We often receive comments regarding the changes in RVUs displayed on the specialty impact table (Table 123), including comments received in response to the proposed valuations. We remind stakeholders that although the estimated impacts are displayed at the specialty level, typically the changes are driven by the valuation of a relatively small number of new and/or potentially misvalued codes. The percentage changes in Table 123 are based upon aggregate estimated PFS allowed charges summed across all services furnished by physicians, practitioners, and suppliers within a specialty to arrive at the total allowed charges for the specialty, and compared to the same summed total from the previous calendar year. Therefore, they are averages, and may not necessarily be representative of what is happening to the particular services furnished by a single practitioner within any given specialty. To illustrate how impacts can vary within specialties, we created a public use file that models the expected percentage change in total RVUs per practitioner. Using CY 2020 utilization data, Total RVUs change between -1 percent and 1 percent for more than 52 percent of practitioners, representing more than 48 percent of the changes in Total RVUs for all practitioners, with variation by specialty. Some specialties, such as chiropractic, clinical social worker, and emergency medicine, exhibit little variation in changes in total RVUs per practitioner. For these specialties, more than 90 percent of these practitioners would experience a change in Total RVUs between -1 percent and 1 percent. Other specialties exhibit more variation in changes in total RVUs per practitioner. For example, for diagnostic testing facilities, 32 percent of IDTFs would experience a 5 percent or more decrease in Total RVUs, but these suppliers represent only 28 percent of Total RVUs for this specialty. Meanwhile, one percent of IDTFs would experience 10 percent or more increases in Total RVUs and these suppliers account for 28 percent of Total RVUs for this specialty.

b. Impact

Column F of Table 123 displays the estimated CY 2022 impact on total allowed charges, by specialty, of all the RVU changes. A table showing the estimated impact of all of the changes on total payments for selected high volume procedures is available under ''downloads'' on the CY 2022 PFS proposed rule website at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/*. We selected these procedures for sake of illustration from among the procedures most commonly furnished by a broad spectrum of specialties. The change in both facility rates and the nonfacility rates are shown. For an explanation of facility and nonfacility PE, we refer readers to Addendum A on the CMS website at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/*.

D. Effect of Proposed Changes Related to Telehealth Services

Before the PHE for COVID–19, approximately 15,000 fee-for-service Medicare beneficiaries received a Medicare telemedicine service each

week. According to a report prepared by the Assistant Secretary for Planning and Evaluation (ASPE),[251] in the last week of April 2020, nearly 1.7 million beneficiaries received telehealth services. By April 2020, nearly half of all Medicare primary care visits were telehealth encounters, a level consistent with health care encounters more broadly. There are approximately 270 services currently included on the list of Medicare telehealth services, including more than 160 that were added on a temporary basis during the PHE for COVID–19 (including service categories such as emergency department visits, initial inpatient and nursing facility visits, and discharge day management services) that are covered through the end of the PHE. Preliminary data show that between mid-March and mid-October 2020, over 24.5 million out of 63 million Medicare beneficiaries and enrollees have received a Medicare telemedicine service during the PHE. It is important to note that preliminary data reflect that the largest increases in services furnished via telehealth communications systems, by beneficiary access/volume, were for services that were already on the Medicare telehealth services list before the PHE.

As discussed in section II.D. of this proposed rule, we are proposing to amend the regulatory definition of interactive telecommunications system for purposes of Medicare telehealth services to include audio-only communication technology under certain circumstances for mental health services furnished to established patients in their homes. We anticipate that this policy will increase utilization of Medicare telehealth mental health services relative to utilization that would occur without the change. The estimated cost impact on overall Medicare services is unclear, though these changes would largely maintain current policies and access to the specific mental health services that are available to beneficiaries during the PHE. By requiring that a modifier be appended to the claim to identify that the service was furnished via audio-only communication technology, we will be able to closely monitor utilization and address any potential concerns regarding overutilization through future rulemaking.

Section 123 of the CAA removed the geographic and site of service restrictions for telehealth services furnished for the purpose of diagnosis, evaluation, or treatment of a mental health disorder, and requires that a physician or practitioner furnish an in-person, non-telehealth service to a beneficiary within 6 months prior to the first time the physician or practitioner furnishes a telehealth service to the beneficiary, and thereafter, at intervals as specified by the Secretary. Section 125 of the CAA created a new Medicare provider type—the rural emergency hospital, effective beginning in CY 2023—and added rural emergency hospitals to the list of eligible telehealth originating sites at section 1834(m)(4)(C)(ii) of the Act. As discussed in section II.D. of this proposed rule, we are proposing to require that, as a condition of payment for a telehealth service described in section 1834(m)(7) of the Act, the billing physician or practitioner must have furnished an in-person, non-telehealth service to the beneficiary within the 6-month period before the date of service of a telehealth service as specified in section 1834(m)(7)(B)(i) of the Act.

We are also seeking comment on whether the required in-person, non-telehealth service could also be furnished by another physician or practitioner of the same specialty and same subspecialty within the same group as the physician or practitioner who furnishes the telehealth service. Given that the removal of the geographic and site of service restrictions for telehealth will expand the availability of mental health services, we anticipate that utilization of these mental health services will be comparable to observed utilization for mental health services during the COVID–19 PHE.

With regard to our proposal to retain all services added to the Medicare telehealth services list on a Category 3 basis until the end of CY 2023, we believe our proposals would provide clarity to the stakeholder community but will have a negligible impact on PFS expenditures. For example, services that have already been added to the permanent telehealth services list are furnished via telehealth, on average, less than 0.1 percent of the time they are reported. The statutory payment requirements for Medicare telehealth services under section 1834(m) of the Act, such as the originating site requirements related to geographic location and site of service, have limited increases in utilization outside of the COVID–19 PHE; however, we believe there is value in allowing physicians to furnish services added to the Medicare telehealth services list on a category 3 basis, and for patients to receive broader access to this care through telehealth. Additionally, for services added to the Medicare telehealth list on a Category 3 basis, outside of the circumstances of the PHE for COVID–19, all of the statutory restrictions under section 1834(m) of the Act will also apply to these services; therefore, we do not anticipate any significant increase in utilization.

E. Effect of Changes Related to Services Furnished in Whole or in Part by PTAs and OTAs

As discussed in section II.H., we are proposing revisions to the current de minimis policy for services furnished in whole or in part by PTAs/OTAs that we finalized in CY 2020 PFS final rule (84 FR 62702 through 62708) under which the CQ or CO modifier would apply when the PTA or OTA furnished more than 10 percent of a service or a 15-minute unit of service. Beginning January 1, 2022, CMS will apply a 15 percent reduction to the payment amount for a physical or occupational therapy service when the CQ/CO modifier is applied to the service. Our proposed revision to the policy would allow the PT/OT to bill without the CQ/CO modifier for the final 15-minute unit (in a multi-unit billing scenario) when the PT/OT meets the billing threshold of 8 minutes, which is when the minutes are greater than the midpoint (7.5 minutes) of the 15-minute unit, regardless of any minutes provided by the PTA/OTA for that final unit.

Under our proposal, the PT/OT services would not be inadvertently discounted as the result of any ''left-over'' minutes provided by the PTA/OTA when the therapist provides enough minutes on his or her own to meet the billing threshold amount. In these scenarios, the PTA's/OTA's minutes are considered immaterial for the purposes of billing. For example, if the PT/OT provided 23 minutes of a 15-minute service and the PTA/OTA provided another 20 minutes of the same service—three units of service can be billed for the 43 total minutes (38 minutes through 52 minutes). Here, one full 15-minute unit of service is billed without the CQ/CO modifier for the PT/OT service with 8 minutes remaining, and one full unit of service is billed with the CQ/CO modifier for the PTA/OTA service with 5 minutes remaining. Under the proposed policy, the third unit is billed without the CQ/CO modifier because the 8 minutes provided by the PT/OT meets the billing threshold amount. However, under our current de minimis policy, the 5 minutes provided by the PTA/OTA is more than 10 percent (it is 38 percent of the total service—PTA/OTA minutes divided by the total of PTA/OTA + PT/OT minutes: 5 divided by 13 = 38

[251] Medicare Beneficiary Use of Telehealth Visits: Early Data from the Start of the Covid-19 Pandemic (*hhs.gov*).

percent) meaning the CQ/CO modifier is applied to the third and final unit of service.

Under our current *de minimis* policy, under which the CQ/CO modifier is applied whenever the PTA/OTA provides more than 10 percent of a service whether or not the PT/OT furnishes enough of the service to bill for it without the portion furnished by the PTA/OTA, stakeholders have expressed concern that the PT/OT has a financial incentive not to have the PTA/OTA provide any additional minutes, regardless of the individual patient's needs, when those minutes of service would lead to a reduced payment for a unit of a service. There may be a cost implication to our proposal as fewer billing scenarios may result in application of the CQ/CO modifiers and consequent payment reduction. However, we believe that basing our proposed policy on a ''midpoint rule'' in which the PT/OT provides enough minutes on their own (8 or more minutes) to bill for the final unit of a billing scenario could eliminate the PT's/OT's financial incentive to not provide appropriate therapy to an individual patient when it is furnished by the PTA/OTA. On the other hand, if we were to continue with our de minimis standard to apply to all billing scenarios for PTA/OTA services that exceed the 10 percent standard, we are uncertain how to gauge the overall costs of this policy because of the possible altered PT/OT behavioral change that is due to the financial incentives built into that policy as discussed above.

F. Other Provisions of the Regulation

1. Rural Health Clinics (RHCs) and Federally Qualified Health Centers (FQHCs)

In section III.A. of this proposed rule, we make multiple proposals related to RHCs and FQHCs. In terms of estimated impacts to the Medicare program, Payment for Attending Physician Services Furnished by RHCs or FQHCs to Hospice Patients as required by section 132 of the CAA, 2021 and Concurrent Billing for CCM and Transitional Care Management TCM Services for RHCs and FQHCs will have negligible impact to Medicare spending.

Section 130 requires that all independent RHCs are now subject to the per-visit limit (which is also referred to as ''cap'') and phases in an increase in the statutory payment cap over an 8-year period. The cap in CY 2021, for services furnished after March 31, is set at $100 per visit, then at $126 per visit in 2022; at $139 per visit in 2023; at $152 per visit in 2024; at $152 per visit in 2025; at $165 per visit in 2026; at $178 per visit in 2027; and at $190 per visit in 2028. Beyond 2028 the limit is updated by the applicable Medicare Economic Index (MEI).

This provision also controls the annual rate of growth in payments to certain provider-based RHCs whose payments are currently higher than the payment limit. Each year, but for services provided after March 31 in 2021, the payment limit shall be set at the greater of: (1) The RHC per visit amount from the prior year, increased by the percentage increase in the applicable MEI; and (2) the cap limits applicable to each year as described above. In order to be eligible for this ''grandfathering'' policy, the RHC must have been based in a hospital with fewer than 50 beds and enrolled in Medicare as of December 31, 2019.

Section 2 of H.R. 1868, enacted on April 14, 2021, made technical corrections to section 130. First, for an RHC that is hospital-based and whose parent hospital has fewer than 50 beds, the date by which the RHC must be Medicare-certified, in order to be grandfathered, is changed from December 31, 2019 to December 31, 2020. Next, a clinic that is owned by a hospital with fewer than 50 beds and that submitted certain applications (received by Medicare) for certification as a Medicare RHC prior to the end of 2020 is to be grandfathered, and its clinic-specific cap is to be set based on its 2021 cost per visit. Lastly, a grandfathered RHC must continue to be owned by a hospital with fewer than 50 beds; if the parent hospital exceeds 50 beds, the RHC will lose its grandfathered status.

Table 124 are the FY estimates (in millions) for the impact of section 130, which improves payments to RHCs. These providers are currently paid an all-inclusive rate (AIR) for all medically necessary medical and mental health services, and qualified preventive health services furnished on the same day (with some exceptions). The AIR is subject to a payment limit, except for certain provider-based RHCs that have an exception to the payment limit. The RHC payment limit per visit for calendar year (CY) 2021 is $87.52, which is 1.4 percent higher than the CY 2020 payment limit of $86.31.

TABLE 124: Fiscal Year Estimates for the Impact of Section 130 of the CAA

Medicare (Part B)	2021	2022	2023	2024	2025	2026	2026	2028	2029	2030	2031	2022-26	2022-31
Part B benefits	10	180	160	230	310	390	490	580	640	700	750	1,270	4,430
Premium offset	–	-40	-40	-60	-80	-100	-120	-140	-160	-170	-190	-320	-1,100
Net Part B	10	140	120	170	230	290	370	440	480	530	560	950	3,330

In section III.B. of this proposed rule, we discuss that we are proposing to revise the regulatory requirement that an RHC or FQHC mental health visit must be a face-to-face (that is, in person) encounter between an RHC or FQHC patient and an RHC or FQHC practitioner to also include encounters furnished through interactive, real-time telecommunications technology, but only when furnishing services for the purposes of diagnosis, evaluation, or treatment of a mental health disorder.

According to our analysis of Medicare Part B claims data for services furnished via Medicare telehealth under the PFS during the PHE, use of telehealth for many professional services spiked in utilization around April 2020 and diminished over time, but not to pre-pandemic levels. In contrast, Medicare claims data suggests that for mental health services both permanently and temporarily added to the Medicare Telehealth list, subsequent to April 2020, the trend is toward maintaining a steady state of usage over time. Given the expanded availability of mental health services at RHCs and FQHCs, we do anticipate that this policy will increase spending, however, we are not certain of the magnitude of this increase, since it is not clear at this time how or whether trends related to utilization of communication technology during the PHE will continue after such a time that the PHE were to end. While the estimated cost impact of this proposal is unclear, the proposed requirement that a modifier be appended to the claim to identify that the service was furnished via audio-only communication technology would allow us to closely monitor utilization and address any potential concerns

regarding overutilization through future rulemaking.

2. Requiring Certain Manufacturers To Report Drug Pricing Information for Part B (§§ 414.802 and 414.806)

This provision implements new statutory requirements under sections 1847A and 1927 of the Act, as amended by section 401 of the CAA (for the purposes of this section of this proposed rule, hereinafter is referred to as ''section 401''). These new requirements will improve the accuracy of reported payment limits and limit the use of WAC-based pricing.

As described in section III.D.1. of this proposed rule, in considering whether to exclude repackagers from the reporting requirements at section 1847A(f)(2) of the Act, we conducted two analyses to estimate: (1) The proportion of repackaged products in our existing ASP data; (2) the number of new ASP submissions we can expect as a result of the new reporting requirements under section 401; and (3) the proportion of those (new) submissions that involve repackaged products.

Additionally, while we believe it will impact reporting volume and payment limits under section 1847A of the Act for many billing and payment codes, we are unable to estimate the magnitude of these effects for the following reasons. We estimate: (1) 361 non-reporting manufacturers (of either single source or multiple source drugs) will now be required to report ASP data under section 1847A(f)(2) of the Act; and (2) 6114 products payable under Part B that these non-reporting manufacturers sell. However, we do not know which Healthcare Common Procedure Coding System (HCPCS) code payment limits will be impacted by these 6114 products, nor do we know the sales volume of these 6114 products. Because this information is used to calculate volume-weighted ASP payment limits, we, are unable to quantitatively estimate the economic impacts of this provision (that is, the likely costs or savings) on beneficiaries, the government, and other stakeholders. (We note that the economic impacts on manufacturers, as a result of the information collection requirements of this provision is discussed in section V. of this proposed rule.)

For single source drugs, these changes may result in lower payment limits because, typically, the WAC plus 3 percent is higher than ASP plus 6 percent. This then translates to cost savings for both the government and beneficiaries, who will pay coinsurance on a lesser amount. However, for the reason stated previously, we are unable to predict the magnitude of this effect.

Similarly, payment limits for multiple source drugs could increase or decrease, and we are unable to predict the direction or magnitude of specific or aggregate effects at this time.

We do not anticipate that this provision of this proposed rule would necessitate the revision of existing Medicaid Drug Rebate Agreements.

We welcome comment on (1) the likely costs or savings to beneficiaries, the government, and other stakeholders and (2) other related impacts of this provision.

3. Determination of ASP for Certain Self-Administered Drug Products

a. Anticipated Effects

This provision implements new statutory requirements under section 1847A(g) of the Act, as amended by section 405 of the CAA 2021, (for the purposes of this section of this proposed rule, hereinafter is referred to as ''section 405''). As identified by the OIG studies discussed in section III.D.2. of this proposed rule, the CMS payment-limit determination under section 1847A of the Act includes all versions of a product marketed under a single FDA approval, and consistent with section 1847A(b)(5) of the Act, the payment-limit determination does not exclude products based on packaging. Thus, the volume-weighted, average-ASP determination can include self-administered versions that may lead to increased program and beneficiary costs because of distorted ASP-based payment limits. In particular, the OIG studies identified two billing and payment codes that included self-administered NDCs. The OIG study determined that as a result of the inclusion of these NDCs in the calculation of the ASP payment limit, Medicare payment amounts remained inflated in 2017 and 2018, causing the program and its beneficiaries to pay an additional $497 million during this period. Since 2014, current payment methodology has resulted in an additional $173 million in Medicare beneficiary coinsurance for these two NDCs. (See OIG's July 2020 report titled, ''Loophole in Drug Payment Rule Continues To Cost Medicare and Beneficiaries Hundreds of Millions of Dollars,'' available at *https://oig.hhs.gov/oei/reports/OEI-BL-20-00100.asp*.)

Implementation of the proposed regulatory changes has the potential to result in decreased payment limits for identified billing and payment codes that could, in turn, substantially reduce Medicare and beneficiary expenditures, as described in the OIG study. Since section 1847A(g)(3) of the Act requires CMS to implement the required payment changes beginning on July 1, 2021, these potential savings may be observed within the year.

By adding sections 1847A(g)(1) and (2) of the Act, section 405 also directs the OIG to conduct future studies with same or similar methodologies to those in the July 2020 report and directs CMS to apply the lesser of payment methodology to the applicable billing and payment codes. This has the potential to result in additional savings to the program and beneficiaries if additional products are identified by these periodic OIG studies.

b. Expected Benefits

Codifying the provisions set forth by section 405 would permit to CMS to apply the lesser of payment methodology at section 1847(g)(2) of the Act to billing and payment codes identified by future OIG studies (described in section III.D.2. of this proposed rule). This provision addresses distorted payment limits for these products and may result in payment amounts that are better aligned with versions of these products that are payable under Part B (for example, versions that are usually not self-administered). Although we are unable to quantify the total magnitude of the potential savings, these changes have the potential to substantially reduce program expenditures and beneficiary coinsurance.

4. Appropriate Use Criteria

Section 1834(q)(2) of the Act, as added by section 218(b) of the Protecting Access to Medicare Act (PAMA), established a program to promote the use of appropriate use criteria (AUC) for applicable imaging services furnished in an applicable setting.

In the CY 2019 PFS final rule (83 FR 59452), we performed a comprehensive regulatory impact analysis for this program. In this proposed rule, we are proposing to begin the payment penalty phase of the program on the later of January 1, 2023 or the January 1 of the year after the year in which the PHE for COVID–19 ends. Because, under our proposals, the payment penalty phase will be further delayed, we are updating the estimates for incremental changes from the regulatory impact analysis from the CY 2019 PFS final rule. Since we are not proposing new policy requirements nor do we have sufficient reason to change any of the assumptions made in the RIA finalized in the CY 2019 PFS (83 FR 60034 through 60044)

we are only updating the analysis to reflect 2019 Medicare claims data (updated from 2014). We identify four incremental changes from the CY 2019 PFS final rule estimates due to updated claims data: (1) Impact of required AUC consultations by ordering professionals; (2) impact to Medicare beneficiaries; (3) process efficiencies to potentially offset the estimated burden on Medicare beneficiaries; and (4) impact on transmitting orders for advanced diagnostic imaging services. Each of these incremental changes results in a lower estimate.

a. Impact of Required AUC Consultations by Ordering Professionals

As discussed in detail in the CY 2019 PFS final rule (83 FR 60035 through 60037), the annual impact estimate of consultations by ordering professionals was $70,001,700. In our estimates, we calculated the burden for auxiliary personnel to consult AUC under the direction of an ordering professional and the burden for ordering professionals to perform the consultation directly. We estimated that 90 percent of consultations would be performed by a medical assistant (occupation code 31–9092) and 10 percent of consultations would be performed by a general practitioner (occupation code 29–1062). We estimated that 43,181,818 2-minute consultations occur annually.

Using 2019 Medicare claims data as our basis for the analysis, we propose to change the methodology used to determine the volume of consultations and propose to use more granular data that will reduce potential double-counting of advanced diagnostic imaging services. For example, an imaging service furnished in an outpatient hospital department could have two claims associated with that service. There could be a claim from the facility and a claim from the physician that interprets that imaging service. In the CY 2019 RIA (83 FR 60034 through 60044) we were concerned that the estimate of 43,181,818 consultations may be an overestimate because it took into account total claims. For this CY 2022 RIA, we propose to change the method of counting the total number of advanced diagnostic imaging services that would be furnished under the AUC program which will correspond to the total number of consultations.

Using the Integrated Data Repository we identified Medicare claims using the following parameters: (1) 2019 Date of service; (2) claim lines containing one of the procedure codes identified in CR10481 and CR11268 at *https://www.cms.gov/Regulations-and-Guidance/Guidance/Transmittals/2018Downloads/R2040OTN.pdf* and *https://www.cms.gov/files/document/r2404otn.pdf*, respectively; and (3) claims types of outpatient or practitioner. Claims were then separated based on the setting in which the imaging service was furnished and further by claim type. Using only services billed on the professional claim type, the total number of claim lines containing one of the identified procedure codes was included to total 30,359,901 advanced diagnostic imaging services estimated to be subject to the AUC program. By using this combination, we believe we can reduce the risk of double-counting services to obtain a more accurate estimate of total number of diagnostic imaging services subject to the AUC program. Therefore, this analysis will use the estimate of 30,359,901 AUC consultations.

Using the May 2020 BLS mean hourly wages, we update our estimates for a medical assistant (occupation code 31–9092) with mean hourly wage of $17.75 and 100 percent fringe benefits for 90 percent of consultations (910,797 hours) to be $30,511,701 (910,797 hours × $33.50/hour). The occupation for general practitioner is no longer listed on the BLS so, instead, we update our estimate using the occupation code for general internal medicine physician (29–1216) with mean hourly wage of $101.42 and 100 percent fringe benefits for 10 percent of consultations (101,200 hours) to be $20,527,408 (101,200 hours × $202.84/hour). The updated total annual estimated impact of consultations is $51,039,109, for an incremental change (reduction) of $18,962,591.

b. Impact to Medicare Beneficiaries

In the CY 2019 PFS final rule, we estimated that the additional 2-minute consultation would impact the Medicare beneficiary when their advanced diagnostic imaging service is ordered by the ordering professional by introducing additional time to their office visit. For this update, we used the updated number of consultations calculated above from claims data, as well as the May 2020 BLS mean hourly wage. To estimate this annual cost, we multiplied the annual burden of 1,011,997 hours by the BLS occupation code that represents all occupations in the BLS (00–0000) as mean hourly wage plus 100 percent fringe ($54.14/hr) for a total estimate of $54,789,518 per year for an incremental change (reduction) of $13,211, 482. We also estimated that, over time, process efficiencies may be implemented. We assumed that 50 percent of practices implemented an improvement process that streamlined AUC consultation so Medicare beneficiaries spent the same amount of time in the physician's office regardless of whether an advanced diagnostic imaging service was ordered. The updated estimate that such an improvement process could offset the estimated burden on Medicare beneficiaries by $27,394,759 annually for an incremental change (reduction) of $6,605,741.

c. Impact on Transmitting Orders for Advanced Diagnostic Imaging Services

In the CY 2019 PFS final rule, we estimated that including AUC consultation information on the order for an advanced diagnostic imaging service to the furnishing professional or facility is estimated as the additional 5 minutes spent by a medical secretary (occupation code 43–6013). To update this estimate, we use the May 2020 mean hourly wage of $18.75 plus 100 percent fringe benefits to transmit the order for the advanced diagnostic imaging service. In aggregate, we assumed in the CY 2019 PFS final rule that 40,000,000 advanced diagnostic imaging services are ordered annually. We propose to update that number to match the total number of AUC consultations proposed earlier in this RIA to 30,359,901, so the updated total annual burden to communicate additional information in the order is estimated as $94,495,192 ($18.75/hr × 2 × 0.083 hr × 30,359,901 orders) for an incremental change (reduction) of $20,044,808.

d. Impact on Furnishing Professionals and Facilities

As described in the CY 2019 PFS final rule, we identified an estimated 174,064 furnishing professionals (comprising radiologists, ASCs, IDTFs and hospitals) and assumed that every identified furnishing professional will choose to update their processes for the purposes of the AUC program in the same way by purchasing an automated solution to report AUC consultation information which was estimated to cost $10,000 for each furnishing professional. We update this cost to account for inflation and therefore the updated estimated cost is $10,636.07 ($10,000 adjusted for inflation to 2021 dollars) for a total estimated one-time update cost of $1,851,356,888.48 (174,064 × $10,636.07).

e. Appropriate Use Criteria for Advanced Diagnostic Imaging Services

As described in the CY 2019 PFS final rule, we assumed that there may be some savings to the Medicare program due to the AUC program requirements

and potential decreases in inappropriate utilization of advanced diagnostic imaging services. This assumption was based on literature describing prior experiences with clinical decision support in a pilot project conducted in Minnesota, a retrospective cohort study on evidence-based clinical decision support for lumbar MRI, brain MR and sinus CT and local implementation of clinical decision support, and we estimated that savings may account for $700,000,000 savings per year.

f. Summary of Delay-Attributable Changes and Discounted Rates

Table 125 summarizes the substantive changes from the CY 2019 PFS final rule to the CY 2022 PFS proposed rule impact estimates. The effect of a 3-year delay is approximated by applying 3 years' worth of discounting at 7 percent or 3 percent discount rates (Circular A–4, *https://www.whitehouse.gov/sites/whitehouse.gov/files/omb/assets/regulatory_matters_pdf/a-4.pdf*).

TABLE 125: AUC Program Related Activities with Changes in Impact Estimates Resulting from a Three-Year Delay

AUC Program Related Activity	CY 2022 PFS Proposed Rule Impact Estimate	Change from CY 2019 PFS Final Rule (as a function of the discount rate)
Impact of required AUC consultations by ordering professional	$51,039,109	- $4.3 million (3%) - $9.4 million (7%)
Impact to Medicare beneficiaries	$54,789,518	- $4.6 million (3%) - $10.1 million (7%)
Impact on transmitting orders for advanced diagnostic imaging services	$94,495,192	- $8.0 million (3%) - $17.4 million (7%)
AUC automated solution	$1,851,356,888	- $157.1 million (3%) - $340.1 million (7%)
Medicare program impacts associated with advanced diagnostic imaging services	$700,000,000	- $59.4 million (3%) - $128.6 million (7%)
Total Change Attributable to a Three-Year Delay		- $174.1 million (costs, 3%) - $376.9 million (costs, 7%) - $59.4 million (transfers, 3%) - $128.6 million (transfers, 7%)

5. Proposal To Remove Select National Coverage Determinations (NCDs)

We are proposing to remove two older NCDs that no longer contain clinically pertinent and current information or that involve items or services that are used infrequently by beneficiaries. Generally, proactively removing obsolete or unnecessary NCDs removes barriers to innovation and reduces burden for stakeholders and CMS. The two NCDs fall into two impact categories. First, eliminating an NCD for items and services that were previously covered means that the item or service will no longer be automatically covered by Medicare. Instead, the coverage determinations for those items and services will be made by Medicare Administrative Contractors (MACs). Second, if the previous national coverage determination barred coverage for an item or service under title XVIII, MACs would now be able to cover the item or service if the MAC determines that such action is appropriate under the statute. We believe that allowing local contractor flexibility in these cases better serves the needs of the Medicare program and its beneficiaries since we believe the future utilization for items and services within these policies will be limited, each affecting less than one percent of the Medicare FFS population.

For the one NCD where we are proposing to go from limited coverage to MAC discretion, claims data from 2019 shows that less than one percent of the Medicare population is affected. Specifically, we provide coverage with limitations for enteral nutrition and parenteral nutrition therapy under NCD 180.2, where in 2019 CMS paid 1,643,739 Medicare FFS claims for 83,551 unique beneficiaries totaling CMS payments of $356,228,606. While we have claims data available for 2020, the data shows a decrease in claims, unique beneficiaries and total amount paid by CMS. We believe this may be due in part to the COVID–19 pandemic; however, we do not have any information to be able to say that conclusively. The change could be due to other factors not examined here. We estimate there will be de minimis change to 2022 payments, compared to 2019 or 2020 because, as discussed in section III.F. of the proposed rule, local contractors have proposed LCDs that, if finalized, would provide parenteral and enteral nutrition coverage for certain Medicare beneficiaries. Therefore, we believe that removing this NCD would not result in significant changes to payments.

For the one non-covered NCD proposed to be eliminated, Positron Emission Tomography (PET) Scans under NCD 220.6, we would not expect to find historical claims data for the non-oncologic uses of PET at issue. We broadly noncover non-oncologic indications of PET, in other words, we required that every non-oncologic indication for PET must have its own NCD in order to receive coverage. Because this NCD provides for noncoverage on non-oncologic indications, we do not have accurate claims data to estimate total impact. However, based on the service, we expect future claims to affect less than one percent of Medicare FFS

beneficiaries. As discussed in section III.F. of this proposed rule, the NCD allows coverage for diagnostic PET imaging for oncologic uses not already determined by an NCD, to be made at the discretion of local MACs. We believe that extending local contractor discretion for non-oncologic indications of PET provides an immediate avenue to potential coverage in appropriate candidates and provides a framework that better serves the needs of the Medicare program and its beneficiaries. For clarity, we are not proposing to change any other subsections of 220.6. Thus, the NCDs listed at 220.6.1 through 220.6.20 would not be changed by this proposal.

6. Pulmonary Rehabilitation, Cardiac Rehabilitation and Intensive Cardiac Rehabilitation

As discussed in section III.H., Pulmonary Rehabilitation (PR), Cardiac Rehabilitation (CR) and Intensive Cardiac Rehabilitation (ICR), of this proposed rule, we are proposing largely conforming changes throughout §§ 410.47 (PR) and 410.49 (CR/ICR). These changes are intended to ensure consistency and accuracy in terminology, definitions and requirements where appropriate across PR and CR/ICR conditions of coverage. Specific to PR, we are proposing to remove the requirement for direct physician-patient contact related to the periodic review of the patient's treatment plan because such interaction within the PR program is not necessary for all patients and can be specified, as needed, in individualized treatment plans (ITPs). We are also proposing to add coverage of PR for beneficiaries who were hospitalized with a COVID–19 diagnosis and experience persistent symptoms, including respiratory dysfunction, for at least 4 weeks after hospital discharge.

In assessing the impact of these proposals, we note that the proposed expansion of PR coverage may increase utilization. Based on the low utilization rate discussed below, we do not believe the other proposed revisions will significantly impact utilization and the Medicare program.

To estimate the potential increase from the proposed expansion of coverage for PR, we searched the literature for articles that evaluated the utilization rate of PR for the currently eligible diagnosis of chronic obstructive pulmonary disease (COPD) in order to determine the historical utilization trends of this service.

Nishi et al. (2016) investigated the number of Medicare beneficiaries with COPD who received PR from January 1, 2003 to December 31, 2012. Their results included both individuals who had experienced hospitalizations for COPD and those who were outpatients only. The number of unique patients with COPD who initially participated in PR during the study period was 2.6 percent in 2003 (before conditions of coverage at § 410.47 were established) and 2.88 percent in 2012 (after conditions of coverage at § 410.47 were established).[252] In 2019, Spitzer, et al. published an article based on Medicare claims data from 2012, finding that 2.7 percent of eligible Medicare beneficiaries received PR within 12 months of hospitalization with COPD.[253] Using claims data from fee-for-service Medicare beneficiaries hospitalized for COPD in 2014, Lindenauer et al. (2020) reported that only 3 percent initiated PR within 1 year of their hospital discharge.[254] Taken together, this data informs us that utilization of PR in the Medicare population is very low, and that the majority of patients who avail themselves of this service do so, post hospitalization.

There are limitations to applying this data to identify the utilization rate of PR to the conditions of coverage specified at § 410.47. Most notably, some of these studies included patients whose services were billed with non-PR respiratory therapy codes (G0237, G0238 and G0239), instead of only patients whose services were billed with the PR code (G0424). But the authors also limited patient inclusion to those with a principal or secondary COPD diagnosis, so we believe this suggests that 3 percent is an upper bound for the utilization of PR currently in Medicare beneficiaries. Given that participation in PR has remained steady for many years, we do not expect this pattern to change. As such, for the purposes of this analysis, we assume that 3 percent of eligible beneficiaries under the proposed expansion of coverage (hospitalized with COVID–19 and experiencing persistent symptoms, including respiratory dysfunction, for at least 4 weeks after discharge) will participate in PR.

To identify the eligible beneficiaries under our proposal, we first identify the number of beneficiaries hospitalized with COVID–19 using the Preliminary Medicare COVID–19 Data Snapshot.[255] At the time of writing, the Snapshot included data from January 1, 2020 to March 20, 2021, and identified 1,141,592 total COVID–19 hospitalizations for Medicare beneficiaries. The Snapshot indicates that 18 percent of these patients expired so we reduce this number by 18 percent to 936,105 beneficiaries. A paper published by the Tony Blair Institute for Global Change [256] states that the Covid Symptom Study led by King's College London indicated that about 10 percent of survey participants reported symptoms (including shortness of breath and other symptoms like fatigue, headache and loss of smell) beyond a four-week recovery period. Using this information we estimate that the patient population we are proposing to expand PR coverage to, those who were hospitalized with a COVID–19 diagnosis and experienced persistent symptoms, including respiratory dysfunction, for at least 4 weeks after hospital discharge, to be 93,611 beneficiaries (936,105 × 0.10). Based on our assumption of utilization above, 3 percent, for the newly proposed covered patient population, we estimate 2,808 beneficiaries will receive PR (93,611 × 0.03).

Medicare covers PR for a maximum of 72 sessions. Using 2018 and 2019 Medicare claims data from the Chronic Conditions Data Warehouse (CCW), beneficiaries on average completed 14 sessions of PR. If we assume patients eligible based on our proposed expansion of coverage would participate, on average, in the same number of sessions, we estimate the proposed expansion of coverage will increase PR utilization by 39,312 sessions annually (2,808 beneficiaries × 14 average sessions completed per beneficiary).

Claims for PR are submitted using CPT code G0424. Our analysis of Medicare claims data indicates that 97.54 percent of PR sessions are billed under the Hospital OPPS at $55.66 (national average price) for an estimated total of $2,134,279 (39,312 PR sessions × 0.9754 × $55.66). The remaining 2.46

[256] Published at *https://institute.global/sites/default/files/articles/Long-Covid-Reviewing-the-Science-and-Assessing-the-Risk.pdf* on October 5 2020.

percent of PR sessions are billed under the PFS, with 2.12 percent of PR sessions furnished in a physician's office which has a national average price of $30.36 and 0.34 percent billed by a physician when PR was furnished in a hospital outpatient department which has a national average price of $13.96. Taken together, the estimated total for this remaining 2.46 percent of PR sessions is $27,168 ((39,312 PR sessions × 0.0212 × $30.36) + (39,312 PR sessions × 0.0034 × $13.96)). We estimate the total added cost to the Medicare program of this proposed expansion of coverage to be $2,161,447 ($2,134,279 + $27,168) annually during and immediately following the public health emergency (PHE) for COVID–19. As hospitalizations and COVID–19 cases decline, we expect the annual impact to decrease because eligible patient populations will likely decrease, however we are unable to estimate the longer term impact of our proposals due to the unpredictable nature of the PHE and the lack of long term data on COVID–19.

7. Medical Nutrition Therapy

As discussed in section III.I., Medical Nutrition Therapy (MNT), of this proposed rule, we are proposing to remove the restriction that patients only be referred to MNT by the treating physician and update the glomerular filtration rate (GFR) eligibility for patients with chronic kidney disease. We do not anticipate any significant increase in utilization of MNT services resulting from our proposed revisions. Despite various policy changes that could have improved use, such as increasing payment via adding work RVUs to MNT codes in 2006, approving MNT for telehealth coverage in 2005 and including registered dieticians (RDs) and nutrition professionals as telehealth distant site providers, and waiving out-of-pocket costs to beneficiaries, MNT participation remains under 2 percent of eligible beneficiaries. Based on an analysis of Medicare claims data from 2018, 2019, 2020, we identify the utilization rate of MNT services among eligible beneficiaries to be between 1.5 and 1.8 percent.

Although MNT is covered by many state Medicaid programs and private insurers, use is low in the US.[257] [258] [259] The Academy of Nutrition and Dietetics recognizes that research specific to the underuse of MNT services is scant.[260] Anecdotal reports and related research on diabetes self-management training point to a multitude of reasons why utilization of the MNT services benefit have remained low. These potential barriers include lack of awareness of MNT by patients and clinicians, inconsistent coverage for MNT services by non-Medicare payers, patient travel and time issues to receive the services and lack of availability of services from RDs who may perceive the process of Medicare enrollment/insurance credentialing and billing as being burdensome and complex.[261] Of about 100,000 RDs in the US, only 1,589 submitted Medicare fee-for-service MNT claims in 2017. One study revealed that less than half of RDs providing MNT services in an ambulatory care setting indicated they were not Medicare providers due to reasons such as perceived low reimbursement rates, not providing MNT to Medicare eligible patients, not knowing how to become a Medicare provider, and providing MNT to Medicare patients for diagnoses not covered by Medicare.[262]

Our proposed revisions may increase beneficiary access to the MNT benefit and reduce primary care physician burden since we are proposing that referrals can come from other physicians and not only from the physician treating the patient for their diabetes or kidney disease; although, as discussed above, we do not expect the changes to make a significant impact on the Medicare program. We do not anticipate increased administrative burden as documentation in the medical record of any referred service is already a part of discharge planning in the hospital setting. The proposed changes to the GFR requirements are to conform our regulation to updated clinical standards and also do not pose a significant change.

8. Medicare Shared Savings Program

a. Modifications to the Shared Savings Program Quality Reporting Requirements Under the APP and the Quality Performance Standard

In section III.J.1.d. of this proposed rule, we are proposing to freeze the quality performance standard at the 30th percentile MIPS Quality Performance Category Score for performance year 2023, increasing to the 40th percentile MIPS Quality performance category score in performance year 2024. Without this proposed change, the quality standard would have increased to the 40th percentile in 2023. The quality performance standard is the minimum performance level ACOs must achieve in order to share in any savings earned, avoid maximum shared losses under certain payment tracks, and avoid quality-related compliance actions.

Our analysis of quality performance data reported by ACOs for performance years starting during 2019 indicates that about 20 percent of ACOs would have failed a quality performance standard defined as the 40th percentile across all MIPS Quality performance category scores as would apply for PY 2023 without the proposed 1-year delay. There is significant uncertainty whether PY 2023 would play out similarly to the baseline data. The fraction of ACOs ultimately failing to meet a higher standard in PY 2023 could change significantly if the universe of MIPS Quality performance category scores improves relative to ACOs' quality performance scores, or alternatively if ACOs, particularly ACOs at risk of failing, respond to the increased quality performance standard by boosting their performance. Utilizing a Monte Carlo approach, assuming that the simulated poor performing ACOs have a 50 percent chance of improving their quality performance beyond the 40th percentile, if CMS kept the quality performance standard at the 40th percentile, then the cost of reducing to the 30th percentile in 2023 would be $190 million (range $10 million to $370 million). There is a wide range because slight changes in quality scoring at the low end of the distribution could render the 40th percentile more or less of an effective point of discrimination among ACOs earning shared savings.

In addition, in section III.J.1.c. of this proposed rule, we are proposing an update to the quality reporting requirements under the APM

Performance Pathway or APP for performance years 2022 and 2023.

For performance year 2022: An ACO would be required to report on either

(a) The ten CMS Web Interface measures and administer a CAHPS for MIPS survey and CMS would calculate the two claims based measures included under the APP, or

(b) The three eCQM/MIPS CQM measures and administer a CAHPS for MIPS survey and CMS would calculate the two claims based measures included under the APP. If an ACO selects this option, meets the data completeness at § 414.1340 and the case minimum requirement at § 414.1380 for all three eCQM/MIPS CQM measures, and achieves a quality performance score equivalent to or higher than the 30th percentile on at least one measure in the APP measure set, the ACO would meet the quality performance standard used to determine eligibility for shared savings and to avoid maximum shared losses, if applicable, for that performance year. If an ACO chooses this option, its performance on all six measures in the APP measure set would be used for purposes of MIPS scoring under the APP. If an ACO decides to report both the ten CMS Web Interface measures and the three eCQM/MIPS CQM measures, it will receive the higher of the two quality scores for purposes of the MIPS Quality performance category.

If an ACO does not report any of the ten CMS Web Interface measures or any of the three eCQM/MIPS CQM measures and does not administer a CAHPS for MIPS survey under the APP, the ACO will not meet the quality performance standard.

For performance year 2023: An ACO would be required to report on either:

(a) The ten CMS Web Interface measures and at least one eCQM/MIPS CQM measure and administer a CAHPS for MIPS survey and CMS would calculate the two claims-based measures included under the APP or

(b) The three eCQM/MIPS CQM measures and administer a CAHPS for MIPS survey and CMS would calculate the two claims based measures included under the APP. If an ACO selects this option, meets the data completeness requirement at § 414.1340 and the case minimum requirement at § 414.1380 for all three eCQM/MIPS CQM measures, and achieves a quality performance score equivalent to or higher than the 30th percentile on one measure in the APP measure set, the ACO would meet the quality performance standard used to determine eligibility for shared savings and to avoid maximum shared losses, if applicable, for that performance year. If an ACO chooses this option, its performance on all six measures in the APP measure set would be used for purposes of MIPS scoring under the APP. If an ACO decides to report both the ten CMS Web Interface measures and the three eCQM/MIPS CQM measures, it will receive the higher of the two quality scores for purposes of the MIPS Quality performance category.

If an ACO does not report at least one eCQM/MIPS CQM measure the ACO would not meet the quality performance standard.

Absent the related proposal analyzed above to reduce the performance standard to the 30th percentile MIPS Quality performance category score, the proposed changes to the quality reporting requirements, including the accommodation to continue the availability of the CMS Web Interface as a reporting mechanism under the APP would have likely provided an easier path for a meaningful subset of ACOs that would have otherwise faced difficulty meeting the quality threshold previously established in rulemaking for PY 2023. However, we estimate that nearly all such ACOs would already meet the lower 30th percentile performance standard in PY 2023 without the additional reporting flexibility. Of the relatively few, remaining ACOs, that we estimate would fail to meet the proposed lower 30th percentile performance standard, we estimate that about half (on average) would meet the quality performance standard as a result of the proposed quality reporting flexibility, and thereby further increase shared savings payments to ACOs by about $20 million in PY 2023.

b. Modifications to Other Shared Savings Program Requirements

We do not anticipate a material aggregate impact for the other changes we are proposing related to the Shared Savings Program, specifically: revisions to the definition of primary care services used in the Shared Savings Program's beneficiary assignment methodology (section III.J.2. of this proposed rule); revisions to the repayment mechanism arrangement policy, including changes to the calculation and recalculation of repayment mechanism amounts (section III.J.3. of this proposed rule); revision of the requirements concerning disclosure of prior participation in the Shared Savings Program by the ACO, ACO participants, and ACO providers/suppliers, and revisions to Shared Savings Program requirements to reduce the frequency and circumstances under which ACOs submit sample ACO participant agreements and executed ACO participant agreements to CMS (section III.J.4. of this proposed rule); and revisions to the beneficiary notification requirement as it applies to ACOs under prospective assignment and ACOs under preliminary prospective assignment with retrospective reconciliation (section III.J.5. of this proposed rule).

However, as we note in section III.J.3. of this proposed rule, lower required repayment mechanism amounts could reduce costs for ACOs in fees charged by financial institutions for letters of credit and by insurance companies for surety bonds. We estimate that such relief, in total for all participating ACOs, could be worth $2 to $4 million annually under the proposed approach (assuming a reduction of approximately $196 million in repayment mechanism amounts, in aggregate) and $3 to $6 million annually under the second, alternative option (assuming a reduction of approximately $322 million in repayment mechanism amounts, in aggregate).

We also note that the proposed revisions to the definition of primary care services used in the assignment methodology may have differing effects on a subset of participating ACOs, for example by changing the competing ACO to which a beneficiary ultimately is assigned, for a small subset of beneficiaries. We do not anticipate such ACO-level changes would result in a net impact on program spending overall.

9. Medicare Ground Ambulance Data Collection System

In section III.K. of this proposed rule, we propose a series of changes to the Medicare Ground Ambulance Data Collection System including the proposed change to the data collection period and data reporting period for selected ground ambulance organizations in year 3, proposed revisions to the timeline for when the payment reduction for failure to report will begin and when the data will be publicly available, and proposed revisions to the Medicare Ground Ambulance Data Collection Instrument.

While we believe that these changes and clarifications will be well received by the ground ambulance stakeholders, we do not believe that these changes would have any substantive impact on the cost or time associated with completing the Medicare Ground Ambulance Data Collection Instrument. We note that the overall length of the Medicare Ground Ambulance Data Collection Instrument is the same as previously finalized (84 FR 62888) with these changes. Additionally, some of the

instructions which we propose to add are intended to improve clarity and may therefore reduce the time the ground ambulance organizations spend addressing the questions.

10. Medicare Diabetes Prevention Program Expanded

a. Effects of Proposals Relating to the Medicare Diabetes Prevention Program Expanded Model

(1) Effects on Beneficiaries

We propose to modify certain Medicare Diabetes Prevention Program (MDPP) expanded model policies to: (1) Allow CMS to remove the ongoing maintenance phase (months 13–24) of the MDPP set of services for those beneficiaries who started their first core session on or after January 1, 2022; (2) update the performance payments for the MDPP set of services in the core and core maintenance performance periods; and (3) waive the Medicare provider enrollment application fee for all organizations enrolling as MDPP suppliers on a prospective basis. These proposed changes will have a positive impact on beneficiaries' health by increasing the capacity of MDPP eligible organizations to enroll in Medicare as MDPP suppliers and increasing access to the MDPP set of services to beneficiaries. Eligible beneficiaries receive these services as preventive services, which require no copays or cost sharing. These proposed changes address MDPP supplier and beneficiary needs based upon all available monitoring and evaluation data. The proposed changes are also responsive respond to stakeholder comments.

(2) Effects on the Market

Currently, more than 1,000 organizations nationally are eligible to become MDPP suppliers based on their preliminary or full CDC Diabetes Prevention Recognition Program (DPRP) status. However, only 27 percent of eligible organizations are participating in MDPP. We anticipate that the removal of the second year of the MDPP set of services will make MDPP attractive and feasible to more MDPP eligible organizations. Not only does a 12-month MDPP services period align with that of the CDC's National DPP and the DPP model test, our data show that only 10 percent of enrolled MDPP participants continue with the Ongoing Maintenance phase sessions (Year 2), and the majority are reaching their weight loss milestone within the first 6 months of the set of MDPP services. Stakeholders report that the second year of MDPP, or the ongoing maintenance phase, is cost prohibitive due to the costs to retain beneficiaries in year 2 of the expanded model as well as the costs to deliver an additional year of the expanded model that is not supported by the CDC National DPP curriculum. The CDC's National DPP curriculum supports a 1-year program and suppliers have found it difficult to extrapolate the curriculum to a second year. Additionally, MDPP suppliers commented that they have an increasingly difficult time making the business case for MDPP given the costs associated with the ongoing maintenance phase and the low performance payments associated with the second year. Given the low volume of participants continuing in the second year of MDPP, delivering the MDPP ongoing maintenance period creates an undue burden to MDPP suppliers. The cost to offer and deliver the sessions to a small cohort of individuals outweigh the maximum payments available from Medicare.

Stakeholders have consistently commented that CMS should shorten the MDPP expanded model to 1 year, with payment levels at least equivalent to the levels provided in the DPP model test. For example, during the DPP model test, suppliers were paid an average of $462 per beneficiary for the 1-year model test. The second year has made delivering MDPP both financially unattractive and unstainable for many of the current and eligible MDPP suppliers. Suppliers have reported that it is very difficult to engage and retain beneficiaries in a second year, and the reimbursement levels for a second year are inadequate to cover supplier costs. Since a second year of the MDPP deviates from both the DPP model test and the National DPP clinical trial protocol, we propose to shorten the MDPP service period to 1 year and increase the performance payments in the first year. These changes respond to stakeholder feedback and may alleviate some of the difficulty retaining MDPP participants during the core maintenance phase of the program.

(3) Burden Related to Information Collection Requirements—No Impact

(a) Supplier Standards

MDPP suppliers may encounter the Medicare enrollment fee during the following Medicare provider enrollment transactions: Initial enrollment, revalidation (every 5 years for MDPP), or the addition of a new practice location. The provider/supplier enrollment fee for Calendar Year 2021 is $599. Although MDPP suppliers may submit a written request to CMS for a hardship exception to the application fee in accordance with § 424.514, many would not qualify and the hardship application process would simply add more burden on the organization. We have heard from the CDC as well as other stakeholders that the enrollment fee is a potential barrier to eligible MDPP suppliers who would not otherwise enroll in Medicare except for MDPP. Approximately 39 percent of our current suppliers are non-traditional suppliers that serve their local communities and play a critical role in enrolling more diverse, equitable, and inclusive cohorts of Medicare beneficiaries to MDPP. These non-traditional suppliers include, but are not limited to YMCAs, county health departments, community health centers, and non-profit organizations that focus on health education, and otherwise would neither enroll nor be able to enroll as a Medicare supplier at all if it were not for MDPP. They often serve as trusted sources of health information for their communities. However, they also represent a large number of eligible organizations who have not enrolled in Medicare as MDPP suppliers. We anticipate that waiving the enrollment fee along with the other programmatic adjustments are likely to result in more MDPP suppliers, increased beneficiary access to MDPP services, and an ongoing reduction of the incidence of diabetes in eligible Medicare beneficiaries, in both urban and rural communities.

In April 2020, CMS waived all provider enrollment application fees as part of the COVID–19 Emergency Declaration Blanket Waivers for Health Care Providers. As a result, we saw an increase in MDPP supplier enrollment. We believe that granting a permanent waiver of the fee for MDPP suppliers to extend beyond the COVID–19 Emergency Declaration Blanket Waiver, along with the other proposed change to MDPP, may stimulate MDPP supplier enrollment and enhance the MDPP evaluation. We propose waiving the Medicare provider enrollment fee beyond COVID–19 Emergency Declaration Blanket Waivers for Health Care Providers because the enrollment fee creates a potential barrier to MDPP supplier enrollment, beneficiary access to the program, and subsequently, our ability to evaluate MDPP. Specifically, we propose, to waive the enrollment fee as described in section 1866(j)(2)(C)(i) and (ii) of the Act during the MDPP expanded model test phase.

(b) Payment for MDPP Services

Our regulations at § 414.84 specify the payments MDPP suppliers may be eligible to receive, payments for

furnishing MDPP services, and meeting performance targets related to beneficiary weight loss and/or attendance. MDPP suppliers are paid by CMS by submitting claims for MDPP beneficiaries using claim form CMS–1500 (*https://www.cms.gov/Medicare/CMS-Forms/CMS-Forms/Downloads/CMS1500.pdf*). As a condition for payment, claims submitted by MDPP suppliers must be for services furnished to eligible beneficiaries in accordance with § 414.84(b) and (c). We have streamlined the proposed performance payments so that they are easier to understand and suppliers receive larger payments for participants reaching attendance and weight loss performance-based milestones. For example, the proposed attendance-based performance payments are based on a standardized per-session rate, paid after the 1st, 4th, and 9th sessions attended during the core sessions interval, and after attending the two (2) sessions during each of the core maintenance intervals. We have increased performance payments for beneficiary achievement of the 5 percent weight loss goal as well as continued attendance during the core maintenance intervals. Although the proposed maximum payment of $661 over a 1-year service period is less than the current maximum payment of $704 under the original 2-year payment structure, we believe eliminating the second year and its associated payments while increasing the first year payments will result in a financially sustainable expanded model.

Increasing the first year MDPP payment amounts should not negatively affect a supplier's performance (for example, participants' weight loss). The increase to the payment amounts are not applied until after the 4th core session and the largest payments to suppliers are still driven by weight loss achievement. Further, in order to maintain CDC Diabetes Prevention Recognition Program (DPRP) recognition status, which is required to be an MDPP supplier, certain levels of performance metrics (for example, weight loss) must be satisfied. There is no evidence that eliminating the second year maintenance sessions, shortening the MDPP services period to 1 year, will have any negative effects on performance.

(4) Effects on the Medicare Program

(a) Estimated 10-Year Impact of MDPP

Table 126 shows estimates (in millions) for the impact on Medicare spending of two proposed changes to the Medicare Diabetes Prevention Program (MDPP) to be implemented in 2022:

- Waiving the Medicare enrollment fee for all new MDPP suppliers; and
- Shortening the MDPP services period to 1 year and shifting some of the Ongoing Maintenance reimbursement amounts to year one.

TABLE 126: Estimated 10-Year Impact of MDPP on Medicare Spending for CYs 2022 through 2031

Year	2022	2023	2024	2025	2026	2027	2028	2029	2030	2031	Total
Impact on Medicare Spending	$0.2	$0.2	$0.1	$0.0	-$0.1	-$0.2	-$0.2	-$0.3	-$0.3	-$0.4	-$0.9

These estimates by the CMS Office of the Actuary do not consider waiving the Medicare enrollment fee as a direct cost and assume there will be an additional 500 beneficiaries per year participating in MDPP. In the most recent year prior to the Public Health Emergency (PHE), 1,742 Medicare beneficiaries entered MDPP. Increasing the first year payment amounts to suppliers and waiving the Medicare enrollment fee should increase access to MDPP, resulting in more utilization of the MDPP set of services. Starting in 2022, we can assume that 2,000 beneficiaries would have entered the program each year without including the proposed changes. After including these changes, we will now assume 2,500 beneficiaries will enter the program each year. This assumption has a high level of uncertainty and we revisit it in the Sensitivity Analysis section.

(b) Sensitivity Analysis

Since the cost to suppliers for delivering the MDPP set of services is generally unknown, how utilization of the expanded model will be affected by the proposed changes is highly uncertain. Table 127 shows the 10-year impact estimates (in millions) for different levels of additional beneficiary participation as a result of the proposed changes:

TABLE 127: 10 Year Impact Estimates

Additional Beneficiaries Per Year	10-year Estimated Impact
0	$0.5
500 (assumption used in best estimate)	-$0.9
1,000	-$2.3
1,500	-$3.7

Finally, higher projected savings are associated with increases in beneficiary participation, while no additional beneficiaries would result in an estimated cost.

b. Alternatives Considered

No alternatives were considered. The 2-year MDPP service period has depressed interest in MDPP among would-be MDPP suppliers. These proposed actions address stakeholder comments on the barriers to MDPP expanded model success. If we do not take action, we will not be able to scale MDPP as intended, impacting Medicare beneficiary access to this expanded model. Reducing the MDPP from a 24- to a 12-month services period, increasing the year 1 performance payments, and waiving the Medicare provider enrollment application fee not

only better aligns the expanded model with the evidence that helped certify the DPP model test initially, but it will encourage eligible organizations to enroll as MDPP suppliers.

c. Impact on Beneficiaries

This change will have a positive impact on eligible MDPP beneficiaries, as it better aligns with the CDC's National DPP, giving both the participants and the coaches similar messaging around this program, regardless of payer. MDPP suppliers often offer the MDPP set of services to mixed cohorts, or classes with participants who are not eligible for MDPP, but who are enrolled in a National DPP cohort. Since MDPP generally follows the CDC's National DPP and aligns its expanded model with the CDC's DPRP Standards, it is confusing to participants, coaches, and staff when talking about a 2-year set of services to its eligible Medicare participants when the non-Medicare participants have a 1-year program. Finally, reducing the MDPP service period from 2 years to 1 year allows more cohorts to start and finish MDPP during the expanded model initial period of performance, which ends in March 2023.

d. Estimating Regulatory Familiarization Costs

Given that we tried to align this rule as much as possible with the CDC DPRP Standards, there should be minimal regulatory familiarization costs. This rule impacts only enrolled MDPP suppliers and eligible beneficiaries who have started the MDPP expanded model or are interested in MDPP.

11. Medicare Provider and Supplier Enrollment Changes—Provider Enrollment

As explained in section III.N. of this proposed rule, we propose changes to three of our existing revocation reasons:

- We propose to expand § 424.535(a)(2) to permit revocation based on the OIG exclusion of an individual serving in an administrative or management services role for the provider/supplier, such as a billing specialist, accountant, or human resources specialist.
- We propose to expand § 424.535(a)(13) to permit revocation of a physician's or other eligible professional's enrollment if he or she surrenders his/her Drug Enforcement Administration (DEA) certificate of registration in response to an order to show cause.
- We propose to revise the factors in § 424.535(a)(8)(ii) (which permits revocation based on a pattern or practice of submitting non-compliant claims) to better enable CMS to target shorter periods of non-compliant billing.

We believe that all three of these changes would result in an increase in the number of revocations that CMS imposes. However, we believe this number will be rather small. We currently impose only a limited number of revocations under §§ 424.535(a)(2), (a)(13), and (a)(8). Accordingly, since our expansion of these three revocation reasons would be fairly modest, we do not foresee more than a very slight increase in revocations thereunder.

Table 128 outlines the number of revocations we estimate would ensue under our proposed revocation expansions. These numbers only account for additional revocations stemming from our changes:

TABLE 128: Additional Revocations

Revocation Reason	Number
§ 424.535(a)(2)	5
§ 424.535(a)(13)	5
§ 424.535(a)(8)(ii)	5
Total	**15**

Internal CMS data indicates that the average provider/supplier that would be affected by these regulatory expansions receives roughly $50,000 in Medicare payments each year. (We used a similar $50,000 annual payment estimate for our provider enrollment provisions in the CY 2020 PFS final rule) (84 FR 62568)). Providers/suppliers revoked under our proposed revocation expansions would thus not receive these payments. Hence, multiplying our $50,000 estimate by the revocation totals in Table 128 results in a projected transfer from these providers/suppliers to the federal government of $750,000 ($50,000 × 15 revocations).

12. Provider/Supplier Medical Review Requirements—Prepayment and Post-payment Reviews

In section III.N.2. of this proposed rule, we are proposing to: (1) Define key terms including ''additional documentation,'' ''additional documentation request,'' ''post-payment medical review,'' and ''prepayment medical review;'' (2) codify contractors' authority to request additional documentation for prepayment and post-payment review within established timeframes; (3) codify timeframes for response to requests for documentation; and (4) codify result of a failure to comply with prepayment or post-payment documentation request(s) by a provider or supplier, specifically denial of payment. We do not believe these proposals involve any additional impact or burden on providers, suppliers, or states; however, we welcome feedback from stakeholders regarding the potential costs of these proposals.

The proposed regulations would incorporate already established key terms and definitions as well as processing requirements pertaining to prepayment and post-payment medical review into regulation. Although placing this information in regulation could improve provider and supplier understanding of the medical review process and their responsibilities in complying with our review contractor's requests, the proposed regulations represent no change to medical review requirements. As such, we do not anticipate any change in the number of prepayment medical reviews, post-payment medical reviews or the number of additional documentation requests made by contractors.

13. Effect of Proposed Modifications to Medicare Coverage for Opioid Use Disorder (OUD) Treatment Services Furnished by Opioid Treatment Programs (OTPs)

As discussed in section III.O of this proposed rule, we are proposing to allow OTPs to continue to furnish the therapy and counseling portions of the weekly bundles, as well as any additional counseling or therapy that is billed using the add-on code, using audio-only telephone calls rather than via two-way interactive audio-video communication technology in cases

where audio/video communication is not available to the beneficiary after the conclusion of the PHE for COVID–19, provided all other applicable requirements are met.

We believe the Part B cost impact of this proposal would be minimal, since payment for therapy and counseling is included in the bundled payment regardless of the modality used to deliver it and we do not expect that this proposal would increase the frequency at which medically necessary counseling and therapy services are billed using the counseling and therapy add-on code (HCPCS code G2080). However, we are also proposing to require that when these services are furnished using audio-only technology, practitioners certify that they had the capacity to furnish the services using two-way audio/video communication technology, but instead, used audio-only technology because audio/video communication technology was not available to the beneficiary. We believe this proposed change would facilitate broader access to these services for beneficiaries.

Additionally, as discussed in section III.O. of this proposed rule, the FDA recently announced the approval of a new, higher dose naloxone hydrochloride nasal spray product used to treat opioid overdose and that the newly approved product delivers 8mg of naloxone. In the CY 2021 PFS final rule (85 FR 84683 through 84685), we finalized payment for HCPCS code G2215 (Take-home supply of nasal naloxone (provision of the services by a Medicare-enrolled Opioid Treatment Program); List separately in addition to code for primary procedure). HCPCS code G2215 was priced based on an assumption of a typical case in which the beneficiary would be provided with a box of two 4mg nasal spray products. At the time of drafting this proposed rule, we do not yet have any available pricing information for this newly approved product. However, in order to be able to make payment to OTPs under Medicare for this product, we are proposing to create a new G-code describing a take-home supply of this higher dose naloxone hydrochloride nasal spray product. Since pricing information is unavailable for this new product at the time of drafting this proposed rule, the estimated cost impact is unclear at this time, however, we believe utilization would be low based on CY 2021 claims data received so far for HCPCS code G2215.

14. Physician Self-Referral Update

The physician self-referral law provisions are discussed in section III.P. of this proposed rule.

As discussed in section III.P. of this proposed rule, we are proposing to amend the provisions of § 411.354(c)(2) identifying unbroken chains of financial relationships that constitute ''indirect compensation arrangements'' to ensure that a long-standing prohibition on certain per-unit of service compensation formulas for determining charges for the rental of office space and equipment remains within the ambit of the law. This provision, which was inadvertently omitted when the definition of ''indirect compensation arrangement'' was revised in the December 2, 2020 final rule entitled ''Modernizing and Clarifying the Physician Self-Referral Regulations'' (85 FR 77492), is necessary to protect against potential abuses such as overutilization and anti-competitive behavior. We believe that most parties have continued to comply with the regulatory provisions on per-unit of service compensation formulas for the rental of office space and equipment as they have done since the requirements became effective on October 1, 2009. In response to stakeholder inquiries, we are also proposing to add provisions to assist stakeholders in identifying the individual unit to be analyzed under the provisions of § 411.354(c)(2)(ii)(A)(i) through (iii) and proposed § 411.354(c)(2)(ii)(A)(iv). We believe that the clarity provided by this proposal would facilitate compliance without adding burden.

As discussed in section III.P. of this proposed rule, we are proposing to permit the use of the exception for preventive screening tests, immunizations, and vaccines at § 411.355(h) for COVID–19 vaccines even when they are not subject to CMS-mandated frequency limits, provided that all other requirements of the exception are satisfied. We believe that this proposal would ensure that the physician self-referral law would not impede the availability of critically important COVID–19 vaccines for Medicare and other patients.

As discussed in section III.P. of this proposed rule, we are proposing regulatory updates related to the process for publication of the Code List for Certain Designated Health Services (the Code List). Specifically, we would update the Code List each calendar quarter. We would provide public notification on the CMS website in advance of each Code List update, followed by a 30-day public comment period. We would provide information on the CMS website regarding the process for submitting public comments through *www.regulations.gov*, and address all public comments on the Code List on the CMS website. In addition, instead of publishing in the PFS final rule, we would publish the Code List solely on the CMS website. Finally, we would revise the definition of ''List of CPT/HCPCS Codes'' at § 411.351 by updating the URL that indicates where the Code List is published on the CMS website. We believe that these proposals would make available the most recent updates in a timelier manner and allow easier access to the most up-to-date Code List.

15. Requirement for Electronic Prescribing for Controlled Substances for a Covered Part D Drug under a Prescription Drug Plan or an MA–PD Plan (section 2003 of the SUPPORT Act) In addition to the cost reflected in the Collection of Information section of this proposed rule, we expect that there would be an additional burden for CMS to award and work with a CMS contractor to develop a process for reviewing the PDE data to assess prescriber compliance with the regulatory provision and review and process prescriber attestations. Based on similar contracts, and conversations with the industry, we have estimated the costs of (A) development of operational strategy for the new program, (B) reviewing PDE data, and (C) prescriber case work. We solicit stakeholder feedback on this estimate and all our assumptions.

(A) *Development of policy:* We estimate that it would take our contractor a week of work, 40 hours, to develop the strategy for how the contractor will process the prescriber attestations. We estimate that it would an operations manager and compliance officer working together at a combined hourly wage of $193.60/hr ($120.90/hr + $72.70/hr) would need a full 40-hour work week to operationalize this aspect of it. Therefore, the aggregate cost would be $7,744 (40 hr * $193.60/hr).

(B) Since systems already exist to collect the appropriate PDE data, our contractor would only have to review the data for compliance with the EPCS mandate. We therefore estimate that it would take 2 computer systems analyst each working at $95.22/hr, a week and a half of work, 60 hours. Therefore, the aggregate cost is $5,713.20 (60 hr * $95.22/hr).

(C) We estimate that it would take 4 administrative support workers each working at $36.82/hr, 60 hours to generate the letters and disseminate them to the appropriate prescriber,

which means that it would cost our contractor $2,209.20/year (60 hr * $36.82/hr) in administrative support costs. We estimate that it would be the full-time job of a customer service representative working at $37.02/hr to field prescriber inquiries about the disseminated letters. Thus, we expect that our contractor will spend $77,001.60 ($37.02/hr * 40 * 52) on the salary of the customer service representative for this task.

The aggregate impact for our contractor is 200 hours at a cost of $92,668. We seek comment on the accuracy of this burden estimate and on any measures that CMS can take to decrease the impact of this provision, while maintaining its utility and implementing the statutory mandate

16. Open Payments

a. Payment Context Field for Teaching Hospitals

This proposal is for a mandatory freeform text context field. We have created this proposal at the request of stakeholders, particularly after conversations with teaching hospitals. The teaching hospitals confirmed that the majority of their disputes arise because of a lack of information within the record and an inability to attribute it to the correct area within their large organization, not the inaccuracy of the record itself. The benefit of this field is to give better context to the records attributed to teaching hospitals and thereby reduce the number of disputes. For this reason, we also believe it will also increase goodwill between the program's stakeholders. The cost is that reporting entities will need to collect an additional piece of information, which will increase burden. We do not believe this burden will be great because compared to physician covered recipient payments, the number of teaching hospital payments is much lower. In addition, we have given flexibility to this field so that the reporting entity can choose which piece of information is most appropriate and can be something that they already collect, such as a check number or name of the department in the hospital.

b. Optional Annual Recertification

The optional annual recertification is at the request of reporting entities and will increase the availability of communication to CMS. The burden associated with this action is low because it will be a low-effort process only completed by the entities who choose to do so.

c. Defining a Physician-Owned Distributorship

Since the program began in 2013, we have heard feedback that physician-owned distributorship (PODs) should be better represented in the data because the conflict of interest potentially created by PODs is at the heart of the program. We created this new definition due to the lack of an existing definition of a POD that would be appropriate for the program's needs. Though this is a new definition, it will only be a subset of the existing definitions of applicable manufacturer and applicable group purchasing organization. ''Applicable manufacturer—POD'' and ''Group purchasing organization—POD'' are already ''business type'' choices when registering in the Open Payments system. Therefore, this definition will not alter existing regulations beyond requiring PODs to identify themselves as such.

d. Disallowing Record Deletion Without Reason

We believe there is not currently language to prevent an applicable manufacturer or applicable group purchasing organization from submitting and attesting to records, then deleting the records to prevent publication. This action would be contrary to the spirit of transparency of the program. To help ensure compliance with this requirement, we are also adding a new field that will allow entities to communicate the reason for the deletion to CMS. Since the entities will have attested to the accuracy and completeness of these records, we believe it is appropriate to confirm the reason for the deletion. We have not perceived the behavior of inappropriate deletions within the data and do not believe it will increase burden beyond the additional field when deleting a record. We are preemptively closing a potential loophole.

e. Disallow Publication Delays of General Payments

The statute requires that delays are ''made pursuant to product research or development agreements and clinical investigations'' (1128G(c)(1)(E) of the Act). A small number of general payments are delayed annually, which we are unable to verify meet this requirement. Research payments contain the appropriate fields to ensure that the statutory provisions are being met. We do not believe that it will be a burden for the small number of general payments to either be reported as research payments or not delayed.

f. Short-Term Loans

Short-term loans are not required to be reported, but they must be shorter than 91 days to meet the exception. This proposal does not create burden because it only clarifies that those 90 days must be the cumulative total for a year, which is already outlined in subregulatory guidance. We do not anticipate that this will change reporting behavior but want to explain the exception more clearly within the text of the final rule.

g. Remove General Ownership Records

Ownership records have special rules for reporting outlined in the statute (section 1128G(a)(2) of the Act), which are not included in the format for general records. However, there is currently a general record for reporting ownership and investment interest (Nature of Payment = 11). We anticipate a small burden for the approximately 92 reporting entities who have previously used the general nature of payment category in order to fill out the different fields in the ownership record. This burden will allow the records to meet statutory mandates.

h. Updated Contact Information

Open Payments conducts regular compliance-related outreaches to reporting entities when it encounters data that may not meet program requirements. We have found that the two contacts provided by applicable manufacturers and group purchasing organizations often become obsolete, especially if a company has not updated its contact information during the recertification process. It is crucial for the integrity of the data that we have the ability to contact entities in the case of irregularities. Additionally, we believe that ensuring informal communications from CMS will reduce burden since it may prevent more formal compliance actions if the entity is unresponsive due to outdated contact information. However, we do not believe this is an issue for the majority of reporting entities, nor do we believe that keeping the contact information updated will create a large burden.

17. Updates to the Quality Payment Program

In section IV.A. of this proposed rule, we included our proposed policies for the Quality Payment Program. In this section, we first present the overall and incremental impacts to the number of expected QPs and associated APM Incentive Payments. In the following sections, we estimate the overall and incremental impacts to the total MIPS eligible population and the payment impacts by practice size for the 2022

MIPS performance period based on various proposed policies, including to modify MIPS eligibility, the MIPS final score and the performance threshold and additional performance threshold as discussed in sections IV.A.3.a.(1) and IV.A.3.f. of this proposed rule.

This RIA uses the 2019 MIPS performance period submissions that were used for the CY 2021 PFS final rule RIA (85 FR 85011 through 85023). The submissions for the 2020 MIPS performance period were not available in time to incorporate into this model and to assess whether the data for 2020 can be used to effectively predict future performance. For the 2020 performance year, we applied the MIPS automatic extreme and uncontrollable circumstances policy to all individual MIPS eligible clinicians and allowed for extreme and uncontrollable applications due to the COVID–19 Public Health Emergency (PHE) (*https://qpp.cms.gov/resources/covid19?py=2020*). Due to these extreme and uncontrollable circumstances policy, not all clinicians or groups may have submitted performance category data for the 2020 MIPS performance period. We will evaluate for the final rule whether it is appropriate to use the 2020 performance period data and whether adjustments would need to be made if CY 2020 performance category submissions data are used.

We ran two RIA models: A baseline and proposed policies RIA model. The aim of the baseline model is to reflect the CY 2022 performance period/2024 MIPS payment year if this proposed rule did not take effect, and therefore, reflects previously finalized policies for the CY 2022 performance period/CY 2024 MIPS payment year. Select examples of the baseline policies scheduled to start in the CY 2022 MIPS performance period/2024 MIPS payment year include the removal of the Web Interface as a collection type and the change in the performance category weights. Our baseline model used the performance threshold and additional performance threshold of the CY 2021 MIPS performance period/2023 MIPS payment year since those values were not previously defined for the CY 2022 MIPS performance period/2024 MIPS payment year. The aim of the proposed policies model is to estimate the incremental effect of the proposed policies for the CY 2022 performance period/CY 2024 MIPS payment year on MIPS eligibility, MIPS final scores, and payment adjustments. Select examples of the proposed policies include, the inclusion of new MIPS eligible clinician types, the inclusion of the Web Interface as a collection type, the change in performance threshold and additional performance threshold, and the new complex patient bonus. Refer to section VII.F.17.d.(2) of this proposed rule for the detailed methods on how we integrated the policies into the baseline and proposed policies models.

a. Estimated APM Incentive Payments to QPs in Advanced APMs and Other Payer Advanced APMs

For payment years from 2019 through 2024, through the Medicare Option, eligible clinicians who have a sufficient percentage of their Medicare Part B payments for covered professional services or Medicare patients through Advanced APMs will be QPs in the applicable QP performance period for a year. These QPs will receive a lump-sum APM Incentive Payment equal to 5 percent of their estimated aggregate paid amounts for Medicare covered professional services furnished during the calendar year immediately preceding the payment year. Beginning in payment year 2021, in addition to the Medicare Option, eligible clinicians may become QPs through the All-Payer Combination Option. The All-Payer Combination Option allows eligible clinicians to become QPs by meeting the QP payment amount or patient count threshold through a pair of calculations that assess a combination of both Medicare Part B covered professional services furnished or patients through Advanced APMs and services furnished or patients through Other Payer Advanced APMs.

Eligible clinicians who become QPs for a year are not subject to MIPS reporting requirements and payment adjustments. Eligible clinicians who do not become QPs, but meet a lower threshold to become Partial QPs for the year, may elect to report to MIPS and, if they elect to report, would then be scored under MIPS and receive a MIPS payment adjustment. Partial QPs are not eligible to receive the APM Incentive Payment.

If an eligible clinician does not attain either QP or Partial QP status, and does not meet any another exemption category, the eligible clinician would be subject to MIPS, would report to MIPS, and would receive the corresponding MIPS payment adjustment.

Beginning in payment year 2026, the update to the PFS CF for services that are furnished by clinicians who achieve QP status for a year is 0.75 percent, while the update to the PFS CF for services that are furnished by clinicians who do not achieve QP status for a year is 0.25 percent. In addition, MIPS eligible clinicians would receive positive, neutral, or negative MIPS payment adjustments to payment for their Part B PFS services in a payment year based on performance during a prior performance period. Although the statute establishes overall payment rate and procedure parameters until 2026 and beyond, this impact analysis covers only the 2024 MIPS payment year of the Quality Payment Program.

Overall, we estimate that for the 2022 QP Performance Period between 225,000 and 290,000 eligible clinicians will become QPs, therefore be excluded from MIPS, and qualify for the lump sum APM incentive payment in Payment Year 2024 based on 5 percent of their Part B paid amounts for covered professional services in the preceding year. These paid amounts for QPs are estimated to be between approximately $12,000 million and $15,000 million in total for the 2022 performance year. The analysis for this proposed rule used the 2020 third snapshot participation file. We based APM Incentive Payment Amounts on paid amounts with service dates of January 1, through September 30, 2020. We multiplied the calculated amounts by 1.5 to approximate payment amounts for the full calendar year. We estimate that the total lump sum APM Incentive Payments will be approximately $600–750 million for the 2024 Quality Payment Program payment year.

In section VII.F.17.a. of this proposed rule, we projected the number of eligible clinicians that will be QPs, and thus excluded from MIPS, using several sources of information. First, the projections are anchored in the most recently available public information on Advanced APMs. The projections reflect Advanced APMs that will be operating during the 2022 QP Performance Period, as well as some Advanced APMs anticipated to be operational during the 2022 QP Performance Period. The projections also reflect an estimated number of eligible clinicians that would attain QP status through the All-Payer Combination Option. We note that the Kidney Care Choices Model and the Radiation Oncology model have been included in our analysis as we anticipate that the model will be Advanced APMs in 2022. The following APMs are expected to be Advanced APMs for the 2022 QP Performance Period:

- Bundled Payments for Care Improvement Advanced Model;
- Comprehensive Care for Joint Replacement Payment Model (CEHRT Track);
- Global and Professional Direct Contracting Model;

- Kidney Care Choices Model (Kidney Care First; Professional Option and Global Option);
- Maryland Total Cost of Care Model (Care Redesign Program; Maryland Primary Care Program);
- Medicare Shared Savings Program (Basic Track Level E, and the ENHANCED Track);
- Oncology Care Model (Two-Sided Risk Arrangements);
- Primary Care First (PCF) Model;
- Radiation Oncology model; and,
- Vermont All-Payer ACO Model (Vermont Medicare ACO Initiative).

We used the Participation Lists and Affiliated Practitioner Lists, as applicable, (see 81 FR 77444 through 77445 for information on the APM Participant Lists and QP determinations) on the 2020 third snapshot participation file to estimate the number of QPs, total Part B paid amounts for covered professional services, and the aggregate total of APM Incentive Payments for the 2022 QP Performance Period. We examined the extent to which Advanced APM participants would meet the QP Thresholds of having at least 50 percent of their Part B covered professional services or at least 35 percent of their Medicare beneficiaries furnished Part B covered professional services through the APM Entity.

b. Impact for the CY 2021 MIPS Performance Period/2023 MIPS Payment Year

In section IV.A.3.e.(2)(a)(ii) of this proposed rule, we proposed to double the complex patient bonus, and to increase its cap to 10 points. We expect this proposed policy to result in the median bonus to increase by 3 points, thus increasing MIPS final scores at the median by 3 points. We do not know the effects of the PHE for COVID–19 and its effect on MIPS performance in 2021, so we did not recreate the analysis and payment distributions with the updated bonus for the 2021 MIPS performance period (85 FR 85012 through 85019). Directionally, the increase in complex patient bonus points will result in smaller payment adjustments for three reasons. First, the resulting increase in final scores will reduce the budget neutral pool. Second, the increase in complex patient bonus points will increase the number of clinicians with scores above the performance threshold or additional performance threshold, meaning more clinicians will share in the budget neutral pool and additional $500 million for exceptional performance and potentially lowering the scaling factor that is applied to the MIPS payment adjustment and additional payment adjustment. Third, the average scores of those receiving a positive or additional adjustment will be higher, which means the adjustment rates for clinicians that have scores above the performance threshold or additional performance threshold will be lower.

c. Estimated Number of Clinicians Eligible for MIPS Eligibility for the 2022 MIPS Performance Period/2024 MIPS Payment Year

(1) Methodology To Assess MIPS Eligibility

(a) Clinicians Included in the Model Prior To Applying the Low-Volume Threshold Exclusion

To estimate the number of MIPS eligible clinicians for the 2022 MIPS performance period and the effect of the proposed policies in this proposed rule, we ran two models as described in section VII.F.17.: A baseline model and proposed policies model.

For the baseline and proposed policies models, we used the same eligibility files and approach as described in the CY 2021 PFS final rule (85 FR 85013), which resulted in the inclusion of 1.6 million clinicians who had PFS claims from October 1, 2018 to September 30, 2019 as well as additional clinicians associated with a group who had at least one PFS claim from October 1, 2019 through December 31, 2019. We used the same exclusion criteria to exclude clinicians from our MIPS eligibility assessment as described in the CY 2021 PFS final rule RIA (85 FR 85013), with the following model updates:

(1) In both the baseline and proposed policies models, we excluded practitioners in Next Generation ACOs because the Next Generation ACO model ends in the CY 2021 MIPS performance period.

(2) In both the baseline and proposed policies models, to determine which clinicians in the initial population of 1.6 million should be excluded as QPs, we used Advanced APM payment and patient percentages from the APM Participant List for the final snapshot date for the 2019 QP performance period. We elected to use this data source because the APM participant list for the 2019 final snapshot can reliably be used for RIA projections. From this data, we calculated the QP and Partial QP determinations as described in section of IV.A.4.c.(1)(b) of this proposed rule for the 2022 QP performance period for both models.

(3) In the proposed policies model, we included in our estimated MIPS eligible population for the CY 2022 performance period/2024 payment year clinical social workers and certified nurse-midwives as proposed in section IV.A.3.a.(1) of this proposed rule.

(4) In the proposed policies model, we are integrating the proposal that starting with the CY2022 MIPS performance period/2024 MIPS payment year, small practices, excluding virtual groups, must submit data as a group in any performance category to indicate that they wish to be scored as a group for Medicare Part B claims. This affects eligibility because previously a single Medicare Part B claims submission, without any other submission, started a group score. Once a group score is created, a clinician who was individually excluded from MIPS for being under the low-volume threshold, may now be eligible if the group exceeds the low-volume threshold. This proposed policy is described at section IV.A.3.a. of this rule.

(b) Assumptions Related To Applying the Low-Volume Threshold Exclusion

The low-volume threshold policy may be applied at the individual (TIN/NPI) or group (TIN) levels based on how data are submitted or at the APM Entity level if the clinician is part of an APM Entity in a MIPS APM (hereafter, a MIPS APM Entity) that elects to submit to MIPS. A clinician or group that exceeds at least one but not all three low-volume threshold criteria may become MIPS eligible by electing to opt-in and subsequently submitting data to MIPS, thereby getting measured on performance and receiving a MIPS payment adjustment.

For the proposed policies model, we describe below the estimated MIPS eligibility status and the associated PFS allowed charges of clinicians in the initial population of 1.6 million clinicians. We present in section VII.F.17.c.(1)(c) the incremental impact of the proposed policies from the baseline model for the CY 2022 performance period/2024 payment year on the MIPS eligible clinician population and their associated PFS allowed charges. We applied the same assumptions presented in the CY 2021 PFS final rule RIA to apply the low-volume threshold and to understand whether clinicians participate as a group, virtual group, APM entity, or as individuals (85 FR 85013 through 85016), except for three modifications. We assumed only individuals or APM TINs that exceeded the low-volume threshold would receive an APM Performance Pathway (APP) score consistent with the policy as finalized in the CY 2021 PFS final rule (85 FR

84897).[263] We assumed APM TINs that qualified for opt-in and submitted data as a TIN would also be eligible. Finally, we did not consider clinicians in groups as MIPS eligible clinicians and start a group score for clinicians in small practices with only Medicare Part B claims submissions to reflect the proposed policy at section IV.A.3.a. of this rule.

For the proposed policies model, we estimate approximately 212,000 clinicians[264] will be MIPS eligible because they exceed the low volume threshold as individuals and are not otherwise excluded. These clinicians may ultimately choose to participate in MIPS as an individual, group, virtual group or APM entity. We identify these clinicians as having ''required eligibility'' in Table 129. We estimate approximately 595,000 additional MIPS eligible clinicians will be eligible because they belong to an APM entity, group or virtual group that meets the low-volume threshold and submits to MIPS. These clinicians are identified as having ''group eligibility'' in Table 129. Finally, we estimate about 3,000 clinicians would be eligible through ''opt-in eligibility'' through the ''opt-in'' policy for a total MIPS eligible clinician population of approximately 810,000. This leads to an associated $67 billion allowed PFS charges estimated to be included in the 2022 performance period/2024 payment year.

[263] Under the proposed policy, APM TINs must submit data, but as that was not a requirement for 2019 Shared Saving Program participants, we assumed all TINs that exceed the low-volume threshold would submit data.

[264] The count of 212,000 MIPS eligible clinicians for required eligibility includes those who participated in MIPS (approximately 185,000 MIPS eligible clinicians), as well as those who did not participate (approximately 27,000 MIPS eligible clinicians).

TABLE 129: Description of MIPS Eligibility Status for CY 2022 Performance Period/2024 MIPS Payment Year Using the CY 2022 PFS Proposed Rule Assumptions**

		CY 2022 PFS Proposed Rule estimates	
Eligibility Status	**Predicted Participation Status in MIPS Among Clinicians***	**Number of Clinicians**	**PFS allowed charges ($ in mil)*****
Required eligibility (always subject to a MIPS payment adjustment because individual clinicians exceed the low-volume threshold in all 3 criteria)	Participate in MIPS	184,773	$ 45,007
	Do not participate in MIPS	27,015	$6,313
Group eligibility (only subject to payment adjustment because clinicians' groups exceed low-volume threshold in all 3 criteria and submit as a group)	Submit data as a group	594,578	$15,195
Opt-In eligibility assumptions (only subject to a positive, neutral, or negative adjustment because the individual or group exceeds the low-volume threshold in at least 1 criterion but not all 3, and they elect to opt-in to MIPS and submit data)	Elect to opt-in and submit data	3,259	$ 77
Total Number of MIPS Eligible Clinicians and the associated PFS allowed charges		**809,625 ***	**$ 66,592**
Not MIPS Eligible			
Potentially MIPS Eligible (not subject to payment adjustment for non-participation; could be eligible for one of two reasons: (1) meet group eligibility; or (2) opt-in eligibility criteria)	Do not opt-in; or Do not submit as a group	411,872	$ 10,529
Below the low-volume threshold (never subject to payment adjustment; both individual and group is below all 3 low-volume threshold criteria)	Not applicable	100,501	$ 565
Excluded for other reasons (Non-eligible clinician type, newly enrolled, QP)	Not applicable	303,873	$ 14,951
Total Number of Clinicians Not MIPS Eligible		816,246	$ 26,045
Total Number of Clinicians (MIPS and Not MIPS Eligible)		1,625,871	$ 92,638

* Estimated MIPS Eligible Population

** This table does not include clinicians impacted by the automatic extreme and uncontrollable policy. (approximately 6,000 clinicians and $527 million in PFS allowed charges). It also excludes CPC+, NextGen and submitters with one or more categories identified as being suppressed as a result of bad data.

*** Allowed charges estimated using 2019 dollars. Low-volume threshold is calculated using allowed charges. MIPS payment adjustments are applied to the paid amount.

Furthermore, we estimate there will be approximately 412,000 clinicians who are not MIPS eligible, but could be if their practice decides to participate or they elect to opt-in. We describe this group as ''Potentially MIPS eligible'' in Table 129. These clinicians would be included as MIPS eligible in the unlikely scenario in which all group practices elect to submit data as a group, or clinicians in a group that does not submit are eligible to opt-into MIPS individually and choose to do so. This assumption is important because it quantifies the maximum number of MIPS eligible clinicians. When this unlikely scenario is modeled, we estimate the MIPS eligible clinician population could be as high as 1.2 million clinicians.

Finally, we estimate approximately 101,000 clinicians would not be MIPS eligible because they and their group are below the low-volume threshold on all three criteria and another approximately 304,000 would not be MIPS eligible because they are categorically excluded regardless of volume or submission activity.

Eligibility among many clinicians is contingent on submission to MIPS as a group, virtual group or election to opt-in, therefore we will not know the number of MIPS eligible clinicians who submit until the submission period for the 2022 MIPS performance period is closed. For this proposed policies model analysis, we use the estimated population of 809,625 MIPS eligible clinicians described above.

(c) Estimated Impact of the Proposed Policies on MIPS Eligibility and PFS Allowed Charges

We illustrate in Table 130 how the proposed policy to add clinical social workers and certified nurse-midwives as MIPS eligible clinician types as proposed in section IV.A.3.a.(1) of this proposed rule affects the estimated number of MIPS eligible clinicians. The first row presents the estimates from the RIA baseline model with the number of individuals that would be MIPS eligible clinicians for the 2022 MIPS performance period/2024 MIPS payment year if this proposed rule did not take effect. The second row presents estimates from the RIA proposed policies model with the incremental impact of adding the two new MIPS eligible clinician types on the number of MIPS eligible clinicians for the CY 2022 MIPS performance period/2024 MIPS payment year. As shown in Table 130, the proposed policy to add clinical social workers and certified nurse-midwives as MIPS eligible clinician types leads to a small increase in the number of MIPS eligible clinicians (1.1 percent increase) and a minimal increase in the PFS allowed charges (0.1 percent increase) for the CY 2022 performance period/2024 payment year.

TABLE 130: Effect of Eligibility Changes on the Expected Number of Clinicians and the Allowed Paid Amount in the CY 2022 Performance Period/2024 Payment Year

Policy changes	Estimated cumulative effect of policy change on number of clinicians	Estimated number of clinicians impacted by policy change	% Change /from Baseline in number of MIPS eligible clinicians	Estimated Cumulative PFS Allowed Charges (mil)	% Change in PFS Allowed Charges from Baseline
Baseline policies model: If the CY 2022 proposed rule did not exist.	801,013	N/A	N/A	66,503	N/A
Proposed policies model: Proposed policies for CY 2022 MIPS performance period/2024 payment year.	809,625	8,612	1.1%	66,592	0.1%

d. Estimated Impacts on Payments to MIPS Eligible Clinicians for the CY 2022 Performance Period/2024 Payment Year

(1) Summary of Approach

In sections IV.A.3.d., IV.A.3.e. and IV.A.3.f. of this proposed rule, we present several provisions which impact the measures and activities that impact the performance category scores, final score calculation, and the MIPS payment adjustment. We discuss these changes in more detail in section VII.F.17.d. of this RIA as we describe our methodology to estimate MIPS payments for the CY 2022 performance period/2024 payment year. We then present the impact of the overall proposed policies on the CY 2022 performance period/2024 payment year and then compare select metrics to the baseline model, which only incorporates previously finalized policies for the CY 2022 performance period/2024 payment year. By comparing the baseline model to the proposed policies model, we are able to estimate the incremental impact of the proposed policies for the CY 2022 performance period/2024 payment year.

The payment impact for a MIPS eligible clinician is based on the clinician's final score, and MIPS eligible clinicians can participate as an individual, group, virtual group, or APM Entity in the four MIPS performance categories: Quality, cost, improvement activities, and Promoting Interoperability. As discussed in section VII.F.17. of this proposed rule, we generally used the most recently available submissions data from the Quality Payment Program which is data submitted for the 2019 MIPS performance period. For the cost performance category, we used the same data as the CY 2020 PFS final rule (84 FR 63169).

The estimated payment impacts presented in this proposed rule are averages by practice size weighted by Medicare utilization. The payment impact for a MIPS eligible clinician will vary from the average and would depend on the measure submissions, scores and their performance. The average percentage change in total revenues that clinicians earn would be less than the impact displayed here because MIPS eligible clinicians generally furnish services to both Medicare and non-Medicare patients; this program does not impact payment from non-Medicare patients. In addition, MIPS eligible clinicians may receive Medicare revenues for services under other Medicare payment systems, such as the Medicare FQHC PPS, that would not be affected by MIPS payment adjustment factors.

(2) Methodology To Assess Impact

To estimate participation in MIPS for the CY 2022 performance period/2024 MIPS payment year for this proposed rule, we generally used 2019 MIPS performance period data for both the baseline and proposed policies models. Our baseline and proposed policies scoring models included the 801,013 and 809,625 estimated MIPS eligible

clinicians, respectively, as described in section VII.F.17.c.(1) of this RIA.

To estimate the impact of MIPS policies on MIPS eligible clinicians, we generally used the 2019 MIPS performance period submissions data, including data submitted for the quality, improvement activities, and Promoting Interoperability performance categories. We supplemented this information with the most recent data available for CAHPS for MIPS and CAHPS for ACOs, testing data for the revised total per capita cost measure and Medicare Spending Per Beneficiary (MSPB) clinician measures which were finalized in the CY 2020 PFS final rule (84 FR 62969 through 62977), testing data for the new episode cost measures, administrative claims data for the new quality performance category measures, and other data sets.[265] We calculated a hypothetical final score for the 2022 MIPS performance period/2024 MIPS payment year for the baseline and proposed policies scoring models for each MIPS eligible clinician using score estimates for quality, cost, Promoting Interoperability, and improvement activities performance categories, where each are described in detail in the following subsections.

(a) Methodology To Estimate the Quality Performance Category Score

We estimated the quality performance category score using a methodology like the one described in the CY 2021 PFS final rule (85 FR 85016 through 85017) for baseline and proposed policies RIA models for the CY 2022 MIPS performance period/2024 payment year.

For the baseline policies RIA model, which does not reflect the proposed policies for CY 2022 MIPS performance period/2024 payment year, we made the following modifications to reflect the previously finalized policies for the CY 2022 performance period/2024 payment year for the quality performance category:

(1) As previously finalized in the CY 2021 PFS final rule, we removed the Web Interface as a collection type in MIPS and through the APP for the CY 2022 performance period/2024 MIPS payment year (85 FR 84870 and 85 FR 84843). Although the Web Interface is proposed to be reinstated for groups for the CY 2022 MIPS performance period/2024 MIPS payment year and ACOs for CY 2022 MIPS performance period/2024 MIPS payment year and CY 2023 MIPS performance period/2025 MIPS payment year as discussed in sections IV.A.3.d.(1)(d) and IV.A.3.c.(2)(a), respectively, the baseline model is attempting to capture the CY 2022 MIPS performance period/2024 MIPS payment year as if this proposal did not exist. Therefore, the baseline model does not incorporate the Web Interface as a collection type for groups and ACOs.

To estimate a quality performance category score for clinicians in groups who previously used the Web Interface as a collection type in 2019, we assumed these groups would use the other two other collection types (MIPS CQMs and eCQMs) available in the 2022 MIPS performance period/2024 MIPS payment year. We then applied the same methodology described in the CY 2021 PFS Proposed Rule when the removal of Web Interface as a collection type was previously proposed (85 FR 50387 through 50388) using 2019 MIPS submissions data. To estimate a quality performance category score for ACOs, we used the same methodology described in the CY 2021 PFS proposed rule when the Web Interface was not included in the APP (85 FR 50388).

(2) We used the published 2021 MIPS historical quality benchmarks file to identify measures subject to the topped out scoring cap that was finalized (82 FR 53721 through 53727).[266]

For the proposed policies model, we made the following modifications to the baseline model to reflect the newly proposed policies for the 2022 MIPS performance period/2024 MIPS payment year for the quality performance category:

(1) As discussed in section IV.A.3.d.(1)(e) of this proposed rule, we propose for this proposed rule two new administrative claims measures for those for whom it is applicable: (1) Risk-Standardized Acute Unplanned Cardiovascular-Related Admission Rates for Patients with Heart Failure for the Merit-based Incentive Payment System; and (2) Clinician and Clinician Group Risk-standardized Hospital Admission Rates for Patients with Multiple Chronic Conditions. To implement this policy in our proposed policies RIA model for the 2022 MIPS performance period/2024 MIPS payment year, we used testing data for these new administrative claims measures.

(2) As discussed in section IV.A.3.e.(1)(c) of this proposed rule, we proposed to use performance period benchmarks for the CY 2022 performance period in accordance with § 414.1380(b)(1)(ii) as opposed to a historical benchmark. Therefore, we used 2019 MIPS performance period benchmarks calculated from the CY 2019 MIPS submissions data because the performance data for this analysis came primarily from the 2019 MIPS performance period.

(3) As discussed in section IV.A.3.e.(1)(c)(iii)(A) of this proposed rule, we proposed to remove the 3-point floor for each measure that can be reliably scored against the benchmark and score the measure from 1 to 10 points. As described in section IV.A.3.e.(1)(c)(iii)(B) of this proposed rule, we also proposed to make the following changes: (1) Remove the special scoring policy of scoring 3 points for class 2 measures, except for clinicians in small practices; (2) introduce a 5-point floor for new measures for their first two performance periods that meet data completeness and can be reliably scored against a benchmark (class 4a measures); and (3) introduce 5 points for new measures in their first two performance periods that meet data completeness, but cannot be reliably scored against a benchmark because they lack a benchmark or do not meet case minimum in the program (class 4b measures). We incorporated these scoring changes into our proposed policies model. Because we are using 2019 MIPS performance period data, we assume that measures new to the 2018 and 2019 MIPS performance periods could qualify as class 4 measures.

(4) As discussed in sections IV.A.3.e.(1)(c)(vi) and IV.A.3.e.(1)(c)(vii) of this proposed rule, we also propose to end measure bonus points for reporting high priority measures and for submitting with end-to-end electronic reporting beginning in the 2022 MIPS performance period. We incorporated these scoring changes into our proposed rule model for all MIPS collection types.

(5) As discussed in section IV.A.3.d.(1)(d), we are proposing to extend Web Interface measures for the CY 2022 performance period/2024 MIPS payment year for groups and virtual groups using the existing 10 CMS Web Interface measures. To estimate the impact of this proposed policy, we used the same methodology described in the CY 2021 PFS final rule (85 FR 85016 through 85017) using 2019 MIPS submissions data.

(6) Finally, we are also proposing to extend the CMS Web Interface as a means of reporting quality under the APM Performance Pathway for Shared Savings Program ACOs for the CY 2022 and CY 2023 MIPS performance periods and 2024 and 2025 MIPS payment years as described in section IV.A.3.c.(2)(a) of

[265] Data submitted to MIPS for the 2018 MIPS performance period data was used for the improvement score for the quality performance category. We also incorporated some additional data sources when available to represent more current data.

[266] Data downloaded on April 9 2021 from *https://qpp.cms.gov/resources/resource-library.*

this proposed rule. Under the proposal, for the CY 2022 and CY 2023 MIPS performance periods and 2024 and 2025 MIPS payment years, Web Interface reporting would work in the same manner as for performance year 2021, where ACOs would have the option of reporting either the CMS Web Interface, the APP eCQM/MIPS CQM measure set, or both. To estimate the impact of this proposed policy, we used the same methodology described in the CY 2021 PFS final rule RIA (85 FR 85016 through 85017) when Web Interface was retained for the APP.

(b) Methodology To Estimate the Cost Performance Category Score

We estimated the cost performance category score using a similar methodology described in the CY 2020 PFS final rule (84 FR 63169) with the modifications to the baseline and the proposed policies RIA model described in this section.

In the baseline policies RIA model, we refined our methodology for developing benchmarks to better reflect the previously finalized policy in CY 2017 Quality Payment Program final rule (81 FR 77308 through 77309). We did not estimate cost improvement scoring that starts in the 2022 MIPS performance period/2024 MIPS payment year as previously finalized at § 414.1380(a)(1)(ii) and in the CY 2019 PFS final rule (83 FR 58956) since we did not have sufficient data to conduct improvement scoring, which requires 2 years of cost data to model.

In the proposed policies RIA model, we modified the baseline model to incorporate the proposal to add five new episode-based cost performance category measures in the CY 2022 MIPS performance period/2024 payment year as described in section IV.A.3.d.(2) of this proposed rule, by using claims data from January 1, 2019 to December 31, 2019. Cost measures were scored if the clinicians or groups met or exceeded the case volume: 10 Episodes for Melanoma Resection to align with the reporting case minimum for procedural cost measures currently in use in MIPS, 20 episodes for Sepsis to align with the reporting case minimum for acute inpatient condition cost measures currently in use in MIPS, 20 episodes for Diabetes and Asthma/COPD as used in field testing for these chronic measures, and 20 episodes for Colon Resection. These newly proposed cost episode-based measures were calculated for both the TIN/NPI and the TIN.

(c) Methodology To Estimate the Facility-Based Measurement Scoring

For the baseline model, we estimated the facility-based score using the scoring policies finalized in the CY2018 Quality Payment Program final rule (82 FR 53763) and the methodology described in the CY 2020 PFS final rule (84 FR 63169). For the proposed policies model, we used the methodology proposed for the CY 2022 MIPS performance period/2024 MIPS payment year as discussed in section IV.A.3.e.(2)(b)(v)(B) of this proposed rule. We propose at § 414.1380(e)(vi) that beginning with the CY 2022 MIPS performance period/CY 2024 MIPS payment year, the MIPS quality and cost performance category scores will be based on the facility-based measurement scoring methodology unless a clinician or group receives a higher MIPS final score through another MIPS submission. Therefore, if a MIPS eligible clinician or a group is eligible for facility-based measurement, but they participate in MIPS as an individual or group, we used the higher final score between the facility-based scoring and MIPS submission-based scoring.

(d) Methodology To Estimate the Promoting Interoperability Performance Category Score

For the baseline RIA model, we used the CY 2019 MIPS Promoting Interoperability performance period data submissions data to estimate CY 2022 MIPS performance for the Promoting Interoperability performance category. We made the following two modifications to the 2019 performance period scoring to reflect the previously finalized policy changes between the CY 2019 and CY 2021 performance periods: (1) We doubled the bonus points for clinicians who submitted the PDMP measure as described in section IV.A.3.d.(4)(c)(i) of this proposed rule; and (2) we did not incorporate the Verify Opioid Treatment Agreement measure data, a measure that was finalized in the CY 2019 performance period (83 FR 59807) but removed in the CY 2020 performance period (84 FR 62994). We retained the PDMP bonus for the baseline model for continuity between the CY 2021 and 2022 performance periods and for consistency since bonuses for the quality performance category were retained for the baseline as well. Because we lacked data on who would adopt the finalized Health Information Exchange bi-directional exchange measure for the CY 2021 performance period and how these clinicians would score, we only used past reporting on the existing Health Information Exchange Objective measures to estimate CY 2022 Promoting Interoperability performance.

For the proposed rule model, we considered the following policy proposals as potential modifications to the baseline RIA model:

(1) In section IV.A.3.d.(4)(c)(i) of this proposed rule, we proposed for the PDMP measure to remain optional and at 10 points. Modifications were not made to reflect this proposed policy in the proposed policies model since the baseline model already incorporated this policy.

(2) In section IV.A.3.d.(4)(c)(iii) of this rule, we proposed to require two of the measures associated with the Public Health and Clinical Data Exchange Objective, beginning with the CY 2022 performance period: Immunization Registry Reporting; and Electronic Case Reporting. Because we lacked data, we did not integrate this requirement into our proposed rule model.

(3) In section IV.A.3.d.(4)(h)(i) of this rule, we proposed to automatically reweight the Promoting Interoperability performance category to another performance category and assigned a weight of zero only in the event a small practice did not submit any data for any of the measures specified for the Promoting Interoperability performance category. This policy was implemented in the proposed policies model.

(4) In section IV.A.3.d.(4)(h)(ii) of this proposed rule, we proposed to reweight the Promoting Interoperability performance category for clinical social workers. This policy was implemented in the proposed policies model.

(5) In section IV.A.3.d.(4)(d) of this proposed rule, we proposed the additional requirement that eligible clinicians must attest to conducting an annual assessment of the High Priority Guides of the SAFER Guides beginning with the 2022 MIPS performance period. This policy was not implemented in the proposed policies model as it does not affect eligibility or payment. We included this policy in our burden calculations in section V.B.8.g.(3) of this rule.

(e) Methodology To Estimate the Improvement Activities Performance Category Score

For the baseline model, we modeled the improvement activities performance category score based on CY 2019 MIPS performance period data and APM participation identified in section VII.F.17.c.(1) of this proposed rule. For clinicians and groups not participating in a MIPS APM, we used the CY 2019 submissions improvement activities

score. We did not model the policy finalized in the CY 2020 performance period (84 FR 62980) to require a minimum threshold of 50 percent of clinicians in a group to complete an improvement activity for the group to receive credit since we did not have data to determine the proportion of clinicians in a group that completed the improvement activity. We continued to apply the methodology described in the CY 2020 PFS final rule (84 FR 63170) to assign an improvement activities performance category score. For the APM participants identified in section VII.F.17.c.(1) of this proposed rule, we assigned an improvement activity performance category score of 100 percent.

For the proposed policies model, we did not make modifications to the baseline model to reflect the proposed policies in section IV.A.3.d.(3) of this proposed rule since we did not have the data to model those changes.

(f) Methodology To Estimate the Complex Patient Bonus Points

In section IV.A.3.e.(2)(a)(iii)(B) of this proposed rule, we proposed to continue the complex patient bonus, with updates, for the CY 2022 MIPS performance period/2024 payment year. For the baseline RIA model, we used the complex patient bonus information calculated for the 2019 performance period data for the 2022 MIPS performance period/2024 payment year, as was previously done in the CY 2021 PFS final rule (85 FR 85017).

For the proposed policies RIA model, we calculated the complex patient bonus using the calculation proposed in section IV.A.3.e.(2)(a)(iii)(B)(cc) of this proposed rule for the CY 2022 performance period/2024 payment year. In section IV.A.3.e.(2)(a)(iii)(B)(aa) of this proposed rule, we propose updates to the complex patient bonus for the CY 2022 performance period/2024 payment year and future MIPS performance periods/payment years to account for social and medical complexity, while still using our current established indicators of dual proportion and HCC risk scores, respectively. Consistent with the proposed policy for the 2022 performance period, our proposed policies RIA model calculated and applied the separate risk indicator complex patient bonus components methodology with a single overall cap described in section IV.A.3.e.(2)(a)(iii)(B)(dd) of this proposed rule.

(g) Methodology To Estimate the Final Score

We did not propose any changes for how we calculated the MIPS final score. Our baseline and proposed policies RIA models assigned a final score for each TIN/NPI by multiplying each estimated performance category score by the corresponding performance category weight, adding the products together, multiplying the sum by 100 points, adding the complex patient bonus, and capping at 100 points.

For the baseline policies RIA model, we applied the performance category weights and redistribution weights finalized in the CY 2021 PFS final rule (85 FR 84913 through 84916).

For the proposed policies RIA model, we proposed to modify the redistribution policy for small practices. Therefore, we applied redistribution weights proposed in section IV.A.3.e.(2)(b)(iii)(A) of this proposed rule.

For both models, after adding any applicable bonus for complex patients, we reset any final scores that exceeded 100 points to equal 100 points. For MIPS eligible clinicians who were assigned a weight of zero percent for any performance category, we redistributed the weights according to section IV.A.3.e.(2)(b)(ii) of this proposed rule.

(h) Methodology to Estimate the MIPS Payment Adjustment

For the baseline and proposed policies RIA models, we applied the hierarchy as finalized in the CY 2021 PFS final rule (85 FR 84917 through 84919) to determine which final score should be used for the payment adjustment for each MIPS eligible clinician when more than one final score is available. We then calculated the parameters of an exchange function in accordance with the statutory requirements related to the linear sliding scale, budget neutrality, minimum and maximum adjustment percentages, and additional payment adjustment for exceptional performance (as proposed under § 414.1405).

For the baseline policies model, we applied the performance threshold and additional performance thresholds finalized for the CY 2021 performance period/2023 payment year (85 FR 84923), of 60 and 85, respectively. For the proposed policies model, we used the performance threshold of 75 points as proposed in section IV.A.3.f. (2) and the additional performance threshold of 89 points as proposed in section IV.A.3.f.(3). We used these resulting parameters to estimate the positive or negative MIPS payment adjustment based on the estimated final score and the paid amount for covered professional services furnished by the MIPS eligible clinician. As discussed in the CY 2021 PFS final rule RIA (85 FR 85013), we adjusted the paid amount of non-engaged clinicians to equal their proportion of paid amount prior to the PHE for COVID–19 for the baseline and proposed policies RIA models.

(3) Impact of Payments by Practice Size

As we shift from previous MIPS transition policies by removing bonuses from the quality performance category and increasing the performance threshold and the additional performance threshold, we observe large changes between the baseline and proposed policies RIA models.

First, we observe an increase in the funds available for redistribution due to the increase in clinicians with final scores below the performance threshold. The baseline model estimates $428 million would be redistributed through budget neutrality and that $500 million would be distributed to MIPS eligible clinicians for exceptional performance. The mean and median final scores for the baseline model are 78.13 and 82.59, respectively. Our proposed policies model estimates that $587 million would be redistributed through budget neutrality. For clinicians who meet or exceed the additional performance threshold, an additional $425 million was estimated to be distributed. The mean and median final scores for the proposed policies model are 75.86 and 80.30, respectively.

In the proposed model, the estimated bonus for exceptional performance is less than the $500 million of available funding because the maximum additional payment adjustment for clinicians with exceptional performance reached 10 percent. As finalized in the 2017 QPP final rule (81 FR 77339 through 77340), we stated the maximum additional payment adjustment would be 10 percent, which is established by the statute, and that it would be multiplied by a scaling factor that cannot exceed 1.0. We reached the maximum additional payment adjustment allowed of 10 percent because the additional performance threshold is higher, and fewer clinicians performed above this higher additional performance threshold while a greater percentage of clinicians performed below the additional performance threshold. As a result, fewer clinicians were sharing the funds available through the additional bonus for exceptional performance.

Second, we observe an increase in the maximum positive payment adjustment. The baseline model estimates the maximum positive MIPS payment adjustment based on the budget neutral pool at 1.5 percent and the maximum positive MIPS additional payment adjustment for exceptional performance at 5.1 percent, for a combined maximum payment adjustment of 6.6 percent. The proposed policies model estimates the maximum MIPS positive payment adjustment based on the budget neutral pool at 4.0 percent and the maximum positive additional MIPS payment adjustment for exceptional performance bonus at 10.0 percent for a combined maximum payment adjustment of 14.0 percent.

Finally, we no longer observe large differences in performance across practice sizes due to the shift from MIPS transition policies. Table 131 shows the overall impact of the payment adjustments by practice size and based on whether clinicians are expected to submit data to MIPS for the proposed policies model. We estimate performance under the proposed policies will be similar across all practice sizes. The smallest proportion of clinicians receiving a positive or neutral payment adjustment is among clinicians in practices with 16 to 24 clinicians compared to other sized practices among those who submit data. Table 131 also shows that overall 67.5 percent of MIPS eligible clinicians that participate in MIPS are expected to receive positive or neutral payment adjustments. In Table 132, we present the overall impact of the baseline and the proposed policies models among clinicians who submit data to assess the incremental impact of the proposed policies. The overall proportion of clinicians receiving a positive or neutral payment adjustment decreases from 91.7 percent to 67.5 percent with the implementation of the proposed policies that shift away from MIPS transition policies. Among clinicians who receive a positive payment adjustment in the baseline model and receive a negative payment adjustment in the proposed policies model, only 30 percent receive a negative payment adjustment greater than 1 percent. In addition, we no longer observe a disproportionate number of clinicians in small practices receiving a negative payment adjustment when implementing the proposed policies.

For the CY 2022 performance period/2024 payment year, we have policies targeted towards small practices including special scoring policies to minimize burden and facilitate small practice participation in MIPS or APMs, which we describe in section VII.F.17.f.(2)(e) of this proposed rule. The intention of the proposed policies is to provide a more equitable participation process and reduce the disparity in performance between clinicians in large and small practices. These findings and proposed policies reflect movement away from the transition policies implemented during the early years of MIPS and how MIPS is focusing on value rather than primarily on engagement. However, non-engagement by not submitting data to MIPS among clinicians in small practices is still a concern. Among those who we estimate would not submit data to MIPS, 85 percent are in small practices (23,056 out of 27,108 clinicians who do not submit data). We intend to continue working with stakeholders to improve engagement in MIPS among clinicians in small practices.

We want to highlight we are using 2019 MIPS performance period submissions data to simulate a 2022 MIPS performance period final score, and it is likely that there will be changes that we cannot account for at this time, including services and payments disrupted by the PHE for COVID–19 or clinicians changing behavior in response to the performance thresholds increased for the 2022 performance period/2024 payment year to avoid a negative payment adjustment. It should also be noted that the estimated number of clinicians who do not submit data to MIPS may be an overestimate of non-engagement in MIPS for the CY 2022 MIPS performance period/2024 payment year. This is because the PHE for COVID–19 may have resulted in fewer clinicians submitting data to MIPS or more clinicians electing to apply for the extreme and uncontrollable circumstances policies due to the PHE for COVID–19 for the 2019 MIPS performance period. Therefore, engagement levels in MIPS for the CY 2022 performance period/2024 payment year may differ from these reported estimates. We also note this participation data is generally based off participation for the 2019 performance period, which is associated with the 2019 performance period/2021 payment year and had a performance threshold of 30 points, and that participation may change for the 2022 performance period/2024 payment year when the performance threshold is 75 points.

Finally, the combined impact of negative and positive adjustments and the additional positive adjustments for exceptional performance as a percent of paid amount among those that do not submit data to MIPS was not the maximum negative payment adjustment of 9 percent possible because some MIPS eligible clinicians that do not submit data to MIPS receive a non-zero score for the cost performance category, which utilizes administrative claims data and does not require separate data submission to MIPS.

e. Estimated Impacts on Payments to MIPS Eligible Clinicians for the 2023 MIPS Performance Period/2025 MIPS Payment Year

We are proposing for the CY 2023 MIPS Performance Period to begin transitioning to MIPS Value Pathways (MVPs) and introduce subgroup reporting in the CY 2023 MIPS performance period/2025 payment year. As described in section IV.A.3.b.(2)(d) of the proposed rule, the first step in the transition plan for MVPs and subgroup reporting is to be voluntary, where eventually MVPs and subgroups will become required. Additionally, subgroups, if applicable, will have the option to report an APP. Since MVP and subgroup reporting will only begin in the CY 2023 MIPS performance period/2025 payment year, we do not have the data to report who would select MVP and who would report through subgroup in the first year and how these clinicians will score. For this regulatory impact analysis, we assume clinicians who elect to use MVPs and subgroups for reporting to MIPS will perform similarly to how they performed through traditional MIPS because the scoring policies are similar. As discussed in section V.B.8.e.(7)(a) of this proposed rule, for the purposes of estimating burden associated with the proposal to implement MVP and subgroup reporting, we assume that 10 percent of MIPS eligible clinicians in the CY 2022 MIPS performance period/2024 payment year will report as MVP participants in the CY 2023 MIPS performance period/2025 payment year. In addition, we assume that there will be 20 subgroup reporters in the CY 2023 MIPS performance period/2025 payment year. We anticipate a per respondent reduction of 3 hours and $412 dollars per CQM/QCDR quality submission, 3 hours and $336 per eCQM quality submission, and 5 hours and $717 per claims quality submission. Overall, we estimate a net reduction in burden of $7,463,145 in the quality performance category ICRs due to the introduction of MVP and subgroup reporting in the CY 2023 MIPPS performance period/2025 payment year. We refer readers to section V.B.8.e.(7)(a)(iii) of the proposed rule for further discussion of burden associated with MVPs and subgroups.

f. Additional Impacts from Outside Payment Adjustments

(1) Burden Overall

In addition to policies affecting the payment adjustments, we are proposing several policies that have an impact on burden in the CY 2022 and CY 2023 MIPS performance periods/2024 and 2025 payment years. In section V.B.8 of this proposed rule, we outline estimates of the costs of data collection that includes both the effect of proposed policy updates and adjustments due to the use of updated data sources. For each proposal included in this regulation which impacts our estimate of collection burden, the incremental burden for each is summarized in Table 133. We also provide proposed additional burden discussions that we are not able to quantify.

TABLE 133: Incremental Burden from Associated Proposed Policies

Burden Description and associated finalized proposals	Burden Hours	Burden Dollars
Total burden associated with the proposal to continue the policies and ICRs set forth in the CY 2021 PFS final rule into the CY 2022 and 2023 MIPS performance periods (as discussed in section V.B.8.p.)	1,468,547	$148,093,881
Burden change due to proposed policy to continue the CMS Web Interface measures as a collection type/submission type for CY 2022	+7,030	+$669,433
Burden change due to proposed policy to sunset the CMS Web Interface measures as a collection type/submission type for CY 2023*	0	0
Burden change due to proposed policy to continue CMS Web Interface group registration for CY 2022	+23	+2,142
Burden change due to proposed policy to continue CMS Web Interface group registration for CY 2023	0	0
Burden change due to the proposed policy to require QCDRs to submit participation plans for the CY 2022 self-nomination period., if necessary	+156	+$14,826
Burden change due to the proposed policy to require qualified registries to submit participation plans for the CY 2022 self-nomination period., if necessary	+108	+$10,322
Burden change due to the proposed revised criteria for nomination of improvement activities: proposed increase of criteria from 1 to 8 including proposed addition of 2 new criteria for nomination of improvement activities beginning with the CY 2022 Annual Call for MIPS Improvement Activities	+43	+$6,236
Burden change due to proposed automatic reweighting of the Promoting Interoperability performance category for small practices	-3,474	-$330,747
Burden change due to proposed SAFER guides attestation requirement for the Promoting Interoperability performance category for CY 2022	+861	+$81,964
Burden change due to the new ICR for capturing proposed MVP registration requirement for clinicians participating in MVPs reporting beginning with the CY 2023 MIPS performance period*	+3,230	+$307,513
Burden change due to the new ICR for capturing proposed subgroup registration requirement for clinicians choosing to participate as subgroups for reporting the MVP or the APP beginning with the CY 2023 MIPS performance period*	+10	+$952
Burden change for Quality Data Submission by Clinicians: Medicare Part B Claims-Based Collection Type ICR for capturing reduced number of quality submissions due to MVP Quality Submissions beginning with the CY 2023 MIPS performance period*	-40,118	-$4,037,279
Burden change for Quality Data Submission by Clinicians: CQM/QCDR Collection Type ICR for capturing reduced number of quality submissions due to MVP Quality Submissions beginning with the CY 2023 MIPS performance period*	-47,264	-$4,801,691
Burden change for Quality Data Submission by Clinicians: eQM Collection Type ICR for capturing reduced number of quality submissions due to MVP Quality Submissions beginning with the CY 2023 MIPS performance period*	-38,926	-$3,988,122
Burden change due to new ICR for capturing the proposed	+84,336	+$8,564,735

Burden Description and associated finalized proposals	Burden Hours	Burden Dollars
reduced reporting requirements for the quality performance category of MVPs beginning with the CY 2023 MIPS performance period *		
Total change in burden due to policy for CY 2022	**+3,811**	**-+$358,556**
Total change in burden due to policy for CY 2023	**-40,982**	**- $4,166,021**
Total burden set forth in the CY 2022 PFS proposed rule for CY 2022	**1,428,537**	**$144,040,730**
Total burden set forth in the CY 2022 PFS proposed rule for CY 2023	**1,383,744**	**$139,516,153**

* The total change in burden due to this policy includes a decrease in burden due to elimination of the "Quality Data Submission: CMS Web Interface collection type" ICR beginning with the CY 2023 MIPS performance period and "Group Registration for CMS Web Interface" ICR beginning with the CY 2023 MIPS performance period as well as an increase in burden for the "Quality Data Submission: MIPS CQM and QCDR collection type" and "Quality Data Submission: eCQM collection type" ICRs beginning with the CY 2023 MIPS performance period for respondents who previously submitted via the CMS Web Interface submitting data via an alternate collection type. Burden will decrease in the "Quality Data Submission: MIPS CQM and QCDR collection type," "Quality Data Submission: eCQM collection type," and "Quality Data Submission: Claims collection type" ICRS beginning with the CY 2023 MIPS performance period due to respondents who previously submitted MIPS through those collection types submitting data with reduced Quality submission requirements as a MVP participant. Total change in burden also includes the increase in submission burden due to the introduction of the "MVP Quality Submission," "MVP registration," and "Subgroup registration" ICRs beginning with the CY 2023 MIPS performance period. See section V.B.8 of this proposed rule.

BILLING CODE 4120–01–C

(2) Additional Impacts to Clinicians

(a) Web Interface

As discussed in section IV.A.3.d.(1)(d) of this proposed rule, we are proposing to continue the use of the CMS Web Interface measures as a collection type for groups and virtual groups with 25 or more eligible clinicians for the CY 2022 MIPS performance period/2024 MIPS payment year. We are also proposing to sunset the CMS Web Interface measures as a collection type for groups and virtual groups with 25 or more eligible clinicians starting with the CY 2023 MIPS performance period/2025 MIPS payment year. We refer readers to sections V.B.8.e.(8) and V.B.8.e.(10) of this proposed rule for our discussion on the estimated burden associated with the extension of the CMS Web Interface collection type in CY 2022 MIPS performance period/2024 MIPS payment year and the sunset of the CMS Web Interface collection type in the CY 2023 MIPS performance period/2025 payment year. Additionally, we assume that the impacts associated with the sunset of CMS Web Interface measures as a collection type for groups and virtual groups with 25 or more eligible clinicians will remain the same as our discussion in the CY 2021 PFS final rule (85 FR 85020 through 85021).

As discussed in section IV.A.3.c.(2)(a), we are proposing to extend the CMS Web Interface as a means of reporting quality under the APP for Shared Savings Program ACOs for the CY 2022 MIPS performance period/2024 payment year and the CY 2023 MIPS performance period/2025 payment year.

(b) Administrative Claims Measure

As discussed in section IV.A.3.d.(1)(e), we are proposing to add the following two new administrative claims measures beginning in the 2022 MIPS performance period and for future performance periods: (1) Risk-Standardized Acute Unplanned Cardiovascular-Related Admission Rates for Patients with Heart Failure for the Merit-based Incentive Payment System; and (2) Clinician and Clinician Group Risk-standardized Hospital Admission Rates for Patients with Multiple Chronic Conditions. We acknowledge there are administrative burdens and related financial costs associated with each administrative claims measure that clinicians, groups, and organizations may choose to monitor. However, because these costs can vary significantly due to organizational size, number of administrative claims measures being reported, volume of clinicians reporting each measure, and the specific methods employed to improve performance, we are unable to provide an estimate of the financial impact each clinician, group, or organization may experience. In summary, we are acknowledging that while there are no data submission requirements per § 414.1325(a)(2)(i) for administrative claim measures, there may be associated costs for clinicians and group practices to monitor new administrative claim measures; however, we are unable to quantify that impact.

(c) Modifications to the Improvement Activities Inventory

As discussed in section IV.A.3.d.(3)(c)(ii) of this proposed rule, we are proposing the removal of 7 previously adopted improvement activities, modification of 15 existing improvement activities, and adoption of 5 new improvement activities. We refer readers to Appendix 2 of this proposed rule for further details. We do not believe these proposed changes to the inventory will impact time or financial burden on stakeholders because MIPS eligible clinicians are still required to submit the same number of activities and the per response time for each activity is uniform. We do not expect these proposed changes to the inventory to affect our currently approved information collection burden estimates in terms of neither the number of estimated respondents nor the burden per response. We anticipate most clinicians performing improvement activities, to comply with existing MIPS

policies, would continue to perform the same activities under the policies in this proposed rule because previously finalized improvement activities continue to apply for the current and future years unless otherwise modified per rulemaking (82 FR 54175). Most of the improvement activities in the Inventory remain unchanged for the CY 2022 MIPS performance period.

(d) Stakeholders Nominating Improvement Activities

In section IV.A.3.d.(3)(c)(i)(B) of this rule, we are proposing: (1) To revise the required criteria for improvement activity nominations received through the Annual Call for Activities; (2) changes to the timeline for improvement activities nomination during a public health emergency (PHE); and (3) to suspend activities that become obsolete or impacted by clinical practice guideline changes from the program when this occurrence happens outside of the rulemaking process.

With regard to the proposal to clarify the timeline for an improvement activity nominated during the PHE, we believe this proposal will not affect our currently approved burden estimates since we believe that the number of nominations will not change, but it would make an activity available for reporting to clinicians in the same performance year it was intended to be implemented. In section IV.A.3.d.(3)(c)(i)(B)(aa) of this rule, we are proposing that in order to implement a new improvement activity for a PHE during the same year as the nomination, the nomination would need to be received no later than January 5th of the nomination year to be included in a rule for notice-and-comment rulemaking during that fiscal or calendar year, a necessary precursor to implementation if it were to be finalized. As described in section V.B.8.j of this rule, we expect additional nominations may be received as a result of this proposal, but we do not have any data with which to estimate what the additional number may be. As a result, we are not making any proposed revisions to our currently approved burden estimate.

Regarding the proposal to suspend activities that become obsolete or impacted by clinical practice guideline changes from the program when this occurrence happens outside of the rulemaking process, we do not anticipate additional burden for stakeholders because of the proposal described above as the proposed policy does not change requirements for the nomination of improvement activities.

As described in section IV.A.3.d.(3)(c)(i)(B) of this rule, due to the proposals to add two new criteria and to increase the number of criteria stakeholders are required to meet when submitting an activity proposal from a minimum of 1 to all 8 criteria, which includes the two new proposed criteria, we propose to revise our estimated annual information collection burden for nomination of improvement activities to 136 hours (31 nominations × 4.4 hr/nomination) at a cost of $20,355 (31 × [(2.8 hr × $114.24/hr) + (1.6 hr × $210.44/hr)]).

(e) Impact on Small Practices

As described in section VII.F.17.d.(3) of this proposed rule RIA, we found 85 percent of clinicians who did not submit data to MIPS were in small practices. However, the estimated number of MIPS eligible clinicians who do not submit data, including those in small practices, may be smaller in the CY 2022 performance period/2024 payment year since more clinicians may choose to submit data after the PHE for COVID–19. CMS is committed to identifying flexibilities and options to help clinicians in small practices participate meaningfully and successfully in MIPS. Specifically, CMS made several proposals to support clinicians in small practices once they engage with MIPS in the quality, improvement activities and Promoting Interoperability performance categories for the CY 2022 performance period/2024 payment year. Based on our RIA model findings described in section VII.F.17.d.(3) of this proposed rule, the proposed policies for the CY 2022 performance period/2024 payment year led to clinicians in small practices no longer disproportionately receiving negative payment adjustments compared to clinicians in larger sized practices. Therefore, the combination of the special scoring policies for clinicians in small practices is expected to positively affect this group of clinicians and will hopefully encourage and improve future engagement in MIPS among clinicians in small practices.

(f) Impact on Third Party Intermediaries

In section IV.A.3.h. of this rule, we are proposing multiple changes to the third-party intermediary regulations at § 414.1400. Specifically, we are proposing: (1) Reorganization and consolidation of § 414.1400 generally; (2) expanding the general participation requirements of third-party intermediaries to third party intermediaries reporting to MIPS on behalf of APM Entities in order to align reporting requirements for all participants in MIPS; (3) beginning with the CY 2023 MIPS performance period/2025 payment year, QCDRs and qualified registries must support MVPs that are applicable to the MVP participants on whose behalf they submit MIPS data. Health IT vendors must support MVPs that are applicable to the MVP participants on whose behalf they submit MIPS data; (4) require QCDRs, qualified registries, health IT vendors, and CAHPS for MIPS survey vendors to support subgroup reporting, beginning with the CY 2023 MIPS performance period/2025 payment year; (5) require QCDRs and qualified registries that have never submitted data since the inception of MIPS (CY 2017 MIPS performance period/2019 payment year) through the 2020 MIPS performance period/2022 payment year, to submit a participation plan as part of their self-nomination for CY 2023; (6) beginning with the 2024 MIPS performance period/2026 payment year, a QCDR or qualified registry that was approved but did not submit any MIPS data for either of the 2 years preceding the applicable self-nomination period must submit a participation plan for CMS' approval; (7) beginning with the CY 2023 MIPS performance period/2025 payment year, the QCDR or qualified registry must submit a data validation plan annually, at the time of self-nomination, for CMS' approval, and may not change the plan once approved, without the prior approval of the agency; and (8) add a rejection criterion to state that a QCDR does not have permission to use a QCDR measure owned by another QCDR for the applicable performance period. Additionally, to provide further clarification of our current policy (84 FR 63070 through 63073), we are proposing to state, if a QCDR measure owner is not an approved active QCDR for a given self-nomination period, that QCDR measure will not be available for use. The inactive QCDR measure owner has the option to transfer ownership of the QCDR measure to an active QCDR or agree upon terms set forth with the active QCDR allowing co-ownership of the QCDR measure.

With regard to the reorganization and consolidation of § 414.1400 generally, we do not anticipate this to require any additional effort for affected entities as the proposal is to allow CMS to reorganize the existing information.

For the requirements related to expanding the general participation requirements of third-party intermediaries to third party intermediaries reporting to MIPS on behalf of APM Entities in order to align reporting requirements for all

participants in MIPS, we do not propose to revise our burden estimates as this requirement is not different from how third-party intermediaries currently submit data for the quality, improvement activities and Promoting Interoperability performance categories in MIPS on behalf of individual eligible clinicians and groups.

As previously discussed in section IV.A.3.h.(2)(b)(ii) of this rule, we are proposing to require QCDRs, qualified registries, health IT vendors, and CAHPS for MIPS survey vendors to support subgroup reporting, beginning with the CY 2023 MIPS performance period/2025 payment year. During the MVP Town Hall held in January 2021 (85 FR 74729), we heard from third-party intermediaries that they are confident that they can make the necessary updates to allow for subgroup reporting, if they have enough time. A few vendors suggested that we add subgroup reporting to the existing CEHRT requirements. Given our proposal described in section IV.A.3.b.(2)(d) of this rule to delay the implementation of subgroup reporting option to the CY 2023 MIPS performance period/2025 payment year, we assume that the proposed delay would give these entities adequate time to make the necessary updates. We assume that there will be no additional burden that third-party intermediaries will incur to implement the subgroup reporting option. We anticipate that there may be administrative burden associated with changes in workflows to their existing systems for submission of subgroup data for the CY 2023 MIPS performance period/2025 payment year. However, given that each of these entities and their information technology systems are unique, we are unable to quantify the burden for these entities to capture and submit data on behalf of clinicians who may choose to participate as subgroups.

We do not anticipate a significant impact to QCDRs and qualified registries resulting from the finalized proposal to require QCDRs and qualified registries to conduct an annual data validation audit and if one or more deficiencies or data errors are identified also conduct targeted audits. First, we are not revising our burden estimates because the finalized data validation requirements are similar to existing expectations which we have already accounted for the associated burden as stated in the CY 2017 Quality Payment Program final rule (81 FR 77383 through 77384) and the CY 2019 PFS final rule (83 FR 59998 through 59999). Second, we believe that the proposed requirements for conduct of the data validation audits are aligned with methods and procedures which stakeholders currently utilize.

As discussed in section IV.A.3.h.(3)(a)(i) of this rule, due to the proposal to require QCDRs and qualified registries that have never submitted data since the inception of MIPS (CY 2017 MIPS performance period/2019 payment year) through the CY 2020 MIPS performance period/2022 payment year to submit a participation plan as part of their self-nomination for CY 2023 MIPS performance period, we refer readers to section V.B.8.c.(2) of this rule for details on the adjusted burden.

As discussed in section V.B.8.c.(2) of this rule, due to the proposal related to new rejection criteria for QCDR measures, we estimate that the annual burden will range from 855 hours (90 QCDRs × 9.5 hr) to 1,035 hours (90 QCDRs × 11.5 hr) at a cost ranging from $81,413 (855 hr × $95.22/hr) and $98,553 (1,035 hr × $95.22/hr).

(g) Assumptions & Limitations

We note several limitations to our estimates of clinicians' MIPS eligibility and participation, negative MIPS payment adjustments, and positive payment adjustments for the CY 2022 performance year/2024 payment year. Due to the PHE for COVID–19, we are aware that there may be changes in health care delivery and billing patterns that will impact results for the 2022 performance year/2024 payment year that we are not able to model with our historic data sources. The scoring model results presented in this proposed rule assume that CY 2019 Quality Payment Program data submissions and performance are representative of CY 2022 Quality Payment Program data submissions and performance. The estimated performance for the CY 2022 performance year/2024 payment year using CY 2019 Quality Payment Program data may be underestimated because the performance threshold to avoid a negative payment adjustment for the 2019 MIPS performance period/2021 MIPS payment year was significantly lower (30 out of 100 points) than the performance threshold for the 2022 performance year/2024 payment year (75 out of 100). We anticipate clinicians may submit more performance categories to meet the higher performance threshold to avoid a negative payment adjustment.

In our MIPS eligible clinician assumptions, we assumed that clinicians who elected to opt-in in the CY 2019 Quality Payment Program and submitted data would continue to elect to opt-in in the CY 2022 performance year/2024 payment year. It is difficult to predict whether clinicians will elect to opt-in to participate in MIPS with the proposed policies.

There are additional limitations to our estimates in addition to the limitations described throughout the methodology sections: (1) To the extent that there are year-to-year changes in the data submission, volume and mix of services provided by MIPS eligible clinicians, the actual impact on total Medicare revenues will be different from those shown in Table 129; and (2) our cost data does not overlap with CY 2019 so we may not be capturing performance for all clinicians. Due to the limitations described, there is considerable uncertainty around our estimates that is difficult to quantify.

G. Alternatives Considered

This proposed rule contains a range of policies, including some provisions related to specific statutory provisions. The preceding preamble provides descriptions of the statutory provisions that are addressed, identifies those policies when discretion has been exercised, presents rationale for our policies and, where relevant, alternatives that were considered. For purposes of the payment impact on PFS services of the policies contained in this proposed rule, we presented the estimated impact on total allowed charges by specialty.

1. Alternatives Considered for Utilization Data in PFS Ratesetting

As discussed earlier in this section II.C.1 (Changes in Relative Value Unit (RVU) Impacts), our estimates of changes in Medicare expenditures for PFS services compared payment rates for CY 2021 with payment rates for CY 2022 using CY 2020 Medicare utilization. As an alternative to using CY 2020 data, we considered using CY 2019 utilization data for the purposes of determining the proposed CY 2022 RVUs, as well as in determining the proposed CY 2022 budget neutrality adjustment and conversion factor. We considered using CY 2019 data due to the PHE for COVID–19, which has impacted the delivery of health care services over the past 18 months. Increases in remote delivery of services to reduce risk of exposure to both practitioner and patients, as well as postponement of elective procedures have resulted in a change to service utilization patterns across Medicare FFS payment systems. Specific to the PFS, overall service utilization decreased by approximately 20 percent in CY 2020 compared to CY 2019, which caused us to question whether CY 2020 data is the

best available data to use for CY 2022 ratesetting.

In order to determine if lower overall utilization in CY 2020 would result in differential impacts on specialties and practitioners, we modeled the PFS ratesetting process using CY 2019 utilization data. We found that the use of CY 2020 as opposed to CY 2019 data in establishing payment rates had relatively little differential impacts on payment, despite the approximately 20 percent decrease in overall service utilization. Table 134 illustrates specialty-specific impacts using CY 2019 data.

BILLING CODE 4120–01–P

TABLE 134: CY 2022 PFS Estimated Impact on Total Allowed Charges by Specialty using CY 2019 Claims

(A) Specialty	(B) Allowed Charges (mil)	(C) Impact of Work RVU Changes	(D) Impact of PE RVU Changes	(E) Impact of MP RVU Changes	(F) Combined Impact
Allergy/Immunology	$265	0%	-2%	0%	-2%

Urology	$1,945	0%	0%	0%	0%
Vascular Surgery	$1,269	0%	-7%	0%	-7%
Total	$100,377	0%	0%	0%	0%

The majority of specialties experienced shifts of less than a percent when we used CY 2019 data, as opposed to CY 2020 data, as displayed in Table 123, as the basis for setting rates. Several specialties shifted by approximately one percent. We did not detect a pattern of specialties that were notably affected by the choice of claims data, either positively or negatively. While Pediatrics shifted from a 1 percent impact when we used CY 2020 claims data to a 5-payment impact when we used CY 2019 claims data, this shift is likely due to the smaller amount of allowed charges associated with the Pediatrics specialty.

We analyzed the percentage change in total RVUs per practitioner. Using CY 2019 utilization data, Total RVUs change between -1 percent and 1 percent for 53 percent of practitioners, representing more than 48 percent of the changes in Total RUs for all practitioners, similar to the results we found when using CY 2020 claims that we discussed in section II.C.1. Variations by specialty were also similar to the results we found using CY 2020 claims and are contained in the public use file that describes the percentage change in total RVUs per practitioner.

Similar to the process described in section II.C.1. of this proposed rule, we used CY 2019 claims data to estimate the CY 2021 PFS CF to be 33.6184 which reflects a budget neutrality adjustment under section 1848(c)(2)(B)(ii)(II) of the Act, which we estimated to be −0.04 using CY 2019 data, the 0.00 percent update adjustment factor specified under section 1848(d)(19) of the Act, and the expiration of the 3.75 percent fee schedule payment increase for CY 2021 provided by the CAA. The anesthesia CF, which reflects the same overall PFS adjustments with the addition of anesthesia-specific PE and MP adjustments, would shift by a similar magnitude as the PFS CF. Thus, the estimated PFS CF and anesthesia CF using CY 2019 data is slightly higher compared to using claims data for CY 2020 with an estimated difference of 0.0336 (a little less than three and half cents). We note that the budget neutrality adjustment will be recalculated for the CY 2022 PFS final rule and the use of CY 2019 claims may or may not be higher than the use of CY 2020 claims based on which policies are ultimately finalized.

2. Alternatives Considered for Clinical Labor Pricing Update

As discussed in the PE section of this rule (section II.B. of this proposed rule), we are proposing to update the clinical labor pricing for CY 2022, in conjunction with the final year of the supply and equipment pricing update. We believe it is important to update the clinical labor pricing to maintain relativity with the recent supply and equipment pricing updates. We noted in regard to the specialty impacts in Table 123 that the proposed clinical labor pricing update will have a significant effect on the valuation of many services. We have occasionally implemented significant updates based on new data through a phased transition across several calendar years.

For example, we utilized a 4-year transition for the market-based supply and equipment pricing update which will conclude in CY 2022. We considered, as an alternative, the use of a similar 4-year transition to implement the clinical labor pricing update that could smooth out the increases and decreases caused by the pricing update for affected stakeholders. In order to evaluate a phased approach to the clinical labor pricing update, we modeled the PFS ratesetting process using clinical labor prices which transitioned one quarter of the distance to their fully implemented updated price. Table 135 illustrates specialty-specific impacts using the first year of a potential 4-year phase-in for clinical labor pricing:

TABLE 135: CY 2022 PFS Estimated Impact on Total Allowed Charges by Specialty using the First Year of a 4-Year Clinical Labor Pricing Transition

(A) Specialty	(B) Allowed Charges (mil)	(C) Impact of Work RVU Changes	(D) Impact of PE RVU Changes	(E) Impact of MP RVU Changes	(F) Combined Impact

Total	$89,065	0%	0%	0%	0%

BILLING CODE 4120–01–C

Table 135 reflects all other proposed policies for CY 2022 with the only difference from Table 123 being the phased approach to updating the clinical labor pricing. Due to the budget neutral nature of PE under the PFS, we do not project that there would be any changes to the conversion factor if we were to use a 4-year transition for clinical labor pricing. We note that a phased transition would delay the full implementation of updated pricing and continue to rely on outdated data for clinical labor pricing.

3. Alternatives Considered for Split (or Shared) Visits

In section II.F of this proposed rule, we proposed to continue our current policy allowing billing of certain ''split'' or ''shared'' evaluation and management (E/M) visits by a physician, when the visit is performed in part by both a physician and an NPP, who are in the same group and the physician performs a substantive portion of the visit. We proposed to codify in our regulations a definition of a split (or shared) visit as an E/M visit in the facility setting that is performed in part by both a physician and NPP who are in the same group, in accordance with applicable laws and regulations, such that the E/M visit could be billed by either the physician or the NPP if it were furnished independently by only one of them in the facility setting (rather than as a split (or shared) visit). We proposed that the physician or NPP who performed the substantive portion of the split (or shared) visit would bill for the visit. We proposed to define substantive portion as more than half of the total time spent by the physician and NPP.

We considered several alternative approaches. First, we considered the option of proposing to disallow split (or shared) visit billing beginning in CY 2022. Under this alternative, in settings where payment for ''incident to'' services is prohibited, physicians and NPPs would only be able to bill for visits they furnish in their entirety under their own NPI. Such a policy would be administratively simple, and reduce the likelihood of paying significantly more than the actual resource costs incurred. When physicians and practitioners furnish services in facility settings, they do not ordinarily incur the cost of clinical staff or other PE costs involved in furnishing the services. When the physician bills for an E/M visit, in accordance with section 1833(a)(1)(N) of the Act, the Medicare Part B payment is equal to 80 percent of the payment basis under the PFS which, under section 1848(a)(1) of the Act, is the lesser of the actual charge or the full fee schedule amount for the service. In contrast, if the NPP bills for it, in accordance with section 1833(a)(1)(O) of the Act, the Medicare Part B payment is equal to 80 percent of the lesser of the actual charge or 85 percent of the fee schedule rate. Because of this payment differential and the lower resource costs associated with E/M visits performed partly by a physician and partly by an NPP, it could be argued that the physician should not be able to bill for such a visit and be paid at the higher fee schedule amount. However, our understanding is that longstanding clinical practice relies substantially upon shared visits between physicians and NPPs in facility settings. To avoid the potential disruption in this common medical practice approach, we did not choose to propose to disallow billing for split (or shared) visits and we are instead seeking comment to confirm current practice patterns and whether there is a need for this kind of split billing, and how often.

We also considered, but did not propose, several alternatives for how to define the substantive portion of split (or shared) visit. We considered proposing to define ''substantive portion'' as any face-to-face portion of the split (or shared) visit, consistent with our current definition. We do not believe it would be appropriate to consider just any portion of the visit—with or without direct patient contact—as a substantive portion. For instance, we do not believe it would be appropriate to consider a brief or trivial interaction, with or without direct patient contact, such as where the physician merely ''pokes their head'' into the room, to be a substantive portion of the visit. We do not believe it would be appropriate to permit a physician to bill for a visit if they do not substantially participate in the visit, given that physicians are paid under the PFS at a higher rate than NPPs. Therefore, we are proposing to define ''substantive portion'' as more than half of the total time spent by the physician or NPP.

Another alternative we considered, but did not propose, was to utilize the medical decision making (MDM) to define substantive portion. We did not choose this approach because MDM is not easily attributed to a single physician or NPP when the work is shared, because MDM is not necessarily quantifiable and can depend on patient characteristics (for example, risk). We believe that time is a more precise factor than MDM to use as a basis for deciding which practitioner performs the substantive portion of the visit. We believe that using the time spent by each practitioner furnishing the split (or shared) visit would provide a more precise metric than potentially finding a way to parse MDM between the physician and the NPP.

We also considered defining substantive portion as performance of the history and/or physical exam, which are key components of certain E/M visits. Given recent changes in the CPT E/M Guidelines, history and physical exam are no longer necessarily included in all E/M visits, because for office/

outpatient E/M visits, the visit level can now be selected based on either MDM or time, and history and exam are performed only as medically appropriate. Also, the CPT Editorial Panel is considering removing history and physical exam as key visit components for institutional visits, similar to the changes already made for office/outpatient E/M visits. Accordingly, defining ''substantive portion'' as any key component including history or exam is not a viable approach.

Lastly, we considered not defining substantive portion in this proposed rule and instead leaving determinations regarding the substantive portion to MAC and/or medical review discretion. However, this approach would impose a significant burden on MACs to assess individual cases and could lead to too much regional variation in payment. We seek public comment to help inform what we consider to be the ''substantive portion'' of a split (or shared) visit in institutional settings and assist us in consideration of our proposed definition of ''substantive portion''.

We considered disallowing split (or shared) billing in critical care, skilled nursing facility (SNF) and nursing facility (NF) visits, as well as new patient and initial patient visits. We require certain SNF/NF visits to be provided entirely by a physician, but we believe we should allow shared visit billing for other visits that can be shared in these settings. (We refer readers to our Conditions of Participation in 42 CFR 483.30 for information regarding the SNF/NF visits that are required to be performed in their entirety by a physician. That regulation requires that certain SNF/NF visits must be furnished directly and solely by a physician). However, we believe current clinical practice generally allows sharing of critical care visits by appropriately trained and qualified practitioners, and we are seeking comment on this belief and this alternative considered. We proposed to allow split (or shared) visit billing in critical care because we believe the practice of medicine has evolved towards a more team-based approach to care, and greater integration in the practice of physicians and NPPs, particularly when care is furnished by clinicians in the same group in the facility setting. Given this evolution in medical practice, the concerns that may have been present when we issued current policy may no longer be as relevant. We understand that there have been changes in the practice of medicine over the past several years, some facilitated by the advent of EHRs and other systems, toward a more team-based approach to care. There has also been an increase in alternative payment models that employ a more team-based approach to care.

We are proposing to allow split (or shared) visits for both new and established patients as well as initial and subsequent visits. After conducting an internal review, including consulting our medical officers, we believe that the practice of medicine has evolved toward a more team-based approach to care, and greater integration in the practice of physicians and NPPs, particularly when care is furnished by practitioners in the same group in the facility setting. Given this evolution in medical practice, the concerns that may have been present when we issued the manual instructions may no longer be as relevant. We understand that there have been changes in the practice of medicine over the past several years, some facilitated by the advent of electronic health records (EHRs) and other systems, toward a more team-based approach to care. There has also been an increase in alternative payment models that employ a more team-based approach to care. In considering and reevaluating our policy, we see no reason to preclude the physician or NPP from billing for split (or shared) visits for a new patient, in addition to an established patient, or for initial and subsequent split (or shared) visits. Therefore, we are proposing to permit the physician or NPP to bill for split (or shared) visits for both new and established patients, as well as for initial and subsequent visits. We believe this approach is also consistent with the CPT E/M Guidelines for split (or shared) visits, which does not exclude these types of visits from being billed when furnished as split (or shared) services.

4. Alternatives Considered for Requiring Certain Manufacturers To Report Drug Pricing Information for Part B (§§ 414.802, 414.806)

This provision implements new statutory requirements under sections 1847A and 1927 of the Act, as amended by section 401 of the CAA (for the purposes of this section of this proposed rule, hereinafter is referred to as ''section 401''). These new requirements will improve the accuracy of reported prices and limit the use of WAC-based pricing.

As discussed in section III.D.1. of this proposed rule, section 1847A(c)(6)(A) of the Act incorporates the definition of manufacturer at section 1927(k)(5) of the Act, but permits the Secretary to exempt repackagers from the definition of manufacturer, as determined appropriate, for purposes of section 1847A(f)(2) of the Act.

We considered whether to implement the flexibility afforded by the statute. However, implementing the flexibility afforded by the statute could potentially lead to a gap in the ASP reporting requirements, meaning that ASPs could be distorted to the extent that certain sales are carved out of the reporting requirement through the use of repackagers.

As discussed previously in this regulatory impact analysis, we are unable to quantitatively estimate the impacts of this provision. We welcome comments on our approach, and on the alternative relative to: (1) The likely costs or savings (to manufacturers, beneficiaries, the government, and other stakeholders); and (2) any other related impacts of this provision.

5. Alternatives Considered for the MDPP Expanded Model Emergency Policy

For the MDPP Expanded Model Emergency Policy, no alternatives were considered. The 2-year MDPP service period has depressed interest in MDPP among would-be MDPP suppliers. These proposed actions address stakeholder comments on the barriers to MDPP expanded model success. If we do not take action, we will not be able to scale MDPP as intended, impacting Medicare beneficiary access to this program. Reducing the MDPP from a 24- to a 12-month services period, increasing the year 1 performance payments, and waiving the Medicare provider enrollment application fee not only better aligns the model with the evidence that helped certify the DPP model test initially, but it will encourage eligible organizations to enroll as MDPP suppliers.

6. Alternatives Considered for the Quality Payment Program

For purposes of the payment impact on the Quality Payment Program, we view the performance threshold as a critical factor affecting the distribution of payment adjustments. We ran a separate proposed policies RIA model based on the actual mean for the CY 2019 performance period/2021 payment year with a performance threshold of 86 and an additional performance threshold of 92 points, which are potential values that may be used for the CY 2022 performance period/2024 payment year. The model with a performance threshold of 86 and additional performance threshold of 92 has the same mean and median final score as our proposed policies RIA model since the performance threshold does not change the final score. We estimate that $ 885 million would be redistributed through budget neutrality.

For clinicians who meet or exceed the additional performance threshold, an additional $294 million was distributed. The maximum positive payment adjustment would be 15.5 percent prior to the maximum additional payment adjustment and 25.5 percent after considering the MIPS maximum positive payment adjustment and the additional MIPS payment adjustment for exceptional performance. In addition, 70.3 percent of MIPS eligible clinicians would receive a negative payment adjustment among those that submit data.

We report the findings for the baseline RIA model which describes the impact for the 2022 MIPS performance period/2024 MIPS payment year if this regulation did not exist. The baseline RIA model has a final score mean of 78.13 and median of 82.59. We estimate that $428 million would be redistributed through budget neutrality. There would be a maximum payment adjustment of 6.6 percent after considering the MIPS payment adjustment and the additional MIPS payment adjustment for exceptional performance. In addition, 8.3 percent of MIPS eligible clinicians would receive a negative payment adjustment among those that submit data.

H. Impact on Beneficiaries

We do not believe these provisions will have a negative impact on beneficiaries given overall PFS budget neutrality.

1. Requiring Certain Manufacturers To Report Drug Pricing Information for Part B (§§ 414.802, 414.806)

Section 1927(b)(3)(A)(iii) of the Act requires manufacturers with a Medicaid drug rebate agreement to report ASP data consistent with the information required for such reporting at section 1847A of the Act. Some manufacturers without Medicaid drug rebate agreements voluntarily submit ASP data for their single source drugs or biologicals that are payable under Part B, however other manufacturers without Medicaid drug rebate agreements do not voluntarily submit such data. Without manufacturer reported ASP data, CMS cannot calculate the ASP payment limit, and consequently, payment is typically based on Wholesale Acquisition Cost (WAC).

Consistent with section 1847A(c)(3) of the Act and our regulations at § 414.804(a)(2), the ASP is net of price concessions. However, consistent with the definition of WAC at section 1847A(c)(6)(B) of the Act, the WAC is not net of price concessions and is thus nearly always, and sometimes significantly, higher than ASP. Drugs with payment allowances based on WAC may have greater ''spreads'' between acquisition costs and payment than drugs for which there is an ASP-based payment allowance, which, in turn, may: (1) Incent the use of the drug based on its spread rather than on purely clinical considerations; (2) result in increased payments under Medicare Part B; and (3) result in increased beneficiary cost sharing. This provision implements new statutory requirements under sections 1847A and 1927 of the Act, as amended by section 401 of Division CC, Title IV of the CAA, 2021. These new requirements will improve the accuracy of reported payment limits and limit the use of WAC-based pricing.

For single source drugs, these changes may result in lower payment limits because, typically, the WAC plus 3 percent is higher than ASP plus 6 percent. This then translates to cost savings for both the government and beneficiaries, who will pay coinsurance on a lesser amount. However, for the reason stated earlier in this regulatory impact analysis (see section VII.G.4. of this proposed rule), we are unable to predict the magnitude of this effect.

Similarly, payment limits for multiple source drugs could increase or decrease, and we are unable to predict the direction or magnitude of specific or aggregate effects at this time.

We welcome comment on: (1) The likely costs or savings to beneficiaries; and (2) other related impacts of this provision.

2. Determination of ASP for Certain Self-Administered Drug Products

Although we are unable to quantify the total magnitude of the potential savings, these changes have the potential to substantially reduce program expenditures and beneficiary coinsurance. The OIG's July 2020 report (discussed in section III.D.2. of this proposed rule) determined that the inclusion of self-administered versions of certolizumab and abatacept in their respective volume-weighted, average ASPs, alone, has resulted in $173 million in additional Medicare beneficiary coinsurance between 2014 and 2018.

The proposed regulatory changes have the potential to result in decreased payment limits for identified billing and payment codes and could, in turn, substantially reduce beneficiary coinsurance. Since section 405 of Division CC, Title IV of the CAA, 2021 directs CMS to implement the statutory changes at section 1847A(g)(3) of the Act beginning on July 1, 2021, these potential savings may be observed within the year.

We welcome comment on: (1) The likely costs or savings to beneficiaries; and (2) other related impacts of this provision.

3. Medicare Diabetes Prevention Program Expanded Model Emergency Policy

This change will have a positive impact on eligible MDPP beneficiaries, as it better aligns with the CDC's National DPP, giving both the participants and the coaches similar messaging around this program, regardless of payer. MDPP suppliers often offer the MDPP set of services to mixed cohorts, or classes with participants who are not eligible for MDPP, but who are enrolled in a National DPP cohort. Since MDPP generally follows the CDC's National DPP and aligns its program with the CDC's DPRP Standards, it is confusing to participants, coaches, and staff when talking about a 2-year program to its eligible Medicare participants when the non-Medicare participants have a 1-year program. Finally, reducing the MDPP service period from 2 years to one (1) year allows more cohorts to start and finish MDPP during the expanded model initial period of performance, which ends in March 2023.

4. Quality Payment Program

There are several changes in this rule that are expected to have a positive effect on beneficiaries. In general, we believe that many of these changes, including the MVP and subgroup proposals if finalized will lead to meaningful feedback to beneficiaries on the type and scope of care provided by clinicians. Additionally, beneficiaries could use the publicly reported information on clinician performance in subgroups to identify and choose clinicians in multispecialty groups relevant to their care needs. Consequently, we anticipate this will improve the quality and value of care provided to Medicare beneficiaries. For example, several of the new measures include patient-reported outcome-based measures, which may be used to help patients make more informed decisions about treatment options. Patient-reported outcome-based measures provide information on a patient's health status from the patient's point of view and may also provide valuable insights on factors such as quality of life, functional status, and overall disease experience, which may not otherwise be available through routine clinical data collection. Patient-reported outcome-based measured are factors

frequently of interest to patients when making decisions about treatment.

K. Estimating Regulatory Familiarization Costs

If regulations impose administrative costs on private entities, such as the time needed to read and interpret this rule, we should estimate the cost associated with regulatory review. Due to the uncertainty involved with accurately quantifying the number of entities that will review the rule, we assumed that the total number of unique commenters on this year's proposed rule will be the number of reviewers of last year's rule. We acknowledge that this assumption may understate or overstate the costs of reviewing this rule. It is possible that not all commenters will review this year's rule in detail, and it is also possible that some reviewers will choose not to comment on the rule. For these reasons we thought that the number of commenters would be a fair estimate of the number of reviewers of last year's rule. We welcome any comments on the approach in estimating the number of entities which will review this rule.

We also recognized that different types of entities are in many cases affected by mutually exclusive sections of this rule, and therefore for the purposes of our estimate we assume that each reviewer reads approximately 50 percent of the rule. We are seeking comments on this assumption.

Using the wage information from the BLS for medical and health service managers (Code 11–9111), we estimate that the cost of reviewing this rule is $114.24 per hour, including overhead and fringe benefits *https://www.bls.gov/oes/current/oes_nat.htm*. Assuming an average reading speed, we estimate that it would take approximately 8.0 hours for the staff to review half of this rule. For each facility that reviews the rule, the estimated cost is $913.92 (8.0 hours × $114.24). Therefore, we estimated that the total cost of reviewing this regulation is $36,764,260 ($885.92 × 40,227 reviewers on last year's proposed rule).

J. Accounting Statement

As required by OMB Circular A–4 (available at *http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf*), in Tables 132 and 133 (Accounting Statements), we have prepared an accounting statement. This estimate includes growth in incurred benefits from CY 2021 to CY 2022 based on the FY 2022 President's Budget baseline.

TABLE 136: Accounting Statement: Classification of Estimated Expenditures

CATEGORY	TRANSFERS
CY 2022 Annualized Monetized Transfers	Estimated increase in expenditures of $2.7 billion for PFS CF update.
From Whom To Whom?	Federal Government to physicians, other practitioners and providers and suppliers who receive payment under Medicare.

TABLE 137: Accounting Statement: Classification of Estimated Costs, Transfer, and Savings

CATEGORY	TRANSFER
CY 2022 Annualized Monetized Transfers of beneficiary cost coinsurance.	-$0.7 billion
From Whom to Whom?	Beneficiaries to Federal Government.

K. Conclusion

The analysis in the previous sections, together with the remainder of this preamble, provided an initial Regulatory Flexibility Analysis. The previous analysis, together with the preceding portion of this preamble, provides an RIA. In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 403

Grant programs—health, Health insurance, Hospitals, Intergovernmental relations, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 405

Administrative practice and procedure, Diseases, Health facilities, Health insurance, Health professions, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 410

Diseases, Health facilities, Health professions, Laboratories, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 411

Diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 414

Administrative practice and procedure, Biologics, Diseases, Drugs, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 415

Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 423

Administrative practice and procedure, Emergency medical services, Health facilities, Health maintenance organizations (HMO), Health professionals, Medicare, Penalties, Privacy, Reporting and recordkeeping requirements.

42 CFR Part 424

Emergency medical services, Health facilities, Health professions, Medicare Reporting and recordkeeping requirements.

42 CFR Part 425

Administrative practice and procedure, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services proposes to amend 42 CFR chapter IV as set forth below:

PART 403—SPECIAL PROGRAMS AND PROJECTS

■ 1. The authority citation for part 403 continues to read as follows:

Authority: 42 U.S.C. 1302, and 1395hh.

■ 2. In § 403.902:

■ a. Amend the definition of ''Ownership or investment interest'' by adding paragraphs (3)(vi) and (vii);

■ b. Add the definition of ''Physician-owned distributorship'' in alphabetical order; and

■ c. Revise the definition of ''Short term medical supply or device loan''.

The additions and revision read as follows:

§ 403.902 Definitions.

* * * * *

Ownership or investment interest

* * *

(3) * * *:

(vi) A titular ownership or investment interest that excludes the ability or right to receive the financial benefits of ownership or investment, including, but not limited to, the distribution of profits, dividends, proceeds of sale, or similar returns on investment; or

(vii) An interest in an entity that arises from an employee stock ownership plan (ESOP) that is qualified under section 401(a) of the Internal Revenue Code of 1986.

* * * * *

Physician-owned distributorship, for the purposes of determining the existence of a reportable ownership or investment interest under this subpart, means an entity that:

(1) Meets the definition of an applicable manufacturer or applicable group purchasing organization as defined in this section, and

(2) Meets at least one of the following two conditions:

(i) Has a minimum of 5 percent direct or indirect ownership or investment interest in the applicable manufacturer or applicable group purchasing organization held by a physician or a physician's immediate family member, or

(ii) A physician or a physician's immediate family member receives compensation from the applicable manufacturer or group purchasing organization in the form of a commission, return on investment, profit sharing, profit distribution, or other remuneration directly or indirectly derived from the sale or distribution of devices by the applicable manufacturer or group purchasing organization in which the physician or physician's immediate family member has ownership.

(3) This physician owned distributor definition does not apply for purposes of any other laws or regulations, including, but not limited to, section 1877 of the Act, the regulations at 42 CFR part 411, subpart J, section 1128B of the Act, or the regulations at 42 CFR 1001.952.

* * * * *

Short term medical supply or device loan means the loan of a covered device or a device under development, or the provision of a limited quantity of medical supplies for a short-term trial period, not to exceed a loan period of 90 cumulative days per calendar year or a quantity of 90 cumulative days of average daily use per calendar year, to permit evaluation of the device or medical supply by the covered recipient.

* * * * *

■ 3. Amend § 403.904 by adding paragraph (a)(3) to read as follows:

§ 403.904 Reports of payments or other transfers of value to covered recipients.

(a) * * *

(3) An applicable manufacturer or applicable group purchasing organization that has reported payments or transfers of value under the scope of this section may not remove, delete, or alter any record/(s) unless an error is discovered in the information that had been furnished, or the record is otherwise believed to meet exceptions for reporting.

* * * * *

■ 4. Amend § 403.908 by revising paragraph (c)(3) and adding paragraph (c)(4) to read as follows:

§ 403.908 Procedures for electronic submission of reports.

* * * * *

(c) * * *

(3) During registration, applicable manufacturers and applicable group purchasing organizations must name two points of contact with appropriate contact information. These points of contact must be updated for 2 years following record submission.

(4) An applicable manufacturer or applicable group purchasing organization that meets the definition of physician-owned distributorship as defined in § 403.902 must identify its status as a physician-owned distributorship when registering or recertifying.

* * * * *

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

■ 5. The authority citation for part 405 continues to read as follows:

Authority: 42 U.S.C. 263a, 405(a), 1302, 1320b–12, 1395x, 1395y(a), 1395ff, 1395hh, 1395kk, 1395rr, and 1395ww(k).

■ 6. Amend § 405.902 by adding the definitions of ''Additional documentation'', ''Additional documentation request (ADR)'', ''Post-payment medical review'', and ''Prepayment medical review'' in alphabetical order to read as follows:

§ 405.902 Definitions.

Additional documentation means any information requested by a contractor when conducting a prepayment review or post-payment review.

Additional documentation request (ADR) means a contractor's initial documentation request in reviewing claims selected for prepayment review or post-payment review.

* * * * *

Post-payment medical review (or post-payment review) means a review that occurs after payment is made on the selected claim to determine whether the initial determination for payment was appropriate.

Prepayment medical review (or prepayment review) means a review that occurs before an initial determination for payment is made on the selected claim to determine whether payment should be made.

* * * * *

■ 7. Add § 405.903 to read as follows:

§ 405.903 Prepayment review.

(a) A contractor may select a claim(s) for prepayment review.

(b) In conducting a prepayment review, a contractor may issue additional documentation requests to a provider or supplier.

(1) A provider or supplier will be provided 45 calendar days to submit additional documentation in response to a contractor's request, except as stated in paragraph (b)(2) and (c) of this section.

(2) A contractor may accept documentation received after 45-calendar days for good cause. Good cause means situations such as natural disasters, interruptions in business practices, or other extenuating circumstances that the contractor deems

good cause in accepting the documentation.

(c) A provider or supplier will be provided 30 calendar days to submit additional documentation in response to a UPIC's request for additional documentation. A UPIC may accept documentation received after the 30 calendar days for good cause. Good cause means situations such as natural disasters, interruptions in business practices, or other extenuating circumstances that the UPIC deems good cause in accepting the documentation.

(d) A contractor's prepayment review will result in an initial determination under § 405.920.

■ 8. Add § 405.929 under the ''Initial Determinations'' heading in Subpart I to read as follows:

§ 405.929 Post-payment review.

(a) A contractor may select a claim(s) for post-payment review, which is conducted under the reopening authority in § 405.980.

(b) In conducting a post-payment review, a contractor may issue an additional documentation request to a provider or supplier.

(1) A provider or supplier will be provided 45 calendar days to submit additional documentation in response to a contractor's request, except as stated in paragraph (b)(2) and (c) of this section.

(2) A contractor may accept documentation received after 45 calendar days for good cause. Good cause means situations such as natural disasters, interruptions in business practices, or other extenuating circumstances that the contractor deems good cause in accepting the documentation.

(c) A provider or supplier will be provided 30 calendar days to submit additional documentation in response to a UPIC's request for additional documentation. A UPIC may accept documentation received after 30 calendar days for good cause. Good cause means situations such as natural disasters, interruptions in business practices, or other extenuating circumstances that the UPIC deems good cause in accepting the documentation.

(d) The outcome of a contractor's review will result in either no change to the initial determination or a revised determination under § 405.984.

■ 9. Add § 405.930 under the ''Initial Determinations'' heading in Subpart I to read as follows:

§ 405.930 Failure to respond to additional documentation request.

If a contractor gives a provider or supplier notice and time to respond to an additional documentation request and the provider or supplier does not provide the additional documentation in a timely manner, the contractor has authority to deny the claim.

■ 10. Amend § 405.986 by revising paragraph (a) introductory text to read as follows:

§ 405.986 Good cause for reopening.

(a) *Establishing good cause for reopening.* Good cause may be established when—

* * * * *

■ 11. Amend § 405.2411 by—

■ a. Revising paragraph (b)(2);

■ b. Redesignating paragraph (b)(3) as (4); and

■ c. Adding a new paragraph (b)(3).

The revision and addition read as follows:

§ 405.2411 Scope of benefits.

* * * * *

(b) * * *

(2) Covered when furnished during a Part A stay in a skilled nursing facility only when provided by a physician, nurse practitioner, physician assistant, certified nurse midwife or clinical psychologist employed or under contract with the RHC or FQHC at the time the services are furnished;

(3) Inclusive of hospice attending physician services, and are covered when furnished during a patient's hospice election only when provided by an RHC/FQHC physician, nurse practitioner, or physician assistant designated by the patient at the time of hospice election as his or her attending physician and employed or under contract with the RHC or FQHC at the time the services are furnished; and

* * * * *

■ 12. Amend § 405.2446 by revising paragraph (c) to read as follows:

§ 405.2446 Scope of services.

* * * * *

(c) FQHC services are covered when provided in outpatient settings only, including a patient's place of residence, which may be a skilled nursing facility or a nursing facility, other institution used as a patient's home, or are hospice attending physician services furnished during a hospice election.

* * * * *

■ 13. Amend § 405.2462 by—

■ a. Redesignating paragraphs (c) through (g) as paragraphs (e) through (i), respectively;

■ b. Revising paragraphs (a) through (c)

■ c. Adding new paragraph (d); and

■ d. In newly redesignated paragraph (e) introductory text, by removing the reference to ''paragraph (d)'' and adding in its place the reference to ''paragraph (f)''.

The additions and revisions read as follows:

§ 405.2462 Payment for RHC and FQHC services.

(a) *Payment to independent RHCs that are authorized to bill under the reasonable cost system.* (1) RHCs that are authorized to bill under the reasonable cost system are paid on the basis of an all-inclusive rate, subject to a payment limit per visit determined in paragraph (b) of this section, for each beneficiary visit for covered services. This rate is determined by the Medicare Administration Contractor (MAC), in accordance with this subpart and general instructions issued by CMS.

(2) The amount payable by the MAC for a visit is determined in accordance with paragraphs (i)(1) and (2) of this section.

(b) *RHC payment limit per visit.* (1) In establishing limits on payment for rural health clinic services provided by rural health clinics the limit for services provided prior to April 1, 2021:

(i) In 1988, after March 31, at $46 per visit; and

(ii) In a subsequent year (before April 1, 2021), at the limit established for the previous year increased by the percentage increase in the Medicare Economic Index (MEI) (as defined in section 1842(i)(3) of the Act) applicable to primary care services (as defined in section 1842(i)(4) of the Act) furnished as of the first day of that year.

(2) In establishing limits on payment for rural health services furnished on or after April 1, 2021, by rural health clinics or any rural health clinic that is enrolled on or after January 1, 2021 under section 1866(j) of the Act), the limit for services provided:

(i) In 2021, after March 31, at $100 per visit;

(ii) In 2022, at $113 per visit;

(iii) In 2023, at $126 per visit;

(iv) In 2024, at $139 per visit;

(v) In 2025, at $152 per visit;

(vi) In 2026, at $165 per visit;

(vii) In 2027, at $178 per visit; and

(viii) In 2028, at $190 per visit.

(ix) In a subsequent year, at the limit established for the previous year increased by the percentage increase in MEI applicable to primary care services furnished as of the first day of such year.

(3) In establishing limits on payment for rural health services furnished on or after April 1, 2021, by provider-based rural health clinics as described in

section (c)(4) of this part, the limit for services provided:

(i) In 2021, after March 31, at an amount equal to the greater of:

(A) For rural health clinics that had an all-inclusive rate established for services furnished in 2020—

(*1*) The all-inclusive rate applicable to the rural health clinic for services furnished in 2020, increased by the percentage increase in the MEI applicable to primary care services furnished as of the first day of 2021, or

(*2*) The payment limit per visit applicable in paragraph (2) of this section.

(B) For rural health clinics that did not have an all-inclusive rate established for services furnished in 2020—

(*1*) The all-inclusive rate applicable to the rural health clinic for services furnished in 2021, or

(*2*) The payment limit per visit applicable in paragraph (2) of this section.

(ii) In a subsequent year, at an amount equal to the greater of:

(A) The amount established under paragraph (b)(3)(i)(A) or (B) of this section, as applicable for the previous year, increased by the percentage increase in MEI applicable to primary care services furnished as of the first day of such subsequent year, or

(B) The payment limit per visit applicable under paragraph (2) of this section for such subsequent year.

(c) *Payment to provider-based RHCs that are authorized to bill under the reasonable cost system.* (1) An RHC that is authorized to bill under the reasonable cost system is paid in accordance with parts 405 and 413 of this subchapter, as applicable, if the RHC is—

(i) An integral and subordinate part of a hospital, skilled nursing facility or home health agency participating in Medicare (that is, a provider of services); and

(ii) Operated with other departments of the provider under common licensure, governance and professional supervision.

(2) An RHC, described in paragraph (c)(1) of this section, is paid on the basis of an all-inclusive rate, subject to a payment limit per visit, described in paragraphs (b)(1) and (2) of this part, for each beneficiary visit for covered services when in a hospital with greater than 50 beds as determined in § 412.105(b) of this chapter. This all-inclusive rate is determined by the MAC, in accordance with this subpart and general instructions issued by CMS. The amount payable by the MAC for a visit is determined in accordance with paragraphs (i)(1) and (2) of this section.

(3) Prior to April 1, 2021, an RHC, described in paragraph (c)(1) of this section, is paid on the basis of an all-inclusive rate and is not subject to a payment limit per visit described in paragraphs (b)(1) and (2) of this part for each beneficiary visit for covered services when in a hospital with less than 50 beds as determined in § 412.105(b) of this chapter. This all-inclusive rate is determined by the MAC, in accordance with this subpart and general instructions issued by CMS. The amount payable by the MAC for a visit is determined in accordance with paragraphs (i)(1) and (2) of this section.

(4) On or after April 1, 2021, an RHC, described in paragraph (c)(1) of this section, is paid on the basis of an all-inclusive rate, subject to a payment limit per visit, described in paragraph (b)(3) of this part, for each beneficiary visit for covered services when it meets the specified qualifications in paragraph(d) of this part. This all-inclusive rate is determined by the MAC, in accordance with this subpart and general instructions issued by CMS. The amount payable by the MAC for a visit is determined in accordance with paragraphs (i)(1) and (2) of this section.

(d) *Specified qualifications.* A provider-based rural health clinic must meet the following qualifications to have a payment limit per visit established in accordance with section (b)(3) of this part.

(1) As of December 31, 2020, was in a hospital with less than 50 beds (as determined in § 412.105(b) of this chapter) and after December 31, 2020 in a hospital that continues to have less than 50 beds (not taking into account any increase in the number of beds pursuant to a waiver during the COVID–19 Public Health Emergency (PHE)); and one of the following circumstances:

(i) As of December 31, 2020, was enrolled under section 1866(j) of the Act (including temporary enrollment during the COVID–19 PHE); or

(ii) Submitted an application for enrollment under section 1866(j) of the Act (or a request for temporary enrollment during the COVID–19 PHE) that was received not later than December 31, 2020.

(2) [Reserved]

* * * * *

■ 14. Amend § 405.2463 by revising paragraphs (a)(1)(i) introductory text, and (b)(3) introductory text to read as follows:

§ 405.2463 What constitutes a visit.

(a) * * *

(1) * * *

(i) Face-to-face encounter (or, for mental health disorders only, an encounter that meets the requirements under paragraph (b)(3) of this section) between an RHC patient and one of the following:

* * * * *

(b) * * *

(3) *Visit—Mental health.* A mental health visit is a face-to-face encounter or an encounter furnished using interactive, real-time, audio and video telecommunications technology or audio-only interactions in cases where the patient is not capable of, or does not consent to, the use of video technology for the purposes of diagnosis, evaluation or treatment of a mental health disorder between an RHC or FQHC patient and one of the following:

* * * * *

■ 15. Amend § 405.2466 by revising paragraph (b)(1)(iv) to read as follows:

§ 405.2466 Annual reconciliation.

* * * * *

(b) * * *

(1) * * *

(iv) For RHCs and FQHCs, payment for pneumococcal, influenza, and COVID–19 vaccine and their administration is 100 percent of Medicare reasonable cost.

* * * * *

■ 16. Amend § 405.2469 by revising paragraph (d) to read as follows:

§ 405.2469 FQHC supplemental payments.

* * * * *

(d) *Per visit supplemental payment.* A supplemental payment required under this section is made to the FQHC when a covered face-to-face encounter or an encounter furnished using interactive, real-time, audio and video telecommunications technology or audio-only interactions in cases where beneficiaries do not wish to use or do not have access to devices that permit a two-way, audio/video interaction for the purposes of diagnosis, evaluation or treatment of a mental health disorder occurs between a MA enrollee and a practitioner as set forth in § 405.2463.

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

■ 17. The authority citation for part 410 continues to read as follows:

Authority: 42 U.S.C. 1302, 1395m, 1395hh, 1395rr, and 1395ddd.

■ 18. Amend § 410.33 by revising paragraphs (c), (g)(6)(i), (g)(6)(ii), (g)(8)(i), (g)(8)(ii), and (g)(9) to read as follows:

§ 410.33 Independent diagnostic testing facility.

* * * * *

(c) *Nonphysician personnel.* (1) Except as otherwise stated in paragraph (c)(2) of this section, any nonphysician personnel used by the IDTF to perform tests must demonstrate the basic qualifications to perform the tests in question and have training and proficiency as evidenced by licensure or certification by the appropriate State health or education department. In the absence of a State licensing board, the technician must be certified by an appropriate national credentialing body. The IDTF must maintain documentation available for review that these requirements are met.

(2) For services that do not require direct or in-person beneficiary interaction, treatment, or testing, any nonphysician personnel used by the IDTF to perform the tests must meet all applicable State licensure requirements for doing so. If there are any applicable State licensure requirements, the IDTF must maintain documentation available for review that these requirements are met.

* * * * *

(g) * * *

(6) * * *

(i) Except as otherwise stated in paragraph (g)(6)(ii) of this section, have a comprehensive liability insurance policy of at least $300,000 per location that covers both the place of business and all customers and employees of the IDTF. The policy must be carried by a nonrelative-owned company. Failure to maintain required insurance at all times will result in revocation of the IDTF's billing privileges retroactive to the date the insurance lapsed. IDTF suppliers are responsible for providing the contact information for the issuing insurance agent and the underwriter. In addition, the IDTF must—

(A) Ensure that the insurance policy must remain in force at all times and provide coverage of at least $300,000 per incident; and

(B) Notify the CMS designated contractor in writing of any policy changes or cancellations.

(ii) Paragraph (g)(6)(i) of this section does not apply to IDTFs that only perform services that do not require direct or in-person beneficiary interaction, treatment, or testing.

* * * * *

(8) * * *

(i) Except as otherwise stated in paragraph (g)(8)(ii) of this section, answer, document, and maintain documentation of a beneficiary's written clinical complaint at the physical site of the IDTF. (For mobile IDTFs, this documentation would be stored at their home office.) This includes, but is not limited to, the following:

(A) The name, address, telephone number, and health insurance claim number of the beneficiary.

(B) The date the complaint was received, the name of the person receiving the complaint, and a summary of actions taken to resolve the complaint.

(C) If an investigation was not conducted, the name of the person making the decision and the reason for the decision.

(ii) Paragraph (g)(8)(i) of this section does not apply to IDTFs that only perform services that do not require direct or in-person beneficiary interaction, treatment, or testing.

(9) Openly post these standards for review by patients and the public. (This requirement does not apply to IDTFs that only perform services that do not require direct or in-person beneficiary interaction, treatment, or testing.)

* * * * *

■ 19. Amend § 410.37 by adding paragraph (j) to read as follows:

§ 410.37 Colorectal cancer screening tests: Conditions for and limitations on coverage.

* * * * *

(j) Effective January 1, 2022, colorectal cancer screening tests include a planned screening flexible sigmoidoscopy or screening colonoscopy that involves the removal of tissue or other matter or other procedure furnished in connection with, as a result of, and in the same clinical encounter as the screening test.

■ 20. Amend § 410.47 by—

■ a. Revising the section heading as set forth below;

■ b. In paragraph (a), revising the definitions of ''Individualized treatment plan'', ''Medical director'', Outcomes assessment'', ''Physician prescribed exercise'', ''Psychosocial assessment'', and ''Supervising physician'';

■ c. Revising paragraphs (b), (c), (d), and (e);

■ d. Removing paragraph (f).

■ e. Redesignating paragraph (g) as new paragraph (f).

The revisions read as follows:

§ 410.47 Pulmonary rehabilitation program: Conditions of coverage.

(a) * * *

Individualized treatment plan means a written plan tailored to each individual patient that includes all of the following:

(i) A description of the individual's diagnosis.

(ii) The type, amount, frequency, and duration of the items and services furnished under the plan.

(iii) The goals set for the individual under the plan.

Medical director means the physician who oversees the pulmonary rehabilitation program at a particular site.

Outcomes assessment means an evaluation of progress as it relates to the individual's rehabilitation which includes the following:

(i) Evaluations, based on patient-centered outcomes, which must be measured by the physician or program staff at the beginning and end of the program. Evaluations measured by program staff must be considered by the physician in developing and/or reviewing individualized treatment plans.

(ii) Objective clinical measures of exercise performance and self-reported measures of shortness of breath and behavior.

* * * * *

Physician-prescribed exercise means aerobic exercise, combined with other types of exercise (such as conditioning, breathing retraining, step, and strengthening) as determined to be appropriate for individual patients by a physician.

Psychosocial assessment means an evaluation of an individual's mental and emotional functioning as it relates to the individual's rehabilitation or respiratory condition which includes an assessment of those aspects of an individual's family and home situation that affects the individual's rehabilitation treatment, and psychosocial evaluation of the individual's response to and rate of progress under the treatment plan.

* * * * *

Supervising physician means a physician that is immediately available and accessible for medical consultations and medical emergencies at all times items and services are being furnished to individuals under pulmonary rehabilitation programs.

(b) *General rule.* (1) *Covered conditions.* Medicare Part B covers pulmonary rehabilitation for beneficiaries:

(i) With moderate to very severe COPD (defined as GOLD classification II, III and IV), when referred by the physician treating the chronic respiratory disease;

(ii) Who were hospitalized with a COVID–19 diagnosis and experience persistent symptoms, including respiratory dysfunction, for at least four weeks after hospital discharge;

(iii) Additional medical indications for coverage for pulmonary

rehabilitation may be established through a national coverage determination (NCD).

(2) *Components.* Pulmonary rehabilitation must include all of the following components:

(i) Physician-prescribed exercise during each pulmonary rehabilitation session.

(ii) Education or training that is closely and clearly related to the individual's care and treatment which is tailored to the individual's needs and assists in achievement of goals toward independence in activities of daily living, adaptation to limitations and improved quality of life. Education must include information on respiratory problem management and, if appropriate, brief smoking cessation counseling.

(iii) Psychosocial assessment.

(iv) Outcomes assessment.

(v) An individualized treatment plan detailing how components are utilized for each patient. The individualized treatment plan must be established, reviewed, and signed by a physician every 30 days.

(3) *Settings.* (i) Medicare Part B pays for pulmonary rehabilitation in the following settings:

(A) A physician's office.

(B) A hospital outpatient setting.

(ii) All settings must have the following:

(A) A physician immediately available and accessible for medical consultations and emergencies at all times when items and services are being furnished under the program. This provision is satisfied if the physician meets the requirements for direct supervision for physician office services at § 410.26 of this subpart; and for hospital outpatient services at § 410.27 of this subpart.

(B) The necessary cardio-pulmonary, emergency, diagnostic, and therapeutic life-saving equipment accepted by the medical community as medically necessary (for example, oxygen, cardiopulmonary resuscitation equipment, and defibrillator) to treat chronic respiratory disease.

(c) *Medical director standards.* The physician responsible for a pulmonary rehabilitation program is identified as the medical director. The medical director, in consultation with staff, is involved in directing the progress of individuals in the program and must possess all of the following:

(1) Expertise in the management of individuals with respiratory pathophysiology.

(2) Cardiopulmonary training in basic life support or advanced cardiac life support.

(3) Be licensed to practice medicine in the State in which the pulmonary rehabilitation program is offered.

(d) *Supervising physician standards.* Physicians acting as the supervising physician must possess all of the following:

(1) Expertise in the management of individuals with respiratory pathophysiology.

(2) Cardiopulmonary training in basic life support or advanced cardiac life support.

(3) Be licensed to practice medicine in the State in which the pulmonary rehabilitation program is offered.

(e) *Limitations on coverage:* The number of pulmonary rehabilitation sessions are limited to a maximum of 2 1-hour sessions per day for up to 36 sessions over up to 36 weeks with the option for an additional 36 sessions over an extended period of time if approved by the Medicare Administrative Contractor.

* * * * *

■ 21. Amend § 410.49 by—

■ a. In paragraph (a), revising the definition of ''Medical director'', revising paragraph (i) in the definition of ''Outcomes assessment'', and revising the definition of ''Physician-prescribed exercise''; and

■ b. Revising paragraphs (b)(1) introductory text, (b)(2) paragraph heading and introductory text, (b)(2)(ii), (b)(3)(i) introductory text, (d) paragraph heading and introductory text, (e) paragraph heading and introductory text, and (f).

The revisions read as follows:

§ 410.49 Cardiac rehabilitation program and intensive cardiac rehabilitation program: Conditions of coverage.

(a) * * *

Medical director means the physician who oversees the cardiac rehabilitation or intensive cardiac rehabilitation program at a particular site.

Outcomes assessment * * *

(i) Evaluations, based on patient-centered outcomes, which must be measured by the physician or program staff at the beginning and end of the program. Evaluations measured by program staff must be considered by the physician in developing and/or reviewing individualized treatment plans.

* * * * *

Physician-prescribed exercise means aerobic exercise combined with other types of exercise (such as strengthening and stretching) as determined to be appropriate for individual patients by a physician.

* * * * *

(b) * * *

(1) *Covered conditions.* Medicare Part B covers cardiac rehabilitation and intensive cardiac rehabilitation for beneficiaries who have experienced one or more of the following:

* * * * *

(2) *Components.* Cardiac rehabilitation and intensive cardiac rehabilitation must include all of the following:

* * * * *

(ii) Cardiac risk factor modification, including education, counseling, and behavioral intervention, tailored to the individual's needs.

* * * * *

(3) * * *

(i) Medicare Part B pays for cardiac rehabilitation and intensive cardiac rehabilitation in the following settings:

* * * * *

(d) *Medical director standards.* The physician responsible for a cardiac rehabilitation program or intensive cardiac rehabilitation program is identified as the medical director. The medical director, in consultation with staff, is involved in directing the progress of individuals in the program and must possess all of the following:

* * * * *

(e) *Supervising physician standards.* Physicians acting as the supervising physician must possess all of the following:

* * * * *

(f) *Limitations on coverage.* (1) Cardiac rehabilitation: The number of cardiac rehabilitation sessions are limited to a maximum of 2 1-hour sessions per day for up to 36 sessions over up to 36 weeks with the option for an additional 36 sessions over an extended period of time if approved by the Medicare Administrative Contractor.

(2) *Intensive cardiac rehabilitation:* Intensive cardiac rehabilitation sessions are limited to 72 1-hour sessions (as defined in section 1848(b)(5) of the Act), up to 6 sessions per day, over a period of up to 18 weeks.

■ 22. Amend § 410.59 by—

■ a. Revising paragraph (a)(4)(iii)(B); and

■ b. Adding paragraphs (a)(4)(iv) and (v).

The revision and additions read as follows:

§ 410.59 Outpatient occupational therapy services: Conditions.

(a) * * *

(4) * * *

(iii) * * *

(B) Except as provided in paragraph (a)(4)(iv) of this section, furnishes a portion of a service, or in the case of a

15-minute timed code, a portion of a unit of service separately from the part furnished by the occupational therapist such that the minutes for that portion of a service (or unit of a service) furnished by the occupational therapist assistant exceed 10 percent of the total minutes for that service (or unit of a service).

(iv) Paragraph (a)(4)(iii)(B) of this section does not apply when determining whether the prescribed modifier applies to the last 15-minute unit of a service billed for a patient on a treatment day when the occupational therapist provides more than the midpoint of a 15-minute timed code, that is, 8 or more minutes, regardless of any minutes for the same service furnished by the occupational therapy assistant.

(v) Where there are two remaining 15-minute units to bill of the same service, and the occupational therapist and occupational therapy assistant each provided between 9 and 14 minutes of the service with a total time of at least 23 minutes and no more than 28 minutes, one unit of the service is billed with the prescribed modifier for the minutes furnished by the occupational therapy assistant and one unit is billed without the prescribed modifier for the service provided by the occupational therapist.

* * * * *

■ 23. Amend § 410.60 by—

■ a. Revising paragraph (a)(4)(iii)(B); and

■ b. Adding paragraphs (a)(4)(iv) and (v).

The revision and additions read as follows:

§ 410.60 Outpatient physical therapy services: Conditions.

(a) * * *

(4) * * *

(iii) * * *

(B) Except as provided in paragraph (a)(4)(iv) of this section, furnishes a portion of a service, or in the case of a 15-minute timed code, a portion of a unit of service separately from the part furnished by the physical therapist such that the minutes for that portion of a service (or unit of a service) furnished by the physical therapist assistant exceed 10 percent of the total minutes for that service (or unit of a service).

(iv) Paragraph (a)(4)(iii)(B) of this section does not apply when determining whether the prescribed modifier applies to the last 15-minute unit of a service billed for a patient on a treatment day, when the physical therapist provides more than the midpoint of a 15-minute timed code, that is, 8 or more minutes, regardless of any minutes for the same service furnished by the physical therapist assistant.

(v) Where there are two remaining 15-minute units to bill of the same service, and the physical therapist and physical therapist assistant each provided between 9 and 14 minutes of the service with a total time of at least 23 minutes, one unit of the service is billed with the prescribed modifier for the minutes furnished by the physical therapist assistant and one unit is billed without the prescribed modifier for the service provided by the physical therapist.

* * * * *

■ 24. Amend § 410.67 by—

■ a. In paragraph (b), revising paragraphs (3) and (4) in the definition of ''Opioid use disorder treatment service'';

■ b. Revising paragraphs (d)(4)(ii) and (iii), and (d)(5);

■ c. Adding paragraph (d)(6).

The revisions and addition read as follows:

§ 410.67 Medicare coverage and payment of Opioid use disorder treatment services furnished by Opioid treatment programs.

* * * * *

(b) * * *

Opioid use disorder treatment service * * *

(3) Substance use counseling by a professional to the extent authorized under State law to furnish such services including services furnished via two-way interactive audio-video communication technology, as clinically appropriate, and in compliance with all applicable requirements. During a Public Health Emergency, as defined in § 400.200 of this chapter, or for services furnished after the end of such emergency, in cases where audio/video communication technology is not available to the beneficiary, the counseling services may be furnished using audio-only telephone calls if all other applicable requirements are met.

(4) Individual and group therapy with a physician or psychologist (or other mental health professional to the extent authorized under State law), including services furnished via two-way interactive audio-video communication technology, as clinically appropriate, and in compliance with all applicable requirements. During a Public Health Emergency, as defined in § 400.200 of this chapter, or for services furnished after the end of such emergency, in cases where audio/video communication technology is not available to the beneficiary, the therapy services may be furnished using audio-only telephone calls if all other applicable requirements are met.

* * * * *

(d) * * *

(4) * * *

(ii) The payment amounts for the non-drug component of the bundled payment for an episode of care, the adjustments for counseling or therapy, intake activities, periodic assessments, and the non-drug component of the adjustment for take-home supplies of opioid antagonist medications will be geographically adjusted using the Geographic Adjustment Factor described in § 414.26 of this chapter.

(iii) The payment amounts for the non-drug component of the bundled payment for an episode of care, the adjustments for counseling or therapy, intake activities, periodic assessments, and the non-drug component of the adjustment for take-home supplies of opioid antagonist medications will be updated annually using the Medicare Economic Index described in § 405.504(d) of this chapter.

(5) Payment for medications delivered, administered or dispensed to a beneficiary as part of the bundled payment or an adjustment to the bundled payment under paragraph (d)(4)(i) of this section is considered a duplicative payment if a claim for delivery, administration or dispensing of the same medications for the same beneficiary on the same date of service was also separately paid under Medicare Part B or Part D. CMS will recoup the duplicative payment made to the opioid treatment program.

(6) When substance use counseling under paragraph (b)(3) of this section or therapy services under paragraph (b)(4) of this section are furnished using audio-only telephone calls after the end of the Public Health Emergency as defined in § 400.200 of this chapter, the practitioner must document in the beneficiary's medical record that the services were furnished using audio-only technology and the rationale for doing so. For purposes of the adjustment to the bundled payment under paragraph (d)(4)(i)(A) of this section, the practitioner must also certify, in a form and manner specified by CMS, that they had the capacity to furnish the services using two-way, audio/video communication technology, but used audio-only technology because audio/video communication technology was not available to the beneficiary.

* * * * *

■ 25. Add § 410.72 to read as follows:

§ 410.72 Registered dietitians' and nutrition professionals' services.

(a) *Definition: Registered dietitians and nutrition professionals.* Meet the qualifications at § 410.134.

(b) *Covered registered dietitian and nutrition professional services.* Medicare Part B covers:

(1) *Coverage condition.* Medical nutrition therapy (MNT) services as defined at § 410.130 under the conditions of coverage at § 410.132.

(2) *Other services.* Registered dietitians and nutrition professionals may also provide diabetes self-management (DSMT) services if they are or represent an accredited DSMT entity and have an order from a physician or qualified nonphysician practitioner who is treating the patient's diabetic condition.

(3) *Limits on MNT and DSMT.* (i) DSMT and MNT cannot be furnished to a patient on the same date of service, and

(ii) MNT and DSMT services cannot be furnished incident to the professional services of a physician or nonphysician practitioner service.

(c) *Limitations.* The following services are not registered dietitian or nutrition professional services for purposes of billing Medicare Part B:

(1) Services furnished by a registered dietitian or nutrition professional to an inpatient of a Medicare-participating hospital.

(2) Services furnished by a registered dietitian or nutrition professional to an inpatient of a Medicare-participating SNF.

(3) Services furnished by a registered dietitian or nutrition professional to a patient in a Medicare-participating ESRD facility in accordance with the limitation on coverage of MNT service listed at § 410.132(b)(1).

(d) *Professional services.* Registered dietitians and nutrition professionals can be paid for professional services only when the services have been personally performed by them.

(e) *Telehealth services.* MNT and DMST services may be provided as telehealth service (meeting the requirements in § 410.78) when registered dietitians or nutrition professionals act as distant site practitioners.

(f) *Restrictions.* The services are provided on an assignment-related basis, and a registered dietitian or nutrition professional may not charge a beneficiary for a service not payable under this provision. If a beneficiary has made payment for a service, the registered dietitian or nutrition professional must make the appropriate refund to the beneficiary.

■ 26. Amend § 410.74 by revising paragraph (a)(2)(v) to read as follows:

§ 410.74 Physician assistants' services.

(a) * * *

(2) * * *

(v) Prior to January 1, 2022, furnishes services that are billed by the employer of a physician assistant; and

* * * * *

■ 27. Amend 410.78 by—

■ a. Revising paragraph (a)(3); and

■ b. Adding paragraphs (b)(3)(xiii) and (xiv), and (b)(4)(iv)(D).

The revision and additions read as follows:

§ 410.78 Telehealth services.

(a) * * *

(3) *Interactive telecommunications system* means, except as otherwise provided in this paragraph, multimedia communications equipment that includes, at a minimum, audio and video equipment permitting two-way, real-time interactive communication between the patient and distant site physician or practitioner. For services furnished for purposes of diagnosis, evaluation, or treatment of a mental health disorder to a patient in their home, interactive telecommunications may include two-way, real-time audio-only communication technology if the distant site physician or practitioner is technically capable to use an interactive telecommunications system as defined in the previous sentence, but the patient is not capable of, or does not consent to, the use of video technology. A modifier designated by CMS must be appended to the claim for services described in this paragraph to verify that these conditions have been met.

* * * * *

(b) * * *

(3) * * *

(xiii) A rural emergency hospital (as defined in section 1861(kkk)(2) of the Act), for services furnished on or after January 1, 2023.

(xiv) The home of a beneficiary for the purposes of diagnosis, evaluation, and/or treatment of a mental health disorder for services furnished on or after the first day after the end of the PHE as defined in our regulation at § 400.200. Payment will not be made for a telehealth service furnished under this paragraph unless the physician or practitioner has furnished an item or service in person, without the use of telehealth, for which Medicare payment was made (or would have been made if the patient were entitled to, or enrolled for, Medicare benefits at the time the item or service is furnished) within 6 months prior to the initial telehealth service and at least once within 6 months prior to the initial telehealth service and at least once within 6 months before any subsequent Medicare telehealth service.

(4) * * *

(iv) * * *

(D) Services furnished on or after the first day after the end of the PHE as defined in our regulation at § 400.200 for the purposes of diagnosis, evaluation, and/or treatment of a mental health disorder. Payment will not be made for a telehealth service furnished under this paragraph unless the physician or practitioner has furnished an item or service in person, without the use of telehealth, for which Medicare payment was made (or would have been made if the patient were entitled to, or enrolled for, Medicare benefits at the time the item or service is furnished) within 6 months prior to the initial telehealth service and within 6 months of any subsequent telehealth service.

* * * * *

■ 28. Amend § 410.79 by—

■ a. Revising paragraph (c)(1)(ii);

■ b. Removing the second duplicate paragraph (c)(3)(ii); and

■ c. Revising paragraph (e)(3)(v)(C).

The revisions read as follows:

§ 410.79 Medicare Diabetes Prevention Program expanded model: Conditions of coverage.

* * * * *

(c) * * *

(1) * * *

(ii) An MDPP beneficiary is eligible for the first ongoing maintenance session interval only if the beneficiary:

(A) Starts his or her first core session on or before December 31, 2021;

(B) Attends at least one in-person core maintenance session during the final core maintenance session interval; and

(C) Achieves or maintains the required minimum weight loss at a minimum of one in-person core maintenance session during the final core maintenance session interval.

* * * * *

(e) * * *

(3) * * *

(v) * * *

(C) Beneficiaries who began the set of MDPP services between January 1, 2021 and December 31, 2021 and who are in the second year of the set of MDPP services as of the start of an applicable 1135 waiver event, whose in-person sessions are suspended due to the applicable 1135 waiver event, and who elect not to continue with MDPP services virtually, may restart the ongoing maintenance session interval in which they were participating at the start of the applicable 1135 waiver event or may resume with the most recent attendance session of record.

* * * * *

■ 29. Amend § 410.105 by—

■ a. Revising paragraph (d)(3)(ii); and
■ b. Adding paragraphs (d)(3)(iii) and (iv).

The revision and additions read as follows:

§ 410.105 Requirements for coverage of CORF services.

* * * * *

(d) * * *

(3) * * *

(ii) Except as provided in paragraph (d)(3)(iii) of this section, furnishes a portion of a service, or in the case of a 15-minute timed code, a portion of a unit of service, separately from the part furnished by the physical or occupational therapist such that the minutes for that portion of a service (or unit of a service) exceed 10 percent of the total time for that service (or unit of a service).

(iii) Paragraph (d)(3)((ii) of this section does not apply when determining whether the prescribed modifier applies to the last 15-minute unit of a service billed for a patient on a treatment day when the physical or occupational therapist provides more than the midpoint of a 15-minute timed code, that is, 8 or more minutes, regardless of any minutes for the same service furnished by the physical therapist assistant or occupational therapy assistant.

(iv) Where there are two remaining 15-minute units to bill of the same service and the physical therapist and the physical therapist assistant or the occupational therapist and the occupational therapy assistant, as applicable, each provided between 9 and 14 minutes, with a total time of at least 23 minutes, one unit of the service is billed with the prescribed modifier for the minutes furnished by the physical therapist assistant or occupational therapy assistant and one unit is billed without the prescribed modifier for the service provided by the physical therapist or occupational therapist.

■ 30. Amend § 410.130 by—
■ a. Revising the definition of ''Chronic renal insufficiency''; and
■ b. Removing the definition of ''Treating physician''.

The revision reads as follows:

§ 410.130 Definitions.

* * * * *

Chronic renal insufficiency means the stage of renal disease associated with a reduction in renal function not severe enough to require dialysis or transplantation (glomerular filtration rate [GFR] 15–59 ml/min/1.73m2).

* * * * *

■ 31. Amend § 410.132 by revising paragraphs (a), (b)(5), and (c) to read as follows.

§ 410.132 Medical nutrition therapy.

(a) *Conditions for coverage of MNT services.* Medicare Part B pays for MNT services provided by a registered dietitian or nutrition professional as defined in § 410.134 when the beneficiary is referred for the service by a physician.

(b) * * *

(5) An exception to the maximum number of hours in paragraphs (b)(2), (3), and (4) of this section may be made when a physician determines that there is a change of diagnosis, medical condition, or treatment regimen related to diabetes or renal disease that requires a change in MNT during an episode of care.

(c) *Referrals.* Referral may only be made by a physician when the beneficiary has been diagnosed with diabetes or renal disease as defined in this subpart with documentation noted by a referring physician in the beneficiary's medical record.

■ 32. Amend § 410.150 by revising paragraph (b)(15) to read as follows:

§ 410.150 To whom payment is made.

* * * * *

(b) * * *

(15)(i) Prior to January 1, 2022, to the qualified employer of a physician assistant for professional services furnished by the physician assistant and for services and supplies provided incident to his or her services. Payment is made to the employer of a physician assistant regardless of whether the physician assistant furnishes services under a W–2, employer-employee employment relationship, or whether the physician assistant is an independent contractor who receives a 1099 reflecting the relationship. Both types of relationships must conform to the appropriate guidelines provided by the Internal Revenue Service. A qualified employer is not a group of physician assistants that incorporate to bill for their services. Payment is made only if no facility or other provider charges or is paid any amount for services furnished by a physician assistant.

(ii) Effective on or after January 1, 2022, payment is made to a physician assistant for professional services furnished by a physician assistant in all settings in both rural and nonrural areas and for services and supplies furnished incident to those services. Payment is made only if no facility or other provider charges, or is paid, any amount for the furnishing of professional services of the physician assistant.

* * * * *

■ 33. Amend § 410.152 by revising paragraphs (l) introductory text and (l)(5) to read as follows:

§ 410.152 Amounts of payment.

* * * * *

(l) *Amount of payment: Preventive services.* Except as provided otherwise in this paragraph, Medicare Part B pays 100 percent of the Medicare payment amount established under the applicable payment methodology for the furnished by a provider or supplier for the following preventive services:

* * * * *

(5) Colorectal cancer screening tests (excluding barium enemas).

(i) For the colorectal cancer screening tests described in § 410.37(j) of this part, Medicare Part B pays at the specified percentage as follows:

(A) 80 percent for CY 2022.

(B) 85 percent for CY 2023 through 2026.

(C) 90 percent for 2027 through 2029.

(D) 100 percent beginning January 1, 2030.

(ii) [Reserved]

* * * * *

PART 411—EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

■ 34. The authority citation for part 411 continues to read as follows:

Authority: 42 U.S.C. 1302, 1395w–101 through 1395w–152, 1395hh, and 1395nn.

■ 35. Amend § 411.351 by revising the definition of ''List of CPT/HCPCS Codes'' to read as follows:

§ 411.351 Definitions.

* * * * *

List of CPT/HCPCS Codes means the list of CPT and HCPCS codes that identifies those items and services that are designated health services under section 1877 of the Act or that may qualify for certain exceptions under section 1877 of the Act. It is updated each calendar quarter and posted on the CMS website at *https://www.cms.gov/Medicare/Fraud-and-Abuse/PhysicianSelfReferral/List_of_Codes.*

* * * * *

■ 36. Amend § 311.354 by—
■ a. Revising paragraphs (c)(2)(ii)(A)(*2*) and (*3*);
■ b. Adding paragraph (c)(2)(ii)(A)(*4*); and
■ c. Revising paragraph (c)(2)(ii)(B).

The revisions and addition read as follows:

§ 411.354 Financial relationship, compensation, and ownership or investment interest.

* * * * *

(c) * * *

(2) * * *

(ii) * * *

(A) * * *

(*2*) Is calculated using a formula that includes the physician's referrals to the entity furnishing designated health services as a variable, resulting in an increase or decrease in the amount of compensation that positively correlates with the number or value of the physician's referrals to the entity;

(*3*) Is calculated using a formula that includes other business generated by the physician for the entity furnishing designated health services as a variable, resulting in an increase or decrease in the amount of compensation per unit that positively correlates with the physician's generation of other business for the entity; or

(*4*) Is payment for anything other than services personally performed by the physician (or immediate family member).

(B) For purposes of applying paragraph (c)(2)(ii)(A) of this section:

(*1*) A positive correlation between two variables exists when one variable decreases as the other variable decreases, or one variable increases as the other variable increases.

(*2*) The individual unit is:

(*i*) Time, where the compensation paid to the physician (or immediate family member) is based solely on the period of time during which the services are provided.

(*ii*) Service, where the compensation paid to the physician (or immediate family member) is based solely on the service provided.

(*iii*) Time, where the compensation paid to the physician (or immediate family member) is not based solely on the period of time during which a service is provided or based solely on the service provided.

(*3*) Services that are personally performed by a physician (or immediate family member) do not include services that are performed by any person other than the physician (or immediate family member), including, but not limited to, the referring physician's (or immediate family member's) employees, independent contractors, group practice members, or persons supervised by the physician (or the immediate family member).

* * * * *

■ 37. Amend § 411.355 by revising paragraph (h) to read as follows:

§ 411.355 General exceptions to the referral prohibition related to both ownership/investment and compensation.

* * * * *

(h) *Preventive screening tests and vaccines.* (1) Preventive screening tests and vaccines that meet the following conditions:

(i) The preventive screening test or vaccine is listed on the List of CPT/HCPCS Codes as a code to which the exception in this paragraph (h) is applicable.

(ii) The preventive screening test or vaccine is covered by Medicare.

(iii) The preventive screening test or vaccine is subject to a CMS-mandated frequency limit.

(2) During such period as the vaccine is not subject to a CMS-mandated frequency limit, paragraph (h)(1)(iii) of this section does not apply to a COVID–19 vaccine identified on the List of CPT/HCPCS Codes as a code to which the exception in this paragraph (h) is applicable.

* * * * *

PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

■ 38. The authority citation for part 414 continues to read as follows:

Authority: 42 U.S.C. 1302, 1395hh, and 1395rr(b)(l).

■ 39. Amend § 414.64 by revising paragraph (a) to read as follows:

§ 414.64 Payment for medical nutrition therapy.

(a) *Payment under the physician fee schedule.* Medicare payment for medical nutrition therapy is made under the physician fee schedule in accordance with subpart B of this part. Payment to nonphysician professionals, as specified in paragraph (b) of this section, is 80 percent (or 100 percent if such services are recommended with a grade of A or B by the United States Preventive Services Task Force for any indication or population and are appropriate for the individual) or the lesser of the actual charges or 85 percent of the physician fee schedule amount.

* * * * *

■ 40. Amend § 414.84 by—

■ a. Revising paragraphs (b)(1)(i)

■ b. In paragraph (b)(1)(ii) by removing the reference ''CY 2018'' and adding in its place the reference ''CY 2022'';

■ c. Revising paragraph (b)(2)(i)

■ d. In paragraph (b)(2)(ii) by removing the reference CY 2018'' and adding in its place the reference ''CY 2022'';

■ e. Revising paragraph (b)(3)(i);

■ f. In paragraph (b)(3)(ii) by removing the reference ''CY 2018'' and adding in its place the reference ''CY 2022'';

■ g. Revising paragraph (b)(4)(i)(A);

■ h. In paragraphs (b)(4)(i)(B) and (b)(4)(ii)(B) by removing the reference ''CY 2018'' and adding in its place the reference ''CY 2022''

■ i. Revising paragraph (b)(4)(ii)(A); and

■ j. Revising paragraphs (b)(5), (b)(6)(i), (b)(7)(i) and (ii), and (c).

The revisions read as follows:

§ 414.84 Payment for MDPP Services.

* * * * *

(b) * * *

(1) * * *

(i) For a first core session furnished January 1, 2022 through December 31, 2022 the amount is $26.

* * * * *

(2) * * *

(i) For the fourth core session furnished January 1, 2022 through December 31, 2022 the amount is $78.

* * * * *

(3) * * *

(i) For the ninth core session furnished January 1, 2022 through December 31, 2022 the amount is $130.

* * * * *

(4) * * *

(i) * * *

(A) For a second core maintenance session January 1, 2022 through December 31, 2022 the amount is $106.

* * * * *

(ii) * * *

(A) For a second core maintenance session January 1, 2022 through December 31, 2022 the amount is $52.

* * * * *

(5) *Performance Goal 5: Attends two ongoing maintenance sessions and maintains the required minimum weight loss during an ongoing maintenance session interval.* For an MDPP beneficiary who attends his or her first core session on or before December 31, 2021, CMS makes a performance payment to an MDPP supplier if an MDPP beneficiary attends two ongoing maintenance sessions during an ongoing maintenance session interval, achieves attendance at that second ongoing maintenance session upon attendance at an ongoing maintenance session furnished by that supplier, and achieves or maintains the required minimum weight loss as measured in-person during an ongoing maintenance session furnished during the applicable ongoing maintenance session interval. CMS makes this performance payment to an MDPP supplier only once per MDPP beneficiary per ongoing maintenance session interval. The amount of this performance payment is determined as follows:

(i) For a second ongoing maintenance session furnished in interval 1 (months 13–15 of the MDPP services period), January 1, 2022 through December 31, 2022 the amount is $52.

(ii) For a second ongoing maintenance session furnished in interval 2 (months 16–18 of the MDPP services period), January 1, 2022 through December 31, 2022 the amount is $52.

(iii) For a second ongoing maintenance session furnished in interval 3 (months 19–21 of the MDPP services period), January 1, 2022 through December 31, 2022 the amount is $53.

(iv) For a second ongoing maintenance session furnished in interval 4 (months 22–24 of the MDPP services period), January 1, 2022 through December 31, 2022 the amount is $53.

(v) For a second ongoing maintenance session furnished during a subsequent year. The performance payment amount specified in this paragraph, adjusted as specified in paragraph (d) of this section.

(6) * * *

(i) For a core session or core maintenance session, as applicable, furnished January 1, 2022 through December 31, 2022 the amount is $189.

* * * * *

(7) * * *

(i) For a core session or core maintenance session, as applicable, furnished January 1, 2022 through December 31, 2022 the amount is $26.

(ii) For a core session or core maintenance session, as applicable, furnished during a calendar year subsequent to CY 2018. The performance payment amount specified in this paragraph, adjusted as specified in paragraph (d) of this section.

(c) *Bridge payment.* CMS makes a bridge payment to an MDPP supplier only for a core session or core maintenance session furnished to an MDPP beneficiary who has previously received MDPP services from a different MDPP supplier. An MDPP supplier that has previously been paid either a bridge payment or a performance payment for an MDPP beneficiary is not eligible to be paid a bridge payment for that beneficiary. A bridge payment is made only on an assignment-related basis in accordance with § 424.55 of this chapter, and MDPP suppliers must accept the Medicare allowed charge as payment in full and may not bill or collect from the beneficiary any amount. CMS will make a bridge payment only to an MDPP supplier that complies with all applicable enrollment and program requirements, and only for MDPP services furnished by an eligible coach, on or after his or her coach eligibility start date and, if applicable, before his or her coach eligibility end date. As a condition of payment, the MDPP supplier must report the NPI of the coach who furnished the session on the claim for the MDPP session. The amount of the bridge payment is determined as follows:

(1) For core session or core maintenance session, as applicable, furnished January 1, 2022 through December 31, 2022 the amount is $26.

(2) For core session and core maintenance session, as applicable, furnished during a calendar year subsequent to CY 2022. The bridge payment amount specified in this paragraph, adjusted as specified in paragraph (d) of this section.

* * * * *

■ 41. Amend § 414.626 by revising paragraphs (b)(1) and (f) to read as follows:

§ 414.626 Data reporting by ground ambulance organizations.

* * * * *

(b) * * *

(1) Within 30 days of the date that CMS notifies a ground ambulance organization under paragraph (c)(3) of this section that it has selected the ground ambulance organization to report data under this section, the ground ambulance organization must select a data collection period that corresponds with its annual accounting period and provide the start date of that data collection period to CMS or its contractor.

* * * * *

(f) *Public availability of data.* Beginning in 2024, and at least once every 2 years thereafter, CMS will post on its website data that it collected under this section, including but not limited to summary statistics and ground ambulance organization characteristics.

* * * * *

■ 42. Amend § 414.802 by revising the definition of ''Drug'' to read as follows:

§ 414.802 Definitions.

* * * * *

Drug means a drug or a biological, and for purposes of applying section 1847A(f) of the Act, includes an item, service, supply, or product that is payable under Medicare Part B as a drug or biological.

* * * * *

■ 43. Section 414.806 is revised to read as follows:

§ 414.806 Penalties associated with misrepresentation and the failure to submit timely and accurate ASP data.

(a) *Misrepresentation.* Section 1847A(d)(4)(A) specifies the penalties associated with misrepresentations in the reporting of the manufacturer's average sales price for a drug as defined at § 414.802.

(b) *Failure to provide timely information or the submission of false information.* (1) For a manufacturer that has entered into and has in effect a rebate agreement under section 1927 of the Act, section 1927(b)(3)(C) of the Act specifies the penalties associated with a manufacturer's failure to submit timely information or the submission of false information.

(2) For a manufacturer that has not entered into and does not have in effect a rebate agreement under section 1927 of the Act, sections 1847A(d)(4)(B) and (C) of the Act specify the penalties associated with a manufacturer's failure to submit timely information or the submission of false information.

■ 44. Amend § 414.904 by adding paragraph (d)(4) to read as follows:

§ 414.904 Average sales price as the basis for payment.

* * * * *

(d) * * *

(4) *Payment adjustment for certain drugs for which there is a self-administered version.*

(i) *In general.* Except as provided in paragraphs (d)(4)(ii) and (iii) of this section, if the Inspector General identifies a drug or biological product in a study described in section 1847A(g)(1) of the Act, the Secretary must apply the payment limit for the applicable billing and payment code as specified in paragraph (d)(4)(iv) of this section, beginning with the first day of the second quarter after such study is publicly available. The methodology described in this paragraph will be recalculated each quarter thereafter, except when conditions described in paragraph (d)(4)(ii) are met.

(ii) *Exception.* The adjustment described in paragraph (d)(4)(i) of this section does not apply to the payment limit for a billing and payment code for a quarter if, at the time that ASP calculations are finalized for such quarter, the drug in the dosage form described by the billing and payment code is included by the FDA on the drug shortage list in effect under section 506E of the Federal Food, Drug, and Cosmetic Act.

(iii) *Special rule for certain billing and payment codes.* Effective July 1, 2021, for a billing and payment code described under section 1847A(g)(3) of

the Act, the payment limit for the applicable billing and payment code must be determined as described in paragraph (d)(4)(iv) of this section, and the exception specified at paragraph (d)(4)(ii) of this section does not apply.

(iv) *Lesser-of methodology.* For purposes of this section, the payment limit is the lesser of:

(A) The payment limit determined under section 1847A of the Act for such billing and payment code if each National Drug Code for such product so identified under section 1847A(g)(1) of the Act were excluded from such determination; and

(B) The payment limit otherwise determined under section 1847A of the Act for such billing and payment code without application of section 1847A(g) of the Act.

(v) *NDC changes.* For an Inspector General-identified National Drug Code, as described under section 1847A(g)(1) or (3) of the Act, for which the manufacturer has redesignated the National Drug Code (without changes to the dosage form), the application of the lesser-of methodology described in this paragraph must use manufacturer-reported ASP data associated with the redesignated National Drug Code in the same manner as the one originally identified by the Inspector General.

* * * * *

■ 45. Amend § 414.1300 by revising paragraphs (a)(2) and (3) to read as follows:

§ 414.1300 Basis and scope.

(a) * * *

(2) Section 1848(k)—Quality Reporting System.

(3) Section 1848(m)—Incentive Payments for Quality Reporting.

* * * * *

■ 46. Amend § 414.1305 by—

■ a. Revising the definitions of ''Collection type'' and ''Meaningful EHR user for MIPS'';

■ b. In the definition of ''MIPS determination period'', revising paragraph (2).

■ c. In the definition of ''MIPS eligible clinician'', revising the introductory text, paragraph (2) introductory text, and adding paragraph (3);

■ d. Adding the definitions of ''Multispecialty group'', ''MVP participant'', ''Population health measure'', ''QCDR measure'', ''Single specialty group'', ''Special status'' and ''Subgroup'' in alphabetical order; and

■ e. Revising the definition of ''Submission type''.

The revision and additions read as follows:

§ 414.1305 Definitions.

* * * * *

Collection type means a set of quality measures with comparable specifications and data completeness criteria, as applicable, including, but not limited to: electronic clinical quality measures (eCQMs); MIPS clinical quality measures (MIPS CQMs); QCDR measures; Medicare Part B claims measures; for the CY 2017 through 2022 MIPS performance periods/2019 through 2024 MIPS payment years, CMS Web Interface measures; the CAHPS for MIPS survey; and administrative claims measures.

* * * * *

Meaningful EHR user for MIPS means a MIPS eligible clinician who possesses CEHRT, uses the functionality of CEHRT, reports on applicable objectives and measures specified for the Promoting Interoperability performance category for a performance period in the form and manner specified by CMS, does not knowingly and willfully take action (such as to disable functionality) to limit or restrict the compatibility or interoperability of CEHRT, and engages in activities related to supporting providers with the performance of CEHRT.

* * * * *

MIPS determination period means:

* * *

(2) Subject to § 414.1310(b)(1)(iii), an individual eligible clinician, group, or APM Entity group that is identified as not exceeding the low-volume threshold or as having special status, as applicable, during the first segment of the MIPS determination period will be identified as such for the applicable MIPS payment year regardless of the results of the second segment of the MIPS determination period. An individual eligible clinician, group, or APM Entity group for which the unique billing TIN and NPI combination is established during the second segment of the MIPS determination period will be assessed based solely on the results of such segment.

MIPS eligible clinician as identified by a unique billing TIN and NPI combination used to assess performance, means any of the following (except as excluded under § 414.1310(b)):

* * * * *

(2) For the 2021 through 2023 MIPS payment years:

* * * * *

(3) For the 2024 MIPS payment year and future years:

(i) A clinician described in paragraph (2) of this definition;

(ii) A clinical social worker (as defined in section 1861(hh)(1) of the Act);

(ii) A certified nurse midwife (as defined in section 1861(gg)(2) of the Act); and

(vii) A group that includes such clinicians.

* * * * *

Multispecialty group means a group that consists of two or more specialty types as identified by eligible clinicians in the Medicare Provider Enrollment, Chain, and Ownership System (PECOS).

MVP participant means an individual MIPS eligible clinician, multispecialty group, single-specialty group, subgroup, or APM Entity that is assessed on an MVP in accordance with § 414.1365 for all MIPS performance categories. For the CY 2025 MIPS performance period/2027 MIPS payment year and future years, MVP Participant means an individual MIPS eligible clinician, single-specialty group, subgroup, or APM Entity that is assessed on an MVP in accordance with § 414.1365 for all MIPS performance categories.

* * * * *

Population health measure means a quality measure that indicates the quality of a population or cohort's overall health and well-being, such as access to care, clinical outcomes, coordination of care and community services, health behaviors, preventive care and screening, health equity, or utilization of health services.

* * * * *

QCDR measure means a quality measure that is submitted by a QCDR and approved by CMS under § 414.1400. QCDR measures consist of:

(1) Measures that are not included in the MIPS final list of quality measures described in § 414.1330(a)(1) for the applicable MIPS payment year; and

(2) Measures that are included in the MIPS final list of quality measures described in § 414.1330(a)(1) for the applicable MIPS payment year, but have undergone substantive changes, as determined by CMS.

* * * * *

Single-specialty group means a group that consists of one specialty type as identified by eligible clinicians in the PECOS.

* * * * *

Special status means that a MIPS eligible clinician:

(1) Meets the definition of an ASC-based MIPS eligible clinician, facility-based MIPS eligible clinician, hospital-based MIPS eligible clinician, non-patient facing MIPS eligible clinician, or is in a small practice; or

(2) Is located in an HPSA or rural area.

Subgroup means a subset of a group which contains at least one MIPS eligible clinician and is identified by a combination of the group TIN, subgroup identifier, and each eligible clinician's NPI.

Submission type means the mechanism by which the submitter type submits data to CMS, including, but not limited to:

(1) Direct;

(2) Log in and upload;

(3) Log in and attest;

(4) Medicare Part B claims; and

(5) For the CY 2017 through 2022 MIPS performance periods/2019 through 2024 MIPS payment years, the CMS Web Interface.

* * * * *

■ 47. Amend § 414.1310 by revising paragraph (e)(1) to read as follows:

§ 414.1310 Applicability.

* * * * *

(e) * * * (1) Except as provided under §§ 414.1315(a)(2), 414.1317(b), 414.1318(b), and 414.1370(f)(2) each MIPS eligible clinician in the group receives a final score based on the group's combined performance assessment.

* * * * *

■ 48. Amend § 414.1317 by revising paragraph (b)(2) to read as follows:

§ 414.1317 APM Entity groups.

* * * * *

(b) * * *

(2) *Performance category weights.* The cost performance category weight is zero percent of the final score for an APM Entity. The performance category reweighting scenarios under § 414.1380(c)(2) apply to an APM Entity.

* * * * *

■ 49. Section 414.1318 is added to subpart O to read as follows:

§ 414.1318 Subgroups.

(a) *Eligibility and special status.* (1) General. Except as provided under paragraph (a)(2) of this section, for a MIPS payment year, determinations of meeting the low-volume threshold criteria and special status for subgroups are determined at the group level in accordance with §§ 414.1305 and 414.1310.

(2) *Exclusions.* An individual eligible clinician or group that elects to participate in MIPS as a MIPS eligible clinician in accordance with § 414.1310(b)(iii)(A) or § 414.1310(b)(2) is not eligible to participate in a subgroup.

(b) *Final score.* Except as provided under § 414.1317(b), each MIPS eligible clinician in the subgroup receives a final score based on the subgroup's combined performance assessment.

(c) *Subgroup reporting requirements.* For individual eligible clinicians to participate in MIPS as a subgroup, all of the following requirements must be met:

(1) Individual eligible clinicians that elect to participate in MIPS as a subgroup must aggregate their quality and improvement activities performance data across the subgroup's identifier.

(2) Individual eligible clinicians that elect to participate in MIPS as a subgroup will have their performance assessed at the subgroup level across all the MIPS performance categories based on an MVP in accordance with § 414.1365 and on the APM Performance Pathway in accordance with § 414.1367, as applicable. Subgroups that are MVP Participants must adhere to an election process described in § 414.1365(b).

■ 50. Amend § 414.1320 by—

■ a. Redesignating paragraphs (d) through (g) as paragraphs (e) through (h).

■ b. Adding a new paragraph (d).

The addition reads as follows:

§ 414.1320 MIPS performance period.

* * * * *

(d) For purposes of the 2022 MIPS payment year, the performance period for:

(1) The quality and cost performance categories are the full calendar year (January 1 through December 31) that occurs 2 years prior to the applicable MIPS payment year.

(2) The improvement activities performance categories are a minimum of a continuous 90-day period within the calendar year that occurs 2 years prior to the applicable MIPS payment year, up to and including the full calendar year.

* * * * *

■ 51. Amend § 414.1325 by revising paragraph (c)(1) to read follows:

§ 414.1325 Data submission requirements.

* * * * *

(c) * * *

(1) For the quality performance category, the direct; login and upload; Medicare Part B claims (beginning with the CY 2019 MIPS performance period/ 2021 MIPS payment year, for small practices only); and, for the CY2017 through 2022 MIPS performance periods/2019 through 2024 MIPS payment years, CMS Web Interface (for groups consisting of 25 or more eligible clinicians or a third party intermediary submitting on behalf of a group) submission types.

* * * * *

■ 52. Amend § 414.1340 by—

■ a. Revising paragraph (a)(3);

■ b. Adding paragraph (a)(4);

■ c. Revising paragraph (b)(3); and

■ d. Adding paragraph (b)(4).

The revisions and additions read as follows:

§ 414.1340 Data completeness criteria for the quality performance category.

(a) * * *

(3) At least 70 percent of the MIPS eligible clinician or group's patients that meet the measure's denominator criteria, regardless of payer for MIPS payment years 2022, 2023, and 2024.

(4) At least 80 percent of the MIPS eligible clinician or group's patients that meet the measure's denominator criteria, regardless of payer for MIPS payment year 2025.

(b) * * *

(3) At least 70 percent of the applicable Medicare Part B patients seen during the performance period to which the measure applies for MIPS payment years 2022, 2023, and 2024.

(4) At least 80 percent of the applicable Medicare Part B patients seen during the performance period to which the measure applies for MIPS payment year 2025.

* * * * *

■ 53. Amend § 414.1350 by revising paragraph (c)(4) and adding paragraph (c)(6) to read as follows:

§ 414.1350 Cost performance category.

* * * * *

(c) * * *

(4) For the procedural episode-based measures specified beginning with the 2019 performance period, the case minimum is 10, unless otherwise specified for individual measures. Beginning with the 2022 performance period, the case minimum for Colon and Rectal Resection procedural episode-based measure is 20 episodes.

* * * * *

(6) For the chronic condition episode-based measures specified beginning with the 2022 performance period, the case minimum is 20.

* * * * *

■ 54. Amend § 414.1360 by revising paragraph (a)(2) to read as follows:

§ 414.1360 Data submission criteria for the improvement activities performance category.

(a) * * *

(2) *Groups and virtual groups.* Beginning with the 2022 performance year, each improvement activity for which groups and virtual groups submit a yes response in accordance with paragraph (a)(1) of this section must be performed by at least 50 percent of the

NPIs that are billing under the group's TIN or virtual group's TINs or that are part of the subgroup, as applicable; and the NPIs must perform the same activity during any continuous 90-day period within the same performance year.

* * * * *

■ 55. Section 414.1365 is added to subpart O to read as follows:

§ 414.1365 MIPS Value Pathways.

(a) *General.* (1) Beginning with the CY 2023 MIPS performance period/2025 MIPS payment year, CMS uses MVPs included in the MIPS final inventory of MVPs established by CMS through rulemaking to assess performance for the quality, cost, improvement activities, and Promoting Interoperability performance categories.

(2) [Reserved]

(b) *MVP/Subgroup registration.* (1) To report an MVP, an MVP Participant must register for the MVP, and if applicable, as a subgroup during a period that begins on April 1 and ends on November 30 of the applicable CY performance period or a later date specified by CMS. To report the CAHPS for MIPS survey associated with an MVP, a group, subgroup or APM Entity must complete their registration by June 30 of such performance period or a later date specified by CMS.

(2) At the time of registration, the MVP Participant must submit the following information, as applicable:

(i) Each MVP Participant must select an MVP, 1 population health measure included in the MVP, and any outcomes-based administrative claims measure on which the MVP Participant intends to be scored.

(ii) Each subgroup must submit a list of each TIN/NPI associated with the subgroup and a plain language name for the subgroup.

(c) *MVP reporting requirements.* (1) Quality. Except as provided in paragraph (c)(1)(i) of this section, an MVP Participant must select and report, if applicable, 4 quality measures, including 1 outcome measure (or, if an outcome measure is not available, 1 high priority measure), included in the MVP, excluding the population health measure required under paragraph (c)(4)(ii) of this section.

(i) Paragraph (c)(1) of this section does not apply to a small practice that reports on an MVP that includes fewer than 4 Medicare Part B claims measures, provided that the small practice reports each such measure that is applicable.

(ii) [Reserved]

(2) *Cost.* An MVP Participant is scored on the cost measures included in the MVP that they select and report.

(3) *Improvement activities.* An MVP Participant who reports an MVP, must report one of the following:

(i) Two medium-weighted improvement activities;

(ii) One high-weighted improvement activity;

(iii) Participation in a certified or recognized patient-centered medical home (PCMH) or comparable specialty practice, as described at § 414.1380(b)(3)(ii).

(4) *Foundational layer*—(i) *Promoting interoperability.* An MVP Participant is required to meet the Promoting Interoperability performance category reporting requirements described at § 414.1375(b).

(A) For the CY 2023 and 2024 performance periods/2025 and 2026 MIPS payment years, an MVP Participant that is a subgroup is required to submit its affiliated group's data for the Promoting Interoperability performance category.

(B) [Reserved]

(ii) *Population health measures.* Each MVP Participant is scored on 1 population health measure in accordance with paragraph (d)(1) of this section.

(d) *MVP scoring*—(1) *General.* An MVP Participant that is not an APM Entity is scored on measures and activities included in the MVP in accordance with paragraphs (d)(1) through (3) of this section. An MVP Participant that is an APM Entity is scored on measures and activities included in the MVP in accordance with § 414.1317(b).

(2) *Performance standards.* Unless otherwise indicated in this paragraph (d), the performance standards described at § 414.1380(a)(1)(i) through (iv) apply to the measures and activities included in the MVP.

(3) *Performance categories.* An MVP Participant is scored under MIPS in four performance categories.

(i) *Quality performance category.* Except as provided in paragraphs (d)(3)(i)(A)(1) and (B) of this section, the quality performance category score for MVP Participants is calculated in accordance with § 414.1380(b)(1) based on measures included in the MVP.

(A) *Population health measures.* Except as provided in paragraph (d)(3)(i)(A)(1) of this section, each selected population health measure that does not have a benchmark or meet the case minimum requirement is excluded from the MVP participant's total measure achievement points and total available measure achievement points.

(*1*) Subgroups are scored on each selected population health measure that does not have a benchmark or meet the case minimum requirement based on their affiliated group score, if available. If the subgroup's affiliated group score is not available, each such measure is excluded from the subgroup's total measure achievement points and total available measure achievement points.

(*2*) [Reserved]

(B) *Outcomes-based administrative claims measures.* MVP Participants receive zero measure achievement points for each selected outcomes-based administrative claims measure that does not have a benchmark or meet the case minimum requirement.

(ii) *Cost performance category.* The cost performance category score is calculated for an MVP Participant using the methodology at § 414.1380(b)(2)(i) through (v) and the cost measures included in the MVP that they select and report.

(iii) *Improvement activities performance category.* The improvement activities performance category score is calculated based on the submission of high- and medium-weighted improvement activities. MVP Participants will receive 20 points for each medium-weighted improvement activity and 40 points for each high-weighted improvement activity required under § 414.1360 on which data is submitted in accordance with § 414.1325 or for participation in a certified or recognized patient-centered medical home (PCMH) or comparable specialty practice, as described at § 414.1380(b)(3)(ii).

(iv) *Promoting interoperability performance category.* The Promoting Interoperability performance category score is calculated for an MVP Participant using the methodology at § 414.1380(b)(4), except as provided in paragraph (d)(3)(iv)(A) of this section.

(A) If a subgroup does not submit its affiliated group's data for the Promoting Interoperability performance category, the subgroup will receive a score of zero for the Promoting Interoperability performance category.

(B) [Reserved]

(e) *Final score calculation.* The final score is calculated for an MVP Participant using the methodology at § 414.1380(c), unless otherwise indicated in this paragraph (e).

(1) *MVP performance category weights.* For an MVP Participant that is not an APM Entity, the final score is calculated using the performance category weights described at § 414.1380(c)(1). For an MVP Participant that is an APM Entity, the final score is calculated using the performance category weights described at § 414.1317(b).

(2) *Reweighting MVP performance categories*—(i) *General reweighting.* For an MVP Participant that is not an APM Entity, in accordance with paragraph (e)(2)(iii) of this section, a scoring weight different from the weights described at § 414.1380(c)(1) will be assigned to a performance category, and its weight as described at § 414.1380(c)(1) will be redistributed to another performance category or categories, in the circumstances described at § 414.1380(c)(2)(i)(A)(*2*) through (*9*) and § 414.1380(c)(2)(i)(C). For an MVP Participant that is an APM Entity, the performance category weights will be redistributed in accordance with § 414.1317(b).

(ii) *Subgroups.* For an MVP Participant that is a subgroup, any reweighting applied to its affiliated group will also be applied to the subgroup. In addition, if reweighting is not applied to the affiliated group, the subgroup may receive reweighting in the following circumstances independent of the affiliated group:

(A) A subgroup may submit an application to CMS demonstrating that it was subject to extreme and uncontrollable circumstances and receive reweighting in accordance with § 414.1380(c)(2)(i)(A)(*6*) and § 414.1380(c)(2)(i)(C)(*2*). In the event that a subgroup submits data for a performance category, the scoring weight described at § 414.1380(c)(1) would be applied and its weight would not be redistributed.

(B) A subgroup will receive reweighting if CMS determines, based on information known to the agency prior to the beginning of the relevant MIPS payment year, that data for the subgroup are inaccurate, unusable or otherwise compromised due to circumstances outside of the control of the subgroup and its agents, in accordance with § 414.1380(c)(2)(i)(A)(*9*) and § 414.1380(c)(2)(i)(C)(*10*).

(iii) *Reweighting scenarios.* For an MVP Participant that is not an APM Entity, a scoring weight different from the weights described at § 414.1380(c)(1) will be assigned to a performance category, and its weight as described at § 414.1380(c)(1) will be redistributed to another performance category or categories, in accordance with § 414.1380(c)(2)(ii). For an MVP Participant that is an APM Entity, the performance category weights will be redistributed in accordance with § 414.1317(b).

(3) *Facility-based scoring.* If an MVP Participant, that is not an APM Entity, is eligible for facility-based scoring, a facility-based score also will be calculated in accordance with § 414.1380(e).

(4) *Complex patient bonus.* A complex patient bonus will be added to the final score for an MVP Participant in accordance with § 414.1380(c)(3).

■ 56. Amend § 414.1375 by—

■ a. Revising paragraphs (b)(2)(ii);

■ b. Revising paragraphs (b)(3) paragraph heading and (b)(3)(ii) introductory text; and

■ c. Adding paragraph (b)(3)(iii).

The revisions and additions read as follows:

§ 414.1375 Promoting Interoperability (PI) performance category.

* * * * *

(b) * * *

(2) * * *

(ii) Beginning with the 2021 MIPS payment year:

(A) Report that the MIPS eligible clinician completed the actions included in the Security Risk Analysis measure during the year in which the performance period occurs;

(B) For each required measure, as applicable, report the numerator (of at least one) and denominator, or yes/no statement, or an exclusion for each measure that includes an option for an exclusion; and

(C) Beginning with the 2024 MIPS payment year, report that the MIPS eligible clinician completed the actions included in the SAFER Guides measure during the year in which the performance period occurs.

(3) *Engaging in activities related to supporting providers with the performance of CEHRT; support for health information exchange and the prevention of information blocking; actions to limit or restrict the compatibility or interoperability of CEHRT.* * * *

* * * * *

(ii) *Support for health information exchange and the prevention of information blocking.* For the 2019, 2020, 2021, 2022, and 2023 MIPS payment years, the MIPS eligible clinician must attest to CMS that he or she—

* * * * *

(iii) *Actions to limit or restrict the compatibility or interoperability of CEHRT.* Beginning with the 2024 MIPS payment year, the MIPS eligible clinician must attest to CMS that he or she—

(A) Did not knowingly and willfully take action (such as to disable functionality) to limit or restrict the compatibility or interoperability of certified EHR technology.

(B) [Reserved]

■ 57. Amend § 414.1380 by—

■ a. Revising paragraphs (b)(1)(i) introductory text, and(b)(1)(i)(A)(*1*);

■ b. Adding paragraphs (b)(1)(i)(A)(*3*) and (b)(1)(i)(C);

■ c. Revising paragraphs (b)(1)(iii) and (b)(1)(iv)(B);

■ d. Revising paragraphs (b)(1)(v)(A) introductory text and (b)(1)(v)(B) introductory text;

■ e. Adding paragraph (b)(1)(v)(B)(*1*)(*iii*);

■ f. Revising paragraphs (b)(1)(vi)(C) introductory text, (b)(1)(vi)(C)(*4*), (b)(1)(vi)(E), (b)(1)(vii) introductory text, (b)(1)(vii)(A), (b)(2)(iii) introductory text and (b)(2)(v) introductory text;

■ g. Adding paragraphs (b)(2)(v)(A) and (B);

■ h. Revising paragraph (b)(4)(ii) introductory text and (b)(4)(ii)(C);

■ i. Revising the table in paragraph (c) introductory text;

■ j. Revising paragraph (c)(2)(i)(A)(*4*);

■ k. Removing and reserving paragraph (c)(2)(i)(A)(*5*);

■ l. Revising paragraphs (c)(2)(i)(C)(*9*), (c)(2)(ii)(A) and (c)(2)(ii)(F);

■ m. Adding paragraph (c)(2)(ii)(G);

■ n. Revising paragraph (c)(3);

■ o. Revising paragraph (e)(6)(iv) through (vi).

The revisions and additions read as follows:

§ 414.1380 Scoring.

* * * * *

(b) * * *

(1) * * *

(i) *Measure achievement points.* For the CY 2017 through 2021 performance periods/2019 through 2023 MIPS payment years, MIPS eligible clinicians receive between 3 and 10 measure achievement points (including partial points) for each measure required under § 414.1335 on which data is submitted in accordance with § 414.1325 that has a benchmark at paragraph (b)(1)(ii) of this section, meets the case minimum requirement at paragraph (b)(1)(iii) of this section, and meets the data completeness requirement at § 414.1340 and for each administrative claims-based measure that has a benchmark at paragraph (b)(1)(ii) of this section and meets the case minimum requirement at paragraph (b)(1)(iii) of this section. Except as provided under paragraph (b)(1)(i)(C) of this section, beginning with the CY 2022 performance period/2024 MIPS payment year, MIPS eligible clinicians receive between 1 and 10 measure achievement points (including partial points) for each such measure. The number of measure achievement points received for each such measure is determined based on the applicable benchmark decile category and the percentile distribution. MIPS eligible

clinicians receive zero measure achievement points for each measure required under § 414.1335 on which no data is submitted in accordance with § 414.1325. MIPS eligible clinicians that submit data in accordance with § 414.1325 on a greater number of measures than required under § 414.1335 are scored only on the required measures with the greatest number of measure achievement points. Beginning with the CY 2019 performance period/2021 MIPS payment year, MIPS eligible clinicians that submit data in accordance with § 414.1325 on a single measure via multiple collection types are scored only on the data submission with the greatest number of measure achievement points.

(A) * * *

(*1*) Except as provided in paragraphs (b)(1)(i)(A)(2) and (3) of this section, for the CY 2017 through 2021 MIPS performance periods/2019 through 2023 MIPS payment years, MIPS eligible clinicians receive 3 measure achievement points for each submitted measure that meets the data completeness requirement, but does not have a benchmark or meet the case minimum requirement. Beginning with the CY 2022 performance period/2024 MIPS payment year, MIPS eligible clinicians other than small practices receive 0 measure achievement points for each such measure, and small practices receive 3 measure achievement points for each such measure.

* * * * *

(*3*) Beginning with the CY 2022 performance period/2024 MIPS payment year, MIPS eligible clinicians receive 5 measure achievement points for each submitted new measure that meets the data completeness requirement, but does not have a benchmark or meet the case minimum requirement.

* * * * *

(C) *New measures.* (1) Beginning with the CY 2022 performance period/2024 MIPS payment year, MIPS eligible clinicians receive between 5 and 10 measure achievement points (including partial points) for each measure required under § 414.1335 on which data is submitted in accordance with § 414.1325 that has a benchmark at paragraph (b)(1)(ii) of this section, meets the case minimum requirement at paragraph (b)(1)(iii) of this section, and meets the data completeness requirement at § 414.1340.

(2) For purposes of this section, ''new measure'' means a quality measure that is in its first 2 years in the program.

* * * * *

(iii) *Minimum case requirements.* Except as otherwise specified in the MIPS final list of quality measures described in § 414.1330(a)(1), the minimum case requirement is 20 cases.

(iv) * * *

(B) Except as provided in paragraph (b)(1)(iv)(B)(1) of this section, beginning with the 2021 MIPS payment year, each measure (except for measures in the CMS Web Interface) for which the benchmark for the applicable collection type is identified as topped out for 2 or more consecutive years receives no more than 7 measure achievement points in the second consecutive year it is identified as topped out, and beyond.

(*1*) For the CY 2022 MIPS performance period/2024 MIPS payment year, MIPS eligible clinicians receive no more than 7 measure achievement points for each measure (except for measures in the CMS Web Interface) for which the applicable benchmark is identified as topped out for 2 or more consecutive years based on the historical benchmarks published for the CY 2021 MIPS performance period and continues to be identified as topped out based on the performance period benchmarks published for the CY 2022 MIPS performance period.

(2) [Reserved]

* * * * *

(v) * * *

(A) *High priority measures.* Subject to paragraph (b)(1)(v)(A)(*1*) of this section, for the CY 2017 through 2021 MIPS performance periods/2019 through 2023 MIPS payment years, MIPS eligible clinicians receive 2 measure bonus points for each outcome and patient experience measure and 1 measure bonus point for each other high priority measure. Beginning with the 2021 MIPS payment year, MIPS eligible clinicians do not receive such measure bonus points for CMS Web Interface measures.

* * * * *

(B) *End-to-end electronic reporting.* Subject to paragraph (b)(1)(v)(B)(*1*) of this section, for the CY 2017 through 2021 MIPS performance periods/2019 through 2023 MIPS payment years, MIPS eligible clinicians receive 1 measure bonus point for each measure (except claims-based measures) submitted with end-to-end electronic reporting for a quality measure under certain criteria determined by the Secretary.

(*1*) * * *

(*iii*) Beginning in the 2024 MIPS payment year, MIPS eligible clinicians will no longer receive measure bonus for submitting using end-to-end electronic reporting.

* * * * *

(vi) * * *

(C) The improvement percent score is assessed at the performance category level for the quality performance category and included in the calculation of the quality performance category score as described in paragraph (b)(1)(vii) of this section.

* * * * *

(*4*) Beginning with the CY 2018 performance period/2020 MIPS payment year, we will assume a quality performance category achievement percent score of 30 percent if a MIPS eligible clinician earned a quality performance category score less than or equal to 30 percent in the previous year.

* * * * *

(E) For the purpose of improvement scoring methodology, the term ''improvement percent score'' means the score that represents improvement for the purposes of calculating the quality performance category score as described in paragraph (b)(1)(vii) of this section.

* * * * *

(vii) *Quality performance category score.* A MIPS eligible clinician's quality performance category score is the sum of all the measure achievement points assigned for the measures required for the quality performance category criteria plus the measure bonus points in paragraph (b)(1)(v) of this section. The sum is divided by the sum of total available measure achievement points. The improvement percent score in paragraph (b)(1)(vi) of this section is added to that result. The quality performance category score cannot exceed 100 percentage points.

(A) For each measure that is submitted, if applicable, and impacted by significant changes or errors prior to the applicable data submission deadline at § 414.1325(e), performance is based on data for 9 consecutive months of the applicable CY performance period. If such data are not available or CMS determines that they may result in patient harm or misleading results, the measure is excluded from a MIPS eligible clinician's total measure achievement points and total available measure achievement points. For purposes of this paragraph (b)(1)(vii)(A), ''significant changes or errors'' means changes to or errors in a measure that are outside the control of the clinician and its agents and that CMS determines may result in patient harm or misleading results. Significant changes or errors include, but are not limited to, changes to codes (such as ICD–10, CPT,

or HCPCS codes) or the active status of codes, the inadvertent omission of codes or inclusion of inactive or inaccurate codes, or changes to clinical guidelines or measure specifications. CMS will publish on the CMS website a list of all measures scored under this paragraph (b)(1)(vii)(A) as soon as technically feasible, but by no later than the data submission deadline at § 414.1325(e)(1).

* * * * *

(2) * * *

(iii) The cost performance category score is the sum of the following, not to exceed 100 percent:

* * * * *

(v) A cost performance category score is not calculated if a MIPS eligible clinician or group is not attributed any cost measures for the performance period because the clinician or group has not met the minimum case volume specified by CMS for any of the cost measures or a benchmark has not been created for any of the cost measures that would otherwise be attributed to the clinician or group.

(A) Beginning with the 2024 MIPS payment year, if data used to calculate a score for a cost measure are impacted by significant changes during the performance period, such that calculating the cost measure score would lead to misleading or inaccurate results, then the affected cost measure is excluded from the MIPS eligible clinician's or group's cost performance category score. For purposes of this paragraph (b)(2)(v)(A), ''significant changes'' are changes external to the care provided, and that CMS determines may lead to misleading or inaccurate results. Significant changes include, but are not limited to, rapid or unprecedented changes to service utilization, and will be empirically assessed by CMS to determine the extent to which the changes impact the calculation of a cost measure score that reflects clinician performance.

(B) [Reserved]

* * * * *

(4) * * *

(ii) Beginning with the 2019 performance period/2021 MIPS payment year, a MIPS eligible clinician's Promoting Interoperability performance category score equals the sum of the scores for each of the required measures and any applicable bonus scores, not to exceed 100 points.

* * * * *

(C) Each optional measure is worth five or ten bonus points, as specified by CMS.

* * * * *

(c) * * *

Table 1 to paragraph (c) introductory text

For the 2019 MIPS payment year:
Final score = [(quality performance category score × quality performance category weight) + (cost performance category score × cost performance category weight) + (improvement activities performance category score × improvement activities performance category weight) + (Promoting Interoperability performance category score × Promoting Interoperability performance category weight)], not to exceed 100 points.
For the 2020 MIPS payment year:
Final score = [(quality performance category score × quality performance category weight) + (cost performance category score × cost performance category weight) + (improvement activities performance category score × improvement activities performance category weight) + (Promoting Interoperability performance category score × Promoting Interoperability performance category weight)] × 100 + [the complex patient bonus + the small practice bonus], not to exceed 100 points.
Beginning with the 2021 MIPS payment year:
Final score = [(quality performance category score × quality performance category weight) + (cost performance category score × cost performance category weight) + (improvement activities performance category score × improvement activities performance category weight) + (Promoting Interoperability performance category score × Promoting Interoperability performance category weight)] × 100 + the complex patient bonus, not to exceed 100 points.

* * * * *

(2) * * *

(i) * * *

(A) * * *

(*4*) *For the Promoting Interoperability performance category:* (i) For the 2021 through 2024 MIPS payment years, the MIPS eligible clinician is a physical therapist, occupational therapist, clinical psychologist, qualified audiologist, qualified speech-language pathologist, or a registered dietitian or nutrition professional. In the event that a MIPS eligible clinician submits data for the Promoting Interoperability performance category, the scoring weight specified in paragraph (c)(1) of this section will be applied and its weight will not be redistributed.

(*ii*) For the 2019 through 2024 MIPS payment years, the MIPS eligible clinician is a nurse practitioner, physician assistant, clinical nurse specialist, or certified registered nurse anesthetist. In the event that a MIPS eligible clinician submits data for the Promoting Interoperability performance category, the scoring weight specified in paragraph (c)(1) of this section will be applied and its weight will not be redistributed.

(*iii*) For the 2024 MIPS payment year, the MIPS eligible clinician is a clinical social worker. In the event that a MIPS eligible clinician submits data for the Promoting Interoperability performance

category, the scoring weight specified in paragraph (c)(1) of this section will be applied and its weight will not be redistributed.

* * * * *

(C) * * *

(9) For the 2020 MIPS payment year through the 2023 MIPS payment year the MIPS eligible clinician demonstrates through an application submitted to CMS that they are in a small practice as defined in § 414.1305, and overwhelming barriers prevent them from complying with the requirements for the Promoting Interoperability performance category. Beginning with the 2024 MIPS payment year the MIPS eligible clinician is in a small practice as defined in § 414.1305.

* * * * *

(ii) * * *

(A) For the 2019 MIPS payment year:

BILLING CODE 4120–01–C

Table 2 to paragraph (c)(2)(ii)(A)

Performance category (%)	Weighting for the 2019 MIPS payment year (%)	Reweight scenario if no promoting interoperability performance category score (%)	Reweight scenario if no quality performance category score (%)	Reweight scenario if no improvement activities performance category score (%)
Quality	60	85	0	75
Cost	0	0	0	0
Improvement Activities	15	15	50	0
Promoting Interoperability	25	0	50	25

* * * * *

(F) Except as provided in paragraph (c)(2)(ii)(G) of this section, beginning with the 2024 MIPS payment year:

Table 7 to paragraph (c)(2)(ii)(F)

Reweighting scenario	Quality (%)	Cost (%)	Improvement activities (%)	Promoting Interoperability (%)
No Reweighting Needed:				
Scores for all four performance categories	30	30	15	25
No Cost	55	0	15	30
No Promoting Interoperability	55	30	15	0
No Quality	0	30	15	55
No Improvement Activities	45	30	0	25
No Cost and no Promoting Interoperability	85	0	15	0
No Cost and no Quality	0	0	15	85
No Cost and no Improvement Activities	70	0	0	30
No Promoting Interoperability and no Quality	0	50	50	0
No Promoting Interoperability and no Improvement Activities	70	30	0	0
No Quality and no Improvement Activities	0	30	0	70

(G) For small practices beginning with the 2024 MIPS payment year:

Table 8 to paragraph (c)(2)(ii)G)

Reweighting scenario	Quality (%)	Cost (%)	Improvement activities (%)	Promoting Interoperability (%)
No Reweighting Needed:				
Scores for all four performance categories	30	30	15	25
No Cost	55	0	15	30
No Promoting Interoperability	40	30	30	0
No Quality	0	30	15	55
No Improvement Activities	45	30	0	25
No Cost and no Promoting Interoperability	50	0	50	0
No Cost and no Quality	0	0	15	85
No Cost and no Improvement Activities	70	0	0	30
No Promoting Interoperability and no Quality	0	50	50	0
No Promoting Interoperability and no Improvement Activities	70	30	0	0
No Quality and no Improvement Activities	0	30	0	70

BILLING CODE 4120–01–C

* * * * *

(3) *Complex patient bonus.* For the CY 2020, 2021, 2022, and 2023 MIPS payment years and associated performance periods, provided that a MIPS eligible clinician, group, virtual group or APM Entity submits data for at least one MIPS performance category for the applicable performance period for the MIPS payment year, a complex patient bonus will be added to the final score for the MIPS payment year, as stated in paragraphs (c)(3)(i) through (c)(3)(iv) of this section. Beginning with the CY 2022 MIPS performance period/CY 2024 MIPS payment year, provided that a MIPS eligible clinician, group, subgroup, virtual group or APM Entity submits data for at least one MIPS performance category for the applicable performance period for the MIPS payment year, a complex patient bonus will be added to the final score for the MIPS payment year, if applicable, as described in paragraphs (c)(3)(v) through (c)(3)(viii) of this section.

(i) For the CY 2020, 2021, 2022, and 2023 MIPS payment years and associated performance periods, for MIPS eligible clinicians and groups, the complex patient bonus is calculated as follows: [The average HCC risk score assigned to beneficiaries (pursuant to the HCC risk adjustment model established by CMS pursuant to section 1853(a)(1) of the Act) seen by the MIPS eligible clinician or seen by clinicians in a group] + [the dual eligible ratio × 5].

(ii) For the CY 2020, 2021, 2022, and 2023 MIPS payment years and associated performance periods, for APM Entities and virtual groups, the complex patient bonus is calculated as follows: [The beneficiary weighted average HCC risk score for all MIPS eligible clinicians, and if technically feasible, TINs for models and virtual groups which rely on complete TIN participation within the APM Entity or virtual group, respectively] + [the average dual eligible ratio for all MIPS eligible clinicians, and if technically feasible, TINs for models and virtual groups which rely on complete TIN participation, within the APM Entity or virtual group, respectively, × 5].

(iii) For the 2020, 2021, 2022, and 2023 MIPS payment years and associated performance periods, the complex patient bonus cannot exceed 5.0 except as provided in paragraph (c)(3)(iv) of this section.

(iv) For the 2022 and 2023 MIPS payment years and associated performance periods, the complex patient bonus is calculated pursuant to paragraphs (c)(3)(i) and (ii) of this section, and the resulting numerical value is then multiplied by 2.0. The complex patient bonus cannot exceed 10.0.

(v) Beginning with the CY 2022 MIPS performance period/CY2024 MIPS payment year, the complex patient bonus is limited to MIPS eligible clinicians, groups, subgroups, APM Entities, and virtual groups with a risk indicator at or above the risk indicator calculated median.

(vi) Beginning with the CY2022 MIPS performance period/CY2024 MIPS payment year, for MIPS eligible clinicians, groups, and subgroups, the complex patient bonus components are calculated as follows for the specific risk indicators: Medical complex patient bonus component = 1.5+4* associated HCC standardized score calculated with the average HCC risk score assigned to beneficiaries (pursuant to the HCC risk adjustment model established by CMS pursuant to section 1853(a)(1) of the Act) seen by the MIPS eligible clinician or seen by clinicians in a group or subgroup; social complex patient bonus component = 1.5+4* associated dual proportion standardized score. The components are added together to calculate one overall complex patient bonus. A standardized score for each risk indicator is determined based on the mean and standard deviation of the raw risk indicator score and provides a standardized measurement of how far each risk score is from the mean: (raw risk indicator score − risk indicator mean)/risk indicator standard deviation.

(vii) Beginning with the CY2022 MIPS performance period/CY2024 MIPS payment year, for APM Entities and

virtual groups, the complex patient bonus components are calculated as follows for the specific risk indicators: Medical complex patient bonus component = 1.5+4* the beneficiary weighted average HCC risk standardized score for all MIPS eligible clinicians, and if technically feasible, TINs for models and virtual groups which rely on complete TIN participation within the APM Entity or virtual group, respectively; social complex patient bonus component = 1.5+4* the average dual proportion standardized score for all MIPS eligible clinicians, and if technically feasible, TINs for models and virtual groups which rely on complete TIN participation, within the APM Entity or virtual group, respectively. The components are added together to calculate one overall complex patient bonus. A standardized score for each risk indicator is determined based on the mean and standard deviation of the raw risk indicator score and provides a standardized measurement of how far each risk score is from the mean: (raw risk indicator score − risk indicator mean)/risk indicator standard deviation.

(viii) Beginning with the CY2022 MIPS performance period/CY2024 MIPS payment year, the complex patient bonus cannot exceed 10.0 and cannot be below 0.0.

* * * * *

(e) * * *

(6) * * *

(iv) *Quality.* The quality performance category score is established by determining the percentile performance of the facility in the value-based purchasing program for the specified year as described in paragraph (e)(1) of this section and awarding a score associated with that same percentile performance in the MIPS quality performance category score for those MIPS-eligible clinicians who are not eligible to be scored using facility-based measurement for the MIPS payment year. A clinician or group receiving a facility-based performance score will not earn improvement points based on prior performance in the MIPS quality performance category

(v) *Cost.* The cost performance category score is established by determining the percentile performance of the facility in the value-based purchasing program for the specified year as described in paragraph (e)(1) of this section and awarding a score associated with that same percentile performance in the MIPS cost performance category score for those MIPS eligible clinicians who are not eligible to be scored using facility-based measurement for the MIPS payment year. A clinician or group receiving a facility-based performance score will not earn improvement points based on prior performance in the MIPS cost performance category.

(A) *Other cost measures.* MIPS eligible clinicians who are scored under facility-based measurement are not scored on cost measures described in paragraph (b)(2) of this section.

(B) [Reserved]

(vi) *Use of score from facility-based measurement.* The MIPS quality and cost performance category scores will be based on the facility-based measurement scoring methodology described in paragraph (e)(6) of this section unless:

(A) For the CY 2019 MIPS performance period/2021 MIPS payment year, through the CY 2021 MIPS performance period/2023 MIPS payment year, a clinician or group receives a higher combined MIPS quality and cost performance category score through another MIPS submission.

(B) Beginning with the CY 2022 MIPS performance period/2024 MIPS payment year, a clinician or group receives a higher MIPS final score through another MIPS submission.

■ 58. Amend § 414.1395 by revising paragraph (c) to read as follows:

§ 414.1395 Public reporting.

* * * * *

(c) *New measures and activities.* (1) CMS does not publicly report any data on new quality or cost measure for the first 2 years in which it is in the program, after which CMS evaluates the measure to determine whether it is suitable for public reporting under paragraph (b) of this section.

(2) CMS does not publicly report any MVP data on new improvement activity or Promoting Interoperability measure, objective, or activity included in an MVP for the first year in which it is included in the MVP.

* * * * *

■ 59. Revise § 414.1400 to read as follows:

§ 414.1400 Third party intermediaries.

(a) *General.* (1) MIPS data may be submitted on behalf of a MIPS eligible clinician, group, virtual group, subgroup, or APM Entity by any of the following third party intermediaries:

(i) QCDR;

(ii) Qualified registry;

(iii) Health IT vendor; or

(iv) CMS-approved survey vendor.

(2) Third party intermediary approval criteria—

(i) To be approved as a third party intermediary, an entity must agree to meet the applicable requirements of this section, including, but not limited to, the following:

(A) A third party intermediary's principle place of business and retention of any data must be based in the U.S.

(B) If the data is derived from CEHRT, a QCDR, qualified registry, or health IT vendor must be able to indicate its data source.

(C) All data must be submitted in the form and manner specified by CMS.

(D) If the clinician chooses to opt-in in accordance with § 414.1310, the third party intermediary must be able to transmit that decision to CMS.

(E) The third party intermediary must provide services throughout the entire performance period and applicable data submission period.

(F) Prior to discontinuing services to any MIPS eligible clinician, group, virtual group, subgroup, or APM Entity during a performance period, the third party intermediary must support the transition of such MIPS eligible clinician, group, virtual group, subgroup, or APM Entity to an alternate third party intermediary, submitter type, or, for any measure on which data has been collected, collection type according to a CMS approved a transition plan.

(ii) The determination of whether to approve an entity as a third party intermediary for a MIPS payment year may take into account:

(A) Whether the entity failed to comply with the requirements of this section for any prior MIPS payment year for which it was approved as third party intermediary; and

(B) Whether the entity provided inaccurate information regarding the requirements of this subpart to any eligible clinician.

(iii) Beginning with the 2023 MIPS payment year, third party intermediaries must attend and complete training and support sessions in the form and manner, and at the times, specified by CMS.

(3) All data submitted to CMS by a third party intermediary on behalf of a MIPS eligible clinician, group, virtual group, subgroup, or APM Entity must be certified by the third party intermediary as true, accurate, and complete to the best of its knowledge. Such certification must be made in a form and manner and at such time as specified by CMS.

(b) *Additional requirements for QCDRs and qualified registries*—(1) *General.* (i) Beginning with the CY 2021 MIPS performance period/2023 MIPS payment year, QCDRs and qualified registries must be able to submit data for all of the following MIPS performance categories:

(A) Quality, except:

(*1*) The CAHPS for MIPS survey; and

(*2*) For qualified registries, QCDR measures;

(B) Improvement activities; and

(C) Promoting Interoperability, if the eligible clinician, group, virtual group, or subgroup is using CEHRT, unless:

(*1*) The third party intermediary's MIPS eligible clinicians, groups, virtual groups, or subgroups fall under the reweighting policies at § 414.1380(c)(2)(i)(A)(*4*)(*i*) through (*iii*) or (c)(2)(i)(C)(*1*) through (*7*) or (c)(2)(i)(C)(*9*).

(*2*) [Reserved]

(ii) Beginning with the 2023 MIPS performance period/2025 MIPS payment year, QCDRs and qualified registries must support MVPs that are applicable to the MVP participant on whose behalf they submit MIPS data. QCDRs and qualified registries may also support the APP.

(2) *Self-nomination.* For the 2018 and 2019 MIPS performance periods/2020 and 2021 MIPS payment years, entities seeking to qualify as a QCDR or qualified registry must self-nominate September 1 until November 1 of the CY preceding the applicable performance period. For the 2020 MIPS performance period/2022 MIPS payment year and future years, entities seeking to qualify as a QCDR or qualified registry must self-nominate during a 60-day period during the CY preceding the applicable performance period (beginning no earlier than July 1 and ending no later than September 1). Entities seeking to qualify as a QCDR or qualified registry for a performance period must provide all information required by CMS at the time of self-nomination and must provide any additional information requested by CMS during the review process. For the 2019 MIPS performance period/2021 MIPS payment year and future years, existing QCDRs and qualified registries that are in good standing may attest that certain aspects of their previous year's approved self-nomination have not changed and will be used for the applicable performance period.

(3) *Conditions for approval.* (i) Beginning with the 2020 MIPS performance period/2022 MIPS payment year, the QCDR or qualified registry must have at least 25 participants by January 1 of the year prior to the applicable performance period.

(ii) If an entity seeking to qualify as a QCDR or qualified registry uses an external organization for purposes of data collection, calculation, or transmission, it must have a signed, written agreement with the external organization that specifically details the responsibilities of the entity and the external organization. The written agreement must be effective as of September 1 of the year preceding the applicable performance period.

(iii) Beginning with the 2021 MIPS performance period/2023 MIPS payment year, the QCDR or qualified registry must provide performance feedback to their clinicians and groups at least 4 times a year, and provide specific feedback to their clinicians and groups on how they compare to other clinicians who have submitted data on a given measure within the QCDR or qualified registry. Exceptions to this requirement may occur if the QCDR or qualified registry submits notification to CMS within the performance period promptly within the month of realization of the impending deficiency and provides sufficient rationale as to why they do not believe they would be able to meet this requirement (for example, if the QCDR does not receive the data from their clinician until the end of the performance period).

(iv) Beginning with the 2023 MIPS performance period/2025 MIPS payment year, the QCDR or qualified registry must submit a data validation plan annually, at the time of self-nomination for CMS's approval and may not change the plan once approved without the prior approval of the agency.

(v) Beginning with the 2021 MIPS performance period/2023 MIPS payment year, the QCDR or qualified registry must conduct annual data validation audits in accordance with this paragraph (b)(3)(v) of this section.

(A) The QCDR or qualified registry must conduct data validation for the payment year prior to submitting any data for that payment year to CMS for purposes of the MIPS program.

(B) The QCDR or qualified registry must conduct data validation on data for each performance category for which it will submit data, including if applicable the Quality, Improvement Activities, and Promoting Interoperability performance categories.

(C) The QCDR or qualified registry must conduct data validation on data for each submitter type for which it will submit data, including MIPS eligible clinicians, groups, virtual groups, subgroups, APM entities, voluntary participants, and opt-in participants, if applicable.

(D) The QCDR or qualified registry must use clinical documentation (provided by the clinicians they are submitting data for) to validate that the action or outcome measured actually occurred or was performed.

(E) The QCDR or qualified registry must conduct each data validation audit using a sampling methodology that meets the following requirements:

(*1*) Uses a sample size of at least 3 percent of the TIN/NPIs for which the QCDR or qualified registry will submit data to CMS, except that if a 3 percent sample size would result in fewer than 10 TIN/NPIs, the QCDR or qualified registry must use a sample size of at least 10 TIN/NPIs, and if a 3 percent sample size would result in more than 50 TIN/NPIs, the QCDR or qualified registry may use a sample size of 50 TIN/NPIs.

(*2*) Uses a sample that includes at least 25 percent of the patients of each TIN/NPI in the sample, except that the sample for each TIN/NPI must include a minimum of 5 patients and does not need to include more than 50 patients.

(F) Each QCDR or qualified registry data validation audit must include the following:

(*1*) Verification of the eligibility status of each eligible clinician, group, virtual group, subgroup, opt-in participant, and voluntary participant.

(*2*) Verification of the accuracy of TINs and NPIs.

(*3*) Calculation of reporting and performance rates.

(*4*) Verification that only the MIPS quality measures and QCDR measures, as applicable, that are relevant to the performance period will be used for MIPS submission.

(G) In a form and manner and by a deadline specified by CMS, the QCDR or qualified registry must report the results of each data validation audit, including the overall data deficiencies or data error rate, the types of deficiencies or data errors discovered, the percentage of clinicians impacted by any deficiency or error, and, how and when each deficiency or data error type was corrected.

(*1*) QCDRs and qualified registries must conduct validation on the data they intend to submit for the MIPS performance period and provide the results of the executed data validation plan by May 31st of the year following the performance period.

(*2*) [Reserved]

(vi) Beginning with the 2021 MIPS performance period/2023 MIPS payment year, the QCDR or qualified registry must conduct targeted audits in accordance with this paragraph (b)(3)(vi).

(A) If a data validation audit under paragraph (b)(3)(v) of this section identifies one or more deficiency or data error, the QCDR or qualified registry must conduct a targeted audit into the impact and root cause of each such

deficiency or data error for that MIPS payment year.

(B) The QCDR or qualified registry must conduct any required targeted audits for the MIPS payment year and correct any deficiencies or data errors identified through such audit prior to the submission of data for that MIPS payment year.

(C) The QCDR or qualified registry must conduct the targeted audit using the sampling methodology that meets the requirements described in paragraph (b)(3)(iv)(E) of this section. The sample for the targeted audit must not include data from the sample used for the data validation audit in which the deficiency or data error was identified.

(D) In a form and manner and by a deadline specified by CMS, the QCDR or qualified registry must report the results of each targeted audit, including the overall deficiency or data error rate, the types of deficiencies or data errors discovered, the percentage of clinicians impacted by each deficiency or data error, and how and when each deficiency or data error type was corrected.

(vii) For the 2023 MIPS performance period/2025 MIPS payment year, a QCDR or qualified registry that was approved but did not submit any MIPS data for any of the 2019 through 2023 MIPS payment years must submit a participation plan for CMS's approval. The participation plan must include the QCDR and/or qualified registry's detailed plans about how the QCDR or qualified registry intends to encourage clinicians to submit MIPS data to CMS through the QCDR or qualified registry.

(viii) Beginning with the 2024 MIPS performance period/2026 MIPS payment year, a QCDR or qualified registry that was approved but did not submit any MIPS data for either of the 2 years preceding the applicable self-nomination period must submit a participation plan for CMS's approval. This participation plan must include the QCDR's and/or qualified registry's detailed plans about how the QCDR or qualified registry intends to encourage clinicians to submit MIPS data to CMS through the QCDR or qualified registry.

(4) *QCDR measures for the quality performance category*—(i) *QCDR measure self-nomination requirements.* For the 2018 MIPS performance period/2020 MIPS payment year and future years, at the time of self-nomination an entity seeking to become a QCDR must submit the following information for any measure it intends to submit for the payment year.

(A) For MIPS quality measures, the entity must submit specifications including the MIPS measure IDs and specialty-specific measure sets, as applicable.

(B) For QCDR measures, the entity must submit for CMS-approval measure specifications including: Name/title of measures, NQF number (if NQF-endorsed), descriptions of the denominator, numerator, and when applicable, denominator exceptions, denominator exclusions, risk adjustment variables, and risk adjustment algorithms. In addition, no later than 15 calendar days following CMS approval of any QCDR measure specifications, the entity must publicly post the measure specifications for that QCDR measure (including the CMS-assigned QCDR measure ID) and provide CMS with a link to where this information is posted.

(ii) *QCDR measure submission requirements.* A QCDR must include the CMS-assigned QCDR measure ID when submitting data on any QCDR measure to CMS.

(iii) *QCDR measure approval criteria.* (A) QCDR measure requirements for approval are:

(*1*) QCDR measures that are beyond the measure concept phase of development.

(*2*) QCDR measures that address significant variation in performance.

(*3*) Beginning with the 2022 MIPS performance period/2024 MIPS payment year, all QCDR measures must meet face validity. To be approved for the 2023 MIPS performance period/2025 MIPS payment year, all QCDR measures must meet face validity for the initial MIPS payment year for which it is approved. For subsequent years, all QCDR measures must be fully developed and tested, with complete testing results at the clinician level, prior to submitting the QCDR measure at the time of self-nomination.

(*i*) To be included in an MVP for the 2022 MIPS performance period/2024 MIPS payment year and future years, a QCDR measure must be fully tested.

(*ii*) [Reserved]

(*4*) Beginning with the 2022 MIPS performance period/2023 MIPS payment year, QCDRs are required to collect data on a QCDR measure, appropriate to the measure type, prior to submitting the QCDR measure for CMS consideration during the self-nomination period.

(*5*) Beginning with the 2020 MIPS performance period/2022 MIPS payment year, CMS may provisionally approve the individual QCDR measures for 1 year with the condition that QCDRs address certain areas of duplication with other approved QCDR measures or MIPS quality measures in order to be considered for the program in subsequent years. If such areas of duplication are not addressed, CMS may reject the duplicative QCDR measure.

(B) QCDR measure considerations for approval include, but are not limited to:

(*1*) Measures that are outcome-based rather than clinical process measures.

(*2*) Measures that address patient safety and adverse events.

(*3*) Measures that identify appropriate use of diagnosis and therapeutics.

(*4*) Measures that address the domain of care coordination.

(*5*) Measures that address the domain for patient and caregiver experience.

(*6*) Measures that address efficiency, cost, and resource use.

(*7*) Beginning with the 2021 performance period—

(*i*) That QCDRs link their QCDR measures as feasible to at least one cost measure, improvement activity, or an MVP at the time of self-nomination.

(*ii*) In cases where a QCDR measure does not have a clear link to a cost measure, improvement activity, or an MVP, we would consider exceptions if the potential QCDR measure otherwise meets the QCDR measure requirements and considerations.

(*8*) Beginning with the 2020 MIPS performance period/2022 MIPS payment year CMS may consider the extent to which a QCDR measure is available to MIPS eligible clinicians reporting through QCDRs other than the QCDR measure owner for purposes of MIPS. If CMS determines that a QCDR measure is not available to MIPS eligible clinicians, groups, and virtual groups reporting through other QCDRs, CMS may not approve the measure.

(*9*) Greater consideration is given to measures for which QCDRs:

(i) Conducted an environmental scan of existing QCDR measures; MIPS quality measures; quality measures retired from the legacy Physician Quality Reporting System (PQRS) program; and

(*ii*) Utilized the CMS Quality Measure Development Plan Annual Report and the Blueprint in the CMS Measures Management System to identify measurement gaps prior to measure development.

(*10*) Beginning with the 2020 MIPS performance period/2022 MIPS payment year, we place greater preference on QCDR measures that meet case minimum and reporting volumes required for benchmarking after being in the program for 2 consecutive CY performance periods. Those that do not, may not continue to be approved.

(*i*) Beginning with the 2020 MIPS performance period/2022 MIPS payment year, in instances where a QCDR believes the low-reported QCDR

measure that did not meet benchmarking thresholds is still important and relevant to a specialist's practice, that the QCDR may develop and submit a QCDR measure participation plan for our consideration. This QCDR measure participation plan must include the QCDR's detailed plans and changes to encourage eligible clinicians and groups to submit data on the low-reported QCDR measure for purposes of the MIPS program.

(*ii*) [Reserved]

(C) Beginning with the 2021 MIPS performance period/2023 MIPS payment year, QCDR measures may be approved for 2 years, at CMS discretion by attaining approval status by meeting QCDR measure considerations and requirements. Upon annual review, CMS may revoke a QCDR measure's second year approval, if the QCDR measure is found to be: Topped out; duplicative of a more robust measure; reflects an outdated clinical guideline; or if the QCDR self-nominating the QCDR measure is no longer in good standing.

(iv) *QCDR measure rejection criteria.* Beginning with the 2020 MIPS performance period/2022 MIPS payment year, QCDR measure rejection considerations include, but are not limited to:

(A) QCDR measures that are duplicative or identical to other QCDR measures or MIPS quality measures that are currently in the program.

(B) QCDR measures that are duplicative or identical to MIPS quality measures that have been removed from MIPS through rulemaking.

(C) QCDR measures that are duplicative or identical to quality measures used under the legacy Physician Quality Reporting System (PQRS) program, which have been retired.

(D) QCDR measures that meet the topped out definition as described at § 414.1305.

(E) QCDR measures that are process-based, with consideration to whether the removal of the process measure impacts the number of measures available for a specific specialty.

(F) Whether the QCDR measure has potential unintended consequences to a patient's care.

(G) Considerations and evaluation of the measure's performance data, to determine whether performance variance exists.

(H) QCDR measures that split a single clinical practice or action into several QCDR measures.

(I) QCDR measures that are ''check-box'' with no actionable quality action.

(J) QCDR measures that do not meet the case minimum and reporting volumes required for benchmarking after being in the program for 2 consecutive years.

(K) QCDR measures with clinician attribution issues, where the quality action is not under the direct control of the reporting clinician.

(L) QCDR measures that focus on rare events or ''never events'' in the measurement period.

(M) QCDR does not have permission to use a QCDR measure owned by another QCDR for the applicable performance period.

(N) If a QCDR measure owner is not approved or is not in good standing, any associated QCDR measures will not be approved.

(c) *Additional requirements for Health IT vendors.* (1) Beginning with the CY 2021 MIPS performance period/2023 MIPS payment year, health IT vendors must be able to submit data for the MIPS performance categories as follows:

(i) Health IT vendors that support MVPs must be able to submit data for all of the MIPS performance categories:

(A) Quality, except:

(*1*) The CAHPS for MIPS survey; and

(*2*) QCDR measures;

(B) Improvement activities; and

(C) Promoting Interoperability, if the eligible clinician, group, virtual group, or subgroup is using CEHRT, unless:

(*1*) The third party intermediary's MIPS eligible clinicians, groups, virtual groups, or subgroups fall under the reweighting policies at § 414.1380(c)(2)(i)(A)(*4*)(*i*) through (*iii*) or (c)(2)(i)(C)(*1*) through (*7*) or (c)(2)(i)(C)(*9*).

(*2*) [Reserved]

(ii) Health IT vendors that do not support MVPs must be able to submit data for at least one of the MIPS performance categories described in paragraphs (c)(1)(i) of this section.

(iii) Beginning with the 2023 MIPS performance period/2025 MIPS payment year, Health IT vendors must support MVPs that are applicable to the MVP participant on whose behalf they submit MIPS data. Health IT vendors may also support the APP.

(2) [Reserved]

(d) *Additional requirements for CMS-approved survey vendors.* (1) CMS-approved survey vendors may submit data on the CAHPS for MIPS survey for the MIPS quality performance category.

(2) Entities seeking to be a CMS-approved survey vendor for any MIPS performance period must submit a survey vendor application to CMS in a form and manner specified by CMS for each MIPS performance period for which it wishes to transmit such data. The application and any supplemental information requested by CMS must be submitted by deadlines specified by CMS. For an entity to be a CMS-approved survey vendor, it must meet the following criteria:

(3) The entity must have sufficient experience, capability, and capacity to accurately report CAHPS data, including:

(i) At least 3 years of experience administering mixed-mode surveys (that is, surveys that employ multiple modes to collect date), including mail survey administration followed by survey administration via Computer Assisted Telephone Interview (CATI);

(ii) At least 3 years of experience administering surveys to a Medicare population;

(iii) At least 3 years of experience administering CAHPS surveys within the past 5 years;

(iv) Experience administering surveys in English and at least one other language for which a translation of the CAHPS for MIPS survey is available;

(v) Use equipment, software, computer programs, systems, and facilities that can verify addresses and phone numbers of sampled beneficiaries, monitor interviewers, collect data via CATI, electronically administer the survey and schedule call-backs to beneficiaries at varying times of the day and week, track fielded surveys, assign final disposition codes to reflect the outcome of data collection of each sampled case, and track cases from mail surveys through telephone follow-up activities; and

(vi) Employment of a program manager, information systems specialist, call center supervisor and mail center supervisor to administer the survey.

(4) The entity has certified that it has the ability to maintain and transmit quality data in a manner that preserves the security and integrity of the data.

(5) The entity has successfully completed, and has required its subcontractors to successfully complete, vendor training(s) administered by CMS or its contractors.

(6) The entity has submitted a quality assurance plan and other materials relevant to survey administration, as determined by CMS, including cover letters, questionnaires and telephone scripts.

(7) The entity has agreed to participate and cooperate, and has required its subcontractors to participate and cooperate, in all oversight activities related to survey administration conducted by CMS or its contractors.

(8) The entity has sent an interim survey data file to CMS that establishes

the entity's ability to accurately report CAHPS data.

(e) *Remedial action and termination of third party intermediaries.* (1) If CMS determines that a third party intermediary has ceased to meet one or more of the applicable criteria for approval, has submitted a false certification under paragraph (a)(3) of this section, or has submitted data that are inaccurate, unusable, or otherwise compromised, CMS may take one or more of the following remedial actions after providing written notice to the third party intermediary:

(i) Require the third party intermediary to submit a corrective action plan (CAP) by a date specified by CMS. The CAP must address the following issues, unless different or additional information is specified by CMS:

(A) The issues that contributed to the non-compliance.

(B) The impact to individual clinicians, groups, or virtual groups, regardless of whether they are participating in the program because they are MIPS eligible, voluntary participating, or opting in to participating in the MIPS program.

(C) The corrective actions to be implemented by the third party intermediary to ensure that the non-compliance has been resolved and will not recur in the future.

(D) The detailed timeline for achieving compliance with the applicable requirements.

(ii) Publicly disclose the entity's data error rate on the CMS website until the data error rate falls below 3 percent.

(2) CMS may immediately or with advance notice terminate the ability of a third party intermediary to submit MIPS data on behalf of a MIPS eligible clinician, group, or virtual group for one or more of the following reasons:

(i) CMS has grounds to impose remedial action;

(ii) CMS has not received a CAP within the specified time-period or the CAP is not accepted by CMS; or

(iii) The third party intermediary fails to correct the deficiencies or data errors by the date specified by CMS.

(3) Contains data inaccuracies affecting the third party intermediary's total clinicians may lead to remedial action/termination of the third party intermediary for future program year(s) based on CMS discretion.

(4) For purposes of paragraph (e) of this section, CMS may determine that submitted data are inaccurate, unusable, or otherwise compromised, including but not limited to, if the submitted data:

(i) Includes, without limitation, TIN/NPI mismatches, formatting issues, calculation errors, or data audit discrepancies.

(ii) [Reserved]

(f) *Auditing of entities submitting MIPS data.* Any third party intermediary must comply with the following procedures as a condition of its qualification and approval to participate in MIPS as a third party intermediary.

(1) The entity must make available to CMS the contact information of each MIPS eligible clinician or group on behalf of whom it submits data. The contact information must include, at a minimum, the MIPS eligible clinician or group's practice phone number, address, and, if available, email.

(2) The entity must retain all data submitted to CMS for purposes of MIPS for 6 years from the end of the MIPS performance period.

(3) For the purposes of auditing, CMS may request any records or data retained for the purposes of MIPS for up to 6 years from the end of the MIPS performance period.

■ 60. Amend § 414.1405 by adding paragraphs (b)(9), (d)(7) and (g) to read as follows:

§ 414.1405 Payment.

* * * * *

(b) * * *

(9) Pursuant to the methodology established at paragraph (g) of this section, the performance threshold for the 2024 MIPS payment year is 75 points. The prior period used to determine the performance threshold is the 2019 MIPS payment year.

* * * * *

(d) * * *

(7) The additional performance threshold for the 2024 MIPS payment year is 89 points.

* * * * *

(g) *Performance threshold methodology.* For each of the 2024, 2025, and 2026 MIPS payment years, the performance threshold is the mean of the final scores for all MIPS eligible clinicians from a prior period as specified under paragraph (b) of this section.

■ 61. Amend § 414.1430 by—

■ a. Revising paragraph (a)(1)(iii); and

■ b. Adding paragraph (a)(1)(iv).

The revision and addition read as follows:

§ 414.1430 Qualifying APM participant determination: QP and partial QP thresholds.

(a) * * *

(1) * * *

(iii) 2023 and 2024: 50 percent

(iv) 2025 and later: 75 percent

* * * * *

■ 62. Amend § 414.1450 by revising paragraph (c) introductory text to read as follows:

§ 414.1450 APM incentive payment.

* * * * *

(c) *APM Incentive Payment recipient.* CMS will pay the APM Incentive Payment amount for a payment year to a solvent TIN or TINs associated with the QP, identified based on Medicare Part B claims submitted for covered professional services during the base period or payment year, according to this section. If no TIN or TINs with which the QP has an association can be identified at a step, CMS will move to the next and successive steps listed in paragraphs (c)(1) through (8) of this section until CMS identifies a TIN or TINs with which the QP is associated, and to which CMS will make the APM Incentive Payment. If more than one TIN is identified at a step, the payment will be proportionately divided among the TINs according to the relative total paid amounts for Part B covered professional services paid to each TIN for services provided during the base year.

* * * * *

PART 415—SERVICES FURNISHED BY PHYSICIANS IN PROVIDERS, SUPERVISING PHYSICIANS IN TEACHING SETTINGS, AND RESIDENTS IN CERTAIN SETTINGS

■ 63. The authority citation for part 415 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh.

■ 64. Section 415.140 is added to subpart D to read as follows:

§ 415.140 Conditions for payment: Split (or shared) visits.

(a) *Definitions.* For purposes of this section, the following definitions apply:

(1) *Split (or shared) visit* means an evaluation and management (E/M) visit in the facility setting that is performed in part by both a physician and a nonphysician practitioner who are in the same group, in accordance with applicable law and regulations such that the service could be could be billed by either the physician or nonphysician practitioner if furnished independently by only one of them.

(2) *Facility setting* for purposes of this section means institutional settings in which payment for services and supplies furnished incident to a physician or practitioner's professional services is prohibited under § 410.26(b)(1).

(3) *Substantive portion* means more than half of the total time spent by the physician and nonphysician

practitioner performing the split (or shared) visit.

(b) *Conditions of payment.* For purposes of this section, the following conditions of payment apply: (1) *Substantive portion of split (or shared) visit.* In general, payment is made to the physician or nonphysician practitioner who performs the substantive portion of the split (or shared) visit.

(2) *Medical record documentation.* Documentation in the medical record must identify the physician and nonphysician practitioner who performed the visit. The individual who performed the substantive portion of the visit (and therefore bills for the visit) must sign and date the medical record.

(3) *Claim modifier.* The designated modifier must be included on the claim to identify that the service was a split (or shared) visit.

PART 423—VOLUNTARY MEDICARE PRESCRIPTION DRUG BENEFIT

■ 65. The authority citation for part 423 continues to read as follows:

Authority: 42 U.S.C. 1302, 1306, 1395w–101 through 1395w–152, and 1395hh.

■ 66. Amend § 423.160 by revising paragraph (a)(5) to read as follows:

§ 423.160 Standards for electronic prescribing.

(a) * * *

(5) Beginning on January 1, 2021, prescribers must, except in the circumstances described in paragraphs (a)(5)(i) through (iv) of this section, conduct prescribing for at least 70 percent of their Schedule II, III, IV, and V controlled substances that are Part D drugs electronically using the applicable standards in paragraph (b) of this section. Compliance actions against prescribers writing prescriptions for beneficiaries in long-term care facilities, and who do not meet the compliance threshold, will commence on or after January 1, 2025. Compliance actions against other prescribers who do not meet the compliance threshold will commence on or after January 1, 2023. Prescribers will be exempt from this requirement in the following situations:

(i) Prescriber and dispensing pharmacy are the same entity.

(ii) Prescriber who issue 100 or fewer controlled substance prescriptions for Part D drugs per calendar year as determined using CMS claims data as of December 31st of the preceding year.

(iii) Prescriber with an NCPDP database address in the geographic area of an emergency or disaster declared by a federal, state or local government entity.

(iv) Prescriber has received a CMS-approved waiver because the prescriber is unable to conduct electronic prescribing of controlled substances (EPCS) due to circumstances beyond the prescriber's control.

* * * * *

PART 424—CONDITIONS FOR MEDICARE PAYMENT

■ 67. The authority for part 424 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh.

■ 68. Amend § 424.205 by—

■ a. Redesignating paragraphs (b)(5) and (6) as paragraphs (b)(6) and (7), respectively; and

■ b. Adding new paragraph (b)(5);

The addition reads as follows:

§ 424.205 Requirements for Medicare Diabetes Prevention Program suppliers.

* * * * *

(b) * * *

(5) The Medicare provider enrollment application fee does not apply to all Medicare Diabetes Prevention Program (MDPP) suppliers that submit an enrollment application on or after January 1, 2022.

* * * * *

■ 69. Amend § 424.502 by revising the definition of ''Institutional provider'' to read as follows:

§ 424.502 Definitions.

* * * * *

Institutional provider means any provider or supplier that submits a paper Medicare enrollment application using the CMS–855A, CMS–855B (not including physician and nonphysician practitioner organizations), CMS–855S, or an associated internet-based PECOS enrollment application.

* * * * *

■ 70. Amend § 424.530 by revising paragraphs (a)(2) introductory text and (a)(11)(i) to read as follows:

§ 424.530 Denial of enrollment in the Medicare program.

(a) * * *

(2) *Provider or supplier conduct.* The provider or supplier, or any owner, managing employee, authorized or delegated official, medical director, supervising physician, or other health care or administrative or management services personnel furnishing services payable by a federal health care program, of the provider or supplier is—

* * * * *

(11) * * * (i) A physician or other eligible professional's Drug Enforcement Administration (DEA) Certificate of Registration to dispense a controlled substance is currently suspended or revoked or is surrendered in response to an order to show cause;

* * * * *

■ 71. Amend § 424.535 by revising paragraphs (a)(2) introductory text, (a)(8)(ii), (a)(13)(i), and (e) to read as follows:

§ 424.535 Revocation of enrollment in the Medicare program.

(a) * * *

(2) *Provider or supplier conduct.* The provider or supplier, or any owner, managing employee, authorized or delegated official, medical director, supervising physician, or other health care or administrative or management services personnel furnishing services payable by a federal health care program, of the provider or supplier is—

* * * * *

(8) * * *

(ii) CMS determines that the provider or supplier has a pattern or practice of submitting claims that fail to meet Medicare requirements. In making this determination, CMS considers, as appropriate or applicable, the following:

(A) The percentage of submitted claims that were denied during the period under consideration.

(B) Whether the provider or supplier has any history of final adverse actions and the nature of any such actions.

(C) The type of billing non-compliance and the specific facts surrounding said non-compliance (to the extent this can be determined).

(D) Any other information regarding the provider or supplier's specific circumstances that CMS deems relevant to its determination.

* * * * *

(13) * * *

(i) A physician or other eligible professional's Drug Enforcement Administration (DEA) Certificate of Registration to dispense a controlled substance is currently suspended or revoked or is surrendered in response to an order to show cause;

* * * * *

(e) *Reversal of revocation.* If the revocation was due to adverse activity (sanction, exclusion, or felony) against the provider's or supplier's owner, managing employee, authorized or delegated official, medical director, supervising physician, or other health care or administrative or management services personnel furnishing services payable by a federal health care program, the revocation may be reversed if the provider or supplier terminates and submits proof that it has terminated its business relationship with that individual within 30 days of the revocation notification.

* * * * *

§ 424.545 [Amended]

■ 72. Amend § 424.545 in paragraph (b) by removing the reference ''§ 405.374'' and adding in its place the reference ''§ 424.546.''

■ 73. Add § 424.546 to read as follows:

§ 424.546 Deactivation rebuttals.

(a) *Rebuttal submittal period.* (1) If a provider or supplier receives written notice from CMS or its contractor that the provider's or supplier's billing privileges are to be or have been deactivated under § 424.540, the provider or supplier has 15 calendar days from the date of the written notice to submit a rebuttal to CMS as permitted under § 424.545(b).

(2) CMS may, at its discretion, extend the 15-day time-period referenced in paragraph (a)(1) of this section.

(b) *Rebuttal requirements.* A rebuttal submitted pursuant to this section and § 424.545(b) must:

(1) Be in writing.

(2) Specify the facts or issues about which the provider or supplier disagrees with the deactivation's imposition and/or the effective date, and the reasons for disagreement.

(3) Submit all documentation the provider or supplier wants CMS to consider in its review of the deactivation.

(4) Be submitted in the form of a letter that is signed and dated by the individual supplier (if enrolled as an individual physician or nonphysician practitioner), the authorized official or delegated official (as those terms are defined in 42 CFR 424.502), or a legal representative (as defined in 42 CFR 498.10). If the legal representative is an attorney, the attorney must include a statement that he or she has the authority to represent the provider or supplier; this statement is sufficient to constitute notice of such authority. If the legal representative is not an attorney, the provider or supplier must file with CMS written notice of the appointment of a representative; this notice of appointment must be signed and dated by, as applicable, the individual supplier, the authorized official or delegated official, or a legal representative.

(c) *Waiver of rebuttal rights.* The provider's or supplier's failure to submit a rebuttal that is both timely under paragraph (a) of this section and fully compliant with all of the requirements of paragraph (b) of this section constitutes a waiver of all rebuttal rights under this section and § 424.545(b).

(d) *CMS review.* Upon receipt of a timely and compliant deactivation rebuttal, CMS reviews the rebuttal to determine whether the imposition of the deactivation and/or the designated effective date are correct.

(e) *Imposition.* Nothing in this section or in § 424.545(b) requires CMS to delay the imposition of a deactivation pending the completion of the review described in paragraph (d) of this section.

(f) *Initial determination.* A determination made under this section is not an initial determination under § 498.3(b) of this chapter and therefore not appealable.

PART 425—MEDICARE SHARED SAVINGS PROGRAM

■ 74. The authority citation for part 425 continues to read as follows:

Authority: 42 U.S.C. 1302, 1306, 1395hh, and 1395jjj.

■ 75. Amend § 425.116 by revising paragraph (c) to read as follows:

§ 425.116 Agreements with ACO participants and ACO providers/suppliers.

* * * * *

(c) *Submission of agreements.* The ACO must submit an executed ACO participant agreement for each ACO participant that it requests to add to its list of ACO participants in accordance with § 425.118. The agreements may be submitted in the form and manner set forth in § 425.204(c)(6) or as otherwise specified by CMS.

■ 76. Amend § 425.204 by—

■ a. Revising paragraphs (b), (c)(6), (f)(4)(ii)(A) and (B), (f)(4)(iii) introductory text, and (f)(4)(iii)(A); and

■ b. Adding paragraph (f)(4)(v).

The revisions and addition read as follows:

§ 425.204 Content of the application.

* * * * *

(b) *Prior participation.* Upon request by CMS during the application cycle, the ACO must submit information regarding prior participation in the Medicare Shared Savings Program by the ACO, its ACO participants, or its ACO providers/suppliers, including such information as may be necessary for CMS to determine whether to approve an ACO's application in accordance with § 425.224(b).

(c) * * *

(6) Upon request by CMS during the application cycle or at any point during an agreement period, the ACO must submit documents demonstrating that its ACO participants, ACO providers/suppliers, and other individuals or entities performing functions or services related to ACO activities are required to comply with the requirements of the Shared Savings Program. Upon such a request, the evidence to be submitted must include, without limitation, sample or form agreements and, in the case of ACO participant agreements, the first and signature page(s) of each executed ACO participant agreement. CMS may request all pages of an executed ACO participant agreement to confirm that it conforms to the sample form agreement submitted by the ACO. The ACO must certify that all of its ACO participant agreements comply with the requirements of this part.

* * * * *

(f) * * *

(4) * * *

(ii) * * *

(A) One-half percent of the total per capita Medicare Parts A and B fee-for-service expenditures for the ACO's assigned beneficiaries, based on expenditures and the number of assigned beneficiaries for the most recent calendar year for which 12 months of data are available.

(B) One percent of the total Medicare Parts A and B fee-for-service revenue of its ACO participants, based on revenue for the most recent calendar year for which 12 months of data are available, and based on the ACO's number of assigned beneficiaries for the most recent calendar year for which 12 months of data are available.

(iii) CMS recalculates the ACO's repayment mechanism amount for the second and each subsequent performance year in the agreement period in accordance with paragraph (f)(4)(ii) of this section based on the certified ACO participant list for the relevant performance year, except that the number of assigned beneficiaries used in the calculations is the number of beneficiaries assigned to the ACO at the beginning of the relevant performance year under § 425.400(a)(2)(i) (for ACOs under preliminary prospective assignment with retrospective reconciliation) or § 425.400(a)(3)(i) (for ACOs under prospective assignment).

(A) If the recalculated repayment mechanism amount exceeds the existing repayment mechanism amount by at least $1,000,000, CMS notifies the ACO in writing that the amount of its repayment mechanism must be increased to the recalculated repayment mechanism amount.

* * * * *

(v)(A) An ACO that established a repayment mechanism to support its participation in a two-sided model beginning on July 1, 2019, January 1, 2020 or January 1, 2021, may elect to decrease the amount of its repayment mechanism if the repayment mechanism amount for performance year 2022, as recalculated pursuant to paragraph

(f)(4)(iii) of this section, is less than the existing repayment mechanism amount.

(B) CMS will notify the ACO in writing if the ACO may elect to decrease the amount of its repayment mechanism pursuant to this paragraph (f)(4)(v). The ACO must submit such election, and revised repayment mechanism documentation, in a form and manner and by a deadline specified by CMS. CMS will review the revised repayment mechanism documentation and may reject the election if the repayment mechanism documentation does not comply with the requirements of paragraph (f) of this section.

* * * * *

■ 77. Amend § 425.312 by—
■ a. Revising paragraph (a)(2)(ii); and
■ b. Adding paragraph (a)(2)(iii).

The revision and addition read as follows:

§ 425.312 Beneficiary notifications.

(a) * * *

(2) * * *

(ii) In the case of an ACO that has selected preliminary prospective assignment with retrospective reconciliation, by the ACO or ACO participant providing each fee-for-service beneficiary with a standardized written notice prior to or at the first primary care visit of the performance year in the form and manner specified by CMS.

(iii) In the case of an ACO that has selected prospective assignment, by the ACO or ACO participant providing each prospectively assigned beneficiary with a standardized written notice prior to or at the first primary care visit of the performance year in the form and manner specified by CMS.

* * * * *

■ 78. Amend § 425.400 by—
■ a. Revising paragraph (c)(1)(v) introductory text;
■ b. Adding paragraph (c)(1)(vi); and
■ c. Revising paragraphs (c)(2)(i) introductory text, (c)(2)(i)(A)(2), and (c)(2)(ii).

The addition and revisions read as follows:

§ 425.400 General.

* * * * *

(c) * * *

(1) * * *

(v) For the performance year starting on January 1, 2021:

* * * * *

(vi) For the performance year starting on January 1, 2022, and subsequent performance years as follows:

(A) CPT codes:

(*1*) 96160 and 96161 (codes for administration of health risk assessment).

(*2*) 99201 through 99215 (codes for office or other outpatient visit for the evaluation and management of a patient).

(*3*) 99304 through 99318 (codes for professional services furnished in a nursing facility; professional services or services reported on an FQHC or RHC claim identified by these codes are excluded when furnished in a SNF).

(*4*) 99319 through 99340 (codes for patient domiciliary, rest home, or custodial care visit).

(*5*) 99341 through 99350 (codes for evaluation and management services furnished in a patient's home for claims identified by place of service modifier 12).

(*6*) 99354 and 99355 (add-on codes, for prolonged evaluation and management or psychotherapy services beyond the typical service time of the primary procedure; when the base code is also a primary care service code under this paragraph (c)(1)(vi)).

(*7*) 99421, 99422, and 99423 (codes for online digital evaluation and management).

(*8*) 99439 (code for non-complex chronic care management).

(*9*) 99483 (code for assessment of and care planning for patients with cognitive impairment).

(*10*) 99484, 99492, 99493 and 99494 (codes for behavioral health integration services).

(*11*) 99X21, 99487, 99489, 99490 and 99491 (codes for chronic care management).

(*12*) 99495 and 99496 (codes for transitional care management services).

(*13*) 99497 and 99498 (codes for advance care planning; services identified by these codes furnished in an inpatient setting are excluded).

(*14*) 99X22, 99X23, 99X24, and 99X25 (codes for principal care management services).

(B) HCPCS codes:

(*1*) G0402 (code for the Welcome to Medicare visit).

(*2*) G0438 and G0439 (codes for the annual wellness visits).

(*3*) G0442 (code for alcohol misuse screening service).

(*4*) G0443 (code for alcohol misuse counseling service).

(*5*) G0444 (code for annual depression screening service).

(*6*) G0463 (code for services furnished in ETA hospitals).

(*7*) G0506 (code for chronic care management).

(*8*) G2010 (code for the remote evaluation of patient video/images).

(*9*) G2012 and G2252 (codes for virtual check-in).

(*10*) G2058 (code for non-complex chronic care management).

(*11*) G2064 and G2065 (codes for principal care management services).

(*12*) G2212 (code for prolonged office or other outpatient visit for the evaluation and management of a patient).

(*13*) G2214 (code for psychiatric collaborative care model).

(C) Primary care service codes include any CPT code identified by CMS that directly replaces a CPT code specified in paragraph (c)(1)(vi)(A) of this section or a HCPCS code specified in paragraph (c)(1)(vi)(B) of this section, when the assignment window (as defined in § 425.20) for a benchmark or performance year includes any day on or after the effective date of the replacement code for payment purposes under FFS Medicare.

(2)(i) Except as otherwise specified in paragraph (c)(2)(i)(A)(*2*) of this section, when the assignment window (as defined in § 425.20) for a benchmark or performance year includes any month(s) during the COVID–19 Public Health Emergency defined in § 400.200 of this chapter, in determining beneficiary assignment, we use the primary care service codes identified in paragraph (c)(1) of this section, and additional primary care service codes as follows:

(A) * * *

(2) 99441, 99442, and 99443 (codes for telephone evaluation and management services). These codes are used in determining beneficiary assignment as specified in paragraphs (c)(2)(i) and (ii) of this section and until they are no longer payable under Medicare fee-for-service payment policies as specified under section 1834(m) of the Act and §§ 410.78 and 414.65 of this chapter.

* * * * *

(ii) Except as otherwise specified in paragraph (c)(2)(i)(A)(2) of this section, the additional primary care service codes specified in paragraph (c)(2)(i) of this section are applicable to all months of the assignment window (as defined in § 425.20), when the assignment window includes any month(s) during the COVID–19 Public Health Emergency defined in § 400.200 of this chapter.

■ 79. Amend § 425.512 by—
■ a. Revising paragraphs (a)(2) and (3);
■ b. Redesignating paragraph (a)(4) as paragraph (a)(5);
■ c. Adding a new paragraph (a)(4);
■ d. Revising newly redesignated paragraph (a)(5);
■ e. Adding paragraph (a)(6);
■ f. Revising paragraphs (b)(2)(i) and (ii) and (b)(3)(i);
■ g. Redesignating paragraph (b)(3)(ii) as paragraph (b)(3)(iii);
■ h. Adding a new paragraph (b)(3)(ii); and

■ i. Revising newly redesignating paragraph (b)(3)(iii).

§ 425.512 Determining the ACO quality performance standard for performance years beginning on or after January 1, 2021.

(a) * * *

(2) *For the first performance year of an ACO's first agreement period under the Shared Savings Program.* If the ACO reports data via the APP and meets the data completeness requirement at § 414.1340 of this chapter and the case minimum requirement at § 414.1380 of this chapter on the measures specified in this paragraph (a)(2) for the applicable performance year, the ACO will meet the quality performance standard.

(i) *For performance year 2022.* The ten CMS Web Interface measures or the three eCQM/MIPS CQM measures, and the CAHPS for MIPS survey.

(ii) *For performance year 2023.* The ten CMS Web Interface measures and at least one eCQM/MIPS CQM measure or the three eCQM/MIPS CQM measures, and the CAHPS for MIPS survey.

(iii) *For performance year 2024 and subsequent performance years.* The three eCQM/MIPS CQM measures and the CAHPS for MIPS survey.

(3) *For performance year 2021*—(i) Except as specified in paragraph (a)(2) of this section, CMS designates the quality performance standard as the ACO reporting quality data via the APP established under § 414.1367 of this chapter, according to the method of submission established by CMS and achieving a quality performance score that is equivalent to or higher than the 30th percentile across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring.

(ii) If an ACO does not report any of the ten CMS Web Interface measures or any of the three eCQM/MIPS CQM measures and does not administer a CAHPS for MIPS survey under the APP, the ACO will not meet the quality performance standard.

(4) *For performance year 2022*—(i) Except as specified in paragraph (a)(2) of this section, CMS designates the quality performance standard as the ACO reporting via the APP established under § 414.1367 of this chapter either:

(A) According to the method of submission established by CMS and achieving a quality performance score that is equivalent to or higher than the 30th percentile across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring, or

(B) The three eCQM/MIPS CQM measures in the APP measure set, meeting the data completeness requirement at § 414.1340 of this chapter and the case minimum requirement at § 414.1380 of this chapter for all three eCQM/MIPS CQM measures, and achieving a quality performance score equivalent to or higher than the 30th percentile of the performance benchmark on at least one measure in the APP measure set.

(ii) If an ACO does not report any of the ten CMS Web Interface measures or any of the three eCQM/MIPS CQM measures and does not administer a CAHPS for MIPS survey under the APP, the ACO will not meet the quality performance standard.

(5) *For performance year 2023*—(i) Except as specified in paragraph (a)(2) of this section, CMS designates the quality performance standard as the ACO reporting via the APP established under § 414.1367 of this chapter either:

(A) According to the method of submission established by CMS, including at least one eCQM/MIPS CQM measure, and achieving a quality performance score that is equivalent to or higher than the 30th percentile across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring, or

(B) The three eCQM/MIPS CQM measures in the APP measure set, meeting the data completeness requirement at § 414.1340 of this chapter and the case minimum requirement at § 414.1380 of this chapter for all three eCQM/MIPS CQM measures, and achieving a quality performance score equivalent to or higher than the 30th percentile of the performance benchmark on at least one measure in the APP measure set.

(ii) If the ACO does not report at least one eCQM/MIPS CQM in the APP measure set, the ACO will not meet the quality performance standard.

(6) *For performance years 2024 and subsequent performance years.* (i) Except as specified in paragraph (a)(2) of this section, CMS designates the quality performance standard as the ACO reporting quality data via the APP established under § 414.1367 of this chapter, according to the method of submission established by CMS and achieving a quality performance score that is equivalent to or higher than the 40th percentile across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring.

(ii) If an ACO does not report any of the three eCQM/MIPS CQM measures and does not administer a CAHPS for MIPS survey under the APP, the ACO will not meet the quality performance standard.

(b) * * *

(2) * * *

(i) For performance years 2021 through 2023, the ACO's minimum quality performance score is set to the equivalent of the 30th percentile MIPS Quality performance category score across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring for the relevant performance year.

(ii) For performance year 2024 and subsequent performance years, the ACO's minimum quality performance score is set to the equivalent of the 40th percentile MIPS Quality performance category score across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring, for the relevant performance year.

(3) * * *

(i) For performance years 2021 and 2022, if the ACO reports quality data via the APP and meets data completeness and case minimum requirements, CMS will use the higher of the ACO's quality performance score or the equivalent of the 30th percentile MIPS Quality performance category score across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring, for the relevant performance year.

(ii) For performance year 2023, if the ACO reports quality data via the APP, including at least one eCQM/MIPS CQM measure, and meets data completeness and case minimum requirements, CMS will use the higher of the ACO's quality performance score or the equivalent of the 30th percentile MIPS Quality performance category score across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring, for the performance year.

(iii) For performance year 2024 and subsequent performance years, if the ACO reports quality data via the APP and meets data completeness and case minimum requirements, CMS will use the higher of the ACO's quality performance score or the equivalent of the 40th percentile MIPS Quality performance category score across all MIPS Quality performance category scores, excluding entities/providers eligible for facility-based scoring, for the relevant performance year.

* * * * *

Dated: July 9, 2021.

Xavier Becerra,

Secretary, Department of Health and Human Services.

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendix 1: MIPS Quality Measures

Note: Except as otherwise noted in this proposed rule, previously finalized measures and specialty measure sets will continue to apply for the 2022 MIPS performance period/2024 MIPS payment year and future years. In addition, electronic clinical quality measures (eCQMs) that are National Quality Forum (NQF) endorsed are shown in Table A as follows: NQF #/eCQM NQF #.

BILLING CODE 4120–01–P

TABLE Group A: New Quality Measures Proposed for the CY 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

A.1. Intravesical Bacillus-Calmette Guerin for Non-muscle Invasive Bladder Cancer

Category	Description
NQF # / eCQM NQF #:	N/A
Quality #:	TBD
Description:	Percentage of patients initially diagnosed with non-muscle invasive bladder cancer and who received intravesical Bacillus-Calmette-Guerin (BCG) within 6 months of bladder cancer staging.
Measure Steward:	Oregon Urology
Numerator:	Intravesical Bacillus-Calmette Guerin (BCG) instillation for initial dose or series. BCG is initiated within 6 months of the bladder cancer staging and during the measurement period.
Denominator:	All patients initially diagnosed with T1, Tis or high grade Ta non-muscle invasive bladder cancer and a qualified encounter in the measurement period.
Exclusions:	Denominator Exceptions: Unavailability of BCG Denominator Exclusions: Immunosuppressed patients, includes HIV and immunocompromised state. Immunosuppressive drug therapy. Active Tuberculosis. Mixed histology urothelial cell carcinoma including micropapillary, plasmacytoid, sarcomatoid, adenocarcinoma and squamous disease. Patients who undergo cystectomy, chemotherapy or radiation within 6 months of Bladder Cancer Staging.
Measure Type:	Process
Measure Domain:	Effective Clinical Care (section 1848(s)(1)(B)(i) of the Act)
High Priority Measure:	No
Collection Type:	eCQM Specifications
Measure-Specific Case Minimum/Performance Period:	N/A for this measure
Rationale:	We are proposing this measure because it addresses a gap in care for patients diagnosed with bladder cancer. Treatment at this stage (non-muscle invasive) can help prevent invasion into the muscle layer which leads to potential bladder removal and additional chemotherapy and/or radiation treatment. It was reviewed by the 2016 National Quality Forum (NQF) Measure Application Partnership (MAP) with a recommendation to refine to address concerns what populations would be included or excluded from the measure. The measure was updated according to MAP feedback by redefining the eligible patient population and exclusions. The measure steward indicated that bladder cancer is ranked 10th for new cancer cases in 2020 and is the 9th leading cause of cancer death in the United States. There were an estimated 81,400 new cases in 2020 and 17,980 estimated deaths in 2020. Early detection (discovery of cancer in situ or localized to the primary site) is found in 85 percent of the patients, and with these there is a 5-year survival rate of 95.8 percent for in situ and 69.2 percent for localized. National Comprehensive Cancer Network (NCCN) Guidelines for Bladder Cancer (version 6.2020) defines intravesical Bacillus-Calmette-Guerin (BCG) as Category 1 Treatment for Ta - high grade, T1 and Tis non-muscle invasive bladder cancer. Most public data reflect prophylactic or adjuvant use of intravesical therapy with the goal of preventing recurrence or delaying progression to a higher grade or stage. Intravesical BCG has been shown to be an effective prophylaxis to prevent bladder cancer recurrences following transurethral resection of a bladder tumor (TURBT). The NCCN Bladder Cancer Panel Members recommend BCG as the preferred option over Mitomycin C for adjuvant treatment of high-grade lesions (Ta). BCG is also standard therapy for Primary Tis. Most T1 lesions are high risk and are similarly treated with adjuvant intravesical therapy with BCG being a Category 1 recommendation. (NCCN guidelines 6.2020). Based on research of the available information presented to the MAP, we believe the measure is evidence-based and represents an important clinical practice. Note: Refer to https://ecqi.healthit.gov/ecqm/ep/2022/cms646v2 for information on this measure.

A.2. Hemodialysis Vascular Access: Practitioner Level Long-term Catheter Rate

Category	Description
NQF # / eCQM NQF #:	N/A
Quality #:	TBD
Description:	Percentage of adult hemodialysis patient-months using a catheter continuously for three months or longer for vascular access attributable to an individual practitioner or group practice.
Measure Steward:	Centers for Medicare & Medicaid Services
Numerator:	The numerator is the number of adult patient-months in the denominator who were on maintenance hemodialysis using a catheter continuously for three months or longer as of the last hemodialysis session of the reporting month.
Denominator:	All patients at least 18 years old as of the first day of the reporting month who are determined to be maintenance hemodialysis patients (in-center and home HD) for the complete reporting month under the care of the same practitioner or group partner.
Exclusions:	Exclusions that are implicit in the denominator definition include: • Pediatric patients (<18 years old). • Patients on Peritoneal Dialysis for any portion of the reporting month. • Patient-months where there are more than one MCP provider listed for the month. In addition, patients with a catheter that have limited life expectancy, as defined by the following criteria are excluded: • Patients under hospice care in the current reporting month. • Patients with metastatic cancer in the past 12 months. • Patients with end stage liver disease in the past 12 months. • Patients with coma or anoxic brain injury in the past 12 months
Measure Type:	Intermediate Outcome
Measure Domain:	Effective Clinical Care (section 1848(s)(1)(B)(i) of the Act)
High Priority Measure:	Yes
Collection Type:	MIPS CQMs Specifications
Measure-Specific Case Minimum/Performance Period:	N/A for this measure
Rationale:	We are proposing this measure because it represents an intermediate outcome for maintenance hemodialysis patients and may incentivize clinicians to evaluate their vascular access with potential to reduce infection, mortality, and hospitalization rates. Long-term catheter use is associated with higher mortality rate than use of an arteriovenous fistula. The measure was evaluated by the MAP and it was conditionally supported pending NQF endorsement. While we agree with the MAP that NQF endorsement of measures is preferred, NQF endorsement is not a requirement for measures to be considered for MIPS if the measure has an evidence-based focus as required by section 1848(q)(2)(D)(v) of the Act. The measure steward indicated, per their analysis of Consolidated Renal Operations in a Web enabled Network (CROWNWeb) data from January 2016 - December 2016, that the physician-level mean percentage of patient-months with a long-term catheter was 9.7 percent (SD=9.0 percent). Distribution: Min=0 percent, 1st quartile=4.5 percent, median=8.3 percent, 3rd quartile=12.7 percent, Max=100 percent. Reliability testing included 7,921 – 8,508 clinicians per month with moderate inter-unit reliability of 0.602 indicating that 60.2 percent of the variation in the annual long-term catheter rate can be attributed to between-practitioner differences in performance (signal) and about 39.8 percent to the within-practitioner variation (noise). Based on research of the available information presented to the MAP, we believe the measure is evidence-based and represents an important clinical practice. Note: Refer to the MAP Spreadsheet of Final Recommendations to CMS and HHS at http://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=91911.

A.3. Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM)

Category	Description
NQF # / eCQM NQF #:	N/A
Quality #:	TBD
Description:	The Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM) uses the PCPCM PROM (a comprehensive and parsimonious set of 11 patient-reported items) to assess the broad scope of primary care. Unlike other primary care measures, the PCPCM PRO-PM measures the high value aspects of primary care based on a patient's relationship with the clinician or practice. Patients identify the PCPCM PROM as meaningful and able to communicate the quality of their care to their clinicians and/or care team. The items within the PCPCM PROM are based on extensive stakeholder engagement and comprehensive reviews of the literature.
Measure Steward:	The American Board of Family Medicine
Numerator:	The target population is all active patients in a practice during the performance reporting period. A patient is defined as active if the patient has had a documented interaction with the practice within 12 months of their birth month within the measurement period. The PCPCM PROM is the same for all patients, regardless of age. Because the PCPCM PROM applies to all patients and is not particular to a clinical encounter, it is administered once a year to each patient during their birth month. The target population is defined the same, regardless of unit of analysis (clinician, practice, or system). The numerator is the sum of all PCPCM PROM scores for active patients. 1. My practice makes it easy for me to get care. 2. My practice is able to provide most of my care. 3. In caring for me, my doctor considers all the factors that affect my health. 4. My practice coordinates the care I get from multiple places. 5. My doctor or practice knows me as a person. 6. My doctor and I have been through a lot together. 7. My doctor or practice stands up for me. 8. The care I get takes into account knowledge of my family. 9. The care I get in this practice is informed by knowledge of my community. 10. Over time, my practice helps me to stay healthy. 11. Over time, my practice helps me to meet my goals.
Denominator:	The denominator is the total number of complete PCPCM PROM instruments received in the reporting period. A completed PROM instrument is defined as a PROM instrument for which the patient has responded to at least 8 of 11 items. The target population is all active patients in a practice during the performance reporting period. A patient is defined as active if the patient has had a documented interaction with the practice within 12 months of their birth month during the measurement period. The PCPCM PROM is the same for all patients, regardless of age. Because the PCPCM PROM applies to all patients and is not particular to a clinical encounter, it is administered once a year to each patient during their birth month. The target population is defined the same, regardless of unit of analysis (clinician, practice, or system).
Exclusions:	None
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Measure Domain:	Person and Caregiver-centered Experience and Outcomes (section 1848(s)(1)(B)(iv) of the Act)
High Priority Measure:	Yes
Collection Type:	MIPS CQMs Specifications
Measure-Specific Case Minimum/Performance Period::	For each MIPS eligible clinician, group, subgroup*, virtual group, and APM Entity, a minimum of 30 PCPCM PROM instruments per clinician are needed for submission of this measure. All valid survey results (as defined in the specification) should be included in the aggregate score. For MIPS eligible groups, subgroups*, virtual groups, and APM Entities with 5 or more clinicians, a minimum of 150 PCPCM PROM instruments per TIN for each site/location associated with the clinicians part of the group, subgroups, virtual groups, and APM Entities are needed for submission of this measure. For TINs with a composition of multiple specialty practices at one site/location, a minimum of 150 PCPCM PROM instruments per specialty practice within a TIN are needed for submission of this measure. If the MIPS eligible group, subgroup*, virtual group, and APM Entity with 5 or more clinicians encompasses multiple sites/locations, each site/location would need to meet the PCPCM PROM instruments requirements as stated. *Subgroups are only available through MVP reporting. All measure-specific criteria must be met by the subgroup.
Rationale:	We are proposing this measure because assessment of patient experience of care is a critical element of quality care and captures the voice of the patient which is an important component of delivering high-value primary care. There are currently a limited number of patient experience measures within the MIPS quality measure set. The original measure was evaluated by the NQF MAP and received conditional support pending NQF endorsement. While we agree with the MAP that NQF endorsement of measures is preferred, NQF endorsement is not a requirement for measures to be considered for MIPS if the measure has an evidence-based focus as required by section 1848(q)(2)(D)(v) of the Act. Based on research of the available information presented to the MAP, evidence demonstrates a strong connection between patient experience of care and traditional health care outcomes, such as improved intermediate outcomes, greater adherence to recommended treatment, and reduced use of health care services. This measure addresses the Meaningful Measurement Area of Patient's Experience of Care and the MIPS high-priority category of Outcomes. Note: Refer to the MAP Spreadsheet of Final Recommendations to CMS and HHS at http://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=94650.

A.4. Risk-Standardized Acute Unplanned Cardiovascular-Related Admission Rates for Patients with Heart Failure for the Merit-based Incentive Payment System

Category	Description
NQF # / eCQM NQF #:	NQF # 3612
Quality #:	TBD
Description:	Annual risk-standardized rate of acute, unplanned cardiovascular-related admissions among Medicare Fee-for-Service (FFS) patients aged 65 years and older with heart failure (HF) or cardiomyopathy.
Measure Steward:	Centers for Medicare & Medicaid Services
Numerator:	The outcome for this measure is the number of acute cardiovascular-related admissions per 100 person-years at risk for admission during the measurement year. Time at risk is calculated as the number of days a patient is alive, from the start of the measurement period or first visit, until heart transplantation, LVAD implantation, or home inotropic therapy; enrollment in hospice; death; or the end of the measurement period. Time not considered at risk and excluded: Days spent in a hospital, SNF, or acute rehabilitation facility; 10 days following discharge from a hospital, SNF, or acute rehabilitation facility; and Time during and after LVAD implantation, home inotropic therapy, or heart transplantation. Acute cardiovascular-related admissions are defined using individual ICD-10-CM codes and the Agency for Healthcare Research and Quality's (AHRQ) Clinical Classification Software (CCS) diagnosis categories, which group clinically similar codes together. AHRQ CCS diagnosis categories used to define outcome: 55: Fluid and electrolyte disorders; 96: Heart valve disorders; 97: Peri-; endo-; and myocarditis; cardiomyopathy (except that caused by tuberculosis or sexually transmitted disease); 98: Essential hypertension; 100: Acute myocardial infarction; 102: Nonspecific chest pain; 104: Other and ill-defined heart disease; 105: Conduction disorders; 106: Cardiac dysrhythmias; 107: Cardiac arrest and ventricular fibrillation; 108: Congestive heart failure; non-hypertensive; 110: Occlusion or stenosis of precerebral arteries; 112: Transient cerebral ischemia; 115: Aortic; peripheral; and visceral artery aneurysms; 116: Aortic and peripheral arterial embolism or thrombosis; 157: Acute and unspecified renal failure; 245: Syncope. Subsets of the following AHRQ CCS diagnosis categories used to define outcome: 99: Hypertension with complications and secondary hypertension; 101: Coronary atherosclerosis and other heart disease; 103: Pulmonary heart disease; 109: Acute cerebrovascular disease; 114: Peripheral and visceral atherosclerosis; 117: Other circulatory disease; 130: Pleurisy; pneumothorax; pulmonary collapse; 131: Respiratory failure; insufficiency; arrest (adult); 133: Other lower respiratory disease; 237: Complication of device; implant or graft. The measure has several outcome exclusions: Planned admissions; Admissions from a skilled nursing facility (SNF) or acute rehab facility; Admissions within 10 days of discharge from a hospital, SNF, or acute rehab; Admissions after patient has entered hospice; Admissions before first visit to provider if no prior year visit; Admissions at time of or following: LVAD implantation, home inotropic therapy, or heart transplant.
Denominator:	The measure includes Medicare FFS beneficiaries >65 years of age with at least one inpatient principal diagnosis for heart failure/cardiomyopathy, or at least two outpatient or inpatient heart failure/cardiomyopathy diagnoses in any coding position (e.g., primary or secondary position) within the two years prior to the measurement year. • Beneficiaries must be enrolled full-time in Medicare Part A and B during the year prior to measurement and during the measurement period. Additionally, the cohort excludes: Patients with internalized left ventricular assist devices (LVADs); Patients with heart transplants; Patients on home inotropic therapy; Patients on hospice for any reason; Patients with end-stage renal disease (ESRD) – defined as chronic kidney disease stage 5 or on dialysis. Provider types included for measurement (vetted by TEP and Clinician Committee): Primary care providers (PCPs): CMS designates PCPs as physicians who practice internal medicine, family medicine, general medicine, or geriatric medicine, and non-physician providers, including nurse practitioners, certified clinical nurse specialists, and physician assistants; Cardiologists: Cardiologists are covered by the measure because they provide overall coordination of care for patients with HF and manage the conditions that put HF patients at risk for admission due to acute cardiovascular-related conditions. Outcome attribution: We begin by assigning each patient to the clinician most responsible for the patient's care, based on the pattern of outpatient visits with PCPs and relevant specialists. The patient can be assigned to a PCP, a cardiologist, or can be left unassigned. A patient who is eligible for attribution is assigned to a cardiologist if they have 2 or more visits with a single cardiologist, regardless of how many visits that patient has with a PCP. There are two scenarios where a patient can be assigned to a PCP. • First, if the patient has seen the PCP at least once but has no visits with a cardiologist, the patient is assigned to the PCP. • Second, if the patient has seen the PCP more than 2 or more times and has only one visit with a cardiologist, the patient is assigned to the PCP. If the patient has 1 visit each with a cardiologist and a PCP, the patient is assigned to the cardiologist. If the patient has 1 visit with a cardiologist and no visit with a PCP, the patient is assigned to the cardiologist. • Finally, the patient will be unassigned if they had no visits with a PCP or cardiologist. Patients are then assigned at the Taxpayer Identification Number (TIN) level, which includes solo clinicians and groups of clinicians who have chosen to report their quality under a common TIN. Patients "follow" their clinician to the TIN designated by the clinician (i.e. they are assigned to their clinician's TIN). Patients unassigned at the individual clinician-level, therefore, continue to be unassigned at the TIN level.
Exclusions:	Numerator Exclusions: The measure does not include the following types of admissions in the outcome because they do not reflect the quality of care provided by ambulatory care clinicians who are managing the care of HF patients: Planned admissions (utilizes the adapted planned admission algorithm (PAA) to identify and exclude admissions that are planned); Admissions that likely do not reflect the quality of heart failure management provided by ambulatory clinicians including: Admissions that occur within 10 days of discharge from a hospital, skilled nursing facility, or acute rehabilitation facility ("10-day buffer period"); Admissions that occur while patients are enrolled in Medicare's hospice benefit; Admissions that occur prior to the first visit with the assigned clinician. Admissions on the date or after any of the following: LVAD implantation, home inotropic therapy, or heart transplant (censored at the time of transition to advanced care).

Category	Description
	Denominator Exclusions: The measure excludes: 1. Patients without continuous enrollment in Medicare Parts A and B for the duration of the measurement period. 2. Patients who (or until death), were ever in hospice during the year prior to the measurement year or in hospice at the start of the measurement period. 3. Patients who have had no Evaluation & Management (E&M) visits to a MIPS eligible clinician. 4.. Patients who have had a heart transplant, been on home inotropic therapy, or who have had a left ventricular assist device (LVAD) placed.
Measure Type:	Outcome
Measure Domain:	Effective Clinical Care (section 1848(s)(1)(B)(i) of the Act)
High Priority Measure:	Yes
Collection Type:	Administrative Claims
Measure-Specific Case Minimum/Performance Period:	MIPS eligible clinicians, groups, subgroups*, virtual groups, and APM Entities / 21 case minimum / 1 year performance period (January 1st – December 31st) *Subgroups are only available through MVP reporting. All measure-specific criteria must be met by the subgroup.
Rationale:	We are proposing this administrative claims outcome measure as HF is a leading cause of hospitalization in the United States and a major source of disease burden among the elderly population. Approximately 5.7 million adults in the United States have HF, costing the United States $30.7 billion each year, which includes the cost of health care services, medications for treatment, and missed days of work.[1] The toll on patients is also great, with high rates of hospitalization and mortality; nearly half of people with HF die within 5 years of their diagnosis.[2] Patients with chronic HF are vulnerable to a range of complications that may put them at risk for hospitalization, including worsening of HF symptoms and destabilization due to other conditions, such as respiratory disease or infection. To expand the list of available reporting options for clinicians, we are proposing this HF measure for use in the MIPS program, as it is an administrative claims measure, which has no reporting burden. Another version of this measure specified for Accountable Care Organizations (ACOs), "Risk-standardized Acute Admission Rates for Patients with Heart Failure" (ACO-37, NQF ID 2886) was previously used in the CMS Medicare Shared Savings Program, initially for accountability and currently as an informational measure. We used the ACO-37 measure in the Shared Savings Program ACO quality measure set until 2019 and since 2019 has provided ACOs with their performance on the measure in quarterly claims-based reports for ACOs to use in quality improvement activities. The HF measure was evaluated by the NQF MAP who did not recommend for rulemaking with potential for mitigation siting NQF endorsement and an analysis of the appropriateness of the risk adjustment for clinicians with higher caseloads of patients with more complicated or severe heart failure. While we agree with the MAP that NQF endorsement of measures is preferred, NQF endorsement is not a requirement for measures to be considered for MIPS if the measure has an evidence-based focus as required by section 1848(q)(2)(D)(v) of the Act. While the measure raises concerns that the risk adjustment may not adequately account for advanced heart failure stages, based on research of the available information presented to the MAP, we believe the measure is evidence-based and represents an important clinical practice and has provided valuable information for other programs. Note: Refer to the MAP Spreadsheet of Final Recommendations to CMS and HHS at http://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=94650.

A.5. Clinician and Clinician Group Risk-standardized Hospital Admission Rates for Patients with Multiple Chronic Conditions[267]

Category	Description
NQF # / eCQM NQF #:	N/A
Quality #:	TBD
Description:	Annual risk-standardized rate of acute, unplanned hospital admissions among Medicare Fee-for-Service (FFS) patients aged 65 years and older with multiple chronic conditions (MCCs).
Measure Steward:	Centers for Medicare & Medicaid Services
Numerator:	"The outcome for this measure is the number of acute, unplanned hospital admissions per 100 person-years at risk for admission during the measurement period. Time Period The outcome includes inpatient admissions to an acute care hospital during the measurement year. Excluded Admissions This measure does not include the following types of admissions in the outcome because they do not reflect the quality of care provided by ambulatory care clinicians who are managing the care of MCC patients: 1. Planned hospital admissions. 2. Admissions that occur directly from a skilled nursing facility (SNF) or acute rehabilitation facility. 3. Admissions that occur within a 10-day "buffer period" of time after discharge from a hospital, SNF, or acute rehabilitation facility. 4. Admissions that occur after the patient has entered hospice. 5. Admissions related to complications from procedures or surgeries. 6. Admissions related to accidents or injuries. 7. Admissions that occur prior to the first visit with the assigned clinician or clinician group. To identify planned admissions, the measure adopted an algorithm CORE previously developed for CMS's hospital readmission measures, CMS's Planned Readmission Algorithm Version 4.0. [1,2] In brief, the algorithm uses the procedure codes and principal discharge diagnosis code on each hospital claim to identify planned admissions. A few specific, limited types of care are always considered planned (for example, major organ transplant, rehabilitation, and maintenance chemotherapy). Otherwise, a planned admission is defined as a non-acute admission for a scheduled procedure (for example, total hip replacement or cholecystectomy). Admissions for an acute illness are never considered planned. To identify complications of procedures or surgeries, we use the Agency for Healthcare Research and Quality's (AHRQ's) Clinical Classifications Software (CCS), which clusters diagnoses into clinically meaningful categories using International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) or International Classification of Diseases, Tenth Revision, and Clinical Modification (ICD-10-CM) codes. We exclude the following 23 CCS categories. 1. 145: Intestinal obstruction without hernia 2. 237: Complication of device; implant or graft 3. 238: Complications of surgical procedures or medical care 4. 257: Other aftercare b) Accidents or injuries 5. 2601 E Codes: Cut/pierce 6. 2602 E Codes: Drowning/submersion 7. 2604 E Codes: Fire/burn 8. 2605 E Codes: Firearm 9. 2606 E Codes: Machinery 10. 2607 E Codes: Motor vehicle traffic (MVT) 11. 2608 E Codes: Pedal cyclist; not MVT 12. 2609 E Codes: Pedestrian; not MVT 13. 2610 E Codes: Transport; not MVT 14. 2611 E Codes: Natural/environment 15. 2612 E Codes: Overexertion 16. 2613 E Codes: Poisoning 17. 2614 E Codes: Struck by; against 18. 2615 E Codes: Suffocation 19. 2616 E Codes: Adverse effects of medical care 20. 2618 E Codes: Other specified and classifiable 21. 2619 E Codes: Other specified; NEC 22. 2620 E Codes: Unspecified 23. 2621 E Codes: Place of occurrence Person-time at risk Persons are considered at risk for hospital admission if they are alive, enrolled in Medicare FFS, and not in the hospital during the measurement period. In addition to time spent in the hospital, we also exclude from at-risk time: 1) time spent in a SNF or acute rehabilitation facility; 2) the time within 10 days following discharge from a hospital, SNF, or acute rehabilitation facility; and 3) time after entering hospice care. Citations

[267] This proposed quality measure is a Population Health measure.

	1. Yale New Haven Health Services Corporation – Center for Outcomes Research & Evaluation (YNHHSC/CORE). 2018 All-Cause Hospital Wide Measure Updates and Specifications Report - Hospital-Level 30-Day Risk-Standardized Readmission Measure – Version 7.0. Centers for Medicare & Medicaid Services; March 2018. 2. Horwitz L, Grady J, Cohen D, et al. Development and validation of an algorithm to identify planned readmissions from claims data. Journal of Hospital Medicine. October 2015;10(10):670-677."
Denominator:	"Patients included in the measure (target patient population) The cohort is comprised of patients whose combinations of chronic conditions put them at high risk of admission and whose admission rates could be lowered through better care. This definition reflects NQF's "Multiple Chronic Conditions Measurement Framework," which defines patients with MCCs as people "having two or more concurrent chronic conditions that…act together to significantly increase the complexity of management, and affect functional roles and health outcomes, compromise life expectancy, or hinder self-management." [1] The specific inclusion criteria are as follows. • Patient is alive at the start of the measurement period and has two or more of nine chronic disease groups in the year prior to the measurement period. Chronic conditions, except for diabetes, are defined using CMS's Chronic Conditions Data Warehouse (CCW). For diabetes, we used the diabetes cohort definition from the Accountable Care Organization (ACO) diabetes admission measure developed by CORE (v2018a ACO-36) as opposed to the definition used in CCW; CCW includes diagnoses for secondary and drug-induced diabetic conditions that are not the focus of the MIPS MCC admission measure. 1. Acute myocardial infarction (AMI), 2. Alzheimer's disease and related disorders or senile dementia, 3. Atrial fibrillation, 4. Chronic kidney disease (CKD), 5. Chronic obstructive pulmonary disease (COPD) or asthma, 6. Depression, 7. Diabetes, 8. Heart failure, and 9. Stroke or transient ischemic attack (TIA). • Patient is aged ≥65 years at the start of the year prior to the measurement period. • Patient is a Medicare FFS beneficiary with continuous enrollment in Medicare Parts A and B during the year prior to the measurement period. Provider types included for measurement • Primary care providers (PCPs): CMS designates PCPs as physicians who practice internal medicine, family medicine, general medicine, or geriatric medicine, and non-physician providers, including nurse practitioners, certified clinical nurse specialists, and physician assistants. • Relevant specialists: Specialists covered by the measure are limited to those who provide overall coordination of care for patients with MCCs and who manage the chronic diseases that put the MCC patients in the measure at risk of admission. These specialists were chosen with input from our Technical Expert Panel (TEP) and include cardiologists, pulmonologists, nephrologists, neurologists, endocrinologists, and hematologists/oncologists. Outcome attribution We begin by assigning each patient to the clinician most responsible for the patient's care, based on the pattern of outpatient visits with PCPs and relevant specialists. The patient can be assigned to a PCP, a relevant specialist, or can be left unassigned. • A patient who is eligible for attribution can be assigned to a relevant specialist only if the specialist has been identified as "dominant". A specialist is considered "dominant" if they have two or more visits with the patient, as well as at least two more visits than any primary care provider or other relevant specialist. • There are two scenarios where a patient can be assigned to a PCP. First, the patient must have seen at least one PCP. The patient will then be assigned to the PCP with the highest number of visits if there are no relevant specialists who are considered "dominant". Second, if the patient has had more than one visit with a relevant specialist, no "dominant" specialist has been identified, and has two or more visits with a PCP, they will be assigned to that PCP. • Finally, the patient will be unassigned if they only saw non-relevant specialists, if the patient has not seen a PCP and no "dominant" specialist can be identified, or if the patient has not had more than one visit with any individual PCP. Patients are then assigned at the Taxpayer Identification Number (TIN) level, which includes solo clinicians and groups of clinicians who have chosen to report their quality under a common TIN. • Patients "follow" their clinician to the TIN designated by the clinician (i.e. they are assigned to their clinician's TIN). Patients unassigned at the individual clinician-level, therefore, continue to be unassigned at the TIN level. Citations 1. National Quality Forum. Multiple Chronic Conditions Measurement Framework. http://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=71227. Accessed February 20, 2019."
Exclusions:	Denominator Exclusions: "The cohort excludes the following patients: 1) Patients without continuous enrollment in Medicare Part A or B during the measurement period. 2) Patients who were in hospice at any time during the year prior to the measurement year or at the start of the measurement year. 3) Patients who had no Evaluation & Management (E&M) visits to a MIPS-eligible clinician type. 4) Patients assigned to clinician who achieve QP status and therefore do not participate in MIPS. 5) Patients attributed to hematologists and oncologists. 6) Patients not at risk for hospitalization during the measurement year." Note: Exclusions 1-3 are applied prior to attribution, while exclusions 4-6 are applied after the attribution algorithm is run.

Category	Description
Measure Type:	Outcome
Measure Domain:	Effective Clinical Care (section 1848(s)(1)(B)(i) of the Act)
High Priority Measure:	Yes
Collection Type:	Administrative Claims
Measure-Specific Case Minimum/Performance Period:	MIPS eligible groups, subgroups*, virtual groups, and APM Entities with at least 16 clinicians / 18 case minimum / 1 year performance period (January 1st – December 31st) *Subgroups are only available through MVP reporting. All measure-specific criteria must be met by the subgroup.
Rationale:	We are proposing this risk-standardized hospital admission rate administrative claims outcome measure as patients with MCCs are at high risk for hospital admission, often for potentially preventable causes, such as exacerbation of pulmonary disease. Evidence from several Medicare demonstration projects suggests that care coordination results in decreased hospital admission rates among high-risk patients. In addition, studies have shown that the types of ambulatory care clinicians this measure targets (for example, primary care providers and specialists caring for patients with MCCs) can influence admission rates through team-based and enhanced access to care, found specifically in the patient-centered medical home (PCMH) model of interventions, and broadly through increased primary care supply and continuity of care. To expand the list of available reporting options for clinicians, we are proposing the MCC measure for use in the MIPS program, as it is an administrative claims measure, which has no reporting burden. This measure was evaluated by the NQF MAP in 2019, who did not support for rulemaking with potential for mitigation, including applying the measure to clinician groups, not to individual clinicians, a higher reliability threshold (e.g., 0.7; 3), consideration of patient preference and selection as a method of attribution and NQF endorsement. While we agree with the MAP that NQF endorsement of measures is preferred, NQF endorsement is not a requirement for measures to be considered for MIPS if the measure has an evidence-based focus as required by section 1848(q)(2)(D)(v) of the Act. This measure has been submitted for endorsement as part of the fall 2020 NQF cycle. The measure developer indicated the measure will be used for clinician group reporting with a mean reliability score for groups of >15 clinicians with at least 18 MCC patients at 0.873. While the developer indicated that the patient attestation is not yet available for testing, based on research of the available information presented at the MAP, we believe the measure is evidence-based and represents an important clinical practice addressing a large Medicare patient population. Note: Refer to the MAP Spreadsheet of Final Recommendations to CMS and HHS at http://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=91911.

TABLE Group AA: COVID-19 Vaccination by Clinicians

In addition to the new quality measures in Table Group A, we are seeking comment on one quality measure for potential future inclusion within MIPS. We refer readers to section IV.A.3.d.(1)(f) of this proposed rule for our request for information pertaining to the COVID-19 Vaccination by Clinicians measure specifications.

AA.1. SARS-CoV-2 Vaccination by Clinicians

Category	Description
NQF # / eCQM NQF #:	N/A
Quality #:	TBD
Description:	Percentage of patients aged 18 years and older seen for a visit during the measurement period who have ever received or reported having ever received a SARS-CoV-2 vaccination dose OR who have ever received or reported having ever received a full SARS-CoV-2 vaccination course.
Measure Steward:	Centers for Medicare & Medicaid Services
Numerator:	Patients who have ever received or reported having ever received a SARS-CoV-2 vaccination dose OR who have ever received or reported having ever received a full SARS-CoV-2 vaccination course.
Denominator:	All patients aged 18 years and older seen for a visit during the measurement period.
Exclusions:	Patient received hospice services any time during the measurement period. Exceptions: 1. SARS-CoV-2 vaccine dose or full SARS-CoV-2 vaccination course was not administered, as documented by clinician, due to patient contraindication. 2. SARS-CoV-2 vaccine dose or full SARS-CoV-2 vaccination course was not administered, as documented by clinician, due to patient refusal. 3. SARS-CoV-2 vaccine dose or full SARS-CoV-2 vaccination course was not administered, as documented by clinician, due to vaccine being unavailable.
Measure Type:	Process
Measure Domain:	Community/Population Health (section 1848(s)(1)(B)(i) of the Act)
High Priority Measure:	No
Collection Type:	MIPS CQMs Specifications
Measure-Specific Case Minimum/Performance Period:	N/A for this measure
Rationale:	We are proposing this measure for comment as it represents a promising effort to advance measurement of vaccination for an evolving pandemic. On December 19, 2020, the Advisory Committee on Immunization Practice (ACIP) made an interim recommendation on the use of the Moderna COVID-19 vaccine for people ages 18 and older. Earlier that month, on December 12, ACIP also granted use of the Pfizer-BioNTech COVID-19 vaccine for people ages 16 and older, as an interim recommendation. The benefits of both vaccines were classified as high certainty (Type 1) based on the Grading of Recommendations, Assessment, Development and Evaluation (GRADE) evidence assessment. On February 28, 2021 ACIP issued an interim recommendation for use of the Janssen COVID-19 vaccine in persons aged ≥18 years for the prevention of COVID-19. The benefit for this single dose vaccine was classified as moderate certainty (Type 2) based on the GRADE evidence assessment. Future versions of the measure will be updated as more evidence and guidelines emerge. This measure would add value to the MIPS quality measure set by providing visibility into an important intervention to limit COVID-19 infections. In addition, collecting information on severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) vaccination coverage and providing feedback to clinicians, will facilitate performance benchmarking and drive quality improvement. Vaccination coverage will reduce transmission of COVID-19 and the associated mortality and morbidity. This measure was reviewed by the NQF MAP, who recommended conditional support for future rulemaking contingent on us bringing the measure back to MAP once the specifications are further refined. We are considering an expedited process for this measure recognizing the importance of a vaccine during a public health emergency and are exploring the inclusion of pediatric hospitals within this COVID-19 vaccination measure. Based on research of the available information presented to the MAP, we believe the measure is evidence-based and represents an important clinical topic. Note: Refer to the MAP Spreadsheet of Final Recommendations to CMS and HHS at http://www.qualityforum.org/WorkArea/linkit.aspx?LinkIdentifier=id&ItemID=94650.

TABLE Group B: New Specialty Measures Set Proposed for Addition and Modifications to Previously Finalized Specialty Measures Sets Proposed for the CY 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

We are proposing to add one new specialty measures set: Certified Nurse Midwife. This set is proposed to be added based in part on the proposed expanded definition of the MIPS eligible clinician to include certified nurse midwife under Section IV.A.3.a. of this proposed rule. Note: Clinical Social Work is also being proposed as a MIPS eligible clinician type under Section IV.A.3.a. of this proposed rule. See Table B.7 for the proposed changes to the previously finalized Clinical Social Work specialty set.

We are proposing to modify the previously finalized specialty measures sets below based upon review of updates made to existing quality measure specifications, proposed the addition of new measures for inclusion in MIPS, and considered the feedback provided by specialty societies. There may be instances where the quality measures within a specialty set remain static, but the individual measures have proposed substantive changes in Table Group D. In the first column, existing measures with substantive changes described in Table Group D are noted with an asterisk (*), core measures that align with Core Quality Measure Collaborative (CQMC) core measure set(s) are noted with the symbol (§), and high priority measures are noted with an exclamation point (!). In addition, the Indicator column includes a "high priority type" in parentheses after each high priority indicator (!) to represent the regulatory definition of high priority measures. In addition, electronic clinical quality measures (eCQMs) that are National Quality Forum (NQF) endorsed are shown in Table Group B as follows: NQF # / eCQM NQF #.

The definition of high priority at §414.1305 includes an outcome (including intermediate-outcome and patient-reported outcome), appropriate use, patient safety, efficiency, patient experience, care coordination, or opioid-related quality measure.

It should be noted that in the 2021 PFS final rule (85 FR 84870), the CMS Web Interface measures as a collection type would sunset starting with the CY 2022 MIPS performance period; however, in section IV.A.3.d.(1)(d) of this proposed rule, we are proposing to extend the availability of the CMS Web Interface measures as a collection type for the 2022 MIPS performance period and sunset the CMS Web Interface measures starting with the CY 2023 MIPS performance period. Therefore, we are proposing to modify the CMS Web Interface Measure Specifications collection type as outlined in the applicable measures within the B tables. In conjunction with seeking public comment on the proposal to extend the availability of the CMS Web Interface measures as a collection type, we are seeking public comment on the modifications proposed for the CMS Web Interface Measure Specifications collection type given that the CMS Web Interface Measure Specifications collection type has generally remained the same for three consecutive (CY 2019, CY 2020, and CY 2021) MIPS performance periods.

B.1. Allergy/Immunology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Allergy/Immunology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Allergy/Immunology specialty set.

B.1. Allergy/Immunology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE ALLERGY/IMMUNOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community / Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	444	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Medication Management for People with Asthma**: The percentage of patients 5-64 years of age during the performance period who were identified as having persistent asthma and were dispensed appropriate medications that they remained on for at least 75% of their treatment period.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.2. Anesthesiology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Anesthesiology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Anesthesiology specialty set.

B.2. Anesthesiology

PREVIOUSLY FINALIZED MEASURES IN THE ANESTHESIOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Patient Safety)	2726 / N/A	076	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Prevention of Central Venous Catheter (CVC) - Related Bloodstream Infections:** Percentage of patients, regardless of age, who undergo central venous catheter (CVC) insertion for whom CVC was inserted with all elements of maximal sterile barrier technique, hand hygiene, skin preparation and, if ultrasound is used, sterile ultrasound techniques followed.	American Society of Anesthesiologists
! (Outcome)	N/A / N/A	404	N/A	MIPS CQMs Specifications	Intermediate Outcome	Effective Clinical Care	**Anesthesiology Smoking Abstinence:** The percentage of current smokers who abstain from cigarettes prior to anesthesia on the day of elective surgery or procedure.	American Society of Anesthesiologists
! (Outcome)	N/A / N/A	424	N/A	MIPS CQMs Specifications	Outcome	Patient Safety	**Perioperative Temperature Management:** Percentage of patients, regardless of age, who undergo surgical or therapeutic procedures under general or neuraxial anesthesia of 60 minutes duration or longer for whom at least one body temperature greater than or equal to 35.5 degrees Celsius (or 95.9 degrees Fahrenheit) was achieved within the 30 minutes immediately before or the 15 minutes immediately after anesthesia end time.	American Society of Anesthesiologists
* ! (Patient Safety)	N/A / N/A	430	N/A	MIPS CQMs Specifications	Process	Patient Safety	**Prevention of Post-Operative Nausea and Vomiting (PONV) – Combination Therapy:** Percentage of patients, aged 18 years and older, who undergo a procedure under an inhalational general anesthetic, AND who have three or more risk factors for post-operative nausea and vomiting (PONV), who receive combination therapy consisting of at least two prophylactic pharmacologic anti-emetic agents of different classes preoperatively and/or intraoperatively.	American Society of Anesthesiologists
* ! (Patient Safety)	N/A / N/A	463	N/A	MIPS CQMs Specifications	Process	Patient Safety	**Prevention of Post-Operative Vomiting (POV) – Combination Therapy (Pediatrics):** Percentage of patients aged 3 through 17 years, who undergo a procedure under general anesthesia in which an inhalational anesthetic is used for maintenance AND who have two or more risk factors for post-operative vomiting (POV), who receive combination therapy consisting of at least two prophylactic pharmacologic anti-emetic agents of different classes preoperatively and/or intraoperatively.	American Society of Anesthesiologists
! (Opioid)	N/A / N/A	477	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Multimodal Pain Management:** Percentage of patients, aged 18 years and older, undergoing selected surgical procedures that were managed with multimodal pain medicine.	American Society of Anesthesiologists

B.2. Anesthesiology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE ANESTHESIOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Removal**
N/A/ N/A	044	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Coronary Artery Bypass Graft (CABG): Preoperative Beta-Blocker in Patients with Isolated CABG Surgery:** Percentage of isolated Coronary Artery Bypass Graft (CABG) surgeries for patients aged 18 years and older who received a beta-blocker within 24 hours prior to surgical incision.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.3. Audiology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Audiology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Audiology specialty set.

The measure contains four goals. All four goals within a measure must be reached in order to meet that measure. The numerator for the all-or-none measure should be collected from the organization's total IVD denominator. All-or-None Outcome Measure (Optimal Control) - Using the IVD denominator optimal results include: • Most recent blood pressure (BP) measurement is less than or equal to 140/90 mm Hg -- And • Most recent tobacco status is Tobacco Free -- And • Daily Aspirin or Other Antiplatelet Unless Contraindicated -- And • Statin Use Unless Contraindicated	Wisconsin Collaborative for Healthcare Quality

B.4a. Cardiology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE CARDIOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.4b. Electrophysiology Cardiac Specialist

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Electrophysiology Cardiac Specialist specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Electrophysiology Cardiac Specialist specialty set.

B.4b. Electrophysiology Cardiac Specialist

American College of Cardiology Foundation

B.5. Certified Nurse Midwife

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, we are soliciting comment on applicable measures for a Certified Nurse Midwife specialty set, which takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. CMS may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures because certified nurse midwife is being proposed for inclusion in the definition of a MIPS eligible clinician type. We request comment on the measures available in the Certified Nurse Midwife specialty set.

B.5. Certified Nurse Midwife

MEASURES PROPOSED FOR **ADDITION** TO THE CERTIFIED NURSE MIDWIFE SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Inclusion**
! National Committee for Quality Assurance	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.
*	0041 / 0041e	110	CMS147v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Influenza Immunization:** Percentage of patients aged 6 months and older seen for a visit between October 1 and March 31 who received an influenza immunization OR who reported previous receipt of an influenza immunization.	National Committee for Quality Assurance	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.
§ ! (Patient Safety)	N/A / N/A	130	CMS68v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Documentation of Current Medications in the Medical Record:** Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.	Centers for Medicare & Medicaid Services	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.

B.5. Certified Nurse Midwife

MEASURES PROPOSED FOR **ADDITION** TO THE CERTIFIED NURSE MIDWIFE SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Inclusion**
* §	0028 / 0028e	226	CMS138v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user.	National Committee for Quality Assurance	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.
* ! (Outcome)	N/A / N/A	335	N/A	MIPS CQMs Specifications	Outcome	Patient Safety	**Maternity Care: Elective Delivery or Early Induction Without Medical Indication at < 39 Weeks (Overuse):** Percentage of patients, regardless of age, who gave birth during a 12-month period who delivered a live singleton at < 39 weeks of gestation completed who had elective deliveries by cesarean section (C-section), or early inductions of labor, without medical indication.	Centers for Medicare & Medicaid Services	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.
* § ! (Care Coordination)	N/A / N/A	336	N/A	MIPS CQMs Specifications	Process	Communication and Care Coordination	**Maternity Care: Postpartum Follow-up and Care Coordination**: Percentage of patients, regardless of age, who gave birth during a 12-month period who were seen for postpartum care before or at 8 weeks of giving birth and received the following at a postpartum visit: breast-feeding evaluation and education, postpartum depression screening, postpartum glucose screening for gestational diabetes patients, family and contraceptive planning counseling, tobacco use screening and cessation education, healthy lifestyle behavioral advice, and an immunization review and update.	Centers for Medicare & Medicaid Services	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.

B.5. Certified Nurse Midwife

MEASURES PROPOSED FOR **ADDITION** TO THE CERTIFIED NURSE MIDWIFE SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Inclusion**
§	2152 / N/A	431	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Unhealthy Alcohol Use: Screening & Brief Counseling:** Percentage of patients aged 18 years and older who were screened for unhealthy alcohol use using a systematic screening method at least once within the last 12 months AND who received brief counseling if identified as an unhealthy alcohol user.	National Committee for Quality Assurance	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.
§	N/A / N/A	475	CMS349v4	eCQM Specifications	Process	Community/ Population Health	**HIV Screening:** Percentage of patients aged 15-65 at the start of the measurement period who were between 15-65 years old when tested for HIV.	Centers for Disease Control and Prevention	We propose to include this measure in the Certified Nurse Midwife specialty set as it is clinically relevant to this clinician type.

B.6. Chiropractic Medicine

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Chiropractic Medicine specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Chiropractic Medicine specialty set.

B.6. Chiropractic Medicine

PREVIOUSLY FINALIZED MEASURES IN THE CHIROPRACTIC MEDICINE SET

National Committee for Quality Assurance
* ! (Care Coordination)	N/A / N/A	265	N/A	MIPS CQMs Specifications	Process	Communication and Care Coordination	**Biopsy Follow-Up:** Percentage of new patients whose biopsy results have been reviewed and communicated to the primary care/referring physician and patient.	American Academy of Dermatology
* ! (Care Coordination)	N/A / N/A	374	CMS50v10	eCQM Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services
	N/A / N/A	402	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance

B.9. Dermatology

PREVIOUSLY FINALIZED MEASURES IN THE DERMATOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Outcome)	N/A / N/A	410	N/A	MIPS CQMs Specifications	Outcome	Person and Caregiver-Centered Experience and Outcomes	**Psoriasis: Clinical Response to Systemic Medications:** Percentage of psoriasis vulgaris patients receiving systemic medication who meet minimal physician-or patient- reported disease activity levels. It is implied that establishment and maintenance of an established minimum level of disease control as measured by physician-and/or patient-reported outcomes will increase patient satisfaction with and adherence to treatment.	American Academy of Dermatology
! (Care Coordination)	N/A / N/A	440	N/A	MIPS CQMs Specifications	Process	Communication and Care Coordination	**Skin Cancer: Biopsy Reporting Time – Pathologist to Clinician:** Percentage of biopsies with a diagnosis of cutaneous Basal Cell Carcinoma (BCC) and Squamous Cell Carcinoma (SCC), or melanoma (including in situ disease) in which the pathologist communicates results to the clinician within 7 days from the time when the tissue specimen was received by the pathologist.	American Academy of Dermatology

B.9. Dermatology

MEASURES PROPOSED FOR **ADDITION** TO THE DERMATOLOGY SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Inclusion**
*	N/A/ N/A	176	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Tuberculosis Screening Prior to First Course Biologic Therapy:** If a patient has been newly prescribed a biologic disease-modifying anti-rheumatic drug (DMARD) therapy, then the medical record should indicate TB testing in the preceding 12-month period.	American College of Rheumatology	We propose to include this measure in the Dermatology specialty set as it is clinically relevant to this clinician type. Previous stakeholder feedback resulted in an expanded list of acceptable medications, proposed in Table D.20, which now cover the broader dermatological patient population. With this expansion, and the clinical relevance to this clinician type, we propose to add to the Dermatology specialty set.

B.9. Dermatology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR REMOVAL FROM THE DERMATOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	137	N/A	MIPS CQMs Specifications	Structure	Communication and Care Coordination	**Melanoma: Continuity of Care – Recall System:** Percentage of patients, regardless of age, with a current diagnosis of melanoma or a history of melanoma whose information was entered, at least once within a 12-month period, into a recall system that includes: • A target date for the next complete physical skin exam, AND • A process to follow up with patients who either did not make an appointment within the specified timeframe or who missed a scheduled appointment.	American Academy of Dermatology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	337	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Psoriasis: Tuberculosis (TB) Prevention for Patients with Psoriasis, Psoriatic Arthritis and Rheumatoid Arthritis on a Biological Immune Response Modifier:** Percentage of patients, regardless of age, with psoriasis, psoriatic arthritis and/or rheumatoid arthritis on a biological immune response modifier whose providers are ensuring active tuberculosis prevention either through negative standard tuberculosis screening tests or are reviewing the patient's history to determine if they have had appropriate management for a recent or prior positive test.	American Academy of Dermatology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.10. Diagnostic Radiology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Diagnostic Radiology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Diagnostic Radiology specialty set.

B.10. Diagnostic Radiology

! (Appropriate Use)	N/A / N/A	406	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Appropriate Follow-Up Imaging for Incidental Thyroid Nodules in Patients:** Percentage of final reports for computed tomography (CT), CT angiography (CTA) or magnetic resonance imaging (MRI) or magnetic resonance angiogram (MRA) studies of the chest or neck for patients aged 18 years and older with no known thyroid disease with a thyroid nodule < 1.0 cm noted incidentally with follow-up imaging recommended.	American College of Radiology
	N/A / N/A	436	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Radiation Consideration for Adult CT: Utilization of Dose Lowering Techniques:** Percentage of final reports for patients aged 18 years and older undergoing computed tomography (CT) with documentation that one or more of the following dose reduction techniques were used: • Automated exposure control. • Adjustment of the mA and/or kV according to patient size. • Use of iterative reconstruction technique.	American College of Radiology/ National Committee for Quality Assurance

B.10. Diagnostic Radiology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE DIAGNOSTIC RADIOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0507/ N/A	195	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Radiology: Stenosis Measurement in Carotid Imaging Reports:** Percentage of final reports for carotid imaging studies (neck magnetic resonance angiography [MRA], neck computed tomography angiography [CTA], neck duplex ultrasound, carotid angiogram) performed that include direct or indirect reference to measurements of distal internal carotid diameter as the denominator for stenosis measurement.	American College of Radiology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0509/ N/A	225	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Structure	Communication and Care Coordination	**Radiology: Reminder System for Screening Mammograms:** Percentage of patients undergoing a screening mammogram whose information is entered into a reminder system with a target due date for the next mammogram.	American College of Radiology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.11. Emergency Medicine

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Emergency Medicine specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Emergency Medicine specialty set.

MEASURES PROPOSED FOR **ADDITION** TO THE FAMILY MEDICINE SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Inclusion**
! (Outcome)	N/A/ N/A	TBD	N/A	MIPS CQMs Specifications	Patient-Reported Outcome-Based Performance Measure	Person and Caregiver-centered Experience and Outcomes	**Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM):** The Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM) uses the PCPCM PROM (a comprehensive and parsimonious set of 11 patient-reported items) to assess the broad scope of primary care. Unlike other primary care measures, the PCPCM PRO-PM measures the high value aspects of primary care based on a patient's relationship with the provider or practice. Patients identify the PCPCM PROM as meaningful and able to communicate the quality of their care to their clinicians and/or care team. The items within the PCPCM PROM are based on extensive stakeholder engagement and comprehensive reviews of the literature.	The American Board of Family Medicine	We propose to include this measure in the Family Medicine specialty set as it is clinically relevant to this clinician type. This measure assesses the element of patient experience in care quality within the broad scope of primary care. Capturing the voice of the patient is an important component of delivering high-value primary care which is a focus of family medicine. Therefore, given the expansive purview of this specialty and applicability of this component in improving patient care, we propose the inclusion of this measure within the Family Medicine specialty set. See Table A.3 for rationale.

B.13. Family Medicine

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE FAMILY MEDICINE SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	050	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older:** Percentage of female patients aged 65 years and older with a diagnosis of urinary incontinence with a documented plan of care for urinary incontinence at least once within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0101 / N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	337	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Psoriasis: Tuberculosis (TB) Prevention for Patients with Psoriasis, Psoriatic Arthritis and Rheumatoid Arthritis on a Biological Immune Response Modifier:** Percentage of patients, regardless of age, with psoriasis, psoriatic arthritis and/or rheumatoid arthritis on a biological immune response modifier whose providers are ensuring active tuberculosis prevention either through negative standard tuberculosis screening tests or are reviewing the patient's history to determine if they have had appropriate management for a recent or prior positive test.	American Academy of Dermatology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0209 / N/A	342	N/A	MIPS CQMs Specifications	Outcome	Person and Caregiver-Centered Experience and Outcomes	**Pain Brought Under Control Within 48 Hours:** Patients aged 18 and older who report being uncomfortable because of pain at the initial assessment (after admission to palliative care services) who report pain was brought to a comfortable level within 48 hours.	National Hospice and Palliative Care Organization	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.13. Family Medicine

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE FAMILY MEDICINE SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	444	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Medication Management for People with Asthma:** The percentage of patients 5-64 years of age during the performance period who were identified as having persistent asthma and were dispensed appropriate medications that they remained on for at least 75% of their treatment period.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.14. Gastroenterology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Gastroenterology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Gastroenterology specialty set.

Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user.	National Committee for Quality Assurance
§	N/A / N/A	275	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Inflammatory Bowel Disease (IBD): Assessment of Hepatitis B Virus (HBV) Status Before Initiating Anti-TNF (Tumor Necrosis Factor) Therapy:** Percentage of patients with a diagnosis of inflammatory bowel disease (IBD) who had Hepatitis B Virus (HBV) status assessed and results interpreted prior to initiating anti-TNF (tumor necrosis factor) therapy.	American Gastroenterological Association
§ ! (Care Coordination)	0658 / N/A	320	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Appropriate Follow-Up Interval for Normal Colonoscopy in Average Risk Patients:** Percentage of patients aged 50 to 75 years of age receiving a screening colonoscopy without biopsy or polypectomy who had a recommended follow-up interval of at least 10 years for repeat colonoscopy documented in their colonoscopy report.	American Gastroenterological Association
* ! (Care Coordination)	N/A / N/A	374	CMS50v10	eCQM Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services
§	N/A / N/A	401	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Hepatitis C: Screening for Hepatocellular Carcinoma (HCC) in Patients with Cirrhosis**: Percentage of patients aged 18 years and older with a diagnosis of chronic hepatitis C cirrhosis who underwent imaging with either ultrasound, contrast enhanced CT or MRI for hepatocellular carcinoma (HCC) at least once within the 12-month submission period.	American Gastroenterological Association

B.14. Gastroenterology

PREVIOUSLY FINALIZED MEASURES IN THE GASTROENTEROLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
	N/A/ N/A	402	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance
*	N/A / N/A	425	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Photodocumentation of Cecal Intubation:** The rate of screening and surveillance colonoscopies for which photodocumentation of at least two landmarks of cecal intubation is performed to establish a complete examination.	American Society for Gastrointestinal Endoscopy
§	2152 / N/A	431	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Unhealthy Alcohol Use: Screening & Brief Counseling:** Percentage of patients aged 18 years and older who were screened for unhealthy alcohol use using a systematic screening method at least once within the last 12 months AND who received brief counseling if identified as an unhealthy alcohol user.	National Committee for Quality Assurance
§ ! (Efficiency)	N/A / N/A	439	N/A	MIPS CQMs Specifications	Efficiency	Efficiency and Cost Reduction	**Age Appropriate Screening Colonoscopy:** The percentage of screening colonoscopies performed in patients greater than or equal to 86 years of age from January 1 to December 31.	American Gastroenterological Association

B.14. Gastroenterology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE GASTROENTEROLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A/ N/A	317	CMS22v10	Medicare Part B Claims Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.15 General Surgery

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the General Surgery specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed General Surgery specialty set.

B.15. General Surgery

PREVIOUSLY FINALIZED MEASURES IN THE GENERAL SURGERY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Care Coordination)	0326 / N/A	047	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Advance Care Plan:** Percentage of patients aged 65 years and older who have an advance care plan or surrogate decision maker documented in the medical record or documentation in the medical record that an advance care plan was discussed but the patient did not wish or was not able to name a surrogate decision maker or provide an advance care plan.	National Committee for Quality Assurance
* §	N/A / N/A	128	CMS69 v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan:** Percentage of patients aged 18 years and older with a BMI documented during the current encounter or within the previous twelve months AND who had a follow-up plan documented if most recent BMI was outside of normal parameters.	Centers for Medicare & Medicaid Services
§ ! (Patient Safety)	N/A / N/A	130	CMS68 v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Documentation of Current Medications in the Medical Record:** Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.	Centers for Medicare & Medicaid Services
* §	0028 / 0028e	226	CMS13 8v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user.	National Committee for Quality Assurance
	N/A / N/A	264	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Sentinel Lymph Node Biopsy for Invasive Breast Cancer**: The percentage of clinically node negative (clinical stage T1N0M0 or T2N0M0) breast cancer patients before or after neoadjuvant systemic therapy, who undergo a sentinel lymph node (SLN) procedure.	American Society of Breast Surgeons
! (Outcome)	N/A / N/A	354	N/A	MIPS CQMs Specifications	Outcome	Patient Safety	**Anastomotic Leak Intervention**: Percentage of patients aged 18 years and older who required an anastomotic leak intervention following gastric bypass or colectomy surgery.	American College of Surgeons

§ ! (Outcome)	N/A / N/A	355	N/A	MIPS CQMs Specifications	Outcome	Patient Safety	**Unplanned Reoperation within the 30 Day Postoperative Period:** Percentage of patients aged 18 years and older who had any unplanned reoperation within the 30 day postoperative period.	American College of Surgeons
! (Outcome)	N/A / N/A	356	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Unplanned Hospital Readmission within 30 Days of Principal Procedure:** Percentage of patients aged 18 years and older who had an unplanned hospital readmission within 30 days of principal procedure.	American College of Surgeons
! (Outcome)	N/A / N/A	357	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Surgical Site Infection (SSI):** Percentage of patients aged 18 years and older who had a surgical site infection (SSI).	American College of Surgeons
* ! (Patient Experience)	N/A / N/A	358	N/A	MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Patient-Centered Surgical Risk Assessment and Communication:** Percentage of patients who underwent a non-emergency surgery who had their personalized risks of postoperative complications assessed by their surgical team prior to surgery using a clinical data-based, patient-specific risk calculator and who received personal discussion of those risks with the surgeon.	American College of Surgeons
* ! (Care Coordination)	N/A / N/A	374	CMS50 v10	eCQM Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services
	N/A / N/A	402	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance

B.15. General Surgery

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE GENERAL SURGERY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0268 / N/A	021	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin:** Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.16. Geriatrics

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Geriatrics specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Geriatrics specialty set.

B.16. Geriatrics

MEASURES PROPOSED FOR **ADDITION** TO THE INTERNAL MEDICINE SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Inclusion**
! (Outcome)	N/A/ N/A	TBD	N/A	MIPS CQMs Specifications	Patient-Reported Outcome-Based Performance Measure	Person and Caregiver-centered Experience and Outcomes	**Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM):** The Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure (PCPCM PRO-PM) uses the PCPCM PROM (a comprehensive and parsimonious set of 11 patient-reported items) to assess the broad scope of primary care. Unlike other primary care measures, the PCPCM PRO-PM measures the high value aspects of primary care based on a patient's relationship with the provider or practice. Patients identify the PCPCM PROM as meaningful and able to communicate the quality of their care to their clinicians and/or care team. The items within the PCPCM PROM are based on extensive stakeholder engagement and comprehensive reviews of the literature.	The American Board of Family Medicine	We propose to include this measure in the Internal Medicine specialty set as it is clinically relevant to this clinician type. This measure assesses the element of patient experience in care quality within the broad scope of primary care. Capturing the voice of the patient is an important component of delivering high-value primary care which is a focus of internal medicine. Therefore, given the expansive purview of this specialty and applicability of this component in improving patient care, we propose the inclusion of this measure within the Internal Medicine specialty set. See Table A.3 for rationale.

B.19. Internal Medicine

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE INTERNAL MEDICINE SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	050	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older:** Percentage of female patients aged 65 years and older with a diagnosis of urinary incontinence with a documented plan of care for urinary incontinence at least once within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0101 / N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented**: Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	337	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Psoriasis: Tuberculosis (TB) Prevention for Patients with Psoriasis, Psoriatic Arthritis and Rheumatoid Arthritis on a Biological Immune Response Modifier:** Percentage of patients, regardless of age, with psoriasis, psoriatic arthritis and/or rheumatoid arthritis on a biological immune response modifier whose providers are ensuring active tuberculosis prevention either through negative standard tuberculosis screening tests or are reviewing the patient's history to determine if they have had appropriate management for a recent or prior positive test.	American Academy of Dermatology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0209 / N/A	342	N/A	MIPS CQMs Specifications	Outcome	Person and Caregiver-Centered Experience and Outcomes	**Pain Brought Under Control Within 48 Hours:** Patients aged 18 and older who report being uncomfortable because of pain at the initial assessment (after admission to palliative care services) who report pain was brought to a comfortable level within 48 hours.	National Hospice and Palliative Care Organization	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.19. Internal Medicine

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE INTERNAL MEDICINE SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A/ N/A	444	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Medication Management for People with Asthma:** The percentage of patients 5-64 years of age during the performance period who were identified as having persistent asthma and were dispensed appropriate medications that they remained on for at least 75% of their treatment period.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.20. Interventional Radiology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Interventional Radiology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Interventional Radiology specialty set.

B.20. Interventional Radiology

PREVIOUSLY FINALIZED MEASURES IN THE INTERVENTIONAL RADIOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Patient Safety)	2726 / N/A	076	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Prevention of Central Venous Catheter (CVC) - Related Bloodstream Infections:** Percentage of patients, regardless of age, who undergo central venous catheter (CVC) insertion for whom CVC was inserted with all elements of maximal sterile barrier technique, hand hygiene, skin preparation and, if ultrasound is used, sterile ultrasound techniques followed.	American Society of Anesthesiologists
! (Patient Safety)	N/A / N/A	145	N/A	Medicare Part B Claims Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Radiology: Exposure Dose Indices or Exposure Time and Number of Images Reported for Procedures Using Fluoroscopy:** Final reports for procedures using fluoroscopy that document radiation exposure indices, or exposure time and number of fluorographic images (if radiation exposure indices are not available).	American College of Radiology
* ! (Care Coordination)	N/A / N/A	374	CMS50v10	MIPS CQMs Specifications, eCQM Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services
* ! (Outcome)	N/A / N/A	409	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Clinical Outcome Post Endovascular Stroke Treatment:** Percentage of patients with a mRs score of 0 to 2 at 90 days following endovascular stroke intervention.	Society of Interventional Radiology
* ! (Outcome)	N/A / N/A	413	N/A	MIPS CQMs Specifications	Intermediate Outcome	Effective Clinical Care	**Door to Puncture Time for Endovascular Stroke Treatment:** Percentage of patients undergoing endovascular stroke treatment who have a door to puncture time of less than two hours.	Society of Interventional Radiology
! (Outcome)	N/A / N/A	420	N/A	MIPS CQMs Specifications	Patient-Reported Outcome-Based Performance Measure	Effective Clinical Care	**Varicose Vein Treatment with Saphenous Ablation: Outcome Survey:** Percentage of patients treated for varicose veins (CEAP C2-S) who are treated with saphenous ablation (with or without adjunctive tributary treatment) that report an improvement on a disease specific patient reported outcome survey instrument after treatment.	Society of Interventional Radiology
	N/A / N/A	421	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Appropriate Assessment of Retrievable Inferior Vena Cava (IVC) Filters for Removal:** Percentage of patients in whom a retrievable IVC filter is placed who, within 3 months post-placement, have a documented assessment for the appropriateness of continued filtration, device removal or the inability to contact the patient with at least two attempts.	Society of Interventional Radiology

B.20. Interventional Radiology

PREVIOUSLY FINALIZED MEASURES IN THE INTERVENTIONAL RADIOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Patient Safety)	N/A / N/A	465	N/A	MIPS CQMs Specifications	Process	Patient Safety	**Uterine Artery Embolization Technique: Documentation of Angiographic Endpoints and Interrogation of Ovarian Arteries:** The percentage of patients with documentation of angiographic endpoints of embolization AND the documentation of embolization strategies in the presence of unilateral or bilateral absent uterine arteries.	Society of Interventional Radiology

B.21. Mental/Behavioral Health

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Mental/Behavioral Health specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Mental/Behavioral Health specialty set.

B.21. Mental/Behavioral Health

PREVIOUSLY FINALIZED MEASURES IN THE MENTAL/BEHAVIORAL HEALTH SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
*	N/A / N/A	009	CMS128v10	eCQM Specifications	Process	Effective Clinical Care	**Anti-Depressant Medication Management:** Percentage of patients 18 years of age and older who were treated with antidepressant medication, had a diagnosis of major depression, and who remained on an antidepressant medication treatment. Two rates are reported. a. Percentage of patients who remained on an antidepressant medication for at least 84 days (12 weeks). b. Percentage of patients who remained on an antidepressant medication for at least 180 days (6 months).	National Committee for Quality Assurance
	N/A/ / 0104e	107	CMS161v10	eCQM Specifications	Process	Effective Clinical Care	**Adult Major Depressive Disorder (MDD): Suicide Risk Assessment:** All patient visits during which a new diagnosis of MDD or a new diagnosis of recurrent MDD was identified for patients aged 18 years and older with a suicide risk assessment completed during the visit.	Mathematica
* §	N/A / N/A	128	CMS69v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan:** Percentage of patients aged 18 years and older with a BMI documented during the current encounter or within the previous twelve months AND who had a follow-up plan documented if most recent BMI was outside of normal parameters.	Centers for Medicare & Medicaid Services
§ ! (Patient Safety)	N/A / N/A	130	CMS68v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Documentation of Current Medications in the Medical Record:** Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.	Centers for Medicare & Medicaid Services
* §	N/A / N/A	134	CMS2v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Screening for Depression and Follow-Up Plan:** Percentage of patients aged 12 years and older screened for depression on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan is documented on the date of the eligible encounter.	Centers for Medicare & Medicaid Services

B.21. Mental/Behavioral Health

PREVIOUSLY FINALIZED MEASURES IN THE MENTAL/BEHAVIORAL HEALTH SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Patient Safety)	N/A / N/A	181	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Elder Maltreatment Screen and Follow-Up Plan:** Percentage of patients aged 65 years and older with a documented elder maltreatment screen using an Elder Maltreatment Screening Tool on the date of encounter AND a documented follow-up plan on the date of the positive screen.	Centers for Medicare & Medicaid Services
* §	0028 / 0028e	226	CMS138v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user.	National Committee for Quality Assurance
*	N/A / 2872e	281	CMS149v10	eCQM Specifications	Process	Effective Clinical Care	**Dementia: Cognitive Assessment:** Percentage of patients, regardless of age, with a diagnosis of dementia for whom an assessment of cognition is performed and the results reviewed at least once within a 12-month period.	American Academy of Neurology
	N/A / N/A	282	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Dementia: Functional Status Assessment:** Percentage of patients with dementia for whom an assessment of functional status was performed at least once in the last 12 months.	American Psychiatric Association/ American Academy of Neurology
	N/A / N/A	283	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Dementia Associated Behavioral and Psychiatric Symptoms Screening and Management:** Percentage of patients with dementia for whom there was a documented screening for behavioral and psychiatric symptoms, including depression, and for whom, if symptoms screening was positive, there was also documentation of recommendations for management in the last 12 months.	American Psychiatric Association/ American Academy of Neurology
! (Patient Safety)	N/A / N/A	286	N/A	MIPS CQMs Specifications	Process	Patient Safety	**Dementia: Safety Concern Screening and Follow-Up for Patients with Dementia:** Percentage of patients with dementia or their caregiver(s) for whom there was a documented safety concerns screening in two domains of risk: 1) dangerousness to self or others and 2) environmental risks; and if safety concerns screening was positive in the last 12 months, there was documentation of mitigation recommendations, including but not limited to referral to other resources.	American Psychiatric Association/ American Academy of Neurology

B.21. Mental/Behavioral Health

PREVIOUSLY FINALIZED MEASURES IN THE MENTAL/BEHAVIORAL HEALTH SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Care Coordination)	N/A / N/A	288	N/A	MIPS CQMs Specifications	Process	Communication and Care Coordination	**Dementia: Education and Support of Caregivers for Patients with Dementia:** Percentage of patients with dementia whose caregiver(s) were provided with education on dementia disease management and health behavior changes AND were referred to additional resources for support in the last 12 months.	American Psychiatric Association/ American Academy of Neurology
* §	N/A / N/A	366	CMS136v11	eCQM Specifications	Process	Effective Clinical Care	**Follow-Up Care for Children Prescribed ADHD Medication (ADD):** Percentage of children 6-12 years of age and newly dispensed a medication for attention-deficit/hyperactivity disorder (ADHD) who had appropriate follow-up care. Two rates are reported. a) Percentage of children who had one follow-up visit with a practitioner with prescribing authority during the 30-Day Initiation Phase. b) Percentage of children who remained on ADHD medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two additional follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.	National Committee for Quality Assurance
* § ! (Outcome)	0710 / 0710e	370	CMS159v10	eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Depression Remission at Twelve Months:** The percentage of adolescent patients 12 to 17 years of age and adult patients 18 years of age or older with major depression or dysthymia who reached remission 12 months (+/- 60 days) after an index event date.	Minnesota Community Measurement
! (Patient Safety)	N/A / 1365e	382	CMS177v10	eCQM Specifications	Process	Patient Safety	**Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment:** Percentage of patient visits for those patients aged 6 through 17 years with a diagnosis of major depressive disorder with an assessment for suicide risk.	Mathematica
* § ! (Outcome)	1879 / N/A	383	N/A	MIPS CQMs Specifications	Intermediate Outcome	Patient Safety	**Adherence to Antipsychotic Medications for Individuals with Schizophrenia:** Percentage of individuals at least 18 years of age as of the beginning of the performance period with schizophrenia or schizoaffective disorder who had at least two prescriptions filled for any antipsychotic medication and who had a Proportion of Days Covered (PDC) of at least 0.8 for antipsychotic medications during the performance period.	Centers for Medicare & Medicaid Services

B.21. Mental/Behavioral Health

PREVIOUSLY FINALIZED MEASURES IN THE MENTAL/BEHAVIORAL HEALTH SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* § ! (Care Coordination)	0576 / N/A	391	N/A	MIPS CQMs Specifications	Process	Communication / Care Coordination	**Follow-up After Hospitalization for Mental Illness (FUH):** The percentage of discharges for patients 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health practitioner. Two rates are submitted: • The percentage of discharges for which the patient received follow-up within 30 days after discharge. • The percentage of discharges for which the patient received follow-up within 7 days after discharge.	National Committee for Quality Assurance
	N/A / N/A	402	NA	MIPS CQMs Specifications	Process	Community/ Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance
§	2152 / N/A	431	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Unhealthy Alcohol Use: Screening & Brief Counseling:** Percentage of patients aged 18 years and older who were screened for unhealthy alcohol use using a systematic screening method at least once within the last 12 months AND who received brief counseling if identified as an unhealthy alcohol user.	National Committee for Quality Assurance
! (Opioid)	N/A / N/A	468	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Continuity of Pharmacotherapy for Opioid Use Disorder (OUD):** Percentage of adults aged 18 years and older with pharmacotherapy for opioid use disorder (OUD) who have at least 180 days of continuous treatment.	University of Southern California

B.21. Mental/Behavioral Health

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE MENTAL/BEHAVIORAL HEALTH SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community / Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented**: Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	374	CMS50v10	eCQM Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal from this specialty set beginning with the 2024 MIPS payment year. Specialty specific coding was not added to this quality measure for the 2022 performance period. In addition, the measure's limited existing mental/behavioral health coding has resulted in limited submissions of this measure historically. Therefore, this measure has minimal eligibility for this clinician type, and we propose to remove it.

B.22. Nephrology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Nephrology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Nephrology specialty set.

B.22. Nephrology

PREVIOUSLY FINALIZED MEASURES IN THE NEPHROLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* § ! (Outcome)	0059 / N/A	001	CMS122v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Intermediate Outcome	Effective Clinical Care	**Diabetes: Hemoglobin A1c (HbA1c) Poor Control (>9%):** Percentage of patients 18-75 years of age with diabetes who had hemoglobin A1c > 9.0% during the measurement period.	National Committee for Quality Assurance
! (Care Coordination)	0326 / N/A	047	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Advance Care Plan:** Percentage of patients aged 65 years and older who have an advance care plan or surrogate decision maker documented in the medical record or documentation in the medical record that an advance care plan was discussed but the patient did not wish or was not able to name a surrogate decision maker or provide an advance care plan.	National Committee for Quality Assurance
*	0041 / 0041e	110	CMS147v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Influenza Immunization:** Percentage of patients aged 6 months and older seen for a visit between October 1 and March 31 who received an influenza immunization OR who reported previous receipt of an influenza immunization.	National Committee for Quality Assurance
*	N/A / N/A	111	CMS127v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Pneumococcal Vaccination Status for Older Adults:** Percentage of patients 65 years of age and older who have ever received a pneumococcal vaccine.	National Committee for Quality Assurance
* §	0062 / N/A	119	CMS134v10	eCQM Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Diabetes: Medical Attention for Nephropathy:** The percentage of patients 18-75 years of age with diabetes who had a nephropathy screening test or evidence of nephropathy during the measurement period.	National Committee for Quality Assurance
§ ! (Patient Safety)	N/A / N/A	130	CMS68v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Documentation of Current Medications in the Medical Record:** Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.	Centers for Medicare & Medicaid Services

B.22. Nephrology

PREVIOUSLY FINALIZED MEASURES IN THE NEPHROLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* § ! (Care Coordination)	N/A / N/A	182	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Functional Outcome Assessment:** Percentage of visits for patients aged 18 years and older with documentation of a current functional outcome assessment using a standardized functional outcome assessment tool on the date of the encounter AND documentation of a care plan based on identified functional outcome deficiencies on the date of the identified deficiencies.	Centers for Medicare & Medicaid Services
* ! (Patient Safety)	0101 / N/A	318	CMS139v10	eCQM Specifications, CMS Web Interface Measure Specifications	Process	Patient Safety	**Falls: Screening for Future Fall Risk:** Percentage of patients 65 years of age and older who were screened for future fall risk during the measurement period.	National Committee for Quality Assurance
* §	N/A / N/A	400	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**One-Time Screening for Hepatitis C Virus (HCV) for Patients at Risk:** Percentage of patients aged 18 years and older with one or more of the following: a history of injection drug use, receipt of a blood transfusion prior to 1992, receiving maintenance hemodialysis, OR birthdate in the years 1945-1965 who received one-time screening for hepatitis C virus (HCV) infection.	American Gastroenterological Association

B.22. Nephrology

MEASURES PROPOSED FOR **ADDITION** TO THE NEPHROLOGY SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Inclusion**
! (Outcome)	N/A/ N/A	TBD	N/A	MIPS CQMs Specifications	Intermediate Outcome	Effective Clinical Care	**Hemodialysis Vascular Access: Practitioner Level Long-term Catheter Rate**: Percentage of adult hemodialysis patient-months using a catheter continuously for three months or longer for vascular access attributable to an individual practitioner or group practice.	Centers for Medicare & Medicaid Services	We propose to include this measure in the Nephrology specialty set as it is clinically relevant to this clinician type. Given the high rates that patients with kidney diseases are treated and managed within this specialty, we recommend the inclusion of this measure in the Nephrology specialty set. See Table A.2 for rationale.

B.22. Nephrology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE NEPHROLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community / Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.23. Neurology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Neurology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Neurology specialty set.

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE NEUROLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0101 / N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/N/A	317	CMS22 v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented**: Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.24. Neurosurgical

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Neurosurgical specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Neurosurgical specialty set.

MEASURES PROPOSED FOR **ADDITION** TO THE NUTRITION/DIETICIAN SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Inclusion**
	0417/ N/A	126	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Diabetes Mellitus: Diabetic Foot and Ankle Care, Peripheral Neuropathy – Neurological Evaluation**: Percentage of patients aged 18 years and older with a diagnosis of diabetes mellitus who had a neurological examination of their lower extremities within 12 months.	American Podiatric Medical Association	We propose to include this measure in the Nutrition/ Dietician specialty set as it is clinically relevant to this clinician type. Based on previous stakeholder feedback, many registered dietitians who are Medicare providers are certified diabetes educators, so these services would be very appropriate for them to perform and report on. As such, we agreed with the feedback and propose to add to the Nutrition/Dietician specialty set.
	0416/ N/A	127	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Diabetes Mellitus: Diabetic Foot and Ankle Care, Ulcer Prevention – Evaluation of Footwear**: Percentage of patients aged 18 years and older with a diagnosis of diabetes mellitus who were evaluated for proper footwear and sizing.	American Podiatric Medical Association	We propose to include this measure in the Nutrition/ Dietician specialty set as it is clinically relevant to this clinician type. Based on previous stakeholder feedback, many registered dietitians who are Medicare providers are certified diabetes educators, so these services would be very appropriate for them to perform and report on. As such, we agreed with the feedback and propose to add to the Nutrition/Dietician specialty set.

B.25. Nutrition/Dietician

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE NUTRITION/DIETICIAN SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0059 / N/A	001	CMS122v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Intermediate Outcome	Effective Clinical Care	**Diabetes: Hemoglobin A1c (HbA1c) Poor Control (>9%):** Percentage of patients 18-75 years of age with diabetes who had hemoglobin A1c > 9.0% during the measurement period.	National Committee for Quality Assurance	This measure is being proposed for removal from this specialty set beginning with the 2024 MIPS payment year. Nutrition/ Dietician specialty specific coding was not finalized for inclusion for the 2022 performance period. Therefore, we propose to remove the measure from the Nutrition/Dietician specialty set as it is no longer relevant to this specialty.

B.26. Obstetrics/Gynecology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Obstetrics/Gynecology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Obstetrics/Gynecology specialty set.

Centers for Medicare & Medicaid Services
§	N/A / N/A	475	CMS349v4	eCQM Specifications	Process	Community/Population Health	**HIV Screening:** Percentage of patients aged 15-65 at the start of the measurement period who were between 15-65 years old when tested for HIV.	Centers for Disease Control and Prevention

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR REMOVAL FROM THE OBSTETRICS/GYNECOLOGY SET

Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.

NQF # / eCQM NQF #	Quality #	CMS eCQM ID	Collection Type	Measure Type	National Quality Strategy Domain	Measure Title and Description	Measure Steward	Rationale for Removal
N/A / N/A	050	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older:** Percentage of female patients aged 65 years and older with a diagnosis of urinary incontinence with a documented plan of care for urinary incontinence at least once within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	429	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Pelvic Organ Prolapse: Preoperative Screening for Uterine Malignancy:** Percentage of patients who are screened for uterine malignancy prior to vaginal closure or obliterative surgery for pelvic organ prolapse.	American Urogynecologic Society	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	434	N/A	MIPS CQMs Specifications	Outcome	Patient Safety	**Proportion of Patients Sustaining a Ureter Injury at the Time of Pelvic Organ Prolapse Repair:** Percentage of patients undergoing pelvic organ prolapse repairs who sustain an injury to the ureter recognized either during or within 30 days after surgery.	American Urogynecologic Society	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.27a. Oncology/Hematology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Oncology/Hematology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Oncology/Hematology specialty set.

B.27a. Oncology/Hematology

PREVIOUSLY FINALIZED MEASURES IN THE ONCOLOGY/HEMATOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Care Coordination)	0326 / N/A	047	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Advance Care Plan:** Percentage of patients aged 65 years and older who have an advance care plan or surrogate decision maker documented in the medical record or documentation in the medical record that an advance care plan was discussed but the patient did not wish or was not able to name a surrogate decision maker or provide an advance care plan.	National Committee for Quality Assurance
* § ! (Appropriate Use)	0389 / 0389e	102	CMS129 v11	eCQM Specifications, MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Prostate Cancer: Avoidance of Overuse of Bone Scan for Staging Low Risk Prostate Cancer Patients:** Percentage of patients, regardless of age, with a diagnosis of prostate cancer at low (or very low) risk of recurrence receiving interstitial prostate brachytherapy, OR external beam radiotherapy to the prostate, OR radical prostatectomy who did not have a bone scan performed at any time since diagnosis of prostate cancer.	Centers for Medicare & Medicaid Services
*	0041 / 0041e	110	CMS147 v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Influenza Immunization:** Percentage of patients aged 6 months and older seen for a visit between October 1 and March 31 who received an influenza immunization OR who reported previous receipt of an influenza immunization.	National Committee for Quality Assurance
*	N/A / N/A	111	CMS127 v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Pneumococcal Vaccination Status for Older Adults:** Percentage of patients 65 years of age and older who have ever received a pneumococcal vaccine.	National Committee for Quality Assurance
§ ! (Patient Safety)	N/A / N/A	130	CMS68v 11	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Documentation of Current Medications in the Medical Record:** Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.	Centers for Medicare & Medicaid Services

The bone density evaluation must be prior to the start of ADT or within 3 months of the start of ADT.	Oregon Urology Institute

B.27a. Oncology/Hematology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE ONCOLOGY/HEMATOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A / N/A	067	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Hematology: Myelodysplastic Syndrome (MDS) and Acute Leukemias: Baseline Cytogenetic Testing Performed on Bone Marrow:** Percentage of patients aged 18 years and older with a diagnosis of myelodysplastic syndrome (MDS) or an acute leukemia who had baseline cytogenetic testing performed on bone marrow.	American Society of Hematology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	070	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Hematology: Chronic Lymphocytic Leukemia (CLL): Baseline Flow Cytometry**: Percentage of patients aged 18 years and older, seen within a 12-month reporting period, with a diagnosis of chronic lymphocytic leukemia (CLL) made at any time during or prior to the reporting period who had baseline flow cytometry studies performed and documented in the chart.	American Society of Hematology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0383 / N/A	144	N/A	MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Oncology: Medical and Radiation – Plan of Care for Pain:** Percentage of visits for patients, regardless of age, with a diagnosis of cancer currently receiving chemotherapy or radiation therapy who report having pain with a documented plan of care to address pain.	American Society of Clinical Oncology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	317	CMS22 v10	Medicare Part B Claims Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented**: Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.27b. Radiation Oncology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Radiation Oncology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Radiation Oncology specialty set.

B.27b. Radiation Oncology

Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
! (Patient Experience)	N/A / N/A	304	N/A	MIPS CQMs Specifications	Patient Engagement/ Experience	Person and Caregiver-Centered Experience and Outcomes	**Cataracts: Patient Satisfaction within 90 Days Following Cataract Surgery:** Percentage of patients aged 18 years and older who had cataract surgery and were satisfied with their care within 90 days following the cataract surgery, based on completion of the Consumer Assessment of Healthcare Providers and Systems Surgical Care Survey.	American Academy of Ophthalmology
* ! (Care Coordination)	N/A / N/A	374	CMS50v10	eCQM Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services
! (Outcome)	N/A / N/A	384	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Adult Primary Rhegmatogenous Retinal Detachment Surgery: No Return to the Operating Room Within 90 Days of Surgery:** Patients aged 18 years and older who had surgery for primary rhegmatogenous retinal detachment who did not require a return to the operating room within 90 days of surgery.	American Academy of Ophthalmology
! (Outcome)	N/A / N/A	385	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Adult Primary Rhegmatogenous Retinal Detachment Surgery: Visual Acuity Improvement Within 90 Days of Surgery:** Patients aged 18 years and older who had surgery for primary rhegmatogenous retinal detachment and achieved an improvement in their visual acuity, from their preoperative level, within 90 days of surgery in the operative eye.	American Academy of Ophthalmology
! (Outcome)	N/A / N/A	389	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Cataract Surgery: Difference Between Planned and Final Refraction:** Percentage of patients aged 18 years and older who had cataract surgery performed and who achieved a final refraction within +/- 1.0 diopters of their planned (target) refraction.	American Academy of Ophthalmology

B.28. Ophthalmology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR REMOVAL FROM THE OPHTHALMOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0087 / N/A	014	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Age-Related Macular Degeneration (AMD): Dilated Macular Examination:** Percentage of patients aged 50 years and older with a diagnosis of age-related macular degeneration (AMD) who had a dilated macular examination performed which included documentation of the presence or absence of macular thickening or geographic atrophy or hemorrhage AND the level of macular degeneration severity during one or more office visits within the 12-month performance period.	American Academy of Ophthalmology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	019	CMS142v 10	eCQM Specifications, MIPS CQMs Specifications	Process	Communicati on and Care Coordination	**Diabetic Retinopathy: Communication with the Physician Managing Ongoing Diabetes Care:** Percentage of patients aged 18 years and older with a diagnosis of diabetic retinopathy who had a dilated macular or fundus exam performed with documented communication to the physician who manages the ongoing care of the patient with diabetes mellitus regarding the findings of the macular or fundus exam at least once within 12 months.	American Academy of Ophthalmology	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.29. Orthopedic Surgery

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Orthopedic Surgery specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Orthopedic Surgery specialty set.

The change in functional status (FS) is assessed using the FOTO Neck FS patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static/paper-pencil).	Focus on Therapeutic Outcomes, Inc.

B.29. Orthopedic Surgery

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR REMOVAL FROM THE ORTHOPEDIC SURGERY SET

Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.

NQF # / eCQM NQF #	Quality #	CMS eCQM ID	Collection Type	Measure Type	National Quality Strategy Domain	Measure Title and Description	Measure Steward	Rationale for Removal
0268 / N/A	021	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin:** Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUII), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0101 / N/A	154	N/A	Medicare Part B Claims Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.30. Otolaryngology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Otolaryngology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Otolaryngology specialty set.

Centers for Medicare & Medicaid Services

B.30. Otolaryngology

PREVIOUSLY FINALIZED MEASURES IN THE OTOLARYNGOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
§ ! (Patient Safety)	N/A / N/A	130	CMS68v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Documentation of Current Medications in the Medical Record:** Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.	Centers for Medicare & Medicaid Services
! (Care Coordination)	0101 / N/A	155	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Falls: Plan of Care:** Percentage of patients aged 65 years and older with a history of falls that had a plan of care for falls documented within 12 months.	National Committee for Quality Assurance
* §	0028 / 0028e	226	CMS138v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user.	National Committee for Quality Assurance
* ! (Care Coordination)	N/A / N/A	265	N/A	MIPS CQMs Specifications	Process	Communication and Care Coordination	**Biopsy Follow-Up:** Percentage of new patients whose biopsy results have been reviewed and communicated to the primary care/referring physician and patient.	American Academy of Dermatology
	N/A / N/A	277	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Sleep Apnea: Severity Assessment at Initial Diagnosis:** Percentage of patients aged 18 years and older with a diagnosis of obstructive sleep apnea who had an apnea hypopnea index (AHI) or a respiratory disturbance index (RDI) measured at the time of initial diagnosis.	American Academy of Sleep Medicine
	N/A / N/A	279	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Sleep Apnea: Assessment of Adherence to Positive Airway Pressure Therapy:** Percentage of visits for patients aged 18 years and older with a diagnosis of obstructive sleep apnea who were prescribed positive airway pressure therapy who had documentation that adherence to positive airway pressure therapy was objectively measured.	American Academy of Sleep Medicine

B.30. Otolaryngology

PREVIOUSLY FINALIZED MEASURES IN THE OTOLARYNGOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* ! (Patient Safety)	0101 / N/A	318	CMS139v10	eCQM Specifications. CMS Web Interface Measure Specifications	Process	Patient Safety	**Falls: Screening for Future Fall Risk:** Percentage of patients 65 years of age and older who were screened for future fall risk during the measurement period.	National Committee for Quality Assurance
! (Appropriate Use)	N/A / N/A	331	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Adult Sinusitis: Antibiotic Prescribed for Acute Viral Sinusitis (Overuse):** Percentage of patients, aged 18 years and older, with a diagnosis of acute viral sinusitis who were prescribed an antibiotic within 10 days after onset of symptoms.	American Academy of Otolaryngology-Head and Neck Surgery Foundation
! (Appropriate Use)	N/A / N/A	332	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Adult Sinusitis: Appropriate Choice of Antibiotic: Amoxicillin With or Without Clavulanate Prescribed for Patients with Acute Bacterial Sinusitis (Appropriate Use):** Percentage of patients aged 18 years and older with a diagnosis of acute bacterial sinusitis that were prescribed amoxicillin, with or without Clavulanate, as a first line antibiotic at the time of diagnosis.	American Academy of Otolaryngology-Head and Neck Surgery Foundation
! (Outcome)	N/A / N/A	357	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Surgical Site Infection (SSI):** Percentage of patients aged 18 years and older who had a surgical site infection (SSI).	American College of Surgeons
* ! (Patient Experience)	N/A / N/A	358	N/A	MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Patient-Centered Surgical Risk Assessment and Communication:** Percentage of patients who underwent a non-emergency surgery who had their personalized risks of postoperative complications assessed by their surgical team prior to surgery using a clinical data-based, patient-specific risk calculator and who received personal discussion of those risks with the surgeon.	American College of Surgeons
* ! (Care Coordination)	N/A / N/A	374	CMS50v10	eCQM Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Closing the Referral Loop: Receipt of Specialist Report:** Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.	Centers for Medicare & Medicaid Services
! (Outcome)	N/A / N/A	398	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Optimal Asthma Control:** Composite measure of the percentage of pediatric and adult patients whose asthma is well-controlled as demonstrated by one of three age appropriate patient reported outcome tools and not at risk for exacerbation.	Minnesota Community Measurement
	N/A / N/A	402	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance

B.30. Otolaryngology

PREVIOUSLY FINALIZED MEASURES IN THE OTOLARYNGOLOGY SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
§	2152 / N/A	431	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Unhealthy Alcohol Use: Screening & Brief Counseling:** Percentage of patients aged 18 years and older who were screened for unhealthy alcohol use using a systematic screening method at least once within the last 12 months AND who received brief counseling if identified as an unhealthy alcohol user.	National Committee for Quality Assurance
! (Appropriate Use)	0657 / N/A	464	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Otitis Media with Effusion: Systemic Antimicrobials - Avoidance of Inappropriate Use:** Percentage of patients aged 2 months through 12 years with a diagnosis of OME who were not prescribed systemic antimicrobials.	American Academy of Otolaryngology – Head and Neck Surgery Foundation

B.30. Otolaryngology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE OTOLARYNGOLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0268 / N/A	021	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin:** Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0101 / N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.31. Pathology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Pathology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Pathology specialty set.

B.31. Pathology

PREVIOUSLY FNALIZED MEASURES IN THE PATHOLOGY SET								
Indicator	**NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
	N/A / N/A	249	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Barrett's Esophagus:** Percentage of esophageal biopsy reports that document the presence of Barrett's mucosa that also include a statement about dysplasia.	College of American Pathologists
§	N/A / N/A	250	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Effective Clinical Care	**Radical Prostatectomy Pathology Reporting:** Percentage of radical prostatectomy pathology reports that include the pT category, the pN category, the Gleason score and a statement about margin status.	College of American Pathologists
* ! (Care Coordination)	N/A / N/A	395	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Lung Cancer Reporting (Biopsy/Cytology Specimens):** Pathology reports based on biopsy and/or cytology specimens with a diagnosis of primary non-small cell lung cancer classified into specific histologic type or classified as non-small cell lung cancer not otherwise specified (NSCLC-NOS) with an explanation included in the pathology report.	College of American Pathologists
* ! (Care Coordination)	N/A / N/A	396	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Lung Cancer Reporting (Resection Specimens):** Pathology reports based on resection specimens with a diagnosis of primary lung carcinoma that include the pT category, pN category and for non-small cell lung cancer (NSCLC), histologic type.	College of American Pathologists
* ! (Care Coordination)	N/A / N/A	397	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Communication and Care Coordination	**Melanoma Reporting:** Pathology reports for primary malignant cutaneous melanoma that include the pT category and a statement on thickness, ulceration and mitotic rate.	College of American Pathologists
! (Care Coordination)	N/A / N/A	440	N/A	MIPS CQMs Specifications	Process	Communication and Care Coordination	**Skin Cancer: Biopsy Reporting Time – Pathologist to Clinician:** Percentage of biopsies with a diagnosis of cutaneous Basal Cell Carcinoma (BCC) and Squamous Cell Carcinoma (SCC), or melanoma (including in situ disease) in which the pathologist communicates results to the clinician within 7 days from the time when the tissue specimen was received by the pathologist.	American Academy of Dermatology

B.32. Pediatrics

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Pediatrics specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Pediatrics specialty set.

B.32. Pediatrics

PREVIOUSLY FNALIZED MEASURES IN THE PEDIATRICS SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* § ! (Appropriate Use)	0069 / N/A	065	CMS 154v10	eCQM Specifications, MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Appropriate Treatment for Upper Respiratory Infection (URI):** Percentage of episodes for patients 3 months of age and older with a diagnosis of upper respiratory infection (URI) that did not result in an antibiotic dispensing event.	National Committee for Quality Assurance
* § ! (Appropriate Use)	N/A / N/A	066	CMS 146v10	eCQM Specifications, MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Appropriate Testing for Pharyngitis:** The percentage of episodes for patients 3 years and older with a diagnosis of pharyngitis that resulted in an antibiotic dispensing event and a group A streptococcus (strep) test.	National Committee for Quality Assurance
* ! (Appropriate Use)	0654 / N/A	093	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Acute Otitis Externa (AOE): Systemic Antimicrobial Therapy – Avoidance of Inappropriate Use:** Percentage of patients aged 2 years and older with a diagnosis of AOE who were not prescribed systemic antimicrobial therapy.	American Academy of Otolaryngology-Head and Neck Surgery
*	0041 / 0041e	110	CMS 147v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Influenza Immunization:** Percentage of patients aged 6 months and older seen for a visit between October 1 and March 31 who received an influenza immunization OR who reported previous receipt of an influenza immunization.	National Committee for Quality Assurance
* § ! (Appropriate Use)	0058 / N/A	116	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis:** The percentage of episodes for patients ages 3 months and older with a diagnosis of acute bronchitis/bronchiolitis that did not result in an antibiotic dispensing event.	National Committee for Quality Assurance
* §	N/A / N/A	134	CMS 2v11	Medicare Part B Claims Measure Specifications, eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Process	Community/Population Health	**Preventive Care and Screening: Screening for Depression and Follow-Up Plan:** Percentage of patients aged 12 years and older screened for depression on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan is documented on the date of the eligible encounter.	Centers for Medicare & Medicaid Services

B.32. Pediatrics

PREVIOUSLY FNALIZED MEASURES IN THE PEDIATRICS SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
§	0409 / N/A	205	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**HIV/AIDS: Sexually Transmitted Disease Screening for Chlamydia, Gonorrhea, and Syphilis:** Percentage of patients aged 13 years and older with a diagnosis of HIV/AIDS for whom chlamydia, gonorrhea, and syphilis screenings were performed at least once since the diagnosis of HIV infection.	Health Resources and Services Administration
* §	N/A / N/A	239	CMS 155v10	eCQM Specifications	Process	Community/ Population Health	**Weight Assessment and Counseling for Nutrition and Physical Activity for Children and Adolescents:** Percentage of patients 3-17 years of age who had an outpatient visit with a Primary Care Physician (PCP) or Obstetrician/Gynecologist (OB/GYN) and who had evidence of the following during the measurement period. Three rates are reported. • Percentage of patients with height, weight, and body mass index (BMI) percentile documentation. • Percentage of patients with counseling for nutrition. Percentage of patients with counseling for physical activity.	National Committee for Quality Assurance
* §	N/A / N/A	240	CMS 117v10	eCQM Specifications	Process	Community/ Population Health	**Childhood Immunization Status:** Percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV), one measles, mumps and rubella (MMR); three or four H influenza type B (Hib); three hepatitis B (Hep B); one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (Hep A); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday.	National Committee for Quality Assurance
* ! (Opioid)	N/A / N/A	305	CMS 137v10	eCQM Specifications	Process	Effective Clinical Care	**Initiation and Engagement of Alcohol and Other Drug Dependence Treatment:** Percentage of patients 13 years of age and older with a new episode of alcohol or other drug abuse or (AOD) dependence who received the following. Two rates are reported. • Percentage of patients who initiated treatment including either an intervention or medication for the treatment of AOD abuse or dependence within 14 days of the diagnosis. • Percentage of patients who engaged in ongoing treatment including two additional interventions or a medication for the treatment of AOD abuse or dependence within 34 days of the initiation visit. For patients who initiated treatment with a medication, at least one of the two engagement events must be a treatment intervention.	National Committee for Quality Assurance

B.32. Pediatrics

Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* §	N/A / N/A	310	CMS 153v10	eCQM Specifications	Process	Community/ Population Health	**Chlamydia Screening for Women:** Percentage of women 16-24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement period.	National Committee for Quality Assurance
* §	N/A / N/A	366	CMS 136v11	eCQM Specifications	Process	Effective Clinical Care	**Follow-Up Care for Children Prescribed ADHD Medication (ADD):** Percentage of children 6-12 years of age and newly dispensed a medication for attention-deficit/hyperactivity disorder (ADHD) who had appropriate follow-up care. Two rates are reported. a) Percentage of children who had one follow-up visit with a practitioner with prescribing authority during the 30-Day Initiation Phase. b) Percentage of children who remained on ADHD medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two additional follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.	National Committee for Quality Assurance
* § ! (Outcome)	0710 / 0710e	370	CMS 159v10	eCQM Specifications, CMS Web Interface Measure Specifications, MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Depression Remission at Twelve Months:** The percentage of adolescent patients 12 to 17 years of age and adult patients 18 years of age or older with major depression or dysthymia who reached remission 12 months (+/- 60 days) after an index event date.	Minnesota Community Measurement
*	N/A / N/A	379	CMS 74v11	eCQM Specifications	Process	Effective Clinical Care	**Primary Caries Prevention Intervention as Offered by Primary Care Providers, including Dentists:** Percentage of children, 6 months - 20 years of age, who received a fluoride varnish application during the measurement period.	Centers for Medicare & Medicaid Services
! (Patient Safety)	N/A / 1365e	382	CMS 177v10	eCQM Specifications	Process	Patient Safety	**Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment:** Percentage of patient visits for those patients aged 6 through 17 years with a diagnosis of major depressive disorder with an assessment for suicide risk.	Mathematica

B.32. Pediatrics

PREVIOUSLY FNALIZED MEASURES IN THE PEDIATRICS SET								
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**
* § ! (Care Coordination)	0576 / N/A	391	N/A	MIPS CQMs Specifications	Process	Communication /Care Coordination	**Follow-up After Hospitalization for Mental Illness (FUII):** The percentage of discharges for patients 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health practitioner. Two rates are submitted: • The percentage of discharges for which the patient received follow-up within 30 days after discharge. • The percentage of discharges for which the patient received follow-up within 7 days after discharge.	National Committee for Quality Assurance
§	N/A / N/A	394	N/A	MIPS CQMs Specifications	Process	Community/Population Health	**Immunizations for Adolescents:** The percentage of adolescents 13 years of age who had one dose of meningococcal vaccine (serogroups A, C, W, Y), one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine, and have completed the human papillomavirus (HPV) vaccine series by their 13th birthday.	National Committee for Quality Assurance
! (Outcome)	N/A / N/A	398	N/A	MIPS CQMs Specifications	Outcome	Effective Clinical Care	**Optimal Asthma Control:** Composite measure of the percentage of pediatric and adult patients whose asthma is well-controlled as demonstrated by one of three age appropriate patient reported outcome tools and not at risk for exacerbation.	Minnesota Community Measurement
	N/A / N/A	402	NA	MIPS CQMs Specifications	Process	Community/Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance
! (Appropriate Use)	0657 / N/A	464	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Otitis Media with Effusion: Systemic Antimicrobials - Avoidance of Inappropriate Use:** Percentage of patients aged 2 months through 12 years with a diagnosis of OME who were not prescribed systemic antimicrobials.	American Academy of Otolaryngology – Head and Neck Surgery Foundation

B.32. Pediatrics

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE PEDIATRICS SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A/ N/A	444	N/A	MIPS CQMs Specifications	Process	Efficiency and Cost Reduction	**Medication Management for People with Asthma:** The percentage of patients 5-64 years of age during the performance period who were identified as having persistent asthma and were dispensed appropriate medications that they remained on for at least 75% of their treatment period.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.33. Physical Medicine

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Physical Medicine specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Physical Medicine specialty set.

Centers for Medicare & Medicaid Services
	N/A / N/A	402	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Tobacco Use and Help with Quitting Among Adolescents:** The percentage of adolescents 12 to 20 years of age with a primary care visit during the measurement year for whom tobacco use status was documented and received help with quitting if identified as a tobacco user.	National Committee for Quality Assurance
§	2152 / N/A	431	N/A	MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Unhealthy Alcohol Use: Screening & Brief Counseling:** Percentage of patients aged 18 years and older who were screened for unhealthy alcohol use using a systematic screening method at least once within the last 12 months AND who received brief counseling if identified as an unhealthy alcohol user.	National Committee for Quality Assurance
! (Opioid)	N/A / N/A	468	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Continuity of Pharmacotherapy for Opioid Use Disorder (OUD):** Percentage of adults aged 18 years and older with pharmacotherapy for opioid use disorder (OUD) who have at least 180 days of continuous treatment.	University of Southern California

B.33. Physical Medicine

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE PHYSICAL MEDICINE SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0101/ N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	317	CMS22 v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.34. Physical Therapy/Occupational Therapy

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Physical Therapy/Occupational Therapy specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Physical Therapy/Occupational Therapy specialty set.

The change in functional status (FS) is assessed using the FOTO Neck FS patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static/paper-pencil).	Focus on Therapeutic Outcomes, Inc.

B.34. Physical Therapy/Occupational Therapy

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE PHYSICAL THERAPY/OCCUPATIONAL THERAPY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A/ N/A	050	N/A	Medicare Part B Claims Specifications, MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older:** Percentage of female patients aged 65 years and older with a diagnosis of urinary incontinence with a documented plan of care for urinary incontinence at least once within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
0101/ N/A	154	N/A	Medicare Part B Claims Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.35. Plastic Surgery

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Plastic Surgery specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Plastic Surgery specialty set.

American College of Surgeons

B.35. Plastic Surgery

MEASURES PROPOSED FOR **ADDITION** TO THE PLASTIC SURGERY SET									
Indicator	**NQF # / eCQM NQF #**	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title And Description**	**Measure Steward**	**Rationale for Inclusion**
*	N/A/ N/A	128	CMS69v10	Medicare Part B Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community/ Population Health	**Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan:** Percentage of patients aged 18 years and older with a BMI documented during the current encounter or within the previous 12 months AND who had a follow-up plan documented if most recent BMI was outside of normal parameters.	Centers for Medicare & Medicaid Services	We propose to include this measure in the Plastic Surgery specialty set as it is clinically relevant to this clinician type. Stakeholders commented, and we agreed, that this is a measure consistently reported by their MIPS eligible clinicians. BMI does impact plastic surgery outcomes, therefore, is clinically relevant to the Plastic Surgery specialty set.

B.35. Plastic Surgery

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE PLASTIC SURGERY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0268 / N/A	021	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin:** Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented**: Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.36. Podiatry

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Podiatry specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Podiatry specialty set.

B.37. Preventive Medicine

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE PREVENTIVE MEDICINE SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0101 / N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented**: Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.38. Pulmonology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this final rule, the Pulmonology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that were proposed to be added, and measures that were proposed for removal, as applicable. We request comment on the measures available in the proposed Pulmonology specialty set.

American Heart Association

B.40. Skilled Nursing Facility

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE SKILLED NURSING FACILITY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0101/ N/A	154	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Falls: Risk Assessment:** Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22 v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.41. Speech Language Pathology

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Speech Language Pathology specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Speech Language Pathology specialty set.

Society of Thoracic Surgeons

B.42. Thoracic Surgery

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE THORACIC SURGERY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0268 / N/A	021	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin:** Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	044	N/A	MIPS CQMs Specifications	Process	Effective Clinical Care	**Coronary Artery Bypass Graft (CABG): Preoperative Beta-Blocker in Patients with Isolated CABG Surgery:** Percentage of isolated Coronary Artery Bypass Graft (CABG) surgeries for patients aged 18 years and older who received a beta-blocker within 24 hours prior to surgical incision.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.43. Urgent Care

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Urgent Care specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Urgent Care specialty set.

B.43. Urgent Care

(Appropriate Use)	N/A/ N/A	TBD	CMS646 v2	eCQM Specifications	Process	Effective Clinical Care	**Intravesical Bacillus-Calmette Guerin for Non-muscle Invasive Bladder Cancer**: Percentage of patients initially diagnosed with non-muscle invasive bladder cancer and who received intravesical Bacillus-Calmette-Guerin (BCG) within 6 months of initial diagnosis	Oregon Urology	We propose to include this measure in the Urology specialty set as it is clinically relevant to this clinician type. Given the high rates that patients are assessed, treated, and managed for this condition within this specialty, we recommend the inclusion of this measure within the Urology specialty set. See Table A.1 for rationale.

B.44. Urology

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE UROLOGY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
N/A/ N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	050	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Person and Caregiver-Centered Experience and Outcomes	**Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older:** Percentage of female patients aged 65 years and older with a diagnosis of urinary incontinence with a documented plan of care for urinary incontinence at least once within 12 months.	National Committee for Quality Assurance	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	429	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Pelvic Organ Prolapse: Preoperative Screening for Uterine Malignancy:** Percentage of patients who are screened for uterine malignancy prior to vaginal closure or obliterative surgery for pelvic organ prolapse.	American Urogynecologic Society	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	434	N/A	MIPS CQMs Specifications	Outcome	Patient Safety	**Proportion of Patients Sustaining a Ureter Injury at the Time of Pelvic Organ Prolapse Repair**: Percentage of patients undergoing pelvic organ prolapse repairs who sustain an injury to the ureter recognized either during or within 30 days after surgery.	American Urogynecologic Society	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

B.45. Vascular Surgery

In addition to the considerations discussed in the introductory language of Table B of the appendix of this proposed rule, the Vascular Surgery specialty set takes additional criteria into consideration, which includes, but is not limited to: whether the measure reflects current clinical guidelines and the coding of the measure includes relevant clinician types. We may reassess the appropriateness of individual measures, on a case-by-case basis, to ensure appropriate inclusion in the specialty set. Measure tables in this set include previously finalized measures that we are maintaining within the set, measures that are proposed to be added, and measures that are proposed for removal, as applicable. We request comment on the measures available in the proposed Vascular Surgery specialty set.

Society of Interventional Radiology
! (Outcome)	N/A / N/A	441	N/A	MIPS CQMs Specifications	Intermediate Outcome	Effective Clinical Care	**Ischemic Vascular Disease (IVD) All or None Outcome Measure (Optimal Control):** The IVD All-or-None Measure is one outcome measure (optimal control). The measure contains four goals. All four goals within a measure must be reached in order to meet that measure. The numerator for the all-or-none measure should be collected from the organization's total IVD denominator. All-or-None Outcome Measure (Optimal Control) - Using the IVD denominator optimal results include: • Most recent blood pressure (BP) measurement is less than or equal to 140/90 mm Hg -- AND • Most recent tobacco status is Tobacco Free -- AND • Daily Aspirin or Other Antiplatelet Unless Contraindicated -- AND • Statin Use Unless Contraindicated.	Wisconsin Collaborative for Healthcare Quality

B.45. Vascular Surgery

PREVIOUSLY FINALIZED MEASURES PROPOSED FOR **REMOVAL** FROM THE VASCULAR SURGERY SET Note: In this this proposed rule, we propose the removal of the following measure(s) below from this specific specialty measure set based upon review of updates made to existing quality measure specifications, the proposed addition of new measures for inclusion in MIPS, and the feedback provided by specialty societies.								
NQF # / eCQM NQF #	**Quality #**	**CMS eCQM ID**	**Collection Type**	**Measure Type**	**National Quality Strategy Domain**	**Measure Title and Description**	**Measure Steward**	**Rationale for Removal**
0268/ N/A	021	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin:** Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A/ N/A	023	N/A	Medicare Part B Claims Measure Specifications, MIPS CQMs Specifications	Process	Patient Safety	**Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients):** Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight IIeparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.	American Society of Plastic Surgeons	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.
N/A / N/A	317	CMS22v10	Medicare Part B Claims Measure Specifications, eCQM Specifications, MIPS CQMs Specifications	Process	Community /Population Health	**Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented:** Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.	Centers for Medicare & Medicaid Services	This measure is being proposed for removal beginning with the 2024 MIPS payment year. See Table C for rationale.

TABLE Group C: Previously Finalized Quality Measures Proposed for Removal in the CY 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

In this proposed rule, we propose to remove 19 previously finalized quality measures from the MIPS Program for the 2022 MIPS performance period/2024 MIPS payment year and future years. These measures are discussed in detail below. Our measure removal criteria was discussed in the CY 2019 PFS final rule (83 FR 59763 through 59765).

Further considerations are given in the evaluation of the measure's performance data, to determine whether there is or no longer is variation in performance. As discussed in the CY 2019 PFS final rule (83 FR 59761 through 59763), additional criteria that we use for the removal of measures also includes extremely topped out measures, which means measures that are topped out with an average (mean) performance rate between 98-100 percent. Beginning with the 2020 MIPS performance period/2022 MIPS payment year, we also refer readers to the CY 2020 PFS final rule (84 FR 62957 through 62959) for additional quality measure removal criteria.

TABLE Group C: Previously Finalized Quality Measures Proposed for Removal in the CY 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

C.1. Age-Related Macular Degeneration (AMD): Dilated Macular Examination

Category	Description
NQF # / eCQM NQF #:	0087 / NA
Quality #:	014
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of patients aged 50 years and older with a diagnosis of age-related macular degeneration (AMD) who had a dilated macular examination performed which included documentation of the presence or absence of macular thickening or geographic atrophy or hemorrhage AND the level of macular degeneration severity during one or more office visits within the 12 month performance period.
Measure Steward:	American Academy of Ophthalmology
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure has reached the end of the topped out lifecycle. Given this measure's continued topped out status (82 FR 53640), we believe it has a limited opportunity to improve clinical outcomes. The topped out status is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.2. Diabetic Retinopathy: Communication with the Physician Managing Ongoing Diabetes Care

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	019
CMS eCQM ID:	CMS142v10
National Quality Strategy Domain:	Communication and Care Coordination
Collection Type:	eCQM Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of diabetic retinopathy who had a dilated macular or fundus exam performed with documented communication to the physician who manages the ongoing care of the patient with diabetes mellitus regarding the findings of the macular or fundus exam at least once within 12 months.
Measure Steward:	American Academy of Ophthalmology
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative. This is a process measure that is a standard of care requiring only the that results were communicated, which by itself may not have a meaningful direct impact on patient care as no follow-up or confirmation of care coordination is required. Additionally, the MIPS CQMs Specifications collection type is in the third year of the topped out lifecycle (82 FR 53640).
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.3. Perioperative Care: Selection of Prophylactic Antibiotic – First OR Second-Generation Cephalosporin

Category	Description
NQF # / eCQM NQF #:	0268 / N/A
Quality #:	021
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of surgical patients aged 18 years and older undergoing procedures with the indications for a first OR second-generation cephalosporin prophylactic antibiotic who had an order for a first OR second-generation cephalosporin for antimicrobial prophylaxis.
Measure Steward:	American Society of Plastic Surgeons
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because the measure steward will not be further reviewing or updating the measure specifications. In addition, this measure has reached the end of the topped out lifecycle (82 FR 53640). Given this measure's continued topped out status, we believe it has a limited opportunity to improve clinical outcomes and the measure has become standard of care. The topped out status is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.4. Perioperative Care: Venous Thromboembolism (VTE) Prophylaxis (When Indicated in ALL Patients)

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	023
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of surgical patients aged 18 years and older undergoing procedures for which venous thromboembolism (VTE) prophylaxis is indicated in all patients, who had an order for Low Molecular Weight Heparin (LMWH), Low- Dose Unfractionated Heparin (LDUH), adjusted-dose warfarin, fondaparinux or mechanical prophylaxis to be given within 24 hours prior to incision time or within 24 hours after surgery end time.
Measure Steward:	American Society of Plastic Surgeons
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because the measure steward will not be further reviewing or updating the measure specifications. In addition, this measure has reached the end of the topped out lifecycle (82 FR 53640). Given this measure's continued topped out status, we believe it has a limited opportunity to improve clinical outcomes and the measure has become standard of care. The topped out status is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.5. Coronary Artery Bypass Graft (CABG): Preoperative Beta-Blocker in Patients with Isolated CABG Surgery

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	044
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of isolated Coronary Artery Bypass Graft (CABG) surgeries for patients aged 18 years and older who received a beta-blocker within 24 hours prior to surgical incision.
Measure Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure has reached the end of the topped out lifecycle (82 FR 53640) and has a high performance rate of 96.08 percent for the MIPS CQMs Specifications collection type. Given this measure's continued topped out status, we believe it has a limited opportunity to improve clinical outcomes and should be a standard of care. The average performance rate and topped out status is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.6. Urinary Incontinence: Plan of Care for Urinary Incontinence in Women Aged 65 Years and Older

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	050
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of female patients aged 65 years and older with a diagnosis of urinary incontinence with a documented plan of care for urinary incontinence at least once within 12 months.
Measure Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as it splits a clinical process into individual quality measures. In order to align with the Meaningful Measures Initiative, we plan to maintain measure Q048: Urinary Incontinence: Assessment of Presence or Absence of Urinary Incontinence in Women Aged 65 Years and Older. We recognize measure Q048 does not quantify the completion of plan of care but includes the assessment for the presence or absence of urinary incontinence within a broader patient population. Measure Q050 is limited to patients that were screened positive for urinary incontinence which results in an incomplete patient population being evaluated; whether screened for urinary incontinence or being voluntarily verbalized by the patient. We believe as a stand-alone measure it is not a true reflection of the quality of care being given, but only reflects care to a subpopulation of patients with documented urinary incontinence. To truly ensure quality of care for these patients, we believe that clinicians should engage patients and perform this assessment for all denominator eligible patients at risk for the presence or absence of urinary incontinence. Additionally, the Medicare Part B Claims Specifications collection type is at the end of the topped out lifecycle (82 FR 53640).
In the Circumstance the Measure is Retained	We would update the denominator eligible encounters to add coding for Physical Therapy MIPS eligible clinician type and add the measure to the Physical Therapy/Occupational Therapy specialty measure set.

C.7. Hematology: Myelodysplastic Syndrome (MDS) and Acute Leukemias: Baseline Cytogenetic Testing Performed on Bone Marrow

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	067
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of myelodysplastic syndrome (MDS) or an acute leukemia who had baseline cytogenetic testing performed on bone marrow.
Measure Steward:	American Society of Hematology
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program at the measure steward's request as it is no longer being maintained for inclusion.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.8. Hematology: Chronic Lymphocytic Leukemia (CLL): Baseline Flow Cytometry

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	070
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of patients aged 18 years and older, seen within a 12-month reporting period, with a diagnosis of chronic lymphocytic leukemia (CLL) made at any time during or prior to the reporting period who had baseline flow cytometry studies performed and documented in the chart.
Measure Steward:	American Society of Hematology
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program at the measure steward's request as it is no longer being maintained for inclusion.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.9. Melanoma: Continuity of Care – Recall System

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	137
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of patients, regardless of age, with a current diagnosis of melanoma or a history of melanoma whose information was entered, at least once within a 12 month period, into a recall system that includes: • A target date for the next complete physical skin exam, AND • A process to follow up with patients who either did not make an appointment within the specified timeframe or who missed a scheduled appointment.
Measure Steward:	American Academy of Dermatology
High Priority Measure:	Yes
Measure Type:	Structure
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as the measure is not advancing quality care but offers performance by simply establishing a recall system. Despite this structure supporting patient care, it does not measure quality care that directly impacts patients. We believe this measure is not providing a meaningful impact to quality improvement.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.10. Oncology: Medical and Radiation - Plan of Care for Pain

Category	Description
NQF # / eCQM NQF #:	0383 / N/A
Quality #:	144
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of visits for patients, regardless of age, with a diagnosis of cancer currently receiving chemotherapy or radiation therapy who report having pain with a documented plan of care to address pain.
Measure Steward:	American Society of Clinical Oncology
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as it splits a clinical process into individual quality measures. In order to align with the Meaningful Measures Initiative, we plan to maintain measure Q143: Oncology: Medical and Radiation – Pain Intensity Quantified. We recognize measure Q144 does not quantify the completion of a plan of care but includes the assessment of pain for patients undergoing cancer treatment. Measure Q144 is limited to those patients that were screened positive for pain; whether screened for pain or being voluntarily verbalized by the patient. We believe as a stand-alone measure it is not a true reflection of the quality of care being given, but only reflects care to a subpopulation of oncology patients with documented pain. To truly ensure quality of care for these patients, we believe that clinicians should engage all denominator eligible patients and perform this assessment to identify the presence of pain in patients undergoing cancer treatment.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.11. Falls: Risk Assessment

Category	Description
NQF # / eCQM NQF #:	0101 / N/A
Quality #:	154
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of patients aged 65 years and older with a history of falls that had a risk assessment for falls completed within 12 months.
Measure Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure has reached the end of the topped out lifecycle (82 FR 53640). Given this measure's continued topped out status, we believe it has a limited opportunity to improve clinical outcomes. The topped out status is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.12. Radiology: Stenosis Measurement in Carotid Imaging Reports

Category	Description
NQF # / eCQM NQF #:	0507 / N/A
Quality #:	195
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of final reports for carotid imaging studies (neck magnetic resonance angiography [MRA], neck computed tomography angiography [CTA], neck duplex ultrasound, carotid angiogram) performed that include direct or indirect reference to measurements of distal internal carotid diameter as the denominator for stenosis measurement.
Measure Steward:	American College of Radiology
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure has reached the end of the topped out lifecycle (82 FR 53640) and has a high performance rate of 95.62 percent for the Medicare Part B Claims Specifications collection type and 97.47 percent for the MIPS CQMs Specifications collection type. Given this measure's continued topped out status, we believe it has a limited opportunity to improve clinical outcomes. The average performance rate and topped out status is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.13. Radiology: Reminder System for Screening Mammograms

Category	Description
NQF # / eCQM NQF #:	0509 / N/A
Quality #:	225
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of patients undergoing a screening mammogram whose information is entered into a reminder system with a target due date for the next mammogram.
Measure Steward:	American College of Radiology
High Priority Measure:	Yes
Measure Type:	Structure
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as it represents a structure measure rather than a measure that supports direct patient care. In addition, the performance on the MIPS CQMs Specifications collection type is extremely high and unvarying, making this measure extremely topped out for this collection type as discussed in the CY 2019 PFS final rule (83 FR 59761 through 59763). The average performance for this measure is 98.37 percent for the MIPS CQMs Specifications collection type. The average performance rate is based on the current MIPS benchmarking data located at https://qpp-cm-prod-content.s3.amazonaws.com/uploads/1275/2021%20MIPS%20Quality%20Benchmarks.zip.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.14. Preventive Care and Screening: Screening for High Blood Pressure and Follow-Up Documented

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	317
CMS eCQM ID:	CMS22v10
National Quality Strategy Domain:	Community/Population Health
Collection Type:	Medicare Part B Claims Specifications, eCQM Measure Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of patient visits for patients aged 18 years and older seen during the measurement period who were screened for high blood pressure AND a recommended follow-up plan is documented, as indicated, if blood pressure is pre-hypertensive or hypertensive.
Measure Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as it is low-bar and a frequently performed assessment. This is a process measure that only requires a blood pressure to be taken and if abnormal a follow-up plan of care be documented; however, the documented follow-up includes referring the patient to a primary care physician and does require confirmation of follow-up. Additionally, the measure does not strive to ensure adequate control of blood pressure as patients with an active diagnosis of hypertension are excluded from the denominator eligible patient population. While screening patients for high blood pressure is an important piece of quality care, it is the controlling of high blood pressure which reduces patient clinical risks and truly drives positive patient outcomes. This quality action is already available in measure Q236: Controlling High Blood Pressure.
In the Circumstance the Measure is Retained	We would update the description to replace 'pre-hypertensive' with 'elevated'. Additionally, the definition for all collection types would be revised to reflect 2017 ACC/AHA guidelines; including, changing blood pressure classifications, relevant thresholds, and applicable interventions. The eCQM Measure Specifications collection type would be revised to have the logic apply to exceptions based on blood pressure classification to more accurately capture a patient declining applicable intervention(s). This measure would also be removed from the Thoracic Surgery specialty measure set.

C.15. Psoriasis: Tuberculosis (TB) Prevention for Patients with Psoriasis, Psoriatic Arthritis and Rheumatoid Arthritis on a Biological Immune Response Modifier

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	337
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of patients, regardless of age, with psoriasis, psoriatic arthritis and/or rheumatoid arthritis on a biological immune response modifier whose providers are ensuring active tuberculosis prevention either through negative standard tuberculosis screening tests or are reviewing the patient's history to determine if they have had appropriate management for a recent or prior positive test.
Measure Steward:	American Academy of Dermatology
High Priority Measure:	No
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure is duplicative to measure Q176: Tuberculosis Screening Prior to First Course Biologic Therapy because we are proposing in Table D.20 substantive changes to measure Q176 that would broaden the denominator by including an expanded list of biologic therapies that capture much of the denominator patient population for this measure.
In the Circumstance the Measure is Retained	We would update the denominator to include only those patients who are on a biologic immune response modifier prescribed within the current measurement period. There is no specialty set movement proposed for this measure.

C.16. Pain Brought Under Control Within 48 Hours

Category	Description
NQF # / eCQM NQF #:	0209 / N/A
Quality #:	342
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Collection Type:	MIPS CQMs Specifications
Measure Description:	Patients aged 18 and older who report being uncomfortable because of pain at the initial assessment (after admission to palliative care services) who report pain was brought to a comfortable level within 48 hours.
Measure Steward:	National Hospice and Palliative Care Organization
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because it does not align with the Meaningful Measures Initiative. This measure should be a standard of care given it represents a central pillar of quality palliative care by supporting effective pain management for patients. As currently specified, this measure only assesses if pain was brought to a comfortable level within 48 hours of the initial assessment and does not ensure treatment is aligned with patient goals, a plan of care for the duration of palliative care, and current guidelines; additionally, it may not be feasible dependent upon the medication and delivery method (i.e., procedural versus oral medication administration). It is important to incorporate shared-decision making and patient engagement while in palliative care, which may not always align with the time constraint of the measure.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.17. Pelvic Organ Prolapse: Preoperative Screening for Uterine Malignancy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	429
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Collection Type:	Medicare Part B Claims Specifications, MIPS CQMs Specifications
Measure Description:	Percentage of patients who are screened for uterine malignancy prior to vaginal closure or obliterative surgery for pelvic organ prolapse.
Measure Steward:	American Urogynecologic Society
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as it does not show meaningful measurement. The limited patient population and adoption of the quality measure does not allow for the creation of benchmarks to provide a meaningful impact to quality improvement.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.18. Proportion of Patients Sustaining a Ureter Injury at the Time of Pelvic Organ Prolapse Repair

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	434
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Collection Type:	MIPS CQMs Specifications
Measure Description:	Percentage of patients undergoing pelvic organ prolapse repairs who sustain an injury to the ureter recognized either during or within 30 days after surgery.
Measure Steward:	American Urogynecologic Society
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program because this measure does not align with the Meaningful Measures Initiative as it is duplicative in denominator patient population to measure Q432: Proportion of Patients Sustaining a Bladder Injury at the Time of any Pelvic Organ Prolapse Repair with the quality action being completed concurrently. Additionally, the limited patient population and adoption of the quality measure does not allow for the creation of benchmarks to provide a meaningful impact to quality improvement.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

C.19. Medication Management for People with Asthma

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality #:	444
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Efficiency and Cost Reduction
Collection Type:	MIPS CQMs Specifications
Measure Description:	The percentage of patients 5-64 years of age during the performance period who were identified as having persistent asthma and were dispensed appropriate medications that they remained on for at least 75% of their treatment period.
Measure Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale for Removal	We propose the removal of this measure (finalized in 81 FR 77558 through 77675) as a quality measure from the MIPS program at the measure steward's request as it is no longer being maintained for inclusion.
In the Circumstance the Measure is Retained	There are no substantive changes or specialty set movement proposed for this measure.

TABLE Group D: Previously Finalized Quality Measures with Substantive Changes Proposed for the CY 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

NOTE: Electronic clinical quality measures (eCQMs) that are National Quality Forum (NQF) endorsed are shown in Table D as follows: NQF # / eCQM NQF #.

The D Tables within the NPRM provide the substantive changes proposed for the quality measures in CY 2022. The changes that are made to the denominator codes sets are generalizations of the revisions communicated from the measure stewards to CMS. Additionally, International Classification of Diseases Tenth Edition (ICD-10) and Current Procedural Terminology (CPT) codes that are identified as invalid for CY 2022 may not be identified within the NPRM due to the availability of these changes to the public. If coding revisions to the denominator are impacted due to the timing of 2022 CPT and ICD-10 updates and assessment of these codes inclusion by the Measure Steward, these changes may be postponed until CY 2023. The 2022 Quality Measure Release Notes provide a comprehensive, detailed reference of exact codes changes to the denominators of the quality measures. The Quality Measure Release Notes are available for each of the collection types in the Quality Payment Program Resource Library at https://qpp.cms.gov/about/resource-library.

In addition to the proposed substantive changes, there may be changes to the coding utilized within the denominator that are not considered substantive in nature, but we believe are important to communicate to stakeholders. These changes align with the scope of the current coding; however, this will expand or contract the current eligible population, therefore, review the current year measure specification and the 2022 Quality Measure Release Notes or the eCQM Technical Release Notes once posted to review all coding changes. Language has also been added, to all applicable 2022 quality measure specifications, in the form of an 'Instructions Note', to clarify that telehealth encounters are allowed for determination of denominator eligibility. Only in the instance telehealth encounters have not been previously allowed as denominator eligible, will the D table corresponding to that measure reflect an update to the denominator allowing for telehealth encounters in the 'Substantive Change' cell.

It should be noted that in the 2021 PFS final rule (85 FR 84870), the CMS Web Interface Measures Specifications collection type would sunset starting with the CY 2022 MIPS performance period; however, in section IV.A.3.d.(1)(d) of this proposed rule, we are proposing to extend the availability of the CMS Web Interface measures as a collection type for the 2022 MIPS performance period and sunset the CMS Web Interface measures starting with the CY 2023 MIPS performance period. Therefore, we are proposing substantive changes to the CMS Web Interface Measure Specifications collection type as outlined in the applicable measures within the D tables. In conjunction with seeking public comment on the proposal to extend the availability of the CMS Web Interface measures as a collection type, we are seeking public comment on the substantive changes proposed for the CMS Web Interface Measure Specifications collection type given that the CMS Web Interface Measure Specifications collection type has generally remained the same for three consecutive (CY 2019, CY 2020, and CY 2021) MIPS performance periods.

D.1 Diabetes: Hemoglobin A1c (HbA1c) Poor Control (>9%)

Category	Description
NQF # / eCQM NQF #:	0059 / N/A
Quality#:	001
CMS eCQM ID:	CMS122v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients 18-75 years of age with diabetes who had hemoglobin A1c > 9.0% during the measurement period.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude patients who are in hospice care for any part of the measurement period. 2. Exclude patients 66 and older who are living long term in an institution for more than 90 consecutive days during the measurement period. 3. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior **Added:** 1. Exclude patients receiving palliative care during the measurement period. **Updated denominator exclusion: For the CMS Web Interface Measure Specifications collection type: Revised:** Patients age 66 and older in Institutional Special Needs Plans (SNP) or residing in long-term care with a POS code 32, 33, 34, 54 or 56 for more than 90 consecutive days during the measurement period. **Updated denominator confirmation: For the CMS Web Interface Measure Specifications collection type: Revised:** Determine if the patient has an active diagnosis of diabetes during the measurement period OR an active diagnosis of diabetes during the year prior. - If the patient has an active diagnosis of diabetes in the medical record, select "Yes" **Updated denominator note: For the MIPS CQMs Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator guidance: For the CMS Web Interface Measure Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated numerator note: For the Medicare Part B Claims Measure Specifications collection type: Added:** To assess the age for exclusions, the patient's age on the date of the encounter should be used. **Updated guidance: For the CMS Web Interface Measure Specifications colleciton type: Added:** Do not include HbA1c levels reported by the patient. **Updated numerator guidance: For the CMS Web Interface Measure Specifications colleciton type: Removed:** - Patient Reported Requirement: Date and most recent value (distinct value required) **Updated denominator exclusion: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** 1. Palliative care services provided to patient any time during the measurement period
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Intermediate Outcome
Rationale:	We propose that the denominator exclusion language be updated for all collection types, except for the CMS Web Interface Measure Specifications collection type, to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, for the eCQM Specifications collection type language was added to clarify timing for those exclusions that have an age-related component. For the eCQM Specifications collection type, the term 'overlaps' was removed and replaced with plain language for clarity and the denominator exclusion for frailty or advanced illness was revised to update how these patients will be captured. We propose to revise the denominator note for the MIPS CQMs Specifications collection type, the numerator note for the Medicare Part B Claims Measure Specifications collection type, and the denominator guidance for the CMS Web Interface Measure Specifications collection type to clarify the timing for those exclusions that have an age-related component. We propose to update the denominator exclusion language for the CMS Web Interface Measure Specifications collection type, for the measure, long-term care will be defined as patients staying more than 90 consecutive days at the long-term care facility versus any 90 days within the performance period. Additionally, the denominator confirmation was updated to clarify that the diagnosis should be active during the performance period or year prior. We propose to update the guidance for the CMS Web Interface Measure Specifications collection type to ensure that patient reported IIbA1c levels should not be utilized for quality action assessment for the purposes of this measure.

D.2 Heart Failure (HF): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) or Angiotensin Receptor-Neprilysin Inhibitor (ARNI) Therapy for Left Ventricular Systolic Dysfunction (LVSD)

Category	Description
NQF # / eCQM NQF #:	0081 / 0081e
Quality#:	005
CMS eCQM ID:	CMS135v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of heart failure (HF) with a current or prior left ventricular ejection fraction (LVEF) < 40% who were prescribed ACE inhibitor or ARB or ARNI therapy either within a 12-month period when seen in the outpatient setting OR at each hospital discharge.
Substantive Change:	**Updated definition: For the eCQM Specifications collection type: Added:** The LVSD may be determined by quantitative or qualitative assessment, which may be current or historical. Examples of a quantitative or qualitative assessment may include an echocardiogram: 1) that provides a numerical value of LVSD or 2) that uses descriptive terms such as moderately or severely depressed left ventricular systolic function. Any current or prior ejection fraction study documenting LVSD can be used to identify patients. **Updated value set/coding: For the eCQM Specifications collection type: Revised:** "Pregnancy" (2.16.840.1.113883.3.526.3.378) value set to more accurately capture pregnancy state
Steward:	American Heart Association
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications collection type definition section to align the measure language with the logic to allow for quantitative or qualitative documentation of moderate or severe left ventricular systolic dysfunction (LVSD). Additionally, we propose to update the eCQM Specifications "Pregnancy" value set to more accurately capture the state of pregnancy to ensure the denominator exclusion is being applied to the correct patient population.

D.3 Coronary Artery Disease (CAD): Beta-Blocker Therapy – Prior Myocardial Infarction (MI) or Left Ventricular Systolic Dysfunction (LVEF < 40%)

Category	Description
NQF # / eCQM NQF #:	0070 / 0070e
Quality#:	007
CMS eCQM ID:	CMS145v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of coronary artery disease seen within a 12-month period who also have a prior MI or a current or prior LVEF < 40% who were prescribed beta-blocker therapy.
Substantive Change:	**Updated definition: For the eCQM Specifications collection type: Added:** LVEF < 40% corresponds to qualitative documentation of moderate dysfunction or severe dysfunction (LVSD). The LVSD may be determined by quantitative or qualitative assessment, which may be current or historical. Examples of a quantitative or qualitative assessment may include an echocardiogram: 1) that provides a numerical value of LVSD or 2) that uses descriptive terms such as moderately or severely depressed left ventricular systolic function. Any current or prior ejection fraction study documenting LVSD can be used to identify patients. **Updated denominator logic: For the eCQM Specifications collection type: Revised:** Myocardial Infarction timing logic to use the start date for the myocardial infarction. **Updated value set/coding: For the eCQM Specifications collection type: Revised:** "Coronary Artery Disease No MI" (2.16.840.1.113883.3.526.3.369) to remove coding related to Dressler's Syndrome. **Updated denominator note: For the MIPS CQM Specifications collection type: Added:** Submission Criteria 1: LVEF < 40% corresponds to qualitative documentation of moderate dysfunction or severe dysfunction (LVSD). The LVSD may be determined by quantitative or qualitative assessment, which may be current or historical. Examples of a quantitative or qualitative assessment may include an echocardiogram: 1) that provides a numerical value of LVSD or 2) that uses descriptive terms such as moderately or severely depressed left ventricular systolic function. Any current or prior ejection fraction study documenting LVSD can be used to identify patients.
Steward:	American Heart Association
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications collection type definition section to align the measure language with the logic to allow for quantitative or qualitative documentation of moderate or severe left ventricular systolic dysfunction (LVSD). We propose to update the denominator logic for the eCQM Specifications collection type to use the start date for the myocardial infarction. This will ensure those patients without a documented myocardial infarction end date within the medical record will be captured within the measure denominator as these patients would be appropriate for the denominator eligible patient population. Additionally, we propose to remove 'Dressler's Syndrome' from the "Coronary Artery Disease No MI" value set for the eCQM Specifications collection type as this is not a conclusive diagnosis to indicate coronary artery disease and therefore, not appropriate for this value set.

D.4 Heart Failure (HF): Beta-Blocker Therapy for Left Ventricular Systolic Dysfunction (LVSD)

Category	Description
NQF # / eCQM NQF #:	0083 / 0083e
Quality#:	008
CMS eCQM ID:	CMS144v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of heart failure (HF) with a current or prior left ventricular ejection fraction (LVEF) < 40% who were prescribed beta-blocker therapy either within a 12-month period when seen in the outpatient setting OR at each hospital discharge.
Substantive Change:	**Updated definition: For the eCQM Specifications collection type: Added:** The LVSD may be determined by quantitative or qualitative assessment, which may be current or historical. Examples of a quantitative or qualitative assessment may include an echocardiogram: 1) that provides a numerical value of LVSD or 2) that uses descriptive terms such as moderately or severely depressed left ventricular systolic function. Any current or prior ejection fraction study documenting LVSD can be used to identify patients
Steward:	American Heart Association
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications collection type definition section to align the measure language with the current measure logic to allow for quantitative or qualitative documentation of moderate or severe left ventricular systolic dysfunction (LVSD).

D.5 Anti-Depressant Medication Management

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	009
CMS eCQM ID:	CMS128v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients 18 years of age and older who were treated with antidepressant medication, had a diagnosis of major depression, and who remained on an antidepressant medication treatment. Two rates are reported. a. Percentage of patients who remained on an antidepressant medication for at least 84 days (12 weeks). b. Percentage of patients who remained on an antidepressant medication for at least 180 days (6 months).
Substantive Change:	**Updated denominator exclusion: Revised:** Exclude patients who are in hospice care for any part of the measurement period
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to revise the denominator exclusion to remove the term 'overlaps' and replace with plain language for clarity and to ensure consistency in implementation.

D.6 Appropriate Treatment for Upper Respiratory Infection (URI)

Category	Description
NQF # / eCQM NQF #:	0069 / N/A
Quality#:	065
CMS eCQM ID:	CMS154v10
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of episodes for patients 3 months of age and older with a diagnosis of upper respiratory infection (URI) that did not result in an antibiotic dispensing event.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude URI episodes when the patient had hospice care for any part of the measurement period. 2. Exclude URI episodes when the patient had an active prescription of antibiotics in the 30 days prior to the episode date, including the episode date up until the time of the encounter. **Updated logic and logic definitions: For the eCQM Specifications collection type: Revised:** logic so definitions point to the encounter as a basis for evaluating other clinical data. **Updated value set/coding: For the eCQM Specifications collection type: Added:** value sets "Observation care discharge day management", "Home Healthcare Services", "Medical Disability Exam", and "Observation". **Updated denominator: For the MIPS CQMs Specifications collection type:** Added: Home Health setting and coding for Work Related or Medical Disability Evaluation services. **Updated denominator exclusion: For the MIPS CQMs Specifications collection type: Revised:** URI episodes when the patient had an active prescription of antibiotics (Table 1) in the 30 days prior to the episode date.
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications collection type denominator exclusion to remove the term 'overlapping' and replace with plain language for clarity and to ensure consistency in implementation. Additionally, we propose to revise the denominator exclusion to align with the logic regarding the timing of the active prescription and the encounter for the purposes of this exclusion. We propose to update the eCQM Specifications collection type logic so that the definitions point to the encounter as a basis for evaluation of other clinical data as this will align with the measure intent and ensure appropriate time intervals for implementation. Additionally, we propose to add value sets to the eCQM Specifications collection type as these value sets are appropriate and applicable to this measure's denominator eligibility. We propose to revise the MIPS CQMs Specifications collection type denominator exclusion to clarify that all patients with active antibiotic prescriptions up to the time of the encounter should be excluded from the denominator eligible patient population. Additionally, we propose to update the denominator eligible coding to include home visits and disability evaluation services as these are appropriate and applicable clinical settings. In the event the proposed substantive change(s) are finalized, for the MIPS CQMs Specifications collection type, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.7 Appropriate Testing for Pharyngitis

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	066
CMS eCQM ID:	CMS146v10
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	The percentage of episodes for patients 3 years and older with a diagnosis of pharyngitis that resulted in an antibiotic dispensing event and a group A streptococcus (strep) test.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type: Revised:** 1. Exclude episodes where the patient is taking antibiotics in the 30 days prior to the episode date, or had an active prescription on the episode date. 3. Exclude episodes where the patient is in hospice care for any part of the measurement period. **Updated denominator logic: For the eCQM Specifications collection type: Revised:** definitions to point to the encounter as a basis for evaluating other clinical data **The measure guidance is revised to read: For the eCQM Specifications collection type:** This is an episode of care measure that examines all eligible episodes for the patient during the measurement period. The intent is to determine whether antibiotics are being dispensed appropriately. Antibiotics should only be dispensed if a strep test has been performed to confirm a bacterial infection. Antibiotics should not be dispensed for viral infections. This eCQM is an episode-based measure. An episode is defined as each eligible encounter for patients aged 3 years and older with a diagnosis of pharyngitis that resulted in an antibiotic dispensing event during the measurement period. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **The measure initial patient population/denominator is revised to read: For all collection types:** Outpatient, telephone, online assessment (i.e. e-visit or virtual check-in), observation, or emergency department (ED) visits with a diagnosis of pharyngitis and an antibiotic dispensing event on or within 3 days after the episode date among patients 3 years or older. **Updated denominator criteria: For the MIPS CQMs Specifications collection type: Revised:** Prescribed or dispensed antibiotic on or within 3 days after the episode date (Table 1). **Updated denominator exclusion: For the MIPS CQMs Specifications collection type: Revised:** Episodes where the patient is taking antibiotics (Table 1) in the 30 days prior to the episode date, or had an active prescription on the episode date.
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications collection type denominator exclusions to clarify timing of exclusion criteria and to remove the term 'overlap' and replace with plain language for clarity and to ensure consistency in implementation. We propose to update the eCQM Specifications collection type logic so that the definitions point to the encounter as a basis for evaluation of other clinical data as this will align with the measure intent and ensure appropriate time intervals for implementation. We propose to update the eCQM Specifications collection type guidance section to clarify the intent of the measure and appropriate antibiotic dispensing. Additionally, we propose to update the eCQM Specifications collection type initial patient population to capture those patients with an antibiotic dispensing event on or within 3 days after the episode event to align with intent of the measure. We propose to update the denominator and denominator criteria of the MIPS CQMs Specifications collection type to reflect that patients with an antibiotic dispensing event on or within 3 days after the episode event should be included within the denominator eligible population as this aligns with the intent of the measure to assess appropriate antibiotic dispensing. We propose to revise the MIPS CQMs Specifications collection type denominator exclusion to clarify that all patients with active antibiotic prescriptions up to the time of the encounter should be excluded from the denominator eligible patient population.

D.8 Acute Otitis Externa (AOE): Systemic Antimicrobial Therapy – Avoidance of Inappropriate Use

Category	Description
NQF # / eCQM NQF #:	0654 / N/A
Quality#:	093
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 2 years and older with a diagnosis of AOE who were not prescribed systemic antimicrobial therapy.
Substantive Change:	**Modified collection type:** MIPS CQM Specifications collection type
Steward:	American Academy of Otolaryngology – Head and Neck Surgery
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to remove the Medicare Part B Claims Measure Specifications collection type as it has reached the end of the topped out lifecycle as finalized in 82 FR 53640. However, the benchmarking data continues to show a gap for the MIPS CQMs Specifications collection type, as such, the measure will be retained for this collection type.

D.9 Prostate Cancer: Avoidance of Overuse of Bone Scan for Staging Low Risk Prostate Cancer Patients

Category	Description
NQF # / eCQM NQF #:	0389 / 0389e
Quality#:	102
CMS eCQM ID:	CMS129v11
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients, regardless of age, with a diagnosis of prostate cancer at low (or very low) risk of recurrence receiving interstitial prostate brachytherapy, OR external beam radiotherapy to the prostate, OR radical prostatectomy who did not have a bone scan performed at any time since diagnosis of prostate cancer.
Substantive Change:	**Updated denominator criteria: For the MIPS CQMs Specifications collection type: Revised:** Any patient, regardless of age **The measure instructions are revised to read: For the MIPS CQMs Specifications collection type:** This measure is to be submitted once per performance period for patients with a diagnosis of prostate cancer at low (or very low) risk of recurrence who receive interstitial prostate brachytherapy, external beam radiotherapy to the prostate, radical prostatectomy during the performance period. The quality-data code or equivalent needs to be submitted only once during the performance period. It is anticipated that Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the listed procedures as specified in the denominator coding will submit this measure. **Updated denominator note: For the MIPS CQMs Specification collection type: Added:** Most recent risk assessment of recurrence completed before the first prostate cancer treatment during the performance period will be used for denominator eligibility.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the MIPS CQMs Specifications collection type to remove the gender specificity from the denominator criteria to ensure a complete patient population. Additionally, we propose to revise the measure instructions and denominator note for the MIPS CQMs Specifications collection type to reflect the update in measure submission frequency from once per episode to once per performance period utilizing the most recent risk assessment for purposes of denominator eligibility, as this is more aligned with the measure intent as well as bringing all collection types into alignment.

D.10 Preventive Care and Screening: Influenza Immunization

Category	Description
NQF # / eCQM NQF #:	0041 / 0041e
Quality#:	110
CMS eCQM ID:	CMS147v11
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	Medicare Part B Claims Measure Specifications eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 6 months and older seen for a visit between October 1 and March 31 who received an influenza immunization OR who reported previous receipt of an influenza immunization.
Substantive Change:	**Updated guidance: For the eCQM Specifications collection type: Added:** Patient self-report for procedures as well as immunizations should be recorded in 'Procedure, Performed' template or 'Immunization, Administered' template in QRDA-1. **Updated value set/coding: For the eCQM Specifications and CMS Web Interface Measure Specifications collection types: Removed:** "Previous Receipt of Influenza Vaccine" (2.16.840.1.113883.3.526.3.1185) value set.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications collection type in order to accurately capture those patients who had previously received the influenza immunization. The current logic definition does not capture the date of immunization receipt nor does it ensure the patient was assessed during the flu season and is not fully aligned with measure intent. Therefore, the value set "Previous Receipt of Influenza Vaccine" will be removed from the measure and the guidance section will be updated to outline the process for capturing those patients who have previously received the influenza immunization for the purposes of this measure. Additionally, the value set "Previous Receipt of Influenza Vaccine" will be removed from CMS Web Interface Measure Specifications collection type to align with the eCQM Specifications collection type, however, this will not impact the numerator of the measure. Medical record documentation of previous receipt of the influenza vaccine during the flu season will still suffice for completion of the quality action, though this value set will no longer be available for mapping purposes.

D.11 Pneumococcal Vaccination Status for Older Adults

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	111
CMS eCQM ID:	CMS127v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	Medicare Part B Claims Measure Specifications | eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients 65 years of age and older who have ever received a pneumococcal vaccine.
Substantive Change:	**The measure description is revised from 'Percentage of patients 65 years of age and older who have ever received a pneumococcal vaccine' to:** Percentage of patients 66 years of age and older who have ever received a pneumococcal vaccine. **The measure denominator exclusion is revised to read: For the eCQM Specifications collection type:** Exclude patients who are in hospice care for any part of the measurement period. **Updated initial patient population: For the eCQM Specifications collection type: Revised:** patient age changed to 66 years of age or older. **The measure numerator is revised to read: For all collection types:** Patients who received a pneumococcal vaccination on or after their 60th birthday and before the end of the measurement period; or had an adverse reaction to the vaccine before the end of the measurement period. **Updated value set/coding: For the eCQM Specifications collection type: Revised:** **Removed:** "Pneumococcal Vaccine" (2.16.840.1.113883.3.464.1003.110.12.1027) and "Pneumococcal Vaccine Administered" (2.16.840.1.113883.3.464.1003.110.12.1034) **Added:** "Pneumococcal Polysaccharide 23 Vaccine" (2.16.840.1.113883.3.464.1003.110.12.1089) **The measure denominator is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** Patients 66 years of age and older with a visit during the measurement period **The measure denominator criteria is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** Patients aged > 66 years on date of encounter **The measure denominator note is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** This measure assesses whether patients 66 years of age or older have received one or more pneumococcal vaccinations. **The measure numerator options are revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Performance Met:** Pneumococcal vaccine administered on or after patient's 60th birthday and before the end of the measurement period **Performance Met:** Documentation of medical reason(s) for not administering pneumococcal vaccine (e.g., adverse reaction to vaccine) **Performance Not Met:** Pneumococcal vaccine was not administered on or after patient's 60th birthday and before the end of the measurement period, reason not otherwise specified **The measure numerator note is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** The measure provides credit for adults 66 years of age and older who have received the PPSV23 vaccine on or after the patient's 60th birthday. Patient reported vaccine receipt, when recorded in the medical record, is acceptable for meeting the numerator.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the measure description, initial patient population, denominator, denominator criteria, and denominator note (as applicable) for all collection types to assess patients aged 66 years and older as this allows time for clinicians to administer the pneumococcal vaccination in accordance with current Advisory Committee on Immunization Practices (ACIP) recommendations. Additionally, the numerator for all collection types is proposed to be revised to assess for the administration of the pneumococcal vaccine on or after the patients 60th birthday and before the end of the measurement period or documentation of medical reason(s) for not administering the pneumococcal vaccine. We propose to update the eCQM Specifications collection type denominator exclusion to remove the term 'overlaps' and replace with plain language for clarity and to ensure consistency in implementation. Additionally, we propose to update the value sets for the eCQM Specifications collection type to reflect the updates to the measure to align with current ACIP recommendations that all adults age 65 years and older receive one dose of the 23-valent pneumococcal polysaccharide vaccine (PPSV23). The MIPS CQMs Specifications and Medicare Part B Claims Measure Specifications collection type will also be updated to only allow for the PPSV23 vaccine to suffice for numerator compliance. We propose to update the numerator options for the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types to allow for the receipt of the pneumococcal vaccine on or after the patient's 60th birthday or the documentation of medical reasons, such as an adverse reaction, to meet the quality action of this measure as it better aligns with current ACIP recommendations. Additionally, we propose to update the MIPS CQMs Specifications and the Medicare Part B

Category	Description
	Claims Measure Specifications collection types by revising the Numerator Note in order to align with current ACIP recommendations and clarify that patient self-reporting is allowable for this measure's required clinical quality action.

D.12 Breast Cancer Screening

Category	Description
NQF # / eCQM NQF #:	2372 / N/A
Quality#:	112
CMS eCQM ID:	CMS125v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of women 50 - 74 years of age who had a mammogram to screen for breast cancer in the 27 months prior to the end of the measurement period.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude patients who are in hospice care for any part of the measurement period. 2. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior **Added:** 1. Exclude patients receiving palliative care during the measurement period. **For the CMS Web Interface Measure Specifications collection type:** **Revised:** 1. Patients age 66 and older in Institutional Special Needs Plans (SNP) or residing in long-term care with a POS code 32, 33, 34, 54 or 56 for more than 90 consecutive days during the measurement period. **Updated denominator note: For the MIPS CQMs Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator exclusion: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** Palliative care services used by patient any time during the measurement period **Updated denominator guidance: For the CMS Web Interface Measure Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated numerator note: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** Patient reported mammograms, when recorded in the medical record, are acceptable for meeting the numerator. **For the Medicare Part B Claims Measure Specifications collection type:** **Added:** To assess the age for exclusions, the patient's age on the date of the encounter should be used.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose that the denominator exclusion language be updated for all collection types to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, for the eCQM Specifications collection type language was added to clarify timing for those exclusions that have an age-related component. For the eCQM Specifications collection type, the term 'overlaps' was removed and replaced with plain language for clarity and the denominator exclusion for frailty or advanced illness was revised to update how these patients will be captured. We propose to revise the denominator note for the MIPS CQMs Specifications collection type, the numerator note for the Medicare Part B Claims Measure Specifications collection type, and the denominator guidance for the CMS Web Interface Measure Specifications collection type to clarify the timing for those exclusions that have an age-related component. Additionally, we propose to add a numerator note to the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types to allow for patient self-report as this is appropriate to avoid overtreatment. We propose to update the denominator exclusion language for the CMS Web Interface Measure Specifications collection type, for the measure, long-term care will be defined as patients staying more than 90 consecutive days at the long-term care facility versus any 90 days within the performance period.

D.13 Colorectal Cancer Screening

Category	Description
NQF # / eCQM NQF #:	0034 / N/A
Quality#:	113
CMS eCQM ID:	CMS130v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients 50-75 years of age who had appropriate screening for colorectal cancer.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude who are in hospice care for any part of the measurement period. 2. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior **Added:** 1. Exclude patients receiving palliative care during the measurement period. **For the CMS Web Interface Measure Specifications collection type:** **Revised:** 1. Patients age 66 and older in Institutional Special Needs Plans (SNP) or residing in long-term care with a POS code 32, 33, 34, 54 or 56 for more than 90 consecutive days during the measurement period. **Updated denominator note: For the MIPS CQMs Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator exclusion: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** 1. Patient was provided palliative care services any time during the measurement period **Updated denominator guidance: For the CMS Web Interface Measure Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated numerator note: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** Patient reported procedures and diagnostic studies, when recorded in the medical record, are acceptable for meeting the numerator. **For the Medicare Part B Claims Measure Specifications collection type:** **Added:** To assess the age for exclusions, the patient's age on the date of the encounter should be used.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose that the denominator exclusion language be updated for all collection types to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, for the eCQM Specifications collection type language was added to clarify timing for those exclusions that have an age-related component. For the eCQM Specifications collection type, the term 'overlaps' was removed and replaced with plain language for clarity and the denominator exclusion for frailty or advanced illness was revised to update how these patients will be captured. We propose to revise the denominator note for the MIPS CQMs Specifications collection type, the numerator note for the Medicare Part B Claims Measure Specifications collection type, and the denominator guidance for the CMS Web Interface Measure Specifications collection type to clarify the timing for those exclusions that have an age-related component. Additionally, we propose to add a numerator note to the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types to allow for patient self-report as this is appropriate to avoid overtreatment. We propose to update the denominator exclusion language for the CMS Web Interface Measure Specifications collection type, for the measure, long-term care will be defined as patients staying more than 90 consecutive days at the long-term care facility versus any 90 days within the performance period.

D.14 Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis

Category	Description
NQF # / eCQM NQF #:	0058 / N/A
Quality#:	116
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	The percentage of episodes for patients ages 3 months and older with a diagnosis of acute bronchitis/bronchiolitis that did not result in an antibiotic dispensing event.
Substantive Change:	**Updated denominator exclusion: Revised:** Acute bronchitis/bronchiolitis episodes when the patient had a new or refill prescription of antibiotics (Table 1) in the 30 days prior to the episode date. **Updated numerator instructions: Removed:** Ticarcillin clavulanate and Erythromycin sulfisoxazole from Table 1 - Antibiotic Medications
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the denominator exclusion to clarify that all patients with active antibiotic prescriptions up to the time of the encounter should be excluded from the denominator eligible patient population. We propose to update Table 1 – Antibiotic Medications to ensure the list includes current and appropriate medications for the purposes of this measure. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.15 Diabetes: Eye Exam

Category	Description
NQF # / eCQM NQF #:	0055 / N/A
Quality#:	117
CMS eCQM ID:	CMS131v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications | eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients 18-75 years of age with diabetes and an active diagnosis of retinopathy overlapping the measurement period who had a retinal or dilated eye exam by an eye care professional during the measurement period or diabetics with no diagnosis of retinopathy overlapping the measurement period who had a retinal or dilated eye exam by an eye care professional during the measurement period or in the 12 months prior to the measurement period.
Substantive Change:	**The measure description is revised to read: For all collection types:** Percentage of patients 18-75 years of age with diabetes and an active diagnosis of retinopathy in any part of the measurement period who had a retinal or dilated eye exam by an eye care professional during the measurement period or diabetics with no diagnosis of retinopathy in any part of the measurement period who had a retinal or dilated eye exam by an eye care professional during the measurement period or in the 12 months prior to the measurement period. **Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude patients who are in hospice care for any part of the measurement period. 2. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior **Added:** 1. Exclude patients receiving palliative care during the measurement period. **The measure guidance is revised to read: For the eCQM Specifications collection type:** Only patients with a diagnosis of Type 1 or Type 2 diabetes should be included in the denominator of this measure; patients with a diagnosis of secondary diabetes due to another condition should not be included. The eye exam must be performed by an ophthalmologist or optometrist, or there must be evidence that fundus photography results were read by a system that provides an artificial intelligence (AI) interpretation. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **Updated denominator note: For the MIPS CQMs Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator exclusion: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** 1. Palliative care services provided to patient any time during the measurement period **The measure numerator is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** Patients with an eye screening for diabetic retinal disease. This includes diabetics who had one of the following: • Diabetic with a diagnosis of retinopathy during the measurement period and a retinal or dilated eye exam by an eye care professional in the measurement period • Diabetic with no diagnosis of retinopathy during the measurement period and a retinal or dilated eye exam by an eye care professional in the measurement period or the year prior to the measurement period **The measure numerator note is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** The eye exam must be performed or reviewed by an ophthalmologist or optometrist, or there must be evidence that fundus photography results were read by a system that provides an artificial intelligence (AI) interpretation. Alternatively, results may be read by a qualified reading center that operates under the direction of a medical director who is a retinal specialist **Updated numerator note: For the Medicare Part B Claims Measure Specifications collection type:** **Added:** To assess the age for exclusions, the patient's age on the date of the encounter should be used.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the description of the measure to remove the term 'overlaps' and replace with plain language for clarity and to ensure consistency in implementation. Additionally, we propose to update the numerator for the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types to remove the terms 'overlaps' and 'overlapping' and replace with plain language for clarity and to ensure consistency in implementation. We propose that the denominator exclusion language be updated for all collection types to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, for the eCQM Specifications collection type language was added to clarify timing for those exclusions that have an age-related component. For the eCQM Specifications collection type, the term 'overlaps' was removed and replaced with plain language for clarity and the denominator exclusion for frailty or advanced illness was revised to update how these patients will be captured.

Category	Description
	Additionally, we propose to update the guidance for the eCQM Specifications collection type and numerator note for the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types to allow for the use of artificial intelligence as it is applicable and clinically appropriate for numerator compliance for this measure. We propose to revise the denominator note for the MIPS CQMs Specifications collection type and the numerator note for the Medicare Part B Claims Measure Specifications collection type to clarify the timing for those exclusions that have an age-related component.

D.16 Diabetes: Medical Attention for Nephropathy

Category	Description
NQF # / eCQM NQF #:	0062 / N/A
Quality#:	119
CMS eCQM ID:	CMS134v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	The percentage of patients 18-75 years of age with diabetes who had a nephropathy screening test or evidence of nephropathy during the measurement period.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude patients who are in hospice care for any part of the measurement period. 2. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior **Added:** 1. Exclude patients receiving palliative care during the measurement period. **Updated value set/coding: For the eCQM Specifications collection type: Removed:** coding related to transplant donors from "Kidney Transplant" (2.16.840.1.113883.3.464.1003.109.12.1012) value set. **Updated denominator note: For the MIPS CQMs Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator exclusion: For the MIPS CQMs Specifications collection types:** **Added:** 1. Patients who use palliative care services any time during the measurement period
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose that the denominator exclusion language be updated for all collection types to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, for the eCQM Specifications collection type language was added to clarify timing for those exclusions that have an age-related component. For the eCQM Specifications collection type, the term 'overlaps' was removed and replaced with plain language for clarity and the denominator exclusion for frailty or advanced illness was revised to update how these patients will be captured. Additionally, we propose to update the "Kidney Transplant" value set to remove coding related to kidney transplant donors as it would be appropriate for these patients to still receive a screening for nephropathy. We propose to revise the denominator note for the MIPS CQMs Specifications collection type to clarify the timing for those exclusions that have an age-related component.

D.17 Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	128
CMS eCQM ID:	CMS69v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	Medicare Part B Claims Measure Specifications | eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a BMI documented during the current encounter or within the previous twelve months AND who had a follow-up plan documented if most recent BMI was outside of normal parameters.
Substantive Change:	**The measure denominator exclusion is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** 1. Documentation stating the patient has received or is currently receiving palliative or hospice care 2. Documentation of patient pregnancy anytime during the measurement period prior to and including the current encounter
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the denominator exclusions to increase clarity and add specificity to ensure the appropriate patient population is being excluded from the assessment of the quality action.

D.18 Preventive Care and Screening: Screening for Depression and Follow-Up Plan

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	134
CMS eCQM ID:	CMS2v11
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	Medicare Part B Claims Measure Specifications eCQM Specifications CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 12 years and older screened for depression on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan is documented on the date of the eligible encounter.
Substantive Change:	**The measure description is revised to read: For the CMS Web Interface Measure Specifications collection type:** Percentage of patients aged 12 years and older screened for depression on the date of the encounter or up to 14 days prior to the date of the encounter using an age appropriate standardized depression screening tool AND if positive, a follow-up plan is documented on the date of the eligible encounter. **The measure guidance is revised to read: For the eCQM Specifications collection type:** The intent of the measure is to screen for depression in patients who have never had a diagnosis of depression or bipolar disorder prior to the eligible encounter used to evaluate the numerator. Patients who have ever been diagnosed with depression or bipolar disorder will be excluded from the measure. A depression screen is completed on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan must be documented on the date of the encounter, such as referral to a provider for additional evaluation, pharmacological interventions, or other interventions for the diagnosis or treatment of depression. This measure does not require documentation of a specific score, just whether results of the normalized and validated depression screening tool used are considered positive or negative. Each standardized screening tool provides guidance on whether a particular score is considered positive for depression. This eCQM is a patient-based measure. Depression screening is required once per measurement period, not at all encounters. Screening Tools: * An age-appropriate, standardized, and validated depression screening tool must be used for numerator compliance. * The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record. * The depression screening must be reviewed and addressed by the provider filing the code, on the date of the encounter. Positive pre-screening results indicating a patient is at high risk for self-harm should receive more urgent intervention as determined by the provider practice. * The screening should occur during a qualifying encounter or up to 14 days prior to the date of the qualifying encounter. * The measure assesses the most recent depression screening completed either during the eligible encounter or within the 14 days prior to that encounter. Therefore, a clinician would not be able to complete another screening at the time of the encounter to count towards a follow-up, because that would serve as the most recent screening. In order to satisfy the follow-up requirement for a patient screening positively, the eligible clinician would need to provide one of the aforementioned follow-up actions, which does not include use of a standardized depression screening tool. Follow-Up Plan: The follow-up plan must be related to a positive depression screening, for example: "Patient referred for psychiatric evaluation due to positive depression screening." Examples of a follow-up plan include but are not limited to: * Referral to a practitioner or program for further evaluation for depression, for example, referral to a psychiatrist, psychologist, social worker, mental health counselor, or other mental health service such as family or group therapy, support group, depression management program, or other service for treatment of depression * Other interventions designed to treat depression such as behavioral health evaluation, psychotherapy, pharmacological interventions, or additional treatment options Should a patient screen positive for depression: * A clinician should only order pharmacological intervention when appropriate and after sufficient diagnostic evaluation. However, for the purposes of this measure, additional screening and assessment during the qualifying encounter will not qualify as a follow-up plan. * A clinician should opt to complete a suicide risk assessment when appropriate and based on individual patient characteristics. However, for the purposes of this measure, a suicide risk assessment or additional screening using a standardized tool will not qualify as a follow-up plan. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **For the CMS Web Interface Measure Specifications collection type:** A depression screen is completed on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan must be documented on the date of the encounter, such as referral to a provider for additional evaluation, pharmacological interventions, or other interventions for the treatment of depression. This is a patient-based measure. Depression screening is required once per measurement period, not at all encounters. This measure does not require documentation of a specific score, just whether results of the normalized and validated depression screening tool used are considered positive or negative. Each standardized screening tool provides guidance on whether a particular score is considered positive for depression. The intent of the measure is to screen for depression in patients who have never had a diagnosis of depression or bipolar disorder prior to the eligible encounter used to evaluate the numerator. Patients who have ever been diagnosed with depression or bipolar disorder will be excluded from the measure. Screening Tools: * An age-appropriate, standardized, and validated depression screening tool must be used for numerator compliance. * The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record * The depression screening must be reviewed and addressed by the provider, filing the code, on the date of the encounter. Positive pre-screening results indicating a patient is at high risk for self-harm should receive more urgent intervention

Category	Description
	as determined by the provider practice * The screening should occur during a qualifying encounter or up to 14 days prior to the date of the qualifying encounter * The measure assesses the most recent depression screening completed either during the eligible encounter or within the 14 days prior to that encounter. Therefore, a clinician would not be able to complete another screening at the time of the encounter to count towards a follow-up, because that would serve as the most recent screening. To satisfy the follow-up requirement for a patient screening positively, the eligible clinician would need to provide one of the aforementioned follow-up actions, which does not include use of a standardized depression screening tool. Follow-Up Plan: The follow-up plan must be related to a positive depression screening, for example: "Patient referred for psychiatric evaluation due to positive depression screening." Examples of a follow-up plan include but are not limited to: * Referral to a provider practitioner or program for further evaluation for depression, for example, referral to a psychiatrist, psychologist, social worker, mental health counselor, or other mental health service such as family or group therapy, support group, depression management program, or other service for treatment of depression * Other interventions designed to treat depression such as behavioral health evaluation, psychotherapy, pharmacological interventions, or additional treatment options Should a patient screen positive for depression, a clinician should: *Only order pharmacological intervention when appropriate and after sufficient diagnostic evaluation. However for the purposes of this measure, additional screening and assessment during the qualifying encounter will not qualify as a follow-up plan. *Opt to complete a suicide risk assessment when appropriate and based on individual patient characteristics. However, for the purposes of this measure, a suicide risk assessment or additional screening using a standardized tool will not qualify as a follow-up plan. **Updated guidance denominator: For the CMS Web Interface Measure Specifications collection type: Revised:** The intent of the measure is to screen for depression in patients who have never had a diagnosis of depression or bipolar disorder prior to the eligible encounter used to evaluate the numerator. Patients who have ever been diagnosed with depression or bipolar disorder will be excluded from the measure. **Updated denominator exclusion: For the CMS Web Interface Measure Specifications collection type: Revised:** Patients who have been diagnosed with depression or with bipolar disorder. **The measure numerator instructions are revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** Numerator Instructions: A depression screen is completed on the date of the encounter or up to 14 days prior to the date of the encounter using an age-appropriate standardized depression screening tool AND if positive, a follow-up plan must be documented on the date of the encounter, such as referral to a provider for additional evaluation, pharmacological interventions, or other interventions for the treatment of depression. This is a patient-based measure. Depression screening is required once per measurement period, not at all encounters. An age-appropriate, standardized, and validated depression screening tool must be used for numerator compliance. The name of the age-appropriate standardized depression screening tool utilized must be documented in the medical record. This measure does not require documentation of a specific score, just whether results of the normalized and validated depression screening tool used are considered positive or negative. Each standardized screening tool provides guidance on whether a particular score is considered positive for depression. The depression screening must be reviewed and addressed by the provider on the date of the encounter. Positive pre-screening results indicating a patient is at high risk for self-harm should receive more urgent intervention as determined by the provider practice. The screening should occur during a qualifying encounter or up to 14 days prior to the date of the qualifying encounter. The measure assesses the most recent depression screening completed either during the eligible encounter or within the 14 days prior to that encounter. Therefore, a clinician would not be able to complete another screening at the time of the encounter to count towards a follow-up, because that would serve as the most recent screening. In order to satisfy the follow-up requirement for a patient screening positively, the eligible clinician would need to provide one of the aforementioned follow-up actions, which does not include use of a standardized depression screening tool. Should a patient screen positive for depression, a clinician should: • Only order pharmacological intervention when appropriate and after sufficient diagnostic evaluation. However, for the purposes of this measure, additional screening and assessment during the qualifying encounter will not qualify as a follow-up plan. • Opt to complete a suicide risk assessment when appropriate and based on individual patient characteristics. However, for the purposes of this measure, a suicide risk assessment or additional screening using a standardized tool, will not qualify as a follow-up plan **Updated definitions (numerator): For the CMS Web Interface Measure Specifications collection type: Revised:** Follow-Up Plan: Documented follow-up for a positive depression screening must include one or more of the following: • Referral to a provider for additional evaluation and assessment to formulate a follow-up plan for a positive depression screen • Pharmacological interventions • Other interventions or follow-up for the diagnosis or treatment of depression **Updated numerator submission guidance: For the CMS Web Interface Measure Specifications collection type: Removed:** If recommended follow-up is additional evaluation or assessment, the additional evaluation or assessment must occur at the eligible encounter. **Revised:** Submission Guidance: Numerator Submission, Guidance Note: Use most recent screening for depression which occurred either during the encounter or up to 14 days prior to the encounter

Category	Description
	Although the patient may have access to the depression screening tool in advance of the encounter, the depression screening results must be documented on the date of the encounter. The results must be reviewed/verified and documented by the eligible professional in the medical record on the date of the encounter to meet the screening portion of this measure. **Updated numerator option: For the CMS Web Interface Measure Specifications collection type: Revised:** Medical Reason(s) Documentation of medical reason for not screening patient for depression (e.g., cognitive, functional, or motivational limitations that may impact accuracy of results; patient is in an urgent or emergent situation where time is of the essence and to delay treatment would jeopardize the patient's health status)
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the eCQM Specifications and CMS Web Interface Measure Specifications collection types guidance section to remove the requirement for an in-office review of the assessment as it is appropriate to allow this to be completed via telehealth encounter, clarify requirements as only documentation of a negative or positive depression screening is needed to align with the intent of the measure, and revise the numerator compliant follow-up plans based on stakeholder feedback to ensure clinical appropriateness. We propose to update the CMS Web Interface Measure Specification collection type description, guidance sections, definitions, and numerator sections to provide clarity as to what constitutes a follow-up plan. Additionally, language throughout the measure specification was updated allowing for alignment with clinical workflow. The measure assesses the most recent depression screening completed either during the encounter or up to 14 days prior to that encounter. Therefore, a clinician would not be able to complete another screening to count towards a follow-up, since that would serve as the most recent screening. To satisfy the follow-up requirement for a patient screening positively, the eligible clinician would need to provide one of the aforementioned follow-up actions, which does not include use of a standardized depression screening tool. Additionally, suicide risk assessments have been removed as a numerator compliant follow-up plan option as this should be completed when appropriate and based on the assessment by the clinician regarding the severity of the patient's symptoms of depression at the time of depression screening. We also propose to update the measure language and denominator exclusions to reflect that this measure is screening of depression for patients who have not been previously diagnosed or have an active diagnosis of depression or bipolar disorder. This preventive measure assesses screening and follow up plan for patients that are screened positive for depression. The denominator exception was revised in order to streamline the language. We propose to update the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types numerator instructions to clarify requirements as only documentation of a negative or positive depression screening is needed to align with the intent of the measure and revise instructions for the numerator compliant follow-up plans based on stakeholder feedback to ensure clinical appropriateness.

D.19 Oncology: Medical and Radiation – Pain Intensity Quantified

Category	Description
NQF # / eCQM NQF #:	0384 / 0384e
Quality#:	143
CMS eCQM ID:	CMS157v10
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patient visits, regardless of patient age, with a diagnosis of cancer currently receiving chemotherapy or radiation therapy in which pain intensity is quantified.
Substantive Change:	**The measure guidance is revised to read: For the eCQM Specifications collection type:** This eCQM is an episode-based measure. An episode is defined as each eligible encounter for patients with a diagnosis of cancer who are also currently receiving chemotherapy or radiation therapy during the measurement period. For patients receiving radiation therapy, pain intensity should be quantified at each radiation treatment management encounter where the patient and physician have a face-to-face or telehealth interaction. Due to the nature of some applicable coding related to radiation therapy (e.g., delivered in multiple fractions), the billing date for certain codes may or may not be the same as the face-to-face or telehealth encounter date. In this instance, for the reporting purposes of this measure, the billing date should be used to pull the appropriate patients into the initial population. It is expected, though, that the numerator criteria would be performed at the time of the actual face-to-face or telehealth encounter during the series of treatments. A lookback (retrospective) period of 7 days, including the billing date, may be used to identify the actual face-to-face or telehealth encounter, which is required to assess the numerator. Therefore, pain intensity should be quantified during the face-to-face or telehealth encounter occurring on the actual billing date or within the 6 days prior to the billing date. For patients receiving chemotherapy, pain intensity should be quantified at each face-to-face or telehealth encounter with the physician while the patient is currently receiving chemotherapy. For purposes of identifying eligible encounters, patients "currently receiving chemotherapy" refers to patients administered chemotherapy on the same day as the encounter or during the 30 days before the date of the encounter AND during the 30 days after the date of the encounter. Pain intensity should be quantified using a standard instrument, such as a 0-10 numerical rating scale, visual analog scale, a categorical scale, or pictorial scale. Examples include the Faces Pain Rating Scale and the Brief Pain Inventory (BPI). This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM **Updated value set/coding: For the eCQM Specifications collection type: Removed:** Topical chemotherapy from value set "Chemotherapy Administration" (2.16.840.1.113883.3.526.3.1027) and coding for neurofibromatosis from value set "Cancer" (2.16.840.1.113883.3.526.3.1010). **Updated denominator criteria: For the MIPS CQMs Specifications collection type:** **Removed:** Submission critiera one coding related to neurofibromatosis. **Revised:** Patient procedure on or within 30 days before denominator eligible encounter AND Patient procedure on or within 30 days after denominator eligible encounter **Updated instructions: For the MIPS CQMs Specifications collection type: Revised:** NOTE: For patients receiving radiation therapy, pain intensity should be quantified at each radiation treatment management encounter, where the patient and physician have a face-to-face or telehealth interaction. Due to the nature of some applicable coding related to the radiation therapy (e.g., delivered in multiple fractions), the billing date for certain codes may or may not be the same as the face-to-face or telehealth encounter date. In this instance, for the reporting purposes of this measure, the billing date should be used to pull the appropriate patients into the initial population. It is expected, though, that the numerator criteria would be performed at the time of the actual face-to-face or telehealth encounter during the series of treatments. A lookback (retrospective) period of 7 days, including the billing date, may be used to identify the actual face-to-face or telehealth encounter, which is required to assess the numerator. Therefore, pain intensity should be quantified during the face-to-face or telehealth encounter occurring on the actual billing date or within the 6 days prior to the billing date. For patients receiving chemotherapy, pain intensity should be quantified at each face-to-face or telehealth encounter with the physician while the patient is currently receiving chemotherapy. For purposes of identifying eligible encounters, patients "currently receiving chemotherapy" refers to patients administered chemotherapy on the same day as the encounter or during the 30 days before the date of the encounter AND during the 30 days after the date of the encounter
Steward:	American Society of Clinical Oncology
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the eCQM Specifications guidance section to align the statement regarding timing of chemotherapy to ensure alignment with the logic timing constraints and added language for telehealth encounters as they are appropriate for inclusion for assessment of quality action completion. Additionally, we propose to remove topical chemotherapy from the "Chemotherapy Administration" value set and neurofibromatosis from the "Cancer" (2.16.840.1.113883.3.526.3.1010) value set as these patient populations are not appropriate for inclusion within the initial patient population for the purposes of clinical quality action assessment. We propose to remove coding related to neurofibromatosis from the MIPS CQMs Specifications collection type denominator criteria for Submission Criteria One as this patient population is not appropriate for inclusion with the denominator eligible patient population for the purposes of clinical quality action assessment. Additionally, the denominator criteria was revised to clarify the timing of the chemotherapy and align with the intent of the measure. We propose to update the MIPS CQMs Specifications collection type instructions note to add clarity in timing of chemotherapy and ensure alignment throughout the measure specification in accordance with measure intent.

D.20 Tuberculosis Screening Prior to First Course Biologic Therapy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	176
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	If a patient has been newly prescribed a biologic disease-modifying anti-rheumatic drug (DMARD) therapy, then the medical record should indicate TB testing in the preceding 12-month period.
Substantive Change:	**Updated denominator instructions:** **Revised:** Patients are considered to be receiving a first course of therapy using a biologic DMARD only if they have been prescribed DMARD biologic therapy during the measurement period and also have not been prescribed DMARD biologic therapy in the 15 months preceding the encounter where DMARD biologic therapy was newly started. Biologic DMARD therapy includes **Added:** Guselkumab (Tremfya), Infliximab-axxq (Avsola), Ixekizumab (Taltz), Upadacitinib (RINVOQ) **Added:** To be included in the denominator, patient must have an encounter and a prescription for DMARD biologic therapy in the measurement period (1/1/2022-12/31/2022) WITHOUT a prior prescription for DMARD biologic therapy within the 15 months prior to the DMARD prescribed during the measurement period. **Updated denominator criteria: Added:** coding for federally qualified health center (FQHC) visit.
Steward:	American College of Rheumatology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the denominator instructions to include a 15-month lookback period in response to stakeholder feedback to align with clinical workflow for more established patients and to add clarity regarding the denominator eligible patient population. Additionally, the medications list was updated to align with current DMARD medications available to treat rheumatic disease. We propose to add coding to the denominator eligibility criteria for visits that occur at a FQHC to allow of quality action assessment for these clinicians. This revision is not a reflection of any policy update and was made to allow those clinicians who bill exclusively through a FQHC to track their performance on the measure. This payment method is still not eligible for payment adjustments under MIPS.

D.21 Rheumatoid Arthritis (RA): Periodic Assessment of Disease Activity

Category	Description
NQF # / eCQM NQF #:	2523 / N/A
Quality#:	177
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of rheumatoid arthritis (RA) who have an assessment of disease activity using an ACR-preferred RA disease activity assessment tool at ≥50% of encounters for RA for each patient during the measurement year.
Substantive Change:	**Updated denominator criteria: Added:** coding for federally qualified health center (FQHC) visit.
Steward:	American College of Rheumatology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to add coding to the denominator eligibility criteria for visits that occur at a FQHC to allow of quality action assessment for these clinicians.

D.22 Rheumatoid Arthritis (RA): Functional Status Assessment

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	178
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of rheumatoid arthritis (RA) for whom a functional status assessment was performed at least once within 12 months.
Substantive Change:	**Updated denominator criteria: Added:** coding for federally qualified health center (FQHC) visit.
Steward:	American College of Rheumatology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to add coding to the denominator eligibility criteria for visits that occur at a FQHC to allow of quality action assessment for these clinicians.

D.23 Rheumatoid Arthritis (RA): Glucocorticoid Management

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	180
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with a diagnosis of rheumatoid arthritis (RA) who have been assessed for glucocorticoid use and, for those on prolonged doses of prednisone > 5 mg daily (or equivalent) with improvement or no change in disease activity, documentation of glucocorticoid management plan within 12 months.
Substantive Change:	**Updated denominator criteria: Added:** coding for federally qualified health center (FQHC) visit.
Steward:	American College of Rheumatology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to add coding to the denominator eligibility criteria for visits that occur at a FQHC to allow of quality action assessment for these clinicians.

D.24 Functional Outcome Assessment

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	182
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of visits for patients aged 18 years and older with documentation of a current functional outcome assessment using a standardized functional outcome assessment tool on the date of the encounter AND documentation of a care plan based on identified functional outcome deficiencies on the date of the identified deficiencies.
Substantive Change:	**Modified collection type:** MIPS CQM Specifications collection type. **Updated numerator definition: Added:** EAT-10: A Swallowing Screening Tool, Health Partners Hearing Assessment and Tinneti Performance Oriented Mobility Assessment (POMA) as eligible standardized tools. **Revised:** Standardized Tool definition note to include speech and language capacity. Functional Outcome Deficiencies – Impairment or loss of function related to musculoskeletal/neuromusculoskeletal capacity, including but are not limited to: restricted flexion, extension and rotation, back pain, neck pain, pain in the joints of the arms or legs, and headaches OR Impairment or loss of function related to speech and language capacity, including but not limited to: swallowing, hearing, and balance disorders
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to remove the Medicare Part B Claims Measure Specifications collection type as it has reached the end of the topped out lifecycle as finalized in 82 FR 53640. However, the benchmarking data continues to show a gap for the MIPS CQMs Specifications collection type, as such, the measure will be retained for this collection type. We propose to update the numerator definition to include concepts of swallowing, hearing, and balance to the measure as it is appropriate to assess this patient population for impairment or loss of function and create a follow-up plan of care based upon any identified loss of function or impairment. In the circumstance the Medicare Part B Claims Measure Specifications collection type is not finalized for removal, all finalized substantive changes will be reflected within this collection type specification.

D.25 Cataracts: 20/40 or Better Visual Acuity within 90 Days Following Cataract Surgery

Category	Description
NQF # / eCQM NQF #:	0565 / 0565e
Quality#:	191
CMS eCQM ID:	CMS133v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of cataract surgeries for patients aged 18 years and older with a diagnosis of uncomplicated cataract and no significant ocular conditions impacting the visual outcome of surgery and had best-corrected visual acuity of 20/40 or better (distance or near) achieved in the operative eye within 90 days following the cataract surgery.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type: Added:** coding for homonymous bilateral field defects and generalized contraction of visual field to the "Visual Field Defects" (2.16.840.1.113883.3.526.3.1446) value set and coding for disorders of visual cortex in (due to) inflammatory disorders to the "Disorders of Visual Cortex" (2.16.840.1.113883.3.526.3.1458) value set. **Updated denominator exclusion: For all collection types:** **Removed:** episcleritis. **Updated denominator exclusion: For the MIPS CQMs Specifications collection type:** **Added:** diagnoses codes to the Significant Ocular Conditions 'Visual Fields Defects' for sector or arcuate defects, other localized visual field defect, homonymous and heteronymous bilateral field defects, and generalized contraction of visual field.
Steward:	American Academy of Ophthalmology
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale:	We propose to update the eCQM Specifications collection type denominator exclusion coding to add appropriate coding for other relevant "disorders of visual field defects" and "disorders of visual cortex" diagnosis codes as these patients should not be included in the initial patient population for the assessment of the clinical quality action. The denominator exclusion coding was updated for all collection types removing diagnosis of episcleritis as a denominator exclusion as the measure steward's Technical Expert Panel (TEP) advised that this would not affect central visual acuity and as such, should not be a criteria for denominator exclusion as it would be appropriate for these patients to be assessed for best-corrected visual acuity following cataract surgery. We propose to update the denominator exclusion for the MIPS CQMs Specifications collection type to include appropriate coding for conditions to ensure the appropriate patient population is being included in the eligible denominator patient population for assessment of the clinical quality action.

D.26 Functional Status Change for Patients with Knee Impairments

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	217
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	A patient-reported outcome measure of risk-adjusted change in functional status for patients aged 14 years+ with knee impairments. The change in functional status (FS) is assessed using the FOTO Lower Extremity Physical Function (LEPF) patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static measure).
Substantive Change:	**The measure description is revised to read:** A patient-reported outcome measure of risk-adjusted change in functional status for patients 14 years+ with knee impairments. The change in functional status (FS) is assessed using the FOTO Lower Extremity Physical Function (LEPF) patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static measure).
Steward:	Focus on Therapeutic Outcomes, Inc.
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to update the measure description to align language across Focus on Therapeutic Outcomes, Inc. (FOTO) measures in order to provide clarity to clinicians.

D.27 Functional Status Change for Patients with Lower Leg, Foot or Ankle Impairments

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	219
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	A patient-reported outcome measure of risk-adjusted change in functional status for patients 14 years+ with foot, ankle and lower leg impairments. The change in functional status (FS) is assessed using the FOTO Lower Extremity Physical Function (LEPF) patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static measure).
Substantive Change:	**The measure description is revised to read:** A patient-reported outcome measure of risk-adjusted change in functional status for patients 14 years+ with foot, ankle or lower leg impairments. The change in functional status (FS) is assessed using the FOTO Lower Extremity Physical Function (LEPF) patient- reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static measure).
Steward:	Focus on Therapeutic Outcomes, Inc.
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to update the measure description to align language across Focus on Therapeutic Outcomes, Inc. (FOTO) measures in order to provide clarity to clinicians.

D.28 Preventive Care and Screening: Tobacco Use: Screening and Cessation Intervention

Category	Description
NQF # / eCQM NQF #:	0028 / 0028e
Quality#:	226
CMS eCQM ID:	CMS138v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	Medicare Part B Claims Measure Specifications | eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within 12 months AND who received tobacco cessation intervention if identified as a tobacco user
Substantive Change:	**The measure description is revised to read: For the eCQM Specifications collection type:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times during the measurement period AND who received tobacco cessation intervention if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times during the measurement period b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times during the measurement period AND who received tobacco cessation intervention if identified as a tobacco user **For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period AND who received tobacco cessation intervention on the date of the encounter or within the previous 12 months if identified as a tobacco user. **For the CMS Web Interface Measure Specifications collection type:** Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period AND who received tobacco cessation intervention on the date of the encounter or within the previous 12 months if identified as a tobacco user. Three rates are reported: a. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period. b. Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention on the date of the encounter or within the previous 12 months. c. Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period AND who received tobacco cessation intervention if identified as a tobacco user on the date of the encounter or within the previous 12 months. **Updated guidance:** **For the eCQM Specifications collection type: Revised:** To satisfy the intent of this measure, a patient must have at least one tobacco use screening during the measurement period. If a patient has multiple tobacco use screenings during the measurement period, only the most recent screening, which has a documented status of tobacco user or tobacco non-user, will be used to satisfy the measure requirements. **For the CMS Web Interface Measure Specifications collection type: Revised:** To reflect a shortened timeframe of 12 months. **Updated value set/coding: For the eCQM Specifications and CMS Web Interface Measure Specifications collection type:** **Removed:** passive smoker from "Tobacco User" (2.16.840.1.113883.3.526.3.1170) value set. **The measure instructions are revised to read: For the MIPS CQMs Specifications collection types:** This measure is to be submitted a minimum of once per performance period for patients seen during the performance period. This measure is intended to reflect the quality of services provided for preventive screening for tobacco use. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who provided the measure-specific denominator coding. For implementation of the measure, the denominator eligible encounter should be used to determine if the numerator action for the tobacco cessation intervention was performed within the 12 month look back period from the date of the denominator eligible encounter. This measure will be calculated with 3 performance rates: 1) Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period 2) Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention on the date of the encounter or within the previous 12 months 3) Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period AND who received tobacco cessation intervention if identified as a tobacco user on the date of the encounter or within the previous 12 months **For the Medicare Part B Claims Measure Specifications collection types:** This measure is to be submitted a minimum of once per performance period for patients seen during the performance period. This measure is intended to reflect the quality of services provided for preventive screening for tobacco use. For implementation of the

Category	Description
	measure, the denominator eligible encounter should be used to determine if the numerator action for the tobacco cessation intervention was performed within the 12 month look back period from the date of the denominator eligible encounter. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who provided the measure-specific denominator coding. This measure will be calculated with 3 performance rates: 1) Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period 2) Percentage of patients aged 18 years and older who were identified as a tobacco user who received tobacco cessation intervention on the date of the encounter or within the previous 12 months 3) Percentage of patients aged 18 years and older who were screened for tobacco use one or more times within the measurement period AND who received tobacco cessation intervention if identified as a tobacco user on the date of the encounter or within the previous 12 months **Updated submission criteria: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types: Added:** The language "on the date of the encounter or within the previous 12 months" to submission criteria 2 and 3. **Updated numerator: For the eCQM Specifications collection types: Revised:** NUMERATOR (SUBMISSION CRITERIA 1): Patients who were screened for tobacco use at least once within the measurement period NUMERATOR (SUBMISSION CRITERIA 3): Patients who were screened for tobacco use at least once within the measurement period AND who received tobacco cessation intervention if identified as a tobacco user **For the MIPS CQMs Specifications, Medicare Part B Claims Measure Specifications, and CMS Web Interface Measure Specifications collection types: Revised:**NUMERATOR (SUBMISSION CRITERIA 1): Patients who were screened for tobacco use at least once within the measurement period NUMERATOR (SUBMISSION CRITERIA 2): Patients who received tobacco cessation intervention on the date of the encounter or within the previous 12 months NUMERATOR (SUBMISSION CRITERIA 3): Patients who were screened for tobacco use at least once within the measurement period AND who received tobacco cessation intervention if identified as a tobacco user on the date of the encounter or within the previous 12 months **Updated numerator note: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types: Revised:** Replaced "12 months" with "the measurement period" for submission criteria 1 and 3. **Added:** The language "on the date of the encounter or within the previous 12 months" to submission criteria 2 and 3 in reference to tobacco cessation intervention. **Updated guidance numerator note: For the CMS Web Interface Measure Specifications collection type: Updated:** Revised language to reflect that the tobacco screening is once per performance period and tobacco cessation intervention if necessary must be completed during the encounter or previous 12 months. **Updated numerator options: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types: Revised:** Submission Criteria 2: **Performance Met:** Patient identified as a tobacco user received tobacco cessation intervention on the date of the encounter or within the previous 12 months (counseling and/or pharmacotherapy) **Denominator Exception:** Documentation of medical reason(s) for not providing tobacco cessation intervention on the date of the encounter or within the previous 12 months (e.g., limited life expectancy, other medical reason) **Performance Not Met:** Patient identified as tobacco user did not receive tobacco cessation intervention on the date of the encounter or within the previous 12 months (counseling and/or pharmacotherapy), reason not given Submission Criteria 3: **Denominator Exception:** Documentation of medical reason(s) for not providing tobacco cessation intervention on the date of the encounter or within the previous 12 months if identified as a tobacco user (e.g., limited life expectancy, other medical reason)
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the language for the MIPS CQMs Specifications, the Medicare Part B Measure Specifications, and CMS Web Interface Measure Specifications collection types to clarify the timing for tobacco use screening and tobacco cessation intervention for those patients identified as tobacco users. The intent of the measure is to ensure all patients are screened for tobacco use on an annual basis (each performance period) and receive tobacco cessation intervention, if identified as a tobacco user on the date of the encounter or within the previous 12 months. We propose to update the eCQM Specifications collection type to reflect that both the tobacco use screening and tobacco use intervention for those patients identified as tobacco users should occur annually (each performance period). We understand that causes a slight misalignment between the different collection types, which is due to the annual update timeline differences between the collection types. This misalignment will be reviewed in future annual update cycles. Additionally, we propose to update the eCQM Specifications and CMS Web Interface Measure Specifications collection type to "Tobacco User" value set to remove passive smoker coding as these patients are not appropriate for inclusion in the tobacco user identified patient population as they do not meet the intent of the measure and the clinical quality action would not be applicable to them. In the event the proposed substantive change(s) are finalized, for the CMS Web Interface Measure Specifications collection type, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of the substantive changes. Under MIPS, the CMS Web Interface measures are scored in comparison to quality measure benchmarks established under the Medicare Shared Savings Program. The benchmarks established for the CMS Web Interface measures are based on historical data. If a benchmark is able to be established for a CMS

Category	Description
	Web Interface measure with the proposed substantive changes, then such benchmark would be used for scoring purposes. If a benchmark is not able to be established for a CMS Web Interface measure, then the following would apply for such CMS Web Interface measure: excluded from MIPS scoring in accordance with § 414.1380(b)(1)(i)(A)(2)(i) provided that the data completeness requirement is met and the applicable measure data is submitted via the CMS Web Interface.

D.29 Controlling High Blood Pressure

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	236
CMS eCQM ID:	CMS165v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients 18 - 85 years of age who had a diagnosis of hypertension overlapping the measurement period or the year prior to the measurement period, and whose most recent blood pressure was adequately controlled (< 140/90 mmHg) during the measurement period.
Substantive Change:	**The measure description is revised to read: For all collection types:** Percentage of patients 18-85 years of age who had a diagnosis of essential hypertension starting before and continuing into, or starting during the first six months of the measurement period, and whose most recent blood pressure was adequately controlled (<140/90mmHg) during the measurement period. **Updated denominator exclusion: For the eCQM Specifications collection type:** **Revised:** 1. Exclude patients who are in hospice care for any part of the measurement period. 2. Exclude patients 66 and older with an indication of frailty for any part of the measurement period who meet any of the following criteria: - Advanced illness with two outpatient encounters during the measurement period or the year prior - OR advanced illness with one inpatient encounter during the measurement period or the year prior - OR taking dementia medications during the measurement period or the year prior **Added:** 1. Exclude patients 81 and older with an indication of frailty for any part of the measurement period. 2. Exclude patients receiving palliative care during the measurement period. **Revised:** Logic to allow ESRD encounter to be on or before the end of the measurement period. **For the CMS Web Interface Measure Specifications collection type:** **Revised:** 1. Patients age 66 and older in Institutional Special Needs Plans (SNP) or residing in long-term care with a POS code 32, 33, 34, 54 or 56 for more than 90 consecutive days during the measurement period. 2. Patients 66 – 80 years of age with at least one claim/encounter for frailty during the measurement period AND a dispensed medication for dementia during the measurement period or the year prior to the measurement period. 3. Patients 66 - 80 years of age with at least one claim/encounter for frailty during the measurement period AND either one acute inpatient encounter with a diagnosis of advanced illness or two outpatient, observation, ED or nonacute inpatient encounters on different dates of service with an advanced illness diagnosis during the measurement period or the year prior to the measurement period. **Added:** 1. Patients 81 years of age and older with at least one claim/encounter for frailty during the measurement period. **Updated value set/coding: For the eCQM Specifications and CMS Web Interface Measure Specifications collection types:** **Revised:** "Pregnancy" (2.16.840.1.113883.3.526.3.378) value set to more accurately capture pregnancy state. **Removed:** coding related to transplant donors from "Kidney Transplant" (2.16.840.1.113883.3.464.1003.109.12.1012) value set. **The measure guidance is revised to read: For the eCQM Specifications collection type:** In reference to the numerator element, only blood pressure readings performed by a clinician or a remote monitoring device are acceptable for numerator compliance with this measure. This includes blood pressures taken in person by a clinician and blood pressures measured remotely by electronic monitoring devices capable of transmitting the blood pressure data to the clinician. Blood pressure readings taken by a remote monitoring device and conveyed by the patient to the clinician are also acceptable. It is the clinician's responsibility and discretion to confirm the remote monitoring device used to obtain the blood pressure is considered acceptable and reliable and whether the blood pressure reading is considered accurate before documenting it in the patient's medical record. Do not include BP readings: -Taken during an acute inpatient stay or an ED visit -Taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the day of the test or procedure, with the exception of fasting blood tests. -Taken by the patient using a non-digital device such as with a manual blood pressure cuff and a stethoscope. If no blood pressure is recorded during the measurement period, the patient's blood pressure is assumed "not controlled." If there are multiple blood pressure readings on the same day, use the lowest systolic and the lowest diastolic reading as the most recent blood pressure reading. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **The measure initial patient population is revised to read: For the eCQM Specifications and CMS Web Interface Measure Specifications collection types:** Patients 18-85 years of age who had a visit and diagnosis of essential hypertension starting before and continuing into, or starting during the first six months of the measurement period.

Category	Description
	The measure denominator is revised to read: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types: Patients 18-85 years of age who had a visit and diagnosis of essential hypertension starting before and continuing into, or starting during the first six months of the measurement period. **Updated denominator exclusion: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Added:** Palliative care services given to patient any time during the measurement period **Updated denominator confirmation: For the CMS Web Interface Measure Specifications collection type: Revised:** The language to reflect the diagnosis for essential hypertenision must start before and continue into, or start during the first six months of the measurement period. **Updated denominator guidance: For the CMS Web Interface Measure Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator note: For the MIPS CQMs Specifications and the Medicare Part B Claims Measure Specifications collection types:** **Revised:** The diagnosis of essential hypertension must be present some time between 1 year prior to the measurement period and the first six months of the measurement period (January 1, 2021 - June 30, 2022). **For the MIPS CQMs Specifications collection type:** **Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **The measure instructions note, numerator note, and narrative guidance are revised to read: For the MIPS CQMs Specifications, Medicare Part B Claims Measure Specifications, and CMS Web Interface Measure Specifications collection types:** In reference to the numerator element, only blood pressure readings performed by a clinician or a remote monitoring device are acceptable for numerator compliance with this measure. This includes blood pressures taken in person by a clinician and blood pressures measured remotely by electronic monitoring devices capable of transmitting the blood pressure data to the clinician. Blood pressure readings taken by a remote monitoring device and conveyed by the patient to the clinician are also acceptable. It is the clinician's responsibility and discretion to confirm the remote monitoring device used to obtain the blood pressure is considered acceptable and reliable and whether the blood pressure reading is considered accurate before documenting it in the patient's medical record. Do not include BP readings: • Taken during an acute inpatient stay or an ED visit • Taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the day of the test or procedure, with the exception of fasting blood tests. BP readings taken on the same day that the member receives a common low-intensity or preventive procedure are eligible for use. For example, the following procedures are considered common low intensity or preventive (this list is just for reference, and is not exhaustive): • Vaccinations. • Injections (e.g., allergy, vitamin B-12, insulin, steroid, toradol, Depo-Provera, testosterone, lidocaine). • TB test. • IUD insertion. • Eye exam with dilating agents. • Wart or mole removal. • Taken by the patient using a non-digital device such as with a manual blood pressure cuff and a stethoscope. If no blood pressure is recorded during the measurement period, the patient's blood pressure is assumed "not controlled." If there are multiple blood pressure readings on the same day, use the lowest systolic and the lowest diastolic reading as the most recent blood pressure reading. **Updated numerator note: For the Medicare Part B Claims Measure Specifications collection type:** **Added:** To assess the age for exclusions, the patient's age on the date of the encounter should be used.
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Intermediate Outcome
Rationale:	We propose to update the measure description to remove the term 'overlapping' and add clarity to the timing associated with the hypertension diagnosis. We propose that the denominator exclusion language be updated for all but the CMS Web Interface Measure Specifications collection type to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, for the eCQM Specifications collection type language was added to clarify timing for those exclusions that have an age-related component. For the eCQM Specifications collection type, the term 'overlaps' was removed and replace with plain language for clarity and the denominator exclusion for frailty or advanced illness was revised to update how these patients will be captured. We propose to update the CMS Web Interface Measure Specifications collection type denominator exclusions language to clarify that, for the measure, long-term care will be defined as patients staying more than 90 consecutive days at the long-term care facility versus any 90 days within the performance period. Additionally for the CMS Web Interface Measure Specifications collection type denominator exclusions, we propose to update the ages for the frailty and advanced illness exclusions and add an exclusion specific to those patients 81 years and older to ensure the appropriate patients are being assessed for the quality action. We propose to update the eCQM Specifications and CMS Web Interface Measure Specifications collection types "Pregnancy" value set to more accurately capture the state of pregnancy to ensure the denominator exclusion is being applied to the correct patient population and revised the logic for the end stage renal disease (ESRD) encounter to align with the intent of the measure. Additionally, we propose to update the "Kidney Transplant" value set to remove coding related to kidney transplant donors as it

Category	Description
	would be appropriate for these patients to still be assessed for blood pressure control if diagnosed with essential hypertension. We propose to revise the eCQM Specifications guidance section to provide clarification that patient obtained blood pressure readings captured via non-digital devices are not acceptable for this measure as they may not provide an accurate reading and therefore do not meet the intent of the measure, as well as the addition of clarifying language for what suffices as an acceptable blood pressure reading. Additionally, we propose to update the initial patient population for the eCQM Specifications collection type to align with clarification for the timing of the hypertension diagnosis. We propose to update the MIPS CQMs Specifications, Medicare Part B Claims Measure Specifications, and CMS Web Interface Measure Specifications collection types denominator, denominator note, and denominator confirmation to align with clarification for the timing of the hypertension diagnosis. Additionally for the MIPS CQMs Specifications, the Medicare Part B Claims Measure Specifications, and the CMS Web Interface Measure Specifications collection types, we propose to update the instructions note, numerator note, and narrative guidance to better clarify acceptable blood pressure readings for the purposes of clinical quality action assessment and examples of low intensity or preventive procedures that would not preclude the use of a blood pressure reading from that day or the day prior. We propose to revise the denominator note for the MIPS CQMs Specifications collection type, the numerator note for the Medicare Part B Claims Measure Specifications collection type, and the denominator guidance for the CMS Web Interface Measure Specifications collection type to clarify the timing for those exclusions that have an age-related component.

D.30 Use of High-Risk Medications in Older Adults

Category	Description
NQF # / eCQM NQF #:	0022/ N/A
Quality#:	238
CMS eCQM ID:	CMS156v10
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients 65 years of age and older who were ordered at least two of the same high-risk medications.
Substantive Change:	**The measure description is revised to read:** **For the eCQM Specifications collection type:** Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class. Three rates are reported. 1. Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class. 2. Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class, except for appropriate diagnoses. 3. Total rate (the sum of the two numerators divided by the denominator, deduplicating for patients in both numerators). **For the MIPS CQMs Specifications collection type:** Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class. **Updated definition: For the eCQM Specifications collection type: Added:** Index prescription start date. The start date of the earliest prescription ordered for a high-risk medication during the measurement period. **The measure denominator exclusion is revised to read: For the eCQM Specifications collection type:** 1. Exclude patients who are in hospice care for any part of the measurement period. 2. Exclude patients receiving palliative care during the measurement period. **Updated logic and logic definitions: For the eCQM Specifications collection type: Removed:** the 90-day supply criterion to the non-benzodiazepine hypnotics. **Updated value set/coding: For the eCQM Specifications collection type:** **Added:** drug classes methscopeolamine and pyrilamine. **Removed:** drug class Diphenhydramine hydrochloride. **The measure numerator is revised to read: For the eCQM Specifications collection type:** Rate 1: Patients with at least two orders of the same high-risk medication to avoid from the same drug class. Rate 2: Patients with at least two orders of high-risk medications from the same medication class (i.e., antipsychotics and benzodiazepines), except for appropriate diagnoses. Total rate (the sum of the two previous numerators, deduplicated). **Updated numerator exclusion: For the eCQM Specifications collection type: Added:** Rate 2: For patients with two or more antipsychotic prescriptions ordered, exclude patients who did have a diagnosis of schizophrenia, schizoaffective disorder, or bipolar disorder on or between January 1 of the year prior to the measurement period and the Index Prescription Start Date (IPSD) for antipsychotics. For patients with two or more benzodiazepine prescriptions ordered, exclude patients who did have a diagnosis of seizure disorders, rapid eye movement sleep behavior disorder, benzodiazepine withdrawal, ethanol withdrawal, or severe generalized anxiety disorder on or between January 1 of the year prior to the measurement period and the IPSD for benzodiazepines. **Updated instructions: For the MIPS CQMs Specifications collection type:** **Added:** This measure will be calculated with 2 performance rates: 1. Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class. 2. Percentage of patients 65 years of age and older who were ordered at least two high-risk medications from the same drug class, except for appropriate diagnoses. For accountability reporting in the CMS MIPS program, the rate for submission criteria 1 is used for performance. **The measure denominator is revised to read: For the MIPS CQMs Specifications collection type:** SUBMISSION CRITERIA 1: PERCENTAGE OF PATIENTS 65 YEARS OF AGE AND OLDER WHO WERE ORDERED AT LEAST TWO HIGH-RISK MEDICATIONS FROM THE SAME DRUG CLASS Denominator (Submission Criteria 1): Patients 65 years and older who had a visit during the measurement period SUBMISSION CRITERIA 2: PERCENTAGE OF PATIENTS 65 YEARS OF AGE AND OLDER WHO WERE ORDERED AT LEAST TWO HIGH-RISK MEDICATIONS FROM THE SAME DRUG CLASS, EXCEPT FOR APPROPRIATE DIAGNOSES Denominator (Submission Criteria 2): Patients 65 years and older who had a visit during the measurement period **Updated denominator criteria: For the MIPS CQMs Specifications collection type: Added:** Submission Criteria 2 Denominator Criteria: Patient aged ≥ 65 years on date of encounter. Patient encounter during performance period (in alignment with submission criteria 1). Denominator exclusions for hospice and palliative care during the measurement period. **Updated denominator exclusion: For the MIPS CQMs Specifications collection type: Added:** Submission Criteria 1: Patients receiving palliative care during the measurement period.

Category	Description
	The measure numerator is revised to read: For the MIPS CQMs Specifications collection type: Numerator (Submission Criteria 1): Patients ordered at least two high-risk medications from the same drug class during the measurement year. Numerator (Submission Criteria 2): Patients with at least two orders of high-risk medications from the same drug class (i.e., antipsychotics and benzodiazepines), except for appropriate diagnoses. **Updated numerator definition: For the MIPS CQMs Specifications collection type: Revised:** Numerator (Submission Criteria 1): Definitions: The intent of the measure is to assess if the eligible clinician ordered high-risk medication(s).The intent of the numerator is to assess if the patient has either been ordered: • At least two high-risk medications from the same drug class (grouped by row) in Table 1 on different dates of service, or • At least two high-risk medications from the same drug class (grouped by row) in Table 2 on different dates of service, where the sum of days supply exceeds 90 days If the patient had a high-risk medication previously prescribed by another provider, they would not be counted towards the numerator unless the submitting provider also ordered a high-risk medication for them from the same drug class. Cumulative Medication Duration – an individual's total number of medication days over a specific period; the period counts multiple prescriptions with gaps in between, but does not count the gaps during which a medication was not dispensed. To determine the cumulative medication duration, determine first the number of the Medication Days for each prescription in the period: the number of doses divided by the dose frequency per day. Then add the Medication Days for each prescription without counting any days between the prescriptions. For example, there is an original prescription for 30 days with 2 refills for thirty days each. After a gap of 3 months, the medication was ordered again for 60 days with 1 refill for 60 days. The cumulative medication duration is (30 x 3) + (60 x 2) = 210 days over the 10 month period. Table 1 - High-Risk Medications at any dose or duration: **Removed:** Orphenadrine from Anticholinergics, first-generation antihistamines **Revised:** Antithrombotics – Dipyridamole, oral short-acting **Added:** Nonbenzodiazepine hypnotics – Eszopiclon, Zolpidem, Zaleplon Table 2 - High-Risk Medications With Days Supply Criteria **Removed:** Nonbenzodiazepine hypnotics **Added:** Numerator (Submission Criteria 2): Definitions: The intent of the numerator is to assess if the patient has been ordered at least two high-risk medications form the same drug class (grouped by row) in Table 3 on different dates or service. The intent of the measure is to assess if the submitting provider ordered the high-risk medication(s). If the patient had a high-risk medication previously prescribed by another provider, they would not be counted towards the numerator unless the submitting provider also ordered a high-risk medication for them from the same drug class. Index Prescription Start Date - the start date of the earliest prescription ordered for a high-risk medication during the measurement period. Table 3 - High-Risk Medications: Antipsychotics, first (conventional) and second (atypical) generation and Benzodiazepines, long, short, and intermediate acting. **Updated numerator instructions: For the MIPS CQMs Specifications collection type: Added:** Submission Criteria 2: INVERSE MEASURE - A lower calculated performance rate for this measure indicates better clinical care or control. The "Performance Not Met" numerator option for this measure is the representation of the better clinical quality or control. Submitting that numerator option will produce a performance rate that trends closer to 0%, as quality increases. For inverse measures a rate of 100% means all of the denominator eligible patients did not receive the appropriate care or were not in proper control. A high-risk medication is identified by: • A prescription for medications classified as high risk at any dose and for any duration listed in Table 3 **Updated numerator note: For the MIPS CQMs Specifications collection type: Removed:** numerator note. **Updated numerator options: For the MIPS CQMs Specifications collection type: Revised:** Submission Criteria 1: **Performance Met:** At least two orders for high-risk medications from the same drug class **Performance Not Met:** At least two orders for high-risk medications from the same drug class not ordered **Added:** Submission Criteria 2: **Performance Met:** At least two orders for high-risk medications from the same drug class **Performance Not Met:** At least two orders for high-risk medications from the same drug class not ordered **Performance Not Met:** Two or more antipsychotic prescriptions ordered for patients who had a diagnosis of schizophrenia, schizoaffective disorder, or bipolar disorder on or between January 1 of the year prior to the measurement period and the Index Prescription Start Date (IPSD) for antipsychotics **Performance Not Met:** Two or more benzodiazepine prescriptions ordered for patients who had a diagnosis of seizure disorders, rapid eye movement sleep behavior disorder, benzodiazepine withdrawal, ethanol withdrawal, or severe generalized anxiety disorder on or between January 1 of the year prior to the measurement period and the IPSD for benzodiazepines

Category	Description
	Updated measure analytic: For all collection types: Revised: performance rate 1 will be utilized for benchmarking purposes.
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to restructure all of the collection types to introduce new performance rates based upon the American Geriatric Society Beers Criteria and expert panel recommendations, with performance rate one being utilized for benchmarking purposes as it is more comprehensive in assessment and aligns across the collection types. These revisions allow for the inclusion of antipsychotics and benzodiazepines to ensure alignment with most recent recommendations. The description for the measure is being updated for all collection types to align with the revisions in the measure and reflect the restructuring within multiple components of the specifications. Additionally, there will be multiple performance rates: three performance rates for the eCQM Specifications collection type and two performance rates for the MIPS CQMs Specifications collection type. We propose that the denominator exclusion language be updated for all collection types to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. For the eCQM Specifications collection type, the term 'overlaps' was removed and replaced with plain language for clarity and consistency in implementation. The eCQM Specifications collection type's value sets were revised to add and remove drug classes and the logic for the non-benzodiazepine hypnotics was revised to remove the 90-day supply criterion to align with the American Geriatric Society Beers Criteria guidelines. We propose to revise the MIPS CQMs Specifications collection type to add a second performance rate and submission criteria as the measure is restructured to align with the American Geriatric Society Beers Criteria guidelines. Additionally, the medication tables have been revised to align with the current guidelines and intent of the measure revisions. Multiple components of the MIPS CQMs Specifications collection type were updated to align with revised structure and the American Geriatric Society Beers Criteria guidelines to ensure consistent language throughout and alignment with the measure intent.

D.31 Weight Assessment and Counseling for Nutrition and Physical Activity for Children and Adolescents

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	239
CMS eCQM ID:	CMS155v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients 3-17 years of age who had an outpatient visit with a Primary Care Physician (PCP) or Obstetrician/Gynecologist (OB/GYN) and who had evidence of the following during the measurement period. Three rates are reported. • Percentage of patients with height, weight, and body mass index (BMI) percentile documentation. • Percentage of patients with counseling for nutrition. • Percentage of patients with counseling for physical activity.
Substantive Change:	**The measure title is revised from 'Weight Assessment and Counseling for Nutrition and Physical Activity for Children and Adolescents' to:** Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents **Updated denominator exclusion: Revised:** Exclude patients who are in hospice care for any part of the measurement period. **Updated value set/coding: Revised:** "Pregnancy" (2.16.840.1.113883.3.526.3.378) value set to more accurately capture pregnancy state.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the title for alignment across programs. We propose to update the "Pregnancy" value set to more accurately capture the state of pregnancy to ensure the denominator exclusion is being applied to the correct patient population and remove the term 'overlaps' and replace with plain language for clarity and consistency in implementation.

D.32 Childhood Immunization Status

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	240
CMS eCQM ID:	CMS117v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of children 2 years of age who had four diphtheria, tetanus and acellular pertussis (DTaP); three polio (IPV), one measles, mumps and rubella (MMR); three or four H influenza type B (HiB); three hepatitis B (Hep B); one chicken pox (VZV); four pneumococcal conjugate (PCV); one hepatitis A (Hep A); two or three rotavirus (RV); and two influenza (flu) vaccines by their second birthday.
Substantive Change:	**The measure denominator exclusion is revised to read:** Exclude patients who are in hospice care for any part of the measurement period. **The measure guidance is revised to read:** Numerator criteria includes evidence of receipt of the recommended vaccine or the following: -- DTaP: Adverse reaction to the DTaP or Td vaccine; or encephalopathy due to DTaP or Td vaccination -- Polio (IPV) vaccine: Adverse reaction to the IPV vaccine, streptomycin, polymyxin B, or neomycin -- MMR Vaccination: Immunodeficiency, HIV, lymphoreticular cancer, multiple myeloma, or leukemia; adverse reaction to neomycin; history of measles, mumps, or rubella; or a seropositive result for the antigens -- Hib: Adverse reaction to the Hib vaccine -- Hepatitis B: Seropositive result for the antigen, adverse reaction to the hepatitis B vaccine, adverse reaction to common baker's yeast, or a history of hepatitis B illness -- Chicken pox (varicella zoster): Seropositive result for the antigen; immunodeficiency, HIV, lymphoreticular cancer, multiple myeloma, or leukemia; adverse reaction to neomycin; or a history of varicella zoster -- Pneumococcal: Adverse reaction to the pneumococcal vaccine -- Hepatitis A: Seropositive result for the antigen, adverse reaction to the hepatitis A vaccine, or a history of hepatitis A illness -- Rotavirus: Adverse reaction to the rotavirus vaccine, severe combined immunodeficiency, or a history of intussusception -- Influenza: Adverse reaction to the influenza vaccine; immunodeficiency, HIV, lymphoreticular cancer, multiple myeloma, or leukemia; or adverse reaction to neomycin The measure allows a grace period by measuring compliance with these recommendations between birth and age two. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **Updated logic and logic definitions: Added:** influenza LAIV vaccination as numerator compliant.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation. The measure guidance is updated to reflect the intent of the measure and clarify the criteria for numerator compliance more accurately. Additionally, we propose to update the logic and logic definitions to include the influenza LAIV vaccination to align with current clinical guidelines.

D.33 Ultrasound Determination of Pregnancy Location for Pregnant Patients with Abdominal Pain

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	254
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of pregnant female patients aged 14 to 50 who present to the emergency department (ED) with a chief complaint of abdominal pain or vaginal bleeding who receive a trans-abdominal or trans-vaginal ultrasound to determine pregnancy location.
Substantive Change:	**Modified collection type:** MIPS CQM Specifications collection type. **Updated denominator criteria: Revised:** Patient has any emergency department encounter during the performance period with Place of Service Indicator 23 (The claim form Place of Service field must indicate emergency department) OR Patient encounter during the performance period (CPT)
Steward:	American College of Emergency Physicians
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the denominator criteria to capture all patients with an encounter with a Place of Service indicator 23 to ensure that all applicable patients are being assessed for the quality action as it is appropriate for those patients who meet all other denominator criteria and are seen at any emergency department encounter. In the circumstance the Medicare Part B Claims Measure Specifications collection type is not finalized for removal, all finalized substantive changes will be reflected within this collection type specification.

D.34 Biopsy Follow-Up

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	265
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of new patients whose biopsy results have been reviewed and communicated to the primary care/referring physician and patient.
Substantive Change:	**The measure denominator note is revised to read:** *Signifies that this CPT Category I code is a non-covered service under the Medicare Part B Physician Fee Schedule (PFS). These non-covered services should be counted in the denominator population for MIPS CQMs. Only the first biopsy results for new patients should be reported for this measure. Do not include specimens sent for debridement.
Steward:	American Academy of Dermatology
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the denominator note to clarify which biopsy, if multiple biopsies are performed, should be utilized for assessment of the clinical quality action and that only new patients should be reported for the purposes of this measure.

D.35 Dementia: Cognitive Assessment

Category	Description
NQF # / eCQM NQF #:	N/A / 2872e
Quality#:	281
CMS eCQM ID:	CMS149v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients, regardless of age, with a diagnosis of dementia for whom an assessment of cognition is performed and the results reviewed at least once within a 12-month period.
Substantive Change:	**Updated logic and logic definitions: Revised:** dementia and qualifying encounter logic to clarify timing of during the measurement period.
Steward:	American Academy of Neurology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to revise the technical definition names and logic to provide clarity and ensure alignment with measure intent.

D.36 Parkinson's Disease: Psychiatric Symptoms Assessment for Patients with Parkinson's Disease

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	290
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of all patients with a diagnosis of Parkinson's Disease [PD] who were assessed for psychiatric symptoms once in the past 12 months
Substantive Change:	**The measure title is revised from 'Parkinson's Disease: Psychiatric Symptoms Assessment for Patients with Parkinson's Disease' to:** Assessment of Mood Disorders and Psychosis for Patients with Parkinson's Disease. **The measure description is revised to read:** Percentage of all patients with a diagnosis of Parkinson's Disease [PD] who were assessed for depression, anxiety, apathy, AND psychosis once during the measurement period. **Updated denominator criteria: Removed:** coding related to Hospital Inpatient Services. **The measure numerator is revised to read:** Patients who were assessed for depression, anxiety, apathy, AND psychosis once during the measurement period. **The measure numerator definition is revised to read:** Assessed – use of a screening tool or discussion with the patient or care partner. Please see "Opportunity for Improvement" section below for suggestions on possible screening tools. Psychosis: includes hallucinations, illusions, delusions, paranoia **Updated numerator instructions:** **Added:** For Depression: Patient Health Questionnaire 2 (PHQ2), Patient Health Questionnaire 9 (PHQ9), Montgomery-Asberg Depression Rating Scale (MADRS) For Anxiety: Parkinson Anxiety Scale (PAS) **Removed:** For Impulse Control Disorder (9): Questionnaire for Impulsive-Compulsive Disorders in Parkinson's Disease-Rating Scale (QUIP-RS) Minnesota Impulsive Disorders Interview **Updated numerator note: Removed:** the Numerator Note. **The measure numerator options are revised to read:** **Performance Met:** Depression, anxiety, apathy, AND psychosis assessed **Performance Not Met:** Depression, anxiety, apathy, AND psychosis not assessed
Steward:	American Academy of Neurology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the measure to lessen the requirements necessary for numerator compliance to balance quality patient care and clinician burden based upon feedback and recommendations from the measure steward's expert work group. The measure title, description, numerator, and numerator options will have updates to align with the proposed change to the measure's clinical quality action requirement. We propose to remove Hospital Inpatient Services from the denominator criteria as patients seen in the inpatient setting are not appropriate for inclusion within the denominator eligible patient population for the clinical quality action being assessed, as this is to address care for patients seen during outpatient encounters. Additionally, we propose to revise the numerator definition to more clearly define what "assessed" means for the purposes of this measure and what components are included within the term "psychosis". We propose to revise the list of tools available for use in the Parkinson's disease patient population to align with current availability and applicability. We propose to remove the numerator note to align with the updated time frame to ensure annual assessment.

D.37 Parkinson's Disease: Cognitive Impairment or Dysfunction Assessment for Patients with Parkinson's Disease

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	291
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of all patients with a diagnosis of Parkinson's Disease [PD] who were assessed for cognitive impairment or dysfunction once in the past 12 months.
Substantive Change:	**The measure title is revised from 'Parkinson's Disease: Cognitive Impairment or Dysfunction Assessment for Patients with Parkinson's Disease' to:** Assessment of Cognitive Impairment or Dysfunction for Patients with Parkinson's Disease. **The measure description is revised to read:** Percentage of all patients with a diagnosis of Parkinson's Disease [PD] who were assessed for cognitive impairment or dysfunction once during the measurement period. **Updated denominator criteria: Removed:** coding related to Hospital Inpatient Services. **The measure numerator is revised to read:** Patients (or care partner as appropriate) who were assessed for cognitive impairment or dysfunction once during the measurement period. **The measure numerator definition is revised to read:** Assessed – Is defined as a discussion with the patient or care partner or use of a screening tool OR referral to neuropsychologist for testing. **Updated numerator instructions: Added:** Neuro-QoL and Patient-Reported Outcomes Measurement Information System (PROMIS). **Updated numerator note: Removed:** the Numerator Note. **Updated numerator options: Added:** **Denominator Exception:** Patient or care partner decline assessment **Denominator Exception:** On date of encounter, patient is not able to participate in assessment or screening, including non-verbal patients, delirious, severely aphasic, severely developmentally delayed, severe visual or hearing impairment and for those patients, no knowledgeable informant available.
Steward:	American Academy of Neurology
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the measure's title to remove redundancy in wording. We propose to remove Hospital Inpatient Services from the denominator criteria as patients seen in the inpatient setting are not appropriate for inclusion within the denominator eligible patient population for the clinical quality action being assessed, as this is to address cares for patients seen during outpatient encounters. We propose to update the measure numerator and numerator definition to include the care partner within the assessment of the clinical quality action as patients who have severe cognitive impairment may be unable to accurately respond to questions, leaving clinicians to rely on care partners for accurate information. We propose to add the PROMIS and Neuro-QoL (Quality of Life) to the list of tools in the numerator instructions as these are applicable to the intent of the measure. Additionally, we propose to update the numerator options to add denominator exceptions as the measure steward's expert work group felt it was important not to penalize clinicians for patients/care partners who are unable to participate in or decline the assessment. Additionally, we propose to update the description and numerator to reflect that the quality action should be completed annually to ensure timely capture of cognitive impairment or dysfunction. To align with these revisions, we propose to remove the numerator note.

D.38 Parkinson's Disease: Rehabilitative Therapy Options

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	293
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of all patients with a diagnosis of Parkinson's Disease (or caregiver(s), as appropriate) who had rehabilitative therapy options (i.e., physical, occupational, and speech therapy) discussed once in the past 12 months.
Substantive Change:	**The measure title is revised from 'Parkinson's Disease: Rehabilitative Therapy Options' to: Rehabilitative** Therapy Referral for Patients with Parkinson's Disease. **The measure description is revised to read:** Percentage of all patients with a diagnosis of Parkinson's Disease who were referred to physical, occupational, speech, or recreational therapy once during the measurement period. **Updated denominator criteria: Added:** Physical and Occupational Therapy, Speech Language Pathology **The measure numerator is revised to read**: Patients who were referred to physical, occupational, speech, or recreational therapy once during the measurement period. **Updated numerator note: Removed:** the Numerator Note. **The measure numerator options is revised to read:** **Performance Met:** Referral to physical, occupational, speech, or recreational therapy **Denominator Exception:** Patient and/or care partner decline referral **Denominator Exception:** Clinician determines patient does not require referral **Denominator Exception:** Patient already receiving physical/occupational/speech/recreational therapy during the measurement period **Performance Not Met:** Patient not referred, reason not otherwise specified
Steward:	American Academy of Neurology
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the measure title to remove redundancy in wording. We propose to update the measure description and numerator to include recreational therapy as it is clinically relevant and can be beneficial to the Parkinson's disease patient population. We propose to update and expand the denominator coding to include additional MIPS eligible clinician types as this measure may be appropriate to their scope of care. We propose to remove the numerator note to align with the updated time-frame to ensure annual assessment. Additionally, we propose to update the numerator options to align with the addition of recreational therapy as numerator compliant and allowing for denominator exceptions for those patients that decline a referral, do not need a referral based on the stage of the disease, or for those patients who are already receiving one or more of the services, as clinicians should not be penalized in these situations.

D.39 Initiation and Engagement of Alcohol and Other Drug Dependence Treatment

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	305
CMS eCQM ID:	CMS137v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients 13 years of age and older with a new episode of alcohol or other drug abuse or (AOD) dependence who received the following. Two rates are reported. a. Percentage of patients who initiated treatment including either an intervention or medication for the treatment of AOD abuse or dependence within 14 days of the diagnosis. b. Percentage of patients who engaged in ongoing treatment including two additional interventions or a medication for the treatment of AOD abuse or dependence within 34 days of the initiation visit. For patients who initiated treatment with a medication, at least one of the two engagement events must be a treatment intervention.
Substantive Change:	**The measure denominator exclusion is revised to read:** 1. Exclude patients with a negative diagnosis history, defined as an encounter or medication treatment for a diagnosis of alcohol, opioid or other drug abuse or dependence in the 60 days prior to the first episode of alcohol or drug dependence. 2. Exclude patients who are in hospice care for any part of the measurement period. **Updated initial patient population: Revised:** logic for timing associated with the timing of the first dependence diagnosis. **Updated numerator logic: Revised:** timing attribute associated with orders of medications to 'authorDatetime'. **The measure stratification is revised to read:** Report a total score, and each of the following strata: Stratum 1: Patients age 13-17 at the start of the Measurement Period Stratum 2: Patients age >=18 at the start of the Measurement Period
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the denominator exclusion to more accurately represent the intent to exclude patients with prior and recent history of substance abuse treatment as this patient population is not appropriate for the clinical quality action being assessed. The term 'overlaps' was removed from the denominator exclusion and replaced with plain language for clarity and consistency in implementation. We propose to revise the logic for the timing associated with the first dependence diagnosis timing to align with the intent of the measure to correctly capture all diagnoses during the measurement period through November 14. We propose to update the datatype for "Medication, Order" to use 'authorDatetime' as this is the preferred timing attribute. We propose to revise the anchor for age calculations of the stratifications to align with those within the initial patient population for alignment.

D.40 Cervical Cancer Screening

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	309
CMS eCQM ID:	CMS124v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of women 21-64 years of age who were screened for cervical cancer using either of the following criteria: * Women age 21-64 who had cervical cytology performed within the last 3 years * Women age 30-64 who had cervical human papillomavirus (HPV) testing performed within the last 5 years
Substantive Change:	**Updated denominator exclusion:** **Revised:** Exclude patients who are in hospice care for any part of the measurement period. **Added:** Exclude patients receiving palliative care during the measurement period. **Updated value set/coding: Updated:** replaced "Congenital absence of cervix (disorder)" ("SNOMEDCT Code (37687000)") with "Congenital or Acquired Absence of Cervix" (2.16.840.1.113883.3.464.1003.111.12.1016) value set.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose that the denominator exclusion language be updated for all collection types to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed and the term 'overlaps' was removed and replaced with plain language for clarity and consistency in implementation. We propose to update the value sets for the denominator exclusion to include acquired absence of cervix as this patient population is not appropriate for the clinical quality action being assessed.

D.41 Chlamydia Screening for Women

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	310
CMS eCQM ID:	CMS153v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of women 16-24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement period.
Substantive Change:	**Updated denominator exclusion: Revised:** Exclude patients whose who are in hospice care for any part of the measurement period. **Updated value set: Added:** Clutton's joints "Diagnoses Used to Indicate Sexual Activity" value set.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to remove the term 'overlaps' and replace with plain language for clarity and consistency in implementation. We propose to update the "Diagnoses Used to Indicate Sexual Activity" value set to align with coding utilized in other programs, however, this code set will undergo further refinements in future years.

D.42 Falls: Screening for Future Fall Risk

Category	Description
NQF # / eCQM NQF #:	0101 / N/A
Quality#:	318
CMS eCQM ID:	CMS139v10
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	eCQM Specifications | CMS Web Interface Measure Specifications
Current Measure Description:	Percentage of patients 65 years of age and older who were screened for future fall risk during the measurement period.
Substantive Change:	**Updated denominator exclusion: For the eCQM Specifications collection type: Revised:** Exclude patients who are in hospice care for any part of the measurement period. **Updated denominator exclusion: For the CMS Web Interface Measure Specifications collection type: Removed:** Exclude patients who were assessed to be non-ambulatory during the measurement period. **Updated denominator guidance: For the CMS Web Interface Measure Specifications collection type: Removed:** Denominator Exclusion, count as non-ambulatory only if non-ambulatory at the most recent encounter during the measurement period (i.e., patient is not ambulatory, bed ridden, immobile, confined to chair, wheelchair bound, dependent on helper pushing wheelchair, independent in wheelchair or minimal help in wheelchair).
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose for the eCQM Specifications collection type to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation. We proposed for the CMS Web Interface Measure Specifications collection type to remove the denominator exclusion for non-ambulatory patients to address implementation challenges as there is a lack of available documentation for a non-ambulatory status. Additionally, the denominator guidance has been updated to reflect this revision.

D.43 Atrial Fibrillation and Atrial Flutter: Chronic Anticoagulation Therapy

Category	Description
NQF # / eCQM NQF #:	1525 / N/A
Quality#:	326
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with nonvalvular atrial fibrillation (AF) or atrial flutter who were prescribed warfarin OR another FDA-approved oral anticoagulant drug for the prevention of thromboembolism during the measurement period.
Substantive Change:	**Modified collection type:** MIPS CQM Specifications collection type. **The measure description is revised to read:** Percentage of patients aged 18 years and older with atrial fibrillation (AF) or atrial flutter who were prescribed an FDA-approved oral anticoagulant drug for the prevention of thromboembolism during the measurement period. **Updated denominator exclusion: Added:** 1. Patients with moderate or severe mitral stenosis 2. Patients with mechanical prosthetic heart valve
Steward:	American Heart Association
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to remove the Medicare Part B Claims Measure Specifications collection type as it has reached the end of the topped out lifecycle as finalized in 82 FR 53640. However, the benchmarking data continues to show a gap for the MIPS CQMs Specifications collection type, as such, the measure will be retained for this collection type. We propose to revise the measure description to align with the language revisions in the measure to no longer explicitly state the valve types. We propose to add denominator exclusions that align with language revisions to remove those patients for whom the clinical quality action being assessed would not be appropriate. In the circumstance the Medicare Part B Claims Measure Specifications collection type is not finalized for removal, all finalized substantive changes will be reflected within this collection type specification.

D.44 Maternity Care: Elective Delivery or Early Induction Without Medical Indication at < 39 Weeks (Overuse)

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	335
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients, regardless of age, who gave birth during a 12-month period who delivered a live singleton at < 39 weeks of gestation completed who had elective deliveries by cesarean section (C-section), or early inductions of labor, without medical indication.
Substantive Change:	**The measure title is revised from 'Maternity Care: Elective Delivery or Early Induction Without Medical Indication at < 39 Weeks (Overuse)' to:** Maternity Care: Elective Delivery (Without Medical Indication) at < 39 Weeks (Overuse) **The measure description is revised to read:** Percentage of patients, regardless of age, who gave birth during a 12-month period, delivered a live singleton at < 39 weeks of gestation, and had elective deliveries (without medical indication) by cesarean birth or induction of labor. **The measure numerator options are revised to read:** **Performance Met:** Elective delivery (without medical indication) by cesarean birth or induction of labor performed (<39 weeks of gestation) **Denominator Exception:** Medical indication for delivery by cesarean birth or induction of labor (<39 weeks of gestation) [Documentation of reason(s) for elective delivery (e.g., hemorrhage and placental complications, hypertension, preeclampsia and eclampsia, rupture of membranes (premature or prolonged), maternal conditions complicating pregnancy/delivery, fetal conditions complicating pregnancy/delivery, late pregnancy, prior uterine surgery, or participation in clinical trial)] **Performance Not Met:** Elective delivery (without medical indication) by cesarean birth or induction of labor not performed (<39 weeks of gestation) **Updated performance calculation: Revised:** Measure analytic was updated to be inverse.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale:	We propose to update the measure analytic to be inverse to better align with the intent of the measure as this is an overuse measure. We propose to update the measure title, description, and numerator options to align with the revision in analytic as a lower calculated performance rate will now indicate better clinical care for the purposes of this measure. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.45 Maternity Care: Postpartum Follow-up and Care Coordination

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	336
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients, regardless of age, who gave birth during a 12-month period who were seen for postpartum care before or at 8 weeks of giving birth and received the following at a postpartum visit: breast-feeding evaluation and education, postpartum depression screening, postpartum glucose screening for gestational diabetes patients, family and contraceptive planning counseling, tobacco use screening and cessation education, healthy lifestyle behavioral advice, and an immunization review and update.
Substantive Change:	**The measure description is revised to read:** Percentage of patients, regardless of age, who gave birth during a 12-month period who were seen for postpartum care before or at 12 weeks of giving birth and received the following at a postpartum visit: breast-feeding evaluation and education, postpartum depression screening, postpartum glucose screening for gestational diabetes patients, family and contraceptive planning counseling, tobacco use screening and cessation education, healthy lifestyle behavioral advice, and an immunization review and update. **The measure denominator is revised to read:** All patients, regardless of age, who gave birth during a 12-month period and were seen for postpartum care at a visit before or at 12 weeks of giving birth. **Updated denominator criteria: Revised:** Postpartum care visit before or at 12 weeks of giving birth. **Updated instructions:** This measure is to be submitted a minimum of once per performance period for all patients seen for postpartum care before or at 12 weeks of giving birth during the performance period. **Updated numerator definition: Revised:** to align with the measure change from 8 weeks to 12 weeks postpartum.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the timeframe for the postpartum care visit from before or at 8 weeks of giving birth to before or at 12 weeks of giving birth, which is reflected in revisions to multiple components of the measure for alignment. This revision aligns with American College of Obstetricians and Gynecologists (ACOG) guidance and better aligns with current clinical workflows. This also ensures a more complete patient population is addressed to drive quality care.

D.46 HIV Medical Visit Frequency

Category	Description
NQF # / eCQM NQF #:	2079 / N/A
Quality#:	340
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients, regardless of age with a diagnosis of HIV who had at least one medical visit in each 6 month period of the 24 month measurement period, with a minimum of 60 days between medical visits.
Substantive Change:	**The measure denominator note is revised to read:** In order to determine denominator eligibility, patients should be diagnosed with HIV during the first 3 months of the 24-month measurement period or have a diagnosis prior to the 24- month measurement period. The 24-month measurement period is defined as the 24 months prior to and including the date of the first qualifying encounter during the performance period (i.e., January 1, 2022 through December 31, 2022). Performance of the measure is met when there is at least one medical visit in each 6 month interval with 60 days between denominator eligible encounters for patients with HIV within the 24-month measurement period.
Steward:	Health Resources and Services Administration
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the denominator note to clarify the 24-month period to ensure alignment with the measure intent and consistency in implementation.

D.47 Total Knee Replacement: Shared Decision-Making: Trial of Conservative (Non-surgical) Therapy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	350
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients regardless of age undergoing a total knee replacement with documented shared decision-making with discussion of conservative (non-surgical) therapy (e.g., non-steroidal anti-inflammatory drug (NSAIDs), analgesics, weight loss, exercise, injections) prior to the procedure.
Substantive Change:	**The measure title is revised from 'Total Knee Replacement: Shared Decision-Making: Trial of Conservative (Non-surgical) Therapy' to:** Total Knee or Hip Replacement: Shared Decision-Making: Trial of Conservative (Non-surgical) Therapy. **The measure description is revised to read:** Percentage of patients regardless of age undergoing a total knee or total hip replacement with documented shared decision- making with discussion of conservative (non-surgical) therapy (e.g., non-steroidal anti-inflammatory drug (NSAIDs), analgesics, weight loss, exercise, injections) prior to the procedure. **Updated instructions: Revised:** This measure is to be submitted each time a procedure for total knee or total hip replacement is performed during the performance period. **Updated denominator: Added:** Total hip replacement.
Steward:	American Association of Hip and Knee Surgeons
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the measure to include total hip replacements as denominator eligible as the clinical quality action being assessed is applicable to this procedure as well. This will ensure that a broader patient population is being assessed as it is important to for the patient and clinician to engage in shared decision making to ensure that joint replacement therapy is the best treatment option. Multiple components of the measure will be updated to reflect the additional procedure of total hip replacement. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.48 Total Knee Replacement: Venous Thromboembolic and Cardiovascular Risk Evaluation

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	351
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients regardless of age undergoing a total knee replacement who are evaluated for the presence or absence of venous thromboembolic and cardiovascular risk factors within 30 days prior to the procedure (e.g., History of Deep Vein Thrombosis (DVT), Pulmonary Embolism (PE), Myocardial Infarction (MI), Arrhythmia and Stroke).
Substantive Change:	**The measure title is revised from 'Total Knee Replacement: Venous Thromboembolic and Cardiovascular Risk Evaluation' to:** Total Knee or Hip Replacement: Venous Thromboembolic and Cardiovascular Risk Evaluation. **The measure description is revised to read:** Percentage of patients regardless of age undergoing a total knee or total hip replacement who are evaluated for the presence or absence of venous thromboembolic and cardiovascular risk factors within 30 days prior to the procedure (e.g., History of Deep Vein Thrombosis (DVT), Pulmonary Embolism (PE), Myocardial Infarction (MI), Arrhythmia and Stroke). **Updated instructions: Revised:** This measure is to be submitted each time a procedure for total knee or total hip replacement is performed during the performance period. **Updated denominator: Added:** Total hip replacement.
Steward:	American Association of Hip and Knee Surgeons
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the measure to include total hip replacements as denominator eligible as the clinical quality action being assessed is applicable to this procedure as well. This will ensure that a broader patient population is being assessed as it is important to evaluate this patient population for venous thromboembolic and cardiovascular risk factors within 30 days prior to the procedure to ensure that joint replacement therapy is the best treatment option. Multiple components of the measure will be updated to reflect the additional procedure of total hip replacement. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.49 Patient-Centered Surgical Risk Assessment and Communication

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	358
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients who underwent a non-emergency surgery who had their personalized risks of postoperative complications assessed by their surgical team prior to surgery using a clinical data-based, patient-specific risk calculator and who received personal discussion of those risks with the surgeon.
Substantive Change:	**Updated denominator criteria: Added:** Coding related to 'Ablation, irreversible electroporation; 1 or more tumors per organ'
Steward:	American College of Surgeons
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the denominator criteria to add a procedure that is appropriate for the measure intent.

D.50 Follow-Up Care for Children Prescribed ADHD Medication (ADD)

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	366
CMS eCQM ID:	CMS136v11
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of children 6-12 years of age and newly dispensed a medication for attention-deficit/hyperactivity disorder (ADHD) who had appropriate follow-up care. Two rates are reported. a) Percentage of children who had one follow-up visit with a practitioner with prescribing authority during the 30-Day Initiation Phase. b) Percentage of children who remained on ADHD medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two additional follow-up visits with a practitioner within 270 days (9 months) after the Initiation Phase ended.
Substantive Change:	**Updated denominator exclusion: Revised:** For all denominators: Exclude patients who are in hospice care for any part of the measurement period. **The measure guidance is revised to read:** This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **The measure numerator is revised to read:** Numerator 1: Patients who had at least one visit with a practitioner with prescribing authority within 30 days after the IPSD. Numerator 2: Patients who had at least one visit with a practitioner with prescribing authority during the Initiation Phase, and at least two follow-up visits during the Continuation and Maintenance Phase. **Updated performance calculation: Revised:** Performance Rate 2 will be used for benchmarking purposes.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation. We propose to update the guidance to remove the language regarding how cumulative medication duration is calculated as this is outdated and no longer in alignment with the measure intent. We propose to revise the numerator language to allow for telehealth visits as these are appropriate for inclusion when assessing for the clinical quality action. We propose to update the performance calculation for the measure to utilize the performance rate for submission criteria 2 as this is more indicative of quality care during and after the Initiation Phase. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.51 Depression Remission at Twelve Months

Category	Description
NQF # / eCQM NQF #:	0710 / 0710e
Quality#:	370
CMS eCQM ID:	CMS159v10
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	The percentage of adolescent patients 12 to 17 years of age and adult patients 18 years of age or older with major depression or dysthymia who reached remission 12 months (+/- 60 days) after an index event date.
Substantive Change:	**Updated logic definitions: For the eCQM Specifications collection type: Revised:** timing of denominator exclusion elements; 'Global."ToDate" {element} on or before end of "Measurement Assessment Period". **Updated denominator criteria: For all collection types: Added:** coding for mental and behavioral health MIPS eligible clinicians to both submission criteria. **Updated initial population: For the CMS Web Interface Measure Specifications collection type: Revised:** Adolescent patients 12 to 17 years of age and adult patients 18 years of age and older with a diagnosis of major depression or dysthymia and an initial Patient Health Questionnaire-9 item version (PHQ-9) or Patient Health Questionnaire-9 Modified for Teens and Adolescents (PHQ-9M) score greater than nine during the index event. Patients may be assessed using PHQ-9 or PHQ-9M on the same date or up to 7 days prior to the encounter (index event). **Updated guidance: For the CMS Web Interface Measure Specifications collection type: Added:** When a baseline assessment is conducted with PHQ 9M, the follow-up assessment can use either a PHQ 9M or PHQ 9. **Updated denominator exclusion: For the CMS Web Interface Measure Specifications collection type: Added:** Patients with a diagnosis of personality disorder emotionally labile.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale:	We propose to update the eCQM Specifications collection type to revise the timing of the denominator exclusion elements to ensure the full 12 months + 60 days after the index event date is allowed in order to align with the measure intent and language. We propose to expand the denominator eligible encounters for all collection types to include mental and behavioral health MIPS eligible clinicians as this measure is applicable to their scope of care. We propose to update the CMS Web Interface Measure Specification collection type as the measure steward believes that allowing flexibility for the timeframe in which a PHQ-9/PHQ-9M can be obtained will accommodate pre-visit planning or distribution of a PHQ-9/PHQ-9M tool prior to the encounter (office visit, psychiatry or psychotherapy visit, telephone or online encounter). The intent of this change includes the following principles: (1) The patient must have the corresponding diagnosis at the time of the index encounter. (2) The patient must have completed the PHQ-9/PHQ-9M and have a score greater than 9. (3) That same PHQ-9/PHQ-9M is directly tied to and used during the index encounter. We propose to revise the denominator exclusion language for the CMS Web Interface Measure Specifications collection type for a diagnosis of personality disorder to further clarify ensuring the correct patient population is being excluded from quality action assessment. We propose to update the guidance for CMS Web Interface Measure Specifications collection type to add clarity regarding the assessment that may be used for the follow-up assessment for the purposes of meeting performance for this measure.

D.52 Closing the Referral Loop: Receipt of Specialist Report

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	374
CMS eCQM ID:	CMS50v10
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	eCQM Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred.
Substantive Change:	**The measure numerator note is revised to read: For the MIPS CQMs Specifications collection type:** The consultant report that will successfully close the referral loop should be related to the first referral for a patient during the measurement period. If there are multiple consultant reports received by the referring provider which pertain to a particular referral, use the first consultant report to satisfy the measure. The provider to whom the patient was referred is responsible for sending the consultant report that will fulfill the communication. Note: this is not the same provider who would report on the measure.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the numerator note for the MIPS CQMs Specification collection type to add clarifying language that the first referral for a patient should be utilized for the purposes of assessing whether the referral loop was closed and the clinical quality action completed, as this aligns with the intent of the measure.

D.53 Functional Status Assessment for Total Knee Replacement

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	375
CMS eCQM ID:	CMS66v10
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients 18 years of age and older who received an elective primary total knee arthroplasty (TKA) and completed a functional status assessment within 90 days prior to the surgery and in the 270-365 days after the surgery.
Substantive Change:	**The measure denominator exclusion is revised to read:** 1. Exclude patients with two or more fractures indicating trauma at the time of the total knee arthroplasty or patients with severe cognitive impairment that starts before or in any part of the measurement period. 2. Exclude patients who are in hospice care for any part of the measurement period. **Updated value set/coding: Revised:** 'Primary TKA Procedure' (2.16.840.1.113883.3.464.1003.198.12.1007) value set to include revisions of one component of total prosthetic replacement of knee joint.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation. We propose to expand the 'Primary TKA Procedure' value set to include revisions of one component of total prosthetic replacement of knee joint to create a more complete denominator eligible patient population as completing a functional status assessment would be appropriate for this patient population.

D.54 Functional Status Assessment for Total Hip Replacement

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	376
CMS eCQM ID:	CMS56v10
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients 18 years of age and older who received an elective primary total hip arthroplasty (THA) and completed a functional status assessment within 90 days prior to the surgery and in the 270-365 days after the surgery.
Substantive Change:	**The measure denominator exclusion is revised to read:** 1. Exclude patients with two or more fractures indicating trauma at the time of the total hip arthroplasty or patients with severe cognitive impairment that starts before or in any part of the measurement period. 2. Exclude patients who are in hospice care for any part of the measurement period.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation.

D.55 Functional Status Assessments for Congestive Heart Failure

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	377
CMS eCQM ID:	CMS90v11
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients 18 years of age and older with congestive heart failure who completed initial and follow-up patient-reported functional status assessments.
Substantive Change:	**The measure title is revised from 'Functional Status Assessments for Congestive Heart Failure' to:** Functional Status Assessments for Heart Failure. **The measure description is revised to read:** Percentage of patients 18 years of age and older with heart failure who completed initial and follow-up patient-reported functional status assessments. **The measure denominator exclusion is revised to read:** 1. Exclude patients with severe cognitive impairment in any part of the measurement period. 2. Exclude patients who are in hospice care for any part of the measurement period. **The measure guidance is revised to read:** Initial functional status assessment (FSA) and encounter: The initial FSA is an FSA that occurs two weeks before or during an encounter, in the 180 days or more before the end of the measurement period. Follow-up FSA: The follow-up FSA must be completed at least 30 days but no more than 180 days after the initial FSA. The same FSA instrument must be used for the initial and follow-up assessment. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **The measure initial patient population is revised to read:** Patients 18 years of age and older who had two outpatient encounters during the measurement period and a diagnosis of heart failure that starts before and continues into the measurement period. **Updated logic and logic definitions: Updated:** restructured the logic to ensure the patient meets the denominator criteria by 1) had multiple assessments in the year and that 2) there is sufficient time for them to have had repeat assessments in the year 3) there is sufficient time between assessments for their condition to have changed or for them to have responded to treatment (30-180days).
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to remove the term 'congestive' from the measure title and description based upon the expert work group recommendations in order to align the language with the denominator eligible patient population to ensure all appropriate patients are included in the initial patient population. We propose to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation. We propose to revise the measure guidance to aid in measure implementation, align with measure intent and the timing constraints within the logic of the measure. We propose to update the initial patient population to clarify timing of the heart failure diagnosis and ensure alignment with the logic. Additionally, we propose to revise the logic to more clearly reflect relationships between the encounter and assessment(s), as identifying the first encounter without ensuring a relationship with an assessment does not meet the intent of the measure.

D.56 Children Who Have Dental Decay or Cavities

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	378
CMS eCQM ID:	CMS75v10
National Quality Strategy Domain:	Community/Population Health
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of children, 6 months - 20 years of age, who have had tooth decay or cavities during the measurement period.
Substantive Change:	**The measure description is revised to read:** Percentage of children, 6 months - 20 years of age at the start of the measurement period, who have had tooth decay or cavities during the measurement period **The measure denominator exclusion is revised to read:** Exclude patients who are in hospice care for any part of the measurement period. **The measure numerator is revised to read:** Children who had a diagnosis of cavities or decayed teeth in any part of the measurement period.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale:	We propose to revise the measure description to be more explicit of the timing associated with the patient's age. We propose to remove the term 'overlaps' from the denominator exclusion and numerator and replace with plain language for clarity and consistency in implementation.

D.57 Primary Caries Prevention Intervention as Offered by Primary Care Providers, including Dentists

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	379
CMS eCQM ID:	CMS74v11
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of children, 6 months - 20 years of age, who received a fluoride varnish application during the measurement period.
Substantive Change:	**The measure denominator exclusion is revised to read:** Exclude patients who are in hospice care for any part of the measurement period
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to remove the term 'overlaps' from the denominator exclusion and replace with plain language for clarity and consistency in implementation.

D.58 Adherence to Antipsychotic Medications For Individuals with Schizophrenia

Category	Description
NQF # / eCQM NQF #:	1879 / N/A
Quality#:	383
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of individuals at least 18 years of age as of the beginning of the performance period with schizophrenia or schizoaffective disorder who had at least two prescriptions filled for any antipsychotic medication and who had a Proportion of Days Covered (PDC) of at least 0.8 for antipsychotic medications during the performance period.
Substantive Change:	**Updated denominator criteria: Added:** Filled at least two prescriptions for any of the qualifying antipsychotic medications listed under "Denominator Note" during the performance period **Added:** outpatient mental health encounters ocurring at federally qualified health centers for the 'Patient encounter during the performance period determination Outpatient Setting Option 1'. **Updated denominator note: Added:** lumateperone to 'Atypical Antipsychotic Medications'
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Intermediate Outcome
Rationale:	We propose to add denominator criteria to ensure that only those patients who fill at least two prescriptions for any of the qualifying antipsychotic medications are included within the denominator eligible patient population as this aligns with the intent of the measure and protects clinicians from being held accountable for non-established patients. We propose to add outpatient mental health encounters ocurring at FQHCs as denominator eligible as schizophrenia may be diagnosed at these encounters. This revision is not a reflection of any policy update and was made to allow those clinicians who bill exclusively through a FQHC to track their performance on the measure. This payment method is still not eligible for payment adjustments under MIPS. We propose to update the 'Atypical Antipsychotic Medications' to align with current Food and Drug Administration (FDA) approved treatments for adults with schizophrenia.

D.59 Follow-Up After Hospitalization for Mental Illness (FUH)

Category	Description
NQF # / eCQM NQF #:	0576 / N/A
Quality#:	391
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	The percentage of discharges for patients 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health practitioner. Two rates are submitted: • The percentage of discharges for which the patient received follow-up within 30 days after discharge. • The percentage of discharges for which the patient received follow-up within 7 days after discharge.
Substantive Change:	**The measure description is revised to read:** The percentage of discharges for patients 6 years of age and older who were hospitalized for treatment of selected mental illness or intentional self-harm diagnoses and who had a follow-up visit with a mental health provider. Two rates are submitted: • The percentage of discharges for which the patient received follow-up within 30 days after discharge • The percentage of discharges for which the patient received follow-up within 7 days after discharge
Steward:	National Committee for Quality Assurance
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the description to utilize the term provider in place of practitioner for alignment within the specification.

D.60 Lung Cancer Reporting (Biopsy/Cytology Specimens)

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	395
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Pathology reports based on biopsy and/or cytology specimens with a diagnosis of primary non-small cell lung cancer classified into specific histologic type or classified as non-small cell lung cancer not otherwise specified (NSCLC-NOS) with an explanation included in the pathology report.
Substantive Change:	**The measure description is revised to read: For all collection types:** Pathology reports based on lung biopsy and/or cytology specimens with a diagnosis of primary non-small cell lung cancer classified into specific histologic type following the International Association for the Study of Lung Cancer (IASLC) guidance or classified as non-small cell lung cancer not otherwise specified (NSCLC-NOS) with an explanation included in the pathology report. **The measure numerator is revised to read: For all collection types:** Lung biopsy and cytology specimen reports with a diagnosis of primary non-small cell lung cancer classified into specific histologic type following IASLC guidance (see below) (including but not limited to squamous cell carcinoma or adenocarcinoma) OR classified as NSCLC-NOS with an explanation included in the pathology report IASLC Guidance: The IASLC recommends the following regarding terminology for small biopsy and cytology specimens: 1. Do not use the term "large cell carcinoma" 2. Do not use the term "AIS (adenocarcinoma in situ)" or "MIA (minimally invasive adenocarcinoma)"—if a noninvasive pattern is present in a small biopsy, the term "lepidic growth" should be used instead 3. Do not use the term "BAC (bronchioloalveolar carcinoma)" All three recommendations must be followed in order for a case to be considered Met (ie if any one of these terms is present, the case is Not Met) **The measure numerator options are revised to read: For all collection types:** **Performance Met:** Primary non-small cell lung cancer lung biopsy and cytology specimen report documents classification into specific histologic type following IASLC guidance OR classified as NSCLC- NOS with an explanation **Denominator Exception:** Documentation of medical reason(s) for not including the histological type OR NSCLC-NOS classification with an explanation (e.g. Specimen insufficient or non-diagnostic, specimen does not contain cancer, or other documented medical reasons) **Performance Not Met:** Primary non-small cell lung cancer lung biopsy and cytology specimen report does not document classification into specific histologic type OR histologic type does not follow IASLC guidance OR is classified as NSCLC-NOS but without an explanation
Steward:	College of American Pathologists
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the measure description to add clarity in alignment with the measure intent. We propose to update the numerator and numerator options to add guidance regarding what phrases should be avoided within the pathology reports to align with IASLC guidance and to clarify what is acceptable for numerator compliance.

D.61 Lung Cancer Reporting (Resection Specimens)

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	396
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Pathology reports based on resection specimens with a diagnosis of primary lung carcinoma that include the pT category, pN category and for non-small cell lung cancer (NSCLC), histologic type.
Substantive Change:	**The measure description is revised to read: For all collection types:** Pathology reports based on lung resection specimens with a diagnosis of primary lung carcinoma that include the pT category, pN category and for non-small cell lung cancer (NSCLC), histologic type.
Steward:	College of American Pathologists
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the measure description to include the term 'lung' for clarity and alignment within the specification.

D.62 Melanoma Reporting

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	397
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Pathology reports for primary malignant cutaneous melanoma that include the pT category and a statement on thickness, ulceration and mitotic rate.
Substantive Change:	**The measure description is revised to read: For all collection types:** Pathology reports for primary malignant cutaneous melanoma that include the pT category, thickness, ulceration and mitotic rate, peripheral and deep margin status and presence or absence of microsatellitosis for invasive tumors. **The measure instructions are revised to read: For all collection types:** This measure is to be submitted each time a patient's pathology report addresses specimens with a diagnosis of malignant cutaneous melanoma; however, only one quality-data code (QDC) per date of service for a patient is required. In instances where multiple specimens from different/unique lesions are submitted and resulted in a single report, each eligible specimen must be Met in order for the case to be considered Met (Denominator Exclusions and Denominator Exceptions are not considered eligible specimens). If any eligible specimen is Not Met, the quality data code for Not Met should be submitted for this report. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding. **The measure numerator is revised to read: For all collection types:** Pathology reports for primary malignant cutaneous melanoma that include the pT category thickness, ulceration and mitotic rate, peripheral and deep margin status and presence or absence of microsatellitosis for invasive tumors **The measure numerator options are revised to read: For all collection types:** **Performance Met:** Pathology report includes the pT Category, thickness, ulceration and mitotic rate, peripheral and deep margin status and presence or absence of microsatellitosis for invasive tumors **Denominator Exception:** Documentation of medical reason(s) for not including pT Category,thickness, ulceration and mitotic rate, peripheral and deep margin status and presence or absence of microsatellitosis for invasive tumors (e.g., negative skin biopsies, insufficient tissue, or other documented medical reasons) **Performance Not Met:** Pathology report does not include the pT Category, thickness, ulceration and mitotic rate, peripheral and deep margin status and presence or absence of microsatellitosis for invasive tumors
Steward:	College of American Pathologists
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to update the measure for all collection types to require to new data elements for numerator compliance to align with updated American Academy of Dermatology (AAD) guideline recommendations. This revision is reflected in the proposed description, numerator, and numerator options language revisions to ensure the measure is aligned with the current clinical recommendations. Additionally, we propose to revise the instructions for all collection types to clarify how to handle instances where there are multiple samples included within one report.

D.63 One-Time Screening for Hepatitis C Virus (HCV) for Patients at Risk

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	400
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 18 years and older with one or more of the following: a history of injection drug use, receipt of a blood transfusion prior to 1992, receiving maintenance hemodialysis, OR birthdate in the years 1945-1965 who received one-time screening for hepatitis C virus (HCV) infection.
Substantive Change:	**The measure title is revised from 'One-Time Screening for Hepatitis C Virus (HCV) for Patients at Risk' to:** One-Time Screening for Hepatitis C Virus (HCV) for all Patients. **The measure description is revised to read:** Percentage of patients age >= 18 years who received one-time screening for hepatitis C virus (HCV) infection **The measure instructions are revised to read:** This measure is to be submitted a minimum of once per performance period for all patients > =18 years of age seen during the performance period AND who were seen twice for any visits or who had at least one preventive visit within the 12-month performance period. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure-specific denominator coding. **The measure denominator is revised to read:** All patients >= 18 years of age who had at least one preventive visit OR were seen at least twice within the 12-month reporting period. **Updated denominator criteria: Removed:** Patients who were born in the years 1945 to 1965 OR History of receiving blood transfusions prior to 1992 OR Receiving maintenance hemodialysis (CPT) OR History of injection drug use
Steward:	American Gastroenterological Association
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update this measure to align with current clinical recommendations which no longer require at-risk conditions for HCV screening. The measure will be updated to require one-time HCV screening for all patients aged 18 years and older, in accordance with current clinical recommendations. We propose to revise the measure title, description, instructions, and denominator to reflect the removal of the at-risk criteria. Additionally, we propose to remove the at-risk criteria from the denominator criteria. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.64 Clinical Outcome Post Endovascular Stroke Treatment

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	409
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients with a mRs score of 0 to 2 at 90 days following endovascular stroke intervention.
Substantive Change:	**The measure description is revised to read:** Percentage of patients with a Modified Rankin Score (mRS) score of 0 to 2 at 90 days following endovascular stroke intervention. **Updated instructions: Revised:** This measure is to be submitted a minimum of once per performance period for patients undergoing an endovascular stroke intervention procedure during the performance period. This measure is intended to reflect the success of the endovascular intervention inclusive of appropriate patient selection. This measure may be submitted by Merit-based Incentive Payment System (MIPS) eligible clinicians who perform the quality actions described in the measure based on the services provided and the measure- specific denominator coding. Include only patients that have cerebrovascular accidents through September 18 of the performance period. This will allow the evaluation of clinical outcome 90 days after the cerebrovascular accident within the performance period. Assessment of the mRS between 75 and 105 days is considered acceptable for reporting this measure. **Added:** Unique to this measure is the Minimum Process of Care Performance Threshold Requirement. This measure based threshold requires that at least 90% of all eligible patients have an mRS score assessed 90 days following endovascular stroke intervention. Therefore, if the performance rate for Submission Criteria 1 is below 90%, the MIPS eligible clinician would not be able to meet the denominator of the Submission Criteria 2 and this measure CANNOT BE SUBMITTED. CMS anticipates the performance rate for Submission Criteria 2 will be calculated using 100% of patients that met performance in Submission Criteria 1. This measure contains two submission criteria which together measure the outcome following an endovascular stroke intervention. Submission Criteria 1 evaluates whether an appropriate percentage of patients received the applicable clinical follow-up assessment using mRS. Submission Criteria 2 evaluates the rate of achieving an mRS score of 0 to 2 in those patients for whom an mRS score was obtained (during clinical follow-up, Submission Criteria 1). The rate of achieving an mRS of 0 to 2 at 90 days (Submission Criteria 2) can be used to compare this measure to performance prior to the 2021 performance year, when the measure had a single performance rate. For accountability reporting in the CMS MIPS program, the rate for Submission Criteria 2 is used for performance. For the purposes of submitting this measure Data Completeness has been determined in Submission Criteria 1. THERE ARE TWO SUBMISSION CRITERIA FOR THIS MEASURE: 1) Percentage of patients with mRS score assessed at 90 days following endovascular stroke intervention AND 2) Percentage of patients with mRS score of 0 to 2 assessed at 90 days following endovascular stroke intervention **Updated denominator: Revised:** **Submission Criteria 1:** Percentage of patients with clinical follow-up and mRS score assessed at 90 days following endovascular stroke intervention. **Denominator (Submission Criteria 1):** All patients with CVA undergoing endovascular stroke treatment. **Submission Criteria 2**: Percentage of patients with Performance Met for Submission Criteria 1 with an mRS score of 0 to 2 assessed at 90 days following endovascular stroke intervention therapy. **Denominator (Submission Criteria 2):** Patients with Performance Met for Submission Criteria 1 who received clinical follow-up and mRS score assessed at 90 days following endovascular stroke intervention therapy. **Updated denominator criteria: Revised:** Denominator (Submission Criteria 1) • All patients • Diagnosis for ischemic stroke • Patient procedure (endovascular stroke treatment) Denominator (Submission Criteria 2) • Minimum Process of Care Threshold Requirement: At least 90% of all eligible patients had an mRS score assessed at 90 days following endovascular stroke intervention (GXXXX submitted for Submission Criteria 1) **Updated numerator: Revised:** **Numerator (Submission Criteria 1):** Patients who received clinical follow-up and mRS score assessed at 90 days. **Numerator (Submission Criteria 2):** Patients with Performance Met for Submission Criteria 1 with 90 day mRS score of 0-2. **Updated numerator note: Added:** For the purposes of submitting this measure Data Completeness has been determined in Submission Criteria 1. The performance rate calculated for Submission Criteria 2 of this measure is calculated using the subset of patients identified in the Performance Met Numerator Option of Submission Criteria 1 (GXXXX). **Updated numerator options:** **Added:** Numerator Options (Submission Criteria 1): **Performance Met:** Clinical follow-up and mRS score assessed at 90 days following endovascular stroke intervention **Performance Not Met:** Clinical follow-up and mRS score not assessed at 90 days following endovascular stroke intervention **Revised:** Numerator Options (Submission Criteria 2): **Performance Met:** Patients with 90 day mRS score of 0 to 2

Category	Description
	Performance Not Met: Patients with 90 day mRS score greater than 2
Steward:	Society of Interventional Radiology
High Priority Measure:	Yes
Measure Type:	Outcome
Rationale:	We propose an update to the measure that includes a new submission criterion to assess whether a clinical follow-up and mRS score is being completed post endovascular stroke treatment. Additionally, this new submission criterion will ensure that the denominator eligible patient population being assessed for an mRS score of 0 – 2 is representative of the assessed population post treatment to determine the degree of disability or dependence in daily activities for patient suffering stroke. We propose to add an additional denominator criterion for submission criteria 2 that requires a 'Minimum Process of Care Threshold Requirement' of 90%. This ensures that patients are receiving post treatment follow-ups as a standard of care being and assessed for good outcomes following a stroke. This update is reflected with the restructure of multiple components of the specification to ensure clarity on the implantation of the measure change. We also propose to update the measure instructions to clarify what timeframe constitutes the 90-day follow-up and to align with the revisions to add a submission criterion. In the event the proposed substantive change(s) are finalized, the substantive changes would not allow for a direct comparison of performance data from prior years to performance data submitted after the implementation of these substantive changes. As such, if the performance data submitted meets the criteria for creation of a performance period benchmark, a new benchmark will be used for scoring.

D.65 Door to Puncture Time for Endovascular Stroke Treatment

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	413
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients undergoing endovascular stroke treatment who have a door to puncture time of less than two hours.
Substantive Change:	**The measure description is revised to read:** Percentage of patients undergoing endovascular stroke treatment who have a door to puncture time of 90 minutes or less **The measure numerator is revised to read:** Patients with CVA undergoing endovascular stroke treatment who have a door to puncture time of less than 90 minutes **Updated numerator options: Revised:** To align with door to puncture time of 90 minutes or less.
Steward:	Society of Interventional Radiology
High Priority Measure:	Yes
Measure Type:	Intermediate Outcome
Rationale:	We propose to revise the measure to reflect an updated door to puncture time of 90 minutes or less to more closely align with Target Stroke (a national initiative organized by the American Heart Association/American Stroke Association) which has an initial goal of achieving a door-to-puncture time of no more than 60 minutes for at least 50 percent of acute ischemic stroke patients. Additionally, The Joint Commission has set an ambitious goal of 80 percent of patients treated within 1 hour for primary stroke centers. This revision will drive quality care for this patient population as every delay in time from onset to arterial puncture will result in significant decreases in likelihood of a good outcome.

D.66 Emergency Medicine: Emergency Department Utilization of CT for Minor Blunt Head Trauma for Patients Aged 2 Through 17 Years

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	416
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of emergency department visits for patients aged 2 through 17 years who presented with a minor blunt head trauma who had a head CT for trauma ordered by an emergency care provider who are classified as low risk according to the Pediatric Emergency Care Applied Research Network (PECARN) prediction rules for traumatic brain injury.
Substantive Change:	**Updated numerator options: For all collection types: Added:** **Performance Met:** Pediatric patient with minor blunt head trauma and PECARN prediction criteria are not assessed.
Steward:	American College of Emergency Physicians
High Priority Measure:	Yes
Measure Type:	Efficiency
Rationale:	We propose to add a Performance Met numerator option to this measure to ensure those patients without a documented PECARN prediction score are correctly submitted as a Performance Met. As the PECARN prediction should be assessed for all patients seen for minor blunt head trauma, those patients without a documented PECARN predication score would not meet the intent of the measure.

D.67 Osteoporosis Management in Women Who Had a Fracture

Category	Description
NQF # / eCQM NQF #:	0053 / N/A
Quality#:	418
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	The percentage of women age 50-85 who suffered a fracture in the six months prior to the performance period through June 30 of the performance period and who either had a bone mineral density test or received a prescription for a drug to treat osteoporosis in the six months after the fracture.
Substantive Change:	**The measure description is revised to read: For all collection types:** The percentage of women 50–85 years of age who suffered a fracture and who had either a bone mineral density (BMD) test or prescription for a drug to treat osteoporosis in the six months after the fracture. **Updated denominator note: For the MIPS CQMs Specifications collection type: Added:** To assess the age for exclusions, the patient's age at the end of the measurement period should be used. **Updated denominator exclusion: For all collection types:** **Added:** Patients who receive palliative care services any time during the intake period through the end of the measurement year **Added:** Donzepezil-memantine to Dementia medication list. **Updated numerator note: For the Medicare Part B Claims Measure Specifications collection type: Added:** To assess the age for exclusions, the patient's age on the date of the encounter should be used.
Steward:	National Committee for Quality Assurance
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the description for alignment with other programs. We propose that the denominator exclusion language be updated to add an exclusion for patients receiving palliative care, as this patient population is not appropriate for the clinical quality action being assessed. Additionally, the medications were update for the Dementia medication list to include Donzepezil-memantine as this is an applicable medication for the purposes of the denominator exclusion. We propose to revise the denominator note for the MIPS CQMs Specifications collection type and the numerator note for the Medicare Part B Claims Measure Specifications collection type to clarify the timing for those exclusions that have an age-related component.

D.68 Photodocumentation of Cecal Intubation

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	425
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	Medicare Part B Claims Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	The rate of screening and surveillance colonoscopies for which photodocumentation of at least two landmarks of cecal intubation is performed to establish a complete examination.
Substantive Change:	**Modified collection type:** MIPS CQM Specifications collection type
Steward:	American Society for Gastrointestinal Endoscopy
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to remove the Medicare Part B Claims Measure Specifications collection type as it has reached the end of the topped-out lifecycle as finalized in 82 FR 53640. However, the benchmarking data continues to show a gap for the MIPS CQMs Specifications collection type, as such, the measure will be retained for this collection type.

D.69 Prevention of Post-Operative Nausea and Vomiting (PONV) – Combination Therapy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	430
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients, aged 18 years and older, who undergo a procedure under an inhalational general anesthetic, AND who have three or more risk factors for post-operative nausea and vomiting (PONV), who receive combination therapy consisting of at least two prophylactic pharmacologic antiemetic agents of different classes preoperatively and/or intraoperatively.
Substantive Change:	**Updated numerator definition: Added:** Propofol for induction and maintenance of anesthesia
Steward:	American Society of Anesthesiologists
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the numerator definition to add propofol as this is a commonly used prophylactic antiemetic and aligns with current clinical recommendations.

D.70 Statin Therapy for the Prevention and Treatment of Cardiovascular Disease

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	438
CMS eCQM ID:	CMS347v5
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications | CMS Web Interface Measure Specifications | MIPS CQMs Specifications
Current Measure Description:	Percentage of the following patients - all considered at high risk of cardiovascular events - who were prescribed or were on statin therapy during the measurement period: • Adults aged ≥ 21 years who were previously diagnosed with or currently have an active diagnosis of clinical atherosclerotic cardiovascular disease (ASCVD); OR • Adults aged ≥ 21 years who have ever had a fasting or direct low-density lipoprotein cholesterol (LDL-C) level ≥ 190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial or pure hypercholesterolemia; OR • Adults aged 40-75 years with a diagnosis of diabetes with a fasting or direct LDL-C level of 70-189 mg/dL.
Substantive Change:	**The measure description is revised to read: For all collection types:** Percentage of the following patients - all considered at high risk of cardiovascular events - who were prescribed or were on statin therapy during the measurement period: *All patients who were previously diagnosed with or currently have an active diagnosis of clinical atherosclerotic cardiovascular disease (ASCVD), including an ASCVD procedure; OR *Patients aged >= 20 years who have ever had a low-density lipoprotein cholesterol (LDL-C) level >= 190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial hypercholesterolemia; OR *Patients aged 40-75 years with a diagnosis of diabetes **The measure definition is revised to read: For the eCQM Specifications collection type:** Clinical atherosclerotic cardiovascular disease (ASCVD) includes: * Acute coronary syndromes * History of myocardial infarction * Stable or unstable angina * Coronary or other arterial revascularization * Stroke or transient ischemic attack (TIA) * Peripheral arterial disease of atherosclerotic origin Lipoprotein density cholesterol (LDL-C) result: * A fasting or non-fasting LDL-C laboratory test performed and direct or calculated test result documented in the medical record. When both direct and calculated test results are available on the same day, the direct LDL-C test result should be used. Statin therapy: * Administration of one or more of a group of medications that are used to lower plasma lipoprotein levels in the treatment of hyperlipoproteinemia. Statin Medication Therapy List (NOTE: List does NOT include dosage): [Generic name] (Brand or trade name) and (-) Medication type, if applicable: [Atorvastatin] (Lipitor) - Statin [Fluvastatin] (Lescol XL or Lescol) - Statin [Lovastatin (Mevinolin)](Mevacor or Altoprev) -Statin [Pitavastatin] (Livalo or Zypitamag or Nikita) - Statin [Pravastatin Sodium] (Pravachol) - Statin [Rosuvastatin Calcium] (Crestor) - Statin [Simvastatin] (Zocor) - Statin [Amlodipine Besylate/Atorvastatin Calcium] (Caduet) – Fixed Dose Combination [Ezetimibe/Simvastatin] (Vytorin) – Fixed Dose Combination Statin-Associated Muscle Symptoms (SAMS) – The 2018 ACC/AHA/MS Guideline (Grundy et al., 2019) includes the following SAMS: myalgias, myositis, myopathy, or statin-associated autoimmune myopathy. Patients who experience significant or repeated statin-associated muscle symptoms may prefer not to take or continue statin therapy and therefore may be removed from the denominator. **Updated denominator exception:** **For the eCQM Specifications CMS Web Interface Measure Specifications collection types:** **Revised:** Patients with statin-associated muscle symptoms or an allergy to statin medication **Removed:** Patients with diabetes who have the most recent fasting or direct LDL-C laboratory test result < 70 mg/dL and are not taking statin therapy **For the MIPS CQM Specifications collection type:** **Revised:** Documentation of medical reason(s) for not currently being a statin therapy user or receiving an order (prescription) for statin therapy (e.g., patients with statin-associated muscle symptoms or an allergy to statin medication therapy, patients who are receiving palliative or hospice care, patients with active liver disease or hepatic disease or insufficiency, and patients with end stage renal disease [ESRD]) **Removed:** Submisstion Criteria Three: Documentation of patients with diabetes who have a most recent fasting or direct LDL-C laboratory test result < 70 mg/dL and are not taking statin therapy **Updated denominator exclusion: For all collection types: Added:** Timeframe of 'at any time during the measurement period' to all denominator exclusions. **The measure guidance is revised to read: For the eCQM Specifications collection type:** Initial Population Guidance: The initial population covers three distinct populations. Use the following process to prevent counting patients more than once. Initial Population 1: All patients who were previously diagnosed with or currently have an active diagnosis of clinical ASCVD, including an ASCVD procedure, before the end of the measurement period.

Category	Description
	-If YES, meets Initial Population 1 risk category -If NO, screen for next risk category Initial Population 2: Patients aged >= 20 years at the beginning of the measurement period who have ever had a laboratory test result of LDL-C >= 190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial hypercholesterolemia -If YES, meets Initial Population 2 risk category -If NO, screen for next risk category Initial Population 3: Patients aged 40 to 75 years at the beginning of the measurement period with an active diagnosis of Type 1 or Type 2 diabetes at any time during the measurement period -If YES, meets Initial Population 3 risk category -If NO, patient does NOT meet Initial Population criteria and is NOT eligible for measure inclusion Initial Population Guidance for Encounter: -In order for the patient to be included in the Initial Population, the patient must have ONE initial population-eligible visit, defined as follows: outpatient visit, initial or established office visit, face-to-face interaction, preventive care services, or annual wellness visit. LDL-C Laboratory test result options: The measure can be reported for all patients with a documented LDL-C level recorded as follows: To meet Initial Population 1: There is no LDL-C result required. To meet Initial Population 2: If a patient has ANY previous laboratory result of LDL-C >= 190 mg/dL, report the highest value >= 190 mg/dL. To meet Initial Population 3: There is no LDL-C result required. Numerator instructions and guidance: -Current statin therapy use must be documented in the patient's current medication list or ordered during the measurement period. -ONLY statin therapy meets the measure Numerator criteria (NOT other cholesterol lowering medications). -Prescription or order does NOT need to be linked to an encounter or visit; it may be called to the pharmacy. -Statin medication "samples" provided to patients can be documented as "current statin therapy" if documented in the medication list in health/medical record. -Patients who meet the denominator criteria for inclusion, but are not prescribed or using statin therapy, will NOT meet performance for this measure unless they have an allowable denominator exception. Patients with an allowable denominator exception should be removed from the denominator of the measure and reported as a valid exception. -There is only one performance rate calculated for this measure: the weighted average of the three populations. -Adherence to statin therapy is not calculated in this measure. -It may not be appropriate to prescribe statin therapy for some patients (see exceptions and exclusions for the complete list) Intensity of statin therapy in primary and secondary prevention: The expert panel of the 2018 ACC/AHA/MS Guidelines (Grundy et al., 2019) defines recommended intensity of statin therapy on the basis of the average expected LDL-C response to specific statin and dose. Although intensity of statin therapy is important in managing cholesterol, this measure assesses prescription of ANY statin therapy, irrespective of intensity. Assessment of appropriate intensity and dosage documentation added too much complexity to allow inclusion of statin therapy intensity in the measure at this time. Lifestyle modification coaching: A healthy lifestyle is important for the prevention of cardiovascular disease. However, lifestyle modification monitoring and documentation added too much complexity to allow its inclusion in the measure at this time. This eCQM is a patient-based measure. This version of the eCQM uses QDM version 5.5. Please refer to the eCQI resource center (https://ecqi.healthit.gov/qdm) for more information on the QDM. **Updated guidance/denominator confirmation: For the CMS Web Interface Measure Specifications collection type: Revised:** Language within all of the guidance/confirmation sections was updated to reflect the changes to the initial patient poulations. **The measure initial patient population is revised to read: For the eCQM Specifications and CMS Web Interface Measure Specifications collection types:** Population 1: All patients who were previously diagnosed with or currently have an active diagnosis of clinical ASCVD, including an ASCVD procedure Population 2: Patients aged >= 20 years at the beginning of the measurement period who have ever had a laboratory result of LDL-C >=190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial hypercholesterolemia Population 3: Patients aged 40 to 75 years at the beginning of the measurement period with Type 1 or Type 2 diabetes **Updated denominator:** **For the eCQMs Specifications collection type: Revised:** Equals Initial Population **For the CMS Web Interface Measure Specifications collection types: Revised:** Population 1: All patients who were previously diagnosed with or currently have an active diagnosis of ASCVD, including an ASCVD procedure, Population 2: Patients aged >= 20 years at the beginning of the measurement period who have ever had laboratory result of LDL-C >= 190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial hypercholesterolemia Population 3: Patients aged 40 to 75 years at the beginning of the measurement period with Type 1 or Type 2 diabetes

Category	Description
	The measure rate aggregation is revised to read: For the eCQM Specifications collection type: This measure is intended to have one reporting rate, which aggregates the following populations into a single performance rate for reporting purposes: Population 1: All patients who were previously diagnosed with or currently have an active diagnosis of clinical ASCVD, including an ASCVD procedure, before the end of the measurement period. Population 2: Patients aged >= 20 years at the beginning of the measurement period who have ever had a laboratory test result of LDL-C >= 190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial hypercholesterolemia. Population 3: Patients aged 40 to 75 years at the beginning of the measurement period with an active diagnosis of Type 1 or Type 2 diabetes at any time during the measurement period. For the purposes of this measure, a single performance rate can be calculated as follows: Performance Rate = (Numerator 1 + Numerator 2 +Numerator 3)/ [(Denominator 1 - Denominator Exclusions 1- Denominator Exceptions 1) + (Denominator 2 - Denominator Exclusions 2 - Denominator Exceptions 2) +(Denominator 3 - Denominator Exclusions 3 - Denominator Exceptions 3)] **Updated definition: For the MIPS CQMs Specifications collection type:** **Revised:** Lipoprotein Density Cholesterol (LDL-C) result – A fasting or non-fasting LDL-C laboratory test performed and direct or calculated test result documented in the medical record. When both direct and calculated test results are available, the direct LDL-C test result should be used. **Added:** - Statin-Associated Muscle Symptoms (SAMS) – The 2018 ACC/AHA/MS Guideline (Grundy et al., 2019) includes the following SAMS: myalgias, myositis, myopathy, or statin-associated autoimmune myopathy. Patients who experience significant or repeated statin-associated muscle symptoms may prefer not to take or continue statin therapy and therefore may be removed from the denominator. The following ICD-10-CM codes are included in the Denominator Exception (G9781) to define SAMS: G72.0, G72.9, M60.9, M79.10. - Zypitamag and Nikita to statin medication therapy list. **Revised:** Caduet and Vytorin to 'Fixed Dose Combination'. **For the CMS Web Interface Measure Specifications collection type:** **Revised:** Statin therapy - Administration of one or more of a group of medications that are used to lower plasma lipoprotein levels in the treatment of hyperlipoproteinemia. Table 1 - Statin Medication Therapy List (NOTE: List does NOT include dosage): [Generic name] (Brand or trade name) and (-) Medication type, if applicable: [Atorvastatin] (Lipitor) - Statin [Fluvastatin] (Lescol XL or Lescol) - Statin [Lovastatin (Mevinolin)](Mevacor or Altoprev) -Statin [Pitavastatin] (Livalo or Zypitamag or Nikita) - Statin [Pravastatin Sodium] (Pravachol) - Statin [Rosuvastatin Calcium] (Crestor) - Statin [Simvastatin] (Zocor) - Statin [Amlodipine Besylate/Atorvastatin Calcium] (Caduet) – Fixed Dose Combination [Ezetimibe/Simvastatin] (Vytorin) – Fixed Dose Combination Statin-Associated Muscle Symptoms (SAMS) – The 2018 ACC/AHA/MS Guideline (Grundy et al., 2019) includes the following SAMS: myalgias, myositis, myopathy, or statin-associated autoimmune myopathy. Patients who experience significant or repeated statin-associated muscle symptoms may prefer not to take or continue statin therapy and therefore may be removed from the denominator. Lipoprotein Density Cholesterol (LDL-C) result - A fasting or non-fasting LDL-C laboratory test performed and direct or calculated test result documented in the medical record. When both direct and calculated test results are available on the same day, the direct LDL-C test result should be used. **Updated denominator: For the MIPS CQMs Specifications collection type: Revised:** Submission Criteria: 1) All patients who were previously diagnosed with or currently have an active diagnosis of clinical ASCVD, including an ASCVD procedure. 2) Patients aged ≥ 20 years at the beginning of the measurement period who have ever had a laboratory result of LDL-C ≥ 190 mg/dL or were previously diagnosed with or currently have an active diagnosis of familial hypercholesterolemia. 3) Patients aged 40 to 75 years at the beginning of the measurement period with Type 1 or Type 2 diabetes. **Updated denominator criteria is revised to read: For the MIPS CQMs Specifications collection type:** **Updated:** Submission Criteria 1: **Revised:** - All patients, regardless of age - Previously diagnosed or have an active diagnosis of clinical ASCVD, including ASCVD procedure. Submissiont Criteria 2: **Revised:** - Patient aged ≥ 20 years at the beginning of the measurement period - Any LDL-C laboratory test result ≥ 190 mg/dL - History of or active diagnosis of familial hypercholesterolemia Submission Criteria 3: **Removed:**

Category	Description
	Patient's highest fasting or direct LDL-C laboratory test result in the measurement period or two years prior to the beginning of the measurement period is 70 –189 mg/dL **Updated numerator guidance: For the CMS Web Interface Measure Specifications collection type: Revised:** These drugs may be used as a Denominator Exception if present in the patient's record accompanied by an appropriate conditional reason why the patient isn't taking the drug (e.g. statin-associated muscle symptoms or an allergy to statin medication) - Documentation of statin therapy prescribed or being taken during the measurement period can be completed during a telehealth encounter.
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to update the measure to align with 2018 American College of Cardiology (ACC)/American Heart Association (AHA) cholesterol guidelines and recommendations. These revisions are reflected in multiple components of the measure specifications for all collection types. The measure definitions and/or guidance sections for all collection types were revised to align with and add clarity to the revisions within the measure to align with current clinical guidelines and recommendations. We propose to remove the denominator exception found in submission criteria 3 for patients with diabetes not taking statin therapy who have the most recent fasting or direct LDL-C laboratory test result < 70 mg/dL as it is no longer applicable as the denominator criteria was revised to remove LDL-C laboratory testing criteria. Additionally, we propse to add statin-associate muscle symptoms to the denominator exception for documentation of medical reason(s) for all submission criteria and all collection types as it would not be appropriate to prescribe statin therapy for this patient population. We proposed to update the numerator guidance for the CMS Web Interface Measure Specifications collection type to allow for the documentation of statin therapies prescribed or taken during the measurement period to be completed during a telehealth encounter as this aligns with the intent of the measure and clinical workflow. We propose to revise the statin medication therapy list for all collection types to reflect current clinical guidelines and recommendations. Additionally, we propose to update the denominator exclusions for all submission criterias and collection types to include a timing component in order to clarify when it must occur and for consistency in implementation.

D.71 Appropriate Workup Prior to Endometrial Ablation

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	448
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Communication and Care Coordination
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients, aged 18 years and older, who undergo endometrial sampling or hysteroscopy with biopsy and results are documented before undergoing an endometrial ablation.
Substantive Change:	**The measure denominator definition is revised to read:** Index Date –Date of first endometrial ablation during the performance period. **Updated denominator exclusion: Revised:** Patients who had an endometrial ablation procedure during the 12 months prior to the index date (exclusive of the index date). **The measure numerator is revised to read:** Patients who received endometrial sampling or hysteroscopy with biopsy and results were documented during the 12 months prior to the index date (exclusive of the index date) of the endometrial ablation. **The measure numerator options are revised to read:** **Performance Met:** Endometrial sampling or hysteroscopy with biopsy and results documented during the 12 months prior to the index date (exclusive of the index date) of the endometrial ablation **Performance Not Met:** Endometrial sampling or hysteroscopy with biopsy and results not documented during the 12 months prior to the index date (exclusive of the index date) of the endometrial ablation
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the measure denominator definition to reference the first endometrial ablation as the index date. This change aligns with the measure intent as the timing of the quality action should be assessed based on the date of the endometrial ablation procedure. We propose to revise the denominator exclusion for clarity in timing of previous endometrial ablations that may suffice for this exclusion. Additionally, we propose to revise the numerator and numerator options for clarity in timing of the quality action as well as to align with the revised definition for Index Date to ensure alignment with measure intent.

D.72 Appropriate Treatment for Patients with Stage I (T1c) - III HER2 Positive Breast Cancer

Category	Description
NQF # / eCQM NQF #:	1858 / N/A
Quality#:	450
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of female patients aged 18 to 70 with stage I (T1c) - III HER2 positive breast cancer for whom appropriate treatment is initiated.
Substantive Change:	**Updated denominator criteria: Added:** exclusion for telehealth
Steward:	American Society of Clinical Oncology
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to add an exclusion for telehealth as adjuvant therapy would require an in-person encounter and this will ensure only the appropriate patients are being pulled into the denominator eligible patient population.

D.73 Back Pain After Lumbar Discectomy/Laminectomy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	459
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients 18 years of age or older who had a lumbar discectomy/laminectomy procedure, back pain is rated by the patients as less than or equal to 3.0 OR an improvement of 5.0 points or greater on the Visual Analog Scale (VAS) Pain scale at three months (6 to 20 weeks) postoperatively.
Substantive Change:	**Updated numerator definition: Revised:** Preoperative Assessment VAS Pain - A preoperative VAS pain scale score can be obtained from the patient any time up to three months preoperatively, inclusive of the date of the procedure. Assessment scores obtained via a telephone screening or more than three months before the procedure will not be used for measure calculation. If more than one preoperative VAS was obtained, use the VAS that is the most recent and prior to the procedure. Postoperative Assessment VAS Pain - A postoperative VAS pain scale score can be obtained from the patient at three months (6 - 20 weeks) after the date of procedure. Assessment scores obtained via a telephone screening or prior to six weeks and after 20 weeks postoperatively will not be used for measure calculation. If more than one postoperative VAS was obtained during the six to 20 weeks following the procedure, use the most recent score obtained during the allowable timeframe.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered.

D.74 Back Pain After Lumbar Fusion

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	460
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients 18 years of age or older who had a lumbar fusion procedure, back pain is rated by the patient as less than or equal to 3.0 OR an improvement of 5.0 points or greater on the Visual Analog Scale (VAS) Pain scale at one year (9 to 15 months) postoperatively.
Substantive Change:	**Updated numerator definition: Revised:** Preoperative Assessment VAS Pain - A preoperative VAS pain scale score can be obtained from the patient any time up to three months preoperatively, inclusive of the date of the procedure. Assessment scores obtained via a telephone screening or more than three months before the procedure will not be used for measure calculation. If more than one preoperative VAS was obtained, use the VAS that is the most recent and prior to the procedure. Postoperative Assessment VAS Pain - A postoperative VAS pain scale score can be obtained from the patient one year (9 to 15 months) after the date of procedure. Assessment scores obtained via a telephone screening or prior to 9 months and after 15 months postoperatively will not be used for measure calculation. If more than one postoperative VAS was obtained during the 9 to 15 months following the procedure, use the most recent score obtained during the allowable timeframe.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered.

D.75 Leg Pain After Lumbar Discectomy/Laminectomy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	461
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients 18 years of age or older who had a lumbar discectomy/laminectomy procedure, leg pain is rated by the patient as less than or equal to 3.0 OR an improvement of 5.0 points or greater on the VAS Pain scale at three months (6 to 20 weeks) postoperatively.
Substantive Change:	**Updated numerator definition: Revised:** Preoperative Assessment VAS Pain - A preoperative VAS pain scale score can be obtained from the patient any time up to three months pre-operatively, inclusive of the date of the procedure. Assessment scores obtained via a telephone screening or more than three months before the procedure will not be used for measure calculation. If more than one preoperative VAS was obtained, use the VAS that is the most recent and prior to the procedure. Postoperative Assessment VAS Pain - A postoperative VAS pain scale score can be obtained from the patient three months (6 to 20 weeks) after the date of the procedure. Assessment scores obtained via a telephone screening or prior to 6 weeks and after 20 weeks postoperatively will not be used for measure calculation. If more than one postoperative VAS was obtained during the six to 20 weeks following the procedure, use the most recent score obtained during the allowable timeframe.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered.

D.76 Bone Density Evaluation for Patients with Prostate Cancer and Receiving Androgen Deprivation Therapy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	462
CMS eCQM ID:	CMS645v5
National Quality Strategy Domain:	Effective Clinical Care
Current Collection Type:	eCQM Specifications
Current Measure Description:	Patients determined as having prostate cancer who are currently starting or undergoing androgen deprivation therapy (ADT), for an anticipated period of 12 months or greater and who receive an initial bone density evaluation. The bone density evaluation must be prior to the start of ADT or within 3 months of the start of ADT.
Substantive Change:	**Updated logic definitions:** **Revised:** First Androgen Deprivation Therapy' to 'Androgen Deprivation Therapy Start Date'. **Added:** 'Androgen Deprivation Therapy for Urology Care Medication Active Start Dates' and 'Androgen Deprivation Therapy for Urology Care Medication Order Start Dates.
Steward:	Oregon Urology Institute
High Priority Measure:	No
Measure Type:	Process
Rationale:	We propose to revise the logic to include order for androgen deprivation therapy as an option to meet eligibility for the initial patient population as these patients would be appropriate for inclusion to be assessed for the quality action.

D.77 Prevention of Post-Operative Vomiting (POV) – Combination Therapy (Pediatrics)

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	463
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Patient Safety
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	Percentage of patients aged 3 through 17 years, who undergo a procedure under general anesthesia in which an inhalational anesthetic is used for maintenance AND who have two or more risk factors for post-operative vomiting (POV), who receive combination therapy consisting of at least two prophylactic pharmacologic anti-emetic agents of different classes preoperatively and/or intraoperatively.
Substantive Change:	**Updated numerator definition: Added:** Propofol for induction and maintenance of anesthesia.
Steward:	American Society of Anesthesiologists
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the numerator definition to add Propofol as this is a commonly used prophylactic antiemetic and aligns with current clinical recommendations.

D.78 Functional Status After Lumbar Fusion

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	469
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients 18 years of age and older who had a lumbar fusion procedure, functional status is rated by the patient as less than or equal to 22 OR a change of 30 points or greater on the Oswestry Disability Index (ODI version 2.1a) at one year (9 to 15 months) postoperatively.
Substantive Change:	**The measure description is revised to read:** For patients 18 years of age and older who had a lumbar fusion procedure, functional status is rated by the patient as less than or equal to 22 OR an improvement of 30 points or greater on the Oswestry Disability Index (ODI version 2.1a) at one year (9 to 15 months) postoperatively **Updated instructions: Revised: NOTE**: This measure is a target-based measure with two ways to meet the numerator; either a postoperative ODI score that is less than or equal to 22 OR an improvement of 30 points or greater from the preoperative to postoperative score. It is expressed as a proportion or rate. Patients having received a lumbar fusion procedure who are not assessed for functional status postoperatively remain in the denominator and are considered as not meeting the target. The measure intent is that MIPS eligible clinicians will submit all denominator eligible procedures for performance calculation. **The measure numerator is revised to read:** All eligible patients whose functional status is less than or equal to 22 OR an improvement of 30 points or greater on the Oswestry Disability Index (ODI Version 2.1a) patient reported outcome tool at one year (9 to 15 months) postoperatively **Updated numerator definition: Revised:** Preoperative Assessment Oswestry Disability Index (ODI version 2.1a)- A preoperative ODI functional assessment score can be obtained from the patient any time up to three months preoperatively, inclusive of the date of the procedure. Assessment scores obtained more than three months before the procedure will not be used for measure calculation. If more than one preoperative ODI was obtained, use the ODI that is the most recent and prior to the procedure. Postoperative Assessment Oswestry Disability Index (ODI version 2.1a) - A postoperative ODI functional assessment score can be obtained from the patient one year (9 to 15 months) after the date of procedure. Assessment scores obtained prior to nine months and after fifteen months postoperatively will not be used for measure calculation. If more than one postoperative ODI was obtained during the 9 to 15 months following the procedure, use the most recent score obtained during the allowable timeframe. Functional Status Target #2 - A patient who does not meet Functional Status Target #1 is assessed both preoperatively within 3 months prior to the procedure AND postoperatively at one year (9 to 15 months) after the procedure AND the improvement is greater than or equal to 30 points. **The measure numerator note is revised to read:** NUMERATOR NOTE: It is recommended that both a preoperative and postoperative tool be administered to the patient to increase the chance that one of the numerator targets will be met. The following situations are those in which the numerator target cannot be reached and Performance Not Met M1043 or G2143 is submitted. • ODI is not administered postoperatively at one year (9 to 15 months) • Functional status is measured using a different patient reported functional status tool or ODI version • Postoperative ODI is administered less than 9 months or greater than 15 months (1 year window) • Postoperative ODI is greater than 22 and no valid preoperative ODI to measure improvement • Postoperative ODI was greater than 22 and preoperative ODI (to measure improvement) is administered beyond the three month timeframe prior to and including the date of procedure (e.g. 6 months before procedure.) **The measure numerator options are revised to read:** **Performance Met:** Functional status measured by the Oswestry Disability Index (ODI version 2.1a) at one year (9 to 15 months) postoperatively was less than or equal to 22 OR Functional status measured by the ODI version 2.1a within three months preoperatively AND at one year (9 to 15 months) postoperatively demonstrated an improvement of 30 points or greater. **Performance Not Met:** Functional status was not measured by the Oswestry Disability Index (ODI version 2.1a) at one year (9 to 15 months) postoperatively. **Performance Not Met:** Functional status measured by the Oswestry Disability Index (ODI version 2.1a) at one year (9 to 15 months) postoperatively was greater than 22 AND Functional status measured by the ODI version 2.1a within three months preoperatively AND at one year (9 to 15 months) postoperatively demonstrated an improvement of less than 30 points.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered. Additionally, we propose to update multiple components of the measure specifications to remove 'a change' and replace it with 'an improvement' as the intent of the measure is to assess if there was improvement in a patient's functional status.

D.79 Functional Status After Primary Total Knee Replacement

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	470
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients age 18 and older who had a primary total knee replacement procedure, functional status is rated by the patient as greater than or equal to 37 on the Oxford Knee Score (OKS) or a 71 or greater on the KOOS, JR tool at one year (9 to 15 months) postoperatively.
Substantive Change:	**Updated numerator definition: Revised:** Measure Assessment Period (Performance Period) - The period of time following the procedure date that is in which a postoperative Oxford Knee Score (OKS) or KOOS, JR. functional status score can be obtained reflecting a one year post operative assessment with a 9 to 15 month window. If more than one postoperative assessment was obtained during the 9 to 15 month window, use the most recent score during the allowable timeframe.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered.

D.80 Functional Status After Lumbar Discectomy/Laminectomy

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	471
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients age 18 and older who had lumbar discectomy/laminectomy procedure, functional status is rated by the patient as less than or equal to 22 OR a change of 30 points or greater on the Oswestry Disability Index (ODI version 2.1a) at three months (6 to 20 weeks) postoperatively.
Substantive Change:	**The measure description is revised to read:** For patients age 18 and older who had lumbar discectomy/laminectomy procedure, functional status is rated by the patient as less than or equal to 22 OR an improvement of 30 points or greater on the Oswestry Disability Index (ODI version 2.1a) at three months (6 to 20 weeks) postoperatively **The measure numerator is revised to read:** All eligible patients whose functional status is less than or equal to 22 OR an improvement of 30 points or greater on the Oswestry Disability Index (ODI version 2.1a) at three months (6 to 20 weeks) postoperatively **Updated numerator definition: Revised:** Preoperative Assessment Oswestry Disability Index (ODI version 2.1a) - A preoperative ODI functional assessment score can be obtained from the patient any time up to three months preoperatively, inclusive of the date of the procedure. Assessment scores obtained more than three months before the procedure will not be used for measure calculation. If more than one preoperative ODI was obtained, use the ODI that is the most recent and prior to the procedure. Postoperative Assessment Oswestry Disability Index (ODI version 2.1a) - A postoperative ODI functional assessment score can be obtained from the patient three months (6 to 20 weeks) after the date of procedure. Assessment scores obtained prior to six weeks and after twenty weeks postoperatively will not be used for measure calculation. If more than one postoperative ODI was obtained during the 6 to 20 weeks following the procedure, use the most recent score obtained during the allowable timeframe. ODI can be obtained below or at the following link https://eprovide.mapi-trust.org/instruments/oswestry-disability-index. Functional Status Target #2 - A patient who does not meet Functional Status Target #1 is assessed both preoperatively within 3 months prior to the procedure AND postoperatively at three months (6 to 20 weeks) after the procedure AND the improvement is greater than or equal to 30 points. **Updated instructions: Revised:** NOTE: This measure is a target-based measure with two ways to meet the numerator; either a postoperative ODI score that is less than or equal to 22 OR an improvement of 30 points or greater from the preoperative to postoperative score. It is expressed as a proportion or rate. Patients having received a lumbar discectomy/laminectomy procedure who are not assessed for functional status postoperatively remain in the denominator and are considered as not meeting the target. The measure intent is that MIPS eligible clinicians will submit all denominator eligible procedures to be utilized for performance calculation. **The measure numerator note is revised to read:** NUMERATOR NOTE: It is recommended that both a preoperative and postoperative be administered to the patient increasing chances that one of the numerator targets will be met. The following situations are those in which the numerator target cannot be reached and Performance Not Met M1049 or G2145 is submitted. • ODI is not administered postoperatively at three months (6 to 20 weeks) • Functional status is measured using a different patient reported functional status tool or ODI version • Postoperative ODI is administered less than 6 weeks or greater than 20 weeks (3 month window) • Postoperative ODI is greater than 22 and no valid preoperative ODI to measure improvement • Postoperative ODI is greater than 22 and preoperative ODI (to measure improvement) is administered beyond the three month timeframe prior to and including the date of procedure (e.g. 6 months before procedure) **The measure numerator options are revised to read:** **Performance Met:** Functional status measured by the Oswestry Disability Index (ODI version 2.1a) at three months (6 – 20 weeks) postoperatively was less than or equal to 22 OR Functional status measured by the ODI version 2.1a within three months preoperatively AND at three months (6 - 20 weeks) postoperatively demonstrated an improvement of 30 points or greater. **Performance Not Met:** Functional status was not measured by the Oswestry Disability Index (ODI version 2.1a) at three months (6 - 20 weeks) postoperatively. **Performance Not Met:** Functional status measured by the Oswestry Disability Index (ODI version 2.1a) at three months (6 – 20 weeks) postoperatively was greater than 22 AND Functional status measured by the ODI version 2.1a within three months preoperatively AND at three months (6 - 20 weeks) postoperatively demonstrated an improvement of less than 30 points.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered. Additionally, we propose to update multiple components of the measure specifications to remove 'a change' and replace it with 'an improvement' as the intent of the measure is to assess if there was improvement in a patient's functional status.

D.81 Appropriate Use of DXA Scans in Women Under 65 Years Who Do Not Meet the Risk Factor Profile for Osteoporotic Fracture

Category	Description
NQF # / eCQM NQF #:	N/A / 3475e
Quality#:	472
CMS eCQM ID:	CMS249v4
National Quality Strategy Domain:	Efficiency and Cost Reduction
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of female patients 50 to 64 years of age without select risk factors for osteoporotic fracture who received an order for a dual-energy x-ray absorptiometry (DXA) scan during the measurement period.
Substantive Change:	**Updated denominator exclusion: Revised:** The following risk factors may occur at any time in the patient's history or during the measurement period: Rheumatoid arthritis Hyperthyroidism Malabsorption Syndromes: celiac disease, inflammatory bowel disease, ulcerative colitis, Crohn's disease, cystic fibrosis, malabsorption Chronic liver disease Chronic malnutrition Osteoporotic fracture The following risk factors may occur any time in the patient's history prior to the start of the measurement period but do not need to be active at the start of the measurement period: Documentation of history of hip fracture in parent Glucocorticoids [cumulative medication duration >= 90 days]
Steward:	Centers for Medicare & Medicaid Services
High Priority Measure:	Yes
Measure Type:	Process
Rationale:	We propose to revise the denominator exclusion to remove the dosage requirements associate with glucocorticoid usage calculation to more accurately capture patients with relevant exposure and to exclude patients who had an osteoporotic fracture at any point in time, based upon stakeholder feedback. This will ensure that only patients appropriate for the assessment of the quality action are being included within the initial patient population.

D.82 Leg Pain After Lumbar Fusion

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	473
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-Centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	For patients 18 years of age or older who had a lumbar fusion procedure, leg pain is rated by the patient as less than or equal to 3.0 OR an improvement of 5.0 points or greater on the Visual Analog Scale (VAS) Pain* scale at one year (9 to 15 months) postoperatively.
Substantive Change:	**Updated numerator definition: Revised:** Preoperative Assessment VAS Pain - A preoperative VAS pain scale score can be obtained from the patient any time up to three months preoperatively, inclusive of the date of the procedure. Assessment scores obtained via a telephone screening or more than three months before the procedure will not be used for measure calculation. If more than one preoperative VAS was obtained, use the VAS that is the most recent and prior to the procedure. Postoperative Assessment VAS Pain - A postoperative VAS pain scale score can be obtained from the patient one year (9 to 15 months) after the date of procedure. Assessment scores obtained via a telephone screening or prior to 9 months and after 15 months postoperatively will not be used for measure calculation. If more than one postoperative VAS was obtained during the 9 to 15 months following the procedure, use the most recent score obtained during the allowable timeframe.
Steward:	Minnesota Community Measurement
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the numerator definition to clarify which assessment should be utilized if multiple assessments are administered.

D.83 Urinary Symptom Score Change 6-12 Months After Diagnosis of Benign Prostatic Hyperplasia

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	476
CMS eCQM ID:	CMS771v3
National Quality Strategy Domain:	Person and Caregiver-centered Experience and Outcomes
Current Collection Type:	eCQM Specifications
Current Measure Description:	Percentage of patients with an office visit within the measurement period and with a new diagnosis of clinically significant Benign Prostatic Hyperplasia who have International Prostate Symptoms Score (IPSS) or American Urological Association (AUA) Symptom Index (SI) documented at time of diagnosis and again 6-12 months later with an improvement of 3 points.
Substantive Change:	**Updated logic definitions: Revised:** the denominator exclusion "Patients with an initial BPH diagnosis that starts during, or within 30 days of hospitalization" logic has been updated to identify the encounter for the first diagnosis. **Updated value set/coding: Updated:** the denominator exclusion "Patients with a diagnosis of morbid obesity, or with a BMI Exam >40 before the follow up urinary symptom score" value set was updated to allow only calculated BMIs
Steward:	Large Urology Group Practice Association and Oregon Urology Institute
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to revise the logic of the denominator exclusion to ensure that the first encounter is being utilized to correctly identify the initial Benign Prostatic Hyperplasia (BPH) diagnosis to align with the intended timing component of the exclusion. Additionally, we propose to update the body mass index (BMI) denominator exclusion value set to allow for calculated BMIs to align with the measure intent and ensure only applicable patients are being excluded.

D.84 Functional Status Change for Patients with Neck Impairments

Category	Description
NQF # / eCQM NQF #:	N/A / N/A
Quality#:	478
CMS eCQM ID:	N/A
National Quality Strategy Domain:	Person and Caregiver-centered Experience and Outcomes
Current Collection Type:	MIPS CQMs Specifications
Current Measure Description:	This is a patient-reported outcome measure of risk-adjusted change in functional status for patients aged 14 years+ with neck impairments. The change in functional status (FS) is assessed using the FOTO Neck FS patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static/paper-pencil).
Substantive Change:	**The measure description is revised to read:** A patient-reported outcome measure of risk-adjusted change in functional status for patients 14 years+ with neck impairments. The change in functional status (FS) is assessed using the FOTO Neck FS patient-reported outcome measure (PROM). The measure is adjusted to patient characteristics known to be associated with FS outcomes (risk-adjusted) and used as a performance measure at the patient level, at the individual clinician level, and at the clinic level to assess quality. The measure is available as a computer adaptive test, for reduced patient burden, or a short form (static/paper-pencil)
Steward:	Focus on Therapeutic Outcomes, Inc.
High Priority Measure:	Yes
Measure Type:	Patient-Reported Outcome-Based Performance Measure
Rationale:	We propose to update the measure description to align language across Focus on Therapeutic Outcomes, Inc. (FOTO) measures.

Table A: Proposed New Improvement Activities for the MIPS CY 2022 Performance Period/2024 MIPS Payment Year and Future Years

New Improvement Activity	
Proposed Activity ID:	**IA_AHE_XX**
Proposed Subcategory:	Achieving Health Equity
Proposed Activity Title:	Create and Implement an Anti-Racism Plan
Proposed Activity Description:	Create and implement an anti-racism plan using the CMS Disparities Impact Statement or other anti-racism planning tools.[1] The plan should include a clinic-wide review of existing tools and policies, such as value statements or clinical practice guidelines, to ensure that they include and are aligned with a commitment to anti-racism and an understanding of race as a political and social construct, not a physiological one. The plan should also identify ways in which issues and gaps identified in the review can be addressed and should include target goals and milestones for addressing prioritized issues and gaps. This may also include an assessment and drafting of an organization's plan to prevent and address racism and/or improve language access and accessibility to ensure services are accessible and understandable for those seeking care. The clinician or practice can also consider including in their plan ongoing training on anti-racism and/or other processes to support identifying explicit and implicit biases in patient care and addressing historic health inequities experienced by people of color. More information about elements of the CMS Disparities Impact Statement is detailed in the template and action plan document at https://www.cms.gov/About-CMS/Agency-Information/OMH/Downloads/Disparities-Impact-Statement-508-rev102018.pdf.
Proposed Weighting:	High
Rationale:	This proposed activity aims to address systemic inequities, including systemic racism, as called for in Executive Order 13985: Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, published January 20, 2021.[2] This activity begins with the premise that it is important to acknowledge systemic racism as a root cause for differences in health outcomes between socially-defined racial groups.[3, 4] We believe this activity has the potential to improve clinical practice or care delivery and is likely to result in improved outcomes, per the improvement activity definition at § 414.1305, because it supports clinicians in identifying health disparities and implementing processes to reduce racism and provide equitable quality health care. This activity is intended to help clinicians move beyond analyzing data to taking real steps to naming and eliminating the causes of the disparities identified. We also propose making this activity high-weighted because clinicians will need considerable time and resources to develop a thorough anti-racism plan that is informed by data, and to implement it throughout the practice or system. See the definition for high weighting in the CY 2019 PFS final rule (83 FR 59780 through 59781).
New Improvement Activity	
Proposed Activity ID:	**IA_AHE_XX**
Proposed Subcategory:	Achieving Health Equity
Proposed Activity Title:	Implement Food Insecurity and Nutrition Risk Identification and Treatment Protocols

Appendix 2: Improvement Activities

Note: In this proposed rule, for the 2022 MIPS performance/2024 MIPS payment year and future years, we are proposing to add 7 new improvement activities, modify 15 previously adopted improvement activities, and remove 6 previously adopted improvement activities. These proposals are discussed in detail below. We request comments on our proposals.

Proposed Activity Description:	Create or improve, and then implement, protocols for identifying and providing appropriate support to: a) patients with or at risk for food insecurity, and b) patients with or at risk for poor nutritional status. (Poor nutritional status is sometimes referred to as clinical malnutrition or undernutrition and applies to people who are overweight and underweight.) Actions to implement this improvement activity may include, but are not limited to, the following: • Use Malnutrition Quality Improvement Initiative (MQii) or other quality improvement resources and standardized screening tools to assess and improve current food insecurity and nutritional screening and care practices. • Update and use clinical decision support tools within the clinician's electronic medical record to align with the new food insecurity and nutrition risk protocols. • Update and apply requirements for staff training on food security and nutrition. • Update and provide resources and referral lists, and/or engage with community partners to facilitate referrals for patients who are identified as at risk for food insecurity or poor nutritional status during screening. Activities must be focused on patients at greatest risk for food insecurity and/or malnutrition—for example patients with low income who live in areas with limited access to affordable fresh food, or who are isolated or have limited mobility.
Proposed Weighting:	Medium
Rationale:	Food insecurity is a widespread and worsening issue in the United States. Estimates indicate that the number of food insecure people in the United States increased from 35.2 million people (1 in 9 people) in 2019 to 45 million people (1 in 7 people) in 2020.[5] Older adults are particularly at risk because of low income, mobility issues, dementia, and other factors such as social isolation. Food insecurity also disproportionately affects Black and Latinx households.[6] Malnutrition is also widespread in the United States.[7] Both food insecurity and malnutrition are associated with worse health outcomes and higher spending on healthcare.[Error! Bookmark not defined.] For example, adults who are malnourished at the time of hospitalization or surgery are more likely to have worse hospitalization, surgical, and recovery outcomes.[8] The improvement activity fills a gap in the inventory, which does not currently include an improvement activity related to food insecurity or malnutrition. We believe this activity has the potential to improve clinical practice or care delivery and is likely to result in improved outcomes, because ameliorating food insecurity and malnutrition leads to better health outcomes.[9,10] This activity creates an opportunity for clinicians to help address food insecurity and malnutrition, and provides the Malnutrition Quality Improvement Initiative as a resource.[11] Evidence indicates that they can help patients by increasing enrollment in the Supplemental Nutrition Assistance Program (SNAP) (https://www.fns.usda.gov/snap/supplemental-nutrition-assistance-program), which is associated with reduced food insecurity[12] or connecting their patients to other community resources. This activity also creates an opportunity for clinicians to help address malnutrition by ensuring patients in need receive a detailed nutritional assessment and appropriate nutritional care. We propose weighting this activity medium, because this activity may be accomplished by providing literature and/or facilitating a conversation with a patient during a regular visit. The estimated level of effort for clinicians is comparable to other medium-weighted activities in the inventory, and less than that of high-weighted activities. See the definition of medium weighting in the CY 2019 PFS final rule (83 FR 59780 through 59781).
New Improvement Activity	
Proposed Activity ID:	**IA_BMH_XX**
Proposed Subcategory:	Behavioral and Mental Health

Proposed Activity Title:	Implementation of a Trauma-Informed Care (TIC) Approach to Clinical Practice
Proposed Activity Description:	Create and implement a plan for trauma-informed care (TIC) that recognizes the potential impact of trauma experiences on patients and takes steps to mitigate the effects of adverse events in order to avoid re-traumatizing or triggering past trauma. Actions in this plan may include, but are not limited to, the following: • Incorporate trauma-informed training into new employee orientation • Offer annual refreshers and/or trainings for all staff • Recommend and supply TIC materials to third party partners, including care management companies and billing services • Identify patients using a screening methodology • Flag charts for patients with one or more adverse events that might have caused trauma • Use ICD-10 diagnosis codes for adverse events when appropriate TIC is a strengths-based healthcare delivery approach that emphasizes physical, psychological, and emotional safety for both trauma survivors and their providers.[13] Core components of a TIC approach are: awareness of the prevalence of trauma; understanding of the impact of past trauma on services utilization and engagement; and a commitment and plan to incorporate that understanding into training, policy, procedure, and practice.[14]
Proposed Weighting:	Medium
Rationale:	We propose this activity because the psychological impact of trauma influences the clinical care needs of a large population in the United States and adopting a TIC approach can help all clinicians avoid retraumatizing affected patients and support providers and staff who have experienced trauma themselves.[15] Research indicates that clinicians have a positive view of TIC but need more resources and support to apply the concepts to practice.[16] For the purposes of this proposed improvement activity, trauma is the experience of a harmful or life-threatening event or series of events and their longer-term psychological impact, which can include development of post-traumatic stress disorder (PTSD) and changes to brain functioning and even genetics.[17] Approximately 60 percent of men and 50 percent of women in the U.S. have experienced trauma in their lifetimes and 7-8 percent of the population will have PTSD at some point in their lives.[18] Multi-generational trauma, whereby experiences that traumatized earlier generations, such as the genocide of Native American tribes, are passed down, impact many families and communities.[19] Clinicians (and not just mental health clinicians) who take a TIC approach anticipate and avoid institutional processes and individual practices that are likely to retraumatize individuals who have histories of trauma.[20] We believe this activity has the potential to improve clinical practice or care delivery and is likely to result in improved outcomes, because trauma-informed approaches in healthcare are associated with improved outcomes for patients.[21] We propose weighting this activity medium, because this activity may be accomplished by conducting a training, providing resources, or incorporating new procedures into a clinician's practice. The estimated level of effort for clinicians is comparable to other medium-weighted activities in the inventory, and less than that of high-weighted activities. See the definition of medium weighting in the CY 2019 PFS final rule (83 FR 59780 through 59781).
New Improvement Activity	
Proposed Activity ID:	**IA_BMH_XX**
Proposed Subcategory:	Behavioral and Mental Health
Proposed Activity Title:	Promoting Clinician Well-Being
Proposed Activity Description:	Develop and implement programs to support clinician well-being and resilience—for example, through relationship-building opportunities, leadership development plans, or

	creation of a team within a practice to address clinician well-being—using one of the following approaches: • Completion of clinician survey on clinician well-being with subsequent implementation of an improvement plan based on the results of the survey. • Completion of training regarding clinician well-being with subsequent implementation of a plan for improvement.
Proposed Weighting:	High
Rationale:	We believe this activity will help clinicians prioritize and improve their own well-being and the well-being of their staff and colleagues. Focusing on improving clinician well-being is especially critical now, given the stress that the COVID-19 public health emergency has exerted on clinicians. Many organizations, including the National Academies of Sciences, Engineering, and Medicine,[22] have prioritized interventions to improve clinician well-being. Studies indicate that clinician burnout, including emotional exhaustion, depersonalization, and reduced personal accomplishment, is associated with poorer quality healthcare and reduced safety for patients.[23, 24] Studies also indicate that some interventions have been shown to reduce burnout and improve well-being.[25] This improvement activity fills a gap because the inventory does not currently include an improvement activity related to clinician well-being. We believe this activity has the potential to improve clinical practice or care delivery and is likely to result in improved outcomes, because promoting clinician well-being and mitigating burnout leads to better quality health care and increased patient safety.[25] Given the impact of the COVID-19 pandemic on the medical community and the considerable time and resources required to mitigate its effects and promote well-being among clinicians, we believe that this activity should be weighted as high, in alignment with our definition in the CY 2019 PFS final rule (83 FR 59780 through 59781).
New Improvement Activity	
Proposed Activity ID:	**IA_ERP_XX**
Proposed Subcategory:	Emergency Response and Preparedness
Proposed Activity Title:	Implementation of a Personal Protective Equipment (PPE) Plan
Proposed Activity Description:	Implement a plan to acquire, store, maintain, and replenish supplies of personal protective equipment (PPE) for all clinicians or other staff who are in physical proximity to patients. In accordance with guidance from the Centers for Disease Control and Prevention (CDC) the PPE plan should address: • Conventional capacity: PPE controls that should be implemented in general infection prevention and control plans in healthcare settings, including training in proper PPE use. • Contingency capacity: actions that may be used temporarily during periods of expected PPE shortages. • Crisis capacity: strategies that may need to be considered during periods of known PPE shortages. The PPE plan should address all of the following types of PPE: • Standard precautions (e.g., hand hygiene, prevention of needle-stick or sharps injuries, safe waste management, cleaning and disinfection of the environment) • Eye protection • Gowns (including coveralls or aprons) • Gloves • Facemasks • Respirators (including N95 respirators)
Proposed Weighting:	Medium
Rationale:	The COVID-19 pandemic illustrated the importance of maintaining adequate PPE supplies for caregivers. Especially early in the pandemic, inadequate PPE supplies reduced access to care and exposed healthcare workers to unnecessary risk.[26]

	While clinicians may be following surge capacity procedures, they may not have a written plan for both preventing and preparing for surge capacity. In a survey conducted in mid-March of 2020, over 50 percent of physician practices cited a lack of supplies as an obstacle to caregiving.[27] Also, in a 2009 survey of American College of Emergency Physician Disaster Medicine Section members, fewer than 75 percent of respondents indicated that their emergency department had a plan for responding to pandemic influenza and other infectious disease threats.[28] This proposed improvement activity is based on the CDC guidelines for optimizing PPE supplies [29] and aligns with World Health Organization guidelines.[30] We believe that including this improvement activity in the inventory would encourage formalizing the process for creating a PPE plan, training staff, and ensuring adequate PPE inventory. Thus, it has the potential to improve clinical practice or care delivery and is likely to result in improved outcomes, because both clinicians and their patients will be safer when responding to epidemics, reducing the transmission of viruses and allowing clinicians to provide patients with appropriate care because supplies are available. We propose that this activity should be weighted as medium, because it may be accomplished by conducting a training, providing resources, or incorporating new procedures into a clinician's practice. The estimated level of effort for clinicians is comparable to other medium-weighted activities in the inventory, and less than that of high-weighted activities. See the definition of medium weighting in the CY 2019 PFS final rule (83 FR 59780 through 59781).
New Improvement Activity	
Proposed Activity ID:	**IA_ERP_XX**
Proposed Subcategory:	Emergency Response and Preparedness
Proposed Activity Title:	Implementation of a Laboratory Preparedness Plan
Proposed Activity Description:	Develop, implement, update, and maintain a preparedness plan for a laboratory intended to support continued or expanded patient care during COVID-19 or another public health emergency. The plan should address how the laboratory would maintain or expand patient access to health care services to improve beneficiary health outcomes and reduce healthcare disparities. For laboratories without a preparedness plan, clinicians would meet with stakeholders, record minutes, and document a preparedness plan, as needed. The laboratory must then implement the steps identified in the plan and maintain them. For laboratories with existing preparedness plans, clinicians should review, revise, or update the plan as necessary to meet the needs of the current PHE, implement new procedures, and maintain the plan. Maintenance of the plan in this activity could include additional hazard assessments, drills, training, and/or developing checklists to facilitate execution of the plan. Participation in debriefings to evaluate the effectiveness of plans are additional examples of engagement in this activity.
Proposed Weighting:	Medium
Rationale:	The COVID-19 pandemic demonstrated a need for many laboratories to develop and implement protocols to respond to the public health emergencies, as an increase in demand (due to a surge in COVID testing) and reduced staffing (due to needing to maintain distancing and other factors, such as childcare becoming unavailable) compromised laboratory functioning.[31] We believe that including this improvement activity in the inventory would encourage formalizing, updating, and maintaining preparedness plans to better equip laboratories to address another public health emergency, as well as other disasters such as floods, fires, or other emergencies. Such a plan will allow laboratory staff to respond and

	maintain operations during emergency situations. Thus, it has the potential to improve clinical practice or care delivery and is likely to result in improved outcomes, because if needed laboratory services increase with the surge in demand, staff will be prepared to meet those needs. We propose weighting this activity medium, because this activity may be accomplished by developing a plan and training staff on that plan. The estimated level of effort for clinicians is comparable to other medium-weighted activities in the inventory, and less than that of high-weighted activities. See the definition of medium weighting in the CY 2019 PFS final rule (83 FR 59780 through 59781).
New Improvement Activity	
Proposed Activity ID:	IA_PSPA_XX
Proposed Subcategory:	Patient Safety and Practice Assessment
Proposed Activity Title:	Application of CDC's Training for Healthcare Providers on Lyme Disease
Proposed Activity Description:	Apply the Centers for Disease Control and Prevention's (CDC) Training for Healthcare Providers on Lyme Disease using clinical decision support (CDS). CDS for Lyme disease should be built directly into the clinician workflow and support decision making for a specific patient at the point of care. Specific examples of how the guideline could be incorporated into a CDS workflow include but are not limited to: electronic health record (EHR) based prescribing prompts, order sets that require review of guidelines before prescriptions can be entered, and prompts requiring review of guidelines before a subsequent action can be taken in the record.
Proposed Weighting:	Medium
Rationale:	Lyme disease has a high burden of disease, with approximately 476,000 cases diagnosed and treated annually. Additionally, the places where Lyme disease is common is expanding.[32] We believe that including this improvement activity in the inventory would increase knowledge about Lyme disease. The CDC has developed a training course to support clinicians in identifying and treating Lyme disease, and this course would provide foundational knowledge to incorporate Lyme disease diagnosis and treatment into the workflow using CDS.[33] It has the potential to improve clinical practice and care delivery and is likely to result in improved outcomes; additional education to improve Lyme disease testing, ordering, and reporting systems are likely to improve patient care, reduce errors, and result in better Lyme disease-related outcomes. [34, 35, 36] We propose weighting this activity medium because this activity may be accomplished by conducting a training and incorporating new procedures into a clinician's practice. The estimated level of effort for clinicians is comparable to other medium-weighted activities in the inventory, and less than that of high-weighted activities. See the definition of medium weighting in the CY 2019 PFS final rule (83 FR 59780 through 59781).

Table B: Proposed Changes to Previously Adopted Improvement Activities for the 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

Current Improvement Activity	
Current Activity ID:	**IA_AHE_1**
Current Subcategory:	Achieving Health Equity
Current Activity Title:	Engagement of new Medicaid patients and follow-up
Current Activity Description:	Seeing new and follow-up Medicaid patients in a timely manner, including individuals dually eligible for Medicaid and Medicare. A timely manner is defined as within 10 business days for this activity.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). The proposed modified activity would continue to address the important objective of providing timely care to Medicaid patients, but also expand the target population to include all patients who are underserved and may face barriers to timely access to appropriate care. We also propose modifying the description so that, instead of stating patients should receive follow-up in a "timely manner," defined as within 10 business days, clinicians would use their own time-to-treat data (i.e., data measuring the time between clinician identifying a need for an appointment and the patient having a scheduled appointment) to ensure that patients receive follow-up within standard guidelines and create, implement and monitor an approach for improvement in engagement in care. We want to broaden the description, because the amount of time that is clinically relevant for a follow up visit varies widely,[1] and therefore, setting a specific definition of "timely manner" may not be clinically appropriate for all patients. The proposed modification acknowledges this variation and encourages clinicians to use their own time-to-treat data and standard practice guidelines to enhance engagement. The proposed modified activity describes that this approach to improving engagement in care may include screening for treatment barriers, especially transportation barriers, and providing resources to patients who need assistance, including access to federally-mandated Medicaid transportation benefits. Lack of suitable transportation can pose a barrier to accessing needed care for many underserved patients—particularly for those who are elderly, disabled, or low-income.[2] As finalized in federal regulation (42 CFR 431.53 and 440.170), Medicaid beneficiaries are eligible for the non-emergency medical transportation benefit, which assures transportation to and from non-emergency medical care for those without other options.[3] This activity is intended to encourage clinicians to direct Medicaid beneficiaries and other underserved patients to access resources to reduce barriers to their timely access of needed care and ultimately help them achieve better health outcomes. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it creates more flexibility around the timeline for follow-up by using time-to-treat data, specifies that these data guide an approach for patient engagement, and addresses a broader range of underserved populations.
Proposed Revised Activity Title	Enhance Engagement of Medicaid and Other Underserved Populations
Proposed Revised Activity Description:	To improve responsiveness of care for Medicaid and other underserved patients: use time-to-treat data (i.e., data measuring the time between clinician identifying a need for an appointment and the patient having a scheduled appointment) to identify patterns by which care or engagement with Medicaid patients or other groups of underserved patients has not achieved standard practice guidelines; and with this information, create, implement, and monitor an approach for improvement. This approach may include screening for patient barriers to treatment, especially transportation barriers, and providing resources to improve engagement (e.g., state Medicaid non-emergency medical transportation benefit).
Current Improvement Activity	
Current Activity ID:	**IA_AHE_5**

Current Subcategory:	Achieving Health Equity
Current Activity Title:	MIPS Eligible Clinician Leadership in Clinical Trials or Community-Based Participatory Research (CBPR)
Current Activity Description:	MIPS eligible clinician leadership in clinical trials, research alliances or community-based participatory research (CBPR) that identify tools, research or processes that can focuses on minimizing disparities in healthcare access, care quality, affordability, or outcomes.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2018 Quality Payment Program final rule (82 FR 54175). This proposed modification would add as an explicit option that the research could focus on addressing health-related social needs as drivers of health. Risks for health-related social needs are more acute and widespread in underserved communities.[4] These risks are linked to worse health outcomes and addressing them can reduce costs.[5] The modification would also change verbiage in ways that clarify the activity, but do not affect the intent of the activity. The health-related social needs included in the proposed modification are aligned with our Accountable Health Communities (AHC) Model (https://innovation.cms.gov/innovation-models/ahcm), which looks at the impact of identifying and addressing patients' health-related social needs on their health outcomes. AHC has prioritized five areas of health-related social needs, namely: food insecurity, housing insecurity, transportation, utilities, and interpersonal safety.[6] These areas were selected as priority, because there is high-quality evidence linking it with poor health or increased health care utilization and cost, there are community providers who can help meet the need, and health care providers are not yet comprehensively screening for or addressing these needs.[7] We propose to modify this improvement activity to identify the same five health-related social needs prioritized in the AHC Model as potential areas of research. Criteria for selecting new improvement activities, which we are proposing to update in section IV.A.3.d.(3)(c)(i), align with those used for prioritizing health-related social needs. With this modification, this improvement activity would become more explicitly a part of our plan to help clinicians provide patient-centered care to patients who have complex and multi-faceted needs. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it explicitly includes research into health-related social needs, which are central to understanding and addressing disparities in achieving positive health outcomes . We believe that we will achieve the objectives of the Quality Payment Program—specifically, to improve beneficiary population health, to improve the care received by Medicare beneficiaries, and to lower costs to the Medicare program—by helping address health-related social needs.
Proposed Revised Activity Description:	Lead clinical trials, research alliances, or community-based participatory research (CBPR) that identify tools, research, or processes that focus on minimizing disparities in healthcare access, care quality, affordability, or outcomes. Research could include addressing health-related social needs like food insecurity, housing insecurity, transportation barriers, utility needs, and interpersonal safety.
Current Improvement Activity	
Current Activity ID:	**IA_BE_1**
Current Subcategory:	Beneficiary Engagement
Current Activity Title:	Use of certified EHR to capture patient reported outcomes
Current Activity Description:	In support of improving patient access, performing additional activities that enable capture of patient reported outcomes (e.g., home blood pressure, blood glucose logs, food diaries, at-risk health factors such as tobacco or alcohol use, etc.) or patient activation measures through use of certified EHR technology, containing this data in a separate queue for clinician recognition and review.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to modify the activity by replacing examples of patient reported outcomes with current industry standards -- functional status, symptoms and symptom burden, health behaviors, and patient experience.

	We also propose to include a definition for patient activation[8] -- measures of patient involvement in their care -- to improve clarity of the activity. Finally, we also propose to simplify the wording in ways that clarify the activity but do not affect the purpose. These proposed modifications would improve the accuracy, applicability, and clarity of the activity. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it promotes clarity by providing more accurate and current industry standard patient reported outcomes.
Proposed Revised Activity Description:	To improve patient access, perform activities beyond routine care that enable capture of patient reported outcomes (e.g., related to functional status, symptoms and symptom burden, health behaviors, or patient experience) or patient activation measures (i.e., measures of patient involvement in their care) through use of certified electronic health record technology, and record these outcomes data for clinician review.
Current Improvement Activity	
Current Activity ID:	**IA_BE_6**
Current Subcategory:	Beneficiary Engagement
Current Activity Title:	Collection of and follow-up on patient experience and satisfaction data on beneficiary engagement
Current Activity Description:	Collection of and follow-up on patient experience and satisfaction data on beneficiary engagement, including development of improvement plan.
Current Weighting:	High
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We are proposing to combine multiple activities into this IA-BE-6 improvement activity to remove overlapping content and improve the applicability and ease of use. In addition to this activity, the previously adopted BE_13 (81 FR 77825) and PSPA_11 (81 FR 77825) improvement activities also require the collection of patient experience and satisfaction data with the objective of increasing patient-centeredness of care. The previously adopted activity descriptions are as follows: • IA_BE_13: Regularly assess the patient experience of care through surveys, advisory councils and/or other mechanisms. • IA_PSPA_11: Participation in the Consumer Assessment of Healthcare Providers and Systems Survey (CAHPS) or other supplemental questionnaire items (e.g., Cultural Competence or Health Information Technology supplemental item sets) We propose to modify IA_BE_6 to include additional detail covering the unique content of IA_BE_13 and IA_PSPA_11. Specifically, we propose to add surveys such as CAHPS, advisory councils, and other mechanisms in the modified version of BE_6 as options for tools used for collecting the patient experience data. We also propose to update the title of the improvement activity to better reflect the full scope of the revised activity description. We also propose to add language that would encourage clinicians to consider the linguistic needs of their population, so that the satisfaction survey results can include the perspectives of patient groups who may not feel comfortable taking a survey in English.
Proposed Revised Title:	Regularly Assess Patient Experience of Care and Follow Up on Findings
Proposed Revised Activity Description:	Collect and follow up on patient experience and satisfaction data. This activity also requires follow-up on findings of assessments, including the development and implementation of improvement plans. To fulfill the requirements of this activity, eligible clinicians can use surveys (e.g., Consumer Assessment of Healthcare Providers and Systems Survey), advisory councils, or other mechanisms. Clinicians may consider implementing patient surveys in multiple languages, based on the needs of their patient population.

Current Improvement Activity	
Current Activity ID:	**IA_BE_16**
Current Subcategory:	Beneficiary Engagement
Current Activity Title:	Evidenced-based techniques to promote self-management into usual care
Current Activity Description:	Incorporate evidence-based techniques to promote self-management into usual care, using techniques such as goal setting with structured follow-up, Teach Back, action planning or motivational interviewing.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to combine this IA_BE_16 with the previously adopted IA_BE_17, IA_BE_18, IA_BE_20, and IA_BE_21 because of overlapping and duplicative content and to improve the applicability and ease of use of the inventory. The above previously adopted improvement activities included effective interventions for helping patients better engage in self-management. The previously adopted activity descriptions are as follows: • IA_BE_17: Use tools to assist patients in assessing their need for support for self-management (e.g., the Patient Activation Measure or "How's My Health"). (81 FR 77825) • IA_BE_18: Provide peer-led support for self-management. (81 FR 77825) • IA_BE_20: Provide condition-specific chronic disease self-management support programs or coaching or link patients to those programs in the community. (81 FR 77825) • IA_BE_21: Provide self-management materials at an appropriate literacy level and in an appropriate language. (81 FR 77825) We are proposing to change IA_BE_16 to include additional detail covering the unique content of IA_BE_17, IA_BE_18, IA_BE_20, and IA_BE_21. Specifically, we are proposing to add tools for self-management, peer-led support, provision of self-management materials, and retain the examples of evidence-based approaches patients better engage in self-management included in the original IA_BE_16: goal setting with structured follow-up,[9] Teach-back methods,[10] action planning,[11] assessment of need for self-management (e.g., the Patient Activation Measure[12]), and motivational interviewing[13] as options for tools and resources to provide patients as part of fulfilling the requirements for the activity. These tools and techniques could be particularly helpful for people with substance use disorders and individuals managing chronic physical conditions such as diabetes and heart disease[14]. We also propose to add that evidence-based techniques for promoting self-management should be culturally and linguistically tailored.
Proposed Revised Activity Title:	Promote Self-management in Usual Care
Proposed Revised Activity Description:	To help patients self-manage their care, incorporate culturally and linguistically tailored evidence-based techniques for promoting self-management into usual care, and provide patients with tools and resources for self-management. Examples of evidence-based techniques to use in usual care include: goal setting with structured follow-up, Teach-back methods, action planning, assessment of need for self-management (e.g., the Patient Activation Measure), and motivational interviewing. Examples of tools and resources to provide patients directly or through community organizations include: peer-led support for self-management, condition-specific chronic disease or substance use disorder self-management programs, and self-management materials.
Current Improvement Activity	
Current Activity ID:	**IA_BE_25**
Current Subcategory:	Beneficiary Engagement
Current Activity Title:	Drug Cost Transparency
Current Activity Description:	To receive credit for this improvement activity, MIPS eligible clinicians must attest that their practice provides counseling to patients and/or their caregivers about the costs of drugs and the patients' out-of-pocket costs for the drugs. If appropriate, the clinician must also explore with their patients the availability of alternative drugs and patients' eligibility for patient assistance programs that provide free medications to people who cannot afford to buy their medicine. One source of information for pricing of

	pharmaceuticals could be a real-time benefit tool (RTBT), which provides to the prescriber, real-time patient-specific formulary and benefit information for drugs, including cost-sharing for a beneficiary. (CMS finalized in the Modernizing Part D and Medicare Advantage to Lower Drug Prices and Reduce Out of Pocket Expenses final rule (84 FR 23832, 23883) that beginning January 1, 2021 Medicare Part D plans will be required to implement one or more RTBT(s).)
Current Weighting:	High
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2020 PFS final rule (84 FR 63539). In the CY 2020 PFS final rule (84 FR 63515), we adopted IA_BE_25, titled "Drug Cost Transparency to include requirements for use of real-time benefit tools" beginning with the 2020 performance year and for subsequent years. It allows a real-time benefit tool (RTBT) to be one source of information for pricing of pharmaceuticals, which provides to the prescriber real-time patient-specific formulary and benefit information for drugs, including cost-sharing for a beneficiary. The 2021 Consolidated Appropriations Act (H.R. 116-133, Pub. L. 116-260) subtitle B included section 119 "Increasing the use of real-time benefit tools to lower beneficiary costs" subsection (c) "Inclusion of Use of Real-Time Electronic Information in Shared Decision-Making Under MIPS" amended Section 1848(q)(2)(B)(iii)(IV) of the Act by adding at the end the following new sentences: ``This subcategory shall include as an activity, for performance periods beginning on or after January 1, 2022, use of a real-time benefit tool as described in section 1860D-4(o). The Secretary may establish this activity as a standalone or as a component of another activity." In response to this amendment, in this proposed rule, we propose to modify this improvement activity such that beginning with the 2022 MIPS performance period/2024 MIPS payment year and for subsequent years the activity would require use of RTBT in order to receive credit for this activity. As previously finalized, use of RTBT is optional. We also propose to update the description in ways that clarify the activity, but do not affect the intent of the activity. We believe that requiring RTBT would make this activity more likely to reduce the costs of care. As explained in the CY 2019 Modernizing Part D final rule (84 FR 23832), RTBTs that are integrated with at least one prescriber's e-prescribing and electronic medical record systems can make beneficiary-specific drug coverage and cost information visible to prescribers. Using RTBT thus allows the prescriber and patient, when appropriate, to choose among clinically acceptable alternatives while weighing costs. By making RTBT a requirement, this modification would also require prescribers to look for alternative drugs, in contrast to the existing activity where such comparisons are optional. We believe that furthering prescription price transparency is critical to lowering overall drug costs and patients' out-of-pocket costs and improving medication adherence. Additionally, it can help advance efforts to improve patient safety, quality of care, and efficiencies and cost savings in the delivery of care.
Proposed Revised Activity Description:	Provide counseling to patients and/or their caregivers regarding: costs of medications using a real time benefit tool (RTBT) which provides to the prescriber real-time patient-specific formulary and benefit information for drugs, including cost-sharing for a beneficiary
Current Improvement Activity	
Current Activity ID:	**IA_CC_14**
Current Subcategory:	Care Coordination
Current Activity Title:	Practice improvements that engage community resources to support patient health goals
Current Activity Description:	Develop pathways to neighborhood/community-based resources to support patient health goals that could include one or more of the following: • Maintain formal (referral) links to community-based chronic disease self-management support programs, exercise programs and other wellness resources with the potential for bidirectional flow of information; and provide a guide to available community resources. • Including through the use of tools that facilitate electronic communication

	between settings; • Screen patients for health-harming legal needs; • Screen and assess patients for social needs using tools that are preferably health IT enabled and that include to any extent standards-based, coded question/field for the capture of data as is feasible and available as part of such tool; and/or • Provide a guide to available community resources.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). The previously adopted improvement activity includes screening as one option to assess patients specifically for social and legal needs. We propose to modify this improvement activity to instead require screening for a range of health-related social needs using evidence-based tools before and in addition to supporting connections to community resources. We believe that screening patients using evidence-based tools can help clinicians adopt a more systematic approach to addressing health related social needs among their patient population, including effective documentation and follow-up, and avoid missing patients who have such needs. Including screening in addition to supporting connections to community resources, represents a continuum of support that clinicians can provide to patients from within the health system. We also propose to remove the promotion of systems for communication that have the "potential for bi-directional flow of information" and the option for using "tools that facilitate electronic communication between settings." In many communities, the resources and programs that might best provide patients who have health-related social needs with support may not have the baseline technological capacity to engage with clinician groups in ways that eclipse basic forms of communication like phone and email. We also propose to add an option for using electronic health records to document screening results, trigger follow-up, and analyze data to better tailor approaches. For practices that already have processes for enabling connections to community resources established, this option would allow continued improvement and provision of more streamlined and systematized support to patients in need. The specific set of health-related social needs that clinicians might choose to prioritize remains part of the improvement activity, as does examples that were previously mentioned in the activity—for example, health-related legal needs. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it requires clinicians to both screen for and address health related social needs, which are major contributors to health care access and health outcomes. In light of the above list of proposed changes in this modification, we are also proposing to increase the weight for this activity from medium to high. Specifically, the modifications now require screening in addition to an activity that links patients to community resources. Previously, the activity required screening *or* linkages to community. Conducting screening then devoting clinical staff time to using that data to identify and disseminate appropriate community resource information to patients takes considerable time and resources. We are proposing to increase the weight for this activity from medium to high to reflect the additional effort required, per high-weight criteria finalized in the CY 2019 PFS final rule (83 FR 59780 through 59781).
Proposed Weighting:	High
Proposed Revised Activity Description:	Select and screen for the health-related social needs (HRSN) that are relevant for your patient population using tools that have been tested with underserved populations. If possible, use a screening tool that is health IT-enabled and includes standards-based, coded question/field for the capture of data. After screening, address HRSNs identified through at least one of the following: • Update a guide to available community resources and provide it to patients who are found to be at risk in one or more HRSN area;

	• Maintain formal (referral) links to key community resources and programs to strengthen the referral process, implementing closed-loop referrals where feasible; or • Record findings of screening and trigger follow-up within the electronic health record (EHR); then analyze EHR data on patients with one or more HRSN needed to identify and implement approaches to better serve their holistic needs through linkages with community resources. HRSNs prioritized by your practice might include health-harming legal needs, which require both health and legal support to resolve, areas such as food and housing insecurity, or needs such as exercise, nutrition, or chronic disease self-management.
Current Improvement Activity	
Current Activity ID:	**IA_CC_15**
Current Subcategory:	Care Coordination
Current Activity Title:	PSH Care Coordination
Current Activity Description:	Participation in a Perioperative Surgical Home (PSH) that provides a patient-centered, physician-led, interdisciplinary, and team-based system of coordinated patient care, which coordinates care from pre-procedure assessment through the acute care episode, recovery, and post-acute care. This activity allows for reporting of strategies and processes related to care coordination of patients receiving surgical or procedural care within a PSH. The clinician must perform one or more of the following care coordination activities: • Coordinate with care managers/navigators in preoperative clinic to plan and implementation comprehensive post discharge plan of care; • Deploy perioperative clinic and care processes to reduce post-operative visits to emergency rooms; • Implement evidence-informed practices and standardize care across the entire spectrum of surgical patients; or • Implement processes to ensure effective communications and education of patients' post-discharge instructions.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2018 Quality Payment Program final rule (82 FR 54175). We are proposing to increase the weight for this activity from medium to high, because it came to our attention that the level of effort to complete this activity was better aligned to our high-weight criteria, which specifies that high-weight activities reflect high intensity activities, requiring significant investment of time and resources. This activity requires team-based, interdisciplinary care coordinated across multiple care settings and requires efforts to both plan for and implement the selected care coordination actions. We note that the activity description would remain the same.
Proposed Weighting:	High
Current Improvement Activity	
Current Activity ID:	**IA_EPA_1**
Current Subcategory:	Expanded Practice Access
Current Activity Title:	Provide 24/7 Access to MIPS Eligible Clinicians or Groups Who Have Real-Time Access to Patient's Medical Record
Current Activity Description:	Provide 24/7 access to MIPS eligible clinicians, groups, or care teams for advice about urgent and emergent care (e.g., MIPS eligible clinician and care team access to medical record, cross-coverage with access to medical record, or protocol-driven nurse line with access to medical record) that could include one or more of the following: • Expanded hours in evenings and weekends with access to the patient medical record (e.g., coordinate with small practices to provide alternate hour office visits and urgent care); • Use of alternatives to increase access to care team by MIPS eligible clinicians and groups, such as e-visits, phone visits, group visits, home visits and alternate locations (e.g., senior centers and assisted living centers); and/or • Provision of same-day or next-day access to a consistent MIPS eligible clinician, group or care team when needed for urgent care or transition management.

Current Weighting:	High
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to remove references to a "consistent" MIPS eligible clinician, group or care team, because the requirement for a consistent clinician is unclear and unnecessary to achieve the activity's objectives. We also propose to limit the scope of the activity to "urgent care" only rather than both "urgent and emergent care," because emergent care would only require the activity's interventions when also urgent. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because the improved clarity will promote expanded access to MIPS eligible clinicians in urgent care settings. We believe that these modifications help clarify the nature and intent of this activity, and thus will help clinicians selecting it to improve access to care for their patients.
Proposed Revised Activity Description:	Provide 24/7 access to MIPS eligible clinicians, groups, or care teams for advice about urgent care (e.g., MIPS eligible clinician and care team access to medical record, cross-coverage with access to medical record, or protocol-driven nurse line with access to medical record) that could include one or more of the following: • Expanded hours in evenings and weekends with access to the patient medical record (e.g., coordinate with small practices to provide alternate hour office visits and urgent care); • Use of alternatives to increase access to care team by MIPS eligible clinicians and groups, such as e-visits, phone visits, group visits, home visits and alternate locations (e.g., senior centers and assisted living centers); and/or • Provision of same-day or next-day access to a MIPS eligible clinician, group or care team when needed for urgent care or transition management.
Current Improvement Activity	
Current Activity ID:	**IA_EPA_2**
Current Subcategory:	Expanded Practice Access
Current Activity Title:	Use of telehealth services that expand practice access
Current Activity Description:	Use of telehealth services and analysis of data for quality improvement, such as participation in remote specialty care consults or teleaudiology pilots that assess ability to still deliver quality care to patients.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 QPP final rule (81 FR 77825). We propose to shift the focus of the activity to developing standardized approaches for telehealth in their daily practice and away from the analysis of data to evaluate effectiveness. This proposed shift retains the objective of the original activity, namely, of improving health outcomes for patients utilizing telehealth services. We believe this proposed shift makes the activity more relevant, because while telehealth has become a routine part of health care during the COVID-19 pandemic and is perceived as effective by clinicians and patients, clinicians may not have implemented it in a standardized manner or as widely as possible due to the rapid adaptation needed during the pandemic.[15] We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it promotes creation and implementation of standardized telehealth services, which can improve access and quality of care by offering another mode by which patients can interact with their care team.
Proposed Revised Activity Description:	Create and implement a standardized process for providing telehealth services to expand access to care.
Current Improvement Activity	
Current Activity ID:	**IA_PM_6**
Current Subcategory:	Population Management
Current Activity Title:	Use of toolsets or other resources to close health care disparities across communities
Current Activity Description:	Take steps to improve healthcare disparities, such as Population Health Toolkit or other resources identified by CMS, the Learning and Action Network, Quality Innovation Network, or National Coordinating Center. Refer to the local Quality Improvement Organization (QIO) for additional steps to take for improving health status of communities as there are many steps to select from for satisfying this activity. QIOs

	work under the direction of CMS to assist eligible clinicians and groups with quality improvement, and review quality concerns for the protection of beneficiaries and the Medicare Trust Fund.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to add language that is more explicit about the improvement activity's focus on using population health data analysis to assess the prevalence of inequities in a practice and community. Specifically, we propose to modify the activity description to specify that population health data analysis tools should be used to identify health inequities; clinicians should then assess the options for effective interventions to address those inequities.[16] We also are proposing to add a requirement that clinicians create, refine, and implement an action plan to address inequities based on the data analysis conducted. We are also proposing to remove references to the Learning and Action Network, Quality Innovation Network, and National Coordinating Center as organizations that may identify tools or resources, because they may not be appropriate resources to support clinicians in assessing and addressing health disparities. Population health data analytic tools may be identified in a number of ways, and we seek to keep the activity broad in this manner. We also propose to replace the term "disparities" with "inequities" in both the title and description of the activity, which acknowledges structural problems like racism are inequities (i.e., state of being unfair) rather than using the term disparities, which is defined as being different or not at parity but does not clearly state the unjustness of the result. We are also proposing to modify the title to recognize that inequities in both health (i.e., status and outcomes) and health care (i.e., access, quality, and safety) may be addressed. With the proposed modifications, clinicians attesting to this improvement activity would need to first analyze inequities in their patient populations, and then use that data to identify and then address issues or gaps. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it is more focused on a data-driven approach to population health analysis and requires practices to use this data to inform a formal action planning process to address them.
Proposed Revised Activity Title:	Use of Toolsets or Other Resources to Close Health and Health Care Inequities Across Communities
Proposed Revised Activity Description:	Address inequities in health outcomes by using population health data analysis tools to identify health inequities in the community and practice, and assess options for effective and relevant interventions such as Population Health Toolkit or other resources identified by the clinician, practice, or by CMS. Based on this information, create, refine, and implement an action plan to address and close inequities in health outcomes and/or health care access, quality, and safety.
Current Improvement Activity	
Current Activity ID:	**IA_PM_11**
Current Subcategory:	Population Management
Current Activity Title:	Regular review practices in place on targeted patient population needs
Current Activity Description:	Implementation of regular reviews of targeted patient population needs, such as structured clinical case reviews, which includes access to reports that show unique characteristics of eligible clinician's patient population, identification of vulnerable patients, and how clinical treatment needs are being tailored, if necessary, to address unique needs and what resources in the community have been identified as additional resources.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to make explicit the acknowledgement that structural issues, like racism, are a root cause of many disparities in health outcomes across populations.

	Specifically, we propose to modify the improvement activity to encourage clinicians to explore structural issues like racism explicitly and openly during their reviews of targeted patient population needs. We propose to remove reference to "vulnerable patients" and replace it with "underserved patients" to better clarify that there is nothing inherently vulnerable about a person. Instead, their poorer health outcomes are due to systemic failures within and beyond the health system—failures which leave the health needs of underserved communities unmet. We believe these additions would allow clinicians to gain perspective and ideas beneficial to their patients by specifically identifying underserved patients, related structural inequities such as those due to racism, and tailor treatment needs and identify community resources to address those problems. We are also proposing to modify the description language in ways that clarify the activity, but do not change the intent. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it requires clinicians to implement regular reviews of patient population needs to identify and address the needs of underserved populations and connect those patients to resources in the community.
Proposed Revised Activity Description:	Implement regular reviews of targeted patient population needs, such as structured clinical case reviews, which include access to reports that show unique characteristics of eligible clinician's patient population, identification of underserved patients, and how clinical treatment needs are being tailored, if necessary, to address unique needs and what resources in the community have been identified as additional resources. The review should consider how structural inequities, such as racism, are influencing patterns of care and consider changes to acknowledge and address them. Reviews should stratify patient data by demographic characteristics and health related social needs to appropriately identify differences among unique populations and assess the drivers of gaps and disparities and identify interventions appropriate for the needs of the sub-populations.
Current Improvement Activity	
Current Activity ID:	**IA_PSPA_6**
Current Subcategory:	Patient Safety and Practice Assessment
Current Activity Title:	Consultation of the Prescription Drug Monitoring program
Current Activity Description:	Clinicians would attest to reviewing the patients' history of controlled substance prescription using state prescription drug monitoring program (PDMP) data prior to the issuance of a Controlled Substance Schedule II (CSII) opioid prescription lasting longer than 3 days. For the transition year, clinicians would attest to 60 percent review of applicable patient's history. For the Quality Payment Program Year 2 and future years, clinicians would attest to 75 percent review of applicable patient's history performance.
Current Weighting:	High
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to increase the percentage of applicable patients for whom clinicians must review prescription history within the PDMP from 75 percent to 100 percent and remove language referencing prior year requirements, which are now obsolete. States are increasingly mandating that providers review the PDMP for all applicable patients.[17] We also propose to include an exception for patients receiving palliative and hospice care, as they are exempt from CDC prescribing guidelines.[18] The CDC has identified increasing use of PDMP as the most promising state-level strategy for improving clinical care and outcomes for at-risk patients.[19] We support the continued efforts of clinicians to increase usage of PDMP in their practice. We also propose to modify the description language in ways that clarify the activity but do not affect its intent. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because it supports use of prescription drug monitoring programs to reduce overprescribing of controlled

	substance prescriptions lasting longer than three days,[20] which can lead to substance use disorder.
Proposed Revised Activity Description:	Review the history of controlled substance prescriptions for 100 percent* of patients using state prescription drug monitoring program (PDMP) data prior to the issuance of a Controlled Substance Schedule II (CSII) opioid prescription lasting longer than 3 days. *Apply exceptions for patients receiving palliative and hospice care.
Current Improvement Activity	
Current Activity ID:	**IA_PSPA_18**
Current Subcategory:	Patient Safety and Practice Assessment
Current Activity Title:	Measurement and improvement at the practice and panel level
Current Activity Description:	Measure and improve quality at the practice and panel level, such as the American Board of Orthopaedic Surgery (ABOS) Physician Scorecards, that could include one or more of the following: • Regularly review measures of quality, utilization, patient satisfaction and other measures that may be useful at the practice level and at the level of the care team or MIPS eligible clinician or group (panel); and/or • Use relevant data sources to create benchmarks and goals for performance at the practice level and panel level.
Current Weighting:	Medium
Proposed Change and Rationale:	This improvement activity was originally finalized in the CY 2017 Quality Payment Program final rule (81 FR 77825). We propose to modify this activity to include the opportunities for clinicians to fulfill this improvement activity by applying the quality, utilization, patient satisfaction, and other measures or quality improvement actions to address inequities in quality and outcomes for underserved populations, including racial, ethnic, and gender minorities. We also propose to improve the activity language in ways that clarify the activity, but do not affect its intent, including simplifying the first activity option by removing the language "that may be useful at the practice level and at the level of the care team or MIPS eligible clinician or group (panel)," since it is stated at the beginning of the description that these activities can take place at the practice and panel levels. We believe that participation in the modified version of this improvement activity would be more likely to result in improved outcomes, because clinicians who review these relevant data sources for particular underserved populations and create benchmarks and goals for improvement are likely to provide better quality and more equitable care.
Proposed Revised Activity Description:	Measure and improve quality at the practice and panel level, such as the American Board of Orthopaedic Surgery (ABOS) Physician Scorecards that could include one or more of the following: • Regularly review measures of quality, utilization, patient satisfaction and other measures; and/or • Use relevant data sources to create benchmarks and goals for performance at the practice or panel levels. Clinicians can apply the measurement and quality improvement to address inequities in quality and outcomes for underserved populations, including racial, ethnic, and/or gender minorities.
Current Improvement Activity	
Current Activity ID:	**IA_ERP_3**
Current Subcategory:	Emergency Response and Preparedness
Current Activity Title:	COVID-19 Clinical Data Reporting with or without Clinical Trial
Current Activity Description:	To receive credit for this improvement activity, a MIPS eligible clinician or group must: (1) participate in a COVID-19 clinical trial utilizing a drug or biological product to treat a patient with a COVID-19 infection and report their findings through a clinical data repository or clinical data registry for the duration of their study; or (2) participate in the care of patients diagnosed with COVID-19 and simultaneously submit relevant clinical data to a clinical data registry for ongoing or future COVID-19 research. Data should be submitted to the extent permitted by applicable privacy and security laws. Examples of COVID-19 clinical trials may be found on the U.S. National Library of

	Medicine website at https://clinicaltrials.gov/ct2/results?cond=COVID-19. In addition, examples of COVID-19 clinical data registries may be found on the National Institute of Health website at https://search.nih.gov/search?utf8=%E2%9C%93&affiliate=nih&query=COVID19+registries&commit=Search. For purposes of this improvement activity, clinical data registries must meet the following requirements: (1) the receiving entity must declare that they are ready to accept data as a clinical registry; and (2) be using the data to improve population health outcomes. Most public health agencies and clinical data registries declare readiness to accept data from clinicians via a public online posting. Clinical data registries should make publicly available specific information on what data the registry gathers, technical requirements or specifications for how the registry can receive the data, and how the registry may use, re-use, or disclose individually identifiable data it receives. For purposes of credit toward this improvement activity, any data should be sent to the clinical data registry in a structured format, which the registry is capable of receiving. A MIPS eligible clinician may submit the data using any standard or format that is supported by the clinician's health IT systems, including but not limited to, certified functions within those systems. Such methods may include, but are not limited to, a secure upload function on a web portal, or submission via an intermediary, such as a health information exchange. To ensure interoperability and versatility of the data submitted, any electronic data should be submitted to the clinical data registry using appropriate vocabulary standards for the specific data elements, such as those identified in the United States Core Data for Interoperability (USCDI) standard adopted in 45 CFR 170.213.
Weighting:	High
Proposed Action and Rationale:	We previously adopted this improvement activity to the inventory for the 2020 and 2021 MIPS performance periods only in response to the PHE for COVID-19 and planned to reassess its need for the 2022 MIPS performance period/2024 MIPS payment year and future years. We are now proposing to continue this improvement activity for the 2022 MIPS performance period/2024 MIPS payment year and future years. Despite increasing dissemination of COVID-19 vaccines, we anticipate that COVID-19 infections may continue to be prevalent in communities with low vaccine adoption and/or among groups (i.e., children) who do not yet have access to vaccines. Additionally, new variants of COVID may introduce additional challenges to the eradication and treatment of the illness. Due to these concerns, clinicians may likely continue to encounter COVID-19 patients, and therefore we anticipate the need for COVID-19 clinical trials and data collection/sharing through registries to continue through CY 2022 and future years. Each year we will reassess whether there remains a need for additional data sharing or if preventive measures and clinical treatments have advanced to the point where these type of data are not needed. We want eligible clinicians to be able to attest to this improvement activity if it is still pertinent. If this improvement activity becomes no longer needed, we will remove the activity through rulemaking. While COVID-19 continues to be a PHE and a great concern for clinicians, patients, and communities, we believe that continued participation in this improvement activity is likely to result in improved outcomes by improving the collection of data clinicians use for the care of their patients as they monitor and manage COVID-19. We note that the activity description would remain the same.

TABLE C: Improvement Activities Proposed for Removal for the 2022 MIPS Performance Period/2024 MIPS Payment Year and Future Years

In this rule, we are proposing to remove six previously finalized improvement activity from the MIPS Program for the 2022 MIPS performance period/2024 MIPS payment year and future years. These improvement activities are discussed in detail below. Improvement activity removal factors are discussed in the MIPS CY 2020 final rule (84 FR 62568 through 63563).

Current Improvement Activity	
Current Activity ID:	**IA_ BE_13**
Current Subcategory:	Beneficiary Engagement
Current Activity Title:	Regularly assess the patient experience of care through surveys, advisory councils and/or other mechanisms
Current Activity Description:	Regularly assess the patient experience of care through surveys, advisory councils and/or other mechanisms.
Current Weighting:	Medium
Removal Rationale:	We are proposing to remove this activity under removal factor 1, improvement activity is "duplicative" and removal factor 2, there is an alternative activity with a stronger relationship to quality care or improvements in clinical practice. We believe IA_BE_13 is duplicative, because it is similar to, but only represents a partial component of proposed modified IA_BE_6. In this proposed rule, we are proposing to consolidate the unique language from IA_BE_13 into IA_BE_6 per the proposed changes in Table B. The proposed revised IA_PM_6 adds additional detail from IA_BE_13 (e.g., use of advisory councils). IA_BE_6 has a stronger relationship to improvement in clinical practice because it also requires the development of an improvement plan based on the results of the patient experience data gathered and assessed. We note that this proposed removal is made in conjunction with our proposal to change IA_BE_6 in Table B, as well as our proposal to remove IA_PSPA_11 in Table C.
Current Improvement Activity	
Current Activity ID:	**IA_PSPA_11**
Current Subcategory:	Patient Safety and Practice Assessment
Current Activity Title:	Participation in CAHPS or other supplemental questionnaire
Current Activity Description:	Participation in the Consumer Assessment of Healthcare Providers and Systems Survey or other supplemental questionnaire items (e.g., Cultural Competence or Health Information Technology supplemental item sets).
Current Weighting:	High
Removal Rationale:	We are proposing to remove this activity under removal factor 1, improvement activity is "duplicative." We believe IA_PSPA_11 is duplicative, because it is similar to, but only represents a partial component of proposed modified IA_BE_6. In this proposed rule, we are proposing to consolidate the unique language from IA_PSPA_11 into IA_BE_6 per the proposed change in Table B. The proposed revised IA_BE_6 adds additional detail from IA_PSPA_11 (e.g., CAHPS). We note that this proposed removal is made in conjunction with our proposal to change IA_BE_6 in Table B, as well as our proposal to remove IA_BE_13 in Table C.

Appendix 3: Mvp Inventory

MVP Development Background

In the CY 2021 PFS final rule (85 FR 84849 through 84854), we finalized a set of criteria to be used in the development of MVPs. In addition, in section IV.A.3.b of this proposed rule, we discuss additional proposed MVP policies, including MVP reporting requirements and selection of measures and activities within an MVP.

This appendix includes seven proposed MVPs for implementation beginning with the CY 2023 MIPS performance period/2025 MIPS payment year.[268] Each proposed MVP includes measures and activities from the quality performance category, improvement activities performance category, and the cost performance category that are relevant to the clinical theme of the MVP. In addition, as described in the CY 2021 PFS final rule (85 FR 84841) and section IV.A.3.b.(4)(b)(i)(C) of this proposed rule, all proposed MVPs include a foundational layer, which is comprised of population health measures and Promoting Interoperability performance category measures. We refer readers to section IV.A.3.b.(4)(b)(i) of this proposed ruled for key considerations and overall development approach for proposing the MVPs included in this appendix. For additional details regarding the proposed annual maintenance process for MVPs, we refer readers to section IV.A.3.b.(4)(b)(ii) of this proposed rule.

MVP Development Performance Category Sources

The MVP tables proposed below contain a set of MIPS quality measures, QCDR measures, improvement activities, cost measures, and foundational measures based on clinical topics. For further reference, the sources of the measures and activities in the MVP tables are as follows:

- Existing MIPS quality measures considered in developing the MVPs are located in Appendix 1: MIPS Quality Measures of this proposed rule.
- Existing QCDR measures considered in developing the MVPs were based on the most recent publication of the 2021 QCDR Measure Specification file. The QCDR measures are listed in the 2021 QCDR Measure Specification file located in the QPP Resource Library.[269] An updated list of 2022 QCDR measures will be available in December 2021.
- Improvement activities considered in developing the MVPs are located in the 2021 Improvement Activities Inventory and the 2021 MIPS Data Validation Criteria located in the QPP Resource Library.[270]
- Existing cost measures considered in developing the MVPs are located in the CY 2020 PFS final rule (84 FR 62979).
- For further details on the proposed new episode-based cost measures, refer to section IV.A.3.d.(2)(b) of this proposed rule.
- For further details on the population health measures included in the foundational layer, refer to section IV.A.3.b.(4)(b)(i)(C)(aa)of this proposed rule.
- Existing Promoting Interoperability measures adopted in prior rulemaking and included in the foundational layer are located in the QPP Resource Library.[271] In addition, see section IV.A.3.d.(4)(c) for any proposed modifications to the existing Promoting Interoperability measures.

Please note that new quality and Promoting Interoperability measures proposed for inclusion in MIPS beginning with the CY 2022 MIPS performance period/2024 MIPS payment year are identified with a caret symbol (^) within the MVP tables in this appendix. In addition, existing quality measures and improvement activities with proposed revisions are identified with an asterisk (*) before the quality measure or improvement activity ID # within the MVP tables in this appendix. See Appendix 1: MIPS Quality Measures and Appendix 2: Improvement Activities for further details regarding the proposed substantive changes and revisions in this proposed rule.

Quality measures that are considered high priority are noted with an exclamation point (!) and outcome measures are noted with a double exclamation point (!!). Quality measure collection types are identified in parentheses after each quality measure title within each MVP table.

QCDR measures proposed in the MVP tables below are noted with a pound sign (#) to indicate that testing data is pending on or before September 1, 2021. In order to determine whether a QCDR measure may be finalized within an MVP, we will need to receive QCDR measure testing data for review by the end of the self-nomination period (i.e., no later than September 1 of the year prior to the applicable performance period). We strongly encourage that QCDRs share testing data for their fully tested QCDR measures at the time of MVP candidate submission, which may be prior to the September 1st deadline. If a QCDR is unable to submit testing data to demonstrate that their QCDR measure is fully tested by the end of the self-nomination period (September 1st), or otherwise does not meet our requirements, we will not finalize the inclusion of the QCDR measure within an MVP. We refer

readers to section IV.A.3.b.(4)(b)(i) of this proposed rule for additional details regarding QCDR measures and selection of measures within an MVP.

In addition, consistent with Executive Order 13985, "Advancing Racial Equity and Support for Underserved Communities Through the Federal Government," each MVP includes improvement activities designed to advance health equity and address and eliminate barriers to care in underserved communities.[272] Improvement activities that include a health equity component are noted with a tilde (~) before the improvement activity ID # within the MVP table. Improvement activity medium/high weight designations are identified in parentheses after each improvement activity. IA_PCMH is noted with a percent (%) before the improvement activity ID # within the MVP tables below to indicate that attestation to this improvement activity would provide full credit for the improvement activities performance category within the MVP.

[272] https://www.whitehouse.gov/briefing-room/presidential-actions/2021/01/20/executive-order-advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government/.

Table A: Proposed Advancing Rheumatology Patient Care MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Rheumatic diseases are comprised of complex chronic autoimmune and inflammatory conditions that affect joints, bones, muscles, and organs, which may eventually lead to poor outcomes and disability in patients if not well-controlled. Timely and appropriate care is critically important to the long-term health of patients. The proposed Advancing Rheumatology Patient Care MVP focuses on the clinical theme of providing fundamental treatment and management of rheumatological conditions and is most applicable to clinicians who specialize in treating patients with rheumatologic conditions.

Quality Measures

Within the quality component of this MVP, we propose to include six MIPS quality measures and three QCDR measures, which promote the assessment and control of rheumatic diseases to reduce the risk of disability and disease-related complications. We reviewed the MIPS quality measure inventory and believe the following quality measures proposed within this MVP provide a meaningful and comprehensive assessment of the clinical care for clinicians who specialize in treating patients with rheumatologic conditions:

- Q176: Tuberculosis Screening Prior to First Course Biologic Therapy: This MIPS quality measure addresses the aspect of screening for tuberculosis (TB) prior to prescribing a biologic disease-modifying anti-rheumatic (DMARD) therapy. This is especially important as patients administered DMARD therapy are at higher risk for TB infection.
- Q177: Rheumatoid Arthritis (RA): Periodic Assessment of Disease Activity: This MIPS quality measure is important for monitoring RA disease activity to facilitate timely and appropriate, optimal treatment for patients.
- Q178: Rheumatoid Arthritis (RA): Functional Status Assessment: This MIPS quality measure examines for evidence of symptoms that may limit or disrupt the patient's quality of life.
- Q180: Rheumatoid Arthritis (RA): Glucocorticoid Management: This MIPS quality measure addresses the need to closely monitor patients who receive glucocorticoid as a part of their rheumatologic care, in order to avoid potential complications. Glucocorticoid therapy is highly effective treatment for relieving symptoms in patients with RA.
- ACR12: Disease Activity Measurements for Patients with PsA: This QCDR measure promotes regular assessment of functional limitations and disease activity for treatment planning and clinical decision making for patients with psoriatic arthritis (PsA).
- ACR14: Gout Serum Urate Target: This QCDR measure is an outcome that assesses the control of gout by assessing control of serum urate levels. This relevant measure helps clinicians evolve to patient-centered, evidence-driven best practices.
- ACR15: Safe Hydroxychloroquine Dosing: This QCDR measure addresses the need to closely monitor patients who receive dosing of hydroxychloroquine as a part of their rheumatologic care, in order to avoid potential complications.

In conjunction with the aforementioned rheumatologic specific measures, we propose to include the following broadly applicable MIPS quality measures that are relevant to rheumatic disease care:

- Q111: Pneumococcal Vaccination Status for Older Adults: This MIPS quality measure has been included to ensure that pneumococcal vaccinations are comprehensively assessed and used. Vaccinations play an important role in the management of patients with rheumatological conditions who are at an increased risk for infections because of their underlying condition, comorbidities, and use of immunosuppressive therapies.
- Q130: Documentation of Current Medications in the Medical Record: This MIPS quality measure promotes care coordination to collect complete and reliable medication records.

Only one MIPS vaccination quality measure was included within this MVP. We selected Q111: Pneumococcal Vaccination Status for Older Adults rather than Q110: Preventive Care and Screening: Influenza Immunization because it is more relevant to the Rheumatology MVP. Q111 focuses on the prevention of pneumonia, which is a common cause of illness and death for patients with underlying conditions and those being treated with immunosuppressive therapies.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include 11 improvement activities that reflect actions and processes undertaken by clinicians who provide rheumatic care to patients. These improvement activities provide an opportunity for meaningful improvement and patient engagement for clinicians who specialize in treating patients with rheumatologic conditions. Therefore, the following improvement activities are proposed for inclusion in this MVP:

- IA_AHE_3: Promote use of Patient-Reported Outcome Tools: Utilization of patient-reported outcome tools often helps clinicians make decisions about the best course of care and which patients may benefit from a particular intervention.
- IA_BE_15: Engagement of patients, family and caregivers in developing a plan of care: Patient engagement while developing a plan of care is a key element of general adherence to the overall care plan established by the clinician for the rheumatologic patient population.
- IA_PM_16: Implementation of medication management practice improvements: Reliable medication records are essential for the care of rheumatology patients, as medication-based therapies may consist of various classes of agents (for example, nonsteroidal anti-inflammatory drugs [NSAIDS], corticosteroids) to slow the progression of rheumatologic disease.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional

opportunities for clinicians, in collaboration with patients, to drive outcomes and improve quality of care for rheumatology patients:

- IA_BE_1: Use of certified EHR to capture patient reported outcomes
- IA_BE_4: Engagement of patients through implementation of improvements in patient portal
- IA_BMH_2: Tobacco use
- IA_BMH_4: Depression screening
- IA_EPA_1: Provide 24/7 Access to MIPS Eligible Clinicians or Groups Who Have Real-Time Access to Patient's Medical Record
- IA_EPA_2: Use of telehealth services that expand practice access
- IA_PSPA_6: Consultation of the Prescription Drug Monitoring Program
- IA_PSPA_28: Completion of an Accredited Safety or Quality Improvement Program

Cost Measures

Within the cost component of this MVP, we propose the Total Per Capita Cost (TPCC) measure because it captures the overall costs of care after establishing a primary care relationship, including the care provided by rheumatologists. The TPCC measure focuses on the ongoing management of rheumatology conditions and aligns with the intent of this MVP. We considered including the Medicare Spending Per Beneficiary (MSPB) Clinician measure, but ultimately did not include it because it only focuses on inpatient care. Currently, there are no applicable episode-based measures available, but one could be considered for development in the future. Refer to section IV.A.3.d.(2) of this proposed rule for details on the current cost measure development process and potential cost measure development process that could lead to an episode-based measure related to this MVP.

TABLE A: Proposed Advancing Rheumatology Patient Care MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Advancing Rheumatology Patient Care MVP. We request comment on the measures and activities included in this MVP.

Quality	Improvement Activities	Cost

Table B: Proposed Coordinating Stroke Care to Promote Prevention and Cultivate Positive Outcomes MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Cerebral infarction, or stroke, is the 9th most expensive condition treated in United States hospitals.[273] According to the Centers for Disease Control and Prevention (CDC), "more than 868,000 Americans die of heart disease or stroke every year—one-third of all deaths."[274] The proposed Coordinating Stroke Care to Promote Prevention and Cultivate Positive Outcomes MVP focuses on the clinical theme of providing fundamental prevention and treatment of those patients at risk for or that have had a stroke. This proposed MVP would be most applicable to clinicians who treat clinically varied patient types within the practice of neurology and vascular surgery.

Quality Measures

Within the quality component of this MVP, we propose to include nine MIPS quality measures, which focus on both stroke prevention and driving positive outcomes for the stroke patient population. We reviewed the MIPS quality measure inventory and believe the quality measures proposed within this MVP below provide a meaningful and comprehensive stroke prevention and intervention set.

This MVP includes the following measures that support the goal of reducing the risk of stroke:

- Q236: Controlling High Blood Pressure: This MIPS quality measure requires controlled blood pressure for patients diagnosed with hypertension which leads to better health outcomes including reducing the risk of stroke.
- Q326: Atrial Fibrillation and Atrial Flutter: Chronic Anticoagulation Therapy AND Q438: Statin Therapy for the Prevention and Treatment of Cardiovascular Disease: These MIPS quality measures were included to ensure patients at an increased risk of stroke receive the appropriate preventive medication regimen. The use of statin therapy reduces the risk of atherosclerotic cardiovascular disease (ASCVD). The use of an anticoagulant will reduce risk of thromboembolism occurring with atrial fibrillation which is associated with a greater risk of recurrent stroke, more severe disability, and mortality.
- Q344: Rate of Carotid Artery Stenting (CAS) for Asymptomatic Patients, Without Major Complications (Discharged to Home by Post-Operative Day #2): This MIPS quality outcome measure promotes appropriate selection of patients for this procedure by assessing percentage of patients discharged to home no later than post-operative day two. Patients at low risk for morbidity, with a surgeon who performs the procedure with a very low complication rate, achieve the benefit of reduction of long-term risk of stroke.
- Q441: Ischemic Vascular Disease (IVD) All or None Outcome Measure (Optimal Control): This MIPS quality measure supports the mitigation of stroke risk for patients with established ischemic vascular disease with quality actions that promote blood pressure control, tobacco free status, patient use of daily aspirin, and use of statin which captures the clinical concepts represented in the Million Hearts® Initiative.

For those patients who do suffer a stroke, this MVP drives timely treatment to drive quality and cultivate positive outcomes with the inclusion of the following measures:

- Q187: Stroke and Stroke Rehabilitation: Thrombolytic Therapy: This MIPS quality measure drives careful screening and timely treatment to promote better outcomes for patients with a stroke diagnosis.
- Q409: Clinical Outcome Post Endovascular Stroke Treatment: This MIPS quality measure utilizes the modified Rankin scale (mRs) to assess degree of disability or dependence in the daily activities of patients suffering a stroke. An mRs of 2 or less after endovascular therapy is considered an excellent outcome following a stroke.
- Q413: Door to Puncture Time for Endovascular Stroke Treatment: This MIPS quality measure drives efficiency so that stroke patients are given the best chance of functional recovery by ensuring door to puncture time is less than 90 minutes.

We understand that the two time-dependent measures (Q187 and Q413) may place small and rural practices at a disadvantage as they may not have the resources to implement rapid stroke response systems; however, MVPs allow for some clinician choice with regards to quality measure submission, which would allow those small and rural practices to select other quality measures to meet the quality reporting requirements described in section IV.A.3.b.(4)(d) of this proposed rule.

In conjunction with the aforementioned stroke and stroke prevention quality measures, we propose to include the following broadly applicable quality measure that is relevant to stroke care:

- Q047: Advance Care Plan: The inclusion of this MIPS quality measure captures the clinical interaction of documenting a patient's voice for possible, future life-sustaining medical intervention. This engagement between the clinician (or clinician staff) and the patient allows the patient to be autonomous and communicate their ideal of clinical care that ensures coordinated care is implemented as documented in the patient's medical record.

We considered including Q260: Rate of Carotid Endarterectomy (CEA) for Asymptomatic Patients, without Major Complications (Discharged to Home by Post-Operative Day #2) within the MVP. However, we determined that Q344: Rate of Carotid Artery Stenting (CAS) for Asymptomatic Patients, Without Major Complications (Discharged to Home by Post-Operative Day #2) was more appropriate because CAS may be utilized more often in the asymptomatic patient population.

[273] https://www.hcup-us.ahrq.gov/reports/statbriefs/sb261-Most-Expensive-Hospital-Conditions-2017.jsp.
[274] https://www.cdc.gov/chronicdisease/about/costs/index.htm#ref1.

Additionally, trial results have shown CAS to be an effective CEA alternative for high-risk surgical patients, allowing the measure to indicate both appropriateness of use and overall outcome. Therefore, we believe the patient population for Q344 will be more encompassing; consequently, the inclusion of this measure will make this MVP more applicable to a broader set of clinicians and allow them to select the most meaningful quality measures.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include nine improvement activities that reflect actions and processes undertaken by clinicians working to coordinate meaningful stroke care and prevention. We have reviewed the MIPS improvement activity inventory and believe the improvement activities proposed within this MVP provide an opportunity for meaningful improvement and patient engagement for clinicians who treat patients at risk for or who have had a stroke. Therefore, the following improvement activities are proposed for inclusion in this MVP:

- IA_PM_13: Chronic care and preventative care management for empaneled patients: This improvement activity reflects opportunities for clinicians to coordinate meaningful stroke care and prevention within an empaneled support network.
- IA_PM_15: Implementation of episodic care management practice improvements AND IA_BE_4: Engagement of patients through implementation of improvements in patient portal: Promotes patient engagement in their own care and provides an opportunity for the patient to connect with others recovering from or at risk for stroke to improve their outcomes.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional opportunities for clinicians, in collaboration with patients, to drive outcomes and improve quality of care for stroke patients:

- IA_BE_1: Use of certified EHR to capture patient reported outcomes
- IA_BE_24: Financial Navigation Program
- IA_CC_2: Implementation of improvements that contribute to more timely communication of test results
- IA_CC_13: Practice improvements for bilateral exchange of patient information
- IA_CC_17: Patient Navigator Program
- IA_PCMH: Implementation of Patient-Centered Medical Home model

Cost Measures

Within the cost component of this MVP, we propose the Intracranial Hemorrhage or Cerebral Infarction episode-based measure because it focuses on the costs related to inpatient clinicians' treatment for the following types of stroke: intracerebral or subdural hemorrhage, and cerebral infarction. The TPCC measure was considered but not included in this MVP since the neurology specialty is excluded from the TPCC measure attribution. We considered including the MSPB Clinician measure but ultimately did not include it as it encompasses all inpatient care, rather than focusing on the specific costs related to stroke.

TABLE B: Proposed Coordinating Stroke Care to Promote Prevention and Cultivate Positive Outcomes MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Coordinating Stroke Care to Promote Prevention and Cultivate Positive Outcomes MVP. We request comment on the measures and activities included in this MVP.

Table C: Proposed Advancing Care for Heart Disease MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Heart disease cost the United States about $219 billion each year from 2014 to 2015, including the cost of health care services, medicines, and lost productivity due to death.[275] Additionally, heart disease can lead to serious illness, disability, lower quality of life, and may be fatal.[276] The proposed Advancing Care for Heart Disease MVP focuses on the clinical theme of providing fundamental treatment and management of costly clinical conditions that contribute to, or may result from, heart disease. This proposed MVP would be most applicable to clinicians who treat clinically varied patient types within the practice of cardiology.

Quality Measures

Within the quality component of this MVP, we propose to include eight MIPS quality measures, which promote the management and risks associated with heart disease. We believe this MVP will support the improvement of patient symptoms with disease management and mitigation of clinical risk which contribute to heart disease. We reviewed the MIPS quality measure inventory and believe the following quality measures proposed within this MVP provide a meaningful and comprehensive assessment of the clinical care for clinicians who specialize in treating patients with conditions related to heart disease conditions:

- Q005: Heart Failure (HF): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) or Angiotensin Receptor-Neprilysin Inhibitor (ARNI) Therapy for Left Ventricular Systolic Dysfunction (LVSD): This MIPS quality measure addresses the use of ACE, ARB, or ARNI pharmacological therapy to reduce the clinical symptoms of heart failure, reduce the risks of morbidity, and mortality.
- Q007: Coronary Artery Disease (CAD): Beta-Blocker Therapy – Prior Myocardial Infarction (MI) or Left Ventricular Systolic Dysfunction (LVEF < 40%): This MIPS quality measure addresses the use of beta-blocker pharmacological therapy to reduce the potential of cardiovascular hospitalizations and revascularization intervention. Additionally, the use of this therapy may reduce angina symptoms for patients.
- Q008: Heart Failure (HF): Beta-Blocker Therapy for Left Ventricular Systolic Dysfunction (LVSD): This MIPS quality measure addresses the use of beta-blocker pharmacological therapy to reduce the clinical symptoms of heart failure, reduce the risks of morbidity, and mortality.
- Q243: Cardiac Rehabilitation Patient Referral from an Outpatient Setting: This MIPS quality measure supports the use of cardiac rehabilitation, to support the reduction of morbidity and mortality, for patients that have experienced an event related to coronary artery disease. NQF 0642: Cardiac Rehabilitation Referral from an Inpatient Setting may be an option for this MVP for future program years. In order for this measure to be considered it would need to be available as a MIPS quality measure.
- Q441: Ischemic Vascular Disease (IVD) All or None Outcome Measure (Optimal Control): This MIPS quality measure supports the mitigation of risk for patients with established coronary artery disease (CAD) with quality actions that promote blood pressure control, tobacco free status, patient use of daily aspirin, and use of statin which captures the clinical concepts represented in the Million Hearts® Initiative. Despite the title of the measure encompassing all ischemic vascular disease, this MIPS quality measure includes the coding to support patients specifically diagnosed with CAD.

In conjunction with the aforementioned heart disease specific measures, we propose to include the following broadly applicable quality measures that are relevant to heart disease care:

- Q047: Advance Care Plan: The inclusion of this MIPS quality measure captures the clinical interaction of documenting a patient's voice for possible, future life-sustaining medical intervention. This engagement between the clinician (or clinician staff) and the patient allows the patient to be autonomous and communicate their ideal of clinical care that ensures coordinated care is implemented as documented in the patient's medical record.
- Q128: Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan: This MIPS quality measure addresses the assessment of body mass index (BMI) and maintenance of a healthy body weight. Specifically, it will support the assessment and follow up plan for those patients identified with having a high BMI which is a risk factor of heart disease.
- Q238: Use of High-Risk Medications in Older Adults: This MIPS quality measure supports patient safety by assessing for the use of high-risk medications.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include 11 improvement activities that reflect actions and processes undertaken by clinicians working to improve care for patients with heart disease. We have reviewed the MIPS improvement activity inventory and believe the improvement activity proposed within this MVP provides an opportunity for meaningful improvement and patient engagement for clinicians who specialize in managing risks and treating patients with heart disease. Therefore, the following improvement activity is proposed for inclusion within this MVP:

- IA_BE_15: Engagement of patients, family and caregivers in developing a plan of care: Drives the urgency of an "informed active patient" and the need to establish communication of healthcare goals and objectives with a proactive team for better health outcomes.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional

[275] https://www.cdc.gov/heartdisease/facts.htm#:~:text=Heart%20Disease%20in%20the%20United%20States&text=Heart%20disease%20costs%20the%20United,year%20from%202014%20to%202015.

[276] https://millionhearts.hhs.gov/learn-prevent/cost-consequences.html.

opportunities for clinicians, in collaboration with patients, to drive outcomes and improve quality of care for patients experiencing symptoms of and/or managing heart disease:

- IA_BE_12: Use evidence-based decision aids to support shared decision-making
- IA_BE_24: Financial Navigation Program
- IA_BE_25: Drug Cost Transparency
- IA_CC_9: Implementation of practices/processes for developing regular individual care plans
- IA_CC_14: Practice improvements that engage community resources to support patient health goals
- IA_EPA_4: Additional improvements in access as a result of QIN/QIO TA
- IA_PM_14: Implementation of methodologies for improvements in longitudinal care management for high risk patients
- IA_PSPA_4: Administration of the AHRQ Survey of Patient Safety Culture
- IA_PSPA_7: Use of QCDR data for ongoing practice assessment and improvements
- IA_PSPA_30: PCI Bleeding Campaign

Cost Measures

Within the cost component of this MVP, we propose the Elective Outpatient Percutaneous Coronary Intervention (PCI) and ST Elevation Myocardial Infarction (STEMI) with PCI episode-based measures, as well as the TPCC measure. All three of these cost measures capture costs of care related to the practice of cardiology. The two episode-based measures assess costs related to PCI: the first, Elective Outpatient PCI, focuses on the specific outpatient procedure as a common procedure that is important for the treatment of stable and urgent coronary artery disease. The second, STEMI with PCI, focuses on inpatient care for severe heart attack. In addition, the TPCC measure assesses the total costs of care after identifying the start of a clinician-patient relationship, including cardiologists. The TPCC measure is appropriate given its broader focus on the ongoing costs of care, similar to the quality measures in this MVP. This range of cost measures aligns with the broad focus of the MVP to apply to clinicians providing care to patients with heart disease. We considered including the MSPB Clinician measure, but ultimately did not include it because it encompasses all inpatient care, rather than focusing on the specific costs related to cardiology.

TABLE C: Proposed Advancing Care for Heart Disease MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Advancing Care for Heart Disease MVP. We request comment on the measures and activities included in this MVP.

	Security Risk Analysis **(^) Safety Assurance Factors for EHR Resilience Guide (SAFER Guide)**

Table D: Proposed Optimizing Chronic Disease Management MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Chronic disease represents 90% of the nation's $3.8 trillion in annual health care expenditures for people with chronic and mental health conditions.[277] The proposed Optimizing Chronic Disease Management MVP focuses on the clinical theme of providing fundamental treatment and management of chronic disease such as diabetes, coronary artery disease, chronic obstructive disease, and major adult depression. This MVP would be most applicable to clinicians who treat clinically varied patient types with those chronic clinical conditions including but not limited to family practice, internist, or geriatric care.

Quality Measures

Within the quality component of this MVP, we propose to include nine MIPS quality measures which focus on a variety of chronic conditions that may impact overall patient health. There may be instances in which a patient could be diagnosed with multiple chronic conditions impacting everyday activities of daily living. In order to preserve clinician choice, we included quality measures that were determined to be priority areas within chronic disease management. We reviewed the MIPS quality measure inventory and believe the following quality measures proposed within this MVP provide a meaningful and comprehensive assessment of the clinical care for clinicians who specialize in treating patients with chronic conditions:

- Q006: Coronary Artery Disease (CAD): Antiplatelet Therapy: This MIPS quality measure addresses the use of antiplatelet therapy for patients diagnosed with CAD. Antiplatelet therapy use has shown to reduce the occurrence of vascular events for patients experiencing CAD.
- Q107: Adult Major Depressive Disorder (MDD): Suicide Risk Assessment: This MIPS quality measure supports assurance that a suicide risk assessment is completed once a patient has a new diagnosis or recurrent episode with MDD.
- Q118: Coronary Artery Disease (CAD): Angiotensin-Converting Enzyme (ACE) Inhibitor or Angiotensin Receptor Blocker (ARB) Therapy - Diabetes or Left Ventricular Systolic Dysfunction (LVEF < 40%): This MIPS quality measure addresses the use of ACE or ARB pharmacological therapy to reduce the clinical symptoms of heart failure, reduce the risks of morbidity and mortality in patients with CAD and/or diabetes.
- Q119: Diabetes: Medical Attention for Nephropathy: This MIPS quality measure supports screening for or evidence of nephropathy. High blood sugar levels in patients with diabetes put them at a higher risk of damaging their kidneys and causing chronic kidney disease, which can lead to kidney failure.
- Q236: Controlling High Blood Pressure: This MIPS quality measure promotes the quality action maintaining a patient blood pressure to maintain a systolic pressure of < 140 mmHg and diastolic pressure of < 90 mmHg. Controlling HBP will significantly reduce the risks of cardiovascular disease mortality and lead to better health outcomes like reduction of heart attacks, stroke, and kidney disease.
- Q398: Optimal Asthma Control: This MIPS quality composite measure evaluates pediatric and adult patients whose asthma is well-controlled as demonstrated by one of three age-appropriate patient reported outcome tools and assesses risk of exacerbation.
- Q438: Statin Therapy for the Prevention and Treatment of Cardiovascular Disease: The MIPS quality action represented within this quality measure is the prescription or maintenance of statin therapy. The use of statin therapy reduces the risk of atherosclerotic cardiovascular disease (ASCVD).

In conjunction with the aforementioned chronic disease management specific measures, we propose to include the following broadly applicable quality measures that are relevant to chronic disease management:

- Q047: Advanced Care Plan: The inclusion of this MIPS quality measure captures the clinical interaction of documenting a patient's voice for possible, future life-sustaining medical intervention. This engagement between the clinician (or clinician staff) and the patient allows the patient to be autonomous and communicate their ideal of clinical care that ensures coordinated care is implemented as documented in the patient's medical record.
- TBD: Person-Centered Primary Care Measure Patient Reported Outcome Performance Measure: This MIPS quality measure represents a comprehensive set of patient-clinician interaction assessments within the broad scope of primary care. This quality measure focuses on a patient's relationship with the clinician or practice.

The following quality measures were considered for this proposed MVP but not included based on the rationales below:

- Q052: Chronic Obstructive Pulmonary Disease (COPD): Long-Acting Inhaled Bronchodilator was considered; however, Q398 was selected because we believe the clinical concept represented within Q398 is more appropriate as it supports a broader age range of patients and promotes improved outcomes in asthma management.
- Q321: Consumer Assessment of Healthcare Providers and Systems (CAHPS) for MIPS Clinician/Group Survey was considered; however, we selected the newly proposed MIPS measure TBD: Person-Centered Primary Care Measure Performance Measure (PCPCM PRO-PM) because we want to capture the patient experience, but limit to one quality measure capturing patient voice.
- Q370: Depression Remission at Twelve Months was considered; however, Q107 was selected because we felt it was important to focus on suicide prevention as it is the 10th leading cause of death in the United States[278]. Although we acknowledge it is important to work towards remission for those patients that suffer from depression, we believe that

[277] https://www.cdc.gov/chronicdisease/about/costs/index.htm.

[278] Mortality in the United States, 2019 NCHS Data Brief No. 395 Kenneth D. Kochanek, M.A., Jiaquan Xu, M.D., and Elizabeth Arias, Ph.D. https://www.cdc.gov/nchs/fastats/leading-causes-of-death.htm.

ongoing suicide risk assessments for those patients with new or ongoing major depressive disorder is a more critical health priority.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include 12 improvement activities that reflect actions and processes undertaken by clinicians working to optimize chronic disease management for their patient populations. We have reviewed the MIPS improvement activity inventory and believe the improvement activities proposed within this MVP provide an opportunity for meaningful improvement and patient engagement for clinicians who focus on a variety of chronic conditions that may impact overall patient health. Therefore, the following improvement activities are proposed for inclusion within this MVP:

- IA_BE_4: Engagement of patients through implementation of improvements in patient portal: Promotes the use of patient portals for the treatment of chronic disease, such as diabetes and leads to better medication adherence and overall chronic disease management.
- IA_BE_21: Improved Practices that Disseminate Appropriate Self-Management Materials: Promotes the use of clinical literature to inform patients of evidenced-based approaches to self-management for the treatment of chronic disease.
- IA_CC_13: Practice improvements for bilateral exchange of patient information: A core component of patient safety, contributing to the reduction of medication errors and patient harm. Additionally, bilateral exchange assists caregivers with relevant clinical decision support and enhances public health reporting initiatives.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional opportunities for clinicians, in collaboration with patients, to drive outcomes and improve quality of care for patients diagnosed with chronic conditions:

- IA_AHE_3: Promote use of Patient-Reported Outcome Tools
- IA_BE_20: Implementation of condition-specific chronic disease self-management support programs
- IA_BE_22: Improved practices that engage patients pre-visit
- IA_CC_2: Implementation of improvements that contribute to more timely communication of test results
- IA_CC_12: Care coordination agreements that promote improvements in patient tracking across settings
- IA_CC_14: Practice improvements that engage community resources to support patient health goals
- IA_EPA_1: Provide 24/7 Access to MIPS Eligible Clinicians or Groups Who Have Real-Time Access to Patient's Medical Record
- IA_PCMH: Implementation of Patient-Centered Medical Home model
- IA_PSPA_19: Implementation of formal quality improvement methods, practice changes or other practice improvement processes

Cost Measures

Within the cost component of this MVP, we propose the TPCC measure because it focuses on the total cost of primary care including ongoing care for major chronic comorbidities after identifying the start of a clinician-patient relationship. The TPCC measure aligns with the types of care being assessed by the quality measures and improvement activities within this MVP. We considered including the MSPB Clinician measure, but ultimately did not include it because the measure applies only to inpatient care and does not align with the types of care envisaged by this MVP. Currently, there are no applicable episode-based measures available for this MVP, but the addition and/or development of applicable episode-based measures could be considered in the future. Refer to section IV.A.3.d.(2) of this proposed rule for details on two chronic condition episode-based measures which focus on asthma/COPD and diabetes that are being proposed for use in the Cost performance category in this proposed rule and could be applicable to this MVP in a future rulemaking cycle.

TABLE D: Proposed Optimizing Chronic Disease Management MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Optimizing Chronic Disease Management MVP. We request comment on the measures and activities included in this MVP.

Table E: Proposed Adopting Best Practices and Promoting Patient Safety within Emergency Medicine MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Emergency Medicine treatment of high frequency pain conditions have considerable influence on healthcare quality and cost.[16] There is significant variation in admission decision rates for conditions including chest pain and abdominal pain.[279] Opportunities for advancement also exist for headache and back pain within the Emergency Department (ED), which identify significant clinician variation in opioid prescribing and imaging utilization for these clinical conditions.[280] The measure topics addressed in this proposed MVP fall within the Center for Disease Control and Prevention (CDC) National Hospital Ambulatory Medical Care Survey (NHAMCS) 2017 ED Summary tables, which list the top eight principal reasons for visiting the ED.[281] The proposed Adopting Best Practices and Promoting Patient Safety within Emergency Medicine MVP focuses on important assessors of the care emergency clinicians provide to patients with undifferentiated high-risk conditions. By focusing on these specific measures and activities, emergency clinicians can reduce clinical variability, improve the quality of emergency care and potentially lower costs. This MVP would be most applicable to clinicians who treat clinically varied patient types within the ED.

Quality Measures

Within the quality component of this MVP, we propose to include five MIPS quality measures and five QCDR measures, which focus on chest pain, abdominal pain, headache, and back pain which promotes assessment of the undifferentiated high-risk conditions seen with high frequency and specific to emergency medicine clinicians. The chosen quality measures address complementary clinical care opportunities by assessing appropriate imaging utilization, laboratory testing, and medication prescribing. We reviewed the MIPS quality measure inventory and believe the following quality measures proposed within this MVP provide a meaningful and comprehensive assessment of the clinical care for clinicians who specialize in treating patients in the ED:

- Q116: Avoidance of Antibiotic Treatment for Acute Bronchitis/Bronchiolitis: This MIPS quality measure promotes appropriate prescribing of antibiotics for patients with acute bronchitis. The overprescribing of antibiotics contributes to antibiotic drug resistance, potentially leading to patient harm.
- Q254: Ultrasound Determination of Pregnancy Location for Pregnant Patients with Abdominal Pain: This MIPS quality measure addresses the use of ultrasound for detection of ectopic pregnancy for pregnant patients presenting with abdominal pain or vaginal bleeding. Early ultrasound can shorten the time to diagnosis and reduce the associated morbidity with a delay in diagnosis.
- Q331: Adult Sinusitis: Antibiotic Prescribed for Acute Viral Sinusitis (Overuse): This MIPS quality measure promotes appropriate prescribing of antibiotics for patients with viral sinusitis. The overprescribing of antibiotics contributes to antibiotic drug resistance, potentially leading to patient harm.
- Q415: Emergency Medicine: Emergency Department Utilization of CT for Minor Blunt Head Trauma for Patients Aged 18 Years and Older: This MIPS quality measure promotes appropriate use of head CT utilization in the ED for adult patients that present with minor blunt head trauma. It ensures that clinicians are purposefully ordering these studies to reduce cost and unnecessary harm to the patient by limiting radiation exposure.
- ACEP21: Coagulation studies in patients presenting with chest pain with no coagulopathy or bleeding: This QCDR measure promotes appropriate care and testing for patients that present with chest pain. It ensures that clinicians are purposefully ordering these studies which may lead to significant reduction in resource utilization without any decrease in value of healthcare provided to the patient.
- ACEP50: ED Median Time from ED arrival to ED departure for all Adult Patients: This QCDR measure promotes improving ED productivity and efficiency by expediting evaluation and treatment of new patients. When treatment times are prolonged, delays in care can occur and patients are put at risk for increased morbidity and mortality.
- ACEP52: Appropriate Emergency Department Utilization of Lumbar Spine Imaging for Atraumatic Low Back Pain: This QCDR measure addresses appropriate diagnostic imaging for patients presenting with low back pain. Diagnostic imaging does not reliably identify the cause of most back pain and does not improve clinical outcome or time to recovery. Unnecessary or routine imaging (X-ray, MRI, CT scans) for low back pain exposes patients to unnecessary harms such as radiation and referral for unnecessary treatment that increases healthcare costs.
- ECPR46: Avoidance of Opiates for Low Back Pain or Migraines: This QCDR measure promotes appropriate prescribing of opiates. Opioid pain medications are often inappropriately utilized for the treatment of migraine headaches and uncomplicated low back pain and over-prescribing of opioids has contributed to the opioid epidemic.
- ECPR55: Avoidance of Long-Acting (LA) or Extended-Release (ER) Opiate Prescriptions and Opiate Prescriptions for Greater Than 3 Days Duration for Acute Pain: This QCDR measure promotes appropriate prescribing of long-acting and extended-release opiates with the intent of reducing the potential for opioid use disorders. Poor prescribing practices and over-prescribing of opioids has contributed to the opioid epidemic. Long-acting opioid pain medications can increase the risk for physical dependence and opioid use disorders. This measure is intended to prevent inappropriate prescribing of opioids and reduce the associated potential for opioid use disorders.

In conjunction with the aforementioned ED specific measures, we propose to include the following broadly applicable quality measure that is relevant to care provided in the ED:

---

[279] Ann Emerg Med. 2020 May;75(5):ti612-614. doi: 10.1016/j.annemergmed.2019.09.008. Epub 2019 Dec 3.
[280] West J Emerg Med. 2017 Oct;18(6):1135-1142. doi: 10.5811/westjem.2017.7.33306. Epub 2017 Sep 18.
[281] https://www.cdc.gov/nchs/data/nhamcs/web_tables/2017_ed_web_tables-508.pdf.

- Q321: CAHPS for MIPS Clinician/Group survey: This survey will provide direct input from patients and their experience regarding timely care, effective communication, shared decision making, care coordination, promotion of health and education, completion of health status/functionality, and courtesy of office staff.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include 10 improvement activities that reflect actions and processes undertaken by clinicians working to improve care processes associated with undifferentiated high-risk conditions. We have reviewed the MIPS improvement activity inventory and believe the improvement activities proposed within this MVP provide an opportunity for meaningful improvement and patient engagement specific to emergency medicine clinicians. Therefore, the following improvement activities are proposed for inclusion within this MVP:

- IA_PSPA_19: Implementation of formal quality improvement methods, practice changes or other practice improvement processes: Provides opportunities to address the challenges presented by patients with undifferentiated high-risk conditions in the emergency healthcare setting.
- IA_PSPA_20: Leadership engagement in regular guidance and demonstrated commitment for implementing practice improvement changes: Encourages the development of innovative strategies for addressing patients with undifferentiated high-risk conditions in emergency room scenarios presenting with diagnostic uncertainty.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional opportunities for clinicians, in collaboration with patients, to drive outcomes and improve quality of care for patients seen by emergency medicine clinicians for assessment of undifferentiated high-risk conditions:

- IA_BE_4: Engagement of patients through implementation of improvements in patient portal
- IA_BE_6: Collection and follow-up on patient experience and satisfaction data on beneficiary engagement
- IA_CC_2: Implementation of improvements that contribute to more timely communication of test results
- IA_CC_14: Practice improvements that engage community resources to support patient health goals
- IA_PSPA_1: Participation in an AHRQ-listed patient safety organization
- IA_PSPA_6: Consultation of the Prescription Drug Monitoring Program
- IA_PSPA_7: Use of QCDR data for ongoing practice assessment and improvements
- IA_PSPA_15: Implementation of Antimicrobial Stewardship Program (ASP)

Cost Measures

Within the cost component of this MVP, we propose the MSPB Clinician measure because it applies to care received in the inpatient setting and covers a small share of emergency medicine clinicians. The TPCC measure was considered but not included in this MVP because the TPCC cost measure focuses on primary care and ongoing clinician-patient relationships, which is not the nature of emergency medicine care; in addition, the emergency medicine specialty is excluded from the TPCC measure attribution. Currently, there are no applicable episode-based measures available for this MVP, but one could be considered for development in the future. Refer to section IV.A.3.d.(2)(c) of this proposed rule for details on the current cost measure development process and potential cost measure development process that could lead to an episode-based measure related to this MVP.

TABLE E: Proposed Adopting Best Practices and Promoting Patient Safety within Emergency Medicine MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Adopting Best Practices and Promoting Patient Safety within Emergency Medicine MVP. We request comment on the measures and activities included in this MVP.

Quality	Improvement Activities	Cost

Table F: Proposed Improving Care for Lower Extremity Joint Repair MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Arthritis and lower extremity (LE) fracture can be costly conditions and lead to increased pain and decreased functional ability. Osteoarthritis, hip, and lower extremity fractures have been identified within the top 20 most expensive conditions for hospital costs; 19,906 million, 5,628 million and 4,368 million in 2017 respectively.[282] The proposed Improving Care for Lower Extremity Joint Repair MVP focuses on the clinical theme of providing fundamental treatment and management of patients with osteoarthritis and lower extremity surgical repair, such as fracture and total joint replacement, to ensure appropriate care and reduce costs. This MVP would be most applicable to clinicians who treat clinically varied patient types and who may also be assessed for, or who have undergone, lower extremity surgical repair, including pre- and post-operatively.

Quality Measures

Within the quality component of this MVP, we propose to include six MIPS quality measures, which promote assessment and treatment of care for patients with lower extremity orthopedic conditions, with emphasis on osteoarthritis and total joint repair/replacement. We have reviewed the MIPS quality measure inventory and believe the following quality measures proposed within this MVP provide a meaningful and comprehensive assessment of the clinical care for clinicians who specialize in treating patients with osteoarthritis and LE joint repair. We decided to keep the focus on total hip and knee replacement because these procedures are directly applicable to the Medicare patient population. Therefore, the following measures are proposed:

- Q350: Total Knee Replacement: Shared Decision-Making: Trial of Conservative (Non-surgical) Therapy: This MIPS quality measure promotes care for non-surgical patients diagnosed with osteoarthritis with the potential to reduce overall healthcare costs associated with this chronic condition.
- Q351: Total Knee Replacement: Venous Thromboembolic and Cardiovascular Risk Evaluation: This MIPS quality measure promotes appropriate pre-operative evaluation for potential venous and cardiovascular complications and to help minimize surgical risk for patients undergoing a total joint repair.
- Q376: Functional Status Assessment for Total Hip Replacement: This MIPS quality measure is a patient-reported outcome measure, that addresses functional status assessment and improvement in patients that undergo a total hip replacement.
- Q470: Functional Status After Primary Total Knee Replacement: This MIPS quality measure is a patient-reported outcome measure, that addresses functional status assessment and improvement in patients that undergo a total knee replacement.
- Q480: Risk-standardized complication rate (RSCR) following elective primary total hip arthroplasty (THA) and/or total knee arthroplasty (TKA) for Merit-based Incentive Payment System: This MIPS quality measure is an administrative claims outcome measure that addresses lower extremity total joint surgery complications rates. As an administrative claims measure, there is no additional burden on the clinician for reporting.

In conjunction with the aforementioned lower extremity joint repair specific measures, we propose to include the following broadly applicable MIPS quality measure that are relevant to care provided by orthopedic clinicians:

- Q128: Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan: This MIPS quality measure addresses the assessment of body mass index (BMI) and maintenance of a healthy body weight. Specifically, it supports surgical or non-surgical patients diagnosed with osteoarthritis with potential to reduce overall healthcare costs and surgical risk associated with this chronic condition.

The following quality measures were considered for this proposed MVP but not included based on the rationales below:

- CCOME6: Patient-Reported Pain and/or Function Improvement after APM Surgery and CCOME7: Patient-Reported Pain and/or Function Improvement after Total Hip Arthroplasty were considered; however, although these QCDR measures are robust outcome measures and would be applicable to orthopedic surgeons, testing requirements will not be completed in time to include within the MVP.
- Q217: Functional Status Change for Patients with Knee Impairments and Q218: Functional Status Change for Patients with Hip Impairments were considered; however, these MIPS quality measures are more appropriate for clinicians providing rehabilitative services (i.e., physical therapy and occupational therapy).
- Q024: Communication with the Physician or Other Clinician Managing On-Going Care Post-Fracture for Men and Women Aged 50 Years and Older was considered; however, to allow for clinician choice in measure selection and to capture those patients who may need osteopathic care for fractures that may not require surgery.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include 11 improvement activities that reflect actions and processes undertaken by clinicians focused on interventional strategies for the improvement of lower extremity joint repair. We have reviewed the MIPS improvement activity inventory and believe the improvement activities proposed within this MVP provide an opportunity for meaningful improvement and patient engagement for clinicians who specialize in treating patients with osteoarthritis and LE joint problems. Therefore, the following improvement activities are proposed for inclusion within this MVP:

- IA_CC_15: PSH Care Coordination: Contributes to the coordinated care of the patient required after a procedure such as a hip/knee replacement. The Perioperative Surgical Home (PSH) strives to provide the patient with the "right care, in the right place, at the right time" to ensure patient satisfaction while reducing complications and costs.
- IA_PSPA_27: Invasive Procedure or Surgery Anticoagulation Medication Management: To address blood-clotting issues commonly associated with hip/knee replacement. Statistical data indicates that hip and knee replacements are a

[282] https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/Chronic-Conditions/CC_Main, https://www.hcup-us.ahrq.gov/reports/statbriefs/sb261-Most-Expensive-Hospital-Conditions-2017.jsp.

commonly performed inpatient procedure with long recovery times that often incur sizable expenses in terms of hospitalization and rehabilitation.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional opportunities for clinicians, in collaboration with patients, to drive outcomes and improve quality of care for patients experiencing LE joint problems:

- IA_AHE_3: Promote use of Patient-Reported Outcome Tools
- IA_BE_6: Collection and follow-up on patient experience and satisfaction data on beneficiary engagement
- IA_BE_12: Use evidence-based decision aids to support shared decision-making
- IA_CC_7: Regular training in care coordination
- IA_CC_9: Implementation of practices/processes for developing regular individual care plans
- IA_CC_13: Practice improvements for bilateral exchange of patient information
- IA_PSPA_6: Consultation of the Prescription Drug Monitoring Program
- IA_PSPA_7: Use of QCDR data for ongoing practice assessment and improvements
- IA_PSPA_18: Measurement and improvement at the practice and panel level

Cost Measures

Within the cost component of this MVP, we propose the Elective Primary Hip Arthroplasty and Knee Arthroplasty episode-based measures because they evaluate the costs of care for clinicians performing elective hip arthroplasty and knee arthroplasty procedures. These two episode-based measures are closely linked to the quality measures within this MVP and help provide a holistic evaluation of the value of care for elective lower extremity joint repair. The TPCC measure was considered but not included in this MVP because the TPCC cost measure focuses on primary care and ongoing clinician-patient relationships, which is not the nature of orthopedic surgery care; in addition, the orthopedic surgery specialty is excluded from the TPCC measure attribution. We considered including the MSPB Clinician measure, but ultimately did not include it as it encompasses all inpatient care, rather than focusing on the specific costs related to lower extremity joint repair.

TABLE F: Proposed Improving Care for Lower Extremity Joint Repair MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Improving Care for Lower Extremity Joint Repair MVP. We request comment on the measures and activities included in this MVP.

Table G: Proposed Patient Safety and Support of Positive Experiences with Anesthesia MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

Clinicians within the profession of anesthesiology evaluate, monitor, and deliver patient care before, during, and after surgeries and/or procedures to ensure optimal patient outcomes. We believe that as the population ages, and the need for surgery and interventional procedures steadily increases, the anesthesiologist can play a significant role in delivering cost-effective health care without affecting the quality of care being delivered. Relative to overall disease healthcare burden, a total of 28%-32% of global disease comes from surgical diseases.[283] The proposed Patient Safety and Support of Positive Experiences with Anesthesia MVP focuses on increasing quality of anesthesia care, improving postoperative outcomes, promoting patient safety, and enhancing satisfaction for patients receiving anesthesia. The measures are used for a variety of surgical procedures that anesthesiologists deliver care for, and are broadly applicable to anesthesiologists practicing within ambulatory, outpatient, and inpatient hospital settings. This MVP would be most applicable to clinicians who provide anesthesia services to patients within the surgical setting or who are considered anesthesiologists or other qualified anesthesia professionals.

Quality Measures

Within the quality component of this MVP, we propose to include five MIPS quality measures and three QCDR measures, which intend to drive the quality of care within an anesthesia episode and is based on guidelines that lead to better patient outcomes for both the adult and pediatric patient populations. The anesthesiology-related quality measures are inclusive of all phases of anesthesia care: pre, intra and postoperative, including coordination with the anesthesiologist's surgical colleagues. We reviewed the MIPS quality measure inventory and believe the following quality measures proposed within this MVP provide a meaningful and comprehensive assessment of the clinical care for clinicians who specialize in providing anesthesia services:

- Q404: Anesthesiology Smoking Abstinence: This MIPS quality measure uses targeted interventions to encourage smoking cessation, which can be critically important in reducing surgical risks and preventing infection, ultimately leading to faster patient recovery and reduced costs. Smoking is a precursor to multiple health challenges including respiratory and cardiovascular diseases which may interfere with metabolic processes such as oxygen delivery and uptake and drug metabolism.
- Q424: Perioperative Temperature Management: This MIPS quality measure ensures the maintenance of normothermia during surgery. Perioperative hypothermia is known to be a common occurrence with anesthesia, which can result in fluctuations in body temperature causing adverse effects on physiological functioning. This is a key clinical action under the control of the anesthesiologist that can directly lead to reduced surgical site infections, faster recovery, and reduced costs.
- Q430: Prevention of Post-Operative Nausea and Vomiting (PONV) – Combination Therapy: This MIPS quality measure encourages effective prophylactic regimens to be used by the anesthesiologist to reduce this highly dissatisfying side effect of anesthesia. Nausea and vomiting are common side effects following anesthesia that can cause electrolyte imbalance, dehydration, aspiration, and/or slow wound healing. Decreasing occurrence of side effects can shorten recovery times, reduce costs and resources.
- Q463: Prevention of Post-Operative Vomiting (POV) – Combination Therapy (Pediatrics): This MIPS quality measure encourages effective prophylactic regimens to be used by the anesthesiologist to reduce this highly dissatisfying side effect of anesthesia. A pediatric-specific measure is needed because the risk factors and recommended prophylaxis are different from the adult population.
- Q477: Multimodal Pain Management: This patient-centered MIPS quality measure assesses the effective peri- and postoperative pain management through the utilization of multimodal pain management. Optimal perioperative pain management improves patients' function and rehabilitation after surgery. Additionally, this measure dissuades the use of opioids, which not only work primarily through a single mechanism, but can lead to a host of side effects that can be life threatening or lead to opioid abuse.

In conjunction with the MIPS quality measures specific to anesthesia, we propose to include the following QCDR measures that are relevant to reducing operative infection and incorporating the patient voice.

- AQI48: Patient-Reported Experience with Anesthesia: This QCDR measure uses patient voice to assess a patient's overall experience with anesthesia care helping to better understand the patient's satisfaction and experience.
- AQI69: Intraoperative Antibiotic Redosing: This QCDR measure addresses the importance of infection prevention by encouraging adequate and timely redosing of intraoperative antibiotics.
- AQI70: Prevention of Arterial Line Infection: This QCDR measure addresses the appropriate use of sterile techniques which are essential to prevent costly and dangerous infections.

This MVP supports the vital practice of anesthesia care in protecting patient safety and mitigating patient risk. Reducing the risk of infection, pain management, post-operative management of nausea and vomiting, as well as patient and family engagement and satisfaction can all lead to the overall goal of better outcomes for patients undergoing surgery.

Improvement Activities

Within the improvement activities component of this MVP, we propose to include 11 improvement activities that reflect actions and processes undertaken by anesthesiologists to identify interventional strategies to promote positive patient experiences with anesthesia. We have reviewed the MIPS improvement activity inventory and believe the improvement activities proposed within this MVP provide an opportunity for meaningful improvement regarding complications associated with anesthesia, which may

[283] Karim HMR. Healthcare delivery cost and anesthesiologists: Time to have a greater role and responsibility. World J Anesthesiol 2019; 8(3): 19-24.

include postoperative vomiting (POV), cardiovascular collapse, and respiratory depression. Therefore, the following improvement activities are proposed for inclusion in this MVP:

- IA_PSPA_7: Use of QCDR data for ongoing practice assessment and improvements: Promotes follow-up systems, tools, and/or strategies that could address complications often encountered after anesthesia.
- IA_PSPA_20: Leadership engagement in regular guidance and demonstrated commitment for implementing practice improvement changes: Promotes follow-up systems, tools, and/or strategies that could address complications often encountered after anesthesia.

Additional improvement activities are included to offer clinician choice and to promote patient engagement and patient-centeredness, health equity, shared decision making, and care coordination. These improvement activities provide additional opportunities for clinicians to drive outcomes and improve quality of care for patients receiving anesthesia:

- IA_BE_6: Collection and follow-up on patient experience and satisfaction data on beneficiary engagement
- IA_BE_22: Improved practices that engage patients pre-visit
- IA_BMH_2: Tobacco use
- IA_CC_2: Implementation of improvements that contribute to more timely communication of test results
- IA_CC_15: PSH Care Coordination
- IA_CC_19: Tracking of clinician's relationship to and responsibility for a patient by reporting MACRA patient relationship codes
- IA_EPA_1: Provide 24/7 Access to MIPS Eligible Clinicians or Groups Who Have Real-Time Access to Patient's Medical Record
- IA_PSPA_1: Participation in an AHRQ-listed patient safety organization
- IA_PSPA_16: Use of decision support and standardized treatment protocols

Cost Measures

Within the cost component of this MVP, we propose the MSPB Clinician measure because it focuses on clinicians providing inpatient care and applies to a small subset of anesthesiologists. The TPCC measure was considered but not included in this MVP because this cost measure focuses on primary care and ongoing clinician -patient relationships, which is not the nature of anesthesiology care; in addition, the anesthesiology specialty is excluded from the TPCC measure attribution. Currently, there are no applicable episode-based measures available, but one could be considered for development in the future. Refer to section IV.A.3.d.(2) of this proposed rule for details on the current cost measure development process and potential cost measure development process that could lead to an episode-based measures related to this MVP.

TABLE G: Proposed Patient Safety and Support of Positive Experiences with Anesthesia MVP Beginning with the CY 2023 MIPS Performance Period/2025 MIPS Payment Year

As noted in the introduction of this appendix, we considered measures and improvement activities available within the MIPS inventory and selected those that we determined best fit the clinical concept of the proposed Patient Safety and Support of Positive Experiences with Anesthesia MVP. We request comment on the measures and activities included in this MVP.

Electronic-Filing Requirements for Specified Returns and Other Documents

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Withdrawal of notice of proposed rulemaking; notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations amending the rules for filing electronically and affects persons required to file partnership returns, corporate income tax returns, unrelated business income tax returns, withholding tax returns, and certain information returns, registration statements, disclosure statements, notifications, actuarial reports, and certain excise tax returns. The proposed amendments reflect changes made by the Taxpayer First Act of 2019 (TFA) and are consistent with the TFA's emphasis on increasing electronic filing. This document also withdraws proposed regulations published in the **Federal Register** on May 31, 2018, amending the rules for determining whether information returns must be filed electronically.

DATES: Written or electronic comments must be received by September 21, 2021. The public hearing is being held by teleconference on September 22, 2021 at 10 a.m. EST. Requests to speak and outlines of topics to be discussed at the public hearing must be received by September 21, 2021. If no outlines are received by September 21, 2021, the public hearing will be cancelled. Requests to attend the public hearing must be received by 5:00 p.m. EST on September 20, 2021. The telephonic hearing will be made accessible to people with disabilities. Requests for special assistance during the telephonic hearing must be received by September 20, 2021.

ADDRESSES: Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions via the Federal eRulemaking Portal at *www.regulations.gov* (indicate IRS and REG–102951–16) by following the online instructions for submitting comments. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the IRS will publish for public availability any comments submitted to its public docket. Send paper submissions to: CC:PA:LPD:PR (REG–102951–16), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, call Casey R. Conrad of the Office of the Associate Chief Counsel (Procedure and Administration), (202) 317–6844; concerning submission of comments or requests for a public hearing, call Regina Johnson, (202) 317–5177 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Regulations on Income Taxes (26 CFR part 1) under sections 1461 and 1474 of the Internal Revenue Code (Code), which provide that persons required to deduct and withhold tax are liable for such tax, and section 6050I of the Code, which requires persons to report information about financial transactions to the IRS; to the Regulations on Pension Excise Taxes (26 CFR part 54) under section 6011 of the Code, which requires persons to report information for certain excise taxes related to employee benefit plans; to the Regulations on Procedure and Administration (26 CFR part 301) under sections 1474, 6011, 6012, 6033, 6057, 6058, and 6059 of the Code for determining whether returns must be filed using magnetic media; and to the Regulations on Foundation and Similar Excise Taxes (26 CFR part 53) under section 6011 of the Code to remove the option—available to a person required to report certain excise taxes on Form 4720, *Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code*—to designate a Form 4720 filed by a private foundation or trust as that person's return if the foundation is reporting the same transaction. This document also withdraws proposed regulations under section 6011 that were published in the **Federal Register** on May 31, 2018 (May 2018 proposed regulations), amending the rules for determining whether information returns must be filed using magnetic media.

Section 6011(e) was added to the Code by section 319 of the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97–248, 96 Stat. 610, and required the Secretary of the Treasury or her delegate (Secretary) to prescribe regulations providing standards for determining which returns were required to be filed on magnetic media (hereinafter references to filing ''in electronic form'' will be used in place of filing ''on magnetic media''). A year later, the statute was amended by section 109 of the Interest and Dividend Tax Compliance Act of 1983, Public Law 98–67, 97 Stat. 383, to require information returns under sections 6042(a) (dividends and corporate earnings and profits), 6044(a) (patronage dividends), and 6049(a) (interest), with respect to more than 50 payees for any calendar year, to be filed electronically. The amendment also added a waiver provision from electronically filing to any person who established undue hardship.

On March 25, 1986, the Secretary first published guidance under section 6011(e) with respect to the electronic filing requirement as § 301.6011–2 (TD 8081), which specified Forms 1042–S, 1098, 1099 series, 5498, 6248, 8027, W–2G, W–2, W–2P as the information returns covered by the regulation that had to be filed electronically unless the person was granted a waiver or was a low-volume filer. The term ''low-volume filers'' was defined as persons not required to file, for any calendar year beginning on or after January 1, 1987, 250 or more of the specified returns (other than Forms 1099–DIV, *Dividends and Distributions;* 1099–PATR, *Taxable Distributions Received from Cooperatives;* 1099–INT, *Interest Income;* or 1099–OID, *Original Issue Discount*). For those four Forms 1099, the regulation provided a special rule that reduced the 250-return threshold to 50 and required that the four forms be aggregated for purposes of determining whether a person met the 50-return threshold. The regulation also provided that the Commissioner of Internal Revenue or his delegate (Commissioner) could prescribe by revenue procedure additional forms to be covered by the regulation.

Section 6011(e) was again amended in 1989 by section 7713, Title VII, of the Revenue Reconciliation Act of 1989 (1989 Act), Public Law 101–239, 103 Stat. 2394, to prohibit the Secretary from requiring any person to file returns electronically unless that person was required to file at least 250 returns during the calendar year. The 1989 Act also required the Secretary to consider the taxpayer's ability to comply at reasonable costs with the regulation's requirements.

On June 30, 1998, the Secretary promulgated amending regulations under section 6011(e), § 301.6011–2 (TD 8772), that removed the special rules related to the four Forms 1099 and

clarified that the 250-return threshold applied separately to each information return covered by § 301.6011–2. The regulation also added Forms 499R–2/W–2PR, W–2VI, W–2GU, and W–2AS as information returns covered by the regulation and removed Form 6248.

On August 5, 1997, the President signed into law the Taxpayer Relief Act of 1997, Public Law 105–34. Section 1224 of that Act amended 6011(e)(2) by adding a sentence that required the Secretary to promulgate regulations to require partnerships with over 100 partners to file returns electronically. On November 12, 1999, the Secretary promulgated regulations under section 6011(e) relating to this special rule for partnerships with more than 100 partners, § 301.6011–3 (TD 8843), requiring partnerships with more than 100 partners to file partnership returns and all information required by the applicable forms and schedules electronically.

On April 29, 2002, the Secretary promulgated regulations under section 6011(e) (TD 8992) to add Form 1098–E as an information return covered by the regulation; on February 7, 2003, the Secretary promulgated regulations under section 6011(e) (TD 9029) to add Form 1098–T as an information return covered by the regulation.

On November 13, 2007, the Secretary promulgated regulations relating to the requirements for filing corporate income tax returns and returns of organizations required to file returns under section 6033 electronically under section 6011(e), § 301.6011–5, § 301.6033–4, and § 301.6037–2 (TD 9363). The regulations specify that all returns required to be filed during the calendar year, including income tax returns, employment tax returns, excise tax returns, and information returns, are counted in determining whether a corporation or organization meets the 250-return threshold. Sections 301.6011–5 and 301.6037–2 apply to large corporations and S corporations, respectively, if the corporation is required to file at least 250 returns during the calendar year and the corporation reports total assets at the end of the corporation's taxable year that equal or exceed $10 million on Schedule L of their Form 1120 ($10 million rule). Section 301.6033–4 applies to organizations required to file Form 990, *Return of Organization Exempt From Income Tax,* that have total assets of $10 million or more as of the end of the taxable year, and that are required to file at least 250 returns during the calendar year; it also applies to any organization (regardless of total assets) required to file Form 990–PF, *Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation,* if the organization is required to file at least 250 returns during the calendar year.

Section 6011(e)(4) was added to the Code in 2010 by section 522, Title V, of the Hiring Incentives to Restore Employment (HIRE) Act, Public Law 111–147, 124 Stat. 71, to authorize the Secretary to require financial institutions that file returns with respect to withholding on foreign transfers to file those returns electronically regardless of the number. On January 28, 2013, the Secretary promulgated regulations under section 1474(f), § 301.1474–1 (TD 9610), to require financial institutions defined in section 1471(d)(5) to electronically file Form 1042–S, *Foreign Persons' U.S. Source Income Subject to Withholding,* regardless of the number of returns filed for the calendar year, but did not include in those regulations a requirement to electronically file Form 1042, *Annual Withholding Tax Return for U.S. Source Income of Foreign Persons*.

On March 10, 2014, the Secretary promulgated regulations under section 6011(e), § 301.6011–2 (TD 9660), to add the Forms 1094 series and 1095 series as information returns covered by the regulation. And on December 19, 2016, the Secretary promulgated regulations under section 6011(e), § 301.6011–2 (TD 9804), to remove the Form 1095 series and add Form 1095–B and Form 1095–C as information returns covered by the regulation.

On March 23, 2018, the President signed into law the Tax Technical Corrections Act of 2018 (TTCA), Public Law 115–141. Section 301, div. U, title III, of the TTCA added a new paragraph (5), Special rule for partnerships, to section 6011(e). Section 6011(e)(5)(A), Partnerships permitted to be required to file on magnetic media, authorized the Secretary to lower the electronic-filing threshold to 200 returns and statements for all partnerships filing returns and statements relating to calendar year 2018, reducing that number by 50 each year until 2023, when partnerships filing more than 20 returns and statements relating to 2022 or any subsequent calendar year could be required to file electronically. The TTCA also moved the rule authorizing the Secretary to require partnerships with more than 100 partners to file their returns electronically from section 6011(e)(2) to new section 6011(e)(5)(B), Partnerships required to file on magnetic media. The Secretary did not promulgate regulations under section 6011(e) relating to the lower electronic-filing thresholds for partnerships.

On May 31, 2018, the Secretary proposed regulations under section 6011(e) (83 FR 24948) amending § 301.6011–2. The proposed regulations would have required that all information returns covered under that regulation, regardless of type, be included in determining whether the returns a person must file meet the 250-return threshold and the person must file the information returns electronically. The May 2018 proposed regulations also provided that corrected information returns would be required to be filed electronically if the corresponding original return was required to be filed electronically.

On July 1, 2019, the President signed into law the Taxpayer First Act of 2019 (TFA), Public Law 116–25. Section 2301 of the TFA amended section 6011(e) by adding new paragraph 5 that authorizes the Secretary to prescribe regulations that decrease, in accordance with the TFA, the number of returns a taxpayer may file without being required to file electronically. These amendments included changes to the special rule for partnerships. Section 2301 of the TFA moved the rule requiring partnerships with more than 100 partners to file returns electronically from section 6011(e)(5), titled ''Partnerships required to file on magnetic media'', to new section 6011(e)(6). Section 3101 of the TFA amended section 6011 to require any charitable or other organization required to file an annual return that relates to any tax imposed by section 511 on unrelated business taxable income to file those returns in electronic form. Section 3101 of the TFA also amended section 6033 to require any organization required to file a return under section 6033 to file those returns in electronic form.

On November 19, 2020, the Secretary promulgated regulations under section 529A of the Code, which amended a regulation under section 6011(e) of the Code, § 301.6011–2 (TD 9923), to add the Forms 5498–ESA, *Coverdell ESA Contribution Information,* 5498–QA, *ABLE Account Contribution Information,* and 5498–SA, *HSA, Archer MSA, or Medicare Advantage MSA Information,* as information returns covered by the regulation.

On December 20, 2019, the President signed into law the Setting Every Community Up for Retirement Enhancement Act of 2019 (SECURE Act), enacted as part of the Further Consolidated Appropriations Act, 2020, Public Law 116–94, div. O. Section 202 of the SECURE Act allows a group of plans to file a single aggregated annual

return or report for plan years beginning after December 31, 2021. Section 202(d) of the SECURE Act clarifies the electronic-filing requirements for these deferred compensation plans. Section 202 of the SECURE Act also added to section 6011 a second paragraph (e)(6), although the headings of the two paragraphs (e)(6) differ. The one moved to paragraph (e)(6) by the TFA is titled ''Partnerships required to file on magnetic media.'' The one added by the SECURE Act is titled ''Application of numerical limitation to returns related to deferred compensation plans'' and treats information regarding each plan for which information is provided on a return required to be filed under section 6058 of the Code as a separate return for purposes of determining the number of returns a taxpayer may file without being required to file electronically. These proposed regulations do not address amendments made by section 202(d) of the SECURE Act.

Explanation of Provisions

1. Scope of the Proposed Regulations for Filing Returns Electronically

These proposed regulations would impose electronic-filing requirements on persons required to file certain returns as authorized by the TFA by amending the following regulations:

(1) § 301.6011–2, Required use of electronic form, which prescribes standards for determining whether certain information returns must be filed electronically;

(2) § 1.6045–2, Furnishing statement required with respect to certain substitute payments, which requires persons to report certain substitute payments;

(3) § 1.6045–4, Information reporting on real estate transactions with dates of closing on or after January 1, 1991, which requires persons to report on real estate transactions;

(4) § 1.6050I–0, Table of contents, which lists the major captions that appear in §§ 1.6050I–1 and 1.6050I–2;

(5) § 1.6050I–1, Returns relating to cash in excess of $10,000 received in a trade or business, which requires persons to report information about these financial transactions to the IRS;

(6) § 1.6050I–2, Returns relating to cash in excess of $10,000 received as bail by court clerks, which requires persons to report information about these financial transactions to the IRS;

(7) § 1.6050M–1, Information returns relating to persons receiving contracts from certain Federal executive agencies, which requires certain Federal executive agencies to report information with respect to each contract entered into by that agency;

(8) § 301.6721–1, Failure to file correct information returns, which provides the penalty for failure to file correct information returns;

(9) § 301.6011–3, Required use of electronic form for partnership returns, which prescribes standards for determining whether a partnership must file its partnership return electronically;

(10) § 301.6011–5, Required use of electronic form for corporate income tax returns, which prescribes standards for determining whether a corporation must file its corporate income tax returns electronically;

(11) § 1.6037–2, Required use of electronic form for income tax returns of electing small business corporations, which prescribes standards for determining whether an electing small-business corporation (S corporation) must file its S corporation return electronically;

(12) § 301.6037–2, Required use of electronic form for returns of electing small business corporations, which prescribes standards for determining whether an electing small-business corporation (S corporation) must file its S corporation return electronically;

(13) § 1.6033–4, Required filing in electronic form for returns by organizations required to file returns under section 6033, which prescribes standards for filing returns required to be filed electronically under § 301.6033–4;

(14) § 301.6033–4, Required filing in electronic form for returns by organizations required to file returns under section 6033, which prescribes standards for determining whether returns by organizations required to file a return under section 6033 must be filed electronically;

(15) § 53.6011–1, General requirement of return, statement or list, which requires persons subject to certain enumerated excise taxes under Chapter 42 of the Code to file a Form 4720 to accompany payment of those excise taxes;

(16) § 301.6057–3, Required use of electronic form for filing requirements relating to deferred vested retirement benefit, which prescribes standards for determining whether a registration statement required to be filed under section 6057(a) or a notification required to be filed under section 6057(b) must be filed electronically;

(17) § 301.6058–2, Required use of electronic form for filing requirements relating to information required in connection with certain plans of deferred compensation, which prescribes standards for determining whether a return required to be filed under section 6058 with respect to an employee benefit plan must be filed electronically; and

(18) § 301.6059–2, Required use of electronic form for filing requirements relating to periodic report of actuary, which prescribes standards for determining whether an actuarial report required to be filed under section 6059 with respect to an employee benefit plan must be filed electronically.

The proposed regulations would also create the following new regulations that impose an electronic-filing requirement:

(1) § 301.6011–10, Certain organizations, including trusts, required to file unrelated business income tax returns in electronic form, which requires certain organizations, including trusts, to file their unrelated business income tax returns electronically;

(2) § 301.6011–11, Required use of electronic form for certain returns for tax-advantaged bonds, which prescribes standards for determining whether a return for credit payments to issuers of qualified bonds must be filed electronically;

(3) § 301.6011–12, Required use of electronic form for returns of certain excise taxes under chapters 41 and 42 of the Internal Revenue Code, which prescribes standards for determining whether an excise tax return on Form 4720 must be filed electronically;

(4) § 301.6011–13, Required use of electronic form for split-interest trust returns, which prescribes standards for determining whether an information return on Form 5227 must be filed electronically;

(5) § 301.6011–14, Required use of electronic form or other machine-readable form for material advisor disclosure statements, which prescribes standards for determining whether a material advisor disclosure statement on Form 8918 must be filed electronically or in other machine-readable form;

(6) § 301.6012–2, Required use of electronic form for income tax returns of certain political organizations, which prescribes standards for determining whether an income tax return on Form 1120–POL must be filed electronically;

(7) § 54.6011–3, Required use of electronic form for the filing requirements for the return for certain excise taxes related to employee benefit plans, which prescribes standards for determining whether an income tax return on Form 5330, *Return of Excise Taxes Related to Employee Benefit Plans,* must be filed electronically; and

(8) § 301.6011–15, Required use of electronic form for withholding tax returns, which prescribes standards for determining whether an income tax

return filed by a withholding agent on Form 1042 must be filed electronically.

In addition, the proposed regulations would amend the following regulations regarding the filing requirements of withholding agents:

(1) § 1.1461–1, Payment and returns of tax withheld, which prescribes requirements for withholding agents to file returns with respect to U.S. source income of foreign persons;

(2) § 1.1471–0, Outline of regulation provisions for sections 1471 through 1474, which lists the major captions that appear in §§ 1.1471–1 through 1.1474–7 and § 301.1474–1;

(3) § 1.1474–1, Liability for withheld tax and withholding agent reporting, which provides rules for withholding agents making payments under chapters 3 or 4 of the Code; and

(4) § 301.1474–1, Required use of electronic form for financial institutions filing Form 1042–S or Form 8966, which provides rules for withholding agents making payments under chapter 4 of the Code.

The regulations proposed in this document include reordering and renumbering of paragraphs when necessary for clarification and logic. In addition, cross references have been updated, and typographical, grammatical, and punctuation corrections have been made.

As many of these regulations imposing electronic-filing requirements also provide a waiver from electronically filing to any person who establishes undue hardship, the Treasury Department and the IRS request comments on how the hardship waiver procedures should be administered, including suggestions for revising the procedures for requesting, and criteria for granting, a hardship waiver.

2. Proposed § 301.6011–2, Rules for Filing Certain Information Returns Electronically

These proposed regulations would amend § 301.6011–2 as discussed in detail in the following sections 2.A though 2.G.

A. Additional Information Returns Required To Be Filed Electronically

i. Forms 1098–C and 1098–Q

Section 301.6011–2(b)(1) provides a list of information returns required to be filed electronically in accordance with § 301.6011–2. Among those returns are three in the Form 1098 series: Form 1098, *Mortgage Interest Statement;* Form 1098–E, *Student Loan Interest Statement;* and Form 1098–T, *Tuition Statement,* added to § 301.6011–2(b)(1) by, respectively, TD 8081 (March 25, 1986), TD 8992 (April 29, 2002), and TD 9029 (February 7, 2003). After those three forms were added to § 301.6011–2(b)(1), the IRS created additional returns in the Form 1098 series: Form 1098–C, *Contributions of Motor Vehicles, Boats, and Airplanes*; and Form 1098–Q, *Qualifying Longevity Annuity Contract Information.* These two additional 1098 series forms, as well as the three currently listed in § 301.6011–2(b), are all filed and furnished by larger organizations and institutions that generally electronically file returns even when not required to do so by § 301.6011–2. Based on the size and sophistication of the entities that file these forms and the accessibility and availability of electronic filing, the Treasury Department and the IRS have determined that filers of Forms 1098–C and 1098–Q are unlikely to incur unreasonable costs to electronically file these returns. Thus, the proposed regulations would amend § 301.6011–2(b)(1) to add Forms 1098–C and 1098–Q to the list of information returns covered by § 301.6011–2(b).

ii. Forms 3921 and 3922

The proposed regulations would also amend § 301.6011–2(b)(1) to add the Form 3921, *Exercise of an Incentive Stock Option Under Section 422(b),* and Form 3922, *Transfer of Stock Acquired Through an Employee Stock Purchase Plan Under Section 423(c).* These forms are filed and furnished by sophisticated taxpayers that generally electronically file returns even when not required to do so by § 301.6011–2. Based on the sophistication of these filers and the accessibility and availability of electronic filing, the Treasury Department and the IRS have determined that filers of Forms 3921 and 3922 are unlikely to incur unreasonable costs to electronically file these returns.

iii. Form 1097–BTC

The proposed regulations would also amend § 301.6011–2(b)(1) to add the Form 1097–BTC, *Bond Tax Credit.* This form is filed and furnished by bond issuers with respect to certain tax credit bonds. For the reasons discussed in this preamble, the Treasury Department and the IRS have determined that filers of Form 1097–BTC should not incur any unreasonable costs to electronically file this return. See section 2.D., Aggregation of returns to determine whether the electronic-filing threshold is met. Proposed § 301.6011–2 would allow for a waiver of the electronic filing requirements for Form 1097–BTC if hardship is shown in a request for waiver made in accordance with the regulation.

B. Form 8300 Required To Be Filed Electronically

Form 8300, *Report of Cash Payments Over $10,000 Received in a Trade or Business,* is a dual-purpose form, designed to meet both the section 6050I reporting requirement and, since January 1, 2002, a similar Bank Secrecy Act (BSA) reporting requirement found in 31 U.S.C. 5331 and 31 CFR 1010.330. Generally, any person in a trade or business who receives more than $10,000 in cash in a single transaction or related transactions must file Form 8300. The IRS uses the information on the Form 8300 for civil and criminal tax administration and compliance. The Financial Crimes Enforcement Network (FinCEN) relies on up-to-date Form 8300 filings for law enforcement, reporting, and statistical purposes. The instructions on Form 8300 state that filers can file the form either on paper with the IRS or electronically through FinCEN's BSA E-Filing System.

Approximately 250,000 of the 300,000 Forms 8300 filed during each calendar year from 2015 to 2018 were filed on paper with the IRS. IRS employees manually input data from the paper-filed Forms 8300 into FinCEN's BSA E-Filing System. This procedure requires significant resources to be spent on processing and data entry. Manual data entry can cause delays in the input and retrieval of data, affecting the timeliness of information available for law enforcement and other users to detect potential money laundering, terrorist financing, and other tax and financial fraud.

These proposed regulations would require filers who are required to file at least the applicable number of returns identified in paragraphs (b)(1) and (b)(2) of proposed § 301.6011–2 during the calendar year to also file their Forms 8300 electronically, as directed by the form's instructions. This requirement would increase the timeliness and accuracy of data entry, reduce postage costs, promote IT modernization efforts, reallocate IRS staff for priority assignments, and provide IRS criminal and civil investigators and other agencies with access to the data with up-to-date and accurate information. Electronic filing would also protect against possible future disruption and delays in processing paper-filed Forms 8300. It is anticipated that the form will direct filers to use FinCEN's BSA E-Filing system (*https://bsaefiling.fincen.treas.gov/main.html*), which is an internet-based secure system with no cost to the user. The only technical

requirement of the BSA E-Filing System is to have an internet connection for access to the system. Nonetheless, the proposed regulations would continue to allow the Commissioner to waive the requirement to file information returns electronically if the request for waiver demonstrates hardship. The principal factor in determining hardship will be the extent, if any, to which the cost of electronically filing Form 8300 exceeds the cost of filing Form 8300 on paper. The proposed regulations would also edit the example in § 1.6050I–1(d)(2)(iv) to provide additional clarity for the rule illustrated in that example.

C. Amending the Electronic-Filing Threshold

Under section 6011(e)(1), the Secretary must prescribe regulations providing standards for determining which returns must be filed electronically. Section 6011(e)(2)(A), however, until it was amended by the TFA, prevented the Secretary from requiring any person to file returns electronically unless the person was required to file at least 250 returns during the calendar year. Section 2301 of the TFA amended section 6011(e), changing the statutory 250-return threshold to a decreasing number over several years, as set forth in new section 6011(e)(5). In accordance with section 2301 of the TFA, these proposed regulations would amend § 301.6011–2(c)(1)(i), which currently provides that no person is required to electronically file an information return covered under § 301.6011–2(b) unless the person is required to file 250 or more returns during the calendar year. The proposed amendments would remove references to the 250-return threshold in § 301.6011–2(c)(1)(i) and add a new paragraph (c)(3)(i) to § 301.6011–2 that, in accordance with the TFA, reduces the electronic-filing threshold for information returns covered under § 301.6011–2(b) from 250 to 100, for returns required to be filed during calendar year 2022, and from 100 to 10, for returns required to be filed during calendar years after 2022.

Information returns are generally required to be filed between January and March of the year following the calendar year to which such returns relate. See sections 6071(b) and (c). If a taxpayer has, for example, 13 employees in calendar year 2022 and is required to file Forms W–2 for those employees during calendar year 2023, that taxpayer would, under these proposed regulations, be required to file those 13 Forms W–2 electronically.

The proposed incremental step-down from 250 to 100 for information returns required to be filed during calendar year 2022, and then from 100 to 10 for information returns required to be filed after 2022, will allow the IRS time to ensure it has sufficient resources and updated programming to seamlessly handle and process the increased volume of electronically-filed information returns and the applications required to file those information returns electronically.

The Treasury Department and the IRS expect that by calendar year 2023 the IRS will be prepared to handle and process the anticipated increased volume of returns and applications, and that no further incremental step-down would be necessary if these proposed regulations are finalized and applicable to returns required to be filed during calendar year 2023. Consequently, persons required to file at least 10 information returns during the calendar year 2023 would be required to file those returns electronically. The Treasury Department and the IRS request comments on why persons required to file at least 10 information returns during the calendar year 2023 would not be able to file those returns electronically during that calendar year and whether the Treasury Department and the IRS should provide an incremental step-down to 100 for information returns required to be filed during calendar year 2023, and then from 100 to 10 for information returns required to be filed during calendar years after 2023.

D. Aggregation of Returns To Determine Whether the Electronic-Filing Threshold Is Met

Section 301.6011–2(c)(1)(iii) provides that each type of information return covered under § 301.6011–2(b) is considered separately for purposes of determining whether a person meets the 250-return electronic-filing threshold. Therefore, different types of information returns are not counted in the aggregate for purposes of determining whether a person is required to file a number of returns that equals or exceeds the 250-return electronic-filing threshold during the calendar year (non-aggregation rule).

These proposed regulations would remove the non-aggregation rule from § 301.6011–2(c)(1)(iii). Section 6011(e) does not prohibit the aggregation of information returns of different types in determining whether a person meets the electronic-filing threshold during a calendar year. When the regulations specifically providing for non-aggregation were published in 1998, electronic filing was still in the early stages of development and not as commonly used as it is today. Both the 250-return limitation that Congress had included in the 1989 amendment to section 6011(e) and the non-aggregation rule that the Secretary prescribed helped ensure that electronic-filing burdens and costs were appropriate, given the existing limits and accessibility to electronic-filing technology at that time.

Since that time, electronic filing has become more common, accessible, and economical, as evidenced by the prevalence of tax-return preparers and third-party service providers who offer return-preparation and electronic-filing services, by the availability of tax-return-preparation software, and by the numbers of returns already being filed electronically on a voluntary basis. In 2018, for example, approximately 98.5 percent of information returns were filed electronically. Moreover, electronic filing increases the IRS's timeliness and accuracy in processing return information, which, in turn, provides faster and better customer service to taxpayers with respect to those returns.

In light of the prevalence of electronic filing and Congress's enactment of the TFA, which significantly expanded the Secretary's authority to prescribe regulations requiring persons to file returns electronically, the Treasury Department and the IRS have determined that the non-aggregation rule is no longer necessary and propose to remove it from § 301.6011–2(c). The proposed regulations would add a new paragraph (c)(4)(i) to § 301.6011–2 to provide that a person required to file original information returns of any type covered by § 301.6011–2(b)(1) and (b)(2) must count all those returns together to determine whether the person meets or exceeds the electronic-filing threshold for the relevant calendar year.

The proposed regulations do not include Forms 8300 in the aggregation rule, and no Form 8300 would be included in determining whether a person is required to file the applicable number of information returns. A Form 8300 generally must be filed within 15 days after a reportable payment of more than $10,000 is received. A filer may not know the number of Forms 8300 it will file in a calendar year until after the year is over, because the filer will not know how many cash transactions over $10,000 will occur during the year. On the other hand, other information returns described in § 301.6011–2(b)(1) and (2) do not need to be filed until after the calendar year of the event being reported. A filer of those other information returns will therefore know at the beginning of the calendar year whether the filer is required to file at

least the applicable number of those other information returns because those returns relate to the preceding calendar year. Thus, the Treasury Department and the IRS propose to require electronic filing of Forms 8300 only if the filer is required to file other information returns electronically.

Under these proposed regulations, filers would generally understand early in the calendar year their electronic-filing obligations for Forms 8300 without an unduly complex aggregation rule. In addition, these proposed regulations are consistent with the TFA's emphasis on development, improvement, and expansion of modern technology (see, for example, ''An Act To amend the Internal Revenue Code of 1986 to modernize and improve the Internal Revenue Service, and for other purposes'' and ''Subtitle B—Development of Information Technology'' under ''Title II—21st Century IRS''), and are within the Secretary's expanded authority under the TFA to prescribe regulations requiring persons to file returns electronically.

E. Corrected Returns Must Be Filed in the Same Manner as the Original Return

Section 301.6011–2 provides that the non-aggregation rule applies separately to each type of corrected information return covered by § 301.6011–2(b) such that, for purposes of determining whether a person meets the 250-return electronic-filing threshold, corrected information returns are counted separately from original information returns, and each type of corrected information return is counted separately.

The Treasury Department and the IRS have determined that, to increase the IRS's timeliness and accuracy in processing information returns, if persons are required to file original information returns electronically, they must file any corresponding corrected information returns electronically. Likewise, if persons permitted to file information returns on paper file those information returns on paper, they must also file any corresponding corrected information returns on paper. As discussed in the next three paragraphs, this will increase the IRS's efficiency in processing returns and should not cause taxpayers to incur unreasonable costs.

Paper information returns are generally filed at one of three different IRS Submission Processing Centers, depending on the filer's legal residence (for individuals) or principal place of business (for entities). When the IRS receives paper returns, it must convert the return to an electronic-data record before it can use the information effectively. Electronic information returns, on the other hand, do not go through Submission Processing Centers; they are generally filed through the IRS's Filing Information Returns Electronically (FIRE) system or Affordable Care Act Information Returns (AIR) system, depending on the type of return.

Because the procedures for processing electronic returns and paper returns are different, when an original return is filed on paper and a corrected return is filed electronically shortly thereafter, the IRS may not have finished processing the original paper return before the electronic return is received. The IRS is thus not able to reconcile differences as quickly as when the original and corrected returns are filed in the same manner. Similar processing issues arise when an original return is filed electronically and the corrected return is filed on paper.

This proposed requirement will not result in any additional costs or burdens on taxpayers with respect to electronic filing because a filer who filed the original return electronically has the software necessary to file a corrected return electronically. Thus, the proposed regulations would add new paragraphs (c)(4)(ii)(A) and (c)(4)(ii)(B) to § 301.6011–2 to provide that corrected information returns must be filed electronically if the corresponding original return was required to be filed electronically, and that corrected returns must be filed on paper if the corresponding original return was permitted to be, and was, filed on paper. In addition, the proposed regulations would amend § 301.6721–1(a)(2)(ii), as discussed under section 5, Proposed § 301.6721–1, Rules Relating to Penalties for Failure to File Correct Information Returns, to provide that a failure to file a corrected information return in the same manner as the corresponding original will be deemed a failure to correct the corresponding original information return.

F. Special Electronic-Filing Threshold for Partnerships of Any Size

Section 2301 of the TFA amended the special rule for partnerships in section 6011(e)(5) to authorize the Secretary to reduce the electronic-filing threshold for partnerships required to file returns. The amended special rule for partnerships authorized the Secretary to reduce the electronic-filing threshold at an accelerated rate when compared to the general electronic-filing threshold, phasing out this special rule for partnerships for returns required to be filed during calendar years after 2021. These proposed regulations do not include a special electronic-filing threshold for partnerships because the final regulations are not expected to be applicable before the 2022 filing season, at which point the special rule for partnerships will be phased out. For all the reasons discussed in this preamble, the proposed regulations would reduce, for all persons, including partnerships, the electronic-filing threshold for information returns covered under § 301.6011–2(b) from 250 to 100, for returns required to be filed during calendar year 2022, and from 100 to 10, for returns required to be filed during calendar years after 2022. See section 2.C., Amending the electronic-filing threshold.

G. Special Electronic-Filing Rule for Partnerships Having More Than 100 Partners

Paragraph (6) of section 6011(e), as that section was amended by the TFA, provides, ''Notwithstanding paragraph (2)(A), the Secretary shall require partnerships having more than 100 partners to file returns on magnetic media'' (100-partner rule). The statute uses the general term ''returns'' without specifying the type of returns that must be filed electronically. But the legislative history of the Taxpayer Relief Act of 1997, which added the 100-partner rule to section 6011(e), mentions the rule's application only with respect to partnership returns. H.R. Rep. No. 105–220, at 675 (1997) (Conf. Rep.) (''The House bill provides generally that any partnership is required to provide the tax return of the partnership (Form 1065), as well as copies of the schedule[s] sent to each partner (Form K–1), to the Internal Revenue Service on magnetic media. An exception is provided for partnerships with 100 or fewer partners.'').

In accordance with this legislative history, the Secretary promulgated regulations in 1999, § 301.6011–3 (TD 8843), requiring partnerships with more than 100 partners to file partnership returns and all other information required by the applicable forms and schedules electronically.

In 2018, however, Congress enacted the TTCA and moved this 100-partner rule from section 6011(e)(2), where it appeared as flush language under the 250-threshold limitation, to a new subparagraph (B) under section 6011(e)(5), ''Special rules for partnerships.'' There is no legislative history to the 2018 TTCA that explains why Congress moved the 100-partner rule. But after the TTCA was enacted, the Joint Committee on Taxation describes the rule with respect to ''returns,'' rather than ''tax return of the

partnership (Form 1065),'' which is how the legislative history of the Taxpayer Relief Act of 1997 described it. Staff of the J. Comm. On Taxation, Technical Explanation of the Revenue Provisions of the House Amendment to the Senate Amendment to H.R. 1625, at 52 (JCX–6–18) (''Present law requires that . . . . partnerships having more than 100 partners are required to file returns electronically.''). In 2019, a year after TTCA moved the 100-partner rule, Congress, in Title II of the TFA, under Subtitle D, ''Expanded Use of Electronic Systems,'' again moved the 100-partner rule to a new paragraph (6) under section 6011(e), ''Partnerships required to file on magnetic media.''

In light of the Joint Committee on Taxation's referring to ''returns'' in general in describing this provision of the TTCA, the TFA's emphasis on development, improvement, and expansion of modern technology, as discussed in this preamble, the TFA's emphasis on electronic filing (see ''Subtitle D—''Expanded Use of Electronic Systems'' under Title II), and the accessibility and prevalence of electronic filing, the Treasury Department and the IRS propose to add a new paragraph (c)(3)(ii)(B) to § 301.6011–2 to require partnerships with more than 100 partners to file their information returns covered by § 301.6011–2(b) electronically, regardless of the number of information returns being filed.

3. Proposed § 1.6050I–0, Table of Contents, and § 1.6050I–1, Returns Relating to Cash in Excess of $10,000 Received in a Trade or Business

Section 1.6050I–1(e)(1) provides that Form 8300 must be filed with the IRS by the 15th day after the date cash in excess of $10,000 is received in a trade or business. Section 1.6050I–1(e)(3) provides that Form 8300 must be filed by mailing it to the address shown in the instructions on the form. For all the reasons discussed in this preamble, the proposed regulations would remove references to mailing Form 8300 to the IRS and require that the form be filed as directed by the form's instructions. See section 2.B., Form 8300 required to be filed electronically; section 2.C., Amending the electronic-filing threshold; and section 2.D., Aggregation of returns to determine whether the electronic-filing threshold is met. The instructions to Form 8300 will explain how to file the form electronically. The proposed regulations would also update outdated citations in § 1.6050I–0 and § 1.6050I–1 that cross-reference to the regulations under Title 31 of the CFR and clarify the example in § 1.6050I–1(d)(2)(iv).

4. Proposed § 1.6050I–2, Returns Relating to Cash in Excess of $10,000 Received as Bail by Court Clerks

Section 1.6050I–2(c)(1)(i) provides that Form 8300 must be filed with the IRS by the 15th day after the date cash bail in excess of $10,000 is received. Section 1.6050I–2(c)(3)(i) provides that Form 8300 must be filed with the IRS office designated in the instructions on the form. For all the reasons discussed in this preamble, the proposed regulations would remove references to filing Form 8300 with a specific IRS office and require that the form be filed as directed by the form's instructions. See section 2.B., Form 8300 required to be filed electronically; section 2.C., Amending the electronic-filing threshold; and section 2.D., Aggregation of returns to determine whether the electronic-filing threshold is met. The instructions to Form 8300 will explain how to file the form electronically.

5. Proposed § 301.6721–1, Rules Relating to Penalties for Failure To File Correct Information Returns

Paragraph (a)(2)(ii) of § 301.6721–1, Failure to file correct information returns, states that no penalty will be imposed solely by reason of failing to file electronically, except to the extent that a failure occurs with respect to more than 250 returns. In accordance with changes made to the 250-return threshold by section 2301 of the TFA, the proposed amendments to § 301.6721–1 would remove references to a 250-return threshold with respect to penalties for failure to file correct information returns.

Section 301.6721–1(a)(2)(ii) also states that the threshold requirements apply separately to original and corrected returns, such that a filer that files 300 returns on Form 1099–DIV and later files 70 corrected returns on Form 1099–DIV could file the corrected returns either on the prescribed paper form (because they fall below the 250-threshold requirement) or electronically. For the reasons discussed in this preamble, the Treasury Department and the IRS propose to remove this rule because they have determined that corrected returns should be filed electronically if the corresponding original returns were so filed. See section 2.E., Corrected returns must be filed in the same manner as the original return. These proposed regulations would thus amend § 301.6721–1(a)(2)(ii) to provide that a failure to file a corrected information return in the same manner as the corresponding original will be deemed a failure to correct the corresponding original information return such that the filer will not receive the benefit of a reduced penalty under § 301.6721–1(b) for that corrected information return.

6. Proposed § 301.6011–3, Rules for Filing Partnership Returns Electronically

Section 301.6011–3 prescribes standards for determining whether a partnership must file its partnership return electronically. In 2018, the TTCA amended section 6011(e) to authorize the Secretary to incrementally reduce, by regulation, the electronic-filing threshold for partnerships. When section 2301 of the TFA amended that particular statute again in 2019, to further reduce the electronic-filing threshold for partnerships, the Secretary had not yet promulgated regulations to implement that reduced-threshold rule for partnerships. As discussed in this preamble, these proposed regulations do not include a special electronic-filing threshold for partnerships because the final regulations are not expected to be applicable before the 2022 filing season, at which point the special rule for partnerships will be phased out. See section 2.F., Special electronic-filing threshold for partnerships of any size. For returns required to be filed during calendar years after 2021, section 2301 of the TFA authorizes the Secretary to reduce the electronic-filing threshold to 10 for all persons, including partnerships. These proposed regulations would amend § 301.6011–3(a) to reduce the electronic-filing threshold to 10 returns for any partnership, in accordance with section 6011(e), as amended by the TFA. In addition, for all the reasons discussed in this preamble, the proposed regulations would add a new paragraph (a)(5) to § 301.6011–3 that provides that all returns of any type, including partnership returns, excise-tax returns, employment-tax returns, and information returns (but not including schedules required to be attached to or included with a partnership return), are counted in the aggregate for purposes of determining whether a partnership of any size meets the electronic-filing threshold of 10 returns in a calendar year, and thus must file its partnership return electronically. See sections 2.D., Aggregation of returns to determine whether the electronic-filing threshold is met; and 2.G., Special electronic-filing rule for partnerships having more than 100 partners. These rules relating to the requirements for determining when a partnership is required to file its partnership return electronically do not

limit the application of any other statute affecting partnership returns that must be filed electronically, such as section 6033(n), which requires a partnership return filed by a section 501(d) apostolic organization to be filed electronically.

7. Proposed § 301.6011–5, Rules for Filing Corporate Income Tax Returns Electronically

Section 301.6011–5 prescribes standards for determining whether a corporation must file its income tax returns electronically and requires large corporations to file the corporate income tax return electronically if the corporation is required to file during the calendar year at least 250 returns of any type. The regulation, however, applies only to those corporations that report total assets at the end of the corporate taxable year of $10 million or more on Schedule L of their Form 1120. Section 2301 of the TFA amended section 6011(e) to authorize the Secretary to prescribe regulations to reduce the number of returns that a person may be required to file during a calendar year before the Secretary may impose an electronic-filing requirement. These proposed regulations would remove references to the 250-return threshold and reduce the electronic-filing threshold for corporate income tax returns to 10, for returns required to be filed during calendar years after 2021, in accordance with section 6011(e), as amended by the TFA. In addition, the Treasury Department and the IRS propose to remove the $10 million rule, making the regulation applicable to all corporations regardless of reportable assets. The $10 million rule was never required by the Code; rather, the Treasury Department and the IRS prescribed the rule in 2007 to help ensure that electronic-filing burdens and costs were appropriate, given the existing limits and accessibility to electronic-filing technology at that time. With the current prevalence and accessibility of electronic filing even for small businesses, as well as the benefits of quicker return processing, the $10-million rule is no longer needed. Accordingly, the proposed regulations would require that any corporation required to file a corporate income tax return under § 1.6012–2, regardless of the corporation's reported total assets at the end of its taxable year, file that return electronically if the corporation is required to file at least 10 returns of any type during calendar years after 2021. The proposed regulations would also update the example to reflect these changes. The proposed regulations do not change the existing rule in § 301.6011–5 that all returns of any type are counted in determining whether a corporation is required to file its income tax return electronically.

8. Proposed § 301.6037–2, Required Use of Electronic Form for Returns of Electing-Small Business Corporation

Section 301.6037–2 prescribes standards for determining whether an S corporation must file its S corporation return electronically. Section 301.6037–2 requires S corporations to file their corporate income tax return electronically if the corporation is required to file during the calendar year at least 250 returns of any type, but the regulation applies only to those S corporations that report total assets at the end of the corporation's taxable year that equal or exceed $10 million on Schedule L of Form 1120–S.

Section 2301 of the TFA amended section 6011(e), authorizing the IRS to change the 250-return threshold to 10, for returns required to be filed during calendar years after 2021. These proposed regulations would remove references to the 250-return threshold and reduce the electronic-filing threshold for S corporations to 10 in accordance with section 6011(e), as amended by the TFA. In addition, the Treasury Department and the IRS propose to remove the $10 million rule for the same reasons that it is eliminating the rule for corporations. See section 7, Proposed § 301.6011–5, Rules for Filing Corporate Income Tax Returns Electronically. With the current prevalence and accessibility of e-filing, as well as the benefits of quicker processing of returns, the $10 million rule is no longer needed. Accordingly, the proposed regulations would require that any S corporation required to file an S-corporation return under § 1.6037–1, regardless of the corporation's reported total assets at the end of its taxable year, file its income tax return electronically if the corporation is required to file at least 10 returns of any type during the calendar year. The proposed regulations would also update the example illustrating this rule to reflect these changes.

9. Proposed §§ 1.6033–4 and 301.6033–4, Required Filing in Electronic Form for Returns by Organizations Required To File Returns Under Section 6033

Section 1.6033–4 provides that the return of an organization that is required to be filed electronically under § 301.6033–4 must be filed in accordance with IRS revenue procedures, publications, forms, or instructions, including those posted electronically.

Section 301.6033–4 provides that an organization required to file a return under section 6033 on Form 990 must file its Form 990 electronically if the organization is required to file during the calendar year at least 250 returns of any type and if the organization has total assets as of the end of the taxable year of $10 million or more. It also provides that any organization (regardless of total assets) required to file Form 990–PF must file its Form 990–PF electronically if it is required to file at least 250 returns of any type during the calendar year.

In accordance with section 3101 of the TFA, these proposed regulations would amend §§ 1.6033–4 and 301.6033–4 to replace the term ''magnetic media'' with ''in electronic form.'' These proposed regulations would also amend § 301.6033–4 to remove any references to thresholds that establish a requirement to file electronically because the TFA now requires that any organization required to file a return under section 6033 must file such return in electronic form. Likewise, the proposed regulations would amend § 301.6033–4 by removing the following paragraphs: Paragraph (d)(1), which defines the term ''magnetic media''; paragraph (d)(3), which defines the term ''determination of 250 returns''; and paragraph (e), which illustrates by example how the 250 number is determined. In addition, the proposed regulations would remove § 301.6033–4(b), which provides that the Commissioner may grant waivers of the electronic-filing requirement.

Section 3101 of the TFA does not provide for any waiver of or alternate method to the electronic-filing requirements for returns required to be filed under section 6033. Accordingly, these proposed regulations would amend § 301.6033–4 by removing paragraph (b) that provides for a waiver of the requirements.

Finally, these proposed regulations would amend § 301.6033–4(d)(2) to include Form 990–EZ, ''Short Form Return of Organization Exempt From Income Tax,'' as a return required to be filed under section 6033, clarifying that section 3101 of the TFA mandates that all returns required to be filed under section 6033 must be filed in electronic form.

10. Proposed § 53.6011–1(c) Deletion, Joint Filing of a Form 4720 Return

Section 3101(a) of the TFA amended section 6033(n) to provide that any exempt organization required to file a return under section 6033 must file such return in electronic form. Section 1.6033–2(a)(2) provides, under the

broad authority of section 6033(a)(1) (requiring every organization exempt from taxation under section 501(a) to file an annual return, stating specifically the items of gross income, receipts, and disbursements, and such other information for the purpose of carrying out the internal revenue laws as the Secretary may by forms or regulations prescribe), that every private foundation must file Form 990–PF, *Return of Private Foundation,* as its annual information return. In the case of a private foundation liable for tax under chapter 42, such information as is required by Form 4720 is to be furnished by the private foundation as part of its annual information return. See § 1.6033–2(a)(2)(ii)(J). The preamble to the final regulations adding § 1.6033–2(a)(2)(ii)(J) specifically noted that Form 4720, when filed by a private foundation, is part of the annual information return required to be filed under section 6033 as well as a tax return required to be filed under section 6011. Accordingly, Form 4720 filed by a private foundation as part of the Form 990–PF is a return required to be filed under section 6033 and is thus required to be filed in electronic form as a return required under section 6033(n). For the electronic-filing requirement for persons not described under section 509(a) as a private foundation, see section 16 of this preamble, Proposed § 301.6011–12, Required Use of Electronic Form for Returns of Certain Excise Taxes Under Chapters 41 And 42 of the Internal Revenue Code.

If Form 4720 is filed by a private foundation (or by a trust described in section 4947(a)(2)) with respect to a transaction to which other persons are required to file under § 53.6011–1(b) (persons liable for excise tax imposed by Chapters 41 and 42 of the Code), and if the other persons' tax years are the same as the foundation's or trust's, § 53.6011–1(c) allows the private foundation and such other persons to file a joint Form 4720, and, to the extent applicable, that form will be considered as the other persons' return for purposes of complying with the filing requirement under § 53.6011–1(b). This current regulatory permission to jointly file Form 4720, however, is incompatible with the requirement under section 6033(n) to file the return electronically. Accordingly, because the Form 4720 cannot be filed jointly in electronic form, the proposed regulations would delete § 53.6011–1(c). Disqualified persons thus will no longer be able to meet their tax filing obligation under § 53.6011–1(b) by the joint-filing process.

Notice 2021–01, 2021–2 I.R.B. 315 (January 11, 2021), announced the IRS's intent to remove § 53.6011–1(c) because the amendments the TFA made to sections 6104 (that any annual return required to be filed electronically under section 6033(n) must be made available by the Secretary to the public as soon as practicable in a machine-readable format) and 6033 rendered unfeasible the ability for a private foundation and other persons to jointly file the same Form 4720 electronically. Notice 2021–01 was first released to the public on December 16, 2020, and substantially described the expected contents of the proposed amendments to § 53.6011–1, in accordance with section 7805(b)(1)(C). Thus, the proposed changes to § 53.6011–1 described in this section are proposed to apply retroactively as of January 1, 2021, as allowed by section 7805(b)(1)(C).

11. Proposed § 301.6057–3, Required Use of Electronic Form for Filing Requirements Relating to Deferred Vested Retirement Benefit

Section 6057(a) requires the plan administrator (within the meaning of section 414(g)) of each plan, to which the vesting standards of section 203 of the Employee Retirement Income Security Act of 1974 (ERISA) apply for a plan year, to file, within the time prescribed by regulations, a registration statement with the Secretary. The registration statement must set forth the following information relating to the plan: (1) The name of the plan; (2) the name and address of the plan administrator; (3) the name and identifying information of plan participants who separated from service covered by the plan and are entitled to deferred vested retirement benefits; and (4) the nature, amount, and form of deferred vested retirement benefits to which the plan participants are entitled. The form used to satisfy the reporting requirements under section 6057 is Form 8955–SSA, *Annual Registration Statement Identifying Separated Participants with Deferred Vested Benefits.*

Section 6057(b) provides that any plan administrator required to register under section 6057(a) must, within the time prescribed by regulations, also notify the Secretary of any change in the name of the plan or the name and address of the plan administrator, the termination of the plan, or the merger or consolidation of the plan with any other plan or its division into two or more plans.

Section 301.6057–3 provides that a registration statement required to be filed under section 6057(a) or a notification required to be filed under section 6057(b) must be filed electronically if the filer is required by the Code or regulations to file at least 250 returns during the calendar year that includes the first day of the plan year. For the reasons discussed in this preamble, and consistent with section 6011(e), as amended by the TFA, these proposed regulations would remove references to the 250-return threshold and would reduce the electronic-filing threshold to 10 for registration statements required to be filed under section 6057(a) and notifications required under section 6057(b) with respect to an employee benefit plan for any plan year that begins after December 31, 2021 (but only for filings with a filing deadline, not taking into account extensions, after July 31, 2022). See section 2.C., Amending the electronic-filing threshold.

12. Proposed § 301.6058–2, Required Use of Electronic Form for Filing Requirements Relating to Information Required in Connection With Certain Plans of Deferred Compensation

Section 6058(a) generally requires that every employer maintaining a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation, or the plan administrator (within the meaning of section 414(g)) of the plan, file an annual return stating such information as the Secretary may by regulations prescribe with respect to the qualification, financial condition, and operations of the plan. The reporting requirement under section 6058(a) is satisfied by filing a return in the Form 5500 series. The Form 5500, *Annual Return/Report of Employee Benefit Plan,* the Form 5500–SF, *Short Form Annual Return/Report of Small Employee Benefit Plan,* and Form 5500–EZ, *Annual Return of A One-Participant (Owners/Partners and Their Spouses) Retirement Plan or A Foreign Plan,* make up the Form 5500 series.

Section 301.6058–2(a) provides that a return required to be filed under section 6058 with respect to an employee benefit plan must be filed electronically if the filer is required by the Code or regulations to file at least 250 returns during the calendar year that includes the first day of the plan year. For the reasons discussed in this preamble, and in accordance with section 6011(e), as amended by the TFA, these proposed regulations would remove references to the 250-return threshold and reduce the electronic-filing threshold to 10 for returns required to be filed under section 6058 with respect to an employee benefit plan for any plan year that begins after December 31, 2021 (but

only for filings with a filing deadline, not taking into account extensions, after July 31, 2022). See section 2.C., Amending the electronic-filing threshold. In addition, these proposed regulations would provide a cross reference, under § 301.6058–2(d)(3), Calculating the number of returns, to new section 6011(e)(6) to alert taxpayers that information regarding each plan for which information is provided on a combined annual return to satisfy the requirements under section 6058 is treated as a separate return for purposes of determining the electronic-filing threshold.

Under section 104 of ERISA, the plan administrator of a plan described in section 6058(a) of the Code that is also an employee pension benefit plan within the meaning of section 3(2) of ERISA must file an annual report on Form 5500, *Annual Return/Report of Employee Benefit Plan,* or Form 5500–SF, *Short Form Annual Return/Report of Small Employee Benefit Plan* (and all attachments to those forms, including Schedules SB and MB) electronically using the Department of Labor's EFAST2 system, without regard to the number of returns the filer is required to file under the Code. The Department of Labor has advised the Treasury Department and the IRS that this proposed regulation does not affect the obligations of any person required to file an annual report electronically under 29 CFR 2520.104a–2 and section 104 of ERISA. An electronic filing on Form 5500 or Form 5500–SF also satisfies any obligation to file such forms using electronic form under section 6011 of the Code. An employer that maintains a one-participant or foreign plan (which is not subject to section 104 of ERISA) or the plan administrator of the plan may satisfy the annual return filing requirements under section 6058(a) of the Code by filing a Form 5500–EZ, *Annual Return of A One-Participant (Owners/Partners and Their Spouses) Retirement Plan or A Foreign Plan,* which is required to be filed electronically using the Department of Labor's EFAST2 system only if the employer or plan administrator is otherwise required to file using electronic form under section 6011.

13. Proposed § 301.6059–2, Required Use of Electronic Form for Filing Requirements Relating to Periodic Report of Actuary

Section 6059(a) generally requires that a plan administrator (as defined in section 414(g)) of each defined benefit plan to which section 412 applies file the actuarial report described in section 6059(b) for the first plan year for which section 412 applies to the plan and for each third plan year thereafter (or more frequently if the Secretary determines that more frequent reports are necessary). The reporting requirements under section 6059(a) and (b) are satisfied by filing Schedule SB (Form 5500), *Single Employer Defined Benefit Plan Actuarial Information* and Schedule MB (Form 5500), *Multiemployer Defined Benefit Plan and Certain Money Purchase Plan Actuarial Information.* Section 301.6059–2 provides that an actuarial report required to be filed under section 6059 with respect to an employee benefit plan must be filed electronically if the filer is required by the Code or regulations to file at least 250 returns during the calendar year that includes the first day of the plan year. For the reasons discussed in this preamble, and in accordance with section 6011(e), as amended by the TFA, these proposed regulations would remove references to the 250-return threshold and would reduce the electronic-filing threshold to 10, for actuarial reports required to be filed under section 6059 with respect to an employee benefit plan for any plan year that begins after December 31, 2021 (but only for filings with a filing deadline, not taking into account extensions, after July 31, 2022). See section 2.C., Amending the electronic-filing threshold. The Department of Labor has advised the Treasury Department and the IRS that the electronic-filing threshold under section 6011(e) does not affect the obligation of a plan administrator or plan sponsor to file electronically with the Department of Labor a Schedule SB or Schedule MB as an attachment to the Form 5500, as required by 29 CFR 2520.104a–2 and section 104 of ERISA.

14. Proposed § 301.6011–10, Certain Organizations, Including Trusts, Required To File Unrelated Business Income Tax Returns in Electronic Form

Section 3101(b)(2) of the TFA amended section 6011 to redesignate paragraph (h) as paragraph (i) and add new paragraph (h) that requires any organization required to file an annual return under section 6011 that relates to any tax imposed by section 511 to file such return in electronic form, effective for taxable years beginning after July 1, 2019. Section 3101 of the TFA does not provide for any waiver of or alternative method to the electronic-filing requirement for returns required to be filed under section 6011(h). The proposed regulations would add a new regulation under section 6011(h), § 301.6011–10, in accordance with the TFA, to require any organization described in section 511(a)(2) subject to the tax under section 511(a)(1) or any trust described in section 511(b)(2) subject to the tax under section 511(b)(1) on their respective unrelated business taxable income to file their unrelated business income tax returns electronically.

15. Proposed § 301.6011–11, Required Use of Electronic Form for Returns for Certain Tax-Advantaged Bonds

Under former sections 54AA and 6431(f) of the Code, issuers of qualified taxable bonds that provide a refundable federal tax credit payable directly to the issuer of the bond, such as build-America bonds, recovery zone economic development bonds, new clean renewable energy bonds, qualified energy conservation bonds, qualified zone academy bonds, and qualified school construction bonds, can elect to receive a direct payment from the federal government based upon a percentage of the interest payments on these bonds. Section 3.1 of Notice 2009–26, 2009–16 I.R.B. 833, 836 (April 20, 2009), and section 3 of Notice 2010–35, 2010–19 I.R.B. 660, 662 (May 10, 2010), provide that issuers of qualified bonds must submit a Form 8038–CP, *Return for Credit Payments to Issuers of Qualified Bonds,* to request payment of the amount of the credit within a prescribed time before or after each applicable interest payment date, depending on whether the bonds are fixed rate or variable rate. During 2013 to 2018, the IRS processed an average of $5 billion in direct payment requests; amounts paid on each return varied from less than $1,000 to more than $65 million. During 2019, state and local governments filed approximately 10,000 Forms 8038–CP in paper form. The IRS expects that it will continue to receive Forms 8038–CP from these issuers during the entire term of the bonds, which may be more than 20 years.

The proposed regulations would require filers who are required to file at least 10 returns of any type during the calendar year to file their Forms 8038–CP electronically, as directed by the form's instructions. This requirement would increase the timeliness and accuracy of processing these forms and promote IT modernization efforts. Proposed § 301.6011–11 would also provide that the Commissioner may grant individual waivers of the e-filing requirement of this section in cases of undue hardship. The Treasury Department and the IRS anticipate issuing guidance that will set forth procedures whereby a taxpayer may request a hardship waiver for filing Form 8038–CP electronically.

16. Proposed § 301.6011–12, Required Use of Electronic Form for Returns of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code

Section 2301 of the TFA amended section 6011(e), changing the 250-return threshold to a 10-return threshold for returns required to be filed in calendar years after 2021. The proposed regulations would add a new regulation under section 6011(e), § 301.6011–12, that would require the electronic filing of Form 4720, *Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code.* The proposed regulations would require a person to file the Form 4720 electronically if that person is required to file at least 10 returns of any type during the calendar year. Proposed § 301.6011–12 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship. The Treasury Department and the IRS anticipate issuing guidance that will set forth procedures whereby a taxpayer may request a hardship waiver for filing Form 4720 electronically. The proposed regulations relating to the requirements for determining whether a person must file its Form 4720 electronically would not limit the application of any other statute affecting Form 4720, such as section 6033(n), which requires a Form 4720 filed by organizations recognized as tax exempt under section 501(c)(3) and classified as private foundations under section 509(a) to be filed electronically, as discussed under section 10, Proposed § 53.6011–1(c) Deletion, Joint Filing of a Form 4720 Return.

17. Proposed § 301.6011–13, Required Use of Electronic Form for Split-Interest Trust Returns

Section 2301 of the TFA amended section 6011(e), changing the 250-return threshold to a 10-return threshold for returns required to be filed in calendar years after 2021. The proposed regulations would add a new regulation under section 6011(e), § 301.6011–13, that would require the filing of Form 5227, *Split-Interest Trust Information Return,* electronically. Forms 5227 are filed by split-interest trusts to report the trust's financial activities, including distributions to the beneficiaries. The proposed regulations would require a trust to file the Form 5227 electronically if the trust is required to file at least 10 returns of any type during the calendar year. Proposed § 301.6011–13 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship. The Treasury Department and the IRS anticipate issuing guidance that will set forth procedures whereby a taxpayer may request a hardship waiver for filing Form 5227 electronically.

18. Proposed § 301.6011–14, Required Use of Electronic Form or Other Machine-Readable Form for Material Advisor Disclosure Statements

The proposed regulations would add a new regulation under section 6011(e), § 301.6011–14, that would require the filing of Form 8918, *Material Advisor Disclosure Statement,* electronically or in other machine-readable form, in accordance with revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Section 6111 requires each material advisor with respect to any reportable transaction to make a return setting forth certain information with respect to the reportable transaction. Section 301.6111–3(d) clarifies that the return required to be filed under section 6111(a) is the Form 8918. Form 8918 is currently filed on paper and must be mailed to the Office of Tax Shelter Analysis in Ogden, Utah. The proposed regulations would require a material advisor to file the Form 8918 electronically or in other machine-readable form if the material advisor is required to file at least 10 returns of any type during the calendar year, in accordance with section 6011(e), as amended by section 2301 of the TFA. This requirement would increase the timeliness and accuracy of processing the data on Form 8918, reduce postage costs, and promote IT modernization efforts. Proposed § 301.6011–14 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship. The Treasury Department and the IRS anticipate issuing guidance that will set forth procedures whereby a taxpayer may request a hardship waiver from filing Form 8918 electronically.

19. Proposed § 301.6011–15, Required Use of Electronic Form for Withholding Tax Returns

The proposed regulations would add a new regulation under section 6011(e), § 301.6011–15, that would require the filing of Form 1042, *Annual Withholding Tax Return for U.S. Source Income of Foreign Persons,* electronically in accordance with revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Sections 1441 and 1442 require withholding agents to withhold tax from payments made to foreign persons with respect to certain U.S. source income and to report those payments and the tax withheld for each recipient. Section 1.1461–1(c) specifies that the reporting be on Form 1042–S, *Foreign Persons' U.S. Source Income Subject to Withholding.* In addition, § 1.1461–1(b) requires withholding agents to make an annual income tax return on Form 1042 that reports the aggregate income paid and taxes withheld for the preceding calendar year.

The IRS verifies the amount of withholding reported on Form 1042 and deposited with the IRS against amounts reported as withheld on Forms 1042–S. Form 1042–S is already required to be electronically filed to the extent provided under § 301.6011–2 for a withholding agent that is not a financial institution. But the Form 1042 is not required to be electronically filed. To increase the timeliness and accuracy of processing refunds and credits claimed by foreign persons that have amounts withheld and reported on Form 1042–S, proposed § 301.6011–15 would require Form 1042 filers—except for individuals, estates, or trusts—to file Form 1042 electronically if they are required to file 10 or more returns of any type during the calendar year, in accordance with section 6011(e), as amended by section 2301 of the TFA. Proposed § 301.6011–15 would also require partnerships with more than 100 partners to file their Forms 1042 electronically, regardless of the number of returns the partnership is required to file during the calendar year. Proposed § 301.6011–15 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship.

20. Proposed § 301.6012–2, Required Use of Electronic Form for Income Tax Returns of Certain Political Organizations

Section 2301 of the TFA amended section 6011(e), changing the 250-return threshold to a 10-return threshold for returns required to be filed in calendar years after 2021. The proposed regulations would add a new regulation under sections 6011(e) and 6012(a), § 301.6012–2, to require the filing of Form 1120–POL, *U.S. Income Tax Return for Certain Political Organizations* electronically. The Form 1120–POL is filed by political organizations, described in section 527 of the Code, to report income not specifically excluded from tax under section 527 and by exempt organizations subject to tax under section 527(f)(1) of the Code. The

proposed regulations would require an organization to file the Form 1120–POL electronically if the organization is required to file at least 10 returns of any type during the calendar year. Proposed § 301.6012–2 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship. The Treasury Department and the IRS anticipate issuing guidance that will set forth procedures whereby a taxpayer may request a hardship waiver for filing Form 1120–POL electronically.

21. Proposed § 54.6011–3, Required Use of Electronic Form for the Filing Requirements for the Return for Certain Excise Taxes Related to Employee Benefit Plans

The proposed regulations would add a new regulation under section 6011(e), § 54.6011–3, to require the filing of Forms 5330, *Return of Excise Taxes Related to Employee Benefit Plans,* electronically. Section 2301 of the TFA amended section 6011(e), changing the 250-return threshold to a 10-return threshold for returns required to be filed during calendar years after 2021. The proposed regulations would require a filer to file the Form 5330 electronically if the filer is required to file at least 10 returns of any type during the calendar year. Proposed § 54.6011–3 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship. The Treasury Department and the IRS anticipate issuing guidance that will set forth procedures whereby a taxpayer may request a hardship waiver for filing Form 5330 electronically.

22. Proposed § 1.1461–1, Payment and Returns of Tax Withheld

Section 1.1461–1 prescribes requirements for withholding agents to file information returns with respect to U.S. source income of foreign persons. Section 1.1461–1(c)(5) provides that a withholding agent that makes 250 or more Form 1042–S information returns for a taxable year must file those forms electronically as required under § 301.6011–2(b). The proposed regulations would amend § 1.1461–1 to remove paragraph (c)(5) because the electronic-filing requirement for Form 1042–S is contained in § 301.6011–2(b) and the 250-return threshold would no longer apply if the proposed amendments to § 301.6011–2 are finalized in a Treasury decision.

23. Proposed § 1.1474–1, Liability for Withheld Tax and Withholding Agent Reporting

Section 1.1474–1 provides rules for withholding agents making payments under chapter 4 of the Code. The first sentence in § 1.1474–1(e) provides that withholding agents that are not financial institutions and that are required to file 250 or more Forms 1042–S for a taxable year must file those forms electronically, referencing § 301.6011–2(b). The proposed regulations would amend § 1.1474–1 to remove the first sentence in § 1.1474–1(e) because the electronic-filing requirement for Form 1042–S is contained in § 301.6011–2(b) and the 250-return threshold would no longer apply if the proposed amendments to § 301.6011–2 are finalized in a Treasury decision.

24. Proposed § 301.1474–1, Required Use of Electronic Form for Financial Institutions Filing Form 1042, Form 1042–S, or Form 8966

These proposed regulations would amend § 301.1474–1 to add a requirement that a financial institution must file its Form 1042 electronically, without regard to the number of returns required to be filed during the calendar year, in accordance with section 6011(e)(4). The existing provision in § 301.1474–1(b), which provides that the Commissioner may grant individual waivers of the requirements of § 301.1474–1 in cases of undue hardship, would also apply to the proposed electronic-filing requirement relating to Form 1042.

25. Proposed § 1.6050M–1, Information Returns Relating to Persons Receiving Contracts From Certain Federal Executive Agencies

Section 1.6050M–1 requires federal executive agencies who enter into certain contracts, as defined under § 1.6050M–1(b)(2), to file information returns with respect to those contracts. Under § 1.6050M–1(d), the information returns must be filed on a quarterly basis; in addition, if the federal executive agency, on any October 1, expects to enter into 250 or more contracts during the one-year period beginning on October 1, it must file the information returns electronically.

Section 2301 of the TFA amended section 6011(e), authorizing the IRS to change the 250-return threshold to 10, for returns required to be filed during calendar years after 2021. For the reasons discussed in this preamble, and consistent with section 6011(e), as amended by the TFA, these proposed regulations would remove references to the 250-return threshold under § 1.6050M–1 and would reduce the electronic-filing threshold from 250 to 100, for information returns required to be filed during calendar year 2022, and from 100 to 10, for information returns required to be filed during calendar years after 2022.

Proposed § 1.6050M–1 would also provide that the Commissioner may grant individual waivers of the requirements of this section in cases of undue hardship.

26. Proposed § 1.6045–4, Information Returns Relating to Persons Receiving Contracts From Certain Federal Executive Agencies

Section 1.6045–4 requires a real estate reporting person to file information returns with respect to real-estate transactions. Section 1.6045–4(k) provides rules for filing these returns electronically. The form used to report these transactions is a form covered under § 301.6011–2(b)(1). Section 301.6011–2 provides the rules for electronically filing the forms listed in § 301.6011–2(b)(1). These proposed regulations would thus remove paragraph (k) from § 1.6045–4 because the electronic-filing requirement is contained in § 301.6011–2.

27. Withdrawal of May 2018 Proposed Regulations

In light of the TFA, the Treasury Department and the IRS withdraw the May 2018 proposed regulations under section 6011(e) because those proposed regulations interpret a provision of the Code that has been amended. The Treasury Department and the IRS have determined that the amendments made to section 6011(e) by the TFA require guidance to be issued by regulations. Withdrawing the proposed regulations and reissuing new proposed regulations ensure that all persons affected by the proposed regulations will have a meaningful opportunity to publicly comment.

Special Analyses

These regulations are not subject to review under section 6(b) of Executive Order 12866 pursuant to the Memorandum of Agreement (April 11, 2018) between the Treasury Department and the Office of Management and Budget regarding review of tax regulations.

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that this proposed rule, if finalized, will not have a significant economic impact on a substantial number of small entities. Although these rules may affect a substantial

number of small entities, for the reasons discussed in the following paragraphs, the economic impact is not significant.

Under section 6011(e) of the Code and §§ 1.6050M–1, 301.6011–2, 301.6011–3, 301.6011–5, 301.6037–2, 301.6057–3, 301.6058–2, and 301.6059–2, filers are already required to file returns and statements electronically if, during a calendar year, they are required to file 250 or more returns. The eight proposed rules—§§ 1.6050M–1, 301.6011–2, 301.6011–3, 301.6011–5, 301.6037–2, 301.6057–3, 301.6058–2, and 301.6059–2—would lower the 250-return threshold as authorized by section 6011(e), as amended by section 2301 of the TFA. A filer may request that the IRS waive the electronic-filing requirement if the filer's cost to comply with the rule would cause a financial hardship. The IRS routinely grants meritorious hardship waiver requests. Accordingly, the economic burden on the limited number of small entities that are not currently filing electronically will be slight; and small entities that would experience a hardship because of these seven proposed rules may seek a waiver.

Under section 6050I of the Code and §§ 1.6050I–1 and 1.6050I–2, filers are required to file Forms 8300 if, in the course of their trade or business, they receive more than $10,000 in cash in one transaction or in two or more related transactions. The proposed rule under § 301.6011–2(b)(3) would require filers of Forms 8300 to file those forms electronically if such filers are also required to file returns electronically under paragraphs (b)(1) and (b)(2) of § 301.6011–2. The Treasury Department and the IRS expect filers of Form 8300 to use FinCEN's BSA E-Filing System, which is free, requiring only an internet connection. The economic impact on small entities should thus not be significant. Nonetheless, small entities that would experience a hardship because of this proposed rule may seek a hardship waiver.

Under section 6011(e)(4) of the Code and § 301.1474–1, financial institutions defined in section 1471(d)(5) of the Code already are required to electronically file Forms 1042–S. The proposed rule under § 301.1474–1(a) would extend this filing requirement to Forms 1042 filed by the same financial institutions. The economic impact on small entities should thus not be significant. Nonetheless, small entities that would experience a hardship because of this proposed rule may seek a hardship waiver.

Under section 6011(h) of the Code, as amended by section 3101 of the TFA, organizations required to file annual returns relating to any tax imposed by section 511 must file those returns in electronic form. The proposed regulation § 301.6011–10 implements this statutory requirement. The economic impact of the proposed regulation should thus be insignificant.

Under section 6033(n), as amended by section 3101 of the TFA, organizations required to file returns under section 6033 must file those returns in electronic form. The proposed regulations under §§ 1.6033–4, 53.6011–1, and 301.6033–4 implement this statutory requirement. The economic impact of these proposed regulations should thus be insignificant.

The seven proposed regulations under §§ 54.6011–3, 301.6011–11, 301.6011–12, 301.6011–13, 301.6011–14, 301.6011–15, and 301.6012–2 would require electronic filing for certain returns not currently required to be filed electronically. Because electronic filing has become more common, accessible, and economical, the economic impact of these proposed rules on small entities should be insignificant. But if the cost to comply with these electronic-filing requirements would cause a financial hardship, an entity may request a waiver. The IRS routinely grants meritorious hardship waiver requests. Accordingly, the burden on small entities affected by these rules will be slight.

Accordingly, it is hereby certified that these proposed regulations will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the RFA.

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any federal mandate that may result in expenditures in any one year by a state, local, or tribal government, in the aggregate, or by the private sector, of $100 million in 1995 dollars, updated annually for inflation. This regulation does not include any federal mandate that may result in expenditures by state, local, or tribal governments, or by the private sector in excess of that threshold.

Executive Order 13132 (titled Federalism) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on state and local governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law, within the meaning of the Executive Order.

Pursuant to section 7805(f) of the Code, this proposed regulation has been submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to comments that are submitted timely to the IRS as prescribed in this preamble under the **ADDRESSES** section. The Treasury Department and the IRS request comments on all aspects of the proposed regulations. Any comments submitted will be available at *www.regulations.gov* or upon request.

The public hearing is being held by teleconference on September 22, 2021 at 10 a.m. EST. Requests to speak and outlines of topics to be discussed at the public hearing must be received by September 21, 2021. If no outlines are received by September 21, 2021, the public hearing will be cancelled. Requests to attend the public hearing must be received by 5:00 p.m. EST on September 20, 2021. The telephonic hearing will be made accessible to people with disabilities. Requests for special assistance during the telephonic hearing must be received by September 20, 2021.

Drafting Information

The principal author of these proposed regulations is Casey R. Conrad of the Office of the Associate Chief Counsel (Procedure and Administration). Other personnel from the Treasury Department and the IRS participated in the development of the regulations.

Statement of Availability of IRS Documents

IRS revenue procedures, notices, and other guidance cited in this document are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *http://www.irs.gov.*

Withdrawal of Proposed Regulations

Under the authority of 26 U.S.C. 7805, § 301.6011–2 and § 301.6721–1 of the notice of proposed rulemaking (REG–102951–16) that was published in the

Federal Register on Thursday, May 31, 2018 (83 FR 24948) is withdrawn.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 53

Excise taxes, Foundations, Investments, Lobbying, Reporting and recordkeeping requirements.

26 CFR Part 54

Excise taxes, Pensions, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR parts 1, 53, 54 and 301 are proposed to be amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding the following entries in numerical order:

Authority: 26 U.S.C. 7805 * * *

Section 1.6033–4 also issued under 26 U.S.C. 6033.

Section 1.6037–2 also issued under 26 U.S.C. 6037.

* * * * *

■ **Par. 2.** Section 1.1461–1 is amended by removing paragraph (c)(5) and revising paragraph (i) to read as follows:

§ 1.1461–1. Payment and returns of tax withheld.

* * * * *

(i) *Applicability date.* Except as provided in paragraph (c)(2)(iii) of this section, this section applies to returns required for payments made on or after [the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**]. (For payments made before [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**] and on or after January 1, 2022, see this section as in effect and contained in 26 CFR part 1, as revised April 1, 2021. For payments made before January 1, 2022, see this section as in effect and contained in 26 CFR part 1, as revised April 1, 2020.)

■ **Par. 3.** Section 1.1471–0 is amended by revising the entries in the table of contents for § 1.1474–1(e) and (j) and § 301.1474–1(d)(1) and (e) to read as follows:

§ 1.1471–0 Outline of regulation provisions for sections 1471 through 1474.

* * * * *

§ 1.1474–1 Liability for withheld tax and withholding agent reporting.

* * * * *

(e) Reporting in electronic form.

* * * * *

(j) Applicability date.

* * * * *

§ 301.1474–1 Required use of electronic form for financial institutions filing Form 1042, Form 1042–S, or Form 8966.

* * * * *

(d) * * *

(1) Magnetic media or electronic form.

* * * * *

(e) Applicability date.

■ **Par. 4.** Section 1.1474–1 is amended by revising paragraphs (e) and (j) to read as follows:

§ 1.1474–1 Liability for withheld tax and withholding agent reporting.

* * * * *

(e) *Reporting in electronic form.* See § 301.6011–2(b) of this chapter for the requirements of a withholding agent that is not a financial institution with respect to the filing of Forms 1042–S in electronic form. See § 301.1474–1(a) of this chapter for the requirements applicable to a withholding agent that is a financial institution with respect to the filing of Forms 1042–S in electronic form.

* * * * *

(j) *Applicability date.* This section applies to returns required for payments made on or after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**]. (For the rules that apply before [the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**] and on or after January 6, 2017, see this section as in effect and contained in 26 CFR part 1, as revised April 1, 2021.)

■ **Par. 5.** Section 1.6033–4 is revised to read as follows:

§ 1.6033–4 Required filing in electronic form for returns by organizations required to file returns under section 6033.

(a) *In general.* The return of an organization that is required to be filed in electronic form under § 301.6033–4 of this chapter must be filed in accordance with revenue procedures, publications, forms, instructions, or other guidance.

(b) *Applicability date.* The rules of this section apply for returns required to be filed for taxable years ending on or after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 6.** Section 1.6037–2 is revised to read as follows:

§ 1.6037–2 Required use of electronic form for income tax returns of electing small business corporations.

(a) *In general.* The return of an electing small business corporation that is required to be filed electronically under § 301.6037–2 of this chapter must be filed in accordance with Internal Revenue Service revenue procedures, publications, forms, or instructions, including those posted electronically.

(b) *Applicability date.* The rules of this section apply for returns required to be filed for taxable years ending on or after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 7.** Section 1.6045–2 is amended by revising paragraphs (g)(2) and (i) to read as follows:

§ 1.6045–2 Furnishing statement required with respect to certain substitute payments.

* * * * *

(g) * * *

(2) *Reporting in electronic form.* For information returns filed after December 31, 1996, see § 301.6011–2 of this chapter for rules relating to filing information returns in electronic form and for rules relating to waivers granted for undue hardship. A broker or barter exchange that fails to file a Form 1099 electronically, when required, may be subject to a penalty under section 6721 for each such failure. See paragraph (g)(4) of this section.

* * * * *

(i) *Applicability date.* This section applies to substitute payments received by a broker after December 31, 1984. The amendments to paragraph (c) of this section apply to payee statements due after December 31, 2014. For payee statements due before January 1, 2015, § 1.6045–2(c) (as contained in 26 CFR part 1, revised April 2013) shall apply. The amendments to paragraph (g)(2) of this section apply to information returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 8.** Section 1.6045–4 is amended by removing and reserving paragraph (k) and revising paragraph (s) to read as follows:

§ 1.6045–4 Information reporting on real estate transactions with dates of closing on or after January 1, 1991.

* * * * *

(s) *Applicability date.* This section applies for real estate transactions with dates of closing (as determined under paragraph (h)(2)(ii) of this section) that

occur on or after January 1, 1991. The amendments to paragraphs (b)(2)(i)(E), (b)(2)(ii) and (c)(2)(i) of this section apply to sales or exchanges of standing timber for lump-sum payments completed after May 28, 2009. The amendments to paragraph (m)(1) of this section apply to payee statements due after December 31, 2014. For payee statements due before January 1, 2015, § 1.6045–4(m)(1) (as contained in 26 CFR part 1, revised April 2013) shall apply. The removal of paragraph (k) of this section applies for information returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 9.** Section 1.6050I–0 is amended by revising the entry in the table of contents for § 1.6050I–1(d)(2)(ii) as follows:

§ 1.6050I–0 Table of contents.

* * * * *

(d) * * *

(2) * * *

(ii) Casinos exempt under 31 CFR 1010.970(c).

* * * * *

■ **Par. 10.** Section 1.6050I–1 is amended by:

■ 1. Revising paragraphs (a)(3)(ii), (c)(1)(iv), (d)(2)(i), (d)(2)(ii):

■ 2. In paragraph (d)(2)(iv), designating the example as paragraph (d)(2)(iv)(A);

■ 3. Revising newly designated paragraph (d)(2)(iv)(A) and adding paragraph (d)(2)(iv)(B);

■ 4. Revising paragraphs (e)(1) and (e)(3)(i); and

■ 5. Adding paragraph (h).

The revisions and additions read as follows:

§ 1.6050I–1 Returns relating to cash in excess of $10,000 received in a trade or business.

(a) * * *

(3) * * *

(ii) *Exception.* An agent who receives cash from a principal and uses all of the cash within 15 days in a cash transaction (second cash transaction) which is reportable under section 6050I or 5312 of title 31 of the United States Code and the regulations thereunder (31 CFR Chapter X), and who discloses the name, address, and taxpayer identification number of the principal to the recipient in the second cash transaction need not report the initial receipt of cash under this section.

* * * * *

(c) * * *

(1) * * *

(iv) *Exception for certain loans.* A cashier's check, bank draft, traveler's check, or money order received in a designated reporting transaction is not treated as cash pursuant to paragraph (c)(1)(ii)(B)(*1*) of this section if the instrument constitutes the proceeds of a loan from a bank (as that term is defined in 31 CFR Chapter X).

* * * * *

(d) * * *

(2) * * * (i) *In general.* If a casino receives cash in excess of $10,000 and is required to report the receipt of such cash directly to the Treasury Department under 31 CFR 1021.310 or 1010.360 and is subject to the recordkeeping requirements of 31 CFR 1021.400, then the casino is not required to make a return with respect to the receipt of such cash under section 6050I and these regulations.

(ii) *Casinos exempt under 31 CFR 1010.970(c).* Under the authority of section 6050I(c)(1)(A), the Secretary may exempt from the reporting requirements of section 6050I casinos with gross annual gaming revenue in excess of $1,000,000 that are exempt under 31 CFR 1010.970(c) from reporting certain cash transactions to the Treasury Department under 31 CFR 1021.310 or 1010.360. The determination whether a casino which is granted an exemption under 31 CFR 1010.970(c) will be required to report under section 6050I will be made on a case by case basis, concurrently with the granting of such an exemption.

* * * * *

(iv) * * *

(A) *Example.* A and B are casinos having gross annual gaming revenue in excess of $1,000,000. C is a casino with gross annual gaming revenue of less than $1,000,000. Casino A receives $15,000 in cash from a customer with respect to a gaming transaction which the casino reports to the Treasury Department under 31 CFR 1021.310 and 1010.360. Casino B's hotel division receives $15,000 in cash from a customer in payment for accommodations provided to that customer at Casino B's hotel. Casino C receives $15,000 in cash from a customer with respect to a gaming transaction. Casino A is not required to report the transaction under section 6050I or these regulations because the exception for certain casinos provided in paragraph (d)(2)(i) of this section (casino exception) applies. Casino B's hotel division is required to report under section 6050I and these regulations because the casino exception does not apply to the receipt of cash by a nongaming business division. Casino C is required to report under section 6050I and these regulations because the casino exception does not apply to casinos having gross annual gaming revenue of $1,000,000 or less which do not have to report to the Treasury Department under 31 CFR 1021.310 and 1010.360.

(B) [Reserved]

* * * * *

(e) * * * (1) *Time of reporting.* The reports required by this section must be filed in accordance with the Form 8300 instructions and related publications by the 15th day after the date the cash is received. However, in the case of multiple payments relating to a single transaction (or two or more related transactions), see paragraph (b) of this section.

* * * * *

(3) * * * (i) *Where to file.* A person making a return of information under this section must file Form 8300 in accordance with the form instructions and related publications.

* * * * *

(h) *Applicability date.* The rules of this section apply for returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 11.** Section 1.6050I–2 is amended by revising paragraphs (c)(1)(i), (c)(3)(i), and (f) to read as follows:

§ 1.6050I–2 Returns relating to cash in excess of $10,000 received as bail by court clerks.

* * * * *

(c) * * *

(1) * * * (i) *In general.* The information return required by this section must be filed in accordance with the Form 8300 instructions and related publications by the 15th day after the date the cash bail is received.

* * * * *

(3) * * * (i) *Where to file.* Returns required by this section must be filed in accordance with the Form 8300 instructions and related publications. A copy of the information return required to be filed under this section must be retained for five years from the date of filing.

* * * * *

(f) *Applicability date.* The rules of this section apply for returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 12.** Section 1.6050M–1 is amended by revising paragraphs (d)(2), (d)(3), and (f) as follows:

§ 1.6050M–1 Information returns relating to persons receiving contracts from certain federal executive agencies.

* * * * *

(d) * * *

(2) *Form of reporting*—(i) *General rule concerning electronic filing.* The information returns required by this section with respect to contracts of a federal executive agency for each calendar quarter must be made in one submission (or in multiple submissions if permitted by paragraph (d)(4) of this section). Except as provided in paragraph (d)(2)(ii) of this section, the required returns must be made in electronic form (within the meaning of § 301.6011–2(a)(1)) in accordance with any applicable revenue procedure or other guidance promulgated by the Internal Revenue Service for the filing of such returns under section 6050M.

(ii) *Exceptions from electronic filing.* Any federal executive agency that, on October 1, has a reasonable expectation of entering into, during the one-year period beginning on that date, fewer than 100 contracts subject to the reporting requirements under this section that are to be filed during the calendar year 2022, or fewer than 10 contracts subject to the reporting requirements under this section that are to be filed during the calendar years after 2022, may make the information returns required by this section for each quarter of that one-year period on the prescribed paper Form 8596 in accordance with the instructions accompanying such form.

(iii) *Undue hardship.* The Commissioner may grant waivers of the electronic-filing requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under paragraph (a) of this section) and the period to which it applies.

(3) *Place of filing*—(i) *Returns in electronic form.* Information returns made under this section in electronic form must be filed with the Internal Revenue Service in accordance with any applicable revenue procedure or other guidance promulgated by the Internal Revenue Service relating to the filing of returns under section 6050M.

(ii) *Form 8596.* Information returns made on paper Form 8596 must be filed with the Internal Revenue Service at the location specified in the instructions for that form.

* * * * *

(f) *Applicability date*—(1) *Contracts required to be reported.* Except as otherwise provided in this paragraph (f), this section applies to each federal executive agency with respect to its contracts entered into on or after January 1, 1989 (including any increase in amount obligated on or after January 1, 1989, that is treated as a new contract under paragraph (e) of this section).

(2) *Contracts not required to be reported.* A federal executive agency is not required to report—

(i) Any basic or initial contract entered into before January 1, 1989,

(ii) Any increase contract action occurring before January 1, 1989, that is treated as a new contract under paragraph (e) of this section, or

(iii) Any increase contract action that is treated as a new contract under paragraph (e) of this section if the basic or initial contract to which that contract action relates was entered into before January 1, 1989, and—

(A) The increase occurs before April 1, 1990, or

(B) The amount of the increase does not exceed $50,000.

(3) *Illustration.* (i) If federal executive agency enters into an initial contract on December 1, 1988, and the amount of money obligated under the contract is increased by $55,000 on April 15, 1990, then (A) there is no reporting requirement with respect to the contract when entered into on December 1, 1988, and (B) the April 15, 1990, increase, which is treated as a new contract under paragraph (e) of this section, is subject to the reporting requirements of this section because it is considered to be a new contract entered into on April 15, 1990.

(ii) If the $55,000 increase had occurred before April 1, 1990, there would have been no reporting requirement with respect to that increase.

(4) *Filing requirements for contracts required to be reported.* The amendments to paragraphs (d)(2) and (d)(3) of this section apply for information returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

PART 53—FOUNDATION AND SIMILAR EXCISE TAXES

■ **Par. 13.** The authority citation for part 53 is amended by adding the following entry:

Authority: 26 U.S.C. 7805 * * *

Section 53.6011–1 also issued under 26 U.S.C. 6011.

* * * * *

■ **Par. 14.** Section 53.6011–1 is amended by:

■ 1. Removing paragraph (c).

■ 2. Redesignating paragraphs (d) and (e) as paragraphs (c) and (d), respectively.

■ 3. Adding a new paragraph (e).

The addition reads as follows:

§ 53.6011–1 General requirement of return, statement or list.

* * * * *

(e) *Applicability Date.* The rules of this section apply for any returns required to be filed under this section on or after January 11, 2021.

PART 54—PENSION EXCISE TAXES

■ **Par. 15.** The authority citation for part 54 is amended by adding the following entry:

Authority: 26 U.S.C. 7805 * * *

Section 54.6011–3 also issued under 26 U.S.C. 6011.

* * * * *

■ **Par. 16.** Section 54.6011–3 is added to read as follows:

§ 54.6011–3 Required use of electronic form for the filing requirements for the return for certain excise taxes related to employee benefit plans.

(a) *Excise tax returns required in electronic form.* Any employer or individual required to file an excise tax return on Form 5330, *Return of Excise Taxes Related to Employee Benefit Plans,* under § 54.6011–1 of this chapter must file the excise tax return electronically if the filer is required by the Internal Revenue Code or regulations to file at least 10 returns of any type during the calendar year that the Form 5330 is due. The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic filing requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds

the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 54.6011–1) and the period to which it applies.

(c) *Failure to file.* If a filer required to file the Form 5330 fails to file the report electronically when required to do so by this section, the filer is deemed to have failed to file the report. See generally section 6651(a)(1) for the penalty for the failure to file a tax return or to pay tax. For general rules relating to the failure to file tax return or to pay tax, see the regulations under 26 CFR 301.6651 (Regulations on Procedure and Administration).

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

(2) *Calculating the number of returns a filer is required to file*—(i) *In general.* For purposes of this section, a filer is required to file at least 10 returns during a calendar year if the filer is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

(ii) *Definition of filer.* For purposes of this section, the term *filer* means the person required to report the tax on the Form 5330. For general rules on who is required to report the tax on the Form 5330, see the Instructions to the Form 5330.

(e) *Example.* The following example illustrates the provisions of paragraph (d)(2) of this section:

(1) In 2022, Employer A (the plan sponsor and plan administrator of Plan B) is required to file Form 5330 for its nondeductible contribution under section 4972 to Plan B. During the 2023 calendar year, Employer A is required to file 20 returns (including 19 Forms 1099–R *Distributions From Pensions, Annuities, Retirement, Profit-Sharing Plans, IRAs, Insurance Contracts, etc.* and one Form 5500 series *Annual Return/Report of the Employee Benefit Plan*). Plan B's plan year is the calendar year. Because Employer A is required to file at least 10 returns during the 2023 calendar year, Employer A must file the 2022 Form 5330 for Plan B electronically.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for any Form 5330 required to be filed for taxable years ending on or after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

PART 301—PROCEDURE AND ADMINISTRATION

■ **Par. 17.** The authority citation for part 301 is amended by adding entries in numerical order to read as follows:

Authority: 26 U.S.C. 7805 * * *

Section 301.6011–10 also issued under 26 U.S.C. 6011.

Section 301.6011–11 also issued under 26 U.S.C. 6011.

Section 301.6011–12 also issued under 26 U.S.C. 6011.

Section 301.6011–13 also issued under 26 U.S.C. 6011.

Section 301.6011–14 also issued under 26 U.S.C. 6011.

Section 301.6011–15 also issued under 26 U.S.C. 6011.

Section 301.6012–2 also issued under 26 U.S.C. 6012.

* * * * *

Section 301.6057–3 also issued under 26 U.S.C. 6011 and 6057.

Section 301.6058–2 also issued under 26 U.S.C. 6011 and 6058.

Section 301.6059–2 also issued under 26 U.S.C. 6011 and 6059.

* * * * *

Section 301.6721–1 also issued under 26 U.S.C. 6011 and 6721.

* * * * *

■ **Par. 18.** Section 301.1474–1 is amended by:

■ 1. Revising the section heading.

■ 2. Revising paragraphs (a) through (c).

■ 3. Revising paragraph (d)(1).

■ 4. Adding a sentence at the end of paragraph (e).

The revisions and addition read as follows:

§ 301.1474–1 Required use of electronic form for financial institutions filing Form 1042, Form 1042–S, or Form 8966.

(a) *Financial institutions filing certain returns.* If a financial institution is required to file a Form 1042, *Annual Withholding Tax Return for U.S. Source Income of Foreign Persons,* (or successor form) under § 1.1474–1(c) of this chapter, the financial institution must file the return information required by the applicable forms and schedules electronically. If a financial institution is required to file a Form 1042–S, *Foreign Person's U.S. Source Income Subject to Withholding,* (or such other form as the IRS may prescribe) under § 1.1474–1(d) of this chapter, the financial institution must file the information required by the applicable forms and schedules electronically. Additionally, if a financial institution is required to file Form 8966, ''FATCA Report,'' (or such other form as the IRS may prescribe) to report certain information about U.S. accounts, substantial U.S. owners of foreign entities, or owner-documented FFIs as required under this chapter, the financial institution must file the required information in electronic form. Returns filed electronically must be made in accordance with applicable regulations, revenue procedures, publications, forms, instructions, and the *IRS.gov* internet site. In prescribing regulations, revenue procedures, publications, forms, and instructions, including those on the *IRS.gov* internet site, the Commissioner may direct the type of electronic filing.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 1.1474–1(c) or (d) of this chapter, or a Form 8966) and the period to which it applies.

(c) *Failure to file.* If a financial institution fails to file a Form 1042 electronically when required to do so by this section, the financial institution is deemed to have failed to file the return. (See section 6651 for the addition to tax for failure to file a return). In determining whether there is reasonable cause for failure to file the return, § 301.6651–1(c) and rules similar to the rules in § 301.6724–1(c)(3) (undue economic hardship related to filing information returns electronically) will apply. If a financial institution fails to file a Form 1042–S or a Form 8966 electronically when required to do so by this section, the financial institution is deemed to have failed to comply with the information reporting requirements under section 6721 of the Code. See section 6724(c) for failure to meet magnetic media requirements. In determining whether there is reasonable cause for failure to file the return,

§ 301.6651–1(c) and rules similar to the rules in § 301.6724–1(c)(3) (undue economic hardship related to filing information returns on magnetic media) will apply.

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(e) * * * This section applies to any Form 1042 (or successor form) filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 19.** Section 301.6011–2 is amended by:

■ 1. Revising paragraphs (a)(1).

■ 2. Revising paragraph (b).

■ 3. Revising the heading of paragraph (c) and paragraph (c)(1).

■ 4. Redesignating paragraph (c)(2) as (c)(6) and adding new paragraphs (c)(2) through (5).

■ 5. Revising newly redesignated paragraphs (c)(6)(i) and (ii).

■ 6. Revising paragraph (g).

The revisions and additions read as follows:

§ 301.6011–2 Required use of electronic form.

(a) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures or publications, or, in the case of returns filed with the Social Security Administration, Social Security Administration publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, or publications.

* * * * *

(b) *Returns required electronically.* (1) If the use of Form 1042–S, Form 1094 series, Form 1095–B, Form 1095–C, Form 1097–BTC, Form 1098, Form 1098–C, Form 1098–E, Form 1098–Q, Form 1098–T, Form 1099 series, Form 3921, Form 3922, Form 5498 series, Form 8027, Form W–2G, or other forms prescribed under paragraph (b)(4) of this section treated as forms specified in this paragraph (b)(1) is required by the applicable regulations or revenue procedures for the purpose of making an information return, the information required by the form must be submitted electronically, except as otherwise provided in paragraph (c) of this section. Returns filed electronically must be made in accordance with applicable revenue procedures, publications, forms, or instructions.

(2) If the use of Form W–2 (Wage and Tax Statement), Form 499R–2/W–2PR (Withholding Statement (Puerto Rico)), Form W–2VI (U.S. Virgin Islands Wage and Tax Statement), Form W–2GU (Guam Wage and Tax Statement), Form W–2AS (American Samoa Wage and Tax Statement), or other forms prescribed under paragraph (b)(4) of this section as treated as forms specified in this paragraph (b)(2) is required for the purpose of making an information return, the information required by the form must be submitted electronically, except as otherwise provided in paragraph (c) of this section. Returns described in this paragraph (b)(2) must be made in accordance with applicable Social Security Administration procedures or publications (which may be obtained from the local office of the Social Security Administration).

(3) If a person is required to make a return for the purpose of section 6050I, and such person is required to file returns described in paragraphs (b)(1) and (2) of this section electronically, then such person must also file the information required by section 6050I on Form 8300 electronically. Returns described in this paragraph (b)(3) must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website.

(4) The Commissioner may prescribe by revenue procedure that additional forms are treated, for purposes of this section, as forms specified in paragraphs (b)(1) or (2) of this section. In addition, the Commissioner may exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website.

(c) *Applicable number-threshold*—(1) *In general.* No person is required to file information returns electronically in a calendar year unless the person is required to file at least the applicable number of returns during that calendar year. Persons required to file fewer than the applicable number of returns during the calendar year may make the returns on the prescribed paper form or, alternatively, electronically in accordance with paragraph (b) of this section.

(2) *Machine-readable forms.* Returns made on a paper form under paragraph (c)(1) of this section must be machine-readable, as described in paragraph (a)(2) of this section, if applicable revenue procedures provide for a machine-readable paper form.

(3) *Calculating the applicable number*—(i) *In general.* For purposes of paragraph (c)(1) of this section, the applicable number is 100, for returns required to be filed during calendar year 2022, and 10, for returns required to be filed during calendar years after 2022.

(ii) *Special rule for partnerships.* Notwithstanding paragraph (c)(3)(i) of this section, a partnership with more than 100 partners is required to file its information returns covered under paragraph (b) of this section electronically.

(4) *Calculating the number of returns*—(i) *Aggregation of returns.* In calculating whether a person is required to file at least the applicable number of returns under paragraph (c)(3) of this section, all the information returns described in paragraphs (b)(1) and (b)(2) of this section required to be filed during the calendar year, are counted in the aggregate. Corrected information returns and information returns described in paragraph (b)(3) of this section are not taken into account in calculating whether a person is required to file at least the applicable number of returns.

(ii) *Corrected returns.* (A) If an original information return covered by paragraph (b) of this section is required to be filed electronically, any corrected information return corresponding to that original return must also be filed electronically.

(B) If an original information return is permitted to be filed on paper and is filed on paper, any corrected information return corresponding to that original return must be filed on paper.

(5) *Examples.* The provisions of paragraphs (c)(3) and (4) of this section are illustrated by the following examples:

(i) *Example 1.* During the 2023 calendar year, Company W, is required to file 5 Forms 1099–INT, *Interest Income,* and 5 Forms 1099–DIV, *Dividends and Distributions,* for a total of 10 returns covered by paragraph (b) of this section. The applicable number for returns required to be filed during calendar year 2023 is 10. Because Company W is required to file the applicable number of returns covered by paragraph (c)(3) of this section during the 2023 calendar year, Company W must file all its 2022 Forms 1099–INT and Forms 1099–DIV electronically.

(ii) *Example 2.* Same facts as paragraph (c)(5)(i) of this section (*Example 1*), except after electronically filing its 10 Forms 1099–

DIV and 1099–INT, Company W files 2 corrected Forms 1099–DIV and 4 corrected Forms 1099–INT. Because Company W electronically filed its original 2022 Forms 1099–DIV and 1099–INT, Company W must electronically file its corrected 2022 Forms 1099–DIV and 1099–INT.

(iii) *Example 3.* Same facts as paragraph (c)(5)(i) of this section (*Example 1*), except on May 16, 2023, Company W received cash in excess of $10,000 and must file a Form 8300 by May 31, 2023. Because Company W is required to file information returns covered under paragraphs (b)(1) and (2) of this section electronically during the 2023 calendar year, Company W must also file all its Forms 8300 electronically during the 2023 calendar year.

(iv) *Example 4.* Same facts as paragraph (c)(5)(i) of this section (*Example 1*), except Company W is not required to file any Forms 1099–INT during calendar year 2023. On December 19, 2022, Company W receives cash in excess of $10,000 and must file a Form 8300 by January 3, 2023. Because Company W is not required to file information returns covered under paragraphs (b)(1) and (b)(2) of this section electronically during the 2023 calendar year, Company W is not required to file this Form 8300 electronically.

(v) *Example 5.* During the 2023 calendar year, Partnership P, a partnership with 15 partners, is required to file 8 Forms 1099–MISC, *Miscellaneous Income,* and 5 Forms 1099–INT. The applicable number of returns required to be filed by partnerships during calendar year 2023 is 10. Because Partnership P is required to file at least the applicable number of returns covered by paragraph (b) of this section during the 2023 calendar year, Partnership P must electronically file all its 2022 Forms 1099–MISC and 1099–INT.

(6) * * *

(i) The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. Notwithstanding the foregoing, if an employer is required to make a final return on Form 941, or a variation thereof, and expedited filing of Forms W–2, Forms 499R–2/W–2PR, Forms W–2VI, Forms W–2GU, or Form W–2AS is required, the unavailability of the specifications for electronic filing will be treated as creating a hardship (see § 31.6071(a)–1(a)(3)(ii) of this chapter). A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under paragraph (b) of this section) and the period to which it applies.

(ii) The Commissioner may supplement the provisions of paragraph (c)(6)(i) of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website.

* * * * *

(g) *Applicability date.* The rules of this section apply for information returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 20.** Section 301.6011–3 is amended by:

■ 1. Revising the section heading.

■ 2. Revising paragraphs (a), (b), and (d)(1).

■ 3. Redesignating paragraph (d)(5) as (d)(6) and adding new paragraph (d)(5).

■ 4. Revising newly redesignated paragraph (d)(6).

■ 5. Revising paragraphs (e) and (f).

The revisions and addition read as follows:

§ 301.6011–3 Required use of electronic form for partnership returns.

(a) *Partnership returns required electronically.* (1) Except as otherwise provided in paragraph (b) of this section, a partnership required to file a partnership return pursuant to § 1.6031(a)–1 of this chapter, must file the information required by the applicable forms and schedules electronically, if:

(i) The partnership is required by the Internal Revenue Code or regulations to file at least 10 returns (as described in paragraph (d)(5) of this section) during the calendar year, or

(ii) the partnership has more than 100 partners during the partnership's taxable year.

(2) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 1.6031(a)–1 of this chapter) and the period to which it applies.

* * * * *

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(5) *Calculating the number of returns.* For purposes of this section, a partnership is required to file at least 10 returns if, during the calendar year ending with or within the taxable year of the partnership, the partnership is required to file at least 10 returns of any type, including income tax returns, employment tax returns, excise tax returns, and information returns (for example, Forms W–2 and Forms 1099, but not including schedules required to be included with a partnership return). In the case of a short-period return, a partnership is required to file at least the applicable number of returns if, during the calendar year in which the partnership's short taxable year ends, the partnership is required to file at least the applicable number of returns of any type, including information returns (for example, Forms W–2 and Forms 1099, but not including schedules required to be included with a partnership return), income tax returns, employment tax returns, and excise tax returns.

(6) *Partnerships with more than 100 partners.* A partnership has more than 100 partners if, over the course of the partnership's taxable year, the partnership had more than 100 partners, regardless of whether a partner was a partner for the entire year or whether the partnership had over 100 partners on any particular day in the year. For purposes of this paragraph (d)(6), however, only those persons having a direct interest in the partnership must be considered partners for purposes of determining the number of partners during the partnership's taxable year.

(e) *Examples.* The following examples illustrate the provisions of this section. In the examples, the partnerships' taxable year is the calendar year 2023 and the partnerships had fewer than 10

returns required to be filed during calendar year 2023:

(1) *Example 1.* Partnership P had five general partners and 90 limited partners on January 1, 2023. On March 15, 2023, 10 more limited partners acquired an interest in P. On September 29, 2023, the 10 newest partners sold their individual partnership interests to C, a corporation which was one of the original 90 limited partners. On December 31, 2023, P had the same five general partners and 90 limited partners it had on January 1, 2023. P had a total of 105 partners over the course of partnership taxable year 2023. Therefore, P must file its 2023 partnership return electronically.

(2) *Example 2.* Partnership Q is a general partnership that had 95 partners on January 1, 2023. On March 15, 2023, 10 partners sold their individual partnership interests to corporation D, which was not previously a partner in Q. On September 29, 2023, corporation D sold one-half of its partnership interest in equal shares to five individuals, who were not previously partners in Q. On December 31, 2023, Q had a total of 91 partners, and on no date in 2023 did Q have more than 100 partners. Over the course of the year, however, Q had 101 partners. Therefore, Q must file its 2023 partnership return electronically.

(3) *Example 3.* Partnership G is a general partnership with 100 partners on January 1, 2023. There are no new partners added to G in 2023. One of G's partners, A, is a partnership with 53 partners. A is one partner, regardless of the number of partners A has. Therefore, G has 100 partners and is not required to file its 2023 partnership return electronically.

(4) *Example 4.* Same facts as paragraph (e)(3) of this section (*Example 3*), except partnership G is also required to file 9 Forms 1099–MISC during calendar year 2023 in addition to its 2022 partnership return. Because partnership G is required to file at least 10 returns of any type during calendar year 2023, partnership G must file its 2023 partnership return electronically.

(f) *Applicability date.* The rules of this section apply for partnership returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 21.** Section 301.6011–5 is amended by revising paragraphs (a), (b), (d)(1) and (5), (e), and (f) to read as follows:

§ 301.6011–5 Required use of electronic form for corporate income tax returns.

(a) *Corporate income tax returns required electronically.* (1) A corporation required to file a corporate income tax return on Form 1120, *U.S. Corporation Income Tax Return,* under § 1.6012–2 of this chapter must file its corporate income tax return electronically if the corporation is required by the Internal Revenue Code or regulations to file at least 10 returns (as defined in paragraph (d)(5) of this section) during the calendar year ending with or within the taxable year of the corporation.

(2) All members of a controlled group of corporations must file their corporate income tax returns electronically if the aggregate number of returns required to be filed by the controlled group of corporations is at least 10 (as defined in paragraph (d)(5) of this section) during the calendar year ending with or within the taxable year of the controlled group of corporations.

(3) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 1.6012–2 of this chapter) and the period to which it applies.

* * * * *

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(5) *Calculating the number of returns.* For purposes of this section, a corporation or controlled group of corporations is required to file at least 10 returns if, during the calendar year ending with or within the taxable year of the corporation or the controlled group, the corporation or the controlled group is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns. In the case of a short-period return, a corporation is required to file at least 10 returns if, during the calendar year in which the corporation's short taxable year ends, the corporation is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns. If the corporation is a member of a controlled group, calculating the number of returns the corporation is required to file includes all returns required to be filed by all members of the controlled group during the calendar year ending with or within the taxable year of the controlled group.

(e) *Example.* The following example illustrates the provisions of this section:

(1) The taxable year of Corporation X, a fiscal-year taxpayer, ends on September 30. During the calendar year ending December 31, 2022, X was required to file one Form 1120, *U.S. Corporation Income Tax Return,* 6 Forms W–2, *Wage and Tax Statement,* 3 Forms 1099–DIV, *Dividends and Distributions,* one Form 940, *Employer's Annual Federal Unemployment (FUTA) Tax Return,* and four Forms 941, *Employer's Quarterly Federal Tax Return.* Because X is required to file 10 returns of any type during calendar year 2022, the calendar year that ended within its taxable year ending September 30, 2023, X is required to file its Form 1120 electronically for its taxable year ending September 30, 2023.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for corporate income tax returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 22.** Section 301.6011–10 is added to read as follows:

§ 301.6011–10 Certain organizations, including trusts, required to file unrelated business income tax returns in electronic form.

(a) *Unrelated business income tax returns required in electronic form.* (1) Organizations, including trusts, subject to tax under section 511 that are required to file a return under § 1.6012–2(e) or 1.6012–3(a)(5) of this chapter to report gross income included in computing unrelated business taxable income, as defined in section 512, or that are otherwise required to file Form 990–T, *Exempt Organization Business Income Tax Return (and proxy tax under section 6033(e)),* are required to file that return in electronic form.

(2) Returns filed in electronic form must be filed in accordance with applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Failure to file.* If an organization or trust fails to file an unrelated business income tax return in electronic form when required to do so by this section, the organization or trust is deemed to have failed to file the return. (See section 6651 for the addition to tax for failure to file a return.) In determining whether there is reasonable cause for failure to file the return, § 301.6651–1(c) will apply.

(c) *Applicability date.* The rules of this section apply for unrelated business income tax returns required to be filed during calendar years beginning after [the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 23.** Section 301.6011–11 is added to read as follows:

§ 301.6011–11 Required use of electronic form for certain returns for tax-advantaged bonds.

(a) *Return for credit payments to issuers of qualified bonds.* (1) An issuer of a qualified bond required to file a return for credit payments on Form 8038–CP, *Return for Credit Payments to Issuers of Qualified Bonds,* must file its return electronically if the issuer is required to file at least 10 returns (as defined in paragraph (d)(4) of this section) during the calendar year.

(2) Returns filed electronically must be made in accordance with applicable revenue procedures, publications, forms, instructions, or other guidance.

(3) The Commissioner may provide an exemption from the electronic requirements of paragraph (a) of this section through revenue procedures, publications, forms, instructions, or other guidance.

(b) *Other returns for tax-advantaged bonds.* The Commissioner may prescribe by revenue procedure that additional forms for tax-advantaged bonds (as defined in § 1.150–1(b) of this chapter) required under the Internal Revenue Code, regulations, or other administrative guidance published by the Internal Revenue Service must be filed electronically if the issuer is required to file at least 10 returns during the calendar year.

(c) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return for credit payments on Form 8038–CP) and the period to which it applies.

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

(2) *Qualified bond.* The term *qualified bond* means a tax-advantaged bond that is a taxable bond that provides a refundable federal tax credit payable directly to the issuer of the bond under former section 6431 or any other tax-advantaged bond (as defined in § 1.150–1(b) of this chapter) that provides a tax credit payment to issuers of such bonds similar to the credit provided with respect to interest on qualified bonds.

(3) *Return for credit payments to issuers of qualified bonds.* The term *return for credit payments to issuers of qualified bonds* means a Form 8038–CP, *Return for Credit Payments to Issuers of Qualified Bonds* or such other form prescribed by the Commissioner for the purpose of filing a return for credit payment with respect to a qualified bond.

(4) *Calculating the number of returns.* For purposes of this section, an issuer of a tax-advantaged bond is required to file at least 10 returns if, during the calendar year, the issuer is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

(e) *Applicability date.* The rules of this section apply for tax-advantaged bond returns required to be filed after the later of December 31, 2021 or [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 24.** Section 301.6011–12 is added to read as follows:

§ 301.6011–12 Required use of electronic form for returns of certain excise taxes under Chapters 41 and 42 of the Internal Revenue Code.

(a) *Excise tax returns required electronically.* (1) Any person required to file an excise tax return on Form 4720, *Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code,* under § 53.6011–1 of this chapter must file its excise tax return electronically if the person is required by the Internal Revenue Code or regulations to file at least 10 returns (as defined in paragraph (d)(3) of this section) during calendar years after 2021.

(2) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(3) Paragraph (a)(1) of this section is not applicable to private foundations that are subject to the filing requirements of § 301.6033–4.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 53.6011–1 of this chapter) and the period to which it applies.

(c) *Failure to file.* If a person fails to file an excise tax return electronically when required to do so by this section, the person is deemed to have failed to

file the return. (See section 6651 for the addition to tax for failure to file a return). In determining whether there is reasonable cause for failure to file the return, § 301.6651–1(c) and rules similar to the rules in § 301.6724–1(c)(3) (undue economic hardship related to filing information returns electronically) will apply.

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

(2) *Excise tax return.* The term *excise tax return* means a Form 4720, *Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code,* along with all other related forms, schedules, and statements that are required to be attached to the Form 4720, including amended and superseding returns.

(3) *Calculating the number of returns.* For purposes of this section, a person is required to file at least 10 returns if, during the calendar year ending with or within the person's taxable year, the person is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns. In the case of a short-period return, a person is required to file at least 10 returns if, during the calendar year in which the person's short taxable year ends, the person is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

(e) *Example.* The following example illustrates the provisions of this section:

(1) During the calendar year ending December 31, 2022, Trust X was required to file one Form 4720, *Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code,* which related to the 2021 taxable year, and 10 Forms W–2, *Wage and Tax Statement,* which reported wages paid to employees during the 2021 taxable year. Because X is required to file 11 returns during calendar year 2022, X is required to file the 2021 Form 4720 electronically.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for excise tax returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 25.** Section 301.6011–13 is added to read as follows:

§ 301.6011–13 Required use of electronic form for split-interest trust returns.

(a) *Split-Interest Trust returns required electronically.* (1) Any trust required to file an information return on Form 5227, *Split-Interest Trust Information Return,* under § 53.6011–1 of this chapter must file its return electronically if the trust is required by the Internal Revenue Code or regulations to file at least 10 returns (as defined in paragraph (d)(3)) of this section) during the calendar year.

(2) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with applicable revenue procedures, publications, forms, or instructions.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 53.6011–1 of this chapter) and the period to which it applies.

(c) *Failure to file.* If a trust fails to file an excise tax return electronically when required to do so by this section, the trust is deemed to have failed to file the return. (See section 6652 for the addition to tax for failure to file a return). In determining whether there is reasonable cause for failure to file the return, § 301.6652–1(f) and rules similar to the rules in § 301.6724–1(c)(3) (undue economic hardship related to filing information returns electronically) will apply.

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

(2) *Split-Interest Trust return.* The term *split-interest trust return* means a Form 5227, *Split-Interest Trust Information Return,* along with all other related forms, schedules, and statements that are required to be attached to the Form 5227, including amended and superseding returns.

(3) *Calculating the number of returns.* For purposes of this section, a trust is required to file at least 10 returns if, during the calendar year ending with or within the trust's taxable year, the trust is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns. In the case of a short-period return, a trust is required to file at least 10 returns if, during the calendar year in which the trust's short taxable year ends, the trust is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

(e) *Example.* The following example illustrates the provisions of this section:

(1) During the calendar year ending December 31, 2022, Trust X was required to file one Form 5227, *Split-Interest Trust Information Return,* one Form 4720, *Return of Certain Excise Taxes Under Chapters 41 and 42 of the Internal Revenue Code,* and 10 Forms 1099–DIV, *Dividends and Distributions.* Because X is required to file 12 returns during the calendar year 2022, X is required to file its Form 5227 electronically for its taxable year ending December 31, 2022.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for Split-Interest Trust returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 26.** Section 301.6011–14 is added to read as follows:

§ 301.6011–14 Required use of electronic form or other machine-readable form for material advisor disclosure statements.

(a) *Material advisor disclosure statements required electronically or in*

other machine-readable form. (1) Any material advisor required to file a return on Form 8918, *Material Advisor Disclosure Statement,* under § 301.6111–3(a) of this chapter must file its return electronically or in other machine-readable form, in accordance with revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website, if the material advisor is required by the Internal Revenue Code or regulations to file at least 10 returns (as defined in paragraph (d)(3)) of this section) during the calendar year.

(2) The Commissioner may direct the type of electronic or other machine-readable form through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically or in other machine-readable form must be made in accordance with applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 301.6111–3(a) of this chapter) and the period to which it applies.

(c) *Failure to file.* If a material advisor fails to file Form 8918 electronically or in other machine-readable form when required to do so by this section, the material advisor is deemed to have failed to file the return. (See section 6707 for the penalty for failure to file the return.)

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

(2) *Machine-readable form.* The term *machine-readable form* means any machine-readable form specifically permitted under applicable regulations, procedures, publications, forms, instructions, or other guidance.

(3) *Material advisor disclosure statement.* The term *material advisor disclosure statement* means a Form 8918, *Material Advisor Disclosure Statement,* along with all other related forms, schedules, and statements that are required to be attached to the Form 8918, including amended material advisor disclosure statements.

(4) *Calculating the number of returns.* For purposes of this section, a material advisor is required to file at least 10 returns if, during the calendar year ending with or within the material advisor's taxable year, the material advisor is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

(e) *Example.* The following example illustrates the provisions of this section:

(1) During the calendar year ending December 31, 2022, Material Advisor X was required to file one Form 8918, *Material Advisor Disclosure Statement,* one Form 1040, *U.S. Individual Income Tax Return,* and 10 Forms 1099–NEC, *Nonemployee Compensation.* Because Material Advisor X is required to file 12 returns during the calendar year 2022, X is required to file its Form 8918 electronically or in other machine-readable form, in accordance with revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website, during its calendar year ending December 31, 2022.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for Material Advisor Disclosure Statements required to be filed for taxable years ending on or after [the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 27.** Section 301.6011–15 is added to read as follows:

§ 301.6011–15 Required use of electronic form for withholding tax returns.

(a) *Withholding tax returns required electronically.* (1) A withholding agent required to file an income tax return on Form 1042, *Annual Withholding Tax Return for U.S. Source Income of Foreign Persons,* under § 1.1461–1 of this chapter must file its return electronically if the withholding agent is required by the Internal Revenue Code or regulations to file at least 10 returns (as defined in paragraph (d)(5) of this section) during the calendar year in which the Form 1042 is required to be filed. Notwithstanding the previous sentence, a withholding agent that is an individual, estate, or trust is not required to file its Form 1042 electronically.

(2) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 1.1461–1 of this chapter) and the period to which it applies.

(c) *Failure to file.* If a withholding agent fails to file a withholding agent income tax return electronically when required to do so by this section, the withholding agent is deemed to have failed to file the return. (See section 6651 for the addition to tax for failure to file a return.) In determining whether there is reasonable cause for failure to file the return, § 301.6651–1(c) and rules similar to the rules in § 301.6724–1(c)(3) (undue economic hardship related to filing information returns electronically) will apply.

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, and diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, or instructions.

(2) *Withholding agent.* The term *withholding agent* means a withholding agent as defined in § 1.1441–7(a) of this chapter.

(3) *Withholding tax return.* The term *withholding tax return* means a Form

1042, *Annual Withholding Tax Return for U.S. Source Income of Foreign Persons,* along with all other related forms, schedules, and statements that are required to be attached to the Form 1042, including amended and superseding returns.

(4) *Special rule for partnerships.* Notwithstanding paragraph (d)(5) of this section, a withholding agent that is a partnership with more than 100 partners is required to file a return described in paragraph (a) of this section electronically.

(5) *Calculating the number of returns.* For purposes of this section, a withholding agent is required to file at least 10 returns if, during the calendar year in which the Form 1042 is required to be filed, the withholding agent is required to file at least 10 returns of any type, including information returns (for example, Forms W–2, Forms 1099, Forms 1042–S), income tax returns (for example, Form 1042), employment tax returns, and excise tax returns.

(e) *Special rule for returns filed by financial institutions.* For rules that require withholding agents that are financial institutions to file returns electronically, see § 301.1474–1.

(f) *Applicability date.* The rules of this section apply to withholding tax returns required to be filed for taxable years ending on or after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 28.** Section 301.6012–2 is added to read as follows:

§ 301.6012–2 Required use of electronic form for income tax returns of certain political organizations.

(a) *Income tax returns of certain political organizations required electronically.* (1) Any organization required to file an income tax return on Form 1120–POL, *U.S. Income Tax Return for Certain Political Organizations,* under § 1.6012–6 of this chapter must file its income tax return, along with all other related forms, schedules, and statements that are required to be attached to the Form 1120–POL, including amended and superseding returns, electronically if the organization is required by the Internal Revenue Code or regulations to file at least 10 returns of any type (as defined in paragraph (d)(2)) during the calendar year.

(2) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under § 1.6012–6 of this chapter) and the period to which it applies.

(c) *Failure to file.* If an organization fails to file an income tax return electronically when required to do so by this section, the organization is deemed to have failed to file the return. (See section 6651 for the addition to tax for failure to file a return.) In determining whether there is reasonable cause for failure to file the return, § 301.6651–1(c) and rules similar to the rules in § 301.6724–1(c)(3) (undue economic hardship related to filing information returns electronically) will apply.

(d) *Meaning of terms.* The following definitions apply for purposes of this section:

(1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

(2) *Income tax return for certain political organizations.* The term *income tax return for certain political organizations* means a Form 1120–POL, *U.S. Income Tax Return for Certain Political Organizations,* along with all other related forms, schedules, and statements that are required to be attached to the Form 1120–POL, including amended and superseding returns.

(3) *Calculating the number of returns.* For purposes of this section, an organization is required to file at least 10 returns if, during the calendar year ending with or within the organization's taxable year, the organization is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns. In the case of a short-period return, an organization is required to file at least 10 returns if, during the calendar year in which the organization's short taxable year ends, the organization is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

(e) *Example.* The following example illustrates the provisions of this section:

(1) During the calendar year ending December 31, 2022, Organization X was required to file one Form 1120–POL, *U.S. Income Tax Return for Certain Political Organizations,* four (quarterly) Forms 8872, *Political Organization Report of Contributions and Expenditures,* two Forms W–2, *Wage and Tax Statement,* one Form 940, *Employer's Annual Federal Unemployment (FUTA) Tax Return,* and four Forms 941, *Employer's Quarterly Federal Tax Return.* Because X is required to file 12 returns during the calendar year, X is required to file its Form 1120–POL electronically for its taxable year ending December 31, 2022.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for income tax returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 29.** Section 301.6033–4 is revised to read as follows:

§ 301.6033–4 Required filing in electronic form for returns by organizations required to file returns under section 6033.

(a) *Returns by organizations required to file returns under section 6033 in electronic form.* (1) An organization required to file a return under section 6033 must file its return in electronic form.

(2) Returns filed in electronic form must be filed in accordance with applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Failure to file.* If an organization required to file a return under section 6033 fails to file an information return in electronic form when required to do so by this section, the organization is deemed to have failed to file the return. (See section 6652 for the addition to tax for failure to file a return.) In determining whether there is reasonable cause for failure to file the return, § 301.6652–2(f) will apply.

(c) *Meaning of terms.* For purposes of this section the term *return required under section 6033* means a Form 990, *Return of Organization Exempt From Income Tax,* Form 990–EZ, *Short Form Return of Organization Exempt From Income Tax,* and Form 990–PF, *Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation,* along with all other related forms, schedules, and statements that are required to be attached to the Form 990, Form 990–EZ, or Form 990–PF, and all members of the Form 990 series of returns, including amended and superseding returns. A Form 4720 filed by a private foundation is a form required to be filed under section 6033.

(d) *Applicability date.* The rules of this section apply for any returns under section 6033 required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 30.** Section 301.6037–2 is amended by revising the section heading, paragraphs (a), (b), (d)(1) and (5), (e) and (f) to read as follows:

§ 301.6037–2 Required use of electronic form for returns of electing small business corporation.

(a) *Returns of electing small business corporation required electronically.* (1) An electing small business corporation required to file an electing small business return on Form 1120–S, *U.S. Income Tax Return for an S Corporation,* under § 1.6037–1 of this chapter must file its Form 1120–S electronically if the small business corporation is required by the Internal Revenue Code and regulations to file at least 10 returns during the calendar year.

(2) The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may grant waivers of the requirements of this section in cases of undue hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the return on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under section 6037) and the period to which it applies.

* * * * *

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(5) *Calculating the number of returns.* For purposes of this section, a corporation is required to file at least 10 returns if, during the calendar year ending with or within the corporation's taxable year, the corporation is required to file at least 10 returns of any type, including income tax returns, employment tax returns, excise tax returns, and information returns (for example, Forms W–2, Forms 1099, but not including schedules required to be attached to an S corporation return). In the case of a short-period return, a corporation is required to file at least 10 returns if, during the calendar year in which the corporation's short taxable year ends, the corporation is required to file at least 10 returns of any type, including information returns (for example, Forms W–2, Forms 1099, but not including schedules required to be attached to an S corporation return), income tax returns, employment tax returns, and excise tax returns.

(e) *Example.* The following example illustrates the provisions of this section. In the example, the corporation is a calendar-year taxpayer.

(1) In 2022, Corporation S, an electing small business corporation, is required to file one 2021 Form 1120–S, *U.S. Corporation Income Tax Return,* two Forms W–2, *Wage and Tax Statement,* two Forms 1099–DIV, *Dividends and Distributions,* one Form 940, *Employer's Annual Federal Unemployment (FUTA) Tax Return,* and four Forms 941, *Employer's Quarterly Federal Tax Return.* Because S is required to file 10 returns during the calendar year 2022, S is required to file its 2022 Form 1120–S electronically.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for electing small business corporation returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**].

■ **Par. 31.** Section 301.6057–3 is amended by:

■ 1. Revising paragraphs (a), (b), and (d)(1);

■ 2. Revising the heading of paragraph (d)(4);

■ 3. Revising paragraph (d)(4)(i);

■ 4. In paragraph (e), designating the example as paragraph (e)(1).

■ 5. Revising newly designated paragraph (e)(1) and adding paragraph (e)(2); and

■ 6. Revising paragraph (f).

The revisions and addition read as follows:

§ 301.6057–3 Required use of electronic form for filing requirements relating to deferred vested retirement benefit.

(a) *Electronic-filing requirements under section 6057.* A registration statement required under section 6057(a) or a notification required under section 6057(b) with respect to an employee benefit plan must be filed electronically if the filer is required by the Internal Revenue Code or regulations to file at least 10 returns during the calendar year that includes the first day of the plan year. The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may waive the requirements of this section in cases of undue economic hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the registration statements or notifications electronically in accordance with this section exceeds the cost of filing the registration statements or notifications on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a registration statement or notification under section 6057) and the period to which it applies.

* * * * *

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(4) *Calculating the number of returns*—(i) *In general.* For purposes of this section, a filer is required to file at least 10 returns if, during the calendar year that includes the first day of the plan year, the filer is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

* * * * *

(e) * * *

(1) *Example.* In 2023, P, the plan administrator of Plan B, is required to file 12 returns (including Forms 1099–R, *Distributions From Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.;* Form 8955–SSA; Form 5500, *Annual Return/Report of Employee Benefit Plan;* and Form 945, *Annual Return of Withheld Federal Income Tax*). Plan B's plan year is the calendar year. Because P is required to file at least 10 returns during the 2023 calendar year, P must file the 2023 Form 8955–SSA for Plan B electronically.

(2) [Reserved]

(f) *Applicability date.* The rules of this section apply for registration statements and other notifications required to be filed under section 6057 for plan years that begin on or after January 1, 2022, but only for filings with a filing deadline (not taking into account extensions) after July 31, 2022.

■ **Par. 32.** Section 301.6058–2 is amended by:

■ 1. Revising the section heading.

■ 2. Revising paragraphs (a), (b), and (d)(1);

■ 3. Revising the heading of paragraph (d)(3); and

■ 4. Revising paragraphs (d)(3)(i), (d)(3)(iii), (e), and (f).

The revisions read as follows:

§ 301.6058–2 Required use of electronic form for filing requirements relating to information required in connection with certain plans of deferred compensation.

(a) *Electronic-filing requirements under section 6058.* A return required under section 6058 with respect to an employee benefit plan must be filed electronically if the filer is required by the Internal Revenue Code or regulations to file at least 10 returns during the calendar year that includes the first day of the plan year. The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Returns filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may waive the requirements of this section in cases of undue economic hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the return electronically in accordance with this section exceeds the cost of filing the returns on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, a return required under section 6058) and the period to which it applies.

* * * * *

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(3) *Calculating the number of returns*—(i) *In general.* For purposes of this section, a filer is required to file at least 10 returns if, during the calendar year that includes the first day of the plan year, the filer is required to file at least 10 returns of any type, including information returns (for example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns. See section 6011(e)(6), Application of numerical limitation to returns relating to deferred compensation plans.

* * * * *

(iii) *Special rules relating to calculating the number of returns.* For purposes of applying paragraph (d)(3)(ii) of this section, the aggregation rules of section 414(b), (c), (m), and (o) will apply to a filer that is or includes an employer. Thus, for example, a filer that is a member of a controlled group of corporations within the meaning of section 414(b) must file the Form 5500 series electronically if the aggregate number of returns required to be filed by all members of the controlled group of corporations is at least 10 returns.

(e) *Example.* The following example illustrates the provisions of paragraph (d)(3) of this section:

(1) In 2023, Employer X (the plan sponsor and plan administrator of Plan A) is required to file 12 returns. The sole shareholder of X and his spouse are the only participants in Plan A. Employer X is required to file the following: One Form 1120, *U.S. Corporation Income Tax Return;* two Forms W–2, *Wage and Tax Statement;* one Form 940, *Employer's Annual Federal Unemployment (FUTA) Tax Return;* four Forms 941, *Employer's Quarterly Federal Tax Return;* one Form 945, *Annual Return of Withheld Federal Income Tax;* and two Forms 1099–DIV, *Dividends and Distributions.* Employer X is required to file one Form 5500–EZ. Plan A's plan year is the calendar year. Because Employer X is required to file at least 10 returns during the 2023 calendar year, the 2023 Form 5500–EZ must be filed electronically.

(2) [Reserved]

(f) *Applicability date.* This section is applicable for returns required to be filed under section 6058 for plan years that begin on or after January 1, 2022, but only for filings with a filing deadline (not taking into account extensions) after July 31, 2022.

■ **Par. 33.** Section 301.6059–2 is amended by:

■ 1. Revising the section heading;

■ 2. Revising paragraphs (a), (b), (d)(1);

■ 3. In paragraph (d)(3), revising the paragraph heading and paragraph (d)(3)(i);

■ 4. Removing paragraph (e) and redesignating paragraph (f) as paragraph (e); and

■ 5. Revising newly designated paragraph (e).

The revisions read as follows:

§ 301.6059–2 Required use of electronic form for filing requirements relating to periodic report of actuary.

(a) *Electronic-filing requirements under section 6059.* An actuarial report required under section 6059 with respect to an employee benefit plan must be filed electronically if the filer is required by the Internal Revenue Code or regulations to file at least 10 returns during the calendar year that includes the first day of the plan year.

The Commissioner may direct the type of electronic filing and may also exempt certain returns from the electronic requirements of this section through revenue procedures, publications, forms, instructions, or other guidance, including postings on the *IRS.gov* website. Actuarial reports filed electronically must be made in accordance with the applicable revenue procedures, publications, forms, instructions, or other guidance.

(b) *Undue hardship.* The Commissioner may waive the requirements of this section in cases of undue economic hardship. The principal factor in determining hardship will be the amount, if any, by which the cost of filing the reports electronically in accordance with this section exceeds the cost of filing the reports on paper. A request for a waiver must be made in accordance with applicable IRS revenue procedures, publications, forms, instructions, or other guidance, including postings to the *IRS.gov* website. The waiver will specify the type of filing (that is, an actuarial report required under section 6059) and the period to which it applies.

* * * * *

(d) * * * (1) *Magnetic media or electronic form.* The terms *magnetic media or electronic form* mean any media or form permitted under applicable regulations, revenue procedures, or publications. These generally include electronic filing, as well as magnetic tape, tape cartridge, diskette, and other media specifically permitted under the applicable regulations, procedures, publications, forms, instructions, or other guidance.

* * * * *

(3) *Calculating the number of returns*—(i) *In general.* For purposes of this section, a filer is required to file at least 10 returns if, during the calendar year that includes the first day of the plan year, the filer is required to file at least 10 returns of any type, including information returns (or example, Forms W–2 and Forms 1099), income tax returns, employment tax returns, and excise tax returns.

* * * * *

(e) *Applicability date.* This section is applicable for actuarial reports required to be filed under section 6059 for plan years that begin on or after January 1, 2022, but only for filings with a filing deadline (not taking into account extensions) after July 31, 2022.

■ **Par. 34.** Section 301.6721–1 is amended by:

■ 1. Revising paragraph (a)(2)(ii).

■ 2. In paragraph (b)(5), revising the introductory text.

■ 3. In paragraph (b)(5), designating *Examples 1* through *4* as paragraphs (b)(5)(i) through (iv).

■ 4. Revising newly designated paragraphs (b)(5)(iii) and (b)(5)(iv).

■ 5. Adding paragraphs (b)(5)(v) and (b)(5)(vi).

■ 6. Adding paragraph (h).

The revisions and additions read as follows:

§ 301.6721–1 Failure to file correct information returns.

(a) * * *

(2) * * *

(ii) A failure to include all the information required to be shown on the return or including incorrect information (failure to include correct information). A failure to file timely includes a failure to file in the required manner, for example, electronically or in other machine-readable form as provided under section 6011(e). However, no penalty is imposed under paragraph (a)(1) of this section solely by reason of any failure to comply with the requirements of section 6011(e)(2), except to the extent that the failure occurs with respect to more than the applicable number of returns (determined under regulations prescribed under section 6011(e)(5) with respect to the calendar year during which such returns are required to be filed), or with respect to a return described in section 6011(e)(4). If a partnership return under section 6031(a) is required to be filed electronically, each schedule required to be included with such return with respect to each partner will be treated as a separate information return for purposes of this section. See section 6724(e). Filers who are required to file information returns electronically and who file those information returns electronically are considered to have satisfied the electronic filing requirement. Except as provided in paragraph (c)(1) or (e)(1) of this section, a failure to include correct information encompasses a failure to include the information required by applicable information-reporting statutes or by any administrative pronouncements issued thereunder (such as regulations, revenue rulings, revenue procedures, or information-reporting forms, and form instructions). A failure to include information in the correct format may be either a failure to file timely an information return or a failure to include correct information on an information return. For example, an error on an electronic submission to the Internal Revenue Service that prevents processing by the Internal Revenue Service may constitute a failure to file timely. However, if information is set forth on the wrong field of the electronic submission, that error may constitute a failure to file timely or a failure to include correct information, depending upon the extent of the failure. For purposes of paragraph (b) of this section, a failure to file corrected information returns in the format required under § 301.6011–2(c)(4)(ii) will be deemed a failure to correct the corresponding original information returns.

(b) * * *

(5) *Examples.* The provisions of paragraphs (a) and (b)(1) through (4) of this section may be illustrated by the following examples. These examples do not take into account any possible application of the *de minimis* exception under paragraph (d) of this section, the lower small business limitations under paragraph (e) of this section, the penalty for intentional disregard under paragraph (f) of this section, adjustments for inflation under section 6721(f), or the reasonable-cause waiver under § 301.6724–1(a):

* * * * *

(iii) *Example 3.* In calendar year 2023, Corporation U timely files on paper 12 Forms 1099–MISC for the 2022 calendar year with correct information. Under § 301.6011–2, a person required to file at least 10 returns during calendar year 2023 must file those returns electronically. Corporation U does not correct its failures to file these returns electronically by August 1, 2023. See section 6721(b)(2). Corporation U is therefore subject to a penalty for a failure to file timely under paragraph (a)(2) of this section. However, under section 6724(c) and paragraph (a)(2) of this section, the penalty for a failure to file timely electronically applies only to the extent the number of returns exceeds 10. As Corporation U was required to file 12 returns electronically, it is subject to a penalty of $500 for 2 returns ($250 × 2 = $500).

(iv) *Example 4.* In calendar year 2023, Corporation W timely electronically files 25 Forms 1099–B (relating to proceeds from broker and barter exchange transactions) with incorrect information. On August 1, 2023, Corporation W discovers the errors and files 25 corrected Forms 1099–B on paper. Under § 301.6011–2(c)(4)(2)(A), a person required to file an original information return covered by § 301.6011–2(b) electronically must file any corrected information return corresponding to that original return electronically. Under paragraph (a)(2)(ii) of this section, a failure to file a corrected information return electronically when required to do so is

deemed a failure to correct the corresponding original information return. As Corporation W was required to file its 25 corrected information returns electronically, it is deemed to have failed to correct the original information returns and is subject to a penalty of $6,250 for failure to include correct information on its 25 original Forms 1099–B ($250 × 25 = $6,250), without any reductions for correcting the information on or before August 1.

(v) *Example 5.* During the 2023 calendar year, Corporation V files 25 Forms 1099–B (relating to proceeds from broker and barter exchange transactions) on paper. The forms were filed on March 15, 2023, rather than on the required filing date of February 28, 2023. Under § 301.6011–2, a person required to file at least 10 returns during calendar years 2023 and after must file those returns electronically. Corporation V does not correctly file these returns electronically by August 1, 2023. See section 6721(b)(2). Corporation V is subject to a penalty of $500 for filing 10 of the returns late, but within 30 days after the required filing date ($50 × 10). In addition, Corporation V is subject to a penalty of $3,750 for failing to file 15 returns electronically ($250 × 15).

(vi) *Example 6.* Partnership X has 120 partners in calendar year 2022. In calendar year 2023, it timely filed on paper its 2022 Form 1065 and 230 accompanying Schedules K–1 and Schedules K–3 (120 Schedules K–1 and 110 Schedules K–3). Partnership X filed no other returns during calendar year 2023. Under § 301.6011–3(a)(1)(B), a partnership with more than 100 partners must electronically file its partnership return, including Schedules K–1 and K–3. Under section 6724(e), Schedules K–1 and K–3 are treated as separate information returns for purposes of penalties under section 6721, even though they are not listed under § 301.6011–2(b) as information returns required to be filed electronically and are not defined as information returns under section 6724(d). Because the applicable number for information returns required to be filed during calendar year 2023 is 10, Partnership X would be subject to a penalty of $55,000 for failing to electronically file 220 Schedules K–1 and K–3 required to be included with the partnership return: The 11th through the 230th of the required schedules ($250 × 220 = $55,000).

* * * * *

(h) *Applicability date.* The rules of paragraph (a)(2)(ii) of this section apply for information returns required to be filed during calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**]. For the rules that apply under paragraph (a)(2)(ii) of this section for information returns required to be filed before calendar years beginning after [Date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**], see 26 CFR part 301, revised as of April 1, 2021.

Douglas W. O'Donnell,

Deputy Commissioner for Services and Enforcement.

ELECTRONIC RESEARCH

World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **www.govinfo.gov.**

Federal Register information and research tools, including Public Inspection List and electronic text are located at: **www.federalregister.gov.**

E-mail

FEDREGTOC (Daily Federal Register Table of Contents Electronic Mailing List) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.

To join or leave, go to **https://public.govdelivery.com/accounts/USGPOOFR/subscriber/new**, enter your email address, then follow the instructions to join, leave, or manage your subscription.

PENS (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.

To subscribe, go to **http://listserv.gsa.gov/archives/publaws-l.html and select** *Join or leave the list (or change settings);* then follow the instructions.

FEDREGTOC and **PENS** are mailing lists only. We cannot respond to specific inquiries.

Reference questions. Send questions and comments about the Federal Register system to: **fedreg.info@nara.gov**

The Federal Register staff cannot interpret specific documents or regulations.
