With respect to excluding certain communications from this requirement or providing a specific list of communications that must be kept in their original format, we note that we have already limited this requirement by only requiring PACE organizations to maintain all written communications that relate to a participant's care, health, or safety. As we stated in the proposed rule (85 FR 9135), the types of communication that would be protected under this provision include, but are not limited to: Written requests for services that the participant, designated representative or caregiver believes are necessary; grievances or complaints relating to the participant's care or health; and communications from the community that indicate concerns over the well-being of a PACE participant. For example, if the participant sent the PACE organization a letter requesting long-term nursing facility placement or Adult Protective Services emailed the PACE organization to express concern about the participant's ability to live on their own, we would expect these communications to be maintained. Given the nature of the PACE program, we recognize that there is frequent communication between a PACE organization and various individuals regarding each participant and that many of these communications would not be appropriate to maintain. For example, if a caregiver texted the PACE organization stating that they were going to be 15 minutes late in dropping off a participant at the PACE center or a participant emailed the PACE organization because they wanted to know what type of food would be served at the PACE center on a particular day, we would not expect this communication to be maintained.

After consideration of the comments received, we are finalizing § 460.200 as proposed with a minor grammatical change in the introductory paragraph of § 460.200(d), to add ''a'' before ''PACE organization.'' This grammatical correction will not change the intended meaning of the regulation as proposed and described in this final rule.

F. Documentation in Medical Records Under PACE (§ 460.210)

In accordance with § 460.210(a), a PACE organization must maintain a single, comprehensive medical record for each participant, in accordance with accepted professional standards, that is accurately documented and available to all staff, among other requirements. We have previously discussed the importance of maintaining a complete record for each participant. In the preamble to the 2006 PACE final rule (71 FR 71326), we stated that, because care for the PACE population will be provided by a variety of sources (for example, PACE center employees, contracted personnel, hospital staff, nursing home staff, etc.), it is critical that all information on the participant be documented in the medical record to ensure quality and continuity of care. CMS currently specifies at § 460.210(b) the minimum required contents of a medical record. Based on audit and oversight experience, we identified

additional requirements that we believe should be added under § 460.210(b) to ensure that participant medical records are fully comprehensive.

We proposed to redesignate § 460.210(b)(4) through (12) as (7) through (15), and to add three new paragraphs under § 460.210(b) to address how recommendations for care and treatment, decisions regarding those recommendations, and communications relating to a participant's care, health or safety should be documented in the medical record. Specifically, we proposed to add a new paragraph (b)(4) that would require the PACE organization to document all recommendations for services made by employees and contractors of the PACE organization, including by all specialists such as dentists, neurologists, cardiologists, and others, in the participant's medical record. We believe that all recommendations for services from these sources must be documented in order for the IDT to remain alert to all pertinent information, even if the IDT decides not to pursue the recommendations, for example based on a determination that the service is not necessary. Recommendations are made based on the employee or contractor's determination that a participant might benefit from a particular service given the participant's health status or condition. Even if the IDT ultimately decides that the recommended service would not be necessary to improve and maintain the participant's health status, the IDT should document that recommendation in order to remain alert to why a particular contractor or employee believed that service was necessary as required by § 460.102(d)(2)(ii).

Additionally, we proposed adding a new paragraph (b)(5) that would require the IDT to document in the medical record the reason(s) for not approving or providing a service recommended by one of these sources. When an employee, contractor, or specialist recommends a service within the scope of their authority to practice, we believe that it is necessary for the IDT to consider this information and document any decision against providing the recommended service in the medical record. For example, if a gastroenterologist recommends that a participant receive drug therapy for Hepatitis C, and after reviewing the recommendation the IDT determines that treatment is not medically necessary or is contraindicated, we would require the IDT to document in the participant's medical record the rationale for not providing the recommended drug therapy, including the clinical criteria used as the basis for that determination. This not only ensures that the IDT can review the information used to make the decision, but also that the participant has access to information about the basis of the decision not to provide a recommended service. This would also align with the requirement we finalized in the 2019 PACE final rule (84 FR 25643) that requires the IDT to document the rationale for determining certain services are not necessary in the participant's plan of care following the initial comprehensive assessment. While the 2019 PACE final rule required the IDT to follow this process during the development of the initial care plan, we are expanding the requirement to account for situations that arise after the initial plan of care is developed. For example, a participant may be diagnosed with diabetes after the development of the initial care plan, and should the PACE organization determine that treatment is not necessary, we would expect that it document that decision and the reasons for that decision in the participant's medical record.

We also proposed to require PACE organizations to maintain certain written communications received by the PACE organization in the participant's medical record, in new paragraph § 460.210(b)(6). The PACE program presents unique challenges in terms of providing care to participants. PACE participants require a nursing facility level of care and often have complex medical needs. When a Medicare or Medicaid beneficiary is in a nursing home, they have daily interactions with staff, and their needs, including changes in condition, are noted by the staff and acted upon. PACE participants, on the other hand, largely remain in their own homes and might not be seen on a daily basis by PACE organization staff. PACE participants do, however, often have regular interactions with caregivers, family members, neighbors, and other members of their communities, as well as with social service organizations like local Area Agencies on Aging (AAA) or Adult Protective Services (APS) agencies. We believe that maintaining a comprehensive, complete, and accurate medical record allows a PACE organization to remain alert to all information that is relevant to a participant's care, health, and safety and to provide appropriate and timely care to the participant. We also believe information about a participant's care, health, or safety provided to a PACE organization by any of these sources could play a critical role in providing comprehensive care to the participant. Therefore, we proposed to add a new paragraph (b)(6) to § 460.210, to require PACE organizations to maintain, in a participant's medical record, original documentation of any written communication relating to the care, health, or safety of a participant that the PACE organization receives from certain sources in any format (for example, emails, faxes, letters, etc.). At a minimum, PACE organizations would be required to maintain communications from the participant, his or her designated representative, family members, caregivers, or any other individual who provides information pertinent to a participant's care, health, or safety, as well as communications from advocacy or governmental agencies like an AAA or APS. We also proposed at § 460.200(d)(2) a reference to § 460.210(b)(6) which would require that the PACE organization maintain this information in its original written form rather than summarizing the information in the participant's record. See 85 FR 9134–9135 and 9259).

We summarize the comments we received on the proposals related to the requirements for the contents of participant medical records under § 460.210(b), and provide our responses to those comments, below.

Comment: A commenter agreed with the proposals under §§ 460.210(b)(4) and (b)(5) which would require PACE organizations to document all recommendations for services made by employees or contractors of the PACE organization, including specialists, and the reason(s) for not approving or providing services recommended by these sources in the participant's medical record.

Response: We thank the commenter for their support of this provision.

Comment: Commenters were split on the proposal to require original documentation to be maintained in the medical record. A commenter agreed with the proposed requirements in §§ 460.200(d)(2) and 460.210(b)(6), which would require PACE organizations to maintain all written communications received from participants or other parties, in their original form, when the communications relate to a participant's care, health or safety, including written communications from an advocacy or governmental agency. Another commenter was opposed to this provision stating that not all communication lends itself to being kept in the original form and the proposed requirement may be impracticable for mundane, routine communications such as confirming an

address for a family member. This commenter recommended that CMS remove the phrase ''all written communication'' and instead provide a specific list of communications that must be kept in its original format. The majority of commenters recommended that the provisions at § 460.210(b)(6) be modified consistent with their comments on the proposal at § 460.200(d)(2). Specifically, commenters were concerned that maintaining original documentation of any written communication relating to the care, health or safety of a participant in any format in the medical record would compromise the usefulness of the medical record, due to the quantity of information that would be required to be stored. These commenters also stated that requiring direct care providers to download or otherwise transfer all such communications to the medical record would be burdensome and take them away from providing care to participants. As a solution, these commenters recommended permitting PACE organizations to scan written documentation and copy and paste communications received via email or text into electronic medical records. The same commenters expressed concerns that the requirements were overly broad and recommended that CMS revise its proposals to both allow PACE organization staff to use their discretion when determining the types of communication that must be included in a participant's medical record and exclude communications related to processing of service requests, appeals and grievances as those communications are often kept in separate systems. Another commenter indicated that the practice of summarizing verbal conversations and documenting in the EMR should apply to written communications. This commenter also recommended that CMS clarify its expectations with regard to communications from advocacy or governmental agencies and suggested that faxes and emails requesting documents should not be placed in the medical record.

Response: We appreciate commenters' feedback and suggestions on §§ 460.200(d)(2) and 460.210(b)(6). As we indicated in the discussion regarding § 460.200 at section VI.E. of this final rule, we made corresponding changes to § 460.210(b)(6) to require that the PACE organization maintain written communications in their original written form in the participant's medical record. (85 FR 9135). We made these corresponding changes at § 460.210(b)(6) in order to establish requirements that would govern how PACE organizations must maintain written communications under § 460.200(d)(2). Currently, § 460.210(b)(7) (redesignated at 460.210(b)(10) in this rule) requires PACE organizations to document reports of contact with informal support, for example, caregivers, legal guardians, or next of kin in the participant's medical record. Since these reports of contact are already maintained in the medical record, we believe that PACE organizations should also maintain original written communication from the participant, his or her designated representative, family members, caregivers, or any other individual who provides information pertinent to a participant's care, health or safety, as well as communications from advocacy or governmental agencies like an AAA or APS within the medical record. We believe that documenting this written communication is necessary to maintain a comprehensive medical record for each participant that is complete and accurately documented, and in order to ensure that the IDT is remaining alert to pertinent information. We do, however, agree with the commenters' recommendation that PACE organizations should be permitted to include an unaltered electronic copy, such as a scanned pdf, of the original written communication in a participant's medical record, which aligns with the intent of this proposal. As discussed in the proposed rule related to § 460.200(d)(2), we were motivated in making this proposal by a concern that PACE organizations are not accurately summarizing written communication or retaining relevant information in written communications they receive. (85 FR 9134). The original basis for the proposal at § 460.200(d)(2) also led us to establish the corresponding changes to § 460.210(b)(6) which would require PACE organizations to maintain these communications in the medical record. (85 FR 9135). We continue to believe that this proposal will ensure that PACE organizations retain relevant information received in written communications relating to the care, health and safety of a participant. We also believe that commenters' suggestion to permit PACE organizations to retain an unaltered electronic copy would be consistent with this proposal, while also reducing the burden associated with storing the documentation in its original format. This change means that PACE organizations would be required to maintain all covered written communications described in § 460.210(b)(6)(i) and (ii), but that they can be maintained in either their original form or as an unaltered electronic copy. We believe this change to § 460.210(b)(6) will ensure that written communications are complete, accurately documented, readily accessible, and available to all staff, while allowing additional administrative flexibility for PACE organizations in operationalizing this requirement. We are not establishing specific requirements governing where affected communications must be stored within a participant's medical record. PACE organizations may operationalize these requirements in accordance with the capabilities of their medical records systems. PACE organizations may also identify which staff will be responsible for entering these communications in the medical record. Section 460.210(b)(6) does not require that covered communications be entered by direct care staff. Although direct care staff must remain alert to the pertinent information contained within these covered communications, PACE organizations may assign the responsibility for entering these covered communications to any staff, including those that does not provide direct care to participants.

After consideration of the comments received and for the reasons outlined in our responses to comments, we are finalizing § 460.210(b)(4) and (5) as proposed. We are also finalizing § 460.210(b)(6) with one modification in the regulation text, which will require PACE organizations to include original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant, in the participant's medical record.

G. PACE Participant Rights: Contact Information and Access Requirements (§ 460.112)

Sections 1894(b)(2)(B) and 1934(b)(2)(B) of the Act specify in part that PACE organizations must have in effect written safeguards of the rights of enrolled participants including a patient bill of rights. Previously, we established in § 460.112 certain rights to which a participant is entitled. This includes the participant's right to receive accurate, easily understood information and to receive assistance in making informed health care decisions under § 460.112(b); and the participant's right to a choice of health care providers, within the PACE organization's network, that is sufficient to ensure access to appropriate high-quality

health care under § 460.112(c). CMS proposed to add three new participant rights in § 460.112 to increase beneficiary protections: The right to contact 1–800–MEDICARE for information or to make a complaint; the right to have reasonable and timely access to specialists as indicated by the participant's health condition and consistent with current clinical practice guidelines; and the right to receive necessary care across all care settings, up to and including placement in a long term care facility when the PACE organization can no longer maintain the participant safely in the community through the support of PACE services.

Section 1804(b) of the Act requires CMS to provide information on Medicare programs through 1–800–MEDICARE, as a means by which individuals may seek information and assistance for Medicare programs. This number may be utilized by Medicare beneficiaries to address coverage questions, find plan information, or make complaints related to the Medicare program. While PACE organizations are responsible for providing to all participants all services covered under Medicare and Medicaid, including prescription drugs, and other services determined necessary by the IDT to improve and maintain the participant's overall health status, PACE organizations are not required to provide this toll-free number to participants in any current communication. In the MA program, MA organizations must provide this information to beneficiaries in their Annual Notice of Change (ANOC) and Evidence of Coverage (EOC) under § 422.111 as well as longstanding guidance under the Medicare Communications and Marketing Guidelines.[82] We have discovered through oversight and monitoring efforts that PACE participants and/or their caregivers are often not aware that, in addition to the internal grievance process under § 460.120, participants also have the right to contact 1–800–MEDICARE; for example, to file quality of care complaints, including filing a complaint regarding the delivery of a necessary service. For example, if the IDT approved treatment for a specific condition, but the participant never received that treatment, the participant or caregiver could call 1–800-Medicare to lodge a complaint. Given the frailty of the PACE population, we believe it is important that these participants be explicitly notified of their right to have their complaints heard and resolved by calling 1–800–MEDICARE. When a participant files a complaint with 1–800–MEDICARE, the complaint gets logged and routed to a CMS account manager or case worker in order to ensure it is appropriately responded to and resolved. To ensure PACE participants are notified about 1–800–MEDICARE, we proposed to amend § 460.112 by adding a new paragraph (b)(4) which would specify that participants have the right to contact 1–800–MEDICARE for information and assistance, including to make a complaint related to quality of care or delivery of a service. PACE organizations are required under § 460.116(c)(2) to display the PACE participant rights in a prominent location in the PACE center, and to include the participant bill of rights in the enrollment agreement under § 460.154(m). Thus, by adding (b)(4) would ensure each PACE organization makes the 1–800–MEDICARE number available to participants by posting it in an accessible location at the PACE center and including it in the enrollment agreement.

We also proposed to include a participant's right to have reasonable and timely access to specialists as indicated by the participant's health condition and consistent with current clinical practice guidelines at new § 460.112(c)(3). PACE organizations are responsible for ensuring participants receive all necessary care from specialists, which is coordinated through the primary care provider and IDT in accordance with § 460.102(c)(2)(ii) and (d)(1). In addition, as noted in the preamble to the 1999 PACE interim final rule that implemented the PACE program (see 64 FR 66260) and the preamble to the 2006 PACE final rule that implemented § 460.92 of the regulations (see 71 FR 71305), PACE organizations must utilize clinical practice guidelines to ensure the quality of care for PACE participants. CMS has also historically required the use of clinical practice guidelines and professional standards in determining outcome measures applicable to the care of PACE participants as part of the PACE organizations quality improvement program (see § 460.134(b)). The 1999 PACE interim final rule also established the expectation that PACE organizations will utilize current clinical standards as a routine part of their daily operations. (64 FR 66260). Because part of the purpose of the quality improvement program is to identify areas to improve or maintain the delivery of services and patient care, CMS believes that these same guidelines and standards should be used as part of care planning and in making determinations about services as discussed in section VI.C. of this final rule. However, CMS' audits of PACE organizations have shown that some PACE participants have not received timely access to appropriate specialists as necessary to improve and maintain the participant's overall health status and in accordance with current clinical practice guidelines. Instead, the IDTs at some PACE organizations seem to be making their decisions based on factors not related to the participant's health condition. In some instances, participants have experienced negative outcomes because they have not received access to a specialist. Therefore, we proposed to redesignate paragraph (c)(3) as (c)(5) and add a new paragraph (c)(3), which expressly states each participant has the right to reasonable and timely access to specialists as indicated by the participant's health condition and consistent with current clinical practice guidelines.

Lastly, we added a new paragraph at § 460.112(c)(4) to address a participant's right to receive care across all care settings. A PACE organization is expected to provide for the care that is necessary for each participant and determine the appropriate setting in which to provide that care, up to and including placement in a long term care facility when a participant's condition requires it (see § 460.98(a) and (b)). However, CMS' monitoring and audit activity show that some PACE organizations are not providing long-term care services, even when their IDTs determine a participant can no longer live safely in their home and requires a higher level of care. We have learned that in some cases, affected participants disenroll from PACE in order to receive the long-term care that is needed. One of the purposes of the PACE program is to enable frail, older adults to live in the community as long as medically and socially feasible (see § 460.4(b)(3)). PACE organizations are also responsible for furnishing comprehensive medical, health, and social services that integrate acute and long-term care, and providing services that are accessible and adequate to meet the needs of its participants. (See § 460.98(b) and (d)(2) respectively). Lastly, enrollment in the PACE program continues until the participant's death, regardless of changes in health status, unless the participant voluntarily disenrolls, or is involuntarily disenrolled. (See § 460.160(a)). A PACE organization cannot deny placement in

[82] *https://www.cms.gov/Medicare/Health-Plans/ManagedCareMarketing/MarketngModels StandardDocumentsandEducationalMaterial.html.*

a long-term care facility if the IDT determines the participant requires 24-hour care but the PACE organization does not have a method for providing that care in the home through either its employees or contractors. See the relevant discussion under section VI.D. of this final rule regarding providing participants access to services 24 hours a day, every day of the year, across all care settings. In order to provide more specific detail about what this fundamental program requirement entails, we added § 460.112(c)(4) which would state that a participant has the right to receive necessary care in all care settings up to and including placement in a long term care facility when the PACE organization can no longer provide the services necessary to maintain the participant safely in the community.

We summarize the comments on the proposals related to PACE participant rights, and provide our responses to those comments, below.

Comment: All commenters that addressed this proposal agreed with CMS's proposal to add a participant right at § 460.112(b)(4) to inform participants of their right to contact 1–800–MEDICARE for information or assistance, including making a complaint related to the quality of care or the delivery of a service. These commenters also requested that CMS ensure that call center representatives are trained on PACE requirements and are able to handle inquiries from PACE participants.

Response: We thank the commenters for expressing support for including the 1–800–MEDICARE number in the participant rights. We are committed to ensuring that participants concerns are addressed appropriately. Call center operatives are currently educated and trained on all Medicare programs, including PACE, and should be able to fully address PACE participant inquiries. PACE participants currently have the ability to contact 1–800–MEDICARE for concerns; however, participants are not utilizing this resource frequently, potentially because of a lack of knowledge about 1–800–MEDICARE, and we expect that by requiring this telephone number to be displayed in the PACE center and included in the participant's bill of rights, participants will more frequently utilize this resource if needed.

Comment: All commenters that addressed this proposal were fully supportive of the addition of § 460.112(c)(3) and (c)(4). These commenters noted that while they agree with the addition of (c)(4), there may be situations when placement in a long-term nursing facility may not be compatible with a participant's wishes.

Response: We appreciate the commenters' support for these proposals. As noted in section VI.G. of the proposed rule, a PACE organization cannot deny placement in a long-term care facility if the IDT determines that the participant requires 24-hour care, but the PACE organization is unable to provide 24-hour care in the home through either its employees or contractors. Based on our experience overseeing PACE organizations, we have observed situations in which participants and caregivers were encouraged to disenroll from the PACE organization when long-term care placement was necessary to meet the participants needs. As required by § 460.162(c), ''a PACE organization must ensure that its employees or contractors do not engage in any practice that would reasonably be expected to have the effect of steering or encouraging disenrollment of participants due to a change in health status.'' However, we understand that placement in a long-term care facility may not always be in line with a participant's wishes, and it is not our intent to require PACE organizations to place participants into long-term care facilities against their wishes.

After consideration of the comments received, we are finalizing this provision without modification.

H. Enforcement Action Appeal Rights Under PACE (§ 460.56)

Sections 1894(e)(7) and 1934(e)(7) of the Act specify that, under regulations, the provisions at section 1857(h) of the Act, governing the procedures for termination of a contract with an MA organization, apply to the termination and sanctions of a PACE program agreement and PACE organization in the same manner as they apply to an MA organization under Medicare Advantage. The current enforcement provisions at 42 CFR part 460, subpart D, do not specify a process for appeals related to civil money penalties or intermediate sanctions. However, at § 460.54, the regulations include appeal rights for termination procedures. In the preamble to the 1999 PACE interim final rule (64 FR 66236), we discuss the requirement in the BBA of 1997 that we take into account some of the requirements established for MA as we develop regulations for PACE organizations in certain areas common to both programs, such as beneficiary protections, payment rates, and sanctions. CMS has interpreted this legal framework as granting the agency the authority to utilize the appeals processes that apply to MA organizations under § 422.756 when imposing a suspension of enrollment or payment, or imposing civil money penalties on PACE organizations. Although it has not been codified in regulation, CMS currently provides PACE organizations with these appeal rights when imposing enforcement actions under §§ 460.42, 460.46, and 460.48(b).

Therefore, in an effort to enhance transparency and ensure that PACE organizations are aware of their right to appeal an enforcement action, we added a new § 460.56 in subpart D of the PACE regulations to affirmatively state that a PACE organization may request a hearing according to the procedures at § 422.756 when CMS imposes a sanction or civil money penalty under §§ 460.42, 460.46, or 460.48(b) on PACE organizations.

For suspensions of enrollment or payment listed under §§ 460.42 and 460.48(b), CMS will follow the hearing procedures for imposing intermediate sanctions at § 422.756(b), which includes the right to a hearing before a CMS designated hearing officer under subpart N of part 422. Under the process specified at § 422.756(b), CMS provides organizations with a notice of intent to impose sanctions and their right to a hearing before a CMS hearing officer. Organizations are given 15 days from the date of the notice to request a hearing.

For civil money penalties listed under § 460.46, CMS will follow the procedures for imposition of civil money penalties at § 422.756(e)(2)(v), which includes the right to a hearing before an Administrative Law Judge (ALJ) under subpart T of part 422. In addition, CMS must send a written notice of the agency's decision to impose a civil money penalty, the amount of the penalty, the date the penalty is due, information about the organization's right to a hearing and where to file the request for hearing.

We believe this will ensure PACE organizations understand the process CMS utilizes for imposing these enforcement actions, as well as the PACE organization's right to appeal those actions.

We did not include § 460.48(a) or (c) in the proposed rule because those provisions refer to the termination of a PACE program agreement, for which procedures are already set forth at § 460.54. However, § 460.48(b) authorizes us to withhold payment under the PACE program agreement, which is similar to the suspension of payment provided at § 460.42(b)(1).

Therefore, the procedures at § 422.756 would apply, as specified at § 460.56(a).

We received no comments on our proposed new § 460.56 to address enforcement action appeal rights and therefore are finalizing this provision without modification.

I. PACE Definitions (§ 460.6)

As discussed briefly at section VI.A. of this final rule, we proposed to modify our existing definition of ''services.'' Currently, the term ''services'' is defined as including items and services. We proposed a change to use the term ''service'' in § 460.6 to be consistent with the use of the singular in the terms defined under § 460.6. The definition of the singular ''service'' would also apply to the plural ''services.'' In addition, we proposed to modify our definition of ''service'' to better reflect the full scope of the PACE benefit package by stating that the term ''service'', as used in part 460, means all services that could be required under § 460.92, including items and drugs. In the 1999 PACE interim final rule, we stated that required services included all current Medicare services, all Medicaid-covered services as specified by the state's approved Medicaid plan, and specifically included ''drugs and biologicals'' as a part of a list of minimum benefits PACE organizations were required to provide. (64 FR 66246 and 66301). In the 2006 PACE final rule, we removed the specific listing of all required services because we determined that it was not possible to provide a complete list of all services that must be furnished to participants if ordered by the IDT. (71 FR 71281). Instead, we adopted the language that is currently used in § 460.92 to identify the services required as a part of the PACE benefit package. Since that time, through CMS' monitoring and oversight, we have found that some PACE organizations do not realize that they are responsible for providing the full Medicare benefit, including the provision of Part D drugs. Therefore, we proposed to make changes by adding ''drugs'' to the definition of services for PACE purposes which is consistent with how we have historically defined the types of services that are required in PACE. We believe this change is necessary to remove potential ambiguity about the meaning of the terms ''service'' or ''services'' when used in the PACE regulations.

We received no comments on the proposed definition of ''service'' in § 460.6 and therefore are finalizing this provision without modification.

VII. Technical Changes

A. Exclusion of Services Furnished Under a Private Contract (§ 422.220)

We proposed two substantive changes to § 422.220 regarding the limits on when an MA organization may or may not pay an opt-out provider. In our proposal to amend § 422.220, we sought first to align the regulatory definition of ''physician'' in regard to private contracts with the definition found in corresponding statute. Currently, section 1802(b)(6)(B) of the Act defines ''physician,'' in regard to private contracts, as a term that is defined by paragraphs (1), (2), (3), and (4) of section 1861(r) of the Act; however, § 422.220 currently defines ''physician,'' in respect to private contracts, using only paragraph (1) of section 1861(r) of the Act—narrowing the regulatory definition to exclude physicians who are not doctors of medicine or osteopathy. To avoid confusion about what kinds of providers the opt-out and private contracting rules apply to, we proposed to extend the regulatory definition of ''physician'' to match the statutory definition when the term is used in regard to private contracts. We designed our proposal to achieve this by adding references to paragraphs (2), (3) and (4) of section 1861(r) of the Act to the definition of ''physician'' at § 422.220 to make the regulatory provision consistent with the statute.

Second, we proposed to clarify the prohibition at § 422.220 in regard to the types of items and services for which an opt-out provider may and may not receive payment from an MA organization. In the proposed rule, we discussed our interpretation of the Medicare statute that payments for supplemental benefits are outside the scope of the statutory restriction on payments to opt-out providers. Section 1802(b)(1)(B) of the Act states that an opt-out physician or practitioner must receive no reimbursement under the Medicare statute directly or on a capitated basis and ''no amount for such item or service from an organization which receives reimbursement for such item or service under [Title XVIII] directly or on a capitated basis.'' We explained that because MA organizations only receive *reimbursement* for Part A and Part B items and services under Title XVIII of the Act, supplemental benefits are not among the items and services for which an MA organization is prohibited from making payments to an opted-out provider. In our proposal, we recommended amending the regulations at § 422.220 to make this distinction so that paragraph (a) states the prohibition on payment while paragraphs (b) and (c) direct when an MA organization must or may nonetheless pay an opt-out provider. We use the terms ''basic benefits'' and ''supplemental benefits'' consistent with how those terms are used in §§ 422.100(c) and 422.102 and in section VI.F. of this final rule.

We received the comments noted on this proposal and our responses follow.

Comment: CMS received comments from an MA organization and a provider association in regard to our proposals. The comments CMS received were fully supportive of CMS's proposal to amend CMS's regulatory definition of ''physician'' at § 422.220, which pertains to private contracts between providers and Medicare Advantage enrollees, to align with the corresponding statutory definition of ''physician'' under section 1802(b)(6)(B) of the Act. CMS also received full support from these commenters in regard to CMS's proposal to amend § 422.220 to clarify that the restrictions on payments to opt-out providers apply only to payments for basic benefits (that is, items and services covered under Parts A and B).

Response: We thank the commenters for their remarks, and believe that in finalizing these proposals we better align our regulations with the statutes from which they originated.

We received no additional comments on this proposal. After consideration of the comments and for the reasons outlined in the proposed rule and our response to comments, we are finalizing these proposed changes to § 422.220 without modification.

B. Disclosure Requirements for Explanation of Benefits (§ 422.111)

In a final rule titled, ''Medicare Program; Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs for Contract Year 2012 and Other Changes; Final Rule'' (73 FR 21504) (hereinafter referred to as the April 2011 final rule), we finalized a regulation at § 422.111(b)(12) that requires an MA organization to furnish directly to enrollees, in the manner specified by CMS and in a form easily understandable to such enrollees, a written explanation of benefits, when benefits are provided under this part. Following the finalization of this regulation, CMS tested model Explanation of Benefits (EOB) templates, and, based on public comments solicited via HPMS memo and in 77 FR 70445, November 26, 2012, made final revisions to the EOB templates and issued guidance about the Part C EOBs. Subsequently, the

requirement for MA organizations to furnish Part C EOBs to their enrollees applied beginning April 1, 2014.

In the February 2020 proposed rule, we sought to clarify and codify existing requirements for the Part C EOB. First, we sought to change where this requirement appears in § 422.111(b) because paragraph (b) specifies general information about the MA plan that must be disclosed to each enrollee at the time of enrollment and annually, which is not when the EOB should be sent. We also proposed to clarify that the requirement to send the Part C EOB is permanently in effect. To achieve this, we proposed to move the substance of the regulation from (b)(12) to a new paragraph (k), with a minor change to delete the phrase ''CMS may require'' and to add the word ''must'' after ''MA organizations.'' We received no comments in regard to these two proposed changes.

We also proposed to codify the existing content requirements of the Part C EOB in new § 422.111(k)(1), (k)(2) and (k)(3). For each Part A and Part B covered item and service, mandatory supplemental benefit, and optional supplemental benefit furnished during the reporting period, we proposed that an MA organization must include a corresponding descriptor, billing code, and amount billed; total cost approved for reimbursement, share of the total cost paid by the plan; and the share of the total cost for which the enrollee is liable. We also proposed that MA organizations must include the most current year-to-date totals in the EOB: the cumulative amount billed by all providers, the cumulative total costs approved by the plan, the cumulative share of total cost paid for by the plan, the cumulative share of total cost for which the enrollee is liable, the amount an enrollee has incurred toward the MOOP limit (as applicable), and the amount an enrollee has incurred toward the deductible (as applicable). We also proposed that MA organizations must provide clear contact information for enrollee customer service, instructions on how to report fraud, and for any EOB that includes one or more denied claims, the EOB must include a clear identification of the claim(s) denied as well as information about the denial and the enrollee's appeal rights. Our proposed regulation directed that this information about denied claims in the EOB would not replace the notice for adverse coverage decisions required by §§ 422.568 and 422.570.

We also proposed to codify the time frame choices available for MA organizations in sending the EOB. Proposed § 422.111(k)(4) would require an MA organization to choose to either send EOBs on a monthly basis or quarterly basis with per-claim notification. Consistent with our current policy, we proposed that MA organizations that send EOBs monthly must send them before the end of each month that follows the month a claim was filed and that a per-claim notice must be sent on the same cycle as a monthly EOB, which is before the end of each month that follows the month a claim was filed; MA organizations that choose to send per-claim notices must also send quarterly summary EOBs. Consistent with our current policy, we also proposed that MA organizations that choose to send EOBs on a quarterly basis must send an EOB no later than the end of each month following the quarter a claim was filed.

We summarize the comments received on our proposal and our responses follow.

Comment: A commenter asked CMS to clarify the term ''filed'' as it is used in paragraph (k)(4) to require the monthly EOB to be sent before the end of the month after the month in which a claim is filed and the quarterly EOB to be sent before the end of each month that follows the quarter in which a claim was filed.

Response: We clarify that we consider a claim to be filed when it has been received by an MA organization. This is consistent with our current policy.

Comment: Although CMS did not specifically discuss the existing policy that exempts MA organizations from sending EOBs to dual-eligible enrollees, one commenter asked CMS whether or not D–SNPs must send EOBs to their enrollees as a result of this rule.

Response: Currently, MA organizations are not required to send EOBs to dual-eligible enrollees, which would necessarily include any enrollee of a D–SNP, because dual-eligible enrollees generally do not pay any out-of-pocket costs. In the April 2011 final rule, we discussed the comments we solicited on this matter, and determined we would study the issue of applicability to dual-eligible enrollees (including those enrolled in D–SNPs) further under our pilot program. (76 FR 21507). At the conclusion of our pilot program, and after reviewing additional public comments solicited via a Health Plan Management System (HPMS) memo release with a 30-day comment period, as well as a November 26, 2012 **Federal Register** notice (77 FR 70445), the policy that exempts MA organizations from sending EOBs to dual-eligible enrollees was finalized. As we did not intend to make changes to Part C EOB policy in our proposal during this current round of rulemaking, we are finalizing this exception at § 422.111(k)(5).

Comment: A commenter, an MA organization, suggested that CMS no longer require MA plans and Part D sponsors to send Part C and Part D EOBs on a monthly basis. The MA organization stated that their enrollees experience confusion in regard to their EOBs which unnecessarily leads to complaints to their customer service department and to CMS. The MAO stated that their consumer research found that enrollees often did not read or did not know how to interpret their EOBs because the documents are lengthy and complex. They also found that their enrollees had a tendency to be interested in seeing how their cost sharing applied toward their deductible and maximum-out-of-pocket costs, and less interested in information that involves complex claims details or medical terminology. The MAO also stated that enrollees often complain about receiving EOBs on a monthly basis. The MAO recommended that CMS modify existing EOB guidance to permit MA plans and Part D sponsors to send quarterly statements to enrollees that include EOB totals related to cost sharing only, rather than the full EOB.

Response: The current Part C EOB was designed to ensure that MA enrollees have all of the information necessary to make important decisions about their health care, and its content was informed by input from MA organizations, patient advocacy groups, and other stakeholders. After publication of the April 2011 final rule, we engaged MA organizations, industry and advocacy groups, and enrollees in listening sessions to gather their feedback; using the feedback we collected, we then designed and tested models through a small pilot program with a volunteer MA organization in CY 2012. After the conclusion of this process, we sought additional public comments on the models through a Health Plan Management System (HPMS) memo release with a 30-day comment period. Based on public comment we received on the HPMS memo and a November 26, 2012 **Federal Register** notice, we finalized the current models for the Part C EOB. While an enrollee may not always need the entirety of the information stated in their EOB, some circumstances (for example, appeals) may arise when the enrollee needs more information than just their updated cost-sharing totals. At this time, CMS will not be changing the content requirements of the EOB; however, we acknowledge the importance of providing easily

understandable information to enrollees and may consider limiting the content requirements in future rulemaking. We are finalizing the proposed option for MA organizations to use a quarterly cycle for furnishing the EOBs. We note that the regulation text does not require that the MA organization use the same cycle for every enrollee, so an MA organization may elect to provide an option for enrollees to select the monthly or quarterly cycle, provided that the applicable content and timing requirements are met. Finally, the Part D EOB notice is outside the scope of this rulemaking.

Comment: Some commenters asked that CMS reconsider the requirement to send enrollees hard copies of their EOBs. An MA organization suggested that rather that mail paper EOBs, plans should be permitted to instead send enrollees a paper disclosure notice instructing them to contact customer service to obtain a hardcopy, or go online to view an electronic copy. The same MA organization stated that plans should continue to mail hard copies of the Integrated Denial Notice (IDN). Another commenter suggested that CMS consider changing the default requirement to electronic EOBs with paper opt-in, and stated that savings on paper, printing, and mailing could be used toward enhanced care and benefits.

Response: While CMS continues to drive innovation with respect to electronic health data access, we also recognize that a default electronic format could create disparity for enrollees who do not have the skills or equipment to obtain their claims data digitally. In order to help ensure that all enrollees are able to access their EOBs, CMS does not support a change in policy that would permit MA organizations to send EOBs electronically by default at this time. With respect to paper and electronic EOBs, CMS is not changing the requirement (finalized in section V.E of this rule) that MA organizations mail required materials in hard copy or provide them electronically following the requirements set forth in § 422.2267(d). CMS notes that in order to send an EOB to an enrollee electronically, the MA organization must obtain prior consent from the enrollee, provide instructions on how and when the enrollee can access the EOB, have a process in place through which an enrollee can request hard copies be mailed, and have a process for automatic mailing of hard copies when electronic versions are undeliverable, consistent with the requirements outlined at § 422.2267(d)(2)(ii).

Comment: An MA organization recommended that CMS provide more flexibility with regard to the frequency that an EOB can be sent to enrollees. Specifically, the MA organization suggested that CMS allow health plans to send the EOB every two weeks.

Response: Under our current policy and the regulation being finalized here at § 422.111(k), an MA organization must deliver the EOB at least on a monthly or quarterly basis, complying with the applicable content requirements. While CMS currently permits these two different frequency cycles, plans may still communicate information to their enrollees on a more frequent basis as long as the requirements of either the monthly or quarterly cycle continue to be met. At this time, CMS will not be making changes to the EOB frequency cycles or their respective requirements.

After consideration of the comments and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing our proposal for § 422.111(k), with one substantive modification to provide that MA organizations are not required to send the explanation of benefits to dual-eligible enrollees.

C. Special Requirements During a Disaster or Emergency (§ 422.100)

Section 422.100(m)(5)(iii) currently requires an MA organization to provide the information described in paragraphs (m)(1), (2), (3), and (4)(i) on its website, but § 422.100(m) does not have a paragraph (m)(4)(i) and paragraph (m)(4) requires a notice to CMS regarding the MA organization's ability to resume normal operations; rather, paragraph (m)(5)(i) describes the terms and conditions of payment during a public health emergency or disaster for non-contracted providers furnishing benefits to plan enrollees residing in the state-of-disaster area, which is the information we intended to be posted by the MA organization. As noted in the proposed rule, the final rule that adopted § 422.100(m), titled ''Medicare Program Contract Year 2016 Policy and Technical Changes to the Medicare Advantage and the Medicare Prescription Drug Benefit Programs'' (80 FR 7912), was clear that the requirement at 422.100(m)(5)(iii) was to post the disaster and emergency policies in order to facilitate enrollee access to needed services while normal care delivery is unavailable, which would enable enrollees and providers to know the payment policies for out-of-network services provided during disasters.

We proposed to amend § 422.100(m)(5)(iii) to correct the text, replacing the reference to paragraph (m)(4)(i) to paragraph (m)(5)(i). We also proposed to update the regulation text to use ''website'' rather than ''Web site'' since the non-hyphenated non-capitalized term ''website'' is now commonly used and more consistent with other regulations in part 422.

We received no comments on this proposal and are finalizing the proposed technical amendments to § 422.100(m)(5) for the reasons outlined in the proposed rule.

D. Effective Date for Exclusion of Coverage for Kidney Acquisitions From Basic Benefits (§ 422.100)

Section 1852(a)(1)(B)(i) of the Act defines the term ''benefits under the original Medicare Fee-for-Service program option'' for purposes of the requirement in subparagraph (a)(1)(A) that each MA organization provide these benefits to MA enrollees. Section 17006(c)(1) of the Cures Act amended section 1852(a)(1)(B)(i) of the Act by inserting ''or coverage for organ acquisitions for kidney transplants, including as covered under section 1881(d)'' after ''hospice care.'' Per section 17006(c)(3) of the Cures Act, this amendment applies with respect to plan years beginning on or after January 1, 2021. Thus, effective January 1, 2021, MA plans will no longer cover organ acquisitions for kidney transplants.

In the April 2019 final rule, we amended the definition of ''basic benefits'' at § 422.100(c)(1) to include ''additional telehealth benefits,'' and in doing so, we also amended § 422.100(c)(1) to note the new exclusion of coverage for organ acquisitions for kidney transplants (in addition to the existing exclusion for hospice care). However, we inadvertently omitted the identification of the 2021 effective date for this change set forth in the Cures Act.

In the proposed rule, we proposed a technical correction that would add the 2021 effective date to § 422.100(c)(1) for the exclusion of original Medicare coverage for organ acquisitions for kidney transplants. Specifically, we proposed to correct the phrase ''(other than hospice care or coverage for organ acquisitions for kidney transplants)'' to read: ''(other than hospice care or, beginning in 2021, coverage for organ acquisitions for kidney transplants).'' This provision is technical and, as stated in the proposed rule, is therefore not expected to have economic impact beyond current operating expenses.

We received no comments on this proposal and are finalizing the proposed amendments to § 422.100(c)(1) without

modification for the reasons outlined in the proposed rule.

E. Add Back Cost Plan Related Sections From Previous Final Regulation (§ 422.503)

In the Medicare Program; Contract Year 2015 Policy and Technical Changes to the Medicare Advantage and Medicare Prescription Drug Benefit Programs; Final Rule (hereinafter referred to as the May 2014 final rule), we finalized regulations affecting the cost plan non-renewal-related requirements (79 FR 29850 through 29851, 29959). The final regulation inadvertently identified the non-renewal section as § 422.503(b)(4)(vi)(G)(*5*)(*i*) and (*ii*) when instead the revisions should have been specified as revising § 422.503(b)(5)(i) and (ii). Although the regulatory text for the provision was published in the May 2014 final rule, it was not correctly codified in the CFR. In the February 2020 proposed rule, we proposed to designate the provision in the correct paragraph of § 422.503.

The rule we adopted in 2014 provides that an entity seeking to offer an MA organization may not accept new enrollees under a section 1876 reasonable cost contract in any area in which it seeks to offer an MA plan. In the February 2020 proposed rule, we proposed to codify a policy adopted in the May 2014 final rule that prohibits an organization from offering and accepting enrollment in both an MA plan and a cost plan in the same service area; that policy applied to when the MA organization and the cost plan organization were the same legal entity or corporate affiliates. The proposed rule explained the redesignation:

- In new § 422.503(b)(5)(i), we specify that an entity seeking to contract as an MA organization must not accept, or share a corporate parent organization owning a controlling interest in an entity that accepts, new enrollees under a section 1876 reasonable cost contract in any area in which it seeks to offer an MA plan.
- In new § 422.503(b)(5)(ii), we specify that an entity seeking to offer an MA organization must not accept, or be either the parent organization owning a controlling interest of or subsidiary of, an entity that accepts, new enrollees under a section 1876 reasonable cost contract in any area in which it seeks to offer an MA plan.

We also proposed minor technical corrections to the regulation text described in the May 2014 final rule to improve the flow of the regulation text.

CMS received comments from two healthcare organizations and a trade association.

Comment: The commenters requested that the provision not be finalized, stating that it was not necessary. They commented that should CMS finalize the proposal, that it not be applied to entities that have both a cost plan and dual eligible special needs plan (D–SNP) or EGWPs, as the likelihood of an organization moving enrollees from one of these plans to another was especially low. In addition, the commenters requested that we revise our current understanding of the service area affected by the provision to determine whether there is an overlap between a cost plan and an MA plan on a county-by-county basis.

Response: The proposal in this rule is to restore, with minor technical and grammatical changes, language from a rule published in the **Federal Register** on May 23, 2014, that was not included in the Code of Federal Regulations. As such, we are proposing a technical change and the comments are outside the scope of this rule. Similar comments regarding the scope of the policy and whether it should apply to D–SNPs were submitted and addressed in that earlier rulemaking. For public comments and CMS responses to policy questions on the provision, as well as additional discussion of this provision, see the May 23, 2014 final rule (79 FR 29850–29851; 29944; 29959).

After considering the comments and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing the amendment to § 422.503(b)(5) as proposed with minor grammatical changes.

F. Definition of ''Institutionalized'' (§ 422.2)

Section 1859(b)(6)(B)(i) of the Act permitted the Secretary to define the term *institutionalized* for the purposes of establishing eligibility criteria for Medicare Advantage (MA) special needs plans for individuals who are institutionalized (I–SNPs). In addition, section 1851(e)(2)(D) of the Act permitted the Secretary to define the term for purposes of eligibility for a continuous open enrollment period to enroll or change enrollment in an MA plan, except for MA MSA plans. CMS codified the current definition of *institutionalized* at § 422.2 in the January 2005 final rule (70 FR 4588) as an MA eligible individual who continuously resides or is expected to continuously reside for 90 days or longer in a long-term care (LTC) facility which is a skilled nursing facility (SNF) nursing facility (NF); SNF/NF; an intermediate care facility for individuals with intellectual disabilities (ICF/IID); or an inpatient psychiatric facility. This definition is used in the MA regulations (42 CFR part 422) to establish eligibility for I–SNPs and eligibility for continuous open enrollment.

We proposed to revise the definition of *institutionalized* in § 422.2 to expand the list of facilities and to add a standard to use to identify additional facilities where an institutionalized individual may reside in order to provide necessary flexibility to the regulation. Under our proposal, an institutionalized individual would be an individual who continuously resides or is expected to continuously reside for 90 days or longer in one of the following long-term care facility settings:

(1) Skilled nursing facility (SNF) as defined in section 1819 of the Act (Medicare);

(2) Nursing facility (NF) as defined in section 1919 of the Act (Medicaid);

(3) Intermediate care facility for individuals with intellectual and developmental disabilities as defined in section 1905(d) of the Act;

(4) Psychiatric hospital or unit as defined in section 1861(f) of the Act;

(5) Rehabilitation hospital or unit as defined in section 1886(d)(1)(B) of the Act;

(6) Long-term care hospital as defined in section 1886(d)(1)(B) of the Act;

(7) Hospital which has an agreement under section 1883 of the Act (a swing bed hospital); and,

(8) Subject to CMS approval, a facility that is not listed in paragraphs (1) through (7) but meets both of the following: (i) Furnishes similar long-term, healthcare services that are covered under Medicare Part A, Medicare Part B, or Medicaid; and (ii) whose residents have similar needs and healthcare status as residents of one or more facilities listed in paragraphs (1) through (7).

We explained in the proposed rule our concern that the current definition is too limited in scope given the array of institution and facility types in place today. We noted how our current subregulatory guidance identifies additional facilities and that the proposed changes to the definition would align the regulatory text with existing operational practice and current guidance, clarify our policy for MA organizations, and promote the expansion of I–SNP offerings under the MA program. Our guidance (Chapter 16b of the Medicare Managed Care Manual (MMCM) and the MA Enrollment and Disenrollment

Guidance [83]) taken together list the five types of institutions in the current definition and other institutions that are identified in some way in Titles XVIII or XIX of the Act in connection with the Medicare and Medicaid programs. We also explained the need for a standard that we could use to identify additional facility types, without having to go through future rulemaking, that we believed would be appropriate to use for defining when an individual is *institutionalized.* We explained how, under our proposal and using this new standard, CMS could permit an MA organization to offer an I–SNP to serve beneficiaries that continuously reside in facilities that meet this new standard but are not listed in the definition, provided the plan meets the remaining criteria for I–SNPs. We explained how our proposed new definition, as a whole, could lead to additional types of I–SNPs and provide more options to Medicare beneficiaries for special needs plans targeted to the needs of individuals who are *institutionalized.*

In the proposed rule, we acknowledged that the proposed definition would not fully align with § 423.772, which defines ''institutionalized individual'' as a full-benefit dual eligible individual who is an inpatient in a medical institution or nursing facility for which payment is made under Medicaid throughout a month, as defined under section 1902(q)(1)(B) of the Act. We explained that we did not believe alignment was necessary because the definition in § 423.772 serves a different purpose than the definition we proposed for § 422.2 and that differences between the two definitions had been in place since 2005, reflecting these different purposes. (85 FR 9145)

Finally, we discussed why we did not propose to change the definition of ''institutionalized-equivalent'' even though that term is also used to establish I–SNPs and eligibility for I–SNPs.

We received the following comments related to our proposals, and our responses follow:

Comment: A commenter stated that the proposed rule disqualifies Medicare Advantage enrollees with advanced cancer disease residing in a neoplastic disease care hospital by implementing a time requirement of 90 days, and that current subregulatory guidance in section 30.3 of Chapter 2 to the Managed Care Manual and regulations at 42 CFR 422.62(a)(4) do not require the 90-day time requirement for an institutionalized stay.

Response: As proposed and finalized, the revised definition of the term *institutionalized* aligns with current CMS guidance and expands the definition of *institutionalized* in § 422.2 to reflect the evolution of institutions over time and the current landscape of institutional health care today. The current definition of *institutionalized* in § 422.2 includes, and has included since the definition was adopted in 2005 (70 FR 4596, 4714), the criterion that the MA eligible individual continuously resides or is expected to continuously reside for 90 days or longer in a long-term care (LTC) facility. Our guidance in Chapter 2 of the Medicare Managed Care Manual, regarding enrollment and disenrollment, might not specifically address the requirement in the definition in § 422.2 that an individual reside or be expected to reside in a long term care facility of the type listed but that does not change the regulation. Because the definition includes individuals who are expected to reside in facility for a 90-day or longer continuous period, enrollment into an I–SNP may precede the 90-day point based on an appropriate assessment that the regulatory standards are met, as CMS explained in the preamble to the 2005 final rule. (70 FR 4596). The new definition of *institutionalized* maintains this criterion and identifies seven specific types of long-term care facilities rather than the original five institution types listed in the definition.

In addition, the definition in the final rule specifies that CMS may approve additional facilities that are not listed previously, but: (i) Furnish similar long-term, healthcare services that are covered under Medicare Part A or Part B or Medicaid; and (ii) whose residents have similar needs and healthcare status as residents of one or more facilities previously listed. In implementing this final rule, CMS will establish a review process to determine whether a particular different institution type meets these standards for designation under this definition and therefore permit an MA organization to offer an I–SNP to serve beneficiaries that continuously reside in (or are expected to continuously reside for 90 days or longer in) such designated facilities, provided the plan meets the remaining qualifying criteria for I–SNPs. This new authority to identify non-listed facilities for purposes of determining if an individual is *institutionalized* is applicable for the contract and coverage year beginning January 1, 2022 and we intend to review requests from MA organizations and others to meet that timeframe for identifying facilities that meet this standard. In addition, individuals residing in institutions that qualify under this part of the definition will also be eligible for the continuous open enrollment under § 422.62(a)(4).

Comment: Another comment stated that the proposed rule would expand use of the definition by making it also applicable to the open enrollment period for *institutionalized* individuals. They note that this would have the effect of expanding a 90-day length of stay requirement to individuals for purposes of their qualification for the open enrollment period for *institutionalized* individuals (OEPI).

Response: The existing requirements establishing qualifications for the open enrollment period for *institutionalized* individuals (OEPI) are established in 42 CFR 422.62(a)(4), which provides that an individual who is eligible to elect an MA plan and who is *institutionalized,* as defined in § 422.2, is not limited (except with regard to MA MSA plans) in the number of elections or changes he or she may make. The use of the definition in § 422.2 to identify individuals who are eligible for this OEPI was adopted in a revision of § 422.62(a)(4) in the April 2018 final rule (83 FR 16616 through 16618, 16723). This final rule does not amend § 422.62(a)(4), so the revised definition of *institutionalized* at § 422.2 will apply to identify who is eligible for the OEPI. The revised definition expands the list of qualifying institutions and provides an opportunity for similar institutions to qualify. We disagree with the commenter, however, that the definition of *institutionalized,* as finalized under this rule, changes the previous requirement that an MA eligible individual must continuously reside or is expected to continuously reside for 90 days or longer in a long-term care (LTC) facility to meet the definition or to be eligible for the OEPI. Because the definition includes individuals who are expected to reside in facility for a 90 day or longer continuous period, enrollment into an I–SNP may precede the 90 day point based on an appropriate assessment.

Comment: Another commenter supported the proposed rule but had concerns that the change may hinder state Medicaid agency efforts to integrate Medicare and Medicaid programs on behalf of dual eligible beneficiaries through FIDE SNPs. First, the commenter believes that expanding the list of facilities and adding a

[83] Chapter 16b of the MMCM can be found here: *https://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/mc86c16b.pdf;* and the MA Enrollment and Disenrollment Guidance document can be found here: *https://www.cms.gov/Medicare/Eligibility-and-Enrollment/MedicareMangCareEligEnrol/Downloads/CY_2019_MA_Enrollment_and_Disenrollment_Guidance.pdf.*

standard to use to identify additional facilities where an institutionalized individual may reside could result in a managed care plan's ability to offer I–SNPs that do not meet the requirements to be D–SNPs to a largely dual eligible beneficiary population, and thus, the MA plan would be able operate outside of the State Medicaid Agency Contract (SMAC) requirement in section 1859 of the Act (added by the MIPPA). The commenter noted that the change in the definition of *institutionalized* creates concerns similar to the recent growth of D–SNP lookalike MA plans that CMS has sought to regulate. Second, the commenter stated that definitional change of institutionalized could potentially confuse dual eligible beneficiaries when selecting the best SNP for the beneficiary's specific needs. The commenter advised CMS and state Medicaid agencies to coordinate implementation if CMS adopted the proposed changes.

Response: We thank the commenter for their remarks, but do not share the same concerns that aligning the definition of *institutionalized* in § 422.2 with current CMS guidance and adding a standard to recognize facilities that are not listed in the definition, but serve the same function for individuals with similar needs, would adversely impact integration of Medicare and Medicaid services for dually eligible beneficiaries. First, with regard to the specifically listed facilities in the definition, this final rule is consolidating current CMS guidance regarding I–SNP and OEPI enrollment policies and is not a significant break from them. The final rule will also provide additional flexibility to account for changes in the types of institutions that could potentially be used for I–SNPs that are not covered by the current definition of *institutionalized.* As we stated in the proposed rule, we are creating criteria that would accommodate changes in forms of institutional care within American healthcare without fundamentally changing or conflicting with other regulatory and statutory provisions surrounding I–SNPs. Under the finalized rule, the definition of *institutionalized* could include, subject to CMS approval, an additional facility that is not listed previously but (i) furnishes similar long-term, healthcare services that are covered under Medicare Part A or Part B or Medicaid and (ii) whose residents have similar needs and healthcare status as residents of one or more facilities previously listed. Therefore, CMS could permit an MA organization to offer an I–SNP to serve beneficiaries that continuously reside in facilities that meet this new standard but are not listed in the definition, provided the plan meets the remaining criteria for I–SNPs. In addition, any I–SNP application containing newly authorized institutions will still need to meet the remaining review standards to gain approval.

Second, we recognize that a portion of I–SNP enrollees are dually eligible for Medicare and Medicaid, and that is also true for many Medicare beneficiaries requiring a nursing level of care; however, this overlap of eligible populations is not complete. This change in the definition of *institutionalized* does not change the current requirements that establish the process for I–SNP application approval such as meeting the care management requirements for all SNPs, required by section 1859(f)(5) of the Act. Given that an MA organization would need to meet a separate set of standards, we believe there is limited incentive for an MA organization to establish an I–SNP as opposed to a D–SNP as a means to circumvent the requirement for a contract between a state and MA organization, which is limited to D–SNPs under section 1859(f)(3)(D) of the Act and § 422.107. Finally, while we appreciate that having several plan options available for a beneficiary requires the beneficiary to think through his or her needs carefully and compare those to the specific benefits and costs of each plan, we do not believe that permitting I–SNPs to enroll individuals who continuously reside in (or are expected to continuously reside) for 90 days or longer in a facility that meets the new standard we are adopting creates unnecessary confusion or burden for beneficiaries. Having a number of plan choices will allow beneficiaries to choose among plans with potentially different plan networks, levels of out-of-pocket costs, and extra benefits like vision, hearing, and dental. We believe this ultimately increases the likelihood that beneficiaries will be able to find a satisfactory MA plan that fits their healthcare needs.

Comment: Another commenter supported the proposal, but recommended a clarification that a ''facility that furnishes similar long term healthcare services that are covered under Part A or Part B or Medicaid . . . .'' includes facilities/settings where the services may be furnished by external healthcare entities that are overseen by the facility.

Response: We do not believe the proposed rule will prohibit services from being furnished by external healthcare entities as long as all other requirements are met by the I–SNP and contracted facility under the plan. Therefore, we are not making the recommended revision.

After consideration of the comments and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing the revised definition of *institutionalized* at § 422.2 as proposed. In reviewing our proposal to amend the definition of *institutionalized,* we realized that the definition of ''special needs individual'' in § 422.2 refers to an individual who is institutionalized but not to an individual who is institutionalized-equivalent. In the final rule published in the **Federal Register** on January 12, 2009 (74 FR 1495 through 1496), we first clarified that that I–SNPs can enroll individuals who are institutionalized-equivalent. In that rule, we noted that section 164 of MIPPA amended section 1859(f) of the Act, allowing institutional SNPs to enroll a special needs individual who is living in the community but requires an institutional level of care (LOC) (that is, an ''institutional-equivalent individual''). In connection with that statutory amendment, we added the definition for the term ''institutionalized equivalent'' to § 422.2 but failed to amend the definition of ''special needs individual'' to include individuals who meet the standard of being institutionalized-equivalent. In order to address this oversight, we are finalizing here a technical change in the definition of ''special needs individual'' to add that an individual who is institutionalized-equivalent is also a special needs individual, which is consistent with that prior final rule and our current practice.

G. Medicare Electronic Complaint Form (§§ 422.504 and 423.505)

On April 15, 2011, CMS amended §§ 422.504 and 423.505 to add a new §§ 422.504(a)(15) and 423.505(b)(22) requiring MA and Part D plans to address and resolve complaints received through CMS' complaint tracking system and to provide a direct link on their main web page to the Medicare.gov electronic complaint form. We are finalizing our proposal to modify §§ 422.504(a)(15) and 423.505(b)(22) by removing §§ 422.504(a)(15)(ii) and 423.505(b)(22)(ii) and recodifying the substance (requiring plans to display a link to the electronic complaint form on the Medicare.gov internet website on the plan's main web page) to subpart V, Communication requirements. Sections 422.111(h)(2) and 423.128(d)(2) require MA and Part D plans to maintain a

website. In section VI.H. of this final rule, we are adding new §§ 422.2265 and 423.2265, which provide requirements for MA and Part D plan websites. Specifically, in §§ 422.2265(b) and 423.2265(b), we identify the required content for websites, including a link to the Medicare.gov electronic complaint form. We believe the requirement for a direct link is more appropriately addressed in CMS' website requirements rather than in §§ 422.504(a)(15) and 423.505(b)(22).

We are not making any substantive changes to §§ 422.504(a)(15) and 423.505(b)(22) other than minor changes in the text to make it clear that plans must use the CMS complaint tracking system to address and resolve complaints received by CMS against the plan. In connection with removing §§ 422.504(a)(15)(ii) and 423.505(b)(22)(ii), we are redesignating the substance of §§ 422.504(a)(15)(i) and 423.505(b)(22)(i) as §§ 422.504(a)(15) and 423.505(b)(22).

We received no comments on this proposal and are finalizing the proposed technical amendments to §§ 422.504(a)(15) and 423.505(b)(22) without modification for the reasons outlined in the proposed rule.

H. General Requirements for Applicable Integrated Plans and Continuation of Benefits (§§ 422.629 and 422.632)

We proposed technical changes to § 422.629(k)(4)(ii) to correct four technical errors from the April 2019 final rule. Paragraph (k)(4)(ii) references Medicare coverage criteria, however Medicaid coverage criteria are also applicable during the unified appeals process described in this section. Therefore, we proposed to add the phrase ''and Medicaid'' following ''knowledge of Medicare'' in § 422.629(k)(4)(ii).

Also in paragraph (k)(4)(ii) of this section, there is an incorrect reference to the MA organization. We proposed to replace ''MA organization'' with the correct term, ''applicable integrated plan''. Also, we proposed to add the word ''integrated'' before ''organization determination decision'' to conform to the terminology used elsewhere in § 422.629(k). Lastly, we proposed to remove the comma between the words ''expertise'' and ''in'' in the regulation text to clarify that the required expertise is in the topics identified in the text.

In § 422.632(b)(1), we proposed to change the citation from § 422.633(e) to (d). Section 422.632(b)(1) reflects the requirement that the enrollee file a request for an integrated appeal in a timely manner, with a cross reference to the regulation that sets the timeframe for such appeals. Paragraph (d) of § 422.633 sets that timeframe while paragraph (e) addresses the requirements for expedited integrated reconsiderations. We therefore proposed to amend § 422.632(b)(1) to use the correct cross-reference.

We received no comments on this proposal and are finalizing the proposed technical amendments to §§ 422.629(k)(4)(ii) and 422.632(b)(1) without modification for the reasons outlined in the proposed rule.

I. Representatives in Part D Appeals (§§ 423.560, 423.566, 423.578, 423.2014, and 423.2036)

The regulations for Medicare fee-for-service (Part A and Part B) claims and entitlement appeals at part 405, subpart I, reference two types of representatives—authorized and appointed. Section 405.902 defines an authorized representative as an individual authorized under state or other applicable law to act on behalf of a beneficiary or other party involved in an appeal, and separately defines an appointed representative as an individual appointed by a party to represent the party in a Medicare claim or claim appeal. Similarly, for appeals of Medicare Part C organization determinations, § 422.561 defines ''representative'' as an individual appointed by an enrollee or other party, or authorized under state or other applicable law, to act on behalf of an enrollee or other party involved in the grievance or appeal. For appeals of Medicare Part D coverage determinations, however, § 423.560 defines ''appointed representative'' as meaning either an individual appointed by an enrollee or authorized under state or other applicable law to act on behalf of the enrollee.

For consistency in the use of these terms across Medicare programs, we proposed to replace the definition of ''appointed representative'' in § 423.560 with a definition of ''representative.'' We also proposed to replace references to appointed representatives in §§ 423.566(c)(2), 423.578(b)(4), 423.2014(a)(1)(ii), and 423.2036(c) and (d) with references to representatives.

We summarize the comment we received on this proposal and respond as follows.

Comment: We received one comment in support of the proposal to replace the definition of ''appointed representative'' in § 423.560 with a definition of ''representative.'' The commenter requested that sufficient time be built in for the implementation of this provision to allow affected enrollee communications documents to be modified to reflect this change.

Response: We appreciate the commenter's support for this proposal. Given that we are enhancing consistency in the use of the term ''representative'' across the Medicare program and not substantively altering the concept of who may be a representative in the grievance and appeals processes, we believe the effective date of this rule affords plans ample opportunity to make any necessary changes to enrollee communications.

After consideration of the comments and for the reasons outlined in the proposed rule and our responses to comments, we are finalizing, without modification, the proposed amendments to §§ 423.560, 423.566, 423.578, 423.2014, and 423.2036 to clarify and streamline references to ''representatives'' in the Part D appeal regulations.

J. Copayments and Coinsurance in Amount in Controversy Calculations (§§ 422.600 and 423.2006)

We proposed amendments to §§ 422.600 and 423.2006 to clarify how the amount in controversy (AIC) is calculated for appeals for MA plans, section 1876 cost plans, section 1833 health care prepayment plans and Part D plans. The regulations applicable to cost plans and healthcare prepayment plans, §§ 417.600 and 417.840 respectively, require those plans to also use the MA appeal regulations.[84]

We explained in the proposed rule the statutory background for using the same rules for calculating the AIC as used for the Medicare FFS program for MA appeals. The regulations at part 405, subpart I, specifically § 405.1006(d), provide the methodology for calculating the amount in controversy (AIC) in Medicare fee-for-service (Part A and Part B) claims and entitlement appeals. In general, and subject to the exceptions listed in §§ 405.1006(d)(2) through (6), § 405.1006(d)(1) provides that the AIC is computed as the amount that the provider or supplier bills (''the actual amount charged the individual'') for the items and services in the disputed claim, reduced by any Medicare payments already made or awarded for the items or services, and further reduced by ''any deductible and/or coinsurance amounts that may be collected for the items or services.''

For Medicare Part C appeals under part 422, subpart M, § 422.600(b) provides that the AIC is computed in

[84] We cited § 405.840 in the proposed rule but provide the correct citations here.

accordance with the part 405 rules (concerning appeals of initial determinations under original (fee-for-service) Medicare). However, we stated in the proposed rule that while original Medicare uses deductibles and coinsurance (where the beneficiary pays a percentage of the cost for an item or service) as forms of cost sharing, MA plans may also use copayments (where the enrollee pays a flat fee for an item or service) as a form of cost sharing. We stated in the proposed rule that because § 405.1006(d)(1) provides that the AIC excludes ''any deductibles and/or coinsurance amounts that may be collected for the items or services,'' questions have arisen regarding whether it is also appropriate to exclude any copayment amounts that may be collected for the items or services when applying the part 405 rules to appeals of Part C organization determinations made under part 422, subpart M. To resolve ambiguity on the proper calculation of the AIC and to help ensure that the AIC in Part C appeals is reflective of the actual amount at issue for the enrollee, we proposed to revise § 422.600(b) to clarify that the AIC, which can include any combination of Part A and Part B services, is computed in accordance with part 405, and that any references to coinsurance in the part 405 regulations, for purposes of computing the AIC under § 422.600, should be read to include both coinsurance and copayment amounts.

We also proposed a revision to the regulations for appeals of Part D plan sponsor coverage determinations and at-risk determinations made under part 423, subpart M. The AIC for these appeals is addressed in § 423.2006, which does not reference cost-sharing amounts. To clarify the AIC calculation for Part D appeals and help ensure that the AIC in Part D appeals is reflective of the actual amount at issue for the enrollee, we proposed to redesignate paragraphs § 423.2006(c)(1) and (2) to (2) and (3), and to amend (c)(1) to provide general AIC calculation provisions for Part D appeals, specifying that the AIC calculation would be reduced by any cost-sharing amounts, including deductible, coinsurance, or copayment amounts, that may be collected from the enrollee for the Part D drug(s).

We received no comments on these proposals and are finalizing amendments to §§ 422.600 and 423.2006 without modification to clarify application of the AIC rules to Part C and Part D appeals, for the reasons outlined in the proposed rule.

K. Stipulated Decisions in Part C (§ 422.562)

The regulations for Medicare fee-for-service (FFS) (Part A and Part B) claims and entitlement appeals at part 405, subpart I provide for stipulated decisions at § 405.1038(c). This provision permits Office of Medicare Hearings and Appeals (OMHA) adjudicators to issue abbreviated, stipulated decisions if CMS or one of its contractors submits a written statement or makes an oral statement at a hearing indicating the item or service should be covered or payment may be made.[85] In this situation, an ALJ or attorney adjudicator may issue a stipulated decision finding in favor of the appellant or other liable parties on the basis of the written or oral statement and without making findings of fact, conclusions of law, or further explaining the reasons for the decision. The MA appeal regulations at § 422.562(d) provide that the FFS appeals procedures in part 405, subpart I apply to appeals of Part C organization determinations to the extent they are appropriate and identifies specific part 405 regulations that are not appropriate to apply to MA appeals. We explained in the proposed rule that because MA organizations are not generally included within the definition of ''contractors'' in § 405.902, it was not readily apparent that the rules for stipulated decisions at § 405.1038(c) apply to MA appeals. For consistency with the Part D regulations (which allow stipulations to be made by Part D plan sponsors under § 423.2038(c)), and to afford OMHA adjudicators the same flexibilities in Part C cases where the MA organization that issued the organization determination and plan reconsideration no longer disputes that an item or service should be covered or that payment should be made, we proposed to revise § 422.562 by adding new paragraph (d)(3) to clarify that, for the sole purpose of applying the regulations at § 405.1038(c) to Part C appeals under part 422, subpart M, an MA organization is included in the § 405.902 definition of ''contractors'' as that definition relates to stipulated decisions issued by ALJs and attorney adjudicators. As we stated in the proposed rule, we believe this revision will permit OMHA adjudicators to more efficiently issue decisions where there is no longer any material issue in dispute, which would ultimately benefit MA enrollees because these decisions could potentially be issued, and effectuated by the MA organization, sooner.

We received no comments on this proposal and therefore are finalizing the proposed changes to § 422.562 without modification for the reasons provided in the proposed rule.

L. Beneficiaries With Sickle Cell Disease (SCD) (§ 423.100)

Section 1860D–4(c)(5)(C)(ii) of the Act contains exemptions from DMPs for certain beneficiaries, and provides the Secretary with the authority to elect to treat other beneficiaries as an exempted individual. As currently codified at § 423.100, exempted beneficiaries include those receiving hospice or end-of-life care, residents of a long-term care facility, or those being treated for active cancer-related pain.

Consistent with the statutory authority and current clinical literature detailed in the preamble of the proposed rule, CMS proposed to add beneficiaries with SCD to the categories of exempted beneficiaries in § 423.100.

Comment: CMS received a number of comments on this proposal, which were unanimously supportive of adding beneficiaries with SCD to the list of individuals exempted from DMPs.

Response: CMS thanks the commenters for their support.

Comment: Several commenters suggested that individuals with other disease states also should be exempt from DMPs, including: Chronic pain in cancer survivors, any chronic pain, complex regional pain syndrome, fibromyalgia, rare chronic pain diseases, Ehlers Danlos syndrome, degenerative disc disease, osteoarthritis, rheumatoid arthritis, ankylosing spondylitis, common variable immunodeficiency, and non-pain syndromes for which opioids are utilized, such as dyskinesias and autoimmune conditions affecting the excretory system.

Response: CMS appreciates these suggestions but disagrees that additional exemptions from DMPs are warranted at this time. In the April 2018 final rule establishing DMPs (83 FR 16454), CMS stated that if exemptions are crafted too broadly or are too numerous, they would risk undermining the purpose of DMPs, which serve as a patient safety tool for beneficiaries who use opioids. CMS believes it is appropriate to narrowly tailor exemptions, distinguish between different clinical scenarios, and account for differences in coordinating care in distinct patient populations. The clinical presentation of SCD is such that individuals with this condition regularly require access to opioid pain medications when experiencing acute

[85] For appeals in which the amount of payment is an issue before the ALJ or attorney adjudicator, § 405.1038(c) further provides that the written or oral statement must agree to the amount of payment the parties believe should be made.

crises in addition to treatment for chronic pain and are more likely to have additional prescribers due to frequent visits to emergency rooms.[86] These factors lead to beneficiaries with SCD being identified as PARBs by OMS criteria while case management, care coordination, and DMP coverage limitations are less practicable for them. Thus, while CMS appreciates commenters' feedback on additional disease states to be considered for exemption from DMPs, at this time CMS does not have sufficient data to demonstrate that the clinical presentation and factors affecting care coordination for the other disease states mentioned in comments make DMP activities of similarly limited value. However, CMS will continue to evaluate OMS response data, other available data sources, and medical literature for consideration in future policy development. In addition, CMS monitors DMPs to ensure they are functioning in the positive ways CMS anticipates will support appropriate pain management.

Comment: A commenter stated that disease-specific exemptions are discriminatory against beneficiaries with other diseases that involve pain and may require opioid therapy, such as inherited autoimmune disorders like ankylosing spondylitis and rheumatoid arthritis and generalized osteoarthritis.

Response: CMS disagrees that the sickle cell disease exemption we proposed is discriminatory. As background, section 1860D–4(c)(5)(C)(ii) of the Act defines an exempted individual as one who (I) receives hospice care, (II) is a resident of a long-term care facility, of a facility described in section 1905(d), or of another facility for which frequently abused drugs are dispensed for residents through a contract with a single pharmacy, or (III) the Secretary elects to treat as an exempted individual. While the first two exemptions are required under CARA, CMS previously exercised the authority in section 1860D–4(c)(5)(C)(ii)(III) of the Act to establish the exemption for a beneficiary who is being treated for active cancer-related pain and is exercising that authority in this rule to exempt beneficiaries with SCD. These discretionary exemptions are not discriminatory toward beneficiaries with other diseases that may require opioid therapy because inclusion in a DMP is not a punitive step. Inclusion means that a beneficiary's opioid use will be reviewed during case management for medical necessity and safety, and DMPs do not dictate the amount or length of opioid use for a beneficiary that is deemed medically necessary. Additionally, CMS adopts discretionary exemptions as part of our ongoing efforts to minimize identification of ''false positives,'' that is, beneficiaries are exempted who may meet OMS criteria but are unlikely to need case management for their safety and medical necessity review.

Comment: A few commenters requested additional flexibilities to include SCD patients in DMPs if case management suggested intervention would benefit them or if they were previously identified as an ARB and a coverage limitation was applied.

Response: Plan sponsors are not permitted to include exempted individuals in their DMPs. Based on the statutory language at section 1860D–4(c)(5)(C) of the Act, current CMS guidance[87] states that: (1) Exempted beneficiaries cannot be placed in a Part D sponsor's DMP, (2) a sponsor must remove an exempted beneficiary from a DMP as soon as it reliably learns that the beneficiary is exempt, whether that be via the beneficiary, the facility, a pharmacy, a prescriber, or an internal or external report, and (3) a beneficiary's identification as an ARB terminates as soon as a sponsor discovers that the beneficiary is exempted. Other than adding individuals with SCD to the existing exemptions starting January 1, 2022, this final rule does not change existing policy with respect to exempted individuals.

Comment: A few commenters requested that CMS update OMS technical elements (for example, response codes) consistent with the final provision.

Response: CMS appreciates this comment and intends to update OMS response forms and technical guidance accordingly.

After consideration of the comments received and for the reasons provided in the proposed rule and preceding responses to comments, CMS is finalizing the exemption for beneficiaries with SCD as proposed with one modification to clarify that this definition is applicable starting in plan year 2022 instead of plan year 2021.

M. Drug Management Programs (DMPs): Additional Requirements (§§ 423.100 and 423.153)

In order to improve the clarity of the DMP regulations, CMS proposed a number of technical wording and reference changes. CMS received no comments on these proposed revisions and are finalizing them without modification for the reasons given in the proposed rule. In response to a comment received on the provision to include beneficiaries with a history of opioid-related overdose in DMPs in section III.B., CMS is making an additional technical change to add ''who is not an exempted beneficiary'' to the PARB definition at § 423.100. This change makes the definitions for PARB and ARB consistent and codifies existing guidance that once a PARB is determined to be an exempt beneficiary, they are no longer to be included in DMPs. CMS also noticed a grammatical error at § 423.153(f)(15)(ii)(D). In order to improve the clarity of the statement at this citation, CMS is changing the two occurrences of ''no later than 7 days of the date'' to ''no later than 7 days from the date'' in this statement.

VIII. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*), we are required to provide 60-day notice in the **Federal Register** and solicit public comment before a ''collection of information,'' as defined under 5 CFR 1320.3(c) of the PRA's implementing regulations, is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection requirement should be approved by OMB, section 3506(c)(2)(A) of the PRA requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

Our February 2020 proposed rule solicited public comment on our proposed information collection requirements, burden, and assumptions. Summaries of the public comments on the proposed information collection requirements, burden, and assumptions for the policies being implemented in this final rule are included in this

[86] James, CV and Wilson-Frederick, SM. The Invisible Crisis: Understanding Pain Management in Medicare Beneficiaries with Sickle Cell Disease. CMS Office of Minority Health Data Highlight, No. 12. Baltimore, MD. 2018. Available from: *https://www.cms.gov/About-CMS/Agency-Information/OMH/Downloads/CMS-OMH-September2018-Sickle-Cell-Data-Highlight.pdf.*

section with our responses under: (1) ICRs Regarding Information on the Safe Disposal of Prescription Drugs (§ 422.111), (2) ICRs Regarding Eligibility for Medication Therapy Management Programs (MTMPs) (§ 423.153), (3) ICRs Regarding Beneficiaries' Education on Opioid Risks and Alternative Treatments (§ 423.128), (3) ICRs Regarding Establishing Pharmacy Performance Measure Reporting Requirements (§ 423.514), and (4) ICRs Regarding PACE.

We did not receive PRA-related comments pertaining to: (1) ICRs Regarding Improvements to Care Management Requirements for Special Needs Plans (SNPs) (§ 422.101), (2) ICRs Regarding Mandatory Drug Management Programs (DMPs) (§ 423.153), (3) ICRs Regarding Beneficiaries with History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.153), (4) ICRs Regarding Information on the Safe Disposal of Prescription Drugs (§ 422.111), (5) ICRs Regarding Suspension of Pharmacy Payments Pending Investigations of Credible Allegations of Fraud and Program Integrity Transparency Measures (§§ 405.370, 422.500, 422.503, 423.4, 423.504, and 455.2), (6) ICRs Regarding Beneficiary Real Time Benefit Tool (RTBT) (§ 423.128), and (7) ICRs Regarding Stipulated Decisions in Part C (§ 422.562).

The following provisions of the February 2020 proposed rule were finalized in our June 2020 final rule (85 FR 33796) and are thereby excluded from this final rule: (1) ICRs Regarding Special Supplemental Benefits for the Chronically Ill (SSBCI) (§ 422.102), (2) ICRs Regarding Contracting Standards for Dual Eligible Special Needs Plan (D–SNP) Look-Alikes (§ 422.514), (3) ICRs Regarding Medicare Advantage (MA) Plan Options for End-Stage Renal Disease (ESRD) Beneficiaries (§§ 422.50, 422.52, and 422.110), (4) ICRs Regarding Medical Loss Ratio (MLR) (§ 422.2440), and (5) ICRs Regarding Special Election Periods (SEPs) for Exceptional Conditions (§§ 422.62 and 423.38).

A. Wage Data

To derive mean costs, we are using data from the most current U.S. Bureau of Labor Statistics' (BLS's) National Occupational Employment and Wage Estimates for all salary estimates (*http://www.bls.gov/oes/current/oes_nat.htm*), which, at the time of publication of this rule, provides May 2019 wages. In this regard, Table H1 presents the mean hourly wage, the cost of fringe benefits and overhead (calculated at 100 percent of salary), and the adjusted hourly wage.

TABLE H1—NATIONAL OCCUPATIONAL EMPLOYMENT AND WAGE ESTIMATES

Occupation title	Occupation code	Mean hourly wage ($/hr)	Fringe benefits and overhead ($/hr)	Adjusted hourly wage ($/hr)
Compliance Officer	13–1041	35.03	35.03	70.06
Computer Programmers	15–1251	44.53	44.53	89.06
Computer Systems Analysts	15–1211	46.23	46.23	92.46
Dietician	29–1031	29.97	29.97	59.94
General Operations Manager	11–1021	59.15	59.15	118.30
Health Technician, All Other	29–9098	28.17	28.17	56.34
Healthcare Social Workers	21–1022	28.51	28.51	57.02
Management Analyst	13–1111	45.94	45.94	91.88
Occupational Therapist	29–1122	41.45	41.45	82.90
Office and Administrative Support	43–9199	18.41	18.41	36.82
Medical and Health Services Managers (PACE Center Manager)	11–9111	55.37	55.37	110.74
Passenger Vehicle Driver	53–3058	15.97	15.97	31.94
Personal Care Aides	31–1120	12.71	12.71	25.42
Pharmacist	29–1051	60.34	60.34	120.68
Physical Therapist	29–1123	43.35	43.35	86.70
Physician	29–1216	96.85	96.85	193.70
Recreational Therapist	29–1125	24.58	24.58	49.16
Registered Nurse	29–1141	37.24	37.24	74.48

As indicated, we are adjusting our employee hourly wage estimates by a factor of 100 percent. This is necessarily a rough adjustment, both because fringe benefits and overhead costs vary significantly from employer to employer and because methods of estimating these costs vary widely from study to study. We believe that doubling the hourly wage to estimate total cost is a reasonably accurate estimation method.

Revised Wage and Cost Estimates: While our proposed rule's costs were based on BLS's May 2018 wage estimates, this final rule uses BLS's more recent May 2019 wage estimates. Changes to the wage estimates represent shifts in average wages of occupations between 2018 and 2019 and are presented in Table H2. The table also reflects occupation titles used in both the proposed rule and this final rule with corresponding changes in wages and changes in occupation codes.

TABLE H2—COMPARISON OF PROPOSED AND FINAL RULE WAGE DATA

Occupation title	CMS–4190–P: Occupation code (BLS: May 2018)	CMS–4190–F2 Occupation code (BLS: May 2019)	CMS–4190–P: (BLS: May 2018 ($/hr))	CMS–4190–F2: (BLS: May 2019 ($/hr))	Difference ($/hr)
Compliance Officer	13–1041	No change	69.72	70.06	+0.34
Computer Programmers	15–1131	15–1251	86.14	89.06	+2.92
Computer Systems Analysts	15–1121	15–1211	90.02	92.46	+2.44

B. Information Collection Requirements (ICRs)

The following ICRs are listed in the order of appearance within the preamble (see sections II through VII) of this final rule.

1. ICRs Regarding Improvements to Care Management Requirements for Special Needs Plans (SNPs) (§ 422.101)

The following changes will be submitted to OMB for approval under control number 0938–1296 (CMS–10565). Subject to renewal, the control number is currently set to expire on June 30, 2022. It was last approved on June 30, 2019 and remains active.

This rule amends § 422.101(f) to implement the new requirements legislated by the BBA of 2018 to section 1859(f) of the Act for C–SNPs and to extend them to all SNP types. Specifically, we are adding the following new regulations to account for new requirements governing SNP enrollee care management and SNP MOC submissions. The new regulations impacting MA SNP MOCs consist of the following:

- We are amending the end of § 422.101(f)(1)(i) by adding the following language: ''. . . and ensure that results from the initial and annual reassessment conducted for each individual enrolled in the plan are addressed in the individual's individualized care plan as required under paragraph (f)(1)(ii) of this section.'' To comply with this provision, MA SNPs will have to provide the necessary guidance to SNP plan staff and develop related internal processes for employees of the SNP that are responsible for incorporating this requirement into their MOC.
- New § 422.101(f)(3)(ii)(A) through (C) will implement the requirement that: As part of the evaluation and approval of the SNP MOC, NCQA must evaluate whether goals were fulfilled from the previous MOC; plans must provide relevant information pertaining to the MOC's goals as well as appropriate data pertaining to the fulfillment the previous MOC's goals; plans submitting an initial MOC must provide relevant information pertaining to the MOC's goals for review and approval; and if the SNP MOC did not fulfill the previous MOC's goals, the plan must indicate in the MOC submission how it will achieve or revise the goals for the plan's next MOC. Under this change, each plan's MOC must provide relevant information pertaining to the MOC's goals as well as appropriate data pertaining to the fulfillment the previous MOC's goals. Note, all SNPs are currently required to identify and clearly define measurable goals and health outcomes as part of their MOC under MOC 4, Element B: Measurable Goals and Health Outcomes for the MOC.
- Lastly, new § 422.101(f)(3)(iii) will implement the requirements that each SNP MOC submitted to CMS will be evaluated by NCQA based on a minimum benchmark (of 50 percent) for each of the existing four elements.

At the time SNP applications are due, MA organizations wishing to offer a new SNP will submit a MOC with their SNP application in the Application module in HPMS for NCQA review and approval. MA organizations wishing to renew their current SNP will submit a MOC in the MOC module in HPMS for NCQA review and approval. Based on their MOC scores, I–SNPs and D–SNPs receive an approval for a period of 1, 2, or 3 years. C–SNPs must renew their MOCs annually per section 1859(b)(6)(B)(iii) of the Act. For calendar year 2020, CMS received 273 SNP MOCs during the annual submission process and received 11 off-cycle submissions during the following time period. We believe these figures are representative of future SNP MOC submission totals going forward.

The burden related to these new requirements for SNP MOCs reflect the time and effort needed to adhere to the new requirements under the amendments to § 422.101(f), and as listed in the bullets in this section, and collect the information as previously described, as well as all other MOC data, and report this information to CMS. To derive average costs, we selected the position of registered nurse because the SNP nurse usually develops and submits the MOC to CMS and typically interacts with the health plan quality registered nurse in matters related to the MOC after it is submitted to CMS.

As is current practice, the MA organization/SNP will click on the Application or MOC module in HPMS and download the SNP MOC Matrix document. The SNP will complete the document, and then upload its MOC matrix document with the MOC narrative. The SNP MOC Matrix upload document outlines the CMS SNP MOC standards and elements that must be addressed in the MOC narrative. The document also serves as a table of contents for the MOC narrative.

Training to use the MOC module will be minimal at 3 hours annually, and training materials and non-mandatory webinar sessions are provided by CMS at no cost to the SNPs except for the time (and cost) to participate. While the training is not mandatory, SNP personnel (we believe this is a SNP compliance officer at $70.06/hr) normally attend the full 3-hour session. In aggregate, we estimate an ongoing annual burden of 819 hours (273 SNPs

* 3 hr) at a cost of $57,379 (819 hr * $70.06/hr).

Using HPMS contract year 2020 submission data, for annual submissions under 42 CFR 422.101(f)(3) we estimate that each year 273 SNPs will submit MOCs. Note, this calculation is based on estimates that include annual MOC submissions for C–SNPs and semi-annual submissions for I–SNPs and D–SNPs. I–SNPs and D–SNPs submitting a MOC can receive MOC approval for one, two, or three year terms. For each SNP, we assume an additional 6 hours at $74.48/hr for a registered nurse. In aggregate, we estimate an ongoing annual burden of 1,638 hours (273 SNPs × 6 hr) at a cost of $121,998 (1,638 hr × $74.48/hr).

For plans seeking to revise their MOC based on qualifying events during the off-cycle season, we estimate that approximately 11 SNPs (D–SNPs/I–SNPs) will submit off-cycle MOC changes based on historical submission rates. For each SNP submitting off-cycle MOC changes, we assume an additional 4 hours at $74.48/hr for a registered nurse. In aggregate, we estimate an ongoing annual burden of 44 hours (11 SNPs × 4 hr) at a cost of $3,277 (44 hr × $74.48/hr).

Since § 422.101(f)(3)(iii) sets a minimum benchmark for each MOC element, we anticipate that there will be some impact to the number of MOC submissions that will not pass NCQA's initial MOC review. Looking at data for contract year 2020, our element benchmark of 50 percent would have impacted 20 of the 273 MOCs submitted, or 7.3 percent. For contract year 2020, 7 plans required submitting their MOCs for revision based on the current scoring system and an additional 7 plans decided to withdraw their MOCs before the revision process for a total of 14 MOCs. The 14 SNPs must resubmit, taking 3 hours, or half the full 6-hour estimate. In aggregate, we estimate an added ongoing annual burden of 42 hours (14 SNPs * 3 hr) at a cost of $3,128 (42 hr * $74.48/hr).

For the aforementioned MOC requirements under the amended 42 CFR 422.101(f)(3), we estimate an added annual burden of 2,543 hours (819 hr for training to use the MOC module + 1,638 hr for MOC submissions + 44 hr for MOC revisions + 42 hr for MOC resubmissions) at a cost of $185,782 ($57,379 + $121,998 + $3,277 + $3,128, respectively).

Separate from the MOC process, newly added § 422.101(f)(1)(iv) will implement a new requirement that plans provide face-to-face encounters with consenting individuals enrolled in the plan not less frequently than on an annual basis. The new regulation requires an annual face-to-face visit, that is, in-person or by visual, real-time, interactive telehealth technology, to occur starting within the first 12 months of enrollment within the plan. CMS will consider a visit to or by employed and/or contracted staff that perform clinical functions, such as direct enrollee care, as a qualifying encounter. Such activities may include, but are not limited to, annual wellness visits and/or physicals, HRA completion, meeting with the interdisciplinary team (IDT), care plan review, health-related education, and care coordination activities. It is also the expectation that any concerns related to physical, mental/behavioral health, and overall health status, including functional status, are addressed and any appropriate referrals, follow-up, and care coordination activities are provided or scheduled as necessary.

We believe that most, if not all, SNP enrollees will have a qualifying face-to-face encounter under § 422.101(f)(1)(iv) through an initial or annual HRA, a qualifying encounter with an IDT member, or an annual wellness visit. We estimate that approximately 734 SNPs that have at least 11 members will need to track face-to-face encounters for their enrollees annually. For each SNP tracking face-to-face encounters, we assume 4 hours of work by SNP personnel, typically a registered nurse. In aggregate, we estimate 2,936 hours (734 SNPs × 4 hr) at a cost of $ 218,673 (2,936 hr × $74.48/hr).

Section 422.101(f)(1)(iii) will also require that MA organizations offering a SNP must provide each enrollee with an IDT in the management of care that includes a team of providers with demonstrated expertise, including training in an applicable specialty, in treating individuals similar to the targeted population of the plan. Plans must develop and implement this requirement into their MOC components to assure an effective management structure. We believe this requirement is consistent with currently approved information tracking practices for all existing SNPs, and thus, does not impose any new or revised requirements and/or burden beyond what is currently approved by OMB under the aforementioned control number.

The remaining changes under § 422.101(f)(2) and (3), will codify current guidance governing SNP MOC submission practices, which is captured under our active information collection request.

We received no comments on our proposed burden estimates. Consequently, we are finalizing them without modification.

2. ICRs Regarding Mandatory Drug Management Programs (DMPs) (§ 423.153)

The following changes will be submitted to OMB for approval under control number 0938–0964 (CMS–10141). Subject to renewal, the control number is currently set to expire on November 30, 2021.

As discussed in section III.A. of this final rule, we are codifying the requirement under section 2004 of the SUPPORT Act that Part D plan sponsors establish DMPs by 2022 at § 423.153(a).

For context, in general, the required elements of a DMP are codified at § 423.153(f). The provisions require Part D sponsors to conduct case management of PARBs identified by OMS through contact with their prescribers to determine if a beneficiary is at-risk for abuse or misuse of opioids and benzodiazepines.[88] After case management is completed, if a plan sponsor intends to limit a beneficiary's access to coverage of opioids and benzodiazepines, the sponsor must provide an initial written notice to the beneficiary. After the beneficiary has a 30-day time period to respond, the plan sponsor sends a second notice to the beneficiary, if the sponsor determines the beneficiary is an at-risk beneficiary (ARB), that the sponsor is implementing a coverage limitation on opioids and/or benzodiazepines, or an alternative second notice if the plan sponsor determines that the beneficiary is not an ARB. Thus, every beneficiary who receives an initial notice receives a second or alternate second notice.

In 2019, a CMS internal analysis found that a majority of Part D contracts (669 of 779, or 85.9 percent) voluntarily included a DMP. Our requirement that sponsors adopt DMPs would only affect the remaining minority of sponsors currently not offering such programs. There are 111 contracts (plan sponsors) run by 79 parent organizations that would be involved. Furthermore, we estimate that only 158 additional PARBs will be identified by these 111 contracts due to meeting the minimum OMS criteria. We estimate burden at the parent organization level because we believe that is a closer reflection of the

[88] CMS currently designates both opioids and benzodiazepines as ''Frequently Abused Drugs'' for purposes of DMPs. See ''Part D Drug Management Program Policy Guidance'', November 20, 2018, p. 6; *https://www.cms.gov/Medicare/Prescription-Drug-Coverage/PrescriptionDrugCovContra/Downloads/2019-Part-D-Drug-Management-Program-Policy-Guidance-Memo-November-20-2018-.pdf.*

number of systems that will need to be updated versus the contract level.

The estimated reporting burden to these sponsors has four aspects. Under § 423.153(f), sponsors must: (1) Design a DMP; (2) conduct case management, which includes sending written information about PARBs to prescribers; (3) program and issue written notices to PARBs and ARBs; and (4) report data to CMS about the outcome of case management via OMS and about any coverage limitation information into MARx.

For one-time initial development, we estimate it would take each parent organization without a DMP 80 hours for a team of four clinical and non-clinical staff to design its DMP. Thus the burden for one parent organization is 320 hours (80 hr × 4 staff). Therefore, the aggregate burden for the 79 remaining parent organizations to develop DMPs consistent with the requirements of § 423.153(f) is 25,280 hours (79 parent organizations × 320 hr).

With regard to costs, we estimate that development, as just indicated, will require a development team consisting of four staff, two pharmacists (working at $120.68/hr) and two general operation managers (working at $118.30/hr) per organization. Thus, the average hourly wage for the organization's development team is $119.49/hr ($477.96/hr/4 staff). The rates for the development team are summarized in Table H3. Consequently, the aggregate cost to develop the DMPs is $3,020,707 ($119.49/hr * 25,280 hr) or $38,237 per parent organization ($3,020,707/79 organizations).

TABLE H3—LABOR RATES FOR THE DEVELOPMENT TEAM

Occupation	Hourly wage ($/hr)	Number of staff	Total wages ($/hr)
General operations manager	118.30	2	236.60
Pharmacist	120.68	2	241.36
Total (for hourly wage and total wages)	*119.49	4	477.96

*Note: 119.49 is the average wage per hour (477.96/4) and equals total wages for four staff (477.96) divided by total staff (4). The 119.49 is a weighted average representing the hourly wage of the team; that is a team of four working on average at $119.49/hr. incur a total cost of $477.96. The reason an average is taken is because not all four members are working all the time. This number is important since it enters the summary table and is the only number that when multiplied by number of hours (4 staff * 1 hr) will give the correct total wage. Since this number is not a total, the ''Totals'' row header has been clarified to indicate that totals only apply ''hourly wage'' and ''total wages''. This is a standard practice.

The 79 Part D parent organizations affected by this requirement also will have to upload beneficiary notices into their internal claims systems before they can issue them. We estimate that it will take each organization, on average, 5 hours at $89.06/hr for a computer programmer to upload all of the notices into their claims systems (note, this is an estimate to upload all of the documents in total, not per document). In aggregate, we estimated a one-time burden of 395 hours (5 hr * 79 sponsors) at a cost of $35,179 (395 hr * $89.06/hr).

Once a DMP is developed and in place, the primary operations for impacted sponsors will involve case management by the sponsor to assess those enrollees reported as PARBs by CMS's OMS. The 111 contracts run by 79 parent organizations that did not voluntarily establish a DMP are generally smaller plans that in some cases offered alternative means of managing comprehensive beneficiary care, such as through PACE. They enroll only 410,000 Part D beneficiaries (less than 1 percent of total Part D enrollment in 2019). Accordingly, based on internal analysis of the first 3 quarters (January–March, April–June, and July–September of 2019) of the OMS report data, we found that only 127 beneficiaries (about 0.7 percent) who met the minimum OMS criteria were not reported thus far in 2019 by CMS to the sponsors, because the sponsors did not have a DMP. Using this estimate of 0.7 percent of beneficiaries extrapolated over the entire year, CMS can project that annually that about 158 beneficiaries would not be reported to their plan sponsors due to not having a DMP until DMPs become mandatory no later than January 1, 2022.

Once required DMP policies are developed and operational, sponsors would have to case-manage their PARBs (as outlined in § 423.153(f)(2)). The case management requirement includes a requirement that sponsors send written information to prescribers about PARBs. The burden for sending this information, which may be accomplished by any of several means (such as mail or fax), is already included in the case management burden estimates provided earlier in this section and does not need to be separately accounted for.

The case management team would consist of a pharmacist (such as initial review of medication profiles, utilization, etc.) working 2 hours at $120.68/hr; one health technician working 2 hours at $56.34/hr; and one physician working 1 hour at $193.70/hr to work directly with providers on discussing available options and determining the best course of action. The case management team would require 5 hours at a cost of $547.74 per PARB case managed ([2 hr × $120.68/hr] + [2 hr * $56.34/hr] + [1 hr * $193.70/hr]). Therefore, the case management team's wage is $109.55/hr ($547.74/5 hr). This is summarized in Table H4. In aggregate, we estimate an annual burden of 790 hours (5 hr × 158 beneficiaries at a cost of $86,545 per year (790 hr × $109.55/hr).

TABLE H4—HOURLY WAGE OF CASE MANAGEMENT TEAM

Occupation	Time (hours)	Wages ($/hr)	Labor cost ($)
Health Technician	2	56.34	112.68
Pharmacist	2	120.68	241.36
Physician	1	193.70	193.70

TABLE H4—HOURLY WAGE OF CASE MANAGEMENT TEAM—Continued

Occupation	Time (hours)	Wages ($/hr)	Labor cost ($)
Totals (For hours and labor cost)	5	*109.55	547.74

*Note: 109.55 is the average wage per hour (547.74/5) and equals total wages for five staff (547.74) divided by total staff (5). The 109.55 is a weighted average representing the hourly wage of the team; that is a team of five working on average at $109.55/hr. incur a total cost of $547.74. The reason a weighted average is being used is because not all team members are working at each instant. This number is important since it enters the summary table and is the only number that when multiplied by number of hours (5 staff * 1 hr) will give the correct total wage. Since this number is not a total, the ''Totals'' row header has been clarified to indicate that totals only apply ''hours'' and ''labor cost''. This is a standard practice.

Since currently 5 percent of PARBs receive an initial and second notice (or alternate second notice), we estimated that 8 beneficiaries (158 beneficiaries * 0.05) would receive an initial notice and 8 would receive a second notice (or alternate second notice). At most, 8 sponsors would be responsible for sending the notices to these 8 beneficiaries. CMS estimates it will take 10 minutes (0.1667 hr) at $56.34/hr for a health technician to send two notices (each notice would require 5 minutes). In aggregate, CMS estimates an annual burden for sending notices to beneficiaries of 1.3336 hours (8 beneficiaries × 0.1667 hr) at a cost of $75 (1.3336 hr × $56.34/hr).

Under § 423.153(f)(15), as stated earlier, the plan sponsors newly impacted by a mandatory DMP policy will be required to report to CMS the outcome of case management via OMS and any associated coverage limitation information into MARx. CMS estimates that it will take sponsors on average 1 minute (0.0167 hr) to report this information to OMS and MARx. In aggregate, we estimate an annual burden of 2.6386 hours (158 newly identified PARBs annually × 0.0167 hr) at a cost of $149 (2.6386 hr × $56.34/hr).

Table H5 summarizes the burden associated with the mandatory DMP provision.

TABLE H5—SUMMARY FOR MANDATORY DMPS

Regulatory citation	Subject	Number of respondents	Number of responses	Time per response (hr)	Total time (hr)	Labor cost ($/hr)	Total cost in 1st year ($)	Total cost in subsequent years ($)
§ 423.153	Creating DMP	79	79	320	25,280	119.49	3,020,707	0
§ 423.153	Upload Model Notices	79	79	5	395	89.06	35,179	0
§ 423.153	Conduct Case Management	79	158	5	790	109.55	86,545	86,545
§ 423.153	Send Model Notices	8	8	0.1667	1.3336	56.34	75	75
§ 423.153	Report to CMS	79	158	0.0167	2.6386	56.34	149	149
Total		79	482	varies	26,469	varies	3,142,655	86,769

CMS received no comments on the proposed burden estimates and assumptions. In the proposed rule, CMS had estimated the cost associated with case management of PARBs by combining the wage for all of the case management team members into one unit of case management time with the associated wage being the total of wages for the entire case management team to carry out case management ($547.74). This was reflected as 1 hour of burden in the proposed rule. While this intermediate presentation did not ultimately affect the estimate of cost associated with case management, CMS realized that this was not an accurate representation of the true time associated with case management. Case management of each of the 158 PARBs requires 5 hours of work (2 from a pharmacist, 2 from a health technician and 1 from a physician). Therefore, CMS is revising the burden calculations for case management to reflect 5 hours of burden and calculated the case management team's hourly wage, prorated according to the number of hours contributed by each team member ($109.55). CMS is revising the number of hours from 158 to 790 (158 PARBs × 5 hr) as this is more accurate. It should be noted, however, that the total cost estimates associated with case management does not change between the proposed rule and this final rule. CMS is finalizing everything else without modification.

3. ICRs Regarding Beneficiaries With History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.153)

The following changes will be submitted to OMB for approval under control number 0938–0964 (CMS–10141). Subject to renewal, the control number is currently set to expire on November 30, 2021.

In this rule, CMS is finalizing the proposed changes to § 423.153(f)(16) to identify and report beneficiaries with a history of opioid-related overdose through OMS to Part D plan sponsors as required by section 2006 of the SUPPORT Act. As a result of this requirement, additional beneficiaries will be reported by OMS as PARBs meeting CMS' proposed criteria for having a history of opioid-related overdose. In producing the estimates below, the burden per affected enrollee for case management (5 hr/response), notification of enrollees (10 min/response), and report to CMS (1 min/response) are identical with those estimated in section VIII.B.2. (ICRs Regarding Mandatory Drug Management Programs (DMPs) (§ 423.153)) of this final rule. That is, the overall burden associated with management of each PARB is the same whether the PARB is identified based on the current clinical guidelines or the updated clinical guidelines which include the criteria for identifying PARBs with a history of opioid-related overdose. The updated clinical guideline criteria to incorporate history of opioid-related overdose increase the total number of beneficiaries identified and included in DMPs. The estimates that follow outline the burden associated with these additional PARBs.

Model beneficiary notices [89] provided by CMS, as well as the required written information sent by sponsors to prescribers of PARBs as part of the case management process, will need to be revised to incorporate language specific to a PARB having a history of opioid-related overdose. For the model beneficiary notices, this includes updates to the sections defining DMPs and possible justifications for applying a coverage limitation. Additionally, sponsors may need to update their DMP prescriber written communications to include history of opioid-related overdose as a possible reason for a beneficiary meeting the OMS criteria. The changes needed to align the model beneficiary notices and the written communication are expected to be minimal. CMS estimates it will take no more than 1 hour at $56.34/hr for a health technician to draft and implement such changes. In aggregate, CMS estimates a one-time burden of 288 hours (288 parent organizations × 1 hr/response) at a cost of $16,226 (288 hr × $56.34/hr).

Based on July 2017 through June 2018 opioid-related overdose data, CMS's internal analysis estimates that about 18,268 enrollees meet the criteria of an opioid-related overdose and would be PARBs. All of these PARBs will require case management. Using the wage and cost data outlined for the case management team in Table H4, in aggregate, CMS estimates an annual burden of 91,340 hours (5 hr × 18,268 PARBs) at a cost of $10,006,297 (91,340 hr × $109.55/hr).

In order to estimate the number of beneficiary notices needed to be sent, CMS compared two populations: (1) Part D beneficiaries projected to be potentially at-risk, by meeting the OMS criteria (which CMS estimates as 22,516 PARBs, based on internal data); and (2) beneficiaries with a history of opioid-related overdose (which CMS estimates as 18,268 PARBs, based on internal data). CMS believes the population of beneficiaries with a history of opioid-related overdose would have a much higher rate of coverage limitations imposed by sponsors, due to the history of overdose being the risk factor most predictive for another overdose or suicide-related event.[90] CMS estimates that about 47.5 percent or 8,677 beneficiaries (18,268 beneficiaries × 0.475) of this population will receive an initial notice from the plan sponsor, informing the beneficiary of the sponsor's intention to limit their access to coverage of opioids and/or benzodiazepines. Thus, the beneficiary will also receive a second or alternate second notice informing them whether the limitation was in fact implemented. CMS estimates it will take 10 minutes (0.1667 hr) at $56.34/hr for a health technician to send two notices (each notice would require 5 minutes). In aggregate, CMS estimates an annual burden of 1,446 hours (8,677 enrollees × 0.1667 hr) at a cost of $81,468 (1,446 hr × $56.34/hr). Evaluation of the use of point-of-sale (POS) claim edits under OMS since 2013 does not demonstrate a steady increase or decrease in edits. The OMS and POS edit reporting systems commenced in 2013 and 2014, and then between 2015 and 2018 the number of beneficiaries with opioid POS claim edits only ranged from 1,152 to 1,351 annually. As such, given that the vast majority of Part D enrollees are in a plan already offering a DMP, including the majority of Part D enrollees with a history of opioid-related overdose, CMS does not anticipate major shifts in the baseline average number of annual POS edits (and related initial notices). This stability in the annual number of ARBs and related notices to date appears largely unaffected by the baseline population of identified PARBs. However, CMS recognizes that this change is projected to approximately double the number of beneficiaries CMS identifies to sponsors as PARBs.

With respect to the reporting of DMP data to CMS for PARBs identified based on history of opioid-related overdose, CMS estimates it will take sponsors (on average) 1 minute (0.0167 hr) at $56.34/hr for a health technician to report in OMS and/or MARx the outcome of case management and any applicable coverage limitations. In aggregate, CMS estimates an annual burden of 305 hours (18,268 PARBs × 0.0167 hr) at a cost of $17,184 (305 hr × $56.34/hr).

Table H6 summarizes the burden associated with the inclusion of PARBs with a history of opioid-related overdose in DMPs.

TABLE H6—SUMMARY FOR IDENTIFICATION OF ADDITIONAL PARBS BASED ON HISTORY OF OPIOID-RELATED OVERDOSE

Regulatory citation	Subject	Number of respondents	Number of responses	Time per response (hr)	Total time (hr)	Labor cost ($/hr)	Total cost in 1st year ($)	Total cost in subsequent years ($)
§ 423.153(f)(16)	Revise Model Notices	288	288	1	288	56.34	16,226	0
§ 423.153(f)(16)	Conduct Case Management	288	18,268	5	91,340	109.55	10,006,297	10,006,297
§ 423.153(f)(16)	Send Model Notices	288	8,677	0.1667	1,446	56.34	81,468	81,468
§ 423.153(f)(16)	Reporting to CMS	288	18,268	0.0167	305	56.34	17,184	17,184
Total		288	45,501	*Varies*	93,379	*Varies*	10,121,175	10,104,949

We received no comments on our proposed burden estimates and assumptions. In the proposed rule, CMS had estimated the cost associated with case management of PARBs by combining the wage for all of the case management team members into one unit of case management time with the associated wage being the total of wages for the entire case management team to carry out case management ($547.74). This was reflected as 1 hour of burden in the proposed rule. While this intermediate presentation did not ultimately affect the estimate of cost associated with case management, CMS realized that this was not an accurate representation of the true time associated with case management. Case management of each of the 18,268 PARBs identified based on the definition of opioid-related overdose requires 5 hours of work (2 from a pharmacist, 2 from a health technician and 1 from a physician). Therefore, CMS is revising the burden calculations for case management to reflect 5 hours of burden and calculated the case management team's hourly wage, prorated according to the number of

[89] Notice documents available at *https://www.cms.gov/Medicare/Prescription-Drug-Coverage/PrescriptionDrugCovContra/Downloads/Part-D-Drug-Management-Program-Notices-.zip.*

[90] Bohnert KM, Ilgen MA, Louzon S, McCarthy JF, Katz IR. Substance use disorders and the risk of suicide mortality among men and women in the US Veterans Health Administration. Addiction. 2017 Jul; 11/2(7):1193–1201. doi: 10.1111/add.13774.

hours contributed by each team member ($109.55). CMS is revising the number of hours from 18,268 to 91,340 (18,268 PARBs × 5 hr) as this is more accurate. It should be noted, however, that the total cost estimates associated with case management does not change between the proposed rule and this final rule. We are finalizing everything else without modification.

4. ICRs Regarding Information on the Safe Disposal of Prescription Drugs (§ 422.111)

Section 6103 of the SUPPORT Act amended section 1852 of the Act by adding a new subsection (n). Section 1852(n)(1) requires MA plans to provide information on the safe disposal of prescription drugs when furnishing an in-home health risk assessment. Section 1852(n)(2) requires CMS to establish, through rulemaking, criteria that we determine appropriate with respect to information provided to an individual during an in-home health risk assessment to ensure that he or she is sufficiently educated on the safe disposal of prescription drugs that are controlled substances. In order to implement the requirements of section 1852(n)(1) for MA plans, CMS revised the § 422.111, Disclosure Requirements, to add a paragraph (j), which would require MA plans that furnish an in-home health risk assessment on or after January 1, 2022, to include both verbal (when possible) and written information on the safe disposal of prescription drugs that are controlled substances in such assessment. Consistent with section 1852(n)(1), we proposed that information must include details on drug takeback programs and safe in-home disposal methods.

In educating beneficiaries about the safe disposal of medications that are controlled substances, we proposed that MA plans would communicate to beneficiaries in writing and, when feasible, verbally. We proposed that MA plans must do the following to ensure that the individual is sufficiently educated on the safe disposal of controlled substances: (1) Advise the enrollee that unused medications should be disposed of as soon as possible; (2) advise the enrollee that the US Drug Enforcement Administration allows unused prescription medications to be mailed back to pharmacies or other authorized sites using packages made available at such pharmacies or other authorized sites; (3) advise the enrollee that the preferred method of disposing of controlled substances is to bring them to a drug take back site; (4) identify drug take back sites that are within the enrollee's MA plan service area or that are nearest to the enrollee's residence; and (5) instruct the enrollee on the safe disposal of medications that can be discarded in the household trash or safely flushed. Although we did not propose to require MA plans to provide more specific instructions with respect to drug disposal, we did propose that the communication to enrollees would provide the following additional guidance: If a drug can be safely disposed of in the enrollee's home, the enrollee should conceal or remove any personal information, including Rx number, on any empty medication containers. If a drug can be discarded in the trash, the enrollee should mix the drugs with an undesirable substance such as dirt or used coffee grounds, place the mixture in a sealed container such as an empty margarine tub, and discard in the trash.

We also proposed that the written communication include a web link to the information available on the United States Department of Health and Human Services website identifying methods for the safe disposal of drugs available at the following address: *https://www.hhs.gov/opioids/prevention/safely-dispose-drugs/index.html.* We noted in our proposed rule that the safe disposal of drugs guidance at this website can be used for all medications not just medications that are controlled substances. We stated in our proposed rule that we believed that plan communications consistent with the standard on this website would furnish enrollees with sufficient information for proper disposal of controlled substances in their community.

The statute specifically limited this educational requirement to those situations when MA plans elect to perform in-home health risk assessments (HRAs) of MA enrollees. We note that while SNP plans are required to perform enrollee health risk assessments all other MA plan types are not required to perform health risk assessments. In addition, SNPs may conduct HRAs over the phone. Since the performance of in-home heath risk assessment is not a specific requirement for MA plans we do not track or have data on the number of in-home HRAs that MA plans elect to perform. As we will further discuss while there is a burden imposed by the law and our regulation MA plans can almost entirely avoid this burden by choosing to not perform an in-home HRA. As previously discussed the burden for an MA plan when electing to conduct an in-home HRA is that consistent with CMS guidelines as previously described it must develop written guidance for the enrollee and also furnish when possible a verbal summary of the main options for the safe disposal of unused controlled medications.

5. ICRs Regarding Eligibility for Medication Therapy Management Programs (MTMPs) (§ 423.153)

The following changes will be submitted to OMB for approval as a reinstatement under control number 0938–10396 (CMS–1154). We received one comment in response to our proposed changes. A summary of this comment, along with our response, is provided below.

In developing the burden estimates for this final rule, we removed the exclusion of beneficiaries enrolled in the Part D Enhanced MTM model because it will end before 2022, and the deadline for plans to come into compliance with the new Part D MTM program requirements finalized in this rule is January 1, 2022.

Since the inception of the Medicare Part D benefit, the Act has required that all Part D plans offer a MTM program to eligible beneficiaries. The Act also established criteria for targeting beneficiaries for MTM program enrollment and a minimum set of services that must be included in MTM.

Under § 423.153(d), all MTM enrollees must be offered a Comprehensive Medication Review (CMR) at least annually and Targeted Medication Reviews (TMRs) no less than quarterly. A CMR is an interactive, person-to-person, or telehealth consultation performed by a pharmacist or other qualified provider that includes a review of the individual's medications and may result in the creation of a recommended medication action plan. An individualized, written summary in CMS's Standardized Format must be provided following each CMR. The SUPPORT Act expanded the population of beneficiaries that must be targeted for Part D MTM, and added a requirement that information on the safe disposal of prescription drugs that are controlled substances be furnished to all MTM program enrollees. This final rule modifies our Part D regulations to incorporate those changes to the MTM requirements. The new requirements will affect the number of beneficiaries enrolled in MTM programs and potentially some of the content for the Standardized Format for the CMR and, therefore, the burden. In this regard, we are estimating burden for:

a. The expanded population of beneficiaries that must be targeted for enrollment in MTM programs;

b. Mailing safe disposal information as part of the CMR summary; and

c. Mailing safe disposal information once a year as part of a TMR or other MTM correspondence or service.

a. The Expanded Population of Beneficiaries That Must Be Targeted for Enrollment in MTM Programs

We estimate that in 2022 there will be 50,684,424 beneficiaries enrolled in Part D plans with MTM programs (line 1 of Table H7). According to internal data, we estimate that section 6064 of the SUPPORT Act requires targeting 10,366 ARBs for MTM in 2022 (line 2). Based on our experience with the MTM program, we estimate that 71.8 percent of beneficiaries targeted for MTM under the existing requirements will accept the offer of a CMR (line 3). This number has been updated based on more recent data which became available after the proposed rule was published. We assume this percentage will also apply to beneficiaries who will be enrolled in MTM programs under the new criteria; therefore, 7,443 ARBs (line 4) (10,366 targeted ARBs × 0.718) are expected to accept a CMR under the new provision.

To estimate the burden on Part D plans of furnishing CMRs to the 7,443 ARBs who would be expected to accept the offer of a CMR under the final policy, we separately calculate the labor cost of preparing the CMR and packaging it, and the non-labor cost of mailing.

To estimate the labor cost of preparing the CMR, we note that the CMR is a clinical consultation service and therefore must be administered by a pharmacist, physician, nurse practitioner, or other qualified provider. Currently, 100 percent of MTM programs employ pharmacists to conduct CMRs, which is the basis of the hourly rate estimate. Stakeholder comments that were received outside of this rulemaking effort and responded to in a previous collection of information request indicate that an average CMR requires 40 minutes or 0.6667 hours (line 5) at $120.68/hr (line 7) for a pharmacist to complete. This results in an annual labor burden of 4,962 hours (line 6) (7,443 ARBs × 0.6667 hr) at a cost of $598,814 (line 8) (4,962 hr × $120.68/hr).

To estimate the cost of mailing, we note that paper costs $2.50 per ream (500 sheets) of paper (at $0.005 per sheet) and toner costs $50.00 per cartridge and lasts for 10,000 sheets (at $0.005 per sheet). We estimate that the average CMR summary will be 6 pages in length based on revisions which would streamline the Standardized Format; therefore, the paper and printing costs for each CMR summary will be $0.06. Since CMR summaries contain private health information, they must be mailed first class, for which postage costs $0.70 per mailing. Based on industry standards, we assume envelopes cost $0.08 each, while folding and stuffing costs about $0.08 per document. We therefore estimate the non-labor cost to print and mail a CMR summary in CMS's Standardized Format will be $0.92 per mailing (line 9). This results in a cost of $6,848 (line 10) ($0.92 cost per mailing × 7,443 ARBs).

Therefore, we estimate that the total annual cost of providing CMRs to 7,443 ARBs is $605,662 (line 11) ($598,814 labor costs + $6,848 non-labor mailing costs). These figures and calculations are summarized in Table H7. The Line ID column contains identifiers for each row following the flow of logic and calculations. Where applicable, the calculations are described in the ''Source'' column.

TABLE H7—ESTIMATED BURDEN OF TARGETING ARBS FOR MTM

Line ID	Item	Number	Source
(1)	Part D enrollees in 2022	50,684,424	Internal CMS Data.
(2)	Part D enrollees expected to meet the ARB criteria	10,366	Internal CMS data.
(3)	Percent of enrollees under the existing program targeted for a CMR who accept the offer.	71.8%	Internal CMS data.
(4)	ARBs targeted for MTM expected to accept CMR offer	7,443	(2) * (3).
(5)	40 minutes is the industry standard for conducting a CMR	0.6667	Industry data.
(6)	Number of hours needed to fulfill the preparation of CMRs under the new provision including stuffing and mailing.	4,962	(4) * (5).
(7)	Wage for a pharmacist to prepare a CMR	$120.68	BLS Wage data.
(8)	Cost to send CMRs to ARBs under the new provision	$598,814	(6) * (7).
(9)	Non-labor cost of mailing one CMR: 6 pages * ($2.50 * 500 cost per page + $50/10000 cost of toner) + $0.08 stuffing + $0.08 envelope + $0.70 for postage.	$0.92	See narrative.
(10)	Non-labor cost of mailing	$6,848	(8) * (9).
(11)	Total cost for preparing and mailing the CMR to ARBs	$605,662	(8) + (10).

b. Mailing Safe-Disposal Information as Part of the CMR Summary

Under the revisions to § 423.153(d)(1) adopted in this final rule, Part D plans will be required to provide all MTM enrollees with information about safe disposal of prescription medications that are controlled substances. The provision will allow plans to mail the newly required safe disposal information either as part of the CMR summary, a TMR, or other MTM correspondence or service. We estimate the safe disposal information will take one page, may include personal information, and can be mailed out as a standalone correspondence if not included in the annual CMR.

However, for those enrollees receiving a CMR, we believe it will be most economical to include the one page with the already existing CMR summary. We solicited comments regarding this assumption, but did not receive any feedback. Therefore, we are estimating that the cost of mailing one extra page per enrollee is $0.01 (line 21 ([1 page × $2.50/ream of 500 sheets] + [1 page × $50 toner/10,000 sheets]). We note that the envelope to mail the CMR is already being paid for under current regulations (although folding and stuffing of 7 pages versus 6 pages might require some extra effort, we do not believe this will raise the $0.08 current cost estimate and we did not receive any comments on this assumption); the $0.70 first class postage for 2 ounces is sufficient for 7 pages (there would be no increase in postage).

To estimate total mailing cost, we add the estimates of (i) total number of Part D enrollees who are not ARBs who will receive a CMR under the existing criteria and (ii) total number of ARBs who will receive a CMR under the new criteria we are adopting in this final rule.

As shown in Table H7, lines (1) and (2), we estimate that in 2022 there will be 50,684,424 Part D enrollees and, as previously determined, 10,366 of those

will meet the new MTM targeting criteria, leaving 50,674,058 Part D enrollees (Table H8, line 14) (50,684,424 Part D enrollees minus 10,366 enrollees meeting the ARB criteria) that must be targeted for MTM if they meet the existing criteria. Our internal data shows that 6.54 percent (line 15) of Part D enrollees will be targeted for MTM programs under the existing criteria. Hence, this leaves 3,314,083 Part D enrollees (0.0654 * 50,674,058) who will be targeted for MTM under the existing criteria (line 16). Of the 3,314,083 targeted enrollees, as stated previously, based on internal CMS data, we estimate 71.8 percent will accept the annual CMR offer (line 17). Therefore 2,379,512 beneficiaries (3,314,083 * 0.718) will receive a CMR under the existing criteria (line 18).

Hence, in 2022 a total of 2,386,955 enrollees will receive a CMR under the existing and new criteria (7,443 ARBs under the new criteria + 2,379,512 under the existing criteria) (line 20), at a total non-labor mailing cost of $23,870 (2,386,955 enrollees × $0.01 mailing cost per enrollee) to add an additional page containing safe disposal information to all CMRs (line 22).

The figures and calculations are summarized in Table H8.

TABLE H8—ESTIMATED BURDEN FOR MAILING SAFE DISPOSAL INFORMATION AS PART OF THE CMR

Line ID	Item	Number	Source
(12)	Part D enrollees in 2022	50,684,424	(1).
(13)	Enrollees estimated to meet ARB criteria under the new provision	10,366	(2).

(17)	Percent of enrollees under the current program targeted for an MTM who accept the offer.	71.8%	Internal CMS data.
(18)	Estimated number of Part D enrollees under the existing criteria who will receive a CMR.	2,379,512	(16) * (17).
(19)	Estimated number of Part D enrollees under the new provision meeting ARB criteria who will elect to receive a CMR.	7,443	(4).
(20)	Total number of Part D enrollees (under the existing and new criteria) who will receive a CMR.	2,386,955	(18) + (19).
(21)	Non-labor costs of one extra page (2.50/500) and toner for one page ($50/10000)	$0.01	See narrative.
(22)	Estimated cost of mailing safe disposal information with a CMR	$23,870	(20) * (21)

c. Mailing Safe Disposal Information Once a Year as Part of a TMR or Other MTM Correspondence or Service

All targeted beneficiaries who have not opted out of the MTM program must receive TMRs at least quarterly, and we are allowing Part D sponsors the flexibility of choosing whether to include safe disposal information in the CMR, through a TMR or other MTM correspondence or service at least once annually. Since we assume that 71.8 percent of targeted enrollees accept an offer of a CMR (Table H7, line 3), it follows that 28.2 percent (100 percent–71.8 percent) (Table H9, line 26) of Part D enrollees who are targeted for enrollment in an MTM program refuse the CMR offer but do not opt out of the MTM program completely. As discussed previously, 10,366 ARBs (Table H7, line (2)) under the new criteria and 3,314,083 enrollees (Table H8, line (16)) under the existing criteria, for a total of 3,324,449 enrollees (3,314,083 + 10,366) (line 25) will be targeted to receive a CMR. Therefore 937,495 enrollees (3,324,449 total enrollees × 0.282 who refuse a CMR) would need to be mailed the safe disposal information as part of a TMR or other MTM correspondence or service (line 27). For purposes of calculating the burden, we are assuming that any safe disposal information that is not included in a CMR is either (i) being mailed in a TMR, which may be as short as one page and may contain private health information or (ii) is mailed as a stand-alone document which does not contain any private health information. For purposes of impact, (i) if one additional page is included in the TMR, then there is no additional postage; (ii) if the safe disposal information is mailed separately, there would be no private health information, and the burden would be the cost of one page plus bulk postage. Due to a lack of data in regard to what percentage of safe disposal information will be mailed as a CMR, TMR, or other MTM correspondence or service, we are assuming the maximum amount, which is that all safe disposal information not sent with a CMR will be one page that is mailed separately using bulk postage. The cost to mail one page of safe disposal information is $0.01095 per enrollee if the letter does not contain private health information and thus bulk mailing is used (line 28) [1 page × $2.50 per ream of paper/500 sheets] + [1 page × $50 per toner/10,000 pages] + [$0.19/200 items]). Therefore, we estimate that the cost of mailing safe disposal information to those MTM enrollees who do not receive it in a CMR summary is $10,266 (line 29) (937,495 enrollees × $0.01095 mailing cost per page).

These calculations are summarized in Table H9.

TABLE H9—BURDEN OF MAILING SAFE DISPOSAL INFORMATION TO ENROLLEES NOT RECEIVING A CMR

Line ID	Item	Number	Source
(27)	Number of enrollees to whom safe disposal information must be mailed even though they don't receive a CMR.	937,495	(25) * (26).
(28)	Non-labor cost of mailing a one page correspondence (at $2.50/500 cost per page + $50/10,000 cost of toner for one page + $0.19/200 cost of bulk mailing).	$0.01095	See narrative.
(29)	Cost of mailing safe disposal information to those who do not receive a CMR	$10,266	(27) * (28).

d. Summary for Eligibility for MTMPs and Information on the Safe Disposal of Prescription Drugs

As discussed in section (b) (Table H8, line (22)), we estimate a cost of $23,870 for mailing safe disposal information to those beneficiaries receiving a CMR (under the assumption that the plan will bundle the safe disposal and CMR). In section (c) (Table H9, line 29), we estimate a total cost of $10,266 for mailing safe disposal information to those beneficiaries who do not receive a CMR. Thus, the total cost of mailing safe disposal information to all Part D beneficiaries enrolled in MTM programs is estimated to be $34,136. This is summarized in Table H10.

TABLE H10—BURDEN OF MAILING SAFE DISPOSAL INFORMATION TO BENEFICIARIES ENROLLED IN MTM PROGRAMS

Line ID	Item	Number	Source
(30)	Estimated cost of mailing safe disposal items to those receiving a CMR (under assumption that the plan will bundle the safe disposal and CMR).	$23,870	(22).
(31)	Cost of mailing safe disposal to those who do not receive a CMR	10,266	(29).
(32)	Total cost of mailing safe disposal information	$34,136	(30) + (31).

The total additional annual cost for 288 parent organizations to provide CMRs to ARBs and to send information on safe disposal of prescription medications that are controlled substances to all MTM program enrollees is $663,668. Table H11 provides a compact summary of the bottom lines of impact by activity.

TABLE H11—SUMMARY FOR ELIGIBILITY FOR MTMPS (§ 423.153) AND INFORMATION ON THE SAFE DISPOSAL OF PRESCRIPTION DRUGS

Regulatory citation	Subject	Number of respondents	Number of responses	Time per response (hr)	Total annual time (hr)	Non labor cost for mailing ($)	Labor cost ($/hr)	Total annual cost ($)

Total		288	3,339,376	Varies	4,962	40,984	Varies	639,798

As indicated above, one PRA-related comment was received. The following summarizes the comment and sets out our response.

Comment: CMS received a comment stating that the percent of Part D enrollees who accept the offer of a CMR (87 percent) was overestimated.

Response: We appreciate the comment and have updated our estimate based on more recent data. We are now estimating the acceptance rate of a CMR to be closer to 71.8 percent in 2022.

As previously stated, we updated our estimates to no longer exclude beneficiaries enrolled in the Part D Enhanced MTM model because the model will end before 2022, and the deadline for plans to come into compliance with the new Part D MTM program requirements finalized in this rule is January 1, 2022. We also updated the estimates for enrollment and CMR rates based on more current data. We did not receive any comments in response to our estimates regarding the cost of mailing a CMR with information on safe disposal of prescription drugs, nor did stakeholders object to our assumption that the distribution of information on safe disposal of prescription drugs would be most economically distributed as part of the CMR summary.

6. ICRs Regarding Beneficiaries' Education on Opioid Risks and Alternative Treatments (§ 423.128)

The following changes will be submitted to OMB for approval under control number 0938–0964 (CMS–10141). Subject to renewal, the control number is currently set to expire on November 30, 2021.

With regard to our proposed changes, comments were received and are responded to below.

In this rule, § 423.128 will require Part D sponsors to disclose, beginning in 2022, information about the risks of prolonged opioid use to enrollees. In addition to this information, Part D sponsors of MA–PDs must disclose coverage of non-pharmacological therapies, devices, and non-opioid medications under their plans and under Medicare Part C. Part D sponsors of PDPs must disclose coverage of non-pharmacological therapies, devices, and non-opioid medications under their plans and under Medicare Parts A and B.

Before Part D sponsors can send this information, they would have to create

and upload materials into their internal systems. Based on 2019 CMS data, there are 608 Part D legal entities (sponsors) with which CMS contracts, associated with 288 parent organizations that these contracts identified in their initial applications, which is confirmed annually. Based on our knowledge of the way parent organizations and their Part D legal entities are structured, we believe it is appropriate to estimate burden at the parent organization level, as it is a closer reflection of the number of systems that will need to be updated versus at the contract level.

We estimate that 288 Part D sponsors would be subject to this requirement, based on 2019 data. We estimate a one-time burden of 2 hours at $120.68/hr for a pharmacist to develop the materials(s) to be sent to the beneficiaries. In aggregate, we estimate a one-time burden of 576 hours (288 parent organizations × 2 hr) at a cost of $69,512 (576 hr × $120.68/hr). Although there might be the need for updates in future years (if opioid risk and/or coverage information changes), we believe the burden to making such updates to existing materials will be negligible as the changes will be minor and may only occur in some future years. Hence, the more accurate approach adopted here is to estimate this as a one-time update.

We also estimate that it will take on average 2 hours at $89.06/hr for a computer programmer to upload the information into the systems. This would result in a one-time burden of 576 hours (2 hr × 288 parent organizations) at a cost of $51,299 (576 hr × $89.06/hr). Once the information is uploaded into the parent organization's database, we anticipate no further burden associated with this task, as the process will be automated after the initial upload with the same information on subsequent materials that are sent. The automation will include the sending of information to those enrollees who wish to receive an electronic copy. The automation will also cover updates in future years as the plan enrollment changes.

We proposed that Part D sponsors be permitted to disclose the opioid and coverage information in electronic form. Some enrollees preferred electronic notification and some preferred paper mailing. We had no way of estimating the proportions for each preference, but our experience suggests that most enrollees expect a paper mailing. Therefore, we assumed 75 percent (the average of 50 percent and 100 percent) would prefer a paper mailing, while the remaining 25 percent would prefer electronic notification.

There are several Part D enrollee groups presented in section III.D. of this final rule that we suggested could be sent the required information and thus, several approaches to estimate the burden. These enrollee group estimates ranged from sending the information to 2,698,064 to 46,759,911 enrollees.

In making estimates on the burden of sending out notices, we assumed that the IT systems of the plan would generate and mail the documents once a template is produced. Thus, the only costs are paper, toner, and postage. We also assumed one page per notice. We therefore estimate:

- *Cost of paper:* Typical wholesale costs of paper are approximately $2.50 for a ream of 500 sheets. The cost for one page is $0.005 ($2.50/500).
- *Cost of toner:* Toner costs can range from $50 to $200 and each toner cartridge can last from 4,000 to 10,000 sheets of paper. In this rule, we assume a cost of $50 for 10,000 pages. In that regard, the cost per page is $0.005 ($50/10,000 pages).
- *Cost of postage:* Currently, the bulk postage rates are $0.19 per 200 pages. The cost per page is $0.00095 ($0.19/200 pages).

Thus, the aggregate cost per page is $0.01095 ($0.005 for paper + $0.005 for toner + $0.00095 for postage). Note that mailing costs are annual while the programming updates and the development of materials are first-year costs with minimal or no costs in future years. The product of the cost per page (at $0.01095) times the number of enrollees (35,069,933) plus the one time first year costs $120,811 ($51,299 + $69,512) equals $504,827 ([$0.01095 × 35,069,933 enrollees] + $120,811) as shown in Table H12.

TABLE H12: IMPACTS FOR PROVIDING INFORMATION TO OPIOID USERS

Item Description	Number of respondents	Number of Responses	Time per response (hr)	Total time (hr)	Non Labor Costs for mailing ($)	Labor cost ($/hr))	First year cost ($)	Cost in subsequent years ($)
Programming	288	288	2	576	NA	89.06	51,299 (Labor)	N/A
Pharmacist development of the materials	288	288	2	576	NA	120.68	69,512 (Labor)	N/A
75% of All Part D enrollees who are estimated to want paper	288	35,069,933	N/A	N/A	384,016	N/A	384,016 (Non Labor)	384,016 (Non Labor)
Total	288	35,070,509	varies	1,152	384,016	Varies	504,827	384,016

The following summarizes the PRA-related public comments that we received and sets out our response to those comments. We are finalizing our proposed provisions, burden estimates, and assumptions without change.

Comment: We received two comments that suggested a specific subset to send this information to. The commenters also recommended focusing on any beneficiary who received an opioid fill in the last 7 days, but also appreciated the flexibility provided in this rule.

Response: We thank the commenters for their feedback. Although some commenters offered their opinion on the subset that might be the best group to receive the information, there was no consensus to inform sponsors' ultimate decisions on a specific enrollee population. Because there was no consensus, CMS will continue to maintain flexibility for plans and therefore are not committing to any specific approach.

7. ICRs Regarding Suspension of Pharmacy Payments Pending Investigations of Credible Allegations of Fraud and Program Integrity Transparency Measures (§§ 405.370, 422.500, 422.503, 423.4, 423.504, and 455.2)

The following changes will be submitted to OMB for approval under control number 0938–1383 (CMS–10724) for Medicare Advantage Plans and 0938–1262 (CMS–10517) for Part D Plans.

Sections 422.503(b)(4)(vi)(G)(*4*) and 423.504(b)(4)(vi)(G)(*4*) will require the MA organization or Part D plan sponsor, respectively, to have procedures to identify and report to CMS or its designee: (1) Any payment suspension implemented by a plan, pending investigation of credible allegations of fraud by a pharmacy, which must be implemented in the same manner as the Secretary does under section 1862(o)(1) of the Act; and (2) any information related to the inappropriate prescribing of opioids and concerning investigations, credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the plan.

CMS initiated a reporting pilot program in December 2016 with six plan sponsors to test the effectiveness of mandatory reporting of fraud, waste, and abuse. The pilot collected all external or internal Medicare complaints and referrals submitted to the plan's Special Investigations Unit (SIU). The data collected as part of the pilot program was time limited, but broader than the scope of reporting required by sections 2008 and 6063 of the SUPPORT Act. The scope of that pilot tested the reporting of all types of health care fraud, waste, and abuse that the plan sponsors could encounter in their operations and, therefore, could be utilized as a reasonable estimate of burden involved with the quarterly plan reporting to CMS that CMS will use to implement sections 2008 and 6063 of the SUPPORT Act. The pilot program analyzed information that was reported from five of six plan participants on time spent collecting three quarterly data submissions. Based on the results of the pilot study, if every Part C plan reported, we estimate it will take 605 MA plans 149,435 hours (605 plans * 247 hr/plan) at a cost of $13,730,088 (149,435 hr * $91.88/hr for a management analyst using 2019 BLS wage estimates) to fulfill the reporting and procedure preparation in the first year as shown in Table H13. In subsequent years, we estimate an annual burden of 94,380 hours (605 plans *156 hr/plan) at a cost of $8,671,634 (94,380 hr * $91.88/hr) as shown in Table H13.

Based on the results of the pilot study, if every Part D plan reported, we estimate it will take 63 Part D plans 15,561 hours (63 plans * 247 hr/plan) at a cost of $1,429,745 (15,561 hr * $91.88/hr) to fulfill the reporting and procedure preparation in the first year as shown in Table H14. In subsequent years, we estimate an annual burden of 9,828 hours (63 plans * 156 hr/plan) at cost of $902,997 (9,828 hr * $91.88/hr) as shown in Table H14.

The first-year burden consist of the time and effort needed to prepare the procedures and report the inappropriate prescribing information. Subsequent effort consists solely of the ongoing time and cost to report the inappropriate prescribing information to CMS. We could not anticipate how many plans will need to report any payment suspension to pharmacies in the plans' network or information on inappropriate opioid prescribing to CMS.

TABLE H13: MA ORGANIZATION BURDEN ESTIMATES

Regulatory Citation	OMB Control Number	Response Summary	Total Number of Respondents	Total Number of Responses	Time per Response (hr)	Total Annual Time (hr)	Labor Cost ($/hr)	Total Cost in 1st year ($)	Total Cost in Subsequent Years ($)
§ 422.503(b)(4)(vi)(G)(*4*)	0938-1383	Report fraud and abuse	605	605	247	149,435	91.88	13,730,088	0
§ 422.503(b)(4)(vi)(G)(*4*)	0938-1383	Report fraud and abuse	605	605	156	94,380	91.88	0	8,671,634
TOTAL*			605	1,210	varies	243,815	91.88	13,730,088	8,671,634

TABLE H14: PART D PLAN SPONSOR BURDEN ESTIMATES

Regulatory Citation	OMB Control Number	Response Summary	Total Number of Respondents	Total Number of Responses	Time per Response (hr)	Total Annual Time (hr)	Labor Cost ($/hr)	Total Cost in 1st year ($)	Total Cost in Subsequent Years ($)
§ 423.504(b)(4)(vi)(G)(*4*)	0938-1262	Report fraud and abuse	63	63	247	15,561	91.88	1,429,745	0
§423.504(b)(4)(vi)(G)(*4*)	0938-1262	Report fraud and abuse	63	63	156	9,828	91.88	0	902,997
TOTAL			63	126	varies	25,389	91.88	1,429,745	902,997

We received no comments on our proposed provisions, burden estimates, and assumptions. Consequently, we are finalizing without change.

8. ICRs Regarding Beneficiary Real Time Benefit Tool (RTBT) (§ 423.128)

The following changes will be submitted to OMB for approval under control number 0938–0763 (CMS–R–262). Subject to renewal, the control number is currently set to expire on April 30, 2022.

As described in section IV.G. of this final rule, the new paragraphs at § 423.128(d)(4) and (5) require each Part D plan to implement a beneficiary RTBT no later than January 1, 2023. This tool will allow enrollees to view the information included in the prescriber RTBT system which includes complete, accurate, timely, and clinically appropriate patient-specific real-time formulary and benefit information (including cost, formulary alternatives, and utilization management requirements). Plans will be able to use existing secure patient portals to fulfill this requirement, to develop a new portal, or to use a computer application.

In estimating the cost impact of this provision it is important to bear in mind that the rewards and incentives are optional for each Part D sponsor. Additionally, based on our conversations with the industry, participation on industry workgroups, and research, we understand that most Part D plans have already created beneficiary portals that satisfy existing privacy and security requirements. We believe that the few plans that have yet to create a portal or web application will have one in place by January 1, 2023. Finally, some Part D Sponsors who wish to use such a portal may find it cheaper to rent an existing portal from a third party vendor. Consequently, the impacts below are maximum impacts; they overestimate the impact of the provision by assuming that all Part D sponsors must create a completely new RTBT.

We estimate it will take 104 hours at $89.06/hr for a computer programmer to program this information into the beneficiary portal and an additional 52 hours to put this information into a user interface that is easily understood by enrollees. The time estimates are based on consultation with the healthcare industry and their IT staff to determine the time that it takes for minor changes in programming. Thus, the burden for implementing RTBT is 44,928 hours (288 organizations * 156 hr) at a cost of $4,001,288 (44,928 hr * $89.06/hr).

This is a maximum one-time first year cost. We are not estimating ongoing maintenance costs because: (1) Many plan sponsors already have a beneficiary portal and (2) the total maintenance costs per plan sponsor tend to be stable from year because although there is variation in what software needs maintenance, some software needs more usage, some needs less, and some needs routine. The average absorbs and stabilizes this variability. Adding one more software cost that is not excessively above the average would not change that average beyond rounding or uncertainty error.

We next estimated the cost of implementing the rewards and incentives program for use of RTBT. We estimated three items: (A) Development of policies for the new program, (B) updating of systems, and (C) maintaining the program. We solicited stakeholder feedback on all of our proposed assumptions. We informally questioned stakeholders who believe that only 10 percent of parent part D sponsors would create such a program. Since there are 288 Part D sponsors we expect 29 (288 * 0.10) organizations to develop and use a reward and incentive program.

(A) *Development of policy:* We estimate that for each parent organization an operations manager and compliance officer working together at a combined hourly wage of $188.36/hr ($118.30/hr + $70.06/hr) would take 40 hours. Therefore, the impact is 1,160 hours (40 hr * 29 parent organizations) at a cost of $218,498 (1,160 hr * $188.36/hr).

(B) Since systems already exist to collect enrollee data, they will only have to be updated to collect data on use of RTBT and most of this work will be done when creating the RTBT. We therefore estimate, per parent organization, an extra 40 hours for a computer programmer. Therefore, the impact is 1,160 hours (40 hr * 29 organizations) at a cost of $103,310 (1,160 hr * $89.06/hr).

(C) We estimate that 2 administrative support workers each working at $36.82/hr will take 15 hours every month to maintain the program. The impact is 10,440 hours (15 hr/month * 12 months * 2 workers * 29 organizations) at a cost of $384,401 (10,440 hr * $36.82/hr).

The aggregate impact for implementing the rewards and incentives for RTBT among those Part D sponsors who wish to do so is 57,688 hours (44,928 hr + 1,160 hr + 1,160 hr

+ 10,440 hr) at a cost of $4,707,497 ($4,001,288 + $218,498 + $103,310 + $384,401).

Since plans are in the best position to estimate their implementation costs, we solicited comment on the accuracy of this burden estimate and on any measures that CMS can take to decrease the impact of this provision, while maintaining its utility for enrollees. In addition, because plans are in the best position to estimate any information collection implications, since they will be the stakeholders implementing this provision, we solicited comment on any other potential information collection implications. We received no comments on our proposed provisions and burden estimates. Consequently, we are finalizing them without change.

9. ICRs Regarding Establishing Pharmacy Performance Measure Reporting Requirements (§ 423.514)

The following changes will be submitted to OMB for approval under control number 0938–0992 (CMS–10185). Subject to renewal, the control number is currently set to expire on December 31, 2021. It was last approved on December 7, 2018, and remains active.

This rule amends § 423.514(a) by giving CMS the authority to collect Part D sponsors' pharmacy performance measures data that is used to evaluate pharmacy performance, as established in their network pharmacy agreement. Given the growing practice of Part D sponsors measuring the performance of pharmacies that service Part D beneficiaries to determine the final cost of a drug under Part D, this reporting requirement will enable CMS to monitor the impact of these recoupment practices. We estimate a collection of less than 15 data elements. As noted in section IV.G of this final rule, the Part D reporting requirements data elements, consistent with our standard, will be specified through the standard non-rule PRA process after publication of this final rule. The standard non-rule process includes the publication of 60- and 30-day **Federal Register** notices. At that time, the data elements, timeline, and method of submission will be made available for public review and comment.

Although the data elements will be made available for public review through the standard PRA process, we are providing the interested parties with an initial projection of the potential burden estimates. In this regard there are currently 627 contracts that would be required to report their pharmacy performance measures' data. Part D sponsors currently report 6 sections of data to CMS in accordance with the Part D reporting requirements. Therefore, CMS does not expect compliance to these reporting requirements will result in additional start-up costs. Anticipated staff time spent performing these data collection activities would be 30 minutes for a data analyst and/or IT analyst at a rate of $92.46/hr. We will require this information to be reported at the plan level once annually. Reporting at the plan level would generate 5,234 responses since there are currently 5,234 plans. In aggregate, we estimate an annual plan sponsor burden of 2,617 hours (5,234 plans × 1 report/year × 0.5 hr/report) at a cost of $241,968 (2,617 hr × $92.46/hr). We solicited input from stakeholders on the accuracy of these estimates and on any measures that CMS could take to decrease the burden of this provision. The following comment was received.

Comment: We received one comment stating that we had underestimated the financial burden of Part D plans reporting their pharmacy collection measures.

Response: We appreciate the comment. However, we believe that based on current wages from the Bureau of Labor Statistics, and from our long current history of collecting other Part D plan reporting requirements, that our burden estimate is fair and reasonable.

We did not receive any other comments related to the projected burden for this provision. As a result, we are finalizing our proposed provisions and burden without change.

10. ICRs Regarding PACE

Subsequent to the publication of the proposed rule, we revised the burden estimates in this final rule by: (1) Incorporating service determination request (formerly ''service delivery request'') data from 2019 PACE audits which was not available at the time the estimates were published in the proposed rule, (2) updating enrollment data from 40,040 participants to 42,800 participants based on 2017–2019 enrollment data from the CMS Office of the Actuary (OACT), (3) updating PACE organization contract data from 131 PACE organizations to 133 PACE organizations based on data from the Health Plans Management System (HPMS), and (4) updating wage figures based on May 2019 BLS data.

The following changes in subsections 10a through 10e will be submitted to OMB for approval under control number 0938–0790 (CMS–R–244). Subject to renewal, the control number is currently set to expire on December 31, 2023.

a. ICRs Regarding Service Determination Request Processes Under PACE (§§ 460.104 and 460.121)

Section 460.121(i)(2) will require that PACE organizations provide written notification to participants when the interdisciplinary team extends the timeframe for processing service determination requests. Based on our experience with PACE audits during 2017, 2018, and 2019, during which time we reviewed all operating PACE organizations at least once, we found a total of 30,173 service determination requests. The average total PACE enrollment during that same period was 42,800. Thus the average number of service determination requests per 1,000 enrollees was 705 (30,173/42,800). This service determination request ratio or intensity (705 service determination requests per 1,000 enrollees) is used to estimate the number of service determination requests PACE organizations will receive from 2022–2024. The service determination request ratio is an intuitive way of capturing the rate of service determination requests per thousand enrollees and is used to estimate the burden associated with service determination requests for 2022–2024.

Based on the same audit experience and data collected, we further estimate that:

- Approximately 10.16 percent of all service determination requests currently received are extended, and
- Of those 705 service determination requests currently received per 1,000 enrollees, 77.53 percent are approved (546.6 requests per 1,000 enrollees), while 22.47 percent are denied (158.4 requests per 1,000 enrollees).

With respect to the final service determination request requirements in the new § 460.121, we estimate that half of all approved service determination requests (that is, 50 percent of the 546.6 approved requests per 1,000 enrollees or 273.3 requests per 1,000 enrollees) could be approved in full by an IDT member at the time the request is made. Because those approval decisions could be made immediately, extension notifications would not be needed for those service determination requests.

Therefore, the requirement to provide written notification when a service determination request is extended will apply to:

- The 2.28 percent of service determination requests which are extended and subsequently denied (22.47 percent of service determination requests that are denied * 10.16 percent of service determination requests that are extended); and

• The 3.94 percent of service determination requests that are approved and not routine (that is, a member of the IDT cannot approve the service determination request in full at the time the request is made) and are extended (77.53 percent of service determination requests that are approved * 50 percent of requests that are not routine * 10.16 percent of requests that are extended).

Thus the requirement will apply to 6.22 percent (2.28 percent of denied service determination requests and 3.94 percent of approved service determination requests) of all service determination requests. Based on OACT estimates, the average projected PACE enrollment for 2022–2024 is 53,549 per year or an increase of 10,749 enrollments from 2017–2019 (53,549 − 42,800). The multiplication of the estimated 2022–2024 PACE enrollment (53,549 enrollees) by the current service determination request intensity of 705 per 1,000 enrollees gives a reasonable estimate of the number of service determination requests PACE organizations will receive for 2022–2024. Based on our audit experience, we estimate that it would take the IDT approximately 1 hour to prepare and issue notification of the extension to a participant or the designated representative.

Consequently, the total annual burden for providing written notification to participants when the interdisciplinary team extends the timeframe for processing service determination requests in accordance with § 460.121(i)(2) is 2,350 hours (705 requests per 1,000 enrollees × 53,549 projected enrollment for 2022–2024 × 6.22 percent of requests that require extensions × 1 hour to process each service determination request extension) at a cost of $133,997 (2,350 hr × $57.02/hr for a Master's-level Social Worker (MSW) (BLS: Healthcare social worker) to process them).

To meet the notification requirements finalized in § 460.121(i)(2), we expect most PACE organizations will develop a template letter to notify the appropriate parties of an extension. We estimate a burden of 1 hour at a cost of $70.06/hr for a compliance officer (quality improvement coordinator) to create an extension letter template.

In addition to the one-time burden associated with creating an extension letter template, we also anticipate a one-time burden associated with the requirements we are finalizing in § 460.121(j)(2), which clarify the required content of denial notifications. As a result of these requirements, we expect that PACE organizations will need to revise their denial notification letter templates. We estimate a burden of 1 hour at a cost of $70.06/hr for a compliance officer (quality improvement coordinator) to revise any existing denial letter templates.

In aggregate, for the development and revision of both the extension notification and denial notification, we estimate it will take of 2 hours at $70.06/hr for a compliance officer (quality improvement coordinator) to create and revise the materials. We estimate a one-time burden of 266 hours (133 PACE organizations × 2 hr) at a cost of $18,636 (266 hr × $70.06/hr).

We received no comments on our proposed burden estimates in §§ 460.121 and 460.104. In this final rule, we revised the burden estimate for these provisions using updated data previously discussed in the introductory paragraph to section VIII.B.10. of this final rule. The updated data used to revise the burden estimates includes: (1) Service determination request data from 2019 PACE audits, (2) 2017–2019 enrollment data, (3) PACE organization contract data, and (4) wage data. Based on this updated data, we have revised the burden estimate for service determination request extension notification in new § 460.121(j)(2), which resulted in a decrease of 578 hours (from 2,928 hr to 2,350 hr) and $30,615 (from $164,612 to $133,997) from the proposed rule. We have also revised the burden estimate for service determination request denial notification requirements in new § 460.121(i)(2), which resulted in an increase of 4 hours (from 262 hr to 266 hr) and $369 (from $18,267 to $18,636) from the proposed rule.

b. ICRs Regarding Appeals Requirements Under PACE (§§ 460.122 and 460.124)

Section 460.122 currently states the requirements for implementing an appeals process in PACE. In this rule we are finalizing requirements for PACE organizations to develop and distribute written materials that will explain the PACE requirements to the third party reviewers that are responsible for making appeal determinations. Additionally, we are finalizing requirements for appeal decision notifications, which we expect will require PACE organizations to revise their current appeal notification materials.

For the development and distribution of materials to the third party reviewer, we estimate it will take 4 hours at $70.06/hr for a compliance officer (quality improvement coordinator) at each PACE organization to create and distribute these materials (3 hr to create and 1 hr to distribute). For the revision of the written appeal notices, we estimate it will take 1 hour at $70.06/hr for a compliance officer (quality improvement coordinator) at each PACE organization to revise the current notices.

In aggregate, we estimate a one-time burden of 665 hours [133 PACE organizations * (4 hr + 1 hr)] at a cost of $46,590 (665 hr * $70.06/hr).

We received no comments on our proposed burden estimates for this provision. In this final rule, we revised the burden estimate for developing and distributing written materials to third party reviewers using updated data previously discussed in the introductory paragraph to section VIII.B.10. of this final rule. The updated data used to revise the burden estimate includes: (1) 2017–2019 enrollment data, (2) PACE organization contract data, and (3) wage data. Updated service determination request data was not utilized to revise this burden estimate since the data does not impact appeals notifications. Based on the updated data, we have revised the burden estimate for this provision which resulted in an increase of 10 hours (from 655 hr to 665 hr) and $923 (from $45,667 to $46,590) from the proposed rule.

c. ICRs Regarding Documenting and Tracking the Provision of Services Under PACE (§ 460.98)

As discussed in section VI.D. of this final rule, we are amending § 460.98(b)(5) in part to require PACE organizations to document, track and monitor the provision of services across all care settings, regardless of whether services are formally incorporated into a participant's plan of care.

We estimate a one-time burden of 50 hours at $56.34/hr for technical staff at each PACE organization to develop the necessary procedures and written materials. We estimate a one-time burden of 6,650 hours (133 PACE organizations * 50 hr) at a cost of $374,661 (6,650 hr * $56.34/hr) for the first year. Since PACE organizations are currently required to document all services furnished in the medical record in accordance with § 460.210(b)(2), we believe the one-time burden of 50 hours is a reasonable estimate for developing the necessary procedures and written materials to document, track, and monitor the provision of services.

We also estimate this provision will result in increased ongoing costs to PACE organizations. To estimate the increased burden, we use the following assumptions about the documentation, tracking and monitoring of services,

based on our experience monitoring and auditing PACE organizations.

As discussed above, PACE organizations are already required to document services furnished in the participant's medical record; however, PACE organizations will need to devote time to monitoring and tracking the provision of services. We therefore estimate a burden of 50 hours at $56.34/hr for technical staff to complete these activities, including, when warranted, revision of the aforementioned program procedures and monitoring measures. We estimate an annual burden of 6,650 hours (133 PACE organizations * 50 hr) at a cost of $374,661 (6,650 hr * $56.34/hr).

In aggregate, we estimate a burden of 13,300 hours (6,650 hr + 6,650 hr) at a cost of $749,322 ($374,661 + $374,661) for the first year of implementation. In subsequent years, we estimate a burden of 6,650 hours at a cost of $374,661 for the ongoing documentation, monitoring and tracking of services.

We received the following comments on the estimated burden for this provision.

Comment: The majority of commenters expressed concern with to the use of the term ''track.'' These commenters suggested that requiring a PACE organization to track the provision of services could imply that PACE organizations would be required to establish and maintain specific logs, universes or data sets, and that such a requirement would potentially increase burden and conflict with CMS' Patients Over Paperwork initiative.

Response: As we discussed in greater detail in section VI.D. of this final rule, we understand from commenters' concerns that the use of the word ''track'' could be interpreted to suggest that PACE organizations would be required to maintain a real time ''log'' of services which could potentially be burdensome to implement. As we stated in the proposed rule, we believe that PACE organizations should document that a service has been ordered as well as when and how the approved service was provided. It was not our intention in the proposal to dictate how an organization implements this provision, and we agree with the commenter that PACE organizations should have flexibility in how they operationalize the requirement to track, monitor and document the provision of services. We expect that PACE organizations will create their own methods for tracking and monitoring services. We note that while commenters expressed concerns regarding the potential burden, no one commented on our estimates related to the burden. We believe this indicates that we were accurate in predicting the potential burden associated with this provision.

Therefore, in this final rule, we did not revise the estimates based on comments received, but revised the burden estimate for these provisions using updated data previously discussed in the introductory paragraph to section VIII.B.10. of this final rule. The updated data used to revise the burden estimates includes: (1) 2017–2019 enrollment data, (2) PACE organization contract data, and (3) wage data. Updated service determination request data was not utilized to revise this burden estimate since the data does not impact documenting and tracking the provision of services. Based on the updated data, we have revised the first year burden estimate for this provision which resulted in an increase of 200 hours (from 13,100 hr to 13,300 hr) and $82,532 (from $666,790 to $749,322) from the proposed rule. We have also revised the ongoing burden estimate for this provision which resulted in an increase of 100 hours (from 6,550 hr to 6,650 hr) and $41,266 (from $333,395 to $374,661) from the proposed rule.

d. ICRs Regarding Documentation in Medical Records Under PACE (§ 460.210)

Subsequent to the publication of our proposed rule and based on public comment, this final rule revises the proposed requirements in § 460.210(b)(6) to require PACE organizations to maintain original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant, in any format (for example, emails, faxes, letters, etc.) and including, but not limited to the following: (i) Communications from the participant, his or her designated representative, a family member, a caregiver, or any other individual who provides information pertinent to a participant's health or safety or both and (ii) Communications from an advocacy or governmental agency such as Adult Protective Services.

Section 460.210 currently sets out the requirements relating to medical records for PACE participants. This includes the minimum content of participant medical records. Under § 460.210(b) of this final rule, CMS requires PACE organizations to maintain additional information and documentation in the medical record, including documentation of all recommendations for services made by employees or contractors of the PACE organization, the reasons for not approving or providing any service recommended by an employee or contractor of the PACE organization, and original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant.

We expect that PACE organizations will have to revise their policies and procedures and re-train staff on the new requirements. We believe that a compliance officer (quality improvement coordinator) will be responsible for ensuring the necessary materials are updated and that staff are trained. For revising materials and training staff, we estimate a one-time burden of 10 hours at $70.06/hr for a compliance office (quality improvement coordinator) to revise materials and lead training. Therefore, the one-time burden to implement this provision is 1,330 hours (133 PACE organizations * 10 hr) at a cost of $93,180 (1,330 hr * $70.06/hr).

We also estimate this provision will result in increased ongoing costs to PACE organizations. To estimate the increased burden, we use the following assumptions about medical record documentation. These assumptions are based on our monitoring and oversight experience.

Each of the new requirements discussed above may require the involvement of any IDT occupation. Therefore, to determine the cost associated with this provision, we took the wages for the full IDT ($846.48/hr) and divided it by the 11 occupations included in the IDT (see Table H15) to determine an average wage of $76.95/hr ($846.48/hr/11 occupations). We believe this is the most accurate estimate as it will be unlikely all occupations will be working on the medical record at the same time, and we are unable to estimate how much any one occupation will work in comparison to the other occupations.

In the proposed rule, we estimated that the proposed requirement to maintain original documentation of any written communication the PACE organization receives relating to the care, health or safety of a participant, would not create a significant burden, as organizations would only be required to store existing documentation within a medical record. Therefore, we estimated that the burden for this part of the provision would be 5 hours per PACE organization or 665 total hours (5 hr * 133 organizations) at a cost of $51,172 (665 hr * $76.95/hr).

Following publication of the proposed rule, while we did not receive any comments specific to our burden

estimates for this requirement, we did receive general comments that expressed concern regarding the potential burden associated with storing written communications in a participant's medical record. Based on these comments, we believe we underestimated the burden for this provision. In response to comments received we revised the requirements at § 460.210(b)(6) to permit PACE organizations to maintain original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant. This change means that PACE organizations would be required to maintain all covered written communications in § 460.210(b)(6)(i) and (ii), but that they can be maintained in either their original form or as an unaltered electronic copy. In addition to revising the regulatory text to permit PACE organizations to maintain unaltered electronic copies of affected written communications, we are also revising our burden estimates for § 460.210(b)(6). In this final rule, we estimate that the burden for maintaining original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant will be 10 hours per PACE organization or 1,330 total hours (10 hr * 133 organizations) at a cost of $102,344 (1,330 hr * $76.95/hr). This burden is an ongoing burden in all years.

This final rule at § 460.210 also requires a PACE organization to document all recommendations for services from employees or contractors of the PACE organization, including specialists, and require PACE organizations to document the reasons a service recommended by an employee or contractor of the PACE organization is not approved or provided .We considered several factors when determining the burden associated with these provisions. First, PACE organizations are already required under § 460.104(b)(1) to document the rationale for not providing services in developing the plan of care; therefore, this provision will only apply to services recommended following the initial development of the plan of care. Second, PACE organizations will only have to document the rationale under § 460.210(b)(5) when the PACE organization does not approve or provide a recommended service, so there will be no additional burden in situations where the PACE organization approves or provides a recommended service. Considering these two factors, we determined that each PACE organization will have to spend approximately 52 hours (approximately 1 hr per week) to implement this part of the regulation. Therefore, we estimate a total of 52 hours per organization per year, or a total of 6,916 hours (52 hr * 133 organizations) at a cost of $532,186 (6,916 hr * $76.95/hr).

We therefore estimate the total ongoing burden of all aspects of this provision at § 460.210 to be 8,246 hours (1,330 hr + 6,916 hr) at a cost of $634,530 ($102,344 + $532,186).

TABLE H15—WAGES FOR IDT STAFF MEMBERS

Occupation title	Occupation code	Adjusted wage * ($/hr)
Dietician	29–1031	59.94
Driver (Passenger Vehicle Driver)	53–3058	31.94
Home Care Coordinator (often a RN)	29–1141	74.48
Masters of Social Work	21–1022	57.02
Occupational Therapist	29–1122	82.90
PACE Center Manager (Medical and Health Services Manager)	11–9111	110.74
Personal Care Attendant	31–1120	25.42
Physical Therapist	29–1123	86.70
Primary Care Provider	29–1216	193.70
Recreational Therapist	29–1125	49.16
Registered Nurse	29–1141	74.48
Total	.....	846.48
Average IDT Cost Per Hour (846.48/11 occupations)	.....	76.95

* See section VIII.A. of this final rule for additional wage information.

We received the following comments on the estimated burden resulting from this provision in the proposed rule.

Comment: Commenters expressed concerns that maintaining original documentation of any written communication relating to the care, health or safety of a participant in any format in the medical record would increase burden for PACE organizations as well as increase burden on providers that may be responsible for transferring these communications to the medical record. As a solution, these commenters recommended permitting PACE organizations to scan written documentation and copy and paste communications received via email or text into electronic medical records.

Response: In response to commenters' concerns, we reviewed our initial burden estimate and determined that we had underestimated the burden for maintaining this documentation in its original format within the medical record. We increased the burden estimate in the final rule accordingly. In determining what an appropriate estimate for this provision would be, we considered both that we may have underestimated the original burden in the proposed rule, as well as the additional operational flexibility that we are allowing for in the final rule, as discussed in greater detail in section VI.F. of this final rule. Given these two factors, we estimate that the burden for maintaining original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant will be 10 hours per PACE organization instead of the 5 hours we initially proposed.

In this final rule, we revised the burden estimate for these provisions using updated data previously discussed in the introductory paragraph to section VIII.B.10. of this final rule. The updated data used to revise the burden estimates includes: (1) 2017–2019 enrollment data, (2) PACE organization contract data, and (3) wage data. Updated service determination request data was not utilized to revise this burden estimate since the data does

not impact medical record documentation. The estimates were also revised to account for additional burden for the requirements in § 460.210(b)(6). Based on this updated data, we have revised the burden estimate for revising materials and training related to the changes in this provision which resulted in an increase of 20 hours (from 1,310 hr to 1,330 hr) and $1,847 (from $91,333 to $93,180) from the proposed rule. We have also revised the burden estimate for the ongoing implementation of this provision which resulted in an increase of 910 hours (from 7,336 hr to 8,246 hr) and $75,453 (from $559,077 to $634,530) from the proposed rule.

e. ICRs Regarding PACE Participant Rights: Contact Information and Access Requirements (§ 460.112)

Section 460.112 currently includes the specific rights to which PACE participants are entitled. As discussed above in section VI.G., this final rule amends the participant rights to identify three additional rights, specifically, the participant's right to have reasonable and timely access to specialists as indicated by the participant's health condition and consistent with current clinical practice guidelines, the right to call 1–800–MEDICARE for information and assistance, and the right to receive necessary care in all care settings, up to and including placement in a long-term care facility when the PACE organization can no longer maintain the participant safely in the community. PACE organizations are currently required to provide a copy of the participant rights to participants at the time of enrollment and to post a copy of the rights in the center. Under this rule, PACE organizations will be required to revise the current participant rights to account for the three new requirements and post a copy of the revised document.

We estimate it will take 2 hours at $70.06/hr for a compliance officer (quality improvement coordinator) to update the participant rights information included in the enrollment information and post the new participant rights in the center. In aggregate, we estimate a one-time burden of 266 hr (133 PACE organizations * 2 hr) at a cost of $18,636 (266 hr * $70.06/hr).

We did not receive any comments related to our projected burden estimates for this provision. With the exception of the adjusted number of organizations, we are finalizing the proposed burden without change.

11. ICRs Regarding Stipulated Decisions in Part C (§ 422.562)

In order to permit OMHA adjudicators to more efficiently issue decisions where there is no longer any material issue in dispute, we are providing in § 422.562(d) that, for the sole purpose of applying § 405.1038(c), MA organizations are included in the definition of ''contractors'' as that definition relates to stipulated decisions issued by ALJs and attorney adjudicators under § 405.1038. We are scoring this impact as negligible for several reasons. The total number of favorable decisions in MA for contract year 2018, the most recent year for which we have complete appeals data, was 578. The number of these overturned denials that were stipulated decisions is not currently quantifiable as it is not data that existing appeals systems are equipped to track, and ALJs do not track this data on their own.

We consulted with OMHA for its opinion on stipulated decisions. OMHA estimated that the number of contractors submitting oral or written statements in an ALJ hearing or attorney adjudicator review was in the single digits as plans typically prefer an alternate, informal approach that removes the claim from the appeals process altogether: Requesting that the beneficiary withdraw their appeal and resubmit their claim for payment.

CMS estimates that while this change would positively impact beneficiaries both in receipt of their items or services, and afford beneficiaries due process protections in a formalized stipulated decisions process, the number of beneficiaries that would be affected is minimal. Despite this estimation of negligible impact, we included this change to promote regulatory uniformity in OMHA's approach to stipulated decisions as far as Medicare contractors are concerned. The submission of a written or oral statement seeking a stipulated decision is associated with an administrative action pertaining to specific individuals or entities (5 CFR 1320.4(a)(2) and (c)). Consequently, the burden for preparing and filing the oral or written statement for use in the appeal is exempt from the requirements of the PRA.

We received no comments on the assumptions related to our proposed provisions. We are finalizing the burden assessment on these provisions without modification.

C. Summary of Information Collection Requirements and Associated Burden Estimates

TABLE H16: SUMMARY OF ANNUAL INFORMATION COLLECTION REQUIREMENTS AND BURDEN [1]

Provision	Regulation under Title 42 of the CFR	Response Summary	OMB Control Number	Total Number of respondents	Total Number of Responses	Time per response (hr)	Total Annual Time (hr)	Non-labor cost ($)	Labor Cost ($/hr)	Total Cost in 1st year ($)	Total Cost in Subsequent Years ($)

IX. Regulatory Impact Analysis

A. Statement of Need

The provisions in this final rule implement specific provisions of the BBA of 2018 and the SUPPORT Act. The statutory need for these policies is clear. However, this rule also contains discretionary policies, including enhancements to the Programs of All-Inclusive Care for the Elderly (PACE) requirements, hence we provide economic justification for some of these noteworthy provisions in the following paragraphs.

Based on industry feedback over the course of several years, and our experiences auditing PACE organizations, we proposed to modify certain PACE requirements to enhance stakeholders' understanding of our requirements and reduce administrative burden. Stakeholders have suggested that the existing processes for addressing service determination requests is burdensome for PACE organizations, and can delay participants' access to services. We are finalizing several changes to the PACE regulations to streamline these processes while ensuring that important participant protections remain intact. We estimate these changes will save PACE organizations, as a whole, approximately $16.8 million in the first year, increasing (due to expected increased PACE enrollment), to $21.3 million in ten years.

Summaries of the public comments that are within the scope of the provisions' proposed regulatory impact analyses implemented in this final rule are included in this section with our responses under the appropriate headings.

B. Overall Impact

We examined the impact of this final rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), Executive Order 13272 on Proper Consideration of Small Entities in Agency Rulemaking (August 13, 2002), section 1102(b) of the Act, section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act (5 U.S.C. 801–808), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017). This rule is economically significant under Executive Order 12866, as it may result in over $100 million in costs, benefits, or transfers annually. The Office of Information and Regulatory Affairs has designated this rule as a major rule pursuant to the Congressional Review Act, 5 U.S.C. 804(2).

Section 202 of UMRA also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2020, that threshold is approximately $156 million. This final rule is not anticipated to have an unfunded effect on state, local, or tribal governments, in the aggregate, or on the private sector of $156 million or more.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has federalism implications. Since this final rule does not impose any substantial costs on state or local governments, preempt state law or have federalism implications, the requirements of Executive Order 13132 are not applicable.

If regulations impose administrative costs on reviewers, such as the time needed to read and interpret this final rule, then we should estimate the cost associated with regulatory review. There are currently 795 contracts (which includes MA, MA–PD, and PDP contracts), 55 state Medicaid Agencies, and 300 Medicaid MCOs. We also expect a variety of other organizations to review (for example, consumer advocacy groups, major Pharmacy Benefit Managers). We expect that each organization will designate one person to review the rule. A reasonable maximal number is 2,000 total reviewers. We note that other assumptions are possible.

Using the BLS wage information for medical and health service managers (code 11–9111), we estimate that the cost of reviewing this final rule is $110.74 per hour, including fringe benefits and overhead costs (*http://www.bls.gov/oes/current/oes_nat.htm*). Assuming an average reading speed, we estimate that it will take approximately 19 hours for each person to review this final rule. For each entity that reviews the rule, the estimated cost is therefore $2,100 (19 hours × $110.74). Therefore, we estimate that the maximum total cost of reviewing this final rule is $4.2 million ($2,104 × 2,000 reviewers). However, we expect that many reviewers, for example pharmaceutical companies and PBMs, will not review the entire rule but just the sections that are relevant to them. We expect that on average (with fluctuations) 10 percent of the rule will be reviewed by an individual reviewer; we therefore estimate the total cost of reviewing to be $0.4 million.

Note that this analysis assumed one reader per contract. Some alternatives include assuming one reader per parent organization. Using parent organizations instead of contracts will reduce the number of reviewers. However, we believe it is likely that review will be performed by contract. The argument for this is that a parent organization might have local reviewers assessing potential region-specific effects from this final rule.

In accordance with the provisions of Executive Order 12866, this final rule was reviewed by OMB.

C. Impact on Small Businesses—Regulatory Flexibility Analysis (RFA)

The RFA, as amended, requires agencies to analyze options for regulatory relief of small businesses if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions.

This final rule has several dozen provisions. Although several provisions are technical or codify existing guidance, and therefore are not expected to have economic impact beyond current operating expenses, there are other provisions with paperwork or other costs. These provisions are analyzed in both this section and in section VIII of this final rule. A compact summary of burdens by year and provision are summarized in Tables H16 and I14 of this final rule. Also, where appropriate the cost burdens and cost savings of groups of provisions that are related are summarized in this section. For example, Table H16 of section VIII of this final rule lists eight paperwork burdens related to PACE organizations which are summarized in Table I7 of this section. Table I7 is then used in Table I9 to give total savings related to PACE organizations, the total savings reflecting all costs and savings of the various provisions whether paperwork or not.

This rule has several affected stakeholders. They include (1) insurance companies, including the five types of Medicare health plans, MA organizations, PDPs, cost plans, PACE organizations, and demonstration projects, (2) providers, including institutional providers, outpatient providers, clinical laboratories, and

pharmacies, and (3) enrollees. Some descriptive data on these stakeholders are as follows:

- Pharmacies and Drug Stores, NAICS 446110, have a $30 million threshold for ''small size'' with 88 percent of pharmacies, those with under 20 employees, considered small.
- Direct Health and Medical Insurance Carriers, NAICS 524114, have a $41.5 million threshold for ''small size,'' with 75 percent of insurers having under 500 employees meeting the definition of small business.
- Ambulatory Health Care Services, NAICS 621, including about 2 dozen sub-specialties, including Physician Offices, Dentists, Optometrists, Dialysis Centers, Medical Laboratories, Diagnostic Imaging Centers, have a threshold ranging from $8 to $35 million (Dialysis Centers, NAICD 621492, have a $41.5 million threshold). Almost all firms are big, and this also applies to sub-specialties. For example, for Physician Offices, NAICS 621111, receipts for offices with under 9 employees exceed $34 million.
- Hospitals, NAICS 622, including General Medical and Surgical Hospitals, Psychiatric and Substance Abuse Hospitals, Specialty Hospitals have a $41.5 million threshold for small size, with half of the hospitals (those with between 20–500 employees) considered small.
- Skilled Nursing Facilities (SNFs), NAICS 623110, have a $30 million threshold for small size, with half of the SNFs (those with under 100 employees) considered small.

We are certifying that this final rule does not have a significant economic impact on a substantial number of small entities. To defend our position, we first describe at a high level the cash flows related to the Medicare program. We then provide more specific details.

The high-level underlying idea in creating the MA, Medicare cost plan, and MA–PD Medicare health insurance programs, is to allow private insurers to coordinate care, resulting in efficiencies of cost. The high-level underlying idea in creating the non-government-managed Prescription Drug program (PDPs and drug portion of MA–PDs) is to allow beneficiaries to obtain prescription drugs in a competitive market to reduce costs. For MA, MA–PD, and cost plans, enrollees obtain the same original Medicare Part A and B services they would otherwise obtain in the original Medicare program, generally at reduced cost (however, for the small percentage of plans bidding above the benchmark, enrollees pay more, but this percentage of plans is not ''significant'' as defined by the RFA and as justified below).

The savings achieved by the MA and the MA–PD plans, the amount of reduced cost, can then be used by the private insurers in a variety of ways, including providing supplemental benefits to the required original Part A and Part B Medicare services. Some examples of these supplemental benefits include vision, dental, and hearing; in addition, MA plans may provide supplemental benefits in the form of reductions in cost sharing compared to the Medicare FFS program. The cost for furnishing these supplemental benefits comes from a combination of the Medicare Trust Fund and enrollee premiums.

Part D plans submit bids and are paid by the Medicare Trust Fund for their projected costs in the form of direct premium subsidy and reinsurance. For any enrolled low-income beneficiaries, plans receive and additional low-income premium subsidy and low-income cost sharing subsidy. The national average monthly bid amount, or NAMBA, determines the base premium. A plan's premium is the sum of the base premium and the difference between its bid amount and the NAMBA.

Thus the cost of providing services by these insurers is met by a variety of government funding and in some cases by enrollee premiums.

In order to achieve these goals, the government pays the MA health plans a portion of the funds that would have been paid had plan enrollees remained in original Medicare. These funds are then used to provide additional benefits on behalf of the health plans' enrollees. This unique insurance relationship has several consequences beneficial to all parties: First, the various insurance programs are not expected to suffer burden or losses since the government subsidizes them; second, the government often incurs savings because health plans, by virtue of coordinating care, are furnishing the same services, albeit often at a reduced cost. This lack of expected burden applies to both large and small health plans. As a consequence of this design, the unique MA regulations, such as those in this final rule, are defined so that small entities are not expected to incur additional burden since the cost of complying with any final rule is passed on to the government.

We next examine in detail each of the stakeholders and explain how they can bear cost. (1) For Pharmacies and Drug Stores, NAICS 446110; (2) for Ambulatory Health Care Services, NAICS 621, including about two dozen sub-specialties, including Physician Offices, Dentists, Optometrists, Dialysis Centers, Medical Laboratories, Diagnostic Imaging Centers, and Dialysis Centers, NAICD 621492; (3) for Hospitals, NAICS 622, including General Medical and Surgical Hospitals, Psychiatric and Substance Abuse Hospitals, and Specialty Hospitals; and (4) for SNFs, NAICS 623110: Each of these are providers (inpatient, outpatient, or pharmacy) that furnish plan-covered services to plan enrollees. Whether these providers are contracted or, in the case of PPOs, PFFS, and MSA, not contracted with the MA plan, their aggregate payment for services is the sum of the enrollee cost sharing and plan payments. For non-contracted providers, § 422.214 and sections 1852(k)(1) and 1866(a)(1)(O) of the Act require that a non-contracted provider accept payment that is at least what they would have been paid had the services been furnished in a fee-for-service setting. For contracted providers, § 422.520 requires that the payment is governed by a mutually agreed upon contract between the provider and the plan. Consequently, for these providers, there is no additional cost burden above the already existing burden in original Medicare.

For Direct Health and Medical Insurance Carriers, NAICS 524114, plans estimate their costs for the coming year and submit bids and proposed plan benefit packages. Upon approval, the plan commits to providing the proposed benefits, and CMS commits to paying the plan either (1) the full amount of the bid, if the bid is below the benchmark, which is a ceiling on bid payments annually calculated from original Medicare data; or (2) the benchmark, if the bid amount is greater than the benchmark.

Theoretically, there is additional burden if plans bid above the benchmark. However, consistent with the RFA, the number of these plans is not substantial. Historically, only 2 percent of plans bid above the benchmark, and they contain roughly 1 percent of all plan enrollees. Since the CMS criteria for a substantial number of small entities is 3 to 5 percent, the number of plans bidding above the benchmark is not substantial.

The preceding analysis shows that meeting the direct cost of this final rule does not have a significant economic impact on a substantial number of small entities, as required by the RFA. There are certain indirect consequences of these provisions which also create impact. We have already explained that 98 percent of the plans bid below the benchmark. Thus, their estimated costs

for the coming year are fully paid by the government. However, the government also pays the plan a ''beneficiary rebate'' amount that is an amount equal to a percentage (between 50 and 70 percent depending on a plan's quality rating) multiplied by the amount by which the benchmark exceeds the bid. The rebate is used to provide additional benefits to enrollees in the form of reduced cost sharing, lower Part B or Part D premiums, or supplemental benefits. (Supplemental benefits may also partially be paid by enrollee premiums if the plan chooses to use premiums or offers optional supplemental benefits that enrollees may elect to purchase.) It would follow that if the provisions of this final rule cause the bid to increase and if the benchmark remains unchanged or increases by less than the bid does, then the result would be a reduced rebate and possibly fewer supplemental benefits for the health plans' enrollees.

CMS has observed that from year to year MA organizations prefer to reduce their profit margins, rather than substantially change their benefit package. This is due to marketing forces; a plan lowering supplemental benefits even for one year may lose its enrollees to competing plans that offer these supplemental benefits. Thus, it is advantageous for the MA Organization to temporarily reduce margins, rather than reduce benefits.

We note that we do not have definitive data on this. That is, we can at most note the way profit margins and supplemental benefits vary from year to year. The thought processes behind the plan are not reported. More specifically, when supplemental benefits are reduced, we have no way of knowing the cause for this reduction, whether it be new provisions, market forces, or other causes.

A second indirect impact arises from effects on the MLR. More specifically, several provisions of this final rule have non-benefit, administrative classification. For example, the RTBT provision is a requirement for plans to utilize or create certain software; the cost of this creation is classified as administrative and hence is entered in the bid as a non-benefit expense. Similarly, the cost of rewards and incentives is being codified at § 422.134(g)(3) as a non-benefit expense in the plan bid. Several other provisions, including those related to models of care, call centers, and marketing standards, represent non-benefit administrative cost. A non-benefit expense contributes to the denominator of the MLR but not the numerator.

If the costs of complying with a particular provision are excessive, then the MLR could be adversely impacted and MLR requirements could possibly not be met. For contract year 2014 and subsequent contract years, MA organizations, Part D sponsors, and cost plans are required to report their MLRs and are subject to financial and other penalties for failure to meet the statutory requirement that they have an MLR of at least 85 percent (§§ 422.2410 and 423.2410). The statute imposes several levels of sanctions for failure to meet the minimum MLR requirement, including remittance of funds to CMS, a prohibition on enrolling new members, and ultimately contract termination.

There are two ways of showing that this burden is not substantial for at least one provision. As noted in section VIII.B.7. of this final rule, the estimated cost of creating and maintaining an RTBT is $4.7 million. We explicitly requested stakeholder impact on this specific estimate and received none. The experience of OACT is that for almost all plans, an extra burden of $0.7 million is unlikely to affect the MLR.

Additionally, the RTBT provision addresses multiple possibilities of implementation, some of them significantly less costly than others. Plans, in implementing the RTBT have the following options: (1) Whether they want to develop a new portal, or use an existing computer application, (2) whether they want to offer rewards and incentives to their enrollees who log onto the beneficiary RTBT, (3) whether they want to exclude certain clinically appropriate formulary alternatives from the RTBT, and (4) whether they want to include the negotiated price.

By both allowing exclusions from the RTBT and also by not requiring that plans build their own portals, the RTBT cost may be significantly less than $4.7 million.

Based on the previous discussion, we certify that this final rule does not have a significant economic impact on a substantial number of small entities.

D. Anticipated Effects

Some provisions of this final rule have negligible impact either because they are technical provisions or are provisions that codify existing guidance. Other provisions have an impact although it cannot be quantified or whose estimated impact is zero. Throughout the preamble, we have noted when we estimated that provisions have no impact. Additionally, this Regulatory Impact Analysis discusses several provisions with either zero impact or impact that cannot be quantified. The remaining provisions are estimated in section VIII of this final rule and in this Regulatory Impact Analysis. Where appropriate, when a group of provisions have both paperwork and non-paperwork impact, this Regulatory Impact Analysis cross-references impacts from section VIII of this final rule in order to arrive at total impact. Additionally, this Regulatory Impact Analysis provides pre-statutory impact of several provisions whose additional current impact is zero because their impact has already been experienced as a direct result of the statute. For further discussion of what is estimated in this Regulatory Impact Analysis, see Table I13 and the discussion afterwards.

1. Beneficiaries With History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.153)

This provision requires that CMS identify beneficiaries enrolled in Medicare Part D with a history of opioid-related overdose (as defined by the Secretary) and include such individuals as PARBs for prescription drug abuse under the Part D sponsor's drug management program. We projected a list of approximately 18,000 beneficiaries that met the criteria for this provision between July 2017 and June 2018, but did not meet other criteria for classification as a potential at-risk beneficiary. Under this provision, this population is projected to (1) increase the population of enrollees requiring case management by plan sponsors (see section IX.B.3. of this final rule), and (2) reduce Part D drug cost.

We evaluated their Prescription Drug Event (PDE) data for the same July 2017 and June 2018 period to determine the effects of this provision. After examining the PDE data, we found that these beneficiaries had an average gross drug cost per beneficiary per year of $9,675. Because this amount is high relative to the typical Part D spending and because they do not meet other at-risk criteria, it is likely that many of these beneficiaries have conditions that require expensive specialty medications. These drugs have complex clinical criteria that are difficult to alter through utilization management. Accordingly, and because there is no directly pertinent information available on the potential savings for increased prescription drug management on this segment of the population, we have, based on the actuarial judgment of staff with pharmaceutical experience as well as based on discussions with pharmacists, assumed that 5 percent of their Part D drug cost would be reduced

through additional plan management. We note that the we received no comments on this estimate as a result of its publication in the proposed rule and therefore believe it reasonable. Our estimated fiscal year federal savings rounded to the nearest million are shown in Table I1. Since these drugs would not be purchased as a result of efficient case management, they represent reduction in goods consumed and are true savings to the Medicare Trust Fund.

TABLE I1: ESTIMATED BENEFITS TO THE MEDICARE TRUST FUND OF THE INCLUSION OF ADDITIONAL AT-RISK BENEFICIARIES

	Fiscal Year ($ in millions)										Total 2023-2032 Impact ($ in millions)
Fiscal Year	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	2022-2032
Estimated Impact	5.8	7.7	7.7	7.7	7.7	7.7	7.7	7.7	7.7	7.7	75.4

Table I2 summarizes the aggregate impact of the changes to DMPs. It reflects all the estimates related to DMPs in section IX of this final rule (which incur costs) and the savings due to reduction in drug costs discussed in this Regulatory Impact Analysis.

TABLE I2: SUMMARY OF DMP IMPACTS BY PROVISION (MILLIONS $) *

	1st Year Savings	1st Year Cost	Annual Savings 2nd – 10th Year	Annual Cost 2nd – 10th Year	Total 10-Year Savings	Total 10-Year Cost
Creation of DMPs for those parent organizations without DMPs		3.0				3.0
Case management of PARBs for those parent organizations without DMPs		0.1		0.1		0.9
Case Management of PARBs with history of opioid overdose		10.0		10.0		100.1
Other paperwork		0.2		0.1		1.0
DMP drug savings	5.8		7.7		75.4	
Total					75.4	105.0
Net Impact (Cost) Over 10 Years						29.6

*Minor discrepancies in the above table are due to rounding. Further detail for DMP paperwork costs may be found in Table H16; the DMP drug savings may be obtained from Table I1.

2. Automatic Escalation to External Review Under a Medicare Part D Drug Management Program (DMP) for At-Risk Beneficiaries (§§ 423.153, 423.590, and 423.600)

The SUPPORT Act requires automatic escalation of drug management program appeals to the independent outside entity contracted with the Secretary for review and resolution. We are finalizing our proposal to codify that provision, with a modification to permit plan sponsors up to 24 hours after the expiration of the applicable adjudication timeframe to assemble and forward the administrative case file to the IRE. We do not believe the modification reflected in this final rule impacts our previous estimate. To estimate the impact, we first determined how many Part D sponsors had implemented drug management plans. As of July 9, 2019, we found that 60 Part D sponsors had implemented drug management plans. Next, we estimated of the number of CARA-appeals per 1,000 enrollees and the percentage of plan denials related to CARA. To do this, we contacted nine Part D sponsors and asked how many CARA related appeals they had received from January 1, 2019 through July 31, 2019.

Of those nine, eight plans responded they had have not received any CARA appeals. One Part D sponsor responded to say they had received CARA related appeals. That plan reported a rate of 0.014 CARA related appeals per 1000 enrollees. This accounted for 0.08 percent of plan denials. Since there are about 28,600 appeals per year, therefore there are only about 23 cases (0.08 percent * 28,600) affected by this provision. Since most IRE cases are judged by a physician at a wage of $202.46 and typically an IRE will take at most 1 hour to review most cases, the total burden is about $4,656.58 (23 cases

* $202.46 * 1 hour) which is entered as $0.0 million in the summary table since regulatory accounting standards impose a rounding to the nearest tenth of a million.

3. Suspension of Pharmacy Payments Pending Investigations of Credible Allegations of Fraud and Program Integrity Transparency Measures (§§ 405.370, 422.500, 422.503, 423.4, 423.504, and 455.2)

We were unable to determine the overall impact of implementing sections 2008 and 6063 of the SUPPORT Act because we do not have adequate data to support an estimate of the potential costs and savings. While we do have access to estimates of overall Medicare Part D opioid spending, sections 2008 and 6063 of the SUPPORT ACT are not expected to impact all Part D opioid prescriptions, nor do we expect that they would impact all pharmacies that dispense those medications. For example, section 2008 of the SUPPORT Act requires Part D plan sponsors to report to CMS any payment suspension pending investigation of credible allegations of fraud by a pharmacy, which must be implemented in the same manner as the Secretary does under section 1862(o) of the Act. In addition, section 6063 of the SUPPORT Act requires MA organizations and Part D plan sponsors to report information on the investigations, credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier related to fraud, and other actions taken by the plan related to inappropriate prescribing of opioids. In both cases, these provisions would directly impact a percentage of all opioid prescriptions written by prescribers and dispensed by pharmacies. While we believe there may be savings generated through actions taken by Part D plan sponsors that will conduct their own due diligence from the reporting and sharing of administrative actions between CMS, MA organizations and Medicare Part D plan sponsors (including MA organizations offering MA–PD plans), as well as additional law enforcement actions, we cannot estimate the impact at this time. We welcomed comment and suggestions for data that could be relied upon for this purpose.

We received no comments on the proposed regulatory impact and consequently we are finalizing them without modification.

4. Medicare Advantage (MA) and Part D Prescription Drug Program Quality Rating System (§§ 422.162, 422.164, 422.166, 422.252, 423.182, 423.184, and 423.186)

We are finalizing measure updates, clarifying and codifying policies in this final rule. These changes are routine and are not expected to have an impact on the highest ratings of contracts (that is, overall rating for MA–PDs, Part C summary rating for MA-only contracts, and Part D summary rating for PDPs). These types of routine changes have historically had very little or no impact on the highest ratings. Hence, there will be no, or negligible, impact on the Medicare Trust Fund from the routine changes.

We are also clarifying some of the current rules around assigning Quality Bonus Payment (QBP) ratings and codifying the rules around assigning QBP ratings for new contracts under existing parent organizations. We are not finalizing any changes to our current QBP policies, so there will be no impact on the Medicare Trust Fund from these provisions.

5. Permitting a Second, ''Preferred,'' Specialty Tier in Part D (§§ 423.104, 423.560, and 423.578)

The option for Part D sponsors to offer a second, ''preferred'' specialty tier has the potential to impact Part D drug costs in at least two ways. First, a Part D sponsor may have additional negotiating power with brand drug manufacturers by offering a preferential tier position relative to the current single specialty tier. Second, Part D sponsors may promote lower-cost biosimilar biological products on a preferred specialty tier. We consider each of these possibilities in the following discussion.

For a Part D sponsor to be able to negotiate better formulary position and lower beneficiary cost sharing for a particular specialty-tier drug, there must be a substantial difference between the cost sharing on the preferred specialty tier and the higher cost-sharing, specialty tier. Because the regulation limits the maximum allowable cost sharing to the range of 25 to 33 percent, Part D sponsors must achieve this difference by lowering the cost sharing on the preferred specialty tier. For example, because of the high cost for specialty-tier drugs and the structure of the Part D benefit, Part D enrollees and prescribers might not significantly alter their behavior in response to a five percent change in coinsurance. A substantial reduction in the cost sharing for preferred specialty tier would necessitate a substantial increase in cost sharing for other tiers to maintain an actuarially equivalent benefit, which may unfavorably change the competitive position of the Part D sponsor's plan offering. In particular, a plan that offers lower cost sharing on high-cost specialty-tier drugs and higher cost sharing on conventional drugs would risk adverse selection from Part D enrollees.

In addition, allowing tiering exceptions between the preferred specialty tier and the higher cost-sharing, specialty tier creates a risk for the Part D sponsor that may exceed the benefit of being better able to negotiate with respect to brand drugs. A portion of the higher cost-sharing, specialty-tier drugs may be granted exceptions as the clinical criteria for such Part D drugs is complex and can lead to different prescriptions for beneficiaries with similar conditions. These Part D drugs are often more complicated chemically and apply to complex conditions, such as Rheumatoid Arthritis or Multiple Sclerosis. This added complexity requires greater specialized knowledge than a traditional small molecule drug would for denying an exception. This will be known to manufacturers, who will be less inclined to provide additional incentives for the preferred placement given that a significant amount of non-preferred use will limit any market share gains from their enhanced formulary position. Part D sponsors would also face additional liability from the difference in cost sharing between the preferred and the higher cost-sharing, specialty tiers on prescriptions that are granted tiering exceptions. This dynamic serves as a disincentive for Part D sponsors to place specialty-tier-eligible drugs on a non-specialty, non-preferred drug tier under current regulation.

Regarding savings from biosimilar biological products that could be promoted through a preferred specialty tier, some of the same previously discussed issues still apply. For example, Part D sponsors may expect a portion of a non-preferred reference biological product's utilization to be given an exception to the preferred tier for a biosimilar biological product if such biosimilar biological product is not licensed for all of the same indications as the reference biological product. Furthermore, the selection of these products is often largely determined by the behavior of the prescriber rather than the formulary status of the Part D sponsor. If the prescriber prefers the reference biological product, they are more likely to prescribe it rather than the biosimilar biological product, regardless of the formulary position.

This is particularly true for specialty-tier drugs, where the differences in total drug cost and the cost-sharing requirements of the plan are not as extreme as the differences between conventional brand and generic drugs. Finally, it is worth noting that several large Part D sponsors do not currently promote biosimilar biological products. For example, Zarxio®, a biosimilar biological product to Neupogen®, is not included on the formulary for several large Part D plans.

Our conclusion is that the provisions of the final rule to allow Part D sponsors to structure their benefits with a second, ''preferred'' specialty tier are unlikely to have a material impact on Part D costs. While it is possible that a small savings to the Part D program could result from the enhanced flexibility, particularly for MA–PD plans with greater prescriber integration, broad adoption of a second specialty tier is unlikely. Nevertheless, we believe there are reasons for a second specialty tier. As discussed in more detail in section IV.E. of this final rule, stakeholders requesting this change have posited that it might lead to better rebates on certain Part D drugs and reduced costs for Part D enrollees and CMS. Most importantly, we are currently not aware of any major adverse effects that could result to Part D enrollees by allowing Part D sponsors to structure their benefits with a second, ''preferred'' specialty tier. For example, concern for undue financial burden on some Part D enrollees has prompted us to retain the current maximum allowable cost sharing (that is, 25/33 percent, as discussed in more detail in section IV.E. of this final rule). Additionally, we solicited comment regarding whether negative consequences to Part D enrollees could result from this proposal. If there were no foreseeable notable harms to Part D enrollees, it would seem reasonable to provide the requested flexibility to Part D sponsors and see if additional benefits do result, while monitoring implementation for adverse effects and responding as necessary.

As discussed in section IV.E. of this final rule, improving Part D enrollee access to needed drugs, including lowering drug costs, are central goals for CMS. While this regulatory impact analysis assesses the potential impact this policy will have on Part D drug costs, we also believe this policy has the potential to impact patient access and lower drug costs more broadly, by providing further incentives for manufacturers to develop generic drugs and biosimilar and interchangeable biological products. Even if notable savings for the Part D program were not to materialize, individual Part D enrollees might save a great deal on rebated Part D drugs. Or, the policy might result in the benefit of (1) more formulary choices, or (2) more choices at a lower cost than might have otherwise been the case. These, in turn, might lead to positive health outcomes with associated indirect savings to Part D enrollees or the government. We solicited comment on any other unforeseen benefits that might result. And, again, in finalizing this proposal, we will closely monitor for any adverse effects and take any necessary action including warranted changes for future rulemaking.

Comment: Some commenters suggested that CMS should conduct additional research on the impact of specialty tiers on Part D enrollees, generally, before enacting this policy.

Response: In finalizing our proposals to permit Part D sponsors to maintain up to two specialty tiers, we intend to monitor the uptake of the use of a second specialty tier. We are unclear about, generally, what the commenters believe we should research, given the Part D enrollee protections we are finalizing as part of this final rule.

Comment: Some commenters suggested that the specialty tier(s) serve as perverse ''reverse insurance,'' reasoning that the sickest patients who need specialty-tier eligible drugs subsidize the benefit to keep premiums and cost sharing on non-specialty tiers lower for the rest of the benefit.

Some commenters stated that CMS's proposals exacerbate an existing lack of transparency and the impact of misaligned rebate incentives in the Part D program because CMS's proposal provides no incentive or imposes no requirement that the rebates on these high-cost drugs be passed on to Part D enrollees at the point of sale. They suggested that these misaligned incentives lead to inappropriate tier placements as Part D sponsors choose higher negotiated prices in exchange for higher rebates, and may prefer a drug with a higher net cost over a less expensive alternative. These commenters suggested that CMS's proposals, due to this inappropriate tier placement, could increase costs to Part D enrollees and the government in two ways: First, as Part D enrollees enter catastrophic coverage more quickly; and second, because Part D enrollees could pay more for preferred products, despite a lower coinsurance percentage, because the coinsurance percent is calculated from a higher list price. These commenters also suggested that misaligned rebate incentives in the Part D program will discourage plan use of newer market alternatives.

Response: We disagree with the sentiment that the specialty tier(s) serve as a perverse, ''reverse insurance'' whereby the sickest patients who need specialty-tier eligible drugs subsidize the benefit to keep premiums and cost sharing on non-specialty tiers lower for the rest of the benefit. We believe this reasoning is flawed because the specialty tier is aligned with the Defined Standard benefit, and the Part D plan bid requirements also necessitate that the benefit structure below the specialty tier also be actuarially equivalent to the Defined Standard benefit. Therefore, the use of specialty-tier eligible drugs has no differential impact on lowering the premiums and cost sharing on non-specialty tiers for the rest of the benefit. Finally, our proposals would not change the role of rebates in the Part D program.

Comment: Relative to the Part D enrollee and governmental impacts of CMS's proposals, some commenters urged CMS to ensure premiums do not go up, and others expressed concern that cost sharing on other (in other words, non-specialty) tiers would increase as Part D sponsors are required to maintain actuarial equivalence. Some commenters suggested that plans will utilize a second specialty tier to shift more risk of financial exposure to Part D enrollees, leading to higher coinsurance for enrollees who use specialty-tier drugs.

Relative to the Part D sponsor impacts of our proposals, some suggested that CMS's proposals would increase costs to Part D sponsors due to increases in administrative burden from tiering exceptions requests. Others disagreed with CMS's assertion that without any specialty tiers, plan costs would increase, and stated that CMS provided no data to suggest that specialty tier drugs at lower cost sharing could cause increases to premiums or cost sharing for non-specialty tiers.

Some commenters were concerned that CMS's proposals would increase costs to Part D enrollees, the government, and Part D sponsors. These commenters suggested that if the higher cost-sharing, specialty tier were kept at the current specialty tier cost threshold (in other words, 25/33 percent) with no changes (in other words, permitting the higher cost-sharing, specialty tier to have cost sharing greater than 25/33 percent), the Part D sponsor's costs for specialty drugs would increase, leading, in turn, to higher bids, and higher premiums and cost sharing for Part D enrollees.

Response: Substantial reductions in cost sharing below the 25/33 percent

maximum for the preferred specialty tier necessitate substantial increases in cost sharing for non-specialty tiers in order to meet actuarial equivalence requirements. Therefore, we recognize that, in order for Part D sponsors to offer competitive plan benefit designs, Part D sponsors may not offer plan benefit designs with cost sharing for the preferred specialty tier far below the 25/33 percent maximum for the higher cost-sharing, specialty tier, and consequently, Part D enrollee savings for drugs on the preferred specialty tier may be limited. However, because § 423.104(d)(2)(iv)(D) maintains the existing 25/33 percent maximum allowable cost sharing for the specialty tiers, Part D enrollees will not pay more for specialty-tier drugs under our proposals than they do now. Therefore, we disagree that our proposals will increase Part D enrollees' cost sharing for specialty-tier drugs.

We do not understand the commenter's assertion that plans will utilize a second specialty tier to shift more risk of financial exposure to Part D enrollees, leading to higher coinsurance for enrollees who use specialty-tier drugs. While this may be the case in the commercial market, which does not, as a matter of policy, establish or maintain either a specialty-tier cost threshold or a maximum allowable cost sharing, and thus, may have incentives to place more drugs on the specialty tier(s), the methodologies to establish an increase the specialty-tier cost threshold that we are finalizing in this rule will serve to limit the specialty tier(s) to only the highest-cost Part D drugs. We welcome further input on this matter.

Because specialty-tier drugs are playing an increasing role in the prescription drug marketplace, and we have concern about the impact this will have on the Part D program, we believe that the increase in volume of specialty-tier drugs, but not our proposals, could increase costs to the government.

Regarding administrative burden, tiering exceptions are requested at a much lower volume than formulary exception requests and coverage determinations in general. Based on 2019 Part D plan reported data, tiering exceptions accounted for only 10.8 percent of all exception requests received at the coverage determination level, and 5.6 percent of all coverage determination requests. We do not anticipate that our proposals to permit Part D sponsors to maintain up to two specialty tiers will significantly impact this volume.

Although implementation will be delayed until coverage year 2022, we are finalizing as proposed our proposals to permit a second specialty tier, except that we are not finalizing our proposal to specify a specialty tier threshold of $780. Additionally, in response to comments, we are finalizing new paragraph § 423.104(d)(2)(iv)(A)(*6*) which describes the eligibility for placement on the specialty tier of newly-FDA-approved Part D drugs.

To retain the policies in effect before coverage year 2022, we are amending the definition of specialty tier at § 423.560 by adding paragraph (i) to clarify that the existing definition will apply before coverage year 2022, and paragraph (ii) to cross reference the definition which appears in § 423.104(d)(2)(iv), which will apply beginning coverage year 2022. Additionally, as discussed in section IV.E.2. of this final rule, we are amending § 423.578(a)(6)(iii) by adding paragraph (A) to cross reference the definition of specialty tier which will apply before coverage year 2022, and paragraph (B) to cross reference placement of the definition of specialty tier at § 423.104(d)(2)(iv) which will apply beginning coverage year 2022. Additionally, paragraph (A) will remove the phrase ''and biological products,'' and paragraph (B) will (1) reflect the possibility of a second specialty tier, and (2) clarify that Part D sponsors may design their exception processes so that Part D drugs on the specialty tier(s) are not eligible for a tiering exception to non-specialty tiers.

6. Service Determination Request Processes Under PACE (§§ 460.104 and 460.121)

We have revised the estimated impact from that presented in the proposed rule in the following ways: (1) We adjusted our estimates to account for an increase in wages according to the May 2019 BLS, (2) we included 2019 PACE audit data which was not available at the time these estimates were published in the proposed rule, (3) we updated enrollment data based on 2017–2019 data from the CMS Office of the Actuary (OACT) and (4) we updated PACE organization contract data based on data from the Health Plans Management System (HPMS). Based on these revisions, we continue to estimate that the finalized provisions will result in savings to PACE organizations.

To estimate the savings from the revisions we are finalizing to the service determination request provisions, we rely upon the assumptions described in the next section. These assumptions are based on our experience monitoring PACE organizations' compliance with current service determination request requirements and on data collected during those monitoring efforts.

We estimate that under the current regulation, the aggregate total annual cost to all PACE organizations for processing service determination requests is approximately $33.2 million.

We estimated that cost by using the following assumptions. First, we estimate the wages for each of the 11 Interdisciplinary team (IDT) members in order to better estimate a total cost. The eleven disciplines shown are the minimum disciplines required to compose the IDT under § 460.102(b). The occupation codes and wages used come from the BLS's website. The wage for each discipline includes the mean hourly wage plus 100 percent of the mean hourly wage for overhead and fringe benefits. Table I3 allows us to estimate the mean hourly wage of the IDT as a whole.

TABLE I3—WAGES FOR IDT STAFF MEMBERS

Occupation title	Occupation code	Mean hourly wage with overhead and fringe benefits ($)
Dietician	29–1031	59.94
Driver	53–3058	31.94
Home Care Coordinator (often an RN)	29–1141	74.48
Masters of Social Work	21–1022	57.02
Occupational Therapist	29–1122	82.90
PACE Center Manager	11–9111	110.74

TABLE I3—WAGES FOR IDT STAFF MEMBERS—Continued

Occupation title	Occupation code	Mean hourly wage with overhead and fringe benefits ($)
Personal Care Attendant	31–1120	25.42
Physical Therapist	29–1123	86.70
Primary Care Provider	29–1216	193.70
Recreational Therapist	29–1125	49.16
Registered Nurse	29–1141	74.48
Total		846.48
Wages/hr (Total/11)		76.95

Currently, when processing a service determination request, the IDT must determine the appropriate discipline(s) to conduct a reassessment under § 460.104(d)(2) and is responsible for notifying the participant or designated representative of its decision to approve or deny a request under § 460.104(d)(2)(iii). Based on our experiences monitoring PACE organizations, we estimate that the IDT takes approximately 1 hour to handle these responsibilities for each service determination request (1 × $846.48 = $846.48).

Reassessments performed in response to service determination requests are varied and may be done by multiple disciplines. For purposes of this estimate, we assume a registered nurse (RN) and Master's-level social worker (MSW) conduct reassessments, and that the total hours for reassessments equals 1.5 hours per discipline. Therefore, we estimate that reassessments would cost (1.5 × $74.48 = $111.72) and (1.5 × $57.02 = $85.53). This is summarized in Table I4.

TABLE I4—COST PER SERVICE DETERMINATION REQUEST FOR A PACE ORGANIZATION ASSESSMENT

Occupation title	Occupation code	Wage/hr ($)	Time (hr)	Total cost ($)
Masters of Social Work	21–1022	57.02	1.5	85.53
Registered Nurse	29–1141	74.48	1.5	111.72
Total Cost				197.25

Additionally, once a decision has been rendered, one discipline (usually the MSW) notifies the applicable parties which we believe takes about 1 hour (1 × $57.02 = $57.02). This is summarized in Table I5.

TABLE I5—COST PER SERVICE DETERMINATION REQUEST FOR A PACE ORGANIZATION NOTIFICATION

Occupation title	Occupation code	Wage/hr ($)	Time (hr)	Total cost ($)
Masters of Social Work	21–1022	57.02	1	57.02

Therefore, the processing of a service determination request under current regulations is $1,100.75 ($57.02 + $846.48 + $197.25) per request.

Additionally, based on combined audit data collected from all PACE organizations in 2017, 2018, and 2019 we estimate there are 705.0 service determination requests per 1,000 enrollees (30,173 total service determination requests for 2017, 2018, and 2019 divided by 42,800, the average enrollment for that time period). Consequently, the total cost of processing service determination requests for 2017–2019 under the current regulations was approximately $33.2 million (705.0 service determination requests/1,000 enrollees × 42,800 enrollees × $1,100.75 per service determination request) per year.

We anticipate the changes in § 460.121 of this final rule will reduce burden on PACE organizations in the following ways. First, the final rule establishes a streamlined approval process for service determination requests when an IDT member can approve the request in full at the time the request is made, under new § 460.121(e)(2). These approved requests will not need to be brought to the full IDT for review and will not require the IDT to conduct a reassessment. We also do not anticipate notification of the approval adding an additional burden because the IDT member would approve the request immediately and presumably satisfy the notification requirements under § 460.121(j)(1) at the time the request is made. As discussed in section VIII.B.10. of this final rule, we estimate:

- 22.47 percent of all service determination requests are denied, while 77.53 percent are approved; and
- Of the 77.53 percent of service determination requests that are approved, 50 percent of those are routine (that is, can be approved in full by an IDT member), while 50 percent are not routine.

Consequently,

• 273 service determination requests/1,000 enrollees are routine and approved (50 percent routine × 77.5 percent approved × 705.0 service determination requests/1,000 enrollees);

• 158 service determination requests/1,000 enrollees are denied (22.5 percent × 705.0 service determination requests/1,000 enrollees); and

• 273 service determination requests/1,000 enrollees are approved but not routine (77.5 percent approved × 50 percent not routine × 705.0 service determination requests/1,000 enrollees).

These estimates are summarized in Table I6.

TABLE I6—BREAKOUT OF SERVICE DETERMINATION REQUESTS BY TYPE

Row ID	Formula	Item	Number or percentage
(1)		Average enrollment PACE, 2017, 2018, 2019	42,800
(2)		Total unduplicated service determination requests (SDR) 2017–2019	30,173
(3)	(2)/(1) * 1000	Number of SDR per 1000 enrollees	705.0
(4)		Percentage of SDR Approved	77.53
(5)	100% − (4)	Percentage of SDR with denial	22.47
(6)		Percentage of approved SDR, easily approved	50
(7)	(3) * (4)	Total approved SDR per 1000 enrollees	547
(8)	(3) * (5)	Total SR with denial per 1000 enrollees	158
(9)	(7) * (6)	Total easily approved SDR per 1000 enrollees	273
(10)	(7) − (9)	Total not-easily approved SDR per 1000 enrollees	273
(11)	(8) + (9) + (10)	Aggregate SDR per 1000 enrollees per year	705.0

We are finalizing the relevant PACE service determination request proposals without substantive modification, and our burden estimates for the final provisions are based on the following assumptions:

• Service determination requests that an IDT member is able to approve in full at the time the request is made under § 460.121(e)(2) will not require full IDT review, assessment, or a separate notification. Although some work is involved in such approvals, we are estimating the cost as $0 since: (i) No reassessment is needed consistent with § 460.121(e)(2)(ii), (ii) no separate notification will generally be needed under § 460.121(j)(1), (iii) review by the full IDT is not required under § 460.121(e)(2)(ii) and (iv) the estimated time for an IDT member to approve an easily approved service determination request in full is small and hence the total cost is negligible and can be done as a part of the PACE organization's routine day to day activities.

• Denied service determination requests require review by the full IDT under § 460.121(f), an in-person assessment pursuant to 460.121(h)(1), and notification.

• Service determination requests that are approved, but cannot be approved in full at the time the request is made, will require review by the full IDT under § 460.121(f) and notification pursuant to § 460.121(j)(1) but would not require an assessment.

In section VIII.B. of this final rule, we identified eight requirements across five provisions anticipated to increase burden for PACE organizations. These eight requirements, their projected first year costs, and their projected annual costs after the first year are summarized in Table I7.

TABLE I7—PAPERWORK COSTS ASSOCIATED WITH THIS FINAL RULE

Item	1st year cost *	Cost for years 2–10 if applicable
Extension notification	133,997	133,997
Update for extension notification	18,636	
Update Appeal Notices	46,590	
Develop written materials for tracking	374,661	
Tracking services	374,661	374,661
Medical record documentation training	93,180	
Medical record documentation	634,530	634,530
Update for patients' rights	18,636	
Totals (in Millions $)	1.7	1.1

To estimate the total savings over 10 years we proceed as follows:

• We estimate the total savings without additional paperwork for 2017–2019 by subtracting the projected cost under the proposed provisions from the actual cost under the current provisions. Table I8 presents these calculations, showing a $15.2 million savings, without considering paperwork, for 2017–2019.

• For any year between 2022 and 2031, we divide the projected enrollment for that year by the actual enrollment for 2017–2019. Since costs are per 1000 enrollees, this quotient when multiplied by 15.2 million will give the savings for that year without considering paperwork requests.

• Finally, since paperwork requests are an additional burden, we subtract paperwork costs from the savings to ascertain the projected savings for that year. In subtracting paperwork costs, we must subtract an annual cost in all years and a special one-time first year cost in 2022. Table I9 presents this 10-year projection.

We illustrate these calculations by deriving the $15.2 million savings estimated based upon the data 2017 through 2019, and presented in Table I9. That is, if the provisions of this rule had

been adopted between 2017 and 2019, there would have been a savings of $15.2 million. This can be shown as follows:

- *Actual Cost (without paperwork) for 2017–2019:* 33.2 million.
- *Cost (without paperwork) if these provisions were adopted:* 18.0 million.
- *Total savings (Difference of the last two rows):* 15.2 million.

As we explained previously, in order to arrive at the 33.2 million and the 18.0 million, we considered the following:

- $33.2 = 42,800 enrollees * 705.0 service determination requests/1,000 enrollees * $1,100.75 (IDT + assessment + notification)
- $18.0 = $10.6 (10.56) + $7.5 (7.44) + $0
- $10.6 = 42,800 enrollees * 273 service determination requests/1,000 enrollees × ($1,100.75 − $197.25)
- $7.4 = 42,800 enrollees * 158 service determination requests/1,000 enrollees × ($1,100.75)
- $0 = 42,800 enrollees * 273 service determination requests/1,000 enrollees × $0

As can be seen, the savings comes from the fact that whereas current regulations require that all 705.0 service determination requests/1,000 enrollees be processed by the IDT (at a cost of $1,100.75), the draft final regulations only require that 431 service determination requests (158 service determination requests/1,000 enrollees that are denied and 273 service determination requests/1,000 enrollees that are approved but not routine) would go to the full IDT for processing, but another 273 service determination requests would be approved and routine and therefore would not impose any administrative cost on the PACE organization. Additionally, the 273 approved but not routine requests that would go to the IDT would be a reduced cost of $1,100.75 − $197.25 since assessments would not be done for all of those approvals. We anticipate this final rule will reduce administrative burden on the PACE organization, and allow IDT members to focus more time on providing participant care.

TABLE I8: ITEMIZED AND TOTAL COST PER YEAR FOR CURRENT OPERATIONS AND PROPOSED FOR BASE PERIOD (2017-2019)

Item	Current	Proposed	Proposed	Proposed	Proposed
	Aggregate SR	Total SR Easily Approved	Total SR Not Easily Approved	Total SR with Denial	Total Cost (millions $) Proposed
Aggregate SR per 1000 per Year	705.0	273	273	158	
Full IDT Review	$846.48		$846.48	$846.48	
Assessment	$197.25			$197.25	
Notification	$57.02		$57.02	$57.02	
Total Cost/SR without Paperwork	$1,100.75	$0.00	$903.50	$1,100.75	
Average Enrollment 2017-2019	42,800	40,151	42,800	42,800	
Total Cost (millions) (2017-2019)	$33.2	$0.0	$10.6	$7.5	18.0
Total Savings (2017-2019) without Paperwork					15.2

TABLE I9: 10-YEAR AGGREGATE PROJECTED SAVINGS FROM PROPOSED PACE PROVISIONS

Year	Enrollment	Base Year Enrollment	Annual Savings 2017 - 2019 without Paperwork	Annual Paperwork Cost	Special 1st Year Paperwork Cost	Adjusted Savings Current Year
(1)	(2)	(3)	(4)	(5)	(6)	(2)/(3)*(4)-((5)+(6))
2022	52,181	42,800	$15.2	1.1	0.6	16.8
2023	53,558	42,800	$15.2	1.1	0	17.9
2024	54,909	42,800	$15.2	1.1	0	18.3
2025	56,259	42,800	$15.2	1.1	0	18.8
2026	57,581	42,800	$15.2	1.1	0	19.3
2027	58,854	42,800	$15.2	1.1	0	19.7
2028	60,069	42,800	$15.2	1.1	0	20.2
2029	61,207	42,800	$15.2	1.1	0	20.6
2030	62,239	42,800	$15.2	1.1	0	20.9
2031	63,195	42,800	$15.2	1.1	0	21.3
Total						193.8

To clarify Table I9, consider the following:

- As noted previously, the actual non-paper savings for the base year, had this provision been implemented between 2017 and 2019, would have been $15.2 million for the 42,800 enrollees.
- The OACT projects 52,181 PACE enrollees for 2022.
- Since enrollment is projected to increase by a factor of 1.2191 (52,181/42,800), and we are estimating service determination requests per 1,000 enrollees, we project the non-paper savings for 2022 to be $1.2191 \times \$15.2 = \$18.5$ million. In other words, the 2017–2019 costs under the current regulation and proposed regulation would involve a product of 2017–2019 enrollment (about 42,800) times the number of service requests per 1,000. The 2022 costs use the same formula, however the 42,800 is replaced by 52,181. It follows that multiplying the 2017–2019 savings by 52,181/42,800 gives us the correct 2022 savings. Since the difference between the current cost and the proposed cost is savings, it follows that multiplying this difference by the ratio of 52,181/42,800 gives the updated savings).
- However, these are savings without paperwork costs. Table I7 indicates an ongoing $1.1 million cost in all years. The extra cost in the first year $0.6 million (in addition to the $1.1 ongoing cost) is derived from Table I7 as the total first year cost of $1.7 million minus the ongoing cost in subsequent years of $1.1 million.
- Therefore, the total savings for 2022 would be $18.5 − (1.1 + 0.6) = $16.8 million.
- The other rows are calculated similarly.

Accordingly, the finalized provisions streamline the processes for addressing service determination requests in PACE are projected to save PACE organizations $16.8 million in 2022 with a gradual increase in savings to $21.5 million by 2031. The aggregate savings from 2022–2031 is $193.8 million. These savings are to industry (PACE organizations) because administrative burden is being reduced. Additionally, each blank cell in Table I8 corresponds to a proposal to eliminate an unnecessary burden.

We received no comments regarding the impact related to the proposed PACE provisions however we have revised our estimate in the following ways: (1) We updated our projected costs for §§ 460.121, 460.122, 460.124, 460.98, 460.210, and 460.112, (2) we adjusted estimates to account for an increase in wages according to the May 2019 BLS, (3) we included 2019 PACE audit data which was not available at the time these estimates were published in the proposed rule, (4) we updated enrollment data based on data from OACT and (5) we updated PACE organization contract data based on data from HPMS.

Specifically, the projected costs for documenting and tracking the provision of services under PACE (§ 460.98), appeals requirements under PACE (§ 460.122), and participant rights (§ 460.112) provisions were updated to account for: (1) An increase in wages according to the May 2019 BLS, (2) updated enrollment data from OACT, and (3) updated PACE organization

contract data based on data from HPMS. Projected costs and savings associated with service determination request (§ 460.121) were updated to account for: (1) An increase in wages according to the May 2019 BLS, (2) updated enrollment data based on data from OACT, (3) updated PACE organization contract data based data from HPMS, and (4) updated service determination request data from PACE audits conducted from 2017 through 2019. As a result of comments, we also revised costs for documentation in medical records under PACE (§ 460.210), which accounts for: (1) An increase in wages according to the May 2019 BLS, (2) updated enrollment data based on data from OACT, (3) updated PACE organization contract data based on data from HPMS, and (4) revisions to the proposed requirements for maintaining all written communications received from a participant or other parties in their original form, as discussed in section VIII.B.10. of this final rule.

7. Beneficiaries With Sickle Cell Disease (§ 423.100)

Based on analysis of 2018 data, we found that about 683 beneficiaries (1.3 percent) who met the minimum OMS criteria or who had a history of an opioid-related overdose had sickle cell disease and would be affected by the finalized exemption. Since we estimate that less than 10 percent of these 683 beneficiaries would have been targeted for case management, the resulting savings is $0.0 million (10 percent × 683 enrollees × $542.46 for each case management).

E. Alternatives Considered

CMS did not develop Alternatives Considered sections for most of the provisions in this final rule as they generally are direct implementations of federal laws or codifications of existing policy for the Part C and D programs. In this section, CMS includes discussions of Alternatives Considered for the provisions to which they are applicable.

1. Beneficiaries With History of Opioid-Related Overdose Included in Drug Management Programs (DMPs) (§ 423.153)

As the Medicare Part D program is a prescription drug benefit and opioid-related overdoses can be due to both prescription opioids, which may be covered under Part D, and illicit opioids, this raises a question of how CMS should define history of opioid-related overdose. CMS considered two options for defining history of an opioid-related overdose plus two alternatives.

Opioid overdose codes (ICD–10) were identified using Medicare FFS Claims data and Part C Encounter data. When considering overdose, we noted that prescription opioids can also be obtained through illegal or illicit means. The available overdose diagnosis codes describe the type of drug involved in the poisoning but do not specify how the drugs were obtained. There is also an unspecified opioid overdose code. Therefore, assumptions were made to classify an overdose code as prescription or illicit. For example, code 40.4 (other synthetic opioids) was classified as illicit opioid overdose but in some cases fentanyl may have been obtained by prescription. Conversely, code 40.2 (other opioids) may include poisoning due to oxycodone which was classified as prescription opioid overdose but may have been obtained illegally.

Option 1: Include beneficiaries with either prescription or illicit opioid-related overdoses. This option would allow CMS to proactively identify the most potential at-risk beneficiaries with a history of opioid-related overdoses, regardless whether the opioid is prescription or illicit, so that they can be reported to the Part D sponsor and reviewed through a DMP. This option represents the largest program size of all of the options. Based on data between July 2017 and June 2018, CMS estimates that there were about 28,891 beneficiaries with prescription or illicit opioid-related overdoses who would have been identified and reported as potential at-risk beneficiaries through the OMS.

Option 2: The program size for this option, as a subset of Option 1, decreases by 37 percent to 18,268 if we were to identify only those beneficiaries reported to have at least one opioid prescription drug claim during the 6-month OMS measurement period (approximately 63 percent had opioid Part D claim(s)), which means that they have at least one relatively current opioid prescriber.

Option 3: Identify beneficiaries with only prescription opioid-related overdoses. This approach would utilize a 12-month lookback period to identify beneficiaries with a history of prescription opioid overdoses. Based on data between July 2017 and June 2018, CMS estimates that there were about 21,037 beneficiaries with prescription opioid-related overdoses who would be identified and reported by OMS.

Option 4: Since about 72 percent of beneficiaries had at least one Part D opioid claim in the 6-month OMS measurement period, this option, as a subset of Option 3, decreases the program size to 15,217 beneficiaries if we were to require beneficiaries reported to have at least one opioid prescription drug claim, which means that they have at least one relatively current opioid prescriber.

As noted, the primary impact will result from needing to case manage the additional beneficiaries identified as meeting the proposed definition. At the proposed hour and skill levels defined, this introduces a projected cost of $547.74 per additional beneficiary undergoing case management. The various economic impacts for the alternatives considered are summarized in Table I10.

TABLE I10—ECONOMIC IMPACT OF ALTERNATIVES CONSIDERED

Alternative (criteria)	Number of enrollees affected	Total cost (millions $)
Option 1	28,891	15.8
Option 2 (finalized)	18,268	10.0
Option 3	21,037	11.5
Option 4	15,217	8.3

CMS is finalizing the proposal to define history of opioid-related overdose as defined in Option 2. This option incorporates the risk factor most predictive for another overdose or suicide-related event and is commensurate with the Administration's commitment to vigorously address the opioid epidemic. However, this approach keeps a clear tie between opioid-related overdoses and the Part D program by requiring a recent

prescription opioid prescriber, which simultaneously increases the likelihood for successful provider outreach through case management by the sponsor. We received no comments on this proposal and therefore are finalizing this provision without modification.

2. Eligibility for Medication Therapy Management Programs (MTMPs) (§ 423.153)

We initially contemplated requiring that each plan as part of its MTM program develop educational materials regarding the safe disposal of prescription drugs that are controlled substances for its beneficiaries. Though each plan would have had a greater cost to develop such materials, the information might have included more local resources specific to individual plans. However, for the sake of consistency, and to reduce burden on MTM programs, we proposed that Part D plans would be required to furnish materials in their MTM programs that meet criteria specified in § 422.111(j) as part of a CMR, TMR, or other MTM correspondence or service.

We also considered whether we should extend MTM eligibility to potential at-risk beneficiaries (PARBs) instead of to just those determined to be at risk. We believe that providing MTM to PARBs might have been beneficial for this population. However, the SUPPORT Act is clear that the extended MTM eligibility criteria should apply only to at-risk beneficiaries.

After careful consideration of all comments received, and for the reasons set forth in section III.E. of this final rule, we are finalizing our proposal to add a requirement that Part D sponsors target ARBs for enrollment in their MTM programs. Part D plan sponsors will be required to comply with this new requirement by January 1, 2022. We are also finalizing the requirement that plans furnish information on safe disposal of prescription drugs that are controlled substances to MTM program enrollees at § 423.153(d)(1)(vii)(E), with a modification to clarify that plans may do so through use of a CMR, TMR or other MTM correspondence or service. We did not receive any comments on our impact analysis.

3. Beneficiaries' Education on Opioid Risks and Alternative Treatments (§ 423.128)

The provision regarding educating MA and Part D beneficiaries on opioid risks and alternative treatments is discussed in section III.D. of this final rule. In section IX.B.6. of this final rule, we estimated a maximum impact assuming that all plans would want to send all Part D enrollees information and that 75 percent of enrollees would request paper versus electronic communication.

However, we emphasize that the SUPPORT Act does not require CMS to set a standard as to which enrollees receive the required information. As indicated in section III.D. of this final rule, the SUPPORT Act gives plans flexibility to choose which enrollees to send the information. To facilitate plan choice, we have provided a wide range of alternatives in Table I11. The alternatives are based on the number of days the enrollee has been on opioids, the possible gaps in opioid treatment, as well as the cause of the opioid treatment; we, for example, think it very reasonable that sponsors would not want to send notices to opioid users in hospice or with cancer as this could unduly alarm them; therefore, one alternative is to carve these populations out. Although not a policy alternative, we also consider two alternatives for paper estimates; a conservative approach is that only half (50 percent) of enrollees would request paper while the more aggressive approach assumes 75 percent so request. As can be seen, despite the wide range of differences, costs vary only between $0.1 and $0.5 million.

TABLE I11: IMPACTS OF SEVERAL ALTERNATIVES FOR PROVIDING INFORMATION TO OPIOID USERS

(A) Issue	(B) Number of Opioid Users in this Category	(C) Number of Part D Sponsors	(D) Percentage of Enrollees Wanting Paper Delivery	(E) Cost per Plan or Enrollee for Paper Copies	(F) Aggregate Cost (B)* (D)*(E)	(G) Total Cost for this Scenario	Total Cost Rounded (millions)
2 hours of programming	N/A	288	N/A	178.12	51,299	N/A	N/A
2 hours for a pharmacist to develop the materials	N/A	288	N/A	241.36	69,512	N/A	N/A
Total first year programming and development cost	N/A	N/A	N/A	N/A	120,811	N/A	N/A
75% want paper; 90-day usage with 7 day (or less) gap	2,698,064	N/A	75%	0.01095	22,158	142,969	0.1
50% want paper; 90-day usage with 7 day (or less) gap	2,698,064	N/A	50%	0.01095	14,772	135,533	0.1
75% want paper; 30-day usage with 7 day (or less) gap	3,816,731	N/A	75%	0.01095	31,345	152,156	0.2
50% want paper; 30-day usage with 7 day (or less) gap	3,816,731	N/A	50%	0.01095	20,897	141,708	0.1

50% want paper; 7-day usage	7,163,615	N/A	50%	0.01095	39,221	160,032	0.2
75% want paper; All opioid users (1 year)	11,027,271	N/A	75%	0.01095	90,561	211,372	0.2
50% want paper; All opioid users (1 year)	11,027,271	N/A	50%	0.01095	60,374	181,185	0.2
75% want paper; any opioid use in last 2 years excluding cancer and hospice patients	16,134,063	N/A	75%	0.01095	132,501	253,312	0.3
50% want paper; any opioid use in last 2 years excluding cancer and hospice patients	16,134,063	N/A	50%	0.01095	88,334	209,145	0.2
75% want paper; All Part D enrollees	46,759,911	N/A	75%	0.01095	384,016	504,827	0.5
50% want paper; All Part D enrollees	46,759,911	N/A	50%	0.01095	256,011	376,822	0.4

Comment: A few commenters suggested that sponsors send information on opioid alternatives to *all* Part D beneficiaries.

Response: As noted earlier in this rule, the SUPPORT Act gives plan sponsors flexibility to choose which enrollees to send the information and sponsors have the most accurate beneficiary information and may wish to select a specific subset to send this information to.

We are finalizing this provision with modification. As explained in section A of this final rule, while the statutory requirement begins with coverage year 2021, this regulation will be applicable beginning January 1, 2022 rather than January 1, 2021 as initially proposed. Although implementation will be delayed until coverage year 2022, we are finalizing without modification for our proposal to permit Part D sponsors to send information on opioid alternatives to all beneficiaries, or to a specific subset as determined by the sponsor.

4. Permitting a Second, ''Preferred'', Specialty Tier in Part D (§§ 423.104, 423.560, and 423.578)

We would allow Part D sponsors to have two specialty tiers, under the existing policy at § 423.578(c)(3)(ii), Part D sponsors would be required to permit tiering exceptions between the two specialty tiers. We also considered permitting Part D sponsors to exempt tiering exceptions between the two specialty tiers, but we are concerned that removing the Part D enrollee protection requiring exceptions between the two specialty tiers could negate benefits that might otherwise have accrued to Part D enrollees under a two specialty-tier policy when there is a therapeutic alternative on the preferred specialty tier that a Part D enrollee is unable to take.

Additionally, although we proposed to codify at § 423.104(d)(2)(iv)(E) the maximum allowable cost sharing under current policy, because we note that the deductible applies to all tiers and it is unclear that we should continue to differentiate the specialty tier from other tiers on the basis of the deductible, we also considered decreasing the maximum permissible cost sharing to the 25 percent Defined Standard coinsurance for Part D plans with decreased or no deductibles. As a result, we would anticipate that Part D sponsors would need to raise cost sharing on non-specialty-tier drugs to maintain actuarial equivalence. If this applies to all plans, then there should be no budget impact, as they must still return to a basic benefit design that is actuarially equivalent to the Defined Standard benefit, and there will be no adverse selection. Additionally, we do not expect impacts from this proposal to the private sector, as additional specialty tiers already exist in that market. Plans with a high proportion of dual-eligible enrollees are less likely to offer a second specialty tier, because the lower cost sharing would be less impactful for those beneficiaries. As a result, we don't expect material impacts to Medicaid costs.

Finally, although we proposed at § 423.104(d)(2)(iv)(B) to increase the specialty-tier cost threshold for all plan years in which CMS determines that no less than a ten percent increase in the specialty-tier cost threshold, before rounding ''to'' the nearest $10 increment, in order to reestablish the 1 percent outlier threshold, CMS is also considering a change in this methodology such that CMS would always round ''up'' to the nearest $10 increment. This rounding up methodology would: (a) Ensure that the new specialty-tier cost threshold actually meets the 1 percent outlier threshold, and (b) provide more stability to the specialty-tier cost threshold. Although the $780 30-day equivalent ingredient cost we determined to be the specialty-tier cost threshold for this final rule did not require rounding, had we arrived at a 30-day equivalent ingredient cost of, for example, $772, rounding up to $780 30-day equivalent ingredient cost would have an insignificant impact on the number of drugs meeting the specialty-tier cost threshold.

As noted above, because of conflicting forces, we have not estimated a quantitative cost to this provision and acknowledged at most a possible qualitative savings. Similarly, these alternatives would not change costs.

Comment: We did not receive any comments regarding the alternative on which we solicited comment to always round ''up'' to the nearest $10 increment.

Response: Due to the balance of other comments, we are not finalizing this alternative.

Comment: Some commenters preferred that CMS permit Part D sponsors to impose cost sharing on the higher-cost sharing, specialty tier higher than the current maximum allowable cost sharing of 25/33 percent.

Response: As discussed in section IV.E. of this final rule, we continue to have concerns that permitting Part D sponsors to impose cost sharing on the higher-cost sharing, specialty tier higher than the current maximum allowable cost sharing of 25/33 percent is discriminatory.

Comment: Some commenters preferred CMS's option to permit Part D sponsors to exempt both specialty tiers from tiering exceptions, even between the two tiers.

Response: As discussed in section IV.E. of this final rule, although we believe reasonable arguments can be made with regard to our statutory authority relative to both our proposal and the alternative, we are concerned that the alternative could make the preferred specialty tier vulnerable to tiering exceptions to the non-specialty tiers, which could impede the ability of Part D sponsors to offer actuarially equivalent benefit designs.

Although implementation will be delayed until coverage year 2022, we are finalizing as proposed our proposals to permit a second specialty tier, except we are not finalizing our proposal to specify a specialty tier threshold of $780. Additionally, in response to comments, we are finalizing new paragraph § 423.104(d)(2)(iv)(A)(*6*) which describes the eligibility for placement on the specialty tier of newly-FDA-approved Part D drugs.

To retain the policies in effect before coverage year 2022, we are amending the definition of specialty tier at § 423.560 by adding paragraph (i) to clarify that the existing definition will apply before coverage year 2022, and paragraph (ii) to cross reference the definition which appears in § 423.104(d)(2)(iv), which will apply beginning coverage year 2022. Additionally, as discussed in section IV.E.2. of this final rule, we are amending § 423.578(a)(6)(iii) by adding paragraph (A) to cross reference the definition of specialty tier which will apply before coverage year 2022, and paragraph (B) to cross reference placement of the definition of specialty tier at § 423.104(d)(2)(iv) which will apply beginning coverage year 2022. Additionally, paragraph (A) will remove the phrase ''and biological products,'' and paragraph (B) will (1) reflect the possibility of a second specialty tier, and (2) clarify that Part D sponsors may design their exception processes so that Part D drugs on the specialty tier(s) are not eligible for a tiering exception to non-specialty tiers.

5. Beneficiary Real Time Benefit Tool (RTBT) (§ 423.128)

We are requiring that each Part D plan adopt a beneficiary RTBT by January 1, 2023. We had considered requiring that this regulatory action occur by January 1, 2021 to coincide with the requirement of a prescriber RTBT and the other regulatory actions in this rule. However, we wanted to ensure that plans had adequate time to focus on implementing the prescriber RTBT by the currently mandated January 1, 2021 deadline.

This option would probably not change the cost impact which, in section H8 of this final rule, was estimated as $4 million for implementation and $0.4 million for policy development and ongoing maintenance. The major driver of change in cost would be changes in

wages. We have already updated the 2018 wages in the NPRM to the current 2019 wages. The wages for general operations manager have decreased while the wages for compliance officer have increased. If we assume this continues for next year there would be no change in the $0.4 million estimate. Computer programmer wages are increased by about 3 percent per year which would increase the $4 million implementation cost by about $0.1 million.

We also considered requiring that plans display this information via a third party website or web application. However, since we discovered that plans already have patient portals that provide some of the mandated information, we believe it would be less confusing for beneficiaries to keep this information on the plan portal. In addition, it would be less of a burden on plans for them to put the information on the portals, rather than supply the information to a third party.

Another variation that we considered was to require that Part D sponsors clarify to enrollees that medications listed in the beneficiary RTBT are based on the formulary and that options may exist outside of the formulary. However, we ultimately decided that this requirement was not necessary, since Part D formularies already provide a robust array of options for Part D enrollees and we believe that Part D sponsors are in the best positon to judge whether such a statement is necessary. As a result, we declined to adopt this requirement.

We received no comments on our estimated impacts and are therefore finalizing it as proposed.

6. Service Determination Request Processes Under PACE (§ 460.121)

As we drafted this provision we considered several alternatives.

Alternative 1: First, we considered requiring that requests that can be immediately approved by a member of the IDT would still require a reassessment. We rejected this approach because the IDT member, based on their knowledge of the participant, would know quickly that the services were appropriate and would therefore not need to conduct a reassessment to make that determination.

Alternative 2: Second, we considered continuing to require that all requests that go to the full IDT would require a reassessment even if the service can be approved. We also rejected this approach because we do not believe it would be necessary to require a reassessment if the IDT can approve a service based on their knowledge of the participant.

The alternatives, the finalized approach, as well as the current approach are listed in Table I12 with total 10-year impact over 10 years.

TABLE I12: CURRENT, FINALIZED, AND ALTERNATIVE SAVINGS

Alternative Description	10-Year Savings (millions $)	SDR Type	Require IDT Review?	Require Reassessment?	Require Separate Notification?
Current	0	Easy approval	Yes	Yes	Yes
		Non-easy approval	Yes	Yes	Yes
		Denied	Yes	Yes	Yes
Finalized	193.8	Easy approval			
		Non-easy approval	Yes		Yes
		Denied	Yes	Yes	Yes
Alternative I	162.5	Easy approval		Yes	
IDT member can easily approve but requires a reassessment		Non-easy approval	Yes		Yes
		Denied	Yes	Yes	Yes
Alternative II	162.5	Easy approval			
IDT member cannot easily approve, require a reassessment for all requests that go to the full IDT		Non-easy approval	Yes	Yes	Yes
		Denied	Yes	Yes	Yes

F. Accounting Statement and Table

The following table summarizes savings, costs, and transfers by provision. As required by OMB Circular A–4 (available at *https://obamawhitehouse.archives.gov/omb/circulars_a004_a-4/*), in Table I13, we have prepared an accounting statement showing the savings and costs associated with the provisions of this final rule for calendar years 2022 through 2031. Table I13 is based on Tables I14A, I14B, and I14C which lists savings and costs by provision. Table I13 is expressed in millions of dollars with both costs and savings listed as positive numbers; aggregate impact is expressed as a positive number since the aggregate impact is savings. As can be seen, the net annualized savings of this rule is about $2.9 to $3.4 million per year. The net raw savings over 10 years is $36.9 million. Minor seeming discrepancies in totals in Tables I14A, I14B, and I14C reflects use of underlying spreadsheets, rather than intermediate rounded amounts. A breakdown of these savings from various perspectives may be found in Table I14.

TABLE I13: ACCOUNTING TABLE (MILLIONS $)*

Item	Annualized at 7%	Annualized at 3%	Period	Who is Impacted
Net Annualized Monetized Savings in 2021 dollars	3.0	3.5	2022-2031	Federal government, MA organizations, and Part D sponsors
Annualized Monetized Savings in 2021 dollars	26.6	26.8	2022-2031	Federal government, MA organizations, and Part D sponsors
Annualized Monetized Cost in 2021 dollars	23.6	23.3	2022-2031	Federal government, MA organizations, and Part D sponsors

* Both savings and costs are expressed as positive numbers. For example, at 7 percent there is an annualized savings of $26.6 million and an annualized cost of $23.6 million, resulting in an annualized net savings of $3.0 million.

The following Table I14 summarizes savings, costs, and transfers by provision and forms a basis for the accounting table. For reasons of space, Table I14 is broken into Table I14A (2022 through 2025), Table I14B (2026 through 2029), and Table I14C (2030 through 2031, as well as raw totals). In these tables, all numbers are positive; positive numbers in the savings columns indicate actual dollars saved while positive numbers in the costs columns indicate actual dollars spent; the aggregate row indicates savings less costs. All numbers are in millions. Tables I14A, I14B, and I14C form the basis for Table I13. The savings in these tables are true savings reflecting reduced consumption of services and goods.

TABLE I14A: AGGREGATE SAVINGS, COSTS, AND TRANSFERS IN MILLIONS BY PROVISION AND YEAR FROM 2022 THROUGH 2025*

	2022 Savings	2022 Cost	2023 Savings	2023 Cost	2024 Savings	2024 cost	2025 Savings	2025 Cost

DMP Drug savings	7.7		7.7		75.4	

*Both savings and costs are indicated with positive numbers. Net impact when positive indicates savings and when negative indicates a cost. Calculations use spreadsheet accuracy and actual numbers; consequently, totals may have minor rounding errors.

The following information supplements Table I14 and also identifies how impacts calculated in section VIII of this final rule affect the calculations of this section and the tables.

- For two provisions, DMP and PACE, this Regulatory Impact Analysis provides tables summarizing a variety of impacts with line items for the paperwork burdens of section VIII of this final rule. Thus the section VIII impacts are reflected both in Table I14 (summary table) and Table I13 (monetized table) as well as in special tables in this section.
- For six provisions (MTMP, RTBT, SNP MOCs, pharmacy performance measures, educating at risk enrollees, and Fraud and Abuse), the only impacts are calculated in section VIII of this final rule. These six provisions have those section VIII impacts listed in Table I14.

We received comments on impacts in certain individual provisions. These comments as well as our responses, including changes to impacts, have been addressed in the appropriate provision sections, with many of these discussions presented in section VIII.D. of this final rule. Additionally, we did not receive any comments on the summary or monetized table per se and are therefore finalizing these numbers as proposed with appropriate adjustments for provisions not included in this first final rule, the updated impacts, and updated wage estimates.

G. Conclusion

As indicated in Table I13, we estimate that this final rule generates annualized cost savings of approximately $3 to $3.5 million (depending on the discount factor used) per year over 2022 through 2031.

As indicated in Table I14, the primary drivers of savings are (1) revisions to the PACE program resulting in greater efficiencies and (2) increased vigilance for at-risk beneficiaries with a consequent reduction in drug costs. These savings are offset by costs from fraud and abuse efforts and a variety of outreach efforts to at-risk beneficiaries.

The net savings are true savings since they reflect reductions in consumption of goods and services. These savings by plans arising from reduction of services and consumptions of goods are ultimately passed back to the Medicare Trust Fund which reduce the dollar spending needed for plans.

The savings for the federal government are $75.4 million over 10 years, arising exclusively from DMP savings on reduced prescription drug spending. Administrative savings such as those from the PACE provisions may not accrue directly to the Medicare Trust Fund.

H. Reducing Regulation and Controlling Regulatory Costs

Executive Order 13771, titled Reducing Regulation and Controlling Regulatory Costs, was issued on January 30, 2017, and requires that the costs associated with significant new regulations ''shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least two prior regulations.'' This final rule is a deregulatory action under Executive Order 13771. At a 7 percent rate, this rule is estimated to save $3.7 million a year in 2016 dollars over an infinite time horizon.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Diseases, Health facilities, Health professions, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, and X-rays.

42 CFR Part 417

Administrative practice and procedure, Grant programs—health, Health care, Health insurance, Health maintenance organizations (HMO), Loan programs—health, Medicare, and Reporting and recordkeeping requirements.

42 CFR Part 422

Administrative practice and procedure, Health facilities, Health maintenance organizations (HMO), Medicare, Penalties, Privacy, Reporting and recordkeeping requirements.

42 CFR Part 423

Administrative practice and procedure, Emergency medical services, Health facilities, Health maintenance organizations (HMO), Medicare, Penalties, Privacy, Reporting and recordkeeping requirements.

42 CFR Part 455

Fraud, Grant programs—health, Health facilities, Health professions, Investigations, Medicaid, Reporting and recordkeeping requirements.

42 CFR Part 460

Aged, Health care, Health records, Medicaid, Medicare, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

■ 1. The authority citation for part 405 continues to reads as follows:

Authority: 42 U.S.C. 263a, 405(a), 1302, 1320b–12, 1395x, 1395y(a), 1395ff, 1395hh, 1395kk, 1395rr, and 1395ww(k).

■ 2. Section 405.370(a) is amended by—
■ a. Revising paragraph (1) of the definition of ''Credible allegation of fraud''; and
■ b. Adding the definition for ''Fraud hotline tip'' in alphabetical order.

The revision and addition read as follows:

§ 405.370 Definitions.

(a) * * *

Credible allegation of fraud. * * *

(1) Fraud hotline tips verified by further evidence.

* * * * *

Fraud hotline tip. A complaint or other communications that are submitted through a fraud reporting phone number or a website intended for the same purpose, such as the Federal Government's HHS OIG Hotline or a health plan's fraud hotline.

* * * * *

PART 417—HEALTH MAINTENANCE ORGANIZATIONS, COMPETITIVE MEDICAL PLANS, AND HEALTH CARE PREPAYMENT PLANS

■ 3. The authority citation for part 417 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh, 42 U.S.C. 300e, 300e–5, and 300e–9, and 31 U.S.C. 9701.

■ 4. Section 417.496 is added to read as follows:

§ 417.496 Cost plan crosswalk.

(a) *General rules*—(1) *Definition.* Crosswalk means the movement of enrollees from one plan (or plan benefit package (PBP)) to another plan (or PBP) under a cost plan contract between the CMP or HMO and CMS. To crosswalk enrollees from one PBP to another is to change the enrollment from the first PBP to the second.

(2) *Prohibition.* (i) Crosswalks are prohibited between different contracts.

(ii) Crosswalks are prohibited between different plan IDs unless the crosswalk to a different plan ID meets the requirements in paragraph (c)(1)(i) of this section.

(3) *Compliance with renewal/nonrenewal rules.* The cost plan must comply with renewal and nonrenewal rules in §§ 417.490 and 417.492 in order to complete plan crosswalks.

(b) *Allowable crosswalk types.* All cost plans may perform a crosswalk in the following circumstances:

(1) *Renewal.* A plan in the following contract year that links to a current contract year plan and retains the entire service area from the current contract year. The following contract year plan must retain the same plan ID as the current contract year plan.

(2) *Consolidated renewal.* A plan in the following contract year that combines 2 or more PBPs. The plan ID for the following contract year must retain one of the current contract year plan IDs.

(3) *Renewal with a service area expansion (SAE).* A plan in the following contract year plan that links to a current contract year plan and retains all of its plan service area from the current contract year, but also adds one or more new counties. The following year contract plan must retain the same plan ID as the current contract year plan.

(4) *Renewal with a service area reduction (SAR).* A plan in the following contract year that links to a current contract year plan and only retains a portion of its plan service area. The following contract year plan must retain the same plan ID as the current contract year plan. The crosswalk is limited to the enrollees in the remaining service area.

(c) *Exception.* (1) In order to perform a crosswalk that is not specified in paragraph (b) of this section, a cost organization must request an exception. CMS reviews requests and may permit a crosswalk exception in the following circumstance:

(i) Except as specified in paragraph (c)(1)(ii) of this section, terminating cost plans offering optional benefits may transfer enrollees from one of the PBPs under its contract to another PBP under its contract, including new PBPs that have no optional benefits or optional benefits different than those in the terminating PBP.

(ii) A terminating cost plan cannot move an enrollee from a PBP that does not include Part D to a PBP that does include Part D.

(iii) If the terminated supplemental benefit includes Part D and the new PBP does not, enrollees must receive written notification about the following:

(A) That they are losing Part D coverage;

(B) The options for obtaining Part D; and

(C) The implications of not getting Part D through some other means.

(2) [Reserved]

PART 422—MEDICARE ADVANTAGE PROGRAM

■ 5. The authority citation for part 422 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh.

Section 422.2 is amended by—

■ a. Revising the definition of ''Institutionalized'';

■ b. Adding the definition of ''Parent organization'' in alphabetical order to read; and

■ c. Revising the definition of ''Special needs individual''.

The revisions and addition read as follows:

§ 422.2 Definitions.

* * * * *

Institutionalized means, for the purposes of defining a special needs individual and for the open enrollment period for institutionalized individuals at § 422.62(a)(4), an MA eligible individual who continuously resides or is expected to continuously reside for 90 days or longer in one of the following long-term care facility settings:

(1) Skilled nursing facility (SNF) as defined in section 1819 of the Act (Medicare).

(2) Nursing facility (NF) as defined in section 1919 of the Act (Medicaid).

(3) Intermediate care facility for individuals with intellectual and developmental disabilities as defined in section 1905(d) of the Act.

(4) Psychiatric hospital or unit as defined in section 1861(f) of the Act.

(5) Rehabilitation hospital or unit as defined in section 1886(d)(1)(B) of the Act.

(6) Long-term care hospital as defined in section 1886(d)(1)(B) of the Act.

(7) Hospital which has an agreement under section 1883 of the Act (a swing-bed hospital).

(8) Subject to CMS approval, a facility that is not listed in paragraphs (1) through (7) of this definition but meets both of the following:

(i) Furnishes similar long-term, healthcare services that are covered under Medicare Part A, Medicare Part B, or Medicaid; and

(ii) Whose residents have similar needs and healthcare status as residents of one or more facilities listed in paragraphs (1) through (7) of this definition.

* * * * *

Parent organization means the legal entity that exercises a controlling interest, through the ownership of shares, the power to appoint voting board members, or other means, in a Part D sponsor or MA organization, directly or through a subsidiary or subsidiaries, and which is not itself a subsidiary of any other legal entity.

* * * * *

Special needs individual means an MA eligible individual who is institutionalized or institutionalized-equivalent, as those terms are defined in this section, is entitled to medical assistance under a State plan under title XIX, or has a severe or disabling chronic condition(s) and would benefit from enrollment in a specialized MA plan.

* * * * *

■ 6. Section 422.100 is amended by—

■ a. Revising paragraphs (c)(1) and (2);

■ b. Redesignating paragraph (d)(2) as paragraph (d)(2)(i);

■ c. Adding paragraph (d)(2)(ii);

■ d. Revising paragraph (m)(5)(iii).

The revisions and additions read as follows:

§ 422.100 General requirements.

* * * * *

(c) * * *

(1) Basic benefits are all items and services (other than hospice care or, beginning in 2021, coverage for organ acquisitions for kidney transplants) for which benefits are available under Parts A and B of Medicare, including additional telehealth benefits offered consistent with the requirements at § 422.135.

(2) Supplemental benefits are benefits offered under § 422.102.

(i) Supplemental benefits consist of—

(A) Mandatory supplemental benefits are services not covered by Medicare that an MA enrollee must purchase as part of an MA plan that are paid for in full, directly by (or on behalf of) Medicare enrollees, in the form of premiums or cost sharing.

(B) Optional supplemental benefits are health services not covered by Medicare that are purchased at the option of the MA enrollee and paid for in full, directly by (or on behalf of) the Medicare enrollee, in the form of premiums or cost sharing. These services may be grouped or offered individually.

(ii) Supplemental benefits must meet the following requirements:

(A) Except in the case of special supplemental benefit for the chronically ill (SSBCI) offered in accordance with § 422.102(f) that are not primarily health related, the benefits diagnose, prevent, or treat an illness or injury; compensate for physical impairments; act to ameliorate the functional/psychological impact of injuries or health conditions; or reduce avoidable emergency and health care utilization;

(B) The MA organization incurs a non-zero direct medical cost, except that in the case of a SSBCI that is not primarily health related that is offered in accordance with § 422.102, the MA organization may instead incur a non-zero direct non-administrative cost; and

(C) The benefits are not covered by Medicare (This specifically includes Medicare Parts A, B, and D).

(d) * * *

(2) * * *

(ii) MA plans may provide supplemental benefits (such as specific reductions in cost sharing or additional services or items) that are tied to disease state or health status in a manner that ensures that similarly situated individuals are treated uniformly; there must be some nexus between the health status or disease state and the specific benefit package designed for enrollees meeting that health status or disease state.

* * * * *

(m) * * *

(5) * * *

(iii) Provide the information described in paragraphs (m)(1), (2), and (3) and (m)(5)(i) of this section on its website.

■ 7. Section 422.101 by—

■ a. Revising paragraphs (f)(1) introductory text and (f)(1)(i) and (iii); and

■ b. Adding paragraph (f)(1)(iv);

■ c. Revising paragraph (f)(2) introductory text; and

■ d. Adding paragraph (f)(3).

The revisions and additions read as follows:

§ 422.101 Requirements relating to basic benefits.

* * * * *

(f) * * *

(1) MA organizations offering special needs plans (SNP) must implement an evidence-based model of care with appropriate networks of providers and specialists designed to meet the specialized needs of the plan's targeted enrollees. The MA organization must, with respect to each individual enrolled, do all of the following:

(i) Conduct a comprehensive initial health risk assessment of the individual's physical, psychosocial, and functional needs as well as annual health risk reassessment, using a comprehensive risk assessment tool that CMS may review during oversight activities, and ensure that results from the initial assessment and annual reassessment conducted for each individual enrolled in the plan are addressed in the individual's

individualized care plan as required under paragraph (f)(1)(ii) of this section.

* * * * *

(iii) In the management of care, use an interdisciplinary team that includes a team of providers with demonstrated expertise and training, and, as applicable, training in a defined role appropriate to their licensure in treating individuals similar to the targeted population of the plan.

(iv) Provide, on at least an annual basis, beginning within the first 12 months of enrollment, as feasible and with the individual's consent, for face-to-face encounters for the delivery of health care or care management or care coordination services and be between each enrollee and a member of the enrollee's interdisciplinary team or the plan's case management and coordination staff, or contracted plan healthcare providers. A face-for-face encounter must be either in person or through a visual, real-time, interactive telehealth encounter.

(2) MA organizations offering SNPs must also develop and implement the following model of care components to assure an effective care management structure:

* * * * *

(3)(i) All MA organizations wishing to offer or continue to offer a SNP will be required to be approved by the National Committee for Quality Assurance (NCQA) effective January 1, 2012 and subsequent years. All SNPs must submit their model of care (MOC) to CMS for NCQA evaluation and approval in accordance with CMS guidance.

(ii) As part of the evaluation and approval of the SNP model of care, NCQA must evaluate whether goals were fulfilled from the previous model of care.

(A) Plans must provide relevant information pertaining to the MOC's goals as well as appropriate data pertaining to the fulfillment the previous MOC's goals.

(B) Plans submitting an initial model of care must provide relevant information pertaining to the MOC's goals for review and approval.

(C) If the SNP model of care did not fulfill the previous MOC's goals, the plan must indicate in the MOC submission how it will achieve or revise the goals for the plan's next MOC.

(iii) Each element of the model of care of a plan must meet a minimum benchmark score of 50 percent, and a plan's model of care will only be approved if each element of the model of care meets the minimum benchmark.

■ 8. Section 422.102 is amended—

■ a. In paragraph (a)(4) by removing the phrase ''only as a mandatory'' and adding in its place the phrase ''for Part A and B benefits only as a mandatory''; and

■ b. Adding paragraphs (a)(5) and (6).

The revisions and additions read as follows:

§ 422.102 Supplemental benefits.

(a) * * *

(5) An MA plan may reduce the cost sharing for items and services that are not basic benefits only as a mandatory supplemental benefit (reductions or payment of cost sharing for Part D drugs is not permissible as a Part C supplemental benefit).

(6) An MA plan may offer mandatory supplemental benefits in the following forms:

(i) Reductions in cost sharing through the use of reimbursement, through a debit card or other means, for cost sharing paid for covered benefits. Reimbursements must be limited to the specific plan year.

(ii) Use of a uniform dollar amount as a maximum plan allowance for a package of supplemental benefits, including reductions in cost sharing or coverage of specific items and services, available to enrollees on a uniform basis for enrollee use for any supplemental benefit in the package. Allowance must be limited to the specific plan year.

* * * * *

■ 9. Section 422.111 is amended by—

■ a. Removing paragraph (b)(12);

■ b. Redesignating paragraph (h)(1)(i) as paragraph (h)(1)(i)(A);

■ c. Adding paragraph (h)(1)(i)(B);

■ d. Adding paragraphs (h)(1)(ii)(A) through (C);

■ e. Redesignating paragraph (h)(1)(iii) as (h)(1)(iii)(A);

■ f. Adding paragraph (h)(1)(iii)(B);

■ g. Adding paragraphs (h)(1)(iv), (j), and (k).

The revisions and additions read as follows:

§ 422.111 Disclosure requirements.

* * * * *

(h) * * *

(1) * * *

(i)(A) * * *

(B) For coverage beginning on and after January 1, 2022, is open at least from 8:00 a.m. to 8:00 p.m. in all service areas served by the Part C plan, with the following exceptions:

(1) From October 1 through March 31 of the following year, a customer call center may be closed on Thanksgiving Day and Christmas Day so long as the interactive voice response (IVR) system or similar technology records messages from incoming callers and such messages are returned within one (1) business day.

(2) From April 1 through September 30, a customer call center may be closed any Federal holiday, Saturday, or Sunday, so long as the interactive voice response (IVR) system or similar technology records messages from incoming callers and such messages are returned within one (1) business day.

(ii) * * *

(A) For coverage beginning on and after January 1, 2022, limits average hold time to no longer than 2 minutes. The hold time is defined as the time spent on hold by callers following the interactive voice response (IVR) system, touch-tone response system, or recorded greeting, before reaching a live person.

(B) For coverage beginning on and after January 1, 2022, answers 80 percent of incoming calls within 30 seconds after the interactive voice response (IVR), touch-tone response system, or recorded greeting interaction.

(C) For coverage beginning on and after January 1, 2022, limits the disconnect rate of all incoming calls to no higher than 5 percent. The disconnect rate is defined as the number of calls unexpectedly dropped divided by the total number of calls made to the customer call center.

(iii) (A) * * *

(B) For coverage beginning on and after January 1, 2022, interpreters must be available for 80 percent of incoming calls requiring an interpreter within 8 minutes of reaching the customer service representative and be made available at no cost to the caller.

(iv) At a minimum, for coverage beginning on and after January 1, 2022:

(A) Provides effective real-time communication with individuals using auxiliary aids and services, including TTYs and all forms of Federal Communication Commission-approved telecommunications relay systems, when using automated-attendant systems. See 28 CFR 35.161 and 36.303(d).

(B) Connects 80 percent of incoming calls requiring TTY services to a TTY operator within 7 minutes.

* * * * *

(j) *Safe disposal of certain prescription drugs.* Information regarding the safe disposal of prescription drugs that are controlled substances and drug takeback programs must be provided in the case of an individual enrolled under an MA plan who is furnished an in-home health risk assessment on or after January 1, 2022. For purposes of this paragraph (j), a health risk assessment furnished to an individual who is residing in an institutional setting, such as a nursing facility, that has the primary

responsibility for the disposal of unused medications, is not considered an in-home health risk assessment. As part of the in-home health risk assessment, the enrollee must be furnished written supporting materials describing how to safely dispose of medications that are controlled substances as well as a verbal summary of the written information as described at paragraphs (j)(1) through (6) of this section when possible. The written information furnished to enrollees about the safe disposal of medications and takeback programs must include the following information for enrollees:

(1) Unused medications should be disposed of as soon as possible.

(2) The U.S. Drug Enforcement Administration (DEA) allows unused prescription medications to be mailed back to pharmacies and other authorized sites using packages made available at such pharmacies or other authorized sites. Include a web link to the information available on the DEA website at *www.deatakeback.com* and the web link to the DEA search engine which enables beneficiaries to identify drug take back sites in their community at the following web address: *https://apps2.deadiversion.usdoj.gov/pubdispsearch/spring/main?execution=e2s1.*

(3) Community take back sites are the preferred method of disposing of unused controlled substances.

(4) The location of two or more drug take back sites that are available in the community where the enrollee resides.

(5) Instructions on how to safely dispose of medications in household trash or of cases when a medication can be safely flushed. Include instructions on removing personal identification information when disposing of prescription containers. If applicable, the instructions may also include information on the availability of in-home drug deactivation kits in the enrollee's community.

(6) Include a web link to the information available on the United States Department of Health and Human Services website identifying methods for the safe disposal of drugs available at the following web address: *www.hhs.gov/opioids/prevention/safely-dispose-drugs/index.html*

(k) *Claims information.* MA organizations must furnish directly to enrollees, in the manner specified by CMS and in a form easily understandable to such enrollees, a written explanation of benefits, when benefits are provided under this part.

(1) *Information requirements for the reporting period.* Claims data elements presented on the explanation of benefits must include all of the following for the reporting period:

(i) The descriptor and billing code for the item or service billed by the provider, and the corresponding amount billed.

(ii) The total cost approved by the plan for reimbursement.

(iii) The share of total cost paid for by the plan.

(iv) The share of total cost for which the enrollee is liable.

(2) *Information requirements for year-to-date totals.* Claims data elements presented on the explanation of benefits must include specific year-to-date totals as follows:

(i) The cumulative amount billed by all providers.

(ii) The cumulative total costs approved by the plan.

(iii) The cumulative share of total cost paid for by the plan.

(iv) The cumulative share of total cost for which the enrollee is liable.

(v) The amount an enrollee has incurred toward the MOOP limit, as applicable.

(vi) The amount an enrollee has incurred toward the deductible, as applicable.

(3) *Additional information requirements.* (i) Each explanation of benefits must include clear contact information for enrollee customer service.

(ii) Each explanation of benefits must include instructions on how to report fraud.

(iii) Each EOB that includes a denied claim must clearly identify the denied claim and provide information about enrollee appeal rights, but the EOB does not replace the notice required by §§ 422.568 and 422.570.

(4) *Reporting cycles for explanation of benefits.* MA organizations must send an explanation of benefits on either a monthly cycle or a quarterly cycle with per-claim notifications.

(i) A monthly explanation of benefits must include all claims processed in the prior month and, for each claim, the information in paragraphs (k)(1) and (2) of this section as of the last day of the prior month.

(A) The monthly explanation of benefits must be sent before the end of each month that follows the month a claim was filed.

(B) [Reserved]

(ii) A quarterly explanation of benefits must include all claims processed in the quarter and, for each claim, the information in paragraphs (k)(1) and (2) of this section as of the last day of the quarter; a per-claim notification must include all claims processed in the prior month and, for each claim, the information specified in paragraph (k)(1) of this section as of the last day of the prior month.

(A) MA organizations that send the explanation of benefits on a quarterly cycle with per-claim notifications must send the quarterly explanation of benefits before the end of each month that follows the quarter in which a claim was filed.

(B) MA organizations that send the explanation of benefits on a quarterly cycle with per-claim notifications must send the per-claim notification before the end of each month that follows the month in which a claim was filed.

(5) *Exceptions.* MA organizations are not required to send the explanation of benefits to dual-eligible enrollees.

■ 10. Section 422.134 is revised to read as follows:

§ 422.134 Reward and incentive programs.

(a) *Definitions.* As used in this section, the following definitions are applicable:

Incentive item means the same things as reward item.

Incentive(s) program, reward(s) program, and *R&I program* mean the same thing as rewards and incentives program.

Incentive(s), R&I, and *rewards and incentives* mean the same things as reward(s).

Qualifying individual in the context of a plan-covered health benefit means any plan enrollee who would qualify for coverage of the benefit. In the context of a non-plan-covered health benefit, qualifying individual means any plan enrollee.

Reward and incentive program is a program offered by an MA plan to qualifying individuals to voluntarily perform specified target activities in exchange for reward items.

Reward item (or incentive item) means the item furnished to a qualifying individual who performs a target activity as specified by the plan in the reward program.

Target activity means the activity for which the reward is provided to the qualifying individual by the MA plan.

(b) *Offering an R&I program.* An MA plan may offer R&I program(s) consistent with the requirements of this section.

(c) *Target activities.* (1) A target activity in an R&I program must meet all of the following:

(i) Directly involve the qualifying individual and performance by the qualifying individual.

(ii) Be specified, in detail, as to the level of completion needed in order to qualify for the reward item.

(iii) Be health-related by doing at least one of the following:

(A) Promoting improved health.
(B) Preventing injuries and illness,
(C) Promoting the efficient use of health care resources.
(iv) Uniformly offer any qualifying individual the opportunity to participate in the target activity.
(v) Be provided with accommodations consistent with the goal of the target activity to otherwise qualifying individuals who are unable to perform the target activity in a manner that satisfies the intended goal of the target activity.
(2) The target activity in an R&I program must not do any of the following:
(i) Be related to Part D benefits.
(ii) Discriminate against enrollees. To ensure that anti-discrimination requirements are met, an MA organization, in providing a rewards and incentives program, must comply with paragraph (g)(1) of this section and must not design a program based on the achievement of a health status measurement.
(d) *Reward items.* (1) The reward item for a target activity must meet all of the following:
(i) Be offered identically to any qualifying individual who performs the target activity.
(ii) Be a direct tangible benefit to the qualifying individual who performs the target activity.
(iii) Be provided, to the enrollee, such as through transfer of ownership or delivery, for a target activity completed in the contract year during which this R&I program was offered, regardless if the enrollee is likely to use the reward item after the contract year.
(2) The reward item for a target activity must not:
(i) Be offered in the form of cash, cash equivalents, or other monetary rebates (including reduced cost sharing or premiums). An item is classified as a cash equivalent if it either:
(A) Is convertible to cash (such as a check); or
(B) Can be used like cash (such as a general purpose debit card).
(ii) Have a value that exceeds the value of the target activity itself.
(iii) Involve elements of chance.
(3) Permissible reward items for a target activity may be reward items that:
(i) Consist of ''points'' or ''tokens'' that can be used to acquire tangible items.
(ii) Are offered in the form of a gift card that can be redeemed only at specific retailers or retail chains or for a specific category of items or services.
(e) *Marketing and communication requirements.* An MA organization that offers an R&I program must comply with all marketing and communications requirements in subpart V of this part.
(f) *R&I disclosure.* MA organization must make information available to CMS upon request about the form and manner of any rewards and incentives programs it offers and any evaluations of the effectiveness of such programs.
(g) *Miscellaneous.* (1) The MA organization's reward and incentive program must comply with all relevant fraud and abuse laws, including, when applicable, the anti-kickback statute and civil monetary penalty prohibiting inducements to beneficiaries. Additionally, all MA program anti-discrimination prohibitions continue to apply. The R&I program may not discriminate against enrollees based on race, color, national origin, including limited English proficiency, sex, age, disability, chronic disease, whether a person resides or receives services in an institutional setting, frailty, health status, or other prohibited basis.
(2) Failure to comply with R&I program requirements may result in a violation of one or more of the basis for sanction at § 422.752(a).
(3) The reward and incentive program is classified as a non-benefit expense in the plan bid.
(i) If offering a reward and incentive program, the MA organization must include all costs associated with the reward and incentive program as an administrative cost and non-benefit expense in the bid for the year in which the reward and incentive program operates.
(ii) Disputes on rewards and incentives must be treated as a grievance under § 422.564.

■ 11. Section 422.162 is amended—
■ a. By revising paragraphs (b)(3)(iv)(A) and (B); and
■ b. By adding paragraph (b)(4).

The additions and revisions read as follows:

§ 422.162 Medicare Advantage Quality Rating System.

* * * * *
(b) * * *
(3) * * *
(iv) * * *
(A)(*1*) For the first year after consolidation, CMS uses enrollment-weighted measure scores using the July enrollment of the measurement period of the consumed and surviving contracts for all measures, except survey-based measures and call center measures. The survey-based measures would use enrollment of the surviving and consumed contracts at the time the sample is pulled for the rating year. The call center measures would use average enrollment during the study period.
(*2*) For contract consolidations approved on or after January 1, 2022, if a measure score for a consumed or surviving contract is missing due to a data integrity issue as described in § 422.164(g)(1)(i) and (ii), CMS assigns a score of zero for the missing measure score in the calculation of the enrollment-weighted measure score.
(B)(*1*) For the second year after consolidation, CMS uses the enrollment-weighted measure scores using the July enrollment of the measurement year of the consumed and surviving contracts for all measures except for HEDIS, CAHPS, and HOS. HEDIS and HOS measure data are scored as reported. CMS ensures that the CAHPS survey sample includes enrollees in the sample frame from both the surviving and consumed contracts.
(*2*) For contract consolidations approved on or after January 1, 2022, for all measures except HEDIS, CAHPS, and HOS if a measure score for a consumed or surviving contract is missing due to a data integrity issue as described in § 422.164(g)(1)(i) and (ii), CMS assigns a score of zero for the missing measure score in the calculation of the enrollment-weighted measure score.
* * * * *
(4) *Quality bonus payment ratings.* (i) For contracts that receive a numeric Star Rating, the final quality bonus payment (QBP) rating for the contract is released in April of each year for the following contract year. The QBP rating is the contract's highest rating from the Star Ratings published by CMS in October of the calendar year that is 2 years before the contract year to which the QBP rating applies.
(ii) The contract QBP rating is applied to each plan benefit package offered under the contract.
* * * * *

■ 12. Section 422.164 is amended by revising paragraph (g)(1)(iii)(A) to read as follows:

§ 422.164 Adding, updating, and removing measures.

* * * * *
(g) * * *
(1) * * *
(iii) * * *
(A)(*1*) The data submitted for the Timeliness Monitoring Project (TMP) or audit that aligns with the Star Ratings year measurement period is used to determine the scaled reduction.
(*2*) For contract consolidations approved on or after January 1, 2022, if there is a contract consolidation as described at § 422.162(b)(3), the TMP or audit data are combined for the consumed and surviving contracts

before the methodology provided in paragraphs (g)(1)(iii)(B) through (O) of this section is applied.

* * * * *

■ 13. Section 422.166 is amended—

■ a. By adding paragraph (d)(2)(vi); and

■ b. By adding a sentence to the end of paragraph (i)(8).

The additions read as follows:

§ 422.166 Calculation of Star Ratings.

* * * * *

(d) * * *

(2) * * *

(vi) The QBP ratings for contracts that do not have sufficient data to calculate and assign ratings and do not meet the definition of low enrollment or new MA plans at § 422.252 are assigned as follows:

(A) For a new contract under an existing parent organization that has other MA contract(s) with numeric Star Ratings in November when the preliminary QBP ratings are calculated for the contract year that begins 14 months later, the QBP rating assigned is the enrollment-weighted average highest rating of the parent organization's other MA contract(s) that are active as of the April when the final QBP ratings are released under § 422.162(b)(4). The Star Ratings used in this calculation are the rounded stars (to the whole or half star) that are publicly displayed on *www.medicare.gov.* The enrollment figures used in the enrollment-weighted calculations are the November enrollment in the year the Star Ratings are released.

(B) For a new contract under a parent organization that does not have other MA contract(s) with numeric Star Ratings in November when the preliminary QBP ratings are calculated for the contract year that begins 14 months later, the MA Star Ratings for the previous 3 years are used and the QBP rating is the enrollment-weighted average of the MA contract(s)'s highest ratings from the most recent year rated for that parent organization.

(*1*) The Star Ratings had to be publicly reported on *www.medicare.gov.*

(*2*) The Star Ratings used in this calculation are rounded to the whole or half star.

(C) The enrollment figures used in the enrollment-weighted calculations are the November enrollment in the year the Star Ratings are released.

(D) The QBP ratings are updated for any changes in a contract's parent organization that are reflected in CMS records prior to the release of the final QBP ratings in April of each year.

(E) Once the QBP ratings are finalized in April of each year for the following contract year, no additional parent organization changes are used for purposes of assigning QBP ratings.

* * * * *

(i) * * *

(8) * * * Missing data includes data where there is a data integrity issue as defined at § 422.164(g)(1).

* * * * *

■ 14. Section 422.220 is revised to read as follows:

§ 422.220 Exclusion of payment for basic benefits furnished under a private contract.

(a) Unless otherwise authorized in paragraph (b) or (c) of this section, an MA organization may not pay, directly or indirectly, on any basis, for basic benefits furnished to a Medicare enrollee by a physician (as defined in paragraphs (1), (2), (3), and (4) of section 1861(r) of the Act) or other practitioner (as defined in section 1842(b)(18)(C) of the Act) who has filed with the Medicare contractor an affidavit promising to furnish Medicare-covered services to Medicare beneficiaries only through private contracts under section 1802(b) of the Act with the beneficiaries.

(b) An MA organization must pay for emergency or urgently needed services furnished by a physician or practitioner described in paragraph (a) of this section who has not signed a private contract with the beneficiary.

(c) An MA organization may make payment to a physician or practitioner described in paragraph (a) of this section for services that are not basic benefits but are provided to a beneficiary as a supplemental benefit consistent with § 422.102.

■ 15. Section 422.252 is amended by revising the definition of ''New MA plan'' to read as follows:

§ 422.252 Terminology.

* * * * *

New MA plan means a plan that meets the following:

(1) Offered under a new MA contract.

(2) Offered under an MA contract that is held by a parent organization defined at § 422.2 that has not had an MA contract in the prior 3 years. For purposes of this definition, the parent organization is identified as of April of the calendar year before the payment year to which the final QBP rating applies, and contracts associated with that parent organization are also evaluated using contracts in existence as of April of the 3 calendar years before the payment year to which the final QBP rating applies. For purposes of 2022 quality bonus payments based on 2021 Star Ratings only, new MA plan means an MA contract offered by a parent organization that has not had another MA contract in the previous 4 years.

* * * * *

■ 16. Section 422.500 is amended in paragraph (b) by adding the definitions of ''Fraud hotline tip'', ''Inappropriate prescribing'', and ''Substantiated or suspicious activities of fraud, waste, or abuse'' in alphabetical order to read as follows:

§ 422.500 Scope and definitions.

* * * * *

(b) * * *

Fraud hotline tip is a complaint or other communications that are submitted through a fraud reporting phone number or a website intended for the same purpose, such as the Federal Government's HHS OIG Hotline or a health plan's fraud hotline.

* * * * *

Inappropriate prescribing means that, after consideration of all the facts and circumstances of a particular situation identified through investigation or other information or actions taken by MA organizations and Part D plan sponsors, there is an established pattern of potential fraud, waste, and abuse related to prescribing of opioids, as reported by the plan sponsors. Beneficiaries with cancer and sickle-cell disease, as well as those patients receiving hospice and long term care (LTC) services are excluded, when determining inappropriate prescribing. Plan sponsors may consider any number of factors including, but not limited to the following:

(1) Documentation of a patient's medical condition.

(2) Identified instances of patient harm or death.

(3) Medical records, including claims (if available).

(4) Concurrent prescribing of opioids with an opioid potentiator in a manner that increases risk of serious patient harm.

(5) Levels of morphine milligram equivalent (MME) dosages prescribed.

(6) Absent clinical indication or documentation in the care management plan or in a manner that may indicate diversion.

(7) State-level prescription drug monitoring program (PDMP) data.

(8) Geography, time, and distance between a prescriber and the patient.

(9) Refill frequency and factors associated with increased risk of opioid overdose.

* * * * *

Substantiated or suspicious activities of fraud, waste, or abuse means and

includes, but is not limited to, allegations that a provider of services (including a prescriber) or supplier—

(1) Engaged in a pattern of improper billing;

(2) Submitted improper claims with suspected knowledge of their falsity;

(3) Submitted improper claims with reckless disregard or deliberate ignorance of their truth or falsity; or

(4) Is the subject of a fraud hotline tip verified by further evidence.

■ 17. Section 422.502 is amended by adding paragraphs (b)(1)(i) and (ii) to read as follows:

§ 422.502 Evaluation and determination procedures.

* * * * *

(b) * * *

(1) * * *

(i) An applicant may be considered to have failed to comply with a contract for purposes of an application denial under paragraph (b)(1) if during the applicable review period the applicant does any of the following:

(A) Was subject to the imposition of an intermediate sanction under subpart O of this part, with the exception of a sanction imposed under § 422.752(d) or a determination by CMS to prohibit the enrollment of new enrollees pursuant to § 422.2410(c).

(B) Failed to maintain a fiscally sound operation consistent with the requirements of § 422.504(b)(14).

(ii) CMS may deny an application submitted by an organization that does not hold a Part C contract at the time of the submission when the applicant's parent organization or another subsidiary of the parent organization meets the criteria for denial stated in paragraph (b)(1)(i) of this section. This paragraph does not apply when the parent organization completed the acquisition of the subsidiary that meets the criteria within the 24 months preceding the application submission deadline.

* * * * *

■ 18. Section 422.503 is amended by adding paragraphs (b)(4)(vi)(G)(*4*) through (*7*) and (b)(5)(i) and (ii) to read as follows:

§ 422.503 General provisions.

* * * * *

(b) * * *

(4) * * *

(vi) * * *

(G) * * *

(*4*) The MA organization must have procedures to identify, and must report to CMS or its designee either of the following, in the manner described in paragraphs (b)(4)(vi)(G)(*4*) through (*6*) of this section:

(*i*) Any payment suspension implemented by a plan, pending investigation of credible allegations of fraud by a pharmacy, which must be implemented in the same manner as the Secretary does under section 1862(o)(1) of the Act.

(*ii*) Any information concerning investigations, credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the plan related to the inappropriate prescribing of opioids.

(*5*) The MA organization must submit data, as specified in this section, in the program integrity portal when reporting payment suspensions pending investigations of credible allegations of fraud by pharmacies; information related to the inappropriate prescribing of opioids and concerning investigations and credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the MA organization; or if the plan reports a referral, through the portal, of substantiated or suspicious activities of a provider of services (including a prescriber) or a supplier related to fraud, waste, or abuse to initiate or assist with investigations conducted by CMS, or its designee, a Medicare program integrity contractor, or law enforcement partners. The data categories, as applicable, include referral information and actions taken by the MA organization on the referral.

(*6*)(*i*) The MA organization is required to notify the Secretary, or its designee, of a payment suspension described in paragraph (b)(4)(vi)(G)(*4*)(*i*) of this section 7 days prior to implementation of the payment suspension. The MA organization may request an exception to the 7-day prior notification to the Secretary, or its designee, if circumstances warrant a reduced reporting time frame, such as potential beneficiary harm.

(*ii*) The MA organization is required to submit the information described in paragraph (b)(4)(vi)(G)(*4*)(*ii*) of this section no later than January 30, April 30, July 30, and October 30 of each year for the preceding periods, respectively, of October 1 through December 31, January 1 through March 31, April 1 through June 30, and July 1 through September 30. For the first reporting period (January 30, 2022), the reporting will reflect the data gathered and analyzed for the previous quarter in the calendar year (October 1–December 31).

(*7*)(*i*) CMS will provide MA organizations with data report(s) or links to the information described in paragraphs (b)(4)(vi)(G)(*4*)(*i*) and (*ii*) of this section no later than April 15, July 15, October 15, and January 15 of each year based on the information in the portal, respectively, as of the preceding October 1 through December 31, January 1 through March 31, April 1 through June 30, and July 1 through September 30.

(*ii*) Include administrative actions, pertinent information related to opioid overprescribing, and other data determined appropriate by the Secretary in consultation with stakeholders.

(*iii*) Are anonymized information submitted by plans without identifying the source of such information.

(*iv*) For the first quarterly report (April 15, 2022), that the report reflect the data gathered and analyzed for the previous quarter submitted by the plan sponsors on January 30, 2022.

(5) * * *

(i) Not accept, or share a corporate parent organization owning a controlling interest in an entity that accepts, new enrollees under a section 1876 reasonable cost contract in any area in which it seeks to offer an MA plan.

(ii) Not accept, or be either the parent organization owning a controlling interest of or subsidiary of an entity that accepts, new enrollees under a section 1876 reasonable cost contract in any area in which it seeks to offer an MA plan.

* * * * *

■ 19. Section 422.504 is amended by revising paragraph (a)(15) to read as follows:

§ 422.504 Contract provisions.

* * * * *

(a) * * *

(15) Through the CMS complaint tracking system, to address and resolve complaints received by CMS against the MA organization.

* * * * *

■ 20. Section 422.530 is added to subpart K to read as follows:

§ 422.530 Plan crosswalks.

(a) *General rules*—(1) *Definition of crosswalk.* A crosswalk is the movement of enrollees from one plan (or plan benefit package (PBP)) to another plan (or PBP) under a contract between the MA organization and CMS. To crosswalk enrollees from one PBP to another is to change the enrollment from the first PBP to the second.

(2) *Prohibitions.* Except as described in paragraph (c) of this section, crosswalks are prohibited between different contracts or different plan types (for example, HMO to PPO).

(3) *Compliance with renewal/nonrenewal rules.* The MA organization

must comply with renewal and nonrenewal rules in §§ 422.505 and 422.506 in order to complete plan crosswalks.

(4) *Eligibility.* Enrollees must be eligible for enrollment under §§ 422.50 through 422.54 in order to be moved from one PBP to another PBP.

(5) *Types of MA plans.* For purposes of crosswalk policy in this section, CMS considers the following plans as different plan types:

(i) Health maintenance organizations coordinated care plans.

(ii) Provider-sponsored organizations coordinated care plans.

(iii) Regional or local preferred provider organizations coordinated care plans.

(iv) Special needs plans.

(v) Private Fee-for-service plans.

(vi) MSA plans.

(b) *Allowable crosswalk types*—(1) *All MA plans.* An MA organization may perform a crosswalk in the following circumstances:

(i) *Renewal.* A plan in the following contract year that links to a current contract year plan and retains the entire service area from the current contract year. The following contract year plan must retain the same plan ID as the current contract year plan.

(ii) *Consolidated renewal.* A plan in the following contract year that combines 2 or more complete current contract year plans of the same plan type but not including when a current PBP is split among more than one PBP for the following contract year. The plan ID for the following contract year must be the same as one of the current contract year plan IDs.

(iii) *Renewal with a service area expansion (SAE).* A plan in the following contract year that links to a current contract year plan and retains all of its plan service area from the current contract year, but also adds one or more new counties. The following year contract plan must retain the same plan ID as the current contract year plan.

(iv) *Renewal with a service area reduction (SAR).* (A) A plan in the following contract year that links to a current contract year plan and only retains a portion of its plan service area. The following contract year plan must retain the same plan ID as the current contract year plan. The crosswalk is limited to the enrollees in the remaining service area.

(B) While the MA organization may not affirmatively crosswalk enrollees in the locations that will no longer be part of the service area, the MA organization may offer those affected enrollees in the reduced portion of the service area a continuation in accordance with § 422.74(b)(3)(ii), provided that there are no other MA plan options in the reduced service area.

(C) If the MA organization offers another PBP in the locations that will no longer be part of the service area, current enrollees in the locations that will no longer be part of the service area must be disenrolled and the MA organization must send a non-renewal notice that includes notification of a special enrollment period under § 422.62 and, for applicable enrollees, Medigap guaranteed issue rights.

(D) The MA organization may offer current enrollees in the locations that will no longer be part of the service area the option of enrolling in the other plan(s) the MA organization offers in the location that is no longer part of the service area, however, no specific plan information for the following contract year may be shared with any beneficiaries prior to the plan marketing period for the next contract year, consistent with 42 CFR 422.2263 and 423.2263.

(2) *Special needs plans (SNPs).* In addition to those described in paragraph (b)(1) of this section, SNPs may also perform the following types of crosswalks:

(i) *Chronic SNPs (C–SNPs).* (A) Renewing C–SNP with one chronic condition that transitions eligible enrollees into another C–SNP with a grouping that contains that same chronic condition.

(B) Non-renewing C–SNP with one chronic condition that transitions eligible enrollees into another C–SNP with a grouping that contains that same chronic condition.

(C) Non-renewing C–SNP with a grouping that is transitioning eligible enrollees into a different grouping C–SNP if the new grouping contains at least one condition that the prior C–SNP contained.

(ii) *Institutional SNP.* (A) Renewing Institutional SNP that transitions enrollees to an Institutional/Institutional Equivalent SNP.

(B) Renewing Institutional Equivalent SNP that transitions enrollees to an Institutional/Institutional Equivalent SNP.

(C) Renewing Institutional/Institutional Equivalent SNP that transitions eligible enrollees to an Institutional SNP.

(D) Renewing Institutional/Institutional Equivalent SNP that transitions eligible enrollees to an Institutional Equivalent SNP.

(E) Non-renewing Institutional/Institutional Equivalent SNP that transitions eligible enrollees to another Institutional/Institutional Equivalent SNP.

(c) *Exceptions.* In order to perform a crosswalk that is not specified in paragraph (b) of this section, an MA organization must request an exception. Crosswalk exceptions are prohibited between different plan types. CMS reviews exception requests and may permit a crosswalk exception in the following circumstances:

(1) When a non-network or partial network Private Fee-For-Service (PFFS) plan changes to either a partial network or to a full network PFFS plan, enrollees may be moved to the new plan when CMS determines it is in the interest of beneficiaries, considering whether the risks to enrollees are such that they would be better served by remaining in the plan, whether there are other suitable managed care plans available, and whether the enrollees are particularly medically vulnerable, such as institutionalized enrollees. Crosswalks from a network based PFFS plan to a non-network or partial network PFFS plan will not be permitted.

(2) When MA contracts offered by two different MA organizations that share the same parent organization are consolidated such that the separate contracts are consolidated under one surviving contract, the enrollees from the consolidating contracts may be crosswalked to an MA plan under the surviving contract.

(3) When a renewing D–SNP with a multi-state service area reduces its service area or, in the case of a D–SNP in an MA regional plan contract, nonrenews and creates state-specific local preferred provider organization plans in its place to accommodate state contracting efforts in the service area, enrollees who are no longer in the service area may be moved into one or more new or renewing D–SNPs, offered under the same parent organization (even if the D–SNPs are offered by two different MA organizations), and for which the enrollees are eligible, as CMS determines is necessary to accommodate changes to the contracts between the state and D–SNP under § 422.107. For this crosswalk exception, CMS will permit enrollees to be moved between different contracts.

(4) When a renewing D–SNP has another new or renewing D–SNP, and the two D–SNPs are offered to different populations, enrollees who are no longer eligible for their current D–SNP may be moved into the other new or renewing D–SNP offered by the same MA organization if they meet the eligibility criteria for the new or renewing D–SNP and CMS determines it

is in the best interest of the enrollees to move to the new or renewing D–SNP in order to promote access to and continuity of care for enrollees relative to the absence of a crosswalk exception. For this crosswalk exception, CMS will not permit enrollees to be moved between different contracts.

(5) Renewing C–SNP with a grouping of multiple conditions that is transitioning eligible enrollees into another C–SNP with one of the chronic conditions from that grouping.

(d) *Procedures.* (1) An MA organization must submit all crosswalks in paragraph (b) of this section in writing through the bid submission process in HPMS by the bid submission deadline announced by CMS.

(2) An MA organization must submit all crosswalk exception requests in paragraph (c)(1) of this section in writing through the crosswalk exceptions process in HPMS by the crosswalk exception request deadline announced by CMS annually. CMS verifies the requests and notifies requesting MA organizations of the approval or denial after the crosswalk exception request deadline.

■ 21. Section 422.550 is amended by adding paragraph (f) to read as follows:

§ 422.550 General provisions.

* * * * *

(f) *Sale of beneficiaries not permitted.* (1) CMS only recognizes the sale or transfer of an organization's entire MA line of business, consisting of all MA contracts held by the MA organization with the exception of the sale or transfer of a full contract between wholly owned subsidiaries of the same parent organization, which is permitted.

(2) CMS does not recognize or allow a sale or transfer that consists solely of the sale or transfer of individual beneficiaries or groups of beneficiaries enrolled in a plan benefit package.

■ 22. Section 422.562 is amended by adding paragraph (d)(3) to read as follows:

§ 422.562 General provisions.

* * * * *

(d) * * *

(3) For the sole purpose of applying the regulations at § 405.1038(c) of this chapter, an MA organization is included in the definition of ''contractors'' as it relates to stipulated decisions.

■ 23. Section 422.568 is amended by adding paragraphs (g) through (k) to read as follows:

§ 422.568 Standard timeframes and notice requirements for organization determinations.

* * * * *

(g) *Dismissing a request.* The MA organization dismisses an organization determination request, either entirely or as to any stated issue, under any of the following circumstances:

(1) The individual or entity making the request is not permitted to request an organization determination under § 422.566(c).

(2) The MA organization determines the party failed to make out a valid request for an organization determination that substantially complies with paragraph (a) of this section.

(3) An enrollee or the enrollee's representative files a request for an organization determination, but the enrollee dies while the request is pending, and both of the following apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) No other individual or entity with a financial interest in the case wishes to pursue the organization determination.

(4) A party filing the organization determination request submits a timely request for withdrawal of their request for an organization determination with the MA organization.

(h) *Notice of dismissal.* The MA organization must mail or otherwise transmit a written notice of the dismissal of the organization determination request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) The right to request that the MA organization vacate the dismissal action.

(3) The right to request reconsideration of the dismissal.

(i) *Vacating a dismissal.* If good cause is established, the MA organization may vacate its dismissal of a request for an organization determination within 6 months from the date of the notice of dismissal.

(j) *Effect of dismissal.* The dismissal of a request for an organization determination is binding unless it is modified or reversed by the MA organization upon reconsideration or vacated under paragraph (i) of this section.

(k) *Withdrawing a request.* A party that requests an organization determination may withdraw its request at any time before the decision is issued by filing a request with the MA organization.

■ 24. Section 422.570 is amended by adding paragraph (g) to read as follows:

§ 422.570 Expediting certain organization determinations.

* * * * *

(g) *Dismissing a request.* The MA organization dismisses an expedited organization request in accordance with § 422.568.

■ 25. Section 422.582 is amended—

■ a. In paragraph (e) by removing the word ''written''; and

■ b. By adding paragraphs (f) through (i).

The additions to read as follows:

§ 422.582 Request for a standard reconsideration.

* * * * *

(f) *Dismissing a request.* The MA organization dismisses a reconsideration request, either entirely or as to any stated issue, under any of the following circumstances:

(1) The person or entity requesting a reconsideration is not a proper party under § 422.578.

(2) The MA organization determines the party failed to make a valid request for a reconsideration that substantially complies with paragraph (a) of this section.

(3) The party fails to file the reconsideration request within the proper filing time frame in accordance with paragraph (b) of this section.

(4) The enrollee or the enrollee's representative files a request for a reconsideration, but the enrollee dies while the request is pending, and both of the following criteria apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) No other individual or entity with a financial interest in the case wishes to pursue the reconsideration.

(5) A party filing the reconsideration request submits a timely request for withdrawal of the request for a reconsideration with the MA organization.

(g) *Notice of dismissal.* The MA organization must mail or otherwise transmit a written notice of the dismissal of the reconsideration request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) The right to request that the MA organization vacate the dismissal action.

(3) The right to request review of the dismissal by the independent entity.

(h) *Vacating a dismissal.* If good cause is established, the MA organization may vacate its dismissal of a request for reconsideration within 6 months from the date of the notice of dismissal.

(i) *Effect of dismissal.* The MA organization's dismissal is binding unless the enrollee or other party requests review by the independent entity in accordance with § 422.590(h) or the decision is vacated under paragraph (h) of this section.

■ 26. Section 422.584 is amended by adding paragraph (g) to read as follows:

§ 422.584 Expediting certain reconsiderations.

* * * * *

(g) *Dismissing a request.* The MA organization dismisses an expedited reconsideration request in accordance with § 422.582(f) through (i).

■ 27. Section 422.590 is amended by adding paragraph (i) to read as follows:

§ 422.590 Timeframes and responsibility for reconsiderations.

* * * * *

(i) *Requests for review of a dismissal by the independent entity.* If the MA organization dismisses a request for a reconsideration in accordance with §§ 422.582(f) and 422.584(g), the enrollee or other proper party under § 422.578 has the right to request review of the dismissal by the independent entity. A request for review of a dismissal must be filed in writing with the independent entity within 60 calendar days from the date of the MA organization's dismissal notice.

■ 28. Section 422.592 is amended—

■ a. In paragraph (a) by adding a sentence at the end of the paragraph; and

■ b. By adding paragraphs (d) through (i).

The additions to read as follows:

§ 422.592 Reconsideration by an independent entity.

(a) * * * In accordance with § 422.590(i), the independent entity is responsible for reviewing MA organization dismissals of reconsideration requests.

* * * * *

(d) The independent entity dismisses a reconsideration request, either entirely or as to any stated issue, under any of the following circumstances:

(1) The person or entity requesting a reconsideration is not a proper party under § 422.578.

(2) The independent entity determines the party failed to make out a valid request for a reconsideration that substantially complies with § 422.582(a) or (b).

(3) The enrollee or the enrollee's representative files a request for a reconsideration, but the enrollee dies while the request is pending, and both of the following criteria apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) No other individual or entity with a financial interest in the case wishes to pursue the reconsideration.

(4) The party filing the reconsideration request submits with the independent review entity a timely request for withdrawal of the request for reconsideration.

(e) The independent entity mails or otherwise transmits a written notice of the dismissal of the reconsideration request to the parties. The notice must state the following:

(1) The reason for the dismissal.

(2) That there is a right to request that the independent entity vacate the dismissal action.

(3) The right to a review of the dismissal under §§ 422.600 and 422.602.

(f) If good cause is established, the independent entity may vacate its dismissal of a request for reconsideration within 6 months from the date of the notice of dismissal.

(g) The independent entity's dismissal is binding and not subject to further review unless a party meets the requirements in § 422.600 and files a proper and timely request under § 422.602 or the dismissal is vacated under paragraph (f) of this section.

(h) The party or physician acting on behalf of an enrollee who files a request for reconsideration may withdraw the request by filing a request for withdrawal with the independent entity.

(i) If the independent entity determines that the MA organization's dismissal was in error, the independent entity vacates the dismissal and remands the case to the plan for reconsideration consistent with § 422.590. The independent entity's decision regarding an MA organization's dismissal, including a decision to deny a request for review of a dismissal, is binding and not subject to further review.

■ 29. Section 422.600 is amended in paragraph (b) by adding a new sentence at the end of the paragraph to read as follows:

§ 422.600 Right to a hearing.

* * * * *

(b) * * * For purposes of calculating the amount remaining in controversy under this section, references to coinsurance in § 405.1006(d) of this chapter should be read to include coinsurance and copayment amounts.

* * * * *

■ 30. Section 422.629 is amended by revising paragraph (k)(4)(ii) to read as follows:

§ 422.629 General requirements for applicable integrated plans.

* * * * *

(k) * * *

(4) * * *

(ii) If deciding an appeal of a denial that is based on lack of medical necessity (or any substantively equivalent term used to describe the concept of medical necessity), are a physician or other appropriate health care professional who have the appropriate clinical expertise in treating the enrollee's condition or disease, and knowledge of Medicare and Medicaid coverage criteria, before the applicable integrated plan issues the integrated organization determination decision.

* * * * *

■ 31. Section 422.631 is amended by adding paragraphs (e) through (i) to read as follows:

§ 422.631 Integrated organization determinations.

* * * * *

(e) *Dismissing a request.* The applicable integrated plan dismisses a standard or expedited integrated organization determination request, either entirely or as to any stated issue, under any of the following circumstances:

(1) The individual or entity making the request is not permitted to request an integrated organization determination under § 422.629(*l*).

(2) The applicable integrated plan determines the party failed to make out a valid request for an integrated organization determination that substantially complies with paragraph (b) of this section.

(3) An enrollee or the enrollee's representative files a request for an integrated organization determination, but the enrollee dies while the request is pending, and both of the following apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) No other individual or entity with a financial interest in the case wishes to pursue the integrated organization determination.

(4) A party filing the integrated organization determination request submits a timely request for withdrawal of their request for an integrated organization determination with the applicable integrated plan.

(f) *Notice of dismissal.* The applicable integrated plan must mail or otherwise transmit a written notice of the dismissal of the integrated organization determination request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) The right to request that the applicable integrated plan vacate the dismissal action.

(3) The right to request reconsideration of the dismissal.

(g) *Vacating a dismissal.* If good cause is established, the applicable integrated plan may vacate its dismissal of a request for an integrated organization determination within 6 months from the date of the notice of dismissal.

(h) *Effect of dismissal.* The dismissal of a request for an integrated organization determination is binding unless it is modified or reversed by the applicable integrated plan or vacated under paragraph (g) of this section.

(i) *Withdrawing a request.* A party that requests an integrated organization determination may withdraw its request at any time before the decision is issued by filing a request with the applicable integrated plan.

■ 32. Section 422.632 is amended in paragraph (b)(1) by removing the reference ''§ 422.633(e)'' and adding in its place the reference ''§ 422.633(d)''.

§ 422.632 [Amended]

■ 33. Section 422.633 is amended by adding paragraphs (g) through (k) to read as follows:

§ 422.633 Integrated reconsideration.

* * * * *

(g) *Withdrawing a request.* The party or physician acting on behalf of an enrollee who files a request for integrated reconsideration may withdraw it by filing a request for withdrawal with the applicable integrated plan.

(h) *Dismissing a request.* The applicable integrated plan dismisses an expedited or standard integrated reconsideration request, either entirely or as to any stated issue, under any of the following circumstances:

(1) The person or entity requesting an integrated reconsideration is not a proper party to request an integrated reconsideration under § 422.629(*l*).

(2) The applicable integrated plan determines the party failed to make a valid request for an integrated reconsideration that substantially complies with § 422.629(*l*) of this section.

(3) The party fails to file the integrated reconsideration request within the proper filing timeframe in accordance with paragraph (d) of this section.

(4) The enrollee or the enrollee's representative files a request for an integrated reconsideration, but the enrollee dies while the request is pending, and both of the following criteria apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) No other individual or entity with a financial interest in the case wishes to pursue the integrated reconsideration.

(5) A party filing the reconsideration request submits a timely request for withdrawal of their request for an integrated reconsideration with the applicable integrated plan.

(i) *Notice of dismissal.* The applicable integrated plan must mail or otherwise transmit a written notice of the dismissal of the integrated reconsideration request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) The right to request that the applicable integrated plan vacate the dismissal action.

(3) The right to request review of the dismissal by the independent entity.

(j) *Vacating a dismissal.* If good cause is established, the applicable integrated plan may vacate its dismissal of a request for integrated reconsideration within 6 months from the date of the notice of dismissal.

(k) *Effect of dismissal.* The applicable integrated plan's dismissal is binding unless the enrollee or other party requests review by the independent entity in accordance with § 422.590(h) or the dismissal is vacated under paragraph (j) of this section.

■ 34. Section 422.760 is amended by redesignating paragraphs (b)(3) and (4) as paragraphs (b)(4) and (5), respectively, and adding a new paragraph (b)(3) to read as follows:

§ 422.760 Determinations regarding the amount of civil money penalties and assessment imposed by CMS.

* * * * *

(b) * * *

(3) CMS calculates the minimum penalty amounts under paragraphs (b)(1) and (2) of this section using the following criteria:

(i) *Definitions for calculating penalty amounts*—(A) *Per determination.* The penalty amounts calculated under paragraph (b)(1) of this section.

(B) *Per enrollee.* The penalty amounts calculated under paragraph (b)(2) of this section.

(C) *Standard minimum penalty.* The per enrollee or per determination penalty amount that is dependent on the type of adverse impact that occurred.

(D) *Aggravating factor(s).* Specific penalty amounts that may increase the per enrollee or per determination standard minimum penalty and are determined based on criteria under paragraph (a) of this section.

(E) *Cost-of-living multiplier.* The percent change between each year's published October consumer price index for all urban consumers (United States city average), which is released by The Office of Management and Budget (OMB) annually.

(ii) *Calculation of minimum penalty amounts.* (A) Per determination and per enrollee minimum penalty amounts increases by multiplying the current standard minimum penalty and aggravating factor amounts by the cost-of-living multiplier.

(B) The minimum penalty and aggravating factor amounts is updated no more often than every 3 years.

(C) CMS does the following:

(*1*) Tracks the calculation and accrual of the standard minimum penalty and aggravating factor amounts.

(*2*) Announces the penalties and amounts described in paragraph (b) of this section on an annual basis.

* * * * *

■ 35. Section 422.2260 is revised to read as follows:

§ 422.2260 Definitions.

The definitions in this section apply for this subpart unless the context indicates otherwise.

Advertisement (Ad) means a read, written, visual, oral, watched, or heard bid for, or call to attention. Advertisements can be considered communications or marketing based on the intent and content of the message.

Alternate format means a format used to convey information to individuals with visual, speech, physical, hearing, and intellectual disabilities (for example, braille, large print, audio).

Banner means a type of advertisement feature typically used in television ads that is intended to be brief, and flashes limited information across a screen for the sole purpose of enticing a prospective enrollee to contact the MA plan (for example, obtain more information) or to alert the viewer that information is forthcoming.

Banner-like advertisement is an advertisement that uses a banner-like feature, that is typically found in some media other than television (for example, outdoors and on the internet).

Communications means activities and use of materials created or administered by the MA organization or any downstream entity to provide information to current and prospective enrollees. Marketing is a subset of communications.

Marketing means communications materials and activities that meet both the following standards for intent and content:

(1) Intended, as determined under paragraph (1)(ii) of this definition, to do any of the following:

(i)(A) Draw a beneficiary's attention to a MA plan or plans.

(B) Influence a beneficiary's decision-making process when making a MA plan selection.

(C) Influence a beneficiary's decision to stay enrolled in a plan (that is, retention-based marketing).

(ii) In evaluating the intent of an activity or material, CMS will consider objective information including, but not limited to, the audience of the activity or material, other information communicated by the activity or material, timing, and other context of the activity or material and is not limited to the MA organization's stated intent.

(2) Include or address content regarding any of the following:

(i) The plan's benefits, benefits structure, premiums, or cost sharing.

(ii) Measuring or ranking standards (for example, Star Ratings or plan comparisons).

(iii) Rewards and incentives as defined under § 422.134(a).

Outdoor advertising (ODA) means outdoor material intended to capture the attention of a passing audience (for example, billboards, signs attached to transportation vehicles). ODA may be communications or marketing material.

■ 36. Section 422.2261 is added to read as follows:

§ 422.2261 Submission, review, and distribution of materials.

(a) *General requirements.* MA organizations must submit all marketing materials, all election forms, and certain designated communications materials for CMS review.

(1) The Health Plan Management System (HPMS) Marketing Module is the primary system of record for the collection, review, and storage of materials that must be submitted for review.

(2) Materials must be submitted to the HPMS Marketing Module by the MA organization.

(3) Unless specified by CMS, third party and downstream entities are not permitted to submit materials directly to CMS.

(b) *CMS review of marketing materials and election forms.* MA organizations may not distribute or otherwise make available any marketing materials or election forms unless one of the following occurs:

(1) CMS has reviewed and approved the material.

(2) The material has been deemed approved; that is, CMS has not rendered a disposition for the material within 45 days (or 10 days if using CMS model or standardized marketing materials as outlined in § 422.2267(e) of this chapter) of submission to CMS; or

(3) The material has been accepted under File and Use, as follows:

(i) The MA organization may distribute certain types of marketing materials, designated by CMS based on the material's content, audience, and intended use, as they apply to potential risk to the beneficiary, 5 days following the submission.

(ii) The MA organization must certify that the material meets all applicable CMS communications and marketing requirements in §§ 422.2260 through 422.2267.

(c) *CMS review of non-marketing communications materials.* CMS does not require submission, or submission and approval, of communications materials prior to use, other than the following exceptions.

(1) Certain designated communications materials that are critical to beneficiaries understanding or accessing their benefits (for example, the Evidence of Coverage (EOC).

(2) Communications materials that, based on feedback such as complaints or data gathered through reviews, warrant additional oversight as determined by CMS, to ensure the information being received by beneficiaries is accurate.

(d) *Standards for CMS review.* CMS reviews materials to ensure the following:

(1) Compliance with all applicable requirements under §§ 422.2260 through 422.2267.

(2) Benefit and cost information is an accurate reflection of what is contained in the MA organization's bid.

(3) CMS may determine, upon review of such materials, that the materials must be modified, or may no longer be used.

■ 37. Section 422.2262 is revised to read as follows:

§ 422.2262 General communications materials and activities requirements.

MA organizations may not mislead, confuse, or provide materially inaccurate information to current or potential enrollees.

(a) *General rules.* MA organizations must ensure their statements and the terminology used in communications activities and materials adhere to the following requirements:

(1) MA organizations may not do any of the following:

(i) Provide information that is inaccurate or misleading.

(ii) Make unsubstantiated statements, except when used in logos or taglines.

(iii) Engage in activities that could mislead or confuse Medicare beneficiaries, or misrepresent the MA organization.

(iv) Engage in any discriminatory activity such as attempting to recruit Medicare beneficiaries from higher income areas without making comparable efforts to enroll Medicare beneficiaries from lower income areas, or vice versa.

(v) Target potential enrollees based on income levels, unless it is a dual eligible special needs plan or comparable plan as determined by the Secretary.

(vi) Target potential enrollees based on health status, unless it is a special needs plan or comparable plan as determined by the Secretary.

(vii) State or imply plans are only available to seniors rather than to all Medicare beneficiaries.

(viii) Employ MA plan names that suggest that a plan is not available to all Medicare beneficiaries, unless it is a special needs plan or comparable plan as determined by the Secretary. This prohibition does not apply to MA plan names in effect prior to July 31, 2000.

(ix) Display the names or logos or both of co-branded network providers on the organization's member identification card, unless the provider names or logos or both are related to the member selection of specific provider organizations (for example, physicians or hospitals).

(x) Use a plan name that does not include the plan type. The plan type should be included at the end of the plan name, for example, ''Super Medicare Advantage (HMO).'' MA organizations are not required to repeat the plan type when the plan name is used multiple times in the same material.

(xi) Claim they are recommended or endorsed by CMS, Medicare, the Secretary, or HHS.

(xii) Convey that a failure to pay premium will not result in disenrollment, except for factually accurate descriptions of the MA organization's policies adopted in accordance with § 422.74(b)(1) and (d)(1) of this chapter.

(xiii) Use the term ''free'' to describe a $0 premium, any type of reduction in premium, reduction in deductibles or cost sharing, low-income subsidy, or cost sharing pertaining to dual eligible individuals.

(xiv) Imply that the plan operates as a supplement to Medicare.

(xv) State or imply a plan is available only to or is designed for beneficiaries who are dually eligible for Medicare and Medicaid, unless it is a dual-eligible special needs plan or comparable plan as determined by the Secretary.

(xvi) Market a non-dual eligible special needs plan as if it were a dual-eligible special needs plan.

(xvii) Target marketing efforts primarily to dual eligible individuals, unless the plan is a dual eligible special needs plan or comparable plan as determined by the Secretary.

(xviii) Claim a relationship with the state Medicaid agency, unless a contract to coordinate Medicaid services for enrollees in that plan is in place.

(2) MA organizations may do the following:

(i) State that the MA organization is approved to participate in Medicare programs or is contracted to administer Medicare benefits or both.

(ii) Use the term ''Medicare-approved'' to describe benefits or services in materials or both.

(iii) Use the term ''free'' in conjunction with mandatory, supplemental, and preventative benefits provided at a zero cost share for all enrollees.

(b) *Product endorsements and testimonials.* (1) Product endorsements and testimonials may take any of the following forms:

(i) Television or video ads.

(ii) Radio ads.

(iii) Print ads.

(iv) Social media ads. In cases of social media, the use of a previous post, whether or not associated with or originated by the MA organization, is considered a product endorsement or testimonial.

(v) Other types of ads.

(2) MA organizations may use individuals to endorse the MA organization's product provided the endorsement or testimonial adheres to the following requirements:

(i) The speaker must identify the MA organization's product or company by name.

(ii) Medicare beneficiaries endorsing or promoting the MA organization must have been an enrollee at the time the endorsement or testimonial was created.

(iii) The endorsement or testimonial must clearly state that the individual was paid for the endorsement or testimonial, if applicable.

(iv) If an individual is used (for example, an actor) to portray a real or fictitious situation, the endorsement or testimonial must state that it is an actor portrayal.

(c) *Requirements when including certain telephone numbers in materials.* (1) MA organizations must adhere to the following requirements for including certain telephone numbers in materials:

(i) When a MA organization includes its customer service number, the hours of operation must be prominently included at least once.

(ii) When a MA organization includes its customer service number, it must provide a toll-free TTY number in conjunction with the customer service number in the same font size.

(iii) On every material where 1–800–MEDICARE or Medicare TTY appears, the MA organization must prominently include, at least once, the hours and days of operation for 1–800–MEDICARE (that is, 24 hours a day/7 days a week).

(2) The following advertisement types are exempt from these requirements:

(i) Outdoor advertising.

(ii) Banners or banner-like ads.

(iii) Radio advertisements and sponsorships.

(d) *Standardized material identification (SMID).* (1) MA organizations must use a standardized method of identification for oversight and tracking of materials received by beneficiaries.

(2) The SMID consists of the following three parts:

(i) The MA organization contract or Multi-Contract Entity (MCE) number (that is, ''H'' for MA or Section 1876 Cost Plans, ''R'' for Regional PPO plans (RPPOs), or ''Y'' for MCE, a means of identification available for Plans/Part D sponsors that have multiple MA contracts) followed by an underscore, except that the SMID for multi-plan marketing materials must begin with the word ''MULTI–PLAN'' instead of the MA organization's contract number (for example, H1234_abc123_C or MULTI–PLAN_efg456_M).

(ii) A series of alpha numeric characters (chosen at the MA organization's discretion) unique to the material followed by an underscore.

(iii) An uppercase ''C'' for communications materials or an uppercase ''M'' for marketing materials (for example, H1234_abc123_C or H5678_efg456_M).

(3) The SMID is required on all materials except the following:

(i) Membership ID card.

(ii) Envelopes, radio ads, outdoor advertisements, banners, banner-like ads, and social media comments and posts.

(iii) OMB-approved forms/documents, except those materials specified in § 422.2267.

(iv) Corporate notices or forms (that is, not MA/Part D specific) meeting the definition of communications (see § 422.2260) such as privacy notices and authorization to disclose protected health information (PHI).

(v) Agent-developed communications materials that are not marketing.

(4) Non-English and alternate format materials, based on previously created materials, may have the same SMID as the material on which they are based.

■ 38. Section 422.2263 is added to read as follows:

§ 422.2263 General marketing requirements.

Marketing is a subset of communications and therefore must follow the requirements outlined in § 422.2262 as well as this section. Marketing (as defined in § 422.2260) must additionally meet the following requirements:

(a) MA organizations may begin marketing prospective plan year offerings on October 1 of each year for the following contract year. MA organizations may market the current and prospective year simultaneously provided materials clearly indicate what year is being discussed.

(b) In marketing, MA organizations may not do any of the following:

(1) Provide cash or other monetary rebates as an inducement for enrollment or otherwise.

(2) Offer gifts to beneficiaries, unless the gifts are of nominal value (as governed by guidance published by the HHS OIG), are offered to similarly situated beneficiaries without regard to whether or not the beneficiary enrolls, and are not in the form of cash or other monetary rebates.

(3) Provide meals to potential enrollees regardless of value.

(4) Market non-health care related products to prospective enrollees during any MA sales activity or presentation. This is considered cross-selling and is prohibited.

(5) Compare their plan to other plans, unless the information is accurate, not misleading, and can be supported by the MA organization making the comparison.

(6) Display the names or logos or both of provider co-branding partners on marketing materials, unless the materials clearly indicate via a disclaimer or in the body that ''Other providers are available in the network.''

(7) Knowingly target or send unsolicited marketing materials to any MA enrollee during the Open Enrollment Period (OEP).

(i) During the OEP, an MA organization may do any of the following:

(A) Conduct marketing activities that focus on other enrollment opportunities, including but not limited to marketing to age-ins (who have not yet made an enrollment decision), marketing by 5-star plans regarding their continuous enrollment special election period (SEP), and marketing to dual-eligible and LIS beneficiaries who, in general, may make changes once per calendar quarter during the first 9 months of the year;

(B) Send marketing materials when a beneficiary makes a proactive request;

(C) At the beneficiary's request, have one-on-one meetings with a sales agent;

(D) At the beneficiary's request, provide information on the OEP through the call center; and

(E) Include educational information, excluding marketing, on the MA organization's website about the existence of OEP.

(ii) During the OEP, an MA organization may not:

(A) Send unsolicited materials advertising the ability or opportunity to make an additional enrollment change or referencing the OEP;

(B) Specifically target beneficiaries who are in the OEP because they made a choice during Annual Enrollment Period (AEP) by purchase of mailing lists or other means of identification;

(C) Engage in or promote agent or broker activities that intend to target the OEP as an opportunity to make further sales; or

(D) Call or otherwise contact former enrollees who have selected a new plan during the AEP.

(c) The following requirements apply to how MA organizations must display CMS-issued Star Ratings:

(1) References to individual Star Rating measure(s) must also include references to the overall Star Rating for MA–PDs and the summary rating for MA-only plans.

(2) May not use an individual underlying category, domain, or measure rating to imply overall higher Star Ratings.

(3) Must be clear that the rating is out of 5 stars.

(4) Must clearly identify the Star Ratings contract year.

(5) May only market the Star Ratings in the service area(s) for which the Star Rating is applicable, unless using Star Ratings to convey overall MA organization performance (for example, ''Plan X has achieved 4.5 stars in Montgomery, Chester, and Delaware Counties), in which case the MA organization must do so in a way that is not confusing or misleading.

(6) The following requirements apply to all 5 Star MA contracts:

(i) May not market the 5-star special enrollment period, as defined in § 422.62(b)(15), after November 30 of each year if the contract has not received an overall 5 star for the next contract year.

(ii) May use CMS' 5-star icon or may create their own icon.

(7) The following requirements apply to all Low Performing MA contracts:

(i) The Low Performing Icon must be included on all materials about or referencing the specific contract's Star Ratings.

(ii) Must state the Low Performing Icon means that the MA organization's contract received a summary rating of 2.5 stars or below in Part C or Part D or both for the last 3 years.

(iii) May not attempt to refute or minimize Low Performing Status.

■ 39. Section 422.2264 is revised to read as follows:

§ 422.2264 Beneficiary contact.

For the purpose of this section, beneficiary contact means any outreach activities to a beneficiary or a beneficiary's caregivers by the MA organization or its agents and brokers.

(a) *Unsolicited contact.* Subject to the rules for contact for plan business in paragraph (b) of this section, the following rules apply when materials or activities are given or supplied to a beneficiary or their caregiver without prior request:

(1) MA organizations may make unsolicited direct contact by conventional mail and other print media (for example, advertisements and direct mail) or email (provided every email contains an opt-out option).

(2) MA organizations may not do any of the following if unsolicited:

(i) Use door to door solicitation, including leaving information of any kind, except that information may be left when an appointment is pre-scheduled but the beneficiary is not home.

(ii) Approach enrollees in common areas such as parking lots, hallways, and lobbies.

(iii) Send direct messages from social media platforms.

(iv) Use telephone solicitation (that is, cold calling), robocalls, text messages, or voicemail messages, including, but not limited to, the following:

(A) Calls based on referrals.

(B) Calls to former enrollees who have disenrolled or those in the process of disenrolling, except to conduct disenrollment surveys for quality improvement purposes.

(C) Calls to beneficiaries who attended a sales event, unless the beneficiary gave express permission to be contacted.

(D) Calls to prospective enrollees to confirm receipt of mailed information.

(3) Calls are not considered unsolicited if the beneficiary provides consent or initiates contact with the plan. For example, returning phone calls or calling an individual who has completed a business reply card requesting contact is not considered unsolicited.

(b) *Contact for plan business.* MA organizations may contact current, and to a more limited extent, former members, including those enrolled in other products offered by the parent organization, to discuss plan business, in accordance with the following requirements:

(1) An MA organization may conduct the following activities as plan business:

(i) Call current enrollees, including those in non-Medicare products, to discuss Medicare products. Examples of such calls include, but are not limited to the following:

(A) Enrollees aging into Medicare from commercial products.

(B) Existing enrollees, including Medicaid enrollees, to discuss other Medicare products or plan benefits.

(C) Members in a Part D plan to discuss other Medicare products.

(ii) Call beneficiaries who submit enrollment applications to conduct business related to enrollment.

(iii) With prior CMS approval, call LIS enrollees that a plan is prospectively losing due to reassignment. CMS decisions to approve calls are for limited circumstances based on the following:

(A) The proximity of cost of the losing plan as compared to the national benchmark; and

(B) The selection of plans in the service area that are below the benchmark.

(iv) Agents/brokers calling clients who are enrolled in other products they may sell, such as automotive or home insurance.

(v) MA organizations may not make unsolicited calls about other lines of business as a means of generating leads for Medicare plans.

(2) When reaching out to a beneficiary regarding plan business, as outlined in this section, MA organizations must offer the beneficiary the ability to opt out of future calls regarding plan business.

(c) *Events with beneficiaries.* MA organizations and their agents or brokers may hold educational events, marketing or sales events, and personal marketing appointments to meet with Medicare beneficiaries, either face-to-face or virtually. The requirements for each type of event are as follows:

(1) Educational events must be advertised as such and be designed to generally inform beneficiaries about Medicare, including Medicare Advantage, Prescription Drug programs, or any other Medicare program.

(i) At educational events, MA organizations and agents/brokers may not market specific MA plans or benefits.

(ii) MA organizations holding or participating in educational events may do any of the following:

(A) Distribute communications materials.

(B) Answer beneficiary-initiated questions pertaining to MA plans.

(C) Set up future personal marketing appointments.

(D) Distribute business cards.

(E) Obtain beneficiary contact information, including Scope of Appointment forms.

(iii) MA organizations holding or participating in educational events may not conduct sales or marketing presentations or distribute or accept plan applications.

(iv) MA organizations may schedule appointments with residents of long-term care facilities (for example, nursing homes, assisted living facilities, board and care homes) upon a resident's request. If a resident did not request an appointment, any visit by an agent or broker is prohibited as unsolicited door-to-door marketing.

(2) Marketing or sales events are group events that fall within the definition of marketing at § 422.2260.

(i) If a marketing event directly follows an educational event, the beneficiary must be made aware of the change and given the opportunity to leave prior to the marketing event beginning.

(ii) MA organizations holding or participating in marketing events may do any of the following:

(A) Provide marketing materials.

(B) Distribute and accept plan applications.

(C) Collect Scope of Appointment forms for future personal marketing appointments.

(D) Conduct marketing presentations.

(iii) MA organizations holding or participating in marketing events may not do any of the following:

(A) Require sign-in sheets or require attendees to provide contact information as a prerequisite for attending an event.

(B) Conduct activities, including health screenings, health surveys, or other activities that are used for or could be viewed as being used to target a subset of members (that is, ''cherry-picking'').

(C) Use information collected for raffles or drawings for any purpose other than raffles or drawings.

(3) Personal marketing appointments are those appointments that are tailored to an individual or small group (for example, a married couple). Personal marketing appointments are not defined by the location.

(i) Prior to the personal marketing appointment beginning, the MA plan (or agent or broker, as applicable) must agree upon and record the Scope of Appointment with the beneficiary(ies).

(ii) MA organizations holding a personal marketing appointment may do any of the following:

(A) Provide marketing materials.

(B) Distribute and accept plan applications.

(C) Conduct marketing presentations.

(D) Review the individual needs of the beneficiary including, but not limited to, health care needs and history, commonly used medications, and financial concerns.

(iii) MA organizations holding a personal marketing appointment may not do any of the following:

(A) Market any health care related product during a marketing appointment beyond the scope agreed upon by the beneficiary, and documented by the plan, prior to the appointment.

(B) Market additional health related lines of plan business not identified prior to an individual appointment without a separate Scope of Appointment identifying the additional lines of business to be discussed.

(C) Market non-health related products, such as annuities.

■ 40. Section 422.2265 is added to read as follows:

§ 422.2265 Websites.

As required under § 422.111(h)(2), MA organizations must have a website.

(a) *General website requirements.* (1) MA organization websites must meet all of the following requirements:

(i) Maintain current year contract content through December 31 of each year.

(ii) Notify users when they will leave the MA organization's Medicare site.

(iii) Include or provide access to (for example, through a hyperlink) applicable notices, statements, disclosures, or disclaimers with corresponding content. Overarching disclaimers, such as the Federal Contracting Statement, are not required on every page.

(iv) Reflect the most current information within 30 days of any material change.

(v) Keep MA content separate and distinct from other lines of business, including Medicare Supplemental Plans.

(2) MA organization websites may not do any of the following:

(i) Require beneficiaries to enter any information other than zip code, county, or state for access to non-beneficiary-specific website content.

(ii) Provide links to foreign drug sales, including advertising links.

(iii) State that the MA organization is not responsible for the content of their social media pages or the website of any first tier, downstream, or related entity that provides information on behalf of the MA organization.

(b) *Required content.* MA organization's websites must include the following content:

(1) A toll-free customer service number, TTY number, and days and hours of operation.

(2) A physical or Post Office Box address.

(3) A PDF or copy of a printable provider directory.

(4) A searchable provider directory.

(5) When applicable, a searchable pharmacy directory combined with a provider directory.

(6) Information on enrollees' and MA organizations' rights and responsibilities upon disenrollment. MA organizations may either post this information or provide specific information on where it is located in the Evidence of Coverage together with a link to that document.

(7) A description of and information on how to file a grievance, request an organization determination, and an appeal.

(8) Prominently displayed link to the Medicare.gov electronic complaint form.

(9) Disaster and emergency policy consistent with § 422.100(m)(5)(iii).

(10) A Notice of Privacy Practices as required under the HIPAA Privacy Rule (45 CFR 164.520).

(11) For PFFS plans, a link to the PFFS Terms and Conditions of Payment.

(12) For MSA plans, the following statements:

(i) ''You must file Form 1040, 'US Individual Income Tax Return,' along with Form 8853, 'Archer MSA and Long-Term Care Insurance Contracts' with the Internal Revenue Service (IRS) for any distributions made from your Medicare MSA account to ensure you aren't taxed on your MSA account withdrawals. You must file these tax forms for any year in which an MSA account withdrawal is made, even if you have no taxable income or other reason for filing a Form 1040. MSA account withdrawals for qualified medical expenses are tax free, while account withdrawals for non-medical expenses are subject to both income tax and a fifty (50) percent tax penalty.''

(ii) ''Tax publications are available on the IRS website at *http://www.irs.gov* or from 1–800–TAX–FORM (1–800–829–3676).''

(c) *Required posted materials.* MA organization's website must provide access to the following materials, in a printable format, within the timeframes specified in paragraphs (c)(1) and (2) of this section.

(1) The following materials for each plan year must be posted on the website

by October 15 prior to the beginning of the plan year:

(i) Evidence of Coverage.

(ii) Annual Notice of Change (for renewing plans).

(iii) Summary of Benefits.

(iv) Provider Directory.

(v) Provider/Pharmacy Directory.

(2) The following materials must be posted on the website throughout the year and be updated as required:

(i) Prior Authorization Forms for physicians and enrollees.

(ii) When applicable, Part D Model Coverage Determination and Redetermination Request Forms.

(iii) Exception request forms for physicians (which must be posted by January 1 for new plans).

(iv) CMS Star Ratings document, which must be posted within 21 days after its release on the Medicare Plan Finder.

■ 41. Section 422.2266 is added to read as follows:

§ 422.2266 Activities with healthcare providers or in the healthcare setting.

(a) *Where marketing is prohibited.* The requirements in paragraphs (c) through (e) of this section apply to activities in the health care setting. Marketing activities and materials are not permitted in areas where care is being administered, including but not limited to the following:

(1) Exam rooms.

(2) Hospital patient rooms.

(3) Treatment areas where patients interact with a provider and clinical team (including such areas in dialysis treatment facilities).

(4) Pharmacy counter areas.

(b) *Where marketing is permitted.* Marketing activities and materials are permitted in common areas within the health care setting, including the following:

(1) Common entryways.

(2) Vestibules.

(3) Waiting rooms.

(4) Hospital or nursing home cafeterias.

(5) Community, recreational, or conference rooms.

(c) *Provider-initiated activities.* Provider-initiated activities are activities conducted by a provider at the request of the patient, or as a matter of a course of treatment, and occur when meeting with the patient as part of the professional relationship between the provider and patient. Provider-initiated activities do not include activities conducted at the request of the MA organization or pursuant to the network participation agreement between the MA organization and the provider. Provider-initiated activities that meet the definition in this paragraph (c) fall outside of the definition of marketing in § 422.2260. Permissible provider-initiated activities include:

(1) Distributing unaltered, printed materials created by CMS, such as reports from Medicare Plan Finder, the ''Medicare & You'' handbook, or ''Medicare Options Compare'' (from *https://www.medicare.gov*), including in areas where care is delivered.

(2) Providing the names of MA organizations with which they contract or participate or both.

(3) Answering questions or discussing the merits of a MA plan or plans, including cost sharing and benefit information, including in areas where care is delivered.

(4) Referring patients to other sources of information, such as State Health Insurance Assistance Program (SHIP) representatives, plan marketing representatives, State Medicaid Office, local Social Security Offices, CMS' website at *https://www.medicare.gov,* or 1–800–MEDICARE.

(5) Referring patients to MA plan marketing materials available in common areas;

(6) Providing information and assistance in applying for the LIS.

(7) Announcing new or continuing affiliations with MA organizations, once a contractual agreement is signed. Announcements may be made through any means of distribution.

(d) *Plan-initiated provider activities.* Plan-initiated provider activities are those activities conducted by a provider at the request of an MA organization. During a plan-initiated provider activity, the provider is acting on behalf of the MA organization. For the purpose of plan-initiated activities, the MA organization is responsible for compliance with all applicable regulatory requirements.

(1) During plan-initiated provider activities, MA organizations must ensure that the provider does not:

(i) Accept or collect Scope of Appointment forms.

(ii) Accept Medicare enrollment applications.

(iii) Make phone calls or direct, urge, or attempt to persuade their patients to enroll in a specific plan based on financial or any other interests of the provider.

(iv) Mail marketing materials on behalf of the MA organization.

(v) Offer inducements to persuade patients to enroll in a particular MA plan or organization.

(vi) Conduct health screenings as a marketing activity.

(vii) Distribute marketing materials or enrollment forms in areas where care is being delivered.

(viii) Offer anything of value to induce enrollees to select the provider.

(ix) Accept compensation from the MA organization for any marketing or enrollment activities performed on behalf of the MA organization.

(2) During plan-initiated provider activities, the provider may do any of the following:

(i) Make available, distribute, and display communications materials, including in areas where care is being delivered.

(ii) Provide or make available marketing materials and enrollment forms in common areas.

(e) *MA organization activities in the health care setting.* MA organization activities in the health care setting are those activities, including marketing activities that are conducted by MA organization staff or on behalf of the MA organization, or by any downstream entity, but not by a provider. All marketing must comply with the requirements in paragraphs (a) and (b) of this section. However, during MA organization activities, the following is permitted:

(1) Accepting and collect Scope of Appointment forms.

(2) Accepting enrollment forms.

(3) Making available, distributing, and displaying communications materials, including in areas where care is being delivered.

(f) *Activities of Institutional Special Needs Plans (I–SNPs) Serving Long-Term Care Facility Residents* (1) Depending on the context of a given situation, I–SNP contracted with a long-term care facility can be viewed as both a provider and a plan.

(2) I–SNPs may use staff operating in a social worker capacity to provide information, including marketing materials (excluding enrollment forms), to residents of a long term care facility.

(3) Social workers of the I–SNP (whether employees, agents, or contracted providers) may not accept or collect a scope of appointment or enrollment form on behalf of the I–SNP.

(4) Unless the beneficiary or the beneficiary's authorized representative initiates additional contact with or by the plan, all other marketing and outreach activities in the beneficiary's room must follow the requirements for beneficiary contact under § 422.2264

(5) All other activities with healthcare providers or in the healthcare setting must comply with §§ 422.2266(a), (b), (c), (d), and (e).

■ 42. Section 422.2267 is added to read as follows:

§ 422.2267 Required materials and content.

For information CMS deems to be vital to the beneficiary, including information related to enrollment, benefits, health, and rights, the agency may develop materials or content that are either standardized or provided in a model form. Such materials and content are collectively referred to as required.

(a) *Standards for required materials and content.* All required materials and content, regardless of categorization as standardized in paragraph (b) of this section or model in paragraph (c) of this section, must meet the following:

(1) Be in a 12pt font, Times New Roman or equivalent.

(2) For markets with a significant non-English speaking population, be in the language of these individuals. Specifically, MA organizations must translate required materials into any non-English language that is the primary language of at least 5 percent of the individuals in a plan benefit package (PBP) service area.

(3) Be provided to the beneficiary within CMS's specified timeframes.

(b) *Standardized materials.* Standardized materials and content are required materials and content that must be used in the form and manner provided by CMS.

(1) When CMS issues standardized material or content, an MA organization must use the document without alteration except for the following:

(i) Populating variable fields.

(ii) Correcting grammatical errors.

(iii) Adding customer service phone numbers.

(iv) Adding plan name, logo, or both.

(v) Deleting content that does not pertain to the plan type (for example, removing Part D language for a MA-only plan).

(vi) Adding the SMID.

(vii) A Notice of Privacy Practices as required under the HIPAA Privacy Rule (45 CFR 164.520).

(2) The MA organization may develop accompanying language for standardized material or content, provided that language does not conflict with the standardized material or content. For example, CMS may issue standardized content associated with an appeal notification and MA organizations may draft a letter that includes the standardized content in the body of the letter; the remaining language in the letter is at the plan's discretion, provided it does not conflict with the standardized content or other regulatory standards.

(c) *Model materials.* Model materials and content are those required materials and content created by CMS as an example of how to convey beneficiary information. When drafting required materials or content based on CMS models, MA organizations:

(1) Must accurately convey the vital information in the required material or content to the beneficiary, although the MA organization is not required to use CMS model materials or content verbatim; and

(2) Must follow CMS's specified order of content, when specified.

(d) *Delivery of required materials.* MA organizations must mail required materials in hard copy or provide them electronically, following the requirements in paragraphs (d)(1) and (2) of this section.

(1) For hard copy mailed materials, each enrollee must receive his or her own copy, except in cases of non-beneficiary-specific material(s) where the MA organization has determined multiple enrollees are living in the same household and it has reason to believe the enrollees are related. In that case, the MA organization may mail one copy to the household. The MA organization must provide all enrollees an opt-out process so the enrollees can each receive his or her own copy, instead of a copy to the household. Materials specific to an individual beneficiary must always be mailed to that individual.

(2) Materials may be delivered electronically following the requirements in paragraphs (d)(2)(i) and (ii) of this section.

(i) Without prior authorization from the enrollee, MA organizations may mail new and current enrollees a notice informing enrollees how to electronically access the following required materials: the Evidence of Coverage, Provider and Pharmacy Directories, and Formulary. The following requirements apply:

(A) The MA organization may mail one notice for all materials or multiple notices.

(B) Notices for prospective year materials may not be mailed prior to September 1 of each year, but must be sent in time for an enrollee to access the specified materials by October 15 of each year.

(C) The MA organization may send the notice throughout the year to new enrollees.

(D) The notice must include the website address to access the materials, the date the materials will be available if not currently available, and a phone number to request that hard-copy materials be mailed.

(E) The notice must provide the enrollee with the option to request hardcopy materials. Requests may be material specific, and must have the option of a one-time request or a permanent request that must stay in place until the enrollee chooses to receive electronic materials again.

(F) Hard copies of requested materials must be sent within three business days of the request.

(ii) With prior authorization from the enrollee, MA organizations may provide any required material or content electronically. To do so, MA organizations must:

(A) Obtain prior consent from the enrollee. The consent must specify both the media type and the specific materials being provided in that media type.

(B) Provide instructions on how and when enrollees can access the materials.

(C) Have a process through which an enrollee can request hard copies be mailed, providing the beneficiary with the option of a one-time request or a permanent request (which must stay in place until the enrollee chooses to receive electronic materials again), and with the option of requesting hard copies for all or a subset of materials. Hard copies must be mailed within three business days of the request.

(D) Have a process for automatic mailing of hard copies when electronic versions or the chosen media type is undeliverable.

(e) *CMS required materials and content.* The following are required materials that must be provided to current and prospective enrollees, as applicable, in the form and manner outlined in this section. Unless otherwise noted or instructed by CMS and subject to § 422.2263(a) of this chapter, required materials may be sent once a fully executed contract is in place, but no later than the due dates listed for each material in this section.

(1) *Evidence of Coverage (EOC).* The EOC is a standardized communications material through which certain required information (under § 422.111(b)) must be provided annually and must be provided:

(i) To current enrollees of the plan by October 15, prior to the year to which the EOC applies.

(ii) To new enrollees within 10 calendars days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(2) *Part C explanation of benefits (EOB).* The EOB is a model communications material through which plans must provide the information required under § 422.111(k). MA organizations may send this monthly or per claim with a quarterly summary.

(3) *Annual notice of change (ANOC).* The ANOC is a standardized marketing material through which plans must provide the information required under § 422.111(d)(2) annually.

(i) Must send for enrollee receipt no later than September 30 of each year.

(ii) Enrollees with an October 1, November 1, or December 1 effective date must receive within 10 calendar days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(4) *Pre-Enrollment checklist (PECL).* The PECL is a standardized communications material that plans must provide to prospective enrollees with the enrollment form, so that the enrollees understand important plan benefits and rules. It references information on the following:

(i) The EOC.

(ii) Provider directory.

(iii) Pharmacy directory.

(iv) Formulary.

(v) Premiums/copayments/coinsurance.

(vi) Emergency/urgent coverage.

(vii) Plan-type rules.

(5) *Summary of Benefits (SB).* MA organizations must disseminate a summary of highly utilized coverage that include benefits and cost sharing to prospective enrollees, known as the SB. The SB is a model marketing material. It must be in a clear and accurate form.

(i) The SB must be provided with an enrollment form as follows:

(A) In hard copy with a paper enrollment form.

(B) For online enrollment, the SB must be made available electronically (for example, via a link) prior to the completion and submission of enrollment request.

(C) For telephonic enrollment, the beneficiary must be verbally told where the SB can be accessed.

(ii) The SB must include the following information:

(A) Information on medical benefits, including:

(*1*) Monthly Plan Premium.

(*2*) Deductible/Out-of-pocket limits.

(*3*) Inpatient/Outpatient Hospital coverage.

(*4*) Ambulatory Surgical Center (ASC).

(*5*) Doctor Visits (Primary Care Providers and Specialists).

(*6*) Preventive Care.

(*7*) Emergency Care/Urgently Needed Services.

(*8*) Diagnostic Services/Labs/Imaging.

(*9*) Hearing Services/Dental Services/Vision Services.

(*10*) Mental Health Services.

(B) Information on prescription drug expenses, including:

(*1*) Deductible, the initial coverage phase, coverage gap, and catastrophic coverage.

(*2*) A statement that costs may differ based on pharmacy type or status (for example, preferred/non-preferred, mail order, long-term care (LTC) or home infusion, and 30-or 90-day supply), when applicable.

(C) For Medicare Medical Savings Account Plans (MSAs), the SB must include the following:

(*1*) The amount Medicare deposits into the beneficiaries MSA account.

(*2*) A statement that the beneficiary pays nothing once the deductible is met.

(D) For dual eligible special needs plan (D–SNP)s, the SB must identify or describe the Medicaid benefits to prospective enrollees. This may be done by either of the following:

(*1*) Including the Medicaid benefits in the SB.

(*2*) Providing a separate document identifying the Medicaid benefits that accompanies the SB.

(E) For D–SNPs open to dually eligible enrollees with differing levels of cost, the SB must:

(*1*) State how cost sharing and benefits differ depending on the level of Medicaid eligibility.

(*2*) Describe the Medicaid benefits, if any, provided by the plan.

(F) Fully integrated dual eligible SNPs (FIDE SNPs) and highly integrated D–SNPs, as defined in § 422.2, that provide Medicaid benefits have the option to display integrated Medicare and Medicaid benefits in the SB.

(G) MA organizations may describe or identify other health related benefits in the SB.

(6) *Enrollment/Election form.* This is a model communications material through which plans must provide the information required under § 422.60(c).

(7) *Enrollment Notice.* This is a model communications material through which plans must provide the information required under § 422.60(e)(3).

(8) *Disenrollment Notice.* This is a model communications material through which plans must provide the information required under § 422.74(b).

(9) *Mid-Year Change Notification.* This is a model communications material through which plans must provide a notice to enrollees when there is a mid-year change in benefits or plan rules, under the following timelines:

(i) Notices of changes in plan rules, unless otherwise addressed elsewhere in this part, must be provided 30 days in advance.

(ii) For National Coverage Determination (NCD) changes announced or finalized less than 30 days before their effective date, a notification is required as soon as possible.

(iii) Mid-year NCD or legislative changes must be provided no later than 30 days after the NCD is announced or the legislative change is effective.

(A) Plans may include the change in next plan mass mailing (for example, newsletter), provided it is within 30 days.

(B) The notice must also appear on the MA organization's website.

(10) *Non-renewal Notice.* This is a model communications material through which plans must provide the information required under § 422.506.

(i) The Non-renewal Notice must be provided at least 90 calendar days before the date on which the nonrenewal is effective. For contracts ending on December 31, the notice must be dated October 2 to ensure national consistency in the application of Medigap Guaranteed Issue (GI) rights to all enrollees, except for those enrollees in special needs plans (SNPs). Information about non-renewals or service area reductions may not be released to the public, including the Non-renewal Notice, until CMS provides notification to the plan.

(ii) The Non-renewal Notice must do all of the following:

(A) Inform the enrollee that the plan will no longer be offered and the date the plan will end.

(B) Provide information about any applicable open enrollment periods or special election periods or both (for example, Medicare open enrollment, non-renewal special election period), including the last day the enrollee has to make a Medicare health plan selection.

(C) Explain what the enrollee must do to continue receiving Medicare coverage and what will happen if the enrollee chooses to do nothing.

(D) As required under § 422.506(a)(2)(ii)(A), provide a CMS-approved written description of alternative MA plan, MA–PD plan, and PDP options available for obtaining qualified Medicare services within the beneficiary's' region in the enrollee's notice.

(E) Specify when coverage will start after a new Medicare plan is chosen.

(F) List 1–800–MEDICARE contact information together with other organizations that may be able to assist with comparing plans (for example, SHIPs).

(G) Explain Medigap to applicable enrollees and the special right to buy a Medigap policy, and include a Medigap fact sheet with the non-renewal notice that explains Medigap coverage, policy,

options to compare Medigap policies, and options to buy a Medigap policy.

(H) Include the MA organization's call center telephone number, TTY number, and hours and days of operation.

(11) *Provider Directory.* This is a model communications material through which plans must provide the information under § 422.111(b)(3). The Provider Directory must:

(i) Be provided to current enrollees of the plan by October 15 of the year prior to the applicable year.

(ii) Be provided to new enrollees within 10 calendar days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(iii) Be provided to current enrollees upon request, within three business days of the request.

(iv) Be updated any time the MA organization becomes aware of changes.

(A) Updates to the online provider directories must be completed within 30 days of receiving information requiring update.

(B)*(1)* Updates to hardcopy provider directories must be completed within 30 days.

(2) Hard copy directories that include separate updates via addenda are considered up-to-date.

(12) *Provider Termination Notice.* This is a model communications material through which plans must provide the information required under § 422.111(e). The provider termination notice must be both of the following:

(i) Provided in hard copy.

(ii) Sent via U.S. mail (first class postage is recommended, but not required).

(13) *Star Ratings Document.* This is a standardized marketing material through which Star Ratings information is conveyed to prospective enrollees.

(i) The Star Ratings Document is generated through HPMS.

(ii) The Star Ratings Document must be provided with an enrollment form, as follows:

(A) In hard copy with a paper enrollment form.

(B) For online enrollment, made available electronically (for example, via a link) prior to the completion and submission of enrollment request.

(C) For telephonic enrollment, the beneficiary must be verbally told where they can access the Star Ratings Document.

(iii) New MA organizations that have no Star Ratings are not required to provide the Star Ratings Document until the following contract year.

(iv) Updated Star Ratings must be used within 21 calendar days of release of updated information on Medicare Plan Finder.

(v) Updated Star Ratings must not be used until CMS releases Star Ratings on Medicare Plan Finder.

(14) *Organization Determination Notice.* This is a model communications material through which plans must provide the information under § 422.568.

(15) *Excluded Provider Notice.* This is a model communications material through which plans must notify enrollees when a provider they visit or consult has been excluded from participating in the Medicare program based on an OIG exclusion or the CMS preclusion list.

(16) *Notice of Denial of Medical Coverage or Payment (NDMCP) (also known as the Integrated Denial Notice (IDN)).* This is a standardized communications material used to convey beneficiary appeal rights when a plan has denied a service as non-covered or excluded from benefits.

(17) *Notice of Medicare Non-Coverage (NOMNC).* This is a standardized communications material used to convey beneficiary appeal rights when a plan is terminating previously-approved coverage in a Skilled Nursing Facility (SNF), Comprehensive Outpatient Rehabilitation Facility (CORF), or Home Health setting (HHA).

(18) *Detailed Explanation of Non-Coverage (DENC).* This is a standardized communications material used to convey to a beneficiary why their current Medicare covered SNF, CORF or HHA services should end.

(19) *Appointment of Representative (AOR).* This is a standardized communications material used to authorize or appoint an individual to act on behalf of a beneficiary for the purpose of a specific appeal, grievance, or organization determination.

(20) *An Important Message From Medicare About Your Rights (IM).* This is a standardized communications material used to convey a beneficiary's rights as a hospital inpatient and appeal rights when their covered inpatient hospital stay is ending.

(21) *Detailed Notice of Discharge Form (DND).* This is a standardized communications material, as required under § 422.622(e), used to convey to a beneficiary why their current Medicare covered inpatient hospital stay should end.

(22) *Medicare Outpatient Observation Notice (MOON).* This is a standardized communications material used to inform a beneficiary that he or she is an outpatient receiving observation services.

(23) *Appeal and Grievance Data Form.* This is a standardized communications material used to convey organization-specific grievance and appeals data.

(24) *Request for Administrative Law Judge (ALJ) Hearing.* This is a standardized communications material used to formally request a reconsideration of the independent review entity's determination.

(25) *Attorney Adjudicator Review in Lieu of ALJ Hearing.* This is a standardized communications material used to request that an attorney adjudicator review a previously determined decision rather than having an ALJ do so.

(26) *Notice of Right to an Expedited Grievance.* This is a model communications material used to convey a Medicare enrollee's rights to request that a decision be made on a grievance or appeal within a shorter timeframe.

(27) *Waiver of Liability Statement.* This is a model communications material used by non-contracted providers to waive beneficiary liability for payment for denied services while utilizing the enrollee appeals process under subpart M of part 422.

(28) *Notice of Appeal Status.* This is a model communications material used to inform a beneficiary of the denial of an appeal and additional appeal rights.

(29) *Notice of Dismissal of Appeal.* This is a model communications material used to convey the rationale by an MA organization to dismiss beneficiary's appeal.

(30) *Federal Contracting Statement.* This is model content through which plans must convey that they have a contract with Medicare and that enrollment in the plan depends on contract renewal.

(i) The Federal Contracting Statement must include all of the following:

(A) Legal or marketing name of the organization.

(B) Type of plan (for example, HMO, HMO SNP, PPO, PFFS, PDP).

(C) A statement that the organization has a contract with Medicare (when applicable, MA organizations may incorporate a statement that the organization has a contract with the state/Medicaid program).

(D) A statement that enrollment depends on contract renewal.

(ii) MA organizations must include the Federal Contracting Statement on all marketing materials with the exception of the following:

(A) Banners and banner-like advertisements.

(B) Outdoor advertisements.

(C) Text messages.

(D) Social media.

(E) Envelopes

(31) *Star Ratings Disclaimer.* This is model content through which plans must:

(i) Convey that MA organizations are evaluated yearly by Medicare.

(ii) Convey that the ratings are based on a 5-star rating system.

(iii) Include the model content in disclaimer form or within the material whenever Star Ratings are mentioned in marketing materials, with the exception of when Star Ratings are published on small objects (that is, a give-away items such as a pens or rulers).

(32) *SSBCI Disclaimer.* This is model content through which MA organizations must:

(i) Convey the benefits mentioned are a part of special supplemental benefits.

(ii) Convey that not all members will qualify.

(iii) Include the model content in the material copy which mentions SSBCI benefits.

(33) *Accommodations Disclaimer.* This is model content through which MA organizations must:

(i) Convey that accommodations for persons with special needs are available.

(ii) Provide a telephone number and TTY number.

(iii) Include the model content in disclaimer form or within the body of the material on any advertisement of invitation to all events described under § 422.2264(c).

(34) *Mailing Statements.* This is standardized content. It consists of statements on envelopes that MA organizations must include when mailing information to current members, as follows:

(i) MA organizations must include the following statement when mailing information about the enrollee's current plan: ''Important [Insert Plan Name] information.''

(ii) MA organizations must include the following statement when mailing health and wellness information: ''Health and wellness or prevention information.''

(iii) The MA organization must include the plan name; however, if the plan name is elsewhere on the envelope, the plan name does not need to be repeated in the disclaimer.

(iv) Delegated or sub-contracted entities and downstream entities that conduct mailings on behalf of a multiple MA organizations must also comply with this requirement; however, they do not have to include a plan name.

(35) *Promotional Give-Away Disclaimer.* This is model content. The disclaimer consists of a statement that must make clear that there is no obligation to enroll in a plan, and must be included when offering a promotional give-away such as a drawing, prizes, or a free gift.

(36) *Provider Co-branded Material Disclaimer.* This is model content through which MA organizations must:

(i) Convey, as applicable, that other pharmacies, physicians or providers are available in the plan's network.

(ii) Include the model content in disclaimer form or within the material whenever co-branding relationships with network provider are mentioned, unless the co-branding is with a provider network or health system that represents 90 percent or more of the network as a whole.

(37) *Out of Network Non-Contracted Provider Disclaimer.* This is standardized content. The disclaimer consists of the statement: ''Out-of-network/non-contracted providers are under no obligation to treat Plan members, except in emergency situations. Please call our customer service number or see your Evidence of Coverage for more information, including the cost-sharing that applies to out-of-network services,'' and must be included whenever materials reference out-of-network/non-contracted providers.

(38) *NCQA SNP Approval Statement.* This is model content and must be used by SNPs who have received NCQA approval. MA organizations must:

(i) Convey that MA organization has been approved by the National Committee for Quality Assurance (NCQA) to operate as a Special Needs Plan (SNP).

(ii) Include the last contract year of NCQA approval.

(iii) Convey that the approval is based on a review of [insert Plan Name's] Model of Care.

(iv) Not include numeric SNP approval scores.

§ 422.2268 [Removed]

■ 43. Section 422.2268 is removed.

■ 44. Section 422.2274 is revised to read as follows:

§ 422.2274 Agent, broker, and other third party requirements.

If an MA organization uses agents and brokers to sell its Medicare plans, the requirements in paragraphs (a) through (e) of this section are applicable. If an MA organization makes payments to third parties, the requirements in paragraph (f) of this section are applicable.

(a) *Definitions.* For purposes of this section, the following definitions are applicable:

Compensation. (i) Includes monetary or non-monetary remuneration of any kind relating to the sale or renewal of a plan or product offered by an MA organization including, but not limited to the following:

(A) Commissions.

(B) Bonuses.

(C) Gifts.

(D) Prizes or Awards.

(ii) Does not include any of the following:

(A) Payment of fees to comply with State appointment laws, training, certification, and testing costs.

(B) Reimbursement for mileage to, and from, appointments with beneficiaries.

(C) Reimbursement for actual costs associated with beneficiary sales appointments such as venue rent, snacks, and materials.

Fair market value (FMV) means, for purposes of evaluating agent or broker compensation under the requirements of this section only, the amount that CMS determines could reasonably be expected to be paid for an enrollment or continued enrollment into an MA plan. Beginning January 1, 2021, the national FMV is $539, the FMV for Connecticut, Pennsylvania, and the District of Columbia is $607, the FMV for California and New Jersey is $672, and the FMV for Puerto Rico and the U.S. Virgin Islands is $370. For subsequent years, FMV is calculated by adding the current year FMV and the product of the current year FMV and MA Growth Percentage for aged and disabled beneficiaries, which is published for each year in the rate announcement issued pursuant to § 422.312.

Initial enrollment year means the first year that a beneficiary is enrolled in a plan versus subsequent years (c.f., *renewal year*) that a beneficiary remains enrolled in a plan.

Like plan type means one of the following:

(i) PDP replaced with another PDP.

(ii) MA or MA–PD replaced with another MA or MA–PD.

(iii) Cost plan replaced with another cost plan.

Plan year and *enrollment year* mean the year beginning January 1 and ending December 31.

Renewal year means all years following the initial enrollment year in the same plan or in different plan that is a like plan type.

Unlike plan type means one of the following:

(i) An MA or, MA–PD plan to a PDP or Section 1876 Cost Plan.

(ii) A PDP to a Section 1876 Cost Plan or an MA or MA–PD plan.

(iii) A Section 1876 Cost Plan to an MA or MA–PD plan or PDP.

(b) *Agent/broker requirements.* Agents and brokers who represent MA

organizations must follow the requirements in paragraphs (b)(1) through (3) of this section. Representation includes selling products (including Medicare Advantage plans, Medicare Advantage-Prescription Drug plans, Medicare Prescription Drug plans, and section 1876 Cost plans) as well as outreach to existing or potential beneficiaries and answering or potentially answering questions from existing or potential beneficiaries.

(1) Be licensed and appointed under State law (if required under applicable State law).

(2) Be trained and tested annually as required under paragraph (c)(4) of this section, and achieve an 85 percent or higher on all forms of testing.

(3) Secure and document a Scope of Appointment prior to meeting with potential enrollees.

(c) *MA organization oversight.* MA organizations must oversee first tier, downstream, and related entities that represent the MA organization to ensure agents and brokers abide by all applicable State and Federal laws, regulations, and requirements. MA organizations must do all of the following:

(1) As required under applicable State law, employ as marketing representatives only individuals who are licensed by the State to conduct marketing (as defined in this subpart) of health insurance in that State, and whom the MA organization has informed that State it has appointed, consistent with the appointment process for agents and brokers provided for under State law.

(2) As required under applicable State law, report the termination of an agent or broker to the State and the reason for termination.

(3) Report to CMS all enrollments made by unlicensed agents or brokers and for-cause terminations of agents or brokers.

(4) On an annual basis, provide training and testing to agents and brokers on Medicare rules and regulations, the plan products that agents and brokers will sell, including any details specific to each plan product, and relevant State and Federal requirements.

(5) On an annual basis by the last Friday in July, report to CMS whether the MA organization intends to use employed, captive, or independent agents or brokers in the upcoming plan year and the specific rates or range of rates the plan will pay independent agents and brokers. Following the reporting deadline, MA organizations may not change their decisions related to agent or broker type, or their compensation rates and ranges, until the next plan year.

(6) On an annual basis by October 1, have in place full compensation structures for the following plan year. The structure must include details on compensation dissemination, including specifying payment amounts for initial enrollment year and renewal year compensation.

(7) Submit agent or broker marketing materials to CMS through HPMS prior to use, following the requirements for marketing materials in this subpart.

(8) Ensure beneficiaries are not charged marketing consulting fees when considering enrollment in MA plans.

(9) Establish and maintain a system for confirming that:

(i) Beneficiaries enrolled by agents or brokers understand the product, including the rules applicable under the plan.

(ii) Agents and brokers appropriately complete Scope of Appointment records for all marketing appointments (including telephonic and walk-in).

(10) Demonstrate that marketing resources are allocated to marketing to the disabled Medicare population as well as to Medicare beneficiaries age 65 and over.

(11) Must comply with State requests for information about the performance of a licensed agent or broker as part of a state investigation into the individual's conduct. CMS will establish and maintain a memorandum of understanding (MOU) to share compliance and oversight information with States that agree to the MOU.

(d) *Compensation requirements.* MA organizations must ensure they meet the requirements in paragraphs (d)(1) through (5) of this section in order to pay compensation. These compensation requirements only apply to independent agents and brokers.

(1) *General rules.* (i) MA organizations may only pay agents or brokers who meet the requirements in paragraph (b) of this section.

(ii) MA organizations may determine, through their contracts, the amount of compensation to be paid, provided it does not exceed limitations outlined in this section.

(iii) MA organizations may determine their payment schedule (for example, monthly or quarterly). Payments (including payments for AEP enrollments) must be made during the year of the beneficiary's enrollment.

(iv) MA organizations may only pay compensation for the number of months a member is enrolled.

(2) *Initial enrollment year compensation.* For each enrollment in an initial enrollment year, MA organizations may pay compensation at or below FMV.

(i) MA organizations may pay either a full or pro-rated initial enrollment year compensation for:

(A) A beneficiary's first year of enrollment in any plan; or

(B) A beneficiary's move from an employer group plan to a non-employer group plan (either within the same parent organization or between parent organizations).

(ii) MA organizations must pay pro-rated initial enrollment year compensation for:

(A) A beneficiary's plan change(s) during their initial enrollment year.

(B) A beneficiary's selection of an ''unlike plan type'' change. In that case, the new plan would only pay the months that the beneficiary is enrolled, and the previous plan would recoup the months that the beneficiary was not in the plan.

(3) *Renewal compensation.* For each enrollment in a renewal year, MA plans may pay compensation at an amount up to 50 percent of FMV.

(i) MA plans may pay compensation for a renewal year:

(A) In any year following the initial enrollment year the beneficiary remains in the same plan; or

(B) When a beneficiary enrolls in a new ''like plan type''.

(ii) [Reserved]

(4) *Other compensation scenarios.* (i) When a beneficiary enrolls in an MA–PD, MA organizations may pay only the MA compensation (and not compensation for Part D enrollment under § 423.2274 of this chapter).

(ii) When a beneficiary enrolls in both a section 1876 Cost Plan and a stand-alone PDP, the 1876 Cost Plan sponsor may pay compensation for the cost plan enrollment and the Part D sponsor must pay compensation for the Part D enrollment.

(iii) When a beneficiary enrolls in a MA-only plan and a PDP plan, the MA plan sponsor may pay for the MA plan enrollment and the Part D plan may pay for the PDP plan enrollment.

(iv) When a beneficiary changes from two plans (for example, a MA plan and a stand-alone PDP) (dual enrollments) to one plan (MA–PD), the MA organization may only pay compensation at the renewal rate for the MA–PD product.

(5) *Additional compensation, payment, and compensation recovery requirements (Charge-backs).* (i) MA organizations must retroactively pay or recoup funds for retroactive beneficiary changes for the current and previous calendar years. MA organizations may choose to recoup or pay compensation

for years prior to the previous calendar year, but they must do both (recoup amounts owed and pay amounts due) during the same year.

(ii) Compensation recovery is required when:

(A) A beneficiary makes any plan change (regardless of the parent organization) within the first three months of enrollment (known as rapid disenrollment), except as provided in paragraph (d)(5)(iii) of this section.

(B) Any other time period a beneficiary is not enrolled in a plan, but the plan paid compensation based on that time period.

(iii) Rapid disenrollment compensation recovery does not apply when:

(A) A beneficiary enrolls effective October 1, November 1, or December 1 and subsequently uses the Annual Election Period to change plans for an effective date of January 1.

(B) A beneficiary's enrollment change is not in the best interests of the Medicare program, including for the following reasons:

(*1*) Other creditable coverage (for example, an employer plan).

(*2*) Moving into or out of an institution.

(*3*) Gain or loss of employer/union sponsored coverage.

(*4*) Plan termination, non-renewal, or CMS imposed sanction.

(*5*) To coordinate with Part D enrollment periods or the State Pharmaceutical Assistance Program.

(*6*) Becoming LIS or dually eligible for Medicare and Medicaid.

(*7*) Qualifying for another plan based on special needs.

(*8*) Due to an auto, facilitated, or passive enrollment.

(*9*) Death.

(*10*) Moving out of the service area.

(*11*) Non-payment of premium.

(*12*) Loss of entitlement or retroactive notice of entitlement.

(*13*) Moving into a 5-star plan.

(*14*) Moving from an LPI plan into a plan with three or more stars.

(iv)(A) When rapid disenrollment compensation recovery applies, the entire compensation must be recovered.

(B) For other compensation recovery, plans must recover a pro-rated amount of compensation (whether paid for an initial enrollment year or renewal year) from an agent or broker equal to the number of months not enrolled.

(*1*) If a plan has paid full initial compensation, and the enrollee disenrolls prior to the end of the enrollment year, the total number of months not enrolled (including months prior to the effective date of enrollment) must be recovered from the agent or broker.

(*2*) Example: A beneficiary enrolls upon turning 65 effective April 1 and disenrolls September 30 of the same year. The plan paid full initial enrollment year compensation. Recovery is equal to 6/12ths of the initial enrollment year compensation (for January through March and October through December).

(e) *Payments other than compensation (administrative payments).* (1) Payments made for services other than enrollment of beneficiaries (for example, training, customer service, agent recruitment, operational overhead, or assistance with completion of health risk assessments) must not exceed the value of those services in the marketplace.

(2) Administrative payments can be based on enrollment provided payments are at or below the value of those services in the marketplace.

(f) *Payments for referrals.* Payments may be made to individuals for the referral (including a recommendation, provision, or other means of referring beneficiaries) to an agent, broker or other entity for potential enrollment into a plan. The payment may not exceed $100 for a referral into an MA or MA–PD plan and $25 for a referral into a PDP plan.

PART 423—VOLUNTARY MEDICARE PRESCRIPTION DRUG BENEFIT

■ 45. The authority citation for part 423 continues to read as follows:

Authority: 42 U.S.C. 1302, 1395w–101 through 1395w–152, and 1395hh.

■ 46. Section 423.4 is amended by adding definitions for ''Credible allegation of fraud'', ''Fraud hotline tip'', ''Inappropriate prescribing'', ''Parent organization'', and ''Substantiated or suspicious activities of fraud, waste, or abuse'' in alphabetical order to read as follows:

§ 423.4 Definitions.

* * * * *

Credible allegation of fraud means an allegation from any source, including but not limited to the following:

(1) Fraud hotline tips verified by further evidence.

(2) Claims data mining.

(3) Patterns identified through provider audits, civil false claims cases, and law enforcement investigations. Allegations are considered to be credible when they have indicia of reliability.

* * * * *

Fraud hotline tip is a complaint or other communications that are submitted through a fraud reporting phone number or a website intended for the same purpose, such as the Federal Government's HHS OIG Hotline or a health plan's fraud hotline.

* * * * *

Inappropriate prescribing means that, after consideration of all the facts and circumstances of a particular situation identified through investigation or other information or actions taken by Medicare Advantage (MA) organizations and Part D plan sponsors, there is an established pattern of potential fraud, waste, and abuse related to prescribing of opioids, as reported by the plan sponsors. Beneficiaries with cancer and sickle-cell disease, as well as those patients receiving hospice and long term care (LTC) services are excluded, when determining inappropriate prescribing. Plan sponsors may consider any number of factors including, but not limited, to the following:

(1) Documentation of a patient's medical condition.

(2) Identified instances of patient harm or death.

(3) Medical records, including claims (if available).

(4) Concurrent prescribing of opioids with an opioid potentiator in a manner that increases risk of serious patient harm.

(5) Levels of morphine milligram equivalent (MME) dosages prescribed.

(6) Absent clinical indication or documentation in the care management plan or in a manner that may indicate diversion.

(7) State-level prescription drug monitoring program (PDMP) data.

(8) Geography, time, and distance between a prescriber and the patient.

(9) Refill frequency and factors associated with increased risk of opioid overdose.

* * * * *

Parent organization means the legal entity that exercises a controlling interest, through the ownership of shares, the power to appoint voting board members, or other means, in a Part D sponsor or MA organization, directly or through a subsidiary or subsidiaries, and which is not itself a subsidiary of any other legal entity.

* * * * *

Substantiated or suspicious activities of fraud, waste, or abuse means and includes, but is not limited to, allegations that a provider of services (including a prescriber) or supplier;

(1) Engaged in a pattern of improper billing;

(2) Submitted improper claims with suspected knowledge of their falsity;

(3) Submitted improper claims with reckless disregard or deliberate ignorance of their truth or falsity; or

(4) Is the subject of a fraud hotline tip verified by further evidence.

* * * * *

■ 47. Section 423.100 is amended—
■ a. In the definition of ''Applicable drug'' by revising paragraph (1)(ii);
■ b. In the definition of ''Exempted beneficiary'' by:
■ i. Removing the word ''or'' at the end of paragraph (2);
■ ii. Removing the period at the end of paragraph (3) and adding ''; or'' in its place; and
■ iii. Adding paragraph (4); and
■ c. By revising the introductory text in the definition of ''Potential at-risk beneficiary''.

The revisions and addition read as follows:

§ 423.100 Definitions.

* * * * *

Applicable drug * * *

(1) * * *

(ii) In the case of a biological product, licensed under section 351 of the Public Health Service Act (other than, with respect to a plan year before 2019, a product licensed under subsection (k) of such section 351); and

* * * * *

Exempted beneficiary * * *

(4) Has sickle cell disease.

* * * * *

Potential at-risk beneficiary means a Part D eligible individual who is not an exempted beneficiary (as defined in this section) and—

* * * * *

■ 48. Section 423.104 is amended by adding paragraph (d)(2)(iv) to read as follows:

§ 423.104 Requirements related to qualified prescription drug coverage.

* * * * *

(d) * * *

(2) * * *

(iv) Specialty tier means a formulary cost sharing tier dedicated to high-cost Part D drugs with ingredient costs for a 30-day equivalent supply (as described in paragraph (d)(2)(iv)(A)(*2*) of this section) that are greater than the specialty tier cost threshold specified in paragraph (d)(2)(iv)(A) of this section.

(A) *Specialty-tier cost threshold.* CMS sets the specialty-tier cost threshold for a plan year in accordance with this paragraph (d)(2)(iv)(A), using the following steps:

(*1*) *30-day equivalent ingredient cost.* Using the PDE data as specified in paragraph (d)(2)(iv)(C) of this section, CMS uses the ingredient cost reflected on the prescription drug event (PDE) to determine the ingredient cost in dollars for a 30-day equivalent supply of the Part D drug.

(*2*) *30-day equivalent supply.* CMS determines the 30-day equivalent supply as follows: If the days' supply reported on a PDE is less than or equal to 34, the number of 30-day equivalent supplies equals one. If the days' supply reported on a PDE is greater than 34, the number of 30-day equivalent supplies is equal to the number of days' supply reported on each PDE divided by 30.

(*3*) *Top 1 percent.* CMS determines the amount that equals the lowest 30-day equivalent ingredient cost that is within the top 1 percent of all 30-day equivalent ingredient costs reflected in the PDE data.

(*4*) *Determination.* Except as provided in paragraph (d)(2)(iv)(B) of this section, the amount determined in paragraph (d)(2)(iii) of this section is the specialty-tier cost threshold for the plan year.

(*5*) *Claims history.* Except for newly FDA-approved Part D drugs only recently available on the market for which Part D sponsors would have little or no claims data, CMS approves placement of a Part D drug on a specialty tier when that Part D sponsor's claims data from the time period specified in paragraph (d)(2)(iv)(C) of this section demonstrates that greater than 50 percent of the Part D sponsor's PDEs for a given Part D drug, when adjusted for 30-day equivalent supplies, have ingredient costs for 30-day equivalent supplies, as described in paragraph (d)(2)(iv)(A)(*2*) of this section, that exceed the specialty-tier cost threshold.

(*6*) *No claims history.* For newly FDA-approved Part D drugs only recently available on the market for which Part D sponsors would have little or no claims data, CMS approves placement of a Part D drug on a specialty tier when that Part D sponsor estimates that ingredient cost portion of their negotiated prices for a 30-day equivalent supply, as defined in subparagraph (d)(2)(iv)(A)(*2*), is anticipated to exceed the specialty-tier cost threshold more than 50 percent of the time, subject to the requirements at § 423.120(b).

(B) *Limit on specialty-tier cost threshold adjustment.* (*1*) CMS increases the specialty-tier cost threshold for a plan year only if the amount determined in paragraph (d)(2)(iv)(A)(*3*) of this section for a plan year is at least 10 percent above the specialty tier cost threshold for the prior plan year.

(*2*) If an increase is made in accordance with this paragraph (d)(2)(iv)(B), CMS rounds the amount determined in paragraph (d)(2)(iv)(A)(*3*) of this section to the nearest $10, and the resulting dollar amount is the specialty-tier cost threshold for the plan year.

(C) *Data used to determine the specialty-tier cost threshold.* CMS uses PDEs from the plan year that ended 12 months prior to the applicable plan year.

(D) *Maximum number of specialty tiers and maximum allowable cost sharing.* A Part D plan may maintain up to two specialty tiers. CMS sets the maximum allowable cost sharing for a single specialty tier, or, in the case of a plan with two specialty tiers, the higher cost sharing specialty tier as follows:

(*1*) For Part D plans with the full deductible provided under the Defined Standard benefit, as specified in paragraph (d)(1) of this section, 25 percent coinsurance.

(*2*) For Part D plans with no deductible, 33 percent coinsurance.

(*3*) For Part D plans with a deductible that is greater than $0 and less than the deductible provided under the Defined Standard benefit, a coinsurance percentage that is determined by subtracting the plan's deductible from 33 percent of the initial coverage limit (ICL) under section 1860D–2(b)(3) of the Act, dividing this difference by the difference between the ICL and the plan's deductible, and rounding to the nearest 1 percent.

* * * * *

■ 49. Section 423.128 is amended by—
■ a. Revising paragraph (a)(1);
■ b. Adding paragraph (b)(11);
■ c. Adding paragraphs (d)(1)(i)(A) and (B), and (ii)(A) through (C);
■ d. Redesignating paragraph (d)(1)(iii) as (d)(1)(iii)(A);
■ e. Adding paragraph (d)(1)(iii)(B); and
■ f. Adding paragraphs (d)(1)(v) and (vi) and (d)(4) and (5).

The revisions and additions read as follows:

§ 423.128 Dissemination of Part D plan information.

(a) * * *

(1) To each enrollee of a Part D plan offered by the Part D sponsor under this part, except as provided in paragraph (b)(11)(ii) of this section;

* * * * *

(b) * * *

(11) *Opioid information.* (i) Beginning January 1, 2022, and subject to paragraph (b)(11)(ii) of this section, a Part D sponsor must disclose to each enrollee at least once per year the following:

(A) The risks associated with prolonged opioid use.

(B) Coverage of non-pharmacological therapies, devices, and non-opioid medications—

(*1*) In the case of an MA–PD, under such plan; and

(*2*) In the case of a PDP, under such plan and Medicare Parts A and B.

(ii) The Part D sponsor may elect to, in lieu of disclosing the information described in paragraph (b)(11)(i) of this section to each enrollee under each plan offered by the Part D sponsor under this part, disclose such information to a subset of enrollees, such as enrollees who have been prescribed an opioid in the previous 2-year period.

* * * * *

(d) * * *

(1) * * *

(i) * * *

(A) For coverage beginning on and after January 1, 2022, is open at least from 8:00 a.m. to 8:00 p.m. in all regions served by the Part D plan, with the following exceptions:

(*1*) From October 1 through March 31 of the following year, a customer call center may be closed on Thanksgiving Day and Christmas Day so long as the interactive voice response (IVR) system or similar technology records messages from incoming callers and such messages are returned within one (1) business day.

(*2*) From April 1 through September 30, a customer call center may be closed any Federal holiday, Saturday, or Sunday, so long as the interactive voice response (IVR) system or similar technology records messages from incoming callers and such messages are returned within one (1) business day.

(B) For coverage beginning on and after January 1, 2022, any call center serving pharmacists or pharmacies must be open so long as any network pharmacy in that region is open.

(ii) * * *

(A) For coverage beginning on and after January 1, 2022, limits average hold time to 2 minutes. The hold time is defined as the time spent on hold by callers following the interactive voice response (IVR) system, touch-tone response system, or recorded greeting, before reaching a live person.

(B) For coverage beginning on and after January 1, 2022, answers 80 percent of incoming calls within 30 seconds after the interactive voice response (IVR), touch-tone response system, or recorded greeting interaction.

(C) For coverage beginning on and after January 1, 2022, limits the disconnect rate of all incoming calls to 5 percent. The disconnect rate is defined as the number of calls unexpectedly dropped divided by the total number of calls made to the customer call center.

(iii)(A) * * *.

(B) For coverage beginning on and after January 1, 2022, interpreters must be available for 80 percent of incoming calls requiring an interpreter within 8 minutes of reaching the customer service representative and be made available at no cost to the caller.

* * * * *

(v) At a minimum, for coverage beginning on and after January 1, 2022:

(A) Provides effective real-time communication with individuals using auxiliary aids and services, including TTYs and all forms of Federal Communication Commission-approved telecommunications relay systems, when using automated-attendant systems. See 28 CFR 35.161 and 36.303(d).

(B) Connects 80 percent of incoming calls requiring TTY services to a TTY operator within 7 minutes.

(vi) For coverage beginning on and after January 1, 2022, provides the information described in paragraph (d)(4) of this section to enrollees who call the customer service call center.

* * * * *

(4) Beginning on January 1, 2023, a Part D sponsor must implement, and make available directly to enrollees, in an easy to understand manner, the following complete, accurate, timely, clinically appropriate, patient-specific formulary and benefit real-time information in their beneficiary-specific portal or computer application:

(i) Enrollee cost sharing amounts.

(ii) Formulary medication alternatives for a given condition.

(iii) Formulary status, including utilization management requirements applicable to each alternative medication, as appropriate for each enrollee and medication presented.

(5) The Part D sponsor may provide rewards and incentives to enrollees who use the beneficiary real time benefit tool (RTBT) described in paragraph (d)(4) of this section, provided the rewards and incentives comply with the requirements in paragraphs (d)(5)(i) through (vi) of this section, and the rewards and incentives information is made available to CMS upon request. Use is defined as logging into the RTBT, via portal or computer application, or calling the customer service call center to obtain the information described in paragraph (d)(4) of this section. The rewards and incentives must meet the following:

(i) Be of reasonable value, both individually and in the aggregate.

(ii) Be designed so that all enrollees are eligible to earn rewards and incentives, and that there is no discrimination based on race, color, national origin, including limited English proficiency, sex, age, disability, chronic disease, health status, or other prohibited basis.

(iii) Not be offered in the form of cash or other cash equivalents.

(iv) Not be used to target potential enrollees.

(v) Be earned solely for logging onto the beneficiary RTBT and not for any other purpose.

(vi) Otherwise comply with all relevant fraud and abuse laws, including, when applicable, the anti-kickback statute and civil money penalty prohibiting inducements to beneficiaries.

* * * * *

■ 50. Section 423.153 is amended by—

■ a. Revising the section heading;

■ b. Revising paragraph (a);

■ c. By adding paragraphs (d)(1)(vii)(E) and (F);

■ d. By revising paragraph (d)(2);

■ e. By revising paragraph (f)(1) introductory text;

■ f. In paragraph (f)(3)(ii) introductory text by removing the phrase ''paragraphs (f)(10) and (11) of this section'' and adding its place the phrase ''paragraphs (f)(9) through (13) of this section'';

■ g. In paragraph (f)(4)(ii)(A) by removing the phrase ''paragraph (f)(2)(ii)(B) of this section'' and adding its place the phrase ''paragraph (f)(3)(ii)(A) of this section'';

■ h. In paragraph (f)(4)(ii)(A) by removing the phrase ''paragraph (f)(4)(i)(B) of this section'' and adding in its place the phrase ''paragraph (f)(2)(i)(B) of this section'';

■ i. Revising paragraphs (f)(5)(ii)(C)(*3*), (f)(6)(ii)(C)(*4*), and (f)(8)(i);

■ j. In paragraph (f)(15)(ii)(C) by removing the phrase ''any potential at-risk beneficiary'' and adding in its place the phrase ''any potential at-risk beneficiary or at-risk beneficiary'' and changing ''definition'' to ''definitions'';

■ k. In paragraph (f)(15)(ii)(D) by changing ''no later than 7 days of the date'' to ''no later than 7 days from the date'';

■ l. By revising paragraph (f)(16); and

■ m. By revising the heading of paragraph (g).

The revisions and additions read as follows:

§ 423.153 Drug utilization management, quality assurance, medication therapy management programs (MTMPs), drug management programs, and access to Medicare Parts A and B claims data extracts.

(a) *General rule.* Each Part D sponsor must have established, for covered Part D drugs furnished through a Part D plan, a drug utilization management program, quality assurance measures and systems, and an MTMP as described in

paragraphs (b), (c), and (d) of this section. No later than January 1, 2022, a Part D plan sponsor must have established a drug management program for at-risk beneficiaries enrolled in their prescription drug benefit plans to address overutilization of frequently abused drugs, as described in paragraph (f) of this section.

* * * * *

(d) * * *

(1) * * *

(vii) * * *

(E) Beginning January 1, 2022, for enrollees targeted in paragraph (d)(2) of this section, provide at least annually as part of the comprehensive medication review, a targeted medication review, or other MTM correspondence or service, information about safe disposal of prescription drugs that are controlled substances, drug take back programs, in-home disposal and cost-effective means to safely dispose of such drugs.

(F) The information to be provided under paragraph (d)(1)(vii)(E) of this section must comply with all requirements of § 422.111(j) of this chapter.

(2) *Targeted beneficiaries.* Targeted beneficiaries for the MTMP described in paragraph (d)(1) of this section are enrollees in the sponsor's Part D plan who meet the characteristics of at least one of the following two groups:

(i)(A) Have multiple chronic diseases, with three chronic diseases being the maximum number a Part D plan sponsor may require for targeted enrollment;

(B) Are taking multiple Part D drugs, with eight Part D drugs being the maximum number of drugs a Part D plan sponsor may require for targeted enrollment; and

(C) Are likely to incur the following annual Part D drug costs:

(*1*) For 2011, costs for covered Part D drugs greater than or equal to $3,000.

(*2*) For 2012 and subsequent years, costs for covered Part D drugs in an amount greater than or equal to $3,000 increased by the annual percentage specified in § 423.104(d)(5)(iv); or

(ii) Beginning January 1, 2022, are at-risk beneficiaries as defined in § 423.100.

* * * * *

(f) * * *

(1) *Written policies and procedures.* A sponsor must document its drug management program in written policies and procedures that are approved by the applicable P&T committee and reviewed and updated as appropriate. In the case of a Part D sponsor, including a PACE organization, without its own or a contracted P&T committee because it does not use a formulary, the written policies and procedures described in this section must be approved by the Part D sponsor's medical director as described at § 423.562(a)(5) (or, for a PACE organization, at § 460.60(b)) and applicable clinical and other staff or contractors as determined appropriate by the medical director. These policies and procedures must address all aspects of the sponsor's drug management program, including but not limited to the following:

* * * * *

(3) * * *

(ii) In accordance with paragraphs (f)(9) through (13) of this section, limit an at-risk beneficiary's access to coverage for frequently abused drugs to those that are—

* * * * *

(4) * * *

(A) Except as provided in paragraph (f)(3)(ii)(A) of this section regarding a prescriber limitation, if the sponsor has complied with the requirement of paragraph (f)(2)(i)(C) of this section about attempts to reach prescribers, and the prescribers were not responsive after 3 attempts by the sponsor to contact them within 10 business days, then the sponsor has met the requirement of paragraph (f)(2)(i)(B) of this section for eliciting information from the prescribers.

(5) * * *

(ii) * * *

(C) * * *

(*3*) An explanation of the beneficiary's right to a redetermination if the sponsor issues a determination that the beneficiary is an at-risk beneficiary and the standard and expedited redetermination processes described at §§ 423.582 and 423.584, including notice that if on redetermination the plan sponsor affirms its denial, in whole or in part, the case must be automatically forwarded to the independent review entity contracted with CMS for review and resolution.

* * * * *

(6) * * *

(ii) * * *

(C) * * *

(*4*) An explanation of the beneficiary's right to a redetermination under § 423.580, including all of the following:

(*i*) A description of both the standard and expedited redetermination processes.

(*ii*) The beneficiary's right to, and conditions for, obtaining an expedited redetermination.

(*iii*) Notice that if on redetermination the plan sponsor affirms its denial, in whole or in part, the case must be automatically forwarded to the independent review entity contracted with CMS for review and resolution.

* * * * *

(8) * * *

(i) Subject to paragraph (f)(8)(ii) of this section, a Part D sponsor must provide the second notice described in paragraph (f)(6) of this section or the alternate second notice described in paragraph (f)(7) of this section, as applicable, on a date that is not less than 30 days after the date of the initial notice described in paragraph (f)(5) of this section and not more than the earlier of the following two dates:

(A) The date the sponsor makes the relevant determination.

(B) Sixty days after the date of the initial notice described in paragraph (f)(5) of this section.

* * * * *

(15) * * *

(ii) * * *

(C) Provide information to CMS about any potential at-risk beneficiary or at-risk beneficiary that meets paragraph (2) of the definitions in § 423.100 that a sponsor identifies within 30 days from the date of the most recent CMS report identifying potential at-risk beneficiaries.

(D) Provide information to CMS as soon as possible but no later than 7 days from the date of the initial notice or second notice that the sponsor provided to a beneficiary, or as soon as possible but no later than 7 days from a termination date, as applicable, about a beneficiary-specific opioid claim edit or a limitation on access to coverage for frequently abused drugs.

* * * * *

(16) *Clinical guidelines.* Potential at-risk beneficiaries and at-risk beneficiaries are identified by CMS or a Part D sponsor using clinical guidelines that—

(i) Are developed with stakeholder consultation;

(ii) Are based on:

(1) The acquisition of frequently abused drugs from multiple prescribers, multiple pharmacies, the level of frequently abused drugs used, or any combination of these factors; or

(2) Beginning January 1, 2022, a history of opioid-related overdose as determined by at least one recent claim that contains a principal diagnosis indicating opioid overdose, and at least one recent claim for an opioid medication other than an opioid used for medication assisted therapy (MAT).

(iii) Are derived from expert opinion and an analysis of Medicare data; and

(iv) Include a program size estimate.

(g) *Prescription drug plan sponsors' access to Medicare Parts A and B claims data extracts*— * * *

* * * * *

■ 51. Section 423.182 is amended by revising paragraphs (b)(3)(ii)(A) and (B) to read as follows:

§ 423.182 Part D Prescription Drug Plan Quality Rating System.

* * * * *

(b) * * *

(3) * * *

(ii) * * *

(A)(*1*) For the first year after consolidation, CMS uses enrollment-weighted measure scores using the July enrollment of the measurement period of the consumed and surviving contracts for all measures, except survey-based measures and call center measures. The survey-based measures would use enrollment of the surviving and consumed contracts at the time the sample is pulled for the rating year. The call center measures would use average enrollment during the study period.

(*2*) For contract consolidations approved on or after January 1, 2022, if a measure score for a consumed or surviving contract is missing due to a data integrity issue as described in § 423.184(g)(1)(i) and (ii), CMS assigns a score of zero for the missing measure score in the calculation of the enrollment-weighted measure score.

(B)(*1*) For the second year after consolidation, CMS uses the enrollment-weighted measure scores using the July enrollment of the measurement year of the consumed and surviving contracts for all measures except for CAHPS. CMS ensures that the CAHPS survey sample includes enrollees in the sample frame from both the surviving and consumed contracts.

(*2*) For contract consolidations approved on or after January 1, 2022, for all measures except CAHPS if a measure score for a consumed or surviving contract is missing due to a data integrity issue as described in § 423.184(g)(1)(i) and (ii), CMS assigns a score of zero for the missing measure score in the calculation of the enrollment-weighted measure score.

* * * * *

■ 52. Section 423.184 is amended by revising paragraph (g)(1)(ii)(A) to read as follows:

§ 423.184 Adding, updating, and removing measures.

* * * * *

(g) * * *

(1) * * *

(ii) * * *

(A)(*1*) The data submitted for the Timeliness Monitoring Project (TMP) or audit that aligns with the Star Ratings year measurement period is used to determine the scaled reduction.

(*2*) For contract consolidations approved on or after January 1, 2022, if there is a contract consolidation as described at § 423.182(b)(3), the TMP or audit data are combined for the consumed and surviving contracts before the methodology provided in paragraphs (g)(1)(ii)(B) through (M) of this section is applied.

* * * * *

■ 53. Section 423.186 is amended by adding a sentence to the end of paragraph (i)(6) to read as follows:

§ 423.186 Calculation of Star Ratings.

* * * * *

(i) * * *

(6) * * * Missing data includes data where there is a data integrity issue as defined at § 423.184(g)(1).

* * * * *

■ 54. Section 423.265 is amended by revising paragraph (b)(2) to read as follows:

§ 423.265 Submission of bids and related information.

* * * * *

(b) * * *

(2) *Limit on number of plan offerings.* Potential Part D sponsors' bid submissions may include no more than three stand-alone prescription drug plan offerings in a service area and must include only one basic prescription drug plan offering.

* * * * *

■ 55. Section 423.286 is amended by revising paragraph (d)(4)(ii) to read as follows:

§ 423.286 Rules regarding premiums.

* * * * *

(d) * * *

(4) * * *

(ii) *Calculating the income-related monthly adjustment amount.* The income-related monthly adjustment is equal to the product of the standard base beneficiary premium, as determined under paragraph (c) of this section, and the ratio of the applicable premium percentage specified in 20 CFR 418.2120, reduced by 25.5 percent; divided by 25.5 percent (that is, premium percentage − 25.5 percent)/25.5 percent).

* * * * *

■ 56. Section 423.503 is amended by adding paragraphs (b)(1)(i) and (ii) to read as follows:

§ 423.503 Evaluation and determination procedures for applications to be determined qualified to act as a sponsor.

* * * * *

(b) * * *

(1) * * *

(i) An applicant may be considered to have failed to comply with a contract for purposes of an application denial under paragraph (b)(1) of this section if during the applicable review period the applicant does any of the following:

(A) Was subject to the imposition of an intermediate sanction under to subpart O of this part or a determination by CMS to prohibit the enrollment of new enrollees pursuant to § 423.2410(c).

(B) Failed to maintain a fiscally sound operation consistent with the requirements of § 423.505(b)(23).

(ii) CMS may deny an application submitted by an organization that does not hold a Part D contract at the time of the submission when the applicant's parent organization or another subsidiary of the parent organization meets the criteria for denial stated in paragraph (b)(1)(i) of this section. This paragraph does not apply when the parent completed the acquisition of the subsidiary that meets the criteria within the 24 months preceding the application submission deadline.

* * * * *

■ 57. Section 423.503 is amended by revising paragraph (a)(3) to read as follows:

§ 423.503 Evaluation and determination procedures for applications to be determined qualified to act as a sponsor.

(a) * * *

(3) CMS does not approve an application when it would result in the applicant's parent organization, directly or through its subsidiaries, holding more than one PDP sponsor contract in the PDP Region for which the applicant is seeking qualification as a PDP sponsor.

* * * * *

■ 58. Section 423.504 is amended by adding paragraphs (b)(4)(vi)(G)(*4*) through (*7*) to read as follows:

§ 423.504 General provisions.

* * * * *

(b) * * *

(4) * * *

(vi) * * *

(G) * * *

(*4*) The Part D plan sponsor must have procedures to identify, and must report to CMS or its designee either of the following, in the manner described in paragraphs (b)(4)(vi)(G)(*4*) through (*6*) of this section:

(*i*) Any payment suspension implemented by a plan, pending investigation of credible allegations of fraud by a pharmacy, which must be implemented in the same manner as the

Secretary does under section 1862(o)(1) of the Act.

(*ii*) Any information concerning investigations, credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the plan related to the inappropriate prescribing of opioids.

(*5*) The Part D plan sponsor must submit data, as specified in this section, in the program integrity portal when reporting payment suspensions pending investigations of credible allegations of fraud by pharmacies; information related to the inappropriate prescribing of opioids and concerning investigations and credible evidence of suspicious activities of a provider of services (including a prescriber) or supplier, and other actions taken by the plan sponsor; or if the plan reports a referral, through the portal, of substantiated or suspicious activities of a provider of services (including a prescriber) or a supplier related to fraud, waste or abuse to initiate or assist with investigations conducted by CMS, or its designee, a Medicare program integrity contractor, or law enforcement partners. The data categories, as applicable, include referral information and actions taken by the Part D plan sponsor on the referral. (*6*)(*i*) The plan sponsor is required to notify the Secretary, or its designee, of a payment suspension described in paragraph (b)(4)(vi)(G)(*4*) of this section 7 days prior to implementation of the payment suspension. The MA organization may request an exception to the 7day prior notification to the Secretary, or its designee, if circumstances warrant a reduced reporting time frame, such as potential beneficiary harm.

(*ii*) The plan sponsor is required to submit the information described in paragraph (b)(4)(vi)(G)(*4*)(*ii*) of this section no later than January 30, April 30, July 30, and October 30 of each year for the preceding periods, respectively, of October 1 through December 31, January 1 through March 31, April 1 through June 30, and July 1 through September 30. For the first reporting period (January 30, 2022), the reporting will reflect the data gathered and analyzed for the previous quarter in the calendar year (October 1–December 31).

(*7*)(*i*) CMS provides plan sponsors with data report(s) or links to the information described in paragraphs (b)(4)(vi)(G)(*4*)*(i*) and (*ii*) of this section no later than April 15, July 15, October 15, and January 15 of each year based on the information in the portal, respectively, as of the preceding October 1 through December 31, January 1 through March 31, April 1 through June 30, and July 1 through September 30.

(*ii*) Include administrative actions, pertinent information related to opioid overprescribing, and other data determined appropriate by the Secretary in consultation with stakeholders.

(*iii*) Are anonymized information submitted by plans without identifying the source of such information.

(*iv*) For the first quarterly report (April 15, 2022), that the report reflect the data gathered and analyzed for the previous quarter submitted by the plan sponsors on January 30, 2022.

* * * * *

■ 59. Section 423.505 is amended by revising paragraph (b)(22) to read as follows:

§ 423.505 Contract provisions.

* * * * *

(b) * * *

(22) Through the CMS complaint tracking system, address and resolve complaints received by CMS against the MA organization.

* * * * *

■ 60. Section 423.514 is amended by redesignating paragraph (a)(5) as paragraph (a)(6) and adding a new paragraph (a)(5) to read as follows:

§ 423.514 Validation of Part D reporting requirements.

(a) * * *

(5) Pharmacy performance measures.

* * * * *

■ 61. Section 423.551 is amended by revising paragraph (g)(2) to read as follows:

§ 423.551 General provisions.

* * * * *

(g) * * *

(2) CMS does not recognize or allow a sale or transfer that consists solely of the sale or transfer of individual beneficiaries or groups of beneficiaries enrolled in a plan benefit package.

* * * * *

■ 62. Section 423.560 is amended by—

■ a. Removing the definition of ''Appointed representative'';

■ b. Adding the definition of ''Representative'' in alphabetical order; and

■ c. Revising the definition of ''Specialty tier''.

The addition and revision read as follows:

§ 423.560 Definitions.

* * * * *

Representative means an individual either appointed by an enrollee or authorized under State or other applicable law to act on behalf of the enrollee in filing a grievance, obtaining a coverage determination, or in dealing with any of the levels of the appeals process. Unless otherwise stated in this subpart, the representative has all of the rights and responsibilities of an enrollee in filing a grievance, obtaining a coverage determination, or in dealing with any of the levels of the appeals process, subject to the rules described in part 422, subpart M, of this chapter.

Specialty tier: (1) Before January 1, 2022, means a formulary cost-sharing tier dedicated to very high cost Part D drugs that exceed a cost threshold established by the Secretary; and

(2) Beginning January 1, 2022, has the meaning given the term in § 423.104.

■ 63. Section 423.566 is amended by revising paragraph (c)(2) to read as follows:

§ 423.566 Coverage determinations.

* * * * *

(c) * * *

(2) The enrollee's representative, on behalf of the enrollee; or

* * * * *

■ 64. Section 423.568 is amended by adding paragraphs (i) through (m) to read as follows:

§ 423.568 Standard timeframe and notice requirements for coverage determinations.

* * * * *

(i) *Dismissing a request.* The Part D plan sponsor dismisses a coverage determination request, either entirely or as to any stated issue, under any of the following circumstances:

(1) When the individual making the request is not permitted to request a coverage determination under § 423.566(c).

(2) When the Part D plan sponsor determines the party failed to make out a valid request for a coverage determination that substantially complies with paragraph (a) of this section.

(3) When an enrollee or the enrollee's representative files a request for a coverage determination, but the enrollee dies while the request is pending, and both of the following criteria apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) The enrollee's representative, if any, does not wish to pursue the request for coverage.

(4) When a party filing the coverage determination request submits a timely request for withdrawal of the request for a coverage determination with the Part D plan sponsor.

(j) *Notice of dismissal.* The Part D plan must mail or otherwise transmit a written notice of the dismissal of the

coverage determination request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) The right to request that the MA organization vacate the dismissal action.

(3) The right to request reconsideration of the dismissal.

(k) *Vacating a dismissal.* If good cause is established, the Part D plan sponsor may vacate its dismissal of a request for redetermination within 6 months from the date of the notice of dismissal.

(*l*) *Effect of dismissal.* The Part D plan sponsor's dismissal is binding unless it is modified or reversed by the Part D plan sponsor or vacated under paragraph (k) of this section.

(m) *Withdrawing a request.* A party that requests a coverage determination may withdraw its request at any time before the decision is issued by filing a request with the Part D plan sponsor.

■ 65. Section 423.570 is amended by adding paragraph (f) to read as follows:

§ 423.570 Expediting certain coverage determinations.

* * * * *

(f) *Dismissing a request.* The Part D plan sponsor dismisses an expedited coverage determination in accordance with § 423.568.

■ 66. Section 423.578 is amended—

■ a. By revising paragraph (a)(6)(iii); and

■ b. In paragraph (b)(4) by removing the phrase ''the enrollee's appointed representative'' and adding in its place the phrase ''the enrollee's representative''.

The revision reads as follows:

§ 423.578 Exceptions process.

(a) * * *

(6) * * *

(iii)(A) Before January 1, 2022, if a Part D plan sponsor maintains a specialty tier, as defined in § 423.560, the Part D sponsor may design its exception process so that Part D drugs on the specialty tier are not eligible for a tiering exception.

(B) Beginning January 1, 2022, if a Part D sponsor maintains one or two specialty tiers, as defined in § 423.104, the Part D sponsor may design its exception process so that Part D drugs on the specialty tier(s) are not eligible for tiering exception(s) to non-specialty tiers.

* * * * *

■ 67. Section 423.582 is amended—

■ a. In paragraph (d) by removing the word ''written'' and

■ b. By adding paragraphs (e) through (h).

The additions read as follows:

§ 423.582 Request for a standard redetermination.

* * * * *

(e) *Dismissing a request.* A Part D plan sponsor dismisses a redetermination request, either entirely or as to any stated issue, under any of the following circumstances:

(1) When the person or entity requesting a redetermination is not a proper party under § 423.580.

(2) When the Part D plan sponsor determines the party failed to make out a valid request for redetermination that substantially complies with paragraph (a) of this section.

(3) When the party fails to file the redetermination request within the proper filing time frame in accordance with paragraph (b) of this section.

(4) When the enrollee or the enrollee's representative files a request for redetermination, but the enrollee dies while the request is pending, and both of the following criteria apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) The enrollee's representative, if any, does not wish to pursue the request for coverage.

(5) When a party filing the redetermination request submits a timely request for withdrawal of the request for a redetermination with the Part D plan sponsor.

(f) *Notice of dismissal.* The Part D plan sponsor must mail or otherwise transmit a written notice of the dismissal of the redetermination request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) The right to request that the Part D plan sponsor vacate the dismissal action.

(3) The right to request review of the dismissal by the independent entity.

(g) *Vacating a dismissal.* If good cause is established, a Part D sponsor may vacate its dismissal of a request for redetermination within 6 months from the date of the notice of dismissal.

(h) *Effect of dismissal.* The dismissal of a request for redetermination is binding unless the enrollee or other party requests review by the IRE or the decision is vacated under paragraph (g) of this section.

■ 68. Section 423.584 is amended by adding paragraph (f) to read as follows:

§ 423.584 Expediting certain redeterminations.

* * * * *

(f) *Dismissing a request.* The Part D plan sponsor dismisses an expedited redetermination in accordance with § 423.582.

■ 69. Section 423.590 is amended by adding paragraphs (i) and (j) to read as follows:

§ 423.590 Timeframes and responsibility for making redeterminations.

* * * * *

(i) *Automatic forwarding of redeterminations made under a drug management program.* If on redetermination the plan sponsor affirms, in whole or in part, its denial related to an at-risk determination under a drug management program in accordance with § 423.153(f), the Part D plan sponsor must forward the case to the IRE contracted with CMS within 24 hours of the expiration of the applicable adjudication timeframe under paragraph (a)(2), (b)(2), or (d)(1) of this section.

(j) *Requests for review of a dismissal by the independent entity.* If the Part D plan sponsor dismisses a request for a reconsideration in accordance with § 423.582(e) or § 423.584(f), the enrollee or other proper party has the right to request review of the dismissal by the independent entity. A request for review of a dismissal must be filed in writing with the independent entity within 60 calendar days from the date of the Part D plan sponsor's dismissal notice.

■ 70. Section 423.600 is amended by—

■ a. Revising paragraph (b); and

■ b. Adding paragraphs (f) through (k).

The revision and additions read as follows:

§ 423.600 Reconsideration by an independent review entity (IRE).

* * * * *

(b) When an enrollee, or an enrollee's prescribing physician or other prescriber (acting on behalf of the enrollee), files an appeal or a determination is forwarded to the IRE by a Part D plan sponsor, the IRE is required to solicit the views of the prescribing physician or other prescriber.

(1) The IRE may solicit the views of the prescribing physician or other prescriber orally or in writing.

(2) A written account of the prescribing physician's or other prescriber's views (prepared by either the prescribing physician, other prescriber, or IRE, as appropriate) must be contained in the IRE record.

* * * * *

(f) The party who files a request for reconsideration may withdraw it by filing a request with the IRE.

(g) The independent entity dismisses a reconsideration request, either entirely or as to any stated issue, under any of the following circumstances:

(1) When the person or entity requesting a reconsideration is not a

proper party under paragraph (a) of this section.

(2) When the IRE determines the party failed to make out a valid request for reconsideration that substantially complies with paragraph (a) of this section.

(3) When the party fails to file the reconsideration request within the proper filing time frame in accordance with paragraph (a) of this section.

(4) When an enrollee or the enrollee's representative files a request for reconsideration, but the enrollee dies while the request is pending, and both of the following criteria apply:

(i) The enrollee's surviving spouse or estate has no remaining financial interest in the case.

(ii) The enrollee's representative, if any, does not wish to continue the appeal.

(5) When a party filing the reconsideration request submits a timely request for withdrawal of the request for a reconsideration with the IRE.

(h) The IRE mails or otherwise transmits a written notice of the dismissal of the reconsideration request to the parties. The notice must state all of the following:

(1) The reason for the dismissal.

(2) That there is a right to request that the IRE vacate the dismissal action.

(3) The right to a review of the dismissal in accordance with § 423.2004.

(i) If good cause is established, the IRE may vacate its dismissal of a request for redetermination within 6 months from the date of the notice of dismissal.

(j) An enrollee has a right to have an IRE's dismissal reconsidered in accordance with § 423.2004.

(k) If the IRE determines that the Part D plan sponsor's dismissal was in error, the IRE vacates the dismissal and remands the case to the Part D plan sponsor for reconsideration consistent with § 423.590. The IRE's decision regarding an Part D plan sponsor's dismissal, including a decision to deny a request for review of a dismissal, is binding and not subject to further review.

■ 71. Section 423.760 is amended by—

■ a. Redesignating paragraphs (b)(3) and (4) as paragraphs (b)(4) and (5); and

■ b. Adding a new paragraph (b)(3).

The addition reads as follows:

§ 423.760 Determinations regarding the amount of civil money penalties and assessments imposed by CMS.

* * * * *

(b) * * *

(3) CMS calculates the minimum penalty amounts under paragraphs (b)(1) and (2) of this section using the following criteria:

(i) *Definitions for calculating penalty amounts*—(A) *Per determination.* The penalty amounts calculated under paragraph (b)(1) of this section.

(B) *Per enrollee.* The penalty amounts calculated under paragraph (b)(2) of this section.

(C) *Standard minimum penalty.* The per enrollee or per determination amount that is dependent on the type of adverse impact that occurred.

(D) *Aggravating factor(s).* Specific penalty amounts that may increase the per enrollee or per determination standard minimum penalty and are determined based on criteria under paragraph (a) of this section.

(E) *Cost-of-living multiplier.* The percent change between each year's published October consumer price index for all urban consumers (United States city average), which is released by the Office of Management and Budget (OMB) annually.

(ii) *Calculation of penalty amounts.* (A) Per determination and per enrollee penalty amounts are increased by multiplying the current standard minimum penalty and aggravating factor amounts by the cost-of-living multiplier.

(B) The minimum penalty and aggravating factor amounts will be updated no more often than every 3 years.

(C) CMS tracks the calculation and accrual of the standard minimum penalty and aggravating factor amounts and announce them on an annual basis.

* * * * *

■ 72. Section 423.2006 is amended by redesignating paragraphs (c)(1) and (2) as paragraphs (c)(2) and (3) and adding a new paragraph (c)(1) to read as follows:

§ 423.2006 Amount in controversy required for an ALJ hearing and judicial review.

* * * * *

(c) * * *

(1) The amount remaining in controversy is computed as the projected value described in paragraph (c)(2) or (3) of this section, reduced by any cost sharing amounts, including deductible, coinsurance, or copayment amounts that may be collected from the enrollee for the Part D drug(s).

* * * * *

§ 423.2014 [Amended]

■ 73. Section 423.2014 is amended in paragraph (a)(1)(ii) by removing the phrase ''appointed representative'' and adding in its place the phrase ''representative''.

§ 423.2036 [Amended]

■ 74. Section 423.2036 is amended in paragraphs (c) and (d) by removing the phrase ''appointed representative'' and adding in its place the phrase ''representative'' each time it appears.

■ 75. Section 423.2260 is revised to read as follows:

§ 423.2260 Definitions.

The definitions in this section apply for this subpart unless the context indicates otherwise.

Advertisement (Ad) means a read, written, visual, oral, watched, or heard bid for, or call to attention. Advertisements can be considered communication or marketing based on the intent and content of the message.

Alternate format means used to convey information to individuals with visual, speech, physical, hearing, and intellectual disabilities (for example, braille, large print, audio).

Banner means a type of advertisement feature typically used in television ads that is intended to be brief, and flashes limited information across a screen for the sole purpose of enticing a prospective enrollee to contact the Part D sponsor (for example, obtain more information) or to alert the viewer that information is forthcoming.

Banner-like advertisement is an advertisement that uses a banner-like feature, that is typically found in some media other than television (for example, outdoors and on the internet).

Communications means activities and use of materials created or administered by the Part D sponsor or any downstream entity to provide information to current and prospective enrollees. Marketing is a subset of communications.

Marketing means communications materials and activities that meet both the following standards for intent and content:

(1) Intended, as determined under paragraph (1)(ii) of this definition, to do any of the following:

(i)(A) Draw a beneficiary's attention to a Part D plan or plans.

(B) Influence a beneficiary's decision making process when making a Part D plan selection.

(C) Influence a beneficiary's decision to stay enrolled in a Part D plan (that is, retention-based marketing).

(ii) In evaluating the intent of an activity or material, CMS will consider objective information including, but not limited to, the audience of the activity or material, other information communicated by the activity or material, timing, and other context of the activity or material and is not

limited to the Part D sponsor's stated intent.

(2) Include or address content regarding any of the following:

(i) The plan's benefits, benefits structure, premiums or cost sharing.

(ii) Measuring or ranking standards (for example, Star Ratings or plan comparisons).

Outdoor advertising (ODA) means outdoor material intended to capture the attention of a passing audience (for example, billboards, signs attached to transportation vehicles). ODA may be a communication or marketing material.

■ 76. Section 423.2261 is added to read as follows:

§ 423.2261 Submission, review, and distribution of materials.

(a) *General requirements.* Part D sponsors must submit all marketing materials, all election forms, and certain designated communications materials for CMS review.

(1) The Health Plan Management System (HPMS) Marketing Module is the primary system of record for the collection, review, and storage of materials that must be submitted for review.

(2) Materials must be submitted to the HPMS Marketing Module by the Part D sponsor.

(3) Unless specified by CMS, third party and downstream entities are not permitted to submit materials directly to CMS.

(b) *CMS review of marketing materials and election forms.* Part D sponsors may not distribute or otherwise make available any marketing materials or election forms unless one of the following occurs:

(1) CMS has reviewed and approved the material.

(2) The material has been deemed approved; that is, CMS has not rendered a disposition for the material within 45 days (or 10 days if using CMS model or standardized marketing materials as outlined in § 422.2267(e) of this chapter) of submission to CMS.

(3) The material has been accepted under File and Use, as follows:

(i) The Part D sponsor may distribute certain types of marketing materials, designated by CMS based on the material's content, audience, and intended use, as they apply to potential risk to the beneficiary, 5 days following the submission.

(ii) The Part D sponsor must certify that the material meets all applicable CMS communications and marketing requirements in §§ 423.2260 through 423.2267.

(c) *CMS review of non-marketing communications materials.* CMS does not require submission, or submission and approval, of communications materials prior to use, other than the following exceptions.

(1) Certain designated communications materials that are critical to beneficiaries understanding or accessing their benefits (for example, the Evidence of Coverage (EOC).

(2) Communications materials that, based on feedback such as complaints or data gathered through reviews, warrant additional oversight as determined by CMS, to ensure the information being received by beneficiaries is accurate.

(d) *Standards for CMS review.* CMS reviews materials to ensure the following:

(1) Compliance with all applicable requirements under §§ 423.2260 through 423.2267.

(2) Benefit and cost information is an accurate reflection of what is contained in the Part D sponsor's bid.

(3) CMS may determine, upon review of such materials, that the materials must be modified, or may no longer be used.

■ 77. Section 423.2262 is revised to read as follows:

§ 423.2262 General communications materials and activity requirements.

Part D sponsors may not mislead, confuse, or provide materially inaccurate information to current or potential enrollees.

(a) *General rules.* Part D sponsors must ensure their statements and the terminology used in communications activities and materials adhere to the following requirements:

(1) Part D sponsors may not do any of the following:

(i) Provide information that is inaccurate or misleading.

(ii) Make unsubstantiated statements except when used in logos or taglines.

(iii) Engage in activities that could mislead or confuse Medicare beneficiaries, or misrepresent the Part D sponsor.

(iv) Engage in any discriminatory activity such as attempting to recruit Medicare beneficiaries from higher income areas without making comparable efforts to enroll Medicare beneficiaries from lower income areas, or vice versa.

(v) Target potential enrollees based on higher or lower income levels.

(vi) Target potential enrollees based on health status.

(vii) State or imply plans are only available to seniors rather than to all Medicare beneficiaries.

(viii) Employ Part D plan names that suggest that a plan is not available to all Medicare beneficiaries.

(ix) Display the names or logos or both of co-branded network pharmacies on the sponsor's member identification card, unless the pharmacy names or logos or both are related to the member selection of specific pharmacies.

(x) Use a plan name that does not include the plan type. The plan type should be included at the end of the plan name, for example, ''Super Medicare Drug Plan (PDP)''. Part D sponsors are not required to repeat the plan type when the plan name is used multiple times in the same material.

(xi) Claim they are recommended or endorsed by CMS, Medicare, the Secretary, or HHS.

(xii) Convey that a failure to pay premium will not result in disenrollment except for factually accurate descriptions of the PDP sponsor's policies adopted in accordance with § 423.44(b)(1) and (d)(1) of this chapter.

(xiii) Use the term ''free'' to describe a $0 premium, any type of reduction in premium, reduction in deductibles or cost sharing, low-income subsidy, or cost sharing pertaining to dual eligible individuals.

(xiv) State or imply a plan is available only to or is designed for Medicaid beneficiaries.

(xv) Market a Part D plan not designed to serve dual eligible beneficiaries as if it were a plan designed to serve dual eligible beneficiaries.

(xvi) Target marketing efforts primarily to dual eligible individuals.

(xvii) Claim a relationship with the state Medicaid agency, unless a contract to coordinate Medicaid services for enrollees in that plan is in place.

(2) Part D sponsors may do the following:

(i) State that the Part D sponsor is approved to participate in Medicare programs or is contracted to administer Medicare benefits or both.

(ii) Use the term ''Medicare-approved'' to describe benefits or services in materials or both.

(b) *Product endorsements and testimonials.* (1) Product endorsements and testimonials may take any of the following forms:

(i) Television or video ads.

(ii) Radio ads.

(iii) Print ads.

(iv) Social media ads. In cases of social media, the use of a previous post, whether or not associated with or originated by the Part D sponsor, is considered a product endorsement or testimonial.

(v) Other types of ads.

(2) Part D sponsors may use individuals to endorse the Part D sponsor's product provided the

endorsement or testimonial adheres to the following requirements:

(i) The speaker must identify the Part D sponsor's product or company by name.

(ii) Medicare beneficiaries endorsing or promoting the Part D sponsor must have been an enrollee at the time the endorsement or testimonial was created.

(iii) The endorsement or testimonial must clearly state that the individual was paid for the endorsement or testimonial, if applicable.

(iv) If an individual is used (for example, an actor) to portray a real or fictitious situation, the advertisement must state that it is an actor portrayal.

(c) *Requirements when including certain telephone numbers in materials.* (1) Part D sponsors must adhere to the following requirements for including certain telephone numbers in materials:

(i) When a Part D sponsor includes its customer service number, the hours of operation must be prominently included at least once.

(ii) When a Part D sponsor includes its customer service number, it must provide a toll-free TTY number in conjunction with the customer service number in the same font size.

(iii) On every material where 1–800–MEDICARE or Medicare TTY appears, the Part D sponsor must prominently include, at least once, the hours and days of operation for 1–800–MEDICARE (that is, 24 hours a day/7 days a week).

(2) The following advertisement types are exempt from these requirements:

(i) Outdoor advertising.

(ii) Banners or banner-like ads.

(iii) Radio advertisements and sponsorships.

(d) *Standardized material identification (SMID).* (1) Part D sponsors must use a standardized method of identification for oversight and tracking of materials received by beneficiaries.

(2) The SMID consists of the following three parts:

(i) The Part D sponsor's contract or Multi-Contract Entity (MCE) number, (that is, ''S'' for PDPs, or ''Y'' for MCE, a means of identification available for Plans/Part D sponsors that have multiple PDP contracts) followed by an underscore, except that the SMID for multi-plan marketing materials must begin with the word ''MULTI-PLAN'' instead of the Part D sponsor's contract number (for example, S1234_abc123_C or MULTI-PLAN_efg456_M).

(ii) A series of alpha numeric characters (at the Part D sponsor's discretion) unique to the material followed by an underscore.

(iii) An uppercase ''C'' for communication materials or an uppercase ''M'' for marketing materials (for example, S1234_abc123_C or S5678_efg456_M).

(3) The SMID is required on all materials except the following:

(i) Membership ID card.

(ii) Envelopes, radio ads, outdoor advertisements, banners, banner-like ads, and social media comments and posts.

(iii) OMB-approved forms/documents, except those materials specified in § 423.2267.

(iv) Corporate notices or forms (that is, not Part D-specific) meeting the definition of communications such as privacy notices and authorization to disclose protected health information (PHI).

(v) Agent-developed communications materials that are not marketing.

(4) Non-English and alternate format materials, based on previously created materials, may have the same SMID as the material on which they are based.

■ 78. Section 423.2263 is added to read as follows.

§ 423.2263 General marketing requirements.

Marketing is a subset of communications and therefore must follow the requirements outlined in § 423.2262 as well as this section. Marketing (as defined in § 423.2260) must additionally meet the following requirements:

(a) Part D sponsors may begin marketing prospective plan year offerings on October 1 of each year for the following contract year. Part D sponsors may market the current and prospective year simultaneously provided materials clearly indicate what year is being discussed.

(b) In marketing, Part D sponsors may not do any of the following:

(1) Provide cash or other monetary rebates as an inducement for enrollment or otherwise.

(2) Offer gifts to beneficiaries, unless the gifts are of nominal value (as governed by guidance published by the HHS OIG), are offered to similarly situated beneficiaries without regard to whether or not the beneficiary enrolls, and are not in the form of cash or other monetary rebates.

(3) Provide meals to potential enrollees regardless of value.

(4) Market non-health care related products to prospective enrollees during any Part D sales activity or presentation. This is considered cross-selling and is prohibited.

(5) Compare their plan to other plans, unless the information is accurate, not misleading, and can be supported by the Part D sponsor making the comparison.

(6) Display the names or logos or both of pharmacy co-branding partners on marketing materials, unless the materials clearly indicate via a disclaimer or in the body that ''Other pharmacies are available in the network.''

(7) Knowingly target or send unsolicited marketing materials to any Part D enrollee during the Open Enrollment Period (OEP).

(i) During the OEP, a Part D sponsors may do any of the following:

(A) Conduct marketing activities that focus on other enrollment opportunities, including but not limited to marketing to age-ins (who have not yet made an enrollment decision), marketing by 5-star plans regarding their continuous enrollment special election period (SEP), and marketing to dual-eligible and LIS beneficiaries who, in general, may make changes once per calendar quarter during the first nine months of the year;

(B) Send marketing materials when a beneficiary makes a proactive request;

(C) At the beneficiary's request, have one-on-one meetings with a sales agent;

(D) At the beneficiary's request, provide information on the OEP through the call center; and

(E) Include educational information, excluding marketing, on the Part D sponsor's website about the existence of OEP.

(ii) During the OEP, a Part D sponsors may not:

(A) Send unsolicited materials advertising the ability or opportunity to make an additional enrollment change or referencing the OEP;

(B) Specifically target beneficiaries who are in the OEP because they made a choice during Annual Enrollment Period (AEP) by purchase of mailing lists or other means of identification;

(C) Engage in or promote agent or broker activities that intend to target the OEP as an opportunity to make further sales; or

(D) Call or otherwise contact former enrollees who have selected a new plan during the AEP.

(c) The following requirements apply to how Part D sponsors must display CMS-issued Star Ratings:

(1) References to individual Star Rating measure(s) must also include references to the overall Star Rating for MA–PDs and the summary rating for PDP plans.

(2) May not use an individual underlying category, domain, or measure rating to imply overall higher Star Ratings.

(3) Must be clear that the rating is out of 5 stars.

(4) Must clearly identify the Star Ratings contract year.

(5) May only market the Star Ratings in the service area(s) for which the Star Rating is applicable unless using Star Ratings to convey overall Part D sponsor performance (for example, ''Plan X has achieved 4.5 stars in Montgomery, Chester, and Delaware Counties), in which case the Part D sponsor must do so in a way that is not confusing or misleading.

(6) The following requirements apply to all 5 Star PDP contracts:

(i) May not market the 5-star special enrollment period, as defined in § 423.38(c)(20), after November 30 of each year if the contract has not received an overall 5 star for the next contract year.

(ii) May use CMS' 5- star icon or may create their own icon.

(7) The following requirements apply to all Low Performing MA contracts:

(i) The Low Performing Icon must be included on all materials about or referencing the specific contract's Star Ratings.

(ii) Must state the Low Performing Icon means that the Part D sponsor's contract received a summary rating of 2.5 stars or below in Part D for the last 3 years.

(iii) May not attempt to refute or minimize Low Performing Status.

■ 79. Section 423.2264 is revised to read as follows:

§ 423.2264 Beneficiary contact.

For the purpose of this section, beneficiary contact means any outreach activities to a beneficiary or a beneficiary's caregivers by the Part D sponsor or its agents and brokers.

(a) *Unsolicited contact.* Subject to the rules for contact for plan business in paragraph (b) of this section, the following rules apply when materials or activities are given or supplied to a beneficiary or their caregiver without prior request:

(1) Part D sponsors may make unsolicited direct contact by conventional mail and other print media (for example, advertisements and direct mail) or email (provided every email contains an opt-out option).

(2) Part D sponsors may not do any of the following if unsolicited:

(i) Use door to door solicitation, including leaving information of any kind, except that information may be left when an appointment is pre-scheduled but the beneficiary is not home.

(ii) Approach enrollees in common areas such as parking lots, hallways, lobbies.

(iii) Send direct messages from social media platforms.

(iv) Use telephone solicitation (that is, cold calling), robocalls, text messages, or voicemail messages, including, but not limited to, the following:

(A) Calls based on referrals.

(B) Calls to former enrollees who have disenrolled or those in the process of disenrolling, except to conduct disenrollment surveys for quality improvement purposes.

(C) Calls to beneficiaries who attended a sales event, unless the beneficiary gave express permission to be contacted.

(D) Calls to prospective enrollees to confirm receipt of mailed information.

(3) Calls are not considered unsolicited if the beneficiary provides consent or initiates contact with the plan. For example, returning phone calls or calling an individual who has completed a business reply card requesting contact is not considered unsolicited.

(b) *Contact for plan business.* Part D sponsors may contact current, and to a more limited extent, former members, including those enrolled in other products offered by the parent organization, to discuss plan business, in accordance with the following requirements:

(1) A Part D sponsor may conduct the following activities as plan business:

(i) Call current enrollees, including those in non-Medicare products, to discuss Medicare products. Examples of such calls include, but are not limited to the following:

(A) Enrollees aging into Medicare from commercial products.

(B) Existing enrollees, including Medicaid enrollees, to discuss other Medicare products or plan benefits.

(C) Members in an MA or cost plan to discuss other Medicare products.

(ii) Call beneficiaries who submit enrollment applications to conduct business related to enrollment.

(iii) With prior CMS approval, call LIS enrollees that a plan is prospectively losing due to reassignment. CMS decisions to approve calls are for limited circumstances based on the following:

(A) The proximity of cost of the losing plan as compared to the national benchmark; and

(B) The selection of plans in the service area that are below the benchmark.

(iv) Agents/brokers calling clients who are enrolled in other products they may sell, such as automotive or home insurance.

(v) Part D sponsors may not make unsolicited calls about other lines of business as a means of generating leads for Medicare plans.

(2) When reaching out to a beneficiary regarding plan business, as outlined in this section, Part D sponsor must offer the beneficiary the ability to opt out of future calls regarding plan business.

(c) *Events with beneficiaries.* Part D sponsors and their agent or brokers may hold educational events, marketing or sales events, and personal marketing appointments to meet with Medicare beneficiaries, either face-to-face or virtually. The requirements for each type of event are as follows:

(1) Educational events must be advertised as such and be designed to generally inform beneficiaries about Medicare, including Medicare Advantage, Prescription Drug programs, or any other Medicare program.

(i) At educational events, Part D sponsors and agents/brokers may not market specific Part D sponsors or benefits.

(ii) Part D sponsors holding or participating in educational events may do any of the following:

(A) Distribute communication materials.

(B) Answer beneficiary initiated questions pertaining to Part D plans.

(C) Set up future personal marketing appointments.

(D) Distribute business cards.

(E) Obtain beneficiary contact information, including Scope of Appointment forms.

(iii) Part D sponsors holding or participating in educational events may not conduct sales or marketing presentations or distribute or accept plan applications.

(iv) Part D sponsors may schedule appointments with residents of long-term care facilities (for example, nursing homes, assisted living facilities, board and care homes) upon a resident's request. If a resident did not request an appointment, any visit by an agent or broker is prohibited as unsolicited door-to-door marketing.

(2) Marketing or sales events are group events that fall within the definition of marketing at § 423.2260.

(i) If a marketing event directly follows an educational event, the beneficiary must be made aware of the change and given the opportunity to leave prior to the marketing event beginning.

(ii) Part D sponsors holding or participating in marketing events may do any of the following:

(A) Provide marketing materials.

(B) Distribute and accept plan applications.

(C) Collect Scope of Appointment forms for future personal marketing appointments.

(D) Conduct marketing presentations.

(iii) Part D sponsors holding or participating in marketing events may not do any of the following:

(A) Require sign in sheets or require attendees to provide contact information as a prerequisite for attending an event.

(B) Conduct activities, including health screenings, health surveys, or other activities that are used for or could be viewed as being used to target a subset of members (that is ''cherry-picking'').

(C) Use information collected for raffles or drawings for any purpose other than raffles or drawings.

(3) Personal marketing appointments are those appointments that are tailored to an individual or small group (for example, a married couple). Personal marketing appointments are not defined by the location.

(i) Prior to the personal marketing appointment beginning, the Part D sponsor (or the agent or broker, as applicable) must agree upon and record the Scope of Appointment with the beneficiary(ies).

(ii) Part D sponsors holding a personal marketing appointment may do any of the following:

(A) Provide marketing materials.

(B) Distribute and accept plan applications.

(C) Conduct marketing presentations.

(D) Review the individual needs of the beneficiary including, but not limited to, health care needs and history, commonly used medications, and financial concerns.

(iii) Part D sponsors holding a personal marketing appointment may not do any of the following:

(A) Market any health care related product during a marketing appointment beyond the scope agreed upon by the beneficiary, and documented by the plan, prior to the appointment.

(B) Market additional health related lines of plan business not identified prior to an individual appointment without a separate scope of appointment identifying the additional lines of business to be discussed.

(C) Market non-health related products such as annuities.

■ 80. Section 423.2265 is added to read as follows:

§ 423.2265 Websites.

As required under § 423.128(d)(2), Part D sponsors must have a website.

(a) *General website requirements.* (1) Part D sponsor websites must meet all of the following requirements:

(i) Maintain current year contract content through December 31 of each year.

(ii) Notify users when they will leave the Part D sponsor's Medicare site.

(iii) Include or provide access to (for example, through a hyperlink) applicable notices, statements, disclosures, or disclaimers with corresponding content. Overarching disclaimers, such as the Federal Contracting Statement, are not required on every page.

(iv) Reflect the most current information within 30 days of any material change

(v) Keep PDP content separate and distinct from other lines of business, including Medicare Supplemental Plans.

(2) Part D sponsor websites may not do any of the following:

(i) Require beneficiaries to enter any information other than zip code, county, or state for access to non-beneficiary-specific website content.

(ii) Provide links to foreign drug sales, including advertising links.

(iii) State that the Part D sponsor is not responsible for the content of their social media pages or the website of any first tier, downstream, or related entity that provides information on behalf of the Part D sponsor.

(b) *Required content.* A Part D sponsor's websites must include the following content:

(1) A toll-free customer service number, TTY number, and days and hours of operation.

(2) A physical or Post Office Box address.

(3) A PDF or copy of a printable pharmacy directory.

(4) A searchable pharmacy directory.

(5) A searchable formulary.

(6) Information on enrollees' and Part D sponsors' rights and responsibilities upon disenrollment. Part D sponsors may either post this information or provide specific information on where it is located in the Evidence of Coverage together with a link to that document.

(7) A description of and information on how to file a grievance, request an organization determination, and an appeal.

(8) Prominently displayed link to the *Medicare.gov* electronic complaint.

(9) A Notice of Privacy Practices as required under the HIPAA Privacy Rule (45 CFR 164.520).

(10) Prescription Drug Transition Policy.

(11) LIS Premium Summary Chart.

(12) Prescription Drug Transition Policy.

(13) A separate section or page about MTM programs providing the following:

(i) Explanation of MTM program, including eligibility requirements, the purpose and benefits of MTM, how to obtain MTM service documents including the Medication list, that the service is free, and a summary of services.

(ii) Information on how to obtain information about the MTM program, including how the member will know they are eligible and enrolled into the MTM program, the comprehensive medication review and targeted medication reviews, a description of how reviews are conducted and delivered, including time commitments and materials beneficiaries will receive.

(c) *Required posted materials.* A Part D sponsor's website must provide access to the following materials, in a printable format, within the timeframes specified in paragraphs (c)(1) and (2) of this section.

(1) The following materials for each plan year must be posted on the website by October 15 prior to the beginning of the plan year:

(i) Evidence of Coverage.

(ii) Annual Notice of Change (for renewing plans).

(iii) Summary of Benefits.

(iv) Pharmacy Directory.

(v) Formulary.

(vi) Utilization Management Forms for physicians and enrollees.

(2) The following materials must be posted on the website throughout the year and be updated as required:

(i) Prior Authorization Forms for Physicians and Enrollees.

(ii) Part D Model Coverage Determination and Redetermination Request Forms.

(iii) Exception request forms for physicians (which must be posted by January 1 for new plans).

(iv) CMS Star Ratings document, which must be posted within 21 days after its release on the Medicare Plan Finder.

■ 81. Section 423.2266 is added to read as follows:

§ 423.2266 Activities with healthcare providers or in the healthcare setting.

(a) *Where marketing is prohibited.* The requirements in paragraphs (c) through (e) of this section apply to activities in the health care setting. Marketing activities and materials are not permitted in areas where care is being administered, including but not limited to the following:

(1) Exam rooms.

(2) Hospital patient rooms.

(3) Treatment areas where patients interact with a provider and his/her clinical team and receive treatment (including such areas in dialysis treatment facilities).

(4) Pharmacy counter areas.

(b) *Where marketing is permitted.* Marketing activities and materials are permitted in common areas within the health care setting, including the following:

(1) Common entryways.
(2) Vestibules.
(3) Waiting rooms.
(4) Hospital or nursing home cafeterias.
(5) Community, recreational, or conference rooms.

(c) *Provider-initiated activities.* Provider-initiated activities are activities conducted by a provider at the request of the patient, or as a matter of a course of treatment, and occur when meeting with the patient as part of the professional relationship between the provider and patient. Provider-initiated activities do not include activities conducted at the request of the Part D sponsor or pursuant to the network participation agreement between the Part D sponsor and the provider. Provider-initiated activities that meet this definition in this paragraph (c) fall outside of the definition of marketing in § 423.2260. Permissible provider-initiated activities include:

(1) Distributing unaltered, printed materials created by CMS, such as reports from Medicare Plan Finder, the ''Medicare & You'' handbook, or ''Medicare Options Compare'' (from *https://www.medicare.gov*) including in areas where care is delivered.

(2) Providing the names of Part D sponsors with which they contract or participate or both.

(3) Answering questions or discussing the merits of a Part D plan or plans, including cost sharing and benefit information including in areas where care is delivered.

(4) Referring patients to other sources of information, such as State Health Insurance Assistance Program (SHIP) representatives, plan marketing representatives, State Medicaid Office, local Social Security Offices, CMS' website at *https://www.medicare.gov,* or 1–800–MEDICARE.

(5) Referring patients to Part D marketing materials available in common areas.

(6) Providing information and assistance in applying for the LIS.

(7) Announcing new or continuing affiliations with Part D sponsors, once a contractual agreement is signed. Announcements may be made through any means of distribution.

(d) *Plan-initiated provider activities.* Plan-initiated provider activities are those activities conducted by a provider at the request of a Part D sponsor. During a plan-initiated provider activity, the provider is acting on behalf of the Part D sponsor. For the purpose of plan-initiated activities, the Part D sponsor is responsible for compliance with all applicable regulatory requirements.

(1) During plan-initiated provider activities, Part D sponsors must ensure that the provider does not:

(i) Accept/collect scope of appointment forms.

(ii) Accept Medicare enrollment applications.

(iii) Make phone calls or direct, urge, or attempt to persuade their patients to enroll in a specific plan based on financial or any other interests of the provider.

(iv) Mail marketing materials on behalf of a Part D sponsor.

(v) Offer inducements to persuade patients to enroll with a particular Part D plan or sponsor.

(vi) Conduct health screenings as a marketing activity.

(vii) Distribute marketing materials or enrollment forms in areas where care is being delivered.

(viii) Offer anything of value to induce enrollees to select the provider.

(ix) Accept compensation from the Part D sponsor for any marketing or enrollment activities performed on behalf of the Part D sponsor.

(2) During plan-initiated provider activities, the provider may do any of the following:

(i) Make available, distribute, and display communications materials, including in areas where care is being delivered.

(ii) Provide or make available marketing materials and enrollment forms in common areas.

(e) *Part D sponsor activities in the healthcare setting.* Part D sponsor activities in the health care setting are those activities, including marketing activities that are conducted by Part D sponsor or on behalf of the Part D sponsor, or by any downstream entity, but not by a provider. All marketing must comply with the requirements in paragraphs (a) and (b) of this section. However, during Part D sponsor activities, the following is permitted:

(1) Accepting and collect Scope of Appointment forms.

(2) Accepting enrollment forms.

(3) Making available, distributing, and displaying communications materials, including in areas where care is being delivered.

■ 82. Section 423.2267 is added to read as follows:

§ 423.2267 Required materials and content.

For information CMS deems to be vital to the beneficiary, including information related to enrollment, benefits, health, and rights, the agency may develop materials or content that are either standardized or provided in a model form. Such materials and content are collectively referred to as required.

(a) *Standards for required materials and content.* All required materials and content, regardless of categorization as standardized in paragraph (b) of this section or model in paragraph (c) of this section, must meet the following:

(1) Be in a 12pt font, Times New Roman or equivalent.

(2) For markets with a significant non-English speaking population, be in the language of these individuals. Specifically, Part D sponsors must translate required materials into any non-English language that is the primary language of at least 5 percent of the individuals in a plan benefit package (PBP) service area.

(3) Be provided to the beneficiary within CMS's specified timeframes.

(b) *Standardized materials.* Standardized materials and content are required materials and content that must be used in the form and manner provided by CMS.

(1) When CMS issues standardized material or content, a Part D sponsor must use the document without alteration except for the following:

(i) Populating variable fields.

(ii) Correcting grammatical errors.

(iii) Adding customer service phone numbers.

(iv) Adding plan name, logo, or both.

(v) Deleting content that does not pertain to the plan type (for example, removing MA language for a Part D plan).

(vi) Adding the SMID.

(vii) A Notice of Privacy Practices as required under the HIPAA Privacy Rule (45 CFR 164.520).

(2) When CMS issues standardized content, Part D sponsors—

(3) The Part D sponsor may develop accompanying language for standardized material or content, provided that language does not conflict with the standardized material or content. For example, CMS may issue standardized content associated with an appeal notification and Part D sponsor may draft a letter that includes the standardized content in the body of the letter; the remaining language in the letter is at the sponsor's discretion, provided it does not conflict with the standardized content or other regulatory standards.

(c) *Model materials.* Model materials and content are those required materials and content created by CMS as an example of how to convey beneficiary information. When drafting required materials or content based on CMS models, Part D sponsors:

(1) Must accurately convey the vital information in the required material or content to the beneficiary, although the Part D sponsor is not required to use

CMS model materials or content verbatim; and

(2) Must follow CMS's specified order of content, when specified.

(d) *Delivery of required materials.* Part D sponsors must mail required materials in hard copy or provide them electronically, following the requirements in paragraphs (d)(1) and (2) of this section.

(1) For hard copy mailed materials, each enrollee must receive his or her own copy, except in cases of non-beneficiary-specific material(s) where the Part D sponsor has determined multiple enrollees are living in the same household and it has reason to believe the enrollees are related. In that case, the Part D sponsor may mail one copy to the household. The Part D sponsor must provide all enrollees an opt-out process so the enrollees can each receive his or her own copy, instead of a copy to the household. Materials specific to an individual beneficiary must always be mailed to that individual.

(2) Materials may be delivered electronically following the requirements in paragraphs (d)(2)(i) and (ii) of this section.

(i) Without prior authorization from the enrollee, Part D sponsors may mail new and current enrollees a notice informing enrollees how to electronically access the following required materials: the Evidence of Coverage, Provider and Pharmacy Directories, and Formulary. The following requirements apply:

(A) The Part D sponsor may mail one notice for all materials or multiple notices.

(B) Notices for prospective year materials may not be mailed prior to September 1 of each year, but must be sent in time for an enrollee to access the specified materials by October 15 of each year.

(C) The Part D sponsor may send the notice throughout the year to new enrollees.

(D) The notice must include the website address to access the materials, the date the materials will be available if not currently available, and a phone number to request that hard copy materials be mailed.

(E) The notice must provide the enrollee with the option to request hardcopy materials. Requests may be material specific, and must have the option of a one-time request or a permanent request that must stay in place until the enrollee chooses to receive electronic materials again.

(F) Hard copies of requested materials must be sent within three business days of the request.

(ii) With prior authorization from the enrollee, the Part D sponsor may provide any required material or content electronically. To do so, the Part D sponsor must do all of the following:

(A) Obtain prior consent from the enrollee. The consent must specify both the media type and the specific materials being provided in that media type.

(B) Provide instructions on how and when enrollees can access the materials.

(C) Have a process through which an enrollee can request hard copies be mailed, providing the beneficiary with the option of a one-time request or a permanent request (which must stay in place until the enrollee chooses to receive electronic materials again), and with the option of requesting hard copies for all or a subset of materials. Hard copies must be mailed within three business days of the request.

(D) Have a process for automatic mailing of hard copies when electronic versions or the chosen media type is undeliverable.

(e) *CMS required materials and content.* The following are required materials that must be provided to current and prospective enrollees, as applicable, in the form and manner outlined in this section. Unless otherwise noted or instructed by CMS and subject to § 423.2263(a) of this chapter, required materials may be sent once a fully executed contract is in place, but no later than the due dates listed for each material in this section.

(1) *Evidence of Coverage (EOC).* The EOC is a standardized communications material through which certain required information (under § 423.128(b)) must be provided annually and must be provided:

(i) To current enrollees of plan by October 15, prior to the year to which the EOC applies.

(ii) To new enrollees within 10 calendar days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(2) *Part D explanation of benefits (EOB).* The EOB is a model communications material through which plans must provide the information required under § 423.128(e). Part D sponsors must provide enrollees with an EOB no later than the end of the month following any month in which the enrollee utilized their prescription drug benefit.

(3) *Annual Notice of Change (ANOC).* The ANOC is a standardized marketing material through which plans must provide the information required under § 423.128(g)(2) annually.

(i) Must send for enrollee receipt no later than September 30 of each year.

(ii) Enrollees with an October 1, November 1, or December 1 effective date must receive within 10 calendar days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(4) *Pre-Enrollment Checklist (PECL).* The PECL is a standardized communications material that plans must provide to prospective enrollees with the enrollment form so that the enrollees understand important plan benefits and rules. The PECL references information on the following:

(i) The EOC.

(ii) Provider directory.

(iii) Pharmacy directory.

(iv) Formulary.

(v) Premiums/copayments/coinsurance.

(vi) Emergency/urgent coverage.

(vii) Plan-type rules.

(5) *Summary of Benefits (SB).* Part D sponsors must disseminate a summary of highly utilized coverage that include benefits and cost sharing to prospective enrollees, known as the SB. The SB is a model marketing material. It must be in a clear and accurate format.

(i) The SB must be provided with an enrollment form as follows:

(A) In hardcopy with a paper enrollment form.

(B) For online enrollment, the SB must be made available electronically (for example, via a link) prior to the completion and submission of enrollment request.

(C) For telephonic enrollment, the beneficiary must be verbally told where the SB can be accessed.

(ii) The SB must include the following information:

(A) Information on prescription drug expenses, including:

(1) Monthly plan premium

(*2*) Deductible, the initial coverage phase, coverage gap, and catastrophic coverage.

(*3*) A statement that costs may differ based on pharmacy type or status (for example, preferred/non-preferred, mail order, long-term care (LTC) or home infusion, and 30- or 90-day supply), when applicable.

(*4*) For dual eligible enrollees with differing levels of cost must state how cost sharing and benefits differ depending on the level of Medicaid eligibility.

(B) Plan sponsors may describe or identify other health related benefits in the SB.

(6) *Enrollment/Election form.* This is the model communications material through which plans must provide the information required under § 423.32(b).

(7) *Enrollment Notice.* This is a model communications material through which plans must provide the information required under § 423.32(d).

(8) *Disenrollment Notice.* This is a model communications material through which plans must provide the information required under § 423.36(b)(2).

(9) *Formulary.* This is a model communications material through which Part D sponsors must provide information required under § 423.128(b)(4).

(i) Must be provided to current enrollees of plan by October 15 of each year.

(ii) Must also provide to new enrollees within 10 calendar days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(10) *Low Income Subsidy (LIS) Notice.* This is a model communications content through which Part D sponsors must notify potential enrollees of what their plan premium will be once they are eligible for Extra Help and receive the low-income subsidy.

(11) *Low Income Subsidy (LIS) Rider.* This is a model communications material provided to all enrollees who qualify for Extra Help. In the LIS Rider, the Part D sponsors must convey how much help the beneficiary will receive in the benefit year toward their Part D premium, deductible, and copayments provide to all beneficiaries who qualify for Extra Help.

(i) The LIS Rider must be provided at least once per year by September 30.

(ii) The LIS Rider must be sent to enrollees who qualify for Extra Help or have a change in LIS levels within 30 days of receiving notification from CMS.

(12) *Midyear Change Notification.* This is a model communications material through which plans must provide a notice to enrollees when there is a midyear change in benefits or plan rules, under the following timelines:

(i) Notices of changes in plan rules, unless otherwise addressed elsewhere in the regulation, must be provided 30 days in advance.

(ii) National Coverage Determination (NCD) changes announced or finalized less than 30 days before effective date, a notification is required as soon as possible.

(iii) Midyear NCD or legislative changes must be provided no later than 30 days after the NCD is announced or the legislative change is effective.

(A) Plans may include the change in next plan mass mailing (for example, newsletter), provided it is within 30 days.

(B) The notice must also appear on the MA organization's website.

(13) *Non-renewal Notice.* This is a model communications material through which plans must provide the information required under § 423.507.

(i) The Non-renewal Notice must be provided at least 90 calendar days before the date on which the nonrenewal is effective. For contracts ending on December 31, the notice must be dated October 2 to ensure national consistency in the application of Medigap Guaranteed Issue (GI) rights to all enrollees, except for those enrollees in Medicare-Medicaid Plans (MMPs) and special needs plans (SNPs). Information about non-renewals or service area reductions may not be released to the public, including the Non-renewal Notice in this section, until CMS provides notification to the plan.

(ii) The Non-renewal Notice must do all of the following:

(A) Inform the enrollee that the plan will no longer be offered and the date the plan will end.

(B) Provide information about any applicable open enrollment periods or special election periods or both (for example, Medicare open enrollment, non-renewal special election period), including the last day the enrollee has to make a Medicare prescription drug plan selection.

(C) Explain what the enrollee must do to continue receiving Medicare coverage and what will happen if the enrollee chooses to do nothing.

(D) As required under § 423.507(a)(2)(ii)(A), provide a CMS-approved written description of alternative MA plan, MA–PD plan, and PDP options available for obtaining qualified Medicare services within the beneficiary's region in the enrollee's notice.

(E) Specify when coverage will start after a new Medicare plan is chosen.

(F) List 1–800–MEDICARE contact information together with other organizations that may be able to assist with comparing plans (for example, SHIPs).

(H) Include the Part D sponsor's call center telephone number, TTY number, and hours and days of operation.

(14) *Part D Transition Letter.* This is a model communications material that must be provided to the beneficiary when they receive a transition fill for a nonformulary drug. The Part D Transition Letter must be sent within three days of adjudication of temporary transition fill.

(15) *Pharmacy Directory.* This is a model communications material through which Part D sponsors must provide the information required under § 423.128. The pharmacy directory must meet all of the following:

(i) Be provided to current enrollees by October 15 of the year prior to the applicable year.

(ii) Be provided to new enrollees within 10 calendars days from receipt of CMS confirmation of enrollment or by last day of month prior to effective date, whichever is later.

(iii) Be provided to current enrollees upon request, within three business days of the request.

(iv) Be updated any time the Part D sponsor becomes aware of changes.

(A) All updates to the online pharmacy directories must be completed within 30 days of receiving information requiring update.

(B)(*1*) Updates to hardcopy provider directories must be completed within 30 days.

(*2*) Hardcopy directories that include separate updates via addenda are considered up-to-date.

(16) *Prescription transfer letter.* This is a model communications material that must be sent when a Part D sponsor requests permission from an enrollee to fill a prescription at a different network pharmacy than the one currently being used by enrollee.

(17) *Star Ratings Document.* This is a standardized marketing material through which Star Ratings information is conveyed to prospective enrollees.

(i) The Star Ratings Document is generated through HPMS.

(ii) The Star Ratings Document must be provided with an enrollment form as follows:

(A) In hardcopy with a paper enrollment form.

(B) For online enrollment, made available electronically (for example, via a link) prior to the completion and submission of enrollment request.

(C) For telephonic enrollment, the beneficiary must be verbally told where they can access the Star Ratings Document.

(iii) New Part D sponsors that have no Star Ratings are not required to provide the Star Ratings Document until the following contract year.

(iv) Updated Star Ratings must be used within 21 calendar days of release of updated information on Medicare Plan Finder.

(v) Updated Star Ratings must not be used until CMS releases Star Ratings on Medicare Plan Finder.

(18) *Coverage Determination Notices.* This is a model communications material through which plans must provide the information under § 423.568.

(19) *Excluded Provider Notices.* This is a model communications material

through which plans must notify enrollees when a provider they use has been excluded from participating in the Medicare program based on an OIG exclusion or the CMS preclusion list.

(20) *Notice of Denial of Medicare Prescription Drug Coverage.* This is a standardized material used to convey detailed descriptions of denied drug coverage and appeal rights.

(21) *Medicare Prescription Drug Coverage and Your Rights.* This is a standardized communications material used to convey a beneficiary's appeal rights when a drug cannot be filled at point-of-sale.

(22) *Medicare Part D Coverage Determination Request Form.* This is a model communications material used to collect additional information from a prescriber.

(23) *Request for Additional Information.* This is a standardized communications material used by the Part D sponsor to request a beneficiary obtain additional information from the prescriber regarding a beneficiary's exception request.

(24) *Notice of Right to an Expedited Grievance.* This is a model communications material used to convey a Medicare beneficiary's rights to request that a decision be made on a grievance or appeal within a shorter timeframe.

(25) *Notice of Inquiry.* This is a model communications material from a prescription drug plan informing a beneficiary if a drug is covered by the formulary.

(26) *Notice of Case Status.* This is a model communications material used to inform a beneficiary of the denial of an appeal and additional appeal rights.

(27) *Request for Reconsideration of Medicare Prescription Drug Denial.* This is a model communications material used to inform the beneficiary of rights to an independent review of a Part D sponsor's decision.

(28) *Notice of Redetermination.* This is a model communications material used to convey instructions for requesting an appeal of an adverse coverage determination.

(29) *LEP Reconsideration Request Form.* This is a model communication used to request an appeal of a decision on an LEP by the independent review entity.

(30) *Request for Administrative Law Judge (ALJ) Hearing or Review of Dismissal.* This is a model communication used by an enrollee to request a hearing by the ALJ or a review of the IRE dismissal.

(31) *Appointment of Representative (AOR).* This is a standardized material used to assign an individual to act on behalf of a beneficiary for the purpose of an appeal, grievance, or coverage determination.

(32) *Federal Contracting Statement.* This is model content through which plans must convey that they have a contract with Medicare and that enrollment in the plan depends on contract renewal.

(i) The Federal Contracting Statement must include all of the following:

(A) Legal or marketing name of the organization.

(B) Type of plan (for example PDP).

(C) A statement that the organization has a contract with Medicare (when applicable, Part D sponsors may incorporate a statement that the organization has a contract with the State/Medicaid program).

(D) A statement that enrollment depends on contract renewal.

(ii) Part D sponsors must include the Federal Contracting Statement on all marketing materials with the exception of the following:

(A) Banner and banner-like advertisements.

(B) Outdoor advertisements.

(C) Text messages.

(D) Social media.

(E) Envelopes

(33) *Star Ratings Disclaimer.* This is model content through which plans must:

(i) Convey that plan sponsors are evaluated yearly by Medicare

(ii) Convey that the ratings are based on a 5-star rating system

(iii) Include the model content in disclaimer form or within the material whenever Star Ratings are mentioned in marketing materials, with the exception of when Star Ratings are published on small objects (that is, a give-away items such as a pens or rulers).

(34) *Accommodations Disclaimer.* This is model content through which plans must:

(i) Convey that accommodations for persons with special needs is available

(ii) Provide a telephone number and TTY number

(iii) Include the model content in disclaimer form or within the body of the material on any advertisement of invitation to all events as described under § 423.2264(c).

(35) *Mailing Statements.* This is standardized content. It consists of statements on envelopes that Part D sponsor must include when mailing information to current members, as follows:

(i) Part D sponsors must include the following statement when mailing information about the enrollee's current plan: ''Important [Insert Plan Name] information.''

(ii) Part D sponsors must include the following statement when mailing health and wellness information ''Health and wellness or prevention information.''

(iii) The Part D sponsor must include the plan name; however, if the plan name is elsewhere on the envelope, the plan name does not need to be repeated in the disclaimer.

(iv) Delegated or sub-contracted entities and downstream entities that conduct mailings on behalf of a multiple Part D sponsors must also comply with this requirement, however, they do not have to include a plan name.

(36) *Promotional Give-Away Disclaimer.* This is model content. The disclaimer consists of a statement that must make clear that there is no obligation to enroll in a plan, and must be included when offering a promotional give-away such as a drawing, prizes, or a free gift.

(37) *Provider Co-Branded Material Disclaimer.* This is model content through which Part D sponsors must:

(i) Convey, as applicable, that other pharmacies, physicians or providers are available in the plan's network.

(ii) Include the model content in disclaimer form or within the material whenever co-branding relationships with network provider are mentioned.

§ 423.2268 [Removed]

■ 83. Section 423.2268 is removed.

■ 84. Section 423.2274 is revised to read as follows:

§ 423.2274 Agent, broker, and other third party requirements.

If a Part D sponsor uses agents and brokers to sell its Medicare Part D plans, the requirements in paragraphs (a) through (e) of this section are applicable. If a Part D sponsor makes payments to third parties, the requirements in paragraph (f) of this section are applicable.

(a) *Definitions.* For purposes of this section, the following definitions are applicable:

Compensation. (i) Includes monetary or non-monetary remuneration of any kind relating to the sale or renewal of a plan or product offered by a Part D sponsor including, but not limited to the following:

(A) Commissions.

(B) Bonuses.

(C) Gifts.

(D) Prizes or Awards.

(ii) Does not include any of the following:

(A) Payment of fees to comply with State appointment laws, training, certification, and testing costs.

(B) Reimbursement for mileage to, and from, appointments with beneficiaries.

(C) Reimbursement for actual costs associated with beneficiary sales appointments such as venue rent, snacks, and materials.

Fair market value (FMV) means, for purposes of evaluating agent/broker compensation under the requirements of this section only, the amount that CMS determines could reasonably be expected to be paid for an enrollment or continued enrollment into a Part D plan. Beginning January 1, 2021, the FMV is $81. For subsequent years, FMV is calculated by adding the current year FMV and the product of the current year FMV and the Annual Percentage Increase for Part D, which is published for each year in the rate announcement issued pursuant to § 422.312 of this chapter.

Initial enrollment year means the first year that a beneficiary is enrolled in a plan versus subsequent years (c.f., *renewal year*) that a beneficiary remains enrolled in a plan.

Like plan type means one of the following:

(i) PDP replaced with another PDP.

(ii) MA or MA–PD replaced with another MA or MA–PD.

(iii) Cost plan replaced with another cost plan.

Plan year and *enrollment year* mean the year beginning January 1 and ending December 31.

Renewal year means all years following the initial enrollment year in the same plan or in different plan that is a like plan type.

Unlike plan type means one of the following:

(i) An MA or MA–PD plan to a PDP or Section 1876 Cost Plan.

(ii) A PDP to a Section 1876 Cost Plan or an MA or MA–PD plan.

(iii) A Section 1876 Cost Plan to an MA or MA–PD plan or PDP.

(b) *Agent/broker requirements.* Agents and brokers who represent Part D sponsors must follow the requirements in paragraphs (b)(1) through (3) of this section. Representation includes selling products (including Medicare Advantage plans, Medicare Advantage-Prescription Drug plans, Medicare Prescription Drug plans, and section 1876 Cost plans) as well as outreach to existing or potential beneficiaries and answering or potentially answering questions from existing or potential beneficiaries.

(1) Be licensed and appointed under State law (if required under applicable State law).

(2) Be trained and tested annually as required under paragraph (c)(4) of this section, and achieve an 85 percent or higher on all forms of testing.

(3) Secure and document a Scope of Appointment prior to meeting with potential enrollees.

(c) *Part D sponsor oversight.* Part D sponsors must oversee first tier, downstream, and related entities that represent Part D sponsor to ensure agents and brokers abide by all applicable State and Federal laws, regulations, and requirements. Part D sponsors must do all of the following:

(1) As required under applicable State law, employ as marketing representatives only individuals who are licensed by the State to conduct marketing (as defined in this subpart) of health insurance in that State, and whom the Part D sponsor has informed that State it has appointed, consistent with the appointment process for agents and brokers provided for under State law.

(2) As required under applicable State law, report the termination of an agent or broker to the State and the reason for termination if required by state law.

(3) Report to CMS all enrollments made by unlicensed agents or brokers and for-cause terminations of agents or brokers.

(4) On an annual basis, provide training and testing to agents and brokers on Medicare rules and regulations, the plan products that agents and brokers will sell including any details specific to each plan product, and relevant State and Federal requirements.

(5) On an annual basis by the last Friday in July, report to CMS whether the Part D sponsor intends to use employed, captive, or independent agents or brokers in the upcoming plan year and the specific rates or range of rates the plan will pay independent agents and brokers. Following the reporting deadline, Part D sponsor may not change their decisions related to agent or broker type, or their compensation rates and ranges, until the next plan year.

(6) On an annual basis by October 1, have in place full compensation structures for the following plan year. The structure must include details on compensation dissemination, including specifying payment amounts for initial enrollment year and renewal year compensation.

(7) Submit agent or broker marketing materials to CMS through HPMS prior to use, following the requirements for marketing materials in this subpart.

(8) Ensure beneficiaries are not charged marketing consulting fees when considering enrollment in Part D plans.

(9) Establish and maintain a system for confirming that:

(i) Beneficiaries enrolled by agents or brokers understand the product, including the rules applicable under the plan.

(ii) Agents and brokers appropriately complete Scope of Appointment records for all marketing appointments (including telephonic and walk-in).

(10) Demonstrate that marketing resources are allocated to marketing to the disabled Medicare population as well as to Medicare beneficiaries age 65 and over.

(11) Must comply with State requests for information about the performance of a licensed agent or broker as part of a state investigation into the individual's conduct. CMS will establish and maintain a memorandum of understanding (MOU) to share compliance and oversight information with States that agree to the MOU.

(d) *Compensation requirements.* Part D sponsors must ensure they meet the requirements in paragraphs (d)(1) through (5) of this section in order to pay compensation. These compensation requirements only apply to independent agents and brokers.

(1) *General rules.* (i) MA organizations may only pay agents or brokers who meet the requirements in paragraph (b) of this section.

(ii) Part D sponsors may determine, through their contracts, the amount of compensation to be paid, provided it does not exceed limitations outlined in this section.

(iii) Part D sponsors may determine their payment schedule (for example, monthly or quarterly). Payments (including payments for AEP enrollments) must be made during the year of the beneficiary's enrollment.

(iv) Part D sponsors may only pay compensation for the number of months a member is enrolled.

(2) *Initial enrollment year compensation.* For each enrollment in an initial enrollment year, Part D sponsors may pay compensation at or below FMV.

(i) Part D sponsors may pay either a full or pro-rated initial enrollment year compensation for:

(A) A beneficiary's first year of enrollment in any plan; or

(B) A beneficiary's move from an employer group plan to a non-employer group plan (either within the same parent organization or between parent organizations).

(ii) Part D sponsors must pay pro-rated initial enrollment year compensation for:

(A) A beneficiary's plan change(s) during their initial enrollment year.

(B) A beneficiary's selection of an ''unlike plan type'' change. In that case,

the new plan would only pay the months that the beneficiary is enrolled, and the previous plan would recoup the months that the beneficiary was not in the plan.

(3) *Renewal compensation.* For each enrollment in a renewal year, Part D sponsors may pay compensation at an amount up to 50 percent of FMV.

(i) Part D sponsors may pay compensation for a renewal year:

(A) In any year following the initial enrollment year the beneficiary remains in the same plan; or

(B) When a beneficiary enrolls in a new ''like plan type''.

(ii) [Reserved]

(4) *Other compensation scenarios.* (i) When a beneficiary enrolls in a PDP, the Part D sponsor may pay only the PDP compensation (and not compensation for MA enrollment under § 422.2274 of this chapter).

(ii) When a beneficiary enrolls in both a section 1876 Cost Plan and a stand-alone PDP, the 1876 Cost Plan sponsor may pay compensation for the cost plan enrollment and the Part D sponsor must pay compensation for the Part D enrollment.

(iii) When a beneficiary enrolls in a MA-only plan and a PDP, the MA plan may pay for the MA plan enrollment and the Part D sponsor may pay for the PDP enrollment.

(5) *Additional compensation, payment, and compensation recovery requirements (Charge-backs).* (i) Part D sponsors must retroactively pay or recoup funds for retroactive beneficiary changes for the current and previous calendar years. Part D sponsors may choose to recoup or pay compensation for years prior to the previous calendar year, but they must do both (recoup amounts owed and pay amounts due) during the same year.

(ii) Compensation recovery is required when:

(A) A beneficiary makes any plan change (regardless of the parent organization) within the first three months of enrollment (known as rapid disenrollment), except as provided in paragraph (d)(5)(iii) of this section.

(B) Any other time period a beneficiary is not enrolled in a plan, but the plan paid compensation based on that time period.

(iii) Rapid disenrollment compensation recovery does not apply when:

(A) A beneficiary enrolls effective October 1, November 1, or December 1 and subsequently uses the Annual Election Period to change plans for an effective date of January 1.

(B) A beneficiary's enrollment change is not in the best interests of the Medicare program, including for the following reasons:

(*1*) Other creditable coverage *(*for example, an employer plan).

(*2*) Moving into or out of an institution.

(*3*) Gain or loss of employer/union sponsored coverage.

(*4*) Plan termination, non-renewal, or CMS imposed sanction.

(*5*) To coordinate with Part D enrollment periods or the State Pharmaceutical Assistance Program.

(*6*) Becoming LIS or dually eligible for Medicare and Medicaid.

(*7*) Qualifying for another plan based on special needs.

(*8*) Due to an auto, facilitated, or passive enrollment.

(*9*) Death.

(*10*) Moving out of the service area.

(*11*) Non-payment of premium.

(*12*) Loss of entitlement or retroactive notice of entitlement.

(*13*) Moving into a 5-star plan.

(*14*) Moving from an LPI plan into a plan with three or more stars.

(iv)(A) When rapid disenrollment compensation recovery applies, the entire compensation must be recovered.

(B) For other compensation recovery, plans must recover a pro-rated amount of compensation (whether paid for an initial enrollment year or renewal year) from an agent or broker equal to the number of months not enrolled.

(*1*) If a plan has paid full initial compensation, and the enrollee disenrolls prior to the end of the enrollment year, the total number of months not enrolled (including months prior to the effective date of enrollment) must be recovered from the agent or broker.

(*2*) Example: A beneficiary enrolls upon turning 65 effective April 1 and disenrolls September 30 of the same year. The plan paid full initial enrollment year compensation. Recovery is equal to 6/12ths of the initial enrollment year compensation (for January through March and October through December).

(e) *Payments other than compensation (administrative payments).* (1) Payments made for services other than enrollment of beneficiaries (for example, training, customer service, agent recruitment, operational overhead, or assistance with completion of health risk assessments) must not exceed the value of those services in the marketplace.

(2) Administrative payments can be based on enrollment provided payments are at or below the value of those services in the marketplace.

(f) *Payments for referrals.* Payments may be made to individuals for the referral (including a recommendation, provision, or other means of referring beneficiaries), recommendation, provision, or other means of referring beneficiaries to an agent, broker or other entity for potential enrollment into a plan. The payment may not exceed $100 for a referral into an MA or MA–PD plan and $25 for a referral into a PDP plan.

■ 85. Section 423.2305 is amended by revising the definition for ''Applicable discount'' to read as follows.

§ 423.2305 Definitions.

* * * * *

Applicable discount means 50 percent or, with respect to a plan year after plan year 2018, 70 percent of the portion of the negotiated price (as defined in this section) of the applicable drug of a manufacturer that falls within the coverage gap and that remains after such negotiated price is reduced by any supplemental benefits that are available.

* * * * *

PART 455—PROGRAM INTEGRITY: MEDICAID

■ 86. The authority citation for part 455 continues to read as follows:

Authority: 42 U.S.C. 1302.

■ 87. Section 455.2 is amended by—

■ a. In the definition of ''Credible allegation of fraud,'' revising paragraph (1); and

■ b. Adding the definition of ''Fraud hotline tip'' in alphabetical order.

The revision and addition read as follows:

§ 455.2 Definitions.

* * * * *

Credible allegation of fraud. * * *

(1) Fraud hotline tips verified by further evidence.

* * * * *

Fraud hotline tip. A fraud hotline tip is a complaint or other communications that are submitted through a fraud reporting phone number or a website intended for the same purpose, such as the Federal Government's HHS OIG Hotline or a health plan's fraud hotline.

* * * * *

PART 460—PROGRAMS OF ALL-INCLUSIVE CARE FOR THE ELDERLY (PACE)

■ 88. The authority citation for part 460 continues to read as follows:

Authority: 42 U.S.C. 1302, 1395, 1395eee(f), and 1396u–4(f).

■ 89. Section 460.6 is amended by revising the definition of ''Services'' to read as follows:

§ 460.6 Definitions.

* * * * *

Service, as used in this part, means all services that could be required under § 460.92, including items and drugs.

* * * * *

■ 90. Section 460.56 is added to subpart D to read as follows:

§ 460.56 Procedures for imposing sanctions and civil money penalties.

CMS provides notice and a right to request a hearing according to the procedures set forth in either of the following:

(a) Section 422.756(a) and (b) of this chapter if CMS imposes a suspension of enrollment or payment under § 460.42 or § 460.48(b).

(b) Section 422.756(e)(2)(v) of this chapter if CMS imposes civil money penalties under § 460.46.

■ 91. Section 460.92 is revised to read as follows:

§ 460.92 Required services.

(a) The PACE benefit package for all participants, regardless of the source of payment, must include the following:

(1) All Medicare-covered services.

(2) All Medicaid-covered services, as specified in the State's approved Medicaid plan.

(3) Other services determined necessary by the interdisciplinary team to improve and maintain the participant's overall health status.

(b) Decisions by the interdisciplinary team to provide or deny services under paragraph (a) of this section must be based on an evaluation of the participant that takes into account:

(1) The participant's current medical, physical, emotional, and social needs; and

(2) Current clinical practice guidelines and professional standards of care applicable to the particular service.

§ 460.96 [Amended]

■ 92. Section 460.96 is amended by—

■ a. Removing paragraphs (a) and (b); and

■ b. Redesignating paragraphs (c) through (e) as paragraphs (a) through (c).

■ 93. Section 460.98 is amended by—

■ a. Revising paragraph (a);

■ b. Adding a sentence to the end of paragraph (b)(1); and

■ c. Adding paragraphs (b)(4) and (5).

The revision and additions read as follows:

§ 460.98 Service delivery.

(a) *Access to services.* A PACE organization is responsible for providing care that meets the needs of each participant across all care settings, 24 hours a day, every day of the year, and must establish and implement a written plan to ensure that care is appropriately furnished.

(b) * * *

(1) * * * These services must be furnished in accordance with § 460.70(a).

* * * * *

(4) Services must be provided as expeditiously as the participant's health condition requires, taking into account the participant's medical, physical, emotional, and social needs.

(5) The PACE organization must document, track and monitor the provision of services across all care settings in order to ensure the interdisciplinary team remains alert to the participant's medical, physical, emotional, and social needs regardless of whether services are formally incorporated into the participant's plan of care.

* * * * *

■ 94. Section 460.102 is amended by revising paragraphs (d)(1) and (d)(2)(ii) to read as follows:

§ 460.102 Interdisciplinary team.

* * * * *

(d) * * *

(1) The interdisciplinary team is responsible for the following:

(i) The initial assessment, periodic reassessments, plan of care, and coordination of 24-hour care delivery.

(ii) Documenting all recommendations for care or services and the reason(s) for not approving or providing recommended care or services, if applicable, in accordance with § 460.210(b).

(2) * * *

(ii) Remaining alert to pertinent input from any individual with direct knowledge of or contact with the participant, including the following:

(A) Other team members.

(B) Participants.

(C) Caregivers.

(D) Employees.

(E) Contractors.

(F) Specialists.

(G) Designated representatives.

* * * * *

■ 95. Section 460.104 is amended by revising paragraph (d)(2) to read as follows:

§ 460.104 Participant assessment.

* * * * *

(d) * * *

(2) *In response to a service determination request.* In accordance with § 460.121(h), the PACE organization must conduct an in-person reassessment if it expects to deny or partially deny a service determination request, and may conduct reassessments as determined necessary for approved services.

* * * * *

■ 96. Section 460.112 is amended by—

■ a. Adding paragraph (b)(4);

■ b. Redesignating paragraph (c)(3) as paragraph (c)(5); and

■ c. Adding new paragraphs (c)(3) and (4).

The additions read as follows:

§ 460.112 Specific rights to which a participant is entitled.

* * * * *

(b) * * *

(4) To contact 1–800–MEDICARE for information and assistance, including to make a complaint related to the quality of care or the delivery of a service.

(c) * * *

(3) To have reasonable and timely access to specialists as indicated by the participant's health condition and consistent with current clinical practice guidelines.

(4) To receive necessary care in all care settings, up to and including placement in a long-term care facility when the PACE organization can no longer provide the services necessary to maintain the participant safely in the community.

* * * * *

■ 97. Section 460.121 is added to read as follows:

§ 460.121 Service determination process.

(a) *Written procedures.* Each PACE organization must have formal written procedures for identifying and processing service determination requests in accordance with the requirements of this Part.

(b) *What is a service determination request*—(1) *Requests that constitute a service determination request.* Except as provided in paragraph (b)(2) of this section, the following requests constitute service determination requests:

(i) A request to initiate a service.

(ii) A request to modify an existing service, including to increase, reduce, eliminate, or otherwise change a service.

(iii) A request to continue coverage of a service that the PACE organization is recommending be discontinued or reduced.

(2) *Requests that do not constitute a service determination request.* Requests to initiate, modify, or continue a service do not constitute a service determination request if the request is made prior to completing the development of the initial plan of care.

(c) *Who can make a service determination request.* Any of the

following individuals can make a service determination request:

(1) The participant.

(2) The participant's designated representative.

(3) The participant's caregiver.

(d) *Method for making a service determination request.* An individual may make a service determination request as follows:

(1) Either orally or in writing.

(2) To any employee or contractor of the PACE organization that provides direct care to a participant in the participant's residence, the PACE center, or while transporting participants.

(e) *Processing a service determination request.* (1) Except as provided in paragraph (e)(2) of this section, the PACE organization must bring a service determination request to the interdisciplinary team as expeditiously as the participant's condition requires, but no later than 3 calendar days from the time the request is made.

(2) If a member of the interdisciplinary team is able to approve the service determination request in full at the time the request is made, the PACE organization—

(i) Must fulfill all of the following:

(A) Notice of the decision to approve a service determination request requirements specified in paragraph (j)(1) of this section.

(B) Effectuation requirements specified in paragraph (k) of this section.

(C) Recordkeeping requirements specified in paragraph (m) of this section.

(ii) Is not required to process the service determination request in accordance with paragraphs (f) through (i), (j)(2), and (*l*) of this section.

(f) *Who must review a service determination request.* The full interdisciplinary team must review and discuss each service determination request and decide to approve, deny, or partially deny the request based on that review.

(g) *Interdisciplinary team decision making.* The interdisciplinary team must consider all relevant information when evaluating a service determination request, including, but not limited to, the findings and results of any reassessments required in paragraph (h) of this section, as well as the criteria specified in § 460.92(b).

(h) *Reassessments in response to a service determination request.* (1) If the interdisciplinary team expects to deny or partially deny a service determination request, the appropriate members of the interdisciplinary team, as identified by the interdisciplinary team, must conduct an in-person reassessment before the interdisciplinary team makes a final decision. The team members performing the reassessment must evaluate whether the requested service is necessary to meet the participant's medical, physical, emotional, and social needs.

(2) The interdisciplinary team may conduct a reassessment prior to approving a service determination request, either in-person or through the use of remote technology, if the team determines that a reassessment is necessary.

(i) *Notification timeframe.* Except as provided in paragraph (i)(1) of this section, when the interdisciplinary team receives a service determination request, it must make its decision and notify the participant or their designated representative of its decision as expeditiously as the participant's condition requires, but no later than 3 calendar days after the date the interdisciplinary team receives the request.

(1) *Extensions.* The interdisciplinary team may extend the timeframe for review and notification by up to 5 calendar days if either of the following occur:

(i) The participant or other requestor listed in paragraph (c)(2) or (3) of this section requests the extension.

(ii) The extension is in the participant's interest because the interdisciplinary team needs additional information from an individual not directly employed by the PACE organization that may change the interdisciplinary team's decision to deny a service. The interdisciplinary team must document the circumstances that led to the extension and demonstrate how the extension is in the participant's best interest.

(2) *Notice of extension.* When the interdisciplinary team extends the timeframe, it must notify the participant or their designated representative in writing. The notice must explain the reason(s) for the delay and must be issued as expeditiously as the participant's condition requires, but no later than 24 hours after the IDT decides to extend the timeframe.

(j) *Notification requirements*—(1) *Notice of decisions to approve a service determination request.* If the interdisciplinary team makes a determination to approve a service determination request, it must provide the participant or the designated representative either oral or written notice of the determination. Notice of any decision to approve a service determination request must explain the conditions of the approval in understandable language, including when the participant may expect to receive the approved service.

(2) *Notice of decisions to deny a service determination request.* If the interdisciplinary team decides to deny or partially deny a service, it must provide the participant or the designated representative both oral and written notice of the determination. Notice of any denial must—

(i) State the specific reason(s) for the denial, including why the service is not necessary to maintain or improve the participant's overall health status, taking into account the participant's medical, physical, emotional, and social needs, and the results of the reassessment(s) in understandable language.

(ii) Inform the participant or designated representative of his or her right to appeal the decision under § 460.122.

(iii) Describe the standard and expedited appeals processes, including the right to, and conditions for, obtaining expedited consideration of an appeal of a denial of services as specified in § 460.122.

(iv) For a Medicaid participant, inform the participant of both of the following, as specified in § 460.122(e)(1):

(A) His or her right to continue receiving disputed services during the appeals process until issuance of the final determination.

(B) The conditions for continuing to receive disputed services.

(k) *Effectuation requirements.* If the interdisciplinary team approves a service determination request, in whole or in part, the PACE organization must provide the approved service as expeditiously as the participant's condition requires, taking into account the participant's medical, physical, emotional, and social needs. The interdisciplinary team must explain when the participant may expect to receive the service in accordance with paragraph (j)(1) of this section.

(l) *Effect of failure to meet the processing timeframes.* If the interdisciplinary team fails to provide the participant with timely notice of the resolution of the request or does not furnish the services required by the revised plan of care, this failure constitutes an adverse decision, and the participant's request must be automatically processed by the PACE organization as an appeal in accordance with § 460.122.

(m) *Recordkeeping.* The PACE organization must establish and implement a process to document, track, and maintain records related to all

processing requirements for service determination requests received both orally and in writing. These records must be available to the interdisciplinary team to ensure that all members remain alert to pertinent participant information.

■ 98. Section 460.122 is amended by—
■ a. Revising the introductory text and paragraphs (b) and (c)(1), (2), and (4);
■ b. Redesignating paragraphs (c)(5) and (6) as paragraphs (c)(6) and (7), respectively;
■ c. Adding a new paragraph (c)(5);
■ d. Revising paragraphs (d), (g) and (h);

The revisions and additions read as follows:

§ 460.122 PACE organization's appeals process.

For purposes of this section, an appeal is a participant's action taken with respect to the PACE organization's noncoverage of, or nonpayment for, a service including denials, reductions, or termination of services. A request to initiate, modify or continue a service must first be processed as a service determination request under § 460.121 before the PACE organization can process an appeal under this section.

* * * * *

(b) *Notification of participants.* Upon enrollment, at least annually thereafter, and whenever the interdisciplinary team denies a service determination request or request for payment, the PACE organization must give a participant written information on the appeals process.

(c) * * *

(1) Timely preparation and processing of a written denial of coverage or payment as provided in §§ 460.121(i) and (m).

(2) How a participant or their designated representative files an appeal, including procedures for accepting oral and written appeal requests.

* * * * *

(4) Review of an appeal by an appropriate third party reviewer or committee. An appropriate third party reviewer or member of a review committee must be an individual who meets all of the following:

(i) Appropriately credentialed in the field(s) or discipline(s) related to the appeal.

(ii) An impartial third party who meets both of the following:

(A) Was not involved in the original action.

(B) Does not have a stake in the outcome of the appeal.

(5) The distribution of written or electronic materials to the third party reviewer or committee that, at a minimum, explain all of the following:

(i) Services must be provided in a manner consistent with the requirements in §§ 460.92 and 460.98.

(ii) The need to make decisions in a manner consistent with how determinations under section 1862(a)(1)(A) of the Act are made.

(iii) The rules in § 460.90(a) that specify that certain limitations and conditions applicable to Medicare or Medicaid or both benefits do not apply.

* * * * *

(d) *Opportunity to submit evidence.* A PACE organization must give all parties involved in the appeal a reasonable opportunity to present evidence related to the dispute, in person, as well as in writing.

* * * * *

(g) *Notification.* A PACE organization must give all parties involved in the appeal appropriate written notification of the decision to approve or deny the appeal.

(1) *Notice of a favorable decision.* Notice of any favorable decision must explain the conditions of the approval in understandable language.

(2) *Notice of partially or fully adverse decisions.* (i) Notice of any denial must—

(A) State the specific reason(s) for the denial;

(B) Explain the reason(s) why the service would not improve or maintain the participant's overall health status;

(C) Inform the participant of his or her right to appeal the decision; and

(D) Describe the external appeal rights under § 460.124.

(ii) At the same time the decision is made, the PACE organization must also notify the following:

(A) CMS.

(B) The State administering agency.

(h) *Actions following a favorable decision.* A PACE organization must furnish the disputed service as expeditiously as the participant's health condition requires if a determination is made in favor of the participant on appeal.

* * * * *

■ 99. Section 460.124 is revised to read as follows:

§ 460.124 Additional appeal rights under Medicare or Medicaid.

A PACE organization must inform a participant in writing of his or her appeal rights under Medicare or Medicaid managed care, or both, assist the participant in choosing which to pursue if both are applicable, and forward the appeal to the appropriate external entity.

(a) *Appeal rights under Medicare.* Medicare participants have the right to a reconsideration by an independent review entity.

(1) A written request for reconsideration must be filed with the independent review entity within 60 calendar days from the date of the decision by the third party reviewer under § 460.122.

(2) The independent outside entity must conduct the review as expeditiously as the participant's health condition requires but must not exceed the deadlines specified in the contract.

(3) If the independent review entity conducts a reconsideration, the parties to the reconsideration are the same parties described in § 460.122(c)(2), with the addition of the PACE organization.

(b) *Appeal rights under Medicaid.* Medicaid participants have the right to a State Fair Hearing as described in part 431, subpart E, of this chapter.

(c) *Appeal rights for dual eligible participants.* Participants who are eligible for both Medicare and Medicaid have the right to external review by means of either the Independent Review Entity described in paragraph (a) of this section or the State Fair Hearing process described in paragraph (b) of this section.

■ 100. Section 460.200 is amended by—
■ a. Redesignating paragraphs (b)(1) through (4) as paragraphs (b)(1)(i) through (iv), respectively;
■ b. Adding a new paragraph (b)(2); and
■ c. Revising paragraph (d).

The addition and revision read as follows:

§ 460.200 Maintenance of records and reporting of data.

* * * * *

(b) * * *

(2) CMS and the State administering agency must be able to obtain, examine or retrieve the information specified at paragraph (b)(1) of this section, which may include reviewing information at the PACE site or remotely. PACE organizations may also be required to upload or electronically transmit information, or send hard copies of required information by mail.

* * * * *

(d) *Safeguarding data and records.* A PACE organization must do all of the following:

(1) Establish written policies and implement procedures to safeguard all data, books, and records against loss, destruction, unauthorized use, or inappropriate alteration.

(2) Maintain all written communications received from participants or other parties in their

original form when the communications relate to a participant's care, health, or safety in accordance with § 460.210(b)(6).

* * * * *

■ 101. Section 460.210 is amended by—

■ a. Redesignating paragraphs (b)(4) through (12) as (b)(7) through (15); and

■ b. Adding new paragraphs (b)(4) through (6).

The additions read as follows:

§ 460.210 Medical records.

* * * * *

(b) * * *

(4) All recommendations for services made by employees or contractors of the PACE organization, including specialists.

(5) If a service recommended by an employee or contractor of the PACE organization, including a specialist, is not approved or provided, the reason(s) for not approving or providing that service.

(6) Original documentation, or an unaltered electronic copy, of any written communication the PACE organization receives relating to the care, health or safety of a participant, in any format (for example, emails, faxes, letters, etc.) and including, but not limited to the following:

(i) Communications from the participant, his or her designated representative, a family member, a caregiver, or any other individual who provides information pertinent to a participant's health or safety or both.

(ii) Communications from an advocacy or governmental agency such as Adult Protective Services.

Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2022; Updates to State Innovation Waiver (Section 1332 Waiver) Implementing Regulations

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health & Human Services (HHS), Department of the Treasury.

ACTION: Final rule.

SUMMARY: This final rule sets forth provisions related to user fees for federally-facilitated Exchanges and State-based Exchanges on the Federal Platform. It includes changes related to acceptance of payments by issuers of individual market Qualified Health Plans and clarifies the regulation imposing network adequacy standards with regard to Qualified Health Plans that do not use provider networks. It also adds a new direct enrollment option for federally-facilitated Exchanges and State Exchanges and implements changes related to section 1332 State Innovation Waivers.

DATES: These regulations are effective on March 15, 2021.

FOR FURTHER INFORMATION CONTACT:

Jeff Wu, (301) 492–4305, Rogelyn McLean, (301) 492–4229, Usree Bandyopadhyay, (410) 786–6650, Grace Bristol, (410) 786–8437, or Kiahana Brooks, (301) 492–5229, for general information.

Aaron Franz, (410) 786–8027, for matters related to user fees.

Robert Yates, (301) 492–5151, for matters related to the direct enrollment option for federally-facilitated Exchange states, State-based Exchanges on the Federal Platform, and State Exchanges.

Erika Melman, (301) 492–4348, for matters related to network adequacy standards.

Emily Ames, (301) 492–4246, for matters related to acceptance of payments by QHP issuers.

Lina Rashid, (443) 902–2823, Michelle Koltov, (301) 492–4225, or Kimberly Koch, (202) 622–0854, for matters related to State Innovation Waivers.

SUPPLEMENTARY INFORMATION: In the December 4, 2020 **Federal Register**, HHS and the Department of the Treasury published the ''Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2022 and Pharmacy Benefit Manager Standards; Updates to State Innovation Waiver (Section 1332 Waiver) Implementing Regulations'' proposed rule (85 FR 78572) (hereinafter referred to as the ''proposed 2022 Payment Notice'' or ''proposed rule'') that proposed revisions to regulations in 31 CFR part 33 and 45 CFR parts 147, 150, 153, 155, 156, 158, and 184, and policies that would reduce fiscal and regulatory burdens across related program areas and provide stakeholders with greater flexibility. This final rule addresses only a subset of the policies and proposed regulatory revisions addressed in the proposed 2022 Payment Notice, including certain policies and related proposed revisions to regulations in 31 CFR part 33 and 45 CFR parts 155 and 156. HHS continues to review comments to the proposed 2022 Payment Notice and intends to address the remaining provisions in future rulemaking.

Table of Contents

I. Executive Summary

American Health Benefit Exchanges, or ''Exchanges,'' are entities established under the Patient Protection and Affordable Care Act (PPACA) [1] through which qualified individuals and qualified employers can purchase health insurance coverage in qualified health plans (QHPs). Many individuals who enroll in QHPs through individual market Exchanges are eligible to receive a premium tax credit (PTC) to reduce their costs for health insurance premiums and to receive reductions in required cost-sharing payments to reduce out-of-pocket expenses for health care services.

On January 20, 2017, the President issued an Executive Order which stated that, to the maximum extent permitted by law, the Secretary of HHS (hereinafter referred to as ''Secretary'') and heads of all other executive departments and agencies with authorities and responsibilities under PPACA should exercise all authority and discretion available to them to waive, defer, grant exemptions from, or delay the implementation of any provision or requirement of PPACA that would impose a fiscal burden on any state or a cost, fee, tax, penalty, or regulatory burden on individuals, families, health care providers, health insurers, patients, recipients of health care services, purchasers of health insurance, or makers of medical devices, products, or medications. In the December 4, 2020 **Federal Register**, we [2] published the proposed 2022 Payment Notice, which proposed to reduce fiscal and regulatory burdens across different program areas and to provide stakeholders with greater flexibility.

In previous rulemaking, we established provisions and parameters to implement many PPACA requirements and programs. In this final rule, we are amending some of these provisions and parameters, with a focus on providing states with additional flexibilities, reducing unnecessary regulatory burdens on stakeholders, empowering consumers, and improving affordability.

[1] PPACA (Pub. L. 111–148) was enacted on March 23, 2010. The Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152), which amended and revised several provisions of PPACA, was enacted on March 30, 2010. In this rule, we refer to the two statutes collectively as the ''Patient Protection and Affordable Care Act'' or ''PPACA''.

[2] As this rule is jointly published by HHS and the Department of the Treasury, HHS clarifies that throughout this final rule, the term 'we' refers only to HHS.

As we do every year in the HHS notice of benefit and payment parameters (Payment Notice), we are finalizing the user fee rates for issuers offering plans through the Exchanges using the federal platform. For the 2022 plan year, we are lowering the federally-facilitated Exchange (FFE) and State-based Exchange on the Federal Platform (SBE–FP) user fees rates to 2.25 and 1.75 percent of total monthly premiums, respectively, in order to reflect enrollment, premium and HHS contract estimates for the 2022 plan year. We are also finalizing a user fee rate for 2023 of 1.5 percent of total monthly premiums for FFE and SBE–FP states that elect in 2023 the direct enrollment option discussed later in the preamble.

We are updating the standards related to QHP issuers' acceptance of payments for premiums and cost sharing to require individual market QHP issuers to accept premium payments made by or on behalf of an enrollee in connection with an individual coverage health reimbursement arrangement (individual coverage HRA) or qualified small employer health reimbursement arrangement (QSEHRA). We are also providing a clarification to the network adequacy rules to reflect the longstanding interpretation that § 156.230 does not apply to plans seeking QHP certification that do not differentiate benefits based on whether or not enrollees receive covered services from providers that are members of the plan's provider network.

We are establishing a new direct enrollment option under which a State Exchange, SBE–FP, or an FFE state can elect to rely on direct enrollment to offer individual market consumers an enhanced QHP shopping experience. Under this option, instead of operating a centralized enrollment website, states may, with HHS approval, use direct enrollment technology to establish pathways to QHP issuers, web-brokers, and agents and brokers, to allow consumers to apply for and receive a determination or assessment of eligibility for insurance affordability programs and enroll in a QHP, or if applicable, be transferred to Medicaid or the Children's Health Insurance Program (CHIP).

The Secretaries of HHS and the Treasury (collectively, the Secretaries) are finalizing the proposal regarding State Innovation Waivers under section 1332 of PPACA, with modifications in response to comments, to codify many of the policies and interpretations outlined in the 2018 ''State Relief and Empowerment Waivers'' guidance (83 FR 53575) [3] (hereinafter referred to as the 2018 Guidance) into section 1332 regulations governing waiver application procedures, monitoring and compliance, and periodic evaluations in order to give states certainty regarding the requirements to receive and maintain approval by the HHS and the Department of the Treasury (collectively, the Departments) for State Innovation Waivers under section 1332 of PPACA.

We intend to address the other topics and proposed policies outlined in the proposed 2022 Payment Notice in future rulemaking, taking into account comments received on those proposals.

II. Background

A. Legislative and Regulatory Overview

Title I of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) added a new title XXVII to the Public Health Service Act (PHS Act) to establish various reforms to the group and individual health insurance markets.

These provisions of the PHS Act were later augmented by other laws, including PPACA. Subtitles A and C of title I of PPACA reorganized, amended, and added to the provisions of part A of title XXVII of the PHS Act relating to group health plans [4] and health insurance issuers in the group and individual markets. The term ''group health plan'' includes both insured and self-insured group health plans.

Sections 1311(b) and 1321(b) of PPACA provide that each state has the opportunity to establish an individual market Exchange that facilitates the purchase of insurance coverage by qualified individuals through QHPs and meets other standards specified in PPACA. Section 1321(c)(1) of PPACA directs the Secretary to establish and operate such Exchange within states that do not elect to establish an Exchange or, as determined by the Secretary on or before January 1, 2013, will not have an Exchange operable by January 1, 2014.

Section 1311(c)(1) of PPACA provides the Secretary the authority to issue regulations to establish criteria for the certification of QHPs, including network adequacy standards at section 1311(c)(1)(B) of PPACA. Section 1311(d) of PPACA describes the minimum functions of an Exchange. Section 1311(e)(1) of PPACA grants the Exchange the authority to certify a health plan as a QHP if the health plan meets the Secretary's requirements for certification issued under section 1311(c)(1) of PPACA, and the Exchange determines that making the plan available through the Exchange is in the interests of qualified individuals and qualified employers in the state.

Section 1312(e) of PPACA directs the Secretary to establish procedures under which a state may permit agents and brokers to enroll qualified individuals and qualified employers in QHPs through an Exchange and to assist individuals in applying for financial assistance for QHPs sold through an Exchange.

Sections 1313 and 1321 of PPACA provide the Secretary with the authority to oversee the financial integrity of State Exchanges, their compliance with HHS standards, and the efficient and non-discriminatory administration of State Exchange activities. Section 1321 of PPACA provides for state flexibility in the operation and enforcement of Exchanges and related requirements.

Section 1321(a) of PPACA provides broad authority for the Secretary to establish standards and regulations to implement the statutory requirements related to Exchanges, QHPs and other components of title I of PPACA. Section 1321(a)(1) of PPACA directs the Secretary to issue regulations that set standards for meeting the requirements of title I of PPACA for, among other things, the establishment and operation of Exchanges. When operating an FFE under section 1321(c)(1) of PPACA, HHS has the authority under sections 1321(c)(1) and 1311(d)(5)(A) of PPACA to collect and spend user fees. Office of Management and Budget (OMB) Circular A–25 establishes federal policy regarding user fees and specifies that a user charge will be assessed against each identifiable recipient for special benefits derived from federal activities beyond those received by the general public.

Section 1321(d) of PPACA provides that nothing in title I of PPACA must be construed to preempt any state law that does not prevent the application of title I of PPACA. Section 1311(k) of PPACA specifies that Exchanges may not establish rules that conflict with or prevent the application of regulations issued by the Secretary.

Section 1332 of PPACA provides the Secretaries with the discretion to approve a state's proposal to waive specific provisions of PPACA, provided the state's section 1332 waiver plan meets certain requirements. The Departments finalized implementing

[3] *https://www.govinfo.gov/content/pkg/FR-2018-10-24/pdf/2018-23182.pdf.*

[4] The term ''group health plan'' is used in title XXVII of the PHS Act and is distinct from the term ''health plan'' as used in other provisions of title I of PPACA. The term ''health plan'' does not include self-insured group health plans.

regulations on February 27, 2012 (76 FR 13553) and published detailed guidance on the Departments' application of section 1332 to proposed state waivers on October 24, 2018 (83 FR 53575).

The 21st Century Cures Act (Cures Act), Public Law 114–255, 130 Stat. 1033, was enacted on December 13, 2016. Section 18001 of the Cures Act amends the Internal Revenue Code (Code), the Employee Retirement Income Security Act of 1974, and the PHS Act to permit an eligible employer to provide a QSEHRA to its eligible employees. Section 9831(d) of the Code, as amended by the Cures Act, establishes requirements for providing a QSEHRA. On October 31, 2017, the Department of the Treasury and the Internal Revenue Service (IRS) issued Notice 2017–67, 2017–47 IRB 517, to provide guidance on the requirements for providing a QSEHRA.

1. Exchanges

We published a request for comment relating to Exchanges in the August 3, 2010 **Federal Register** (75 FR 45584). We issued initial guidance to states on Exchanges on November 18, 2010. In the July 15, 2011 **Federal Register** (76 FR 41865), we published a proposed rule with proposals to implement components of the Exchanges, and a rule in the August 17, 2011 **Federal Register** (76 FR 51201) regarding Exchange functions in the individual market and Small Business Health Options Program (SHOP), eligibility determinations, and Exchange standards for employers. A final rule implementing components of the Exchanges and setting forth standards for eligibility for Exchanges was published in the March 27, 2012 **Federal Register** (77 FR 18309) (Exchange Establishment Rule).

In the 2014 Payment Notice and in the Amendments to the HHS Notice of Benefit and Payment Parameters for 2014 interim final rule, published in the March 11, 2013 **Federal Register** (78 FR 15541), we set forth standards related to Exchange user fees. We established an adjustment to the FFE user fee in the Coverage of Certain Preventive Services under the Affordable Care Act final rule, published in the July 2, 2013 **Federal Register** (78 FR 39869) (Preventive Services Rule).

2. Health Reimbursement Arrangements

On October 29, 2018, the Departments of HHS, Labor, and the Treasury published proposed regulations in the **Federal Register** (83 FR 54420) on health reimbursement arrangements (HRAs) and other account-based group health plans including individual coverage HRAs. On June 20, 2019, the Departments of HHS, Labor, and the Treasury published final regulations in the **Federal Register** (84 FR 28888) on HRAs and other account-based group health plans.

3. State Innovation Waivers

Section 1332(a)(4)(B) of PPACA requires the Secretaries to issue regulations regarding procedures for State Innovation Waivers. On March 14, 2011, the Departments published the ''Application, Review, and Reporting Process for Waivers for State Innovation'' proposed rule [5] in the **Federal Register** (76 FR 13553) to implement section 1332(a)(4)(B) of PPACA. On February 27, 2012, the Departments published the ''Application, Review, and Reporting Process for Waivers for State Innovation'' final rule [6] in the **Federal Register** (77 FR 11700) (hereinafter referred to as the ''2012 Final Rule''). On October 24, 2018, the Departments issued the 2018 Guidance, which superseded the previous guidance [7] published on December 16, 2015 in the **Federal Register** (80 FR 78131) and provided additional information about the requirements that states must meet for waiver proposals, the Secretaries' application review procedures, pass-through funding determinations, certain analytical requirements, and operational considerations. On November 6, 2020, the Departments issued an interim final rule [8] in the **Federal Register** (85 FR 71142), which revised regulations relating to public notice procedures to set forth flexibilities in the public notice requirements and post-award public participation requirements for State Innovation Waivers under section 1332 of PPACA during the Coronavirus Disease 2019 (COVID–19) public health emergency (PHE).

B. Stakeholder Consultation and Input

HHS has consulted with stakeholders on policies related to the operation of Exchanges. We have held a number of listening sessions with consumers, providers, employers, health plans, advocacy groups and the actuarial community to gather public input. We have solicited input from state representatives on numerous topics, particularly the direct enrollment option for FFE states and State Exchanges.

We consulted with stakeholders through regular meetings with the National Association of Insurance Commissioners (NAIC), and regular contact with states, health insurance issuers, trade groups, consumer advocates, employers, and other interested parties. We considered all public input we received on the proposals addressed in this final rule as we developed the policies in this final rule.

C. Structure of Final Rule

The regulations outlined in this final rule are codified in 45 CFR parts 155 and 156. In addition, the regulations outlined in this final rule governing State Innovation Waivers under section 1332 of PPACA are codified in 31 CFR part 33 and 45 CFR part 155.

We establish a new direct enrollment option for State Exchanges, SBE–FPs and FFE states to use direct enrollment technology and non-Exchange websites developed by approved web-brokers, issuers, and other direct enrollment partners to enroll qualified individuals in QHPs offered through the Exchange.

As we do every year in the annual HHS notice of benefit and payment parameters, we set forth the user fee rates for the 2022 benefit year for all issuers participating on the Exchanges using the federal platform. We also finalize modifications to the regulations addressing network adequacy standards for non-network plans. Finally, we require individual market QHP issuers to accept premium payments made by or on behalf of an enrollee in connection with an individual coverage HRA or QSEHRA.

The changes in 31 CFR part 33 and 45 CFR part 155 related to State Innovation Waivers finalize with modifications the proposals to codify many of the policies and interpretations outlined in the existing 2018 Guidance into the section 1332 waiver implementation regulations in order to give states certainty regarding the requirements to receive and maintain approval of State Innovation Waivers by the Departments.

III. Summary of the Proposed Provisions of the HHS Notice of Benefit and Payment Parameters for 2022, Analysis of and Responses to Public Comments, and Provisions of the Final Rule—Department of Health and Human Services

In the December 4, 2020 **Federal Register** (86 FR 78572), we published the ''Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2022 and

Pharmacy Benefit Manager Standards; Updates To State Innovation Waiver (Section 1332 Waiver) Implementing Regulations'' proposed rule. We received 542 comments in response to the policies in the proposed 2022 Payment Notice. Comments were received from members of Congress, state entities, such as departments of insurance and State Exchanges, health insurance issuers, providers and provider groups, consumer groups, industry groups, national interest groups, and other stakeholders. The comments ranged from general support of or opposition to the proposed provisions to specific questions or comments regarding proposed changes. We received a number of comments and suggestions that were outside the scope of the proposed rule that are not addressed in this final rule.

In this final rule, we provide a summary of the proposed provisions we are addressing in this final rule, a summary of the public comments received that relate to those proposals, our responses to these comments, and a description of the provisions we are finalizing.

We first address comments regarding the publication of this final rule and the comment period.

Comment: Multiple commenters criticized the length of the comment period, stating that a longer comment period is necessary to allow stakeholders to review the proposed rule and provide thoughtful comments. Some commenters also expressed concern that HHS would not adequately review and consider all comments before issuing a final rule; that HHS appears to be rushing to finalize substantial changes to regulations that would hamper access to coverage through the Exchanges; and that HHS should defer any major policy decisions affecting access to Exchange coverage to the incoming Administration.

Response: We disagree that the comment period was not long enough to allow stakeholders to provide meaningful comments. Each year, we generally have set a 30-day comment period to accommodate issuer filing deadlines for the upcoming plan year and to avoid creating significant challenges for states, Exchanges, issuers, and other entities operating under strict deadlines related to approval of products. Moreover, we found commenters' submissions to be thoughtful and reflective of a detailed review and analysis of the proposed rule. We further recognize the importance of federal agencies reviewing and considering all relevant comments before issuing a final rule. For this reason, HHS determined that it was appropriate to address in this final rule only those policies in the proposed 2022 Payment Notice that were most important to advancing the policy goals of reducing fiscal and regulatory burdens across related program areas and providing stakeholders with greater flexibility. Limiting the policies addressed in this final rule allowed us to review all relevant comments and expedite the publication of this final rule.

For reasons more fully reviewed in the preamble discussions related to specific policies in this final rule, we also disagree that the rule will hamper access to Exchange coverage. The policies we finalize in this rule have the potential to increase access to Exchange coverage. For example, the Exchange DE option we finalize in this rule has the potential to increase incentives for licensed agents, brokers, and web-brokers to promote Exchange enrollment through improvements to the consumer application and enrollment experience. The policies this final rule adopts in relation to section 1332 waivers are designed to provide flexibilities that will allow states to propose and implement waiver plans to increase access to Exchange coverage by reducing premiums. In addition, the policies related to individual coverage HRAs and QSEHRAs are being finalized to remove obstacles and ensure individuals offered these types of coverage have seamless access to enroll in individual market QHP coverage.

Finally, we disagree that major policy decisions should be deferred until a new Administration is in place, as this final rule constitutes a valid exercise of the Departments' rulemaking authorities.

A. Part 155—Exchange Establishment Standards and Other Related Standards Under the Affordable Care Act

1. Standards for Direct Enrollment Entities (§ 155.221)

a. FFE, SBE–FP, and State Exchange Direct Enrollment Option

Classic Direct Enrollment (Classic DE) and Enhanced Direct Enrollment (EDE) are pathways offered as part of the FFE's DE program under which third-party entities (issuers, agents and brokers, and web brokers) are approved by HHS to assist consumers with QHP plan selection and enrollment through a non-Exchange website in a manner considered to be through the Exchange.[9] The Classic DE and EDE pathways are available in FFE and SBE–FP states. In light of the success of the FFEs' DE program in improving the consumer experience, we proposed to provide additional options for states that wish to promote more flexible and lower-cost private sector approaches for assisting consumers with shopping and enrolling in individual market QHP coverage offered through Exchanges.

While we have taken a number of actions to reduce the burden on states of establishing State Exchanges, we wish to maximize flexibility for all states to oversee their own health care markets and to address unique state market dynamics. In the Exchange Final Rule,[10] we recognized that states are best equipped to adapt Exchange functions to their local markets and the unique needs of their residents.[11] In addition, we recognized that for decades, issuers, licensed agents and brokers, and web-brokers have been engaging directly with consumers in offering health insurance and assisting consumers in selecting, enrolling in, and managing their coverage. We believe that the proposal to establish a new DE option for Exchanges would allow states to continue to more effectively exercise their traditional oversight authority over health insurance markets, while enhancing the consumer experience, increasing competition, and lowering costs.

To date, Exchange eligibility application and enrollment activities have been supported through Exchange-operated websites. One of the primary advantages of this design is that consumers can access one-stop shopping for all QHPs offered through an Exchange and can access relevant details on such plans in a standardized format. Before Exchanges existed, consumers shopping for individual health insurance coverage who searched for this information would generally have to contact multiple issuers or visit

[9] Classic DE is the original version of DE, which utilizes a ''double redirect'' from a DE entity's non-Exchange website to *HealthCare.gov* where the eligibility application is submitted and an eligibility determination is made by the Exchange, and then back to the DE entity's non-Exchange website for QHP shopping and plan selection consistent with applicable requirements in §§ 155.220(c)(3)(i), 155.221, 156.265, or 156.1230(b). EDE is the version of DE which allows consumers to complete all steps in the application, eligibility and enrollment processes on the DE entity's non-Exchange website consistent with applicable requirements in §§ 155.220(c)(3)(ii), 155.221, 156.265, or 156.1230(b). EDE uses application programming interfaces (APIs) that are made available, owned, and maintained by CMS to transfer data between *HealthCare.gov* and the DE entity's non-Exchange website.

[10] 77 FR 18310 (March 27, 2012). Available at *https://www.govinfo.gov/content/pkg/FR-2012-03-27/pdf/2012-6125.pdf.*

[11] See, for example, 77 FR at 18313.

multiple websites, and the information would often be presented inconsistently, preventing true apples-to-apples comparison shopping. Exchange-run eligibility application and enrollment websites also help to manage coordination of coverage between private health insurance coverage and Medicaid and CHIP by offering full eligibility and enrollment integration between the programs or by providing connections to those public programs for individuals who may qualify for participation.

While Exchange-operated eligibility application and enrollment websites have undoubtedly helped many consumers shop for and compare plans, they also present some significant potential disadvantages given historical and current implementations of Exchange-operated websites. First, as we explained in the proposed rule, it can be costly and burdensome to create and operate Exchanges, including not only the cost of designing and maintaining a complex website, but also the burden of staffing and operating call centers that must be scaled up during each annual Open Enrollment Period (OEP), and then scaled down during lower-traffic periods.

Second, the design of Exchange-operated websites also tends to result in choke points when a large number of consumers use the same website at the same time to apply, shop for, and enroll in coverage. For example, on high traffic days near the end of the annual OEP, some consumers trying to access *HealthCare.gov* have been redirected to the FFE call center or told to come back to the website at a later time to complete their enrollment due to high volume. The ability for consumers to shop for coverage through any one of the websites operated by Classic DE and EDE entities with which HHS partners during these high traffic days provides an important, additional avenue to ensure consumers complete their plan selection and enroll in coverage. Although we recognize that without robust participation and competition among DE entities, a DE entity's website may experience similar choke points due to high consumer traffic, we believe that providing Exchanges in states that elect this option with the flexibility to partner with more than one DE entity mitigates this risk.

Third, we believe it is inherently difficult for Exchanges to keep up with the rapid pace of innovation in e-commerce and the ever-evolving preferences of online shoppers, who are accustomed to shopping for the products they buy in a manner that is not only tailored to their specific needs, but is also aesthetically appealing and constantly refreshed. Federal and state governments, for example, can be limited in their ability to frequently refresh and update the consumer experience due to the length of time it can take to award vendor contracts.[12] Finally, we have heard criticisms from some stakeholders, including agents, brokers, and web-brokers, that the Exchange-operated eligibility application and enrollment website model competes directly with and may crowd out market players such as web-brokers, licensed agents and brokers, and issuers, dampening commercial investments in outreach and marketing by these market players to reach new consumers, including those who are currently uninsured.

We believe that both the FFE's DE and EDE pathways have promoted innovation and competition in states whose consumers use *HealthCare.gov* and have ultimately led to better experiences for consumers in these states. The FFE's Classic DE pathway has been in operation since the launch of the FFE in 2013. The FFE EDE pathway has been in operation since 2018. Together, for the 2020 Plan Year, the Classic DE and EDE pathways were responsible for approximately 29 percent of FFE enrollments. The recent experience from the 2021 Open Enrollment Period shows substantial growth in the use of the EDE pathway. The number of consumers who enrolled through the EDE pathway more than doubled from the prior 2020 Open Enrollment Period—increasing from approximately 521,000 to 1,130,000 plan selections, representing 37 percent of FFE enrollments.

Currently, the *HealthCare.gov* eligibility application and enrollment website and approved private sector non-Exchange websites operate in parallel to enroll consumers in individual market QHPs offered through the FFEs and SBE–FPs. Like Exchange-operated websites, non-Exchange websites operated by Classic DE and EDE entity partners in FFE and SBE–FP states are required to provide standardized comparative information to assist consumers shopping for coverage.[13] DE entities are also able to provide assistance with a broader array of plan options, including both on- and off-Exchange plan options and ancillary products. These additional coverage options are important for many consumers who do not qualify for premium tax credits or have less incentive to enroll in Exchange coverage, including employees with an offer of an affordable individual coverage HRA who may wish to opt into that coverage, as well as employees offered both an individual coverage HRA and a cafeteria plan because section 125(f)(3) of the Code specifically prohibits using salary reduction contributions under a cafeteria plan to purchase on-Exchange coverage.[14] Finally, the FFE's EDE pathway helps to reduce costs to the federal government by enrolling many consumers without using the FFEs' eligibility application intake and enrollment resources (for example, the Marketplace call center and the *HealthCare.gov* website).

To build on the success of the FFE's Classic DE and EDE pathways in FFE and SBE–FP states that use *HealthCare.gov*, and to offer additional flexibility to all Exchanges, we proposed a new opportunity for states to adapt Exchange activities to the needs of local state markets and leverage the benefits of direct enrollment to enhance the consumer experience through a private sector-focused consumer engagement and enrollment strategy. We proposed to add § 155.221(j) to establish a process for states to elect a new Exchange Direct Enrollment option (Exchange DE option) in which a state can request to allow private sector entities (including QHP issuers, web-brokers, agents and brokers) to operate enrollment websites through which consumers can apply, receive an eligibility determination from the Exchange, and purchase an individual market QHP offered through the Exchange with advance payments of the premium tax credit (APTC) and cost-sharing reductions (CSRs), if otherwise eligible.

[12] For example, Federal contracting rules generally require full and open competitions under which federal agencies must seek proposals to fulfill an agency's needs for contractor services. See 10 U.S.C. 2304 and 41 U.S.C. 3301. These competitions generally last for months and may impede an agency's ability to quickly engage a vendor for the information technology services like those that may be necessary to update, improve, or otherwise address issues with the consumer shopping, eligibility, and enrollment experience. Moreover, even if a federal or state agency has a suitable contract in place that covers such services, there may not be sufficient funds allocated to the contract or otherwise available to the agency to cover the services at the time they are needed or desired. In these situations, government agencies like State Exchanges and HHS may be required to delay the services until a future funding cycle. Commercial entities like DE and EDE entities generally do not face such impediments and may more readily respond to consumer needs and preferences.

[13] See, for example, 45 CFR 155.220(c)(3)(i)(A) (for web-brokers) and 156.1230(a)(1)(ii) (for QHP issuers).

[14] As detailed in the proposed 2022 Payment Notice, there is a growing cohort of consumers who may be interested in off-Exchange coverage options. See 85 FR 78616–78619.

We proposed in § 155.221(j) that, subject to HHS approval, a state may elect for the Exchange in the state to engage one or more entities described in paragraph (a) [15] to facilitate QHP enrollments through its Exchange. Under this option, similar to the current FFE DE program, approved DE entities would enroll qualified individuals in a QHP in a manner that constitutes enrollment through the Exchange [16] and would also assist individuals in applying for, and receiving eligibility determinations from the Exchange, for APTCs and CSRs.

In § 155.221(j)(1), we proposed requirements that would apply to traditional State Exchanges that do not rely on the federal eligibility and enrollment platform that want to pursue the Exchange DE option and become an SBE–DE. In § 155.221(j)(2), we proposed requirements that would apply to states with an FFE or SBE–FP [17] that want to pursue the Exchange DE option and become an FFE–DE or SBE–FP–DE. We proposed that, subject to HHS approval, the Exchange DE option may be implemented in states with a State Exchange starting in plan year 2022. We proposed that, subject to HHS approval, the Exchange DE option may be implemented in states with an FFE or SBE–FP starting in plan year 2023.

Under the Exchange DE option, states would be able to request to adopt a private sector-based enrollment approach as an alternative to the consumer-facing enrollment website operated by the Exchange (for example, *HealthCare.gov* for the FFEs). This de-centralized, private sector-focused approach would transition application and enrollment functions to websites operated by approved partners (DE partners) to serve as the online platform(s) through which consumers apply for and enroll in individual market QHPs offered through the Exchange in their state, as well as apply for and receive determinations of APTC and cost-sharing reduction (CSR) eligibility for QHP coverage offered through the Exchange. The Exchange in a state that elects this option would implement a direct enrollment pathway (or pathways) with secure connections between its back-end eligibility determination system and the websites (or systems) of approved issuers, web-brokers, or agents and brokers that enable consumers to complete and submit the single streamlined eligibility application as described in § 155.405, receive an eligibility determination from the Exchange, select a plan and enroll in a QHP, with or without APTC and CSRs (if otherwise eligible). Exchanges would continue to be responsible for meeting, and ensuring its approved DE partners meet, all applicable statutory and regulatory requirements governing application for and enrollment in QHPs and other applicable state health subsidy programs.[18] Under the Exchange DE option, the Exchange would also remain the entity responsible for making all determinations of whether an applicant is eligible for QHP enrollment, APTC, and CSRs, assessing or determining whether an applicant is eligible for Medicaid or CHIP, and conducting required verifications of consumer eligibility against trusted data sources. The Exchange would also continue to be responsible for sharing eligibility determination and enrollment information in coordination with issuers and HHS in accordance with 45 CFR 155.400, 155.430, and 155.340. The Exchange will continue to issue the applicable APTC to carriers on behalf of qualified individuals, and continue to be responsible for sharing this information with the IRS to support reconciliation of APTC on individual tax returns.

Consistent with section 1311(d)(4)(F) of PPACA and 45 CFR 155.302, under the Exchange DE option, the Exchange would also continue to be responsible for conducting assessments or determinations of eligibility for Medicaid and CHIP, and where appropriate, for referring individuals who are assessed or determined eligible for Medicaid or CHIP to the appropriate state Medicaid agency for enrollment in those programs.[19]

In proposing the Exchange DE option, we noted that the applicable statutory provisions do not require Exchanges to operate an enrollment website. Rather, section 1311(d)(4)(C) of PPACA provides that an Exchange must maintain an internet website through which enrollees and prospective enrollees of QHPs may obtain standardized comparative information on QHPs available in the state. Within the statutory framework, these are some of the specific minimum functions an Exchange must undertake to facilitate the purchase of QHPs under section 1311(b)(1)(A) of PPACA and make available QHPs to qualified individuals and employers under section 1311(d)(2)(A) of PPACA. These minimum functions facilitate the purchase of QHPs by helping to make the purchase of QHPs easier and administering elements of the structure necessary to make QHPs available. An Exchange can continue to meet these obligations without operating a singular consumer-facing eligibility and enrollment website. In the context of operating an internet website, we interpret the statutory language at section 1311(c)(5) and (d)(4)(C) of PPACA to require that Exchanges provide consumers with the ability to view comparative information on QHP options, but that the Exchange may direct consumers to other entities or resources for purposes of submitting applications for eligibility and enrolling in QHPs, with APTC and CSRs, if otherwise eligible. We further explained that Exchanges, rather than DE entities, in states that elect to pursue this new option would continue to be responsible for determining eligibility for, and granting, exemption certifications under section 1311(d)(4)(H) of PPACA, as applicable; making available an electronic calculator consistent with section 1311(d)(4)(G) of PPACA; establishing a Navigator program as required under section 1311(d)(4)(K) of PPACA; and providing for the operation of a toll-free telephone hotline under section 1311(d)(4)(B) of PPACA.

[15] Section 155.221(a) identifies QHP issuers and web-brokers as eligible direct enrollment entities.

[16] Section 1401(a) of PPACA added new section 36B to the Code, which provides for PTCs for eligible individuals, while section 1402 of PPACA provides for CSRs for eligible individuals. For individuals to be eligible to receive PTCs, among other requirements, PPACA requires that individuals be enrolled in a QHP through an Exchange. CMS has interpreted this statutory language to allow a QHP issuer to enroll an applicant who initiates enrollment directly with the QHP issuer. See § 156.1230, whereby individuals enrolling directly on the site of a QHP issuer are considered enrolled ''through an Exchange'' so long as the issuer meets applicable requirements. We adopted a similar approach to allow a web-broker to enroll an applicant who seeks to enroll through the web-broker's website. See § 155.220(a)(2) and (c), whereby individuals enrolling directly through the site of a web-broker are considered enrolled ''through an Exchange'' so long as the web-broker meets applicable requirements.

[17] As detailed further below, states with an SBE–FP can request to pursue the Exchange DE option as an SBE–FP–DE. If a state that currently operates an SBE–FP is interested in transitioning to a full State Exchange that implements this Exchange DE option, it would need to update its Blueprint accordingly, and meet statutory and regulatory requirements to become a State Exchange implementing the Exchange DE option (an SBE–DE). Such requirements include operating its own eligibility and enrollment platform rather than relying on the federal platform.

[18] See section 1413(e) of PPACA for a definition of the term ''applicable state health subsidy program.''

[19] Section 1311(d)(4)(F) of PPACA requires Exchanges to inform individuals of eligibility requirements for Medicaid, CHIP, or any applicable state or local public programs and, if through screening of the application the Exchange determines such individuals are eligible for any such program and refer such individuals to the appropriate state Medicaid agency for enrollment in such program(s).

In connection with the Exchange DE option, the Exchange would also be required to make available a website listing basic QHP information for comparison, and a listing with links to approved partner websites for consumer shopping, plan selection, and enrollment activities. Consistent with section 1311(d)(4)(E) of PPACA, the comparative plan information presented on the Exchange website would need to continue to utilize a standardized format, including the use of the uniform summary of benefits and coverage established under section 2715 of the PHS Act.[20] The standardized comparative information displayed on Exchange websites must also continue to include the quality ratings assigned to each QHP offered through the Exchange.[21] Finally, the Exchange, along with its issuers and registered agents and brokers, which may also function as DE entities, would continue to be responsible for meeting federal accessibility standards under 45 CFR 155.205(c) for individuals living with disabilities and for individuals who have limited English proficiency.[22]

Through private sector partners such as web-brokers and issuers, states may pursue alternatives to *HealthCare.gov* or other centralized, publicly-operated Exchange enrollment websites to enhance the consumer experience and provide additional incentives for insurers and licensed agents and brokers to conduct marketing and outreach to enroll more consumers in coverage. While states may consider creating enhanced commission structures or providing other market-based incentives, we also recognize the inherent incentive to issuers, web-brokers, and agents and brokers that will result from removing what some stakeholders view as a dominant public-sector competitor, making them the primary channels through which individuals shop for and enroll in individual market QHPs in those states.[23] In the proposed rule we recognized that consumers who apply and enroll through a DE partner will have the benefit of assistance from a state-licensed agent or broker if they so choose. These agents and brokers will have been recognized by the relevant state as possessing the specialized expertise necessary to help consumers choose between health insurance options.

(1) Federally-Facilitated Exchange Direct Enrollment (FFE–DE) and State Exchange on the Federal Platform Direct Enrollment (SBE–FP–DE) Option

We proposed an option for any FFE or SBE–FP state to request the use of direct enrollment as the avenue through which individual market consumers and qualified individuals can shop for and purchase a QHP offered through the Exchange in the state, and apply and receive determinations of eligibility for APTC and CSRs. While SBE–FP states have the authority and responsibility for certifying QHPs and performing consumer outreach and assistance activities, because they rely on the federal eligibility and enrollment platform and consumer-facing website, in this respect they are more similar to the FFE–DE model than the SBE–DE model. In addition, the current FFE DE program and accompanying requirements also apply in SBE–FP states.[24]

Under the proposed FFE–DE and SBE–FP–DE option, *HealthCare.gov* would continue to provide the same standardized comparative information on QHP options that is available today. The FFE would post and maintain an up-to-date list on *HealthCare.gov* of approved direct enrollment partners operating in the state. As such, consumers would still be able to view comparative information on *HealthCare.gov* for all QHP options available in their area and would also be able to access information to connect with approved direct enrollment partners in that state. In the event that any approved direct enrollment partner does not have the technical capability to process a consumer eligibility application, *HealthCare.gov* would process that application. The Exchange would continue to have responsibility for operating a toll-free call center to provide eligibility and enrollment support for all consumers, pursuant to 45 CFR 155.205(a). However, under the Exchange DE option, there may be some cases where the DE partner may be best able to provide additional support to a consumer in completing their enrollment through the DE partner's website. We proposed to codify requirements at 45 CFR 155.221(j)(2)(ii), whereby a state that elects to implement the Exchange DE option must execute a federal agreement with HHS that defines the division of responsibilities between HHS and the state. This would include the Exchange's responsibilities, as well as DE partners' responsibilities for various activities, such as those pertaining to operating a toll-free call center to provide eligibility and enrollment support for consumers that enroll in coverage through an approved DE partner's website.

By leveraging private sector entities and directing consumers to approved direct enrollment partners, the vast majority of consumer traffic would flow to direct enrollment partners, leaving the *HealthCare.gov* structure in place primarily to provide the supporting functions that it does today, like the processing of data matching issues and special enrollment period verification documentation, casework, and eligibility appeals.

As noted above, the FFE would remain the entity responsible for making eligibility determinations and verifying whether an applicant is eligible for QHP enrollment, APTC and CSRs. The FFE would also continue to reconcile eligibility and enrollment information with issuers, in accordance with 45 CFR 155.340, 155.400, and 155.430, in order for HHS to issue the applicable APTC to carriers on behalf of qualified individuals, and would share similar information with the IRS to facilitate the IRS' reconciliation of APTC on individual tax returns. Under this option, given that an FFE–DE state or SBE–FP–DE state would use one or more participating, federally-approved Classic DE and EDE entities, at a minimum, the FFE privacy and security standards[25] and the FFE DE program

[20] See 45 CFR 155.205(b).

[21] See section 1311(d)(4)(D) of PPACA and 45 CFR 155.205(b). Also see sections 1311(c)(3) and (c)(4) of PPACA and 45 CFR 155.1400 and 1405.

[22] Covered entities such as States, recipients of Federal financial assistance from HHS, programs or activities administered by HHS under title I of PPACA (such as the FFE), and programs or activities administered by any entity established under Title I (such as State Exchanges), must comply with applicable federal civil rights laws that prohibit discrimination on the basis of race, color, national origin, sex, age, and disability. These laws include Section 1557 of PPACA (42 U.S.C. 18116) (Section 1557), Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*) (Title VI), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) (Section 504), and the Americans with Disabilities Act of 1990 (29 U.S.C. 12101 *et seq.*) (ADA).

[23] Removing this public-sector competitor may be of particular interest due to the competitive advantage Exchanges hold over web-brokers under federal user fee and medical loss ratio (MLR) regulations. Consumers pay for both Exchange user fees and web-broker commissions indirectly through higher premiums. However, Exchange user fees and web-broker commissions are accounted for differently in the MLR calculation. Exchange user fees, a portion of which are used to fund Exchange-operated eligibility and enrollment websites that could be considered to be competitive with EDE interfaces, are treated as taxes, which makes it easier to meet the MLR requirement. In contrast, web-broker commissions count toward administrative costs, which makes it harder for issuers to meet the MLR requirements. This MLR accounting disparity on that portion of the Exchange user fees arguably disadvantages EDE entities.

[24] See, for example, 45 CFR 155.220(l) and 155.221(h).

[25] See 45 CFR 155.260 through 155.285.

requirements [26] would continue to apply.

We proposed in § 155.221(j)(2) that a state with an FFE or SBE–FP may request to pursue the FFE–DE or SBE–FP–DE option starting in plan year 2023, as applicable. We proposed that, pursuant to a request from the state, HHS may partner with the requesting state to implement the direct enrollment option described in paragraph (j). The FFE or SBE–FP must meet all applicable federal statutory and regulatory requirements for the operation of an Exchange, including maintaining the single, streamlined eligibility application required under § 155.405. To obtain HHS approval to implement this option, the state must coordinate with HHS on an implementation plan and timeline that allows for a transition period, developed at the discretion of HHS in consultation with the state, necessary to operationalize the required changes to implement this option. We proposed to codify these new requirements at paragraph (j)(2)(i). Additionally, we proposed to codify requirements at paragraph (j)(2)(ii), whereby the state must execute a federal agreement with HHS that includes the terms and conditions for the arrangement and that defines the division of responsibilities between HHS and the state. Further, to obtain HHS approval to implement the FFE–DE or SBE–FP–DE option, we proposed at § 155.221(j)(2)(iii) that the state must agree to procedures developed by HHS for the collection and remittance of the monthly user fee described in § 156.50(c) in support of the responsibilities undertaken by the state and HHS. Finally, we proposed at paragraph (j)(2)(iv) that the state would be required to perform and cooperate with activities established by HHS related to oversight and financial integrity requirements in accordance with section 1313 of PPACA, including complying with reporting and compliance activities required by HHS and described in the Federal agreement entered into pursuant to paragraph (j)(2)(ii).

(2) State Exchange Direct Enrollment Option (SBE–DE)

We proposed that a State Exchange that does not rely on the federal eligibility and enrollment platform can also elect the Exchange DE option to engage approved private-sector entities as the pathway (or pathways) for consumers in their state to apply for, and enroll in, QHPs offered through the Exchange. Under this option, the State Exchange would remain responsible for continuing to operate an internet website to provide the same standardized comparative information on QHP options that is available today and for making eligibility determinations via its eligibility rules engine for consumers applying for APTC, CSRs, and enrollment in QHPs offered through the Exchange. However, this new option would permit multiple private entities, such as a combination of web-brokers and QHP issuers, to provide the consumer-facing resources for consumers to apply for and enroll in individual market coverage offered through the Exchange. State Exchanges that pursue this option could thereby leverage direct enrollment technology and direct consumers to approved partner non-Exchange websites to apply for APTC and CSRs, as well as select and enroll in a QHP offered through the Exchange (if otherwise eligible). In the event that direct enrollment partners in the state do not have the technical capability to process any consumer's application, the State Exchange would be required to maintain the capability to process that application through its own consumer-facing website.

We proposed in § 155.221(j)(1) that a state with a State Exchange that does not rely on the federal eligibility and enrollment platform may request approval to pursue the SBE–DE option by submitting a revised Exchange Blueprint within 90 days of their targeted launch date, in accordance with § 155.105(e) to do so.[27] We also proposed that the State Exchange must meet all other applicable federal statutory and regulatory requirements for the operation of an Exchange, including establishing and maintaining the single, streamlined eligibility application under § 155.405. Following submission of a revised Exchange Blueprint, HHS would have up to a total of 90 days [28] to review this revised submission and render a decision as to approval. We proposed to codify the new requirement at § 155.221(j)(2)(ii) that, to obtain HHS approval, the state would need to provide HHS an implementation plan and timeline that details the key activities, milestones, and communication and outreach strategy to support the transition of enrollment operations to direct enrollment entities. Additionally, in accordance with § 155.105(c)(2) and the new requirement proposed at § 155.221(j)(1)(ii), a State Exchange that implements the SBE–DE option would be required to demonstrate to HHS operational readiness for the State Exchange and its proposed direct enrollment entities to enroll qualified individuals in a QHP in a manner that constitutes enrollment through the Exchange and to enable individuals to apply for APTC and cost sharing for QHPs.

While we proposed that State Exchanges that elect to implement the Exchange DE option would retain the flexibility to determine their own business controls, as well as to decide the state-specific requirements and mechanisms for approval and oversight of direct enrollment entities operating in the state, we would encourage these states to review and adopt processes and standards similar to those in the existing FFE federal direct enrollment and EDE framework, as described in 45 CFR 155.220, 155.221, 156.1230, and in sub-regulatory guidance.[29] Moreover, we proposed to codify a new requirement at § 155.221(j)(1)(iii) whereby State Exchanges that elect to implement the Exchange DE option are obligated to ensure that a minimum of one state-approved direct enrollment entity meets the minimum federal requirements applicable to DE entities that seek approval to participate in the FFE DE program, including requirements at 45 CFR 155.220 and 155.221, and is capable of enrolling all consumers in the state. In particular, we explained that we believe it is critical that State Exchanges that elect to implement the Exchange DE option ensure, at a minimum, that at least one approved web-broker DE entity meets requirements that align with the FFE standards under 45 CFR 155.220(c)(3)(i)(A) and (D) [30] to ensure

[26] See 45 CFR 155.220, 155.221, and 156.1230.

[27] This approach is consistent with the framework established in prior rulemakings that require a state to notify HHS and receive written approval from HHS before significant changes are made to the Exchange Blueprint. See, for example, 77 FR at 18316. Significant changes could include altering a key function of Exchange operations or other changes to the Exchange Blueprint that would have an impact on the operation of the Exchange. This includes, but is not limited to the process for enrollment in a QHP. See, for example, 76 FR at 41871.

[28] As detailed in § 155.105(e), HHS generally has 60 days after receipt of a completed request to complete its review of a significant change to an Exchange Blueprint and, for good cause, may extend the review period by an additional 30 days up to a total of 90 days.

[29] See generally CMS guidance for becoming a web-broker in the FFEs, available at: *https://www.cms.gov/CCIIO/Programs-and-Initiatives/Health-Insurance-Marketplaces/Downloads/2020-WB-Program-Guidance-052120-Final.pdf.*

[30] In addition to ensuring there is at least one website available in the state that satisfies all accessibility requirements under § 155.205(c), we proposed that there must also be at least one website available in the state through which consumers can view and enroll in all available QHPs in the state.

consumers have at least one option through which to view detailed QHP information for all available QHPs in the state that also meets accessibility requirements under 45 CFR 155.205(c). Therefore, we proposed that if no direct enrollment partner in an SBE–DE state meets these requirements, the state would be required to continue operation of its own Exchange website to ensure there is one enrollment pathway in the state that does. To assist states in meeting requirements to become an SBE–DE, we noted that states would have the flexibility to partner with an existing, HHS-approved web-broker direct enrollment partner as a starting point to develop their own direct enrollment programs, as these entities would have already met requirements for HHS approval to participate in the FFE's DE program.

We requested comment on all aspects of these proposals, including any comments related to timing, governance, and any other considerations needed to effectively operationalize these proposed FFE–DE, SBE–FP–DE, and SBE–DE options. The following is a summary of the comments we received and our responses.

Comment: We received several comments that expressed support for the proposed Exchange DE option because of the flexibility it provides, noting that the Exchange DE option will increase consumer choice and competition among DE entities, potentially leading to reduced costs for consumers. These comments also included caveats or recommendations. For example, one commenter recommended delaying implementation of the proposed Exchange DE option pending additional stakeholder consultation to further explore potential advantages or disadvantages of the proposed Exchange DE option, including conducting consumer focus groups, accounting for operational considerations for QHPs and stand-alone dental plans (SADP), and conducting an assessment of the potential impact of the Exchange DE option on enrollment and premiums. One commenter recommended additional consumer support options be made available, namely the adoption of controls to ensure non-QHP options are readily-identifiable. Another commenter recommended that HHS work closely with DE entities, including issuers, in advance of implementation of the proposed Exchange DE option to further develop operational requirements. This commenter also recommended that there be one primary website available to consumers to enter their information so that they do not have to complete multiple eligibility applications.

Response: We appreciate commenters' support for this option and are finalizing with some minor clarifying edits to the regulatory text. We believe the Exchange DE option will provide states and Exchanges with additional flexibility to tailor consumers' health insurance shopping experience, allowing states and their residents to reap the expected potential benefits of leveraging private sector DE partners, including increased choice in consumer experience to complete the enrollment process, access to information on additional plan options, and lower costs. We also underscore that this option is strictly permissive for states, and we welcome states that are interested in pursuing these options to undertake research, stakeholder consultation particularly with issuers and web-brokers, and data gathering at the state level to inform any operational requirements related to how the Exchange DE option is implemented to ensure it is tailored to meet the needs of their residents.

We also believe it is important for consumers to have access to tools and resources to compare their coverage options. Under the Exchange DE option, consumers will be able to view standardized information to compare QHPs using the website of their choice, and will still be able to access *HealthCare.gov* (or similar information technology infrastructure in a state with a State Exchange) should they choose to, or if necessary. Consumers will also continue to have access to other Exchange tools and resources—such as the single, streamlined eligibility application, a toll-free telephone number to request assistance, an electronic calculator to determine the actual cost of coverage after the application of any APTC and CSRs, as well as Navigators, other Assisters, and licensed agents and brokers. As detailed elsewhere in this final rule, at a minimum, the existing FFE DE program requirements will continue to apply in any state that is approved to implement an FFE–DE or SBE–FP–DE. These existing requirements include several safeguards to ensure non-QHP options are readily identifiable.[31] For SBE–DE states, we finalize in § 155.221(j)(1)(iii) the requirement for the state to ensure that a minimum of at least one DE entity approved by the state meets minimum federal requirements to participate in the FFE DE program (including the FFE's plan display requirements) and we encourage these states to more broadly adopt standards similar to the existing FFE DE program for all DE partners approved by the state.

We believe that the Exchange DE option will drive the private sector to make consumer-centric investments that will improve consumers' shopping experiences, as these private entities are incentivized to provide the best possible consumer experience to retain their consumer base year-over-year and to attract new consumers each year. While the Exchange DE option is not available today, with an expanded available customer base, issuers, web-brokers, and individual agents and brokers will have an increased incentive to invest in providing the resources necessary to serve a majority of consumers, and in focusing marketing and outreach activities to attract new consumers, including the currently uninsured population. We believe these increased incentives to invest in the consumer enrollment experience will, over time, increase consumer enrollment by persons who would not otherwise have enrolled, a potentially healthier population who may improve the health of the risk pool and lead to lower premiums.

Comment: Nearly all commenters on this rulemaking cautioned about potential harmful impacts to consumers from the introduction of the Exchange DE option. Commenters asserted that the Exchange DE option may effectively eliminate access to *HealthCare.gov* and State Exchange websites, by allowing access to apply and enroll for QHP coverage through multiple private websites operated by DE entities. Commenters believed that because existing Exchange consumers have established relationships with, and have relied on, the centralized Exchange enrollment website in their state to serve as an unbiased resource to provide eligibility determinations, enroll in QHPs, and receive APTC/CSR eligibility determinations, the Exchange DE option would result in a new, fragmented process that would likely lead to consumer confusion and mistrust. They further stated that the negative impacts of effectively eliminating the Exchange-run enrollment websites as an option would outweigh the benefits of making this new option available to consumers. One commenter, which operates as an EDE entity, noted that while DE entities account for a significant volume of

[31] See, for example, 45 CFR 155.221(b)(1)–(3). In the proposed rule, we proposed to provide additional flexibilities regarding the plan display standards currently captured at 45 CFR 155.221(b)(1) and (3) in certain circumstances. See 85 FR at 78616–78618. We intend to address these proposals in future rulemaking and, if finalized, would also consider and address the intersection with the new Exchange DE option as necessary or appropriate.

HealthCare.gov enrollment today, elimination of the centralized FFE or SBE enrollment platforms would lead to various forms of disruption for the majority of consumers who already are accustomed to relying on an Exchange-operated website for enrollment.

Response: We understand commenters' concerns about the potential impact of the Exchange DE option and acknowledge that any transition or change can be unsettling and disruptive. However, we disagree that the potential negative impacts of the Exchange DE option outweigh the benefits given the success of the Federal DE and EDE pathways, and we note that the Exchange DE option is not a requirement for states, and that states have ample flexibility to tailor operational requirements and any transition steps to the needs of their health care markets. We also note that several states have made full transitions from the FFE to become an SBE, providing models of successful transitions to new enrollment platforms with minimal disruptions. In addition, an Exchange in a state that elects this option must at a minimum continue to operate an internet website that provides the same standardized comparative QHP information that is available today, along with an up-to-date listing of approved DE entities operating in the state. We believe that the continued availability of this website will mitigate any potential consumer confusion caused by the availability of multiple enrollment pathways. We further note that in states that choose to implement the Exchange DE option, the Exchange will remain available to consumers whose eligibility applications cannot be processed by an approved DE entity. States choosing the Exchange DE option also have the flexibility to continue making available its Exchange eligibility and enrollment website despite the availability of DE partner websites, or to define other instances in which the Exchange enrollment website would be available to consumers, including instances in which a consumer makes a request to apply through an Exchange-run website. We are also requiring that Exchanges in states choosing to implement the Exchange DE option continue to meet all applicable statutory and regulatory requirements. This includes, but is not limited to, the Exchange retaining responsibility for making all determinations of whether an applicant is eligible for QHP enrollment, APTC, and CSRs, conducting required verifications of consumer eligibility against trusted data sources, and conducting assessments or determinations of eligibility for Medicaid and CHIP for all applicants, and where appropriate, refer individuals assessed or determined eligible for such coverage to the appropriate state Medicaid agency for enrollment in those programs. Consumers will therefore continue to have access to an unbiased resource for comparative QHP information and eligibility determinations in states that elect this option. We also strongly encourage DE entities to undergo appropriate coordination efforts with the Exchange. In particular, additional coordination will be required to ensure consumer communications, particularly consumer eligibility notices sent by the Exchange regarding coverage obtained by enrolling through a DE entity website do not result in consumer confusion.

The FFE already has experience transitioning consumers already enrolled in Exchange coverage through *HealthCare.gov* between enrollment platforms to new State Exchange platforms as evidenced by the successful transitions of SBE–FP states to SBE states. Most recently, ahead of the plan year 2021 open enrollment period, New Jersey and Pennsylvania transitioned from SBE–FPs to SBEs. Among the most critical work streams associated with these transitions was the migration of these states' consumer eligibility and enrollment data from *HealthCare.gov* to the respective State Exchange eligibility and enrollment platforms such that existing Exchange consumers could re-enroll directly through the State Exchange. We believe that any consumer disruptions can be minimized during a transition process by incorporating safeguards during the transition, such as robust stakeholder consultation with issuers and other partners, proactive coordination with other state agencies, targeted consumer outreach and education, and contingency planning to ensure consumers can fall back on *HealthCare.gov* if needed. The implementation plans developed under § 155.221(j)(1)(ii) and (j)(2)(i) should include details on any such measures. In addition, for states pursuing the SBE–DE option, HHS intends to examine these types of issues as part of the operational readiness assessment under § 155.221(j)(1)(i). Based on the FFE's experience, we expect that given the ability of existing DE entities to meet consumer needs and reduce burden on Exchanges, introducing DE entities as the primary consumer-facing pathway to enroll in coverage in states that elect this new option will be beneficial to all stakeholders.

Comment: An overwhelming majority of commenters on this rulemaking argued that there are potential conflicts of interest, particularly financial incentives, that would put DE entities at odds with consumers seeking coverage and the policy goals of PPACA. Commenters noted that the proposed Exchange DE option will increase the incentive for DE entities, particularly agents and brokers, to compete among each other for commissions, which could lead to consumers being directed to the most profitable products, rather than those best-suited for their health care needs. Several commenters emphasized that, in many cases, the most profitable product for DE entities is non-QHP coverage. Commenters thus fear that the Exchange DE option could lead to deceptive marketing practices and an increase in fraud, as well as more consumers who are uninsured, or who enroll in coverage even if it does not adequately meet their health care needs. Commenters were also concerned that the Exchange DE option could result in consumers being steered toward less robust non-comprehensive coverage (for instance, short-term limited duration insurance (STLDI) plans) that generally bring higher commissions to agents and brokers and web-brokers, but do not meet PPACA requirements. Commenters also asserted that consumers could be required to pay higher out-of-pocket costs because they did not receive information related to, or were misinformed about, the availability of Exchange financial assistance. A few commenters raised similar concerns related to Navigators and other Exchange assisters using DE entity websites to enroll consumers since consumers could be misled by the inclusion of non-QHP products on the DE entity websites, by the omission of critical information related to coverage options, or by confusion that could result when consumers are required to visit multiple DE entity websites to review comprehensive information on all available QHPs in a state.

Several commenters also raised concerns about protecting consumer privacy and security under the Exchange DE option, under which a consumer must share personally identifiable information with a private DE entity that could be misused in the absence of a robust regulatory framework to protect against this abuse.

We also received many comments that cautioned against potential negative impacts of working with DE entities to coordinate coverage with other insurance affordability programs. In

particular, commenters noted that DE entities generally do not have the incentive or expertise to ensure consumers receive a Medicaid eligibility assessment or determination, and to subsequently transfer them to the appropriate state website to complete the enrollment process. These commenters requested additional information on how HHS would ensure that this coordination of coverage will occur in order for HHS to maintain its ''no wrong door'' policy.

Response: We acknowledge that there must be sufficient oversight of all states approved to implement the Exchange DE option, as well as oversight of the DE entities themselves, to ensure the proper alignment and management of incentives. The many comments we received that raised concerns around potential misalignment of incentives and conflicts of interest serve to highlight key areas where HHS and the states can be proactive to implement additional controls and work closely with DE entities to prevent fraud, waste, and abuse, particularly with respect to protecting against deceptive marketing and inappropriate steering. We reiterate that, at a minimum, the existing FFE DE program requirements will continue to apply in any state that is approved to implement an FFE–DE or SBE–FP–DE. These existing requirements include safeguards to protect against deceptive marketing practices and ensure consumers have the information they need to make informed decisions.[32] For SBE–DE states, we finalize in § 155.221(j)(1)(iii) the requirement for the state to ensure that a minimum of at least one DE entity approved by the state meets minimum federal requirements to participate in the FFE DE program (including the FFE's safeguards to protect against deceptive marketing practices and ensure consumers have the information needed to make informed decisions) and we encourage these states to more broadly adopt standards similar to the existing FFE DE program for all DE partners approved by the state. We note too that recent federal legislation addressing surprise billing [33] generally requires issuers of STLDI plans to disclose to potential enrollees any broker commissions for STLDI plans prior to plan selection. This transparency requirement should further mitigate risk presented by any misalignment of incentives that could result in inappropriate steering. Other controls could also be implemented by states to check misalignment of incentives and mitigate the risk that DE entities will improperly steer consumers toward non-QHP products and allow consumers to make informed choices.

We also reiterate that DE entities operating under the FFE–DE and SBE–FP–DE options would be required to meet FFE privacy and security standards while SBE–DEs have the flexibility to ensure similar standards are in place to protect consumer information. HHS intends to continue to strengthen the regulatory and operational controls that would apply to DE entities operating in FFE and SBE–FP states that elect this option to ensure that sufficient protections are in place. Generally, assuming due diligence and appropriate regulatory and operational safeguards to ensure oversight over DE entities, and taking into account that these organizations have a strong business interest in serving their customers effectively to maintain their customers, we believe that the balance of risk is acceptable. Thus, we believe that the potential benefits of the Exchange DE option outweigh the burdens of oversight and the risk of fraud, waste, and abuse.

We also agree that it is important for consumers to continue receiving Medicaid and CHIP eligibility assessments or determinations when they apply for Exchange QHP enrollment and financial assistance through DE entities. In states implementing the Exchange DE option, the Exchange would still be required to establish and maintain the single, streamlined eligibility application as required under § 155.405, and make eligibility assessments and determinations of Medicaid or CHIP eligibility as required under § 155.302. Exchanges would also remain the entity responsible for making all determinations of whether an applicant is eligible for QHP enrollment, APTC, and CSRs, conducting required verifications of consumer eligibility against trusted data sources, and SBE–FPs and FFEs that elect this option can choose among HHS-approved entities already operating through the FFE's DE program, and we are requiring SBE–DEs to have at least one DE entity with whom they partner that can display and allow for enrollment in all QHPs available in the state. We also intend to work closely with states electing this option to ensure that they meet these and other applicable requirements, and that there are appropriate back-end application interfaces in place between the Exchange's eligibility platform and approved DE entities to ensure that all consumers have a seamless experience completing the single, streamlined eligibility application and receiving an eligibility determination just as if they were applying for coverage directly through the Exchange website. These are examples of the areas HHS intends to focus on when assessing an SBE–DE state's operational readiness under § 155.221(j)(1)(i) and implementation plan under § 155.221(j)(1)(ii). For states interested in pursuing the FFE–DE or SBE–FP–DE option, these are areas that would need to be considered and addressed, as appropriate, as part of the implementation plan under § 155.221(j)(2)(i) and the Federal agreement under § 155.221(j)(2)(ii). While we acknowledge comments that the Exchange DE option could produce a disjointed enrollment process to a certain degree for some consumers, we believe that the benefits of providing consumers with more options outweigh the drawbacks, especially since they will still be completing the single, streamlined eligibility application on an approved DE partner's website in order to access APTCs and CSRs, or access Medicaid and CHIP coverage, if eligible. We also believe our focus on coordinating closely with states as part of the rollout process and transition to the Exchange DE option will help mitigate any risk of a reduction in Exchange or Medicaid and CHIP enrollment, as well as any potential increase in the uninsured.

Finally, the availability of the Exchange DE option does not directly affect the existence or operation of Navigator and other assister programs created by PPACA. As indicated above and detailed in the proposed rule, states that implement the Exchange DE option (DE states) will still be required to establish a Navigator program as required under section 1311(d)(4)(K) of PPACA. In all states that are approved to implement the DE option, the Exchange in the state must continue to make available an internet website that provides the same standardized comparative information on QHP options that is available on Exchange websites today. Therefore, Navigators and certified application counselors (collectively assisters), as well as agents and brokers, in DE states will still be able to view on State Exchange websites or *HealthCare.gov,* as applicable, comparative information for all QHP options available in the state, and will also be able to access information to connect with approved DE entities in their states. Moreover, each DE state

[32] See, for example, 45 CFR 155.220(j)(2)(i) and 156.1230(b)(2). Also see supra note 30.

[33] See Sec. 202 of Division BB of Public Law: 116–260, the Consolidated Appropriations Act, 2021, signed into law on 12/27/2020. *https://www.congress.gov/bill/116th-congress/house-bill/133.*

must ensure that at least one DE entity website is capable of processing all eligibility applications, including those that present complex enrollment scenarios, or else the state must continue to make available its own website that possesses such capability.

Finally, we note that the DE option requirements we finalize in this rule will provide Navigators and certified application counselors greater flexibility to effectively assist consumers than currently exists under the FFE's assister programs. For instance, in 2015 the FFE issued guidance (the 2015 guidance) instructing that FFE assisters should not use non-Exchange websites when providing enrollment assistance except as reference tools to supplement information on *HealthCare.gov.* But given the consumer protections that will apply in DE option states to ensure ready access to information on all QHPs available in a state (which include consumer-protective requirements that were not in place at the time we published the 2015 guidance),[34] there is no need to similarly limit assisters' ability to use DE entity websites to assist consumers.[35] We appreciate that actual implementation of the DE option will require states and HHS to closely monitor the program to ensure that consumers are receiving complete and accurate information and effective assistance. In the event HHS becomes aware of the need for additional or different DE option requirements, or greater clarity regarding DE option requirements, HHS may issue future guidance or pursue future rulemaking.

Comment: Many commenters argued that HHS does not have the legal authority under sections 1103,1302, 1311, or 1312 of PPACA to permit states and Exchanges to implement the Exchange DE option. Some commenters also argued that the Exchange DE option violates the spirit and intent of PPACA and represents an attempt to replace congressional legislation in violation of the Administrative Procedure Act (APA). Other commenters argued that the Exchange DE option is not based on a reasonable interpretation of specific aspects of PPACA and implementing regulations. In particular, some commenters argued that the Exchange DE option violates Section 1311(d)(1) of PPACA that requires that Exchanges be operated by a ''governmental agency or nonprofit entity that is established by a State.'' Some commenters also argued that HHS does not have the authority to delegate essential government functions currently performed by Exchanges to private entities.

Response: We disagree. The Exchange DE option requires that participating states and HHS continue to meet all applicable requirements of PPACA, including applicable requirements under section 1311 of PPACA. This is captured in the regulatory text at § 155.221(j)(1) and (2), which states that Exchanges must meet all federal statutory and regulatory requirements for the operation of an Exchange. As detailed above and in the proposed rule, Exchanges in states that elect this option must continue to provide the required minimum functions established in PPACA and comply with applicable requirements. This includes the responsibility to make all determinations of whether an applicant is eligible for QHP enrollment, APTC, and CSRs; conducting required verifications of consumer eligibility against trusted data sources; conducting assessments or determinations of eligibility for Medicaid and CHIP, and where appropriate, referring individuals who are assessed or determined eligible for Medicaid or CHIP to the appropriate state agency for enrollment in those programs; certifying plans as QHPs, making QHPs available to consumers, and facilitating the purchase of QHPs; granting exemption certifications, as applicable; making an electronic calculator available; establishing a Navigator program; and providing for the operation of a toll-free telephone hotline. In the context of operating an internet website, we interpret the statutory language at section 1311(c)(5) and (d)(4)(C) of PPACA to require that Exchanges provide consumers with the ability to view comparative information on QHP options, but that the Exchange may direct consumers to other entities or resources for purposes of submitting applications for eligibility and enrolling in QHPs, with APTC and CSRs, if otherwise eligible. An Exchange can continue to meet these obligations without operating a consumer-facing enrollment website and Exchanges in states that elect this option must continue to operate a website that provides the same standardized comparative information about QHPs that is available today.[36] In addition, we maintain that states choosing to transition to the SBE–DE or SBE–FP–DE option must still meet the requirements of Section 1311(d)(1) of PPACA.[37] The arrangements that states would make with the DE entities approved to provide a consumer shopping and enrollment portal would be no different than the current contracting arrangements that HHS enters into today with approved partners who participate in the FFE DE program. It is also similar to the arrangements Exchanges may enter into today to provide other services, such as a call center, to their consumers.[38] Finally, we note how the Exchange DE option aligns with the general structure of how PPACA assigns states substantial authority to administer provisions of the law—including giving states the primary responsibility to create Exchanges and relying on states as the primary enforcers of PPACA's insurance regulations and Exchange requirements.[39] Accordingly, HHS is of the view that the Exchange DE option is consistent with the language, spirit, and intent of PPACA and its implementing regulations and there is sufficient authority to permit states to pursue this option. Moreover, consumers would still have available to them a centralized website, operated by the Exchange, to obtain standardized comparative information about available QHPs, as

[34] See 85 FR 78613.

[35] As detailed in the proposed rule, we are also revisiting our policy regarding the ability of FFE assisters' use of web-broker non-Exchange websites. See 85 FR at 78611–78614. If finalized as proposed, this policy change would permit assisters in FFEs and SBE–FPs to also use web-broker non-Exchange websites to assist consumers with QHP selection and enrollment, provided certain conditions are met.

[36] We further note that HHS met its obligations under section 1103 of PPACA when it established the internet Portal and developed the standardized format to be used for the presentation of information on coverage option by July 1, 2010. See, for example, Health Care Reform Insurance Web Portal Requirements; Interim Final Rule with Comment Period, 75 FR 24470 (May 5, 2010). We also disagree with commenters who suggested that sections 1302 or 1312 of PPACA are legal obstacles to the adoption of the Exchange DE option. Section 1302 relates to the development of the essential health benefits package and accompanying benefit requirements (for example, requirements related to cost-sharing and actuarial value levels of coverage). Section 1312 establishes requirements related to consumer choice and the establishment of single risk pools by issuers. As such, section 1302 and section 1312's single risk pool provisions generally outline benefits, plan design, and rating requirements applicable to issuers of non-grandfathered health insurance coverage, and issuers must continue to comply with these requirements in any state that elects to adopt the Exchange DE option. The other provisions in section 1312, such as those related to consumers' choice of whether to enroll in coverage through an Exchange, the continued operation of the market outside the Exchanges, the option for states to allow agents or brokers to assist with Exchange enrollments, and the enrollment of members of Congress in plans offered through an Exchange also would continue to apply in states that elect to adopt the Exchange DE option and do not preclude our finalizing the Exchange DE option.

[37] For FFE states that elect and are approved to transition to the FFE–DE option, CMS, on behalf of HHS will continue to be responsible for operation of the Exchange consistent with section 1321(c)(1).

[38] See, for example, section 1311(f)(3).

[39] See section 2723(a)(1) of the PHS Act and section 1321(c)(2).

well as information about and links to approved partners' enrollment websites. Finally, they would still have access to the Exchange itself to apply for, and enroll in, coverage should that be necessary. Given that states electing the Exchange DE option remain subject to the requirements of PPACA and its implementing regulations, we further disagree that the flexibility we are providing to meet those requirements constitutes an attempt to replace congressional legislation in violation of the APA.

Comment: Many commenters argued that the Exchange DE option is not legally permissible in the absence of a section 1332 waiver, and should only be approved through the section 1332 waiver process. Some commenters highlighted in particular the benefits of the section 1332 waiver public notice and comment process as an additional safeguard that they asserted would be beneficial to any state interested in pursuing the Exchange DE option. Some commenters further argued that Georgia's recent section 1332 waiver proposal to implement activities similar to those proposed under the Exchange DE option was wrongfully approved and that even if another state were to apply for a section 1332 waiver to implement the Exchange DE option, such a waiver plan would violate section 1332's coverage guardrail because they believe enrollment would generally be reduced.

Response: The merits of the Departments' decision to approve Georgia's section 1332 waiver is not in the scope of this rulemaking. However, we clarify that a section 1332 waiver is not required for a state to be approved for and to implement the Exchange DE option. Georgia's section 1332 waiver is distinguishable from the Exchange DE option we finalize here because states that elect and implement the Exchange DE option would still be required to meet all Exchange requirements under PPACA, while under its section 1332 waiver plan Georgia waived certain Exchange requirements under section 1311.[40] Moreover, under Georgia's section 1332 waiver, consumers in Georgia will no longer be able to access and utilize *HealthCare.gov,* and a state statute expressly prohibits the state from implementing a State Exchange and from establishing a Navigator program or its equivalent.[41]

In contrast, in states that elect the FFE–DE or SBE–FP–DE option, consumers will continue to have the *HealthCare.gov* website available to them to view standardized comparative information about QHPs and the Exchange will be required to continue to operate its respective Navigator program. States that elect to become or transition to an SBE–DE would similarly be required to maintain and make available the State Exchange website for standardized comparative information, the state's respective Navigator program to assist consumers, and the state's associated eligibility rules engine to make eligibility determinations, as well as the state's enrollment platform, in the event that there is not a DE entity capable of processing a consumer's application. We also recognize the importance of a meaningful public notice and comment process, and note that states that elect to pursue the Exchange DE option have the discretion to provide for a state public notice and comment process should they deem it to be beneficial.

Comment: Many commenters noted that programmatic guardrails or operational parameters are not adequately defined and incorporated into the rule to allow for effective implementation of the Exchange DE option, particularly with respect to ensuring oversight over DE entities. In particular, commenters noted a lack of clarity about the responsibilities of DE entities regarding administering consumer education and assistance to ensure consumers are not confused or misled about their coverage options. In particular, commenters noted that it is not clear how HHS would ensure DE entities operate in an unbiased, transparent manner such that consumers can effectively compare and make an informed choice among all available QHP options, know when they are viewing non-QHP options, and receive information on public coverage options they may be determined eligible for, such as Medicaid and CHIP. Several commenters noted that we should be more definitive about the responsibilities of the DE entities regarding display of QHPs and choice of QHPs, including how DE entities and Exchanges should handle the scenario where a consumer wishes to enroll in an issuer's QHP when a particular DE entity is not appointed to sell products by that issuer.

Response: In proposing the Exchange DE option, we wanted to strike an appropriate balance to provide states with appropriate flexibility to implement the Exchange DE option in a manner that is tailored to the needs of their unique health care markets while still meeting the applicable federal requirements. We have included a broad framework of baseline federal requirements governing the Exchange DE option in this final rule and welcome states interested in pursuing this option to adopt any additional state-specific requirements they deem necessary to effectively oversee DE entities and protect consumers. It is important to note that the framework of programmatic parameters and federal requirements governing the Exchange DE option included in this final rule is meant to serve as a floor and not a ceiling. We also share commenters' concerns about ensuring effective oversight over DE entities and protecting consumers. As explained in the proposed rule, given that an FFE–DE or SBE–FP–DE state would use one or more DE entities approved to participate in the FFE DE program, at a minimum, the FFE privacy and security standards[42] and the FFE DE program requirements[43] would continue to apply. This includes the requirement for web brokers under § 155.220(c)(3)(i)(B) to provide consumers with the ability to view all QHPs offered through the Exchange and the corresponding similar requirement for issuers at § 156.1230(a)(1)(ii); the requirement for web brokers under § 155.220(c)(3)(i)(A) to display QHP information comparable to information available on the Exchange website or display a subset of QHP information and a disclaimer with a link to the Exchange and the corresponding similar requirement for issuers at § 156.1230(a)(1)(iv); as well as the requirements at §§ 156.1230(b)(2) and 155.220(j)(2)(i) applicable to all DE entities to provide consumers with correct information, without omission of material fact, and refrain from marketing or conduct that is misleading, coercive, or discriminatory.

For SBE–DE states, we codify in § 155.221(j)(1)(iii) the requirement for the state to ensure that a minimum of at least one DE entity approved by the state meets minimum federal requirements for HHS approval to participate in the FFE DE program (including the examples highlighted in the prior sentence) and we encourage these states to more broadly adopt processes and standards similar to the

[40] As detailed in Georgia's approval letter and Specific Terms and Conditions (STCs), the Exchange requirements in sections 1311(b), (c), (d), (e) and (i) are waived to the extent they conflict with the Georgia Access Model as described in the state's approved waiver. See *https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Section_1332_State_Innovation_Waivers-/1332-GA-Approval-Letter-STCs.pdf.*

[41] See O.C.G.A. sec. 33–1–23, available at: *https://law.justia.com/codes/georgia/2019/title-33/chapter-1/section-33-1-23.*

[42] See 45 CFR 155.260 through 155.285.

[43] See 45 CFR 155.220, 155.221 and 156.1230.

existing FFE DE program for all DE partners approved by the state. At the same time, however, SBE–DE states would retain general flexibility to determine their own business controls, as well as to decide the state-specific requirements and mechanisms for approval and oversight of direct enrollment entities operating in the state. HHS would review and assess an SBE–DE state's process, standards and oversight approach for DE entities as part of the operational readiness assessment under § 155.221(j)(1)(i). We also intend to continue engaging stakeholders on, and develop, additional programmatic and operational requirements through future rulemaking and sub-regulatory guidance, as necessary or appropriate. Furthermore, additional technical assistance and operational details related to implementation of the FFE–DE and SBE–FP–DE options may be best defined and addressed during the development of the implementation plan under § 155.221(j)(2)(i) and the federal agreement that states electing to implement the FFE–DE or SBE–FP–DE option must execute with HHS under § 155.221(j)(2)(ii). This approach allows HHS to be responsive to programmatic and operational concerns in real time, as well as tailor the implementation to meet a state's unique market conditions or needs of its residents.

Comment: Several supportive commenters recommended that CMS delay implementation of the Exchange DE option pending further research, evidence gathering, stakeholder consultation, and a more robust public comment process to quantify potential impacts and adequately inform programmatic and operational parameters. Many opposing commenters requested that we strike it from this rulemaking entirely for the same reasons. In particular, commenters noted interest in potential impacts on premiums, as well as how enrollment in various insurance affordability programs and the uninsured could impact the risk pool. Other commenters noted that it is not clear that the Exchange DE option represents a better value proposition than the current centralized Exchange enrollment model and requested that HHS gather additional data to quantify the value of this new option. Commenters questioned the premise that a centralized consumer-facing website is less efficient than fracturing the consumer-facing pathway and consumer experience among multiple platforms, potentially leading to increased cost and burden on consumers. Many commenters also contend that a centralized consumer-facing website is the more efficient and effective model for states and Exchanges, as well, rather than the state or an Exchange having to manage multiple DE entity relationships and their associated technical infrastructure, including multiple DE entity websites and their interfaces to the back-end Exchange eligibility and enrollment platform that must be managed under the Exchange DE option.

Response: We proposed and are finalizing this new Exchange DE option in response to our experience operating the *HealthCare.gov* platform and stakeholder feedback, including the comments about challenges related to Exchanges becoming a dominant public-sector competitor that can crowd out other market players. We also emphasize this option is strictly permissive for states. Whether the Exchange DE option or a centralized Exchange website is more efficient, or provides better value, for a given state is contingent on the unique circumstances of that state's health care market and the needs of its residents. Therefore, we do not believe that one or the other can be characterized as generally more efficient, or a better value, across all states. As states consider and elect the Exchange DE option, we will coordinate and engage in information sharing with these states as appropriate to assess the efficacy and value of this option from the federal perspective. This will help inform our continued consideration and development of programmatic and operational parameters and any additional regulatory requirements related to these options. Given that the health care market of each state is unique, we also welcome states that are interested in pursuing the Exchange DE option to undertake their own research, stakeholder consultation, and data gathering to determine whether it represents a sensible value proposition for their consumers. We also welcome the sharing of any information and data on findings, best practices, and lessons learned. Finally, expected impacts to the premiums and the risk pool have been addressed in the Regulatory Impact Analysis (RIA) in this rulemaking.

Comment: A few commenters noted that the potential consequences of the Exchange DE option, including Exchanges no longer serving as the single pathway for many to get covered, present potential barriers to accessing QHP or Medicaid coverage, and risks of being underinsured or becoming uninsured would disproportionately impact various vulnerable groups, namely historically-marginalized populations, individuals with pre-existing conditions, individuals with substance-abuse disorders, rural and low-income populations, non-English-speaking populations, and others. One commenter noted that it could encourage health inequities between white communities and communities of color particularly with respect to substance abuse addiction.

Response: We share concerns about health disparities and the disproportionate impact on vulnerable population groups or the creation of inequity that exist in today's health care system, and commend commenters for identifying these issues as particular areas where HHS and states can remain proactive and diligent. States that elect to pursue the SBE–DE option should consider these issues and detail their communication and outreach strategy to target vulnerable populations as part of the implementation plan required under § 155.221(j)(1)(ii). Similarly, HHS will partner with FFE–DE and SBE–FP–DE states to consider these issues when developing the implementation plan under § 155.221(j)(2)(i). Through the various requirements and controls we are finalizing, particularly accessibility and non-discrimination requirements, the requirement that the Exchange remain available to consumers who need it, as well as the flexibility states will have to implement additional requirements and controls to protect consumers, we believe that such disproportionate impacts can be prevented or mitigated. We note that the Exchange DE option offers a platform for multiple DE entities to compete to serve consumers, which creates an opportunity for DE entities to specialize to serve specific populations, including vulnerable populations. As such, the Exchange DE option holds potential to better connect vulnerable populations to coverage than a centralized one-size-fits-all Exchange model. Again, we welcome the sharing of any information and data on findings, best practices, and lessons learned.

Following our review of the comments, we are finalizing this proposal but have amended the regulatory text to underscore our requirement that State Exchanges electing the DE option must ensure at a minimum, that at least one approved web-broker DE entity meets requirements that align with the FFE standards under §§ 155.220 and 155.221 to ensure consumers have at least one option through which to view detailed QHP information for all available QHPs in the state and enroll in a QHP. We have also incorporated minor clarifying edits throughout the regulatory text. We

will also continue to assess the need for any additional programmatic and operational parameters, as well as any additions to the regulatory requirements, to ensure necessary protections for consumers in states that implement the Exchange DE option.

B. Part 156—Health Insurance Issuer Standards Under the Affordable Care Act, Including Standards Related to Exchanges

1. User Fee Rates for the 2022 Benefit Year (§ 156.50)

a. FFE and SBE–FP User Fee Rates for the 2022 Benefit Year (§ 156.50(c))

Section 1311(d)(5)(A) of PPACA requires states to ensure that Exchanges are self-sustaining, which may include the state allowing an Exchange to charge assessments or user fees on participating health insurance issuers as a means of generating funding to support its operations. If a state does not elect to operate an Exchange or does not have an approved Exchange, section 1321(c)(1) of PPACA directs HHS to operate an Exchange within the state. Accordingly, in § 156.50(c), we specify that a participating issuer offering a plan through an FFE or SBE–FP must remit a user fee to HHS each month that is equal to the product of the annual user fee rate specified in the annual HHS notice of benefit and payment parameters for FFEs and SBE–FPs for the applicable benefit year and the monthly premium charged by the issuer for each policy where enrollment is through an FFE or SBE–FP. In addition, OMB Circular No. A–25 establishes federal policy regarding the assessment of user charges under other statutes and applies to the extent permitted by law. Furthermore, OMB Circular A–25 specifically provides that a user fee charge will be assessed against each identifiable recipient of special benefits derived from federal activities beyond those received by the general public. Activities performed by the federal government that do not provide issuers participating in an FFE with a special benefit are not covered by this user fee. As in benefit years 2014 through 2021, issuers seeking to participate in an FFE in the 2022 benefit year will receive two special benefits not available to the general public: (1) The certification of their plans as QHPs; and (2) the ability to sell health insurance coverage through an FFE to individuals determined eligible for enrollment in a QHP.

For the 2022 benefit year, issuers participating in an FFE will receive special benefits from the following federal activities:

- Provision of consumer assistance tools;
- Consumer outreach and education;
- Management of a Navigator program;
- Regulation of agents and brokers;
- Eligibility determinations;
- Enrollment processes; and
- Certification processes for QHPs (including ongoing compliance verification, recertification, and decertification).

Activities through which FFE issuers receive a special benefit also include the Health Insurance and Oversight System (HIOS) and Multidimensional Insurance Data Analytics System (MIDAS) platforms, which are partially funded by Exchange user fees. Based on estimated costs, enrollment (accounting for anticipated establishment of state Exchanges in certain states in which FFEs are currently operating), and premiums for the 2021 plan year, we proposed a 2022 user fee rate for all participating FFE issuers at 2.25 percent of total monthly premiums. This proposed user fee rate reflects our estimates for the 2022 benefit year of costs for operating the FFEs, premiums, enrollment, and transitions in Exchange models (from the FFE and SBE–FP models to either the SBE–FP, FFE–DE or State Exchange models (state transitions)). The proposed FFE user fee rate is lower than the 3.0 percent FFE user fee rate that we established for benefit years 2020 and 2021, and the 3.5 percent FFE user fee rate that we established for benefit years 2014 through 2019. After accounting for the impact of the lower user fee rate, we estimated that we would have the necessary funding available to fully fund user-fee eligible Exchange activities in 2022. We sought comment on this proposed 2022 FFE user fee rate.

As previously discussed, OMB Circular No. A–25 establishes federal policy regarding user fees, and specifies that a user charge will be assessed against each identifiable recipient for special benefits derived from federal activities beyond those received by the general public. SBE–FPs enter into a federal platform agreement with HHS to leverage the systems established for the FFEs to perform certain Exchange functions, and to enhance efficiency and coordination between state and federal programs. Accordingly, in § 156.50(c)(2), we specify that an issuer offering a plan through an SBE–FP must remit a user fee to HHS, in the timeframe and manner established by HHS, equal to the product of the monthly user fee rate specified in the annual HHS notice of benefit and payment parameters for the applicable benefit year, unless the SBE–FP and HHS agree on an alternative mechanism to collect the funds from the SBE–FP or state.

The benefits provided to SBE–FP issuers by the federal government include use of the federal information technology platform and call center infrastructure used to support eligibility determinations for enrollment in QHPs and other applicable state health subsidy programs as defined at section 1413(e) of PPACA, and QHP enrollment functions under § 155.400. The user fee rate for SBE–FPs is calculated based on the proportion of FFE costs that are associated with the FFE information technology infrastructure, the consumer call center infrastructure, and eligibility and enrollment services, and allocating a share of those costs to issuers in the relevant SBE–FPs. Based on this methodology, we proposed to charge issuers offering QHPs through an SBE–FP a user fee rate of 1.75 percent of the monthly premium charged by the issuer for each policy under plans offered through an SBE–FP. This proposed rate is lower than the 2.5 percent user fee rate that we had established for the 2021 benefit year. The lower proposed user fee rate for SBE–FP issuers for the 2022 benefit year reflects our estimates of costs for operating the Federal Exchanges, premiums, enrollment, as well as state Exchange transitions for the 2022 benefit year, and the costs associated with performing these services that benefit SBE–FP issuers. We sought comment on the proposed 2022 SBE–FP user fee rate.

We received public comments on the proposed FFE and SBE–FP user fee rates for the 2022 benefit year (§ 156.50(c)). The following is a summary of the comments we received and our responses.

Comment: Several commenters supported lowering the FFE and SBE–FP user fee rates as proposed, with some commenters supporting the lower user fee rates so long as the reduction does not adversely impact FFE operations. Other commenters opposed the proposed user fee rates and asked that HHS raise the user fee rates to previous levels, 3.5 percent for FFE issuers and 2.5 percent for SBE–FP issuers, and use any excess user fees for education, consumer outreach, improving *HealthCare.gov,* or to otherwise increase funding levels for these activities. Some commenters asked that HHS maintain the current 2021 user fee rates of 3.0 percent for FFE issuers and 2.5 percent for SBE–FPs issuers. Other commenters recommended HHS finalize a lesser reduction to the user fee rates than the 0.75 percentage point reductions we

proposed. Several other commenters opposed the proposed user fee rates, noting that the reduction in user fee rates could negatively affect State Exchanges by limiting the funding available for national marketing and outreach, which those states rely on to encourage enrollment in all Exchange types. However, one commenter suggested further lowering the FFE and SBE–FP user fee rates to 2 percent and 1.5 percent respectively. This commenter stated that the additional reductions would better align the user fee rates with the reduced scope of operations performed by HHS.

Several commenters asked that HHS use user fees to improve Exchange services for populations facing heightened barriers to enrollment, such as those in rural areas and those with limited English proficiency. One commenter questioned whether lowering the user fee rate was sound budgeting practice.

Response: We are finalizing the 2022 benefit year user fee rates at 2.25 percent for FFE issuers and 1.75 percent for SBE–FP issuers, which is lower than the user fee rates for the 2021 benefit year. We estimate that these user fee rates will provide the necessary funding for the full functioning of the federal platform for the 2022 benefit year. Based on future projected changes in costs, enrollment, and premiums, we project that HHS can fully fund federal platform costs associated with providing special benefits to these issuers.

HHS remains committed to providing a seamless enrollment experience for consumers who enroll in coverage through an Exchange that uses the federal platform and to providing a value based approach to outreach and marketing activities. We believe that the services offered by the FFEs are sufficient to support all consumers seeking to enroll in coverage through the FFEs and SBE–FPs. The experience from the recently closed 2021 Open Enrollment Period shows *HealthCare.gov* and the call center operated well with the investments made over recent years to improve stability and the consumer experience on the federal platform. Specifically, the reduced user fee rates we adopt in this final rule will not impede federal platform services and will continue to apply resources to cost-effective, high-impact outreach and marketing activities that offer the highest return on investment. We will continue to evaluate consumer outreach and education needs within the normal budget process. Additionally, we will continue to evaluate the user fee rates and the associated costs to operate the federal platform for future benefit years.

Comment: Some commenters requested more transparency and data on how user fees are calculated and allocated, and information on how funding for *HealthCare.gov* is allocated. Several commenters noted that without data transparency, it is difficult to meaningfully comment on the proposed user fee reductions. One commenter requested that HHS delay finalization of the 2022 benefit year user fee rates until more data is made publicly available.

Response: We believe that the information provided in the proposed rule in support of the user fee rate proposals was sufficient to allow commenters to meaningfully assess and comment on the appropriateness of our user fee rate proposals. As we explained in the preamble to the proposed rule, the FFE and SBE–FP user fee rates for the 2022 benefit year are based on expected total costs to offer the special benefits to issuers offering plans on FFEs or SBE–FPs, and evaluation of expected enrollment and premiums for the 2022 benefit year. To calculate these expected costs, we make reasonable assumptions about the expected market for the upcoming benefit years and we reconsider these assumptions and re-estimate these costs on an annual basis with the most recent data available. For example, for the 2022 benefit year, we considered whether we needed to make changes to our cost, premium, and enrollment assumptions based on data from the 2020 benefit year and made updates to our projections as appropriate.

User fee-eligible costs are estimated in advance of the benefit year and are based upon cost targets for specific contracting activities that are not yet finalized, and therefore, proprietary. We will continue to outline user fee-eligible functional areas in the annual HHS notice of benefit and payment parameters, and will evaluate contract activities related to operation of the FFE user fee-eligible functions. The categories that are considered user fee-eligible include activities that provide special benefits to issuers offering QHPs through the federal platform, and do not include activities that are provided to all QHP issuers. For example, functions related to risk adjustment program operations and operations associated with APTC calculation and payment, which are provided to all issuers in states where HHS operates the risk adjustment program (all 50 states and the District of Columbia for the 2022 benefit year), are not included in the FFE or SBE–FP user fee-eligible costs. However, costs related to Exchange-related information technology, health plan review, management and oversight, eligibility and enrollment determination functions including the call center, and consumer information and outreach are considered FFE user fee-eligible costs. SBE–FPs conduct their own health plan certification reviews and consumer information and outreach, and therefore, the SBE–FP user fee rate is determined based on the portion of FFE costs that are also applicable to issuers offering QHPs through SBE–FPs.

Based on our estimates and after considering comments, we continue to believe that a user fee rate of 2.25 percent for FFE issuers and 1.75 percent for SBE–FP issuers will provide the necessary funding for the full functioning of the federal platform for the 2022 benefit year, and therefore, we are finalizing the FFE and SBE–FP user fee rates as proposed.

b. FFE–DE and SBE–FP–DE User Fee Rates for the 2023 Benefit Year (§ 156.50(c)(3))

In the proposed rule, we proposed to allow states served by an FFE or SBE–FP to implement the proposed direct enrollment option under § 155.221(j) beginning with plan year 2023, under which one or more private direct enrollment entities approved by the FFE would operate non-Exchange websites through which consumers may apply for and enroll in a QHP, with or without APTC or CSR (if otherwise eligible), in a manner considered to be through the Exchange. Under the Exchange DE option, QHP issuers offering plans through an FFE–DE or SBE–FP–DE would continue to receive some of the benefits received by FFE and SBE–FP issuers; however, some consumer outreach, education, and support activities would be provided by the state or through the approved DE partners.[44] As previously discussed, OMB Circular No. A–25 establishes federal policy regarding user fees, and specifies that a user charge will be assessed against each identifiable recipient for special benefits derived from federal activities beyond those received by the general public. As such, we proposed in new § 156.50(c)(3) to charge issuers offering QHPs through an FFE–DE or an SBE–FP–DE a user fee for the services and benefits provided to those issuers by HHS as the administrator of the FFE. We proposed to charge issuers offering QHPs through an FFE–DE or SBE–FP–DE a user fee rate calculated based on the proportion of FFE user fee-eligible costs incurred by HHS that are

[44] See above for more information on the direct enrollment option under § 155.221(j).

associated with implementation and operation of the FFE–DE or SBE–FP–DE. We assumed that the use of FFE services will be less for FFE–DE and SBE–FP–DE states in 2023 than for FFE and SBE–FP states during the same time period. Therefore, to provide some certainty for states that consider a transition to a proposed FFE–DE or SBE–FP–DE, we proposed a 2023 user fee rate of 1.5 percent of the monthly premium charged by the issuer for each policy under plans offered through an FFE–DE or SBE–FP–DE in plan year 2023.

In a state that implements the Exchange DE option, the Exchange in the state would no longer provide many of the consumer-facing enrollment-related activities that are currently being performed through the federal platform, or such activities would be substantially reduced. For example, the use of the Marketplace call center and *HealthCare.gov* website will be substantially diminished. Because of the role of the state in operating SBE–FPs, the value to issuers and the associated costs of operating these functions in FFEs are typically higher. The reduction of these functions and costs is reflected by a larger proposed reduction in the user fee rate for issuers in FFE–DEs from the rate applicable in FFEs (from 2.25 percent to 1.5 percent) than the reduction in the user fee rate for issuers in SBE–FP–DEs from the rate applicable in SBE–FPs (from 1.75 percent to 1.5 percent), resulting in the same proposed user fee rate for FFE–DEs and SBE–FP–DEs. We sought comment on the FFE–DE or SBE–FP–DE user fee rate, including whether the rate should be state-specific or higher or lower depending on whether the Exchange is an FFE–DE or SBE–FP–DE. We also sought comment on the specific services HHS will provide consistent with the Federal agreement we proposed to require under new § 155.221(j)(2)(ii). We sought comment on the FFE–DE and SBE–FP–DE user fee rates for the 2023 benefit year.

We are finalizing the 2023 FFE–DE and SBE–FP–DE user fee rate as proposed. We also make clear that HHS intends to collect these user fees on a monthly basis as it does with the FFE and SBE–FP user fees, consistent with the netting regulations at 45 CFR 156.1210. The following is a summary of the public comments we received on the FFE–DE and SBE–FP–DE user fee rate proposal for the 2023 benefit year and our responses.

Comment: We received several comments in support of a lower user fee rate for FFE–DE and SBE–FP–DE states. Other commenters expressed a general skepticism or disapproval of this user fee rate as an extension of their disapproval of the proposed Exchange DE option. One commenter believed that increased reliance on agents and brokers calls for increased spending on their oversight, and thus a higher FFE–DE and SBE–FP–DE user fee rate than that proposed would be appropriate.

Response: We are finalizing the proposed 1.5 percent of premium user fee rate for issuers offering plans through FFE–DEs and SBE–FP–DEs for the 2023 benefit year. We proposed this user fee rate to provide clarity and predictability regarding the user fee rate HHS would assess in FFE–DE and SBE–FP–DE states in order to allow states to evaluate whether to elect the Exchange DE option beginning with the 2023 benefit year. As discussed earlier in the preamble, this user fee rate is reflective of the costs incurred by HHS to support FFE–DE and SBE–FP–DE operations. Changes to HHS's costs, such as those related to oversight of agents and brokers, changes to underlying estimates of premiums and enrollment, or changes to the models adopted by states for their Exchanges could impact the user fee rate for 2023 or future benefit years. Therefore, we will continue to evaluate our estimates and will revisit the 2023 FFE–DE and SBE–FP–DE user fee rates in the 2023 Payment Notice proposed rule in compliance with our regulations.[45]

Comment: One commenter questioned the validity of a single user fee rate for issuers in FFE–DE and SBE–FP–DE states. The commenter asserted that even where differences between the services provided to FFE–DE and SBE–FP–DE issuers were minimized, a single user fee rate may not be justified.

Response: The 1.5 percent of premium user fee rate we proposed for FFE–DE and SBE–FP–DE issuers was calculated based on the proportion of FFE user-fee eligible costs that HHS anticipates it would incur to support the operation of an FFE–DE or SBE–FP–DE. We assumed that the use of federal platform services will be less for FFE–DEs and SBE–FP–DEs in 2023 than for an FFE or SBE–FP during the same time period.

Under the Exchange DE option, an Exchange would no longer provide many of the consumer-facing enrollment-related activities that are currently being performed through the federal platform for FFEs and SBE–FPs, or such activities would be substantially reduced. For example, the use of the Marketplace call center and *HealthCare.gov* website will be substantially diminished. Because of the role of the state in operating SBE–FPs, the value to issuers and the associated costs of operating these functions in FFEs is typically higher. The reduction of these functions and costs is reflected by a larger proposed reduction in the user fee rate for issuers in FFE–DEs from the rate applicable in FFEs (from 2.25 percent to 1.5 percent) than the reduction in the user fee rate for issuers in SBE–FP–DEs from the rate applicable in SBE–FPs (from 1.75 percent to 1.5 percent). These reductions resulted in the same user fee rate for issuers offering QHPs through FFE–DEs and SBE–FP–DEs.

[45] We note that even if this further consideration does not lead us to propose a change to the FFE–DE or SBE–FP–DE user fee rates applicable for the 2023 benefit year, we intend to address the 2023 FFE–DE and SBE–FP–DE user fee in the 2023 Payment Notice proposed rule in compliance with our regulations. See 45 CFR 156.50(c).

2. Network Adequacy Standards (§ 156.230)

We are finalizing the proposed revisions to 45 CFR 156.230, which implements section 1311(c)(1)(B) of PPACA and describes network adequacy standards for plans seeking certification as QHPs. As we stated in the proposed rule, we have received questions regarding whether § 156.230 requirements apply to a plan that does not vary benefits based on whether enrollees receive services from an in-network or out-of-network provider.

As we stated in the proposed rule, nothing in PPACA requires a QHP issuer to use a provider network and § 156.230 does not impose any network adequacy certification requirement for QHPs that do not use a provider network. Accordingly, an issuer might design and seek QHP certification for a plan that does not use a provider network and provides equal benefits for the same covered services without regard to whether the issuer has a network participation agreement with the provider that furnishes the covered services. To address any ambiguity in this section, we proposed to codify this longstanding interpretation at paragraph (f) to provide that a plan that does not vary benefits based on whether the issuer has a network participation agreement with a provider that furnishes covered services is not required to comply with the network adequacy standards at paragraphs (a) through (e) of § 156.230 to qualify for certification as a QHP. In the proposed rule, we explained that this proposal would simply clarify existing QHP requirements and would not add to, change, or remove any QHP certification requirements.

We received public comments on the proposed updates to the QHP network

adequacy standards under § 156.230. The following is a summary of the comments we received and our responses.

Comment: Of the comments received addressing this provision, a plurality supported this clarification, asserting that it will encourage variety in the kinds of plans certified as QHPs, lower costs by fostering more competition between issuers, increase enrollee access to providers, and reduce pressure on providers to enter into network agreements with issuers.

Response: We agree with commenters and are finalizing this clarification as proposed. Since plan year 2016, § 156.230(a) has applied only to QHPs that utilize a provider network.[46] The provision finalized here only clarifies this existing policy by adding explicit regulatory text reflecting the regulation's inapplicability to plans that do not utilize a provider network and do not vary benefits for covered services based on whether or not they are provided by an in-network or out-of-network provider.

Comment: A few commenters opposed the proposed clarification, asserting that it would reduce CMS's ability to oversee QHP issuers and ensure issuer accountability. A few commenters requested clarification on whether plans that do not utilize a provider network must comply with other QHP certification and market-wide requirements, such as requirements related to maximum out-of-pocket limits, cost-sharing protections, coverage of essential health benefits (EHB), actuarial value standards, inclusion of essential community providers, and non-discrimination standards under § 156.125. Some of these commenters opposed finalization of this provision until CMS could be assured that such plans would comply with these requirements.

Response: The provision finalized here only clarifies that plans that do not utilize a provider network are not required to satisfy the network adequacy standards at § 156.230 to obtain QHP certification. This final rule does not add to, change, or remove QHP certification requirements, nor does it add to, change, or remove any requirement for these plans to comply with the market reform provisions under title I of PPACA. Plans that do not utilize a provider network must still comply with all applicable QHP certification requirements to obtain QHP certification, which ensures that any plan that does not comply with applicable QHP certification requirements will be denied QHP certification.

Comment: A few commenters cautioned about the potential proliferation of QHPs that do not utilize a provider network, which could place consumers in the middle of payment disputes between issuers and providers. One commenter asserted that, while CMS should do more to encourage issuers to develop plans that do not utilize a provider network, QHP certification should be reserved for plans that utilize adequate provider networks and meet all other QHP certification requirements.

Response: We proposed no substantive changes to QHP certification requirements and decline to disqualify plans that do not utilize provider networks from obtaining QHP certification. Since plan year 2016, the text of § 156.230(a) has stated that the section only applies to QHPs that utilize a provider network.[47] While plans that do not utilize a provider network have always been eligible to apply for QHP certification, only 12 plans that did not utilize a provider network have ever been approved as QHPs in the FFEs.[48]

Comment: One commenter requested that CMS disclose the plans that do not utilize a provider network that have sought or received certification as QHPs.

Response: CMS releases QHP certification information in Public Use Files (PUFs) at *https://www.cms.gov/CCIIO/Resources/Data-Resources/marketplace-puf.* The Plan Attributes PUF lists the plan type for each plan approved as a QHP. There were 12 plans certified as QHPs in Wisconsin for plan year 2016 that did not utilize a provider network. No such plans have been granted QHP certification in an FFE since.

We are finalizing this policy as proposed.

3. Enrollment Process for Qualified Individuals (§ 156.1240)

We are finalizing the proposed revisions to § 156.1240, with a modification in response to comments. Under § 156.1240(a), QHP issuers are required to accept a variety of payment methods so that individuals without a bank account or a credit card will have readily available options for making monthly premium payments. Specifically, paragraph (a)(1) of § 156.1240 requires QHP issuers to follow the premium payment process established by an Exchange in accordance with 45 CFR 155.240. Paragraph (a)(2) requires QHP issuers to accept for all payments in the individual market, at a minimum, paper checks, cashier's checks, money orders, EFT, and all general-purpose pre-paid debit cards as methods of payment and to present equally all payment method options to allow a consumer to select their preferred payment method. We proposed to add new paragraph (a)(3) to require individual market QHP issuers to also accept payments on behalf of an enrollee from an individual coverage HRA or QSEHRA. As explained in the proposed rule, we received questions indicating that there is some confusion over whether issuers must accept payments on behalf of an enrollee from an individual coverage HRA or QSEHRA. Individual coverage HRAs are a new type of health reimbursement arrangement that employers may offer to employees as of January 1, 2020.[49] QSEHRAs are another new type of HRA that qualified small employers can provide to their employees pursuant to section 9831 of the Code. In general, employers may offer individual coverage HRAs or provide QSEHRAs to their employees as a means of providing tax-advantaged reimbursements for medical care expenses, including premiums for individual health insurance coverage that they purchase for themselves and their families. Reimbursement from individual coverage HRAs and QSEHRAs may include employee-initiated payments made through use of financial instruments, such as pre-paid debit cards, as well as direct payments (individual or aggregate) by the employer, employee organization, or other plan sponsor to the health insurance issuer.[50]

We proposed to add a new § 156.1240(a)(3) to require issuers offering individual market QHPs to accept payments of premiums that are received directly from an individual

[50] See 84 FR at 28950–51 (''[E]mployer funds paid from an HRA go directly to a participant or a health insurance issuer because the economic substance of the transaction is the same—that is, the funds are being used to discharge an employee's premium payment obligations.'').

coverage HRA or QSEHRA that are made on behalf of an enrollee who is covered by the individual coverage HRA or QSEHRA. We proposed that QHP issuers would be required to accept such payments when they are made using a method of payment described in § 156.1240(a)(2). We recognized some individual coverage HRAs and QSEHRAs prefer to make aggregate payments on behalf of multiple employees to a QHP issuer. We further encouraged QHP issuers to work with employers and administrators of individual coverage HRAs and QSEHRAs to facilitate these aggregate payments, as this approach could ease administration of individual coverage HRAs and QSEHRAs. We also explained that this proposal would help ensure that individual coverage HRAs or QSEHRAs operate as intended, and would address potential stakeholder confusion regarding whether QHP issuers must accept payments made from individual coverage HRAs or QSEHRAs. However, we did not propose to require QHP issuers to accept payments from individual coverage HRAs or QSEHRAs when made using a form of payment that is not described in § 156.1240(a)(2) or to accept aggregate payments from an individual coverage HRA or QSEHRA made on behalf of multiple enrollees.

We are finalizing this policy, but with a modification to clarify that QHP issuers not only must accept payments made on behalf of an enrollee directly from an individual coverage HRA or QSEHRA, but must also accept payments made directly by an enrollee using funds from an individual coverage HRA or QSEHRA, so long as such payments are made using a form of payment that is described in § 156.1240(a)(2).

We received public comments on the proposed updates to § 156.1240. The following is a summary of the comments we received and our responses.

Comment: Most commenters who commented on this proposal supported it. Several commenters noted that it would help overcome issuer confusion about whether they must accept payments from an individual coverage HRA or QSEHRA, which commenters stated has been an obstacle to the implementation of these options. One commenter reported that some issuers have refused to accept payments from an individual coverage HRA or QSEHRA when it was used to purchase coverage through a special enrollment period, and that this change would ensure that individuals offered an individual coverage HRA or provided a QSEHRA would be able to enroll in individual market QHP coverage. A few commenters encouraged CMS to require that QHP issuers accept aggregate payments from individual coverage HRAs or QSEHRAs made on behalf of multiple enrollees.

A smaller number of commenters opposed the proposal and stated that whether to accept premium payments made by an individual coverage HRA or QSEHRA on behalf of an enrollee should be at the option of the issuer, rather than required by HHS. A few commenters were concerned that accepting these payments, particularly aggregate payments, was not issuer standard practice and would be operationally difficult to implement. They raised concerns about the issuer burden associated with building the IT infrastructure to facilitate roster, or list, billing.

Response: We did not propose and are not finalizing a requirement for QHP issuers to accept aggregate payments from individual coverage HRAs or QSEHRAs.[51] We also did not propose and are not finalizing any requirement that QHP issuers facilitate roster, or list, billing. We instead encourage QHP issuers to work with employers and administrators of individual coverage HRAs and QSEHRAs to facilitate acceptance of aggregate payments from these HRA vehicles. We are not inclined to require more at this time given the relative infancy of individual coverage HRAs and QSEHRAs, but we expect the proposal we are finalizing that requires QHP issuers to accept premium payments received directly from an individual coverage HRA or QSEHRA to ease administration of individual coverage HRAs and QSEHRAs. This rule will also make the individual coverage HRA and QSEHRA experience more seamless for employees by ensuring that individual coverage HRAs and QSEHRAs may pay employee premiums directly, rather than only reimbursing employees after they have paid first out of their own pockets.

We understand that some QHP issuers are working to build IT systems to accommodate aggregate payments. However, because not all QHP issuers can accept aggregate payments using their existing IT infrastructure, it could be costly and time-consuming to require all QHP issuers to accept them. As individual coverage HRAs and QSEHRAs grow in popularity, we anticipate the benefits of making such an IT investment may outweigh the costs for most QHP issuers. However, at this time, with individual coverage HRAs and QSEHRAs still in their infancy, the final rule does not require QHP issuers to accept such aggregate payments, even if such payments are made using a form of payment that is described in § 156.1240(a)(2). Additionally, we recognize that it may not previously have been standard practice for every individual market QHP issuer to accept payments of premiums that are received directly from an individual coverage HRA or QSEHRA. Although some QHP issuers may incur administrative costs for operational changes necessary to comply with the payment acceptance requirement adopted in this final rule, such costs should be minimal because QHP issuers are already required to accept the forms of payment described in § 156.1240(a)(2) for all payments in the individual market. Therefore, we believe the benefits of requiring individual market QHP issuers to accept payments from individual coverage HRAs and QSEHRAs, rather than employees having to pay premiums out-of-pocket and then seek reimbursement at a later time, outweighs these administrative costs and is in the best interests of consumers.

Comment: Several commenters stated that individual coverage HRAs and QSEHRAs constitute third party payments, which issuers are not required to accept under § 156.1250.

Response: Individual coverage HRAs and QSEHRAs are structured to reimburse an employee for eligible medical care expenses that are paid by the employee. HHS considers any payments for eligible medical care expenses that are reimbursed by an employer through an individual coverage HRA or a QSEHRA per the terms of the employee's compensation package, including payments for eligible individual market premiums, to be payments by the employee, not the employer. This remains true regardless of whether funds from an individual coverage HRA or QSEHRA are transmitted directly by an enrollee or by an employer. As such, payments from these HRA vehicles for individual market coverage do not constitute third party payments. To ensure that QHP issuers do not erroneously reject payments as third party payments when the payments are made in connection with an individual coverage HRA or QSEHRA that are transmitted directly by an enrollee or by an employer, we are finalizing revisions to § 156.1240(a)(3) that make clear that all such payments must be accepted so long as they are made using a form of payment described in § 156.1240(a)(2).

We recognize that individual coverage HRAs and QSEHRAs may differ in how

[51] 85 FR 78572, 78644.

they are administered. While some individual coverage HRAs and QSEHRAs may pay premiums directly to issuers on behalf of covered individuals, others may reimburse covered individuals for incurred or paid covered expenses. It is important that, regardless of how an individual coverage HRA or QSEHRA is administered, individuals covered by individual coverage HRAs and QSEHRAs be able to use HRA funds to enroll in QHP coverage. We can identify no compelling reason to treat payments from an individual coverage HRA and QSEHRA differently based on whether the payments are made directly to the QHP issuer or to the covered individual. In either case, the payment functions as a reimbursement to the employee for the employee's premium payment as part of the employee's compensation package.[52]

After considering comments, we are finalizing § 156.1240(a)(3) to require issuers offering individual market QHPs to accept payments of premiums that are received directly from an individual coverage HRA or QSEHRA that are made on behalf of an enrollee who is covered by the individual coverage HRA or QSEHRA. To address potential confusion about the payment acceptance requirements, in response to comments, we specify in the regulation text that QHP issuers must also accept payments that are made directly by an enrollee in connection with an individual coverage HRA or QSEHRA. These requirements apply so long as such premium payments are made using a payment method described in § 156.1240(a)(2).

[52] See 84 FR at 28951 (''[U]nder the [HRA] final rules, 'reimbursement' may include employee-initiated payments made through use of financial instruments, such as pre-paid debit cards, as well as direct payments, individual or aggregate, by the employer, employee organization, or other plan sponsor to the health insurance issuer.'').

IV. Summary of the Proposed Provisions of the HHS Notice of Benefit and Payment Parameters for 2022, Analysis of and Responses to Public Comments, and Provisions of the Final Rule—Department of Health and Human Services and Department of the Treasury

A. 31 CFR Part 33 and 45 CFR Part 155—State Innovation Waivers

1. Section 1332 Application Procedures (31 CFR 33.108 and 45 CFR 155.1308), Monitoring and Compliance (31 CFR 33.120 and 45 CFR 155.1320), and Periodic Evaluation Requirements (31 CFR 33.128 and 45 CFR 155.1328)

Section 1332 of PPACA permits states to apply for a State Innovation Waiver (also referred to as a section 1332 waiver or State Relief and Empowerment Waiver) to pursue innovative strategies for providing their residents with access to higher value, more affordable health coverage. The overarching goal of section 1332 waivers is to give all Americans the opportunity to obtain high value and affordable health coverage regardless of income, geography, age, sex, or health status, while simultaneously empowering states to develop health coverage strategies that best meet the needs of their residents. In the proposed rule, the Departments sought to provide states with consistency and predictability by proposing to codify the Departments' interpretative guidance published in the **Federal Register** in 2018, regarding how the Departments will apply section 1332 of PPACA to determine whether applications for section 1332 waivers will be approved. In this final rule, the Departments are finalizing these policies, with modifications to explicitly incorporate major policies outlined in the 2018 Guidance into the text of relevant section 1332 regulations.

Under section 1332 of PPACA, the Secretaries may exercise their discretion to approve a request for a section 1332 waiver only if the Secretaries determine that the proposal for the section 1332 waiver meets the following four requirements (referred to as the statutory guardrails): (1) The proposal will provide coverage that is at least as comprehensive as coverage defined in PPACA section 1302(b) and offered through Exchanges established by title I of PPACA, as certified by the Office of the Actuary of CMS, based on sufficient data from the state and from comparable states about their experience with programs created by PPACA and the provisions of PPACA that would be waived; (2) the proposal will provide coverage and cost-sharing protections against excessive out-of-pocket spending that are at least as affordable for the state's residents as would be provided under title I of PPACA; (3) the proposal will provide coverage to at least a comparable number of the state's residents as would be provided under title I of PPACA; and (4) the proposal will not increase the federal deficit. The Secretaries retain their discretionary authority under section 1332 to deny waivers when appropriate given consideration of the application as a whole, even if an application meets the four statutory guardrails.

The Departments are also responsible under section 1332 of PPACA for monitoring a waiver's compliance with the statutory guardrails and for conducting evaluations to determine the impact of the waiver. Specifically, section 1332 of PPACA requires that the Secretaries provide for and conduct periodic evaluations of approved section 1332 waivers. The Secretaries must also provide for a process under which states with approved waivers must submit periodic reports concerning the implementation of the state's waiver program.

In October 2018, the Departments issued the 2018 Guidance,[53] which provides additional guidance for states that wish to submit section 1332 waiver proposals regarding the Secretaries' application review procedures, pass-through funding determinations, certain analytical requirements, and operational considerations. The 2018 Guidance also includes information regarding how the Departments will apply the section 1332 statutory guardrails to evaluate whether a waiver is approvable. Section 1332 of PPACA and the 2018 Guidance empower states to address problems with their individual insurance markets and increase coverage options for their residents, and to encourage states to evaluate and adopt innovative strategies to reduce future overall health care spending. Together, the statutory guardrails and the 2018 Guidance provide states a reliable roadmap to follow in designing section 1332 waiver programs that will promote a stable health insurance market that offers more choice and affordability to state residents.

In this final rule, the Departments provide certainty to states that the requirements and expectations of the section 1332 program will not change abruptly, or without notice to states and the public, and an opportunity to comment. Specifically, the Departments proposed to incorporate by reference the 2018 Guidance in full in the regulations

[53] 83 FR 53575 (Oct. 24, 2018).

governing section 1332 waiver application procedures, monitoring and compliance, and periodic evaluation requirements. The Departments are finalizing the policies, with modifications made in response to public comments to codify many of the policies and interpretations outlined in the 2018 Guidance specifically in the text of the section 1332 implementing regulations. The Departments are of the view that this rulemaking will give states greater certainty regarding how the Departments will apply section 1332's statutory guardrails when determining whether a state's waiver proposal can receive and maintain approval by the Departments.

31 CFR 33.108 and 45 CFR 155.1308 specify the application procedures a section 1332 waiver proposal must meet to be approved by the Secretaries. Under these regulations, an application for initial approval of a section 1332 waiver will not be considered complete unless the application complies with the application procedures under 31 CFR 33.108(f) and 45 CFR 155.1308(f), including written evidence of the state's compliance with the public notice requirements set forth in 31 CFR 33.112 and 45 CFR 155.1312. Furthermore, an application must provide a comprehensive description of the enacted state legislation and program to implement a plan meeting the requirements for a waiver under section 1332; a copy of the enacted state legislation authorizing such waiver request; a list of the provisions of law that the state seeks to waive including a brief description of the reason for the specific request; and the analyses, actuarial certifications, data, assumptions, targets and other information sufficient to provide the Secretaries with the necessary data to determine that the state's proposed waiver meets the statutory guardrails. The 2018 Guidance provides supplementary information about the Departments' analysis as to whether a proposed section 1332 waiver plan meets requirements for approval, the Secretaries' application review procedures, the calculation of pass-through funding, certain analytical requirements, and operational considerations. The 2018 Guidance also clarifies adjustments the Secretaries may make to maintain federal deficit neutrality, and explains how states may rely on existing legislative authority in certain circumstances as authorization for section 1332 waivers.

The Departments are of the view that formalizing these policies and interpretations through rulemaking will encourage more states to pursue waivers without being concerned that some of the rules may change without sufficient notice after they have submitted a waiver application. As such, the Departments are finalizing modifications to 31 CFR 33.108(f)(3)(iv)(A)–(C) and 45 CFR 155.1308(f)(3)(iv)(A)–(C) to codify in regulation the manner in which the Departments will apply the comprehensiveness, affordability, and coverage 'section 1332 guardrails' [54] as outlined in the 2018 Guidance. Specifically, this final rule adds regulatory language to 31 CFR 33.108(f)(3)(iv)(A) and 45 CFR 155.1308(f)(3)(iv)(A) explaining that the Departments will consider the comprehensive coverage guardrail to be met by a state waiver plan if the plan will provide consumers access to coverage options that are at least as comprehensive as the coverage options provided without the waiver, to at least a comparable number of people as would have had access to such coverage absent the waiver. This final rule also adds language to 31 CFR 33.108(f)(3)(iv)(B) and 45 CFR 155.1308(f)(3)(iv)(B) providing that the Departments will consider the affordability requirement to be met by a state waiver plan that will provide consumers access to coverage options that are at least as affordable as the coverage options provided without the waiver, to at least a comparable number of people as would have had access to such coverage absent the waiver. These modifications also provide, consistent with the 2018 Guidance, that the Departments will consider the comprehensiveness and affordability guardrails met if a waiver plan provides access to coverage that is as comprehensive and affordable as coverage forecasted to have been available in the absence of the waiver, and is projected to be available to a comparable number of people under the waiver.

This final rule also adds regulatory language to 31 CFR 33.108(f)(3)(iv)(C) and 45 CFR 155.1308(f)(3)(iv)(C) providing that for purposes of the coverage guardrail, coverage refers to minimum essential coverage as defined in 26 U.S.C. 5000A(f) and 26 CFR 1.5000A–2, and health insurance coverage as defined in 45 CFR 144.103. No changes are being made to the Federal deficit neutrality guardrail under 31 CFR 33.108(f)(3)(iv)(D) and 45 CFR 155.1308(f)(3)(iv)(D), which prohibits approval of any waiver plan that is projected to increase the Federal deficit.

The Departments are also finalizing a modification to 31 CFR 33.108(f)(3)(i) and 45 CFR 155.1308(f)(3)(i) to provide that the Departments may consider existing legislation in analyzing whether the state has satisfied the requirement that the state enact a law under section 1332(b)(2)(A) of PPACA that provides statutory authority to enforce PPACA provisions or the state plan, combined with a duly-enacted state regulation or executive order. The Departments are of the view that these modifications will allow states to better plan for future section 1332 waiver applications and provide certainty to states as they invest significant state resources toward the submission of a section 1332 waiver application and the implementation of a section 1332 waiver plan, particularly waivers that require multi-year preparation.

In the proposed rule, the Departments proposed to incorporate the 2018 Guidance in full into the Departments' monitoring and compliance regulations at 31 CFR 155.1320 and 45 CFR 155.1320. Specifically, under the current regulations, the Secretaries reserve the right to suspend or terminate a waiver, in whole or in part, any time before the date of expiration, if the Secretaries determine that the state materially failed to comply with the terms and conditions of the waiver. The Departments will review and, when appropriate, investigate documented complaints that the state is failing to materially comply with requirements specified in the approved waiver and the specific terms and conditions (STCs) for the approval of the waiver signed by the Departments and the state. In addition, the Departments will promptly share with the state any complaint that they may receive and will notify the state of any applicable monitoring and compliance issues. States with approved section 1332 waivers must comply with all applicable federal laws and regulations (unless specifically waived) and must come into compliance with any changes in federal law or regulations affecting section 1332 waivers.

The Departments are finalizing a modification to 31 CFR 33.120(a)(1) and 45 CFR 155.1320(a)(1) to explicitly require that the Departments examine monitoring and compliance consistent with 31 CFR 33.108(f)(3)(iv) and 45 CFR 155.1308(f)(3)(iv)and guidance published by the Departments. The

[54] Under section 1332 of PPACA, the Departments may approve a state's section 1332 waiver application when the Departments determine the waiver plan will meet the four criteria specified in section 1332(b)(1), including the guardrails related to comprehensiveness, affordability, and coverage, as well as a fourth guardrail related to deficit neutrality.

Departments are of the view that codifying many of the policies and interpretations outlined in the 2018 Guidance into the section 1332 waiver implementing regulations will provide certainty regarding how the Departments will evaluate and review section 1332 waiver programs, as states submit information concerning the implementation of their waiver programs.

In the proposed rule, the Departments also proposed to incorporate the 2018 Guidance in full in the periodic evaluation requirements regulations at 31 CFR 33.128 and 45 CFR 155.1328. Under current regulations, the Departments are responsible for evaluating the waiver using federal data, information reported by states, and the waiver application itself to ensure that the Departments can exercise appropriate oversight of the approved waiver. Per 31 CFR 33.120(f) and 45 CFR 155.1320(f), the state must fully cooperate with the Departments or an independent evaluator selected by the Departments, to undertake an independent evaluation of any component of the section 1332 waiver. As part of this required cooperation, the state must submit all requested data and information to the Departments or the independent evaluator. The state generally must meet the statutory requirements in each year that the waiver is in effect; as such the primary focus of the periodic evaluations will be the four statutory guardrails. However, the Departments will consider the longer-term impacts of a state's waiver plan.

The Departments are finalizing a modification to 31 CFR 33.128 and 45 CFR 155.1328 to require that the Departments periodically evaluate approved waivers to ensure the program is consistent with 31 CFR 33.108(f)(3)(iv) and 45 CFR 155.1308(f)(3)(iv) and guidance published by the Departments. The Departments are of the view that codifying many of the policies and interpretations outlined in the 2018 Guidance into the section 1332 waiver implementing regulations will provide certainty regarding how the Departments will evaluate whether a state may maintain approval of its section 1332 waiver. The Departments also are of the view that this policy will help states to anticipate the data that will be most relevant and helpful to the Departments' analyses of a state's compliance with the specific terms and conditions approved by the Departments and other applicable requirements.

The Departments are finalizing the policies, as stated above, with modifications to 31 CFR 33.108, 31 CFR 33.120, 31 CFR 33.128, 45 CFR 155.1308, 45 CFR 155.1320, and 45 CFR 155.1328 to codify many of the policies and interpretations outlined in the 2018 Guidance in the section 1332 implementing regulations. The Departments are of the view that the increased certainty that would result from incorporating these policies in the 2018 Guidance into the section 1332 implementing regulations will allow states to have greater confidence that the significant time and monetary investments necessary to plan for, submit, and implement a section 1332 waiver will not result in wasted resources and taxpayer dollars. The Departments are also of the view that these modifications finalized in this final rule will help to increase state innovation, which could lead to more affordable health coverage for individuals and families in states that implement a section 1332 waiver program.

The Departments sought comments on these proposals. The Departments received public comments on the proposed updates to the regulations detailing the section 1332 application procedures (31 CFR 33.108 and 45 CFR 155.1308), monitoring and compliance (31 CFR 33.120 and 45 CFR 155.1320), and periodic evaluation requirements (31 CFR 33.128 and 45 CFR 155.1328). In addition, the Departments previously solicited public comments on the 2018 Guidance for a 60-day period (October 22, 2018 through December 24, 2018). During that period, the Departments received approximately 2,100 public comments.

Based on the Departments' review and consideration of comments in response to the proposed rule and the 2018 Guidance, their experience with section 1332 waivers, and the positive market effects that have been attained as a result of existing section 1332 waiver programs, the Departments will not revise the 2018 Guidance or otherwise modify the policies that they are now explicitly incorporating into regulation in this final rule. However, in response to comments, the Departments will not incorporate by reference the 2018 Guidance in the section 1332 implementing regulations, but are finalizing modifications to the text of those implementing regulations to codify many of the policies and interpretations outlined in the 2018 Guidance. Later in this section of the preamble, the Departments review and respond to comments received in 2018 in response to the 2018 Guidance, as well as those received in response to the proposals to incorporate the 2018 Guidance into the section 1332 implementing regulations in the proposed rule, which were largely similar to comments submitted on the 2018 Guidance.

Comment: A few commenters stated that it is not proper to incorporate by reference the 2018 Guidance under 1 CFR 51.7(b) because it is an HHS publication or under 1 CFR 51.7(c)(1) because it has previously been published in the **Federal Register**. Another commenter stated that the 2018 Guidance is amorphous and imprecise, such that the proposed cross-references to the 2018 Guidance do not fit the definition of a rule under 5 U.S.C. 551. Other commenters asserted that it was bad policy to codify the 2018 Guidance by reference rather than by crafting concrete regulatory language.

One commenter stated that the Departments failed to comply with H.R. 3010, the Regulatory Flexibility Act of 2011, which the commenter believes to include a legal mandate that a federal agency, as part of an agency's evaluation of any proposed regulatory change, must analyze its distributional effects, which specifically refers to the impact of a regulatory action across the population and economy, divided up in various ways (for example, income groups, race, sex, industrial sector, geography).[55] The commenter further stated that the Departments failed to adequately identify and analyze the effects of codifying the 2018 Guidance. One commenter noted that the Department of the Treasury's participation was necessary for any regulation issued regarding section 1332 waivers and CMS cannot act alone.

Response: The Departments appreciate these commenters' concerns and want to ensure the requirements are clear to the public. The goal of the proposal to incorporate the 2018 Guidance into the section 1332 implementing regulations was to provide stability and certainty to states with existing waivers and to those who may be in the process of or interested in pursuing such a waiver. The Departments agree with commenters that suggested the Departments craft more specific regulatory text, rather than finalize the proposed incorporation of the 2018 Guidance by reference, to codify the Departments' interpretations in these regulations. As such, in this rule, the Departments are finalizing

[55] The Departments' research shows that H.R. 3010, the Regulatory Flexibility Act of 2011, was never signed into law. Notwithstanding, the Departments respond to the commenter's concerns here and in the RIA, section VI.C.3 of this final rule.

modifications to 31 CFR 33.108, 31 CFR 33.120, 31 CFR 33.128, 45 CFR 155.1308, 45 CFR 155.1320, and 45 CFR 155.1328 to codify many of the policies and interpretations outlined in the 2018 Guidance in the section 1332 waiver program's implementing regulations. Specifically, the Departments are adding language to 31 CFR 33.108(f)(3)(i) and 45 CFR 155.1308(f)(3)(i) providing that the Departments may consider existing legislation in analyzing whether the state has satisfied the requirement that the state enact a law under section 1332(b)(2)(A) of PPACA if that legislation provides statutory authority to enforce PPACA provisions or the state plan, combined with a duly-enacted state regulation or executive order. Additionally, the Departments are finalizing changes to 31 CFR 33.108(f)(3)(iv)(A)–(C) and 45 CFR 155.1308(f)(3)(iv)(A)–(C) to codify many of the 2018 Guidance guardrail interpretations into regulations. The Departments are also finalizing changes to 31 CFR 33.120(a)(1) and 45 CFR 155.1320(a)(1) to explicitly require that the Departments examine monitoring and compliance requirements consistent with the guardrail interpretations outlined in 31 CFR 33.108(f)(3)(iv) and 45 CFR 155.1308(f)(3)(iv) and guidance published by the Departments. Lastly, the Departments are finalizing changes to 31 CFR 33.128 and 45 CFR 155.1328 to require that the Departments periodically evaluate approved waivers to ensure the program is consistent with the guardrail interpretations outlined in 31 CFR 33.108(f)(3)(iv) and 45 CFR 155.1308(f)(3)(iv) and guidance published by the Departments. As described below, the policies and interpretations outlined in the 2018 Guidance remain unchanged. These regulatory modifications are being made in response to commenters' recommendations to craft concrete regulatory language and to further ensure that these finalized requirements are clear to the public.

Regarding some commenters' concerns that the Departments' did not analyze the distributional effect on the population and economy across subgroups that could result from incorporating the 2018 Guidance into regulation, the Departments are of the view that the data and information necessary to such an analysis are unavailable at this time. In particular, the Departments are unable to estimate or determine how many or which states may apply for a waiver using the regulatory modifications finalized in this final rule. As discussed in detail in the RIA under section VI.C.3 of this final rule, it would be difficult for the Departments to predict and analyze the impact of various state waiver plans that have not been submitted, including the distributional effects on various segments of the population. The Departments are of the view that meaningful analyses of the distributional effects of waiver proposals will be possible upon states' submissions to the Departments of complete section 1332 waiver applications. Pursuant to section 1332 of PPACA, the Departments must conduct reviews of section 1332 waiver applications on an individual basis. The distributional effects of each proposed waiver plan will be analyzed as part of the Departments' review, and members of the public and other stakeholders will have two distinct opportunities to comment on the distributional effects of a waiver during the state and federal public comment periods.

The Departments also agree that the Department of the Treasury's participation was necessary to the section 1332 proposals in the proposed rule. Thus, HHS did not act alone in developing or publishing the section 1332 proposals in the proposed rule. The proposed rule's section 1332 proposals were issued by both HHS and the Department of the Treasury, and in this final rule, the Departments are finalizing changes to relevant provisions in both 31 CFR part 33 (Treasury regulations) and 45 CFR part 155 (HHS regulations).

Comment: A few commenters expressed their support for the 2018 Guidance and its incorporation into the section 1332 implementing regulations. These commenters supported simplifying and streamlining the process for obtaining section 1332 waivers and affording states flexibility in meeting the guardrails for obtaining a waiver. Another commenter supported this proposal because it will provide certainty and allow states to utilize section 1332 waivers as intended, without adding unnecessary cost and time dealing with proposals that do not meet the necessary standards. The commenter further noted that such action is especially appreciated as state budgets are stretched thin due to the COVID–19 pandemic. One commenter noted that codifying the Departments' 2018 Guidance is especially important because of the significant time and taxpayer resources to develop and submit a waiver application. One commenter also noted that the process of developing a proposal and submitting it may take significant time and taxpayer resources, such that states may not want to undertake section 1332 waivers if the probability of success is low and the probability of the Departments changing requirements is high.

Furthermore, a few commenters noted that incorporating the 2018 Guidance into regulation will continue to improve the ability of states to access the flexibilities allowed by section 1332 waivers, empowering new innovation in the push to lower health costs. One commenter noted that a June 2020 CMS analysis of the effect of implemented section 1332 state-based reinsurance waivers found that premiums were an average of 17.7 percent lower during the 2020 plan year in the 12 states that had approved section 1332 waivers in place than they would have been without those waivers. The same commenter also noted that the results of 1332 waivers have been impressive thus far and that CMS should allow states to rely on existing regulatory direction across administrations, particularly when the existing framework demonstrates clear, positive results.

Response: The Departments appreciate commenters' support for these proposals. The Departments agree that codifying many of the policies and interpretations outlined in the 2018 Guidance into the implementing regulations will provide stability and certainty to states as they invest significant state resources towards submission of a section 1332 waiver application and implementation of an approved section 1332 waiver, particularly waivers that require multi-year preparation. The Departments also agree that implemented section 1332 waivers are lowering premiums for consumers, and that section 1332 waivers are an important tool to lower costs and strengthen state health insurance markets by providing a variety of coverage options. The Departments note that all states that have implemented a section 1332 reinsurance waiver plan have reduced premiums compared to a scenario without these waivers in place.[56] As described in this preamble, the Departments are finalizing these policies, with modifications, to codify many of the policies and interpretations outlined in the 2018 Guidance into the section 1332 waiver implementing regulations and are not otherwise making changes to the 2018 Guidance.

Comment: A majority of commenters did not support either the 2018

[56] See CCIIO Data Brief Series, State Relief and Empowerment Waivers: State-based Reinsurance Programs (June 2020), available at *https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Downloads/1332-Data-Brief-June2020.pdf*.

Guidance or its incorporation into the section 1332 regulations. Many of these commenters stated that the 2018 Guidance and its proposed codification would undermine the congressional intent underlying the section 1332 guardrails and effectively codify policy they believe is based on a misinterpretation of the statute. A few commenters recommended rescinding and abandoning the 2018 Guidance completely and that the Departments return to the prior interpretation of the guardrails described in now superseded guidance issued in 2015 (referred to as the 2015 Guidance).[57]

Response: The Departments acknowledge commenters' concerns, but do not agree that the 2018 Guidance suffers from the purported flaws these commenters describe. The Departments note that the 2018 Guidance has been in place for more than 2 years and states have relied upon it to better understand the submission requirements for a section 1332 waiver application and how the Departments apply and interpret these requirements. The Departments are of the view that the changes finalized in this rule provide predictability and certainty for states as they decide whether to invest resources in developing and implementing innovative wavier proposals. Further, the 2018 Guidance aims to lower barriers to innovation for states seeking to reform their health insurance markets. As described more fully below, the Departments maintain that the policies announced in the 2018 Guidance are based on a sound interpretation of section 1332 of PPACA.

Comment: A majority of commenters did not support the policies outlined in the 2018 Guidance, specifically those related to how the Departments would analyze and determine whether a waiver proposal complies with the section 1332 guardrails. All of these commenters expressed concerns regarding the legality of the coverage, affordability, and comprehensiveness guardrail interpretations included in the 2018 Guidance.

Many commenters expressed concerns with the focus on the ''availability of comprehensive and affordable coverage'' in the 2018 Guidance and its effect on how the Departments could apply the coverage, affordability, and comprehensiveness guardrails. Some commenters raised a fundamental concern that the Department's current interpretation conflicts with the plain language and Congressional intent of the statute, and stated that the Departments should revert to the previous approach (as outlined in the 2015 Guidance) requiring that only those actually covered in EHB-compliant plans be counted toward compliance with the guardrails. Some commenters asserted that the statute requires the Departments to consider the estimated number of state residents who would actually enroll in comprehensive, affordable coverage if the waiver were approved and implemented, not just the estimated number of residents who would have the opportunity to enroll in such coverage. The commenters were concerned that the focus on the interpretation of the availability of comprehensive and affordable coverage in the 2018 Guidance would result in fewer residents enrolled in comprehensive and affordable coverage, and would contradict the congressional intent behind the statutory guardrails. Other commenters asserted that the interpretation of the availability of comprehensive and affordable coverage for the coverage guardrail allows for a disjointed application of the guardrails whereby a state can meet the coverage guardrail, while its waiver plan reduces the overall comprehensiveness and affordability of coverage in a state.

Some commenters were concerned that the Departments' consideration of all forms of private coverage in addition to public coverage, including employer-based coverage, individual market coverage, and other forms of private health coverage would include forms of coverage that are not subject to the federal market reform requirements, including short-term, limited duration insurance (STLDI) plans and association health plans (AHPs). Other commenters were concerned that, because the 2018 Guidance would allow for STLDI to be included as a form of coverage under the analysis of whether a proposed waiver plan meets the section 1332 guardrails, there may be consumer confusion regarding what STLDI plans cover and do not cover in terms of benefits and out-of-pocket spending.

Commenters also expressed generalized concern that the 2018 Guidance could permit states to implement waiver programs that support consumer uptake of alternative plan options, including plans such as STLDI and AHPs that can be underwritten, or plans that do not meet EHB standards. In particular, commenters were concerned, in relation to the affordability guardrail, that measures taken under a state waiver program to facilitate coverage in such alternative plan options (for example, allowing the use of subsidies for such coverage) would result in fewer comprehensive plans in the market, and that those comprehensive plans would be less affordable. Commenters asserted that this would perpetuate a tendency for comprehensive coverage to attract higher-risk consumers, while healthier, lower-risk consumers would tend to enroll in alternative plan options, with non-comprehensive coverage. This, the commenters assert, would change the risk pool, bifurcating the market into low-risk consumers enrolled in alternative plan options and high-risk consumers enrolled in comprehensive coverage and comprehensive coverage would become less affordable and less available. Commenters thus asserted concerns related to the comprehensiveness and affordability guardrails that fewer individuals would be covered by comprehensive, affordable coverage with cost-sharing protections, and any interpretation of the section 1332 guardrails that allows approval of a waiver plan that promotes less comprehensive forms of coverage such as STLDI and AHPs is inconsistent with the statute.

Commenters also expressed concern that these alternative plan options are not subject to the same limitations as comprehensive coverage in terms of consumer protections and could also impact the affordability guardrail. For instance, these alternative plan options generally lack financial limitations like out-of-pocket maximums and are not subject to the federal prohibition on annual and lifetime limits for EHB. These commenters asserted that lower-risk consumers would tend to enroll in such alternative plan options because of these plan options' lower premiums and that these consumers would bear the financial risks associated with having coverage that places no limit on enrollee out-of-pocket expenses. Furthermore, commenters asserted that these consumers could then experience an unexpected, catastrophic health event, and could therefore be forced to pay substantially more in out-of-pocket costs than if they had enrolled in comprehensive coverage. Commenters asserted that such out-of-pocket costs would far exceed any savings consumers might achieve by rejecting comprehensive coverage and choosing a cheaper alternative.

There were a variety of other comments related to potential market impacts of the interpretation of the guardrails included in the 2018 Guidance. Some commenters noted that issuers offering comprehensive coverage might be more prone to exit a market

[57] Waivers for State Innovation, 80 FR 78131, available at *https://www.govinfo.gov/content/pkg/FR-2015-12-16/pdf/2015-31563.pdf.*

due to instability caused by the entry of alternative plan options. These commenters raised concerns regarding the potential degradation of the risk pool due to the increased likelihood of high health care costs with healthier consumers tending to choose alternative plan options. Other commenters raised concerns that the 2018 Guidance would lead to increased uninsured and underinsured populations, which would in turn increase emergency room utilization and health care costs. Some commenters were also concerned about the impact on the risk pool that they stated could occur as a result of the inclusion of alternative plan options as a form of coverage and allowing subsidies to be used towards purchasing these plans.

Response: The Departments acknowledge commenters' concerns and agree that section 1332 waivers should be designed to improve a state's health care market while protecting those in vulnerable populations, including consumers with pre-existing conditions. However, the Departments are of the view that the 2018 Guidance is based on a sound interpretation of section 1332 of PPACA and represents a reasonable and appropriate application of the section 1332 guardrails. The Departments also are of the view that the 2018 Guidance provides states more flexibility to address problems caused by PPACA and to give Americans more options to get health coverage that better meets their needs. Under the framework outlined in the 2018 Guidance, states can pursue waivers to improve their individual insurance markets, increase affordable coverage options for their residents, and ensure that people with pre-existing conditions are protected. For all waiver requests, the Departments retain the discretion to decide whether to approve a section 1332 waiver based on the particular circumstances of each state's application, provided that the Departments determine that all of the guardrails are satisfied, and the Departments must in all cases evaluate each application for compliance with section 1332 statutory requirements.

The Departments are of the view that the framework outlined in 2018 Guidance is based upon a sound interpretation of section 1332 and its requirements for approval of a section 1332 waiver. Under section 1332, the Departments may approve a state's section 1332 waiver application when the Departments determine the waiver plan will meet the section 1332 guardrails. For example, section 1332(b)(1)(C) of PPACA, the coverage guardrail, requires that a state's plan under a waiver will provide coverage ''to at least a comparable number of its residents'' as would occur without the waiver. However, the statutory text for the coverage guardrail is silent as to the type of coverage that is required or must be considered as part of this analysis. In addition, sections 1332(b)(1)(A) and (B) of PPACA state only that the state's waiver plan must ''provide'' coverage that is as comprehensive and affordable as would occur without a waiver, but do not require that people actually purchase and enroll in this coverage under a waiver. By its plain language, the term provide means ''to supply or make available'' and does not require or imply that people must use what is provided.[58] Prior to the publication of the 2018 Guidance, the interpretations and policies outlined in the 2015 Guidance focused on the number of individuals actually estimated to enroll in comprehensive and affordable coverage that meets all requirements under title I of PPACA, in effect reading the ''to at least a comparable number of its residents'' language from the coverage guardrail into the comprehensiveness and affordability guardrails as well.[59] However, neither the language nor structure of the statute compels that reading.

The Departments are of the view that the interpretations of the guardrails in the 2018 Guidance are reasonable and encourage states to provide, alongside coverage options that comply with PPACA market reforms, innovative coverage options that, while potentially less comprehensive than coverage established under PPACA, could be better suited to consumer needs and potentially more affordable and attractive to a broad range of a state's residents. Regarding the commenters' concerns about the focus on ''availability of comprehensive and affordable coverage'' as outlined in the 2018 Guidance (83 FR 53578) and its impact on how the Departments would analyze the guardrails when reviewing section 1332 waiver applications, the Departments are of the view that this focus loosens restrictions imposed by the interpretations outlined in the 2015 Guidance that were not required by PPACA and that previously limited state flexibility and consumer choice. While the 2015 Guidance focused on the number of individuals who would actually be provided comprehensive and affordable coverage under a proposed state waiver plan, the 2018 Guidance shifted focus to whether a waiver plan would actually make available comprehensive and affordable coverage to state residents. Under the 2018 Guidance and the regulatory changes finalized in this rule, the coverage available under the proposed waiver must be both as comprehensive and affordable as coverage available without the waiver. As noted previously, this shift comports with the plain language of the statute by establishing that ''provide coverage'' does not mean anything more than for such coverage to be supplied or available to consumers under the waiver. This shift would allow states to provide access to health insurance coverage at different price points and benefit levels. This shift ensures that state residents who wish to retain comprehensive coverage similar to that provided under PPACA can continue to do so, while permitting a state waiver plan to also provide access to other coverage options that may be better suited to consumer needs and more attractive to many other individuals. In addition, the 2018 Guidance focuses on the aggregate effects of a waiver on all state residents, rather than requiring that the guardrails be met for specific sub-populations. This interpretation provides states more flexibility to consider the effects on all categories of residents and to decide that improvements in comprehensiveness and affordability for state residents as a whole offset any small detrimental effects for particular residents. As explained in the 2018 Guidance, the state's analysis should address in the application for the section 1332 waiver how the section 1332 state waiver plan supports and empowers those with low income as well at those with high expected health care costs.

When applying the coverage guardrail, a comparable number of residents must still be covered as would have been covered absent the waiver. The 2018 Guidance also explains that the Departments conduct an assessment that takes into account whether the section 1332 state plan sufficiently prevents gaps in or discontinuations of coverage to address any decreases in coverage for specific sub-populations.

The Departments generally have discretion to interpret the statutory guardrails, including ambiguous or undefined terms, and continue to be of the view that the interpretations and policies outlined in the 2018 Guidance are consistent with the statute. As such, the Departments are finalizing amendments to 31 CFR 33.108(f)(3)(iv) and 45 CFR 155.1308(f)(3)(iv) to codify policies and interpretations outlined in

[58] Merriam Webster. Available at *https://www.merriam-webster.com/dictionary/provide.*

[59] See 80 FR 78132–33 (discussion of the affordability guardrail in the 2015 Guidance).

the 2018 Guidance into the section 1332 waiver implementing regulations.

In response to commenters' concerns regarding the Departments' consideration of ''all forms of private coverage in addition to public coverage, including employer-based coverage, individual market coverage, and other forms of private health coverage'' (85 FR 53579) for the purposes of the coverage guardrail as outlined in the 2018 Guidance, the Departments are of the view that consumers are best suited to determine what coverage best suits their individual or family's needs, whether that is a QHP, a major medical non-QHP, an STLDI plan, or another available coverage option. Section 1332 waivers should empower states to present innovative plans to provide access to coverage to every state resident, including those individuals who are not eligible for Medicaid or CHIP or who cannot afford comprehensive, major-medical coverage, but still want or need some form of coverage to protect against catastrophic expenses. In addition, regarding some commenters' concerns that fewer people may actually be covered, the Departments note that when applying the coverage guardrail, a comparable number of residents must still be covered as would have been covered absent the waiver. In response to commenters' concerns regarding the impact on the affordability guardrail due to the alternative plan options that are not subject to the same consumer protections as comprehensive coverage, the Departments previously noted that the affordability guardrail refers to state residents' ability to pay for health care expenses relative to their incomes and may generally be measured by comparing each individual's expected out-of-pocket spending for health coverage and services to his or her income. Therefore, states are required to include such analyses in waiver applications. As such, the Departments are finalizing amendments to 31 CFR 33.108(f)(3)(iv) and 45 CFR 155.1308(f)(3)(iv) as discussed in this section of the preamble.

We generally disagree with the commenters' suggestion that the consideration of alternative plan options, including STLDI plans, in the analysis of whether a proposed waiver meets the section 1332 guardrails, may result in consumer confusion about the benefits and coverage offered by STLDI plans. If a waiver were approved that included alternative plan options, residents in the state would continue to have access under the state's waiver plan to the same metal level plans and catastrophic plans that include EHB that are available today. Consumers would therefore have access to at least the same coverage and cost-sharing protections against excessive out-of-pocket spending as without the waiver. The availability of alternative plan options would be another option for consumers to consider as they shop for and enroll in coverage. However, recognizing the need and importance to ensure consumers are making informed choices, the Departments note that existing federal regulation requires issuers of STLDI plans to prominently display in the contract and in any application materials a consumer disclosure notice that informs consumers about the limitations of STLDI plans.[60] The Departments further note that, to the extent STLDI plans are displayed on non-Exchange direct enrollment websites approved by the FFE to assist with Exchange applications and enrollment, those websites must clearly distinguish QHPs from other available coverage options and are prohibited from displaying STLDI plans side-by-side on the same website page with QHPs.[61] These display requirements ensure that consumers can easily discern which plans are QHPs eligible for APTC and which are not. In addition, many states have adopted state-specific marketing and other consumer protection laws intended to help consumers understand the differences between the different available coverage options.

The Departments are of the view that concerns related to the potential increase in the cost of comprehensive coverage are not warranted because the application of the guardrails would prevent the approval of a waiver that would reduce access to comprehensive health coverage. Under the guardrails, a waiver clearly cannot be approved if it raises the cost of the comprehensive coverage that is available to consumers. The Departments are confident that the review process applicable to section 1332 waiver applications and the Departments' discretion to reject waiver applications that would result in unreasonable harm to a state's risk pool are sufficient to mitigate commenters' concerns that the cost of comprehensive coverage will increase, in terms of premiums and out of pocket spending. Specifically, the Departments are required to evaluate each state's proposal to determine that it meets the section 1332 requirements. The Departments undertake extensive analysis and reviews of research and program information as part of these determinations. As provided in 31 CFR part 33 and 45 CFR part 155, subpart N, the waiver application must include analysis and supporting data that demonstrates that the waiver satisfies the guardrails. As such, a state is required to include an actuarial analysis and actuarial certification, economic analysis, data and assumptions and other necessary information to support the state's estimates that the proposed waiver will meet the requirements of section 1332. The actuarial and economic analysis must appropriately model the impact of the waiver plan, including impacts on enrollment and affordability for individual market single risk pool coverage, relative to a without-waiver baseline. Any net increase in premiums in the individual market risk pool in a with waiver scenario, compared to a without-waiver scenario, would likely not meet the guardrails and would not be an approvable waiver application. In addition the Departments maintain the discretion to deny waivers when appropriate given consideration of the application as a whole, even if an application meets the four statutory guardrail requirements. As such, the Departments can deny a proposed waiver plan that meets the guardrails, if the Departments determine the waiver would cause more harm than good to the state's residents or to a state's risk pool.

Comment: Some commenters raised concerns regarding how the interpretation of the guardrails, including the focus on the ''availability of comprehensive and affordable coverage'', in the 2018 Guidance would impact maintaining protections for vulnerable populations and consumers with pre-existing conditions. In particular, commenters raised concerns that alternative plan options can terminate or deny coverage based on health status, which would tend to affect high-risk individuals. Commenters asserted that coupled with the diminished affordability of comprehensive coverage, this possibility puts high-risk individuals at great risk of going without effective coverage for their health care needs. Commenters also raised concerns that the guidance

[60] See 45 CFR 144.103 (defining STLDI and providing the language of the required consumer disclosure notice).

[61] See 45 CFR 155.221(b)(1) (direct enrollment entities must ''[d]isplay and market QHPs and non-QHPs on separate website pages on its non-Exchange website. . . .''); 45 CFR 155.221(b)(3) (direct enrollment entities must ''[l]imit marketing of non-QHPs during the Exchange eligibility application and QHP plan selection process in a manner that minimizes the likelihood that consumers will be confused as to what products are available through the Exchange and what products are not. . . .'').

provides the flexibility to craft hypothetical EHB-benchmarks that could further diminish the quality and affordability even of comprehensive coverage under a waiver program.

Some commenters also expressed concern that the potential market effects would generally have a disparate impact on vulnerable populations, especially low-income consumers and those with pre-existing conditions. Additionally, these commenters expressed concern that a disparate impact on any particular group would not necessarily cause the Departments to deny a waiver application, even though the impact on vulnerable population groups would be taken into account. Many vulnerable population groups were represented in the comments, including the elderly and those with pre-existing conditions like cystic fibrosis, ostomy/continent diversion, heart disease, arthritis, epilepsy, muscular dystrophy, leukemia/lymphoma, hemophilia, and others. Commenters raised the importance of ensuring compliance with specific PPACA market reforms including coverage of preventive services without cost sharing, the prohibition of pre-existing condition exclusions, the rating rules, and EHB coverage requirements, including prescription drugs and mental health and substance use disorder services. Commenters also stated concern for young adults who heavily rely on comprehensive coverage and key benefits like mental health care.

Response: The Departments understand commenters' concerns regarding potential impacts on vulnerable populations. The Departments are of the view that it is important that vulnerable populations have the support they need to obtain affordable and comprehensive coverage that meets their individual or family needs. As outlined in the 2018 Guidance, the Departments are committed to supporting and empowering those in need.[62] Furthermore, as discussed in the 2018 Guidance, the state should address in the application for the section 1332 waiver how the section 1332 state plan addresses the principles outlined in the 2018 Guidance to support and empower those with low incomes as well at those with high expected health care costs as it relates to the coverage, comprehensiveness, and affordability guardrails. The Departments also note that state section 1332 waiver applications are reviewed by the Departments on an individual basis, and in the 2018 Guidance, the Departments explained that state waiver applications should also identify any types of individuals for whom affordability of coverage would be reduced by the waiver and any types of individuals for whom affordability of coverage would be improved under the waiver. In addition, the Departments have encouraged and continue to encourage states to develop waiver proposals that support and empower those with low incomes as well at those with high expected health care costs. The Departments further note and emphasize that section 1332 waiver authority cannot be used to waive many of PPACA's consumer protections, including coverage of preventive services without cost sharing, the prohibition against pre-existing conditions exclusions, guaranteed issue, or the rating rules. As such, consumers will continue to have access to comprehensive coverage options that are subject to and must comply with PPACA market reforms identified by commenters.

Comment: A few commenters recommended that the Departments provide more flexibility for states to meet the requirement that a waivers will not increase the federal deficit. They recommended that instead of mandating that all waiver applications meet the deficit neutrality guardrail for each and every year of the waiver, they should instead be required to meet the deficit neutrality guardrail over a 10-year period. These commenters noted that this approach would be consistent with how CBO scores are generally analyzed for budget neutrality over a 10-year period, and would be consistent with the current requirement for states to include a 10-year budget projection in a state section 1332 waiver application.

Response: The Departments appreciate these commenters' recommendation, but the Departments are not making any changes to the Departments' interpretation or application of the federal deficit guardrail. Therefore, the Departments continue to require that a waiver must not increase the federal deficit over the period of the waiver (which may not exceed 5 years unless renewed) or in total over the 10-year budget plan submitted by the state as part of the application.

Comment: A few commenters expressed concern that allowing states to rely on existing general authority to enforce PPACA, in conjunction with a duly enacted regulation or Executive Order, delays stakeholder notification of a state's proposal and does not provide stakeholders adequate time to prepare comments or work with state legislatures to address concerns with proposed legislation.

Response: The Departments acknowledge these commenters' concerns, but note that the section 1332 implementing regulations include requirements for public notice at the state and federal level for new waiver applications.[63] In addition, states are not precluded from providing additional notice of an intent to submit a section 1332 waiver application under the section 1332 implementing regulations. The Departments therefore are not making any changes to this policy and will continue to apply the interpretation that permits states to rely on existing general authority to enforce PPACA, in conjunction with a duly enacted regulation or Executive Order.

Comment: A few commenters stated that the revisions in the 2018 Guidance constituted a significant change to prior section 1332 waiver policy and should have been proposed through rulemaking. Several commenters requested the Departments consider the comments submitted and publish a revised version of the guidance. Additional commenters stated that the 30-day comment period for the proposed 2022 Payment Notice was too short and did not provide sufficient opportunity for commenters to address the impact of these requirements to date and the potential prospective impact, including the potential negative consequences for consumers seeking affordable coverage to meet their health needs. Other commenters recommended that this rule is not an appropriate place to propose moving the 2018 Guidance into regulation and if the Departments want to pursue these policies, then the Departments must retract these provisions from this rule and repost the entire 2018 Guidance through the full APA rulemaking process with a separate notice-and-comment period.

Response: The Departments appreciate commenters' interest in policies affecting section 1332 waivers. The Departments are of the view that a

[62] From 2018 Guidance principles: ''Support and empower those in need. Americans should have access to affordable, high value health insurance. Some Americans, particularly those with low incomes or high expected health care costs, may require financial assistance. Policies in section 1332 waiver applications should support state residents in need in the purchase of private coverage with financial assistance that meets their specific health care situations.'' (83 FR 53577).

[63] *See* 31 CFR 33.112 and 45 CFR 155.1312; 31 CFR 33.116 and 45 CFR 155.1316. Also note that there is flexibility under 31 CFR 33.118 and 45 CFR 155.1318 for states to request, subject to approval by the Departments, modification from the normal public notice requirements during the COVID–19 PHE when a delay would undermine or compromise the purpose of the proposed waiver request and be contrary to the interest of consumers.

longer comment period would have delayed the publication of this final rule and created significant challenges in providing certainty for states developing section 1332 waiver proposals or those with existing approved waivers. Furthermore, while the Departments generally disagree that the 2018 Guidance should have been formalized in rulemaking initially or that there is a need to codify amendments to the section 1332 regulations through a separate rulemaking, stakeholders and the general public have now had two opportunities to provide feedback on the policies and interpretations outlined. The Departments have considered comments received in response to the 2018 Guidance, as well as those received in response to the section 1332 policies in the proposed rule. After consideration of these comments, for the reasons outlined earlier in this section of the preamble, the Departments are finalizing amendments to the section 1332 implementing regulations to codify many of the policies and interpretations outlined in the 2018 Guidance. The Departments, however, are not changing any of the substantive policies or interpretations in the 2018 Guidance, as the goal of this effort is to provide stability and certainty to states with existing approved waiver plans and those who may be interested in pursuing a section 1332 waiver.

Comment: Commenters requested that the Departments closely monitor waiver proposals to ensure fair and adequate access to affordable and comprehensive coverage, particularly in light of the COVID–19 PHE. A few commenters highlighted that the timing of this proposal could be particularly harmful given the current COVID–19 PHE. These commenters were concerned that this policy will have a disproportionate impact on certain populations, that have also been disproportionally impacted by COVID–19, such as certain racial and ethnic populations.

Several commenters requested that CMS closely monitor waiver proposals to ensure fair and adequate access and payment for Federally Qualified Health Centers (FQHC) services.[64] Commenters also encouraged CMS to prioritize section 1332 waiver proposals that maintain the statutory requirement for qualified health plans to include essential community providers, like FQHCs, that serve predominately low-income individuals, and that CMS encourage states to explore section 1332 waivers that expand the vital enabling services, including outreach and enrollment assistance.

Response: The Departments note that the purpose of section 1332 waivers is for states to pursue innovative strategies for providing their residents with access to higher value, more affordable health coverage. For instance, to date, reinsurance waivers have delivered measurable premium reductions. These benefits may be particularly important to address COVID–19, and the Departments have already issued regulations to provide states with flexibility to take advantage of section 1332 waivers to address the immediate issues COVID–19 presents.[65] The Departments are of the view that this rule further supports state efforts to take advantage of section 1332 waivers to address the COVID–19 PHE.

The Departments are of the view there are many areas, including those identified by commenters, in which compliance monitoring will be particularly important to ensure that approved waivers continue to meet the statutory criteria for approval, especially during the current COVID–19 PHE. Given that all policy changes can have a range of impacts due to the specifics of the state, such as the time the policy was implemented, the specific operational choices, and other market factors, the Departments may include strict safeguards and monitoring protocols in the approval letter and waiver terms and conditions to ensure that the waiver continues to meet the guardrails, including the impact on certain populations, for the duration of the waiver period. The federal government is committed to an all of government approach to providing COVID–19 relief.[66] In addition, throughout the COVID–19 PHE, CMS has worked to ensure the safety of the American public and has offered states, providers, suppliers, and group health plans and health insurance issuers flexibilities in furnishing and providing services to combat COVID–19. To the extent possible, the Departments intend to align this monitoring with each state's waiver design to effectively evaluate waiver program performance, while keeping administrative burdens to a minimum.

[64] Specifically, the FQHC protections in section 1311(c)(1)(C)) of PPACA and section 10104(b)(2) of PPACA (adding (g) to section 1311 of PPACA)) should not be compromised in any waiver granted to a state under section 1332.

[65] See 85 FR 71142 (Nov. 6, 2020) (adopting flexibilities in the public notice requirements and post award public participation requirements for section 1332 waivers during the COVID–19 PHE).

[66] See *https://www.usa.gov/coronavirus.*

V. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995 (PRA), we are required to provide 30-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to OMB for review and approval. This final rule contains information collection requirements (ICRs) that are subject to review by OMB. A description of these provisions is given in the following paragraphs. To fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the PRA requires that we solicited comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

We solicited public comment on each of the required issues under section 3506(c)(2)(A) of the PRA for the following ICRs.

A. ICRs Regarding State Innovation Waivers (31 CFR 33.108, 45 CFR 155.1308, 31 CFR 33.120, 45 CFR 155.1320, 31 CFR 33.128 and 45 CFR 155.1328)

The Departments are finalizing regulatory revisions codifying into section 1332 regulations policies initially announced in the 2018 Guidance governing waiver application procedures, monitoring and compliance, and periodic evaluations to give states certainty regarding the requirements to receive and maintain approval of a section 1332 waiver by the Departments. The Departments are not altering any of the requirements related to state innovation waiver applications, compliance and monitoring, or evaluation in a way that would create any additional costs or burdens for states seeking waiver approval or those states with approved waiver plans. The Departments anticipate that implementing these provisions will not significantly change the associated burden. The burden related to this information collection (Review and Approval Process for Waivers for State Innovation (CMS–10383)) is currently under review by OMB. CMS did not receive comments on these ICRs.

B. ICRs Regarding Exchange Direct Enrollment (DE) Option (§ 155.221)

Current SBEs that elect to implement the Exchange DE option will need to revise their Exchange Blueprint (Blueprint) under § 155.221(j)(1) to describe precisely how the state proposes to implement the Exchange DE option in compliance with related requirements. We believe that any costs of revising the Blueprint will be nominal, as this process involves logging into a CMS web interface that serves as the repository for all states' Exchange Blueprints to input additional information on the updated processes and controls the state will implement to manage its new Exchange DE program. The burden related to completing the Blueprint is currently approved under OMB Control Number 0938–1172 (Blueprint for Approval of Affordable State-based and State Partnership Insurance Exchanges (CMS–10416)). We sought comment on the burden associated with this activity, but did not receive any.

Prospective DE entities must contract with an independent third-party auditor to complete a security and privacy controls assessment, which must be submitted to HHS for review. Once approved, a DE entity must submit quarterly plans of action and milestones (POA&Ms) to HHS to document the identification and resolution of any new or existing security or privacy risks. We will prepare an ICR submission for review and approval by OMB through the normal PRA notice-and-comment process.

C. Submission of PRA-Related Comments

We have submitted a copy of this final rule to OMB for its review of the rule's information collection requirements. The requirements are not effective until they have been approved by OMB.

To obtain copies of the supporting statement and any related forms for the collections discussed in this rule, please visit the CMS website at *www.cms.hhs.gov/PaperworkReductionActof1995,* or call the Reports Clearance Office at 410–786–1326.

VI. Regulatory Impact Analysis

A. Statement of Need

This final rule includes provisions related to FFE and SBE–FP user fees for the 2022 benefit year. It also includes changes related to acceptance of payments by issuers of individual market QHPs. It clarifies the regulation imposing network adequacy standards with regard to QHPs that do not differentiate benefits based on whether an enrollee receives services from an in-network or out-of-network provider. It also creates a new direct enrollment (DE) option for states served by State Exchanges, FFEs, and SBE–FPs. In addition, relating to State Innovation Waivers, this rule finalizes regulatory revisions codifying into section 1332 regulations policies initially announced in the section 1332 2018 Guidance, governing waiver application procedures, monitoring and compliance, and periodic evaluations to give states certainty regarding the requirements to receive and maintain approval of a section 1332 waiver.

B. Overall Impact

The Departments have examined the impacts of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA), Public Law 96–354 (September 19, 1980), section 202 of the Unfunded Mandates Reform Act of 1995, Public Law 104–4 (March 22, 1995), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act, 5 U.S.C. 804(2), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. An RIA must be prepared for rules with economically significant effects ($100 million or more in any one year).

Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action that is likely to result in a rule: (1) Having an annual effect on the economy of $100 million or more in any one year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order. An RIA must be prepared for major rules with economically significant effects ($100 million or more in any one year), and a ''significant'' regulatory action is subject to review by OMB. The Departments have concluded that this rule is likely to have economic impacts of $100 million or more in at least one year, and therefore, meets the definition of ''significant rule'' under Executive Order 12866. Therefore, the Departments have provided an assessment of the potential costs, benefits, and transfers associated with this rule. In accordance with the provisions of Executive Order 12866, this regulation was reviewed by OMB.

The provisions in this final rule aim to ensure that consumers continue to have access to affordable coverage and health care, and that states have flexibility and control over their insurance markets. The changes related to the Exchange DE option and section 1332 waivers will reduce regulatory burdens for states. Through the reduction in financial uncertainty for states and issuers and increased affordability for consumers, these provisions are expected to promote greater market stability and to increase access to affordable health coverage. In states that implement the Exchange DE option, there will be start-up costs for states, DE entities (including web-brokers, agents and brokers, and issuers), and the federal government related to start-up, approval, implementation, and oversight. However, consumers in such states will likely have more options to shop for coverage and an improved shopping experience. Some issuers may incur minimal costs to make operational changes in order to accept payments on behalf of an enrollee from an individual coverage HRA or QSEHRA.

Comment: A few commenters stated that the RIA in the proposed rule was inadequate.

Response: As explained in the proposed rule, the Departments are unable to quantify all the effects of the provisions of this rule. There are uncertainties regarding the impact of several provisions. For example, it is not certain how many states will implement the Exchange DE option or how many states will submit section 1332 waiver applications. Therefore, the Departments have included qualitative

discussions of costs and benefits related to the provisions in this final rule.

C. Impact Estimates of the Payment Notice Provisions and Accounting Statement

In accordance with OMB Circular A–4, Table 1 depicts an accounting statement summarizing the Departments' assessment of the benefits, costs, and transfers associated with this regulatory action.

This final rule implements standards for programs that will have numerous effects, including allowing consumers to have continued access to coverage and health care, and stabilizing premiums in the individual and small group health insurance markets and in an Exchange. Although we are unable to quantify all benefits and costs of this final rule, the effects in Table 1 reflect qualitative impacts and estimated direct monetary costs and transfers resulting from some of the provisions of this rule.

For 2022, we are finalizing a reduction in the FFE user fee rate from 3.0 percent of total premiums charged to 2.25 percent of total premiums charged, and a reduction in the SBE–FP user fee rate from 2.5 percent of total premiums charged to 1.75 percent of total premiums charged. For the 2023 benefit year, we are finalizing the FFE–DE and SBE–FP–DE user fee rate of 1.5 percent of total premiums charged. While our current budget estimates may change in the future, we believe that it is important to keep the user fee in all markets at the lowest level possible to cover the costs of the Exchanges and keep premiums low for consumers and issuers. We expect transfers from the issuers to federal government to be reduced by approximately $270 million in 2022 and by approximately $60 million in 2023 due to changes in user fee rates and state transitions; transitions from FFE or SBE–FP to State Exchange, SBE–FP in 2022, or to FFE–DE in 2023 are included in the reduction in user fee transfers from issuers to federal government.

TABLE 1: Accounting Statement

Benefits:

Qualitative:

- Continued access to coverage and heath care for consumers.
- Potential reduction in operational costs for the federal government if FFE or SBE-FP states elect to implement the FFE-DE or SBE-FP-DE option.
- Potential improved shopping experience for consumers in states with Exchanges that implement the Exchange DE option. This may result in a potential increase in enrollments in a state that implements this option.
- Potential improvements to the individual market risk pool through increased incentives for DE entities to enroll people who would otherwise not enroll—a potentially healthier group—in states that implement the Exchange DE option.
- Increased certainty for states to pursue section 1332 waivers, which could, in turn, help increase the number of states that apply for waivers to improve their individual insurance markets and increase affordable coverage options for their residents.
- Ease of administration of individual coverage HRAs and QSEHRAs when issuers accept payments made on behalf of enrollees.

Costs:	Estimate	Year Dollar	Discount Rate	Period Covered
Annualized Monetized ($/year)	$ 0.03 million	2020	7 percent	2021-2023
	$ 0.03 million	2020	3 percent	2021-2023

Quantitative:

- Regulatory familiarization costs of approximately $80,000 in 2021.

Qualitative:

- Increased costs due to increases in providing medical services (if health insurance enrollment increases).
- Start-up costs for states seeking to transition to an SBE for future plan years in order to utilize the new Exchange DE option. These costs may potentially be higher as compared to start-up costs for states seeking to transition to an SBE without implementing the Exchange DE option, due to the additional interfaces to DE entities that must be implemented and managed.
- Increased operational costs for existing SBEs electing to implement the Exchange DE option for ongoing monitoring and oversight of the DE entities, as well as for maintaining and managing the individual interfaces and transactions with each DE entity.
- Costs incurred by prospective DE entities (including web-brokers, agents and brokers, and issuers) and the federal government related to startup, approval, and implementation of the Exchange DE Option.
- Increase in administrative costs for issuers that need to make operational adjustments in order to accept premium payments from individual coverage HRAs or QSEHRAs made on behalf of enrollees.
- Potential increase in consumer confusion associated with a transition to an Exchange that implements the DE option. This may result in a potential reduction in enrollments through an Exchange that implements this option.

Transfers:	Estimate	Year Dollar	Discount Rate	Period Covered
Annualized Monetized ($/year)	- $108.5 million	2020	7 percent	2021-2023
	- $109.4 million	2020	3 percent	2021-2023

Quantitative:

- Reduction in transfers from the issuers to the federal government by approximately $270 million in 2022 due to changes in user fee rates, and approximately $60 million in 2023, due to the availability of the DE option to FFE and SBE-FP states beginning with the 2023 benefit year.

Qualitative:

- Pass-through funding amounts paid to states would increase if the number of states that apply for and receive 1332 waivers increases. Under a section 1332 waiver, a state may receive pass-through funding associated with the resulting elimination or reductions in federal spending on Exchange financial assistance (that is, PTC, CSR, or small business health insurance tax credits (SBTC) under section 45R of the Code), provided pursuant to PPACA that would have been paid on behalf of participants in the Exchange in the state in the calendar year in the absence of the waiver, but will not be paid as a result of the waiver.

1. Exchange Direct Enrollment (DE) Option (§ 155.221)

We are finalizing the proposal to add § 155.221(j) to establish a new Exchange direct enrollment (DE) option by which states can use direct enrollment technology to transition to private sector-focused enrollment pathways operated by QHP issuers, web-brokers, and agents and brokers, instead of or in addition to a centralized eligibility and enrollment website operated by an Exchange. State Exchanges, as well as SBE–FP and FFE states can elect, subject to HHS approval, to implement the Exchange DE option. The impact of the new Exchange DE option will depend on the specific Exchange model and the number of states that take advantage of the new option. There are various stakeholders in states that elect to implement the Exchange DE option that could be impacted, including consumers, State Exchanges, web-brokers, issuers, and agents and brokers, as well as the federal government. However, we note that the FFEs' current direct enrollment pathways (Classic DE and EDE) generally reduce operational costs to the federal government while alleviating certain burdens on consumers.

The Exchange DE option may have varied impacts on consumers, and we solicited public comments to help us to understand how implementation of the Exchange DE option and a corresponding increase in the number of potential websites through which consumers could shop for QHP coverage might impact consumers and consumer behavior with respect to QHP enrollment.

At this time, we do not anticipate that any of the 15 current SBEs will implement the Exchange DE option in plan year 2022 because these states have not implemented direct enrollment interfaces with web-brokers or other direct enrollment entities similar to those implemented by the FFE. However, current SBEs that elect to implement the Exchange DE option will be responsible for meeting certain requirements for approval, in particular revising their Exchange Blueprint (Blueprint) under new § 155.221(j)(1) to describe precisely how the state proposes to implement the Exchange DE option. We believe that any costs of revising the Blueprint will be nominal, as this process involves logging into a CMS web interface that serves as the repository for all states' Exchange Blueprints to input additional information on the updated processes and controls the state will implement to manage its new Exchange DE program. However, we sought comment on the burden associated with this activity, noting that the Blueprint is currently approved under the PRA under OMB Control Number 0938–1172.

For states seeking to transition to an SBE in future plan years and implement the SBE–DE option, we anticipate that start-up costs may potentially be higher than the start-up costs for states seeking to transition to an SBE without implementing the Exchange DE option, due to the additional interfaces that must be implemented between the Exchange's eligibility platform and each approved DE entity and managed on an ongoing basis by the Exchange. States transitioning to an SBE–DE will be required to complete the Exchange Blueprint in the same manner as required prior to this final rule and will be required to meet all required minimum functions of an Exchange. In terms of implementation costs, these states can realize savings by virtue of not having to maintain and operate a consumer-facing enrollment website capable of handling all Exchange-related internet traffic for all state residents, instead relying on DE entities and their websites to provide the majority of the Exchange's consumer-facing enrollment functionality.

The costs associated with consumer-facing enrollment functionality may be relatively lower than those associated with building the back-end Exchange eligibility platform, interfaces with DE entities to accept Exchange applications and complete eligibility determinations, the connections required from an Exchange's back-end eligibility platform to the Federal Data Services Hub for eligibility verifications, connections from the Exchange's back-end eligibility platform to the respective state Medicaid agency for coordinating Medicaid and CHIP eligibility determinations, and the Exchange's data management and reporting functionality necessary to submit required eligibility and enrollment data regarding all Exchange enrollees to HHS and the IRS. Based on recent state transitions to the SBE model, the design, development, and implementation costs for an Exchange depend on a number of factors. Recent design, development, and implementation costs have ranged from $4 million for a smaller state, to almost $24 million for a larger state. As no SBE to date has implemented direct enrollment, however, we are not able to provide accurate cost estimates in this regard. States may be able to partner with existing federal DE partners who are already fully-compliant with federal operational requirements to achieve administrative savings related to the approval process for DE entities seeking to operate in their state. Any operational cost increases or savings may, in turn, affect an SBE's user fee and premium costs.

We do anticipate that an SBE electing the Exchange DE option will have increased operational costs for ongoing monitoring and oversight of the approved DE entities, as well as for maintaining and managing the individual interfaces and transactions with each DE entity. However, any savings achieved through a decrease in call center volume or other consumer supports due to DE partners assisting consumers with enrollment would offset any increased operational costs. Any operational cost increases or savings stemming from implementation of the Exchange DE option could, in turn, affect an SBE's user fee and consumer premium costs.

We also anticipate that the Exchange DE option can have significant impacts on prospective DE entities (including web-brokers, agents and brokers, and issuers) and the federal government as a result of start-up, approval, and implementation costs. Such costs may be incurred by entities who enter a state's market as a new DE entity for the first time, or by existing DE entities that expand into new markets. We presume that DE entities will act rationally and enter a state's market or expand into new markets if the benefits exceed the costs. For the SBE–FP–DE and FFE–DE option, prospective federal DE entities pursuing approval to host their own DE platforms will incur a number of costs associated with startup and implementation activities, including costs to implement the appropriate privacy and security infrastructure, business controls, and with meeting eligibility application technical requirements related to ensuring the proper coordination with state Medicaid and CHIP programs.

In terms of privacy/security approval and startup costs, prospective DE entities operating through the SBE–FP–DE and FFE–DE option will be required to implement almost 300 security and privacy controls consistent with a system security and privacy plan provided by CMS. After control implementation, prospective DE entities must contract with an independent third-party auditor to complete a security and privacy controls assessment test plan, which must be submitted to CMS for review. Once approved, a DE entity must submit quarterly POA&Ms to CMS to document the identification and resolution of any new or existing security or privacy risks. DE entities must also incur costs to

contract with a third-party auditor to perform an annual assessment of their security and privacy posture consistent with continuous monitoring requirements published by CMS, and feedback provided on their quarterly POA&Ms.

In terms of approval and startup costs of implementing appropriate business controls, prospective DE entities that wish to serve an SBE–FP–DE or FFE–DE option state and host an eligibility application also will be required to implement a dynamic user interface (UI) that adapts to consumer scenarios based on complex business rules and integration with a range of application programming interfaces (APIs). They must also implement post-enrollment support functionality. After development, integration, and testing are complete, a prospective DE entity serving an SBE–FP–DE or FFE–DE option state must contract with a third-party auditor to evaluate its implementation consistent with business audit report toolkits provided by CMS. The audit consists of evaluation of the UI to ensure its consistency with program requirements, as well as completion of functional and integration testing. Once approved, a DE entity is required to implement CMS-initiated change requests to update its DE implementation as needed. In addition, DE entities are subject to periodic application audits to confirm their platforms continue to meet program requirements and remain functional.

There are additional technical startup and approval costs related to the eligibility application functionality that DE entities serving SBE–FP–DE or FFE–DE option states are required to implement. They must have the ability to provide the Exchange with all the information necessary for it to determine eligibility to enroll in QHPs, as well as to determine eligibility for APTC, CSRs, Medicaid, and CHIP. Consumers who complete an eligibility application on a DE entity's website must be provided with an eligibility determination notice (EDN) from the Exchange, and related information must display within the DE entity's website UI about consumers' eligibility. Therefore, if a consumer is determined eligible for Medicaid or CHIP after completing an eligibility application through a DE entity's website, they will receive the same information in their EDN about that eligibility and next steps as if they completed the application on *HealthCare.gov*.

We also anticipate that there will be costs specific to web-brokers and issuers that choose to enter into fee-based arrangements with other agents, brokers, or issuers, or that choose to enter new economic or legal arrangements with states, that help to offset the costs of the DE services provided. In terms of costs to issuers, generally any changes in issuer costs associated with the Exchange DE option could have downstream effects on premium rates. Issuers will be impacted by adjustments in Exchange user fees, and may have an incentive to promote direct enrollment if user fees are lower under the Exchange DE option, and the savings achieved through those lower user fees exceed the new costs of arrangements with web-brokers. Issuers may also be impacted if the Exchange DE option leads to shifts in consumer enrollment patterns, such as movement from a QHP offered by one issuer to another QHP. If issuers choose to build out standalone consumer-facing applications to enroll in coverage under the Exchange DE option, this would be another cost to consider that could impact them directly and have downstream impacts.

There are a number of additional anticipated costs to the federal government associated with the Exchange DE option beyond startup and approval. Under the FFE–DE and SBE–FP–DE option, for instance, we will continue to provide back-end eligibility services, notice and tax form generation, the processing of data matching and special enrollment verification issues, eligibility appeals, casework, advanced customer service, enrollment reconciliation, IRS reporting, and an alternate/backup consumer-facing eligibility and enrollment platform (as we do today). In addition, the *HealthCare.gov* website will continue to provide standardized comparative information for QHPs offered through an SBE–FP or FFE and will remain available for enrollment, as well to ensure there is an avenue to handle eligibility applications that approved DE partners are unable to process. Assuming an FFE–DE state chooses existing DE entities with whom HHS has partnered for the FFE's DE and EDE programs, we anticipate that there will be minimal increases in federal administrative costs associated with implementing the FFE–DE option since we have already implemented these programs. Any changes in payment amounts of the federal user fee for these services or any changes in issuer costs associated with the DE option may have downstream impacts on premiums, and therefore, federal tax expenditures on PTCs, which are benchmarked to premiums. We anticipate that any HHS costs associated with supporting the additional monitoring and oversight in states that elect to implement the SBE–DE option will be nominal given that SBEs will retain primary responsibility for overseeing their approved DE entities and HHS can leverage its existing SBE oversight mechanism [67] and associated processes to ensure that this is occurring.

We sought comment on this proposal, including any additional consumer, state, SBE, HHS, issuer, web-broker, or other costs, benefits or transfers that should be considered. We also sought data and information that would help us to quantify the potential impacts associated with this proposal. Comment summaries and our responses are included earlier in the preamble.

2. FFE and SBE–FP User Fees (§ 156.50)

We are finalizing an FFE user fee rate of 2.25 percent for the 2022 benefit year, which is lower than the 3.0 percent FFE user fee rate finalized for 2021 benefit year. We are also finalizing an SBE–FP user fee rate of 1.75 percent for the 2022 benefit year, which is lower than the 2.5 percent SBE–FP user fee rate we finalized for the 2021 benefit year. We are finalizing an FFE–DE and SBE–FP–DE user fee rate of 1.5 percent for the 2023 benefit year. Subject to HHS approval, SBE–FP or FFE states may implement the Exchange DE option starting in 2023. Based on our estimated costs, enrollment (including anticipated transitions of states from the FFE and SBE–FP models to either the SBE–FP or State Exchange models), premiums for the 2021 and 2022 benefit years, and the finalized user fee rates, we are estimating FFE and SBE–FP user fee transfers from issuers to the federal government will be lower by $270 million in 2022 compared to those estimated for the prior benefit year. Costs may be shifted to approved DE entities (including QHP issuers) that states elect to use, so there may not actually be any cost savings on the part of issuers in SBE or FFE states that elect the Exchange DE option. As such, there may not be an incentive for issuers in FFE–DE or SBE–FP–DE states to adopt these models solely as a result of the lower user fee rate. While there will be reduced transfers to the federal government in FFE–DE or SBE–FP–DE states, we expect that available user fee collections from current and prior years will be sufficient to fund Exchange operations. Based on our finalization of the FFE–DE and SBE–FP–DE user fee rates, transfers to the federal

[67] *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/smart_2018_9.pdf.*

government will be reduced by $60 million in 2023.

Comment: While some commenters supported the reduced user fee rates stating that these rates could lead to lower premiums, many other commenters expressed concern regarding the reduced user fee rates and the potential impact on Exchange operations, specifically how these rates could impact enrollment. However, two commenters specifically criticized the information provided in the RIA section of the proposed rule. Both commenters expressed concern that HHS had not sufficiently analyzed the financial and health impacts of the proposed user fee rate reductions, as HHS had not investigated how reduced Exchange operations, Navigator services, marketing and outreach, health plan oversight, call center and consumer appeals services, among others may translate into reduced enrollment, and the health costs associated. The second commenter further suggested that the proposed user fee rate would not be sufficient to enable the Exchange to reduce premiums.

Response: We are finalizing 2022 benefit year user fee rates at 2.25 percent for FFE issuers and 1.75 percent for SBE–FP issuers as proposed. We have addressed the general concern for reductions in user fees in the earlier preamble response sections. With respect to the specific comment of the RIA, we have sufficiently analyzed the financial and health impacts of the proposed user fee rate reductions and our internal analysis suggests that user fees will provide the necessary funding for the full functioning of Exchange operations including Navigator services, oversight functions, call center, and appeals services, among others for the 2022 benefit year. Based on prior years' additional collections and future projected changes in costs, enrollment, and premiums, we project that HHS can fully fund Federal platform costs associated with providing special benefits to these issuers.

3. State Innovation Waivers

The Departments are finalizing the policies, with modifications, to codify many of the policies and interpretations outlined in the 2018 Guidance into the section 1332 waiver implementing regulations governing waiver application procedures, monitoring and compliance, and periodic evaluations to give states certainty regarding the requirements to receive and maintain approval of a section 1332 waiver by the Departments. As such, the Departments are finalizing changes to 31 CFR 33.108, 31 CFR 33.120, 31 CFR 33.128, 45 CFR 155.1308, 45 CFR 155.1320, and 45 CFR 155.1328. This final rule does not alter any of the requirements related to state innovation waiver applications, compliance and monitoring, nor evaluation in a way that would create any additional costs or burdens for states seeking waiver approval or those states with approved waiver plans. The Departments are of the view that the increased certainty regarding the application requirements will allow states to have greater confidence that the significant time and monetary investments necessary to plan for and submit a section 1332 waiver application will not result in wasted resources and taxpayer dollars. This increased certainty could help increase the number of states that apply for waivers and increase state innovation, which in turn could lead to more affordable health coverage for individuals and families in states that consider implementing a section 1332 waiver program.

Comment: The Departments received many comments on the proposal and the potential impacts of the 2018 Guidance. Some commenters were concerned that finalization of the policy would increase health care costs, though the commenters did not define these costs further, and could potentially lead to increased premiums. A commenter stated that the Departments failed to analyze the distributional effects of the proposal, including its impact across the population and economy. The commenters asserted that the Departments failed to adequately identify and analyze the effects of codifying the policies in the 2018 Guidance in regulation.

Response: The Departments acknowledge that federal agencies, where appropriate, should analyze and consider the distributional effects of regulatory actions, which are the impacts of a regulatory action across the population and economy, divided up in various ways (for example, by income groups, race, sex, industrial sector, geography).[68] The Departments must analyze and determine whether each state waiver proposal complies with the section 1332 guardrails, which include comprehensiveness, affordability, coverage, and Federal deficit neutrality.

As explained earlier in section IV. of this final rule, a state's application and accompanying actuarial and economic analysis must appropriately model the impact of the waiver plan, including impacts on enrollment and affordability for individual market single risk pool coverage. Any increase in premiums in the individual market risk pool with the waiver, compared to a without-waiver scenario, would likely not meet the guardrails and would not be an approvable waiver application. To date, waivers have reduced premiums in comparison to premiums anticipated in the absence of the waivers.[69] In addition, the Departments maintain the discretion to reject any proposed waiver plan that meets the guardrails, such as if the Departments determine would cause more harm than good to the state's residents, or for example to a state's risk pool.[70] The Departments' approval letters for state waivers include information regarding the Departments' determination of whether a state's analysis and waiver plan satisfies the requirements of the section 1332 guardrails, as well as information on the projected impacts of waiver proposals.[71]

The Departments also acknowledge commenters' interest in the distributive impacts of incorporating the policies described in the 2018 Guidance into regulation text. As noted by commenters, OMB Circular A–4 is guidance issued by OMB and instructs that agencies should analyze the ''distributional effect'' of regulatory actions, which refers to the impact of a regulatory action across the population and economy, divided up in various ways (for example, income groups, race, sex, industrial sector, geography). However, the policies announced in the 2018 Guidance, specifically those that explain how the Departments will analyze compliance with the section 1332 guardrails, are not determinative of the specific waiver plans states may propose. Section 1332 waivers allow states to pursue innovative strategies for providing their residents with access to higher value, more affordable health coverage. The Departments have encouraged states to propose innovative approaches to meet the unique needs of their population through the flexibilities

[68] OMB Circular A–4, Regulatory Analysis (Sept. 17, 2003).

[69] Information about the pass-through amounts states received is available on HHS's CCIIO 1332 website, and information on the methodology and key components of the pass-through calculation is available under the ''pass-through funding tools and resources'' section and data brief on state relief and Empowerment Waivers, available at *https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Section_1332_State_Innovation_Waivers-*.

[70] The Secretaries retain their discretionary authority under section 1332 to deny waivers when appropriate given consideration of the application as a whole, even if an application meets the four statutory guardrail requirements.

[71] All section 1332 waiver approval letters available at *https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Section_1332_State_Innovation_Waivers-#Section_1332_State_Application_Waiver_Applications.*

Congress made available to states under section 1332 of PPACA. As such, the Departments are unable to predict or analyze the impact of various state waiver plans that have not yet been submitted, including the distributional effects on various segments of the population. Based on previous waiver applications, the Departments know that the impact of waivers vary widely based on the state's specific wavier plan. For example, the actual impact of the waiver on statewide average premiums compared to the estimated impact on statewide average premiums (that is, as estimated in the original state waiver application) for each waiver year varies based on the state's specific waiver program. In plan year 2020, states that implemented reinsurance waivers have lowered premiums ranging from 3.8 percent in Rhode Island to 37.1 percent in Alaska when comparing with and without the waivers, depending on a variety of factors of the states' plans and the composition of the state's population.[72]

A potential distributional impact for certain section 1332 waivers includes the substitution of pass-through funds from the federal government to the state in lieu of PTC, SBTC, or CSR, if a state waiver plan eliminates or reduces the amount of PTC, SBTC, or CSR that individuals and employers in the state receive (''pass-through funding''). [73] Pass-through funding amounts are adjusted to ensure that waivers remain deficit neutral, as required by statute. As discussed in the 2018 Guidance and consistent with the Departments' regulations, when applying for a section 1332 waiver, the state should include in the waiver application sufficient analysis and supporting data to inform the estimate of any pass-through funding amount; states with approved waivers must report additional data and information to support the annual estimate of pass-through funding. Furthermore, pass-through funding may be for the amount of federal financial assistance pursuant to the PPACA not paid due to an individual not qualifying for financial assistance or qualifying for a reduced level of financial assistance resulting from a waived provision as a direct result of the waiver plan.[74] Although pass-through funding payments would be operationalized by the federal government, the transfers, as categorized for purposes of this regulatory impact analysis, would flow from the individuals and employers who would otherwise receive PTC, SBTC, or CSR (not from the federal government) to the relevant states for the purposes of implementing the waiver plan.

The Departments are unable to estimate or determine how many or which states will apply for a section 1332 waiver once the policies described in the 2018 Guidance are codified in regulation. Based on our interactions with states that previously proposed or considered proposing section 1332 waiver plans, the Departments anticipate that more states will be able to take advantage of section 1332 waivers if approval standards are reasonable, appropriate, and sufficiently flexible to allow states to design waiver plans that are capable of addressing the specific needs and circumstances of their residents. The Departments are also of the view that, despite the significant investment of tax dollars and other state resources necessary to consider, design, and submit a section 1332 waiver proposal, more states will consider a waiver as a viable option to improve or address specific problems in their health care markets if they do not have to be concerned that the Departments' standards will change without notice or an opportunity to comment. For these reasons, the Departments are of the view that codifying the policies announced in the 2018 Guidance in rulemaking, as a general matter, will likely provide greater opportunities for states to lower premiums, provide greater health care support for state residents at a greater variety of income levels, and develop innovative strategies to address the needs of vulnerable populations.

The Departments note that the distributive impact of a state's particular waiver plan would be analyzed as part of the waiver application and review process. Specifically, as part of a state waiver application, final regulations at 31 CFR part 33 and 45 CFR part 155, subpart N, require a state to provide actuarial analyses and actuarial certifications, economic analyses, data and assumptions, targets, an implementation timeline, and other necessary information to support the state's estimates that the proposed waiver will comply with section 1332 requirements to satisfy the section 1332 waiver guardrails. The 2012 regulation also specified that data and assumptions used should include information on the age, income, health expenses, and current health insurance status of the relevant state population; the number of employers by number of employees and whether the employer offers insurance; cross tabulations of these variables; and an explanation of data sources and quality that the Departments would use to evaluate any waiver application and address regulatory impact across the population and economy. For example, state waiver applications' actuarial and economic analysis showed that enrollment increased when comparing the with and without-waiver scenarios over different age ranges and income levels for states that are implementing a reinsurance program.[75] Furthermore, the Departments complete a preliminary review of any waiver application received in accordance with 45 CFR 155.1308(c) and 3l CFR 33.108(c), and if an application does not have the aforementioned information the Secretaries can make a preliminary determination that the application is not complete. In that case, the waiver application would not be reviewed further unless additional information is provided.

Furthermore, section 1332(a)(4)(B) of PPACA provides that the Secretary of HHS and the Secretary of the Treasury shall issue regulations providing a process for public notice and comment at the state level, including public hearings, and a process for providing public notice and comment after the application is received by the Secretaries, that are both sufficient to ensure a meaningful level of public input. Current regulations at 31 CFR 33.112 and 45 CFR 155.1312 specify state public notice and participation requirements for proposed waiver requests, and 31 CFR 33.116(b) and 45 CFR 155.1316(b) specify the accompanying public notice and comment period requirements under the Federal public notice and approval process.[76] Under the current regulations

[73] Information about the pass-through amounts states received is available on the CCIIO 1332 website and information on the methodology and key components of the pass-through calculation is available, under the ''pass-through funding tools and resources'' section and data brief on state relief and Empowerment Waivers ''here: *https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Section_1332_State_Innovation_Waivers-.*

[74] The guidance on State Relief and Empowerment Waivers is available online at *https://www.federalregister.gov/documents/2018/10/24/2018-23182/state-reliefand-empowerment-waivers.*

[75] An example of information showing the distributional impact of a waiver on the population by age can be found in Table 3C. See *https://www.cms.gov/CCIIO/Programs-and-Initiatives/State-Innovation-Waivers/Downloads/Delaware-1332-Waiver-Application-July-10-2019.pdf.*

[76] Also note that there is flexibility under 31 CFR 33.118 and 45 CFR 155.1318 for states to request, subject to approval by the Departments, modification from the normal public notice requirements during the COVID–19 PHE when a delay would undermine or compromise the purpose

at 31 CFR 33.112 and 45 CFR 155.1312, states are required to provide a public notice and comment period prior to submitting an application for a new section 1332 waiver. In addition, under section 1332(a)(4)(B)(iii) of PPACA and the existing implementing regulations at 31 CFR 33.116(b) and 45 CFR 155.1316(b), the Secretary of HHS and the Secretary of the Treasury are required to provide a Federal public notice and comment period following their preliminary determination that a state's section 1332 waiver application is complete. As such, the Departments are of the view that the public has a meaningful opportunity to provide comments on waiver proposals and to understand the distributional effects on various segments of the population prior to waiver approval.

4. Network Adequacy Standards (§ 156.230)

We are finalizing the proposal to revise § 156.230 to reflect the longstanding interpretation that plans that do not utilize a provider network are not required to comply with network adequacy standards to obtain QHP certification. We make no other changes to QHP certification requirements or requirements under the market reform provisions under title I of PPACA; plans that do not utilize a provider network must still comply with all other applicable QHP certification requirements to obtain QHP certification. Because the codified interpretation is the status quo, we do not anticipate any burden to result from finalization of this policy. We disagree with some commenters' assertions that finalization of this policy will create increased costs for consumers or a proliferation of plans that do not differentiate benefits based on whether enrollees receive covered services from in-network providers, which may not be advantageous for certain consumers. As we explain earlier in the preamble, the changes to the QHP network adequacy standard we are finalizing make no changes to QHP certification requirements. There have only been 12 such plans that did not utilize a provider network approved as QHPs, which were approved for sale in Wisconsin for plan year 2016. In the last five plan years, there have been no such plans approved for QHP certification. Accordingly, we do not expect this policy to result in increased consumer costs or any proliferation appreciable increases to such plans seeking QHP certification.

5. Enrollment Process for Qualified Individuals (§ 156.1240)

We are finalizing this policy with some minor modifications to the regulatory text and the adoption of additional language specifying that QHP issuers must also accept premium payments using a payment method described in § 156.1240(a)(2) that are made directly by enrollees who are enrolled in an individual coverage HRA or QSEHRA. We expect this approach will ease administration of individual coverage HRAs and QSEHRAs by altering the behavior of QHP issuers who do not yet accept premium payments using such payment methods. It will also make the individual coverage HRA and QSEHRA experience more seamless for employers and employees by ensuring that individual coverage HRAs and QSEHRAs may pay premiums for employees through direct payments to the issuer, rather than through reimbursements of premium payments to employees.

We received several comments asserting that finalizing these changes would place cost burdens on issuers and have addressed them earlier in the preamble. As discussed, we did not propose and are not finalizing a requirement for QHP issuers to accept payments from individual coverage HRAs or QSEHRAs when such payments are made using a form of payment that is not described in § 156.1240(a)(2) or to accept aggregate payments from an individual coverage HRA or QSEHRA made on behalf of multiple enrollees.[77] While it may be possible that some issuers may incur administrative costs to implement operational changes necessary to comply with this requirement, such issuer costs should be minimal because QHP issuers, as a general matter, are already required to accept premium payments that are made using the forms of payment described in § 156.1240(a)(2). Accordingly, the rule we finalize here does not require issuers to incur additional costs to invest in information technology infrastructure that can generally accommodate roster, or list, billing.

6. Regulatory Review Costs

If regulations impose administrative costs on private entities, such as the time needed to read and interpret this final rule, the Departments should estimate the cost associated with regulatory review. Due to the uncertainty involved with accurately quantifying the number of entities that will review the rule, the Departments assume that the this rule will be reviewed by all affected issuers, states, and some individuals and other entities that commented on the proposed rule. The Departments acknowledge that this assumption may understate or overstate the costs of reviewing this rule. It is possible that not all commenters reviewed the proposed rule in detail, and it is also possible that some reviewers chose not to comment on the proposed rule. For these reasons, the Departments consider the number of affected entities and commenters to be a fair estimate of the number of reviewers of this rule.

HHS is required to issue a portion of this rule each year under their regulations and the Departments estimate that approximately half of the remaining provisions would cause additional regulatory review burden that stakeholders do not already anticipate. The Departments also recognize that different types of entities are in many cases affected by mutually exclusive sections of this final rule, and therefore, for purposes of our estimate, the Departments assume that each reviewer reads approximately 50 percent of the rule, excluding the portion of the rule that HHS is required to issue each year.

Using the wage information from the BLS for medical and health service managers (Code 11–9111), the Departments estimate that the cost of reviewing this rule is $110.74 per hour, including overhead and fringe benefits.[78] Assuming an average reading speed, the Departments estimate that it will take approximately 1 hour for staff to review the relevant portions of this final rule that causes unanticipated burden. The Departments assume that approximately 725 entities will review this final rule. For each entity that reviews the rule, the estimated cost is approximately $110.74. Therefore, the Departments estimate that the total cost of reviewing this regulation is approximately $80,287 ($110.74 × 725 reviewers).

D. Regulatory Alternatives Considered

In developing the policies contained in this final rule, the Departments considered numerous alternatives. Below the Departments discuss the key regulatory alternatives that were considered.

As an alternative to the proposed reduction in user fee rates, we considered maintaining the FFE and SBE–FP user fee rates at their current 2021 levels. However, our analysis supported reducing the user fee rate. In

of the proposed waiver request and be contrary to the interest of consumers.

[77] 85 FR 78572, 78644.

[78] *https://www.bls.gov/oes/current/oes_nat.htm.*

light of the projected premium and enrollment increases, HHS believed that a reduction in FFE and SBE–FP user fees was warranted for 2022.

We considered including a requirement for states to submit and be approved for a State Innovation Waiver under section 1332 of PPACA as part of the proposed Exchange DE option described at new § 155.221(j). However, nothing under the plain terms of section 1311(d)(4) PPACA governing the functions of an Exchange requires an Exchange to host a single, consumer-facing enrollment website to receive applications or support plan shopping and selection.[79] Thus we concluded that there is no requirement in PPACA that must be waived to allow a state to implement the Exchange DE option, and requiring states to expend taxpayer dollars to file a waiver application would be unnecessary and unduly burdensome. We also considered aligning the implementation timeframe for all Exchange models interested in the Exchange DE option to plan year 2023; however, because we believe that this option could improve health insurance markets and that State Exchanges could implement the option by plan year 2022, we chose not to do so.

Regarding the section 1332 waiver policies in this rule, the Departments considered not proposing to codify the 2018 Guidance. Additionally, the Departments considered proposing the 2018 Guidance through separate notice and comment rulemaking. The Departments did not take either of these options because it would be contrary to the interest of states. Specifically, the Departments concluded that not proposing codifying the 2018 Guidance would lead to uncertainty for states considering section 1332 waiver applications, and the Departments concluded that separate notice and comment rulemaking was unnecessary because this rulemaking provided a public notice and comment period.

In this final rule, the Departments seek to provide certainty to states that the requirements and expectations of the section 1332 waiver program will not change abruptly during a period in which states are doing the work to prepare a waiver proposal. The Departments considered alternatives to the interpretations set forth in the 2018 Guidance, including interpretations that could further increase flexibility. However, the Departments determined that changing guidance and the criteria required for approval would increase regulatory uncertainty and make states less likely to submit section 1332 waivers. The Departments are of the view that finalizing these policies with modifications will help states that are interested in undertaking the complicated and potentially expensive work to design a waiver program that meets the four guardrails, as described in the 2018 Guidance. Codification of many of the policies described in the 2018 Guidance could also encourage more states to apply for section 1332 waivers. As discussed section IV.A. of this the preamble, this consideration is especially important because the process of developing and submitting a proposal may take significant time and taxpayer resources at the state level, and states do not want to undertake these efforts if the probability of success is low and the probability of the Departments changing requirements is high. As part of this rulemaking, the Departments substantively considered comments and determined that changes to 2018 Guidance were not warranted based on comments received.

E. Regulatory Flexibility Act

The Regulatory Flexibility Act, (5 U.S.C. 601, *et seq.*), requires agencies to prepare an initial regulatory flexibility analysis to describe the impact of the final rule on small entities, unless the head of the agency can certify that the rule will not have a significant economic impact on a substantial number of small entities. The RFA generally defines a ''small entity'' as (1) a proprietary firm meeting the size standards of the Small Business Administration (SBA), (2) a not-for-profit organization that is not dominant in its field, or (3) a small government jurisdiction with a population of less than 50,000. States and individuals are not included in the definition of ''small entity.'' HHS uses a change in revenues of more than 3 to 5 percent as its measure of significant economic impact on a substantial number of small entities.

The provisions in this rule will affect health insurance issuers in the individual and small group markets. The Departments are of the view that health insurance issuers and group health plans would be classified under the North American Industry Classification System code 524114 (Direct Health and Medical Insurance Carriers). According to SBA size standards, entities with average annual receipts of $41.5 million or less are considered small entities for these North American Industry Classification System codes. Issuers could possibly be classified in 621491 (HMO Medical Centers) and, if this is the case, the SBA size standard would be $35 million or less.[80] The Departments are of the view that few, if any, insurance companies underwriting comprehensive health insurance policies (in contrast, for example, to travel insurance policies or dental discount policies) fall below these size thresholds. Based on data from MLR annual report[81] submissions for the 2019 MLR reporting year, approximately 77 out of 479 issuers of health insurance coverage nationwide had total premium revenue of $41.5 million or less. This estimate may overstate the actual number of small health insurance companies that may be affected, since over 67 percent of these small companies belong to larger holding groups, and many, if not all, of these small companies are likely to have non-health lines of business that will result in their revenues exceeding $41.5 million. Therefore, the Departments do not expect the provisions of this rule to affect a substantial number of small entities.

The changes related to section 1332 waivers may have an impact on small businesses. Section 1332 allows a state to waive Part I of Subtitle D of Title I of the ACA (relating to establishing QHPs); Part II of Subtitle D of Title I of the ACA (relating to consumer choices and insurance competition through Exchanges); sections 36B of the Code and 1402 of the ACA (relating to premium tax credits and cost-sharing reductions for plans offered through Exchanges); section 4980H of the Code (relating to employer shared responsibility); and section 5000A of the Code (relating to individual shared responsibility). To date, the Departments have approved one waiver that impacts small businesses. Hawaii's waiver waived the small business health options program (SHOP) and related provisions in order to allow Hawaii to operate its own state program consistent with its state law. The state program, the Prepaid Health Care Act, requires virtually all employers to offer coverage to their employees and provides small employers premium assistance. As part of its the waiver, Hawaii waived the SBTC under section 45R of the Code. As such, the SBTC amounts that would otherwise be paid to small employers in Hawaii has been provided as a pass-through payment to the state, which it

[79] Section 1311(d)(4)(C) of PPACA requires only that ''[a]n Exchange shall, at a minimum . . . maintain an Internet website through which enrollees and prospective enrollees of qualified health plans may obtain standardized comparative information on such plans . . .''

[80] *https://www.sba.gov/document/support--table-size-standards.*

[81] Available at *https://www.cms.gov/CCIIO/Resources/Data-Resources/mlr.html.*

used to support a state fund that helps small businesses cover their health care-related costs.

In addition, section 1102(b) of the Act requires us to prepare a RIA if a rule under title XVIII, title XIX, or part B of title 42 of the Act may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, the Departments define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. While this rule is not subject to section 1102 of the Act, the Departments have determined that this rule will not affect small rural hospitals. Therefore, the Secretaries have determined that this rule will not have a significant impact on the operations of a substantial number of small rural hospitals.

F. Unfunded Mandates

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any federal mandate that may result in expenditures in any one year by a state, local, or Tribal governments, in the aggregate, or by the private sector, of $100 million in 1995 dollars, updated annually for inflation. Currently, that threshold is approximately $156 million. Although the Departments have not been able to quantify all costs, the Departments expect the combined impact on state, local, or Tribal governments and the private sector to be below the threshold.

G. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it issues a final rule that imposes substantial direct costs on state and local governments, preempts state law, or otherwise has federalism implications. In the Departments' view, while this final rule will not impose substantial direct requirement costs on state and local governments, this regulation has federalism implications due to potential direct effects on the distribution of power and responsibilities among the state and federal governments relating to determining standards relating to health insurance that is offered in the individual and small group markets.

In compliance with the requirement of Executive Order 13132 that agencies examine closely any policies that may have federalism implications or limit the policy making discretion of the states, the Departments have engaged in efforts to consult with and work cooperatively with affected states, including participating in conference calls with and attending conferences of the NAIC, and consulting with state insurance officials on an individual basis.

While developing this rule, the Departments attempted to balance the states' interests in regulating health insurance issuers with the need to ensure market stability. By doing so, the Departments complied with the requirements of Executive Order 13132.

Because states have flexibility in designing their Exchange and Exchange-related programs, state decisions will ultimately influence both administrative expenses and overall premiums. States are not required to establish an Exchange. For states that elected previously to operate an Exchange, those states had the opportunity to use funds under Exchange Planning and Establishment Grants to fund the development of data. Accordingly, some of the initial cost of creating programs was funded by Exchange Planning and Establishment Grants. After establishment, Exchanges must be financially self-sustaining, with revenue sources at the discretion of the state. A user fee is assessed on issuers under all existing Exchange models, including State Exchanges where the user fee is assessed by the state, SBE–FPs, and the FFEs.

H. Congressional Review Act

This final rule is subject to the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801, *et seq.*), which specifies that before a rule can take effect, the federal agency promulgating the rule shall submit to each House of the Congress and to the Comptroller General a report containing a copy of the rule along with other specified information, and has been transmitted to the Congress and the Comptroller for review. Under the Congressional Review Act, the Office of Information and Regulatory Affairs designated this final rule as a ''major rule'' as that term is defined in 5 U.S.C. 804(2), because it is likely to result in an annual effect on the economy of $100 million or more.

I. Reducing Regulation and Controlling Regulatory Costs

Executive Order 13771, titled Reducing Regulation and Controlling Regulatory Costs, was issued on January 30, 2017. Section 2(a) of Executive Order 13771 requires an agency, unless prohibited by law, to identify at least two existing regulations to be repealed when the agency publicly proposes for notice and comment, or otherwise issues, a new regulation. In furtherance of this requirement, section 2(c) of Executive Order 13771 requires that the new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least two prior regulations.

This final rule primarily results in transfers and is thus not a regulatory or deregulatory action for the purposes of E.O. 13771.

List of Subjects

31 CFR Part 33

Health care, Health insurance, Reporting and recordkeeping requirements, Waivers for State Innovation.

45 CFR Part 155

Administrative practice and procedure, Advertising, Age discrimination, Brokers, Civil rights, Citizenship and naturalization, Conflict of interests, Consumer protection, Grant programs—health, Grants administration, Health care, Health insurance, Health maintenance organizations (HMO), Health records, Hospitals, Indians, Individuals with disabilities, Intergovernmental relations, Loan programs—health, Medicaid, Organization and functions (Government agencies), Public assistance programs, Reporting and recordkeeping requirements, Sex discrimination, State and local governments, Technical assistance, Taxes, Women, Youth.

45 CFR Part 156

Administrative practice and procedure, Advertising, Advisory committees, Age discrimination, Alaska, Brokers, Citizenship and naturalization, Civil rights, Conflict of interests, Consumer protection, Grant programs—health, Grants administration, Health care, Health insurance, Health maintenance organization (HMO), Health records, Hospitals, Indians, Individuals with disabilities, Intergovernmental relations, Loan programs—health, Medicaid, Organization and functions (Government agencies), Prescription drugs, Public assistance programs, Reporting and recordkeeping requirements, Sex discrimination, State and local governments, Sunshine Act, Technical assistance, Women, Youth.

For the reasons set forth in the preamble, the Department of the

Treasury amends 31 CFR subtitle A as set forth below:

PART 33—WAIVERS FOR STATE INNOVATION

■ 1. The authority citation for part 33 continues to read as follows:

Authority: Sec. 1332, Pub. L. 111–148, 124 Stat. 119.

■ 2. Section 33.108 is amended by revising paragraphs (f)(3)(i), (f)(3)(iv) introductory text, and (f)(3)(iv)(A) through (C) to read as follows:

§ 33.108 Application procedures.

* * * * *

(f) * * *

(3) * * *

(i) A comprehensive description of the State legislation and program to implement a plan meeting the requirements for a waiver under section 1332 of PPACA. In analyzing whether the State has satisfied the requirement under section 1332(b)(2)(A) of PPACA that the State enact a law authorizing a waiver under section 1332 of PPACA, the Secretary and the Secretary of Health and Human Services, as applicable, may consider existing State legislation combined with duly-enacted State regulation or an executive order so long as the State legislation provides statutory authority to enforce PPACA provisions or the State plan;

* * * * *

(iv) The analyses, actuarial certifications, data, assumptions, targets, and other information set forth in paragraph (f)(4) of this section sufficient to provide the Secretary and the Secretary of Health and Human Services, as applicable, with the necessary data to determine that the State's proposed waiver satisfies the general requirements for approval under section 1332(b)(1) of the Affordable Care Act consistent with the provisions of this paragraph (f)(3)(iv) and interpretive guidance published by the Secretary and the Secretary of Health and Human Services:

(A) As required under section 1332(b)(1)(A) of the Affordable Care Act (the comprehensive coverage requirement), will provide coverage that is at least as comprehensive as the coverage defined in section 1302(b) of the Affordable Care Act and offered through Exchanges established under the Affordable Care Act as certified by the Office of the Actuary of the Centers for Medicare & Medicaid Services based on sufficient data from the State and from comparable States about their experience with programs created by the Affordable Care Act and the provisions of the Affordable Care Act that the State seeks to waive. To satisfy the comprehensive coverage requirement, the Secretary and the Secretary of Health and Human Services, as applicable, must determine that the State plan will provide consumers access to coverage options that are at least as comprehensive as the coverage options provided without the waiver, to at least a comparable number of people as would have had access to such coverage absent the waiver. These coverage options must also satisfy the affordability requirement in paragraph (f)(3)(iv)(B) of this section;

(B) As required under section 1332(b)(1)(B) of the Affordable Care Act (the affordability requirement), will provide coverage and cost sharing protections against excessive out-of-pocket spending that are at least as affordable as the provisions of Title I of the Affordable Care Act would provide. To satisfy the affordability requirement, the Secretary and the Secretary of Health and Human Services, as applicable, must determine that the State plan will provide consumers access to coverage options that are at least as affordable as the coverage options provided without the waiver, to at least a comparable number of people as would have had access to such coverage absent the waiver. These coverage options must also satisfy the comprehensive coverage requirement in paragraph (f)(3)(iv)(A) of this section;

(C) As required under section 1332(b)(1)(C) of the Affordable Care Act (the scope of coverage requirement), will provide coverage to at least a comparable number of its residents as the provisions of Title I of the Affordable Care Act would provide. Coverage refers to minimum essential coverage as defined in 26 U.S.C. 5000A(f) and 26 CFR 1.5000A–2, and health insurance coverage as defined in 45 CFR 144.103; and

* * * * *

■ 3. Section 33.120 is amended by revising paragraphs (a)(1) and (2) to read as follows:

§ 33.120 Monitoring and compliance.

(a) * * *

(1) Following the issuance of a final decision to approve a section 1332 waiver by the Secretary and the Secretary of Health and Human Services, as applicable, a State must comply with all applicable Federal laws, regulations, and interpretive policy statements, as well as interpretive guidance published by the Secretary and the Secretary of Health and Human Services, unless expressly waived. A State must, within the timeframes specified in law, regulation, interpretive policy or guidance, come into compliance with any changes in Federal law, regulation, or policy affecting section 1332 waivers, unless the provision being changed is expressly waived.

(2) The Secretary and the Secretary of Health and Human Services will examine compliance with Federal and regulatory requirements consistent with § 33.108(f)(3)(iv) and interpretive guidance published by the Secretary and the Secretary of Health and Human Services when conducting implementation reviews under paragraph (b) of this section.

* * * * *

■ 4. Section 33.128 is amended by revising paragraph (a) to read as follows:

§ 33.128 Periodic evaluation requirements.

(a) The Secretary and the Secretary of Health and Human Services, as applicable, shall periodically evaluate the implementation of a program under a section 1332 waiver consistent with § 33.108(f)(3)(iv) and interpretive guidance published by the Secretary and the Secretary of Health and Human Services, as applicable, and any terms and conditions governing the section 1332 waiver.

* * * * *

For the reasons set forth in the preamble, the Department of Health and Human Services amends 45 CFR parts 155 and 156 as set forth below.

PART 155—EXCHANGE ESTABLISHMENT STANDARDS AND OTHER RELATED STANDARDS UNDER THE AFFORDABLE CARE ACT

■ 5. The authority citation for part 155 continues to read as follows:

Authority: 42 U.S.C. 18021–18024, 18031–18033, 18041–18042, 18051, 18054, 18071, and 18081–18083.

■ 6. Section 155.221 is amended by—

■ a. Redesignating paragraphs (c) through (h) as paragraphs (d) through (i), respectively.

■ b. Adding a reserved paragraph (c);

■ c. In newly redesignated paragraphs (g) introductory text, (g)(6) and (7), and (h) by removing the reference to ''paragraph (e)'' and adding in its place a reference to ''paragraph (f)''; and

■ d. Adding paragraph (j).

The additions and revisions read as follows:

§ 155.221 Standards for direct enrollment entities and for third parties to perform audits of direct enrollment entities.

* * * * *

(c) [Reserved]

* * * * *

(j) *Process for States to elect the Exchange direct enrollment option.* Subject to HHS approval, and in addition to or in lieu of the Exchange operating its own consumer-facing eligibility application and enrollment website, a State may elect for the State Exchange, State Exchange on the Federal platform, or federally-facilitated Exchange in the State to approve one or more enrollment entities described in paragraph (a) of this section to make available a non-Exchange online website to enroll qualified individuals in a QHP offered through the Exchange in the State in a manner that constitutes enrollment through the Exchange, as specified in paragraph (j)(1) or (2) of this section. Through the websites of these approved entities, consumers in the State apply for and enroll in coverage using an eligibility application as described in § 155.405, and receive eligibility determinations from the Exchange for QHP enrollment, advance payments of the premium tax credit and cost-sharing reductions, as well as receive assessments or determinations from the Exchange for Medicaid and CHIP eligibility in accordance with §§ 155.302 and 155.405.

(1) *Direct enrollment option for a State Exchange.* A State may receive approval, under §§ 155.105(b) and 155.106(a), to operate a State Exchange using the direct enrollment option described in this paragraph (j). The State Exchange must meet all Federal statutory and regulatory requirements for the operation of an Exchange. An approved State Exchange that wishes to implement this option must submit a revised Exchange Blueprint in accordance with § 155.105(e). In order to obtain approval for the State Exchange to implement this option, the State must:

(i) Demonstrate to HHS operational readiness for the State Exchange to enroll qualified individuals in a QHP through approved direct enrollment entity websites in a manner that constitutes enrollment through the Exchange, including enabling individuals to apply for, and receive eligibility determinations from the Exchange for QHP enrollment and advance payments of the premium tax credit and cost-sharing reductions, as well as receive assessments or determinations of Medicaid and CHIP eligibility from the Exchange as described in § 155.302, using the eligibility application described in § 155.405;

(ii) Provide HHS an implementation plan and timeline that details the key activities, milestones, and communication and outreach strategy to support the transition of enrollment operations to direct enrollment entities; and

(iii) Ensure that a minimum of one direct enrollment entity approved by the State meets minimum Federal requirements for HHS approval to participate in the federally-facilitated Exchange direct enrollment program, including requirements at § 155.220 and this section, particularly § 155.220(c)(3)(i)(A) and (D) so that at least one approved web-broker in the state displays detailed information for all available QHPs and meets accessibility requirements under § 155.205(c) and is capable of enrolling all consumers in the State, including those who present complex eligibility scenarios. Where no direct enrollment entity approved by the State meets such minimum Federal requirements or possesses the capability to enroll all consumers in the State, the State must offer a consumer-facing website that meets such requirements and possesses such capability.

(2) *Direct enrollment option for a State with a federally-facilitated Exchange or State Exchange on the Federal platform.* Pursuant to a request from a State, the federally-facilitated Exchange or a State Exchange on the Federal platform may partner with the requesting State to implement the direct enrollment option described in this paragraph (j). The federally-facilitated Exchange or State-based Exchange on the Federal platform must meet all Federal statutory and regulatory requirements for the operation of an Exchange. In order to obtain approval for the federally-facilitated Exchange or State Exchange on the Federal platform in a State to implement this option, a State must:

(i) Coordinate with HHS on an implementation plan and timeline that allows for a transition period, developed at the discretion of HHS in consultation with the State, necessary for the federally-facilitated Exchange to operationalize the necessary changes to implement this option;

(ii) Execute a Federal agreement with HHS that includes the terms and conditions for the arrangement and which defines the division of responsibilities between HHS and the State;

(iii) Agree to procedures developed by HHS for the collection and remittance of the monthly user fee described in § 156.50(c) of this subchapter; and

(iv) Perform and cooperate with activities established by HHS related to oversight and financial integrity requirements in accordance with section 1313 of the Affordable Care Act, including complying with reporting and compliance activities required by HHS and described in the Federal agreement.

■ 7. Section 155.1308 is amended by revising paragraphs (f)(3)(i), (f)(3)(iv) introductory text, and (f)(3)(iv)(A) through (C) to read as follows:

§ 155.1308 Application procedures.

* * * * *

(f) * * *

(3) * * *

(i) A comprehensive description of the State legislation and program to implement a plan meeting the requirements for a waiver under section 1332 of PPACA. In analyzing whether the State has satisfied the requirement under section 1332(b)(2)(A) of PPACA that the State enact a law authorizing a waiver under section 1332 of PPACA, the Secretary and the Secretary of the Treasury, as applicable, may consider existing State legislation combined with duly-enacted State regulation or an executive order so long as the State legislation provides statutory authority to enforce PPACA provisions or the State plan;

* * * * *

(iv) The analyses, actuarial certifications, data, assumptions, targets, and other information set forth in paragraph (f)(4) of this section sufficient to provide the Secretary and the Secretary of the Treasury, as applicable, with the necessary data to determine that the State's proposed waiver satisfies the general requirements for approval under section 1332(b)(1) of the Affordable Care Act consistent with the provisions of this paragraph (f)(3)(iv) and interpretive guidance published by the Secretary and the Secretary of the Treasury;

(A) As required under section 1332(b)(1)(A) of the Affordable Care Act (the comprehensive coverage requirement), will provide coverage that is at least as comprehensive as the coverage defined in section 1302(b) of the Affordable Care Act and offered through Exchanges established under the Affordable Care Act as certified by the Office of the Actuary of the Centers for Medicare & Medicaid Services based on sufficient data from the State and from comparable States about their experience with programs created by the Affordable Care Act and the provisions of the Affordable Care Act that the State seeks to waive. To satisfy the comprehensive coverage requirement,

the Secretary and the Secretary of the Treasury, as applicable, must determine that the State plan will provide consumers access to coverage options that are at least as comprehensive as the coverage options provided without the waiver, to at least a comparable number of people as would have had access to such coverage absent the waiver. These coverage options must also satisfy the affordability requirement in paragraph (f)(3)(iv)(B) of this section;

(B) As required under section 1332(b)(1)(B) of the Affordable Care Act (the affordability requirement), will provide coverage and cost sharing protections against excessive out-of-pocket spending that are at least as affordable as the provisions of Title I of the Affordable Care Act would provide. To satisfy the affordability requirement, the Secretary and the Secretary of the Treasury, as applicable, must determine that the State plan will provide consumers access to coverage options that are at least as affordable as the coverage options provided without the waiver, to at least a comparable number of people as would have had access to such coverage absent the waiver. These coverage options must also satisfy the comprehensive coverage requirement in paragraph (f)(3)(iv)(A) of this section;

(C) As required under section 1332(b)(1)(C) of the Affordable Care Act (the scope of coverage requirement), will provide coverage to at least a comparable number of its residents as the provisions of Title I of the Affordable Care Act would provide. Coverage refers to minimum essential coverage as defined in 26 U.S.C. 5000A(f) and 26 CFR 1.5000A–2, and health insurance coverage as defined in 45 CFR 144.103; and

* * * * *

■ 8. Section 155.1320 is amended by revising paragraphs (a)(1) and (2) to read as follows:

§ 155.1320 Monitoring and compliance.

(a) * * *

(1) Following the issuance of a final decision to approve a section 1332 waiver by the Secretary and the Secretary of the Treasury, as applicable, a State must comply with all applicable Federal laws, regulations, and interpretive policy statements, as well as interpretive guidance published by the Secretary and the Secretary of the Treasury, unless expressly waived. A State must, within the timeframes specified in law, regulation, interpretive policy or guidance, come into compliance with any changes in Federal law, regulation, or policy affecting section 1332 waivers, unless the provision being changed is expressly waived.

(2) The Secretary and the Secretary of the Treasury will examine compliance with Federal and regulatory requirements consistent with § 155.1308(f)(3)(iv) and interpretive guidance published by the Secretary and the Secretary of the Treasury when conducting implementation reviews under paragraph (b) of this section.

* * * * *

■ 9. Section 155.1328 is amended by revising paragraph (a) to read as follows:

§ 155.1328 Periodic evaluation requirements.

(a) The Secretary and the Secretary of the Treasury, as applicable, shall periodically evaluate the implementation of a program under a section 1332 waiver consistent with § 155.1308(f)(3)(iv) and interpretive guidance published by the Secretary and the Secretary of the Treasury, as applicable, and any terms and conditions governing the section 1332 waiver.

* * * * *

PART 156—HEALTH INSURANCE ISSUER STANDARDS UNDER THE AFFORDABLE CARE ACT, INCLUDING STANDARDS RELATED TO EXCHANGES

■ 10. The authority citation for part 156 is revised to read as follows:

Authority: 42 U.S.C. 18021–18024, 18031–18032, 18041–18042, 18044, 18054, and 26 U.S.C. 36B.

■ 11. Section 156.230 is amended by adding paragraph (f) to read as follows:

§ 156.230 Network adequacy standards.

* * * * *

(f) *Exception.* Paragraphs (a) through (e) of this section do not apply to a plan for which an issuer seeks QHP certification or to any certified QHP that does not use a provider network, meaning that the plan or QHP does not condition or differentiate benefits based on whether the issuer has a network participation agreement with the provider that furnishes covered services.

■ 12. Section 156.1240 is amended by adding paragraph (a)(3) to read as follows:

§ 156.1240 Enrollment process for qualified individuals.

(a) * * *

(3) For payments in the individual market made using a payment method described in paragraph (a)(2) of this section, accept premium payments made by or on behalf of an enrollee in connection with an individual coverage HRA (as described in § 146.123(b) of this subchapter) or qualified small employer health reimbursement arrangement (as described in section 9831(d)(2) of the Internal Revenue Code of 1986, as amended) in which the enrollee is enrolled.

[Docket No. FAR–2021–0051, Sequence No. 1]

Federal Acquisition Regulation; Federal Acquisition Circular 2021–04; Introduction

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Summary presentation of final rule.

SUMMARY: This document summarizes the Federal Acquisition Regulation (FAR) rule agreed to by the Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) in this Federal Acquisition Circular (FAC) 2021–04. A companion document, the *Small Entity Compliance Guide* (SECG), follows this FAC.

DATES: For effective dates see the separate documents, which follow.

FOR FURTHER INFORMATION CONTACT: Ms. Zenaida Delgado, Procurement Analyst, at 202–969–7207 or *zenaida.delgado@gsa.gov* for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat Division at 202–501–4755 or *GSARegSec@gsa.gov.* Please cite FAC 2021–04, FAR Case 2019–016.

RULES LISTED IN FAC 2021–04

Subject	FAR case
Maximizing Use of American-Made Goods, Products and Materials	2019–016

ADDRESSES: The FAC, including the SECG, is available via the internet at *https://www.regulations.gov.*

SUPPLEMENTARY INFORMATION: A summary for the FAR rule follows. For the actual revisions and/or amendments by this FAR rule, refer to the specific item numbers and subjects set forth in the documents following this summary. FAC 2021–04 amends the FAR as follows:

Maximizing Use of American-Made Goods, Products, and Materials (FAR Case 2019–016)

This final rule strengthens domestic preferences under the Buy American statute by making adjustments to the required percentage of domestic content and the existing percentages for the price evaluation preferences in an effort to decrease the amount of foreign-sourced content in a U.S. manufactured product to promote economic and national security, help stimulate economic growth, and create jobs. The price evaluation preferences increase from 6 percent to 20 percent for large business and from 12 percent to 30 percent for small business; for DoD procurements there is no change to the DoD 50 percent amount. The domestic content requirement for iron and steel increases from 50 percent to 95 percent; for other end products and construction materials, the domestic content requirement increases from 50 percent to 55 percent. Foreign iron and steel is iron or steel products that are not produced in the United States. The rule implements E.O. 13881, Maximizing Use of American-Made Goods, Products, and Materials. This final rule will not have a significant economic impact on a substantial number of small entities.

William F. Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Federal Acquisition Circular (FAC) 2021–04 is issued under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator of National Aeronautics and Space Administration.

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 2021–04 is effective January 19, 2021.

John M. Tenaglia,

Principal Director, Defense Pricing and Contracting, Department of Defense.

Jeffrey A. Koses,

Senior Procurement Executive/Deputy CAO, Office of Acquisition Policy, U.S. General Services Administration.

William G. Roets, II,

Acting Assistant Administrator, Office of Procurement, National Aeronautics and Space Administration.

Federal Acquisition Regulation: Maximizing Use of American-Made Goods, Products, and Materials

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: DoD, GSA, and NASA are issuing a final rule amending the Federal Acquisition Regulation (FAR) to implement an Executive order (E.O.) addressing domestic preferences in Government procurement.

DATES: *Effective:* January 21, 2021.

Applicability: The changes in this rule apply to solicitations issued on or after February 22, 2021 and resultant contracts.

FOR FURTHER INFORMATION CONTACT: Ms. Zenaida Delgado, Procurement Analyst, at 202–969–7207 or *zenaida.delgado@gsa.gov* for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat Division at 202–501–4755 or *GSARegSec@gsa.gov.* Please cite FAC 2021–04, FAR Case 2019–016.

SUPPLEMENTARY INFORMATION:

I. Background

DoD, GSA, and NASA published a proposed rule at 85 FR 56558 on September 14, 2020, to implement E.O. 13881, Maximizing Use of American-Made Goods, Products, and Materials (84 FR 34257, July 18, 2019). In order to implement the E.O., this final rule changes FAR clauses implementing the Buy American statute by increasing the—

1. Domestic content requirements; and

2. Price preference for domestic products.

Increased Domestic Content Requirements

Under E.O. 13881, and this final rule, in order to meet the definition of ''domestic construction material'' or ''domestic end product,'' the cost of

foreign iron and steel for iron and steel products must be less than 5 percent of the cost of all components in the product. For everything else, the domestic content requirement increases from 50 percent to more than 55 percent of the cost of all components. E.O. 13881 creates a new separate higher standard for iron and steel products. This distinction has existed for many years in domestic preference requirements governing certain Federal grant programs, such as the Federal Transit Administration's Buy America regulations applicable to grantees. Also, DoD procurements are affected by the increased domestic content requirements of E.O. 13881; the changes will be implemented in the Defense Federal Acquisition Regulation Supplement (DFARS) through DFARS Case 2019–D045, Maximizing Use of American-Made Goods.

Increased Price Preference for Domestic Offers

The Buy American statute does not prohibit the purchase of foreign end products or use of foreign construction material. Instead, it encourages the use of domestic end products and construction material by imposing a price preference for domestic end products and construction material. E.O. 13881 and this final rule increase the price preference from 6 percent to 20 percent for large businesses, and from 12 percent to 30 percent for small businesses. The E.O. does not impact the price preference for end products for DoD procurements, which is 50 percent for both large and small businesses, because the DoD percentage exceeds the requirements of the E.O.

Thirty-five respondents submitted comments on the proposed rule.

II. Discussion and Analysis

The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (the Councils) reviewed the public comments in the development of the final rule. A discussion of the comments and the changes made to the rule as a result of those comments are provided as follows:

A. Summary of Significant Changes

This final rule makes the following significant changes from the proposed rule:

• *Definitions.* At FAR 25.003, the definitions of ''domestic construction material,'' ''domestic end product,'' and ''predominantly of iron or steel or a combination of both'' are revised; and a definition of ''foreign iron and steel'' is added.

○ The definitions of ''domestic construction material'' and ''domestic end product'' now specify that the cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of all foreign iron or steel components excluding commercially available off-the-shelf (COTS) fasteners. The definition specifies that the iron or steel components of unknown origin are treated as foreign. Also, the definition explains that if the construction material contains multiple components, the cost of all the materials used in the construction material is calculated in accordance with the definition of ''cost of components'' in FAR 25.003.

○ A definition of ''foreign iron and steel'' which includes language explaining ''produced in the United States'' is added to clarify the term as it is used in the revised definitions of ''domestic construction material'' and ''domestic end product''.

○ The definition of ''predominantly of iron or steel or a combination of both'' now clarifies what is meant by the phrase ''the cost of iron and steel.''

○ Conforming changes are made at FAR 25.101(a)(2)(ii) and 25.201(b)(2)(ii), as well as to FAR clauses 52.225–1, Buy American—Supplies; 52.225–3, Buy American—Free Trade Agreements—Israeli Trade Act; 52.225–9, Buy American—Construction Materials; and 52.225–11, Buy American—Construction Materials Under Trade Agreement.

• *COTS fasteners.* Revisions have been made throughout the FAR to clarify that the domestic content test does not apply to COTS fasteners. These revisions are made at FAR 25.001, 25.003, 25.101, 25.201, as well as in FAR clauses 52.225–1, Buy American-Supplies; 52.225–3, Buy American—Free Trade Agreements—Israeli Trade Act, and its alternates; 52.225–9, Buy American—Construction Materials; and 52.225–11, Buy American—Construction Materials Under Trade Agreement, and its alternate.

B. Analysis of Public Comments

1. Strong Support for the Rule

Comment: Most of the respondents strongly supported the proposed rule. One respondent noted positive factors regarding this rule as follows:

• Improves America's position from an economic standpoint.

• Helps increase jobs.

• Improves relationships with companies within our country.

• Interests other countries to do more trades and business with companies that have American-made products, goods, and materials.

• Improves our national image.

Response: Noted.

2. Domestic Content Test for COTS Items

2a. Remove the COTS Waiver for All Construction Materials

Comment: A few respondents stated that the rule should restore the domestic content test for all COTS construction material, not just for COTS construction iron and steel products. The respondents pointed out that there are instances where ''nonferrous'' construction materials compete with iron and steel products and in these instances, the rule provides an advantage to foreign nonferrous producers when they compete with U.S. producers of iron and steel products by not applying the domestic content test to the ''nonferrous'' construction material.

Response: This FAR change is required to implement E.O. 13881.

2b. Remove the COTS Waiver for Fasteners

Comment: Many respondents (using an essentially identical form letter) urged the Councils to remove the waiver of the domestic content test of the Buy American statute for the acquisition of COTS fasteners. These respondents stated that not doing so would not provide U.S. fastener manufacturers the same protection being offered to manufacturers of other iron and steel products.

Response: The Councils determined that requiring offerors to keep track of the origin of all fasteners could have a significant negative impact by creating an administrative burden on offerors that would outweigh any benefit to the American iron and steel industrial base. However, a clarification is made in FAR 25.001 to exclude only COTS fasteners.

2c. No Changes to Current COTS Waiver

Comment: A few respondents stated that the COTS waiver should remain as is and not subject iron and steel products to the additional rigor of the domestic content test. These respondents commented that contractors for COTS items have built their supply chains to comply with the existing COTS waiver and changing this paradigm will impede projects around the country, adversely impact these contractors, be administratively burdensome for them, and increase compliance costs that will eventually be borne by the Government. One of the

respondents stated that waiving some COTS items, but not others, would create a dissimilar application of the domestic content rule that is not in the public interest and should not be implemented in the FAR.

Response: As explained in the proposed rule, roll-back of the COTS waiver is necessary to give full effect to the E.O. 13881 requirement.

3. Definitions

Comment: One respondent stated that it was not clear why the longstanding practice of using cost of ''components'' has been replaced with ''content'' when determining whether an end product is a steel end product and the implications of this change. The respondent recommended defining the word ''content'' and providing examples of application of this new standard.

Response: The Councils note that the domestic content test is not applied to determine whether an item is wholly or predominantly of iron or steel or a combination of both, but to determine whether such a product is foreign or domestic. As explained in paragraph II.B.2.i of the proposed rule preamble, the term ''component test'' was replaced with ''domestic content test'' because of the wording of the E.O. regarding iron and steel. Per FAR 25.001(c)(1), this domestic content test is one of the two-part test elements used by the Buy American statute to define a ''domestic construction material'' or ''domestic end product.'' Regarding iron and steel end products, the E.O. states that the materials shall be considered to be of foreign origin if ''the cost of foreign iron and steel used in such iron and steel end products constitutes 5 percent or more of the cost of all the products used in such iron and steel end products.'' ''All the products used'' in an item would be the common meaning of ''content.'' The Councils do not consider it necessary to define ''content''.

However, the Councils added the explanation that the cost of all the materials used in a product is to be calculated consistent with the definition of ''cost of components'' at FAR 25.003, if the product contains multiple components. The Councils also specified that the cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners, both in the definitions of ''domestic construction material,'' and ''domestic end product.''

To determine whether a product that is wholly or predominantly of iron or steel or a combination of both is foreign or domestic, it is necessary to determine the following:

(i) Does the product consist wholly or ''predominantly of iron or steel or a combination of both'' (as defined in FAR 25.003)?

(ii) Is any of the iron or steel content not produced in the United States?

(iii) Is the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product, and a good faith estimate of the cost of all foreign iron or steel components (excluding COTS fasteners), less than 5 percent of the cost of all the components used in the end product (or construction material)? If the product contains multiple components, the cost is to be calculated consistent with the definition of ''cost of components'' at FAR 25.003.

See the following examples:

• *A steel beam.* For purposes of this example, this steel beam consists wholly of steel. The cost of all material in the beam, excluding final manufacture, overhead costs, and profit, is $50. If the steel beam is rolled from steel bloom, then the steel beam probably contains either all domestic steel, or all foreign steel. However, if the beam is welded or riveted from separate steel plates, then it is conceivable that some of the steel plates could have been formed from steel not produced in the United States. If the cost of the foreign steel plates used to make the beam equals or exceeds $2.50 (*i.e.,* 5 percent of the cost of all the components used in the product), then the entire beam is a foreign construction material.

• *A steel safe.* The steel safe may include other components such as a combination lock, a dehumidifier, or drawers. The safe costs $1,000 and the cost of all components in the safe is $500. If the cost of the steel plates or other steel mill products (excluding COTS fasteners) utilized in the manufacture of the safe exceeds $250 (*i.e.,* 50 percent of the total cost of all the components as defined in FAR 25.003), then the safe consists predominantly of steel. If the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the safe and a good faith estimate of the cost of all foreign iron or steel components (excluding COTS fasteners) is less than $25 (*i.e.,* 5 percent of the cost of all the components used in the product), then the safe is a domestic end product.

• *A refrigerator.* The refrigerator consists of many components and materials. The exterior cabinet and door and the inner cabinet of this refrigerator are steel. The refrigerator also includes insulation, cooling system, refrigerant, and fixtures. The refrigerator costs $2,000 and the cost of all components in the refrigerator is $1,000. If the cost of the steel plates or other steel mill products (excluding COTS fasteners) utilized in the manufacture of the refrigerator does not exceed $500 (*i.e.,* 50 percent of the total cost of all the components as defined in FAR 25.003), then the refrigerator does not consist predominantly of steel.

Comment: One respondent recommended clarifying the meaning of ''metallurgical processes'' and providing a list of representative metallurgical functions such as smelting, melting, pouring, rolling, casting, and other similar processes. The respondent based the recommendation on their interpretation of the existing guidance and the proposed rule, suggesting that raw steel and iron material for a steel end product may enter the United States and after undergoing all manufacturing processes for its intended final use, it would then be considered ''produced in the U.S.'' both for purposes of being a domestic component (if it is a component in an end product) or a domestic end product itself (if solely from one foreign material). The respondent's interpretation also suggested that if ''the steel came with any foreign manufacturing outside the original metallurgical process, the item would be considered foreign, even if all subsequent manufacturing occurred in the U.S.'' One respondent suggested defining ''manufactured in the United States'' under the Buy American statute's two-part test using a more stringent standard where all steelmaking processes, including the melting and pouring of the steel (*i.e.,* the actual steelmaking), occur in the United States. Other respondents requested the rule provide a clear, explicit definition of ''foreign iron and steel'' to prevent any adverse or unintended consequences.

Response: The exception relating to metallurgical processes involving refinement of steel additives does not apply to any of the metallurgical processes involved in the making of the steel itself. Steel is defined in FAR 25.003 as an alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements. These other elements (*e.g.,* manganese, silicon, copper, aluminum, chromium, cobalt, molybdenum, nickel, niobium, titanium, tungsten, vanadium) are termed steel additives, and as such,

are added to the steel alloy to create steel with different properties (*e.g.,* stainless steel). Therefore, whatever metallurgical processes are used to separate and concentrate and reduce the ore to metal, then refine to increase the grade or purity of a steel additive (such as titanium or tungsten) can occur anywhere, prior to adding these other metals to produce the steel alloy in the United States. As stated in the proposed rule, in order to be domestic, all manufacturing processes of the iron or steel (other than the additives) must take place in the United States. In the final rule, language is added from the definition of ''produced in the United States'' from E.O. 13788, Buy American and Hire American (82 FR 18837) to better explain how the iron or steel is considered domestic. For clarity, the final rule moves the explanation of what it means to produce iron or steel in the United States from the definition of ''domestic construction material'' and ''domestic end product'' to a new, separate definition in FAR 25.003 for the term ''foreign iron and steel.'' The definition of ''foreign iron and steel'' is based on the existing description of ''iron or steel components'' at FAR 25.602–1(a)(1)(ii), consistent with the intent articulated in the proposed rule.

Comment: One respondent recommended that ''good faith'' be further defined to include a subjective and objective standard for a ''reasonable business person without legal knowledge or training''.

Response: The term ''good faith'' is used in many instances in the FAR and other agency regulations. The Councils concluded that ''a good faith estimate'' should be sufficient; and that adding the suggested language will not make the standard any clearer.

Comment: One respondent stated that requiring nothing more than a ''good faith assurance'' to calculate the cost of foreign components could lead to abuse or fraud in calculating the cost of foreign components, which would undermine the purpose of E.O. 13881. The respondent commented that because the origin of the iron and steel products should be readily discernible, the final rule should require suppliers to track the domestic content in iron and steel products and subject this accounting to periodic audit. Another respondent submitted a similar comment.

Response: The Councils agree that the origin of the iron and steel components should be readily discernible. As such, the final rule has been revised to clarify that contractors are to make a ''good faith estimate'' only for the cost of all foreign iron or steel components, other than the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product. It is highly likely that current procedures will yield the needed information for the offeror to make the required determinations in this rule. The cost of the iron and steel items are included in invoices and already used to determine whether an end product or construction material is foreign.

Comment: A few respondents stated that defining ''predominantly of iron or steel'' based on cost of the components, as opposed to weight, volume, and cost, opens a loophole that will allow manufacturers and contractors to evade the domestic content requirements through creative accounting practices.

Response: The Councils reiterate that basing the predominance on cost, rather than weight or volume, is consistent with the requirement of the E.O. that the ''cost'' of foreign iron and steel be limited to less than 5 percent of the ''cost'' of all components. Therefore, the final rule remains unchanged regarding the basis for determining whether an item is predominantly of iron or steel.

Comment: One respondent stated that the proposed rule's definition of ''fasteners'' was overly broad and by exempting fasteners from the domestic content requirements, the rule creates an opportunity for abuse of this ''loophole.'' The respondent requested the definition of ''fasteners'' be modified to reflect the qualifiers the Councils provided in the proposed rule, *i.e.,* that the fasteners being exempted were those that were ''small'' or ''inexpensive.''

Response: The Councils have clarified the text in the final rule to state that the fasteners being exempted from the domestic content requirement are those that are COTS items.

Comment: One respondent stated that requiring iron and steel products to contain 95 percent domestic content is too onerous and burdensome on manufacturers. The respondent commented that the 95 percent requirement should be reduced or phased in over time. Alternatively, the respondent also suggested that in determining whether a predominantly of iron or steel product is domestic, manufacturers should be allowed to use the cost of non-iron and non-steel components of the item; this way, manufacturers can mitigate the 95 percent requirement, while still incentivizing domestic purchase of non-steel components. Another respondent had a similar comment, pointing out that the Environmental Protection Agency allows for 5 percent of the total ''project'' cost to be foreign iron and steel products instead of 5 percent of the total cost of the individual product.

Response: This FAR change is required to implement E.O. 13881, which increased the domestic content requirement for iron and steel end products to 95 percent. However, the Councils note that the proposed rule presented the requirement as whether 5 percent of the cost of all the components was foreign iron or steel, not whether 5 percent of the cost of only the iron or steel components were foreign iron or steel; thereby, giving credit to the non-iron and non-steel components of the end item as requested by the respondent.

Comment: One respondent stated their interpretation that the proposed rule encompassed steel subcomponents, not just steel components. Due to lack of visibility into the cost of these steel subcomponents by manufacturers, the respondent requested the rule consider exempting the cost of subcomponents from the calculations. Another respondent had a similar comment, pointing out that the Federal Transit Administration's policy explicitly exempts subcomponents from country-of-origin consideration, including iron and steel components.

Response: The Councils confirm that the intent of the proposed rule was to include the cost of subcomponents in the domestic content calculations. However, the Councils did not add ''subcomponents'' in the FAR text because the definition of ''components'' at FAR 25.003 is written broadly enough to already cover subcomponents. In acknowledging the difficulty contractors may have to know, definitively, the cost of all subcomponents in iron or steel items, the Councils clarify in the final rule that contractors are to make a ''good faith estimate'' of the cost of all foreign iron or steel components, other than the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product.

4. Outside the Scope of This Rule

Comment: Two respondents provided comments regarding marketing their specific businesses, and two respondents provided comments of a political nature.

Response: These comments did not address the rule and, as such, are outside the scope of this rule.

Comment: One respondent recommended that if no domestic offers are received on an acquisition conducted using full and open competition, then the procurement officer should confirm with at least two

other manufacturers within the same NAICS code their non-interest in the procurement.

Response: The Councils concluded the recommendation would add a significant burden on contracting officers, and is not necessary for implementation of the E.O.

Comment: One respondent recommended defining ''manufactured'' and adopting a clear non-shift approach to the items specified in the procurement document for all purchases (aside from systems).

Response: This recommendation is not necessary for implementation of the E.O. The Councils note that definitions of ''manufacture'' have been considered in the past and rejected. Although the FAR does not define ''manufacture,'' it does define ''place of manufacture,'' at FAR 52.225–18, as ''the place where an end product is assembled out of components, or otherwise made or processed from raw materials into the finished product that is to be provided to the Government.''

Comment: One respondent recommended removing the Buy American statute's exception for ''Goods for Use Outside the United States'' and using an evaluation factor instead.

Response: The exception for articles, materials, or supplies for use outside the United States is included in the Buy American statute (41 U.S.C. 8302(a)(2)(A) and 8303(b)(1)(A)).

The Balance of Payments Program provided a preference for U.S. products and services for overseas use, and its restrictions were similar to the restrictions of the Buy American statute, which apply only within the United States. Purchases of supplies for use outside the United States, and construction materials for construction contracts performed outside the United States, were covered by the Balance of Payments Program in FAR subpart 25.3, as a matter of policy, until it was removed in 2002. Only a few civilian agencies make purchases for use outside the United States. Furthermore, even fewer civilian agencies award construction contracts that are performed outside the United States. The Balance of Payments Program applied to purchases valued at more than the simplified acquisition threshold and had little impact for civilian agency acquisitions of supplies in excess of the Trade Agreements Act threshold, because the civilian agencies do not apply the Balance of Payments Program when the Trade Agreements Act applies. Therefore, because there was no statutory requirement for the Balance of Payments Program, and because elimination of this Program for civilian agencies would reduce administrative burdens on both the Government and the public, without significant impact on the Government's international balance of payments, the Balance of Payments Program was eliminated for civilian agencies. The rationale for elimination of this Program for civilian agencies has not changed. Note that DoD has retained the Balance of Payments Program for acquisitions of supplies for use outside the United States or construction projects to be performed overseas.

5. Oppose the Rule

Comment: Some respondents urged the Councils not to increase the iron and steel content requirements beyond their current levels because of the limited availability of U.S. sources for components, which will result in increased costs and a decrease in competition. Some of these respondents also stated that Buying American should be an incentive, not a requirement.

Response: This FAR change implements the content requirements established in E.O. 13881.

III. Applicability to Contracts at or Below the Simplified Acquisition Threshold (SAT) and for Commercial Items, Including Commercially Available Off-the-Shelf (COTS) Items

This final rule does not add any new provisions or clauses, nor change the applicability of existing provisions or clauses, to contracts at or below the SAT and contracts for the acquisition of commercial items, including COTS items.

However, this rule applies the domestic content test of the Buy American statute, as implemented by E.O. 13881, to COTS items that consist wholly or predominantly of iron or steel (excluding COTS fasteners). In accordance with 41 U.S.C. 1907, since 2008, the domestic content test of the Buy American statute has been waived for COTS items, in part due to the complexity and cost of keeping track of components in a world of global sourcing where the Government is not a market driver. But absent restoration of the domestic content test, the E.O. 13881 requirement regarding iron and steel construction material would have very little effect. As such, the Administrator for Federal Procurement Policy has determined that it would not be in the best interest of the Federal Government to exempt iron and steel products (excluding COTS fasteners) that are COTS items from the applicability of the content test for foreign iron and steel under the Buy American statute.

The domestic content waiver for COTS items would continue to apply to COTS iron and steel fasteners, such as nuts, bolts, pins, rivets, nails, clips, and screws, which are generally so small, inexpensive, and comingled that trying to keep track of the origin of all fasteners would create an administrative burden on offerors that would outweigh any benefit to the American iron and steel industrial base.

IV. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule is not a significant regulatory action and, therefore, was not subject to the review of the Office of Information and Regulatory Affairs under section 6(b) of E.O. 12866. This rule is not a major rule under 5 U.S.C. 804.

V. Expected Impact of the Final Rule

The FAR clauses implementing the Buy American statute apply to a narrow set of procurements. Also, because the FAR Council is leaving the COTS items exception in place for most COTS items, the heightened domestic content requirements will not be applicable to those procurements.

With this rule's implementation, domestic industries supplying domestic end products are likely to benefit from a competitive advantage. Based on the E.O., it is unclear if the pool of qualified suppliers would be reduced, resulting in less competition (and a possible increase in prices that the Government will pay to procure these products).

At least three arguments point to the possibility that any increased burden, on contractors in particular, could be small if not *de minimis:* (1) Familiarization costs should be low; (2) some, if not many, contractors may already be able to meet the more stringent threshold; and (3) costs incurred by contractors that adjust their supply chains so that their end products qualify as domestic will enjoy a larger price preference that should help to offset these costs over time. Each of these arguments is explained below.

First, DoD, GSA, and NASA do not anticipate significant costs from contractors' familiarization with this

rule given the history of rulemaking and E.O.s in this area. The basic mechanics of the Buy American statute (*e.g.,* definitions, how and when the price preference is used to favor domestic end products, certifications required of offerors to demonstrate end products are domestic) remain unchanged and continue to reflect processes that are decades old.

Second, some, if not many, contractors may already be able to comply with the lower foreign content requirement needed to meet the definition of ''domestic end product'' under E.O. 13881 and this rule. Laws such as the SECURE Technology Act, Public Law 115–390, which requires a series of actions to strengthen the Federal infrastructure for managing supply chain risks, are placing a significantly increased emphasis on Federal agencies and Federal Government contractors to identify and reduce risk in their supply chains. One way to reduce supply chain risk is to increase domestic sourcing of content. In addition, in the context of iron and steel, many existing laws already require more stringent content. For example, the Recovery Act required that all construction material for a project for the construction, alteration, maintenance, or repair of a public building or a public work in the United States, consisting wholly or predominantly of iron or steel, had to be produced in the United States when using Recovery Act funds, to the extent consistent with trade agreements (see FAR 25.602–1, implementing section 1605 of the Recovery Act). In addition, Federal contractors who also work on subawards funded under Federal grants may, in some cases, find that the steel, iron, and manufactured goods used in the project be produced in the United States, as is the case for certain funding administrated by the Federal Transit Administration for public transportation projects (see 49 U.S.C. 5323(j)). Accordingly, it is possible that the Federal market for iron and steel has already done significant retooling and could meet the requirements of E.O. 13881 with minor additional effort.

Third, it is anticipated that some contractors' products and construction materials may not meet the definitions of ''domestic construction material,'' and ''domestic end product'' unless the contractors take steps to adjust their supply chains to increase the domestic content. Contractors that make a business decision not to modify their supply chains will still be able to propose in response to Federal contract solicitations but will no longer enjoy a price preference. Contractors that sell to civilian agencies and retool their supply sources to meet the more stringent threshold will have a more generous price preference applied to their products. These stronger preferences, which are designed as an incentive to encourage more domestic sourcing, may help to offset costs of meeting the new standards.

This rule has the potential to slightly increase the estimated percentage of foreign offers. It can only impact products that are made in the United States as follows: Iron or steel products where the cost of foreign iron and steel is 5 percent or more of the cost of all components in the product; or other products, other than COTS items, that have a content of 45 to 50 percent foreign components. Offerors of such products have an option to increase the domestic content and continue to offer domestic products, in which case they may benefit from the increased preference for domestic products, or they may continue to offer the same product, which will now be evaluated as foreign. The Councils do not have any data on how many currently domestic products would fall into this category. Nor do the Councils have any knowledge as to which option an offeror of such products would select since this is a business decision for each offeror to make. Regarding the increased price preference for domestic offers, the Councils note that robust competition among vendors offering domestic products will decrease the extent to which the Government could pay an additional 20 to 30 percent for domestic products above and beyond the cost of otherwise equivalent foreign products.

Therefore, based on public comments received, DoD, GSA, and NASA have concluded that the initial assessment is correct that the cost impact of this rule is not significant, and any impact is predominantly positive.

VI. Executive Order 13771

This rule is not subject to E.O. 13771, Reducing Regulation and Controlling Regulatory Costs, because this rule has a *de minimis* impact on the public (see section V. of this preamble).

VII. Regulatory Flexibility Act

DoD, GSA, and NASA have prepared a Final Regulatory Flexibility Analysis (FRFA) consistent with the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* The FRFA is summarized as follows:

This rule strengthens domestic preferences under the Buy American statute by making adjustments to the required percentage of domestic content and the existing percentages for the price evaluation preferences in an effort to decrease the amount of foreign-sourced content in a U.S. manufactured product to promote economic and national security, help stimulate economic growth, and create jobs. The objective of this rule is to implement E.O. 13881, Maximizing Use of American-Made Goods, Products, and Materials (84 FR 34257, July 18, 2019).

There were no significant issues raised by the public comments in response to the initial regulatory flexibility analysis.

DoD, GSA, and NASA examined data from the Federal Procurement Data System for fiscal years (FY) 2017, 2018, and 2019, for new awards with a foreign place of performance for construction valued over the micro-purchase threshold and awards for supplies to unique small businesses. This rule will apply to only the 8 percent of foreign construction awards that were made to small businesses, and only 14 percent of foreign supply awards were made to small businesses.

Buy american statute	FY 2017	FY 2018	FY 2019	Median
	SB/total	SB/total	SB/total	SB (%)
Construction	18/217 = 8%	13/223 = 6%	15/199 = 8%	8
Supplies	153/1,200 = 13%	164/1,161 = 14%	164/1,048 = 16%	14

This rule is covered under the existing information collection requirements associated with the Buy American statute. The rule will strengthen domestic preferences under the Buy American statute and provide small businesses the opportunity and incentive to deliver U.S. manufactured products from domestic suppliers. It is expected that this rule will benefit U.S. small business manufacturers, including those of iron or steel.

There are no available alternatives to the rule to accomplish the desired objective of the statute.

Interested parties may obtain a copy of the FRFA from the Regulatory Secretariat Division. The Regulatory

Secretariat Division has submitted a copy of the FRFA to the Chief Counsel for Advocacy of the Small Business Administration.

VIII. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does apply; however, these changes to the FAR do not impose additional information collection requirements to the paperwork burden previously approved under the Office of Management and Budget Control Number 9000–0024, Buy American, Trade Agreements, and Duty-Free Entry.

List of Subjects in 48 CFR Parts 12, 25, and 52

Government procurement.

William F. Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 12, 25, and 52 as set forth below:

■ 1. The authority citation for 48 CFR parts 12, 25, and 52 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 51 U.S.C. 20113.

PART 12—ACQUISITION OF COMMERCIAL ITEMS

■ 2. Amend section 12.505 by revising paragraph (a) to read as follows:

12.505 Applicability of certain laws to contracts for the acquisition of COTS items.

* * * * *

(a)(1) The portion of 41 U.S.C. 8302, American Materials Required for Public Use, paragraph (a)(1) that reads ''substantially all from articles, materials, or supplies mined, produced, or manufactured in the United States,'' Buy American—Supplies, domestic content test, except as provided in 25.101(a)(2)(ii) (see 52.225–1 and 52.225–3).

(2) The portion of 41 U.S.C. 8303, Contracts for Public Works, paragraph (a)(2) that reads ''substantially all from articles, materials, or supplies mined, produced, or manufactured in the United States,'' Buy American—Construction Materials, domestic content test, except as provided in 25.201(b)(2)(ii)(see 52.225–9 and 52.225–11).

* * * * *

PART 25—FOREIGN ACQUISITION

■ 3. Amend section 25.001 by revising paragraph (c)(1) to read as follows:

25.001 General.

* * * * *

(c) * * *

(1) The Buy American statute uses a two-part test to define a ''domestic end product'' or ''domestic construction material'' (manufactured in the United States and a domestic content test). The domestic content test has been waived for acquisition of commercially available off-the-shelf (COTS) items, except a product that consists wholly or predominantly of iron or steel or a combination of both (excluding COTS fasteners) (see 25.101(a) and 25.201(b)).

* * * * *

■ 4. Amend section 25.003 by—

■ a. Revising the definitions ''Domestic construction material'' and ''Domestic end product''; and

■ b. Adding in alphabetical order the definitions ''Fastener'', ''Foreign iron and steel'', ''Predominantly of iron or steel or a combination of both'', and ''Steel''.

The revisions and additions read as follows:

25.003 Definitions.

* * * * *

Domestic construction material means—

(1) For use in subparts other than 25.6—

(i) For construction material that does not consist wholly or predominantly of iron or steel or a combination of both—

(A) An unmanufactured construction material mined or produced in the United States; or

(B) A construction material manufactured in the United States, if—

(*1*) The cost of the components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind for which nonavailability determinations have been made are treated as domestic. Components of unknown origin are treated as foreign; or

(*2*) The construction material is a commercially available off-the-shelf (COTS) item; or

(ii) For construction material that consists wholly or predominantly of iron or steel or a combination of both, a construction material manufactured in the United States if the cost of foreign iron and steel constitutes less than 5 percent of the cost of all the components used in such construction material. The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the construction material and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. Iron or steel components of unknown origin are treated as foreign. If the construction material contains multiple components, the cost of all the materials used in such construction material is calculated in accordance with the definition of ''cost of components'' in this section; or

(2) For use in subpart 25.6, see the definition in 25.601.

Domestic end product means—

(1) For an end product that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured end product mined or produced in the United States;

(ii) An end product manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind as those that the agency determines are not mined, produced, or manufactured in sufficient and reasonably available commercial quantities of a satisfactory quality are treated as domestic. Components of unknown origin are treated as foreign. Scrap generated, collected, and prepared for processing in the United States is considered domestic; or

(B) The end product is a COTS item; or

(2) For an end product that consists wholly or predominantly of iron or steel or a combination of both, an end product manufactured in the United States, if the cost of foreign iron and steel constitutes less than 5 percent of the cost of all the components used in the end product. The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the end product and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. Iron or steel components of unknown origin are treated as foreign. If the end product contains multiple components, the cost of all the materials used in such end product is calculated in accordance with the definition of ''cost of components'' in this section.

* * * * *

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Foreign iron and steel means iron or steel products not produced in the United States. Produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving refinement of steel additives. The origin of the elements of the iron or steel is not relevant to the determination of whether it is domestic or foreign.

* * * * *

Predominantly of iron or steel or a combination of both means that the cost of the iron and steel content exceeds 50 percent of the total cost of all its components. The cost of iron and steel is the cost of the iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of iron or steel components excluding COTS fasteners.

Steel means an alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements.

* * * * *

■ 5. Amend section 25.100 by—
■ a. Removing from the end of paragraph (a)(2) ''and'';
■ b. Redesignating paragraph (a)(3) as paragraph (a)(4);
■ c. Adding a new paragraph (a)(3); and
■ d. Revising the newly redesignated paragraph (a)(4).

The addition and revision read as follows:

25.100 Scope of subpart.

(a) * * *

(3) Executive Order 13881, July 15, 2019; and

(4) Waiver of the domestic content test of the Buy American statute for acquisition of commercially available off-the-shelf (COTS) items in accordance with 41 U.S.C. 1907, but see 25.101(a)(2)(ii).

* * * * *

■ 6. Amend section 25.101 by—
■ a. Removing from paragraph (a) introductory text ''statute uses'' and adding ''statute and E.O. 13881 use'' in its place;
■ b. Revising paragraph (a)(2);
■ c. Removing from paragraph (b) ''component test'' and adding ''domestic content test'' in its place; and
■ d. Removing from paragraph (c) ''Subpart 25.5'' and adding ''subpart 25.5'' in its place.

The revision reads as follows:

25.101 General.

(a) * * *

(2)(i) Except for an end product that consists wholly or predominantly of iron or steel or a combination of both, the cost of domestic components must exceed 55 percent of the cost of all the components. In accordance with 41 U.S.C. 1907, this domestic content test of the Buy American statute has been waived for acquisitions of COTS items (see 12.505(a)) (but see paragraph (a)(2)(ii) of this section).

(ii) For an end product that consists wholly or predominantly of iron or steel or a combination of both, the cost of foreign iron and steel must constitute less than 5 percent of the cost of all the components used in the end product (see the definition of ''foreign iron and steel'' at 25.003). The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the end product and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. This domestic content test of the Buy American statute has not been waived for acquisitions of COTS items in this category, except for COTS fasteners.

* * * * *

25.105 [Amended]

■ 7. Amend section 25.105 by—
■ a. Removing from paragraph (b)(1) ''6 percent'' and adding ''20 percent'' in its place; and
■ b. Removing from paragraph (b)(2) ''12 percent'' and ''Subpart 19.5'' and adding ''30 percent'' and ''subpart 19.5'' in their places, respectively.

■ 8. Amend section 25.200 by—
■ a. Removing from the end of paragraph (a)(2) ''and'';
■ b. Redesignating paragraph (a)(3) as paragraph (a)(4);
■ c. Adding a new paragraph (a)(3); and
■ d. Revising the newly redesignated paragraph (a)(4).

The addition and revision read as follows:

25.200 Scope of subpart.

(a) * * *

(3) Executive Order 13881, July 15, 2019; and

(4) Waiver of the domestic content test of the Buy American statute for acquisitions of commercially available off-the-shelf (COTS) items in accordance with 41 U.S.C. 1907, but see 25.201(b)(2)(ii).

* * * * *

■ 9. Revise section 25.201 to read as follows:

25.201 Policy.

(a) Except as provided in 25.202, use only domestic construction materials in construction contracts performed in the United States.

(b) The Buy American statute restricts the purchase of construction materials that are not domestic construction materials. For manufactured construction materials, the Buy American statute and E.O. 13881 use a two-part test to define domestic construction materials.

(1) The article must be manufactured in the United States; and

(2)(i) Except for construction material that consists wholly or predominantly of iron or steel or a combination of both, the cost of domestic components must exceed 55 percent of the cost of all the components. In accordance with 41 U.S.C. 1907, this domestic content test of the Buy American statute has been waived for acquisitions of COTS items (see 12.505(a)).

(ii) For construction material that consists wholly or predominantly of iron or steel or a combination of both, the cost of foreign iron and steel must constitute less than 5 percent of the cost of all the components used in such construction material (see the definition of ''foreign iron and steel'' at 25.003). The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the construction material and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. This domestic content test of the Buy American statute has not been waived for acquisitions of COTS items in this category, except for COTS fasteners.

25.204 [Amended]

■ 10. Amend section 25.204 in paragraph (b) by removing ''6 percent'' and adding ''20 percent'' in its place.

■ 11. Amend section 25.504–1 by—
■ a. Revising the table in paragraph (a)(1);
■ b. Removing from paragraph (a)(2) ''12 percent'' and ''$11,200'' and adding ''30 percent'' and ''$13,000'' in their places, respectively; and
■ c. Removing from paragraph (b)(2) ''12 percent'' and ''$11,424'' and adding ''30 percent'' and ''$13,260'' in their places, respectively.

The revision reads as follows:

25.504–1 Buy American statute.

(a)(1) * * *

Offer A	$16,000	Domestic end product, small business.

Offer B	$15,700	Domestic end product, small business.
Offer C	$10,000	U.S.-made end product (not domestic), small business.

* * * * *

■ 12. Amend section 25.504–2 by revising the table to read as follows:

25.504–2 WTO GPA/Caribbean Basin Trade Initiative/FTAs.

* * * * *

Offer A	$304,000	U.S.-made end product (not domestic).
Offer B	$303,000	U.S.-made end product (domestic), small business.
Offer C	$300,000	Eligible product.
Offer D	$295,000	Noneligible product (not U.S.-made).

* * * * *

■ 13. Amend section 25.504–3 by—

■ a. Revising the entry ''Offer B'' in the table in paragraph (a);

■ b. Revising the entry ''Offer B'' in the table in paragraph (b); and

■ c. Revising entries ''Offer B'' and ''Offer C'' in the table in paragraph (c).

The revisions read as follows:

25.504–3 FTA/Israeli Trade Act.

(a) * * *

*	*	* * *
Offer B	$100,000	Eligible product.

* * * * *

(b) * * *

*	*	* * *
Offer B	$103,000	Noneligible product.

* * * * *

(c) * * *

*	*	* * *
Offer B	$103,000	Eligible product.
Offer C	100,000	Noneligible product.

* * * * *

■ 14. Amend section 25.504–4 by—

■ a. In paragraph (a)—

■ i. Revising the table;

■ ii. In STEP 1, Items 3 and 5, removing ''6 percent'' and adding ''20 percent'' in their places, respectively; and

■ iii. Revising STEP 2 and 3.

■ b. Revising paragraph (b).

The revisions read as follows:

25.504–4 Group award basis.

(a) * * *

Item	Offers		
	A	B	C
1	DO = $55,000	EL = $56,000	NEL = $50,000
2	NEL = 13,000	EL = 10,000	EL = 13,000
3	NEL = 11,500	DO = 12,000	DO = 10,000
4	NEL = 24,000	EL = 28,000	NEL = 22,000
5	DO = 18,000	NEL = 10,000	DO = 14,000
Total	121,500	116,000	109,000

* * * * *

STEP 2: Evaluate Offer C against the tentative award pattern for Offers A and B:

Item	Offers		
	Low offer	Tentative award pattern from A and B	C
1	A	DO = $55,000	*NEL = $60,000
2	B	EL = 10,000	EL = 13,000
3	B	DO = 12,000	DO = 10,000
4	A	NEL = 24,000	NEL = 22,000
5	B	*NEL = 12,000	DO = 14,000
Total		113,000	119,000

* Offer + 20 percent.

On a line item basis, apply a factor to any noneligible offer if the other offer for that line item is domestic.

For Item 1, apply a factor to Offer C because Offer A is domestic and the acquisition was not covered by the WTO GPA. The evaluated price of Offer C, Item 1, becomes $60,000 ($50,000 plus 20 percent). Apply a factor to Offer B, Item 5, because it is a noneligible product and Offer C is domestic. The evaluated price of Offer B is $12,000 ($10,000 plus 20 percent). Evaluate the remaining items without applying a factor.

STEP 3: The tentative unrestricted award pattern from Offers A and B is lower than the evaluated price of Offer C. Award the combination of Offers A and B. Note that if Offer C had not specified all-or-none award, award would be made on Offer C for line items 3 and 4, totaling an award of $32,000.

(b) *Example 2.*

Item	Offers		
	A	B	C
1	DO = $50,000	EL = $50,500	NEL = $50,000

Item	Offers		
	A	B	C
2	NEL = 10,300	NEL = 10,000	EL = 10,200
3	EL = 20,400	EL = 21,000	NEL = 20,200
4	DO = 10,500	DO = 10,300	DO = 10,400
Total	91,200	91,800	90,800

Problem: The solicitation specifies award on a group basis. Assume the Buy American statute applies and the acquisition cannot be set aside for small business concerns. All offerors are large businesses.

Analysis: (see 25.503(c))

STEP 1: Determine which of the offers are domestic (see 25.503(c)(1)):

	Domestic (percent)	Determination
A	$50,000 (Offer A1) + $10,500 (Offer A4) = $60,500 $60,500/$91,200 (Offer A Total) = 66.3%	Domestic.
B	$10,300 (Offer B4)/$91,800 (Offer B Total) $ = 11.2%	Foreign.
C	$10,400 (Offer C4)/$90,800 (Offer C Total) = 11.5%	Foreign.

STEP 2: Determine whether foreign offers are eligible or noneligible offers (see 25.503(c)(2)):

	Domestic + eligible (percent)	Determination
A	N/A (Both Domestic)	Domestic.
B	$50,500 (Offer B1) + $21,000 (Offer B3) + $10,300 (Offer B4) = $81,800 $81,800/$91,800 (Offer B Total) = 89.1%	Eligible.
C	$10,200 (Offer C2) + $10,400 (Offer C4) = $20,600 $20,600/$90,800 (Offer C Total) = 22.7%	Noneligible.

STEP 3: Determine whether to apply an evaluation factor (see 25.503(c)(3)). The low offer (Offer C) is a foreign offer. There is no eligible offer lower than the domestic offer. Therefore, apply the factor to the low offer. Addition of the 20 percent factor (use 30 percent if Offer A is a small business) to Offer C yields an evaluated price of $108,960 ($90,800 + 20 percent). Award on Offer A (see 25.502(c)(4)(ii)). Note that, if Offer A were greater than Offer B, an evaluation factor would not be applied, and award would be on Offer C (see 25.502(c)(3)).

25.601 [Amended]

■ 15. Amend section 25.601 by removing the definition ''Steel''.

25.604 [Amended]

■ 16. Amend section 25.604 in paragraph (c)(2) by removing ''6 percent'' and adding ''20 percent'' in its place.

25.605 [Amended]

■ 17. Amend section 25.605 by—

■ a. Removing from paragraph (a)(2) ''6 percent'' and adding ''20 percent'' in its place; and

■ b. Removing from paragraph (a)(3) ''.06'' and adding ''.20'' in its place.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 18. Amend section 52.212–3 by—

■ a. Revising the date of the provision; and

■ b. Revising paragraphs (f)(1), (g)(1)(i), the first sentence of (g)(1)(ii), and (g)(1)(iii) introductory text.

The revisions read as follows:

52.212–3 Offeror Representations and Certifications—Commercial Items.

* * * * *

Offeror Representations and Certifications—Commercial Items (Jan 2021)

* * * * *

(f) * * *

(1)(i) The Offeror certifies that each end product, except those listed in paragraph (f)(2) of this provision, is a domestic end product.

(ii) The Offeror shall list as foreign end products those end products manufactured in the United States that do not qualify as domestic end products.

(iii) The terms ''domestic end product,'' ''end product,'' ''foreign end product,'' and ''United States'' are defined in the clause of this solicitation entitled ''Buy American-Supplies.''

* * * * *

(g)(1) * * *

(i)(A) The Offeror certifies that each end product, except those listed in paragraph (g)(1)(ii) or (iii) of this provision, is a domestic end product.

(B) The terms ''Bahrainian, Moroccan, Omani, Panamanian, or Peruvian end product,'' ''domestic end product,'' ''end product,'' ''foreign end product,'' ''Free Trade Agreement country,'' ''Free Trade Agreement country end product,'' ''Israeli end product,'' and ''United States'' are defined in the clause of this solicitation entitled ''Buy American—Free Trade Agreements—Israeli Trade Act.''

(ii) The Offeror certifies that the following supplies are Free Trade Agreement country end products (other than Bahrainian, Moroccan, Omani, Panamanian, or Peruvian end products) or Israeli end products as defined in the clause of this solicitation entitled ''Buy American—Free Trade Agreements—Israeli Trade Act.''

* * * * *

(iii) The Offeror shall list those supplies that are foreign end products (other than those listed in paragraph (g)(1)(ii) of this provision) as defined in the clause of this solicitation entitled ''Buy American—Free Trade Agreements—Israeli Trade Act.'' The Offeror shall list as other foreign end products those end products manufactured in the United States that do not qualify as domestic end products.

* * * * *

■ 19. Amend section 52.212–5 by—

■ a. Revising the date of the clause; and
■ b. Removing from paragraphs (b)(48) and (b)(49)(i) through (iv) ''(MAY 2014)'' and adding ''(JAN 2021)'' in their places, respectively.

The revision reads as follows:

52.212–5 Contract Terms and Conditions Required To Implement Statutes or Executive Orders—Commercial Items.

* * * * *

Contract Terms and Conditions Required To Implement Statutes or Executive Orders—Commercial Items (Jan 2021)

* * * * *

■ 20. Amend section 52.213–4 by—
■ a. Revising the date of the clause; and
■ b. Removing from paragraph (b)(1)(xvii) introductory text ''(MAY 2014)'' and adding ''(JAN 2021)'' in its place.

The revision reads as follows:

52.213–4 Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items).

* * * * *

Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items) (Jan 2021)

* * * * *

■ 21. Amend section 52.225–1 by—
■ a. Revising the date of the clause;
■ b. In paragraph (a):
■ i. Removing from paragraph (1)(i) in the definition ''Commercially available off-the-shelf (COTS) item'' ''FAR'' and adding ''Federal Acquisition Regulation (FAR)'' in its place;
■ ii. Revising the definition ''*Domestic end product*'';
■ iii. Adding in alphabetical order the definitions ''*Fastener*'' ''*Foreign iron and steel*'' ''*Predominantly of iron or steel or a combination of both*'' and ''*Steel*''; and
■ c. Revising paragraph (b).

The revisions and additions read as follows:

52.225–1 Buy American—Supplies.

* * * * *

Buy American—Supplies (Jan 2021)

(a) * * *

Domestic end product means—

(1) For an end product that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured end product mined or produced in the United States;

(ii) An end product manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind as those that the agency determines are not mined, produced, or manufactured in sufficient and reasonably available commercial quantities of a satisfactory quality are treated as domestic. Components of unknown origin are treated as foreign. Scrap generated, collected, and prepared for processing in the United States is considered domestic; or

(B) The end product is a COTS item; or

(2) For an end product that consists wholly or predominantly of iron or steel or a combination of both, an end product manufactured in the United States, if the cost of foreign iron and steel constitutes less than 5 percent of the cost of all the components used in the end product. The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the end product and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. Iron or steel components of unknown origin are treated as foreign. If the end product contains multiple components, the cost of all the materials used in such end product is calculated in accordance with the definition of ''cost of components''.

* * * * *

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Foreign iron and steel means iron or steel products not produced in the United States. Produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving refinement of steel additives. The origin of the elements of the iron or steel is not relevant to the determination of whether it is domestic or foreign.

Predominantly of iron or steel or a combination of both means that the cost of the iron and steel content exceeds 50 percent of the total cost of all its components. The cost of iron and steel is the cost of the iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of iron or steel components excluding COTS fasteners.

Steel means an alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements.

* * * * *

(b) 41 U.S.C. chapter 83, Buy American, provides a preference for domestic end products for supplies acquired for use in the United States. In accordance with 41 U.S.C. 1907, the domestic content test of the Buy American statute is waived for an end product that is a COTS item (see 12.505(a)(1)), except that for an end product that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the end product, excluding COTS fasteners.

* * * * *

■ 22. Amend section 52.225–2 by—
■ a. Revising the date of the provision and paragraphs (a) and (b);
■ b. Removing from paragraph (c) ''Part'' and adding ''part'' in its place.

The revisions read as follows:

52.225–2 Buy American Certificate.

* * * * *

Buy American Certificate (Jan 2021)

(a)(1) The Offeror certifies that each end product, except those listed in paragraph (b) of this provision, is a domestic end product.

(2) The Offeror shall list as foreign end products those end products manufactured in the United States that do not qualify as domestic end products.

(3) The terms ''domestic end product,'' ''end product,'' and ''foreign end product'' are defined in the clause of this solicitation entitled ''Buy American—Supplies.''

(b) Foreign End Products:

Line item No.	Country of origin

[*List as necessary.*]

* * * * *

■ 23. Amend section 52.225–3 by—
■ a. Revising the date of the clause;
■ b. In paragraph (a):
■ i. Removing from paragraph (1)(i) in the definition ''Commercially available off-the-shelf (COTS) item'' ''FAR'' and adding ''Federal Acquisition Regulation (FAR)'' in its place;
■ ii. Revising the definition ''*Domestic end product*''; and
■ iii. Adding in alphabetical order the definitions ''*Fastener*'' ''*Foreign iron and* steel'' ''*Predominantly of iron or steel or a combination of both*'' and ''*Steel*'';
■ c. Revising the second sentence of paragraph (c);
■ d. Revising the date in the introductory text and the second sentence of paragraph (c) of Alternate I;
■ e. Revising the date in the introductory text and the second sentence of paragraph (c) of Alternate II and adding a period to the end of paragraph (c); and
■ f. Revising the date in the introductory text and the second sentence of paragraph (c) of Alternate III.

The revisions and additions read as follows:

52.225–3 Buy American—Free Trade Agreements—Israeli Trade Act.

* * * * *

Buy American—Free Trade Agreements—Israeli Trade Act (Jan 2021)

(a) * * *

Domestic end product means—

Alternate III (Jan 2021) * * *

■ 25. Amend section 52.225–9 by—

■ a. Revising the date of the clause;

■ b. In paragraph (a):

■ i. Removing from paragraph (1)(i) in the definition ''Commercially available off-the-shelf (COTS) item'' ''FAR'' and adding ''Federal Acquisition Regulation (FAR)'' in its place;

■ ii. Revising the definition ''*Domestic construction material*''; and

■ iii. Adding in alphabetical order the definitions ''*Fastener*'' ''*Foreign iron and steel*'' ''*Predominantly of iron or steel or a combination of both*'' and ''*Steel*'';

■ c. Revising paragraph (b)(1);

■ d. Removing from paragraph (b)(3)(i) ''6 percent'' and adding ''20 percent'' in its place; and

■ e. Revising paragraph (d).

The revisions and additions read as follows:

52.225–9 Buy American—Construction Materials.

* * * * *

Buy American—Construction Materials (Jan 2021)

(a) * * *

Domestic construction material means—

(1) For construction material that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured construction material mined or produced in the United States; or

(ii) A construction material manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind for which nonavailability determinations have been made are treated as domestic. Components of unknown origin are treated as foreign; or

(B) The construction material is a COTS item; or

(2) For construction material that consists wholly or predominantly of iron or steel or a combination of both, a construction material manufactured in the United States if the cost of foreign iron and steel constitutes less than 5 percent of the cost of all components used in such construction material. The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the construction material and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. Iron or steel components of unknown origin are treated as foreign. If the construction material contains multiple components, the cost of all the materials used in such construction material is calculated in accordance with the definition of ''cost of components''.

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Foreign iron and steel means iron or steel products not produced in the United States. Produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving refinement of steel additives. The origin of the elements of the iron or steel is not relevant to the determination of whether it is domestic or foreign.

Predominantly of iron or steel or a combination of both means that the cost of the iron and steel content exceeds 50 percent of the total cost of all its components. The cost of iron and steel is the cost of the iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of iron or steel components excluding COTS fasteners.

Steel means an alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements.

* * * * *

(b) * * * (1) This clause implements 41 U.S.C. chapter 83, Buy American, by providing a preference for domestic construction material. In accordance with 41 U.S.C. 1907, the domestic content test of the Buy American statute is waived for construction material that is a COTS item, except that for construction material that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the construction materials, excluding COTS fasteners. (See FAR 12.505(a)(2)). The Contractor shall use only domestic construction material in performing this contract, except as provided in paragraphs (b)(2) and (b)(3) of this clause.

* * * * *

(d) *Data.* To permit evaluation of requests under paragraph (c) of this clause based on unreasonable cost, the Contractor shall include the following information and any applicable supporting data based on the survey of suppliers:

FOREIGN AND DOMESTIC CONSTRUCTION MATERIALS PRICE COMPARISON

Construction material description	Unit of measure	Quantity	Price (dollars) *
Item 1:			
Foreign construction material.			
Domestic construction material.			
Item 2:			
Foreign construction material.			
Domestic construction material.			

[Include all delivery costs to the construction site and any applicable duty (whether or not a duty-free entry certificate is issued)].*
[List name, address, telephone number, and contact for suppliers surveyed. Attach copy of response; if oral, attach summary.]
[Include other applicable supporting information.]

(End of clause)

■ 26. Amend section 52.225–11 by—

■ a. Revising the date of the clause;

■ b. In paragraph (a):

■ i. Removing from paragraph (1)(i) in the definition ''Commercially available off-the-shelf (COTS) item'' ''FAR'' and adding ''Federal Acquisition Regulation (FAR)'' in its place;

■ ii. Revising the definition ''*Domestic construction material*'';

■ iii. Adding in alphabetical order the definitions ''*Fastener*'' ''*Foreign iron and* steel'' ''*Predominantly of iron or steel or a combination of both*'' and ''*Steel*'';

■ c. Revising paragraph (b)(1);

■ d. Removing from paragraph (b)(4)(i) ''6 percent'' and adding ''20 percent'' in its place;

■ e. Revising paragraph (d);

■ f. In Alternate I—

■ i. Revising the date of the Alternate; and

■ ii. Revising paragraph (b)(1).

The revisions and additions read as follows:

52.225–11 Buy American—Construction Materials Under Trade Agreements.

* * * * *

Buy American—Construction Materials Under Trade Agreements (Jan 2021)

(a) * * *

Domestic construction material means—

(1) For construction material that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured construction material mined or produced in the United States; or

(ii) A construction material manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind for which nonavailability determinations have been made are treated as domestic. Components of unknown origin are treated as foreign; or

(B) The construction material is a COTS item; or

(2) For construction material that consists wholly or predominantly of iron or steel or a combination of both, a construction material manufactured in the United States if the cost of foreign iron and steel constitutes less than 5 percent of the cost of all components used in such construction material. The cost of foreign iron and steel includes but is not limited to the cost of foreign iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the construction material and a good faith estimate of the cost of all foreign iron or steel components excluding COTS fasteners. Iron or steel components of unknown origin are treated as foreign. If the

construction material contains multiple components, the cost of all the materials used in such construction material is calculated in accordance with the definition of ''cost of components''.

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Foreign iron and steel means iron or steel products not produced in the United States. Produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, from the initial melting stage through the application of coatings, except metallurgical processes involving refinement of steel additives. The origin of the elements of the iron or steel is not relevant to the determination of whether it is domestic or foreign.

* * * * *

Predominantly of iron or steel or a combination of both means that the cost of the iron and steel content exceeds 50 percent of the total cost of all its components. The cost of iron and steel is the cost of the iron or steel mill products (such as bar, billet, slab, wire, plate, or sheet), castings, or forgings utilized in the manufacture of the product and a good faith estimate of the cost of iron or steel components excluding COTS fasteners.

Steel means an alloy that includes at least 50 percent iron, between 0.02 and 2 percent carbon, and may include other elements.

* * * * *

(b) * * * (1) This clause implements 41 U.S.C. chapter 83, Buy American, by providing a preference for domestic construction material. In accordance with 41 U.S.C. 1907, the domestic content test of the Buy American statute is waived for construction material that is a COTS item, except that for construction material that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the construction material, excluding COTS fasteners. (See FAR 12.505(a)(2)). In addition, the Contracting Officer has determined that the WTO GPA and Free Trade Agreements (FTAs) apply to this acquisition. Therefore, the Buy American restrictions are waived for designated country construction materials.

* * * * *

(d) *Data.* To permit evaluation of requests under paragraph (c) of this clause based on unreasonable cost, the Contractor shall include the following information and any applicable supporting data based on the survey of suppliers:

FOREIGN AND DOMESTIC CONSTRUCTION MATERIALS PRICE COMPARISON

Construction material description	Unit of measure	Quantity	Price (dollars) *
Item 1:			
Foreign construction material.			
Domestic construction material.			
Item 2:			
Foreign construction material.			
Domestic construction material.			

[Include all delivery costs to the construction site and any applicable duty (whether or not a duty-free entry certificate is issued)].*
[List name, address, telephone number, and contact for suppliers surveyed. Attach copy of response; if oral, attach summary.]
[Include other applicable supporting information.]

(End of clause)

Alternate I (Jan 2021) * * *

(b) * * * (1) This clause implements 41 U.S.C. chapter 83, Buy American, by providing a preference for domestic construction material. In accordance with 41 U.S.C. 1907, the domestic content test of the Buy American statute is waived for construction material that is a COTS item, except that for construction material that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the construction material, excluding COTS fasteners. (See FAR 12.505(a)(2)). In addition, the Contracting Officer has determined that the WTO GPA and all the Free Trade Agreements except the Bahrain FTA, NAFTA, and the Oman FTA apply to this acquisition. Therefore, the Buy American statute restrictions are waived for designated country construction materials other than Bahrainian, Mexican, or Omani construction materials.

* * * * *

■ 27. Amend section 52.225–21 by—

■ a. Revising the date of the clause;

■ b. In paragraph (a) in the definition ''Steel'' removing ''.02'' and adding ''0.02'' in its place;

■ c. Removing from paragraph (b)(4)(i)(B) ''6 percent'' and adding ''20 percent'' in its place;

■ d. Removing from paragraph (c) heading ''*Section*'' and adding ''*section*'' in its place; and

■ e. In paragraph (d):

■ i. Removing from the first undesignated paragraph following the table ''reponse'' and adding ''response'' in its place; and

■ ii Removing from the second undesignated paragraph following the table ''**Include*'' and adding ''*[*Include*'' in its place.

The revision reads as follows:

52.225–21 Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials.

* * * * *

Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials (Jan 2021)

Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials Under Trade Agreements (Jan 2021)

* * * * *

■ 30. Amend section 52.225–24 by—

■ a. Revising the date of the provision;

■ b. Removing from paragraph (b) ''offeror'' and adding ''Offeror'' in its place wherever it appears;

■ c. Removing from paragraph (c)(1)(ii) ''6 percent'' and adding ''20 percent'' in its place;

■ d. Removing from paragraph (c)(3) ''offeror'' and adding ''Offeror'' in its place; and

■ e. Removing from paragraphs (d)(1), (2), and (3) introductory text ''offeror'' and adding ''Offeror'' in their places, respectively.

The revision reads as follows:

52.225–24 Notice of Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials Under Trade Agreements.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Chapter 1

[Docket No. FAR–2021–0051, Sequence No. 1]

Federal Acquisition Regulation; Federal Acquisition Circular 2021–04; Small Entity Compliance Guide

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Small Entity Compliance Guide.

SUMMARY: This document is issued under the joint authority of DOD, GSA, and NASA. This *Small Entity Compliance Guide* has been prepared in accordance with section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996. It consists of a summary of the rule appearing in Federal Acquisition Circular (FAC) 2021–04, which amends the Federal Acquisition Regulation (FAR). Interested parties may obtain further information regarding this rule by referring to FAC 2021–04, which precedes this document.

DATES: January 19, 2021.

ADDRESSES: The FAC, including the SECG, is available via the internet at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Ms. Zenaida Delgado, Procurement Analyst, at 202–969–7207 or *zenaida.delgado@gsa.gov* for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat Division at 202–501–4755 or *GSARegSec@gsa.gov.* Please cite FAC 2021–04, FAR Case 2019–016. An asterisk (*) next to a rule indicates that a regulatory flexibility analysis has been prepared.

RULES LISTED IN FAC 2021–04

Subject	FAR case
* Maximizing Use of American-Made Goods, Products and Materials	2019–016

ADDRESSES: The FAC, including the SECG, is available via the internet at *https://www.regulations.gov.*

SUPPLEMENTARY INFORMATION: A summary for the FAR rule follows. For the actual revisions and/or amendments made by this FAR rule, refer to the specific subject set forth in the document following this summary. FAC 2021–04 amends the FAR as follows:

Maximizing Use of American-Made Goods, Products, and Materials (FAR Case 2019–016)

This final rule strengthens domestic preferences under the Buy American statute by making adjustments to the required percentage of domestic content and the existing percentages for the price evaluation preferences in an effort to decrease the amount of foreign-sourced content in a U.S. manufactured product to promote economic and national security, help stimulate economic growth, and create jobs. The price evaluation preferences increase from 6 percent to 20 percent for large business and from 12 percent to 30 percent for small business; for DoD procurements there is no change to the DoD 50 percent amount. The domestic content requirement for iron and steel increases from 50 percent to 95 percent; for other end products and construction materials, the domestic content requirement increases from 50 percent to 55 percent. Foreign iron and steel is iron or steel products that are not produced in the United States. The rule implements E.O. 13881, Maximizing Use of American-Made Goods, Products, and Materials. This final rule will not have a significant economic impact on a substantial number of small entities.

William F. Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Tax on Excess Tax-Exempt Organization Executive Compensation

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document sets forth final regulations under section 4960 of the Internal Revenue Code (Code), which imposes an excise tax on remuneration in excess of $1,000,000 and any excess parachute payment paid by an applicable tax-exempt organization to any covered employee. The regulations affect certain tax-exempt organizations and certain entities that are treated as related to those organizations.

DATES: *Effective Date:* These final regulations are effective on January 15, 2021.

Applicability Dates: For dates of applicability, see § 53.4960–6.

FOR FURTHER INFORMATION CONTACT: William McNally at (202) 317–5600 or Patrick Sternal at (202) 317–5800 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document amends the Foundation and Similar Excise Tax Regulations (26 CFR part 53) by adding final regulations under section 4960. Section 4960 was added to the Code by section 13602 of the Tax Cuts and Jobs Act, Public Law 115–97, 131 Stat. 2054, 2157 (TCJA). Section 4960(a) generally provides that an applicable tax-exempt organization (ATEO) that pays to a covered employee remuneration in excess of $1 million for a taxable year or any excess parachute payment is subject to an excise tax on the amount of the excess remuneration (as described in section IV of the Summary of Comments and Explanation of Revisions, titled ''Excess Remuneration'') plus excess parachute payments paid during that taxable year at a rate equal to the rate of tax imposed on corporations under section 11 (currently 21 percent). Section 4960 is effective for taxable years beginning after December 31, 2017.

An ATEO is defined in section 4960(c)(1) as any organization that for the taxable year is exempt from taxation under section 501(a) as well as certain other tax-exempt organizations. A covered employee is defined in section 4960(c)(2) as any employee (including any former employee) of an ATEO if the employee is one of the five highest-compensated employees of the organization for the taxable year or any preceding taxable year beginning after December 31, 2016. Section 4960(c)(4)(A) provides that remuneration paid to a covered employee by an ATEO includes any remuneration paid with respect to employment of such employee by any related person or governmental entity. Section 4960(c)(4)(B) defines a related person or governmental entity as an entity that controls, or is controlled by, the ATEO; is controlled by one or more persons that control the ATEO; or is a supported or supporting organization as described in sections 509(f)(3) and 509(a)(3), respectively. An excess parachute payment is defined in section 4960(c)(5)(A) as an amount equal to the excess of any parachute payment over the portion of the base amount (as described in section V.D. of the Summary of Comments and Explanation of Revisions, titled ''Three-Times-Base-Amount Test'') allocated to such payment; section 4960(c)(5)(B) defines a parachute payment as any payment in the nature of compensation to a covered employee if the payment is contingent on the employee's separation from employment with the employer and the aggregate present value of such payments exceeds 3-times the base amount.

On December 31, 2018, the Department of the Treasury (Treasury Department) and the Internal Revenue Service (IRS) issued Notice 2019–09 (2019–04 I.R.B. 403), setting forth initial guidance on the application of section 4960. On June 11, 2020, the Treasury Department and the IRS published proposed regulations on section 4960 in the **Federal Register** (REG–122345–18, 85 FR 35746) (the proposed regulations). The statutory provisions and the initial guidance provided by Notice 2019–09 are described in detail in the proposed regulations.

The Treasury Department and the IRS received written comments on the proposed regulations. No public hearing was requested or held. All written comments received in response to the proposed regulations are available at *www.regulations.gov* or upon request. Comments received that are outside of the scope of the proposed regulations generally are not addressed in this preamble but may be considered in connection with future guidance projects. After consideration of the relevant comments received, the proposed regulations under section 4960 are adopted as final regulations as modified by this Treasury Decision. The major areas of comment and the revisions to the proposed regulations are discussed in the Summary of Comments and Explanation of Revisions. With respect to provisions in the proposed regulations on which no comments were received or for which comments were received prior to the issuance of the proposed regulations, the preamble to the proposed regulations may provide additional information.

Summary of Comments and Explanation of Revisions

These final regulations provide guidance on the excise tax imposed by section 4960 and the entities that are subject to the tax.

I. Scope of Final Regulations

These final regulations retain the basic approach and structure of the proposed regulations, with certain revisions. These final regulations restate certain statutory definitions and define various terms set forth in section 4960. These final regulations also provide rules for determining: The amount of remuneration paid for a taxable year for purposes of identifying covered employees and calculating the excise tax; whether excess remuneration has been paid and in what amount; whether a parachute payment has been paid and in what amount; the allocation of liability for the excise tax among related organizations; and the date of applicability of these final regulations. These definitions and rules apply solely for purposes of section 4960.

II. Definitions

A. Applicable Tax-Exempt Organization

These final regulations adopt the definition of ''applicable tax-exempt organization'' or ''ATEO'' as set forth in the proposed regulations. Consistent with section 4960(c)(1), the proposed regulations provided that an ''applicable tax-exempt organization'' or ''ATEO'' includes an organization that is exempt from tax under section 501(a); is a farmers' cooperative organization described in section 521(b)(1); has income excluded from taxation under section 115(1); or is a political organization described in section 527(e)(1).

In response to comments on Notice 2019–09 regarding the applicability of the excise tax imposed by section 4960 to certain Federal instrumentalities, section II.A. of the Explanation of Provisions of the proposed regulations, titled ''Applicable Tax-Exempt Organization,'' stated that the Treasury

Department and the IRS consider all Federal instrumentalities described in section 501(c)(1) to be included in the statutory ATEO definition as an organization exempt from tax under section 501(a) and thus subject to section 4960. However, the Treasury Department and the IRS requested comments regarding the application of section 4960 to Federal instrumentalities. One commenter requested that these final regulations confirm that Federal instrumentalities described under section 501(c)(1)(A)(i), for which the enabling acts provide for exemption from all current and future Federal taxes are not subject to tax under section 4960. These final regulations do not address this issue but reserve § 53.4960–1(b)(3) and § 53.4960–4(a)(5) for future rules to address these Federal instrumentalities. The Treasury Department and the IRS will continue to consider whether section 4960 should apply to Federal instrumentalities for which the enabling acts provide for exemption from all current and future Federal taxes. Until further guidance is issued, a Federal instrumentality for which an enabling act provides for exemption from all current and future Federal taxes may treat itself as not subject to tax under section 4960 as an ATEO or related organization. However, if that Federal instrumentality is a related organization of an ATEO, remuneration it pays must be taken into account by that ATEO.

B. Applicable Year

Section 4960(a)(1) refers to remuneration paid ''for the taxable year,'' but does not specify which taxpayer's taxable year is referenced, what it means for remuneration to be paid ''for'' a taxable year, or how to measure remuneration if an ATEO and a related organization have different taxable years. The proposed regulations provided that remuneration is treated as paid for a taxable year if it is paid during the applicable year, and that the applicable year is defined as the calendar year ending with or within an ATEO's taxable year. The proposed regulations provided rules for determining the applicable year of an organization with respect to the taxable year in which the organization becomes an ATEO or ceases to be an ATEO, including rules addressing short applicable years that may arise in these situations and rules addressing related organizations with different taxable years. No comments were received on those proposed rules, and these final regulations adopt those rules without change.

C. Employee

Section 4960(a) imposes a tax on excess remuneration and any excess parachute payment paid by an ATEO for the taxable year with respect to employment of a covered employee. Section 4960(c)(2) defines a ''covered employee'' as an employee (including any former employee) of the ATEO who meets certain other conditions. Accordingly, the excise tax imposed by section 4960(a) applies only with respect to a current or former employee of the ATEO.

The proposed regulations defined ''employee'' by reference to the definition of ''employee'' for purposes of Federal income tax withholding in section 3401(c) and the regulations thereunder. Specifically, the proposed regulations cross-referenced the definition of ''employee'' in § 31.3401(c)–1, which includes common-law employees, officers or elected or appointed officials of governments, or agencies or instrumentalities thereof, and certain officers of corporations. The proposed regulations restated certain rules from § 31.3401(c)–1 that are particularly relevant to section 4960, including the rules that a member of a board of directors of a corporation is not an employee of the corporation (in the member's capacity as a director), and that an officer is an employee of the entity for which the officer serves as an officer (unless the officer performs no services or only minor services and neither receives, nor is entitled to receive, any remuneration for such services). For further discussion, see section II.E. of this Summary of Comments and Explanation of Revisions, titled ''Covered Employee.'' No comments were received on those proposed rules, and these final regulations adopt those provisions of the proposed regulations without change.

One commenter requested clarification regarding the source of the remuneration that is considered for purposes of applying the minor services exception to the rule that treats a corporation's officer as an employee. The minor services exception in Prop. § 53.4960–1(e)(1) incorporated the standard in § 31.3401(c)–1 and provided that ''an officer of a corporation who as such does not perform any services or performs only minor services and who neither receives, nor is entitled to receive, any remuneration is not considered to be an employee of the corporation solely due to the individual's status as an officer of the corporation.'' The commenter stated that it is unclear whether an individual qualifies for the exception if he or she receives remuneration from a related person or governmental entity for services performed for an organization other than the ATEO and also volunteers his or her time as an officer of the ATEO (and performs no services or only minor services for the ATEO). The commenter recommended that these final regulations clarify that the relevant remuneration for purposes of meeting the minor services exception is only remuneration paid by the ATEO. The minor services exception applies if an individual is not paid (nor is entitled to be paid) remuneration based ''solely'' on the individual's status as an officer. Thus, the source of the remuneration is not relevant, but rather the standard is whether the individual received any remuneration for the minor services as an officer regardless of the source of the remuneration. Therefore, the Treasury Department and the IRS have concluded that this clarification of the minor services exception in these final regulations is unnecessary.

For a discussion of how this definition of ''employee'' and other rules address employees of non-ATEO related organizations performing limited or temporary services for the related ATEO (in particular, while also receiving compensation from the non-ATEO related organization), see section II.E.5. of this Summary of Comments and Explanation of Revisions, titled ''Volunteer Services and Other Exceptions.''

D. Employer

Section 4960(b) provides that the employer is liable for the tax imposed under section 4960(a). Similar to the definition of ''employee,'' the proposed regulations defined ''employer'' by reference to the definition of ''employer'' for purposes of Federal income tax withholding in section 3401(d) and the regulations thereunder, without regard to the special rules in section 3401(d)(1) and (2). Accordingly, control of the payment of wages would not be relevant for determining whether an entity is the employer for section 4960 purposes. Further, the proposed regulations provided that a person or governmental entity does not avoid status as an employer of an employee by using a third-party payor to pay remuneration to that employee. Third-party payors include a payroll agent, an agent under section 3504, a common paymaster, a statutory employer under section 3401(d)(1), or a certified professional employer organization under section 7705 (which is an ''employer'' only for purposes of subtitle

C of the Code). Similarly, consistent with existing principles for determining the employer, under certain facts and circumstances, a management company may also be acting as a third-party payor for the employees of its ATEO client, rather than as the common law employer of the employees. Thus, the proposed regulations provided that remuneration that is paid to an individual by a separate organization for services the individual performed as an employee of the ATEO would be remuneration paid by the ATEO to its employee for purposes of section 4960, whether or not the separate organization is related to the ATEO. In addition, the proposed regulations provided that the sole owner of an entity that is disregarded as separate from its owner under § 301.7701–2(c)(2)(i) would be treated as the employer of any employee of the disregarded entity, notwithstanding that the entity is regarded for subtitle C purposes under § 301.7701–2(c)(2)(iv). No comments were received on these provisions of the proposed regulations, and these final regulations adopt them without change.

E. Covered Employee

1. In General

Section 4960(c)(2) defines ''covered employee'' as any individual who is one of the five highest-compensated employees of the ATEO for a taxable year or was a covered employee of the ATEO (or any predecessor) for any preceding taxable year beginning after December 31, 2016. Thus, once an employee is a covered employee of an ATEO, the employee continues to be a covered employee for all subsequent taxable years of that ATEO. The proposed regulations provided that whether an employee is one of the five highest-compensated employees of an ATEO is determined separately for each ATEO and not for an entire group of related organizations. As a result, a group of related ATEOs could have more than five ''five highest-compensated employees'' for a taxable year. Similarly, an employee could be a covered employee of more than one ATEO in a related group of organizations for a taxable year. No comments were received on these provisions of the proposed regulations, and these final regulations adopt them without change.

2. Aggregation of Remuneration Paid by the ATEO and Its Related Organizations for Purposes of Determining the Five Highest-Compensated Employees

For purposes of determining whether an employee is one of an ATEO's five highest-compensated employees for a taxable year, the proposed regulations provided that remuneration paid by the ATEO during the ATEO's applicable year is aggregated with remuneration paid by any related organization during the ATEO's applicable year, including remuneration paid by a related taxable organization or governmental entity, for services performed as an employee of that related organization. Remuneration for which a deduction is disallowed under section 162(m) generally is not considered for purposes of determining whether excess remuneration is paid for a taxable year, but that remuneration is considered for purposes of determining an ATEO's five highest-compensated employees.

One commenter suggested that, for purposes of determining an ATEO's five highest-compensated employees, these final regulations should consider only remuneration paid (directly or indirectly) by an ATEO for services provided by an employee to the ATEO, rather than aggregating all remuneration paid to the individual for services the individual provides as an employee of the ATEO and as an employee of any related organization, including a related non-ATEO (for example, a taxable organization). The commenter reasoned that aggregating remuneration for purposes of determining covered employee status is not required by the statutory text and is unnecessary to comply with Congressional intent to achieve parity between ATEOs and publicly held corporations that are subject to the section 162(m) deduction disallowance for compensation paid to a covered employee in excess of $1 million. The commenter also reasoned that because only an ATEO can have a ''covered employee'' under section 4960(c)(2), the reference to the ''five highest-compensated employees *of the organization*'' (emphasis in comment) in section 4960(c)(2)(A) should be read to include only compensation paid by the ATEO, directly or indirectly (for example, by reimbursing another entity), for services provided by the employee to the ATEO, regardless of the payor. The commenter asserted that the language in section 4960(c)(4)(A), which provides that ''remuneration *of a covered employee* by an [ATEO] shall include any remuneration paid with respect to employment of such employee by any related person or governmental entity'' (emphasis in comment) should not override a plain reading of section 4960(c)(2), which refers only to employment with the ATEO. The commenter further reasoned that section 4960(c)(4)(A) applies after a determination of the ATEO's covered employees has already been made, and thus it is circular to read section 4960(c)(4)(A) as requiring inclusion of remuneration paid to a covered employee of an ATEO by a related person or governmental entity for purposes of determining an ATEO's highest-compensated employees (and, thus, its covered employees).

While the Treasury Department and the IRS acknowledge that alternative interpretations as to whether sections 4960(c)(2) and (c)(4)(A) take into account remuneration paid by a related organization for purposes of determining an ATEO's covered employees may be reasonable, for the reasons set forth below, these final regulations adopt the relevant provisions of the proposed regulations without change and do not adopt the commenter's recommendation. Section 4960 does not define the ''five highest-compensated employees'' of an ATEO. The ambiguity in this term is highlighted by the fact that the only provision in the statute that references ''compensation'' is section 4960(c)(2), which defines ''covered employee'' as one of the ''5 highest compensated employees''; the statute otherwise uses the defined terms ''remuneration'' and ''parachute payment'' for purposes of determining the excise tax imposed by section 4960. In addition, there is no discussion in the legislative history describing how Congress intended an ATEO to determine its five highest-compensated employees. The Treasury Department and the IRS have concluded that the commenter's suggested interpretation—that only remuneration paid by the ATEO for services performed for the ATEO should be considered for purposes of determining who is a covered employee—would raise significant tax administration issues and the potential for abuse in circumstances in which an individual provides services to, and receives compensation from, the ATEO and one or more related organizations during the applicable year. In these cases, it may be difficult to determine the proper allocation of the compensation among the organizations to which the individual provides the services and whether the allocation was properly based on the value of the services provided. Due to the highly factual nature of this analysis and the potential for differing conclusions on one or more of these issues, the commenter's suggested rule would result in an unpredictable standard to be applied by taxpayers and the IRS and would raise the potential for abusive

mischaracterizations of the nature of the services and compensation provided.

The commenter further asserted that the requirement to aggregate compensation paid by the ATEO and all related organizations is not required to ensure parity with the rules for identifying covered employees under section 162(m). Under §§ 1.162–27(c)(2)(ii) and 1.162–33(c)(1)(ii)(B), the amount of compensation used to identify the covered employees who are the three most highly compensated executive officers (other than the principal executive officer and the principal financial officer) for the taxable year is determined pursuant to the executive compensation disclosure rules under the Securities Exchange Act of 1934. Under 17 CFR 229.402(a)(2), the amount of compensation paid to an employee by a publicly held corporation is measured by reference to remuneration paid by the registrant and remuneration paid by the registrant's subsidiaries, and is not limited to remuneration for services provided to the registrant. Although the provisions of sections 4960 and 162(m) are similar in many respects, there is no indication in the legislative history that sections 162(m) and 4960 are intended to apply in the same manner in all situations. Further, the section 162(m) and section 4960 statutory language and the application of the rules differ significantly in many respects that would not allow that strict parity. Regardless of the conclusion that the sections 162(m) and 4960 rules do not allow for strict parity, the Treasury Department and the IRS have concluded that the aggregation of compensation paid by all related entities in identifying covered employees is more analogous to the rules under section 162(m) than considering only remuneration for services provided to the ATEO.

Thus, while the Treasury Department and the IRS considered several alternatives for determining the ATEO's five highest-compensated employees, including the alternative proposed by the commenter, the Treasury Department and the IRS ultimately concluded that including remuneration paid by all related organizations is appropriate and that it is more administrable to use a single standard for identifying covered employees and computing the excise tax, if any, imposed by section 4960(a)(1). However, to mitigate the effect of requiring the aggregation of remuneration paid by an ATEO and all related organizations for purposes of determining the ATEO's covered employees, these final regulations retain the limited hours, nonexempt funds, and limited services exceptions (discussed in section II.E.5. of this Summary of Comments and Explanation of Revisions, titled ''Volunteer Services and Other Exceptions'').

3. Remuneration for Medical Services

Consistent with section 4960(c)(3)(B) and the proposed regulations, these final regulations provide that for purposes of identifying an ATEO's five highest-compensated employees for a taxable year, remuneration paid during the applicable year for medical services is not taken into account. For a discussion of the rules for determining the remuneration paid for medical or veterinary services and for allocating remuneration to medical and non-medical services, see section II.F. of this Summary of Comments and Explanation of Revisions, titled ''Medical Services.''

4. Covered Employee Status Continues for All Subsequent Taxable Years

In accordance with section 4960(c)(2), the proposed regulations provided that a covered employee includes any employee (including any former employee) of an ATEO who was a covered employee of the organization (or a predecessor) for any preceding taxable year beginning after December 31, 2016. In response to the proposed regulations, one commenter suggested that the Treasury Department and the IRS reconsider the rule that an individual who is a covered employee of an ATEO (or of a predecessor ATEO) for one taxable year remains a covered employee of that ATEO (and any successor ATEOs) for all subsequent taxable years. The commenter suggested that an ATEO should be relieved of the burden of continuing to include an employee among its covered employees when a consolidation or restructuring of a tax-exempt organization results in changes to the employee's job responsibilities and compensation, if it no longer furthers the purpose of the statute to include the employee among its covered employees. The commenter asserted that the requirement that an individual remain a covered employee for all subsequent years, even after the employment relationship has ended, creates a potentially excessive administrative burden for the ATEO. These final regulations do not adopt this suggestion because that rule would be inconsistent with the statutory language.

5. Volunteer Services and Other Exceptions

The proposed regulations provided certain exceptions to the definition of ''covered employee'' and the rules for identifying the five highest-compensated employees of an ATEO. Several commenters supported the inclusion of the exceptions provided in Prop. § 53.4960–1(d)(2)(ii), (iii), and (iv). These final regulations adopt these exceptions with certain modifications in response to comments as discussed later in this section.

The exceptions to the definition of ''covered employee'' in the proposed regulations were provided in response to comments on Notice 2019–09 expressing concern that the rules for identifying an ATEO's five highest-compensated employees in the notice would subject a non-ATEO to the excise tax on remuneration it pays to an employee who performs limited or temporary services for a related ATEO and who typically receives remuneration only from the non-ATEO. The exceptions were intended to ensure that certain employees of a related non-ATEO providing services as an employee of an ATEO are not treated as one of the five highest-compensated employees of the ATEO, and thus considered a covered employee, if certain conditions related to the individuals' remuneration or hours of service are met. To avoid manipulation of the rules through the deferral of compensation, in determining whether an employee is one of the five highest-compensated employees, the proposed regulations provided that a grant of a legally binding right to vested remuneration is considered to be remuneration paid, and any grant of a legally binding right to nonvested remuneration by the ATEO (or a related ATEO), for example under a deferred compensation plan or arrangement, disqualifies the ATEO from claiming a relevant exception. No comments were received on those proposed rules, and these final regulations adopt those rules without change.

a. No Remuneration and Non-Employment Exceptions

The proposed regulations provided that the remuneration paid to an individual who is never an employee of an ATEO is not considered for purposes of section 4960. For example, an individual who, under all the facts and circumstances, performs services for an ATEO solely as a bona fide independent contractor is not an employee of the ATEO, and thus is not considered for purposes of determining the ATEO's five highest-compensated employees. Similarly, an individual who, under all the facts and circumstances, performs services solely as a bona fide employee of a related organization, including a related organization that provides services to the ATEO, is not an

employee of the ATEO, and thus is not considered for purposes of determining the ATEO's five highest-compensated employees. No comments were received on those provisions of the proposed regulations, and these final regulations adopt them without change.

The proposed regulations further provided that, for purposes of determining an ATEO's five highest-compensated employees for a taxable year, an employee is disregarded if neither the ATEO nor any related organization pays remuneration or grants a legally binding right to nonvested remuneration for services the individual performed as an employee of the ATEO or any related organization. Thus, if none of an ATEO's employees received remuneration from the ATEO or from a related organization, then the ATEO has no covered employees. Benefits excluded from gross income are not considered remuneration, including expense allowances and reimbursements under an accountable plan (see § 1.62–2) and most insurance for liability arising from service with an ATEO, such as directors and officers liability insurance (see § 1.132–5(r)(3)). These final regulations adopt these provisions of the proposed regulations without change.

In section II.E.2. of the Explanation of Provisions of the proposed regulations, titled ''Volunteer Services and Similar Exceptions,'' the Treasury Department and the IRS requested comments on whether certain taxable benefits, such as employer-provided parking in excess of the value excluded under section 132, should be disregarded for purposes of determining whether an individual receives remuneration for services and what standards should apply to identify those benefits. No comments were received on this issue. Because taxable fringe benefits that are wages within the meaning of section 3401(a) are included in the statutory definition of remuneration, these final regulations adopt the provisions of the proposed regulations providing that these amounts are considered for purposes of determining an ATEO's five highest-compensated employees and for purposes of applying the exceptions from covered employee status. For a discussion of comments received on the exclusion of taxable fringe benefits from the definition of remuneration for purposes other than the determination of the five highest-compensated employees, see section III.A. of this Summary of Comments and Explanation of Revisions, titled ''In General'' under ''Remuneration.''

b. Limited Hours Exception

These final regulations adopt the ''limited hours'' exception as provided in the proposed regulations for purposes of determining an ATEO's five highest-compensated employees. Under this exception, an employee of an ATEO is disregarded for purposes of determining the ATEO's five highest-compensated employees for a taxable year if neither the ATEO nor any related ATEO pays remuneration or grants a legally binding right to nonvested remuneration to the employee for services performed for the ATEO and the employee performs only limited hours of service for the ATEO. For purposes of this exception, an ATEO is not treated as paying an amount paid to an individual by a related organization that employs the individual, so long as the ATEO does not reimburse the payor. An employee qualifies for this exception only if the hours of service the employee performs as an employee of the ATEO and all related ATEOs comprise 10 percent or less of the employee's total hours of service for the ATEO and all related organizations during the applicable year. For purposes of this rule, an employee who performs fewer than 100 hours of service as an employee of an ATEO (and all related ATEOs) during an applicable year is treated as having worked no more than 10 percent of the employee's total hours for the ATEO (and all related ATEOs).

One commenter recommended that these final regulations replace the 10 percent hours of service threshold in the limited hours exception with the 50 percent hours of service threshold that is used for the nonexempt funds exception (discussed later in this section) because the 10 percent threshold fails to capture many common arrangements between ATEOs and taxable related organizations controlled by the ATEO (''controlled taxable related organizations'') that are not structured to avoid the excise tax imposed by section 4960. These final regulations do not adopt this suggestion because the limited hours exception was intended to address arrangements in which services are sufficiently limited so that the arrangements resemble volunteer arrangements. This exception therefore has a much lower hours of service threshold than the nonexempt funds exception but may be used by a broader group of ATEOs. Further, the Treasury Department and the IRS have concluded that adopting the commenter's suggestion would be inconsistent with the legislative intent of section 4960. As explained in section II.E.2 of the Explanation of Provisions of the proposed regulations, titled ''Volunteer Services and Similar Exceptions,'' the legislative history indicates that Congress intended to tax excessive compensation paid to covered employees from tax-exempt funds.[1] Consistent with this intent, the proposed regulations provided a nonexempt funds exception, which applies if certain criteria are satisfied, but does not apply if an ATEO's controlled taxable related organization pays remuneration to an employee of the ATEO. The Treasury Department and the IRS reasoned that a controlled taxable related organization that pays remuneration to an employee for services provided to an ATEO uses the ATEO's funds to do so, either because the controlled taxable related organization's assets are, effectively, the ATEO's assets, or because the payment reduces the related organization's assets, which in turn reduces the value of the ATEO's interest in the related organization. The Treasury Department and the IRS consider the funds of an ATEO's controlled taxable related organization as, in substance, equivalent to tax-exempt funds, and thus the use of such funds to compensate an individual for services provided to an ATEO is in substance the use of tax-exempt funds.[2]

One commenter expressed concern about the ''cliff'' nature of the proposed limited hours exception (as well as the nonexempt funds and limited services exceptions), noting that exceeding the thresholds even slightly may result in the employee being a covered employee for the applicable year and all subsequent applicable years. The commenter recommended that these final regulations allow a 3-year (or longer) measurement period to qualify for the limited hours exception or the other exceptions, primarily to prevent the ATEO from inadvertently failing to satisfy the exception.

A 3-year measurement period would reduce the potential for inadvertent failures for an employer intending to be at or below the threshold for every applicable year. However, for an employer that intends to meet the limited hours exception during only one applicable year, the suggested 3-year standard would effectively raise the 10 percent hours of service limit to 30 percent and create a new ''cliff'' at that

[1] H. Rep. 115–409, 115th Cong., 1st Sess. 333 (Nov. 13, 2017).

[2] In a similar context, § 53.4958–4(a)(2) treats excessive compensation paid to a disqualified person with respect to an applicable tax-exempt organization by a controlled entity of the organization as excessive compensation paid by the organization, and thus as an excess benefit transaction.

30 percent threshold. In addition, permitting a 3-year measurement period would create additional complexity and burdens for taxpayer compliance and tax administration. For these reasons, the Treasury Department and the IRS do not adopt this suggestion. However, the modification to the nonexempt funds exception described later in this section, expanding the measurement period to two applicable years, is intended to address some of the commenter's concerns with respect to inadvertent failures to meet the requirements of the nonexempt funds exception.

Another commenter recommended that Example 5 in the provisions of the proposed regulations, which illustrated the application of the limited hours exception (Prop. § 53.4960–1(d)(3)(v)), be modified to eliminate from the facts that ATEO 5 does not control CORP 3, as control of another corporation by an ATEO is irrelevant for purposes determining whether the requirements of this exception are met, and thus irrelevant to the conclusion in that example. The commenter further suggested that this fact be moved to Example 8 in the proposed regulations, which illustrated the application of the separate nonexempt funds exception (Prop. § 53.4960–1(d)(3)(viii)), since control of another corporation by an ATEO is relevant for determining whether the requirements of that exception are met, and thus relevant to the conclusion in that example. The Treasury Department and the IRS agree with the commenter's suggestion, and modified Example 5 in these final regulations describing the limited hours exception (§ 53.4960–1(d)(3)(v)) accordingly. However, because of changes to the nonexempt funds exception as described later in this Summary of Comments and Explanation of Revisions, these final regulations replace Example 8 (§ 53.4960–1(d)(3)(viii)) with a new example.

c. Nonexempt Funds Exception

As previously discussed, the proposed regulations also provided a ''nonexempt funds'' exception for employees of a related non-ATEO organization who may perform a large portion of their overall services as an employee of the ATEO under certain circumstances. Under the nonexempt funds exception, an employee is disregarded for purposes of determining an ATEO's five highest-compensated employees for a taxable year provided that none of the ATEO, any related ATEO, or any controlled taxable related organization, pays the employee of the ATEO any remuneration or grants a legally binding right to nonvested remuneration to the employee. When applying these requirements for the nonexempt funds exception, the ATEO is not treated as paying remuneration that is paid by a related organization that also employs the individual, so long as the ATEO does not reimburse the payor. Further, to prevent indirect payment of remuneration by the ATEO, a related ATEO, or controlled taxable related organization, no related organization that paid remuneration to the individual may provide services for a fee to the ATEO, related ATEO, or any controlled taxable related organization.

To satisfy the nonexempt funds exception, the proposed regulations also stated that the employee must have provided services primarily to a taxable related organization or other non-ATEO (other than a controlled taxable related organization of the ATEO) during the applicable year. For this purpose, an employee is treated as having provided services primarily to the taxable related organization or other non-ATEO (other than a controlled taxable related organization of the ATEO) only if the employee provided services to the taxable related organization or other non-ATEO for more than 50 percent of the employee's total hours worked for the ATEO and all related organizations (including ATEOs) during the applicable year.

One commenter expressed concern that, for purposes of the nonexempt funds exception, the requirement limiting the employee's hours worked for the ATEO and all related ATEOs to not more than 50 percent of the total hours worked for the ATEO and all related organizations during an applicable year was too restrictive and may result in inadvertent failures. The Treasury Department and the IRS acknowledge the issues presented by this comment. These final regulations modify the exception by expanding the measurement period from one applicable year to two applicable years (that is, the current applicable year and the preceding applicable year are treated as a single measurement period) for purposes of determining whether an employee provided services to the ATEO and all related ATEOs for not more than 50 percent of the employee's total hours worked as an employee of the ATEO and all related organizations during the applicable year and the prior applicable year. This modification provides additional flexibility for situations in which an employee ''rotates'' to an ATEO for a period that extends longer than six months, or when an employee unexpectedly provides services beyond six months in an applicable year.

Another commenter recommended that the nonexempt funds exception be modified to prohibit the provision of services for a fee to a taxable entity only if the ATEO actually owns a controlling interest in the taxable entity, as opposed to being attributed the ownership interest under the section 318 attribution principles, which were incorporated into the definitions of a related organization and control. The commenter asserted that the related organizations requirement under the proposed nonexempt funds exception (Prop. § 53.4960–1(d)(2)(iii)(A)(3)), which incorporates the section 318 attribution principles, is unduly restrictive, and would have unintended results, as illustrated by the following example. An individual who is the sole shareholder of two taxable corporations (Corporation 1 and Corporation 2) also controls an ATEO (by having the power to appoint a majority of the ATEO's board of directors); Corporation 1 provides administrative services for a fee to Corporation 2; employee of Corporation 1 provides services only to Corporation 1 and does not provide any services to the ATEO. Under these facts, Corporation 2 is deemed to be controlled by the ATEO because, for purposes of determining whether an ATEO controls an organization under Prop. § 53.4960–1(i)(2)(vii)(B)(2), if a person controls an ATEO, the ATEO is treated as owning a percentage of the stock owned by that person in accordance with the percentage of directors of the ATEO that are controlled by that person. Because the related organizations requirement prohibits the payment of a fee by a related organization to a controlled taxable related organization for services performed by an employee of the controlled taxable related organization, and because Corporation 1 is providing services for a fee to Corporation 2, which is deemed to be controlled by the ATEO, no employee of Corporation 1 could meet the requirements of the proposed nonexempt funds exception. The commenter suggested that this result is inappropriate because the sharing of services between two taxable corporations in which an ATEO has no actual ownership interest would not circumvent the legislative intent of section 4960. The Treasury Department and the IRS agree with the commenter's recommendation. Accordingly, these final regulations modify the attribution rules as they apply for purposes of determining eligibility for the nonexempt funds exception by disregarding the application of downward attribution in applying

section 318(a)(3) to corporations and other entities and in applying section 318 principles to nonstock organizations. This modification applies only for purposes of applying the nonexempt funds exception and does not apply for purposes of determining whether an organization is a related organization generally.

d. Limited Services Exception

The proposed regulations provided a ''limited services'' exception, under which an employee is not considered for purposes of determining an ATEO's five highest-compensated employees for a taxable year if, during the applicable year, the ATEO paid less than 10 percent of the employee's total remuneration during the applicable year for services performed as an employee of the ATEO and all related organizations. However, if an employee would not be considered for purposes of determining the five highest-compensated employees of any ATEO in an ATEO's group of related organizations because no ATEO in the group paid at least 10 percent of the total remuneration paid by the group during the applicable year, then this exception does not apply to the ATEO that paid the employee the most remuneration during that applicable year. No comments were received on that proposed rule, and these final regulations retain that rule without change.

F. Medical Services

Section 4960(c)(3)(B) provides that remuneration for purposes of section 4960 does not include the portion of any remuneration paid to a licensed medical professional (including a veterinarian) that is for the performance of medical or veterinary services by such professional. Section 4960(c)(5)(C)(iii) provides a substantially similar exception from the definition of ''parachute payment.'' The proposed regulations provided rules relating to medical services and licensed medical professionals. No comments were received on those rules in the proposed regulations, and these final regulations adopt the rules in the proposed regulations without change. For further discussion of these rules, see section II.F. of the Explanation of Provisions of the proposed regulations, titled ''Medical Services.''

These final regulations also adopt the rule in the proposed regulations that a ''licensed medical professional'' is an individual who is licensed under state or local law to perform medical services. In addition to doctors, nurses, and veterinarians, a licensed medical professional generally would include dentists and nurse practitioners and may include other medical professionals, depending on the applicable state or local law. For a discussion of other issues related to remuneration for medical or veterinary services, including a rule for allocating remuneration received for a combination of medical and non-medical services, see section III.B. of this Summary of Comments and Explanation of Revisions, titled ''Remuneration Related to Medical Services.''

G. Predecessor Organization

Section 4960(c)(2)(B) provides that a covered employee includes any employee who was a covered employee of the ATEO (or any predecessor) for any preceding taxable year beginning after December 31, 2016. Because a covered employee, under section 4960(c)(2), must be (or have been) an employee of an ATEO, the predecessor must also have been an ATEO at the time the individual was employed by the predecessor to be a covered employee. Thus, an individual who is a covered employee of an ATEO (or of an ATEO predecessor of an ATEO) for one taxable year remains a covered employee of that ATEO (and any successor ATEOs) for subsequent taxable years.

The proposed regulations defined ''predecessor'' by reference to several enumerated categories of organizational changes, including acquisitions, mergers, other reorganizations, and changes in tax-exempt status. A predecessor ATEO ordinarily is an ATEO that has transferred, by any of several legal means, its assets and operations to another pre-existing or newly created ATEO (the successor of the predecessor ATEO). No comments were received with respect to the proposed rules. These final regulations adopt the definition of predecessor as provided in the proposed regulations without change. For further information concerning these rules, see section II.G. of the Explanation of Provisions of the proposed regulations, titled ''Predecessor Organization.''

H. Related Organization

Section 4960(c)(4)(A) provides that remuneration paid to a covered employee by an ATEO includes any remuneration paid with respect to employment of the employee by any related person or governmental entity,[3] and includes in the definition of ''remuneration'' any remuneration paid by the employer ATEO, related ATEOs, and related non-ATEOs (including taxable entities, nonprofit entities that are not ATEOs, and governmental entities that are not ATEOs). Section 4960(c)(4)(B) defines a ''related organization'' of an ATEO as a person or governmental entity that controls, or is controlled by, the ATEO; is controlled by one or more persons that control the ATEO; is a supported organization or a supporting organization (as defined in sections 509(f)(3) and 509(a)(3), respectively) during the taxable year of the ATEO, or, in the case of an ATEO that is a voluntary employees' beneficiary association described in section 501(c)(9) (VEBA), establishes, maintains, or makes contribution to the VEBA.

Section 4960(c)(4) does not define ''control'' for purposes of identifying related organizations. To determine which persons are related organizations under section 4960(c)(4)(B), the proposed regulations generally adopted the definition of ''control'' set forth in section 512(b)(13)(D) and § 1.512(b)–1(l)(4). Section II.H. of the Explanation of Provisions of the proposed regulations, titled ''Related Organization,'' explained that this standard (and its ''greater than 50 percent'' threshold) was intended to align the definition of ''related organization'' for purposes of section 4960 with the definition of ''related organization'' for purposes of the annual reporting requirements on Form 990, ''Return of Organization Exempt From Income Tax,'' and with other exempt organization control tests.

One commenter recommended that these final regulations instead define ''control'' based on the controlled group rules in section 414(b) and (c) and the regulations thereunder, which include an 80 percent control test. The commenter suggested that the section 414(b) and (c) controlled group test was more appropriate for a number of reasons: The purpose of section 414(b) and (c) is to treat related parties as a single employer (the same purpose as section 4960(c)(4)(C)), whereas the purpose of section 512(b)(13) is to tax abusive transactions; the regulations under section 512(b)(13) do not reflect statutory revisions; the control definition under section 512(b)(13) is overinclusive; and using the Form 990 test for control does not reduce administrative burdens because the Form 990 rules for identifying an ATEO's highest-compensated employees and calculating compensation differ significantly from the section 4960 rules.

[3] The proposed and final regulations refer to related persons and governmental entities collectively as related organizations.

These final regulations do not adopt the suggestion in this comment. Instead, these final regulations adopt the rules in the proposed regulations, which align the definition of control with the definition in the Form 990 instructions, which, in turn, is generally based on the section 512(b)(13) standards. The Treasury Department and the IRS have concluded that this definition of control is more appropriate and administrable because the Form 990 control definition and the section 512(b)(13) rules are familiar to and used by exempt organizations. Similarly, an 80 percent control threshold, while used in section 414(b) and (c), as well as in regulations under section 162(m), generally is not a standard used for purposes of tax administration related to exempt organizations, whereas the 50 percent control threshold is a control test familiar to exempt organizations. See, for example, the instructions to Form 990; §§ 1.509(a)–4(g)(1)(i); 1.509(a)–4(j)(1); 56.4911–7(b); 53.4941(d)–1(b)(5); 53.4943–3(b)(3)(ii); 53.4958–4(a)(2)(ii)(B); and 53.4968–3(b). In addition, section 509(a)(3) supporting organizations and their section 509(f)(3) supported organizations are defined as related organizations under section 4960(c)(4)(B); the adoption of an 80 percent control threshold would be incongruous with the lower standards of control for such organizations under § 1.509(a)–4 (particularly in the case of Type III supporting organizations, for which control is not required). Further, the legislative history states that the purpose for enacting section 4960 is to deter ''excessive compensation,'' [4] indicating an intent to deter arguably abusive practices, and the Treasury Department and the IRS have determined that use of a higher control threshold would allow potentially abusive compensation arrangements among organizations that are related to a lesser degree.[5] For these reasons, and the reasons set forth in section II.H. of the Explanation of Provisions of the proposed regulations, titled ''Related Organization,'' these final regulations adopt the rules regarding the overall definition of ''control'' in the proposed regulations without change.

To determine control of a nonstock organization, the proposed regulations provided rules similar to other regulations dealing with control of tax-exempt organizations (§§ 1.512(b)–1(l)(4)(i)(b), 53.4958–4(a)(2)(ii)(B)(1)(iii), and 1.414(c)–5(b)) [6] that provide that a person is considered to control a nonstock organization under either a ''removal power'' test or a ''representative'' test. No comments were received addressing the ''removal power'' test, and the final regulations adopt these rules from the proposed regulations without change. Comments were received on the ''representative'' test, and in particular the manner in which the proposed regulations would address certain situations involving ''accidental control.''

Under the representative test, a person or governmental entity generally controls a nonstock organization if more than 50 percent of the nonstock organization's directors or trustees are also trustees, directors, officers, agents, or employees of the person or governmental entity. Unlike the representative test in §§ 1.512(b)–1(l)(4)(i)(b), 53.4958–4(a)(2)(ii)(B)(1)(iii), and 1.414(c)–5(b), the proposed regulations expressly included an officer of the person or governmental entity as a representative for purposes of determining control of a nonstock organization.

In response to Notice 2019–09, a commenter raised the issue of ''accidental control'' presented by the representative test in which, for example, control of an organization by an employer may be found because a few lower-level employees of the employer serve on the board of directors of the organization. The proposed regulations addressed this issue by permitting a nonstock organization (or its putative controlling person or governmental entity) to qualify for an exception from control status if the employees of the person or governmental entity that are directors or trustees of the nonstock organization are not trustees, directors, officers, or employees with the powers of a director or officer, of the person or governmental entity and are not acting as representatives of the person or governmental entity in their service with the nonstock organization. A nonstock organization that relies on this exception must report its reliance on this exception on the applicable Form 990 and provide supporting details.

Another commenter on the proposed regulations stated that compliance with this exception to avoid ''accidental control'' under the representative test places additional reporting burdens on exempt organizations and recommended that these final regulations remove ''employees'' altogether from the list of deemed representatives and instead focus the representative test on the actual decision-makers in the organization. The commenter suggested that an expansive list of deemed representatives, including employees, is more justifiable with an 80 percent control threshold. These final regulations do not adopt the commenter's suggestions. The Treasury Department and the IRS have concluded that a rule that treats as non-officers any employees not defined as officers under the organization's organizing documents may be subject to abuse because employees frequently function as officers, even if they do not have that title. Further, a rule that treats any employee without the title of officer as a non-officer would be inconsistent with other Code provisions addressing exempt organizations, which generally treat as an officer any person with similar powers. See, for example, sections 4946(b)(1), 4955(f)(2)(A), 4958(f)(2), 4965(d)(1), and 4966(d)(3)(A). In addition, an employee of an organization (such as a department head) may serve *ex officio* on the board of another organization, and, in substance, serve in a representative capacity. Similarly, the facts of other arrangements in which an employee serves on another organization's board may demonstrate that the employee is serving as a representative of the employer. Finally, the percentage threshold of control is not necessarily relevant to the determination of whether the individual is serving in a representative capacity—an employer with less than a specific threshold percentage may still have reasons to have an employee represent its interests on another organization's board of directors. For these reasons, these final regulations adopt without change the representative rules in the proposed regulations.

The proposed regulations also addressed the status of foreign organizations as ATEOs, excluding them from ATEO status if described in section 4948(b) and the regulations thereunder. The Treasury Department and the IRS requested comments on whether a foreign related organization described in section 4948(b) should be exempt from tax imposed by section 4960(c)(4)(C) and, if so, whether remuneration paid by such an organization should nonetheless be taken into account for purposes of determining excess

[4] H. Rep. 115–409, supra, at 333.

[5] The imposition of excise tax under section 4960 is not determinative as to whether the remuneration paid to the covered employee is excessive or unreasonable compensation for purposes of sections 4941 or 4958. Similarly, there is no presumption, inference, or basis for concluding that remuneration paid to a covered employee that is not subject to excise tax under section 4960 is reasonable compensation for purposes of determining liability for excise tax under sections 4941 or 4958.

[6] See also the representative test in section 4911(f)(2)(B)(i) for determining affiliated organizations.

remuneration and allocating liability among the ATEO and related organizations that are subject to the excise tax imposed by section 4960. No comments were received on these issues. However, the Treasury Department and the IRS have concluded that it is appropriate to address these issues in these final regulations.

Chapter 42 of the Code applies generally to private foundations and other tax-exempt organizations and the excise taxes in chapter 42 generally are payable by exempt organizations and in some cases by persons associated with them. However, under section 4948(b), sections 507 and 508 and chapter 42 do not apply to a foreign organization that has not received substantial support (other than gross investment income) from United States sources. Section 509(d) defines support for purposes of chapter 42 as including gifts, gross receipts from an activity that is not an unrelated trade or business under section 513, net income from unrelated business activities, gross investment income, tax revenues levied for the benefit of the organization, and the value of services or facilities furnished by a governmental unit without charge—a breadth of items that support a tax-exempt organization. Section 4948(b) is thus concerned with foreign private foundations (including entities treated as private foundations for purposes of chapter 42) and other tax-exempt organizations that have received sufficient support from United States sources to warrant subjection to taxation and various prohibitions under chapter 42. Therefore, the Treasury Department and the IRS have determined that it is appropriate to exclude from taxation under section 4960 as a related organization any foreign organization that is both described in section 4948(b) and is either exempt from tax under section 501(a)[7] or a taxable private foundation.[8] Such organizations excluded from the excise tax imposed by section 4960 are referred to as ''section 4948(b) related organizations.''

While chapter 42 taxes are inapplicable to section 4948(b) related organizations, those organizations' activities that otherwise would have resulted in chapter 42 taxes may have other consequences. For example, section 4948(c) in certain circumstances imposes loss of exemption on an exempt organization described in section 4948(b) that engages in activities that would result in chapter 42 taxes for domestic organizations. Therefore, the Treasury Department and the IRS have determined that the remuneration paid to a covered employee of an ATEO by a section 4948(b) related organization must be taken into account by the ATEO and any related organizations subject to the excise tax imposed by section 4960 for purposes of determining an ATEO's (and related organizations') liability under section 4960 and the ATEO's five highest-compensated employees, even though the section 4948(b) related organization is not subject to the excise tax imposed by section 4960 on the excess remuneration that is otherwise allocable to that organization. These final regulations also clarify that for purposes of applying the exclusion from status as an ATEO or a related organization, whether the foreign organization meets the requirements of section 4948(b) is determined at the end of the organization's taxable year.

III. Remuneration

A. In General

Consistent with section 4960(c)(3)(A), the proposed regulations defined ''remuneration'' as wages under section 3401(a) (meaning generally amounts subject to Federal income tax withholding), but excluding designated Roth contributions under section 402A(c) and including amounts required to be included in gross income under section 457(f). Remuneration does not include certain retirement benefits, including payments that are contributions to or distributions from a trust described in section 401(a); payments under or to an annuity plan described in section 403(a) at the time of payment; payments described in section 402(h)(1) and (2) if, at the time of the payment, it is reasonable to believe that the employee will be entitled to an exclusion under that section for the payment; payments under an arrangement to which section 408(p) applies; or payments under or to an eligible deferred compensation plan described in section 457(b) and maintained by an eligible employer described in section 457(e)(1)(A) (governmental employer) at the time of payment. See section 3401(a)(12). Remuneration includes a parachute payment, but excess remuneration does not include a parachute payment that is an excess parachute payment. These final regulations adopt these rules provided in the proposed regulations without change.

One commenter recommended that, for purposes of computing the excise tax, section 4960(c)(4)(A) should be interpreted to include only remuneration related to the employment of an employee by an ATEO, which would include remuneration paid by a related person or related governmental entity with respect to an ATEO or by any other third party, but only if the payment related to the employee's employment by the ATEO. The commenter stated that this suggested interpretation would ensure that all remuneration with respect to a covered employee's employment by an ATEO, including remuneration paid by a related organization of an ATEO with respect to services performed for the ATEO, would be included in computing the tax under section 4960(a). The commenter asserted that the suggested interpretation would avoid the unintended result, caused by the proposed regulations, of subjecting to the excise tax remuneration that is paid by persons who are not ATEOs for an individual's services that are unrelated to an ATEO.

The Treasury Department and the IRS have concluded that the more natural reading of the statute is that remuneration paid to a covered employee of an ATEO includes remuneration paid by a related organization with respect to services performed as an employee for the related organization. In addition, adoption of the commenter's suggestion could raise the potential for abuse because it relies on an ability to identify the specific recipient of services that an employee provides to multiple entities and determine the relative value of the services or allocate the compensation to the entities under a reasonable allocation method. Specifically, given the facts and circumstances analysis that in many cases may be difficult and burdensome to administer, adoption of the suggestion could provide an opening for related taxpayers to coordinate their activities to mischaracterize the employer of an individual with respect to some or all services provided to a related organization, or to misallocate portions of the total remuneration paid by the related taxpayers to the individual as paid for services provided as an employee of a related organization, so that all the related entities avoid any liability under section 4960 while still providing what would otherwise be excess remuneration to the individual as an employee of an ATEO. While this type of identification and allocation may be needed for other tax purposes, including in some cases the

[7] Some types of exempt organizations are limited to domestic organizations, such as section 501(c)(10) fraternal organizations.

[8] A private foundation that loses its exemption under section 501(c)(3) remains a taxable private foundation until its private foundation status is terminated under section 507. See sections 509(b) and 4940(b).

allocation of liability under section 4960, those applications do not involve a situation such as this in which all the entities may benefit from the mischaracterizations through the avoidance of the potential liability. Thus, the interpretation provided in these final regulations also is consistent with the exercise of authority in section 4960(d) to prevent avoidance of the tax imposed by section 4960 by providing compensation through a third party. Further, adoption of the commenter's suggestion could raise issues regarding the role of section 4960(c)(6), the statutory provision coordinating the application of section 162(m) and section 4960, given the impact that adoption of the suggestion would have on the scope of circumstances to which that provision may apply. For these reasons, these final regulations do not limit the application of section 4960(c)(4)(A) to remuneration paid solely with respect to employment by an ATEO or for services provided to an ATEO, as suggested by the commenter.

The commenter also suggested that these final regulations not treat remuneration paid by a related organization as paid by the ATEO if a covered employee is not employed by an ATEO at any time during an applicable year. For example, in circumstances in which a covered employee of an ATEO performs services for a related non-ATEO but provides no services for the ATEO during an applicable year, the commenter suggested that compensation for those services not be treated as remuneration under section 4960. These final regulations do not adopt this suggestion. Section 4960(c)(2)(B) provides that once an individual is a covered employee of an ATEO (or any predecessor), the employee remains a covered employee for all subsequent years. Section 4960(c)(4)(A) provides that ''remuneration of a covered employee by an [ATEO]'' includes ''any remuneration paid with respect to employment of such employee by any related person or governmental entity.'' The Treasury Department and the IRS have concluded that the better interpretation of section 4960(c)(2)(B) and (c)(4)(A), when read together, is that compensation paid to a covered employee by a related organization during an applicable year is remuneration for purposes of section 4960, even if the covered employee does not perform services as an employee of the ATEO during the applicable year. In addition, the commenter's suggestion also raises administrability issues similar to those that would arise if only remuneration for services provided to the ATEO were taken into account. If an employee provides services to different members of a group of related organizations from year to year, it may be difficult to determine what remuneration is allocable to services provided to each group member. Therefore, the commenter's suggestion would be similarly difficult and burdensome to administer and could raise the potential for abuse.

The same commenter also suggested that these final regulations apply the substance of the limited hours and nonexempt funds exceptions for purposes of determining remuneration paid. These final regulations do not adopt this suggestion because the Treasury Department and the IRS have concluded that the statute does not provide the authority to apply these exceptions to the definition of remuneration. The statute does not define compensation for purposes of identifying the five highest-compensated employees, and thus the statute permits flexibility in the rules for determining the five highest-compensated employees. In contrast, section 4960(c)(3)(A) defines remuneration as wages within the meaning of section 3401(a) (with certain specified modifications) paid by an ATEO and section 4960(c)(4)(A) provides that ''remuneration of a covered employee by an [ATEO] shall include any remuneration paid with respect to employment of such employee by any related person or governmental entity.'' These statutory provisions do not provide the flexibility to adopt the commenter's suggestion to include the exceptions applicable to the determination of a covered employee in the definition of remuneration.

Another commenter requested that these final regulations limit the scope of the definition of remuneration to include only regular employee wages, as defined in section 3401(a), and to exclude taxable fringe benefits from the section 4960 definition of remuneration. The commenter asserted that certain taxable fringe benefits, such as paid parking above the excludable limit and reimbursement of childcare expenses, are not the type of remuneration that was intended to be taxed under section 4960. The commenter further suggested that the inclusion of taxable fringe benefits in remuneration would have an adverse effect on certain employers' ability to attract and retain key employees. These final regulations do not adopt this commenter's suggestion because it would be inconsistent with the statutory provisions. Section 4960(c)(3)(A) defines remuneration as amounts that are ''wages'' within the meaning of section 3401(a). Section 3401(a) defines ''wages'' as all remuneration for services performed by an employee for his employer, including the cash value of all remuneration (including benefits) paid in any medium other than cash, with certain specific exclusions. Taxable fringe benefits, including parking above the excludable limit and reimbursement of childcare expenses, are not excluded from wages under section 3401(a). In addition, section 4960(c)(3) specifically excludes other type of wages, such as designated Roth contributions and remuneration for medical services, indicating a legislative intent for all other types of wages to be included. For these reasons, the Treasury Department and the IRS have determined that providing further exclusions such as those suggested would be inconsistent with the statute and these final regulations do not adopt this suggestion.

The proposed regulations clarified that remuneration includes any amount includible in gross income as compensation under section 7872 and the regulations thereunder. For example, under § 1.7872–15(e)(1)(i), a below-market split-dollar loan between an employer and employee generally is treated as a compensation-related loan, and thus any imputed transfer from the employer to the employee generally is a payment of compensation. Although section 7872(f)(9) provides that no amount shall be withheld under chapter 24 of the Code with respect to any amount treated as transferred or retransferred under section 7872(a) or received under section 7872(b), those amounts are ''remuneration . . . for services performed by an employee for his employer'' within the meaning of section 3401(a) and are not specifically excluded from wages under section 3401(a). Thus, those amounts are remuneration as defined in section 4960(c)(3)(A). ATEOs that are private foundations or section 509(a)(3) supporting organizations should consider, before entering into these arrangements, that loans (including transactions treated as loans for Federal tax purposes, such as split-dollar arrangements) to certain employees may constitute an act of self-dealing under section 4941 or an excess benefit transaction under section 4958(c)(3).

A commenter recommended that these final regulations, or alternatively the preamble to these final regulations, confirm that remuneration does not include amounts that are not includible in gross income pursuant to the $10,000 de minimis exception under section 7872(c)(3). Under that exception, the

foregone interest attributable to any day on which the aggregate outstanding amount of loans between the borrower and lender does not exceed $10,000 is not includible in gross income. These final regulations adopt the commenter's suggestion and clarify that, in accordance with section 7872, these de minimis amounts are not remuneration for purposes of section 4960. Other than this comment that resulted in this clarification, no further comments were received on those provisions of the proposed regulations, and these final regulations adopt them without further changes.

B. Remuneration Related to Medical Services

Remuneration that is paid to a licensed medical professional for medical services is excluded from the definition of ''remuneration'' for purposes of section 4960. (See section II.F. of the Summary of Comments and Explanation of Revisions, titled ''Medical Services,'' for a further discussion of the scope of this exception.) When an employer pays remuneration to an employee for both medical services (including related services, such as medical recordkeeping) and other services, the employer must allocate that remuneration between remuneration paid for medical services or for other services. These final regulations adopt the proposed regulations, with minor clarifications, and permit taxpayers to use a reasonable, good faith method to allocate remuneration between these two categories of services. For this purpose, taxpayers may rely on a reasonable allocation set forth in an employment agreement allocating remuneration between medical services and other services. If some or all of the remuneration is not reasonably allocated in an employment agreement, taxpayers must use another reasonable method of allocation. For example, allocating remuneration to medical services based on the portion of the total hours the employee worked for the employer providing medical services (determined based on records such as patient, insurance, Medicare/Medicaid billing records, or internal time reporting mechanisms) would be a reasonable method.

In section III.B. of the Explanation of Provisions of the proposed regulations, titled ''Remuneration Related to Medical Services,'' the Treasury Department and the IRS requested comments on other reasonable methods of allocating remuneration between medical services and other services. One commenter recommended that an employer be permitted to make a reasonable, good faith allocation between remuneration for providing medical services and remuneration for providing nonmedical services, not only with respect to current remuneration but also with respect to contributions and earnings under a deferred compensation plan. These final regulations adopt this recommendation and clarify that an employer may make a reasonable, good faith allocation between remuneration for medical and nonmedical services, regardless of the form of compensation, and that an employer may apply the same principles with respect to contributions and earnings under a deferred compensation plan.

C. When Remuneration Is Treated as Paid

The proposed regulations addressed when remuneration is treated as paid for purposes of section 4960. The flush language at the end of section 4960(a) provides that, for purposes of section 4960(a), remuneration is treated as paid when there is no substantial risk of forfeiture of the rights to the remuneration within the meaning of section 457(f)(3)(B). Although section 4960(a) cross-references the definition of ''substantial risk of forfeiture'' in section 457(f)(3)(B), the rule under section 4960(a) providing that remuneration is treated as paid when there is no substantial risk of forfeiture of the rights to the remuneration is neither limited to remuneration that is otherwise subject to section 457(f) nor limited to amounts paid pursuant to a nonqualified deferred compensation arrangement. The proposed regulations provided that, for purposes of section 4960(a), all forms of remuneration except for ''regular wages'' as described in the next paragraph are treated as paid when the remuneration is not subject to a substantial risk of forfeiture. These final regulations adopt this payment timing rule provided in the proposed regulations with certain modifications, as discussed in further detail in this section.

To clarify when remuneration that is never subject to a substantial risk of forfeiture is treated as paid, the proposed regulations provided that remuneration that is a ''regular wage'' within the meaning of § 31.3402(g)–1(a)(ii) is treated as paid at the time of actual or constructive payment. A ''regular wage'' is defined in § 31.3402(g)–1(a)(ii) as remuneration ''paid at a regular hourly, daily, or similar periodic rate (and not an overtime rate) for the current payroll period or at a predetermined fixed determinable amount for the current payroll period.'' These final regulations adopt these rules provided in the proposed regulations without change. Because the final regulations provide that remuneration that is a regular wage within the meaning of § 31.3402(g)–1(a)(1)(ii) is treated as paid when actually or constructively paid, an employer will not need to determine amounts of regular wages that vested in the preceding year for purposes of section 4960. For example, if a pay period begins December 25, 2022, and ends January 7, 2023, and the salary for that period is not actually paid until January 14, 2023, then the salary for the pay period is treated as paid in 2023, and the employer need not treat any amount as remuneration paid in 2022 due to vesting in 2022.

The proposed regulations treated an amount that is not regular wages as paid when it is no longer subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B) and referred to such an amount as ''vested.'' The Treasury Department and the IRS issued proposed regulations under section 457(f) in 2016 (81 FR 40548 (June 22, 2016)), upon which taxpayers may rely for periods before the applicability date of the final section 457(f) regulations. Under Prop. § 1.457–12(e)(1), an amount of compensation is subject to a substantial risk of forfeiture only if entitlement to the amount is conditioned on the future performance of substantial services, or upon the occurrence of a condition that is related to a purpose of the compensation if the possibility of forfeiture is substantial. See Prop. § 1.457–12(e)(3) for examples of the rules relating to substantial risk forfeiture. These final regulations adopt the rules provided in the proposed regulations, including the definition of ''substantial risk of forfeiture'' in Prop. § 1.457–12(e)(1). Any changes to the proposed regulations under section 457(f) when finalized will be considered for purposes of section 4960, and further guidance may be issued, if appropriate, including any transition guidance that may be needed to take into account periods before and after the applicability date of the definition of substantial risk of forfeiture under the final section 457(f) regulations.

In section III.C. of the Explanation of Provisions of the proposed regulations, titled ''When Remuneration Is Treated as Paid,'' the Treasury Department and the IRS invited comments regarding any burdens that could be avoided through a short-term deferral rule and how such a rule could be designed to avoid permitting inappropriate avoidance of the tax. One commenter recommended that these final regulations extend the

rule for ''regular wages'' as defined in § 31.3402(g)–1(a) to amounts that are not treated as deferred compensation under § 1.409A–1(b)(4) or Prop. § 1.457–12(d)(2) because such amounts are paid within the ''short-term deferral'' period. The commenter suggested that other remuneration that falls outside the definition of ''regular wages'' be treated as remuneration when actually or constructively paid, including benefits under bona fide severance pay plans and death and disability plans, as well as annual bonuses, long-term incentive pay, business expense reimbursements, and noncash fringe benefits. The commenter noted that such amounts are treated as wages for other reporting purposes, including Federal Insurance Contributions Act (FICA) wage reporting, when actually or constructively paid, and thus the rules under the proposed regulations result in a timing mismatch. The commenter asserted that this recommendation would substantially reduce the administrative burden and potential for errors created by the broad timing rule in the proposed regulations, yet affect a limited range of remuneration.

Another commenter recommended that these final regulations provide that the short-term deferral exception to the definition of deferred compensation for section 457(f) apply to section 4960 such that the year of inclusion for income tax purposes matches the year of inclusion for section 4960 purposes. The commenter interpreted the statutory reference to wages under section 3401(a) and amounts included in income under section 457(f) as providing not only a substantive rule but also a timing rule, meaning the amount must either be wages within the meaning of section 3401(a) paid during that year or be an amount included in income under section 457(f) during that year in order to be treated as remuneration paid in that year. According to the commenter, since amounts that meet the definition of a short-term deferral for purposes of section 457(f) are neither wages under section 3401(a) nor includible in income under section 457(f) in the year of vesting, those amounts should be treated as remuneration for purposes of section 4960 only in the year actually paid.

Further, the commenter noted that applying a short-term deferral rule would simplify administration for employers because the determination of remuneration would more closely track the determination of wages for Form W–2, ''Wage and Tax Statement,'' reporting. The commenter acknowledged the concern stated in section III.C. of the Explanation of Provisions of the proposed regulations, titled ''When Remuneration Is Treated as Paid,'' that a short-term deferral rule would permit an ATEO to select the year in which remuneration would be subject to tax under section 4960, but observed that an individual may become a covered employee during the section 457(f) short-term deferral period after the year of vesting, and thus the proposed rule could actually result in amounts not being subject to the excise tax. The commenter also observed that treating short-term deferrals as remuneration in the year of vesting requires that those amounts be present-valued and that earnings be included in remuneration in the subsequent year, resulting in additional complexity for ATEOs. Finally, the commenter suggested that an employer be permitted to include an amount in remuneration in the year of vesting or include the amount in the year of payment, as is permitted for FICA tax purposes under § 31.3121(v)(2)–1(b)(3)(iii), and require that employers apply consistent treatment of amounts with respect to its selection of the timing of FICA taxation of short-term deferrals and timing of the treatment as remuneration for purposes of section 4960.

These final regulations do not adopt the commenter's suggestions to apply a ''short-term deferral'' rule. Rather, these final regulations adopt the applicable provisions of the proposed regulations without change. Under section 4960(c)(3), an amount must either be wages under section 3401(a) or be includible in income under section 457(f) in order to be remuneration under section 4960. However, the rules under section 4960(c)(3) determine whether an amount is remuneration, not when the remuneration is considered to be paid. The flush language at the end of section 4960(a) provides that, for purposes of section 4960(a), remuneration is treated as paid when there is no substantial risk of forfeiture, as defined in section 457(f)(3)(B), of the rights to the remuneration. Section 3401(a) primarily focuses on whether, not when, amounts are includible in wages; the basic timing rule for wage inclusion appears in regulations under section 3402(a), not section 3401(a). Specifically, § 31.3402(a)–1(b) provides that wages are paid when actually or constructively paid and explains what it means for an amount to be constructively paid. Thus, the cross-reference to section 3401(a) (and not section 3402(a)) in section 4960(c)(3) establishes the scope of the term ''remuneration'' without regard to timing, but the flush language in section 4960(a) establishes the timing rule that applies to all forms of remuneration. In addition to being inconsistent with the statutory language addressing the timing of the payment of remuneration, allowing a short-term deferral rule similar to the rule in § 1.409A–1(b)(4) and Prop. § 1.457–12(d)(2) could permit an employer to determine the taxable year in which the amount is treated as paid, which could be used not only to manipulate the application of section 4960(a) to the remuneration paid, but also to manipulate the identification of covered employees.

This application of the statutory language results in circumstances in which the amount of remuneration paid for purposes of section 4960 is not the same as the amount reported in any box on Form W–2 for an applicable year. However, as described later in this section, these final regulations address the administrative burden of calculating the present value of vested but unpaid amounts by expanding the ability to include at vesting the full amount that is to be paid in circumstances in which there is a short delay between vesting and payment.

These final regulations adopt the rule set forth in the proposed regulations that provided that an amount of remuneration treated as paid generally is the present value of the remuneration on the date on which the covered employee vests in the right to payment of the remuneration. The employer must determine the present value using reasonable actuarial assumptions regarding the amount, time, and probability that the payment will be made. These final regulations do not provide rules for the determination of present value. However, an employer may determine the present value using the rules set forth in Prop. § 1.457–12(c)(1). The Treasury Department and the IRS anticipate that final regulations addressing the determination of present value for purposes of section 4960 will be issued when final regulations under section 457(f) are issued. Until actually or constructively paid or otherwise includible in gross income of the employee, any amount treated as paid at vesting is referred to as ''previously paid remuneration.''

To reduce the administrative burden of determining the present value of remuneration in certain circumstances that would involve minimal discounting, these final regulations adopt the rule provided in the proposed regulations that the employer may treat the entire amount to be paid on a future date (without making a present valuation determination) as the present value on the date of vesting. However, these final regulations do not limit the

application of this rule to amounts that are paid under a nonaccount balance plan described in § 1.409A–1(c)(2)(i)(C), but instead this rule applies to any vested amount that is scheduled to be paid within 90 days. For example, an employer is not required to discount an annual bonus of $10,000 that vests on December 31, 2022, and is scheduled to be paid on February 15, 2023, to reflect the delay in actual payment, but instead may treat $10,000 as remuneration paid in 2022.

D. Earnings and Losses

These final regulations generally adopt the proposed regulations and provide specific rules for the treatment of earnings and losses on previously paid remuneration. In general, these rules are intended to minimize administrative burdens in determining the amount of earnings and losses treated as paid for an applicable year, as well as in determining the amount of earnings and losses across multiple compensation arrangements.

The proposed regulations provided that net earnings on previously paid remuneration are treated as vested (and therefore paid) on the last day of the applicable year in which they are accrued unless otherwise actually or constructively paid before that date. For example, the present value of vested remuneration accrued to an employee's account under an account balance plan described in § 1.409A–1(c)(2)(i)(A) (under which the earnings and losses attributed to the account are based solely on a predetermined actual investment or a reasonable market interest rate) is treated as paid on the date accrued to the employee's account and, until subsequently actually or constructively paid, is treated as previously paid remuneration. In addition, at the end of each applicable year in which there is previously paid remuneration remaining in the covered employee's account balance, the present value of any net earnings accrued on that previously paid remuneration (the increase in present value due to the application of a predetermined actual investment or a reasonable market interest rate) is treated as remuneration paid in that applicable year. This remuneration is then treated as previously paid remuneration for subsequent applicable years until actually or constructively paid.

Similarly, the proposed regulations provided that the present value of a vested, fixed amount of remuneration under a nonaccount balance plan described in § 1.409A–1(c)(2)(i)(C) is treated as paid on the date of vesting and subsequently treated as previously paid remuneration until actually or constructively paid. In addition, at the end of each applicable year in which previously paid remuneration remains as part of the covered employee's benefit under the plan, the net increase in the present value of that amount during the year due solely to the passage of time constitutes earnings and is treated as remuneration paid. For this purpose, earnings and losses from one plan or arrangement are aggregated with earnings and losses from any other plan or arrangement in which the employee participates that is provided by the same employer (but not across arrangements provided by related but separate employers). For purposes of determining earnings and losses, previously paid remuneration under a plan or arrangement is reduced by the amount actually or constructively paid under the plan or arrangement. These final regulations further illustrate the operation of these rules through examples.

One commenter recommended that these final regulations permit, but not require, related employers to determine net earnings on previously paid remuneration on an aggregate basis by treating all earnings and losses on the previously paid remuneration of related employers as paid by the ATEO. The commenter explained that in groups of related taxable and tax-exempt organizations, related organizations often provide separate deferred compensation plans to their employees. Therefore, an individual employee who works (or has worked) for multiple related employers might have several deferred compensation plans, which often differ considerably, with some being nonaccount balance plans and others being account balance plans that may offer very different investment options. As a result, an individual employee might accrue significant earnings in a year under some deferred compensation plans but incur significant losses in others. The commenter therefore suggested that these final regulations permit aggregation of losses with earnings among related employers to avoid the inappropriate inflation of remuneration in certain circumstances. Any concerns about manipulation due to permitting aggregation could be addressed by requiring employers to aggregate (or not aggregate) earnings and losses consistently from year to year, with changes allowed only infrequently—for example, every 3 years—unless in response to changes in the composition of the group of related organizations.

These final regulations do not adopt the commenter's suggestion to permit the aggregation of earnings and losses among related organizations. The commenter's suggestions would be feasible among related organizations only if they agreed to either aggregate or disaggregate arrangements as to all employees and also to coordinate and integrate their remuneration calculations across the separate plans and arrangements that each employer established to permit timely and accurate calculations for each covered employee (and employees that may become covered employees) who participated in more than one employer arrangement. Even if this was feasible for a particular year, the regulatory framework would need to account for the entry and departure of members of the group of related organizations and how the aggregation or disaggregation would account for those events. This regime would be complex and burdensome for taxpayers and the IRS to administer and is not warranted due to the limited potential benefits. In addition, the aggregation of earnings and losses across related employers would implicate the statutory allocation of the liability for the tax on excess remuneration under section 4960(c)(4)(C), since the aggregation of earnings and losses would impact the relative remuneration paid by the separate employers.

E. Request for a Grandfathering Rule

One commenter suggested that these final regulations provide for grandfathering of employee remuneration contracts executed on or before November 2, 2017, so that amounts paid under such contracts would not be treated as remuneration for purposes of section 4960. The commenter reasoned that the grandfathering of employee remuneration contracts executed on or before November 2, 2017, would help certain employers in overcoming challenges in hiring executives, and that the legislative history of the TCJA failed to consider the differences between tax-exempt employers and their taxable counterparts. The final regulations do not adopt the commenter's suggested rule. Section 13602(c) of TCJA, which added section 4960 to the Code, did not provide for a grandfathering rule and there is no indication in the legislative history that Congress intended that one be adopted by regulation. In contrast, section 13601 of TCJA amended section 162(m) of the Code and provided an explicit grandfathering rule. Under these circumstances, the Treasury Department and the IRS do not find it appropriate to provide a grandfathering rule. However, these final regulations

provide rules that have the effect of grandfathering remuneration that vested before the taxpayer's first taxable year beginning after December 31, 2017.

Section III.E. of the Explanation of Provisions of the proposed regulations, titled ''Request for a Grandfather Rule,'' explained that one of the consequences of treating remuneration as paid at the time the remuneration vests is that any remuneration that vested prior to the first day of the first taxable year of the ATEO beginning after December 31, 2017, is not considered remuneration for purposes of section 4960. One commenter recommended that the Treasury Department and the IRS explicitly reflect this rule in these final regulations. In response to this comment, these final regulations provide that any vested remuneration, including vested but unpaid earnings accrued on deferred amounts, that is treated as paid before the effective date of section 4960 (January 1, 2018, for a calendar year employer) is not subject to the excise tax imposed under section 4960(a)(1). All earnings on those vested amounts that accrue or vest after the effective date, however, are treated as remuneration paid for purposes of section 4960(a)(1).

Similarly, for an employee who has vested compensation from years prior to the taxable year in which the employee first became a covered employee, these final regulations adopt the rule in the proposed regulations providing that vested remuneration (including vested but unpaid earnings) that would have been treated as remuneration paid for a taxable year before the taxable year in which an employee first became a covered employee under section 4960 is not remuneration subject to the excise tax imposed by section 4960(a)(1) for the first taxable year in which the employee becomes a covered employee or any subsequent year. However, subsequent earnings that accrue on those vested amounts when the employee is a covered employee are treated as remuneration paid for purposes of section 4960(a)(1).

F. Remuneration Paid to a Covered Employee for Which a Deduction Is Disallowed Under Section 162(m)

Section 4960(c)(6) provides that remuneration for which a deduction is disallowed under section 162(m) is not taken into account for purposes of section 4960. Thus, remuneration that is paid to a covered employee of an ATEO who is also a covered employee of a related ''publicly held corporation'' or an applicable individual of a related ''covered health insurance provider'' (as defined in section 162(m)(2) and (m)(6)(C), respectively), for which a deduction is disallowed under section 162(m), generally is not treated as remuneration for purposes of determining whether remuneration has been paid. However, that remuneration is taken into account for purposes of determining the ATEO's five highest-compensated employees. See section II.E. of this Summary of Comments and Explanation of Revisions, titled ''Covered Employee.''

As discussed in section III.F. of the Explanation of Provisions of the proposed regulations, titled ''Remuneration Paid to a Covered Employee for Which a Deduction Is Disallowed Under Section 162(m),'' the application of this provision raises significant issues stemming largely from the difference in timing between the payment of remuneration under section 4960 (when the right to the amount vests), and the availability of a deduction that may be restricted by section 162(m) (generally when the amount is paid). Section III.F. of the Explanation of Provisions of the proposed regulations, titled ''Remuneration Paid to a Covered Employee for Which a Deduction Is Disallowed Under Section 162(m),'' described two possible approaches for addressing these circumstances and requested comments on those approaches. The Treasury Department and the IRS continue to consider the issues raised by this provision in section 4960(c)(6) requiring coordination with section 162(m), including the comments submitted, but have not yet determined the appropriate manner of implementation. Accordingly, these final regulations do not address the coordination of sections 4960 and 162(m) in these circumstances, but instead reserve a section of these final regulations as a place for future guidance.

Until that future guidance is issued, taxpayers may use a reasonable, good faith approach with respect to the coordination of sections 4960 and 162(m) in circumstances in which it is not known whether a deduction for the remuneration will be disallowed under section 162(m) by the due date (including any extension) of the relevant Form 4720. For this purpose, a reasonable, good faith approach must have a reasonable basis for anticipating that the compensation that a particular employee will be paid in the future may be subject to the deduction limitations of section 162(m). For example, it is not reasonable for this purpose to anticipate that an ATEO may become a public corporation by the date the compensation will be paid absent facts indicating that is a realistic potentiality. Additionally, until further guidance is issued, the two approaches regarding deferred compensation described in section III.F. of the Explanation of Provisions of the proposed regulations, titled ''Remuneration Paid to a Covered Employee for Which a Deduction Is Disallowed Under Section 162(m),'' will be treated as reasonable, good faith approaches. However, a third approach suggested by a commenter, under which section 162(m) would not disallow a taxpayer's deduction for remuneration that the taxpayer treated as excess remuneration under section 4960 in a previous taxable year, will not be treated as a reasonable, good faith approach, because such an approach would be inconsistent with section 162(m) and the regulations thereunder.

IV. Excess Remuneration

In general, the excise tax imposed under section 4960(a)(1) is based on the remuneration paid (other than any excess parachute payment) by an ATEO for the taxable year with respect to employment of any covered employee in excess of $1 million. Consistent with the proposed regulations, these final regulations refer to this amount as ''excess remuneration.'' The $1 million threshold provided in section 4960(a)(1) is not adjusted for inflation, and an amount subject to tax under section 4960(a)(2) as an excess parachute payment is not subject to tax under section 4960(a)(1) as excess remuneration.

As provided in section 4960(c)(4)(C), if an individual performs services as an employee for two or more related organizations during an applicable year, one or more of which is an ATEO, each employer is liable for its proportionate share of the excise tax. These final regulations adopt the rules provided in the proposed regulations for allocating liability for the excise tax among the employers. For this purpose, remuneration that is paid by a separate organization (whether related to the ATEO or not) for services performed as an employee of the ATEO is treated as remuneration paid by the ATEO. For a further discussion of when amounts are treated as paid by an ATEO, see section VI of this Summary of Comments and Explanation of Revisions, titled ''Calculation, Reporting, and Payment of the Tax.''

V. Excess Parachute Payments

A. In General

The proposed regulations set forth rules with respect to excess parachute payments under section 4960. No

comments were received on these rules, and these final regulations adopt them without change. Section 4960(a)(2) imposes an excise tax on any excess parachute payment. Section 4960(c)(5)(A) provides that ''excess parachute payment'' means an amount equal to the excess of any parachute payment over the portion of the base amount allocated to such payment. Section 4960(c)(5)(B) provides that ''parachute payment'' means any payment in the nature of compensation to (or for the benefit of) a covered employee if the payment is contingent on the employee's separation from employment with the employer and the aggregate present value of the payments in the nature of compensation to (or for the benefit of) the individual that are contingent on the separation equals or exceeds an amount equal to 3-times the base amount. Under section 4960(c)(5)(C), certain retirement plan payments, certain payments to licensed medical professionals, and payments to an individual who is not a ''highly compensated employee'' (HCE) as defined in section 414(q) are not excess parachute payments.[9]

The excess parachute payment rules under section 4960 are modeled after section 280G, but section 4960(c)(5)(B) defines ''parachute payment'' differently than section 280G(b)(2). The section 4960 definition refers to payments contingent on an employee's separation from employment, whereas the section 280G definition refers to payments contingent on a change in the ownership or effective control of a corporation (or in the ownership of a substantial portion of the assets of the corporation). While these final regulations incorporate many of the concepts found in the rules under § 1.280G–1, with modifications to reflect the statutory differences between sections 280G and 4960, they do not incorporate other rules under § 1.280G–1 because those rules address issues that do not arise under section 4960. In addition, many provisions in these final regulations do not have parallel rules under § 1.280G–1 because they address issues that arise under section 4960, but not under section 280G.

The following sections provide a general overview of these final regulations for purposes of calculating the excise tax imposed under section 4960(a)(2), noting certain similarities and differences between these final regulations and the rules under § 1.280G–1. For more information concerning these rules, including additional similarities and differences with the rules under section 280G, see section V of the Explanation of Provisions of the proposed regulations, titled ''Excess Parachute Payments.''

B. Definitions Related to Excess Parachute Payments

These final regulations define ''excess parachute payment'' and the term ''parachute payment'' for purposes of section 4960. Any payment in the nature of compensation made by an ATEO (or any predecessor or related organization) to a covered employee that is contingent on the employee's separation from employment is taken into account for purposes of the parachute payment calculation, assuming no exclusion applies. Those combined payments constitute a parachute payment if the aggregate present value of all such payments made to an individual equals or exceeds 3-times the individual's base amount. A parachute payment is an excess parachute payment to the extent it exceeds one-times the individual's base amount allocated to the payment.

These final regulations define a ''payment in the nature of compensation'' based on § 1.280G–1, Q/A–11 and Q/A–14. In general, any payment arising out of an employment relationship is a payment in the nature of compensation. A payment in the nature of compensation is reduced, however, by any consideration paid by the covered employee in exchange for the payment.

C. Payments Contingent on a Separation From Employment

1. In General

Although section 4960 does not define what it means for a payment to be contingent on a separation from employment, these final regulations generally treat a payment as contingent on an employee's separation from employment only if there is an involuntary separation from employment. If the payment is subject to a substantial risk of forfeiture (defined in a manner consistent with section 457(f)) that lapses upon an involuntary separation from employment, and the separation causes the risk of forfeiture to lapse, the payment is contingent on separation from employment.

2. Requirement of Involuntary Separation From Employment

Separation from employment (whether voluntary or involuntary) often is used in compensation arrangements as a trigger to pay vested compensation. For example, it is typical for a nonqualified deferred compensation plan to provide that a payment or a series of payments will be made or begin upon a separation from employment, including separation from employment resulting from death or disability. The vested amounts that are to be paid after a separation from employment generally are not treated as contingent on a separation from employment because the amounts will never be subject to forfeiture or otherwise not paid (even if an employee does not voluntarily or involuntarily terminate employment during the employee's lifetime, the payments will be made upon the employee's death). In these cases, the separation from employment functions only as a payment timing event and is neither a contingent event that may not occur nor a precondition to entitlement to the payment.

3. Definition of ''Involuntary Separation From Employment''

If an amount is payable solely upon an involuntary separation from employment, then it is a payment contingent on an event that may not occur and that is a precondition to entitlement to the payment. The definition of an ''involuntary separation from employment'' set forth in these final regulations is modeled after the definition of an ''involuntary separation from service'' in § 1.409A–1(n)(1), which also was the model for the definition of an ''involuntary severance from employment'' under Prop. § 1.457–11(d)(2). A separation from employment for good reason is treated as an involuntary separation from employment for purposes of section 4960 if certain conditions are met. For this purpose, these regulations generally adopt the standards set forth in § 1.409A–1(n)(2) and Prop. § 1.457–11(d)(2)(ii).

These final regulations generally adopt the standards of the section 409A regulations for purposes of determining whether there has been a separation from employment, except that for purposes of section 4960 a bona fide change from employee to independent contractor status is treated as a

[9] Under section 414(q), a ''highly compensated employee'' generally is defined as any employee who was a five-percent owner at any time during the year or the preceding year or who had compensation from the employer in the preceding year in excess of an inflation-adjusted amount. Notice 2019–59 (2019–47 I.R.B. 1091) and Notice 2020–79 (2020–46 I.R.B 1014), provide that the inflation-adjusted amounts for 2020 and 2021 are $130,000 and $130,000, respectively. See section 414(q) and the regulations thereunder for additional rules, including the availability of an election to treat no more than the top 20 percent of an employer's employees as highly compensated employees by reason of their compensation.

separation from employment. Because the section 409A regulations do not provide a standard for determining when an involuntary change of status from employee to independent contractor results in a separation from employment, in section V.C.3. of the Explanation of Provisions of the proposed regulations, titled ''Definition of 'Involuntary Separation from Employment,' '' the Treasury Department and the IRS requested comments on whether additional guidance is needed on this issue. No comments were received in response to that request. Consistent with the proposed regulations, these final regulations provide that a separation from employment occurs in the case of a bona fide and involuntary change of status from employee to independent contractor in circumstances in which the change in status otherwise meets the requirements for an involuntary separation from employment.

With respect to when an employee otherwise has terminated employment, these final regulations adopt rules based on the section 409A regulations. Specifically, these regulations adopt the standards of § 1.409A–1(h)(1)(ii), providing that an anticipated reduction in the level of services of more than 80 percent is treated as a separation from employment, an anticipated reduction in the level of services of less than 50 percent is not treated as a separation from employment, and the treatment of an anticipated reduction between these two levels will depend on the facts and circumstances. The measurement of the anticipated reduction in the level of services is based on the average level of bona fide services performed over the immediately preceding 3 years (or shorter period for an employee employed for less than 3 full prior years). However, these regulations do not adopt the rule in § 1.409A–1(h)(1)(ii), under which an employer may modify the level of the anticipated reduction in future services that will be considered to result in a separation from employment.

4. When a Payment Is Contingent on Separation From Employment

In defining when a payment is contingent on separation from employment, these final regulations do not focus solely on whether the payment would not have been made but for a separation from employment, but also take into consideration whether the separation from employment accelerates the right to payment or the lapse of a substantial risk of forfeiture with respect to the right to payment. Generally, if the payment or the lapse of a substantial risk of forfeiture is accelerated as a result of an involuntary separation from employment (such as a payment that otherwise would have vested and been paid had the employee remained employed for a subsequent period), then the value of any accelerated payment plus the value of any lapse of the substantial risk of forfeiture is treated as contingent on a separation from employment (since the employer would not have provided the increased value in the absence of an involuntary separation from employment).

However, if the lapse of the substantial risk of forfeiture is dependent on an event other than the performance of services, such as the attainment of a performance goal, and if that event does not occur prior to the employee's separation from employment, but the payment vests due to the employee's involuntary separation from employment, then the full amount of the payment is treated as contingent on the separation from employment.

As discussed in section V.C.4. of the Explanation of Provisions of the proposed regulations, titled ''When a Payment Is Contingent on Separation from Employment,'' a payment the right to which is not subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B) at the time of an involuntary separation from employment generally is not contingent on a separation from employment (since the right to the payment is not triggered by the separation from employment). However, the increased value of a payment accelerated due to the involuntary separation from employment, and the value of accelerated vesting due to the involuntary separation from employment, each generally are treated as a payment contingent on a separation from employment. In addition, a payment for damages due to the breach of an employment agreement that is related to an involuntary separation from employment generally constitutes a payment contingent on a separation from employment, and a payment for compliance with a noncompetition agreement or similar arrangement may, in certain situations, constitute a payment contingent on a separation from employment.

Actual or constructive payment of an amount that was previously includible in gross income is not a payment contingent on a separation from employment. For example, a payment of deferred compensation after an involuntary separation from employment that vested based on years of service completed before the involuntary separation from employment generally is not a payment that is contingent on a separation from employment because the separation from employment may affect the time of, but not the right to, the payment (although the value of an acceleration of the payment may be contingent on a separation from employment).

Unlike Q/A–25 and Q/A–26 of § 1.280G–1, these regulations do not provide a presumption that a payment made pursuant to an agreement entered into or modified within 12 months of a separation from employment is a payment that is contingent on a separation from employment. However, as discussed later in this section, if the facts and circumstances demonstrate that either the vesting or the payment of an amount would not have occurred but for the involuntary nature of the separation from employment, the amount will be treated as a payment contingent on a separation from employment.

In addition, these final regulations do not provide a rule similar to § 1.280G–1, Q/A–9 (exempting reasonable compensation for services rendered on or after a change in ownership or control from the definition of ''parachute payment''), which would exclude reasonable compensation for services provided after a separation from employment. In most cases, the issue of whether payments made after a separation from employment are reasonable compensation for services will not arise because the employee will not provide services after the separation from employment. However, if the employee continues to provide services (including as a bona fide independent contractor) after an involuntary separation from employment, payments for those services are not contingent on the involuntary separation from employment to the extent those payments are reasonable and are not made due to the involuntary nature of the separation from employment.

Notwithstanding the foregoing, if the facts and circumstances demonstrate that either vesting or payment of an amount (whether before or after an involuntary separation from employment) would not have occurred but for the involuntary nature of the separation from employment, the amount will be treated as contingent on a separation from employment. For example, an employer's exercise of discretion to accelerate vesting of an amount shortly before an involuntary separation from employment may indicate that the acceleration of vesting was due to the involuntary nature of the separation from employment and was

therefore contingent on the employee's separation from employment.

In section V.C.4. of the Explanation of Provisions of the proposed regulations, titled ''When a Payment Is Contingent on Separation from Employment,'' the Treasury Department and the IRS requested comments on whether there are additional types of payments made in connection with separation from employment and the extent to which these final regulations under section 4960 should be modified to ensure appropriate classification of those payments as contingent or not contingent on separation from employment. No comments were received in response to this request, and no modifications have been made in the final regulations.

D. Three-Times-Base-Amount Test

Section 4960(c)(5) provides rules for determining the tax on any excess parachute payment imposed under section 4960(a)(2). Section 4960(c)(5)(B) provides that a payment is a parachute payment only if the aggregate present value of the payments in the nature of compensation to (or for the benefit of) an individual that are contingent on a separation from employment equals or exceeds an amount equal to 3-times the base amount. Section 4960(c)(5)(D) provides that rules similar to the rules of section 280G(b)(3) apply for purposes of determining the base amount, and section 4960(c)(5)(E) provides that rules similar to the rules of section 280G(d)(3) and (4) apply for purposes of present value determinations. Section 280G(b)(3) provides that ''base amount'' means an individual's annualized includible compensation for the base period. Section 280G(d)(2) defines ''base period'' as the period consisting of the 5 most-recent taxable years of the service provider ending before the date on which the change in ownership or control occurs or the portion of such period during which the individual performed personal services for the corporation.

These final regulations provide that the ''base amount'' is the average annual compensation as an employee of the ATEO (including services performed as an employee of a predecessor or related organization) for the taxable years in the ''base period.'' The base period is the 5 most-recent taxable years during which the individual was an employee of the ATEO (or predecessor or related organization) or the portion of the 5-year period during which the employee was an employee of the ATEO (or predecessor or related organization).

These final regulations provide rules for determining whether a payment is an excess parachute payment, including rules for applying the 3-times-base-amount test. The rules for determining the base amount, base period, and present value, including determining the present value of payments that are contingent on uncertain future events, are based on the rules under § 1.280G–1, Q/A–30 through Q/A–36 (substituting an involuntary separation from employment for a change in control). These final regulations describe when a payment in the nature of compensation is considered made for purposes of section 4960(a)(2), based on the rules in § 1.280G–1, Q/A–11 through Q/A–14. Consistent with the rules provided under § 1.280G–1, Q/A–12(a), these final regulations provide that the transfer of section 83 property generally is considered a payment made in the taxable year in which the fair market value of the property would be includible in the gross income of the covered employee under section 83, disregarding any election made by the employee under section 83(b) or (i). In addition, similar to the rules provided under § 1.280G–1, Q/A–13(a), these regulations generally provide that stock options are treated as property transferred on the date of vesting (regardless of whether the option has a ''readily ascertainable value'' as defined in § 1.83–7(b)). For purposes of determining the timing and amount of any payment related to an option, the principles of § 1.280G–1, Q/A–13 and Rev. Proc. 2003–68 (2003–2 C.B. 398) apply.

E. Computation of Excess Parachute Payments

Consistent with section 4960(c)(5)(A), these final regulations provide that an ''excess parachute payment'' is an amount equal to the excess of any parachute payment over the portion of the base amount allocated to the payment. The portion of the base amount allocated to any parachute payment is the amount that bears the same ratio to the base amount as the present value of the parachute payment bears to the aggregate present value of all parachute payments to be made to the covered employee. The rules on allocation of the base amount in these regulations are based on § 1.280G–1, Q/A–38.

VI. Calculation, Reporting, and Payment of the Tax

ATEOs (and any related non-ATEO organizations) are liable for the excise tax imposed by section 4960 only if they pay a covered employee sufficient remuneration to trigger the tax. An ATEO is not subject to the excise tax under section 4960(a)(1) unless the ATEO (together with any related organizations) pays more than $1 million of remuneration to a covered employee for a taxable year. An ATEO cannot make an excess parachute payment subject to the excise tax under section 4960(a)(2) if the employer does not have any HCEs under section 414(q) [10] for the taxable year. If both of these situations apply to an ATEO, the ATEO is not liable for any excise tax under section 4960 for that taxable year.

These final regulations generally adopt the proposed rules regarding the entity that is liable for the excise tax under section 4960 and how that excise tax is calculated. These regulations provide that the employer, as determined under section 3401(d), without regard to paragraph (d)(1) or (d)(2), is liable for the excise tax imposed under section 4960. Further, as authorized by section 4960(d), a payment by the employer may be treated as remuneration or a parachute payment if, based on the facts and circumstances, the payment is structured such that it has the effect of avoiding the tax applicable under section 4960. For example, the excise tax under section 4960 would apply with respect to an individual who is an employee of an ATEO or related organization but who is incorrectly classified as an independent contractor. Similarly, the excise tax under section 4960 would apply to an amount paid to a limited liability company or other entity owned all or in part by an employee (or owned by another entity unrelated to the ATEO or related organization) for services performed by an employee of the ATEO or related organization if the arrangement would otherwise have the effect of avoiding the tax applicable under section 4960. For a further discussion of the definition of ''employer'' see section II.D. of this Summary of Comments and Explanation of Revisions, titled ''Employer.''

A. Calculation of Tax on Excess Remuneration

An individual may perform services as an employee of an ATEO and as an employee of one or more related organizations during the same applicable year, in which case remuneration paid for the taxable year is aggregated for purposes of determining whether excess remuneration has been paid. To address these cases, these final regulations adopt the proposed rules for allocating liability for the excise tax among the related employers. As provided in

[10] See footnote 9.

section 4960(c)(4)(C), in any case in which an ATEO includes remuneration from one or more related organizations as separate employers of the individual in determining the excise tax imposed by section 4960(a), each employer is liable for its proportionate share of the excise tax. In contrast, a payment to an individual for performing services as an employee of an ATEO that is made by a third-party payor (whether the payor is related to the ATEO or not) is remuneration paid by the ATEO for section 4960 purposes and thus is included with any remuneration paid directly by the ATEO (and the related liability is not allocated to the other organization). If a covered employee is employed by one employer when the legally binding right to the remuneration is granted and by a different employer at vesting, then the covered employee's employer at vesting is treated as paying the remuneration, provided the employment relationship is bona fide and not a means to avoid tax under section 4960. A related organization may become (or cease to be) related during the applicable year, in which case only remuneration the related organization pays (or is treated as paying due to vesting) to the ATEO's covered employee during the portion of the applicable year that it is a related organization is treated as paid by the ATEO for the taxable year, as provided in section 4960(c)(4)(A).

If an employee is a covered employee of more than one ATEO, these final regulations provide that each ATEO calculates its liability under section 4960(a)(1), taking into account remuneration paid to the employee by the organizations to which it is related. These regulations also provide that, rather than owing tax as both an ATEO and a related organization for the same remuneration paid to a covered employee, each employer is liable only for the greater of the excise tax for which it would be liable as an ATEO or the excise tax it would be liable for as a related organization with respect to that covered employee (and if there is more than one related group of organizations, then for the group that results in the greatest amount of tax). These regulations provide that these same allocation principles apply in the case of the allocation of liability in situations involving an ATEO or related organization with a short taxable year, and should be applied in a manner that avoids, to the extent possible, duplicative taxation of remuneration paid to the same individual. Because the application of the allocation rules may prove complicated in situations involving short taxable years, especially if those situations also involve multiple short taxable years or differing taxable years among the group constituting the ATEO and its related organizations, the regulations further provide that the Commissioner may prescribe guidance of general applicability addressing how the allocation rules apply in particular circumstances involving short taxable years.

Under section 4960(b) and (c)(4)(C), the employer or employers are liable for the excise tax imposed by section 4960. Related organizations must obtain information from each other on remuneration paid to covered employees in order to calculate the tax and their share of the liability. One commenter noted that there may be situations in which an employer is unable to obtain complete information on the remuneration and benefits paid by other employers. The commenter requested guidance on relief from penalties or interest for an error if the employer made a bona fide attempt to obtain the necessary information when it became aware of the error and requested guidance on what would be a bona fide attempt for this purpose. If an ATEO or related organization fails to pay tax it is liable for due to failure to obtain information on remuneration paid by other organizations within the related group, it may be liable for a civil penalty under section 6651 (and in some cases, criminal penalties). Section 6651 includes an exception for reasonable cause. Guidance as to reasonable cause for penalty relief, and therefore the guidance requested by this commenter, is beyond the scope of these final regulations, and therefore is not addressed in these final regulations.

B. Calculation of Tax on an Excess Parachute Payment

These final regulations adopt the proposed regulations with respect to the rules for the calculation of tax on an excess parachute payment. With respect to the calculation of, and liability for, the tax on excess parachute payments, the proposed regulations differed in one respect from the guidance provided in Q/A–1 of Notice 2019–09. Notice 2019–09 provided that an ATEO or related organization may be liable for the tax on an excess parachute payment based on the aggregate parachute payments made by the ATEO and its related organizations, including parachute payments based on separation from employment from a related organization. As in the proposed regulations, these final regulations provide that only an excess parachute payment paid by an ATEO is subject to the excise tax on excess parachute payments. However, consistent with the provision in section 4960(c)(5)(D) that rules similar to section 280G(b)(3) apply for purposes of determining the base amount under section 4960, payments from all related organizations (including payments from non-ATEOs) are considered for purposes of determining the base amount and total payments in the nature of compensation that are contingent on the covered employee's separation from employment with the employer. See § 1.280G–1, Q/A–34. Generally, this means that a covered employee's base amount calculation includes remuneration from the ATEO and all related organizations, and that a covered employee's parachute payment calculation includes all payments (made by the ATEO and all related organizations) that are contingent on the employee's involuntary separation from employment. However, only an ATEO is subject to the excise tax on excess parachute payments it makes to a covered employee. A non-ATEO that pays an amount that would otherwise be an excess parachute payment is not subject to the excise tax. These regulations further provide that, based on the facts and circumstances, the Commissioner may reallocate excess parachute payments to an ATEO if it is determined that excess parachute payments were made by a non-ATEO for the purpose of avoiding the tax under section 4960. Step by step instructions for calculating the tax on excess parachute payments were provided in section VI.B. of the Explanation of Provisions of the proposed regulations, titled ''Calculation of Tax on an Excess Parachute Payment.''

C. Reporting and Payment of the Tax

These final regulations adopt without change the rules provided in the proposed regulations relating to the reporting and payment of the excise tax. Under §§ 53.6011–1 and 53.6071–1, the excise tax under section 4960 is reported on Form 4720, ''Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code,'' which is the form generally used for reporting and paying chapter 42 taxes. The reporting and payment of any applicable taxes are due when payments of chapter 42 taxes are ordinarily due (the 15th day of the 5th month after the end of the taxpayer's taxable year—May 15 for a calendar year employer), subject to an extension of time for filing returns and making payments [11] that generally

[11] The tentative tax, an estimate, must be paid by the due date of Form 4720 without extensions and

Continued

applies. Because section 6655 has not been amended to include section 4960, no quarterly payments of estimated excise tax imposed by section 4960 are required under section 6655.

These final regulations require that the excise tax imposed by section 4960 be reported and paid in the form and manner prescribed by the Commissioner, and § 53.6011–1 requires that every person (including a governmental entity) liable for the excise tax imposed by section 4960 shall file Form 4720, ''Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code.'' Notice 2019–09, Q/A–33(a) required each employer liable for the excise tax imposed by section 4960 to file a separate Form 4720 to report its share of liability. Two commenters recommended allowing related employers to file a joint Form 4720, as has been permitted in § 53.6011–1(c) for private foundations and their disqualified persons and foundation managers. In addition to being beyond the scope of these regulations, permitting joint filing of Form 4720 is incompatible with electronic filing of Form 4720 that is required for certain tax-exempt organizations under the Taxpayer First Act, Public Law 116–25. See Notice 2021–01.

These final regulations also provide that an employer may elect to prepay the excise tax imposed under section 4960(a)(2) for excess parachute payments in the year of separation from employment or any taxable year prior to the year in which the parachute payment is actually paid. This prepayment rule for the tax applicable to excess parachute payments is similar to the rule in § 1.280G–1, Q/A–11(c), under which a disqualified employee may elect to prepay the excise tax under section 4999 based on the present value of the excise tax that would be owed by the employee when the parachute payments are actually made.

VII. Applicability Date

These final regulations were proposed to apply to taxable years beginning after December 31 of the calendar year in which the Treasury decision adopting these rules as final regulations is published in the **Federal Register**. The Treasury Department and the IRS requested comments on the burdens anticipated and the timeframe expected to be necessary to implement these final regulations (taking into account that the statutory provisions are already effective).

One commenter recommended that these final regulations apply to taxable years beginning after December 31 of the calendar year that ends at least six months after the date on which these final regulations are published in the **Federal Register** in order for ATEOs and related organization to have sufficient time to understand and apply these final regulations. The Treasury Department and the IRS agree with this recommendation, and therefore these final regulations apply to taxable years beginning after December 31, 2021 (with the first applicable year generally being the 2022 calendar year).

The guidance provided in these final regulations and the proposed regulations generally is consistent with the guidance provided in Notice 2019–09. Until the applicability date of these final regulations, taxpayers may rely on the guidance provided in Notice 2019–09 in its entirety or on the proposed regulations in their entirety. Alternatively, taxpayers may choose to apply these final regulations to taxable years beginning after December 31, 2017, and on or before December 31, 2021, provided they apply the final regulations in their entirety and in a consistent manner.

Until the applicability date of these final regulations, taxpayers may also base their positions upon a reasonable, good faith interpretation of the statute that includes consideration of any relevant legislative history. Whether a taxpayer's position that is inconsistent with Notice 2019–09, the proposed regulations, or these final regulations constitutes a reasonable, good faith interpretation of the statute generally will be determined based upon all of the relevant facts and circumstances, including whether the taxpayer has applied the position consistently and the extent to which the taxpayer has resolved interpretive issues based on consistent principles and in a consistent manner. Notwithstanding the previous sentence, the preamble to Notice 2019–09 describes certain positions that the Treasury Department and the IRS have concluded are not consistent with a reasonable, good faith interpretation of the statutory language, and the proposed regulations and these final regulations reflect this view. For a description of each of these positions, see section VII of the Explanation of Provisions of the proposed regulations, titled ''Proposed Applicability Date.''

Special Analyses

I. Regulatory Planning and Review

Executive Orders 13771, 13563, and 12866 direct agencies to assess costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. The Executive Order 13771 designation for this rule is ''regulatory.''

The regulations have been designated as subject to review under Executive Order 12866 pursuant to the Memorandum of Agreement (April 11, 2018) between the Treasury Department and the Office of Management and Budget (OMB) regarding review of tax regulations. The Office of Information and Regulatory Affairs (OIRA) has designated the rulemaking as significant under section 1(c) of the Memorandum of Agreement. Accordingly, OMB has reviewed the regulations.

A. Background

1. The Excise Tax Under Section 4960

Section 4960 was added to the Code by TCJA. Section 4960(a) subjects excess remuneration above $1 million and excess parachute payments that an ATEO pays to a covered employee to an excise tax equal to the rate of tax imposed on corporations under section 11 (21 percent for 2020). Before TCJA, compensation paid by tax-exempt organizations was not subject to an excise tax, although section 4958 applies an excise tax to penalize excess benefit transactions in which an ''applicable tax-exempt organization'' (as defined in section 4958) provides a benefit to a disqualified person that exceeds the reasonable fair market value of the services received.

Section 4960 defines an ''ATEO'' as any organization which is exempt from taxation under section 501(a), is a farmers' cooperative organization described in section 521(b)(1), has income excluded from taxation under section 115(1), or is a political organization described in section 527(e)(1). Covered employees of an ATEO include the five highest-compensated employees of the organization for the taxable year and any employee or former employee who was a covered employee of the organization (or predecessor) for any

may be paid with Form 8868, ''Application for Automatic Extension of Time To File an Exempt Organization Return.''

preceding taxable year beginning after December 31, 2016.

''Remuneration'' means ''wages'' as defined in section 3401(a) (excluding designated Roth contributions) and includes amounts required to be included in gross income under section 457(f). Section 4960 excludes from remuneration any amount paid to a licensed medical professional for medical or veterinary services provided. Remuneration also includes payments with respect to employment of a covered employee by any person or government entity related to the ATEO. A person or governmental entity is treated as related to the ATEO if that person or governmental entity controls, or is controlled by, the ATEO, is controlled by one or more persons which control the ATEO, is a ''supported organization'' (as defined in section 509(f)(3)) during the taxable year with respect to the ATEO, is a supporting organization described in section 509(a)(3) during the taxable year with respect to the ATEO, or in the case of an organization which is a voluntary employees' beneficiary association (VEBA) under section 501(c)(9), established, maintains, or makes contribution to such VEBA.

2. Notice 2019–09 and the Proposed and Final Regulations

Notice 2019–09 provided taxpayers with initial guidance on the application of section 4960, including that taxpayers may base their positions on a reasonable, good faith interpretation of the statute until further guidance is issued. On June 11, 2020, the Treasury Department and the IRS published proposed regulations on section 4960 in the **Federal Register** (REG–122345–18, 85 FR 35746) (the proposed regulations). The Treasury Department and the IRS received comments responding to the proposed regulations, which were considered in these final regulations, published here. The comments primarily discussed the treatment of employees of a related organization who also provide services to the ATEO, suggesting various exceptions for these situations. Comments also addressed the possibility of a grandfather rule for compensation to be paid under arrangements in place prior to the effective date of section 4960, treatment of deferred compensation as remuneration, the definition of ''control,'' and which organizations are ATEOs.

B. Baseline

The Treasury Department and the IRS have assessed the benefits and costs of the final regulations relative to a no-action baseline reflecting anticipated Federal income tax-related behavior in the absence of these regulations.

C. Affected Entities

The final regulations affect an estimated 261,000 ATEOs and 77,000 non-ATEO related organizations of ATEOs that in historical filings report substantial executive compensation.[12] Of the roughly 261,000 such ATEOs based on filings for tax year 2017, 239,000 are section 501(a) exempt organizations (including 23,000 private foundations), 19,000 are section 115 state and local instrumentalities, 2,000 are section 527 political organizations, 600 are exempt farmers' cooperative organizations described in section 521(b)(1), and 200 are federal instrumentalities (although the Treasury Department and the IRS will continue to consider whether federal instrumentalities are ATEOs).

D. Economic Analysis

This section describes the key economic effects of the provisions of these final regulations.

1. Clarifications

Most provisions of these final regulations clarify aspects of the excise tax imposed by section 4960, minimizing the burdens entities bear to comply with section 4960, and have little other economic impact. Clarifications reduce uncertainty, lowering the effort required to infer which organizations, employees, and payments are subject to the excise tax and the potential for conflict if entities and tax administrators interpret provisions differently. Examples of provisions of these final regulations that are primarily clarifications include the definition of ''control,'' treatment of deferred compensation and vesting, and which organizations are ATEOs.

2. ''Volunteer'' Exceptions

Several commenters expressed concern that highly-paid employees of a non-ATEO performing services for a related ATEO without receiving compensation from the ATEO may be subject to the excise tax. To avoid the excise tax, individuals might cease performing such services, or ATEOs might dissolve their relationships with related non-ATEOs, reducing donations from related non-ATEOs.

The final regulations include exceptions to the definitions of ''employee'' and ''covered employees'' (specifically to the rules for determining the five highest compensated employees for purposes of identifying covered employees) to address such situations. With respect to the first exception, the regulations define ''employee'' consistent with section 3401(c), in particular adopting the rule that a director is not an employee in the capacity as a director and an officer performing minor or no services and not receiving any remuneration for those services is not an employee.

The general rule provides that employees of a related non-ATEO are not considered for purposes of determining the five highest-compensated employees if they are never employees of the ATEO. In addition, individuals who receive no remuneration (or grant of a legally binding right to remuneration) from the ATEO or a related organization cannot be among the ATEO's five highest-compensated employees.

Under the exceptions, an ATEO's five highest-compensated employees also exclude an employee of the ATEO who receives no remuneration from the ATEO and performs only limited hours of service for the ATEO, which means that no more than 10 percent of total annual hours worked for the ATEO and related organizations are for services performed for the ATEO. An employee who performs fewer than 100 hours of services as an employee of an ATEO and its related ATEOs is treated as having worked less than 10 percent of total hours for the ATEO and related ATEOs. An employee who is not compensated by an ATEO, related ATEO, or any taxable related organization controlled by the ATEO and who primarily (more than 50 percent of total hours worked) provides services to a related non-ATEO is also disregarded. In response to comments on the proposed regulations expressing concern that this exception did not provide sufficient flexibility for situations in which an employee of a non-ATEO performs services for a related ATEO as a temporary assignment, these final regulations provide that the 50 percent of total hours worked threshold can be computed over a period of two consecutive years, rather than a single year. This modification expands the exception to provide additional flexibility. An employee is also disregarded if an ATEO paid less than 10 percent of the employee's total remuneration for services performed for the ATEO and all related organizations, and the ATEO had at least one related ATEO during the applicable year. Additionally, if neither the ATEO nor any related ATEO paid more than 10 percent of the employee's total

[12] The methods and data used to estimate the number of affected entities are discussed in detail in the Paperwork Reduction Act special analysis.

remuneration, then the ATEO that paid the highest percent of remuneration does not meet this exception.

Consider, for example, a corporate employee making $2 million per year who spends 5 percent of her time (roughly one day each month) working for the corporation's foundation, a related ATEO, without receiving compensation from the ATEO and who would be a covered employee of the ATEO absent the exceptions. Without the exceptions, her compensation in excess of $1 million from the corporation, which is a related party of the foundation, is subject to a 21 percent excise tax, or $210,000 in excise tax liability. The exceptions (either of the first two could apply here) remove that liability and the incentive it provides to stop providing such services or to dissolve the relationship between the ATEO and the related organization. The exceptions support a transfer of substantial value (5 percent of the employee's salary, or $100,000) that might otherwise not take place.

Commenters on the proposed regulations suggested other ways in which the exceptions could be expanded. The Treasury Department and the IRS considered these suggested expansions of the exceptions and concluded that the suggestions were inconsistent with the statute and legislative history or would enable organizations to circumvent the excise tax in situations where an individual performs services for an ATEO on more than a volunteer basis, creating the potential for abuse and increasing the costs of administering the excise tax. Therefore, these final regulations do not adopt the suggested expansions of the exceptions.

The exceptions in these final regulations may have a substantial impact on donations relative to a no-action baseline, although the magnitude of the potential impact depends on how often the exceptions apply and on how responsive organizations and employees are to the excise tax, both of which are uncertain.

The exceptions apply only in particular circumstances: For example, the employee must be employed by a related organization (typically an organization that controls or is controlled by the ATEO), the employee must be highly compensated, and the employee's work for the ATEO must be sufficiently minimal. Historically, many ATEOs report employees with compensation from related organizations. An estimated 8,500 ATEOs filing Form 990 in tax year 2017 reported both compensation of $500,000 or more for any person and any compensation from related organizations. These ATEOs are estimated to have an average of 18 non-ATEO related organizations based on information reported on Form 990 Schedule R, yielding an estimated 154,000 non-ATEO related organizations, of which half, or 77,000, are estimated to employ a covered employee of the ATEO. The fraction of the 154,000 non-ATEO related organizations with employees to whom the exceptions apply (and who are thus not covered employees of the ATEO) is uncertain, but perhaps half the related organizations, or 77,000, have such an employee.

This entity count omits a substantial number of private foundations which may have employees who receive no compensation from the ATEO but who are highly compensated by related organizations, because while the ATEO count used in these estimates includes approximately 100 private foundations that have historically reported employee compensation of $500,000 or more on Form 990–PF, Form 990–PF (unlike Form 990) does not include information on employee compensation received from related organizations. The exceptions are particularly likely to apply to donations to foundations related to non-ATEO businesses, as companies are highly likely to be related organizations of a company's foundation, many family foundations are controlled by the same family that controls a private business, and executives of the related business often provide services to the foundation without payment from the foundation. Because of these facts, looking at pre-TCJA tax forms may underestimate the number of entities potentially affected by the exceptions. In the U.S. in 2015, there were about 2,000 company foundations responsible for $5.5 billion in giving, and 42,000 family foundations.[13] It is reasonable to assume that about half of these foundations, or 22,000, have a related business with an employee to whom the exceptions apply.

Under reasonable assumptions about the response of donated services to the excise tax, the exceptions may restore substantial donations (transfers) of services that the excise tax could potentially otherwise eliminate. Totaling both private foundations and other ATEOs, roughly 99,000 related organizations are estimated to have employees to whom the exceptions apply. If the excise tax would have reduced services that are donated under the exceptions by an average of just over $5,000 per related organization, the total transfer reduction exceeds $500 million.

Absent the exceptions, organizations may also avoid the excise tax by dissolving the relationship between the ATEO and non-ATEO, which may affect donations of money as well as services. Considering only corporate foundations and setting aside other ATEOs, if such dissolutions would lead to a two percent reduction in the $5.5 billion in corporate giving that would otherwise take place through related foundations, the reduction exceeds $100 million. The Treasury Department and the IRS requested but did not receive comments on the impact of the exceptions on the dissolution of relationships between ATEOs and related organizations.

It is plausible that these final regulations restore substantial economic activity relative to regulatory alternatives, under which the excise tax would discourage highly-compensated employees of related non-ATEOs from providing services to a related ATEO without compensation from the ATEO and discourage relationships between ATEOs and non-ATEOs.

3. Summary

This analysis suggests that these final regulations will reduce compliance burden on affected entities by providing clarifications and, through the exceptions, increase services provided to ATEOs without compensation from the ATEO by a small but potentially economically significant amount ($100 million or more), relative to regulatory alternatives. The Treasury Department and the IRS requested but did not receive comments on the economic impact of these proposed regulations (in particular, comments providing data, other evidence, or models that provide insight).

II. Paperwork Reduction Act

The collections of information in these final regulations are in § 53.4960–1(d), (h), and (i); § 53.4960–2(a), (c) and (d); and § 53.4960–4(a) and (d). This information is required to determine an ATEO's ''covered employees'' as defined in section 4960(c)(2); to calculate remuneration in excess of $1 million as described in section 4960(c)(3); to determine remuneration from related organizations and allocation of liability as described in section 4960(c)(4); and to determine any excess parachute payments to covered employees described in section 4960(c)(5).

The IRS intends that the burden of the collections of information will be reflected in the burden associated with Form 4720, under OMB approval

[13] *http://data.foundationcenter.org/.*

number 1545–0047. The burden associated with Form 4720 is included in the aggregated burden estimates for OMB control number 1545–0047, which represents a total estimated burden time for all forms and schedules of 52.450 million hours and total estimated burden in dollars of $1.497 billion (estimated for fiscal year 2021). The overall burden estimates provided for 1545–0047 are aggregate amounts that relate to all information collections associated with that OMB control number. This estimate is therefore unrelated to the future calculations needed to assess the burden imposed by these regulations. To guard against over-counting the burden imposed, the Treasury Department and the IRS urge readers to recognize that these burden estimates are aggregates for the applicable types of filers. For purposes of the Paperwork Reduction Act, the Treasury Department and the IRS have not estimated the burden, including that of any new information collections, related to the requirements under these final regulations. Future burden estimates under OMB control number 1545–0047 would capture changes made by TCJA and changes that arise out of discretionary authority exercised in the regulations.

The expected burden associated with section 4960 compliance (including Form 4720 preparation and filing) for ATEOs as described in section 4960(c)(1) and related organizations as described in section 4960(c)(4)(B) is listed below:

Estimated number of respondents: 337,888.

Estimated average annual burden hours per response: 0.20 hours.

Estimated total annual burden: $3,569,632 (2020).

Estimated frequency of collection: Annual.

In the proposed regulations, the Treasury Department and the IRS requested comments on all aspects of information collection burdens related to the proposed regulations, including estimates for how much time it would take to comply with the paperwork burdens previously described in this section for each relevant form and ways for the IRS to minimize the paperwork burden. The Treasury Department and the IRS did not receive any comments on these issues. Revisions (if any) to these forms that reflect the information collections included in these final regulations will be made available for public comment at *https://apps.irs.gov/app/picklist/list/draftTaxForms.html* and will not be finalized until after these forms have been approved by OMB under the PRA. Comments on these forms can be submitted at *https://www.irs.gov/forms-pubs/comment-on-tax-forms-and-publications.*

The current status of the PRA submissions related to section 4960 are provided in the following table.

Form	Type of filer	OMB No.(s)	Status
Form 4720	Tax-exempt organizations and their related organizations, including for-profit and government entities.	1545–0047	Published in the **Federal Register** on 11/12/20. Public comment period closes on 1/11/21.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law.

Generally, tax returns and return information are confidential, as required by 26 U.S.C. 6103.

III. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (RFA) (5 U.S.C. chapter 6), it is hereby certified that these final regulations will not have a significant economic impact on a substantial number of small entities. In the proposed regulations, the Treasury Department and the IRS invited comments on the impact this rule would have on small entities. The Treasury Department and the IRS did not receive any comments on this issue.

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) generally defines a ''small entity'' as (1) a proprietary firm meeting the size standards of the Small Business Administration (SBA) (13 CFR 121.201), (2) a nonprofit organization that is not dominant in its field, or (3) a small government jurisdiction with a population of less than 50,000. (States and individuals are not included in the definition of ''small entity.'') The Treasury Department and the IRS estimate that these final regulations will affect 324,000 small entities, 73,000 of which are proprietary firms meeting the size standards of the SBA and 251,000 of which are nonprofit organizations that are not dominant in their fields or small government jurisdictions with a population of less than 50,000.

The Treasury Department and the IRS estimated the number of ATEOs, based primarily on Form 990 data for filers with at least one employee (and thus having a burden, at a minimum, of maintaining annual lists of covered employees), as 261,118, and the number of non-ATEO related organizations employing at least one covered employee of an ATEO as 76,770, for a total of 337,888 affected entities. The SBA defines a small business as an independent business having fewer than 500 employees. (See A Guide for Government Agencies, How to Comply with the Regulatory Flexibility Act, Appendix B [14]). Tax data available to the Treasury Department and the IRS include employee counts for only half the affected entities, as employee counts are included on Form 990, but not on other forms including Form 990–EZ and 990–PF. An examination of tax data from 2016 shows that for filers for whom employee counts were available and who had at least one employee, 96.5 percent had fewer than 500 employees. Similarly, there are no bright lines in the available data to distinguish small nonprofit organizations that are not dominant in their field. An examination of non-tax data shows that a similar proportion, approximately 96 percent, of all incorporated cities, towns, and villages in 2014 had a population of less than 50,000, which may serve as a proxy for small government jurisdictions generally.[15] By applying the 96 percent estimate to all entities affected by section 4960, the Treasury Department and the IRS estimate that 324,000 small entities are affected by these regulations. However, the Treasury Department and the IRS have determined that the rules regarding an ATEO's covered employees will not have a significant economic impact on affected small entities as described later in this discussion of the RFA.

Section 4960 imposes the excise tax on ATEOs and their related organizations to the extent they pay certain compensation to a covered employee. Because covered employee

[14] *https://advocacy.sba.gov/2017/08/31/a-guide-for-government-agencies-how-to-comply-with-the-regulatory-flexibility-act/.*

[15] See *https://www.statista.com/statistics/241695/number-of-us-cities-towns-villages-by-population-size/.*

status is permanent, every ATEO must determine its five highest-compensated employees for the taxable year—even if the ATEO is not subject to the tax for that taxable year—and maintain a list of covered employees. Accordingly, these final rules likely will affect a substantial number of small entities, especially nonprofit entities that are not dominant in their fields.

The Treasury Department and the IRS estimate that the vast majority of ATEOs, particularly small ATEOs, can determine their five highest-compensated employees for the taxable year under the method provided in these final rules very quickly and at negligible cost using information already collected in the normal course of business. The time necessary to determine an ATEO's five highest-compensated employees is positively correlated with the size of the entity (that is, the smaller the entity, the less time such a determination should take). Larger ATEOs may need more time, but it is estimated that this determination will take less than seven hours. The burden for making this determination is estimated to fall on the small number of larger ATEOs. Putting these two groups together, the total estimated cost for all 261,118 ATEOs to make these determinations is $1,255,760 per year, averaging $4.81 per ATEO. Thus, it is hereby certified that these final regulations will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA).

Pursuant to section 7805(f) of the Code, the proposed regulations preceding these final regulations were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small entities and no comments were received.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a state, local, or tribal government, in the aggregate, or by the private sector, of $100 million in 1995 dollars, updated annually for inflation. This final rule does not include any Federal mandate that may result in expenditures by state, local, or tribal governments, or by the private sector in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (titled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on state and local governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This final rule does not have federalism implications that are not required by the statute and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive Order.

VI. Congressional Review Act

The Administrator of OIRA has determined that this is a major rule for purposes of the Congressional Review Act (5 U.S.C. 801 *et seq.*) (CRA). Under section 801(3) of the CRA, a major rule takes effect 60 days after the rule is published in the **Federal Register**.

Notwithstanding this requirement, section 808(2) of the CRA allows agencies to dispense with the requirements of section 801 when the agency for good cause finds that such procedure would be impracticable, unnecessary, or contrary to the public interest and the rule shall take effect at such time as the agency promulgating the rule determines. Pursuant to section 808(2) of the CRA, the Treasury Department and the IRS find, for good cause, that a 60-day delay in the effective date is unnecessary and contrary to the public interest.

Following the addition of section 4960 to the Code by TCJA, the Treasury Department and the IRS published the proposed regulations setting forth guidance on all aspects of the law, including certain exceptions to the definition of ''employee'' and ''covered employee'' for purposes of identifying covered employees. The majority of comments received in response to the proposed regulations requested additional clarifications or modifications of the rules for these exceptions. In response, these final regulations include certain clarifications and modifications to the proposed rules. The clarifications and modifications in these final regulations reduce both uncertainty and the burden associated with application of these rules.

In response to certain commenter requests that the applicability date of the final regulations be delayed after publication of the regulations as final in the **Federal Register** so that ATEOs and related organizations have sufficient time to understand and apply these final regulations, these final regulations apply to taxable years beginning after December 31, 2021. However, until the applicability date, taxpayers may choose to apply these final regulations to taxable years beginning after December 31, 2017, and on or before December 31, 2021, provided the taxpayer applies them in their entirety and in a consistent manner. Therefore, ATEOs and related organizations that wish to apply these regulations prior to the applicability date will need to know that these final regulations are effective before incurring necessary costs to timely comply with these final regulations. In particular, certainty that these rules are effective is essential to taxpayers so that they can determine whether and to what extent the excise tax imposed by section 4960 applies to an organization and which employees are covered employees, given that taxpayers will begin preparing their 2020 tax returns in early 2021. Further, for these potentially affected taxpayers, certainty with respect to these rules is necessary for them to proceed with several aspects of their operations, including employee hiring and retention, designing of compensatory arrangements, recordkeeping, and maintaining relationships between related non-ATEOs and ATEOs—including with respect to donating of services. Further, the COVID–19 pandemic has affected many ATEOs, and providing additional clarification regarding these rules, in particular with respect to the exceptions for purposes of determining covered employees, will better enable ATEOs and related organizations to perform financial and operational planning tasks for the tax year as they anticipate the easing of restrictions that have severely impacted their operations during the COVID–19 pandemic. Consistent with Executive Order 13924 (May 19, 2020), the Treasury Department and the IRS have therefore determined that an expedited effective date of these final regulations will provide critical guidance on what the law requires for taxpayers to determine whether the excise tax imposed by section 4960 applies, which employees may be considered to be covered employees, and what actions are required under the law as a result. Accordingly, the Treasury Department and the IRS have determined that the rules in this Treasury decision will take effect on the date of filing for public inspection in the **Federal Register**.

Statutory Authority

The regulations are adopted pursuant to the authority contained in sections 7805 and 4960.

Drafting Information

The principal authors of the regulations are William McNally and Patrick Sternal of the Office of Associate Chief Counsel (Employee Benefits, Exempt Organizations, and Employment Taxes). However, other personnel from the Treasury Department and the IRS participated in the development of the regulations.

Statement of Availability

IRS Revenue Procedures, Revenue Rulings, Notices, and other guidance cited in this preamble are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *https://www.irs.gov.*

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 53

Excise taxes, Foundations, Investments, Lobbying, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, the Department of the Treasury and the Internal Revenue Service amend 26 CFR parts 1 and 53 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.338–1 is amended by revising paragraph (b)(2)(i) to read as follows:

§ 1.338–1 General principles; status of old target and new target.

* * * * *

(b) * * *

(2) * * *

(i) The rules applicable to employee benefit plans (including those plans described in sections 79, 104, 105, 106, 125, 127, 129, 132, 137, and 220), qualified pension, profit-sharing, stock bonus and annuity plans (sections 401(a) and 403(a)), simplified employee pensions (section 408(k)), tax qualified stock option plans (sections 422 and 423), welfare benefit funds (sections 419, 419A, 512(a)(3), and 4976), voluntary employees' beneficiary associations (section 501(c)(9) and the regulations thereunder), and tax on excess tax-exempt organization executive compensation (section 4960) and the regulations in part 53 under section 4960;

* * * * *

PART 53—FOUNDATION AND SIMILAR EXCISE TAXES

■ **Par. 3.** The authority citation for part 53 is revised to read in part as follows:

Authority: 26 U.S.C. 7805; 4960.

* * * * *

■ **Par. 4.** Sections 53.4960–0 through 53.4960–6 are added to read as follows:

* * * * *

* * * * *

§ 53.4960–0 Table of contents.

§ 53.4960–1 Scope and definitions.

(a) *Scope.* This section provides definitions for purposes of section 4960, this section, and §§ 53.4960–2 through 53.4960–6. Section 53.4960–2 provides definitions and rules for determining the amount of remuneration paid for a taxable year. Section 53.4960–3 provides definitions and rules for determining whether a parachute payment is paid. Section 53.4960–4 provides definitions and rules for calculating the amount of excess remuneration paid for a taxable year, excess parachute payments paid in a taxable year, and liability for the excise tax. Section 53.4960–5 is reserved for rules on the coordination of sections 4960 and 162(m). Section 53.4960–6 provides rules regarding the applicability date for the regulations in §§ 53.4960–1 through 53.4960–5. The rules and definitions provided in this section through § 53.4960–6 apply solely for purposes of section 4960 unless specified otherwise.

(b) *Applicable tax-exempt organization*—(1) *In general. Applicable tax-exempt organization* or *ATEO* means any organization that is one of the following types of organizations:

(i) *Section 501(a) organization.* The organization is exempt from taxation under section 501(a) (except as provided in paragraph (b)(2) or (b)(3) of this section);

(ii) *Section 521 farmers' cooperative.* The organization is a farmers' cooperative organization described in section 521(b)(1);

(iii) *Section 115(1) organization.* The organization has income excluded from taxation under section 115(1); or

(iv) *Section 527 political organization.* The organization is a political

organization described in section 527(e)(1).

(2) *Certain foreign organizations.* Any foreign organization described in section 4948(b) that either is exempt from tax under section 501(a) or is a taxable private foundation (section 4948(b) organization) is not an ATEO. A foreign organization is an organization not created or organized in the United States or in any possession thereof, or under the law of the United States, any State, the District of Columbia, or any possession of the United States. See section 4948(b) and § 53.4948–1. For purposes of this paragraph (b)(2) and the application of section 4960 to a taxable year, an organization's status as a section 4948(b) organization is determined at the end of its taxable year.

(c) *Applicable year*—(1) *In general. Applicable year* means the calendar year ending with or within the ATEO's taxable year. See § 53.4960–4 regarding how an ATEO's applicable year affects the liability of related organizations.

(2) *Examples.* The following examples illustrate the rules of paragraph (c)(1) of this section.

(i) *Example 1 (Calendar year taxpayer)*—(A) *Facts.* ATEO 1 uses the calendar year as its taxable year and became an ATEO before 2022.

(B) *Conclusion.* ATEO 1's applicable year for its 2022 taxable year is the period from January 1, 2022, through December 31, 2022 (that is, the 2022 calendar year).

(ii) *Example 2 (Fiscal year taxpayer)*—(A) *Facts.* ATEO 2 uses a taxable year that starts July 1 and ends June 30 and became an ATEO before 2022.

(B) *Conclusion.* ATEO 2's applicable year for the taxable year beginning July 1, 2022, and ending June 30, 2023, is the 2022 calendar year.

(3) *Short applicable years*—(i) *In general.* An ATEO may have an applicable year that does not span the entire calendar year for the initial taxable year that the organization is an ATEO or for the taxable year in which the taxpayer ceases to be an ATEO. The beginning and end dates of the applicable year in the case of an ATEO's change in status depend on when the change in status occurs.

(ii) *Initial year of ATEO status.* For the taxable year in which an ATEO first becomes an ATEO, *applicable year* means the period beginning on the date the ATEO first becomes an ATEO and ending on the last day of the calendar year ending with or within such taxable year (or, if earlier, the date of termination of ATEO status, as described in paragraph (c)(3)(ii)(A) of this section). If the taxable year in which an ATEO first becomes an ATEO ends before the end of the calendar year in which the ATEO first becomes an ATEO, then there is no applicable year for the ATEO's first taxable year; however, for the ATEO's next taxable year, *applicable year* means the period beginning on the date the ATEO first becomes an ATEO and ending on December 31 of the calendar year (or, if earlier, the date of termination of ATEO status, as described in paragraph (c)(3)(ii)(A) of this section).

(iii) *Year of termination of ATEO status*—(A) *Termination on or before the close of the calendar year ending with or within the taxable year of termination.* If an ATEO has a termination of ATEO status during the taxable year and the termination of ATEO status occurs on or before the close of the calendar year ending with or within such taxable year, then, for the taxable year of termination of ATEO status, applicable year means the period starting January 1 of the calendar year of the termination of ATEO status and ending on the date of the termination of ATEO status.

(B) *Termination after the close of the calendar year ending in the taxable year of termination.* If an ATEO has a termination of ATEO status during the taxable year and the termination of ATEO status occurs after the close of the calendar year ending within such taxable year, then, for the taxable year of the termination of ATEO status, *applicable year* means both the calendar year ending within such taxable year and the period beginning January 1 of the calendar year of the termination of ATEO status and ending on the date of the termination of ATEO status. Both such applicable years are treated as separate applicable years. See § 53.4960–4(b)(2)(ii) for rules regarding calculation of the tax in the event there are multiple applicable years associated with a taxable year.

(4) *Examples.* The following examples illustrate the rules of paragraph (c)(3) of this section. For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO and any entity referred to as ''CORP'' is not an ATEO.

(i) *Example 1 (Taxable year of formation ending after December 31)*—(A) *Facts.* ATEO 1, ATEO 2, and CORP 1 are related organizations that all use a taxable year that starts July 1 and ends June 30. ATEO 1 is recognized as a section 501(c)(3) organization by the IRS on May 8, 2023, effective as of October 1, 2022. ATEO 2 became an ATEO in 2017.

(B) *Conclusion (ATEO 1*). ATEO 1's applicable year for the taxable year beginning October 1, 2022, and ending June 30, 2023, is the period beginning October 1, 2022, and ending December 31, 2022. For purposes of determining the amount of remuneration paid by ATEO 1 and all related organizations for ATEO 1's taxable year beginning October 1, 2022, and ending June 30, 2023, (including for purposes of determining ATEO 1's covered employees), only remuneration paid between October 1, 2022, and December 31, 2022, is taken into account. Thus, any remuneration paid by ATEO 1, ATEO 2, and CORP 1 before October 1, 2022, is disregarded for purposes of ATEO 1's applicable year associated with its initial taxable year.

(C) *Conclusion (ATEO 2).* ATEO 2's applicable year for its taxable year beginning July 1, 2022, and ending June 30, 2023, is the 2022 calendar year. Thus, any remuneration paid by ATEO 1, ATEO 2, and CORP 1 during the 2022 calendar year is taken into account for purposes of determining ATEO 2's covered employees and remuneration paid for ATEO 2's taxable year ending June 30, 2023.

(ii) *Example 2 (Taxable year of formation ending before December 31)*—(A) *Facts.* Assume the same facts as in paragraph (c)(4)(i)(A) of this section (Example 1), except that ATEO 1 is recognized as a section 501(c)(3) organization effective as of March 15, 2023.

(B) *Conclusion.* ATEO 1 has no applicable year for the taxable year starting March 15, 2023, and ending June 30, 2023, because no calendar year ends (or termination of ATEO status occurs) with or within the taxable year. ATEO 1's applicable year for the taxable year ending June 30, 2024, is the period beginning March 15, 2023, and ending December 31, 2023. For purposes of determining the amount of remuneration paid by ATEO 1 and all related organizations for ATEO 1's taxable year ending June 30, 2024 (including for purposes of determining ATEO 1's covered employees), only remuneration paid between March 15, 2023, and December 31, 2023, is taken into account. The conclusion for ATEO 2 is the same as in paragraph (c)(4)(i)(C) of this section (Example 1).

(iii) *Example 3 (Termination before the close of the calendar year ending in the taxable year of termination)*—(A) *Facts.* Assume the same facts as in paragraph (c)(4)(i)(A) of this section (Example 1). In addition, ATEO 1 has a termination of ATEO status on September 30, 2024.

(B) *Conclusion.* For ATEO 1's taxable year beginning July 1, 2024, and ending September 30, 2024, ATEO 1's applicable year is the period beginning

January 1, 2024, and ending September 30, 2024.

(iv) *Example 4 (Termination after the close of the calendar year ending in the taxable year of termination)*—(A) *Facts.* Assume the same facts as in paragraph (c)(4)(i)(A) of this section (Example 1). In addition, ATEO 1 has a termination of ATEO status on March 31, 2025.

(B) *Conclusion.* For ATEO 1's taxable year beginning July 1, 2024, and ending March 31, 2025, ATEO 1 has two applicable years: the 2024 calendar year, and the period beginning on January 1, 2025, and ending on March 31, 2025.

(d) *Covered employee*—(1) *In general.* For each taxable year, *covered employee* means any individual who is one of the five highest-compensated employees of the ATEO for the taxable year or was a covered employee of the ATEO (or any predecessor) for any preceding taxable year beginning after December 31, 2016.

(2) *Five highest-compensated employees*—(i) *In general.* Except as otherwise provided in this paragraph (d)(2), an individual is one of an ATEO's five highest- compensated employees for the taxable year if the individual is among the five employees of the ATEO with the highest amount of remuneration paid during the applicable year, as determined under § 53.4960–2. However, remuneration for which the deduction is disallowed by reason of section 162(m) is taken into account for purposes of determining an ATEO's five highest-compensated employees. The five highest-compensated employees of an ATEO for the taxable year are identified on the basis of the total remuneration paid during the applicable year to the employee for services performed as an employee of the ATEO or any related organization. An ATEO may have fewer than five highest-compensated employees for a taxable year if it has fewer than five employees other than employees who are disregarded under paragraphs (d)(2)(ii) through (iv) of this section. For purposes of this paragraph (d)(2), a grant of a legally binding right (within the meaning of § 1.409A–1(b)) to vested remuneration is considered to be remuneration paid as of the date of grant, as described in § 53.4960–2(c)(2), and a person or governmental entity is considered to grant a legally binding right to nonvested remuneration if the person or governmental entity grants a legally binding right to remuneration that is not vested within the meaning of § 53.4960–2(c)(2). An employee is disregarded for purposes of determining an ATEO's five highest-compensated employees for a taxable year if, during the applicable year, neither the ATEO nor any related organization paid remuneration or granted a legally binding right to nonvested remuneration to the individual for services the individual performed as an employee of the ATEO or any related organization.

(ii) *Limited hours exception*—(A) *In general.* An individual is disregarded for purposes of determining an ATEO's five highest-compensated employees for a taxable year if all of the following requirements are met:

(*1*) *Remuneration requirement.* Neither the ATEO nor any related ATEO paid remuneration or granted a legally binding right to nonvested remuneration to the individual for services the individual performed as an employee of the ATEO during the applicable year; and

(*2*) *Hours of service requirement.* The individual performed services as an employee of the ATEO and all related ATEOs for no more than 10 percent of the total hours the individual worked as an employee of the ATEO and any related organizations during the applicable year. An ATEO may instead make this determination based on the total days the individual worked as an employee of the ATEO and all related ATEOs as a percentage of the total days worked as an employee of the ATEO and all related organizations, provided that for purposes of the calculation, any day that the individual worked at least one hour as an employee of the ATEO or a related ATEO is treated as a day worked as an employee of the ATEO and not for any other organization.

(B) *Certain payments disregarded.* For purposes of paragraph (d)(2)(ii)(A)(*1*) of this section, a payment of remuneration made to the individual by a related organization that is an employer of the individual and for which the related organization is neither entitled to reimbursement by the ATEO nor entitled to any other consideration from the ATEO is not considered remuneration paid by the ATEO under § 53.4960–2(b)(1), and a payment of remuneration made to the individual by a related organization is not treated as remuneration paid by the ATEO under § 53.4960–2(b)(2).

(C) *Safe harbor.* For purposes of paragraph (d)(2)(ii)(A)(*2*) of this section, an individual is treated as having performed services as an employee of the ATEO and all related ATEOs for no more than 10 percent of the total hours the individual worked as an employee of the ATEO and all related organizations during the applicable year if the employee performed no more than 100 hours of service as an employee of the ATEO and all related ATEOs during the applicable year.

(iii) *Nonexempt funds exception*—(A) *In general.* An individual is disregarded for purposes of determining an ATEO's five highest-compensated employees for a taxable year if all the following requirements are met:

(*1*) *Remuneration requirement.* Neither the ATEO, nor any related ATEO, nor any taxable related organization controlled by the ATEO, or by one or more related ATEOs, either alone or together with the ATEO, paid remuneration or granted a legally binding right to nonvested remuneration to the individual for services the individual performed as an employee of an ATEO during the applicable year and the preceding applicable year. For this purpose, whether a taxable related organization is controlled by the ATEO (or one or more related ATEOs) is determined without regard to paragraph (i)(2)(vii)(B)(*2*) of this section and without regard to section 318(a)(3) for purposes of applying paragraph (i)(2)(vii)(A) of this section, so that an interest in a corporation or nonstock entity is not attributed downward in determining control of the corporation or nonstock entity;

(*2*) *Hours of service requirement.* The individual performed services as an employee of the ATEO and any related ATEOs for not more than 50 percent of the total hours worked as an employee of the ATEO and any related organizations during the applicable year and the preceding applicable year. An ATEO may instead make this determination based on the total days the individual worked as an employee of the ATEO and all related ATEOs as a percentage of the total days worked as an employee of the ATEO and all related organizations, provided that for purposes of the calculation, any day that the individual worked at least one hour as an employee of the ATEO or a related ATEO is treated as a day worked as an employee of the ATEO and not for any other organization; and

(*3*) *Related organizations requirement.* No related organization that paid remuneration or granted a legally binding right to nonvested remuneration to the individual during the applicable year and the preceding applicable year provided services for a fee to the ATEO, to any related ATEO, or to any taxable related organization controlled by the ATEO or by one or more related ATEOs, either alone or together with the ATEO, during the applicable year and the preceding applicable year. For purposes of this paragraph (d)(2)(iii)(A)(*3*), whether a taxable related organization is controlled by the ATEO (or one or more related ATEOs) is determined without regard to paragraph (i)(2)(vii)(B)(*2*) of

this section and without regard to section 318(a)(3) for purposes of applying paragraph (i)(2)(vii)(A) of this section, so that an interest in a corporation or nonstock entity is not attributed downward in determining control of the corporation or nonstock entity.

(B) *Certain payments disregarded.* For purposes of paragraph (d)(2)(iii)(A)(*1*) of this section, a payment of remuneration made to an individual by a related organization that is an employer of the individual and for which the related organization is neither entitled to reimbursement by the ATEO nor entitled to any other consideration from the ATEO is not considered remuneration paid by the ATEO under § 53.4960–2(b)(1) and a payment of remuneration made to the individual by a related organization is not treated as paid by the ATEO under § 53.4960–2(b)(2).

(iv) *Limited services exception.* An individual is disregarded for purposes of determining an ATEO's five highest-compensated employees for a taxable year even though the ATEO paid remuneration to the individual if, disregarding § 53.4960–2(b)(2), all of the following requirements are met:

(A) *Remuneration requirement.* The ATEO did not pay 10 percent or more of the individual's total remuneration for services performed as an employee of the ATEO and all related organizations during the applicable year; and

(B) *Related ATEO requirement.* The ATEO had at least one related ATEO during the applicable year and one of the following conditions applies:

(*1*) *Ten percent remuneration condition.* A related ATEO paid at least 10 percent of the remuneration paid by the ATEO and any related organizations during the applicable year; or

(*2*) *Less remuneration condition.* No related ATEO paid at least 10 percent of the total remuneration paid by the ATEO and any related organizations and the ATEO paid less remuneration to the individual than at least one related ATEO during the applicable year.

(3) *Examples.* The following examples illustrate the rules of this paragraph (d). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO, any entity referred to as ''CORP'' is not an ATEO and is not a publicly held company within the meaning of section 162(m)(2) unless otherwise stated, and each taxpayer uses the calendar year as its taxable year.

(i) *Example 1 (Employee of two related ATEOs)*—(A) *Facts.* ATEO 1 and ATEO 2 are related organizations and have no other related organizations. Both employ Employee A during calendar year 2022 and pay remuneration to Employee A for Employee A's services. During 2022, Employee A performed services for 1,000 hours as an employee of ATEO 1 and 1,000 hours as an employee of ATEO 2.

(B) *Conclusion.* Employee A may be a covered employee of both ATEO 1 and ATEO 2 as one of the five highest-compensated employees for taxable year 2022 under paragraph (d)(2)(i) of this section because the exceptions in paragraphs (d)(2)(ii) through (iv) of this section do not apply. Because they are related organizations, ATEO 1 and ATEO 2 must each include the remuneration paid to Employee A by the other during each of their applicable years in determining their respective five highest-compensated employees for taxable year 2022.

(ii) *Example 2 (Employee of an ATEO and a related non-ATEO)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(i) of this section (*Example 1*), except that ATEO 1 is instead CORP 1.

(B) *Conclusion (CORP 1).* For taxable year 2022, CORP 1 is not an ATEO and therefore does not need to identify covered employees.

(C) *Conclusion (ATEO 2).* Employee A may be a covered employee of ATEO 2 as one of its five highest-compensated employees for taxable year 2022 under paragraph (d)(2)(i) of this section because no exception in paragraphs (d)(2)(ii) through (iv) of this section applies. ATEO 2 must include the remuneration paid to Employee A by CORP 1 during its applicable year in determining ATEO 2's five highest-compensated employees for taxable year 2022.

(iii) *Example 3 (Amounts for which a deduction is disallowed under section 162(m) are taken into account for purposes of determining the five highest-compensated employees)*—(A) *Facts.* CORP 2 is a publicly held corporation within the meaning of section 162(m)(2) and is a related organization of ATEO 3. ATEO 3 is a corporation that is part of CORP 2's affiliated group (as defined in section 1504, without regard to section 1504(b)) and has no other related organizations. Employee B is a covered employee (as defined in section 162(m)(3)) of CORP 2 and an employee of ATEO 3. In 2022, CORP 2 paid Employee B $8 million of remuneration for services provided as an employee of CORP 2 and ATEO 3 paid Employee B $500,000 of remuneration for services provided as an employee of ATEO 3. $7.5 million of the remuneration is compensation for which a deduction is disallowed pursuant to section 162(m)(1).

(B) *Conclusion.* The $7.5 million of remuneration for which a deduction is disallowed under section 162(m)(1) is taken into account for purposes of determining ATEO 3's five highest-compensated employees. Thus, ATEO 3 is treated as paying Employee B $8.5 million of remuneration for purposes of determining its five highest-compensated employees.

(iv) *Example 4 (Employee disregarded due to receiving no remuneration)*—(A) *Facts.* Employee C is an officer of ATEO 4 who performs more than minor services for ATEO 4. In 2022, neither ATEO 4 nor any related organization paid remuneration or granted a legally binding right to any nonvested remuneration to Employee C. ATEO 4 paid premiums for insurance for liability arising from Employee C's service with ATEO 4, which is properly treated as a working condition fringe benefit excluded from gross income under § 1.132–5.

(B) *Conclusion.* Even though Employee C is an employee of ATEO 4, Employee C is disregarded for purposes of determining ATEO 4's five highest-compensated employees for taxable year 2022 under paragraph (d)(2)(i) of this section because neither ATEO 4 nor any related organization paid Employee C any remuneration (nor did they grant a legally binding right to nonvested remuneration) in applicable year 2022. The working condition fringe benefit is not wages within the meaning of section 3401(a), as provided in section 3401(a)(19), and thus is not remuneration within the meaning of § 53.4960–2(a).

(v) *Example 5 (Limited hours exception)*—(A) *Facts.* ATEO 5 and CORP 3 are related organizations. ATEO 5 has no other related organizations. Employee D is an employee of CORP 3. As part of Employee D's duties at CORP 3, Employee D serves as an officer of ATEO 5. Only CORP 3 paid remuneration (or granted a legally binding right to nonvested remuneration) to Employee D and ATEO 5 did not reimburse CORP 3 for any portion of Employee D's remuneration in any manner. During 2022, Employee D provided services as an employee for 2,000 hours to CORP 3 and 200 hours to ATEO 5.

(B) *Conclusion.* Even though Employee D is an employee of ATEO 5 because Employee D provided more than minor services as an officer, Employee D is disregarded for purposes of determining ATEO 5's five highest-compensated employees for taxable year 2022. Employee D is disregarded under

paragraph (d)(2)(ii) of this section because only CORP 3 paid Employee D any remuneration or granted a legally binding right to nonvested remuneration in applicable year 2022 and Employee D provided services as an employee of ATEO 5 for 200 hours, which is not more than ten percent of the 2,200 total hours (2,000 + 200 = 2,200) worked as an employee of ATEO 5 and all related organizations.

(vi) *Example 6 (Limited hours exception)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(v) of this section (*Example 5*), except that ATEO 5 also provides a reasonable allowance for expenses incurred by Employee D in executing Employee D's duties as an officer of ATEO 5, which is properly excluded from gross income under an accountable plan described in § 1.62–2.

(B) *Conclusion.* The conclusion is the same as in paragraph (d)(3)(v)(B) of this section (*Example 5*). Specifically, even though Employee D is an employee of ATEO 5 because Employee D provided more than minor services for ATEO 5, Employee D is disregarded for purposes of determining ATEO 5's five highest-compensated employees for taxable year 2022 under paragraph (d)(2)(ii) of this section because the expense allowance under the accountable plan is excluded from wages within the meaning of section 3401(a), as provided in § 31.3401(a)-4, and thus is not remuneration within the meaning of § 53.4960–2(a).

(vii) *Example 7 (No exception applies due to source of payment)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(v) of this section (*Example 5*), except that ATEO 5 has a contractual arrangement with CORP 3 to reimburse CORP 3 for the hours of service Employee D provides to ATEO 5 during applicable year 2022 by paying an amount equal to the total remuneration received by Employee D from both ATEO 5 and CORP 3, multiplied by a fraction equal to the hours of service Employee D provided ATEO 5 over Employee D's total hours of service to both ATEO 5 and CORP 3.

(B) *Conclusion.* Employee D may be one of ATEO 5's five highest-compensated employees for taxable year 2022 under paragraph (d)(2)(i) of this section because the exceptions in paragraphs (d)(2)(ii) through (iv) of this section do not apply. Pursuant to the contractual arrangement between CORP 3 and ATEO 5, ATEO 5 reimburses CORP 3 for a portion of Employee D's remuneration during applicable year 2022; thus, the exceptions under paragraphs (d)(2)(ii) and (iii) of this section do not apply. Further, while ATEO 5 paid Employee D less than 10 percent of the total remuneration from ATEO 5 and all related organizations (200 hours of service to ATEO 5/2,200 hours of service to ATEO 5 and all related organizations = 9 percent), it had no related ATEO; thus, the limited services exception under paragraph (d)(2)(iv) of this section does not apply.

(viii) *Example 8 (Nonexempt funds exception for part-time services)*—(A) *Facts.* ATEO 6 and CORP 4 are related organizations. ATEO 6 has no other related organizations and does not control CORP 4. During applicable year 2022, Employee E provided 2,000 hours of services as an employee of CORP 4 and 0 hours of services as an employee of ATEO 6; during applicable year 2023, Employee E provided 1,100 hours of services as an employee of CORP 4 and 900 hours of services as an employee of ATEO 6; during applicable year 2024, Employee E provided 1,100 hours of services as an employee of CORP 4 and 900 hours of services as an employee of ATEO 6. ATEO 6 neither paid any remuneration to Employee E nor paid a fee for services to CORP 4 during any applicable year. No exception under paragraphs (d)(2)(i), (ii), or (iv) applies to Employee E.

(B) *Conclusion (2023).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2023 under paragraph (d)(2)(iii) of this section because for applicable years 2022 and 2023, Employee E provided services as an employee of ATEO 6 for not more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (900 hours/4,000 hours), and ATEO 6 neither paid any remuneration to Employee E nor paid a fee for services to CORP 4 during applicable years 2022 and 2023.

(C) *Conclusion (2024).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2024 under paragraph (d)(2)(iii) of this section because for applicable years 2023 and 2024, Employee E provided services as an employee of ATEO 6 for not more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (1,800 hours/4,000 hours), and ATEO 6 neither paid any remuneration to Employee E nor paid a fee for services to CORP 4 during applicable years 2023 and 2024.

(ix) *Example 9 (Nonexempt funds for full-time services in one applicable year)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(viii) of this section (*Example 8),* except that during applicable year 2022, Employee E provided services as an employee for 2,000 hours to CORP 4 and for 0 hours to ATEO 6; during applicable year 2023, Employee E provided services as an employee for 0 hours to CORP 4 and 2,000 hours to ATEO 6; and during applicable year 2024, Employee E resumes employment with CORP 4 so that Employee E provided services as an employee for 2,000 hours to CORP 4 and 0 hours to ATEO 6.

(B) *Conclusion (2023).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2023 under paragraph (d)(2)(iii) of this section because for applicable years 2022 and 2023, Employee E provided services as an employee of ATEO 6 for not more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (2,000 hours/4,000 hours), and ATEO 6 neither paid any remuneration to Employee E nor paid a fee for services to CORP 4 during applicable years 2022 and 2023.

(C) *Conclusion (2024).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2024 under paragraph (d)(2)(iii) of this section because for applicable years 2023 and 2024, Employee E provided services as an employee of ATEO 6 for not more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (2,000 hours/4,000 hours for ATEO 6 and CORP 4), and ATEO 6 neither paid any remuneration to Employee E nor paid a fee for services to CORP 4 during applicable years 2023 and 2024.

(x) *Example 10 (Nonexempt funds exception for full-time services across two applicable years)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(viii)(A) of this section (*Example 8),* except that during applicable year 2022, Employee E provided services as an employee for 2,000 hours to CORP 4 and for 0 hours to ATEO 6; during applicable year 2023, Employee E provided services as an employee for 600 hours to CORP 4 and for 1,400 hours to ATEO 6; and during applicable year 2024, Employee E provided services as an employee for 1,400 hours to CORP 4 and for 600 hours to ATEO 6.

(B) *Conclusion (2023).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2023 under paragraph (d)(2)(iii) of this section because for applicable years 2022 and 2023, Employee E provided services as an employee of ATEO 6 for not more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (1,400 hours/4,000 hours), and ATEO 6 neither

paid any remuneration to Employee E, nor paid a fee for services to CORP 4 during applicable years 2022 and 2023.

(C) *Conclusion (2024).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2024 under paragraph (d)(2)(iii) of this section because for applicable years 2023 and 2024, Employee E provided services as an employee of ATEO 6 for not more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (2,000 hours/4,000 hours), and ATEO 6 neither paid any remuneration to Employee E, nor paid a fee for services to CORP 4 during applicable years 2023 and 2024.

(xi) *Example 11 (Failure under the nonexempt funds exception)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(viii)(A) of this section (*Example 8),* except that during applicable year 2022, Employee E provided services as an employee for 2,000 hours to CORP 4 and for 0 hours to ATEO 6; during applicable year 2023, Employee E provided services as an employee for 600 hours to CORP 4 and for 1,400 hours to ATEO 6; and during applicable year 2024, Employee E provided services as an employee for 1,300 hours to CORP 4 and for 700 hours to ATEO 6.

(B) *Conclusion (2023).* Employee E is disregarded for purposes of determining ATEO 6's five highest-compensated employees for taxable year 2023 under paragraph (d)(2)(iii) of this section because for applicable years 2022 and 2023, Employee E provided services as an employee of ATEO 6 for less than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (1,400 hours/4,000 hours), and ATEO 6 neither paid any remuneration to Employee E, nor paid a fee for services to CORP 4 during applicable years 2022 and 2023.

(C) *Conclusion (2024).* Employee E may be a covered employee of ATEO 6 as one of its five highest-compensated employees for taxable year 2024 because the requirements under paragraph (d)(2)(iii) are not met and no other exception applies. For applicable years 2023 and 2024, Employee E provided services as an employee of ATEO 6 for more than 50 percent of the total hours Employee E provided services as an employee of ATEO 6 and CORP 4 (2,100 hours/4,000 hours).

(xii) *Example 12 (Limited services exception)*—(A) *Facts.* ATEO 7, ATEO 8, ATEO 9, and ATEO 10 are a group of related organizations, none of which have any other related organizations. During 2022, Employee F is an employee of ATEO 7, ATEO 8, ATEO 9, and ATEO 10. During applicable year 2022, ATEO 7 paid 5 percent of Employee F's remuneration, ATEO 8 paid 10 percent of Employee F's remuneration, ATEO 9 paid 25 percent of Employee F's remuneration, and ATEO 10 paid 60 percent of Employee F's remuneration. No exception under paragraph (d)(2)(i), (ii), or (iii) applies to Employee F for any of ATEO 7, ATEO 8, ATEO 9, or ATEO 10.

(B) *Conclusion (ATEO 7).* Employee F is disregarded for purposes of determining ATEO 7's five highest-compensated employees for taxable year 2022 under paragraph (d)(2)(iv) of this section because ATEO 7 paid less than 10 percent of Employee F's total remuneration from ATEO 7 and all related organizations during applicable year 2022, and another related ATEO paid at least 10 percent of that total remuneration.

(C) *Conclusion (ATEO 8, ATEO 9, and ATEO 10).* Employee F may be a covered employee of ATEO 8, ATEO 9, and ATEO 10 as one of their respective five highest-compensated employees for their taxable years 2022 because each of those ATEOs paid 10 percent or more of Employee F's remuneration during the 2022 applicable year. Thus, the limited services exception under paragraph (d)(2)(iv) of this section does not apply.

(xiii) *Example 13 (Limited services exception if no ATEO paid at least 10 percent of remuneration)*—(A) *Facts.* Assume the same facts as in paragraph (d)(3)(xii) of this section (*Example 12*), except that for applicable year 2022, ATEO 7 paid 6 percent of F's remuneration, ATEO 8, ATEO 9, and ATEO 10 each paid 5 percent of Employee F's remuneration, and Employee F also works as an employee of CORP 5, a related organization of ATEO 7, ATEO 8, ATEO 9, and ATEO 10 that paid 79 percent of Employee F's remuneration for applicable year 2022.

(B) *Conclusion (ATEO 7).* Employee F may be one of ATEO 7's five highest-compensated employees for taxable year 2022. Although ATEO 7 did not pay Employee F 10 percent or more of the total remuneration paid by ATEO 7 and all of its related organizations, no related ATEO paid more than 10 percent of Employee F's remuneration, and ATEO 7 did not pay less remuneration to Employee F than at least one related ATEO. Thus, the limited services exception under paragraph (d)(2)(iv) of this section does not apply, and Employee F may be one of ATEO 7's five highest-compensated employees because ATEO 7 paid Employee F more remuneration than any other related ATEO.

(C) *Conclusion (ATEO 8, ATEO 9, and ATEO 10).* Employee F is disregarded for purposes of determining the five highest-compensated employees of ATEO 8, ATEO 9, and ATEO 10 for taxable year 2022 under paragraph (d)(2)(iv) of this section because none paid 10 percent or more of Employee F's total remuneration, each had no related ATEO that paid at least 10 percent of Employee F's total remuneration, and each paid less remuneration than at least one related ATEO (ATEO 7).

(e) *Employee*—(1) *In general. Employee* means an employee as defined in section 3401(c) and § 31.3401(c)–1. Section 31.3401(c)–1 generally defines an employee as any individual performing services if the relationship between the individual and the person for whom the individual performs services is the legal relationship of employer and employee. As set forth in § 31.3401(c)–1, this includes common law employees, as well as officers and employees of government entities, whether or not elected. An employee generally also includes an officer of a corporation, but an officer of a corporation who as such does not perform any services or performs only minor services and who neither receives, nor is entitled to receive, any remuneration is not considered to be an employee of the corporation solely due to the individual's status as an officer of the corporation. Whether an individual is an employee depends on the facts and circumstances.

(2) *Directors.* A director of a corporation (or an individual holding a substantially similar position in a corporation or other entity) in the individual's capacity as such is not an employee of the corporation. See § 31.3401(c)–1(f).

(3) *Trustees.* The principles of paragraph (e)(2) of this section apply by analogy to a trustee of any arrangement classified as a trust for Federal tax purposes in § 301.7701–4(a).

(f) *Employer*—(1) *In general. Employer* means an employer within the meaning of section 3401(d), without regard to section 3401(d)(1) or (2), meaning generally the person or governmental entity for whom the services were performed as an employee. Whether a person or governmental entity is the employer depends on the facts and circumstances, but a person does not cease to be the employer through use of a payroll agent under section 3504, a common paymaster under section 3121(s), a person described in section 3401(d)(1) or (2), a certified professional employer

organization under section 7705, or any similar arrangement.

(2) *Disregarded entities.* In the case of a disregarded entity described in § 301.7701–3, § 301.7701–2(c)(2)(iv) does not apply; thus, the sole owner of the disregarded entity is treated as the employer of any individual performing services as an employee of the disregarded entity.

(g) *Medical services*—(1) *Medical and veterinary services*—(i) *In general. Medical services* means services directly performed by a licensed medical professional (as defined in paragraph (g)(2) of this section) for the diagnosis, cure, mitigation, treatment, or prevention of disease in humans or animals; services provided for the purpose of affecting any structure or function of the human or animal body; and other services integral to providing such medical services. For purposes of section 4960, teaching and research services are not medical services except to the extent that they involve the services performed to directly diagnose, cure, mitigate, treat, or prevent disease or affect a structure or function of the body. Administrative services may be integral to directly providing medical services. For example, documenting the care and condition of a patient is integral to providing medical services, as is accompanying another licensed professional as a supervisor while that medical professional provides medical services. However, managing an organization's operations, including scheduling, staffing, appraising employee performance, and other similar functions that may relate to a particular medical professional or professionals who perform medical services, is not integral to providing medical services. See § 53.4960–2(a)(2)(ii) for rules regarding allocating remuneration paid to a medical professional who performs both medical services and other services.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (g):

(A) *Example 1 (Administrative tasks that are integral to providing medical services)*—(*1*) *Facts.* Employee A is a doctor who is licensed to practice medicine in the state in which Employee A's place of employment is located. In the course of Employee A's practice, Employee A treats patients and performs some closely-related administrative tasks, such as examining and updating patient records.

(*2*) *Conclusion.* Employee A's administrative tasks are integral to providing medical services and thus are medical services.

(B) *Example 2 (Administrative tasks that are not integral to providing medical services)*—(*1*) *Facts.* Assume the same facts as in paragraph (g)(1)(ii)(A)(*1*) of this section (Example 1), except that Employee A also performs additional administrative tasks such as analyzing the budget, authorizing capital expenditures, and managing human resources for the organization by which Employee A is employed.

(*2*) *Conclusion.* Employee A's additional administrative tasks are not integral to providing medical services and thus are not medical services.

(C) *Example 3 (Teaching duties that are and are not medical services)*—(*1*) *Facts.* Employee B is a medical doctor who is licensed to practice medicine in the state in which her place of employment, a university hospital, is located. Employee B's duties include overseeing and teaching a group of resident physicians who have restricted licenses to practice medicine. Those duties include supervising and instructing the resident physicians while they treat patients and instruction in a classroom setting.

(*2*) *Conclusion.* Employee B's supervision and instruction of resident physicians during the course of patient treatment are necessary for the treatment, and thus are medical services. Employee B's classroom instruction is not necessary for patient treatment, and thus is not medical services.

(D) *Example 4 (Research services that are and are not medical services)*—(*1*) *Facts.* Employee C is a licensed medical doctor who is employed to work on a research trial. Employee C provides an experimental treatment to patients afflicted by a disease and performs certain closely-related administrative tasks that ordinarily are performed by a medical professional in a course of patient treatment. As part of the research trial, Employee C also compiles and analyzes patient results and prepares reports and articles that would not ordinarily be prepared by a medical professional in the course of patient treatment.

(*2*) *Conclusion.* Employee C's services that are ordinarily performed by a medical professional in a course of treatment, including closely-related administrative tasks, are medical services. Because the compilation and analysis of patient results and the formulation of reports and articles are neither services ordinarily performed by a medical professional in a course of treatment nor necessary for such treatment, these services are not medical services.

(2) *Definition of licensed medical professional. Licensed medical professional* means an individual who is licensed under applicable state or local law to perform medical services, including as a doctor, nurse, nurse practitioner, dentist, veterinarian, or other licensed medical professional.

(h) *Predecessor*—(1) *Asset acquisitions.* If an ATEO (acquiror) acquires at least 80 percent of the operating assets or total assets (determined by fair market value on the date of acquisition) of another ATEO (target), then the target is a predecessor of the acquiror. For an acquisition of assets that occurs over time, only assets acquired within a 12-month period are taken into account to determine whether at least 80 percent of the target's operating assets or total assets were acquired. However, this 12-month period is extended to include any continuous period that ends or begins on any day during which the acquiror has an arrangement to acquire directly or indirectly, assets of the target. Additions to the assets of target made as part of a plan or arrangement to avoid the application of this subsection to acquiror's purchase of target's assets are disregarded in applying this paragraph. This paragraph (h)(1) applies for purposes of determining whether an employee is a covered employee under paragraph (d)(1) of this section only with respect to a covered employee of the target who commences the performance of services for the acquiror (or a related organization with respect to the acquiror) within the period beginning 12 months before and ending 12 months after the date of the transaction as defined in paragraph (h)(7) of this section.

(2) *Corporate reorganizations.* A predecessor of an ATEO includes another separate ATEO the stock or assets of which are acquired in a corporate reorganization as defined in section 368(a)(1)(A), (C), (D), (E), (F), or (G) (including by reason of section 368(a)(2)).

(3) *Predecessor change of form or of place of organization.* An ATEO that restructured by changing its organizational form or place of organization (or both) is a predecessor of the restructured ATEO.

(4) *ATEO that becomes a non-ATEO*—(i) *General rule.* An organization is a predecessor of an ATEO if it ceases to be an ATEO and then again becomes an ATEO effective on or before the predecessor end date. The *predecessor end date* is the date that is 36 months following the date that the organization's Federal information return under section 6033 (or, for an

ATEO described in paragraph (b)(1)(ii) or (iii) of this section, its Federal income tax return under section 6011(a)) is due (or would be due if the organization were required to file), excluding any extension, for the last taxable year for which the organization previously was an ATEO. If the organization becomes an ATEO again effective after the predecessor end date, then the former ATEO is treated as a separate organization that is not a predecessor of the current ATEO.

(ii) *Intervening changes or entities.* If an ATEO that ceases to be an ATEO (former ATEO) would be treated as a predecessor to an organization that becomes an ATEO before the predecessor end date (successor ATEO), and if the former ATEO would be treated as a predecessor to each intervening entity (if such intervening entities had been ATEOs) under the rules of this paragraph (h), then the former ATEO is a predecessor of the successor ATEO. For example, if ATEO 1 loses its tax-exempt status and then merges into Corporation X, Corporation X then merges into Corporation Y, and Corporation Y becomes an ATEO before the predecessor end date, then ATEO 1 is a predecessor of Corporation Y.

(5) *Predecessor of a predecessor.* A reference to a predecessor includes any predecessor or predecessors of such predecessor, as determined under these rules.

(6) *Elections under sections 336(e) and 338.* For purposes of this paragraph (h), when an ATEO organized as a corporation makes an election to treat as an asset purchase either the sale, exchange, or distribution of stock pursuant to regulations under section 336(e) or the purchase of stock pursuant to regulations under section 338, the corporation that issued the stock is treated as the same corporation both before and after such transaction.

(7) *Date of transaction.* For purposes of this paragraph (h), the date that a transaction is treated as having occurred is the date on which all events necessary to complete the transaction described in the relevant provision have occurred.

(i) *Related organization*—(1) *In general. Related organization* means any person or governmental entity, domestic or foreign, that meets any of the following tests:

(i) *Controls or controlled by test.* The person or governmental entity controls, or is controlled by, the ATEO;

(ii) *Controlled by same persons test.* The person or governmental entity is controlled by one or more persons that control the ATEO;

(iii) *Supported organization test.* The person or governmental entity is a supported organization (as defined in section 509(f)(3)) with respect to the ATEO;

(iv) *Supporting organization test.* The person or governmental entity is a supporting organization described in section 509(a)(3) with respect to the ATEO; or

(v) *VEBA test.* With regard to an ATEO that is a voluntary employees' beneficiary association (VEBA) described in section 501(c)(9), the person or governmental entity establishes, maintains, or makes contributions to such VEBA.

(2) *Control*—(i) *In general.* Control may be direct or indirect. For rules concerning application of the principles of section 318 in applying this paragraph (i)(2), see paragraph (i)(2)(vii) of this section.

(ii) *Stock corporation.* A person or governmental entity controls a stock corporation if it owns (by vote or value) more than 50 percent of the stock in the stock corporation.

(iii) *Partnership.* A person or governmental entity controls a partnership if it owns more than 50 percent of the profits interests or capital interests in the partnership, determined in accordance with the rules and principles of § 1.706–1(b)(4)(ii) for a partner's interest in the profits of a partnership and § 1.706–1(b)(4)(iii) for a partner's interest in the capital of a partnership.

(iv) *Trust.* A person or governmental entity controls a trust if it owns more than 50 percent of the beneficial interests in the trust, determined by actuarial value.

(v) *Nonstock organization*—(A) *In general.* A person or governmental entity controls a nonstock organization if more than 50 percent of the trustees or directors of the nonstock organization are either representatives of, or directly or indirectly controlled by, the person or governmental entity. A *nonstock organization* is a nonprofit organization or other organization without owners and includes a governmental entity.

(B) *Control of a trustee or director of a nonstock organization.* A person or governmental entity controls a trustee or director of the nonstock organization if the person or governmental entity has the power (either at will or at regular intervals) to remove such trustee or director and designate a new one.

(C) *Representatives.* Trustees, directors, officers, employees, or agents of a person or governmental entity are deemed representatives of the person or governmental entity. However, an employee of a person or governmental entity (other than a trustee, director, or officer, or an employee who possesses at least the authority commonly exercised by an officer) who is a director or trustee of a nonstock organization (or acting in that capacity) will not be treated as a representative of the person or governmental entity if the employee does not act as a representative of the person or governmental entity and that fact is reported in the form and manner prescribed by the Commissioner in forms and instructions.

(vi) *Brother-sister related organizations.* Under paragraph (i)(1)(ii) of this section, an organization is a related organization with respect to an ATEO if one or more persons control both the ATEO and the other organization. In the case of control by multiple persons, the control tests described in this paragraph (i)(2) of this section apply to the persons as a group. For example, if 1,000 individuals who are members of both ATEO 1 and ATEO 2 elect a majority of the board members of each organization, then ATEO 1 and ATEO 2 are related to each other because the same group of 1,000 persons controls both ATEO 1 and ATEO 2.

(vii) *Section 318 principles*—(A) *In general.* Section 318 (relating to constructive ownership of stock) applies in determining ownership of stock in a corporation. The principles of section 318 also apply for purposes of determining ownership of interests in a partnership or in a trust with beneficial interests. For example, applying the principles of section 318(a)(1)(A), an individual is considered to own the partnership interest or trust interest owned, directly or indirectly, by or for the family members specified in such section.

(B) *Nonstock organizations*—(*1*) *Attribution of ownership interest from a nonstock organization to a controlling person.* If a person or governmental entity controls a nonstock organization, the person or governmental entity is treated as owning a percentage of the stock (or partnership interest or beneficial interest in a trust) owned by the nonstock organization in accordance with the percentage of trustees or directors of the nonstock organization that are representatives of, or directly or indirectly controlled by, the person or governmental entity.

(*2*) *Attribution of ownership interest from a controlling person to a nonstock organization.* If a person or governmental entity controls a nonstock organization, the nonstock organization is treated as owning a percentage of the stock (or partnership interest or beneficial interest in a trust) owned by the person or governmental entity in

accordance with the percentage of trustees or directors of the nonstock organization that are representatives of, or directly or indirectly controlled by, the person or governmental entity.

(*3*) *Indirect control of a nonstock organization through another nonstock organization.* If a person or governmental entity controls one nonstock organization that controls a second nonstock organization, the person or governmental entity is treated as controlling the second nonstock organization if the product of the percentage of trustees or directors of the first nonstock organization that are representatives of, or directly or indirectly controlled by, the person or governmental entity, multiplied by the percentage of trustees or directors of the second nonstock organization that are representatives of, or directly or indirectly controlled by, the person or governmental entity or first nonstock organization, exceeds 50 percent. Similar principles apply to successive tiers of nonstock organizations.

(*4*) *Attribution of control of nonstock organization to family member.* An individual's control of a nonstock organization or of a trustee or director of a nonstock organization is attributed to the members of the individual's family (as set forth in section 318(a)(1) and the regulations thereunder), subject to the limitation of section 318(a)(5)(B) and the regulations thereunder.

(3) *Examples.* The following examples illustrate the principles of this paragraph (i). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO and any entity referred to as ''CORP'' is not an ATEO.

(i) *Example 1 (Related through a chain of control)*—(A) *Facts.* ATEO 1, ATEO 2, and ATEO 3 are nonstock organizations. ATEO 3 owns 80 percent of the stock (by value) of corporation CORP 1. Eighty percent of ATEO 2's directors are representatives of ATEO 1. In addition, 80 percent of ATEO 3's directors are representatives of ATEO 1.

(B) *Conclusion.* ATEO 1 is a related organization with respect to ATEO 2 (and vice versa) because more than 50 percent of ATEO 2's directors are representatives of ATEO 1; thus, ATEO 1 controls ATEO 2. Based on the same analysis, ATEO 1 is also a related organization with respect to ATEO 3 (and vice versa). CORP 1 is a related organization with respect to ATEO 3 because, as the owner of more than 50 percent of CORP 1's stock, ATEO 3 controls CORP 1. Applying the principles of section 318, ATEO 1 is deemed to own 64 percent of the stock of CORP 1 (80 percent of ATEO 3's stock in CORP 1). Thus, CORP 1 is a related organization with respect to ATEO 1 because ATEO 1 controls CORP 1. ATEO 2 is a related organization with respect to ATEO 3, ATEO 3 is a related organization with respect to ATEO 2, and CORP 1 is a related organization with respect to ATEO 2 because ATEO 2, ATEO 3, and CORP 1 are all controlled by the same person (ATEO 1).

(ii) *Example 2 (Not related through a chain of control)*—(A) *Facts.* ATEO 4, ATEO 5, and ATEO 6 are nonstock organizations. Sixty percent of ATEO 5's directors are representatives of ATEO 4. In addition, 60 percent of ATEO 6's directors are representatives of ATEO 5, but none are representatives of ATEO 4.

(B) *Conclusion.* ATEO 4 is a related organization with respect to ATEO 5 (and vice versa) because more than 50 percent of ATEO 5's directors are representatives of ATEO 4; thus, ATEO 4 controls ATEO 5. Based on the same analysis, ATEO 6 is a related organization with respect to ATEO 5 (and vice versa). Applying the principles of section 318, ATEO 4 is deemed to control 36 percent of ATEO 6's directors (60 percent of ATEO 5's 60 percent control over ATEO 6). Because less than 50 percent of ATEO 6's directors are representatives of ATEO 4, and absent any facts suggesting that ATEO 4 directly or indirectly controls ATEO 6, ATEO 4 and ATEO 6 are not related organizations with respect to each other.

§ 53.4960–2 Determination of remuneration paid for a taxable year.

(a) *Remuneration*—(1) *In general.* For purposes of section 4960, *remuneration* means any amount that is wages as defined in section 3401(a), excluding any designated Roth contribution (as defined in section 402A(c)) and including any amount required to be included in gross income under section 457(f). Remuneration includes amounts includible in gross income as compensation for services as an employee pursuant to a below-market loan described in section 7872(c)(1)(B)(i) (compensation-related loans) but does not include amounts excepted by section 7872(c)(3) ($10,000 de minimis exception). For example, see § 1.7872–15(e)(1)(i). Director's fees paid by a corporation to a director of the corporation are not remuneration, provided that if the director is also an employee of the corporation, the director's fees are excluded from remuneration only to the extent that they do not exceed fees paid to a director who is not an employee of the corporation or any related organization or, if there is no such director, they do not exceed reasonable director's fees. Remuneration does not include any amount that vested or was paid by a taxpayer before the start of the taxpayer's first taxable year that began on or after January 1, 2018.

(2) *Exclusion of remuneration for medical services*—(i) *In general. Remuneration* does not include the portion of any remuneration paid to a licensed medical professional that is for the performance of medical services by such professional.

(ii) *Allocation of remuneration for medical services and non-medical services.* If, during an applicable year, an employer pays a covered employee remuneration for providing both medical services and non-medical services, the employer must make a reasonable, good faith allocation between the remuneration for medical services and the remuneration for non-medical services. For example, if a medical doctor receives current remuneration (or vests in remuneration under a deferred compensation plan) for providing medical services and administrative or management services, the employer must make a reasonable, good faith allocation between the remuneration for the medical services and the remuneration for the administrative or management services. For this purpose, if an employment agreement or similar written arrangement sets forth the remuneration to be paid for particular services, that allocation of remuneration applies unless the facts and circumstances demonstrate that the amount allocated to medical services is unreasonable for those services or that the allocation was established for purposes of avoiding application of the excise tax under section 4960. If some or all of the remuneration is not reasonably allocated in an employment agreement or similar arrangement, an employer may use any reasonable allocation method. For example, an employer may use a representative sample of records, such as patient, insurance, and Medicare/Medicaid billing records or internal time reporting mechanisms to determine the time spent providing medical services, and then allocate remuneration to medical services in the proportion such time bears to the total hours the employee worked for the employer (and any related employer) for purposes of making a reasonable allocation of remuneration. Similarly, if some or all of the remuneration is not reasonably allocated in an employment agreement or other similar arrangement, an employer may use salaries or other remuneration paid by the employer or similarly situated employers for duties

comparable to those the employee performs (for example, hospital administrator and physician) for purposes of making a reasonable allocation between remuneration for providing medical services and for providing non-medical services.

(iii) *Examples.* The following examples illustrate the rules of this paragraph (a)(2). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO.

(A) *Example 1 (Allocation based on employment agreement)*—(*1*) *Facts.* Employee A is a covered employee of ATEO 1. Employee A is a licensed medical professional who provides patient care services for ATEO 1 and also provides management and administrative services to ATEO 1 as the manager of a medical practice group within ATEO 1. The employment agreement between ATEO 1 and Employee A specifies that of Employee A's salary, 30 percent is allocable to Employee A's services as manager of the medical practice group and 70 percent is allocable to Employee A's services as a medical professional providing patient care services. The facts regarding Employee A's employment indicate the employment agreement provides a reasonable allocation and that the allocation was not established for purposes of avoiding application of the excise tax.

(*2*) *Conclusion.* Consistent with Employee A's employment agreement, ATEO 1 must allocate 30 percent of Employee A's salary to the provision of non-medical services and 70 percent of Employee A's salary to the provision of medical services. Accordingly, only the 30 percent portion of Employee A's salary allocated to the other, non-medical services is remuneration for purposes of paragraph (a) of this section.

(B) *Example 2 (Allocation based on billing records)*—(*1*) *Facts.* Assume the same facts as in paragraph (a)(2)(iii)(A) of this section (Example 1), except that the employment agreement does not allocate Employee A's salary between medical and non-medical services performed by Employee A. Based on a representative sample of insurance and Medicare billing records, as well as time reports that Employee A submits to ATEO 1, ATEO 1 determines that Employee A spends 50 percent of her work hours providing patient care and 50 percent of her work hours performing administrative and management services. ATEO 1 allocates 50 percent of Employee A's remuneration to medical services.

(*2*) *Conclusion.* ATEO 1's allocation of Employee A's salary is a reasonable, good faith allocation. Accordingly, only the 50 percent portion of Employee A's remuneration allocated to the non-medical services is remuneration for purposes of paragraph (a) of this section.

(b) *Source of payment.* For purposes of this section, the determination of the source of a payment of remuneration may involve the application of one or both of two separate rules described in this paragraph (b). Paragraph (b)(1) of this section addresses payments by a third party for services performed as an employee of a separate employer entity, while paragraph (b)(2) of this section addresses the application of section 4960(c)(4)(A) to treat certain remuneration paid by a related organization (after application of paragraph (b)(1) of this section, if applicable) as paid by the ATEO.

(1) *Remuneration paid by a third party for employment by an employer.* Remuneration paid (or a grant of a legally binding right to nonvested remuneration) by a third-party payor (whether a related organization, payroll agent, agent designated under section 3504, certified professional employer organization under section 7705, or other entity) during an applicable year for services performed as an employee of an employer is remuneration paid (or payable) by the employer, except as otherwise provided in § 53.4960–1(d)(2)(ii) and (iii).

(2) *Remuneration paid by a related organization for employment by the related organization.* Pursuant to section 4960(c)(4)(A), remuneration paid (or a grant of a legally binding right to nonvested remuneration) by a related organization to an ATEO's employee during an applicable year for services performed as an employee of the related organization is treated as remuneration paid (or payable) by the ATEO, except as otherwise provided in § 53.4960–1(d)(2)(ii) and (iii).

(c) *Applicable year in which remuneration is treated as paid*—(1) *In general.* Remuneration that is a regular wage within the meaning of § 31.3402(g)–1(a)(1)(ii) is treated as paid on the date it is actually or constructively paid and all other remuneration is treated as paid on the first date on which the remuneration is vested.

(2) *Vested remuneration.* Remuneration is *vested* if it is not subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B) (regardless of whether the arrangement under which the remuneration is to be paid is deferred compensation described in section 457(f) or 409A). In general, an amount is subject to a substantial risk of forfeiture if entitlement to the amount is conditioned on the future performance of substantial services or upon the occurrence of a condition that is related to a purpose of the remuneration if the possibility of forfeiture is substantial. Except as provided in paragraph (c)(1) of this section, remuneration that is never subject to a substantial risk of forfeiture is considered paid on the first date the service provider has a legally binding right to the payment. For purposes of this section, a *plan* means a plan within the meaning of § 1.409A–1(c), an *account balance plan* means an account balance plan within the meaning of § 1.409A–1(c)(2)(i)(A), and a *nonaccount balance plan* means a nonaccount balance plan within the meaning of § 1.409A–1(c)(2)(i)(C). Net earnings on previously paid remuneration (described in paragraph (d)(2) of this section) that are not subject to a substantial risk of forfeiture are vested (and, thus, treated as paid) at the earlier of the date actually or constructively paid to the employee or the close of the applicable year in which they accrue. For example, the present value of a principal amount accrued to an employee's account under an account balance plan (under which the earnings and losses attributed to the account are based solely on a predetermined actual investment as determined under § 31.3121(v)(2)–1(d)(2)(i)(B) or a reasonable market interest rate) is treated as paid on the date vested, but the present value of any net earnings subsequently accrued on that amount (the increase in value due to the predetermined actual investment or a reasonable market interest rate) is treated as paid at the close of the applicable year in which they accrue. Similarly, while the present value of an amount accrued under a nonaccount balance (including earnings that accrued while the amount was nonvested) is treated as paid on the date it is first vested, the present value of the net earnings on that amount (the increase in the present value) is treated as paid at the close of the applicable year in which they accrue.

(3) *Change in related status during the year.* If a taxpayer becomes or ceases to be a related organization with respect to an ATEO during an applicable year, then only the remuneration paid by the taxpayer to an employee with respect to services performed as an employee of the related organization during the portion of the applicable year during which the employer is a related organization is treated as paid by the ATEO. If an amount is treated as paid due to vesting in the year the taxpayer becomes or ceases to be a related

organization with respect to the ATEO, then the amount is treated as paid by the ATEO only if the amount becomes vested during the portion of the applicable year that the taxpayer is a related organization with respect to the ATEO.

(d) *Amount of remuneration treated as paid*—(1) *In general.* For each applicable year, the amount of remuneration treated as paid by the employer to a covered employee is the sum of regular wages within the meaning of § 31.3402(g)–1(a)(1)(ii) actually or constructively paid during the applicable year and the present value (as determined under paragraph (e) of this section) of all other remuneration that vested during the applicable year. The amount of remuneration that vests during an applicable year is determined on an employer-by-employer basis with respect to each covered employee.

(2) *Earnings and losses on previously paid remuneration*—(i) *In general.* The amount of net earnings or losses on previously paid remuneration paid by an employer is determined on an employee-by-employee basis, such that amounts accrued with regard to one employee do not affect amounts accrued with regard to a different employee. Similarly, losses accrued on previously paid remuneration from one employer do not offset earnings accrued on previously paid remuneration from another employer. The amount of net earnings or losses on previously paid remuneration paid by the employer is determined on a net aggregate basis for all plans maintained by the employer in which the employee participates for each applicable year. For example, losses under an account balance plan may offset earnings under a nonaccount balance plan for the same applicable year maintained by the same employer for the same employee.

(ii) *Previously paid remuneration*—(A) *New covered employee.* For an individual who was not a covered employee for any prior applicable year, *previously paid remuneration* means, for the applicable year for which the individual becomes a covered employee, the present value of vested remuneration that was not actually or constructively paid or otherwise includible in the employee's gross income before the start of the applicable year plus any remuneration that vested during the applicable year but that is not actually or constructively paid or otherwise includible in the employee's gross income before the close of the applicable year.

(B) *Existing covered employee.* For an individual who was a covered employee for any prior applicable year, *previously paid remuneration* means, for each applicable year, the amount of remuneration that the employer treated as paid in the applicable year or for a prior applicable year but that is not actually or constructively paid or otherwise includible in the employee's gross income before the close of the applicable year. Actual or constructive payment or another event causing an amount of previously paid remuneration to be includible in the employee's gross income thus reduces the amount of previously paid remuneration.

(iii) *Earnings. Earnings* means any increase in the vested present value of previously paid remuneration as of the close of the applicable year, regardless of whether the plan denominates the increase as earnings. For example, an increase in the vested account balance of a nonqualified deferred compensation plan based solely on the investment return of a predetermined actual investment (and disregarding any additional contributions) constitutes earnings. Similarly, an increase in the vested present value of a benefit under a nonqualified nonaccount balance plan due solely to the passage of time (and disregarding any additional benefit accruals) constitutes earnings. However, an increase in an account balance of a nonqualified deferred compensation plan due to a salary reduction contribution or an employer contribution does not constitute earnings (and therefore may not be offset with losses). Likewise, an increase in the benefit under a nonaccount balance plan due to an additional year of service or an increase in compensation that is reflected in a benefit formula does not constitute earnings.

(iv) *Losses. Losses* means any decrease in the vested present value of previously paid remuneration as of the close of the applicable year, regardless of whether the plan denominates that decrease as losses.

(v) *Net earnings. Net earnings* means, for each applicable year, the amount (if any) by which the earnings accrued for the applicable year on previously paid remuneration exceeds the sum of the losses accrued on previously paid remuneration for the applicable year and any net losses carried forward from a previous taxable year.

(vi) *Net losses. Net losses* means, for each applicable year, the amount (if any) by which the sum of the losses accrued on previously paid remuneration for the applicable year and any net losses carried forward from a previous taxable year exceed the earnings accrued for the applicable year on previously paid remuneration. Losses may only be used to offset earnings and thus do not reduce the remuneration treated as paid for an applicable year except to the extent of the earnings accrued for that applicable year. However, with regard to a covered employee, an employer may carry net losses forward to the next applicable year and offset vested earnings for purposes of determining net earnings or losses for that subsequent applicable year. For example, if a covered employee who participates in a nonaccount balance plan and an account balance plan vests in an amount of earnings under the nonaccount balance plan and has losses under the account balance plan that exceed the vested earnings treated as remuneration under the nonaccount balance plan, those excess losses are carried forward to the next applicable year and offset vested earnings for purposes of determining net earnings or losses for that applicable year. If, for the next applicable year, there are not sufficient earnings to offset the entire amount of losses carried forward from the previous year (and any additional losses), the offset process repeats for each subsequent applicable year until there are sufficient earnings for the applicable year to offset any remaining losses carried forward.

(3) *Remuneration paid for a taxable year before the employee becomes a covered employee*—(i) *In general.* In accordance with the payment timing rules of paragraph (c) of this section, any remuneration that is vested but is not actually or constructively paid or otherwise includible in an employee's gross income as of the close of the applicable year for the taxable year immediately preceding the taxable year in which the employee first becomes a covered employee of an ATEO is treated as previously paid remuneration for the taxable year in which the employee first becomes a covered employee. Net losses on this previously paid remuneration from any preceding applicable year do not carry forward to subsequent applicable years. However, net earnings and losses that vest on such previously paid remuneration in subsequent applicable years are treated as remuneration paid for a taxable year for which the employee is a covered employee.

(ii) *Examples.* The following examples illustrate the rules of this paragraph (d)(3). For purposes of these examples, assume any organization described as ''ATEO'' is an ATEO.

(A) *Example 1 (Earnings on pre-covered employee remuneration)*—(*1*) *Facts.* ATEO 1 uses a taxable year

beginning July 1 and ending June 30. Employee A becomes a covered employee of ATEO 1 for the taxable year beginning July 1, 2023, and ending June 30, 2024. During the 2022 applicable year, Employee A vests in $1 million of nonqualified deferred compensation. As of December 31, 2022, the present value of the amount deferred under the plan is $1.1 million. During the 2023 applicable year, ATEO 1 pays Employee A $1 million in regular wages. The present value as of December 31, 2023, of Employee A's nonqualified deferred compensation is $1.3 million.

(*2*) *Conclusion (Taxable year beginning July 1, 2022, and ending June 30, 2023).* ATEO 1 pays Employee A $1.1 million of remuneration in the 2022 applicable year. This is comprised of $1 million of vested nonqualified deferred compensation, and $100,000 of earnings, all of which is treated as paid for the taxable year beginning July 1, 2022, and ending June 30, 2023.

(*3*) *Conclusion (Taxable year beginning July 1, 2023, and ending June 30, 2024).* ATEO 1 pays Employee A $1.2 million of remuneration in the 2023 applicable year. This is comprised of $1 million regular wages and $200,000 of earnings ($1.3 million present value as of December 31, 2023, minus $1.1 million previously paid remuneration as of December 31, 2022).

(B) *Example 2 (Losses on pre-covered employee remuneration)*—(*1*) *Facts.* Assume the same facts as in paragraph (d)(3)(ii)(A) of this section (Example 1), except that the present value of the nonqualified deferred compensation as of December 31, 2022, is $900,000.

(*2*) *Conclusion (Taxable year beginning July 1, 2022, and ending June 30, 2023).* ATEO 1 pays Employee A $1 million of remuneration in the 2022 applicable year. This is comprised of $1 million of vested nonqualified deferred compensation. The present value of all vested deferred compensation as of December 31 of the 2022 applicable year ($900,000) is treated as previously paid remuneration for the next applicable year (as Employee A is a covered employee for the next taxable year). The $100,000 of losses accrued while Employee A was not a covered employee do not carry forward to the next applicable year.

(*3*) *Conclusion (Taxable year beginning July 1, 2023, and ending June 30, 2024).* ATEO 1 pays Employee A $1.4 million of remuneration in the 2023 applicable year. This is comprised of $1 million cash and $400,000 of earnings ($1.3 million present value as of December 31, 2023, minus $900,000 previously paid remuneration).

(e) *Calculation of present value*—(1) *In general.* The employer must determine present value using reasonable actuarial assumptions regarding the amount, time, and probability that a payment will be made. For this purpose, a discount for the probability that an employee will die before commencement of benefit payments is permitted, but only to the extent that benefits will be forfeited upon death. The present value may not be discounted for the probability that payments will not be made (or will be reduced) because of the unfunded status of the plan; the risk associated with any deemed or actual investment of amounts deferred under the plan; the risk that the employer, the trustee, or another party will be unwilling or unable to pay; the possibility of future plan amendments; the possibility of a future change in the law; or similar risks or contingencies. The present value of the right to future payments as of the vesting date includes any earnings that have accrued as of the vesting date that are not previously paid remuneration.

(2) *Treatment of future payment amount as present value for certain amounts.* For purposes of determining the present value of remuneration that is scheduled to be actually or constructively paid within 90 days of vesting, the employer may treat the future amount that is to be paid as the present value at vesting.

(f) *Examples.* The following examples illustrate the rules of this section. For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO, any entity referred to as ''CORP'' is not an ATEO, and all taxpayers use the calendar year as their taxable year.

(1) *Example 1 (Account balance plan)*—(i) *Facts.* Employee A is a covered employee of ATEO 1. Employee A participates in a nonqualified deferred compensation plan (the NQDC plan) in which the account balance is adjusted based on the investment returns on predetermined actual investments. On January 1, 2022, ATEO 1 credits $100,000 to Employee A's account under the plan, subject to the requirement that Employee A remain employed through June 30, 2024. On June 30, 2024, the vested account balance is $110,000. Due to earnings or losses on the account balance, the closing account balance on each of the following dates is: $115,000 on December 31, 2024, $120,000 on December 31, 2025, $100,000 on December 31, 2026, and $110,000 on December 31, 2027. During 2028, Employee A defers an additional $10,000 under the plan, all of which is vested at the time of deferral. On December 31, 2028, the closing account balance is $125,000. In 2029, ATEO 1 pays $10,000 to Employee A under the plan. On December 31, 2029, the closing account balance is $135,000 due to earnings on the account balance.

(ii) *Conclusion (2022 and 2023 applicable years—nonvested amounts).* For 2022 and 2023, ATEO 1 is not treated as paying Employee A any remuneration attributable to Employee A's participation in the NQDC plan because the amount deferred under the plan remains subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B).

(iii) *Conclusion (2024 applicable year—amounts in year of vesting).* For 2024, ATEO 1 is treated as paying Employee A $115,000 of remuneration attributable to Employee A's participation in the NQDC plan, including $110,000 of remuneration on June 30, 2024, when the amount becomes vested, and an additional $5,000 of remuneration on December 31, 2024, which is earnings on the previously paid remuneration ($110,000).

(iv) *Conclusion (2025 applicable year—earnings).* For 2025, ATEO 1 is treated as paying Employee A $5,000 of remuneration attributable to Employee A's participation in the NQDC plan, which is the additional earnings on the previously paid remuneration ($115,000) as of December 31, 2025.

(v) *Conclusion (2026 applicable year—losses).* For 2026, ATEO 1 is not treated as paying Employee A any remuneration attributable to Employee A's participation in the NQDC plan because the present value of the previously paid remuneration ($120,000) decreased to $100,000 as of December 31, 2026. The $20,000 loss for 2026 does not reduce any amount previously treated as remuneration but is available for carryover to subsequent taxable years to offset earnings.

(vi) *Conclusion (2027 applicable year—recovery of losses).* For 2027, ATEO 1 is not treated as paying Employee A any remuneration attributable to Employee A's participation in the NQDC plan because the present value of the previously paid remuneration ($120,000) was $110,000 as of December 31, 2027. Due to increases on the account balance, ATEO 1 recovers $10,000 of the $20,000 of losses carried over from 2026. The net losses as of December 31, 2027, are $10,000, and none of the $10,000 in earnings during 2027 is treated as remuneration paid in 2027.

(vii) *Conclusion (2028 applicable year—no recovery of losses against additional deferrals of compensation).*

For 2028, ATEO 1 is treated as paying Employee A $10,000 of remuneration attributable to Employee A's participation in the NQDC plan. The additional $10,000 deferral is vested and thus is treated as remuneration paid on the date credited to Employee A's account. This credit increases the amount of previously paid remuneration from $120,000 to $130,000. Additionally, due to earnings, ATEO 1 recovers $5,000 of the $10,000 loss carried over from 2027, none of which was remuneration paid for 2026, so that as of December 31, 2028, the net loss available for carryover to 2029 is $5,000.

(viii) *Conclusion (2029 applicable year—distributions, recovery of remainder of losses through earnings and additional earnings).* For 2029, ATEO 1 is treated as paying Employee A $15,000 of remuneration attributable to Employee A's participation in the NQDC plan. The $10,000 payment reduces the amount of previously paid remuneration (from $130,000 to $120,000) and the account balance (from $125,000 to $115,000). The present value of the vested account balance increases by $20,000 (from $115,000 to $135,000) as of December 31, 2029. Therefore, due to earnings, ATEO 1 recovers the remaining $5,000 loss carried over from 2028 (the difference between the $120,000 previously paid remuneration before earnings and the $115,000 account balance before earnings) and is treated as paying Employee A an additional $15,000 of remuneration as earnings (the difference between the $135,000 account balance after earnings and the $120,000 previously paid remuneration after loss recovery).

(2) *Example 2 (Nonaccount balance plan with earnings)*—(i) *Facts.* ATEO 2 and CORP 2 are related organizations. Employee B is a covered employee of ATEO 2 and is also employed by CORP 2. On January 1, 2022, CORP 2 and Employee B enter into an agreement under which CORP 2 will pay Employee B $100,000 on December 31, 2025, if B remains employed by CORP 2 through January 1, 2024. Employee B remains employed by CORP 2 through January 1, 2024. On January 1, 2024, the present value based on reasonable actuarial assumptions of the $100,000 to be paid on December 31, 2025, is $75,000. On December 31, 2024, the present value of the $100,000 future payment increases to $85,000 due solely to the passage of time. On December 31, 2025, CORP 2 pays Employee B $100,000.

(ii) *Conclusion (2022 and 2023 applicable years—nonvested amounts).* For 2022 and 2023, CORP 2 is not treated as paying Employee B any remuneration attributable to the agreement because the amount deferred under the agreement remains subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B).

(iii) *Conclusion (2024 applicable year—amounts in year of vesting).* For 2024, CORP 2 is treated as paying Employee B $75,000 of remuneration attributable to the agreement on January 1, 2024, which is the present value on that date of the $100,000 payable on December 31, 2025. In addition, CORP 2 is treated as paying Employee B $10,000 of remuneration attributable to the agreement on December 31, 2024, which is earnings based on the increase in the present value of the previously paid remuneration (from $75,000 to $85,000) as of December 31, 2024.

(iv) *Conclusion (2025 applicable year—earnings and distribution of previously paid remuneration).* For 2025, CORP 2 is treated as paying Employee B $15,000 in remuneration attributable to the agreement on December 31, 2025, which is earnings based on the increase in the present value of the previously paid remuneration (from $85,000 to $100,000) as of December 31, 2025. In addition, the $100,000 payment is treated as reducing the amount of previously paid remuneration ($100,000) to zero.

(3) *Example 3 (Treatment of amount payable as present value at vesting)*—(i) *Facts.* Employee C is a covered employee of ATEO 3. Under an agreement between ATEO 3 and Employee C, ATEO 3 agrees to pay Employee C $100,000 two months after the date Employee C meets a specified performance goal that is a substantial risk of forfeiture within the meaning of section 457(f)(3)(B). Employee C meets the performance goal on November 30, 2022, and ATEO 3 pays Employee C $100,000 on January 31, 2023. In accordance with § 53.4960–2(e)(2), because the payment is to be made within 90 days of vesting, ATEO 3 elects to treat the full payment amount as the amount of remuneration paid at vesting.

(ii) *Conclusion (2022 applicable year—election to treat amount payable within 90 days as paid at vesting).* For taxable year 2022, ATEO 3 is treated as paying Employee C $100,000 of remuneration attributable to the agreement. Employee C vests in the $100,000 payment in 2022 upon meeting the performance goal. Under the general rule, ATEO 3 would be treated as paying for the taxable year 2022 the present value as of November 30, 2022, of $100,000 payable on January 31, 2023 (two months after the date of vesting), with adjustments to the present value as of the end of the year. However, because ATEO 3 elected to treat the full $100,000 amount payable within 90 days of vesting as the remuneration paid, the $100,000 payable to Employee C in 2023 is treated as remuneration paid in 2022 (and no additional amount related to the $100,000 paid on January 31, 2023, is treated as remuneration paid in 2023).

(4) *Example 4 (Aggregation of remuneration from related organizations)*—(i) *Facts.* Employee D is a covered employee of ATEO 4 and also an employee of CORP 4 and CORP 5. ATEO 4, CORP 4, and CORP 5 are related organizations. ATEO 4, CORP 4, and CORP 5 each pay Employee D $200,000 of salary during 2022 and 2023. On January 1, 2022, ATEO 4 promises to pay Employee D $120,000 on December 31, 2023, under a nonaccount balance plan, the right to which is vested and the present value of which is $100,000 on January 1, 2022. On January 1, 2022, CORP 4 and CORP 5 each contribute $100,000 on Employee D's behalf to account balance plans of CORP 4 and CORP 5, respectively, under which all amounts deferred are vested. On December 31, 2022, the present value of the amounts deferred under the ATEO 4 plan is $110,000, the present value of the amounts deferred under the CORP 4 plan is $120,000, and the present value of the amounts deferred under the CORP 5 plan maintained is $90,000. On December 31, 2023, the present value of the amounts deferred under the ATEO 4 plan is $120,000, the present value of the amounts deferred under the CORP 4 plan is $130,000, and the present value of the amounts deferred under the CORP 5 plan is $110,000.

(ii) *Conclusion (2022 applicable year).* For 2022, before aggregation of remuneration paid by related organizations, ATEO 4 is treated as paying Employee D $310,000 of remuneration ($200,000 salary + $100,000 upon vesting of deferred amounts + $10,000 net earnings on vested deferred amounts). CORP 4 is treated as paying Employee D $320,000 of remuneration ($200,000 salary + $100,000 upon vesting of deferred amounts + $20,000 net earnings on vested deferred amounts). CORP 5 is treated as paying Employee D $300,000 of remuneration ($200,000 salary + $100,000 upon vesting of deferred amounts) and has $10,000 of net losses on vested deferred amounts, which are carried forward to 2023. Thus, ATEO 4 is treated as paying $930,000 of remuneration to Employee D for the applicable year.

(iii) *Conclusion (2023 applicable year).* For 2023, before aggregation of remuneration paid by related organizations, ATEO 4 is treated as paying Employee D $210,000 of remuneration ($200,000 salary + $10,000 earnings on previously paid remuneration). CORP 4 is treated as paying Employee D $210,000 of remuneration ($200,000 salary + $10,000 net earnings on previously paid remuneration). CORP 5 is treated as paying Employee D $210,000 of remuneration ($200,000 salary + $10,000 net earnings on previously paid remuneration after taking into account the loss carryforward). Thus, ATEO 4 is treated as paying $630,000 of remuneration to Employee D for the applicable year.

(5) *Example 5 (Treatment of regular wages for a pay period spanning applicable years)*—(i) *Facts.* ATEO 5 pays its employees' salaries in accordance with a two-week payroll period that begins Sunday of the first week and ends Saturday of the second week. Payment occurs the Friday following the end of the payroll period. The last payroll period of 2023 ends on December 31, 2023. For the last payroll period, Employee E earns $8,000 of salary. In addition, ATEO 5 awards Employee E a $10,000 bonus that vests on December 31, 2023. ATEO 5 pays Employee E $18,000 on Friday, January 5, 2024, reflecting Employee E's salary for the last payroll period of 2023 and the bonus, the right to which vested on December 31, 2023.

(ii) *Conclusion (Regular wages).* The $8,000 of salary is regular wages within the meaning of § 31.3402(g)–1(a)(1)(ii) because it is an amount paid at a periodic rate for the current payroll period. Thus, $8,000 is treated as remuneration paid on January 5, 2024 (when it is actually or constructively paid), and, therefore, is treated as remuneration paid in ATEO 5's 2024 applicable year.

(iii) *Conclusion (Amounts other than regular wages).* The $10,000 bonus is not regular wages within the meaning of § 31.3402(g)–1(a)(1)(ii) because it is not an amount paid at a periodic rate for the current payroll period. Thus, $10,000 is treated as remuneration paid on December 31, 2023 (when it is vested) and, therefore, is treated as remuneration paid in ATEO 5's 2023 applicable year.

§ 53.4960–3 Determination of whether there is a parachute payment.

(a) *Parachute payment*—(1) *In general.* Except as otherwise provided in paragraph (a)(2) of this section (relating to payments excluded from the definition of a parachute payment), *parachute payment* means any payment in the nature of compensation made by an ATEO (or a predecessor of the ATEO) or a related organization to (or for the benefit of) a covered employee if the payment is contingent on the employee's separation from employment with the employer, and the aggregate present value of the payments in the nature of compensation to (or for the benefit of) the individual that are contingent on the separation equals or exceeds an amount equal to 3-times the base amount.

(2) *Exclusions.* The following payments are not parachute payments:

(i) *Certain qualified plans.* A payment that is a contribution to or a distribution from a plan described in section 401(a) that includes a trust exempt from tax under section 501(a), an annuity plan described in section 403(a), a simplified employee pension (as defined in section 408(k)), or a simple retirement account described in section 408(p);

(ii) *Certain annuity contracts.* A payment made under or to an annuity contract described in section 403(b) or a plan described in section 457(b);

(iii) *Compensation for medical services.* A payment made to a licensed medical professional for the performance of medical services performed by such professional; and

(iv) *Payments to non-HCEs.* A payment made to an individual who is not a highly compensated employee (HCE) as defined in paragraph (a)(3) of this section.

(3) *Determination of HCEs for purposes of the exclusion from parachute payments.* For purposes of this section, *highly compensated employee* or *HCE* means, with regard to an ATEO that maintains a qualified retirement plan or other employee benefit plan described in § 1.414(q)–1T, Q/A–1, any person who is a highly compensated employee within the meaning of section 414(q) and, with regard to an ATEO that does not maintain such a plan, any person who would be a highly compensated employee within the meaning of section 414(q) if the ATEO did maintain such a plan. For purposes of determining the group of highly compensated employees for a determination year, consistent with § 1.414(q)–1T, Q/A–14(a)(1), the determination year calculation is made on the basis of the applicable plan year under § 1.414(q)–1T, Q/A–14(a)(2) of the plan or other entity for which a determination is made, and the look-back year calculation is made on the basis of the 12-month period immediately preceding that year. For an ATEO that does not maintain a plan described in § 1.414(q)–1T, Q/A–1, the rules are applied by analogy, substituting the calendar year for the plan year. Thus, for example, in 2022, an ATEO that does not maintain such a plan must use its employees' 2021 annual compensation (as defined in § 1.414(q)–1T, Q/A–13, including any of the safe harbor definitions if applied consistently to all employees) to determine which employees are HCEs for 2022, if any, for purposes of section 4960. If an employee is an HCE at the time of separation from employment, then for purposes of section 4960 any parachute payment that is contingent on the separation from employment (as defined in paragraph (d) of this section) is treated as paid to an HCE so that the exception from the term parachute payment under paragraph (a)(2)(iv) of this section does not apply, even if the payment occurs during one or more later taxable years (that is, taxable years after the taxable year during which the employee separated from employment).

(b) *Payment in the nature of compensation*—(1) *In general.* Any payment—in whatever form—is a payment in the nature of compensation if the payment arises out of an employment relationship, including holding oneself out as available to perform services and refraining from performing services. Thus, for example, a payment made under a covenant not to compete or a similar arrangement is a payment in the nature of compensation. A payment in the nature of compensation includes (but is not limited to) wages and salary, bonuses, severance pay, fringe benefits, life insurance, pension benefits, and other deferred compensation (including any amount characterized by the parties as interest or earnings thereon). A payment in the nature of compensation also includes cash when paid, the value of the right to receive cash, the value of accelerated vesting, or a transfer of property. The vesting of an option, stock appreciation right, or similar form of compensation as a result of a covered employee's separation from employment is a payment in the nature of compensation. However, a payment in the nature of compensation does not include attorney's fees or court costs paid or incurred in connection with the payment of any parachute payment or a reasonable rate of interest accrued on any amount during the period the parties contest whether a parachute payment will be made.

(2) *Consideration paid by covered employee.* Any payment in the nature of compensation is reduced by the amount of any money or the fair market value of any property (owned by the covered

employee without restriction) that is (or will be) transferred by the covered employee in exchange for the payment.

(c) *When payment is considered to be made*—(1) *In general.* A payment in the nature of compensation is considered made in the taxable year in which it is includible in the covered employee's gross income or, in the case of fringe benefits and other benefits that are excludable from income, in the taxable year the benefits are received. In the case of taxable non-cash fringe benefits provided in a calendar year, payment is considered made on the date or dates the employer chooses, but no later than December 31 of the calendar year in which the benefits are provided, except that when the fringe benefit is the transfer of personal property (either tangible or intangible) of a kind normally held for investment or the transfer of real property, payment is considered made on the actual date of transfer. If the fringe benefit is neither a transfer of personal property nor a transfer of real property, the employer may, in its discretion, treat the value of the benefit actually provided during the last two months of the calendar year as paid during the subsequent calendar year. However, an employer that treats the value of a benefit paid during the last two months of a calendar year as paid during the subsequent calendar year under this rule must treat the value of that fringe benefit as paid during the subsequent calendar year with respect to all employees who receive it.

(2) *Transfers of section 83 property.* A transfer of property in connection with the performance of services that is subject to section 83 is considered a payment made in the taxable year in which the property is transferred or would be includible in the gross income of the covered employee under section 83, disregarding any election made by the employee under section 83(b) or (i). Thus, in general, such a payment is considered made at the later of the date the property is transferred (as defined in § 1.83–3(a)) to the covered employee or the date the property becomes substantially vested (as defined in § 1.83–3(b) and (j)). The amount of the payment is the compensation as determined under section 83, disregarding any amount includible in income pursuant to an election made by an employee under section 83(b).

(3) *Stock options.* An option (including an option to which section 421 applies) is treated as property that is transferred when the option becomes vested (regardless of whether the option has a readily ascertainable fair market value as defined in § 1.83–7(b)). For purposes of determining the timing and amount of any payment related to the option, the principles of § 1.280G–1, Q/A–13 and any method prescribed by the Commissioner in published guidance of general applicability under § 601.601(d)(2) apply.

(d) *Payment contingent on an employee's separation from employment*—(1) *In general.* A payment is contingent on an employee's separation from employment if the facts and circumstances indicate that the employer would not make the payment in the absence of the employee's involuntary separation from employment. A payment generally would be made in the absence of the employee's involuntary separation from employment if it is substantially certain at the time of the involuntary separation from employment that the payment would be made whether or not the involuntary separation occurred. A payment the right to which is not subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B) at the time of an involuntary separation from employment generally is a payment that would have been made in the absence of an involuntary separation from employment (and is therefore not contingent on a separation from employment), except that the increased value of an accelerated payment of a vested amount described in paragraph (f)(3) of this section resulting from an involuntary separation from employment is not treated as a payment that would have been made in the absence of an involuntary separation from employment. A payment the right to which is no longer subject to a substantial risk of forfeiture within the meaning of section 457(f)(3)(B) as a result of an involuntary separation from employment, including a payment the vesting of which is accelerated due to the separation from employment as described in paragraph (f)(3) of this section, is not treated as a payment that would have been made in the absence of an involuntary separation from employment (and thus is contingent on a separation from employment). A payment does not fail to be contingent on a separation from employment merely because the payment is conditioned upon the execution of a release of claims, noncompetition or nondisclosure provisions, or other similar requirements. See paragraph (d)(3) of this section for the treatment of a payment made pursuant to a covenant not to compete. If, after an involuntary separation from employment, the former employee continues to provide certain services as a nonemployee, payments for services rendered as a nonemployee are not payments that are contingent on a separation from employment to the extent those payments are reasonable and are not made on account of the involuntary separation from employment. Whether services are performed as an employee or nonemployee depends upon all the facts and circumstances. See § 53.4960–1(e). For rules on determining whether payments are reasonable compensation for services, the rules of § 1.280G–1, Q/A–40 through Q/A–42 (excluding Q/A–40(b) and Q/A–42(b)), and Q/A–44 are applied by analogy (substituting involuntary separation from employment for change in ownership or control).

(2) *Employment agreements*—(i) *In general.* If a covered employee involuntarily separates from employment before the end of a contract term and is paid damages for breach of contract pursuant to an *employment agreement*, the payment of damages is treated as a payment that is contingent on a separation from employment. An *employment agreement* is an agreement between an employee and employer that describes, among other things, the amount of compensation or remuneration payable to the employee for services performed during the term of the agreement.

(ii) *Example.* The following example illustrates the rules of this paragraph (d)(2). For purposes of this example, assume any entity referred to as ''ATEO'' is an ATEO.

(A) *Example*—(*1*) *Facts.* Employee A, a covered employee, has a 3-year employment agreement with ATEO 1. Under the agreement, Employee A will receive a salary of $200,000 for the first year and, for each succeeding year, an annual salary that is $100,000 more than the previous year. The agreement provides that, in the event of A's involuntary separation from employment without cause, Employee A will receive the remaining salary due under the agreement. At the beginning of the second year of the agreement, ATEO 1 involuntarily terminates Employee A's employment without cause and pays Employee A $700,000 representing the remaining salary due under the employment agreement ($300,000 for the second year of the agreement plus $400,000 for the third year of the agreement).

(*2*) *Conclusion.* The $700,000 payment is treated as a payment that is contingent on a separation from employment.

(3) *Noncompetition agreements.* A payment under an agreement requiring a covered employee to refrain from performing services (for example, a

covenant not to compete) is a payment that is contingent on a separation from employment if the payment would not have been made in the absence of an involuntary separation from employment. For example, a payment contingent on compliance in whole or in part with a covenant not to compete negotiated as part of a severance arrangement arising from an involuntary separation from employment is contingent on a separation from employment. Similarly, one or more payments contingent on compliance in whole or in part with a covenant not to compete not negotiated as part of a severance arrangement arising from an involuntary separation from employment but that provides for a payment specific to an involuntary separation from employment (and not voluntary separation from employment) is contingent on a separation from employment. Payments made under an agreement requiring a covered employee to refrain from performing services that are contingent on separation from employment are not treated as paid in exchange for the performance of services and are not excluded from parachute payments.

(4) *Payment of amounts previously included in income or excess remuneration.* Actual or constructive payment of an amount that was previously included in gross income of the employee is not a payment contingent on a separation from employment. For example, payment of an amount included in income under section 457(f)(1)(A) due to the lapsing of a substantial risk of forfeiture on a date before the separation from employment generally is not a payment that is contingent on a separation from employment, even if the amount is paid in cash or otherwise to the employee because of the separation from employment. In addition, actual or constructive receipt of an amount treated as excess remuneration under § 53.4960–4(b)(1) is not a payment that is contingent on a separation from employment (and thus is not a parachute payment), even if the amount is paid to the employee because of the separation from employment.

(5) *Window programs.* A payment under a window program is contingent on a separation from employment. A *window program* is a program established by an employer in connection with an impending separation from employment to provide separation pay if the program is made available by the employer for a limited period of time (no longer than 12 months) to employees who separate from employment during that period or to employees who separate from service during that period under specified circumstances. A payment made under a window program is treated as a payment that is contingent on an employee's separation from employment notwithstanding that the employee may not have had an involuntary separation from employment.

(6) *Anti-abuse provision.* Notwithstanding paragraphs (d)(1) through (5) of this section, if the facts and circumstances demonstrate that either the vesting or the payment of an amount (whether before or after an employee's involuntary separation from employment) would not have occurred but for the involuntary nature of the separation from employment, the payment of the amount is contingent on a separation from employment. For example, an employer's exercise of discretion to accelerate vesting of an amount shortly before an involuntary separation from employment may indicate that the acceleration of vesting was due to the involuntary nature of the separation from employment and was therefore contingent on the employee's separation from employment. Similarly, payment of an amount in excess of an amount otherwise payable (for example, increased salary), shortly before or after an involuntary separation from employment, may indicate that the amount was paid because the separation was involuntary and was therefore contingent on the employee's separation from employment. If an ATEO becomes a predecessor as a result of a reorganization or other transaction described in § 53.4960–1(h), any payment to an employee by a successor organization that is contingent on the employee's separation from employment with the predecessor ATEO is treated as paid by the predecessor ATEO.

(e) *Involuntary separation from employment*—(1) *In general. Involuntary separation from employment* means a separation from employment due to the independent exercise of the employer's unilateral authority to terminate the employee's services, other than due to the employee's implicit or explicit request, if the employee was willing and able to continue performing services as an employee. An involuntary separation from employment may include an employer's failure to renew a contract at the time the contract expires, provided that the employee was willing and able to execute a new contract providing terms and conditions substantially similar to those in the expiring contract and to continue providing services. The determination of whether a separation from employment is involuntary is based on all the facts and circumstances.

(2) *Separation from employment for good reason*—(i) *In general.* Notwithstanding paragraph (e)(1) of this section, an employee's voluntary separation from employment is treated as an involuntary separation from employment if the separation occurs under certain bona fide conditions (referred to herein as a separation from employment for good reason).

(ii) *Material negative change required.* A separation from employment for good reason is treated as an involuntary separation from employment if the relevant facts and circumstances demonstrate that it was the result of unilateral employer action that caused a material negative change to the employee's relationship with the employer. Factors that may provide evidence of such a material negative change include a material reduction in the duties to be performed, a material negative change in the conditions under which the duties are to be performed, or a material reduction in the compensation to be received for performing such services.

(iii) *Deemed material negative change.* An involuntary separation from employment due to a material negative change is deemed to occur if the separation from employment occurs within 2 years following the initial existence of one or more of the following conditions arising without the consent of the employee:

(A) *Material diminution of compensation.* A material diminution in the employee's base compensation;

(B) *Material diminution of responsibility.* A material diminution in the employee's authority, duties, or responsibilities;

(C) *Material diminution of authority of supervisor.* A material diminution in the authority, duties, or responsibilities of the supervisor to whom the employee is required to report, including a requirement that an employee report to a corporate officer or employee instead of reporting directly to the board of directors (or similar governing body) of an organization;

(D) *Material diminution of budget.* A material diminution in the budget over which the employee retains authority;

(E) *Material change of location.* A material change in the geographic location at which the employee must perform services; or

(F) *Other material breach.* Any other action or inaction that constitutes a material breach by the employer of the

agreement under which the employee provides services.

(3) *Separation from employment.* Except as otherwise provided in this paragraph, separation from employment has the same meaning as separation from service as defined in § 1.409A–1(h). Pursuant to § 1.409A–1(h), an employee generally separates from employment with the employer if the employee dies, retires, or otherwise has a termination of employment with the employer or experiences a sufficient reduction in the level of services provided to the employer. For purposes of applying the rules regarding reductions in the level of services set forth in the definition of termination of employment in § 1.409A–1(h)(1)(ii), the rules are modified for purposes of this paragraph such that an employer may not set the level of the anticipated reduction in future services that will give rise to a separation from employment, meaning that the default percentages set forth in § 1.409A–1(h)(1)(ii) apply in all circumstances. Thus, an anticipated reduction of the level of service of less than 50 percent is not treated as a separation from employment, an anticipated reduction of more than 80 percent is treated as a separation from employment, and the treatment of an anticipated reduction between those two levels is determined based on the facts and circumstances. The measurement of the anticipated reduction of the level of service is based on the average level of service for the prior 36 months (or shorter period for an employee employed for less than 36 months). In addition, an employee's separation from employment is determined without regard to § 1.409A–1(h)(2) and (5) (application to independent contractors), since, for purposes of this section, only an employee may have a separation from employment, and a change from bona fide employee status to bona fide independent contractor status is also a separation from employment. See § 53.4960–2(a)(1) regarding the treatment of an employee who also serves as a director of a corporation (or in a substantially similar position). The definition of separation from employment also incorporates the rules under § 1.409A–1(h)(1)(i) (addressing leaves of absence, including military leaves of absence), § 1.409A–1(h)(4) (addressing asset purchase transactions), and § 1.409A–1(h)(6) (addressing employees participating in collectively bargained plans covering multiple employers). The definition further incorporates the rules of § 1.409A–1(h)(3), under which an employee separates from employment only if the employee has a separation from employment with the employer and all employers that would be considered a single employer under section 414(b) and (c), except that the ''at least 80 percent'' rule under section 414(b) and (c) is used, rather than replacing it with ''at least 50 percent.'' However, for purposes of determining whether there has been a separation from employment, a purported ongoing employment relationship between a covered employee and an ATEO or a related organization is disregarded if the facts and circumstances demonstrate that the purported employment relationship is not bona fide, or the primary purpose of the establishment or continuation of the relationship is avoidance of the application of section 4960.

(f) *Accelerated payment or accelerated vesting resulting from an involuntary separation from employment*—(1) *In general.* If a payment or the lapse of a substantial risk of forfeiture is accelerated as a result of an involuntary separation from employment, generally only the value due to the acceleration of payment or vesting is treated as contingent on a separation from employment, as described in paragraphs (f)(3) and (4) of this section, except as otherwise provided in this paragraph (f). For purposes of this paragraph (f), the terms *vested* and *substantial risk of forfeiture* have the same meaning as provided in § 53.4960–2(c)(2).

(2) *Nonvested payments subject to a non-service vesting condition.* If (without regard to a separation from employment) vesting of a payment would depend on an event other than the performance of services, such as the attainment of a performance goal, and that vesting event does not occur prior to the employee's separation from employment and the payment vests due to the employee's involuntary separation from employment, the full amount of the payment is treated as contingent on the separation from employment.

(3) *Vested payments.* If an involuntary separation from employment accelerates actual or constructive payment of an amount that previously vested without regard to the separation, the portion of the payment, if any, that is contingent on the separation from employment is the amount by which the present value of the accelerated payment exceeds the present value of the payment absent the acceleration. The payment of an amount otherwise due upon a separation from employment (whether voluntary or involuntary) is not treated as an acceleration of the payment unless the payment timing was accelerated due to the involuntary nature of the separation from employment. If the value of the payment absent the acceleration is not reasonably ascertainable, and the acceleration of the payment does not significantly increase the present value of the payment absent the acceleration, the present value of the payment absent the acceleration is the amount of the accelerated payment (so the amount contingent on the separation from employment is zero). If the present value of the payment absent the acceleration is not reasonably ascertainable but the acceleration significantly increases the present value of the payment, the future value of the payment contingent on the separation from employment is treated as equal to the amount of the accelerated payment. For purposes of this paragraph (f)(3), the acceleration of a payment by 90 days or less is not treated as significantly increasing the present value of the payment. For rules on determining present value, see paragraph (f)(6) and paragraphs (h), (i) and (j) of this section.

(4) *Nonvested payments subject to a service vesting condition*—(i) *In general.* If an involuntary separation from employment accelerates vesting of a payment, the portion of the payment that is contingent on separation from employment is the amount described in paragraph (f)(3) of this section (if any) plus the value of the lapse of the obligation to continue to perform services described in paragraph (f)(4)(ii) of this section (but the amount cannot exceed the amount of the accelerated payment, or, if the payment is not accelerated, the present value of the payment), to the extent that all of the following conditions are satisfied with respect to the payment:

(A) *Vesting trigger.* The payment vests as a result of an involuntary separation from employment;

(B) *Vesting condition.* Disregarding the involuntary separation from employment, the vesting of the payment was contingent only on the continued performance of services for the employer for a specified period of time; and

(C) *Services condition.* The payment is attributable, at least in part, to the performance of services before the date the payment is made or becomes certain to be made.

(ii) *Value of the lapse of the obligation to continue to perform services.* The value of the lapse of the obligation to continue to perform services is one percent of the amount of the accelerated payment multiplied by the number of full months between the date that the employee's right to receive the payment

is vested and the date that, absent the acceleration, the payment would have been vested. This paragraph (f)(4)(ii) applies to the accelerated vesting of a payment in the nature of compensation even if the time when the payment is made is not accelerated. In that case, the value of the lapse of the obligation to continue to perform services is one percent of the present value of the future payment multiplied by the number of full months between the date that the individual's right to receive the payment is vested and the date that, absent the acceleration, the payment would have been vested.

(iii) *Accelerated vesting of equity compensation.* For purposes of this paragraph (f)(4), the acceleration of the vesting of a stock option or stock appreciation right (or similar arrangement) or the lapse of a restriction on restricted stock or a restricted stock unit (or a similar arrangement) is considered to significantly increase the value of the payment.

(5) *Application to benefits under a nonqualified deferred compensation plan.* In the case of a payment of benefits under a nonqualified deferred compensation plan, paragraph (f)(3) of this section applies to the extent benefits under the plan are vested without regard to the involuntary separation from employment, but the payment of benefits is accelerated due to the involuntary separation from employment. Paragraph (f)(4) of this section applies to the extent benefits under the plan are subject to the conditions described in paragraph (f)(4)(i) of this section. For any other payment of benefits under a nonqualified deferred compensation plan (such as a contribution made due to the employee's involuntary separation from employment), the full amount of the payment is contingent on the employee's separation from employment.

(6) *Present value.* For purposes of this paragraph (f), the present value of a payment is determined based on the payment date absent the acceleration and the date on which the accelerated payment is scheduled to be made. The amount that is treated as contingent on the separation from employment is the amount by which the present value of the accelerated payment exceeds the present value of the payment absent the acceleration.

(7) *Examples.* See § 1.280G Q/A–24(f) for examples that may be applied by analogy to illustrate the rules of this paragraph (f).

(g) *Three-times-base-amount test for parachute payments*—(1) *In general.* To determine whether payments in the nature of compensation made to a covered employee that are contingent on the covered employee separating from employment with the ATEO are parachute payments, the aggregate present value of the payments must be compared to the individual's base amount. To do this, the aggregate present value of all payments in the nature of compensation that are made or to be made to (or for the benefit of) the same covered employee by an ATEO (or any predecessor of the ATEO) or related organization and that are contingent on the separation from employment must be determined. If this aggregate present value equals or exceeds the amount equal to 3-times the individual's base amount, the payments are parachute payments. If this aggregate present value is less than the amount equal to 3-times the individual's base amount, the payments are not parachute payments. See paragraphs (f)(6), (h), (i), and (j) of this section for rules on determining present value.

(2) *Examples.* The following examples illustrate the rules of this paragraph (g). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO.

(i) *Example 1 (Parachute payment)*—(A) *Facts.* Employee A is a covered employee and an HCE of ATEO 1. Employee A's base amount is $200,000. Payments in the nature of compensation that are contingent on a separation from employment with ATEO 1 totaling $800,000 are made to Employee A on the date of Employee A's separation from employment.

(B) *Conclusion.* The payments are parachute payments because they have an aggregate present value at the time of the separation from employment of $800,000, which is at least equal to 3-times Employee A's base amount of $200,000 ($3 \times \$200{,}000 = \$600{,}000$).

(ii) *Example 2 (No parachute payment)*—(A) *Facts.* Assume the same facts as in paragraph (g)(2)(i) of this section (Example 1), except that the payments contingent on Employee A's separation from employment total $580,000.

(B) *Conclusion.* Because the aggregate present value of the payments ($580,000) is not at least equal to 3-times Employee A's base amount ($600,000), the payments are not parachute payments.

(h) *Calculating present value*—(1) *In general.* Except as otherwise provided in this paragraph (h), for purposes of determining if a payment contingent on a separation from employment exceeds 3-times the base amount, the present value of a payment is determined as of the date of the separation from employment or, if the payment is made prior to that date, the date on which the payment is made.

(2) *Deferred payments.* For purposes of determining whether a payment is a parachute payment, if a payment in the nature of compensation is the right to receive payments in a year (or years) subsequent to the year of the separation from employment, the value of the payment is the present value of the payment (or payments) calculated on the basis of reasonable actuarial assumptions and using the applicable discount rate for the present value calculation that is determined in accordance with paragraph (i) of this section.

(3) *Health care.* If the payment in the nature of compensation is an obligation to provide health care (including an obligation to purchase or provide health insurance), then, for purposes of this paragraph (h) and for applying the 3-times-base-amount test under paragraph (g) of this section, the present value of the obligation is calculated in accordance with generally accepted accounting principles. For purposes of paragraph (g) of this section and this paragraph (h), the obligation to provide health care is permitted to be measured by projecting the cost of premiums for health care insurance, even if no health care insurance is actually purchased. If the obligation to provide health care is made in coordination with a health care plan that the employer makes available to a group, then the premiums used for purposes of this paragraph (h)(3) may be the allocable portion of group premiums.

(i) *Discount rate.* Present value generally is determined by using a discount rate equal to 120 percent of the applicable Federal rate (determined under section 1274(d) and the regulations in part 1 under section 1274(d)), compounded semiannually. The applicable Federal rate to be used is the Federal rate that is in effect on the date as of which the present value is determined, using the period until the payment is expected to be made as the term of the debt instrument under section 1274(d). See paragraph (h) of this section for rules with respect to the date as of which the present value is determined. However, for any payment, the employer and the covered employee may elect to use the applicable Federal rate that is in effect on the date on which the parties entered into the contract that provides for the payment if that election is set forth in writing in the contract.

(j) *Present value of a payment to be made in the future that is contingent on an uncertain future event or condition*—

(1) *Treatment based on the estimated probability of payment.* In certain cases, it may be necessary to apply the 3-times-base-amount test to a payment that is contingent on separation from employment at a time when the aggregate present value of all the payments is uncertain because the time, amount, or right to receive one or more of the payments is also contingent on the occurrence of an uncertain future event or condition. In that case, the employer must reasonably estimate whether it will make the payment. If the employer reasonably estimates there is a 50-percent or greater probability that it will make the payment, the full amount of the payment is considered for purposes of the 3-times-base-amount test and the allocation of the base amount. If the employer reasonably estimates there is a less than 50-percent probability that the payment will be made, the payment is not considered for either purpose.

(2) *Correction of incorrect estimates.* If an ATEO later determines that an estimate it made under paragraph (j)(1) of this section was incorrect, it must reapply the 3-times-base-amount test to reflect the actual time and amount of the payment. In reapplying the 3-times-base-amount test (and, if necessary, reallocating the base amount), the ATEO must determine the aggregate present value of payments paid or to be paid as of the date described in paragraph (h) of this section using the discount rate described in paragraph (i) of this section. This redetermination may affect the amount of any excess parachute payment for a prior taxable year. However, if, based on the application of the 3-times-base-amount test without regard to the payment described in this paragraph (j), an ATEO has determined it will pay an employee an excess parachute payment or payments, then the 3-times-base-amount test does not have to be reapplied when a payment described in this paragraph (j) is made (or becomes certain to be made) if no base amount is allocated to that payment under § 53.4960–4(d)(5).

(3) *Initial option value estimate.* To the extent provided in published guidance of general applicability under § 601.601(d)(2), an initial estimate of the value of an option subject to paragraph (c) of this section is permitted to be made, with the valuation subsequently redetermined and the 3-times-base-amount test reapplied. Until guidance is published under section 4960, published guidance of general applicability described in § 601.601(d)(2) that is issued under section 280G applies by analogy.

(4) *Examples.* See § 1.280G–1, Q/A–33(d) for examples that may be applied by analogy to illustrate the rules of this paragraph (j).

(k) *Base amount*—(1) *In general.* A covered employee's base amount is the average annual compensation for services performed as an employee of the ATEO (including compensation for services performed for a predecessor of the ATEO), and/or, if applicable, a related organization, with respect to which there has been a separation from employment, if the compensation was includible in the gross income of the individual for taxable years in the base period (including amounts that were excluded under section 911) or that would have been includible in the individual's gross income if the individual had been a United States citizen or resident. See paragraph (l) of this section for the definition of base period and for examples of base amount computations.

(2) *Short or incomplete taxable years.* If the base period of a covered employee includes a short taxable year or less than all of a taxable year of the employee, compensation for the short or incomplete taxable year must be annualized before determining the average annual compensation for the base period. In annualizing compensation, the frequency with which payments are expected to be made over an annual period must be taken into account. Thus, any amount of compensation for a short or incomplete taxable year that represents a payment that will not be made more often than once per year is not annualized.

(3) *Excludable fringe benefits.* Because the base amount includes only compensation that is includible in gross income, the base amount does not include certain items that may constitute parachute payments. For example, payments in the form of excludable fringe benefits or excludable health care benefits are not included in the base amount but may be treated as parachute payments.

(4) *Section 83(b) income.* The base amount includes the amount of compensation included in income under section 83(b) during the base period.

(l) *Base period*—(1) *In general.* The base period of a covered employee is the covered employee's 5 most-recent taxable years ending before the date on which the separation from employment occurs. However, if the covered employee was not an employee of the ATEO for this entire 5-year period, the individual's base period is the portion of the 5-year period during which the covered employee performed services for the ATEO, a predecessor, or a related organization.

(2) *Determination of base amount if employee separates from employment in the year hired.* If a covered employee commences services as an employee and experiences a separation from employment in the same taxable year, the covered employee's base amount is the annualized compensation for services performed for the ATEO (or a predecessor or related organization) that was not contingent on the separation from employment and either was includible in the employee's gross income for that portion of the employee's taxable year prior to the employee's separation from employment (including amounts that were excluded under section 911) or would have been includible in the employee's gross income if the employee had been a United States citizen or resident.

(3) *Examples.* The following examples illustrate the rules of paragraph (k) of this section and this paragraph (l). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO, any entity referred to as ''CORP'' is not an ATEO, and all employees are HCEs of their respective employers.

(i) *Example 1 (Calculation with salary deferrals)*—(A) *Facts.* Employee A, a covered employee of ATEO 1, receives an annual salary of $500,000 per year during the 5-year base period. Employee A defers $100,000 of salary each year under a nonqualified deferred compensation plan (none of which is includible in Employee A's income until paid in cash to Employee A).

(B) *Conclusion.* Employee A's base amount is $400,000 (($400,000 × 5)/5).

(ii) *Example 2 (Calculation for less-than-5-year base period)*—(A) *Facts.* Employee B, a covered employee of ATEO 1, was employed by ATEO 1 for 2 years and 4 months preceding the year in which Employee B separates from employment. Employee B's compensation includible in gross income was $100,000 for the 4-month period, $420,000 for the first full year, and $450,000 for the second full year.

(B) *Conclusion.* Employee B's base amount is $390,000 (((3 × $100,000) + $420,000 + $450,000)/3). Any compensation Employee B receives in the year of separation from employment is not included in the base amount calculation.

(iii) *Example 3 (Calculation for less-than-5-year base period with signing bonus)*—(A) *Facts.* Assume the same facts as in paragraph (l)(3)(ii)(A) of this section (Example 2), except that Employee B also received a $60,000 signing bonus when Employee B's

employment with ATEO 1 commenced at the beginning of the 4-month period.

(B) *Conclusion.* Employee B's base amount is $410,000 (((($60,000 + (3 × $100,000)) + $420,000 + $450,000)/3). Pursuant to paragraph (k)(2) of this section, because the bonus is a payment that will not be paid more often than once per year, the bonus is not taken into account in annualizing Employee B's compensation for the 4-month period.

(iv) *Example 4 (Effect of non-employee compensation)*—(A) *Facts.* Employee C, a covered employee of ATEO 1, was not an employee of ATEO 1 for the full 5-year base period. In 2024 and 2025, Employee C is only a director of ATEO 1 and receives $30,000 per year for services as a director. On January 1, 2026, Employee C becomes an officer and covered employee of ATEO 1. Employee C's includible compensation for services as an officer of ATEO 1 is $250,000 for each of 2026 and 2027, and $300,000 for 2028. In 2028, Employee C separates from employment with ATEO 1.

(B) *Conclusion.* Employee C's base amount is $250,000 ((2 × $250,000)/2). The $30,000 of director's fees paid to Employee C in each of 2024 and 2025 is not included in Employee C's base amount calculation because it was not for services performed as an employee of ATEO 1.

§ 53.4960–4 Liability for tax on excess remuneration and excess parachute payments.

(a) *Liability, reporting, and payment of excise taxes*—(1) *Liability.* For each taxable year, with respect to each covered employee, the taxpayer is liable for tax at the rate imposed under section 11 on the sum of the excess remuneration allocated to the taxpayer under paragraph (c) of this section and, if the taxpayer is an ATEO, any excess parachute payment paid by the taxpayer or a predecessor during the taxable year.

(2) *Reporting and payment.* The excise tax imposed by section 4960 is reported as provided in §§ 53.6011–1(b) and 53.6071–1(i) and paid in the form and manner prescribed by the Commissioner.

(3) *Arrangements between an ATEO and a related organization.* Calculation of, and liability for, the excise tax imposed by section 4960 is separate from, and unaffected by, any arrangement that an ATEO and any related organization may have for bearing the cost of any liability for the excise tax imposed by section 4960.

(4) *Certain foreign related organizations.* A related organization that is a foreign organization described in section 4948(b) that either is exempt from tax under section 501(a) or is a taxable private foundation (section 4948(b) related organization) is not liable for the excise tax imposed by section 4960. A foreign organization is an organization not created or organized in the United States or in any possession thereof, or under the law of the United States, any State, the District of Columbia, or any possession of the United States. See section 4948(b) and § 53.4948–1. For purposes of this paragraph (a)(4) and the application of section 4960 to a taxable year, an organization's status as a section 4948(b) related organization is determined at the end of its taxable year. However, remuneration that the section 4948(b) related organization pays to a covered employee of an ATEO must be taken into account by the ATEO and other related organizations for purposes of section 4960 generally, including for purposes of determining the five highest-compensated employees and the total remuneration paid to a covered employee. For example, if an ATEO and its related organization that is a section 4948(b) related organization each paid $600,000 remuneration to a covered employee during the applicable year, then the related organization would not be liable for the tax that would otherwise be allocable to it, and the ATEO would be liable for tax on $100,000 (50 percent of the $200,000 excess remuneration paid to the employee).

(5) [Reserved]

(b) *Amounts subject to tax*—(1) *Excess remuneration*—(i) *In general. Excess remuneration* means the amount of remuneration paid by an ATEO to any covered employee during an applicable year in excess of $1 million, as determined under § 53.4960–2.

(ii) *Exclusion for excess parachute payments.* Excess remuneration does not include any amount that is an excess parachute payment as defined in paragraph (b)(2) of this section.

(2) *Excess parachute payment. Excess parachute payment* means an amount equal to the excess (if any) of the amount of any parachute payment paid by an ATEO, a predecessor of the ATEO, or a related organization, or on behalf of any such person, during the taxable year over the portion of the base amount allocated to such payment.

(c) *Calculation of liability for tax on excess remuneration*—(1) *In general.* For each taxable year, an employer is liable for the tax on excess remuneration paid in the applicable year ending with or within the employer's taxable year. If, for the taxable year, remuneration paid during an applicable year by an ATEO or one or more related organizations to a covered employee is taken into account in determining the tax imposed on excess remuneration for that taxable year, then each employer is liable for the tax in an amount that bears the same ratio to the total tax determined under section 4960(a) as the amount of remuneration paid by the employer to the covered employee (including remuneration paid by the employer as described in § 53.4960–2(b)(1), but disregarding remuneration treated as paid by the employer under § 53.4960–2(b)(2)), bears to the total amount of remuneration paid by the ATEO under § 53.4960–2 (including remuneration treated as paid by the ATEO under § 53.4960–2(b)(2)).

(2) *Calculation if liability is allocated from more than one ATEO with regard to an individual.* If liability for the tax on excess remuneration is allocated to an employer from more than one ATEO in a taxable year with regard to an individual that is a covered employee of each ATEO, then the employer is liable for the tax only in the capacity in which it is liable for the greatest amount of the tax with respect to that individual for the taxable year. For example, assume ATEO 1 is a related organization to both ATEO 2 and ATEO 3 and pays excess remuneration to Employee D, and Employee D is a covered employee of ATEO 1, ATEO 2, and ATEO 3. In this case, ATEO 1's liability for the tax on excess remuneration to Employee D is the highest of its liability as an ATEO, as a related organization to ATEO 2, or as a related organization to ATEO 3.

(3) *Calculation if liability is allocated from an ATEO with a short applicable year.* If liability for the tax on excess remuneration paid to an individual is allocated to an employer from an ATEO with a short applicable year under § 53.4960–1(c)(3), then the liability with respect to the excess remuneration paid to that individual is allocated in accordance with the principles of this paragraph (c) adjusted as necessary to avoid, to the extent possible, duplication of application of the excise tax. The Commissioner may provide additional guidance of general applicability, published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter), on the application of this paragraph (c)(3) to particular circumstances, including circumstances involving an ATEO with a short applicable year that has one or more related organizations and the ATEO's short applicable year and the preceding applicable year both end with or within the related organization's taxable year, such that the ATEO and related organizations are liable for the tax for

multiple applicable years ending with or within the employer's taxable year.

(4) *Examples.* The following examples illustrate the rules of this paragraph (c). For purposes of these examples, assume that the rate of excise tax under section 4960 is 21 percent, that any entity that is referred to as ''ATEO'' is an ATEO, that any entity referred to as ''CORP'' is not an ATEO and is not a publicly held corporation within the meaning of section 162(m)(2) or a covered health insurance provider within the meaning of section 162(m)(6)(C), that no related organization is a section 4948(b) related organization, all taxpayers use the calendar year as their taxable year unless otherwise stated, and that no parachute payments are made in any of the years at issue.

(i) *Example 1 (Remuneration from multiple employers)*—(A) *Facts.* ATEO 1 and CORP 1 are related organizations. Employee A is a covered employee of ATEO 1 and an employee of CORP 1. In the 2022 applicable year, ATEO 1 pays Employee A $1.2 million of remuneration, and CORP 1 pays A $800,000 of remuneration. Remuneration paid by each employer is for services performed by Employee A solely as an employee of that employer.

(B) *Conclusion.* For the 2022 taxable year, ATEO 1 is treated as paying Employee A $2 million of remuneration, $1 million of which is excess remuneration. The total excise tax is $210,000 (21 percent × $1 million). ATEO 1 paid ⅗ of Employee A's total remuneration ($1.2 million/$2 million); thus, ATEO 1 is liable for ⅗ of the excise tax, which is $126,000. CORP 1 paid ⅖ of Employee A's total remuneration ($800,000/$2 million); thus, CORP 1 is liable for ⅖ of the excise tax, which is $84,000.

(ii) *Example 2 (Application when taxpayers have different taxable years)*—(A) *Facts.* Assume the same facts as in paragraph (c)(4)(i) of this section (*Example 1*), except that CORP 2 uses a taxable year beginning July 1 and ending June 30.

(B) *Conclusion.* The conclusion is the same as the conclusion in paragraph (c)(4)(i) of this section (*Example 1*), except that ATEO 1 is liable for the tax for its taxable year starting January 1, 2022, and ending December 31, 2022, and CORP 1 is liable for the tax for its taxable year beginning July 1, 2022, and ending June 30, 2023 (the taxable year with or within which ATEO 1's 2022 applicable year ends).

(iii) *Example 3 (Multiple liabilities for same applicable year due to multiple ATEOs)*—(A) *Facts.* The following facts are all with respect to the 2023 applicable year: ATEO 5 owns 60 percent of the stock of CORP 2. Sixty percent of ATEO 4's directors are representatives of ATEO 3. In addition, 60 percent of ATEO 5's directors are representatives of ATEO 4, but none are representatives of ATEO 3. Employee B is a covered employee of ATEO 3, ATEO 4, and ATEO 5 and is an employee of CORP 2. ATEO 3, ATEO 4, ATEO 5, and CORP 2 each pay Employee B $1.2 million of remuneration in the applicable year. ATEO 4's related organizations are ATEO 3 and ATEO 5. ATEO 3's only related organization is ATEO 4. ATEO 5's related organizations are ATEO 4 and CORP 2.

(B) *Calculation (ATEO 3).* Under ATEO 3's calculation as an ATEO for the 2023 applicable year, ATEO 3 is treated as paying Employee B a total of $2.4 million in remuneration ($1.2 million from ATEO 3 + $1.2 million from ATEO 4). The total excise tax is $294,000 (21 percent × $1.4 million). ATEO 3 and ATEO 4 each paid ½ of Employee B's total remuneration ($1.2 million/$2.4 million); thus, under ATEO 3's calculation, ATEO 3 and ATEO 4 each would be liable for ½ of the excise tax, which is $147,000.

(C) *Calculation (ATEO 4).* Under ATEO 4's calculation as an ATEO for the 2023 applicable year, ATEO 4 is treated as paying Employee B a total of $3.6 million in remuneration for the 2022 applicable year ($1.2 million from ATEO 3 + $1.2 million from ATEO 4 + $1.2 million from ATEO 5). The total excise tax is $546,000 (21 percent × $2.6 million). ATEO 3, ATEO 4, and ATEO 5 each paid ⅓ of the total remuneration to Employee B ($1.2 million/$3.6 million); thus, under ATEO 4's calculation, ATEO 3, ATEO 4, and ATEO 5 each would be liable for ⅓ of the excise tax, which is $182,000.

(D) *Calculation (ATEO 5).* Under ATEO 5's calculation as an ATEO for the 2023 applicable year, ATEO 5 is treated as paying Employee B a total of $3.6 million in remuneration ($1.2 million from ATEO 4 + $1.2 million from ATEO 5 + $1.2 million from CORP 2). The total excise tax is $546,000 (21 percent × $2.6 million). ATEO 4, ATEO 5, and CORP 2 each paid ⅓ of the total remuneration to Employee B ($1.2 million/$3.6 million); thus, under ATEO 5's calculation, ATEO 4, ATEO 5, and CORP 2 each would be liable for ⅓ of the excise tax, which is $182,000.

(E) *Conclusion (Liability of ATEO 3).* For the 2023 applicable year, ATEO 3 is liable for $182,000 of excise tax as a related organization under ATEO 4's calculation, which is greater than the $147,000 of excise tax under ATEO 3's own calculation. Thus, ATEO 3's excise tax liability with respect to Employee B is $182,000 for its 2023 taxable year.

(F) *Conclusion (Liability of ATEO 4).* For the 2023 applicable year, ATEO 4 is liable as a related organization for $147,000 of excise tax according to ATEO 3's calculation, for $182,000 according to ATEO 4's own calculation, and for $182,000 according to ATEO 5's calculation. Thus, ATEO 4's excise tax liability with respect to Employee B is $182,000 for its 2023 taxable year.

(G) *Conclusion (Liability of ATEO 5).* For the 2023 applicable year, ATEO 5 is liable as a related organization for $182,000 of excise tax under ATEO 4's calculation, and is liable for $182,000 of excise tax under ATEO 5's own calculation. Thus, ATEO 5's excise tax liability with respect to Employee B is $182,000 for its 2023 taxable year.

(H) *Conclusion (Liability of CORP 2).* For the 2023 applicable year, CORP 2 is liable as a related organization for $182,000 of excise tax according to ATEO 5's calculation only. Thus, CORP 2's excise tax liability with respect to Employee B is $182,000 for its 2023 taxable year.

(d) *Calculation of liability for excess parachute payments*—(1) *In general.* Except as provided in paragraph (d)(3) of this section, only excess parachute payments made by or on behalf of an ATEO are subject to tax under this section. However, parachute payments made by related organizations that are not made by or on behalf of an ATEO are taken into account for purposes of determining the total amount of excess parachute payments.

(2) *Computation of excess parachute payments*—(i) *Calculation.* The amount of an excess parachute payment is the excess of the amount of any parachute payment made by an ATEO, a predecessor of the ATEO, or a related organization, or on behalf of any such person, over the portion of the covered employee's base amount that is allocated to the payment. The portion of the base amount allocated to any parachute payment is the amount that bears the same ratio to the base amount as the present value of the parachute payment bears to the aggregate present value of all parachute payments made or to be made to (or for the benefit of) the same covered employee. Thus, the portion of the base amount allocated to any parachute payment is determined by multiplying the base amount by a fraction, the numerator of which is the present value of the parachute payment and the denominator of which is the aggregate present value of all parachute payments.

(ii) *Examples.* The following examples illustrate the rules of this

paragraph (d)(2). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO and all employees are HCEs of their respective employers.

(A) *Example 1 (Compensation from related organizations)*—(*1*) *Facts.* ATEO 1 and ATEO 2 are related organizations. Employee A is a covered employee of ATEO 1 and an employee of ATEO 2 who has an involuntary separation from employment with ATEO 1 and ATEO 2. Employee A's base amount is $200,000 with respect to ATEO 1 and $400,000 with respect to ATEO 2. A receives $1 million from ATEO 1 contingent upon Employee A's involuntary separation from employment from ATEO 1 and $1 million from ATEO 2 contingent upon Employee A's involuntary separation from employment from ATEO 2.

(*2*) *Conclusion.* Employee A has a base amount of $600,000 ($200,000 + $400,000). The two $1 million payments are parachute payments because their aggregate present value is at least 3-times Employee A's base amount (3 × $600,000 = $1.8 million). The portion of the base amount allocated to each parachute payment is $300,000 (($1 million/$2 million) × $600,000). Thus, the amount of each excess parachute payment is $700,000 ($1 million − $300,000).

(B) *Example 2 (Multiple parachute payments)*—(*1*) *Facts.* Employee B is a covered employee of ATEO 3 with a base amount of $200,000 who is entitled to receive two parachute payments: One of $200,000 and the other of $900,000. The $200,000 payment is made upon separation from employment, and the $900,000 payment is to be made on a date in a future taxable year. The present value of the $900,000 payment is $800,000 as of the date of the separation from employment.

(*2*) *Conclusion.* The portion of the base amount allocated to the first payment is $40,000 (($200,000 present value of the parachute payment/$1 million present value of all parachute payments) × $200,000 total base amount) and the portion of the base amount allocated to the second payment is $160,000 (($800,000 present value of the parachute payment/$1 million present value of all parachute payments) × $200,000 total base amount). Thus, the amount of the first excess parachute payment is $160,000 ($200,000 − $40,000) and that the amount of the second excess parachute payment is $740,000 ($900,000 − $160,000).

(3) *Reallocation when the payment is disproportionate to base amount.* In accordance with section 4960(d), the Commissioner may treat a parachute payment as paid by an ATEO if the facts and circumstances indicate that the ATEO and other payors of parachute payments structured the payments in a manner primarily to avoid liability under section 4960. For example, if an ATEO would otherwise be treated as paying a portion of an excess parachute payment in an amount that is materially lower in proportion to the total excess parachute payment than the proportion that the amount of average annual compensation paid by the ATEO (or any predecessor) during the base period bears to the total average annual compensation paid by the ATEO (or any predecessor) and any related organization (or organizations), and the lower amount is offset by payments from a non-ATEO or an unrelated ATEO, this may indicate that that the parachute payments were structured in a manner primarily to avoid liability under section 4960.

(4) *Election to prepay tax.* An ATEO may prepay the excise tax under paragraph (a)(1) of this section on any excess parachute payment for the taxable year of the separation from employment or any later taxable year before the taxable year in which the parachute payment is actually or constructively paid. However, an employer may not prepay the excise tax on a payment to be made in cash if the present value of the payment is not reasonably ascertainable under § 31.3121(v)(2)–1(e)(4) or on a payment related to health coverage. Any prepayment must be based on the present value of the excise tax that would be due for the taxable year in which the employer will pay the excess parachute payment, and be calculated using the discount rate equal to 120 percent of the applicable Federal rate (determined under section 1274(d) and the regulations in part 1 under section 1274) and the tax rate in effect under section 11 for the year in which the excise tax is paid. For purposes of projecting the future value of a payment that provides for interest to be credited at a variable interest rate, the employer may make a reasonable assumption regarding the variable rate. An employer is not required to adjust the excise tax paid merely because the actual future interest rates are not the same as the rate used for purposes of projecting the future value of the payment.

(5) *Liability after a redetermination of total parachute payments.* If an ATEO determines that an estimate made under § 53.4960–3(j)(1) was incorrect, it must reapply the 3-times-base-amount test to reflect the actual time and amount of the payment. In reapplying the 3-times-base-amount test (and, if necessary, reallocating the base amount), the ATEO must determine the correct base amount allocable to any parachute payment paid in the taxable year. See § 1.280G–1, Q/A–33(d) for examples that may be applied by analogy to illustrate the rules of this paragraph (d)(5).

(6) *Examples.* The following examples illustrate the rules of this paragraph (d). For purposes of these examples, assume any entity referred to as ''ATEO'' is an ATEO, any entity referred to as ''CORP'' is not an ATEO, and all employees are HCEs of their respective employers.

(i) *Example 1 (Excess parachute payment paid by a non-ATEO)*—(A) *Facts.* ATEO 1 and CORP 1 are related organizations that are treated as the same employer for purposes of § 53.4960–3(e)(3) (defining separation from employment) and are both calendar year taxpayers. For 2022 through 2026, ATEO 1 and CORP 1 each pay Employee A $250,000 of compensation per year for services performed as an employee of each organization ($500,000 total per year). In 2027, ATEO 1 and CORP 1 each pay Employee A $1 million payment ($2 million total) that is contingent on Employee A's separation from employment with both ATEO 1 and CORP 1, all of which is remuneration, and no other compensation. Employee A is a covered employee of ATEO 1 in 2027.

(B) *Conclusion.* Employee A's base amount in 2027 is $500,000 (Employee A's average annual compensation from both ATEO 1 and CORP 1 for the previous 5 years). ATEO 1 makes a parachute payment of $2 million in 2027, the amount paid by both ATEO 1 and CORP 1 that is contingent on Employee A's separation from employment with ATEO 1 and all organizations that are treated as the same employer under § 53.4960–3(e)(3). Employee A's $2 million payment exceeds 3-times the base amount ($1.5 million). ATEO 1 makes a $1.5 million excess parachute payment (the amount by which $2 million exceeds the $500,000 base amount). However, ATEO 1 is liable for tax only on the excess parachute payment paid by ATEO 1 ($1 million parachute payment − $250,000 base amount = $750,000) that is subject to tax under § 53.4960–4(a). CORP 1 is not liable for tax under § 53.4960–4(a) in 2027.

(ii) *Example 2 (Election to prepay tax on excess parachute payments and effect on excess remuneration)*—(A) *Facts.* Employee B is a covered employee of ATEO 2 with a base amount of $200,000 who is entitled to receive two parachute payments from ATEO 2, one of $200,000 and the other

of $900,000. The $200,000 payment is made upon separation from employment, and the $900,000 payment is to be made on a date in a future taxable year. The present value of the $900,000 payment is $800,000 as of the date of the separation from employment. ATEO 2 elects to prepay the excise tax on the $900,000 future parachute payment (of which $740,000 is an excess parachute payment). The tax rate under section 11 is 21 percent for the taxable year the excise tax is paid and, using a discount rate determined under § 53.4960–3(i), the present value of the $155,400 ($740,000 × 21 percent) excise tax on the $740,000 future excess parachute payment is $140,000.

(B) *Conclusion.* The excess parachute payment is thus $800,000 ($200,000 plus $800,000 present value of the $900,000 future payment, less $200,000 base amount), with $40,000 of the base amount allocable to the $200,000 payment and $160,000 of the base amount allocable to the $900,000 payment. To prepay the excise tax on the $740,000 future excess parachute payment, the employer must satisfy its $140,000 obligation under section 4960 with respect to the future payment, in addition to the $33,600 excise tax ($160,000 × 21 percent) on the $160,000 excess parachute payment made upon separation from employment. For purposes of determining the amount of excess remuneration (if any) under section 4960(a)(1), the amount of remuneration paid by the employer to the covered employee for the taxable year of the separation from employment is reduced by the $900,000 of total excess parachute payments ($160,000 + $740,000).

§ 53.4960–5 [Reserved]

§ 53.4960–6 Applicability date.

(a) *General applicability date.* Sections 53.4960–0 through 53.4960–4 apply to taxable years beginning after December 31, 2021. Taxpayers may choose to apply §§ 53.4960–0 through 53.4960–4 to taxable years beginning after December 31, 2017, and on or before December 31, 2021, provided the taxpayer applies §§ 53.4960–0 through 53.4960–4 in their entirety and in a consistent manner.

(b) [Reserved]

Sunita Lough,

Deputy Commissioner for Services and Enforcement.

Approved: January 9, 2021.

David J. Kautter,

Assistant Secretary of the Treasury (Tax Policy).
