data. A team of researchers at the University of Michigan Transportation Research Institute (UMTRI) will lead the study, and the study will be conducted at UMTRI Laboratories in Ann Arbor, MI. The contractor will recruit children to participate through their caregivers, using the University of Michigan Engage site, Craigslist, and flyers placed at UMTRI. The contractor will create a customized tool for data collection and feedback. The contractor will assign participants a random identification number that is not linked to any personal identifying information and will de-identify photos and videos of participants, taken to document their exertion postures, by blurring the faces. Participation will be voluntary, and information collected from participants will be kept confidential and used only for research purposes. Following data collection, the contractor will provide CPSC staff with raw strength and position data (with identifying information removed), as well as a final report. After CPSC staff has reviewed and approved the final report, CPSC will release the report on the agency's website and through presentations at meetings and conferences related to the subject matter, in accordance with applicable laws and Commission policy.

A copy of the proposed study, titled, ''Child Strength Study-Final Supporting Statement and Justification,'' is available at: *www.regulations.gov* under Docket No. CPSC–2020–0021, Supporting and Related Material.

C. Comments

CPSC received four comments in response to the August 31, 2020 notice. All four commenters supported the information collection; however, two of the commenters also suggested specific or additional measures to collect or analyze as part of the study.

One commenter recommended collecting metrics on children's hand grip strength, push strength, pull strength, push-up head strength, and seated leg press strength. CPSC already plans to collect information about children's hand grip strength, push strength, pull strength, and seated leg press strength, as part of this study. Although CPSC does not plan to collect information about children's push up head strength, the commenter suggested this measure for purposes of evaluating entrapment hazards, and CPSC already plans to collect children's head

The Physical Characteristics of Children as Related to Death and Injury for Consumer Product Design and Use (Report No. UM–HSRI–BI–75–5). Prepared for the U.S. Consumer Product Safety Commission. Ann Arbor, MI: The Highway Safety Research Institute, University of Michigan.

[2] Snyder, R.G., Schneider, L.W., Owings, C.L., Reynolds, H.M., Golomb, D.H., and Schork, M.A. (1977). Anthropometry of Infants, Children, and Youths to Age 18 for Product Safety Design.Final Report UM–HSRI–77–17. University of Michigan Transportation Research Institute, Ann Arbor, MI. Prepared for the U.S. Consumer Product Safety Commission, Washington, D.C. 014926–F.

[3] Owings, C.L., Chaffin, D.B., Snyder, R.G., and Norcutt, R.H. (1975). Strength Characteristics of U.S. Children for Product Safety Design. U.S. Consumer Product Safety Commission, Bethesda, MD.

[4] Owings, C.L., Norcutt, R.H., Snyder, R.G., Golomb, D.H., and Lloyd, K.Y. (1977). Gripping Strength Measurements of Children for Product Safety Design (Contract No. CPSC–C–76–0119).

entrapment measures as part of the study.

The same commenter also recommended directly correlating data with the age of the child tested, to provide more detailed information to identify safe product designs. CPSC plans to group data into 3-month, 6-month, and 1-year age ranges, with smaller groupings for younger ages. Each age group will include approximately 50 participants. This approach will provide more age-specific information than previous studies, which grouped children into 3-year age ranges. CPSC could provide results for specific ages, however, this information would have limited use, because each specific age likely will have a small number of participants.

Another commenter recommended collecting a wide range of information on static anthropometry, functional anthropometry, physical abilities, and psychological abilities. The static anthropometry measures (*e.g.,* weight, head breadth) that the commenter requested would not require any modifications to the study. Rather, they would involve additional analysis of information that will already be collected as part of the body scan data in the study. CPSC agrees that this information may be useful and plans to request this additional data analysis as part of the final study report.

In contrast, the functional anthropometry measures (*e.g.,* overhead reach to grip) that the commenter requested would require modifying the study to collect additional measures. Based on study design and participant fatigue, child participants can only be in the laboratory for 2 hours. The data collection that is already part of the study will take 2 hours; additional measures would exceed the 2-hour allotted time. If CPSC determines, upon review of the final study report, that more information is necessary, and that additional measures need to be evaluated, staff will consider collecting supplemental information at that time.

CPSC already plans to collect most of the physical abilities measures (*e.g.,* pushing forward, pinch force) that the commenter recommended. CPSC is not collecting the psychological abilities measures (*e.g.,* reaction time to visual stimuli) that the commenter requested because those measures are not within the scope of this study. The focus of this study is on children's anthropometrics and strength.

This commenter also recommended compiling data for children from various countries, so that a comprehensive data set is available for companies that distribute products globally. CPSC cannot collect data from participants in other countries or compel other countries to collect child strength data. However, the data CPSC collects as part of this study will be publicly available, so interested parties may combine it with information from other countries to create a comprehensive data set.

CPSC's review and consideration of the comments yielded no basis for modifying the supporting statement for the study. Therefore, by publication of this notice, the Commission announces that CPSC has submitted to OMB a request for approval of this collection of information.

D. Burden Hours

The only change to the supporting statement corrects typographical errors to the burden hours for the federal government. The correct burden hours and costs are below. Although CPSC's 60-day **Federal Register** notice correctly stated these numbers, the supporting statement on *www.Regulations.gov* reflected slightly different numbers based on older Employer Costs for Employee Compensation. The final supporting statement, which is available in the docket for this notice, corrects those errors.

CPSC estimates that the study will involve 3,050 respondents and take a total of 1,813 hours over the duration of the study. The monetized hourly cost for the adult caregiver of a participant is $37.73, as defined by the average total hourly cost to employers for employee compensation for all civilian employees across all occupations as of March 2020, reported by the Bureau of Labor Statistics, Employer Costs for Employee Compensation. Accordingly, CPSC estimates the total cost burden to be $68,404 (1,813 hours × $37.73 = $68,404).

The estimated cost to the federal government for the contract to design and conduct the study issued to the University of Michigan under contract number 61320618D0004 is $1,134,502. The estimated salary and benefits costs for government personnel assigned to this study are $170,356, based on 12 staff months in 2020, at an average level of GS–13 step 5 in the Washington, DC area, effective January 2020 ($116,353) and a 68.3 percent ratio of wages and salary to total compensation (all civilian management, professional, and related workers) from Table 2 of the March 2020 Employer Costs for Employee Compensation, published by the Bureau of Labor Statistics. Therefore, the total estimated cost to the federal government is $1,134,502 for the contract, plus $170,356 in government labor costs, for a total of $1,304,858.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket DARS–2020–0041; OMB Control Number 0704–0525]

Information Collection Requirement; Defense Federal Acquisition Regulation Supplement; Prohibition of Foreign Commercial Satellite Services From Certain Foreign Entities—Representations

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Notice.

SUMMARY: The Defense Acquisition Regulations System has submitted to OMB for clearance the following proposed revision and extension of a collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by February 18, 2021.

FOR FURTHER INFORMATION CONTACT: Ms. Kimberly Bass, 571–372–6174.

SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS), Prohibition on Acquisition of Commercial Satellite Services from Certain Foreign Entities-Representations; OMB Control Number 0704–0525.

Type of Request: Revision and extension of a currently approved collection.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Obligation to Respond: Required to obtain or retain benefits.

Number of Respondents: 235.

Responses Per Respondent: 1.

Annual Responses: 235.

Average Burden Per Response: 0.25 hours.

Annual Burden Hours: 58.

Frequency: On Occasion.

Needs and Uses: DFARS provision 252.225–7049, Prohibition on Acquisition of Commercial Satellite Services from Certain Foreign Entities—Representations, is used by contracting

officers to determine whether the offeror is subject to the statutory prohibition on award of contracts for commercial satellite services to certain foreign entities. The provision is included in solicitations for the acquisition of foreign commercial satellite services and requires the offeror to represent whether it is or is not a foreign entity subject to the prohibitions of the statute, and whether it is or is not offering foreign commercial satellite services provided by such a foreign entity. If the offeror responds affirmatively to any of the representations, then the offeror must provide further information.

Comments and recommendations on the proposed information collection should be sent to Ms. Susan Minson, DoD Desk Officer, at *Oira_submission@omb.eop.gov.* Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments, identified by docket number and title, by the following method: *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.

DoD Clearance Officer: Ms. Angela James. Requests for copies of the information collection proposal should be sent to Ms. James at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Jennifer D. Johnson,

Regulatory Control Officer,Defense Acquisition Regulations System.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket Number DARS–2020–0037; OMB Control Number 0704–0390]

Information Collection Requirement; Defense Federal Acquisition Regulation Supplement (DFARS) Part 229, Taxes, and Related Clause at DFARS 252.229–7010

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Notice.

SUMMARY: The Defense Acquisition Regulations System has submitted to OMB for clearance, the following proposed revision and extension of a collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by February 18, 2021.

FOR FURTHER INFORMATION CONTACT: Ms. Heather Kitchens, 571–372–6104.

SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS) Part 229, Taxes, and related clause at DFARS 252.229–7010; OMB Control Number 0704–0390.

Type of Request: Revision and extension.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Respondent's Obligation: Required to obtain or retain benefits.

Number of Respondents: 12.

Responses per Respondent: 2.33, approximately.

Annual Responses: 28.

Average Burden Per Response: 4 hours.

Annual Burden Hours: 112.

Reporting Frequency: On occasion.

Needs and Uses: DoD uses this information to determine if DoD contractors in the United Kingdom have attempted to obtain relief from customs duty on vehicle fuels in accordance with contract requirements. The clause at DFARS 252.229–7010, Relief from Customs Duty on Fuel (United Kingdom), is prescribed at DFARS 229.402–70(j) for use in solicitations issued and contracts awarded in the United Kingdom that require the use of fuels (gasoline or diesel) and lubricants in taxis or vehicles other than passenger vehicles. The clause requires the contractor to provide the contracting officer with evidence that the contractor has initiated an attempt to obtain relief from customs duty on fuels and lubricants, as permitted by an agreement between the United States and the United Kingdom.

Comments and recommendations on the proposed information collection should be sent to Ms. Susan Minson, DoD Desk Officer, at *Oira_submission@omb.eop.gov.* Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments, identified by docket number and title, by the following method: *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.

DoD Clearance Officer: Ms. Angela James. Requests for copies of the information collection proposal should be sent to Ms. James at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket Number DARS–2021–0003; OMB Control Number 0704–0483]

Information Collection Requirement; Defense Federal Acquisition Regulation Supplement (DFARS); Independent Research and Development Technical Descriptions

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Notice and request for comments regarding a proposed revision and extension of an approved information collection requirement.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, DoD announces the proposed revision and extension of a public information collection requirement and seeks public comment on the provisions thereof.

DoD invites comments on: Whether the proposed collection of information is necessary for the proper performance of the functions of DoD, including whether the information will have practical utility; the accuracy of the estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including the use of automated collection techniques or other forms of information technology. The Office of Management and Budget (OMB) has approved this information collection requirement for use through April 30, 2021. DoD proposes that OMB extend its approval for three additional years.

DATES: DoD will consider all comments received by March 22, 2021.

ADDRESSES: You may submit comments, identified by OMB Control Number 0704–0483, using any of the following methods:

○ *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.

Email: osd.dfars@mail.mil. Include OMB Control Number 0704–0483 in the subject line of the message.

Mail: Defense Acquisition Regulations System, Attn: Ms. Heather Kitchens, OUSD(A&S)DPC(DARS), 3060 Defense Pentagon, Room 3B938, Washington, DC 20301–3060.

Comments received generally will be posted without change to *https://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Ms. Heather Kitchens, 571–372–6104.

SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS), Independent Research and Development Technical Descriptions; OMB Control Number 0704–0483.

Affected Public: Businesses and other for-profit entities.

Respondent's Obligation: Required to obtain or retain benefits.

Type of Request: Revision and extension of a currently approved collection.

Reporting Frequency: On occasion.

Number of Respondents: 69.

Responses Per Respondent: 90.49, approximately.

Annual Responses: 6,244.

Average Burden Per Response: 0.5 hours.

Annual Response Burden Hours: 3,122.

Needs and Uses: DFARS 231.205–18 requires contractors to report independent research and development (IR&D) projects to the Defense Technical Information Center (DTIC) using DTIC's online IR&D database. The inputs must be updated at least annually and when the project is completed. The data provide in-process information on IR&D projects for which DoD reimburses the contractor as an allowable indirect expense. In addition to improving the Department's ability to determine whether contractor IR&D costs are allowable, the data provide visibility into the technical content of industry IR&D activities to meet DoD needs.

Jennifer D. Johnson,

Regulatory Control Officer, Defense Acquisition Regulations System.

BILLING CODE 6820–ep–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2021–OS–0002]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness, Department of Defense (DoD).

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Office of the Under Secretary of Defense for Personnel and Readiness announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by March 22, 2021.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

• *Mail:* The Department of Defense (DoD) cannot receive written comments at this time due to the COVID–19 pandemic. Comments should be sent electronically to the docket listed above.

Instructions: All submissions received must include the agency name, docket number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public

viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

Any associated form(s) for this collection may be located within this same electronic docket and downloaded for review/testing. Follow the instructions at *http://www.regulations.gov* for submitting comments. Please submit comments on any given form identified by docket number, form number, and title.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the Rand Corporation, 1200 South Hayes Street, Arlington, VA 22202, Towanda Street, 703–614–0823.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Needs Assessment of Child and Youth Non-Medical Counseling; OMB Control Number 0704–XXXX.

Needs and Uses: In order for the DoD to best and most efficiently serve the needs of military children, it is important to know how the CYB–MFLC program fits within the landscape of family and child support systems to meet the needs and expectations of stakeholders. It is also important to identify where gaps in services remain and to identify the emerging needs of military children and youth that could be potentially filled or addressed by the CYB–MFLC program. Assessing how prevalent those needs and gaps are, and whether there is variation in these needs across locations, will inform modifications to the program to strengthen alignment of the scope of its services with other sources of support, resulting in improved coordinated care for military children in the school environment.

Affected Public: Individuals or Households.

Annual Burden Hours: 45.

Number of Respondents: 180.

Responses per Respondent: 1.

Annual Responses: 180.

Average Burden per Response: 15 minutes.

Frequency: Once.

Respondents are school principals at civilian schools involved with the CYB–MFLC program. Respondents will provide information, currently not available in any other source, about the breadth and depth of the unique non-medical counseling needs of military children and the ways in which the CYB–MFLC program is or is not meeting those needs.

Dated: January 12, 2021.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2020–OS–0092]

Submission for OMB Review; Comment Request

AGENCY: Office of the Under Secretary of Defense for Acquisition and Sustainment, Department of Defense (DoD).

ACTION: 30-day information collection notice.

SUMMARY: The DoD has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by February 18, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela James, 571–372–7574, or

whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Revitalizing Base Closure Communities, Economic Development Conveyance Annual Financial Statement; OMB Control Number 0790–0004.

Type of Request: Extension.

Number of Respondents: 24.

Responses per Respondent: 1.

Annual Responses: 24.

Average Burden per Response: 40 hours.

Annual Burden Hours: 960.

Needs and Uses: The information collection requirement is necessary to verify that Local Redevelopment Authority (LRA) recipients of Economic Development Conveyances (EDCs) are in compliance with the requirement that the LRA reinvest proceeds from the use of EDC property for seven years. Respondents are LRAs that have executed EDC agreements with a Military Department that transferred property from a closed military installation. As provided by 32 CFR 174.9, such agreements require that the LRA reinvest the proceeds from any sale, lease or equivalent use of EDC property (or any portion thereof) during at least the first seven years after the date of the initial transfer of the property to support the economic redevelopment of, or related to, the installation. The Secretary of Defense may recoup from the LRA such portion of these proceeds not used to support the economic redevelopment of, or related to, the installation. LRAs are subject to this same seven-year reinvestment requirement if their EDC agreement is modified to reduce the debt owed to the Federal Government. Military Departments monitor LRA compliance with this provision by requiring an annual financial statement certified by an independent Certified Public Accountant. No specific form is required.

Affected Public: State and local governments.

Frequency: Annually.

Respondent's Obligation: Required to Obtain or Retain Benefits.

OMB Desk Officer: Ms. Jasmeet Seehra.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Promise Neighborhoods (PN) Program

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education is issuing a notice inviting applications for fiscal year (FY) 2021 for the PN Program, Assistance Listing Number 84.215N. This notice relates to the approved information collection under OMB control number 1894–0006.

DATES: *Applications Available:* January 19, 2021.

Deadline for Notice of Intent to Apply: February 3, 2021.

Date of Pre-Application Meetings: The Department will hold a pre-application meeting on January 29, 2021 via webinar for prospective applicants. Detailed information regarding pre-application webinar(s) will be provided on the PN website at *https://oese.ed.gov/offices/office-of-discretionary-grants-support-services/school-choice-improvement-programs/promise-neighborhoods-pn/.*

Deadline for Transmittal of Applications: March 5, 2021.

Deadline for Intergovernmental Review: May 4, 2021.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768) and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf.*

FOR FURTHER INFORMATION CONTACT: Adrienne Hawkins, U.S. Department of Education, 400 Maryland Avenue SW, Room 4W220, Washington, DC 20202. Telephone: (202) 453–5638. Email: *Adrienne.Hawkins@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The PN program is authorized under the Elementary and Secondary Education Act of 1965, as amended (ESEA). The purpose of the PN program is to significantly improve the academic and developmental outcomes of children living in the most distressed communities of the United States, including ensuring school readiness, high school graduation, and access to a community-based continuum of high-quality services. The program serves neighborhoods with high concentrations of low-income individuals; multiple signs of distress, which may include high rates of poverty, childhood obesity, academic failure, and juvenile delinquency, adjudication, or incarceration; and schools implementing comprehensive support and improvement activities or targeted support and improvement activities under section 1111(d) of the ESEA. All strategies in the continuum of solutions must be accessible to children with disabilities and English learners.

Priorities: This competition includes three absolute priorities, four competitive preference priorities, and one invitational priority.

Absolute Priorities 1 and 3 and Competitive Preference Priorities 1 and 4 are from the notice of final priorities, requirements, definitions, and selection criteria for this program published elsewhere in this issue of the **Federal Register** (NFP). Absolute Priority 2 and Competitive Preference Priority 3 are from the notice of final priorities published in the **Federal Register** on March 9, 2020 (85 FR 13640) (Administrative Priorities). Competitive Preference Priority 2 is from the notice of final priority published in the **Federal Register** on November 27, 2019 (84 FR 65300) (Opportunity Zones NFP).

Absolute Priorities: For FY 2021 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are absolute priorities. Under 34 CFR 75.105(c)(3), we consider

only applications that meet one or more of these priorities.

These priorities are:

Absolute Priority 1—Non-Rural and Non-Tribal Communities.

To meet this priority, an applicant must propose to implement a PN strategy that serves one or more non-rural or non-Tribal communities.

Absolute Priority 2—Rural Applicants.

Under this priority, an applicant must demonstrate one or more of the following:

(a) The applicant proposes to serve a local educational agency (LEA) that is eligible under the Small Rural School Achievement (SRSA) program or the Rural and Low-Income School (RLIS) program authorized under Title V, Part B of the ESEA.

(b) The applicant proposes to serve a community that is served by one or more LEAs with a locale code of 32, 33, 41, 42, or 43.

(c) The applicant proposes a project in which a majority of the schools served have a locale code of 32, 33, 41, 42, or 43.

(d) The applicant is an institution of higher education (IHE) with a rural campus setting, or the applicant proposes to serve a campus with a rural setting. Rural settings include any of the following: Town-Fringe, Town-Distant, Town-Remote, Rural Fringe, Rural-Distant, Rural-Remote, as defined by the National Center for Education Statistics (NCES) College Navigator search tool.

Note: To determine whether a particular LEA is eligible for SRSA or RLIS, refer to the Department's website at *https://oese.ed.gov/offices/office-of-formula-grants/rural-insular-native-achievement-programs/rural-education-achievement-program/.* Applicants are encouraged to retrieve locale codes from the NCES School District search tool (*https://nces.ed.gov/ccd/districtsearch/*), where LEAs can be looked up individually to retrieve locale codes, and Public School search tool (*https://nces.ed.gov/ccd/schoolsearch/*), where individual schools can be looked up to retrieve locale codes. Applicants are encouraged to retrieve campus settings from the NCES College Navigator search tool (*https://nces.ed.gov/collegenavigator/*) where IHEs can be looked up individually to determine the campus setting.

Absolute Priority 3—Tribal Communities.

To meet this priority, an applicant must propose to implement a PN strategy that serves one or more Indian Tribes (as defined in this notice).

Competitive Preference Priorities: For FY 2021 and any subsequent year in which we make awards from the list of unfunded applications from this competition, these priorities are competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we award up to an additional 10 points to an application, depending on how well the application meets one or more of these priorities; the total possible points for each priority are noted in parentheses.

These priorities are:

Competitive Preference Priority 1—Community-Level Opioid Abuse Prevention Efforts (0 to 3 points).

To meet this priority, an applicant must: (1) Demonstrate how it will partner with an organization that conducts high-quality, community-level activities to prevent opioid abuse, such as an organization supported by an Office of National Drug Control Policy, Drug-Free Communities Support Program grant, in PN communities; (2) describe the partner organization's record of success in approaching opioid abuse prevention at the community level; and (3) provide, in its application, a memorandum of understanding between it and the partner organization responsible for managing the effort. The memorandum of understanding must indicate a commitment on the part of the applicant to coordinate implementation and align resources to the greatest extent practicable.

Competitive Preference Priority 2—Spurring Investment in Qualified Opportunity Zones (0 to 3 points).

Under this priority, an applicant must demonstrate that the area in which the applicant proposes to provide services overlaps with a Qualified Opportunity Zone (QOZ), as designated by the Secretary of the Treasury under section 1400Z–1 of the Internal Revenue Code.

An applicant must—

(1) Provide the census tract number of the QOZ(s) in which it proposes to provide services (1 point); and

(2) Describe how the applicant will provide services in the QOZ(s) (Up to 2 points).

Competitive Preference Priority 3—Applications from New Potential Grantees (0 or 1 point).

Under this priority, an applicant must demonstrate that it has never received a grant, including through membership in a group application submitted in accordance with 34 CFR 75.127–75.129, under the program from which it seeks funds.

Note: For new potential grantees unfamiliar with grantmaking at the Department, please consult our funding basics resource at *www2.ed.gov/documents/funding-101/funding-101-basics.pdf* or a more detailed resource at *www2.ed.gov/documents/funding-101/funding-101.pdf.*

Competitive Preference Priority 4—Evidence-Based Activities to Support Academic Achievement (0 to 3 points).

Projects that propose to use evidence-based (as defined in 34 CFR 77.1(c)) activities, strategies, or interventions that support teaching practices that will lead to increasing student achievement (as defined in this notice), graduation rates, and career readiness.

Invitational Priority: For FY 2021 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an invitational priority. Under 34 CFR 75.105(c)(1), we do not give an application that meets this invitational priority a competitive or absolute preference over other applications.

This priority is:

Community-Based Crime Reduction Efforts.

To meet this priority, an applicant must: (1) Demonstrate how it will partner with an organization that conducts high-quality activities focused on the re-entry of formerly incarcerated individuals or on community-based crime reduction activities, such as an organization supported by a U.S. Department of Justice (DOJ) Innovations in Community-Based Crime Reduction Program grant, a grant authorized under the Second Chance Act, as reauthorized under the Formerly Incarcerated Reenter Society Transformed Safely Transitioning Every Person (FIRST STEP) Act, or DOJ Office of Justice Programs competitive grants related to juvenile justice and delinquency prevention; (2) describe the partner organization's record of success with supporting the re-entry of formerly incarcerated individuals or community-based crime reduction and how their efforts will be coordinated with the PN activities of this grant; and (3) provide, in its application, a memorandum of understanding between it and a partner organization managing the effort. The memorandum of understanding must indicate a commitment on the part of the applicant to coordinate implementation and align resources to the greatest extent practicable.

Requirements: For FY 2021 and any subsequent year in which we make awards from the list of unfunded applications from this competition, applicants must meet the following application and program requirements from section 4624 of the ESEA and the NFP.

Application Requirements:

(1) A plan to significantly improve the academic outcomes of children living in the geographically defined area (neighborhood) that is served by the eligible entity by providing pipeline services that address the needs of children in the neighborhood, as

identified by the needs analysis; and that is supported by effective practices.

(2) A description of the neighborhood the eligible entity will serve.

Note: Applicants may propose to serve multiple, non-contiguous geographically defined areas, that is to say geographic areas that are not adjacent to one another. In cases where target areas are non-contiguous, the applicant should explain its rationale for including non-contiguous areas.

(3) An applicant must demonstrate that its proposed project—

(a) Is representative of the geographic area proposed to be served (as defined in this notice); and

(b) Would provide a majority of the solutions from the applicant's proposed pipeline services in the geographic area proposed to be served.

(4) An analysis of the needs and assets of the neighborhood, including:

(a) The size and scope of the population affected;

(b) A description of the process through which the needs analysis was produced, including a description of how parents, families, and community members were engaged in such analysis;

(c) An analysis of community assets and collaborative efforts (including programs already provided from Federal and non-Federal sources) within, or accessible to, the neighborhood, including, at a minimum, early learning opportunities, family and student supports, local businesses, local educational agencies, and institutions of higher education;

(d) The steps that the eligible entity is taking at the time of the application to address the needs identified in the needs analysis; and

(e) Any barriers the eligible entity, public agencies, and other community-based organizations have faced in meeting such needs.

(5) A description of (i) all information the entity used to identify the pipeline services to be provided, which shall not include information that is more than 3 years old; and (ii) how the eligible entity will collect data on children served by each pipeline service and increase the percentage of children served over time.

(6) A description of how the pipeline services will facilitate the coordination of the following activities:

(a) Providing early learning opportunities for children, including by:

(i) Providing opportunities for families to acquire the skills to promote early learning and child development; and

(ii) Ensuring appropriate diagnostic assessments and referrals for children with disabilities and children aged 3 through 9 experiencing developmental delays, consistent with the Individuals with Disabilities Education Act (20 U.S.C. 1400 *et seq.*), where applicable.

(b) Supporting, enhancing, operating, or expanding rigorous, comprehensive, effective educational improvements, which may include high-quality academic programs, expanded learning time, and programs and activities to prepare students for postsecondary education admissions and success.

(c) Supporting partnerships between schools and other community resources with an integrated focus on academics and other social, health, and familial supports.

(d) Providing social, health, nutrition, and mental health services and supports, for children, family members, and community members, which may include services provided within the school building.

(e) Supporting evidence-based programs that assist students through school transitions, which may include expanding access to postsecondary education courses and postsecondary education enrollment aid or guidance, and other supports for at-risk youth.

(7) Each applicant must submit, as part of its application, a preliminary memorandum of understanding, signed by each organization or agency with which it would partner in implementing the proposed PN program. Within the preliminary memorandum of understanding, all applicants must detail each partner's financial, programmatic, and long-term commitment with respect to the strategies described in the application. Under section 4624(c) of the ESEA, applicants that are non-profit entities must submit a preliminary memorandum of understanding signed by each partner entity or agency, which must include at least one of the following: A high-need LEA; an institution of higher education, as defined in section 102 of the HEA (20 U.S.C. 1002); the office of a chief elected official of a unit of local government; or an Indian Tribe or Tribal organization as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 5304).

(8) A description of the process used to develop the application, including the involvement of family and community members. In addressing this paragraph, an applicant must provide a description of the process used to develop the application, which must include the involvement of an LEA(s) (including but not limited to the LEA's or LEAs' involvement in the creation and planning of the application and a signed Memorandum of Understanding) and at least one public elementary or secondary school that is located within the identified geographic area that the grant will serve.

(9) A description of the strategies that will be used to provide pipeline services (including a description of which programs and services will be provided to children, family members, community members, and children within the neighborhood) to support the purpose of the Promise Neighborhoods program.

(10) An explanation of the process the eligible entity will use to establish and maintain family and community engagement, including:

(a) Involving representative participation by the members of such neighborhood in the planning and implementation of the activities of each grant awarded;

(b) The provision of strategies and practices to assist family and community members in actively supporting student achievement and child development;

(c) Providing services for students, families, and communities within the school building; and

(d) Collaboration with institutions of higher education, workforce development centers, and employers to align expectations and programming with postsecondary education and workforce readiness.

(e) In addressing this paragraph, an applicant must describe the process it will use to establish and maintain a family navigation system (as defined in this notice), including an explanation of the process the applicant will use to establish and maintain family and community engagement.

(11) An explanation of how the eligible entity will continuously evaluate and improve the continuum of high-quality pipeline services to provide for continuous program improvement and potential expansion.

(12) In addressing the application requirements in paragraphs (4), (5), and (6), an applicant must clearly demonstrate needs, including a segmentation analysis, gaps in services, and any available data from within the last 3 years to demonstrate needs. The applicant must also describe proposed activities that address these needs and the extent to which these activities are evidence-based. The applicant must also describe its, or its partner organization's, if applicable, experience providing these activities, including any data demonstrating effectiveness.

Program Requirements:

(1) Each grantee under the PN competition must use the grant funds to implement the pipeline services and continuously evaluate the success of the program and improve the program based

on data and outcomes. Section 4624(d) of the ESEA.

(2) Grantees may use not less than 50 percent of grant funds in year one, and not less than 25 percent of grant funds in year two for planning activities to develop and implement pipeline services.

(3) Grantees that operate a school in a neighborhood served by a grant program must provide such school with the operational flexibility, including autonomy over staff, time, and budget, needed to effectively carry out the activities described in this notice.

(4) Grantees cannot, in carrying out activities to improve early childhood education programs, use PN funds to carry out the following activities: (1) Assessments that provide rewards or sanctions for individual children or teachers. (2) A single assessment that is used as the primary or sole method for assessing program effectiveness. (3) Evaluation of children, other than for the purposes of improving instruction, classroom environment, professional development, or parent and family engagement, or program improvement.

Definitions: The definitions for ''eligible entity'' and ''pipeline services'' are from section 4622 of the ESEA. The definitions of ''family navigation system,'' ''graduation rate,'' ''Indian Tribe,'' ''indicators of need,'' ''regular high-school diploma,'' ''representative of the geographic area to be served,'' ''segmentation analysis,'' ''student achievement,'' and ''student mobility rate'' are from the NFP. The remaining definitions are from 34 CFR 77.1.

Demonstrates a rationale means a key project component included in the project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

Evidence-based means the proposed project component is supported by one or more of strong evidence, moderate evidence, promising evidence, or evidence that demonstrates a rationale.

Experimental study means a study that is designed to compare outcomes between two groups of individuals (such as students) that are otherwise equivalent except for their assignment to either a treatment group receiving a project component or a control group that does not. Randomized controlled trials, regression discontinuity design studies, and single-case design studies are the specific types of experimental studies that, depending on their design and implementation (*e.g.,* sample attrition in randomized controlled trials and regression discontinuity design studies), can meet What Works Clearinghouse (WWC) standards without reservations as described in the WWC Handbooks:

(i) A randomized controlled trial employs random assignment of, for example, students, teachers, classrooms, or schools to receive the project component being evaluated (the treatment group) or not to receive the project component (the control group).

(ii) A regression discontinuity design study assigns the project component being evaluated using a measured variable (*e.g.,* assigning students reading below a cutoff score to tutoring or developmental education classes) and controls for that variable in the analysis of outcomes.

(iii) A single-case design study uses observations of a single case (*e.g.,* a student eligible for a behavioral intervention) over time in the absence and presence of a controlled treatment manipulation to determine whether the outcome is systematically related to the treatment.

Family navigation system means a service delivery model that includes coordinators who teach, mentor, and collaborate with students and their families, as well as community members, to choose interventions, treatments, or solutions provided by the grantee and that best meet the needs of students and their families. Students and their families can select services and supports based on available services and individual needs, as well as advocate for additional services.

Graduation rate means the four-year adjusted cohort graduation rate or extended-year adjusted cohort graduation rate as defined in section 8101(25) and (23) of the ESEA.

Indian Tribe means an Indian Tribe or Tribal organization as defined in section 4 of the Indian Self-determination Act (25 U.S.C. 5304(e)).

Indicators of need means currently available data that describe—

(a) Education need, which means—

(1) All or a portion of the neighborhood includes or is within the attendance zone of a low-performing school that is a high school, especially one in which the graduation rate (as defined in this notice) is less than 60 percent or a school that can be characterized as low-performing based on another proxy indicator, such as students' on-time progression from grade to grade; and

(2) Other indicators, such as significant achievement gaps between subgroups of students (as identified in section 1111(b)(2)(B)(xi) of the ESEA), within a school or LEA, high teacher and principal turnover, or high student absenteeism; and

(b) Family and community support need, which means—

(1) Percentages of children with preventable chronic health conditions (*e.g.,* asthma, poor nutrition, dental problems, obesity) or avoidable developmental delays;

(2) Immunization rates;

(3) Rates of crime, including violent crime;

(4) Student mobility rates;

(5) Teenage birth rates;

(6) Percentage of children in single parent or no-parent families;

(7) Rates of vacant or substandard homes, including distressed public and assisted housing; or

(8) Percentage of the residents living at or below the Federal poverty threshold.

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Moderate evidence means that there is evidence of effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations or settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''strong evidence base'' or ''moderate evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''positive effect'' or ''potentially positive effect'' on a relevant outcome based on a ''medium to large'' extent of evidence, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study or quasi-experimental design study reviewed and reported by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks, or otherwise assessed by the Department using version 4.1 of the WWC Handbooks, as appropriate, and that—

(A) Meets WWC standards with or without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on

relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks; and

(D) Is based on a sample from more than one site (*e.g.,* State, county, city, school district, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet requirements in paragraphs (iii)(A), (B), and (C) of this definition may together satisfy this requirement.

Pipeline services means a continuum of coordinated supports, services, and opportunities for children from birth through entry into and success in postsecondary education, and career attainment. Such services shall include, at a minimum, strategies to address through services or programs (including integrated student supports) the following:

(a) High-quality early childhood education programs.

(b) High-quality school and out-of-school-time programs and strategies.

(c) Support for a child's transition to elementary school, from elementary school to middle school, from middle school to high school, and from high school into and through postsecondary education and into the workforce, including any comprehensive readiness assessment determined necessary.

(d) Family and community engagement and supports, which may include engaging or supporting families at school or at home.

(e) Activities that support postsecondary and work-force readiness, which may include job training, internship opportunities, and career counseling.

(f) Community-based support for students who have attended the schools in the area served by the pipeline, or students who are members of the community, facilitating their continued connection to the community and success in postsecondary education and the workforce.

(g) Social, health, nutrition, and mental health services and supports.

(h) Juvenile crime prevention and rehabilitation programs.

Promising evidence means that there is evidence of the effectiveness of a key project component in improving a relevant outcome, based on a relevant finding from one of the following:

(i) A practice guide prepared by WWC reporting a ''strong evidence base'' or ''moderate evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC reporting a ''positive effect'' or ''potentially positive effect'' on a relevant outcome with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single study assessed by the Department, as appropriate, that—

(A) Is an experimental study, a quasi-experimental design study, or a well-designed and well-implemented correlational study with statistical controls for selection bias (*e.g.,* a study using regression methods to account for differences between a treatment group and a comparison group); and

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome.

Quasi-experimental design study means a study using a design that attempts to approximate an experimental study by identifying a comparison group that is similar to the treatment group in important respects. This type of study, depending on design and implementation (*e.g.,* establishment of baseline equivalence of the groups being compared), can meet WWC standards with reservations, but cannot meet WWC standards without reservations, as described in the WWC Handbooks.

Regular high school diploma has the meaning set out in section 8101(43) of the ESEA.

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

Representative of the geographic area proposed to be served means that residents of the geographic area proposed to be served have an active role in decision-making and that at least one-third of the applicant's governing board or advisory board is made up of—

(a) Residents who live in the geographic area proposed to be served, which may include residents who are representative of the ethnic and racial composition of the neighborhood's residents and the languages they speak;

(b) Residents of the city or county in which the neighborhood is located but who live outside the geographic area proposed to be served, and who earn less than 80 percent of the area's median income as published by the U.S. Department of Housing and Urban Development;

(c) Public officials who serve the geographic area proposed to be served (although not more than one-half of the governing board or advisory board may be made up of public officials); or

(d) Some combination of individuals from the three groups listed in paragraphs (a), (b), and (c) of this definition.

Segmentation analysis means the process of grouping and analyzing data from children and families in the geographic area proposed to be served according to indicators of need or other relevant indicators to allow grantees to differentiate and more effectively target interventions based on the needs of different populations in the geographic area.

Strong evidence means that there is evidence of the effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations and settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''strong evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''positive effect'' on a relevant outcome based on a ''medium to large'' extent of evidence, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study reviewed and reported by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks, or otherwise assessed by the Department using version 4.1 of the WWC Handbooks, as appropriate, and that—

(A) Meets WWC standards without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks; and

(D) Is based on a sample from more than one site (*e.g.,* State, county, city, school district, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet requirements in paragraphs (iii)(A), (B), and (C) of this definition may together satisfy this requirement.

Student achievement means—

(a) For tested grades and subjects—

(1) A student's score on the State's assessments under the ESEA; and

(2) As appropriate, other measures of student learning, such as those described in paragraph (b) of this definition, provided they are rigorous and comparable across classrooms and programs; and

(b) For non-tested grades and subjects, alternative measures of student learning and performance, such as student scores on pre-tests and end-of-course tests; student performance on English language proficiency assessments; and other measures of student achievement that are rigorous and comparable across classrooms.

Student mobility rate is calculated by dividing the total number of new student entries and withdrawals at a school, from the day after the first official enrollment number is collected through the end of the academic year, by the first official enrollment number of the academic year.

What Works Clearinghouse (WWC) Handbooks (WWC Handbooks) means the standards and procedures set forth in the WWC Standards Handbook, Versions 4.0 or 4.1, and WWC Procedures Handbook, Versions 4.0 or 4.1, or in the WWC Procedures and Standards Handbook, Version 3.0 or Version 2.1 (all incorporated by reference, see § 77.2). Study findings eligible for review under WWC standards can meet WWC standards without reservations, meet WWC standards with reservations, or not meet WWC standards. WWC practice guides and intervention reports include findings from systematic reviews of evidence as described in the WWC Handbooks documentation.

Authority: *Program Authority:* 20 U.S.C. 7273–7274.

Note: Projects must be awarded and operated in a manner consistent with the nondiscrimination requirements contained in the U.S. Constitution and the Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget (OMB) Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The NFP. (e) The notice of final priorities, requirements, definitions, and selection criteria published in the **Federal Register** on July 6, 2011 (76 FR 39589) (2011 Promise Neighborhoods NFP). (f) The Administrative Priorities. (g) The Opportunity Zones NFP.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Discretionary grant.

Estimated Available Funds: $36,993,970.

Contingent upon the availability of funds and the quality of applications, we may make additional awards later in FY 2021 or in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $4,000,000 to $6,000,000.

Estimated Average Size of Awards: $5,000,000.

Maximum Award: We will not make an award exceeding $6,000,000 for a single budget period of 12 months.

Estimated Number of Awards: 5–7.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

Under section 4623 of the ESEA, a grant awarded under this competition will be for a period of not more than five years, and may be extended for an additional period of not more than two years.

III. Eligibility Information

1. *Eligible Applicants:* Under section 4622 of the ESEA, an eligible entity must be one of the following:

(a) An institution of higher education, as defined in section 102 of the HEA (20 U.S.C. 1002);

(b) An Indian Tribe or Tribal organization, as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 5304); or

(c) One or more nonprofit entities working in formal partnership with not less than one of the following entities:

(i) A high-need LEA.

(ii) An institution of higher education, as defined in section 102 of the HEA (20 U.S.C. 1002).

(iii) The office of a chief elected official of a unit of local government.

(iv) An Indian Tribe or Tribal organization, as defined under section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 5304).

Note: If you are a nonprofit organization, under 34 CFR 75.51, you may demonstrate your nonprofit status by providing: (1) Proof that the Internal Revenue Service currently recognizes the applicant as an organization to which contributions are tax deductible under section 501(c)(3) of the Internal Revenue Code; (2) a statement from a State taxing body or the State attorney general certifying that the organization is a nonprofit organization operating within the State and that no part of its net earnings may lawfully benefit any private shareholder or individual; (3) a certified copy of the applicant's certificate of incorporation or similar document if it clearly establishes the nonprofit status of the applicant; or (4) any item described above if that item applies to a State or national parent organization, together with a statement by the State or parent organization that the applicant is a local nonprofit affiliate.

2. a. *Cost Sharing or Matching:* Under section 4623(d)(1)(A) of the ESEA, to be eligible for a grant under this competition, an applicant must demonstrate a commitment from one or more entities in the public or private sector, which may include Federal, State, and local public agencies, philanthropic organizations, and private sources, to provide matching funds.

An applicant proposing a project that meets Absolute Priority 1—Non-rural and Non-Tribal Communities must obtain matching funds or in-kind donations equal to at least 100 percent of its grant award.

Under section 4623(d)(1)(C) of the ESEA, an applicant proposing a project that meets Absolute Priority 2—Rural Applicants or Absolute Priority 3—Tribal Communities must obtain matching funds or in-kind donations equal to at least 50 percent of its grant award.

Eligible sources of matching funds include sources of funds used to pay for solutions within the pipeline services, initiatives supported by the LEA, or public health services for children in the neighborhood. Under section 4623(d)(1)(B) of the ESEA, at least 10 percent of an applicant's total match must be cash or in-kind contributions from the private sector, which may include philanthropic organizations or private sources.

Applicants must demonstrate a commitment of matching funds in the application. Applicants must specify the source of the funds or contributions and in the case of a third-party in-kind contribution, a description of how the value was determined for the donated or contributed goods or service. Applicants must demonstrate the match commitment by including letters in their applications explaining the type and quantity of the match commitment

with original signatures from the executives of organizations or agencies providing the match.

Under section 4623(d)(1)(C) of the ESEA, the Secretary may consider decreasing the matching requirement in the most exceptional circumstances, on a case-by-basis.

An applicant that is unable to meet the matching requirement must include in its application a request to the Secretary to reduce the matching requirement, including the amount of the requested reduction, the total remaining match contribution, and a statement of the basis for the request. The Secretary will grant this request only if an applicant demonstrates a significant financial hardship.

An applicant should review the Department's cost-sharing and cost matching regulations, which include specific limitations, in 2 CFR 200.306 and the cost principles regarding donations, capital assets, depreciations, and allowable costs, set out in subpart E of 2 CFR part 200.

The Secretary does not, as a general matter, anticipate waiving the matching requirement. Furthermore, given the importance of matching funds to the long-term success of the project, eligible entities must identify appropriate matching funds in the proposed budget.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* The grantee may award subgrants to entities it has identified in an approved application or that it selects through a competition under procedures established by the grantee.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768) and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the PN competition, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended). Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you feel is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this program.

4. *Funding Restrictions:* We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 50 pages and (2) use the following standards:

- A ''page'' is 8.5'' x 11'', on one side only, with 1'' margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts,
- tables, figures, and graphs.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- *Use one of the following fonts:* Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the recommended page limit does apply to all of the application narrative.

6. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name and a contact person's name and email address. Applicants that do not submit a notice of intent to apply may still apply for funding; applicants that do submit a notice of intent to apply are not bound to apply or bound by the information provided.

V. Application Review Information

1. *Selection Criteria:* The selection criteria ''Need for project'' and ''Project design'' are from the NFP. The remaining selection criteria are from 34 CFR 75.210 and the 2011 Promise Neighborhoods NFP. The maximum score for each criterion is indicated in parenthesis; the maximum score that an application may receive under the selection criteria, and the competitive preference priorities, is 110 points.

The selection criteria are as follows:

(a) *Need for project (up to 20 points).*

In determining the need for the proposed project, the Secretary considers the following factors:

(1) The magnitude or severity of the problems to be addressed by the proposed project as described by indicators of need and other relevant indicators identified in part by the needs assessment and segmentation analysis (up to 5 points);

(2) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including—

(i) The nature and magnitude of those gaps or weaknesses (up to 5 points); and

(ii) A pipeline of solutions addressing the identified gaps and weaknesses, including solutions targeted to early childhood, K–12, family and community supports, and college and career (up to 10 points).

(b) *Quality of project services (up to 30 points).*

The Secretary considers the quality of the services to be provided by the proposed project. In determining the

quality of the project services, the Secretary considers:

(1) The quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability (34 CFR 75.210) (up to 10 points); and

(2) The likelihood that the services to be provided by the proposed project will lead to improvement in the achievement of students as measured against rigorous academic standards (34 CFR 75.210) (up to 20 points).

(c) *Quality of project design (up to 20 points).*

In determining the quality of project design for the proposed project, the Secretary considers the following factors:

(1) The extent to which the applicant describes a plan to create a complete pipeline of services, without time and resource gaps, that is designed to prepare all children in the neighborhood to attain a high-quality education and successfully transition to college and a career (up to 5 points);

(2) The extent to which the project will significantly increase the proportion of students in the neighborhood that are served by the complete continuum of high-quality services (up to 5 points); and

(3) The extent to which the proposed family navigation system is high-quality and provides students and their families sufficient services and supports based on available services and individual needs (up to 10 points).

(d) *Quality of the management plan (up to 15 points).*

The Secretary considers the quality of the management plan for the proposed project. In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks (34 CFR 75.210) (up to 5 points); and

(2) The experience, lessons learned, and proposal to build capacity of the applicant's management team and project director in collecting, analyzing, and using data for decision-making, learning, continuous improvement, and accountability, including whether the applicant has a plan to build, adapt, or expand a longitudinal data system that integrates student-level data from multiple sources in order to measure progress while abiding by privacy laws and requirements (2011 Promise Neighborhoods NFP) (up to 10 points).

(e) *Adequacy of resources (up to 15 points).*

The Secretary considers the adequacy of resources for the proposed project. In determining the adequacy of resources for the proposed project, the Secretary considers:

(1) The extent to which the costs are reasonable in relation to the number of persons to be served and to the anticipated results and benefits (34 CFR 75.210) (up to 5 points);

(2) The extent to which the applicant demonstrates that it has the resources to operate the project beyond the length of the grant, including a multi-year financial and operating model and accompanying plan; the demonstrated commitment of any partners; evidence of broad support from stakeholders (*e.g.,* State educational agencies, teachers' unions) critical to the project's long term success; or more than one of these types of evidence (34 CFR 75.210) (up to 5 points); and

(3) The extent to which the applicant identifies existing neighborhood assets and programs supported by Federal, State, local, and private funds that will be used to implement a continuum of solutions (2011 Promise Neighborhoods NFP) (up to 5 points).

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this program the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose specific conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department of Education will review and consider applications for funding pursuant to this notice inviting applications in accordance with the following:

- Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);
- Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);
- Promoting the freedom of speech and religious liberty in alignment with Promoting Free Speech and Religious Liberty (E.O. 13798) and Improving Free Inquiry, Transparency, and Accountability at Colleges and Universities (E.O. 13864) (34 CFR 200.300, 200.303, 200.339, and 200.341);

• Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

• Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html*.

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* The Secretary has established performance indicators (*i.e.,* performance measures) for PN as required under section 4624(h) of the ESEA. Performance indicators established by the Secretary include improved academic and development outcomes for children, including indicators of school readiness, high school graduation, postsecondary education and career readiness, and other academic and developmental outcomes. These outcomes promote data-driven decision-making and access to a community-based continuum of high-quality services for children living in the most distressed communities of the United States, beginning at birth. All grantees will be required to submit data annually against these performance measures as part of their annual performance report.

The Secretary establishes, in Table 1, the following performance indicators under section 4624(h) of the ESEA and 34 CFR 75.110:

TABLE 1—PROMISE NEIGHBORHOODS PERFORMANCE INDICATORS

Result	Indicator	Recommended source
1. Children enter kindergarten ready to succeed in school.	1. Number and percentage of children in kindergarten who demonstrate at the beginning of the program or school year age-appropriate functioning across multiple domains of early learning as determined using developmentally appropriate early learning measures.	Administrative data from LEA.
2. Students are proficient in core academic subjects.	2.1 Number and percentage of students at or above grade level according to State mathematics assessments in at least the grades required by the ESEA (3rd through 8th grades and once in high school). 2.2 Number and percentage of students at or above grade level according to State English language arts assessments in at least the grades required by the ESEA.	
3. Students successfully transition from middle school grades to high school.	3.1 Attendance rate of students in 6th, 7th, 8th, and 9th grade as defined by average daily attendance. 3.2 Chronic absenteeism rate of students in 6th, 7th, 8th, and 9th grades.	
4. Youth graduate from high school.	4. Four-year adjusted cohort graduation rate.	
5. High school graduates obtain a postsecondary degree, certification or credential.	5.1 Number and percentage of Promise Neighborhood students who enroll in a two-year or four-year college or university after graduation. 5.2 Number and percent of Promise Neighborhood students who graduate from a two-year or four-year college or university or vocational certification completion.	Third party data such as the National Student Clearinghouse.
6. Students are healthy	6. Number and percentage of children who consume five or more servings of fruits and vegetables daily.	Neighborhood survey, school climate survey or other reliable data source for population level data collection.

TABLE 1—PROMISE NEIGHBORHOODS PERFORMANCE INDICATORS—Continued

Result	Indicator	Recommended source
7. Students feel safe at school and in their community.	7. Number and percentage of children who feel safe at school and traveling to and from school as measured by a school climate survey.	
8. Students live in stable communities.	8. Student mobility rate (as defined in the notice).	
9. Families and community members support learning in promise Neighborhood Schools.	9.1 Number and percentage of parents or family members that read to or encourage their children to read three or more times a week or reported their child read to themselves three or more times a week (birth–8th grade). 9.2 Number and percentage of parents/family members who report talking about the importance of college and career (9th–12th grade).	
10. Students have access to 21st century learning tools.	10. Number and percentage of students who have school and home access to broadband internet and a connected computing device.	

Note: The indicators in Table 1 are not intended to limit an applicant from collecting and using data from additional Family and Community Support indicators proposed to the Department. Applicants are strongly encouraged, but not required, to propose additional performance indicators aligned to the specific pipeline services proposed in their application.

Each eligible entity that receives a grant under this program is required to prepare and submit an annual report to the Secretary that must include the following: (1) Information about the number and percentage of children in the neighborhood who are served by the grant program, including a description of the number and percentage of children accessing each support service offered as part of the pipeline of services; and (2) information relating to the metrics established under the PN Performance Indicators.

In addition, grantees are required to make these data publicly available, including through electronic means. To the extent practicable, and as required by law, such information must be provided in an accessible form and a language accessible to parents and families in the neighborhood served under the PN grant. In addition, data on academic indicators pertinent to the PN program will be, in most cases, part of statewide longitudinal data systems already.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: Whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

Also, in making continuation awards for years four and five, the Department will consider whether the grantee is achieving the intended goals and outcomes of the grant and shows substantial improvement against baseline data on performance indicators and performance measures.

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Frank T. Brogan,

Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Native Hawaiian Career and Technical Education Program (NHCTEP)

AGENCY: Office of Career, Technical, and Adult Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2021 for the Native Hawaiian Career and Technical Education Program (NHCTEP), Assistance Listing number 84.259A. This notice relates to the approved information collection under OMB control number 1830–0564.

DATES:

Applications Available: January 19, 2021.

Deadline for Notice of Intent to Apply: Applicants are strongly encouraged, but not required, to submit a notice of intent to apply by February 18, 2021.

Date of Pre-Application Meeting: February 2, 2021.

Deadline for Transmittal of Applications: March 22, 2021.

Deadline for Intergovernmental Review: May 19, 2021.

Pre-Application Webinar Information: The Department will hold a pre-application meeting via webinar for prospective applicants on February 2, 2021. More information about the webinar can be found in the application package.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common

Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768), and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf.*

FOR FURTHER INFORMATION CONTACT: Jim Means, U.S. Department of Education, 400 Maryland Avenue SW, Potomac Center Plaza, Room 11–076, Washington, DC 20202. Telephone: (202) 245–8222. Email: *NHCTEPgrant@ed.gov.* If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program

NHCTEP provides grants to improve career and technical education (CTE) programs that are consistent with the purposes of the Carl D. Perkins Career and Technical Education Act of 2006, as amended by the Strengthening Career and Technical Education for the 21st Century Act (Perkins V) and that benefit Native Hawaiians. Section 116(e) of Perkins V provides that programs, services, and activities funded under NHCTEP must support and improve career and technical education programs. (20 U.S.C. 2326(e)

Background

This notice invites applications for a competition for NHCTEP grants under Perkins V. Section 116(h) of Perkins V authorizes the Secretary of Education (Secretary) to award grants to community-based organizations primarily serving and representing Native Hawaiians to plan, conduct, and administer programs, or portions of programs, that are for the benefit of Native Hawaiians and authorized by and consistent with Perkins V.

Statutory Changes Affecting NHCTEP

For the convenience of applicants, we summarize in this notice some of the major statutory changes made to the Carl D. Perkins Career and Technical Education Act of 2006 by Perkins V that are relevant to NHCTEP. This summary is not meant to be comprehensive of all Perkins V changes applicable to NHCTEP.

(a) Purpose. Congress amended the statement of purpose of the law in Perkins V, most significantly by adding, as a new purpose, increasing employment opportunities for populations who are chronically unemployed or underemployed, including individuals with disabilities; individuals from economically disadvantaged families; out-of-workforce individuals; youth who are in or have aged out of the foster care system; and homeless individuals (20 U.S.C. 2301(8)). Other amendments to the purpose incorporate references to programs of study and the development of employability skills by students; delete the term ''tech-prep education''; and change a reference to ''high-demand occupations'' to ''in-demand occupation,'' a new term defined by Perkins V (20 U.S.C. 2302(26)).

(b) Definitions. Congress amended the definitions of certain terms that affect NHCTEP. Most significant among these are changes to the definition of ''career and technical education'' in section 3(5) of Perkins V (20 U.S.C. 2302(5)). The new definition of CTE now allows CTE programs to provide ''a recognized postsecondary credential,'' as defined in section 3 of the Workforce Innovation and Opportunity Act (WIOA),[1] and allows CTE to include ''career exploration at the high school level or as early as the middle grades (as such term is defined in section 8101 of the Elementary and Secondary Education Act of 1965, as amended (ESEA).'' [2] The amended definition of CTE also provides that, to the extent practicable, CTE should include coordination between secondary and postsecondary education programs through programs of study, which may include coordination through articulation agreements, early college high school programs, dual or concurrent enrollment program opportunities, or other credit transfer agreements that provide postsecondary credit or advanced standing.

Additionally, the definition of CTE now includes work-based learning (20 U.S.C. 2302(55)). For NHCTEP grantees, this means that students may be paid stipends not only for time they spend in class receiving instruction, but also for participating in unpaid work-based learning that is part of a CTE program that meets the Perkins V definition of CTE.

Congress also made significant changes to the definition of ''special populations'' (20 U.S.C. 2302(48)). Perkins V now includes three additional subpopulations within this definition: Homeless individuals described in section 725 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a); youth who are in or have aged out of the foster care system; and youth with a parent who is a member of the armed forces (as defined in 10 U.S.C. 101(a)(4)) and who is on active duty (as defined in 10 U.S.C. 101(d)(1)). Also, the term ''displaced homemakers'' has been removed and replaced by the term ''out-of-workforce individuals,'' which includes: Displaced homemakers, as defined in section 3 of WIOA (29 U.S.C. 3102); and unemployed or underemployed individuals who are experiencing difficulty in obtaining or upgrading employment who are either an individual who has worked primarily without remuneration to care for a home and family, and for that reason has diminished marketable skills, or is a parent whose youngest dependent child will become ineligible to receive assistance under the Temporary Assistance for Needy Families (TANF) program not later than two years after the date on which the parent applies for TANF assistance (20 U.S.C. 2302(36)). Additionally, the term ''individuals with limited English proficiency'' has been changed to ''English learners'' and the definition of this latter term has been aligned with the definition of this term in ESEA so that it now includes any secondary student who is an English learner as defined by section 8101 of ESEA (20 U.S.C. 2302(22)).

(c) Authorized activities. A new allowable use of funds in Perkins V permits NHCTEP grant funds to be used to provide preparatory, refresher, and remedial education services that are designed to enable students to achieve success in CTE programs or programs of study (20 U.S.C. 2326(c)(2)).

Finally, section 134(c) of Perkins V requires subrecipients of funds under Perkins V to conduct a local comprehensive needs assessment that must include a description of how CTE programs are aligned to State, regional, Tribal, or local in-demand industry sectors or occupations and are designed to meet local education or economic needs. The assessments must be updated every two years. Eligible applicants for NHCTEP may wish to review the comprehensive local needs assessment and use its data to inform project design and to better prepare Native Hawaiian students for successful careers.

[1] Section 3(52) of WIOA defines the term ''recognized postsecondary credential'' to mean ''a credential consisting of an industry-recognized certificate or certification, a certificate of completion of an apprenticeship, a license recognized by the State involved or Federal Government, or an associate or baccalaureate degree.''

[2] Section 8101(32) of the ESEA defines the term ''middle grades'' to mean ''any of grades 5 through 8.''

Fiscal Year 2021 Competition

For this competition, through the absolute priority, we require applicants to incorporate evidence into their project design. Evidence-based interventions are practices or programs that have evidence to show that they are supported by research or an evaluation. Applicants for this competition must submit evidence that demonstrates a rationale, as defined in this notice.

Requirements and Selection Criteria

This notice includes program requirements and selection criteria that are from statutory requirements or from the Notice of Final Requirements, Definitions, and Selection Criteria published in the **Federal Register** on March 24, 2009 (Notice of Final Requirements) (74 FR 12341). In addition, some requirements are based on those in the Notice of Final Requirements but established in accordance with section 437(d)(1) of the General Education Provisions Act (GEPA) in order to make some modifications to those requirements and selection criteria due primarily to changes in the program's authorizing statute.

Priorities: This competition includes one absolute priority and one competitive preference priority. The absolute priority is from the notice of final priorities for discretionary grant programs, published in the **Federal Register** on March 9, 2020 (85 FR 13640) (Administrative Priorities). The competitive preference priority is from the Secretary's notice of final supplemental priorities and definitions, published in the **Federal Register** on March 2, 2018 (83 FR 9096) (Supplemental Priorities).

Absolute Priority: For FY 2021, and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet the absolute priority.

This priority is:

Demonstrates a Rationale.

Under this priority, an applicant proposes a project that demonstrates a rationale (as defined in this notice).

Note: Applicants may wish to review the following technical assistance resources on evaluation and logic models:

(1) The Logic Model Workshop Toolkit developed by the Institute of Education Sciences: *https://ies.ed.gov/ncee/edlabs/regions/northeast/pdf/REL_2015057.pdf;*

(2) The Ideas that Work website hosted by the Office of Special Education Programs: *https://osepideasthatwork.org/evaluation.* This page includes additional resources on planning and conducting evaluation activities and developing logic models and high-quality objectives and performance measures.

Competitive Preference Priority: For FY 2021, and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is a competitive preference priority. Under 34 CFR 75.105(c)(2)(i), we award up to an additional five points to an application, depending on how well the application meets this competitive preference priority. If an applicant chooses to address this competitive preference priority, the project narrative section of its application must identify its response to the competitive preference priority.

This priority is:

Promoting Science, Technology, Engineering, or Math (STEM) Education, With a Particular Focus on Computer Science (up to 5 points).

Projects designed to improve student achievement or other educational outcomes in one or more of the following areas: Science, technology, engineering, math, or computer science (as defined in this notice). These projects must address increasing access to STEM coursework, including computer science, and hands-on learning opportunities, such as through expanded course offerings, dual-enrollment, high-quality online coursework, or other innovative delivery mechanisms.

Requirements: These program requirements are established in accordance with section 437(d)(1) of GEPA unless a specific statutory or regulatory citation for the requirement is provided.

The program requirements are:

Requirement 1—Authorized Programs:

(a) Section 116 of Perkins V requires the Secretary to ensure that activities funded under NHCTEP ''will improve career and technical education programs'' (20 U.S.C. 2326(e)), as the term ''career and technical education'' is defined by Perkins V (20 U.S.C. 2302(5)). Therefore, under NHCTEP, the Assistant Secretary will award grants to carry out projects that—

(1) Propose organized educational activities offering a sequence of courses that—

(A) Provide individuals with rigorous academic content and relevant technical knowledge and skills needed to prepare for further education and careers in current or emerging professions, which may include high-skill, high-wage, or in-demand industry sectors or occupations, which shall be, at the secondary level, aligned with the challenging State academic standards adopted by a State under section 1111(b)(1) of the ESEA;

(B) Provide technical skill proficiency or a recognized postsecondary credential, which may include an industry-recognized credential, a certificate, or an associate degree; and

(C) May include prerequisite courses that meet the requirements of this subparagraph;

(2) Include competency-based, work-based, or other applied learning that supports the development of academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of an industry, including entrepreneurship, of an individual;

(3) To the extent practicable, coordinate between secondary and postsecondary education programs through programs of study, which may include coordination through articulation agreements, early college high school programs, dual or concurrent enrollment program opportunities, or other credit transfer agreements that provide postsecondary credit or advanced standing; and

(4) May include career exploration at the high school level or as early as the middle grades (as such term is defined in section 8101 of ESEA).

(b) Special rule. Notwithstanding section 3(5)(A)(iii) of the Act, which excludes remedial courses from the definition of ''career and technical education,'' funds made available under NHCTEP for CTE may be used to provide preparatory, refresher, and remedial education services that are designed to enable students to achieve success in CTE programs or programs of study.

Requirement 2—Evaluation:

To help ensure the high quality of NHCTEP projects and the achievement of the goals and purposes of section 116 of the Act, each grantee must budget for and conduct an ongoing evaluation of its NHCTEP project. An independent evaluator must conduct the evaluation. The evaluation must be appropriate for the project and be both formative and summative in nature.

Requirement 3—Student Stipends:

(1) A portion of an award under this program may be used to provide stipends (as defined in this notice) to help students meet the costs of participation in a NHCTEP project.

(2) To be eligible for a stipend a student must—

(i) Be enrolled in a CTE project funded under this program;

(ii) Be in regular attendance in a NHCTEP project and meet the training institution's attendance requirement;

(iii) Maintain satisfactory progress in his or her program of study according to the training institution's published standards for satisfactory progress; and

(iv) Have an acute economic need that—

(A) Prevents participation in a project funded under this program without a stipend; and

(B) Cannot be met through a work-study program.

(3) The amount of a stipend is the greater of either the minimum hourly wage prescribed by State or local law, or the minimum hourly wage established under the Fair Labor Standards Act.

(4) A grantee may only award a stipend if the stipend combined with other resources the student receives does not exceed the student's financial need. A student's financial need is the difference between the student's cost of attendance and the financial aid or other resources available to defray the student's cost of participating in a NHCTEP project.

(5) To calculate the amount of a student's stipend, a grantee must multiply the number of hours a student actually attends CTE instruction by the amount of the minimum hourly wage that is prescribed by State or local law, or by the minimum hourly wage that is established under the Fair Labor Standards Act. The grantee must reduce the amount of a stipend if necessary to ensure that it does not exceed the student's financial need.

Example: If a grantee uses the Fair Labor Standards Act minimum hourly wage of $7.25 and a student attends classes for 20 hours a week, the student's stipend would be $145 for the week during which the student attends classes ($7.25 × 20 = $145.00). If the program lasts 16 weeks and the student's total financial need is $2,000, the grantee must reduce the weekly stipend to $125, because the total stipend for the course would otherwise exceed the student's financial need by $320 (or $20 a week).

Note: Grantees must maintain records that fully support their decisions to award stipends to students, as well as the amounts that are paid, such as proof of a student's enrollment in the NHCTEP project, stipend applications, timesheets showing the number of hours of student attendance that are confirmed in writing by an instructor, student financial status information, and evidence that a student would not be able to participate in the NHCTEP funds without a stipend. (*See generally* 20 U.S.C. 1232f; 34 CFR 75.700–75.702; 75.730; and 75.731.)

(6) An eligible student may receive a stipend when taking a course for the first time, although a stipend may not be provided to a student for a particular course if the student has already taken, completed, and had the opportunity to benefit from a course and is merely repeating the course.

(7) An applicant must include, in its application, the procedure it intends to use to determine student eligibility for stipends and stipend amounts, and its oversight procedures for the awarding and payment of stipends. (Notice of Final Requirements).

Requirement 4—Direct Assistance to Students:

A grantee may provide direct assistance (as defined in this notice) to a student only if the following conditions are met:

(1) The recipient of the direct assistance is an individual who is a member of a special population (as defined in section 3(48) of Perkins V) and who is participating in a NHCTEP project.

(2) The direct assistance is needed to address barriers to the individual's successful participation in a NHCTEP project.

(3) The direct assistance is part of a broader, more generally focused program or activity for addressing the needs of an individual who is a member of a special population.

Note: Direct assistance to individuals who are members of special populations is not, by itself, a ''program or activity for special populations.''

(4) The grant funds used for direct assistance must be expended to supplement, and not supplant, assistance that is otherwise available from non-Federal sources. For example, generally, a community-based organization could not use NHCTEP funds to provide child care for single parents if non-Federal funds previously were made available for this purpose, or if non-Federal funds are used to provide child care services for single parents participating in non-career and technical education programs and these services otherwise (in the absence of NHCTEP funds) would have been available to CTE students.

(5) In determining how much of the NHCTEP grant funds it will use for direct assistance to an eligible student, a grantee—

(i) May only provide assistance to the extent that it is needed to address barriers to the individual's successful participation in CTE; and

(ii) Considers whether the specific services to be provided are a reasonable and necessary cost of providing CTE programs for special populations. However, the Secretary does not envision a circumstance in which it would be a reasonable and necessary expenditure of NHCTEP project funds for a grantee to utilize a majority of a project's budget to pay direct assistance to students, in lieu of providing the students served by the project with CTE. (Notice of Final Requirements.)

Requirement 5—Career and Technical Education Memorandum of Understanding:

Any applicant that is not proposing to provide CTE directly to Native Hawaiian students and proposes instead to pay one or more qualified educational entities to provide such CTE to Native Hawaiian students must include with its application a signed memorandum of understanding (MOU) between the applicant and the educational entity. The MOU must describe the commitment between the applicant and the educational entity and must include, at a minimum, a statement of the responsibilities of the applicant and the entity. The MOU must be signed by the appropriate individuals on behalf of each party, such as the authorizing official or administrative head of the applicant Native Hawaiian community-based organization.

Definitions: These definitions are from Perkins V, the Supplemental Priorities, the Notice of Final Requirements, or 34 CFR 77.1. The source of each definition is noted after the definition.

Acute economic need means an income that is at or below the national poverty level according to the latest available data from the U.S. Department of Commerce or the U.S. Department of Health and Human Services Poverty Guidelines. (Notice of Final Requirements).

Career and technical education (CTE) means organized educational activities that—

(a) Offer a sequence of courses that—

(1) Provides individuals with rigorous academic content and relevant technical knowledge and skills needed to prepare for further education and careers in current or emerging professions, which may include high-skill, high-wage, or in-demand industry sectors or occupations, which shall be, at the secondary level, aligned with the challenging State academic standards adopted by a State under section 1111(b)(1) of the ESEA;

(2) Provides technical skill proficiency or a recognized postsecondary credential, which may include an industry-recognized credential, a certificate, or an associate degree; and

(3) May include prerequisite courses (other than a remedial course) [3] that meet the requirements of this paragraph (a);

(b) Include competency-based, work-based, or other applied learning that supports the development of academic knowledge, higher-order reasoning and problem-solving skills, work attitudes, employability skills, technical skills, and occupation-specific skills, and knowledge of all aspects of an industry, including entrepreneurship, of an individual;

(c) To the extent practicable, coordinate between secondary and postsecondary education programs through programs of study, which may include coordination through articulation agreements, early college high school programs, dual or concurrent enrollment program opportunities, or other credit transfer agreements that provide postsecondary credit or advanced standing; and

(d) May include career exploration at the high school level or as early as the middle grades (as such term is defined in section 8101 of the ESEA). (20 U.S.C. 2302(5)).

Computer science means the study of computers and algorithmic processes and includes the study of computing principles and theories, computational thinking, computer hardware, software design, coding, analytics, and computer applications.

Computer science often includes computer programming or coding as a tool to create software, including applications, games, websites, and tools to manage or manipulate data; or development and management of computer hardware and the other electronics related to sharing, securing, and using digital information.

In addition to coding, the expanding field of computer science emphasizes computational thinking and interdisciplinary problem-solving to equip students with the skills and abilities necessary to apply computation in our digital world.

Computer science does not include using a computer for everyday activities, such as browsing the internet; use of tools like word processing, spreadsheets, or presentation software; or using computers in the study and exploration of unrelated subjects. (Supplemental Priorities).

[3] Section 116(c)(2) of Perkins V provides that, notwithstanding the exclusion of remedial courses from Perkins V's definition of CTE, funds made available under NHCTEP ''may be used to provide preparatory, refresher, and remedial education services that are designed to enable students to achieve success in career and technical education programs or programs of study.''

CTE concentrator means—

(a) At the secondary school level, a student served by an eligible recipient who has completed at least two courses in a single career and technical education program or program of study; and

(b) At the postsecondary level, a student enrolled in an eligible recipient who has—

(1) Earned at least 12 credits within a career and technical education program or program of study; or

(2) Completed such a program if the program encompasses fewer than 12 credits or the equivalent in total. (20 U.S.C. 2302(12))

Demonstrates a rationale means a key project component included in the project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes. (34 CFR 77.1).

Direct assistance to students means tuition, dependent care, transportation, books, and supplies that are necessary for a student to participate in a project funded under this program. (Notice of Final Requirements).

In-demand industry sector or occupation means—

(a) An industry sector that has a substantial current or potential impact (including through jobs that lead to economic self-sufficiency and opportunities for advancement) on the State, regional, or local economy, as appropriate, and that contributes to the growth or stability of other supporting businesses, or the growth of other industry sectors; or

(b) An occupation that currently has or is projected to have a number of positions (including positions that lead to economic self-sufficiency and opportunities for advancement) in an industry sector so as to have a significant impact on the State, regional, or local economy, as appropriate. (29 U.S.C. 3102(23)).

Institution of higher education means—

(a) An educational institution in any State that—

(1) Admits as regular students only persons having a certificate of graduation from a school providing secondary education, or the recognized equivalent of such a certificate or persons who meet the requirements of section 1091(d) of this title;

(2) Is legally authorized within such State to provide a program of education beyond secondary education;

(3) Provides an educational program for which the institution awards a bachelor's degree or provides not less than a two-year program that is acceptable for full credit toward such a degree, or awards a degree that is acceptable for admission to a graduate or professional degree program, subject to review and approval by the Secretary;

(4) Is a public or other nonprofit institution; and

(5) Is accredited by a nationally recognized accrediting agency or association or, if not so accredited, is an institution that has been granted pre-accreditation status by such an agency or association that has been recognized by the Secretary for the granting of pre-accreditation status, and the Secretary has determined that there is satisfactory assurance that the institution will meet the accreditation standards of such an agency or association within a reasonable time.

(b) The term also includes—

(1) Any school that provides not less than a one-year program of training to prepare students for gainful employment in a recognized occupation and that meets the provisions of paragraphs (1), (2), (4), and (5) of paragraph (a); and

(2) A public or nonprofit private educational institution in any State that, in lieu of the requirement in paragraph (a)(1) of this definition, admits as regular students individuals—

(A) Who are beyond the age of compulsory school attendance in the State in which the institution is located; or

(B) Who will be dually or concurrently enrolled in the institution and a secondary school. (20 U.S.C. 1001(a) and (b)).

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes. (34 CFR 77.1).

Native Hawaiian means any individual any of whose ancestors were natives, prior to 1778, of the area which now comprises the State of Hawaii. (20 U.S.C. 2326(a)(3))

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers). (34 CFR 77.1).

Professional development means activities that—

(a) Are an integral part of eligible agency, eligible recipient, institution, or

school strategies for providing educators (including teachers, principals, other school leaders, administrators, specialized instructional support personnel, career guidance and academic counselors, and paraprofessionals) with the knowledge and skills necessary to enable students to succeed in career and technical education, to meet challenging State academic standards under section 1111(b)(1) of ESEA, or to achieve academic skills at the postsecondary level; and

(b) Are sustained (not stand-alone, one-day, or short-term workshops), intensive, collaborative, job-embedded, data-driven, and classroom-focused, to the extent practicable evidence-based, and may include activities that—

(1) Improve and increase educators'—

(A) Knowledge of the academic and technical subjects;

(B) Understanding of how students learn; and

(C) Ability to analyze student work and achievement from multiple sources, including how to adjust instructional strategies, assessments, and materials based on such analysis;

(2) Are an integral part of eligible recipients' improvement plans;

(3) Allow personalized plans for each educator to address the educator's specific needs identified in observation or other feedback;

(4) Support the recruitment, hiring, and training of effective educators, including educators who became certified through State and local alternative routes to certification;

(5) Advance educator understanding of—

(A) Effective instructional strategies that are evidence-based; and

(B) Strategies for improving student academic and technical achievement or substantially increasing the knowledge and teaching skills of educators;

(6) Are developed with extensive participation of educators, parents, students, and representatives of Indian Tribes (as applicable), of schools and institutions served under the Act;

(7) Are designed to give educators of students who are English learners in career and technical education programs or programs of study the knowledge and skills to provide instruction and appropriate language and academic support services to those students, including the appropriate use of curricula and assessments;

(8) As a whole, are regularly evaluated for their impact on increased educator effectiveness and improved student academic and technical achievement, with the findings of the evaluations used to improve the quality of professional development;

(9) Are designed to give educators of individuals with disabilities in career and technical education programs or programs of study the knowledge and skills to provide instruction and academic support services to those individuals, including positive behavioral interventions and supports, multi-tier system of supports, and use of accommodations;

(10) Include instruction in the use of data and assessments to inform and instruct classroom practice;

(11) Include instruction in ways that educators may work more effectively with parents and families;

(12) Provide follow-up training to educators who have participated in activities described in this definition that are designed to ensure that the knowledge and skills learned by the educators are implemented in the classroom;

(13) Promote the integration of academic knowledge and skills and relevant technical knowledge and skills, including programming jointly delivered to academic and career and technical education teachers; or

(14) Increase the ability of educators providing career and technical education instruction to stay current with industry standards. (20 U.S.C. 2302(40)).

Program of study means a coordinated, nonduplicative sequence of academic and technical content at the secondary and postsecondary level that—

(A) Incorporates challenging State academic standards, including those adopted by a State under section 1111(b)(1) of ESEA;

(B) Addresses both academic and technical knowledge and skills, including employability skills;

(C) Is aligned with the needs of industries in the economy of the State, region, Tribal community, or local area;

(D) Progresses in specificity (beginning with all aspects of an industry or career cluster and leading to more occupation-specific instruction);

(E) Has multiple entry and exit points that incorporate credentialing; and

(F) Culminates in the attainment of a recognized postsecondary credential. (20 U.S.C. 2302(41)).

Recognized postsecondary credential means a credential consisting of an industry-recognized certificate or certification, a certificate of completion of an apprenticeship, a license recognized by the State involved or Federal Government, or an associate or baccalaureate degree. (29 U.S.C. 3102(52)).

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program. (34 CFR 77.1).

Secondary school means a nonprofit institutional day or residential school, including a public secondary charter school, that provides secondary education, as determined under State law, except that the term does not include any education beyond grade 12. (20 U.S.C. 7801(45)).

Special populations means—

(a) Individuals with disabilities;

(b) Individuals from economically disadvantaged families, including low-income youth and adults;

(c) Individuals preparing for non-traditional fields;

(d) Single parents, including single pregnant women;

(e) Out-of-workforce individuals;

(f) English learners;

(g) Homeless individuals described in section 725 of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11434a);

(h) Youth who are in, or have aged out of, the foster care system; and

(i) Youth with a parent who—

(i) Is a member of the armed forces (as such term is defined in section 101(a)(4) of title 10, United States Code); and

(ii) Is on active duty (as such term is defined in section 101(d)(1) of such title). (20 U.S.C. 2302(48)).

Stipend means a subsistence allowance—

(a) For a student who is enrolled in a career and technical education program funded under the NHCTEP;

(b) For a student who has an acute economic need that cannot be met through work-study programs; and

(c) That is necessary for the student to participate in a project funded under this program. (Notice of Final Requirements).

Support services means services related to curriculum modification, equipment modification, classroom modification, supportive personnel (including paraprofessionals and specialized instructional support personnel), and instructional aids and devices. (20 U.S.C. 2302(50)).

Work-based learning means sustained interactions with industry or community professionals in real workplace settings, to the extent practicable, or simulated environments at an educational institution that foster in-depth, firsthand engagement with the tasks required of a given career field, that are aligned to curriculum and instruction. (20 U.S.C. 2302(55)).

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act

(5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed selection criteria and other requirements. Section 437(d)(1) of GEPA, however, allows the Secretary to exempt from rulemaking requirements regulations governing the first grant competition under a new or substantially revised program authority. This is the first grant competition for this substantially revised program under section 116 of the Carl D. Perkins Career and Technical Education Act of 2006, as amended by the Strengthening Career and Technical Education for the 21st Century Act, 20 U.S.C. 2326, and therefore qualifies for this exemption. In order to ensure timely grant awards, the Secretary has decided to forgo public comment on certain requirements and selection criteria under section 437(d)(1) of GEPA. These requirements and selection criteria will apply to the FY 2021 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition.

Program Authority: 20 U.S.C. 2301, *et seq.,* particularly 2326(a)–(h).

Note: Projects must be awarded and operated in a manner consistent with the nondiscrimination requirements contained in the U.S. Constitution and the Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget (OMB) Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The Notice of Final Requirements. (e) The Supplemental Priorities. (f) The Administrative Priorities.

Note: The regulations in 34 CFR 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Discretionary grants.

Estimated Available Funds: $3,176,000 for the first 12 months of the project period. Funding for years two, three, four, and five is subject to the availability of funds and to a grantee meeting the requirements of 34 CFR 75.253.

Contingent upon the availability of funds and the quality of applications, we may make additional awards later in FY 2021 or in subsequent years from the list of unfunded applications from this competition.

Estimated Range of Awards: $250,000 to $500,000.

Estimated Average Size of Awards: $350,000.

Estimated Number of Awards: 9–10.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants:* The following entities are eligible to apply under this competition:

(a) Community-based organizations primarily serving and representing Native Hawaiians. For purposes of the NHCTEP, a community-based organization means a public or private organization that provides career and technical education, or related services, to individuals in the Native Hawaiian community.

(b) Any community-based organization may apply individually or as part of a consortium with one or more eligible community-based organizations. (Eligible applicants seeking to apply for funds as a consortium must meet the requirements in 34 CFR 75.127–75.129.).

Note: If you are a nonprofit organization, under 34 CFR 75.51, you may demonstrate your nonprofit status by providing: (1) Proof that the Internal Revenue Service currently recognizes the applicant as an organization to which contributions are tax deductible under section 501(c)(3) of the Internal Revenue Code; (2) a statement from a State taxing body or the State attorney general certifying that the organization is a nonprofit organization operating within the State and that no part of its net earnings may lawfully benefit any private shareholder or individual; (3) a certified copy of the applicant's certificate of incorporation or similar document if it clearly establishes the nonprofit status of the applicant; or (4) any item described above if that item applies to a State or national parent organization, together with a statement by the State or parent organization that the applicant is a local nonprofit affiliate.

2. a. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

b. *Supplement-Not-Supplant:* This competition involves supplement-not-supplant funding requirements. In accordance with section 211(a) of Perkins V (20 U.S.C. 2391(a)), funds under this program may not be used to supplant non-Federal funds used to carry out CTE activities.

We caution applicants not to plan to use funds under NHCTEP to replace otherwise available non-Federal funding for direct assistance to students and family assistance programs. For example, NHCTEP funds must not be used to supplant other non-Federal funds with Federal funds in order to pay the costs of students' tuition, dependent care, transportation, books, supplies, and other costs associated with participation in a CTE program.

Funds under NHCTEP should not be used to replace Federal student financial aid. Perkins V does not authorize the Secretary to fund projects that serve primarily as entities through which students may apply for and receive tuition and other financial assistance.

c. *Indirect Cost Rate Information:* This program uses a restricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see: *www2.ed.gov/about/offices/list/ocfo/intro.html.*

d. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

e. *Limitation on Services:* Section 215 of Perkins V (20 U.S.C. 2395) forbids the use of Perkins funds for the education of students prior to the middle grades. The term ''middle grades'' refers to grades 5 through 8, as defined in section 8101 of ESEA.

3. *Subgrantees:* Under 34 CFR 75.708(b) and (c) a grantee under this competition may award subgrants—to directly carry out project activities described in its application—to the following types of entities: Institutions of higher education, nonprofit organizations, local educational agencies. The grantee may award subgrants to entities it has identified in an approved application or that it selects through a competition under procedures established by the grantee.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768) and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf,* which contain requirements and information on how to submit an application.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the NHCTEP program, your application may include business information that you consider proprietary. In 34 CFR 5.11 we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552, as amended).

Because we plan to make successful applications available to the public on the Department's website, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate Appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to 35 pages and (2) use the following standards:

- A ''page'' is 8.5'' x 11'', on one side only, with 1'' margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger, and no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; the one-page abstract; the resumes; the bibliography; or the letters of support. However, the recommended page limit does apply to all of the application narrative.
