FEDERAL REGISTER

Vol. 87 Friday

No. 145 July 29, 2022

Book 1 of 2 Books

Pages 45623–46386

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 87 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Proclamation 10427 of July 26, 2022

National Korean War Veterans Armistice Day, 2022

By the President of the United States of America

A Proclamation

In June of 1950, the United States answered the call to defend freedom abroad by joining the Republic of Korea in its fight against the communist regime in North Korea and eventually the People's Republic of China. After 3 years of violent combat across the Korean peninsula, an armistice was signed by representatives of the United States as head of the United Nations Command, the People's Republic of China, and North Korea. For nearly 70 years, the ensuing peace and the abiding relationship between the Korean and American people has been the foundation for the thriving democracy and incredible economic progress of the Republic of Korea. During my recent visit to the Republic of Korea, I paid tribute to those Korean troops who fought and sacrificed shoulder-to-shoulder with Americans, along with our United Nations counterparts, to defend their country. Today, our Nation honors those selfless American service members whose courage and sacrifice helped forge the armistice, the enduring Alliance between our two nations, and a lasting legacy of freedom in the Republic of Korea.

Today, the Republic of Korea is our strong ally, a global center of innovation, and a vibrant democracy. In Seoul, I affirmed with President Yoon that the U.S.-ROK Alliance is stronger than ever, evolving to maintain its role as a linchpin of peace and stability in the region and increasingly expanding to the global stage. At Osan Air Base, I met with some of the brave American troops and their families who are stationed in the Republic of Korea, still serving side-by-side with our South Korean allies and strengthening the bonds between our people.

During the Korean War, nearly 1.8 million Americans answered the call to serve and defend the freedoms and universal values that the people of South Korea enjoy today. They faced enormous challenges—often outnumbered by the enemy, facing extreme heat and cold while fighting in the mountains and valleys and in the rice paddies and rocky terrain of the Korean Peninsula. More than 36,000 of those American service members were killed in action, along with more than 7,000 Korean Augmentation to the United States Army soldiers that fought with the United States Armed Forces—sacrificing everything to defend freedom and democracy on the Peninsula. Thousands were held in brutal captivity. Thousands remain unaccounted for to this day. Many more service members returned home with wounds of war, both visible and invisible. The First Lady and I are committed to fully accounting for all of our Prisoners of War and Missing in Action and fulfilling our sacred obligation to care for our veterans and their families, caregivers, and survivors, making sure they receive the benefits and services they have earned.

Today and every day, we continue to remember our Nation's Korean War Veterans and honor all that they made possible through service to our Nation and our highest ideals.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim July 27, 2022, as National Korean War Veterans Armistice Day. On this day, I encourage

all Americans to reflect on the strength, sacrifices, and sense of duty of our Korean War Veterans and bestow upon them the high honor they deserve. I call upon all Americans to observe this day with appropriate ceremonies and activities that honor and give thanks to our distinguished Korean War Veterans.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of July, in the year of our Lord two thousand twenty-two, and of the Independence of the United States of America the two hundred and forty-seventh.

Memorandum of July 22, 2022

Delegation of Authority Under Section 506(a)(1) of the Foreign Assistance Act of 1961

Memorandum for the Secretary of State

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 621 of the Foreign Assistance Act of 1961 (FAA), I hereby delegate to the Secretary of State the authority under section 506(a)(1) of the FAA to direct the drawdown of up to $175 million in defense articles and services of the Department of Defense, and military education and training, to provide assistance to Ukraine and to make the determinations required under such section to direct such a drawdown.

You are authorized and directed to publish this memorandum in the *Federal Register*.

Rules and Regulations

Federal Register
Vol. 87, No. 145
Friday, July 29, 2022

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–1075; Project Identifier MCAI–2021–00856–T; Amendment 39–22077; AD 2022–12–05]

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2020–26–01, which applied to all Airbus SAS Model A318–111, –112, –121, and –122 airplanes; Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; and Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes. AD 2020–26–01 required repetitive general visual inspections of the affected main landing gear (MLG) sliding tubes for cracks, and replacement if necessary. This AD was prompted by reports of cracks found on MLG sliding tubes that may have been subject to improperly performed magnetic particle inspection. This AD requires repetitive general visual inspections of the affected MLG sliding tubes (both retained affected parts and additional affected parts) for cracks, and replacement if necessary, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. This AD also adds airplanes to the applicability. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective September 2, 2022.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of September 2, 2022.

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2021–1075.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2021–1075; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3229; email *vladimir.ulyanov@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021–0175, dated July 22, 2021; corrected July 23, 2021 (EASA AD 2021–0175) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A318–111, A318–112, A318–121, A318–122, A319–111, A319–112, A319–113, A319–114, A319–115, A319–131, A319–132, A319–133, A320–211, A320–212, A320–214, A320–215, A320–216, A320–231, A320–232, A320–233, A321–111, A321–112, A321–131, A321–211, A321–212, A321–213, A321–231, and A321–232 airplanes. Model A320–215 airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this AD therefore does not include those airplanes in the applicability.

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2020–26–01, Amendment 39–21356 (85 FR 82299, December 18, 2020) (AD 2020–26–01). AD 2020–26–01 applied to all Airbus SAS Model A318–111, –112, –121, and –122 airplanes; Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes; and Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes. The NPRM published in the **Federal Register** on December 27, 2021 (86 FR 73197). The NPRM was prompted by reports of cracks found on MLG sliding tubes that may have been subject to improperly performed magnetic particle inspection. The NPRM proposed to require repetitive general visual inspections of the affected MLG sliding tubes (both retained affected parts and additional affected parts) for cracks, and replacement if necessary, as specified in EASA AD 2021–0175. The NPRM also proposed to add airplanes to the applicability.

The FAA is issuing this AD to address cracks on the MLG sliding tubes, which could cause MLG sliding tube fracture, and could result in the MLG collapsing, damage to the airplane, and injury to occupants. See the MCAI for additional background information.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from the Air Line Pilots Association, International (ALPA), who supported the NPRM without change.

The FAA also received a comment from Delta Air Lines (DAL). The following presents the comment received on the NPRM and the FAA's response.

Request for Clarification of Inspection Requirements

DAL requested clarification of the language specified in paragraph (6) of EASA AD 2021–0175 that ''following installation, the part is inspected as required by this [EASA] AD.'' DAL stated that more than one interpretation is possible, but it presumed the intent to be that an affected part can only be

installed if it is inspected within the compliance time specified in paragraph (1) of EASA AD 2021–0175 (rather than requiring an inspection immediately after installing an affected part on-wing).

The FAA agrees to clarify the referenced quote. The statement ''following installation, the part is inspected as required by this [EASA] AD'' does not mean an inspection is required before further flight after installing an affected part. Instead, it means that the part must meet the inspection requirements of paragraph (1) of EASA AD 2021–0175 at the applicable compliance times specified in paragraph (1) of EASA AD 2021–0175.

Conclusion

The FAA reviewed the relevant data, considered the comments received, and determined that air safety requires adopting this AD as proposed. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products.

Related Service Information Under 1 CFR Part 51

EASA AD 2021–0175 describes procedures for repetitive general visual inspections of the MLG sliding tubes for cracks, and replacement if necessary. EASA AD 2021–0175 also describes terminating actions for the repetitive inspections of affected MLG sliding tubes by either overhauling an affected MLG sliding tube or replacing an affected MLG sliding tube with an MLG sliding tube that is not affected.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 1,524 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Retained actions from AD 2020–26–01.	2 work-hours × $85 per hour = $170	$0	$170	$259,080
New proposed actions	2 work-hours × $85 per hour = $170	0	170	259,080

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
19 work-hours × $85 per hour = $1,615	$185	$1,800

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2020–26–01, Amendment 39–21356 (85 FR 82299, December 18, 2020); and

■ b. Adding the following new AD:

2022–12–05 Airbus SAS: Amendment 39–22077; Docket No. FAA–2021–1075; Project Identifier MCAI–2021–00856–T.

(a) Effective Date

This airworthiness directive (AD) is effective September 2, 2022.

(b) Affected ADs

This AD replaces AD 2020–26–01, Amendment 39–21356 (85 FR 82299, December 18, 2020) (AD 2020–26–01).

(c) Applicability

This AD applies to all Airbus SAS airplanes identified in paragraphs (c)(1) through (4) of this AD, certificated in any category.

(1) Model A318–111, –112, –121, and –122 airplanes.

(2) Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(3) Model A320–211, –212, –214, –216, –231, –232, and –233 airplanes.

(4) Model A321–111, –112, –131, –211, –212, –213, –231, and –232 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 32, Landing gear.

(e) Reason

This AD was prompted by reports of cracks found on main landing gear (MLG) sliding tubes that may have been subject to improperly performed magnetic particle inspection. The FAA is issuing this AD to address cracks on the MLG sliding tubes, which could cause MLG sliding tube fracture, and could result in the MLG collapsing, damage to the airplane, and injury to occupants.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2021–0175, dated July 22, 2021; corrected July 23, 2021 (EASA AD 2021–0175).

(h) Exceptions to EASA AD 2021–0175

(1) Where EASA AD 2021–0175 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where EASA AD 2021–0175 refers to July 10, 2018 (the effective date of EASA AD 2018–0136, dated June 26, 2018), this AD requires using April 9, 2019 (the effective date of AD 2019–03–18, Amendment 39–19570 (84 FR 7804, March 5, 2019)).

(3) Where EASA AD 2021–0175 refers to December 2, 2020 (the effective date of EASA AD 2020–0258, dated November 18, 2020; corrected November 19. 2020), this AD requires using January 4, 2021 (the effective date of AD 2020–26–01).

(4) Where paragraph (1) of EASA AD 2021–0175 specifies compliance times to do the initial inspection, for this AD, the initial inspection must be done within the applicable compliance time specified in paragraph (1) of EASA AD 2021–0175, or within 30 days after the effective date of this AD, whichever occurs later.

(5) The ''Remarks'' section of EASA AD 2021–0175 does not apply to this AD.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2021–0175 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (j)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(k) Related Information

For more information about this AD, contact Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3229; email *vladimir.ulyanov@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2021–0175, dated July 22, 2021; corrected July 23, 2021.

(ii) [Reserved]

(3) For EASA AD 2021–0175, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on June 4, 2022.

Gaetano A. Sciortino,

Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; Embraer S.A. (Type Certificate Previously Held by Yaborã Indústria Aeronáutica S.A.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2022–08–07, which applied to all Embraer S.A. Model ERJ 170–100 STD, –100 LR, –100 SU, and –100 SE airplanes; Model ERJ 170–200 STD, –200 LR, and –200 SU airplanes; Model ERJ 190–100 STD, –100 LR, –100 IGW, and –100 ECJ airplanes; and Model ERJ 190–200 STD, –200 LR, and –200 IGW airplanes. AD 2022–08–07 required determining if certain NORDAM passenger windows are installed, inspecting affected parts for cracks, and replacing cracked parts. AD 2022–08–07 also required repetitive inspections of uncracked affected parts until all affected parts are replaced. This

AD was prompted by a determination that additional airplanes are affected by the unsafe condition identified in AD 2022–08–07. This AD retains certain requirements of AD 2022–08–07, revises the applicability of AD 2022–08–07 to include the affected parts for clarification, and adds a certain airplane model to the applicability. This AD also prohibits the installation of affected parts. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective August 15, 2022.

The FAA must receive comments on this AD by September 12, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0976; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The street address for the Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Jacob Fitch, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–4130; email *jacob.fitch@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA issued AD 2022–08–07, Amendment 39–22010 (87 FR 21003, April 11, 2022) (AD 2022–08–07), for all Embraer S.A. Model ERJ 170–100 STD, –100 LR, –100 SU, and –100 SE airplanes; Model ERJ 170–200 STD, –200 LR, and –200 SU airplanes; Model ERJ 190–100 STD, –100 LR, –100 IGW, and –100 ECJ airplanes; and Model ERJ 190–200 STD, –200 LR, and –200 IGW airplanes. AD 2022–08–07 required determining if certain NORDAM passenger windows are installed (*i.e.,* windows having parts manufacturer approval (PMA) part number (P/N) NP00038–3), inspecting affected parts for cracks, and replacing cracked parts. AD 2022–08–07 also required repetitive inspections of uncracked affected parts until all affected parts are replaced. AD 2022–08–07 also prohibited the installation of affected parts. AD 2022–08–07 was prompted by a report of the failure of the inner pane of the passenger window to meet maximum operating pressure and lack of fail-safe design. The FAA issued AD 2022–08–07 to address this condition, which could result in possible serious injury to a passenger near the window due to rapid decompression, and consequent reduced ability of the flightcrew to maintain the safe flight and landing of the airplane.

Actions Since AD 2022–08–07 Was Issued

Since the FAA issued AD 2022–08–07, the agency has determined that Model ERJ 170–200 LL airplanes are also affected by the identified unsafe condition. For Model ERJ 170–200 LR airplanes that were converted to Model ERJ 170–200 LL airplanes, the affected parts could be installed on one of the converted airplanes. The FAA also determined that, for clarity, the applicability of AD 2022–08–07 must be revised to include the affected parts.

Comments on AD 2022–08–07

The FAA issued AD 2022–08–07 as a final rule; request for comments. The FAA received a comment from Aerolitoral, S.A. de C.V. (Aeromexico Connect) who expressed support for AD 2022–08–07. The FAA received additional comments from five commenters, including Agência Nacional de Aviação Civil (ANAC), Embraer, Myanmar Airways International, Servicio Aéreo a Territorios Nacionales (SATENA), and Ukraine International Airlines. The FAA determined that certain comments contained information to warrant changes to AD 2022–08–07. The following presents the comments received on AD 2022–08–07 and the FAA's response to each comment.

Request To Revise Applicability

Embraer requested that the FAA revise the applicability in paragraph (c) of AD 2022–08–07 to specify that the AD applies to NORDAM passenger windows having PMA P/N NP00038–3 and that the part could be installed on the airplanes identified in paragraphs (c)(1) through (4) of AD 2022–08–07. Embraer stated that the applicability of AD 2022–08–07 specifies that certain airplanes are affected; however, Embraer noted the AD should specify it is applicable to the PMA passenger windows. Embraer stated the applicability is generating questions and doubts from operators and local authorities in countries where PMA part numbers are not approved by local regulators. Embraer noted it is unable to define if the AD is applicable or not to specific operators as it depends on the local aircraft civil operations rules.

ANAC, which is the aviation authority for Brazil, also requested that the FAA revise the applicability to make it clear the AD is component-level AD and not an airplane-level AD. ANAC stated that if the affected parts can be used on any airplane registered outside of the U.S., it is concerned that other countries may not follow the AD, as the FAA is not the State of Design Authority for the airplanes.

The FAA agrees to revise the applicability and has revised paragraph (c) of this AD to specify this AD applies to airplanes equipped with NORDAM passenger windows having PMA P/N NP00038–3. As noted, the FAA is not the State of Design Authority for Embraer airplanes. However, the FAA is responsible for the affected PMA part. The change to the applicability clarifies this AD is applicable to the affected PMA parts, which are only installed on the Embraer airplanes identified in the applicability. The change to the applicability does not change how the unsafe condition is addressed. All affected PMA parts must be inspected and replaced as required by this AD.

Request To Clarify Affected Parts

Embraer requested that the FAA clarify paragraph (g) of AD 2022–08–07 to specify that the affected part is a PMA part. Embraer stated that NORDAM P/N NP00038–3 is a PMA part number that is not part of the Embraer type design since it is an FAA-approved PMA part number.

The FAA agrees to clarify that the affected parts are PMA parts and has revised paragraphs (g) and (j) of this AD accordingly. The FAA also notes that the NORDAM PMA part number is distinct from the original equipment manufacturer (Embraer) part number and has added Note 1 to paragraph (c) of this AD to clarify that the Embraer part number is not affected by this AD.

Request To Clarify Part Number

Ukraine International Airlines and SATENA requested that the FAA clarify the affected part number. The commenters stated that the illustrated

parts catalog (IPC) for Embraer 190 does not mention the part number specified in AD 2022–08–07. Ukraine International Airlines stated the IPC lists a ''TRANSPARENCY, PAX WINDOW'' having P/N P00038–3 only (without the letter ''N'' before the number).

The FAA agrees to clarify. NORDAM manufactures P/N NP00038–3 as a PMA replacement part for the original equipment manufacturer (Embraer) P/N P00038–3. As specified in paragraph (c) of this AD, this AD only applies to the NORDAM PMA part number, not the original Embraer part number.

Request for Contact Information

Myanmar Airways International requested that the FAA provide contact information for the NORDAM Alert Service Bulletin ERJ 56–A01, dated January 18, 2022, referenced in AD 2022–08–07. The commenter noted that the NORDAM Alert Service Bulletin ERJ 56–A01, dated January 18, 2022, is referred to as guidance for accomplishing the actions.

The FAA agrees for the reasons provided. The FAA has included contact information for obtaining a copy of NORDAM Alert Service Bulletin ERJ 56–A01, dated January 18, 2022, in paragraph (o)(2) of this AD.

FAA's Determination

The FAA is issuing this AD because the agency has determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD requires repetitive inspections of NORDAM passenger windows having PMA P/N NP00038–3 for cracks, replacement of cracked windows, and eventual replacement of all PMA P/N NP00038–3 windows. This AD also prohibits the installation of PMA P/N NP00038–3 windows.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for ''good cause,'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies forgoing notice and comment prior to adoption of this rule because due to the lack of a fail-safe design and failure of the window's inner pane to meet maximum operating pressure, a complete failure of the outer window pane could result in possible serious injury to a passenger near the window due to rapid decompression, and consequent reduced ability of the flightcrew to maintain the safe flight and landing of the airplane. Accordingly, notice and opportunity for prior public comment are impracticable and contrary to the public interest pursuant to 5 U.S.C. 553(b)(3)(B).

In addition, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days, for the same reasons the FAA found good cause to forgo notice and comment.

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2022–0976 and Project Identifier AD–2022–00722–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Jacob Fitch, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–4130; email *jacob.fitch@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Regulatory Flexibility Act

The requirements of the Regulatory Flexibility Act (RFA) do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD affects 65 airplanes of U.S. registry (only a total of 65 affected parts were produced). The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Repetitive inspections for cracking (retained action from AD 2022–08–07).	Up to 1 work-hour × $85 per hour = $85 per inspection cycle.	$0	$85 per inspection cycle.	Up to $5,525 per inspection cycle.
Replacement (retained action from AD 2022–08–07).	2 work-hours × $85 per hour = $170	500	$670	Up to $43,550.

ESTIMATED COSTS—Continued

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Repetitive inspections for cracking (new action for added airplane model).	Up to 1 work-hour × $85 per hour = $85 per inspection cycle.	0	$85 per inspection cycle.	Up to $5,525 per inspection cycle.
Replacement (new action for added airplane model).	2 work-hours × $85 per hour = $170	500	$670	Up to $43,550.

The FAA estimates the following costs to do any necessary actions that would be required based on the results of the inspections. The FAA has no way of determining the number of aircraft that might need these actions:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replacement	2 work-hours × $85 per hour = $170	$500	$670

The FAA has included all known costs in its cost estimate. According to the parts manufacturer, however, some or all of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–08–07, Amendment 39–22010 (87 FR 21003, April 11, 2022); and

■ b. Adding the following new AD:

2022–16–01 Embraer S.A. (Type Certificate Previously Held by Yaborã Indústria Aeronáutica S.A.): Amendment 39–22130; Docket No. FAA–2022–0976; Project Identifier AD–2022–00722–T.

(a) Effective Date

This airworthiness directive (AD) is effective August 15, 2022.

(b) Affected ADs

This AD replaces AD 2022–08–07, Amendment 39–22010 (87 FR 21003, April 11, 2022) (AD 2022–08–07).

(c) Applicability

This AD applies to all Embraer S.A. airplanes identified in paragraphs (c)(1) through (4) of this AD, certificated in any category; equipped with any NORDAM passenger window having parts manufacturer approval (PMA) part number (P/N) NP00038–3.

Note 1 to the introductory text of paragraph (c): PMA P/N NP00038–3 is approved for type design (Embraer) P/N P00038–3. Only PMA P/N NP00038–3 is affected by this AD.

(1) Model ERJ 170–100 STD, –100 LR, –100 SU, and –100 SE airplanes.

(2) Model ERJ 170–200 STD, –200 LR, –200 SU, and –200 LL airplanes.

(3) Model ERJ 190–100 STD, –100 LR, –100 IGW, and –100 ECJ airplanes.

(4) Model ERJ 190–200 STD, –200 LR, and –200 IGW airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 56, Windows.

(e) Unsafe Condition

This AD was prompted by a report of the failure of the inner pane of the passenger window to meet maximum operating pressure and lack of fail-safe design, and by a determination that additional airplanes are affected by the unsafe condition identified in AD 2022–08–07. The FAA is issuing this AD to address this condition, which could result in possible serious injury to a passenger near the window due to rapid decompression, and consequent reduced ability of the flightcrew to maintain the safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Definition of Affected Parts With a Clarification That the Affected Parts Are PMA Parts

This paragraph restates the definition specified in paragraph (g) of AD 2022–08–07, with a clarification that the affected parts are PMA parts. For the purposes of this AD, affected parts are NORDAM passenger

windows having PMA part number (P/N) NP00038–3.

(h) Retained Inspections and Replacement With Added Reference to Affected Parts in Paragraph (h)(1) of This AD

This paragraph restates the requirements of paragraphs (h)(1) and (2) of AD 2022–08–07, with added reference to affected parts in paragraph (h)(1) of this AD. For all airplanes except Model ERJ 170–200 LL airplanes, comply with the actions required by paragraphs (h)(1) and (2) of this AD.

(1) Before further flight, do a visual inspection of the outer window pane of the affected parts for cracking, and do the applicable action specified in paragraph (h)(1)(i) or (ii) of this AD.

(i) If any cracking is found, before further flight, replace the affected part with a serviceable window.

(ii) If no cracking is found, repeat the inspection thereafter before each flight, until the affected part is replaced, as specified in paragraph (h)(2) of this AD.

(2) Within 90 days after April 26, 2022 (the effective date AD 2022–08–07): Replace all affected parts installed on the airplane with serviceable windows.

Note 2 to paragraph (h): Guidance for the actions required by paragraph (h) of this AD can be found in NORDAM Alert Service Bulletin ERJ 56–A01, dated January 18, 2022.

(i) Retained Terminating Action for Repetitive Inspections Required by Paragraph (h)(1)(ii) of This AD With No Changes

This paragraph restates the terminating action specified in paragraph (i) of AD 2022–08–07, with no changes. Replacement of an affected part, as specified in paragraph (h)(2) of this AD, terminates the repetitive inspection requirements specified in paragraph (h)(1)(ii) of this AD for that part.

(j) Retained Parts Installation Prohibition With a Clarification That the Affected Parts Are PMA Parts

This paragraph restates the parts installation prohibition specified in paragraph (j) of AD 2022–08–07, with a clarification that the affected parts are PMA parts. For all airplanes except Model ERJ 170–200 LL airplanes: As of April 26, 2022 (the effective date AD 2022–08–07), no person may install a NORDAM passenger window, PMA P/N NP00038–3, on any airplane.

(k) New Inspections and Replacement for Certain Airplanes

For Model ERJ 170–200 LL airplanes: Comply with the actions required by paragraphs (k)(1) and (2) of this AD.

(1) Before further flight, do a visual inspection of the outer window pane of the affected parts for cracking, and do the applicable action specified in paragraph (k)(1)(i) or (ii) of this AD.

(i) If any cracking is found, before further flight, replace the affected part with a serviceable window.

(ii) If no cracking is found, repeat the inspection thereafter before each flight, until the affected part is replaced, as specified in paragraph (k)(2) of this AD.

(2) Within 90 days after the effective date of this AD: Replace all affected parts installed on the airplane with serviceable windows.

Note 3 to paragraph (k): Guidance for the actions required by paragraph (k) of this AD can be found in NORDAM Alert Service Bulletin ERJ 56–A01, dated January 18, 2022.

(l) Terminating Action for Repetitive Inspections Required by Paragraph (k)(1)(ii) of This AD

Replacement of an affected part, as specified in paragraph (k)(2) of this AD, terminates the repetitive inspection requirements specified in paragraph (k)(1)(ii) of this AD for that part.

(m) New Parts Installation Prohibition for Certain Airplanes

For Model ERJ 170–200 LL airplanes: As of the effective date of this AD, no person may install a NORDAM passenger window, PMA P/N NP00038–3, on any airplane.

(n) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (o)(1) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(o) Related Information

(1) For more information about this AD, contact Jacob Fitch, Aerospace Engineer, COS Program Management Section, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone (817) 222–4130; email *jacob.fitch@faa.gov.*

(2) For service information identified in this AD that is not incorporated by reference, contact The NORDAM Group LLC, Transparency Division, 7018 North Lakewood Ave., Tulsa, OK 74117; email John Clawson, Vice President Engineering and Program Management, NORDAM Corporate Division, at *jclawson@nordam.com;* internet *https://nordam.com.*

(p) Material Incorporated by Reference

None.

Issued on July 21, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2022–0983; Project Identifier AD–2022–00614–E; Amendment 39–22132; AD 2022–16–03]

RIN 2120–AA64

Airworthiness Directives; Continental Aerospace Technologies, Inc., Lycoming Engines, and Textron Lycoming/Subsidiary of Textron, Inc. Reciprocating Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for certain Continental Aerospace Technologies, Inc. GTSIO–520, IO–346, IO–470, IO–520, IO–550, LTSIO–520, O–470, TSIO–520, and TSIOL–550 series model reciprocating engines, Lycoming Engines AEIO–320, AEIO–360, AEIO–540, AIO–320, AIO–360, GO–480, GSO–480, HIO–360, HIO–540, IGO–480, IGO–540, IGSO–480, IGSO–540, IO–320, IO–360, IO–540, LIO–360, LTIO–540, O–235, O–320, O–360, O–540, TIGO–541, TIO–360, TIO–540, TIO–541, TVO–435, VO–435, and VO–540 series model reciprocating engines, and Textron Lycoming/Subsidiary of Textron, Inc. IO–720 series model reciprocating engines. This AD was prompted by a report of a manufacturing quality escape of improperly lubricated roller bearings installed in certain magnetos, which may result in overheating and magneto seizure. This AD requires the replacement of affected magneto or inspection of affected magneto and, if no white grease is detected, replacement of magneto components, as applicable, and reassembly of the magneto. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective August 15, 2022.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of August 15, 2022.

The FAA must receive comments on this AD by September 12, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.

• *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

• *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact Continental Aerospace Technologies, P.O. Box 90, Mobile, AL 36615; phone: (251) 436–8299; website: *www.continental.aero.* You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0983; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The street address for the Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Boyce Jones, Aviation Safety Engineer, Atlanta ACO, FAA, 1701 Columbia Avenue, College Park, GA 30337; phone: (404) 474–5535; email: *boyce.jones@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The FAA received a report from Continental Aerospace Technologies, Inc., of a manufacturing quality escape that identified a certain population of magnetos that did not meet the design specification due to improperly lubricated roller bearings. The supplier notified the manufacturer that roller bearings installed in certain magnetos were delivered with a light corrosion preventive lubricant instead of the specified translucent white grease. Analysis by the manufacturer determined that affected magnetos assembled without the properly lubricated roller bearing have the potential to overheat, causing accelerated wear in the contact and cam follower. As a result of its analysis, the manufacturer published service information that specifies procedures for the removal and replacement of the affected magneto or inspection of the affected magneto and, if no white grease is detected, replacement of magneto components, as applicable, and reassembly of the magneto. This condition, if not addressed, could result in failure of one or more engines, in-flight shutdown, and loss of the airplane. The FAA is issuing this AD to address the unsafe condition on these products.

FAA's Determination

The FAA is issuing this AD because the agency has determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Related Service Information Under 1 CFR Part 51

The FAA reviewed Continental Aerospace Technologies Critical Service Bulletin CSB673, Revision C, dated May 24, 2022 (the CSB). The CSB specifies procedures for removing and replacing affected magneto or inspecting affected magneto and, if no white grease is detected, replacing magneto components, as applicable, and reassembling the magneto. This CSB also specifies procedures for returning certain parts to the manufacturer for warranty replacement. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in **ADDRESSES**.

AD Requirements

This AD requires the replacement of the affected magneto or inspection of the affected magneto and, if no white grease is detected, replacement of magneto components, as applicable, and reassembly of the magneto.

Clarification of Requirements

The CSB specifies procedures to return certain parts to the manufacturer for warranty replacement. However, this AD does not require returning parts to the manufacturer. The CSB also specifies to discard the roller bearing after the roller bearing has been pressed out of the magneto housing. This AD does not require discarding the roller bearing.

Justification for Immediate Adoption and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for ''good cause,'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under this section, an agency, upon finding good cause, may issue a final rule without providing notice and seeking comment prior to issuance. Further, section 553(d) of the APA authorizes agencies to make rules effective in less than thirty days, upon a finding of good cause.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies foregoing notice and comment prior to adoption of this rule because affected magnetos assembled without properly lubricated roller bearings have the potential to overheat, causing accelerated wear in the contact and cam follower that could lead to seizure and failure of the magnetos. Since an engine may contain two affected magnetos, there is a possibility of failure of one or more engines and loss of the airplane due to loss of ignition. The FAA considers replacement or inspection of the affected magneto to be an urgent safety issue. Replacement or inspection of the affected magneto must be accomplished within 25 operating hours time-in-service (TIS) or, if any affected magneto has accumulated more than 25 operating hours TIS, before further flight after the effective date of this AD. Accordingly, notice and opportunity for prior public comment are impracticable and contrary to the public interest pursuant to 5 U.S.C. 553(b)(3)(B).

In addition, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days, for the same reasons the FAA found good cause to forego notice and comment.

Comments Invited

The FAA invites you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under **ADDRESSES**. Include ''FAA–2022–0983 and Project Identifier AD–2022–00614–E'' at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Boyce Jones, Aviation Safety Engineer, Atlanta ACO, FAA, 1701 Columbia Avenue, College Park, GA 30337. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Regulatory Flexibility Act

The requirements of the Regulatory Flexibility Act (RFA) do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because FAA has determined that it has good cause to adopt this rule without prior notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD could affect up to 740 magnetos installed on airplanes of U.S. registry. The FAA has no way of determining the number of operators that will remove the affected magneto and replace it with a part eligible for installation or, in lieu of replacing, disassemble, inspect and replace magneto components. The FAA's estimated cost on U.S. operators reflects the maximum possible cost based on the 740 affected magnetos installed on products of U.S. registry.

The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Remove and replace the affected magneto.	1.5 work-hours × $85 per hour = $127.50	$1,600	$1,727.50	Up to $1,278,350.
Remove, disassemble, and inspect affected magneto.	1 work-hour × $85 per hour = $85	0	85	Up to $62,900.

The FAA estimates the following costs to replace magneto components. The agency has no way of determining the number of aircraft that might need this replacement:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Replace magneto components	.25 work-hours × $85 per hour = $21.25	$20	$41.25
Reassemble and install magneto	1 work-hour × $85 per hour = $85	0	170

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some of the costs of this AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2022–16–03 Continental Aerospace Technologies, Inc., Lycoming Engines, and Textron Lycoming/Subsidiary of Textron, Inc. Reciprocating Engines:

Amendment 39–22132; Docket No. FAA–2022–0983; Project Identifier AD–2022–00614–E.

(a) Effective Date

This airworthiness directive (AD) is effective August 15, 2022.

(b) Affected ADs

None.

(c) Applicability

This AD applies to:

(1) Continental Aerospace Technologies, Inc. reciprocating engine models identified in Table 1 to paragraph (c) of this AD that are equipped with an S–1200 series magneto having a serial number (S/N) between F21EA057 and F21KA009R, inclusive, manufactured and sold between May and November 2021; and

(2) Lycoming Engines and Textron Lycoming/Subsidiary of Textron, Inc. reciprocating engine models identified in Table 2 to paragraph (c) of this AD that are equipped with an S–1200 series magneto authorized by Continental Aerospace Technologies, Inc. Parts Manufacturer Approval (PMA) Supplements 1–54, having an S/N between F21EA057 and F21KA009R, inclusive, manufactured and sold between May and November 2021.

Table 2 to Paragraph (c) – Lycoming Engines and Textron Lycoming Reciprocating Engine Models

Make	Model
Lycoming Engines	AEIO-320-D1B, AEIO-320-D2B, AEIO-360-A1B, AEIO-360-A1B6, AEIO-360-A2B, AEIO-360-B1F, AEIO-360-B2F, AEIO-360-B2F6, AEIO-540-D4B5, AIO-320-A1A, AIO-320-A1B, AIO-320-A2A, AIO-320-A2B, AIO-320-B1B, AIO-320-C1B, AIO-360-A1A, AIO-360-A1B, AIO-360-A2A, AIO-360-A2B, AIO-360-B1B, GO-480-G1J6, GSO-480-B1J6, HIO-360-C1B, HIO-360-D1A, HIO-540-A1A, IGO-480-A1A6, IGO-540-A1C, IGSO-480-A1G6, IGSO-540-A1A, IGSO-540-A1C, IGSO-540-A1D, IGSO-540-A1E, IGSO-540-A1F, IGSO-540-A1H, IGSO-540-B1A, IGSO-540-B1C, IO-320-B1D, IO-320-B1E, IO-320-D1A, IO-320-D1B, IO-320-D1C, IO-360-A1B, IO-360-A1B6, IO-360-A1C, IO-360-A1D6, IO-360-A2B, IO-360-A2C, IO-360-B1E, IO-360-B1F, IO-360-B2E, IO-360-B2F, IO-360-B2F6, IO-360-C1B, IO-360-C1C, IO-360-C1C6, IO-360-C1D6, IO-360-C1E6, IO-360-C1F, IO-360-D1A, IO-360-E1A, IO-360-F1A, IO-540-B1A5, IO-540-D4B5, IO-540-D4C5, IO-540-E1B5, IO-540-E1C5, IO-540-G1B5, IO-540-G1C5, IO-540-G1D5, IO-540-G1E5, IO-540-G1F5, IO-540-J4A5, IO-540-K1A5, IO-540-K1B5, IO-540-K1C5, IO-540-K1D5, IO-540-K1E5, IO-540-K1F5, IO-540-K1G5, IO-540-K1H5, IO-540-K1J5, IO-540-K1K5, IO-540-L1A5, IO-540-L1C5, IO-540-M1A5, IO-540-M1C5, IO-540-P1A5, IO-540-R1A5, IO-540-S1A5, IO-540-T4B5, IO-540-W1A5, IO-540-AA1A5, LIO-360-C1E6, LTIO-540-J2B, LTIO-540-U2A, LTIO-540-W2A, O-235-C2B, O-235-E2B, O-235-F2B, O-235-G2B, O-235-J2B, O-235-K2B, O-320-D1C, O-320-D1F, O-320-D2C, O-320-D2F, O-320-E1C, O-320-E1F, O-320-E1J, O-320-E2C, O-320-E2F, O-360-A1F, O-360-A1F6, O-360-A1G, O-360-A1G6, O-360-A2F, O-360-A2G, O-360-A4G, O-360-C1F, O-540-B1D5, O-540-B2C5, O-540-E4C5, O-540-G1A5, O-540-G2A5, TIGO-541-B1A, TIGO-541-C1A, TIGO-541-D1A, TIGO-541-D1B, TIGO-541-E1A, TIO-360-A1A, TIO-360-A1B, TIO-540-A1A, TIO-540-A1B, TIO-540-A1C, TIO-540-A2A, TIO-540-A2B, TIO-540-A2C, TIO-540-C1A, TIO-540-E1A, TIO-540-G1A, TIO-540-H1A, TIO-540-J2B, TIO-540-U2A, TIO-540-W2A, TIO-541-A1A, TIO-541-E1A4, TIO-541-E1B4, TIO-541-E1C4, TIO-541-E1D4, TVO-435-B1B, TVO-435-D1A, TVO-435-F1A, TVO-435-G1A, VO-435-B1A, VO-540-B1H3, VO-540-B2G, VO-540-C2C
Textron Lycoming/Subsidiary of Textron, Inc.	IO-720-A1B, IO-720-B1B, IO-720-C1B

BILLING CODE 4910–13–C

(d) Subject

Joint Aircraft System Component (JASC) Code 8500, Engine (RECIPROCATING).

(e) Unsafe Condition

This AD was prompted by a report of a manufacturing quality escape of improperly lubricated roller bearings installed in certain magnetos, which may result in overheating and magneto seizure. The FAA is issuing this AD to prevent failure of the magneto. The unsafe condition, if not addressed, could result in failure of one or more engines, in-flight shutdown, and loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

For any affected magneto, within 25 operating hours time-in-service (TIS) or, if any affected magneto has accumulated more than 25 operating hours TIS, before further flight after the effective date of this AD:

(1) Remove the affected magneto from the engine and replace with a part eligible for installation in accordance with the Corrective Action, paragraph III.A., of Continental Aerospace Technologies Critical Service Bulletin CSB673, Revision C, dated May 24, 2022 (the CSB); or

(2) Remove the affected magneto from the engine and disassemble and inspect the affected magneto in accordance with the Corrective Action, paragraphs III.B.1. through III.B.8.a., of the CSB.

(i) If, during the inspection required by paragraph (g)(2) of this AD, no white grease is detected, before further flight, inspect and replace the magneto components, as applicable, in accordance with the Corrective Action, paragraphs III.B.8.b.1 and III.B.8.b.2, of the CSB. Where the CSB specifies discarding the roller bearing, this AD instead requires removing the roller bearing from service.

(ii) Reassemble and install the magneto in accordance with the Corrective Action, paragraph III.C., of the CSB.

(h) Installation Prohibition

After the effective date of this AD, do not install onto any engine an S–1200 series magneto having a S/N between F21EA057 and F21KA009R, inclusive, manufactured and sold between May and November 2021; or any S–1200 series magneto authorized by Continental Aerospace Technologies, Inc. PMA Supplements 1–54, having an S/N between F21EA057 and F21KA009R, inclusive, manufactured and sold between May and November 2021, unless the magneto has first undergone corrective action and the data plate has been marked in accordance with the Corrective Action, paragraph III.C.3., of the CSB.

(i) Credit for Previous Actions

You may take credit for actions required by paragraph (g) of this AD if the actions were performed before the effective date of this AD using Continental Aerospace Technologies Critical Service Bulletin CSB673, Revision B, dated April 20, 2022; Continental Ignition Systems Service Bulletin (SB) SB673, Revision A, dated March 8, 2022; or Continental Ignition Systems SB SB673, Original Issue, dated January 31, 2022.

(j) Special Flight Permit

A special flight permit may be issued in accordance with 14 CFR 21.197 and 21.199 to permit a one-time non-revenue ferry flight to a location where this AD can be accomplished. This ferry flight must be performed with only essential flight crew.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Atlanta ACO, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (l) of this AD.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(l) Related Information

For more information about this AD, contact Boyce Jones, Aviation Safety Engineer, Atlanta ACO, FAA, 1701 Columbia Avenue, College Park, GA 30337; phone: (404) 474–5535; email: *boyce.jones@faa.gov*.

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Continental Aerospace Technologies Critical Service Bulletin CSB673, Revision C, dated May 24, 2022.

(ii) [Reserved]

(3) For service information identified in this AD, contact Continental Aerospace Technologies, P.O. Box 90, Mobile, AL 36615; phone: (251) 436–8299; website: *www.continental.aero*.

(4) You may view this service information at FAA, Airworthiness Products Section, Operational Safety Branch, 1200 District Avenue, Burlington, MA 01803. For information on the availability of this material at the FAA, call (817) 222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email: *fr.inspection@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on July 25, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 93

[Docket No. FAA–2022–1029; Amdt. No. 93–103]

RIN 2120–AL77

Extension of the Requirement for Helicopters To Use the New York North Shore Helicopter Route

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Interim final rule with request for comment.

SUMMARY: This interim final rule with request for comment amends the expiration date of the rule requiring pilots operating civil helicopters under Visual Flight Rules to use the New York North Shore Helicopter Route when operating along the northern shoreline of Long Island, New York. The current rule expires on August 5, 2022. The FAA finds it necessary to extend the rule for four years.

DATES: Effective July 29 2022 through July 29, 2026.

Send comments on or before August 29, 2022.

ADDRESSES: Send comments identified by docket number FAA–2022–1029 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov/* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at (202) 493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments,

without edit, including any personal information the commenter provides, to *https://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *https://www.regulations.gov/* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Brian Konie, Airspace Rules and Regulations Team AJV–P21, Mission Support Services, Air Traffic Organization, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone (202) 267–0745; email *9-NATL-NY-NorthShore@faa.gov.*

SUPPLEMENTARY INFORMATION:

Good Cause for Immediate Adoption

Title 5 U.S.C. 553(b)(B) authorizes agencies to dispense with notice and comment procedures for rules when the agency for ''good cause'' finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Additionally, 5 U.S.C. 553(d) generally requires that the publication or service of a substantive rule shall be made not less than 30 days before its effective date, but section 553(d)(3) provides an exception to this general requirement when the agency finds good cause to waive the delay in the effective date.

The East Hampton Town Airport (previously the East Hampton Airport) is the airport of choice for those traveling to the Hamptons because of its location and available services at the airport, particularly fueling. Other airports in the vicinity of the Hamptons include Francis S. Gabreski Airport (KFOK), a county-owned, joint civil-military airport; Montauk Airport (KMTP), a privately owned, public use airport; and Southampton Heliport (87N). Although Gabreski Airport is 26 miles from central East Hampton, limited road capacity (one lane in each direction) and congestion during the summer months make it a less attractive destination airport. Montauk Airport has a shorter runway and does not provide aircraft services, including fueling. The Southampton Heliport consists of a single helipad with no room for parking aircraft and provides neither fueling nor other aircraft services.

On September 26, 2021, East Hampton Airport's contractual grant obligations expired.[1] The FAA received written notice on January 20, 2022, from the Town of East Hampton, New York, followed by an amended request on February 17, 2022, advising that effective May 17, 2022, the Town would close the public-use East Hampton Airport and activate a new private-use, prior permission required, airport at the same location on May 19, 2022.[2] The FAA published the notice of closure of the public-use of East Hampton Airport in the **Federal Register** on April 15, 2022 (87 FR 22617). Subsequently, the FAA began deactivating the East Hampton Airport and taking the necessary steps to activate the East Hampton Town Airport.[3] On May 19, 2022, the new private-use, prior permission required, East Hampton Town Airport was activated.[4]

Notwithstanding the FAA's actions to deactivate the public-use East Hampton Airport and activate the private-use East Hampton Town Airport, the East Hampton Town Airport has not begun operating as a private-use airport. On May 16, 2022, the New York State Supreme Court issued temporary restraining orders (TRO) prohibiting the Town from ''continuing to take any steps to effectuate the closure of the airport, the conversion of the airport to a 'private use' facility, or the operation of the airport on a 'prior permission required' basis'' in response to several lawsuits.[5] To effectuate the court's orders and in light of the FAA's inability to safely forestall several aspects of the deactivation of a public-use airport process,[6] the private-use, prior permission required, East Hampton Town Airport is currently operating as if it was a public-use airport. Additionally, on June 8, 2022, the Town indicated that it may close the airport permanently.[7]

Since the time that East Hampton Airport's contractual obligations expired in 2021, the airport's operating status has remained in flux. Because the East Hampton Airport is the airport of choice for those traveling to the Hamptons, a change in the airport's operating status could conceivably have significant effects on helicopter air travel in the New York North Shore area to the east end of Long Island. For example, if the East Hampton Airport is changed to a private-use airport or closed permanently, much of the traveling public currently using the New York North Shore Helicopter Route may need to find an alternative means of traveling to their destinations in Long Island.

[1] Grant obligations are assurances that an airport provides in exchange for receiving federal grants to improve the airport. Among the grant assurances are prohibitions on restricting access to the airport based on noise and the obligation to keep the airport open until the grant obligations expire.

[2] 87 FR 22617 (April 15, 2022). Private-use airports may be able to impose limits on operations (*e.g.,* limits on the number of operations per day or limits on the time of day that aircraft may operate) that public-use airports cannot impose without complying with the Aircraft Noise and Capacity Act of 1990 (49 U.S.C. 47521 *et seq.*) See also implementing regulations at 14 CFR part 161.

[3] Letter from Marie Kennington-Gardiner, Regional Administrator, Office of the Regional Administrator Eastern Region, Federal Aviation Administration dated May 17, 2022, to Andrew Barr, Cooley LLP, available at *http://ehamptonny.gov/786/2022-Airport-News-and-Decision-Making.*

[4] In order to deactivate (*i.e.,* close) an airport for a period of one year or more, the airport operator must file a notice with the FAA of closing 90 days prior to the intended closing date. The FAA then posts a notice in the **Federal Register** announcing the closure in some cases. In order to activate (*i.e.,* open) an airport, the potential operator must file a notice 90 days in advance of construction, allowing the FAA to conduct an airport airspace analysis to determine if the proposed airport would impact traffic patterns of neighboring airports; would impact the existing airspace structure and projected programs of the FAA; along with impacts of known obstructions within the affected area, and on file with the FAA, on the proposed airport. Public-use airports and some private-use airports are then charted on FAA-issued aeronautical charts for the area in which the airport is located. The FAA determined that the East Hampton Town Airport should be charted. The Airport was charted on the New York Area charts, the New York Area Sectional Chart, the New York Terminal Area Chart, and the New York Helicopter Chart, on May 19, 2022.

[5] See *East End Hangars, Inc.* v. *Town of East Hampton,* No. 602799/2022 (N.Y. Sup. Ct. Suffolk Cty.); *The Coalition to Keep East Hampton Airport Open, Ltd.* v. *Town of East Hampton, New York,* No. 602801/2022 (N.Y. Sup. Ct. Suffolk Cty.); and, *Blade Air Mobility, Inc.* v. *Town of East Hampton,* No. 602802/2022 (N.Y. Sup. Ct. Suffolk Cty.) available at *http://ehamptonny.gov/786/2022-Airport-News-and-Decision-Making.* Separately, on May 14, 2022, the National Business Aviation Association joined with several other stakeholders in filing legal challenges to planned closure of the East Hampton Airport in the U.S. District Court for the Eastern District of New York. *Friends of the East Hampton Airport, Inc. Analar Corporation, Associated Aircraft Group, Inc. Eleventh Street Aviation LLC, Helicopter Association International, Inc. Heliflite Shares LLC,. Liberty Helicopters, Inc. Sound Aircraft Services, Inc., and National Business Aviation Association, Inc.* v. *Town of East Hampton,* No. 15–cv–2246–JS–ARL (E.D.N.Y.).

[6] By the time the FAA received notice of the TRO on May 16, 2022, it was too late to change or cancel the new charts. As a result, the airport identifier for the public-use East Hampton Airport no longer existed on May 19, 2022, and was replaced by the identifier for the private-use East Hampton Town Airport. Pilots are not able to file flight plans to the public-use airport. The public instrument procedures for the public-use airport were decommissioned and replaced by special instrument procedures. Air Traffic Controllers had been trained on new procedures for dealing with the private-use airport; retraining the controllers in the formerly-used procedures would cause confusion, which would compromise safety.

[7] *https://www.easthamptonstar.com/government/202268/if-town-cant-change-airport-it-may-close-it.*

Those alternative means could involve the use of a different air travel route or surface transportation, which would decrease the amount of air traffic using the New York North Shore Helicopter Route. The ongoing uncertainty regarding the airport's operating status prevents the FAA and the public in assessing the effects of any changes that the East Hampton Town Airport may implement that might influence potential modifications to the New York North Shore Helicopter Route, prior to the Rule's August 5, 2022, expiration date.

Further, given that there is no available timeline for resolution of the East Hampton Town Airport's operating status and subsequent adjustments operators may make, the FAA expects a 4-year extension to provide FAA with sufficient time for such issues to resolve to evaluate any new traffic redirection and consider that evaluation in assessing the current rule.

Therefore, in light of the pending expiration date, to prevent confusion among pilots using the Route and avoid disruption of the current operating environment, the FAA finds notice and comment impractical and that good cause exists to make this interim final rule extending the expiration date of the Rule, effective in less than 30 days.

Authority

The FAA's authority to issue rules on aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

The FAA's authority for this rule is contained in 49 U.S.C. 40103 and 44715. Under section 40103(b)(2), the Administrator of the FAA has authority to prescribe air traffic regulations on the flight of aircraft (including regulations on safe altitudes) for, among other purposes, navigating aircraft and protecting individuals and property on the ground. In addition, section 44715(a), provides that, to relieve and protect the public health and welfare from aircraft noise, the Administrator of the FAA, has the authority to prescribe regulations to control and abate aircraft noise.

I. Background

In 2012, in response to concerns from local residents regarding noise from helicopters operating over Long Island, the FAA issued the New York North Shore Helicopter Route final rule (77 FR 39911, July 6, 2012). The FAA codified the final rule in subpart H of part 93 of title 14 of the Code of Federal Regulations (14 CFR). The rule requires pilots operating civil helicopters under Visual Flight Rules (VFR) over the north shore of Long Island, between the Visual Point Lloyd Harbor (VPLYD) waypoint and Orient Point (VPOLT), to use the North Shore Helicopter Route as published in the New York Helicopter Chart (Chart). Subpart H was promulgated to maximize use of the Route, as published per the Chart, to secure and improve upon decreased levels of noise that had been voluntarily achieved. Under subpart H, pilots are permitted to deviate from the Route and altitude requirements when necessary for safety, weather conditions, or transitioning to or from a destination or point of landing. Subpart H is based on a voluntary VFR route that was developed by the FAA, working with the Eastern Region Helicopter Council. The voluntary route originally was added to the Chart on May 8, 2008. The rule has been extended three times without substantive change.[8] It is currently in effect through August 5, 2022.

II. Discussion of Interim Final Rule

This interim final rule extends, for an additional four years, the requirement for pilots of civil helicopters operating under VFR to use the North Shore Helicopter Route when transiting along the north shore of Long Island.

In the 2020 final rule extending subpart H for two years, the FAA explained that it needed to assess route modifications identified by commenters in response to the FAA's request for comments and public meetings regarding subpart H in accordance with section 182 of the FAA Reauthorization Act of 2018[9] and whether a new or modified route should be created and incorporated into regulation. Additionally, the FAA stated that it required time to evaluate the effects of the all-water route around Orient Point resulting from the voluntary agreement by the Eastern Region Helicopter Council and the effects of any changes implemented by East Hampton Airport once it ceased to be a grant obligated airport.[10] However, prior to completing these assessments, the operating status of the East Hampton Town Airport must be resolved.

Extending the requirement for helicopters to use the North Shore Helicopter Route for a four-year period will continue to foster maximum use of the Route and avoid disruption of the current operating environment while the East Hampton Town Airport's operating status is resolved and then allow the FAA a sufficient period of time to collect and assess relevant data.

III. Regulatory Notices and Analyses

A. Regulatory Evaluation

Changes to Federal regulations must undergo several analyses. First, Executive Orders 12866 and 13563 direct that each Federal agency shall propose or adopt a regulation only upon a reasoned determination that the benefits of the intended regulation justify its costs. Second, the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), as codified in 5 U.S.C. 603 *et seq.,* requires agencies to analyze the economic impact of regulatory changes on small entities. Third, the Trade Agreements Act of 1979 (Pub. L. 96–39), as codified in 19 U.S.C. Chapter 13, prohibits agencies from setting standards that create unnecessary obstacles to the foreign commerce of the United States. In developing U.S. standards, the Trade Agreements Act requires agencies to consider international standards and, where appropriate, that they be the basis of U.S. standards. Fourth, the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), as codified in 2 U.S.C. Chapter 25, requires agencies to prepare a written assessment of the costs, benefits, and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more annually (adjusted

[8] *The Extension of the Expiration Date of the New York North Shore Helicopter Route,* 79 FR 35488, (June 23, 2014); *Extension of the Requirement for Helicopters to Use the New York North Shore Helicopter Route,* 81 FR 48323 (June 25, 2016); and *Extension of the Requirement for Helicopters To Use the New York North Shore Helicopter Route,* 85 FR at 47897 (August 7, 2020).

[9] Section 182 of the FAA Reauthorization Act of 2018 (Pub. L. 115–254, October 5, 2018) directed the FAA to hold a public hearing to solicit feedback on subpart H of 14 CFR part 93, from impacted communities and to provide notice of, and an opportunity for, at least 60 days of public comment with respect to subpart H. The FAA invited responses to four questions; including, should subpart H be extended, modified, or allowed to expire in 2020. Virtually all of the comments the FAA received in response to this question suggested that subpart H should either expire or be modified. *See Request for Comments on Requirement for Helicopters To Use the New York North Shore Helicopter Route,* 83 FR 55133 (Nov. 2, 2018), *Notification of Public Meetings on Requirement for Helicopters To Use the New York North Shore Helicopter Route,* 83 FR 55134 (Nov. 2, 2018), and *Notification of Replacement Public Meeting on Requirement for Helicopters To Use the New York North Shore Helicopter Route,* 83 FR 63817 (Dec. 12, 2018).

[10] The FAA notes that operators voluntarily agreed to fly the all-water route around Orient Point, and it appears that many operators, while continuing to comply with the regulation, have ceased flying the all-water route.

for inflation with base year of 1995). The FAA also analyzes this regulation under the Paperwork Reduction Act. This portion of the preamble summarizes the FAA's analysis of the economic impacts of this final rule.

In conducting these analyses, the FAA has determined this rule is not a significant regulatory action, as defined in section 3(f) of Executive Order 12866. As notice and comment under 5 U.S.C. 553 are not required for this interim final rule, the regulatory flexibility analyses described in 5 U.S.C. 603 and 604 regarding impacts on small entities are not required. This rule will not create unnecessary obstacles to the foreign commerce of the United States. This rule will not impose an unfunded mandate on State, local, or tribal governments, or on the private sector, by exceeding the threshold identified previously.

This interim final rule amends the expiration date of the final rule requiring pilots operating civil helicopters under Visual Flight Rules to use the New York North Shore Helicopter Route when operating along that area of Long Island, New York. As previously discussed, the FAA finds it necessary to extend subpart H for an additional four years to preserve the current operating environment while allowing sufficient time for the FAA to conduct research to assess route modifications identified by commenters and whether a new or modified route could be created and would be appropriate for incorporation into the regulations.

The FAA determined the 2012 final rule would impose minimal costs because many of the existing operators were already complying with the final rule requirements. In addition, the FAA based the 2012 final rule on a voluntary route developed by the FAA working with the Eastern Region Helicopter Council—the FAA added the voluntary route to the New York Helicopter Chart on May 8, 2008. The 2012 final rule also permits deviations from the route for safety, weather conditions, or transitioning to or from a destination or point of landing. The FAA extended the 2012 final rule in 2014, 2016, and 2020 without any substantive change. As this interim final rule further extends the 2012 final rule requirements without change, the FAA expects it will not impose additional costs.

B. Regulatory Flexibility Determination

The Regulatory Flexibility Act (RFA), in 5 U.S.C. 603, requires an agency to prepare an initial regulatory flexibility analysis describing impacts on small entities whenever an agency is required by 5 U.S.C. 553, or any other law, to publish a general notice of proposed rulemaking for any proposed rule. Similarly, 5 U.S.C. 604 requires an agency to prepare a final regulatory flexibility analysis when an agency issues a final rule under 5 U.S.C. 553 after being required by that section or any other law to publish a general notice of proposed rulemaking. The FAA found good cause to forgo prior notice and comment for this rule. As notice and comment under 5 U.S.C. 553 are not required in this situation, the regulatory flexibility analyses described in 5 U.S.C. 603 and 604 are not required.

C. International Trade Impact Assessment

The Trade Agreements Act of 1979 (Pub. L. 96–39) prohibits Federal agencies from establishing standards or engaging in related activities that create unnecessary obstacles to the foreign commerce of the United States. Pursuant to this Act, the establishment of standards is not considered an unnecessary obstacle to the foreign commerce of the United States, so long as the standard has a legitimate domestic objective, such as the protection of safety, and does not operate in a manner that excludes imports that meet this objective. The statute also requires consideration of international standards and, where appropriate, that they be the basis for U.S. standards. The FAA has assessed the potential effect of this interim final rule and determined that subpart H will preserve the current operating environment and is not considered an unnecessary obstacle to foreign commerce.

D. Unfunded Mandates Assessment

Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires each Federal agency to prepare a written statement assessing the effects of any Federal mandate in a proposed or final agency rule that may result in an expenditure of $100 million or more (in 1995 dollars) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector; such a mandate is deemed to be a ''significant regulatory action.'' The FAA currently uses an inflation-adjusted value of $165 million in lieu of $100 million.

This interim final rule does not contain such a mandate. Therefore, the requirements of Title II of the Act do not apply.

E. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the FAA consider the impact of paperwork and other information collection burdens imposed on the public. The FAA has determined that there is no new requirement for information collection associated with this interim final rule.

F. International Compatibility and Cooperation

In keeping with U.S. obligations under the Convention on International Civil Aviation, it is FAA policy to conform to International Civil Aviation Organization (ICAO) Standards and Recommended Practices to the maximum extent practicable. The FAA has determined that there are no ICAO Standards and Recommended Practices that correspond to this interim final rule.

G. Environmental Analysis

FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures,'' identifies FAA actions that, in the absence of extraordinary circumstances, are categorically excluded from requiring an environmental assessment (EA) or environmental impact statement (EIS) under the National Environmental Policy Act. This rule qualifies for the categorical exclusion in paragraph 5–6.6.f of that Order, which includes ''[r]egulations . . . excluding those that if implemented may cause a significant impact on the human environment.'' There are no extraordinary circumstances that warrant preparation of an EA or EIS.

IV. Executive Order Determinations

A. Executive Order 13132, Federalism

The FAA has analyzed this interim final rule under the principles and criteria of Executive Order 13132, Federalism. The agency determined that this action will not have a substantial direct effect on the States, or the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government, and, therefore, does not have federalism implications.

B. Executive Order 13211, Regulations That Significantly Affect Energy Supply, Distribution, or Use

The FAA analyzed this interim final rule under Executive Order 13211, Actions Concerning Regulations that Significantly Affect Energy Supply, Distribution, or Use. The agency has determined that it is not a ''significant energy action'' under the Executive order and it is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

C. Executive Order 13609, Promoting International Regulatory Cooperation

Executive Order 13609, Promoting International Regulatory Cooperation, promotes international regulatory cooperation to meet shared challenges involving health, safety, labor, security, environmental, and other issues and to reduce, eliminate, or prevent unnecessary differences in regulatory requirements. The FAA has analyzed this action under the policies and agency responsibilities of Executive Order 13609, and has determined that this action would have no effect on international regulatory cooperation.

V. How To Obtain Additional Information

A. Comments Invited

The FAA invites interested persons to participate in this rulemaking by submitting written comments, data, or views. The Agency also invites comments relating to the economic, environmental, energy, or federalism impacts that might result from adopting this interim final rule. The most helpful comments reference a specific portion of the rule, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one time if comments are filed electronically or commenters should send only one copy of written comments if comments are filed in writing.

The FAA will file in the docket all comments it receives, as well as a report summarizing each substantive public contact with FAA personnel concerning this rulemaking. Before acting on this interim final rule, the FAA will consider all comments it receives on or before the closing date for comments. The FAA will consider comments filed after the comment period has closed if it is possible to do so without incurring expense or delay. The Agency may change this interim final rule in light of the comments it receives.

B. Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this interim final rule contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this interim final rule, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this rule. Submissions containing CBI should be sent to the person in the **FOR FURTHER INFORMATION CONTACT** section of this document. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

C. Electronic Access and Filing

A copy of this interim final rule, all comments received, any final rule, and all background material may be viewed online at *https://www.regulations.gov* using the docket number listed above. A copy of this rule will be placed in the docket. Electronic retrieval help and guidelines are available on the website. It is available 24 hours each day, 365 days each year. An electronic copy of this document may also be downloaded from the Office of the Federal Register's website at *https://www.federalregister.gov* and the Government Publishing Office's website at *https://www.govinfo.gov.* A copy may also be found at the FAA's Regulations and Policies website at *https://www.faa.gov/regulations_policies.*

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM–1, 800 Independence Avenue SW, Washington, DC 20591, or by calling (202) 267–9677. Interested persons must identify the docket or amendment number of this rulemaking.

All documents the FAA considered in developing this rule, including economic analyses and technical reports, may be accessed in the electronic docket for this rulemaking.

D. Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996 requires FAA to comply with small entity requests for information or advice about compliance with statutes and regulations within its jurisdiction. A small entity with questions regarding this document may contact its local FAA official, or the person listed under the **FOR FURTHER INFORMATION CONTACT** heading at the beginning of the preamble. To find out more about SBREFA, visit *https://www.faa.gov/regulations_policies/rulemaking/sbre_act/.*

List of Subjects in 14 CFR Part 93

Air traffic control, Airspace, Navigation (air).

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends chapter I of Title 14 of the Code of Federal Regulations as follows:

PART 93—SPECIAL AIR TRAFFIC RULES

■ 1. The authority citation for part 93 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40106, 40109, 40113, 44502, 44514, 44701, 44715, 44719, 46301.

■ 2. Revise § 93.101 to read as follows:

§ 93.101 Applicability.

This subpart prescribes a special air traffic rule for civil helicopters operating VFR along the North Shore, Long Island, New York, between July 29, 2022, and July 29, 2026.

Issued under authority provided by 49 U.S.C. 106(f), 44701(a), and 44703 in Washington, DC, on

Billy Nolen,

Acting Administrator.

U.S. Customs and Border Protection

19 CFR Part 4

[CBP Dec. 22–14]

RIN 1651–AB41

Vessel Repair Duties for Vessels Entering U.S. Ports

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security (DHS).

ACTION: Final rule.

SUMMARY: This rule amends U.S. Customs and Border Protection (CBP) regulations to streamline the vessel repair entry process by extending the timeframe from 90 days to 150 days for vessel owners, masters, or authorized agents (''vessel operators'') to provide completed vessel repair entries and to apply for relief from assessment of those vessel repair duties. Because CBP is extending the timeframe from 90 days to 150 days, CBP is also eliminating provisions that allow for requests for an additional 30-day extension to submit all of the relevant evidence as those extensions are no longer necessary.

DATES: This final rule is effective July 29, 2022.

FOR FURTHER INFORMATION CONTACT: W. Richmond Beevers, Chief, Cargo Security, Carriers, and Restricted Merchandise Branch, Regulations and Rulings, U.S. Customs and Border Protection, at 202–325–0084 or *wiley.r.beevers@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Under section 466 of the Tariff Act of 1930, as amended (19 U.S.C. 1466), purchases for repairs or repairs made to certain vessels while outside the United States are subject to declaration, entry, and payment of ad valorem duty upon vessel arrival in any port of the United States. Duties owed for vessel repairs made in a foreign country apply to all vessels documented under U.S. law that engage in foreign or coasting trade, as well as those intended to be employed in such trade. 19 U.S.C. 1466(a). The statute also specifies the situations in which vessel operators may be relieved from paying such duties.[1]

Section 4.14 of title 19 of the Code of Federal Regulations (19 CFR 4.14) implements 19 U.S.C. 1466. Section 4.14(a)(1) requires vessel operators to declare, enter, and be subject to payment of duty for vessel repair purchases or repairs made to vessels while outside of the United States upon vessel arrival to the United States or Puerto Rico. The duties owed on these repairs and purchases are based on the actual foreign cost of the vessel repair or expenditure. 19 CFR 4.14(a)(1). Certain foreign vessel repair expenditures are not subject to declaration, entry, or duty at all. *See* 19 CFR 4.14(a)(2)(i)–(iii). Some expenditures may not require duty payments but must still follow declaration and entry procedures. *See* 19 CFR 4.14(a)(3), (h)(1)–(4).

Upon arrival, vessel operators must declare and enter all foreign repairs or related expenses to U.S. Customs and Border Protection (CBP) on CBP Form 226, or an electronic equivalent, to be processed by CBP's Vessel Repair Unit (VRU) in New Orleans, Louisiana (''vessel repair entry''). *See* 19 CFR 4.14(d), (e), (g). The vessel repair entry must include all foreign voyage expenditures for equipment, parts of equipment, repair parts, materials, and labor. 19 CFR 4.14(e). The regulations currently require a vessel operator to submit a completed vessel repair entry within 90 days of vessel arrival into the United States. 19 CFR 4.14(f). A completed vessel repair entry must contain evidence of the cost of each foreign repair or related expense. *Id.* The vessel operator can request additional time from the VRU to file a completed vessel repair entry. *Id.* The VRU may grant, and in practice almost always does grant, a 30-day extension period for vessel operators to submit the completed entry.[2] If additional time is needed, the Cargo Security, Carriers, and Restricted Merchandise Branch (CCR) at CBP Headquarters may grant, and in practice almost always does grant, a second extension.[3] Normally, in this instance, the CCR will grant an additional 30-day extension after the first extension. Therefore, in practice, vessel operators have a total of 150 days to submit a completed vessel repair entry supported by evidence showing the cost of each foreign repair or expense.

Before the vessel may depart from a U.S. port, the vessel operator must also submit the estimated cost of duties, or evidence of a bond, for all potential repairs or expenses declared in the vessel repair entry. 19 CFR 4.14(c). The current regulations set forth the circumstances in which the vessel operator may be relieved from assessment of these duties. Such relief is available when: (i) the expenditure is not considered to be a repair or purchase within the terms of 19 U.S.C. 1466 or as determined under judicial or administrative interpretation; (ii) foreign repairs or expenditures were the result of damage caused by inclement weather or other casualties; (iii) materials used for repair were made in the United States and installed by U.S. residents or the vessel's crew; (iv) materials were used for the purpose of providing dunnage for the packing of cargo, erection of temporary bulkheads, or in preparation for the carrying of liquid cargo; (v) for vessels that continuously remained outside the United States for two years, expenditures were made after the first six months of their absence; (vi) expenditures were made for Lighter Abroad Ship (LASH) operations; (vii) spare repair parts or materials were certified for use on a cargo vessel, if duty was previously paid under the appropriate U.S. commodity classification; and (viii) spare repair parts were necessarily installed prior to first entry into the United States, if duty was paid under the appropriate U.S. commodity classification. 19 U.S.C. 1466(a), (d), (e), (h); 19 CFR 4.14(h)(1)–(3).

Under the current regulations, the operator must apply for relief from these duties within 90 days of the vessel's arrival into the United States. 19 CFR 4.14(i). Similar to the timeline for submitting a completed vessel repair entry, the VRU may grant, and in practice almost always does grant, a 30-day filing extension, and the CCR may grant an additional filing extension for vessel operators to apply for relief from assessment of such duties.[4] The CCR almost always grants an additional 30-day extension, which results in an additional 60 days for vessel operators to file for relief from duty payment after the initial 90-day timeline expires. Therefore, in practice, current procedures almost always allow vessel operators a total of 150 days to file for relief from assessment of vessel repair duties.

Although both the VRU and CCR rarely deny filing extensions for vessel operators seeking to submit completed vessel repair entries or to apply for relief from assessment of vessel repair duties, the two offices are still faced with the administrative burden of processing extension requests. For instance, on average, the CCR processes 42 vessel repair extension requests annually. The VRU processes annually over three times this number of extension requests.[5] The hours expended on extension requests create an unnecessary burden on both CBP and vessel operators filing such requests with no benefit to CBP, vessel operators or the public by maintaining the extensions.[6]

[1] Vessel operators may be relieved from paying duties for foreign repairs to vessels when: materials purchased and repairs made to vessels outside the United States were a result of damage caused by inclement weather or other casualties; purchased materials were made in the United States and installed by U.S. residents or the vessel's crew; or purchased materials were used for dunnage cargo, packing, erection of temporary bulkheads, or in preparation for the carrying of liquid cargo. 19 U.S.C. 1466(d).

[2] Based on communication with the Cargo Security, Carriers, and Restricted Merchandise Branch on April 13, 2022. A subject matter expert stated that the VRU nearly always approves the 30-day extension requests subject to timeliness of such request. In 2021–2022, VRU approved 100% of all requests for extensions.

[3] Based on communication with the Cargo Security, Carriers, and Restricted Merchandise Branch on April 13, 2022. A subject matter expert stated that vessel operators are sophisticated users understanding what is required and as a result, CCR nearly always approves a second extension request subject to the timeliness of the request. In 2021–2022, CCR approved 100% of all second requests for extensions.

[4] *See* 19 CFR 4.14(f) for extension procedures.

[5] The VRU processes on average 152 extension requests annually. *See* Part IV, Table 1. Time Burden to Complete Extension Requests.

[6] Based on communication with the Cargo Security, Carriers, and Restricted Merchandise Branch on April 13, 2022, subject matter experts stated that the only reason VRU or CCR had ever denied a request for an extension was an untimely request which occurred one time with VRU over the last several years. Vessel operators are sophisticated

Continued

II. Discussion of Regulatory Changes

CBP is streamlining the vessel repair entry process under 19 CFR 4.14 by amending the timeframe to submit complete vessel repair entries with supporting evidence for the costs of each repair and to apply for relief from assessment of vessel repair duties. This rule will also eliminate the need for filing extension requests. In particular, paragraphs (f) and (i) are amended to eliminate provisions allowing for extensions and to change the timeline for document submission from 90 to 150 days. These amendments allow the same timeframe as the current practice, which provides for a 90-day deadline and the potential to file two extensions, for a total of 150 days. Accordingly, the amendments will simplify the process and alleviate unnecessary burdens placed on CBP to process extension requests and on vessel operators to file such requests. The amendments are described below.

A. Evidence for Cost of Repair

Paragraph (f) requires vessel operators to submit to CBP completed vessel repair entries with supporting evidence of the final cost of each foreign repair or expenditure within 90 days of the vessel's arrival. 19 CFR 4.14(f). The vessel operator is permitted to submit initial or interim cost estimates if sufficient evidence to show final costs or expenditures is not yet available, but must submit a completed entry within 90 days of the vessel's arrival. 19 CFR 4.14(f). If additional time is needed to submit completed vessel repair entries, vessel operators are required to submit to the VRU a written request explaining their need for filing extensions before the 90-day timeline expires. 19 CFR 4.14(f). Paragraph (f) allows the VRU to grant a 30-day extension and the CCR to grant a second extension. 19 CFR 4.14(f). Current practice allows vessel operators a total of 150 days to submit vessel repair entries because both the VRU and CCR rarely deny extension requests. In practice, the CCR will grant a second 30-day extension. Therefore, the filing extensions provide vessel operators with an additional 60 days to file completed vessel repair entries. The amendment to paragraph (f) thus removes the provision regarding extensions and provides 150 days from vessel arrival for operators to submit a completed vessel repair entry, as opposed to the existing 90-day deadline and the possibility of filing for two extensions.

users who understand what is required to obtain an extension.

B. Application for Relief From Assessment of Vessel Repair Duties

Paragraph (i) requires vessel operators to apply for relief from assessment of vessel repair duties within 90 days of vessel arrival for the opportunity to qualify for relief from assessment of these duties. 19 CFR 4.14(i). An Application for Relief must clearly state the legal basis for granting relief for one of the reasons specified in paragraph (h). Although the Application for Relief is not required to be submitted in any particular format, it must certify that all repair operations performed aboard the vessel during the one-year period prior to the current submission have been declared and entered and must be supported by certain evidence outlined in paragraph (i)(1)(i)–(vi) and (i)(2).[7] 19 CFR 4.14(i)(1). Paragraph (i) allows the VRU to grant a 30-day extension and the CCR to grant a second extension for vessel operators to file for relief from assessment of vessel repair duties. Similar to the procedure for vessel repair entries in paragraph (f), the CCR normally grants a second 30-day extension. Therefore, current practice allows vessel owners 150 days to file an Application for Relief from assessment of vessel repair duties, because, as a practical matter, the VRU and CCR usually grant all extension requests. The amendments therefore remove the extension provisions and expand the original 90-day timeline to 150 days from vessel arrival for owners to apply for relief from assessment of vessel repair duties.

IV. Statutory and Regulatory Analysis

A. Inapplicability of Prior Notice and Delayed Effective Date

According to section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), rulemaking generally requires prior notice and comment and a 30-day delayed effective date, subject to specified exceptions. Pursuant to 5 U.S.C. 553(b)(3)(A), the prior notice and comment and delayed effective date requirements do not apply when agencies promulgate rules concerning agency organization, procedure, or practice. In addition, section 553(d) of the APA requires that a final rule have a 30-day delayed effective date. The APA, however, provides exceptions from the prior notice and public comment requirement and the delayed effective date requirements, when an agency for good cause finds that such procedures are impracticable, unnecessary, or contrary to the public interest.

This rule does not require prior notice and comment because it relates to agency organization, procedure, or practice. Specifically, the final rule merely updates the regulations to simplify CBP's procedures and does not substantially change any parties' right to file evidence for the cost of vessel repair or to apply for relief from assessment of vessel repair duties. Moreover, the new amendment seeks to codify what is done in practice.

Current practice almost always provides vessel operators with 150 days to file the supporting evidence for repairs and to apply for relief from assessment of duties, which the new amendment will still allow. Current regulations allow 90 days from vessel arrival to file these documents. Upon the request of a vessel operator, the VRU and CCR usually grant two 30-day filing extensions, for a total of an additional 60 days. The final rule will eliminate the extension request procedure and allow for a total of 150 days without extensions, rather than an initial 90 days with two 30-day extensions, to file these documents. As a result, this rule merely streamlines the vessel repair entry process by eliminating the need for vessel owners to file extension requests and by providing the same timeframe for these documents to be filed.

Additionally, CBP finds that prior notice and comment are unnecessary and that good cause exists to issue this rule effective upon publication. Prior notice and comment are unnecessary because the rule does not substantively alter the underlying rights or interests of vessel operators and streamlines the process for both vessel operators and CBP.

B. Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety

[7] Each Application for Relief must include copies of: (i) itemized bills, receipts, and invoices for items shown in 19 CFR 4.14(e); (ii) photocopies of relevant parts of vessel logs, as well as of any classification society reports which detail damage and remedies; (iii) a certification by the senior officer with personal knowledge of all relevant circumstances relating to casualty damage; (iv) a certification by the senior officer with personal knowledge of all relevant circumstances relating to foreign repair expenditures; (v) a certification by the master that casualty-related expenditures were necessary to ensure the safety and seaworthiness of the vessel in reaching its U.S. port of destination; and (vi) any permits or other documents filed with or issued by any U.S. Government agency other than CBP regarding the operation of the vessel that are relevant to the request for relief. 19 CFR 4.14(i).

effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This amendment is not a ''significant regulatory action,'' under section 3(f) of Executive Order 12866. Accordingly, OMB has not reviewed this regulation. In summary, CBP expects there to be a combined total savings of approximately $55,209 annually to the Federal Government and vessel owners as a result of this rule. Following is analysis of this estimated cost savings.

Purchases for repairs or repairs made to certain vessels while outside the United States are subject to entry and payment of duty. This amendment to 19 CFR 4.14 extends the timeframe for U.S. vessel operators to provide a completed vessel repair entry to CBP and to apply for relief from the assessment of duty usually required for vessel repairs occurring in a foreign country to reflect current CBP practice. Currently, vessel operators have 90 days to submit a completed vessel repair entry with supporting evidence for each repair. In certain circumstances, vessel operators can apply for relief from assessment of these duty amounts, if they provide the appropriate documentation. Vessel operators are likewise given 90 days from vessel arrival into the United States to apply for relief.

In both scenarios, current regulations, 19 CFR 4.14(f), (i), allow vessel operators to request extensions to complete vessel repair entries and apply for relief from duty assessment. Vessel operators can request two separate extensions, allowing them, in practice, a total of 150 days to provide all the necessary information to complete their vessel repair entries or Applications for Relief. This amendment to 19 CFR 4.14 changes the deadline from 90 to 150 days and eliminates the requirement that vessel operators request extensions. This amendment would obviate the need for vessel operators to make extension requests and would eliminate all costs associated with these requests. CBP estimates that this amendment would provide an overall savings to the U.S. economy by taking away the time burden associated with the extension requests for both vessel repair entries and relief from duty payments on vessel repairs made abroad.

Under the current regulations located at 19 CFR 4.14, when certain vessels undergo repairs outside of the United States, the value of the foreign repairs may be subject to duties when these vessels re-enter the United States or Puerto Rico.[8] Upon re-entry to a U.S. or Puerto Rico port, vessel operators are required to submit a vessel repair declaration and entry documentation, including an estimated duty payment (or produce evidence of a bond), before the vessel can be released from that U.S. port of entry. Specifically, the values of foreign parts and foreign repairs made to certain vessels at foreign shipyards are subject to duty upon re-entry to a U.S. or Puerto Rico port. The duty amount is based on the actual foreign costs to the vessel operator for purchases of articles used in repairs and labor costs for repairs made outside the United States by foreign shipyards and foreign labor. According to existing regulations, for articles previously imported into the United States and then exported for use in foreign vessel repairs, vessel owners are required to pay duties. The duties owed are based on the foreign purchase price of the articles when initially imported into the United States.

Vessel operators submitting vessel repair entries must provide supporting documentation validating the costs of all foreign parts and repairs. If vessel operators do not have all of the required information at the time of entry, they can file an incomplete vessel repair entry as long as they can provide complete evidence to the VRU within 90 days of vessel arrival. Vessel operators must provide the final foreign cost of articles used and any repairs within this 90-day deadline to complete a vessel repair entry. However, vessel operators may be granted an extension to complete a vessel repair entry if they are unable to before the deadline. Upon the vessel operator's submission of a written request justifying the need for additional time, the VRU may grant a 30-day extension. As discussed above, in practice, the VRU nearly always approves requests made by vessel operators for a 30-day extension.[9] A second extension may also be granted beyond the initial 30-day extension. This second request must be approved by the CCR.[10] If both requests for extensions are granted, vessel operators, in practice, are given a total of 150 days to provide complete evidence of costs for vessel repair entries. If all cost evidence is not provided by the specified deadlines, the VRU can refer the matter to U.S. Immigration and Customs Enforcement to acquire the information needed to complete the vessel repair entry.

In the current regulations, there are limited circumstances under which vessel operators can be granted relief from paying the duties on foreign articles and foreign repairs.[11] In these cases, vessel operators may apply for relief from assessment of the duties. However, Applications for Relief from assessment of vessel repair duties require a significant amount of documentation to support such claims for relief.[12] These applications must provide information regarding all vessel repair operations performed aboard that vessel within the 12-month period prior to the most current vessel repair entry. As with filing incomplete vessel repair entries, vessel operators likewise have 90 days from vessel arrival at a U.S. port to file these Applications for Relief. Vessel operators can similarly request an extension to the initial 90-day deadline to apply for relief, assuming vessel operators can justify the need for a 30-day extension. These extension requests are comparable to the extension requests for completing vessel repair entries which include: waiting on

[8] According to 19 CFR 4.14(a), duties owed for vessel repairs occurring outside the United States apply to all vessels documented under U.S. law that engage in foreign or coasting trade, as well as those intended to engage in those trades, under CBP interpretations.

[9] Based on communication with the Cargo Security, Carriers, and Restricted Merchandise Branch on April 13, 2022. A subject matter expert stated that the VRU nearly always approves the 30-day extension requests, only 1 request had been denied in the past several years and denial was based on a late submission well after the deadline.

[10] CBP notes that these second extension requests for vessel repair entries are rarely denied. Data received from the Cargo Security, Carriers, and Restricted Merchandise Branch on October 28, 2020. A subject matter expert stated that the CCR nearly always approves a second extension request.

[11] According to 19 CFR 4.14(h) and (i), there are a few circumstances where vessels can qualify for duty relief. These include but are not limited to: matters involving vessels normally subject to 19 U.S.C. 1466(a), (d), (e), or (h). These situations include vessels that continuously remain outside the United States for two years or longer; expenditures on LASH barges; relief on certain spare repair parts or materials; and relief on certain spare parts necessarily installed on a vessel prior to their first entry into the United States.

[12] According to 19 CFR 4.14(i), each Application for Relief should include the following documentation: itemized bills, receipts, and invoices for items shown in 19 CFR 4.14(e); the cost of items for which a request for relief is made must be segregated from the cost of the other items listed in the vessel repair entry; photocopies of relevant parts of vessel logs, as well as of any classification society reports which detail damage and remedies; a certification by the senior officer with personal knowledge of all relevant circumstances relating to casualty damage (time, place, cause, and nature of damage); a certification by the senior officer with personal knowledge of all relevant circumstances relating to foreign repair expenditures (time, place, and nature of purchases and work performed); a certification by the master that casualty-related expenditures were necessary to ensure the safety and seaworthiness of the vessel in reaching its U.S. port of destination and any permits or other documents filed with or issued by any U.S. Government agency other than CBP regarding the operation of the vessel that are relevant to the request for relief.

receipts, invoices, documents, certifications, surveyor reports, and third party organization reports. The VRU determines whether to grant extensions for submitting Applications for Relief, and in practice, the VRU rarely declines such requests.[13] In addition, vessel operators can request a second extension, which the CCR may grant.[14] If the vessel operator does not file an Application for Relief or does not provide an appropriate justification for relief, the vessel operator is responsible for the full duty amount as determined by the vessel repair entry.

This amendment changes the deadline for vessel operators to provide complete information for vessel repair entries and to submit Applications for Relief. The amendment extends the time period from 90 days to 150 days and eliminates the need for extension requests. CBP believes that extending the initial deadline will provide vessel operators additional time to provide the appropriate and accurate information. In addition, by changing the deadline to 150 days, the amendment would eliminate the necessity for vessel operators to request deadline extensions to complete vessel repair entries and Applications for Relief. CBP expects that the amendment will generate savings to both vessel operators and the Federal Government by eliminating the costs associated with completing and reviewing extension requests beyond the initial 90-day deadline in the existing regulations. CBP does not expect this amendment to impose any costs to vessel operators or the Federal Government.

TABLE 1—TIME BURDEN TO COMPLETE EXTENSION REQUESTS

	Expected annual extension requests	Time burden per request to vessel operators (hours)	Annual time burden to vessel operators (hours)	Time burden per request to CBP (hours)	Annual time burden to CBP (hours)
VRU Extension Requests	152	1	152	0.5	76
CCR Extension Requests	42	1	42	0.56	24

Vessel operators and CBP will benefit from this amendment because the extension request process is time-consuming for both the government and private parties. CBP estimates that the VRU reviews approximately 152 extension requests annually, while the CCR reviews on average 42 extension requests each year.[15] CBP estimates the average time burden placed on vessel operators or representatives to complete a single extension request (both the initial and subsequent requests) is approximately one hour each.[16] Meanwhile, CBP estimates that the time burden placed on CBP to review and approve the extension requests is approximately 30 minutes (0.5 hours) to review each VRU extension request and approximately 34 minutes (0.56 hours) to review each CCR extension request.[17]

Benefits From Eliminating VRU Extension Requests

Extension requests for vessel repair entries and applications for duty assessment relief are typically filed on behalf of the vessel operators by legal representatives or vessel agents. Unfortunately, CBP does not have exact data on the proportion of how many extension requests are completed by legal representatives on behalf of the vessel operators and how many are filed by vessel agents. Therefore, CBP assumes that half of all extension requests are filed by legal representatives and half are filed by vessel agents.

TABLE 2—EXPECTED ANNUAL SAVINGS FROM ELIMINATING VRU 30-DAY EXTENSION REQUESTS

	Estimated time burden to vessel operators (hours)	Estimated time burden to vessel legal representatives (hours)	Cost to vessel agents	Cost to vessel legal representatives	Estimated time burden to CBP (hours)	Cost to CBP	Total savings
VRU Extension Requests	76	76	$4,265	$32,669	76	$5,796	$42,730

On average, CBP estimates that vessel operators file approximately 152 extension requests every year that are reviewed by the VRU. CBP assumes that half of these 152 requests (76) are filed by a vessel operator's legal representative and half (76) are filed by vessel agents. The expected savings to vessel operators from eliminating these extension requests is based on the estimated burden hours for half of the VRU extension requests (76 hours, 1 hour per request), multiplied by the average loaded hourly wage rate for vessel legal representatives ($429.86). CBP determined that this is the best estimate for private lawyers hired outside of a company, because the data

[13] Based on communication with the Cargo Security, Carriers, and Restricted Merchandise Branch on April 13, 2022; subject matter expert stated that the VRU essentially always approves the 30-day extension requests. During the past several years, only 1 request has been denied and the denial was solely due to the extension request being submitted well after the deadline.

[14] CBP notes that these second extension requests for Applications for Relief are rarely denied. Data received from the Cargo Security, Carriers, and Restricted Merchandise Branch on April 13, 2022; subject matter expert stated that the CCR nearly always approves a second extension request.

[15] Data provided by the Cargo Security, Carriers, and Restricted Merchandise Branch on November 9, 2020. Data obtained included the average number of extension requests reviewed by the VRU and CCR from FY 2018–FY 2020. CBP calculated the average annual expected extension requests by looking at the annual requests reviewed in FY 2018, FY 2019 and FY 2020. The extension request numbers include both extension requests for completing vessel repair entries and applications for duty assessment relief.

[16] Data received from the Vessel Repair Unit on November 10, 2020. Subject matter expert's best estimate on time burden placed on vessel operators to file extension requests is approximately one hour.

[17] Data obtained from the Cargo Security, Carriers, and Restricted Merchandise Branch on October 28, 2020, providing an estimated time burden on CBP to review each VRU and each CCR extension request.

was obtained from an American Intellectual Property Law Association (AIPLA) study on the average hourly billing rate for lawyers. AIPLA's study surveyed intellectual property (IP) lawyers and was used in the 2017 Report of the Economic Survey. The study found the median hourly billing rate for these lawyers was $400 in 2016 dollars, which is the most recent data available, and $429.86 after adjustment to 2020 dollars.[18] To estimate the cost of filing VRU extension requests imposed on vessel agents, CBP used the estimated burden hours for half of VRU extension requests (76 hours, 1 hour per request), multiplied by the average loaded hourly wage rate for vessel operators ($56.12).[19] CBP estimated that the savings each year from eliminating these extension requests to vessel agents ($4,265) and legal representatives ($32,669) would be approximately $36,934.

In addition to the cost to vessel operators, the Federal Government incurs costs from reviewing VRU extension requests every year. The expected annual cost to the Federal Government associated with the review of VRU extension requests is based on the number of responses that must be reviewed (152) multiplied by the time burden to review and process each response (0.5 hours) = 76 hours. This is then multiplied by the average hourly loaded rate for other CBP employees ($76.26) = $5,796.[20] CBP thus estimates that the savings to the Federal Government from eliminating VRU requests would be approximately $5,796 on an annual basis. Considering the combined savings to vessel operators and the Federal Government as a result of eliminating VRU extension requests, CBP estimates that this rule's annual savings is approximately $42,730.

Benefits From Eliminating CCR Extension Requests

As discussed above, CBP expects that, on average, the CCR reviews about 42 requests for 30-day extensions every year. These amendments will have the effect of eliminating extension requests and their associated costs, constituting a net savings to all associated parties. CBP calculated these costs by combining the costs to vessel operators and the Federal Government for filing and reviewing these subsequent extension requests, for completing vessel repair entries, and for applying for relief from duty payments. CBP assumes that the time burden on vessel operators to file the subsequent extension requests (which are reviewed by the CCR) is one hour per extension request. Like extension requests to the VRU, CBP expects that the costs incurred by these extension requests to the CCR represent potential savings from the amendment. CBP expects that half of the 42 extension requests to the CCR (21) are completed by legal representatives on behalf of vessel operators and half (21) are completed by vessel agents.

TABLE 3—EXPECTED ANNUAL SAVINGS FROM ELIMINATING CCR 30-DAY EXTENSION REQUESTS

	Estimated time burden to vessel operators (hours)	Estimated time burden to vessel legal representatives (hours)	Cost to vessel agents	Cost to vessel legal representatives	Estimated time burden to CBP (hours)	Cost to CBP	Total savings
CCR Extension Requests	21	21	$1,169	$8,955	24	$2,354	$12,479

CBP calculated the savings from removing the subsequent requests for 30-day extensions based on the estimated burden hours for half of the CCR extension requests (21 hours, 1 hour per request), multiplied by the average loaded hourly wage rate for vessel legal representatives equaling $429.86).[21] For the second half of the CCR extension requests, which CBP assumes are filed by vessel agents, CBP used the estimated burden hours for half of the CCR extension requests (21 hours, 1 hour per request), multiplied by the average loaded hourly wage rate for vessel operators equaling $56.12.[22] CBP calculated that the estimated annual savings to vessel operators by eliminating the CCR extension requests will be approximately $10,125.

By eliminating the need for subsequent extension requests, the amendments will provide savings to the Federal Government, as the CCR staff would no longer need to review extension requests. The estimated annual savings from this portion of the

[18] American Intellectual Property Law Association. *2017 Report of the Economic Survey.* ''Billable Hours, Billing Rate, Dollars Billed (Q29, Q30, Q27).'' June 2017. CBP calculated the 2020 adjusted dollar amount using the percent increase in the Annual Average GDP Price Deflator (2015 = 100) between 2016 and 2020. The annual average GDP Price Deflator value in 2016 = 101.0481, the annual average GDP Price Deflator value in 2020 = 108.5904, the percent increase was estimated to be around 7.4641% (108.5904/101.0481 = 1.07.4641 or 7.4641%). This percent increase was applied to the 2016 estimated hourly billing rate of $400 for external attorneys to estimate the 2020 hourly billing rate of $429.86 for external attorneys.

[19] CBP calculated this loaded wage rate by first multiplying the Bureau of Labor Statistics' (BLS) 2020 median hourly wage rate for Captains, Mates, and Pilots of Water Vessels ($37.08) by the ratio of BLS' average 2020 total compensation to wages and salaries for Transportation and Material Moving occupations (1.5134), the assumed occupational group for captains, mates, and pilots of water vessels, to account for non-salary employee benefits. These figures are in 2020 U.S. dollars and CBP assumes an annual growth rate of 0 percent; the 2020 U.S. dollar values are equal to the 2021 U.S. dollar values.

[20] Data obtained from the Cargo Security, Carriers, and Restricted Merchandise Branch on October 28, 2020. The Cargo Security, Carriers, and Restricted Merchandise Branch calculated the time burden to GS–12 litigation specialists at 30 minutes to review each VRU extension requests. CBP used its estimates for Other CBP Employees at the GS–12 Step 3 level, as the best proxy for average hourly loaded wage rate. CBP based this wage on the FY 2021 salary and benefits of the national average of other CBP positions, which is equal to a GS–12, Step 3. Source: Email correspondence with CBP's Office of Finance on September 7, 2021.

[21] CBP determined this is the best estimate for private lawyers hired outside of a company and was obtained from an American Intellectual Property Law Association (AIPLA) study on the average hourly billing rate for lawyers. AIPLA's study surveyed intellectual property (IP) lawyers that were used in the *2017 Report of the Economic Survey.* The median hourly billing rate for these lawyers was $400 in 2016 dollars, which is the most recent data available, and $424.75 after adjustment to 2019 dollars. American Intellectual Property Law Association. *2017 Report of the Economic Survey.* ''Billable Hours, Billing Rate, Dollars Billed (Q29, Q30, Q27).'' June 2017. CBP calculated the 2020 adjusted dollar amount using the percent increase in the Annual Average GDP Price Deflator (2015 = 100) between 2016 and 2020. The annual average GDP Price Deflator value in 2016 = 101.0481, the annual average GDP Price Deflator value in 2020 = 108.5904, the percent increase was estimated to be around 7.4641% (108.5904/101.0481 = 1.074641 or 7.4641%). This percent increase was applied to the 2016 estimated hourly billing rate of $400 for external attorneys to estimate the 2020 hourly billing rate of $429.86 for external attorneys.

[22] CBP calculated this loaded wage rate by first multiplying the Bureau of Labor Statistics' (BLS) 2020 median hourly wage rate for Captains, Mates, and Pilots of Water Vessels ($37.08) by the ratio of BLS' average 2020 total compensation to wages and salaries for Transportation and Material Moving occupations (1.5134), the assumed occupational group for captains, mates, and pilots of water vessels, to account for non-salary employee benefits. These figures are in 2020 U.S. dollars and CBP assumes an annual growth rate of 0 percent; the 2020 U.S. dollar values are equal to the 2021 U.S. dollar values.

amendment to the Federal Government is based on the number of responses that must be reviewed (42) multiplied by the time burden to review and process each response (0.5625 hours) = 24 hours multiplied by the average hourly loaded wage rate for a CBP attorney-advisor ($98.10) = $2,354.[23] [24] The total savings from eliminating CCR extension requests was estimated by combining savings to both vessel operators ($10,125) and CBP ($2,354), which is approximately $12,479 each year.

CBP expects the amendment will result in savings to the U.S. economy on an annual basis. CBP calculated the total savings as the combination of savings accrued by both the Federal Government and vessel operators from extending the filing deadlines to 150 days. CBP calculated the total savings by adding the expected savings to vessel operators generated by eliminating VRU extension requests ($36,934) and CCR extension requests ($10,125). CBP also included in total savings of the amendment, the added savings to the Federal Government generated by eliminating VRU extension requests ($5,796) and CCR extension requests ($2,354). CBP estimates that the overall savings to the U.S. economy from this amendment will be approximately $55,209 each year.

Overall, CBP expects that the impact from amending the deadlines from 90 to 150 days for vessel operators to provide completed vessel repair entries and applications for duty assessment relief does not result in a ''significant'' economic impact in any given year. After considering the impacts of the amendment, CBP expects there to be a net savings of approximately $55,209 annually to the U.S. economy. At the same time, CBP does not expect any costs associated with this amendment.

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement and Fairness Act of 1996, requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of a proposed rule on small entities (*i.e.,* small businesses, small organizations, and small governmental jurisdictions) when the agency is required to publish a general notice of proposed rulemaking for a rule. Since a general notice of proposed rulemaking is not necessary for this rule, CBP is not required to prepare a regulatory flexibility analysis for this rule.

D. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that CBP consider the impact of paperwork and other information collection burdens imposed on the public. As there is no collection of information in this document, the provisions of the Paperwork Reduction Act are inapplicable.

V. Signing Authority

This document is being issued in accordance with 19 CFR 0.2(a), which provides that the authority of the Secretary of the Treasury with respect to CBP regulations that are not related to customs revenue functions was transferred to the Secretary of Homeland Security pursuant to Section 403(l) of the Homeland Security Act of 2002. Accordingly, this final rule to amend such regulations may be signed by the Secretary of Homeland Security (or his or her delegate).

List of Subjects in 19 CFR Part 4

Exports, Freight, Harbors, Maritime carriers, Oil pollution, Reporting and recordkeeping requirements, Vessels.

Amendments to the Regulations

For the reasons set forth in the preamble, CBP amends part 4 of title 19 of the Code of Federal Regulations (19 CFR part 4) as set forth below.

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

■ 1. The general authority citation for part 4 and the specific authority citation for § 4.14 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 66, 1415, 1431, 1433, 1434, 1624, 2071 note; 46 U.S.C. 501, 60105.

* * * * *

Section 4.14 also issued under 19 U.S.C. 1466, 1498; 31 U.S.C. 9701.

* * * * *

■ 2. In § 4.14, revise paragraphs (f) and (i)(1) to read as follows:

§ 4.14 Equipment purchases for, and repairs to, American vessels.

* * * * *

(f) *Time limit for submitting evidence of cost.* A complete vessel repair entry must be supported by evidence showing the cost of each item entered. If the entry is incomplete when submitted, evidence to make it complete must be received by the VRU as identified in paragraph (g) of this section within 150 calendar days from the date of vessel arrival. That evidence must include the final cost of repairs. In the event that all final cost evidence is not furnished within 150 days, or is of doubtful authenticity, the VRU may refer the matter to U.S. Immigration and Customs Enforcement to begin procedures to obtain the needed evidence. That agency may also investigate the reason for a failure to file or for an untimely submission. Unexplained or unjustified delays in providing CBP with sufficient information to properly determine duty may result in penalty action as specified in paragraph (j) of this section.

* * * * *

(i) * * *

(1) *Applications for Relief.* Relief from the assessment of vessel repair duty will not be granted unless an Application for Relief is filed with CBP. Relief will not be granted based merely upon a claim for relief made at the time of entry under paragraph (e) of this section. If relief is sought, an Application is not required to be presented in any particular format, but it must clearly present the legal basis for granting relief, as specified in paragraph (h) of this section. An Application must also state that all repair operations performed aboard a vessel during the one-year period prior to the current submission have been declared and entered. A valid Application is required to be supported by complete evidence as detailed in paragraphs (i)(1)(i) through (vi) and (i)(2) of this section. Except as further provided in this paragraph, the deadline for receipt of an Application and supporting evidence is 150 calendar days from the date that the vessel first arrived in the United States following foreign operations. Applications must be addressed and submitted by the vessel operator to the VRU and will be decided in that unit. The VRU may seek the advice of the Cargo Security, Carriers & Restricted Merchandise Branch, Office of Trade, in CBP Headquarters with regard to any specific item or issue which has not been addressed by clear precedent. If no Application is filed or if a submission which does not meet the minimal standards of an Application for Relief is

[23] Data obtained from the Cargo Security, Carriers, and Restricted Merchandise Branch on October 28, 2020, providing an estimated time burden to the CCR to review the secondary extension requests. Of the 80 requests reviewed in FY 2020, the estimated time burden was about 45 hours for attorney-advisors, equivalent to about 0.5625 hours per request to review. A lack of detailed data for FY 2019 and FY 2018 prevented CBP from obtaining exact time burdens to complete the requests made during those years. Therefore, CBP used the FY 2020 average time burden per request and applied that average to the total number of requests reviewed in FY 2019 and FY 2018 to estimate the annual expected time burden associated with secondary extension requests.

[24] CBP based this wage on the FY 2021 salary and benefits of the national average of CBP Attorney positions. Source: Email correspondence with CBP's Office of Finance on March 18, 2022.

received, the duty amount will be determined without regard to any potential claims for relief from duty assessment (see paragraph (h) of this section). Each Application for Relief must include copies of:

* * * * *

Alejandro N. Mayorkas,

Secretary of Homeland Security.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2022–0627]

Safety Zone; Oswego Harbor Fest Fireworks

AGENCY: Coast Guard, DHS.

ACTION: Notification of enforcement of regulation.

SUMMARY: The Coast Guard will enforce a safety zone for the Oswego Harbor Fest Fireworks. This safety zone is necessary for the safety of life on navigable waterways during this display. Our regulation for limited access areas within the Captain of the Port Buffalo Zone identifies the regulated area for this event in Oswego, NY. During the enforcement periods, the operator of any vessel in the regulated area must comply with directions from the Safety Zone Coordinator or any Official Patrol displaying a Coast Guard ensign.

DATES: The regulation listed in 33 CFR 165.939 Table 165.939 (b)(28) will be enforced from 9 p.m. through 10 p.m. on July 30, 2022.

FOR FURTHER INFORMATION CONTACT: If you have questions about this notification of enforcement, contact LTJG William Kelley, Chief of Waterways Management, Sector Buffalo, U.S. Coast Guard; telephone 716–843–9301, email *D09-SMB-SECBuffalo-WWM@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the Oswego Harbor Fest Fireworks Safety Zone in 33 CFR 165.939 listed in the Table 165.939 (b)(28). The safety zone will be enforced on all waters of Oswego Harbor, Oswego, NY contained within a 700-foot radius of position 43°27′54.9″ N, 076°31′20.48″ W along with a 350-foot radius of the break wall between positions 43°27′86.0″ N, 076°31′44.3″ W then Northeast to 43°28′01.4″ N, 076°31′44.6″ W, from 9 p.m. through 10 p.m. on July 30, 2022.

Pursuant to 33 CFR 165.23, entry into, transiting, or anchoring within these safety zones during an enforcement period is prohibited unless authorized by the Captain of the Port (COTP) Buffalo or his designated representative; designation need not be in writing. Those seeking permission to enter these safety zones may request permission from the COTP Buffalo via channel 16, VHF–FM. Vessels and persons granted permission to enter the safety zone shall obey the directions of the COTP Buffalo or his designated representative. While within a safety zone, all vessels shall operate at the minimum speed necessary to maintain a safe course.

In addition to this notice of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of the enforcement periods via Broadcast Notice to Mariners or other suitable means. If the COTP Buffalo determines that the safety zone need not be enforced for the full duration stated in this notice, he may use a Broadcast Notice to Mariners to grant general permission to enter the respective safety zone. This notice is issued under the authority of 5 U.S.C. 552(a).

Dated: July 25, 2022.

M.I. Kuperman,

Captain, U.S. Coast Guard, Captain of the Port Buffalo.

[FR Doc. 2022–16265 Filed 7–28–22; 8:45 am]

BILLING CODE 9110–04–P

POSTAL REGULATORY COMMISSION

39 CFR Part 3040

[Docket No. RM2020–8]

Update to Product Lists

AGENCY: Postal Regulatory Commission.

ACTION: Direct final rule.

SUMMARY: The Commission is announcing an update to the Market Dominant and Competitive product lists. This action reflects a publication policy adopted by Commission rules. The referenced policy assumes periodic updates. The updates are identified in the body of this document. The Market Dominant and Competitive product lists, which are re-published in their entirety, include these updates.

DATES: This rule is effective September 12, 2022, without further action, unless adverse comment is received by August 29, 2022. If adverse comment is received, the Commission will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: For additional information, this document can be accessed electronically through the Commission's website at *https://www.prc.gov.*

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6800.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Commission Process
III. Authorization
IV. Modifications
V. Ordering Paragraphs

I. Introduction

Pursuant to 39 U.S.C. 3642(d)(2) and 39 CFR 3040.103, the Commission provides a Notice of Update to Product Lists by listing all necessary modifications to both the Market Dominant and Competitive product lists between April 1, 2022 and June 30, 2022.

II. Commission Process

Pursuant to 39 CFR part 3040, the Commission maintains a Mail Classification Schedule (MCS) that includes rates, fees, and product descriptions for each Market Dominant and Competitive product, as well as product lists that categorize Postal Service products as either Market Dominant or Competitive. *See generally* 39 CFR part 3040. The product lists are published in the Code of Federal Regulations as 39 CFR Appendix A to Subpart A of Part 3040—Market Dominant Product List and Appendix B to Subpart A of Part 3040—Competitive Product List pursuant to 39 U.S.C. 3642(d)(2). *See* 39 U.S.C. 3642(d)(2). Both the MCS and its product lists are updated by the Commission on its website on a quarterly basis.[1] In addition, these quarterly updates to the product lists are also published in the **Federal Register** pursuant to 39 CFR 3040.103. *See* 39 CFR 3040.103.

III. Authorization

Pursuant to 39 CFR 3040.103(d)(1), this Notice of Update to Product Lists identifies any modifications made to the Market Dominant or Competitive product list, including product additions, removals, and transfers.[2] Pursuant to 39 CFR 3040.103(d)(2), the modifications identified in this document result from the Commission's most recent MCS update posted on the

[1] *See https://www.prc.gov/mail-classification-schedule* in the Current MCS section.

[2] 39 CFR 3040.103(d)(1). More detailed information (*e.g.,* Docket Nos., Order Nos., effective dates, and extensions) for each Market Dominant and Competitive product can be found in the MCS, including the ''Revision History'' section. *See, e.g.,* file ''*MCSRedline01092022.docx,*'' available at *https://www.prc.gov/mail-classification-schedule.*

Commission's website on June 30, 2022, and supersede all previous product lists.[3]

IV. Modifications

The following list of products is being added to 39 CFR Appendix B to Subpart A of Part 3040—Competitive Product List:

1. Parcel Select Contract 49
2. Priority Mail Contract 738
3. Priority Mail Contract 739
4. Priority Mail Contract 740
5. Priority Mail Contract 741
6. Priority Mail Contract 742
7. Priority Mail Contract 743
8. Priority Mail Contract 744
9. Priority Mail Contract 745
10. Priority Mail Contract 746
11. Priority Mail Contract 747
12. Priority Mail Contract 748
13. Priority Mail Contract 749
14. Priority Mail Contract 750
15. Priority Mail Express Contract 94
16. Priority Mail & First-Class Package Service Contract 216
17. Priority Mail & First-Class Package Service Contract 217
18. Priority Mail Express & Priority Mail Contract 131
19. Priority Mail Express & Priority Mail Contract 132
20. Priority Mail Express & Priority Mail Contract 133
21. Priority Mail Express International, Priority Mail International & First-Class Package International Service Contract 4
22. Priority Mail Express International, Priority Mail International & First-Class Package International Service Contract 5

The following list of products is being removed from 39 CFR Appendix A to Subpart A of Part 3040—Market Dominant Product List:

1. Extended Mail Forwarding
2. Commercial PO Box Redirect Service

The following list of products is being removed from 39 CFR Appendix B to Subpart A of Part 3040—Competitive Product List:

1. Parcel Return Service Contract 14
2. Priority Mail Contract 479
3. Priority Mail Contract 505
4. Priority Mail Contract 507
5. Priority Mail Contract 509
6. Priority Mail Contract 523
7. Priority Mail Contract 529
8. Priority Mail Contract 531
9. Priority Mail Contract 533
10. Priority Mail Contract 661
11. Priority Mail Contract 664
12. Priority Mail Contract 691
13. Priority Mail Contract 713
14. Priority Mail Contract 717
15. Priority Mail Contract 719
16. Priority Mail & First-Class Package Service Contract 110
17. Priority Mail & First-Class Package Service Contract 115
18. Priority Mail & First-Class Package Service Contract 185
19. Priority Mail Express Contract 74
20. Priority Mail Express & Priority Mail Contract 84
21. Priority Mail Express & Priority Mail Contract 92
22. Priority Mail Express International, Priority Mail International, First-Class Package International Service & Commercial ePacket Contract 4

The above-referenced changes to the Market Dominant product list and the Competitive product list are incorporated into 39 CFR Appendix A and B to Subpart A of Part 3040.

V. Ordering Paragraphs

It is ordered:

1. Part 3040 of title 39, Code of Federal Regulations, is amended as set forth below the signature of this Notice, effective 45 days after the date of publication of the Notice in the **Federal Register** without further action, unless adverse comments are received.

2. The Secretary shall arrange for publication of the Notice in the **Federal Register**.

3. Interested persons may submit adverse comments no later than 30 days from the date of the publication of this Notice in the **Federal Register**.

4. If adverse comments are received, the Secretary will publish a timely withdrawal of the Notice in the **Federal Register**.

By the Commission.

Erica A. Barker,

Secretary.

List of Subjects in 39 CFR Part 3040

Administrative practice and procedure, Postal Service.

For the reasons discussed in the preamble, the Postal Regulatory Commission amends chapter III of title 39 of the Code of Federal Regulations as follows:

PART 3040—PRODUCT LISTS

■ 1. The authority citation for part 3040 continues to read as follows:

Authority: 39 U.S.C. 503; 3622; 3631; 3642; 3682.

■ 2. Revise Appendix A to Subpart A of Part 3040 to read as follows:

Appendix A to Subpart A of Part 3040—Market Dominant Product List

(An asterisk (*) indicates an organizational class or group, not a Postal Service product.)

[FR Doc. 2022–15974 Filed 7–28–22; 8:45 am]

BILLING CODE 7710–FW–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R06–OAR–2020–0437; FRL–8698–02–R6]

Air Plan Approval; Oklahoma; Volatile Organic Compound Emissions in Nonattainment Areas and Former Nonattainment Areas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is approving revisions to the State Implementation Plan (SIP) for Oklahoma submitted by the State of Oklahoma designee with a letter dated May 7, 2020. The submittal covers updates to the Oklahoma SIP, as contained in the State's 2019 annual SIP update. Specifically, this action addresses revisions to Oklahoma Administrative Code (OAC) Title 252 Chapter 100 Subchapter 39, Emission of Volatile Organic Compounds (VOCs) in Nonattainment Areas and Former Nonattainment Areas. There are two Oklahoma counties affected by this action: Tulsa County and Oklahoma County.

DATES: This rule is effective on August 29, 2022.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R06–OAR–2020–0437. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet. Publicly available docket materials are available electronically through *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Clovis Steib, EPA Region 6 Office, Infrastructure and Ozone Section, 214–665–7566, *steib.clovis@epa.gov.* Out of an abundance of caution for members of the public and our staff, the EPA Region 6 office may be closed to the public to reduce the risk of transmitting COVID–19. Please call or email the contact listed above if you need alternative access to material indexed but not provided in the docket.

SUPPLEMENTARY INFORMATION: Throughout this document ''we,'' ''us,'' and ''our'' means the EPA.

I. Background

The background for this action is discussed in detail in our July 22, 2021, proposal (86 FR 38627). In that document we proposed to approve revisions to the SIP for Oklahoma submitted by the State of Oklahoma with a letter dated May 7, 2020. Specifically, the action addressed revisions to OAC Title 252 Chapter 100 Subchapter 39, Sections 4, 16, 40, and 41. The revisions corrected errors and made these sections of the Oklahoma SIP consistent with EPA's rules. The two areas in Oklahoma affected by this action are Tulsa County and Oklahoma County.

We received comments on our proposal from one commenter. Our response to the comments follows.

II. Response to Comments

Comment: One commenter stated that it is important for citizens to stay informed and be kept up to date on Federal government revisions and regulations, such as this proposed approval action on the Oklahoma SIP.

Response: Public comment is just one part of an extensive rulemaking process. It is an invaluable gateway to plug in to the regulatory process because it is required of all agencies, across statutes, for any new regulation. Under the Administrative Procedures Act (1946), Federal agencies like the EPA, are required to request comments on new regulation proposals by all members of the public. We thank the commenter for their interest and taking the time to submit their response; as well as encouraging their fellow citizens to engage in the public comment process. No changes to the proposal were made in response to the comment.

III. Impact on Areas of Indian Country

As stated in the proposed action, following the U.S. Supreme Court decision in *McGirt* v. *Oklahoma*, 140 S.Ct. 2452 (2020), the Governor of the State of Oklahoma requested approval under Section 10211(a) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, Public Law 109–59, 119 Stat. 1144, 1937 (August 10, 2005) (''SAFETEA''), to administer in certain areas of Indian country (as defined at 18 U.S.C. 1151) the State's environmental regulatory programs that were previously approved by the EPA outside of Indian country.[1] The State's request excluded certain areas of Indian country further described below. In addition, the State only sought approval to the extent that such approval is necessary for the State to administer a program in light of *Oklahoma Dept. of Environmental Quality* v. *EPA,* 740 F.3d 185 (D.C. Cir. 2014).[2]

On October 1, 2020, the EPA approved Oklahoma's SAFETEA request to administer all of the State's EPA-approved environmental regulatory programs, including the Oklahoma SIP, in the requested areas of Indian country.[3] As requested by Oklahoma, the EPA's approval under SAFETEA does not include Indian country lands, including rights-of-way running through the same, that: (1) qualify as Indian allotments, the Indian titles to which have not been extinguished, under 18 U.S.C. 1151(c); (2) are held in trust by the United States on behalf of an individual Indian or Tribe; or (3) are owned in fee by a Tribe, if the Tribe (a) acquired that fee title to such land, or an area that included such land, in accordance with a treaty with the United States to which such Tribe was a party, and (b) never allotted the land to a member or citizen of the Tribe (collectively ''excluded Indian country lands'').

EPA's approval under SAFETEA expressly provided that to the extent EPA's prior approvals of Oklahoma's environmental programs excluded

[1] A copy of the Governor's July 22, 2020, request can be found in the docket for this rulemaking on the *https://www.regulations.gov* website. See Docket ID No. EPA–R06–OAR–2020–0437.

[2] In *ODEQ* v. *EPA,* the D.C. Circuit held that under the CAA, a state has the authority to implement a SIP in non-reservation areas of Indian country in the state, where there has been no demonstration of tribal jurisdiction. Under the D.C. Circuit's decision, the CAA does not provide authority to states to implement SIPs in Indian reservations. *ODEQ* did not, however, substantively address the separate authority in Indian country provided specifically to Oklahoma under SAFETEA. That separate authority was not invoked until the State submitted its request under SAFETEA, and was not approved until EPA's decision, described in this section, on October 1, 2020.

[3] A copy of EPA's October 1, 2020, approval can be found in the docket for this rulemaking on the *https://www.regulations.gov* website. See Docket ID No. EPA–R06–OAR–2020–0437.

Indian country, any such exclusions are superseded for the geographic areas of Indian country covered by the EPA's approval of Oklahoma's SAFETEA request.[4] The approval also provided that future revisions or amendments to Oklahoma's approved environmental regulatory programs would extend to the covered areas of Indian country (without any further need for additional requests under SAFETEA).[5]

As explained above, the EPA is approving revisions to the SIP for Oklahoma submitted by the State of Oklahoma with a letter dated May 7, 2020. Specifically, the action addressed revisions to OAC Title 252 Chapter 100 Subchapter 39, Sections 4, 16, 40, and 41. The revisions corrected errors and made these sections of the Oklahoma SIP consistent with EPA's rules. Consistent with the D.C. Circuit's decision in *ODEQ* v. *EPA* and with EPA's October 1, 2020, SAFETEA approval, this portion of the SIP applies in certain areas of Indian country. Under EPA's October 1, 2020 SAFETEA approval, the SIP revisions approved in this rulemaking action will apply to all Indian country within Tulsa and Oklahoma Counties, other than the excluded Indian country lands, as described above. Because—per the State's request under SAFETEA—EPA's October 1, 2020 approval does not displace any SIP authority previously exercised by the State under the CAA as interpreted in *ODEQ* v. *EPA,* the approved SIP revisions for Oklahoma County and Tulsa County will also apply to any Indian allotments or dependent Indian communities located outside of an Indian reservation over which there has been no demonstration of tribal authority.

[4] EPA's prior approvals relating to Oklahoma's SIP frequently noted that the SIP was not approved to apply in areas of Indian country (consistent with the D.C. Circuit's decision in *ODEQ* v. *EPA*) located in the state. *See, e.g.,* 85 FR 20178, 20180 (April 10, 2020). Such prior expressed limitations are superseded by the EPA's approval of Oklahoma's SAFETEA request.

[5] On December 22, 2021, the EPA proposed to withdraw and reconsider the October 1, 2020, SAFETEA approval. See *https://www.epa.gov/ok/proposed-withdrawal-and-reconsideration-and-supporting-information.* The EPA expects to have further discussions with tribal governments and the State of Oklahoma as part of this reconsideration. The EPA also notes that the October 1, 2020, approval is the subject of a pending challenge in federal court. *Pawnee Nation of Oklahoma* v. *Regan,* No. 20–9635 (10th Cir.). The EPA may make further changes to the approval of Oklahoma's program to reflect the outcome of the proposed withdrawal and reconsideration of the October 1, 2020, SAFETEA approval.

IV. Environmental Justice Considerations

Executive Order 12898 (Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, 59 FR 7629, Feb. 16, 1994) directs Federal agencies to identify and address ''disproportionately high and adverse human health or environmental effects'' of their actions on minority populations and low-income populations to the greatest extent practicable and permitted by law. The EPA defines environmental justice (EJ) as ''the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.'' [6] The EPA further defines the term fair treatment to mean that ''no group of people should bear a disproportionate burden of environmental harms and risks, including those resulting from the negative environmental consequences of industrial, governmental, and commercial operations or programs and policies.'' [7] EPA is providing additional analysis of environmental justice associated with this action. We are doing so for the purpose of providing information to the public, not as a basis of our final action.

EPA reviewed demographic data, which provides an assessment of individual demographic groups of the populations living within the affected Oklahoma and Tulsa counties area.[8] The EPA then compared the data to the national average for each of the demographic groups.[9] The results of the demographic analysis indicate that, for populations within Tulsa and Oklahoma counties, the percent people of color (persons who reported their race as a category other than white alone (not Hispanic or Latino)) is slightly less than the national average for Tulsa County; and slightly more than the national average for Oklahoma County (38 and 44 percent, respectively versus 40 percent). Within people of color, the percent of the population that is Black or African American alone is below the national average for Tulsa County and above the national average for Oklahoma County (10.8 and 15.8 percent, respectively versus 13.4 percent), and the percent of the population that is American Indian/Alaska Native is higher than the national average for both Tulsa and Oklahoma counties (6.9 and 4.4 percent, respectively versus 1.3 percent). The percent of the population that is ''two or more races'' is higher than the national average for both Tulsa and Oklahoma counties (6.2 and 5.4 percent, respectively versus 2.8 percent). The percent of people living below the poverty level in Tulsa and Oklahoma counties is higher than the national average (12.8 and 15.2 percent, respectively versus 11.4 percent). The percent of people over 25 with a high school diploma in Tulsa and Oklahoma counties is similar to the national average (89.9 and 88 percent, respectively versus 88.5 percent), as is the percent with a ''bachelor's degree or higher'' (32 and 33.1 percent, respectively versus 32.9 percent).

The SIP revisions do not appear to have a disproportionately high or adverse human health or environmental effects on communities with EJ concerns as the changes to the Oklahoma SIP will result in updates and clarifications an also further restrict the use of cutback asphalt. Since the use of cutback asphalt is prohibited for a longer period of time each year communities throughout the affected counties will realize benefits.

V. Final Action

We are approving revisions to OAC 252:100–39, Emission of VOCs in Nonattainment Areas and Former Nonattainment Areas, in Section 4 (Exemptions), Section 16 (Petroleum refinery process unit turnaround), Section 40 (Cutback asphalt), and Section 41 (Storage, loading and transport/delivery of VOCs) as submitted to us by a letter dated May 7, 2020 (Submittal). The submittal covers Oklahoma's 2019 regulatory update. This action is being taken under section 110 of the Act.

VI. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference the revisions to the Oklahoma regulations, as described in the Final Action section above. The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* (please contact the person identified in the **FOR FURTHER**

INFORMATION CONTACT section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated in the next update to the SIP compilation.

VII. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

This approval of revisions to the Oklahoma SIP will apply to certain areas of Indian country in Tulsa and Oklahoma Counties, as discussed in the preamble, and therefore has tribal implications as specified in E.O. 13175 (65 FR 67249, November 9, 2000). However, this action will neither impose substantial direct compliance costs on federally recognized tribal governments, nor preempt tribal law. This action will not impose substantial direct compliance costs on federally recognized tribal governments because no actions will be required of tribal governments. This action will also not preempt tribal law as no Oklahoma tribe implements a regulatory program under the CAA, and thus does not have applicable or related tribal laws. Consistent with the EPA Policy on Consultation and Coordination with Indian Tribes (May 4, 2011), the EPA offered consultation to tribal governments that may be affected by this action. EPA received no comments or requests for consultation from tribal governments.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 27, 2022. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 20, 2022.

Earthea Nance,

Regional Administrator, Region 6.

For the reasons stated in the preamble, the Environmental Protection Agency amends 40 CFR part 52 as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart LL—Oklahoma

■ 2. In § 52.1920 in paragraph (c) amend the table ''EPA APPROVED OKLAHOMA REGULATIONS'' by revising the entries for ''252:100–39–4,'' ''252:100–39–16,'' ''252:100–39–40,'' and ''252:100–39–41'' to read as follows.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2021–0623; FRL–8997–02–R9]

Air Plan Approval; Arizona, California, Nevada; Emissions Statements Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions, under the Clean Air Act (CAA or ''Act''), to portions of the Arizona, California, and Nevada State Implementation Plans (SIPs) regarding emissions statements (ES) requirements for the 2015 ozone national ambient air quality standards (NAAQS). We are also taking final action to approve ES certifications (''certifications'') adopted by various California air districts that existing SIP-approved rules are adequate to meet the ES requirements for the 2015 ozone NAAQS. In addition, we are finalizing our proposal that the following Arizona, California, and Nevada nonattainment areas (NAAs) meet the ES requirements for the 2015 ozone NAAQS: Phoenix-Mesa, Yuma, Amador County, Butte County, Imperial County, Los Angeles-San Bernardino Counties (West Mojave Desert), Los Angeles-South Coast Air Basin, Nevada County (Western part), Riverside County (Coachella Valley), Sacramento Metro, San Diego County, San Francisco Bay Area, San Joaquin Valley, San Luis Obispo (Eastern part), Sutter Buttes, Tuolumne County, Ventura County, and Las Vegas. We are also finalizing our proposal that two NAAs meet requirements for prior ozone NAAQS. Lastly, we are finalizing our proposal that Maricopa County Air Quality District (MCAQD) Rule 100, section 503, which we approved on February 15, 2022, meets the ES requirements for the 2015 ozone NAAQS.

DATES: This rule is effective August 29, 2022.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2021–0623. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please

contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Sina Schwenk-Mueller, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4100 or by email at *SchwenkMueller.Sina@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

I. Proposed Action

On December 14, 2021 (86 FR 70996), the EPA proposed to approve the following rules into their respective state SIPs.

TABLE 1—SUBMITTED RULES

Agency	Rule No.	Rule title	Adopted/ revised	Submitted	Deemed complete
Arizona Department of Environmental Quality (ADEQ).	Arizona Administrative Code (AAC) R18–2–327.	Annual Emissions Inventory Questionnaire and Emissions Statement.	[a] 12/4/2020	12/22/2020	Complete by Operation of Law (COL), 6/22/2020.
Pinal County Air Quality Control District (AQCD).	Rule 3–1–103	Annual Emissions Inventory Questionnaire and Emissions Statement.	7/1/2020	7/21/2020	COL, 1/21/2021.
Amador Air District	Rule 428	Emissions Statements	3/16/2021	6/10/2021	Letter, 9/25/2021.
Butte County Air Quality Management District (AQMD).	Rule 434	Emissions Statements	6/25/2020	7/27/2020	COL, 1/27/2021.
El Dorado County AQMD	Rule 1000	Emission Statement	8/25/2020	9/22/2020	COL, 3/22/2021.
El Dorado County AQMD	Rule 1000.1 [b]	Emission Statement Waiver	8/25/2020	9/22/2020	COL, 3/22/2021.
Feather River AQMD	Rule 4.8	Further Information	8/3/2020	12/15/2020	COL, 6/15/2021.
Imperial County Air Pollution Control District (APCD).	Rule 116	Emissions Statement and Certification.	11/3/2020	2/19/2021	COL, 8/19/2021.
Placer County APCD	Rule 503	Emission Statement	10/8/2020	12/15/2020	COL, 6/15/2021.
San Luis Obispo County AQMD.	Rule 222	Federal Emission Statement	6/24/2020	7/27/2020	COL, 1/27/2021.
Tuolumne County APCD	Rule 428	Emissions Statements	7/21/2020	8/3/2020	COL, 2/3/2021.
Clark County Division of Air Quality.	Section 12.9.1 [c]	Annual Emissions Statement.	[d] 8/18/2020	10/15/2020	COL, 4/15/2021.

[a] The effectiveness date of this rulemaking is 1/19/2021.
[b] Our proposed action incorrectly listed this rule number as 1001.1. The correct rule number is 1000.1.
[c] NDEP submitted Section 12.9 ''Annual Emissions Statement and Inventory Requirements,'' which includes 12.9.1 ''Annual Emissions Statement'' and 12.9.2 and 12.9.3. On 1/24/2022, NDEP withdrew 12.9.2 and 12.9.3 from SIP consideration.
[d] State effective date.

On December 14, 2021 (86 FR 70996), the EPA proposed to approve the following emissions statements certifications into the California SIP.

TABLE 2—SUBMITTED EMISSIONS STATEMENTS CERTIFICATIONS

[2015 Ozone NAAQS] [1]

Local agency	Existing SIP approved Rule No.	Rule title	Adopted	Submitted	Deemed complete
Antelope Valley AQMD	Rule 107 (2012); 78 FR 21545 (April 11, 2013).	Certification of Submissions and Emission Statements.	7/21/2020	8/3/2020	COL, 2/3/2021.
Mojave Desert AQMD	Rule 107 (1992); 69 FR 29880 (May 26, 2004).	Certification and Emission Statements.	10/28/2019	12/20/2019	COL, 6/20/2020.
Northern Sierra AQMD	Rule 513 (2016); 82 FR 28240 (June 21, 2017) [a].	Emissions Statements and Recordkeeping.	1/25/2021	3/23/2021	COL, 9/23/2021.
Sacramento Metropolitan AQMD.	Rule 105 (1996) 73 FR 32240 (June 6, 2008).	Emissions Statement	7/23/2020	8/3/2020	COL, 2/3/2021.
San Diego County APCD	Rule 19.3 (1996); 65 FR 12472 (March 9, 2000).	Emissions Information	10/14/2020	1/12/2021	COL, 7/12/2021.
San Francisco Bay Area AQMD.	Reg 2—Permits 2–1–429 (2004); 83 FR 23372 (May 21, 2018).	Federal Emissions Statement.	7/15/2020	8/3/2020	COL, 2/3/2021.
San Joaquin Valley APCD	Rule 1160 (1992); 84 FR 3302 (February 12, 2019).	Emissions Statements (1992).	6/18/2020	8/3/2020	COL, 2/3/2021.

[1] All certifications in this table were submitted by the State of California. The ''Adopted'' and ''Submitted'' and ''Deemed Complete'' dates listed in Table 2 refer to those of the certifications.

TABLE 2—SUBMITTED EMISSIONS STATEMENTS CERTIFICATIONS—Continued

[2015 Ozone NAAQS] [1]

Local agency	Existing SIP approved Rule No.	Rule title	Adopted	Submitted	Deemed complete
South Coast AQMD	Rule 301 (2019); 84 FR 52005 (October 1, 2019) [b].	Permitting and Associated Fees (paragraphs (e)(1), except (e)(1)(C), (e)(2), (5), and (8) only).	6/5/2020	8/3/2020	COL, 2/3/2021.
Ventura County APCD	Rule 24 (1992); 65 FR 76567 (December 7, 2000).	Source Recordkeeping, Reporting and Emissions Statements.	7/14/2020	7/29/2020	COL, 1/29/2021.
Yolo-Solano AQMD	Rule 3.18 (1992); 69 FR 29880 (May 26, 2004).	Emissions Statements	9/9/2020	11/2/2020	COL, 5/2/2021.

[a] We note that in our December 11, 2017 action, *Findings of Failure to Submit State Implementation Plan Submittals for the 2008 Ozone National Ambient Air Quality Standards (NAAQS)* (82 FR 58118), we erroneously listed the ''Emission statement'' requirement for Nevada County (Western part) in Table 1—Findings of Failure to Submit Certain Required SIP Elements for 2008 Ozone NAAQS Nonattainment Areas.

[b] South Coast AQMD has jurisdiction over Riverside (Coachella), and Rule 301 applies to both the South Coast Air Basin and the Riverside (Coachella) NAAs.

In addition to the certifications for the 2015 ozone NAAQS, the San Francisco Bay Area AQMD is certifying that Reg 2—Permits 2–1–429 meets section 182(a)(3)(B) requirements for the 1997 and 2008 ozone NAAQS, and the San Diego County APCD is certifying that Rule 19.3 meets section 182(a)(3)(B) requirements for the 2008 ozone NAAQS.

We are finalizing approval of these rules and certifications because we determined that they comply with the relevant CAA requirements. Our proposed action contains more information on our evaluation of the rules and certifications.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received one comment.

Comment: The commenter expresses support for air pollution control and states that it is important that all the listed counties in our proposal maintain stringent emission standards. However, the commenter is concerned that the SIP is not approved to apply on any Indian reservation or in any other area where a tribe has jurisdiction. The commenter worries that this could provide loopholes to pollute on tribal reservations and wants to know if tribes want to be excluded from state emission control measures.

Response: The comment refers to the EPA's statement that ''the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.'' The EPA typically uses such statements in actions regarding state SIP submittals to explain the non-applicability of the SIP in relevant areas of Indian country as a jurisdictional matter. The States of Arizona, California, and Nevada submitted the rules in this action to apply only on lands where the States and relevant local agencies have jurisdiction. Under the Clean Air Act, states generally lack jurisdiction to implement plans over Indian reservations and other areas of Indian country where the EPA or a tribe has demonstrated tribal jurisdiction. For this reason, the EPA typically excludes such areas from its approvals of SIPs. The commenter's concern regarding the inapplicability of the SIP in areas where an Indian tribe has jurisdiction does not bear upon whether the rules that are the subject of our action meet the applicable requirements for approval of a SIP submission. Therefore, we do not find that the comment provides a basis for the EPA to change its assessment of the submitted rules or our proposal to approve them.

III. EPA Action

No comments were submitted that change our assessment of the rules and certifications as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA fully approves the submitted rules and certifications because they fulfill all relevant requirements. We are finalizing our proposed approval that the following 2015 ozone nonattainment areas have met CAA section 182(a)(3)(B) requirements: Phoenix-Mesa, AZ; Yuma, AZ; Amador County, CA; Butte County, CA; Imperial County, CA; Los Angeles-San Bernardino Counties, CA (West Mojave Desert); Los Angeles-South Coast Air Basin, CA; Nevada County (Western part), CA; Riverside County (Coachella Valley) CA; Sacramento Metro, CA; San Diego County, CA; San Francisco Bay Area, CA; San Joaquin Valley, CA; San Luis Obispo (Eastern part), CA; Sutter Buttes, CA; Tuolumne, County, CA; Ventura County, CA; and Las Vegas, NV. We are also finalizing our proposed approval that the San Francisco Bay Area NAA meets the emissions statements requirements for the 1997 and 2008 ozone NAAQS, and the San Diego County NAA meets these requirements for the 2008 ozone NAAQS. Lastly, we are finalizing our proposal that MCAQD Rule 100, section 503, which the EPA finalized in a separate action on February 15, 2022 (87 FR 8418), meets the emissions statements requirements for the 2015 ozone NAAQS.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the California rules described in section I of this preamble and set forth below in the amendments to 40 CFR part 52. For the States of Arizona and Nevada, the rules described in section I of the preamble and set forth below in the amendments to 40 CFR part 52 have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[2] The EPA has made, and will continue to make, these documents available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

[2] 62 FR 27968 (May 22, 1997).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 27, 2022. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 20, 2022.

Kerry Drake,

Acting Regional Administrator, Region IX.

For the reasons stated in the preamble, the Environmental Protection Agency amends Part 52, chapter I, title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart D—Arizona

■ 2. In § 52.120, paragraph (c):

■ a. Amend Table 2 is amended by revising the entry ''R18–2–327''; and

■ b. Amend Table 9 by revising the entry ''3–1–103''.

The revisions read as follows:

§ 52.120 Identification of plan.

* * * * *

(c) * * *

(573) Amended regulations for the following APCDs were submitted on July 27, 2020 by the Governor's designee as an attachment to a letter dated July 23, 2020.

(i) *Incorporation by reference.* (A) Butte County Air Quality Management District.

(*1*) Rule 434, ''Emission Statements,'' amended on June 25, 2020.

(*2*) [Reserved]

(B) San Luis Obispo County Air Pollution Control District.

(*1*) Rule 222, ''Federal Emission Statement,'' revised on June 24, 2020.

(*2*) [Reserved]

(ii) [Reserved]

(574) New and amended regulations and materials for the following APCDs were submitted on August 3, 2020 by the Governor's designee as an attachment to a letter dated August 3, 2020.

(i) *Incorporation by reference.* (A) Tuolumne County Air Pollution Control District.

(*1*) Rule 428, ''Emission Statements,'' adopted on July 21, 2020.

(*2*) [Reserved]

(B) [Reserved]

(ii) *Additional materials.* (A) Antelope Valley Air Quality Management District.

(*1*) ''Emission Statement Certification,'' adopted July 21, 2020.

(*2*) [Reserved]

(B) Sacramento Metropolitan Air Quality Management District.

(*1*) ''Emissions Statements Certification for the 2015 Ozone NAAQS,'' adopted July 23, 2020.

(*2*) [Reserved]

(C) San Francisco Bay Area Air Quality Management District.

(*1*) ''Clean Air Act Emissions Statement Certification,'' adopted July 15, 2020.

(*2*) [Reserved]

(D) San Joaquin Valley Unified Air Pollution Control District.

(*1*) ''Emissions Statement Program Certification for the 2015 8-Hour Ozone Standard,'' adopted June 18, 2020.

(*2*) [Reserved]

(E) South Coast Air Quality Management District.

(*1*) ''Emissions Statement Certification,'' adopted June 5, 2020.

(*2*) [Reserved]

(575) Amended regulations for the following APCDs were submitted on September 22, 2020 by the Governor's designee as an attachment to a letter dated September 18, 2020.

(i) Incorporation by reference.

(A) El Dorado County Air Quality Management District.

(*1*) Rule 1000, ''Emission Statement,'' revised on August 25, 2020.

(*2*) Rule 1000.1, ''Emission Statement Waiver,'' revised on August 25, 2020.

(B) [Reserved]

(ii) [Reserved]

(576) Amended regulations for the following APCDs were submitted on December 15, 2020 by the Governor's designee as an attachment to a letter dated December 14, 2020.

(i) *Incorporation by reference.* (A) Feather River Air Quality Management District.

(*1*) Rule 4.8, ''Further Information,'' amended on August 3, 2020.

(*2*) [Reserved]

(B) Placer County Air Pollution Control District.

(*1*) Rule 503, ''Emission Statement,'' amended on October 8, 2020.

(*2*) [Reserved]

(ii) [Reserved]

(577) Amended regulations for the following APCDs were submitted on June 10, 2021 by the Governor's designee as an attachment to a letter dated June 10, 2021.

(i) Incorporation by reference.

(A) Amador Air District.

(*1*) Rule 428, ''Emissions Statements,'' adopted on March 16, 2021.

(*2*) [Reserved]

(B) [Reserved]

(ii) [Reserved]

(578) The following plan was submitted on December 20, 2019 by the Governor's designee.

(i) [Reserved]

(ii) *Additional materials.* (A) Mojave Desert Air Quality Management District.

(*1*) ''Emission Statement Certification,'' adopted October 28, 2019.

(*2*) [Reserved]

(B) [Reserved]

(579) The following plan was submitted on July 29, 2020 by the Governor's designee.

(i) [Reserved]

(ii) *Additional materials.*(A) Ventura County Air Pollution Control District.

(*1*) ''2020 Emissions Statement Certification for Ventura County, California,'' adopted July 14, 2020.

(*2*) [Reserved]

(B) [Reserved]

(580) The following plan was submitted on November 2, 2020 by the Governor's designee.

(i) [Reserved]

(ii) *Additional materials.* (A) Yolo-Solano Air Quality Management District.

(*1*) ''2015 Federal Ozone Standard Emissions Statement Certification for the Yolo-Solano Air Quality Management District,'' adopted September 9, 2020.

(*2*) [Reserved]

(B) [Reserved]

(581) The following plan was submitted on January 12, 2021 by the Governor's designee.

(i) [Reserved]

(ii) *Additional materials.* (A) San Diego County Air Pollution Control District.

(*1*) ''Emissions Statement Rule Certification,'' adopted October 14, 2020.

(*2*) [Reserved]

(B) [Reserved]

(582) The following plan was submitted on March 23, 2021 by the Governor's designee.

(i) [Reserved]

(ii) *Additional materials.* (A) Northern Sierra Air Quality Management District.

(*1*) ''Certification of Emissions Statements Rule Adequacy,'' adopted January 25, 2021.

(*2*) [Reserved]

(B) [Reserved]

(583) Amended regulations for the following APCD were submitted on February 19, 2021 by the Governor's designee as an attachment to a letter dated February 18, 2021.

(i) *Incorporation by reference.* (A) Imperial County Air Pollution Control District.

(*1*) Rule 116, ''Emissions Statement and Certification,'' revised on November 3, 2020.

(*2*) [Reserved]

(B) [Reserved]

(ii) [Reserved]

Subpart DD—Nevada

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2018–0689; FRL–9654–02–R5]

Air Plan Approval; Minnesota; Approval of Infrastructure SIP Requirements for the 2015 Ozone NAAQS

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving most elements of a State Implementation Plan (SIP) submission from Minnesota regarding the infrastructure requirements of section 110 of the Clean Air Act (CAA) for the 2015 ozone National Ambient Air Quality Standards (NAAQS). The infrastructure requirements are designed to ensure that the structural components of each state's air quality management program are adequate to meet the state's responsibilities under the CAA. EPA proposed this action on May 24, 2022 and received no comments.

DATES: This final rule is effective August 29, 2022.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2018–0689. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through *www.regulations.gov* or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays and facility closures due to COVID–19. We recommend that you telephone Olivia Davidson, Physical Scientist, at (312) 886–0266 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Olivia Davidson, Physical Scientist, Attainment Planning and Maintenance Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–0266, *davidson.olivia@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA.

I. Background Information

On May 24, 2022 (87 FR 31462), EPA proposed to approve most elements of an October 1, 2018, submission from the Minnesota Pollution Control Agency (MPCA) intended to address all applicable infrastructure requirements for the 2015 ozone NAAQS. An explanation of the CAA requirements, a detailed analysis of the revisions, and EPA's reasons for proposing approval were provided in the notice of proposed rulemaking and will not be restated here. The public comment period for this proposed rule ended on June 23, 2022. EPA received no comments on the proposal. Therefore, we are finalizing our action as proposed.

II. Final Action

EPA is approving most elements of a submission from MPCA certifying that its current SIP is sufficient to meet the required infrastructure elements under sections 110(a)(1) and (2) for the 2015 ozone NAAQS. EPA is not acting on the interstate transport requirements of section 110(a)(2)(D)(i)(I) and visibility impairment requirements of section 110(a)(2)(D)(i)(II). EPA's actions for the state's satisfaction of infrastructure SIP requirements, by element of section 110(a)(2), are contained in the table below.

Element	2015 Ozone
(A)—Emission limits and other control measures	A
(B)—Ambient air quality monitoring/data system	A
(C)1—Program for enforcement of control measures	A
(C)2—Minor NSR	A
(C)3—PSD	A
(D)1—I Prong 1: Interstate transport—significant contribution to nonattainment	NA
(D)2—I Prong 2: Interstate transport—interference with maintenance	NA
(D)3—II Prong 3: Interstate transport—interference with PSD	A
(D)4—II Prong 4: Interstate transport—interference with visibility protection	NA
(D)5—Interstate and international pollution abatement	A
(E)1—Adequate resources	A
(E)2—State board requirements	A
(F)—Stationary source monitoring system	A
(G)—Emergency powers	A
(H)—Future SIP revisions	A
(I)—Nonattainment planning requirements of part D	*
(J)1—Consultation with government officials	A
(J)2—Public notification	A
(J)3—PSD	A
(J)4—Visibility protection	*
(K)—Air quality modeling/data	A
(L)—Permitting fees	A
(M)—Consultation/participation by affected local entities	A

In the above table, the key is as follows:

A	Approve.
NA	No Action/Separate Rulemaking.
*	Not germane to infrastructure SIPs.

III. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

This action is subject to the Congressional Review Act, and EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 27, 2022. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 25, 2022.

Debra Shore,

Regional Administrator, Region 5.

For the reasons stated in the preamble, 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 52.1220, the table in paragraph (e) is amended by adding an entry at the end of the table for ''Section 110(a)(2) Infrastructure Requirements for the 2015 Ozone NAAQS'' to read as follows:

§ 52.1220 Identification of plan.

* * * * *

(e) * * *

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2021–0385; FRL–10027–01–OCSPP]

Isofetamid; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of isofetamid in or on multiple commodities discussed later in this document. Interregional Research Project Number 4 (IR–4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective July 29, 2022. Objections and requests for hearings must be received on or before September 27, 2022, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2021–0385, is available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566–1744. For the latest status information on EPA/DC services, docket access, visit *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Marietta Echeverria, Acting Director, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 566–1030; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Office of the Federal Register's e-CFR site at *https://www.ecfr.gov/current/title-40.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2021–0385 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing and must be received by the Hearing Clerk on or before September 27, 2022. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2021–0385, by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *https://www.epa.gov/dockets/where-send-comments-epa-dockets.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of October 21, 2021 (86 FR 58239) (FRL–8792–04–OCSPP), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 1E8913) by IR–4, North Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606. The petition requested to amend 40 CFR part 180.681 to establish tolerances for residues of the fungicide isofetamid, N-[1,1-dimethyl-2-[2-methyl-4-(l-methylethoxy)phenyl]-2-oxoethyl]-3-methyl-2-thiophenecarboxamide including its metabolites and degradates, in or on the raw agricultural commodities ginseng at 3 ppm; individual commodities of Proposed Crop Subgroup 6–XXA: Edible podded bean legume vegetable subgroup at 0.6 ppm; individual commodities of Proposed Crop Subgroup 6–XXB: Edible podded pea legume vegetable subgroup at 1.5 ppm; individual commodities of Proposed Crop Subgroup 6–XXC: Succulent shelled bean subgroup at 0.04 ppm; individual commodities of Proposed Crop Subgroup 6–XXD: Succulent shelled pea subgroup at 0.04 ppm; individual commodities of Proposed Crop Subgroup 6–XXE: Dried shelled bean (except soybean), subgroup at 0.04 ppm; and individual commodities of Proposed Crop Subgroup 6–XXF: Dried shelled pea subgroup at 0.04 ppm. See the October 21, 2021, **Federal Register** notice for the specific commodities. Additionally, the petition requested to remove the established tolerances in or on the raw agricultural commodities: Pea and bean, dried shelled, except soybean, subgroup 6C at 0.040 ppm; Pea and bean, succulent shelled, subgroup 6B at 0.030 ppm; and vegetable, legume, edible podded, subgroup 6A at 1.50 ppm. That document referenced a summary of the petition, which is available in the docket, *https://www.regulations.gov.*

There were no comments received in response to the notice of filing.

Based upon review of the data supporting the petition and in accordance with its authority under FFDCA section 408(d)(4)(A)(i), EPA is modifying the crop group definitions to be consistent with Agency terminology and removing the existing tolerances for Vegetable, legume, edible podded, subgroup 6A; Pea and bean, succulent shelled, subgroup 6B; and Pea and bean, dried shelled, except soybean, subgroup 6C.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . . .''

Consistent with FFDCA section 408(b)(2)(D), and the factors specified therein, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for isofetamid including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with isofetamid follows.

In an effort to streamline its publications in the **Federal Register**, EPA is not reprinting sections that repeat what has been previously published for tolerance rulemaking of the same pesticide chemical. Where scientific information concerning a particular chemical remains unchanged, the content of those sections would not vary between tolerance rulemaking, and EPA considers referral back to those sections as sufficient to provide an explanation of the information EPA considered in making its safety determination for the new rulemaking.

EPA has previously published tolerance rulemakings in 2015 and 2017 in which EPA concluded, based on the available information, that there is a reasonable certainty that no harm would result from aggregate exposure to isofetamid and established tolerances for residues of that pesticide chemical. EPA is incorporating previously published sections from the 2015 and 2017 rulemakings as described further in this rulemaking, as they remain unchanged.

Toxicological profile. For a discussion of the Toxicological Profile of isofetamid, see Unit III.A. of the isofetamid tolerance rulemaking published in the **Federal Register** of July 30, 2015 (80 FR 45438) (FRL–9923–86).

Toxicological points of departure/Levels of concern. For a summary of the Toxicological Points of Departure/Levels of Concern for isofetamid used for human risk assessment, please reference Unit III.B. of the July 30, 2015, rulemaking.

Exposure assessment. EPA's dietary exposure assessments have been updated to include the additional exposure from the new use of isofetamid on ginseng and the crop group expansions to all the individual bean and pea commodities in proposed crop group 6–XX, which is not yet finalized. An acute dietary exposure assessment was not performed as there are no appropriate toxicological effects attributable to a single exposure (dose). An unrefined chronic aggregate dietary (food and drinking water) exposure and risk assessment was conducted using the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM–FCID) Version 4.02. This software uses 2005–2010 food consumption data from the U.S. Department of Agriculture's (USDA's) National Health and Nutrition Examination Survey, What We Eat in America (NHANES/WWEIA). The unrefined chronic dietary exposure assessment used tolerance-level residues and assumed 100 percent crop treated (PCT) for all registered and proposed commodities. Default processing factors were used for all other proposed and registered processed commodities. Exposure to drinking water was incorporated directly into the dietary assessment. A cancer dietary assessment was not conducted because isofetamid is classified as ''not likely to be carcinogenic to humans.''

Drinking water and non-occupational exposures. The previously recommended estimated drinking water concentrations (EDWCs) remain current and are considered protective potential drinking water residue levels anticipated from the proposed tolerance updates. As stated in the July 30, 2015, rulemaking, the chronic dietary exposure and risk assessment incorporate the highest total estimated drinking water concentrations (EDWC) of 110 parts per billion directly into this dietary assessment. The residential exposure assessment has not changed since the June 14, 2017, rulemaking (82 FR 27149) (FRL–9961–80) because there are no proposed new residential uses. For a summary of the residential exposure analysis for isofetamid used for the human risk assessment, please reference Unit III.C.3. of the June 14, 2017, rulemaking.

Cumulative exposure. Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.'' Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding for isofetamid and any other substances and isofetamid does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has not assumed that isofetamid has a common mechanism of toxicity with other substances.

Safety factor for infants and children. EPA continues to conclude that there are reliable data to support the reduction of the Food Quality Protection Act (FQPA) safety factor from 10X to 1X. See Unit III.D. of the July 30, 2015, rulemaking for a discussion of the Agency's rationale for that determination.

Aggregate risks and determination of safety. EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute population-adjusted dose (aPAD) and chronic population-adjusted dose (cPAD). Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate points of departure to ensure that an adequate margin of exposure (MOE) exists. For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure.

An acute dietary exposure assessment was not performed as there were no appropriate toxicological effects

attributable to a single exposure (dose) observed in available oral toxicity studies, including maternal toxicity in the developmental toxicity studies. Chronic dietary risks are below the Agency's level of concern of 100% of the cPAD; they are 4.0% of the cPAD for children 1 to 2 years old, the group with the highest exposure. The combined short-term food, water, and residential exposures result in an aggregate MOE of 670 for children 1 to 2 years old. This MOE is greater than the level of concern of 100 and is therefore not of concern. Isofetamid is classified as ''Not Likely to Be Carcinogenic to Humans''; therefore, EPA does not expect isofetamid exposures to pose an aggregate cancer risk.

Therefore, based on the risk assessments and information described above, EPA concludes there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to isofetamid residues. More detailed information on this action can be found in the document titled ''Isofetamid. Human Health Risk Assessment for the Petition to Establish Permanent Tolerances and Associated Section 3 Registration for Residues Resulting from Proposed Use on Ginseng and for Crop Group Conversions and Expansions.'' in docket ID EPA–HQ–OPP–2021–0385.

IV. Other Considerations

A. Analytical Enforcement Methodology

For a discussion of the available analytical enforcement method, see Unit IV.A. of the July 30, 2015, rulemaking.

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4).

There are no Codex MRLs for isofetamid in or on ginseng. Presently, there are Codex MRLs established for residues of isofetamid on edible podded beans and peas at 0.6 ppm and on dry beans and peas at 0.09 ppm. The U.S. tolerances of 0.6 ppm for the commodities in the proposed edible podded bean legume subgroup are harmonized with the Codex MRL for edible podded beans. The U.S. tolerances for the edible podded pea commodities at 1.5 ppm are not harmonized with the lower Codex MRL of 0.6 ppm. Harmonization with Codex is not possible for the commodities in the proposed edible podded pea legume vegetable subgroup because decreasing the U.S. tolerance could cause U.S. growers to have violative residues despite legal use of isofetamid according to the label. EPA considered harmonizing the tolerances for dried bean and dried pea commodities with the Codex MRL, but rather elected to be consistent with the Canadian MRL.

V. Conclusion

Therefore, tolerances are established for residues of isofetamid in or on Bean, adzuki, dry seed at 0.04 ppm; Bean, American potato, dry seed at 0.04 ppm; Bean, asparagus, dry seed at 0.04 ppm; Bean, asparagus, edible podded at 0.6 ppm; Bean, black, dry seed at 0.04 ppm; Bean, broad, dry seed at 0.04 ppm; Bean, broad, succulent shelled at 0.04 ppm; Bean, catjang, dry seed at 0.04 ppm; Bean, catjang, edible podded at 0.6 ppm; Bean, catjang, succulent shelled at 0.04 ppm; Bean, cranberry, dry seed at 0.04 ppm; Bean, dry, dry seed at 0.04 ppm; Bean, field, dry seed at 0.04 ppm; Bean, French, dry seed at 0.04 ppm; Bean, French, edible podded at 0.6 ppm; Bean, garden, dry seed at 0.04 ppm; Bean, garden, edible podded at 0.6 ppm; Bean, goa, dry seed at 0.04 ppm; Bean, goa, edible podded at 0.6 ppm; Bean, goa, succulent shelled at 0.04 ppm; Bean, great northern, dry seed at 0.04 ppm; Bean, green, dry seed at 0.04 ppm; Bean, green, edible podded at 0.6 ppm; Bean, guar, dry seed at 0.04 ppm; Bean, guar, edible podded at 0.6 ppm; Bean, kidney, dry seed at 0.04 ppm; Bean, kidney, edible podded at 0.6 ppm; Bean, lablab, dry seed at 0.04 ppm; Bean, lablab, edible podded at 0.6 ppm; Bean, lablab, succulent shelled at 0.04 ppm; Bean, lima, dry seed at 0.04 ppm; Bean, lima, succulent shelled at 0.04 ppm; Bean, morama, dry seed at 0.04 ppm; Bean, moth, dry seed at 0.04 ppm; Bean, moth, edible podded at 0.6 ppm; Bean, moth, succulent shelled at 0.04 ppm; Bean, mung, dry seed at 0.04 ppm; Bean, mung, edible podded at 0.6 ppm; Bean, navy, dry seed at 0.04 ppm; Bean, navy, edible podded at 0.6 ppm; Bean, pink, dry seed at 0.04 ppm; Bean, pinto, dry seed at 0.04 ppm; Bean, red, dry seed at 0.04 ppm; Bean, rice, dry seed at 0.04 ppm; Bean, rice, edible podded at 0.6 ppm; Bean, scarlet runner, dry seed at 0.04 ppm; Bean, scarlet runner, edible podded at 0.6 ppm; Bean, scarlet runner, succulent shelled at 0.04 ppm; Bean, snap, edible podded at 0.6 ppm; Bean, sword, dry seed at 0.04 ppm; Bean, sword, edible podded at 0.6 ppm; Bean, tepary, dry seed at 0.04 ppm; Bean, urd, dry seed at 0.04 ppm; Bean, urd, edible podded at 0.6 ppm; Bean, wax, edible podded at 0.6 ppm; Bean, wax, succulent shelled at 0.04 ppm; Bean, yardlong, dry seed at 0.04 ppm; Bean, yardlong, edible podded at 0.6 ppm; Bean, yellow, dry seed at 0.04 ppm; Chickpea, dry seed at 0.04 ppm; Chickpea, edible podded at 1.5 ppm; Chickpea, succulent shelled at 0.04 ppm; Cowpea, dry seed at 0.04 ppm; Cowpea, edible podded at 0.6 ppm; Cowpea, succulent shelled at 0.04 ppm; Edible podded pea, edible podded at 1.5 ppm; Ginseng at 3 ppm; Gram, horse, dry seed at 0.04 ppm; Grass pea, dry seed at 0.04 ppm; Grass pea, edible podded at 1.5 ppm; Jackbean, dry seed at 0.04 ppm; Jackbean, edible podded at 0.6 ppm; Jackbean, succulent shelled at 0.04 ppm; Lentil, dry seed at 0.04 ppm; Lentil, edible podded at 1.5 ppm; Lentil, succulent shelled at 0.04 ppm; Longbean, Chinese, dry seed at 0.04 ppm; Longbean, Chinese, edible podded at 0.6 ppm; Lupin, Andean, dry seed at 0.04 ppm; Lupin, Andean, succulent shelled at 0.04 ppm; Lupin, blue, dry seed at 0.04 ppm; Lupin, blue, succulent shelled at 0.04 ppm; Lupin, grain, dry seed at 0.04 ppm; Lupin, grain, succulent shelled at 0.04 ppm; Lupin, sweet white, dry seed at 0.04 ppm; Lupin, sweet white, succulent shelled at 0.04 ppm; Lupin, sweet, dry seed at 0.04 ppm; Lupin, sweet, succulent shelled at 0.04 ppm; Lupin, white, dry seed at 0.04 ppm; Lupin, white, succulent shelled at 0.04 ppm; Lupin, yellow, dry seed at 0.04 ppm; Lupin, yellow, succulent shelled at 0.04 ppm; Pea, blackeyed, succulent shelled at 0.04 ppm; Pea, crowder, dry seed at 0.04 ppm; Pea, crowder, succulent shelled at 0.04 ppm; Pea, dry, dry seed at 0.04 ppm; Pea, dwarf, edible podded at 1.5 ppm; Pea, English, succulent shelled at 0.04 ppm; Pea, field, dry seed at 0.04 ppm; Pea, garden, dry seed at 0.04 ppm; Pea, garden, succulent shelled at 0.04 ppm; Pea, green, dry seed at 0.04 ppm; Pea, green, edible podded at 1.5 ppm; Pea, green, succulent shelled at 0.04 ppm; Pea, pigeon, dry seed at 0.04 ppm; Pea, pigeon, edible podded at 1.5 ppm; Pea, pigeon, succulent shelled at 0.04 ppm; Pea, snap, edible podded at 1.5 ppm; Pea, snow, edible podded at 1.5 ppm; Pea, southern, succulent shelled at 0.04 ppm; Pea, sugar snap, edible podded at 1.5 ppm; Pea, winged, dry seed at 0.04 ppm; Pea, winged, edible podded at 0.6 ppm; Soybean, vegetable, dry seed at 0.04 ppm; Soybean, vegetable, edible podded at 0.6 ppm; Soybean, vegetable, succulent shelled at 0.04 ppm; Velvetbean, dry seed at 0.04 ppm; Velvetbean, edible podded at 0.6 ppm; Velvetbean, succulent shelled at 0.04

ppm; and Yam bean, African, dry seed at 0.04 ppm.

Additionally, the existing tolerances on Vegetable, legume, edible podded, subgroup 6A; Pea and bean, succulent shelled, subgroup 6B; and Pea and bean, dried shelled, except soybean, subgroup 6C are removed as unnecessary since they are covered by the new tolerances established in this rulemaking.

VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), or to Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal Governments, on the relationship between the National Government and the States or Tribal Governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian Tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides, and pests, Reporting and recordkeeping requirements.

Dated: July 21, 2022.

Marietta Echeverria,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter 1 as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1.The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Amend § 180.681 by revising the table in paragraph (a) to read as follows:

§ 180.681 Isofetamid; tolerances for residues.

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

42 CFR Part 418

[CMS–1773–F]

RIN 0938–AU83

Medicare Program; FY 2023 Hospice Wage Index and Payment Rate Update and Hospice Quality Reporting Requirements

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Final rule.

SUMMARY: This rule updates the hospice wage index, payment rates, and aggregate cap amount for Fiscal Year (FY) 2023. This final rule establishes a permanent mitigation policy to smooth the impact of year-to-year changes in hospice payments related to changes in the hospice wage index. In addition, this rule updates the Hospice Quality Reporting Program (HQRP) and discusses further development of the Hospice Outcomes and Patient Evaluation (HOPE) assessment instrument; updates the Quality Measures (QMs) that will be in effect in FY 2023 for the HQRP and future QMs; updates the Consumer Assessment of Healthcare Providers and Systems, Hospice Survey Mode Experiment, discusses a request for information on health equity, and updates the hospice survey and enforcement procedures.

DATES: These regulations are effective on October 1, 2022.

FOR FURTHER INFORMATION CONTACT:

For general questions about hospice payment policy, send your inquiry via email to: *hospicepolicy@cms.hhs.gov.*

For questions regarding the CAHPS® Hospice Survey, contact Lori Teichman at (410) 786–6684 and Lauren Fuentes at (410) 786–2290.

For questions regarding the hospice quality reporting program, contact Cindy Massuda at (410) 786–0652.

For information regarding the hospice special focus program, send your inquiry via email to *QSOG_hospice@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Executive Summary

This final rule updates the hospice wage index, hospice payment rates, and aggregate cap amount for FY 2023, as required under section 1814(i) of the Social Security Act (the Act). This rule also finalizes the permanent mitigation policy to smooth the impact of year-to-year changes in hospice payments related to changes in the hospice wage index. In addition, in this final rule, CMS discusses updates to the Hospice Quality Reporting Program (HQRP) that include the Hospice Outcomes and Patient Evaluation (HOPE) with national beta testing; the Consumer Assessment of Healthcare Providers and Systems (CAHPS) Hospice Survey with Star Ratings; developing a web-based survey; Public Reporting; a request for information that builds from last year's discussion on health equity, updates on advancing a health information exchange, and updates on hospice survey and enforcement procedures.

II. Background

A. Hospice Care

Hospice care is a comprehensive, holistic approach to treatment that

recognizes the impending death of a terminally ill individual and warrants a change in the focus from curative care to palliative care for relief of pain and for symptom management. Medicare regulations define ''palliative care'' as patient and family-centered care that optimizes quality of life by anticipating, preventing, and treating suffering. Palliative care throughout the continuum of illness involves addressing physical, intellectual, emotional, social, and spiritual needs and to facilitate patient autonomy, access to information, and choice (42 CFR 418.3). Palliative care is at the core of hospice philosophy and care practices, and is a critical component of the Medicare hospice benefit.

The goal of hospice care is to help terminally ill individuals continue life with minimal disruption to normal activities while remaining primarily in the home environment. A hospice uses an interdisciplinary approach to deliver medical, nursing, social, psychological, emotional, and spiritual services through a collaboration of professionals and other caregivers, with the goal of making the beneficiary as physically and emotionally comfortable as possible. Hospice provides compassionate beneficiary and family/caregiver-centered care for those who are terminally ill.

As referenced in our regulations at § 418.22(b)(1), to be eligible for Medicare hospice services, the patient's attending physician (if any) and the hospice medical director must certify that the individual is ''terminally ill,'' as defined in section 1861(dd)(3)(A) of the Act and our regulations at § 418.3; that is, the individual has a medical prognosis that his or her life expectancy is 6 months or less if the illness runs its normal course. The regulations at § 418.22(b)(2) require that clinical information and other documentation that support the medical prognosis accompany the certification and be filed in the medical record with it. Additionally, the regulations at § 418.22(b)(3) require that the certification and recertification forms include a brief narrative explanation of the clinical findings that support a life expectancy of 6 months or less.

Under the Medicare hospice benefit, once a terminally ill patient elects to receive hospice care, a hospice interdisciplinary group (IDG) is essential in ensuring the provision of primarily home-based services, keeping the choices of the patient and family first and foremost. The hospice IDG works with the beneficiary, family, and caregiver(s) to develop a coordinated, comprehensive care plan; reduce unnecessary diagnostics or ineffective therapies; and maintain ongoing communication with individuals and their families about changes in their condition and care. The beneficiary's care plan will shift over time to meet the changing needs of the individual, family, and caregiver(s) as the individual approaches the end of life.

If, in the judgment of the hospice IDG, which includes the hospice physician, the patient's symptoms cannot be effectively managed at home, then the patient is eligible for general inpatient care (GIP), a more medically intense level of care. GIP must be provided in a Medicare-certified hospice freestanding facility, skilled nursing facility, or hospital. GIP is provided to ensure that any new or worsening symptoms are intensively addressed so that the beneficiary can return to their home and continue to receive routine home care (RHC). Limited, short-term, intermittent, inpatient respite care (IRC) is also available to provide relief for the family or other caregivers, or when the family or other caregivers are absent. Additionally, an individual can receive continuous home care (CHC) during a period of crisis, in which an individual requires continuous care to achieve palliation or management of acute medical symptoms so that the individual can remain at home. CHC may be covered for as much as 24 hours a day, and these periods must be predominantly nursing care, in accordance with the regulations at § 418.204. A minimum of 8 hours of nursing care, or nursing and aide care, must be furnished on a particular day to qualify for the CHC rate (§ 418.302(e)(4)).

Hospices must comply with applicable civil rights laws,[1] including section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act, under which covered entities must take appropriate steps to ensure effective communication with patients and patient care representatives with disabilities, including the provisions of auxiliary aids and services. In addition, they must take reasonable steps to ensure meaningful access for individuals with limited English proficiency, consistent with Title VI of the Civil Rights Act of 1964. Further information about these requirements may be found at: *http://www.hhs.gov/ocr/civilrights.*

[1] Hospices are also subject to additional Federal civil rights laws, including the Age Discrimination Act, Section 1557 of the Affordable Care Act, and conscience and religious freedom laws.

B. Services Covered by the Medicare Hospice Benefit

Coverage under the Medicare hospice benefit requires that hospice services must be reasonable and necessary for the palliation and management of the terminal illness and related conditions. Section 1861(dd)(1) of the Act establishes the services that are to be rendered by a Medicare-certified hospice program. These covered services include: nursing care; physical therapy; occupational therapy; speech-language pathology therapy; medical social services; home health aide services (called hospice aide services); physician services; homemaker services; medical supplies (including drugs and biologicals); medical appliances; counseling services (including dietary counseling); short-term inpatient care in a hospital, nursing facility, or hospice inpatient facility (including both respite care and procedures necessary for pain control and acute or chronic symptom management); continuous home care during periods of crisis, and only as necessary to maintain the terminally ill individual at home; and any other item or service, which is specified in the plan of care and for which payment may otherwise be made under Medicare in accordance with Title XVIII of the Act.

Section 1814(a)(7)(B) of the Act requires that a written plan for providing hospice care to a beneficiary who is a hospice patient be established before care is provided by, or under arrangements made by, the hospice program; and that the written plan be periodically reviewed by the beneficiary's attending physician (if any), the hospice medical director, and an interdisciplinary group (section 1861(dd)(2)(B) of the Act). The services offered under the Medicare hospice benefit must be available to beneficiaries as needed, 24 hours a day, 7 days a week (section 1861(dd)(2)(A)(i) of the Act).

Upon the implementation of the hospice benefit, the Congress also expected hospices to continue to use volunteer services, though Medicare does not pay for these volunteer services (section 1861(dd)(2)(E) of the Act). As stated in the FY 1983 Hospice Wage Index and Rate Update proposed rule (48 FR 38149), the hospice must have an interdisciplinary group composed of paid hospice employees as well as hospice volunteers, and that ''the hospice benefit and the resulting Medicare reimbursement is not intended to diminish the voluntary spirit of hospices.'' This expectation supports the hospice philosophy of community based, holistic,

comprehensive, and compassionate end of life care.

C. Medicare Payment and Quality for Hospice Care

Sections 1812(d), 1813(a)(4), 1814(a)(7), 1814(i), and 1861(dd) of the Act, and the regulations in 42 CFR part 418, establish eligibility requirements, payment standards and procedures; define covered services; and delineate the conditions a hospice must meet to be approved for participation in the Medicare program. Part 418, subpart G, provides for a per diem payment based on one of four prospectively-determined rate categories of hospice care (RHC, CHC, IRC, and GIP), based on each day a qualified Medicare beneficiary is under hospice care (once the individual has elected). This per diem payment is meant to cover all of the hospice services and items needed to manage the beneficiary's care, as required by section 1861(dd)(1) of the Act.

While recent news reports [2] have brought to light the potential role hospices could play in medical aid in dying (MAID) where such practices have been legalized in certain states, we wish to remind hospices that the Assisted Suicide Funding Restriction Act of 1997 (Pub. L. 105–12) prohibits the use of Federal funds to provide or pay for any health care item or service or health benefit coverage for the purpose of causing, or assisting to cause, the death of any individual including mercy killing, euthanasia, or assisted suicide. This means that while payments made to hospices are to cover all items, services, and drugs for the palliation and management of the terminal illness and related conditions, Federal funds cannot be used for the prohibited activities, even in the context of a per diem payment. However, the prohibition does not pertain to the provision of an item or service for the purpose of alleviating pain or discomfort, even if such use may increase the risk of death, so long as the item or service is not furnished for the specific purpose of causing or accelerating death.

1. Omnibus Budget Reconciliation Act of 1989

Section 6005(a) of the Omnibus Budget Reconciliation Act of 1989 (Pub. L. 101–239) amended section 1814(i)(1)(C) of the Act and provided changes in the methodology concerning updating the daily payment rates based on the hospital market basket percentage increase applied to the payment rates in effect during the previous Federal fiscal year.

2. Balanced Budget Act of 1997

Section 4441(a) of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) established that updates to the hospice payment rates beginning FY 2002 and in subsequent FYs are to be the hospital market basket percentage increase for the current FY. Section 4442 of the BBA amended section 1814(i)(2) of the Act, effective for services furnished on or after October 1, 1997, to require that hospices submit claims for payment for hospice care furnished in an individual's home only on the basis of the geographic location at which the service is furnished. Previously, local wage index values were applied based on the geographic location of the hospice provider, regardless of where the hospice care was furnished. Section 4443 of the BBA amended sections 1812(a)(4) and 1812(d)(1) of the Act to provide for hospice benefit periods of two 90-day periods, followed by an unlimited number of 60-day periods.

3. FY 1998 Hospice Wage Index Final Rule

The FY 1998 Hospice Wage Index final rule (62 FR 42860) implemented a new methodology for calculating the hospice wage index and instituted an annual Budget Neutrality Adjustment Factor (BNAF) so aggregate Medicare payments to hospices would remain budget neutral to payments calculated using the 1983 wage index.

4. FY 2010 Hospice Wage Index Final Rule

The FY 2010 Hospice Wage Index and Rate Update final rule (74 FR 39384) instituted an incremental 7-year phase-out of the BNAF beginning in FY 2010 through FY 2016. The BNAF phase-out reduced the amount of the BNAF increase applied to the hospice wage index value, but was not a reduction in the hospice wage index value itself or in the hospice payment rates.

5. The Affordable Care Act

Starting with FY 2013 (and in subsequent FYs), the market basket percentage update under the hospice payment system referenced in sections 1814(i)(1)(C)(ii)(VII) and 1814(i)(1)(C)(iii) of the Act are subject to annual reductions related to changes in economy-wide productivity, as specified in section 1814(i)(1)(C)(iv) of the Act.

In addition, sections 1814(i)(5)(A) through (C) of the Act, as added by section 3132(a) of the Patient Protection and Affordable Care Act (PPACA) (Pub. L. 111–148), required hospices to begin submitting quality data, based on measures specified by the Secretary of the Department of Health and Human Services (the Secretary) for FY 2014 and subsequent FYs. Since FY 2014, hospices that fail to report quality data have their market basket percentage increase reduced by 2 percentage points. Note that with the passage of the Consolidated Appropriations Act, 2021 (hereafter referred to as CAA 2021) (Pub. L. 116–260), the reduction changes to 4 percentage points beginning in FY 2024.

Section 1814(a)(7)(D)(i) of the Act, as added by section 3132(b)(2) of the PPACA, required, effective January 1, 2011, that a hospice physician or nurse practitioner have a face-to-face encounter with the beneficiary to determine continued eligibility of the beneficiary's hospice care prior to the 180th day recertification and each subsequent recertification, and to attest that such visit took place. When implementing this provision, the Centers for Medicare & Medicaid Services (CMS) finalized in the FY 2011 Hospice Wage Index final rule (75 FR 70435) that the 180th day recertification and subsequent recertifications would correspond to the beneficiary's third or subsequent benefit periods. Further, section 1814(i)(6) of the Act, as added by section 3132(a)(1)(B) of the PPACA, authorized the Secretary to collect additional data and information determined appropriate to revise payments for hospice care and other purposes. The types of data and information suggested in the ACA could capture accurate resource utilization, which could be collected on claims, cost reports, and possibly other mechanisms, as the Secretary determined to be appropriate. The data collected could be used to revise the methodology for determining the payment rates for RHC and other services included in hospice care, no earlier than October 1, 2013, as described in section 1814(i)(6)(D) of the Act. In addition, CMS was required to consult with hospice programs and the Medicare Payment Advisory Commission (MedPAC) regarding additional data collection and payment revision options.

6. FY 2012 Hospice Wage Index Final Rule

In the FY 2012 Hospice Wage Index final rule (76 FR 47308 through 47314) we announced that beginning in 2012, the hospice aggregate cap would be calculated using the patient-by-patient proportional methodology, within certain limits. Existing hospices had the

[2] Nelson, R., Should Medical Aid in Dying Be Part of Hospice Care? Medscape Nurses. February 26, 2020. *https://www.medscape.com/viewarticle/925769#vp_1.*

option of having their cap calculated through the original streamlined methodology, also within certain limits. As of FY 2012, new hospices have their cap determinations calculated using the patient-by-patient proportional methodology. If a hospice's total Medicare payments for the cap year exceed the hospice aggregate cap, then the hospice must repay the excess back to Medicare.

7. IMPACT Act of 2014

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) (Pub. L. 113–185) became law on October 6, 2014. Section 3(a) of the IMPACT Act mandated that all Medicare certified hospices be surveyed every 3 years beginning April 6, 2015 and ending September 30, 2025. In addition, section 3(c) of the IMPACT Act requires medical review of hospice cases involving beneficiaries receiving more than 180 days of care in select hospices that show a preponderance of such patients; section 3(d) of the IMPACT Act contains a new provision mandating that the cap amount for accounting years that end after September 30, 2016, and before October 1, 2025 be updated by the hospice payment percentage update rather than using the consumer price index for urban consumers (CPI–U) for medical care expenditures.

8. FY 2015 Hospice Wage Index and Payment Rate Update Final Rule

The FY 2015 Hospice Wage Index and Rate Update final rule (79 FR 50452) finalized a requirement that the Notice of Election (NOE) be filed within 5 calendar days after the effective date of hospice election. If the NOE is filed beyond this 5-day period, hospice providers are liable for the services furnished during the days from the effective date of hospice election to the date of NOE filing (79 FR 50474). As with the NOE, the claims processing system must be notified of a beneficiary's discharge from hospice or hospice benefit revocation within 5 calendar days after the effective date of the discharge/revocation (unless the hospice has already filed a final claim) through the submission of a final claim or a Notice of Termination or Revocation (NOTR).

The FY 2015 Hospice Wage Index and Rate Update final rule (79 FR 50479) also finalized a requirement that the election form include the beneficiary's choice of attending physician and that the beneficiary provide the hospice with a signed document when he or she chooses to change attending physicians.

In addition, the FY 2015 Hospice Wage Index and Rate Update final rule (79 FR 50496) provided background, described eligibility criteria, identified survey respondents, and otherwise implemented the Hospice Experience of Care Survey for informal caregivers. Hospice providers were required to begin using this survey for hospice patients as of 2015.

Finally, the FY 2015 Hospice Wage Index and Rate Update final rule required providers to complete their aggregate cap determination not sooner than 3 months after the end of the cap year, and not later than 5 months after, and remit any overpayments. Those hospices that fail to submit their aggregate cap determinations on a timely basis will have their payments suspended until the determination is completed and received by the Medicare contractor (79 FR 50503).

9. FY 2016 Hospice Wage Index and Payment Rate Update Final Rule

In the FY 2016 Hospice Wage Index and Rate Update final rule (80 FR 47142), CMS finalized two different payment rates for RHC: a higher per diem base payment rate for the first 60 days of hospice care and a reduced per diem base payment rate for subsequent days of hospice care. CMS also finalized a service intensity add-on (SIA) payment payable for certain services during the last 7 days of the beneficiary's life. A service intensity add-on payment will be made for the social worker (SW) visits and nursing visits provided by a registered nurse (RN), when provided during routine home care in the last 7 days of life. The SIA payment is in addition to the routine home care rate. The SIA payment is provided for visits of a minimum of 15 minutes and a maximum of 4 hours per day (80 FR 47172).

In addition to the hospice payment reform changes discussed, the FY 2016 Hospice Wage Index and Rate Update final rule implemented changes mandated by the IMPACT Act, in which the cap amount for accounting years that end after September 30, 2016 and before October 1, 2025 would be updated by the hospice payment update percentage rather than using the CPI–U (80 FR 47186). In addition, we finalized a provision to align the cap accounting year for both the inpatient cap and the hospice aggregate cap with the FY for FY 2017 and thereafter. Finally, the FY 2016 Hospice Wage Index and Rate Update final rule (80 FR 47144) clarified that hospices would have to report all diagnoses on the hospice claim as a part of the ongoing data collection efforts for possible future hospice payment refinements.

10. FY 2017 Hospice Wage Index and Payment Rate Update Final Rule

In the FY 2017 Hospice Wage Index and Rate Update final rule (81 FR 52160), CMS finalized several new policies and requirements related to the HQRP. First, CMS codified the policy that if the National Quality Forum (NQF) made non-substantive changes to specifications for HQRP measures as part of the NQF's re-endorsement process, CMS would continue to utilize the measure in its new endorsed status, without going through new notice-and-comment rulemaking. CMS would continue to use rulemaking to adopt substantive updates made by the NQF to the endorsed measures adopted for the HQRP; determinations about what constitutes a substantive versus non-substantive change would be made on a measure-by-measure basis. Second, we finalized two new quality measures for the HQRP for the FY 2019 payment determination and subsequent years: (1) Hospice Visits when Death is Imminent Measure Pair; and (2) Hospice and Palliative Care Composite Process Measure-Comprehensive Assessment at Admission (81 FR 52173). The data collection mechanism for both of these measures is the Hospice Item Set (HIS), and the measures were effective April 1, 2017. Regarding the CAHPS® Hospice Survey, CMS finalized a policy that hospices that receive their CMS Certification Number (CCN) after January 1, 2017 for the FY 2019 Annual Payment Update (APU) and January 1, 2018 for the FY 2020 APU will be exempted from the Hospice CAHPS® requirements due to newness (81 FR 52182). The exemption is determined by CMS and is only for 1 year.

11. FY 2020 Hospice Wage Index and Payment Rate Update Final Rule

In the FY 2020 Hospice Wage Index and Rate Update final rule (84 FR 38484), we finalized rebased payment rates for CHC and GIP and set those rates equal to their average estimated FY 2019 costs per day. We also rebased IRC per diem rates equal to the estimated FY 2019 average costs per day, with a reduction of 5 percent to the FY 2019 average cost per day to account for coinsurance. We finalized the FY 2020 proposal to reduce the RHC payment rates by 2.72 percent to offset the increases to CHC, IRC, and GIP payment rates to implement this policy in a budget-neutral manner in accordance with section 1814(i)(6) of the Act (84 FR 38496).

In addition, we finalized a policy to use the current year's pre-floor, pre-reclassified hospital inpatient wage index as the wage adjustment to the labor portion of the hospice rates. Finally, in the FY 2020 Hospice Wage Index and Rate Update final rule (84 FR 38505), we finalized modifications to the hospice election statement content requirements at § 418.24(b), and added a requirement for hospices, upon request, to furnish an election statement addendum effective beginning in FY 2021. The addendum must list items, services, and drugs the hospice has determined to be unrelated to the terminal illness and related conditions, to increase coverage transparency for beneficiaries under a hospice election.

12. Consolidated Appropriations Act, 2021

Division CC, section 404 of the CAA 2021 amended section 1814(i)(2)(B) of the Act and extended the provision that currently mandates the hospice cap be updated by the hospice payment update percentage (hospital market basket update reduced by the productivity adjustment) rather than the CPI–U for accounting years that end after September 30, 2016 and before October 1, 2030. Prior to enactment of this provision, the hospice cap update was set to revert to the original methodology of updating the annual cap amount by the CPI–U beginning on October 1, 2025. Division CC, section 407(b) of CAA 2021 revised section 1814(i)(5)(A)(i) to increase the payment reduction for hospices who fail to meet hospice quality measure reporting requirements from 2 percentage points to 4 percentage points beginning with FY 2024.

13. FY 2022 Hospice Wage Index and Payment Rate Update Final Rule

In the FY 2022 Hospice Wage Index and Rate Update final rule (86 FR 42532 through 42539), we finalized a policy to rebase and revise the labor shares for CHC, RHC, IRC and GIP using Medicare cost report (MCR) data for freestanding hospices (collected via CMS Form 1984–14, OMB NO. 0938–0758) for 2018. We established separate labor shares for CHC, RHC, IRC, and GIP based on the calculated compensation cost weights for each level of care from the 2018 MCR data. The revised labor shares were implemented in a budget neutral manner through the use of labor share standardization factors.

In the FY 2022 final rule, we removed the seven original Hospice Item Set (HIS) measures from the program because a more broadly applicable measure (across settings, populations, or conditions) for the particular topic is available and already publicly reported. The Hospice Comprehensive Assessment Measure, NQF #3235, is one measure that is calculated and rolled up by completion of the seven individual measures. This measure helps to ensure all hospice patients receive a holistic comprehensive assessment. Also, in or after May 2022, we will start publicly reporting the two new claims-based measures. Specifically, this includes the: (1) Hospice Visits in the Last Days of Life (HVLDL) (which replaces the HIS Hospice Visits when Death is Imminent measure pair); and (2) Hospice Care Index (HCI) that includes 10 indicators that collectively represent different aspects of hospice care and aim to convey a comprehensive characterization of the quality of care furnished by a hospice throughout the hospice stay. Related to these changes, we finalized reporting eight quarters of claims data in order to display small providers. We finalized the public reporting of Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Hospice Survey Star ratings on Care Compare to begin no sooner than FY 2022.

III. Analysis of and Responses to Public Comments

We received approximately 73 comments from stakeholders including national hospice associations, state associations, hospices, health systems, electronic health record vendors, and individuals. We reviewed each commenter's letter and grouped related comments. Some comments were identical. After associating like comments, we placed them in categories based on subject matter or based on the section(s) of the regulation affected. Summaries of the public comments received and our responses to those comments are provided in the appropriate sections in the preamble of this final rule.

IV. Provisions of the Final Rule

A. FY 2023 Hospice Wage Index and Rate Update

1. FY 2023 Hospice Wage Index

The hospice wage index is used to adjust payment rates for hospices under the Medicare program to reflect local differences in area wage levels, based on the location where services are furnished. The hospice wage index utilizes the wage adjustment factors used by the Secretary for purposes of section 1886(d)(3)(E) of the Act for hospital wage adjustments. Our regulations at § 418.306(c) require each labor market to be established using the most current hospital wage data available, including any changes made by the Office of Management and Budget (OMB) to the Metropolitan Statistical Areas (MSAs) definitions.

In general, OMB issues major revisions to statistical areas every 10 years, based on the results of the decennial census. However, OMB occasionally issues minor updates and revisions to statistical areas in the years between the decennial censuses. On March 6, 2020, OMB issued Bulletin No. 20–01, which provided updates to and superseded OMB Bulletin No. 18–04 that was issued on September 14, 2018. The attachments to OMB Bulletin No. 20–01 provided detailed information on the update to statistical areas since September 14, 2018, and were based on the application of the 2010 Standards for Delineating Metropolitan and Micropolitan Statistical Areas to Census Bureau population estimates for July 1, 2017 and July 1, 2018. (For a copy of this bulletin, we refer readers to the following website: *https://www.whitehouse.gov/wp-content/uploads/2020/03/Bulletin-20-01.pdf.* In OMB Bulletin No. 20–01, OMB announced one new Micropolitan Statistical Area, one new component of an existing Combined Statistical Area (CSA), and changes to New England City and Town Area (NECTA) delineations. In the FY 2021 Hospice Wage Index final rule (85 FR 47070) we stated that if appropriate, we would propose any updates from OMB Bulletin No. 20–01 in future rulemaking. After reviewing OMB Bulletin No. 20–01, we determined that the changes in Bulletin 20–01 encompassed delineation changes that would not affect the Medicare wage index for FY 2022. Specifically, the updates consisted of changes to NECTA delineations and the redesignation of a single rural county into a newly created Micropolitan Statistical Area. The Medicare wage index does not utilize NECTA definitions, and, as most recently discussed in the FY 2021 Hospice Wage Index final rule (85 FR 47070), we include hospitals located in Micropolitan Statistical areas in each state's rural wage index.

In the FY 2020 Hospice Wage Index final rule (84 FR 38484), we finalized the proposal to use the current FY's hospital wage index data to calculate the hospice wage index values. In the FY 2021 Hospice Wage Index final rule (85 FR 47070), we adopted the revised OMB delineations with a 5-percent cap on wage index decreases, where the estimated reduction in a geographic area's wage index would be capped at 5-percent in FY 2021 and no cap would be applied to wage index decreases for

the second year (FY 2022). For FY 2023, the final hospice wage index will be based on the FY 2023 hospital pre-floor, pre-reclassified wage index for hospital cost reporting periods beginning on or after October 1, 2018 and before October 1, 2019 (FY 2019 cost report data). The final FY 2023 hospice wage index will not take into account any geographic reclassification of hospitals, including those in accordance with section 1886(d)(8)(B) or 1886(d)(10) of the Act. The FY 2023 hospice wage index will include a 5-percent cap on wage index decreases, as discussed later in this section. The appropriate wage index value would be applied to the labor portion of the hospice payment rate based on the geographic area in which the beneficiary resides when receiving RHC or CHC. The appropriate wage index value is applied to the labor portion of the payment rate based on the geographic location of the facility for beneficiaries receiving GIP or IRC.

In the FY 2006 Hospice Wage Index final rule (70 FR 45135), we adopted the policy that, for urban labor markets without a hospital from which hospital wage index data could be derived, all of the CBSAs within the state would be used to calculate a statewide urban average pre-floor, pre-reclassified hospital wage index value to use as a reasonable proxy for these areas. For FY 2023, the only CBSA without a hospital from which hospital wage data can be derived is 25980, Hinesville-Fort Stewart, Georgia. The FY 2023 final wage index value for Hinesville-Fort Stewart, Georgia is 0.8628.

There exist some geographic areas where there were no hospitals, and thus, no hospital wage data on which to base the calculation of the hospice wage index. In the FY 2008 Hospice Wage Index final rule (72 FR 50217 through 50218), we implemented a methodology to update the hospice wage index for rural areas without hospital wage data. In cases where there was a rural area without rural hospital wage data, we use the average pre-floor, pre-reclassified hospital wage index data from all contiguous CBSAs, to represent a reasonable proxy for the rural area. The term ''contiguous'' means sharing a border (72 FR 50217). Currently, the only rural area without a hospital from which hospital wage data could be derived is Puerto Rico. However, for rural Puerto Rico, we would not apply this methodology due to the distinct economic circumstances that exist there (for example, due to the close proximity of almost all of Puerto Rico's various urban areas to non-urban areas, this methodology would produce a wage index for rural Puerto Rico that is higher than that in half of its urban areas); instead, we would continue to use the most recent wage index previously available for that area. For FY 2023, we proposed to continue using the most recent pre-floor, pre-reclassified hospital wage index value available for Puerto Rico, which is 0.4047, subsequently adjusted by the hospice floor.

As described in the August 8, 1997 Hospice Wage Index final rule (62 FR 42860), the pre-floor and pre-reclassified hospital wage index is used as the raw wage index for the hospice benefit. These raw wage index values are subject to application of the hospice floor to compute the hospice wage index used to determine payments to hospices. As previously discussed, the pre-floor, pre-reclassified hospital wage index values below 0.8 will be further adjusted by a 15 percent increase subject to a maximum wage index value of 0.8. For example, if County A has a pre-floor, pre-reclassified hospital wage index value of 0.3994, we would multiply 0.3994 by 1.15, which equals 0.4593. Since 0.4593 is not greater than 0.8, then County A's hospice wage index would be 0.4593. In another example, if County B has a pre-floor, pre-reclassified hospital wage index value of 0.7440, we would multiply 0.7440 by 1.15, which equals 0.8556. Because 0.8556 is greater than 0.8, County B's hospice wage index would be 0.8.

The final hospice wage index applicable for FY 2023 (October 1, 2022 through September 30, 2023) is available on the CMS website at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/Hospice/Hospice-Wage-Index.html.*

We received 8 comments on the proposed FY 2023 hospice wage index from various stakeholders including hospices and national industry associations. A summary of these comments and our responses to those comments are as follows:

Comment: A few commenters expressed concerns regarding the CBSA designation of Montgomery County, Maryland and its associated wage index value. These commenters stated that hospices in Montgomery County, Maryland are at a disadvantage because they are not included in the Washington-Arlington-Alexandria, DC-VA-MD-WV CBSA (CBSA 47894). Two commenters requested that CMS reconsider the Frederick-Gaithersburg-Rockville, Maryland metropolitan division to resolve the hospice payment inequity in Montgomery County. Another commenter recommended three possible solutions to resolve the wage index issue they believe exists in Montgomery County, Maryland. These recommended solutions include: CMS assigning the District of Columbia (DC) hospice wage index valuation to the Montgomery/Frederick County CBSA; CMS assigning the highest wage index valuation from among the MSAs' metropolitan divisions, also known as CBSAs, for the purpose of hospice Medicare reimbursement; CMS pursuing either option for a time limited period, such as 5 years, in order to evaluate the impact on Montgomery County hospices.

Response: We thank the commenters for these recommendations. However, we have used CBSAs for determining hospice payments since FY 2006, and continue to believe that the OMB's geographic area delineations represent a useful proxy for differentiating between labor markets and that the geographic area delineations are appropriate for use in determining Medicare hospice payments. CBSAs provide a uniform and consistent basis for determining statistical area delineations, based on long-standing statistical standards maintained by OMB. Further, OMB conducts periodic review of the standards to ensure their continued usefulness and relevance. Additionally, other provider types, such as Inpatient Prospective Payment System (IPPS) hospitals, home health agencies (HHAs), skilled nursing facilities (SNFs), inpatient rehabilitation facilities (IRFs), and dialysis facilities, all use CBSAs to define their labor market areas. Therefore, we believe it is important to apply this method consistently among providers. Using the most current OMB delineations provides an accurate representation of geographic variation in wage levels; therefore, we do not believe it would be appropriate to allow hospices to be assigned a higher CBSA designation or to allow a 5-year limited increase in hospice wage index payments for hospices only in the Montgomery County Metropolitan Divisions. However, if Montgomery County is ever redesignated into CBSA 47894, we would propose this change in future rulemaking consistent with our longstanding approach of adopting OMB statistical area delineations outlined in the most recent OMB bulletins.

Comment: One commenter stated that the pre-floor, pre-reclassified hospital wage index is inadequate for adjusting hospice and home health costs, particularly in states that have the nation's highest labor costs. The commenter stated that these costs will never be adequately addressed if CMS continues to use the pre-floor, pre-reclassified hospital wage index to

adjust hospice and home health costs. Several commenters recommended more far-reaching revisions and reforms to the wage index methodology used under Medicare fee-for-service, such as instituting a policy that no hospice be paid below the rural floor for their state or considering a rural floor for hospices that exceed a 3 percent or greater gap between their urban versus average rural rate. Other commenters recommended that CMS allow hospices and other post-acute providers to utilize a reclassification board similar to hospitals. Another commenter suggested that CMS revisit MedPAC's 2007 proposal, which recommended that the Congress repeal the existing hospital wage index statute, including reclassifications and exceptions, and give the Secretary authority to establish new wage index systems.

Response: We appreciate the commenters' recommendations; however, these comments are outside the scope of the proposed rule. Any changes regarding the adjustment of the hospice payments to account for geographic wage differences, beyond the wage index proposals discussed in the FY 2023 Hospice Wage Index and Rate Update proposed rule, would have to go through notice and comment rulemaking. While CMS and other interested parties, such as MedPAC, have explored potential alternatives to the current CBSA-based labor market system, no consensus has been achieved regarding how best to implement a replacement system. We believe that in the absence of hospice specific wage data, using the pre-floor, pre-reclassified hospital wage data is appropriate and reasonable for hospice payments.

Additionally, the regulations that govern hospice payment do not provide a mechanism for allowing hospices to seek geographic reclassification or to utilize the rural floor provisions that exist for IPPS hospitals. The reclassification provision found in section 1886(d)(10) of the Act is specific to hospitals. Section 4410(a) of the Balanced Budget Act of 1997 (Pub. L. 105–33) provides that the area wage index applicable to any hospital that is located in an urban area of a state may not be less than the area wage index applicable to hospitals located in rural areas in that state. This rural floor provision is also specific to hospitals. Because the reclassification provision and the hospital rural floor applies only to hospitals, and not to hospices, we continue to believe the use of the pre-floor and pre-reclassified hospital wage index results is the most appropriate adjustment to the labor portion of the hospice payment rates. This position is longstanding and consistent with other Medicare payment systems (for example, SNF PPS, IRF PPS, and HH PPS). However, the hospice wage index does include the hospice floor which is applicable to all CBSAs, both rural and urban. The hospice floor adjusts pre-floor, pre-reclassified hospital wage index values below 0.8 by a 15 percent increase subject to a maximum wage index value of 0.8.

Final Decision: We are finalizing our proposal to use the FY 2023 pre-floor, pre-reclassified hospital wage index data as the basis for the FY 2023 hospice wage index. The wage index applicable for FY 2023 is available on our website at *https://www.cms.gov/Medicare/Medicare-Fee-for-ServicePayment/Hospice/Hospice-Wage-Index.* The hospice wage index for FY 2023 is effective October 1, 2022 through September 30, 2023.

2. Permanent Cap on Wage Index Decreases

As discussed in this section, we have proposed and finalized temporary transition policies in the past to mitigate significant changes to payments due to changes to the hospice wage index. Specifically, in the FY 2016 Hospice Wage Index and Payment Rate Update final rule (80 FR 47142) we implemented a 50/50 blend for all geographic areas consisting of the wage index values using the then-current OMB area delineations and the wage index values using OMB's new area delineations based on OMB Bulletin No. 13–01. In the FY 2021 Hospice Wage Index final rule (85 FR 47070), we adopted the revised OMB delineations with a 5-percent cap on wage index decreases, where the estimated reduction in a geographic area's wage index would be capped at 5-percent in FY 2021 and no cap would be applied to wage index decreases for the second year (FY 2022). As explained, we believed the 5-percent cap would provide greater transparency and be administratively less complex than the prior methodology of applying a 50/50 blended wage index. We noted that this transition approach struck an appropriate balance by providing a transition period to mitigate the resulting short-term instability and negative impacts on providers and time for them to adjust to their new labor market area delineations and wage index values.

In the FY 2022 Hospice Wage Index and Payment Rate Update final rule (86 FR 42541), a few commenters stated that providers should be protected against substantial payment reductions due to dramatic reductions in wage index values from one year to the next. Because we did not propose to modify the transition policy that was finalized in the FY 2021 Hospice final rule, we did not extend the transition period for FY 2022. In the FY 2022 Hospice final rule, we stated that we continued to believe that applying the 5-percent cap transition policy in year one provided an adequate safeguard against any significant payment reductions associated with the adoption of the revised CBSA delineations in FY 2021, allowed for sufficient time to make operational changes for future FYs, and provided a reasonable balance between mitigating some short-term instability in hospice payments and improving the accuracy of the payment adjustment for differences in area wage levels. However, we acknowledged that certain changes to wage index policy may significantly affect Medicare payments. In addition, we reiterated that our policy principles with regard to the wage index include generally using the most current data and information available and providing that data and information, as well as any approaches to addressing any significant effects on Medicare payments resulting from these potential scenarios, in notice and comment rulemaking. With these policy principles in mind, we considered for the FY 2023 Hospice proposed rule how best to address the potential scenarios about which commenters raised concerns; that is, scenarios in which changes to wage index policy may significantly affect Medicare payments.

In the past, we have established transition policies of limited duration to phase in significant changes to labor market areas. In taking this approach in the past, we sought to mitigate short term instability and fluctuations that can negatively impact providers due to wage index changes. In accordance with the requirement of our regulations at § 418.306(c) each labor market is established using the most current hospital wage data available, including any changes made by the OMB to the Metropolitan Statistical Areas (MSAs) definitions. We have previously stated that, because the wage index is a relative measure of the value of labor in prescribed labor market areas, we believe it is important to implement new labor market area delineations with as minimal a transition as is reasonably possible. However, we recognize that changes to the wage index have the potential to create instability and significant negative impacts on certain providers even when labor market areas do not change. In addition, year-to-year fluctuations in an area's wage index can

occur due to external factors beyond a provider's control, such as the COVID–19 public health emergency (PHE), and for an individual provider, these fluctuations can be difficult to predict. We also recognize that predictability in Medicare payments is important to enable providers to budget and plan their operations.

In light of these considerations, for FY 2023 and subsequent years, we proposed to apply a permanent 5-percent cap on any decrease to a geographic area's wage index from its wage index in the prior year, regardless of the circumstances causing the decline. That is, we proposed that a geographic area's wage index for FY 2023 would not be less than 95 percent of its final wage index for FY 2022, regardless of whether the geographic area is part of an updated CBSA, and that for subsequent years, a geographic area's wage index would not be less than 95 percent of its wage index calculated in the prior FY. We further proposed that if a geographic area's prior FY wage index is calculated based on the 5-percent cap, then the following year's wage index would not be less than 95 percent of the geographic area's capped wage index in the prior FY. For example, if a geographic area's wage index for FY 2023 is calculated with the application of the 5-percent cap, then its wage index for FY 2024 would not be less than 95 percent of its capped wage index in FY 2023. Likewise, we proposed to make the corresponding regulations text changes at § 418.306(c) as follows: starting on October 1, 2022, CMS applies a cap on decreases to the hospice wage index such that the wage index applied to a geographic area is not less than 95 percent of the wage index applied to that geographic area in the prior FY. This 5-percent cap on negative wage index changes would be implemented in a budget neutral manner through the use of wage index standardization factors. Furthermore, the 5-percent cap would be applied after the application of the hospice wage index floor. Therefore, pre-floor, pre-reclassified hospital wage index values below 0.8 would be adjusted by the 15 percent increase, subject to a maximum wage index value of 0.8. If there is a 5-percent decrease from the previous FY's wage index value after the application of the hospice wage index floor, then the 5-percent cap on wage index decreases would also be applied. We stated that we believe that applying a 5-percent cap on all wage index decreases, from the prior year, would have a small overall impact on the labor market area wage index system. We estimate that applying a 5-percent cap on all wage index decreases, from the prior year, will have a very small effect on the wage index budget standardization factors for FY 2023. Because the wage index is a measure of the value of labor (wage and wage-related costs) in a prescribed labor market area relative to the national average, we anticipate that most providers will not experience year-to-year wage index declines greater than 5-percent in any given year. We believe that applying a 5-percent cap on all wage index decreases, from the prior year, would continue to maintain the accuracy of the overall labor market area wage index system.

In section III.A.4 of this final rule, we estimate the impact to payments for providers in FY 2023 based on this final policy. We also note that we would examine the effects of this policy on an ongoing basis in the future in order to assess its appropriateness.

We received 23 comments on the proposed permanent cap on wage index decreases. A summary of these comments and our responses to those comments are as follows:

Comment: The majority of commenters expressed support for the proposal to cap wage index decreases at 5 percent.

Response: We thank the commenters for their support of the proposed wage index cap policy.

Comment: MedPAC expressed support for the wage index cap proposal, but recommended that the 5-percent cap also extend to wage index increases of more than 5 percent, such that no geographic area would have its wage index value increase or decrease by more than 5 percent in any given year. In addition, MedPAC recommended that the implementation of the revised relative wage index values (where changes are limited to plus or minus 5 percent) should be done in a budget-neutral manner.

Response: We appreciate MedPAC's suggestion that the cap on wage index changes of more than 5 percent should also be applied to increases in the wage index. However, as we discussed in the proposed rule, one purpose of the proposed policy is to help mitigate the significant negative impacts of certain wage index changes. As we noted in the FY 2023 Hospice proposed rule (87 FR 19447), we believe applying a 5-percent cap on all wage index decreases would support increased predictability about hospice payments for providers, enabling them to more effectively budget and plan their operations. That is, we proposed to cap decreases because we believe that a provider would be able to more effectively budget and plan when there is predictability about its expected minimum level of hospice payments in the upcoming fiscal year. We did not propose to limit wage index increases because we do not believe such a policy would enable hospices to more effectively budget and plan their operations. Rather, we believe it would be more appropriate to allow providers that would experience an increase in their wage index value to receive the full benefit of their increased wage index value.

Comment: A few commenters recommended lowering the threshold percentage of the cap to percentages ranging from 2 percent to 4 percent. In general, these commenters believe that a more gradual approach to lowering the cap would better allow hospices to plan their operations. One commenter stated that lowering the threshold of the wage index cap would protect hospice providers who are already operating with negative operating margins and still experiencing multiple negative consequences due to the COVID pandemic, such has increased costs and loss of staff. Another commenter recommended that CMS finalize the permanent cap on hospice wage index decreases to 2 percent in a non-budget neutral way.

Response: We believe that the 5-percent cap on wage index decreases is an adequate safeguard against any significant payment reductions and that lowering the cap on wage index decreases below 5 percent is not appropriate. We also believe that 5 percent is a reasonable level for the cap because it would more effectively mitigate any significant decreases in a hospice's wage index for future FYs, while still balancing the importance of ensuring that area wage index values accurately reflect relative differences in area wage levels. Additionally, we believe that a 5-percent cap on wage index decreases in FY 2023 and beyond is sufficient and provides a degree of predictability in payment changes for providers; and it would not be appropriate to implement the cap policy in a non-budget neutral manner. Our longstanding policy is to apply the wage index standardization factors to hospice payments to eliminate the aggregate effect of wage index updates and revisions, such as updates in the underlying hospital wage data as well as other proposed wage index policies, resulting in any wage index changes being budget-neutral in the aggregate. In the FY 2023 hospice proposed rule (87 FR 19448), we stated that we believe that applying a 5-percent cap on all wage index decreases, from the prior year, would have a small overall impact

on the labor market area wage index system. We estimate that applying a 5-percent cap on all wage index decreases, from the prior year, will have a very small effect on the wage index budget standardization factors for FY 2023 and we expect the impact to the wage index budget neutrality factor in future years will continue to be minimal.

Comment: A few commenters requested a temporary transition policy for providers that saw decreases in their FY 2022 wage indexes. Several commenters recommended CMS adopt a transition policy that treats affected hospice providers' FY 2023 wage index as if a 5-percent cap had also been implemented for FY 2022, while other commenters requested that CMS retroactively apply the permanent wage index cap proposal to FY 2022 payments.

Response: We thank commenters for these recommendations. In FY 2021 rulemaking, CMS proposed and finalized the one-year transition policy for FY 2021 only. We have historically implemented 1-year transitions, as discussed in the FY 2006 (70 FR 45137) and FY 2016 (80 FR 47142) final rules, to address CBSA changes due to substantial updates to OMB delineations. Our policy principles with regard to the wage index are to use the most current data and information available. Therefore, we proposed that the FY 2023 Hospice wage index policy would be prospective to mitigate any significant decreases beginning in FY 2023, not retroactively.

As such, we did not calculate or propose the FY 2023 wage index as if the cap was in place for 2022. We note that we received comments on the FY 2022 proposed rule requesting an extension to the one-year transition policy for FY 2021; however, because we did not propose this policy, or the wage index standardization factors that we would have anticipated such a potential policy proposal to require in the FY 2023 proposed rule, we did not propose a policy that treats affected hospice providers' FY 2023 wage index as if a 5-percent cap had also been implemented for FY 2022, or include any data and information that warrant the use of a cap for FY 2022 data in order to calculate the FY 2023 wage index. While such a policy may benefit some providers, it would change the wage index standardization factors, and would impact the FY 2023 payment rates for all providers without allowing them the opportunity to comment.

Final Decision: CMS is finalizing for FY 2023 and subsequent years the application of a permanent 5-percent cap on any decrease to a geographic area's wage index from its wage index in the prior year, regardless of the circumstances causing the decline. That is, we are finalizing our policy that a geographic area's wage index for FY 2023 would not be less than 95 percent of its final wage index for FY 2022, regardless of whether the geographic area is part of an updated CBSA, and that for subsequent years, a geographic area's wage index would not be less than 95 percent of its wage index calculated in the prior FY. We are codifying the permanent cap on wage index decreases in regulation at § 418.306(c).

As previously discussed, we believe this methodology will maintain the hospice wage index as a relative measure of the value of labor in prescribed labor market areas, increase predictability of hospice payments for providers, and mitigate instability and significant negative impacts to providers resulting from significant changes to the wage index. In section X of this final rule, we estimate the impact to payments for providers in FY 2023 based on this policy. We also note that we will examine the effects of this policy on an ongoing basis in the future in order to assess its appropriateness.

3. FY 2023 Hospice Payment Update Percentage

Section 4441(a) of the BBA (Pub. L. 105–33) amended section 1814(i)(1)(C)(ii)(VI) of the Act to establish updates to hospice rates for FYs 1998 through 2002. Hospice rates were to be updated by a factor equal to the inpatient hospital market basket percentage increase set out under section 1886(b)(3)(B)(iii) of the Act, minus 1 percentage point. Payment rates for FYs since 2002 have been updated according to section 1814(i)(1)(C)(ii)(VII) of the Act, which states that the update to the payment rates for subsequent FYs must be the inpatient market basket percentage increase for that FY. In the FY 2022 IPPS final rule CMS finalized the proposal to rebase and revise the IPPS market baskets to reflect a 2018 base year. We refer readers to the FY 2022 IPPS final rule for further information (86 FR 45194 through 45208).

Section 3401(g) of the Affordable Care Act mandated that, starting with FY 2013 (and in subsequent FYs), the hospice payment update percentage would be annually reduced by changes in economy-wide productivity as specified in section 1886(b)(3)(B)(xi)(II) of the Act. The statute defines the productivity adjustment to be equal to the 10-year moving average of changes in annual economy-wide private nonfarm business multifactor productivity (MFP) as projected by the Secretary for the 10-year period ending with the applicable FY, year, cost reporting period, or other annual period) (the ''productivity adjustment''). The United States Department of Labor's Bureau of Labor Statistics (BLS) publishes the official measures of productivity for the United States economy. We note that previously the productivity measure referenced in section 1886(b)(3)(B)(xi)(II) was published by BLS as private nonfarm business multifactor productivity. Beginning with the November 18, 2021 release of productivity data, BLS replaced the term ''multifactor productivity'' with ''total factor productivity'' (TFP). BLS noted that this is a change in terminology only and will not affect the data or methodology. As a result of the BLS name change, the productivity measure referenced in section 1886(b)(3)(B)(xi)(II) of the Act is now published by BLS as ''private nonfarm business total factor productivity.'' However, as mentioned, the data and methods are unchanged. We refer readers to *http://www.bls.gov* for the BLS historical published TFP data. A complete description of IGI's TFP projection methodology is available on the CMS website at *https://www.cms.gov/Research-Statistics-Data-and-Systems/Statistics-Trends-and-Reports/MedicareProgramRatesStats/MarketBasketResearch.* In addition, in the FY 2022 IPPS final rule (86 FR 45214), we noted that beginning with FY 2022, CMS changed the name of this adjustment to refer to it as the ''productivity adjustment'' rather than the ''MFP adjustment''.

In the FY 2023 Hospice Wage Index and Payment Rate Update proposed rule (87 FR 19448), we proposed a hospice market basket increase of 3.1 percent for FY 2023 using the most current estimate of the inpatient hospital market basket (based on IHS Global Inc.'s fourth quarter 2021 forecast with historical data through the third quarter 2021). Due to the requirements at sections 1886(b)(3)(B)(xi)(II) and 1814(i)(1)(C)(v) of the Act, the proposed inpatient hospital market basket update for FY 2023 of 3.1 percent was reduced by a productivity adjustment as mandated by the Affordable Care Act (estimated in the proposed rule to be 0.4 percentage point for FY 2023). Therefore, the proposed hospice payment update percentage for FY 2023 was 2.7 percent.

We stated that if more recent data became available after the publication of the proposed rule and before the publication of the final rule (for example, more recent estimates of the

inpatient hospital market basket update and productivity adjustment), we would use such data, if appropriate, to determine the hospice payment update percentage for FY 2023 in the final rule. For this final rule, based on IHS Global Inc.'s (IGI) second quarter 2022 forecast with historical data through the first quarter 2022 of the inpatient hospital market basket update, the market basket percentage increase for FY 2023 is 4.1 percent. The productivity adjustment for FY 2023, based on IGI's second quarter 2022 forecast, is 0.3 percent. Therefore, the hospice payment update percentage for FY 2023, based on more recent data, is 3.8 percent.

We continue to believe it is appropriate to routinely update the hospice payment system so that it reflects the best available data about differences in patient resource use and costs among hospices as required by the statute. Therefore, we proposed to: (1) update hospice payments using the methodology outlined and apply the 2018-based IPPS market basket update for FY 2023 of 4.1 percent, reduced by the statutorily required productivity adjustment of 0.3 percentage point along with the wage index budget neutrality adjustment to update the payment rates; and (2) use the FY 2023 hospice wage index which uses the FY 2023 pre-floor, pre-reclassified IPPS hospital wage index as its basis.

In the FY 2022 Hospice Wage Index final rule (86 FR 42532 through 42539), we rebased and revised the labor shares for RHC, CHC, GIP and IRC using MCR data for freestanding hospices (CMS Form 1984–14, OMB Control Number 0938–0758) from 2018. The current labor portion of the payment rates are: for RHC, 66.0 percent; for CHC, 75.2 percent; for GIP, 63.5 percent; and for IRC, 61.0 percent. The non-labor portion is equal to 100 percent minus the labor portion for each level of care. The non-labor portion of the payment rates are as follows: for RHC, 34.0 percent; for CHC, 24.8 percent; for GIP, 36.5 percent; and for IRC, 39.0 percent.

We received 28 comments on the proposed hospice update percentage of 2.7 percent. A summary of the comments and our responses to those comments are as follows:

Comment: One commenter expressed support for the 2.7 percent payment update and the 2-percentage point reduction for hospices that do not provide quality data.

Response: We thank the commenter for their support of the hospice payment update percentage.

Comment: MedPAC stated that while the commission recognizes that CMS is required by statute to propose an increase to the FY 2023 base rates by 2.7 percent, they recommend no update to the FY 2022 payment rates for FY 2023 (that is, hold the payment rates for FY 2023 at the FY 2022 levels).

Response: We thank the commission for their recommendation; however, we are statutorily required to update the payment rates for FY 2023 and do not have the authority to hold the payment rates to FY 2022 levels. Section 1814(i)(1)(C)(iii) of the Act requires the Secretary, for years subsequent to the first FY in which payment revisions described in paragraph (6)(D) are implemented, to update the payment rates by the market basket percentage increase (as defined in section 1886(b)(3)(B)(iii)) of the Act for the FY; section 1814(i)(1)(C)(iv)(I) of the Act requires that subsequent to such increase, the payment rates be reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act.

Comment: Many commenters expressed concerns about the proposed 2.7 percent payment rate update, especially when the 2 percent sequestration resumes in July 2022. Commenters stated hospice providers have incurred increased costs due to inflation and a health care workforce shortage, which is driving up the cost to hire and retain qualified staff. Several commenters stated hospices have also continued to incur costs to address the COVID–19 PHE, including for personal protective equipment and other infection control efforts. Several commenters noted the increase in gas prices and its impact on hospices, given the preponderance of home-based care delivery.

Several commenters noted that CMS stated that if more recent data became available after the publication of the proposed rule and before the publication of the final rule, it would consider such data to determine the hospice payment update percentage for FY 2023 in the final rule. They encouraged CMS to review the data carefully and exercise its flexibilities to more accurately determine adjustments to the hospice payment rates to account for inflation, ensuring adequate reimbursement.

Other commenters encouraged CMS to finalize a payment rate increase reflective of the current cost of care recommending that CMS pursue all possible administrative options available and provide a higher payment update for FY 2023. One commenter stated that to the extent CMS is restricted by statutory formulas for updating hospice payments, they recommend CMS work with the Congress to effectuate a higher, more sustainable hospice payment update percentage for FY 2023. Several commenters stated that if CMS is considering other alternatives to the hospital rate update that would take into account costs and challenges due to the COVID–19 PHE and inflation, then CMS should consider applying these same updates to the hospice rates. Commenters also requested CMS examine trends relative to IHS Global Inc.'s forecasts to determine whether more recently available data used for the final FY 2023 rule would result in a higher market basket update and determine whether additional updates could be made during the course of FY 2023 to provide additional support to hospice and other providers.

Response: Section 1814(i)(1)(C) of the Act, requires hospice payment rates be updated by the inpatient hospital market basket update and reduced by a productivity adjustment as mandated by the Affordable Care Act.

As described in the FY 2022 IPPS final rule (86 FR 45194 through 45214), the IPPS market basket is a fixed-weight, Laspeyres-type index that measures price changes over time of the mix of goods and services that hospitals purchase (hospital inputs) to furnish inpatient care. It would not reflect increases in costs associated with changes in the volume or intensity of input goods and services. As such, the IPPS market basket update would reflect the prospective price pressures described by the commenters as increasing during a high inflation period (such as faster wage growth or higher energy prices), but would not reflect other factors that might increase the level of costs, such as the quantity of labor used.

We agree with the commenters that recent higher inflationary trends have impacted the outlook for price growth over the next several quarters. At the time of the FY 2023 hospice proposed rule, based on IHS Global Inc. fourth quarter 2021 forecast with historical data through third quarter 2021, IHS Global Inc. forecasted the 2018-based IPPS market basket update of 3.1 percent for FY 2023 reflecting forecasted compensation price growth of 3.8 percent (by comparison, compensation price growth in the IPPS market basket averaged 2.1 percent over the 2012–2021 time period). In the FY 2023 Hospice proposed rule, we proposed that if more recent data became available, we would use such data, if appropriate, to derive the final FY 2023 hospice payment update for the final rule. For this final rule, we now have an updated forecast of the price proxies

underlying the market basket that incorporates more recent historical data and reflects a revised outlook regarding the United States economy and expected price inflation for FY 2023 for IPPS hospitals. Based on the IHS Global Inc. second quarter 2022 forecast with historical data through first quarter 2022, we are projecting a FY 2023 IPPS market basket update of 4.1 percent (reflecting forecasted compensation price growth of 4.8 percent) and productivity adjustment of 0.3 percentage point. Therefore, for FY 2023 a final hospice payment update of 3.8 percent (4.1 percent less 0.3 percentage point) will be applicable, compared to 2.7 percent as proposed. We note that the final FY 2023 IPPS market basket growth rate of 4.1 percent would be the highest market basket update implemented in an IPPS final rule going back to FY 1998.

Comment: A few commenters requested that CMS consider updating the base year for the hospital IPPS market basket from the current base year of 2018 to a more current base year. The commenter stated that this update will more accurately reflect the cost structure of hospital IPPS during the pandemic for inflationary adjustments to be applied against within the hospice wage index formula. One commenter noted that while they recognize that more recent final data may not yet be available, it should be clear that providers' cost structures have changed since 2018, including changes in operations that have been required as a result of the COVID–19 PHE.

Response: The CMS market baskets are fixed-weight, Laspeyres-type indexes in that they measure ''pure'' price changes only. Any changes in the quantity or mix of goods and services (that is, intensity) purchased over time are not measured. Changes in quantity or mix of goods and services do eventually get incorporated into the market basket cost weights when it is rebased. Therefore, we rebase the market baskets periodically so that the cost weights reflect more recent purchases of goods and services used by providers to furnish medical care. The IPPS market basket was last rebased in the FY 2022 IPPS final rule using 2018 Medicare cost reports (86 FR 45194 through 45207), the most recent year of complete data available at the time of the rebasing. We did not propose to rebase the IPPS market basket in the FY 2023 IPPS proposed rule. However, we did review the most recent Medicare cost report (MCR) data available for IPPS hospitals submitted as of March 2022, which includes data for 2019 through 2020. The MCR data for 2019 showed little change in the reported cost weights and MCR data for 2020 showed a slight decrease in the compensation cost weight (roughly 1 percentage point) relative to the 2018-based IPPS market basket cost weight. Data through 2021 are incomplete at this time. Based on this preliminary analysis, the impact on the cost weights through 2020 are minimal and it is unclear whether these trends (particularly the compensation cost weight) through 2020 are reflective of sustained shifts in the cost structure for hospitals or whether they were temporary as a result of the COVID–19 PHE. Therefore, we continue to believe it is premature at this time to use more recent MCR data to derive a rebased and revised IPPS market basket. We will continue to monitor these data and any changes to the IPPS market basket will be proposed in future rulemaking.

Final Decision: We are finalizing the hospice payment update percentage of 3.8 percent for FY 2023. Based on IHS Global, Inc.'s more recent forecast of the inpatient hospital market basket update and the productivity adjustment, the hospice payment update percentage for FY 2023 will be 3.8 percent for hospices that submit the required quality data and 1.8 percent (FY 2023 hospice payment update of 3.8 percent minus 2 percentage points) for hospices that do not submit the required data.

4. FY 2023 Hospice Payment Rates

There are four payment categories that are distinguished by the location and intensity of the hospice services provided. The base payments are adjusted for geographic differences in wages by multiplying the labor share, which varies by category, of each base rate by the applicable hospice wage index. A hospice is paid the RHC rate for each day the beneficiary is enrolled in hospice, unless the hospice provides CHC, IRC, or GIP. CHC is provided during a period of patient crisis to maintain the patient at home; IRC is short-term care to allow the usual caregiver to rest and be relieved from caregiving; and GIP is to treat symptoms that cannot be managed in another setting.

As discussed in the FY 2016 Hospice Wage Index and Rate Update final rule (80 FR 47172), we implemented two different RHC payment rates: (1) RHC rate for the first 60 days; and (2) RHC rate for days 61 and beyond. In addition, in that final rule, we implemented an SIA payment for RHC when direct patient care is provided by an RN or social worker during the last 7 days of the beneficiary's life. The SIA payment is equal to the CHC hourly rate multiplied by the hours of nursing or social work provided (up to 4 hours total) that occurred on the day of service, if certain criteria are met. In order to maintain budget neutrality, as required under section 1814(i)(6)(D)(ii) of the Act, the new RHC rates were adjusted by a service intensity add-on budget neutrality factor (SBNF). The SBNF is used to reduce the overall RHC rate in order to ensure that SIA payments are budget-neutral. At the beginning of every FY, SIA utilization is compared to the prior year in order calculate a budget neutrality adjustment.

In the FY 2017 Hospice Wage Index and Rate Update final rule (81 FR 52156), we initiated a policy of applying a wage index standardization factor to hospice payments to eliminate the aggregate effect of annual variations in hospital wage data. Typically, the wage index standardization factor is calculated using the most recent, complete hospice claims data available. However, due to the COVID–19 PHE, in the FY 2022 Hospice Wage Index and Payment Rate Update proposed rule we looked at using hospice claims data before the declaration of the COVID–19 PHE (FY 2019) to determine if there were significant differences between utilizing 2019 and 2020 claims data. The difference between using FY 2019 and FY 2020 hospice claims data was minimal. Therefore, in the FY 2022 Hospice Wage Index and Payment Rate Update final rule (86 FR 42543), we stated that we would continue our practice of using the most recent, complete hospice claims data available. For FY 2023 hospice rate setting, we saw minimal differences in using the updated data; therefore, we are continuing our longstanding policy of using the most recent data available. Specifically, we are using FY 2021 claims data with the FY 2023 payment rate updates. In order to calculate the wage index standardization factor, we simulate total payments using FY 2021 hospice utilization claims data with the FY 2022 wage index (pre-floor, pre-reclassified hospital wage index with the hospice floor, without the 5-percent cap on wage index decreases) and FY 2022 payment rates and compare it to our simulation of total payments using the FY 2023 hospice wage index (pre-floor, pre-reclassified hospital wage index with hospice floor, with the 5-percent cap on wage index decreases) and FY 2022 payment rates. By dividing payments for each level of care (RHC days 1 through 60, RHC days 61+, CHC, IRC, and GIP) using the FY 2022 wage index and payment rates for each level

of care by the FY 2023 wage index and FY 2022 payment rates, we obtain a wage index standardization factor for each level of care. The wage index standardization factors for each level of care are shown in the Tables 1 and 2.

The FY 2023 RHC rates are shown in Table 1. The FY 2023 payment rates for CHC, IRC, and GIP are shown in Table 2.

TABLE 1: FY 2023 Hospice RHC Payment Rates

Code	Description	FY 2022 Payment Rates	SIA Budget Neutrality Factor	Wage Index Standardization Factor	FY 2023 Hospice Payment Update	FY 2023 Payment Rates
651	**Routine Home Care (days 1-60)**	$203.40	1.0003	1.0007	1.038	$211.34
651	**Routine Home Care (days 61+)**	$160.74	1.0003	1.0006	1.038	$167.00

TABLE 2: FY 2023 Hospice CHC, IRC, and GIP Payment Rates

Code	Description	FY 2022 Payment Rates	Wage Index Standardization Factor	FY 2023 Hospice Payment Update	FY 2023 Payment Rates
652	**Continuous Home Care Full Rate = 24 hours of care.**	$1,462.52	1.0026	1.038	$1,522.04
655	**Inpatient Respite Care**	$473.75	1.0007	1.038	$492.10
656	**General Inpatient Care**	$1,068.28	1.0017	1.038	$1,110.76

Sections 1814(i)(5)(A) through (C) of the Act require that hospices submit quality data, based on measures to be specified by the Secretary. In the FY 2012 Hospice Wage Index and Rate Update final rule (76 FR 47320 through 47324), we implemented a HQRP as required by those sections. Hospices were required to begin collecting quality data in October 2012 and submit those quality data in 2013. Section 1814(i)(5)(A)(i) of the Act requires that beginning with FY 2014 and each subsequent FY, the Secretary shall reduce the market basket update by 2 percentage points for any hospice that does not comply with the quality data submission requirements with respect to that FY. The FY 2023 rates for hospices that do not submit the required quality data would be updated by the FY 2023 hospice payment update percentage of 3.8 percent minus 2 percentage points. These rates are shown in Tables 3 and 4.

TABLE 3: FY 2023 Hospice RHC Payment Rates for Hospices That DO NOT Submit the Required Quality Data

Code	Description	FY 2022 Payment Rates	SIA Budget Neutrality Factor	Wage Index Standardization Factor	FY 2023 Hospice Payment Update of 3.8% minus 2 percentage points = +1.8%	FY 2023 Payment Rates
651	Routine Home Care (days 1-60)	$203.40	1.0003	1.0007	1.018	$207.27
651	Routine Home Care (days 61+)	$160.74	1.0003	1.0006	1.018	$163.78

TABLE 4: FY 2023 Hospice CHC, IRC, and GIP Payment Rates for Hospices That DO NOT Submit the Required Quality Data

Code	Description	FY 2022 Payment Rates	Wage Index Standardization Factor	FY 2023 Hospice Payment Update of 3.8% minus 2 percentage points = +1.8%	FY 2023 Payment Rates
652	Continuous Home Care Full Rate = 24 hours of care.	$1,462.52	1.0026	1.018	$1,492.72
655	Inpatient Respite Care	$473.75	1.0007	1.018	$482.62
656	General Inpatient Care	$1,068.28	1.0017	1.018	$1,089.36

Final Decision: We are finalizing the FY 2023 payment rates in accordance with statutorily mandated requirements.

5. Hospice Cap Amount for FY 2023

As discussed in the FY 2016 Hospice Wage Index and Rate Update final rule (80 FR 47183), we implemented changes mandated by the IMPACT Act of 2014 (Pub. L. 113–185). Specifically, we stated that for accounting years that end after September 30, 2016 and before October 1, 2025, the hospice cap is updated by the hospice payment update percentage rather than using the CPI–U. Division CC, section 404 of the CAA 2021 extended the accounting years impacted by the adjustment made to the hospice cap calculation until 2030. In the FY 2022 Hospice Wage Index final rule (86 FR 42539), we finalized conforming regulations text changes at § 418.309 to reflect the provisions of the CAA 2021. Therefore, for accounting years that end after September 30, 2016 and before October 1, 2030, the hospice cap amount is updated by the hospice payment update percentage rather than using the CPI–U.

The hospice cap amount for the FY 2023 cap year is $32,486.92, which is equal to the FY 2022 cap amount ($31,297.61) updated by the FY 2023 hospice payment update percentage of 3.8 percent.

We received few comments regarding the hospice cap amount. A summary of these comments and our responses to those comments are as follows:

Comment: MedPAC recommended that the hospice aggregate cap be wage adjusted and reduced by 20 percent. Another commenter recommended several refinements to the cap including: wage adjusting the cap to address wage variation in a budget neutral manner, phasing in the adjustment over multiple years to minimize the potential impact on access to care and to allow the most negatively impacted areas of the country to adjust; and limiting variation in the wage index applicable to the cap (creating a ''floor''

and a ''ceiling'') to protect hospice providers from the significant swings that can accompany wage index changes from year to year, ensuring the cap value remains more consistent. One commenter stated that they would support a cap structure that aligns with hospices taking risk, but that also considers high inflationary factors. This commenter believes that CMS should align payment to account for these factors.

Response: We thank the commenters for their recommendations to improve the hospice cap; however, we are required by law to update the hospice cap amount from the preceding year by the hospice payment update percentage, in accordance with section 1814(i)(2)(B)(ii) of the Act. Therefore, we do not have the statutory authority to reduce the aggregate cap amount nor the statutory authority to wage-adjust the cap.

Final Decision: We are finalizing the update to the hospice cap amount for FY 2023 in accordance with statutorily mandated requirements.

B. Updates to the Hospice Quality Reporting Program (HQRP)

1. Background and Statutory Authority

The HQRP specifies reporting requirements for the Hospice Item Set (HIS), administrative data, and Consumer Assessment of Healthcare Providers and Systems (CAHPS®) Hospice Survey. Section 1814(i)(5) of the Act requires the Secretary to establish and maintain a quality reporting program for hospices. Section 1814(i)(5)(A)(i) of the Act was amended by section 407(b) of Division CC, Title IV of the CAA 2021 (Pub. L. 116–260) to change the payment reduction for failing to meet hospice quality reporting requirements from 2 to 4 percentage points. This policy will apply beginning with FY 2024 annual payment update (APU) that is based on CY 2022 quality data. Specifically, the Act requires that, beginning with FY 2014 through FY 2023, the Secretary shall reduce the market basket update by 2 percentage points and beginning with the FY 2024 APU and for each subsequent year, the Secretary shall reduce the market basket update by 4 percentage points for any hospice that does not comply with the quality data submission requirements for that FY. Since this payment penalty increase to 4 percent is statutorily required and self-implementing, we cannot address comments on this topic.

Depending on the amount of the annual update for a particular year, a reduction of 2 percentage points through FY 2023 or 4 percentage points beginning in FY 2024 could result in the annual market basket update being less than zero percent for a FY and may result in payment rates that are less than payment rates for the preceding FY. A reduction of 2 percentage points through FY 2023 or 4 percentage points beginning in FY 2024 based on failure to comply with the reporting requirements, as required by section 1814(i)(5)(B) of the Act, would apply only for the specified year. Typically, about 18 percent of Medicare-certified hospices are found non-compliant with the HQRP reporting requirements and subject to the APU payment reduction for a given fiscal year.

In the FY 2022 Hospice Wage Index and Payment Rate Update final rule (86 FR 42552), we finalized two new measures using claims data: (1) Hospice Visits in the Last Days of Life (HVLDL); and (2) Hospice Care Index (HCI). We also finalized a policy that claims-based measures will use 8 quarters of data in order to report on more hospices. In addition, we removed the seven Hospice Item Set (HIS) Process Measures from the program as individual measures and public reporting because the HIS Comprehensive Assessment Measure (NQF #3235) is sufficient for measuring care at admission without the seven individual process measures. For a detailed discussion of the historical use for measure selection and removal for the HQRP quality measures, we refer readers to the FY 2016 Hospice Wage Index and Rate Update final rule (80 FR 47142) and the FY 2019 Hospice Wage Index and Rate Update final rule (83 FR 38622). In the FY 2022 Hospice Wage Index and Rate Update final rule (86 FR 42553), we finalized § 418.312(b)(2), which requires hospices to provide administrative data, including claims-based measures, as part of the HQRP requirements for § 418.306(b). In that same final rule, we provided CAHPS Hospice Survey updates. We finalized temporary changes to our public reporting policies based on the March 27, 2020 memorandum [3] and provided another tip sheet, referred to as the *Second Edition HQRP Public Reporting Tip Sheet* on the *HQRP Requirements and Best Practices web page.*

As finalized in the FY 2022 Hospice Wage Index and Payment Rate Update final rule (86 FR 42552), the inaugural display of the two new claims-based quality measures (QMs), the Hospice Visits in Last Days of Life (HVLDL) and the Hospice Care Index (HCI) will be available on the Care Compare/Provider Data Catalogue (PDC) web pages. In the FY 2023 Hospice proposed rule, we did not propose any new quality measures. However, we provide updates on already-adopted measures. Table 5 shows all quality measures finalized in the FY 2022 Hospice Wage Index and Payment Rate Update final rule and in effect for the FY 2023 HQRP.

[3] Exceptions and Extensions for Quality Reporting Requirements for Acute Care Hospitals, PPS-Exempt Cancer Hospitals, Inpatient Psychiatric Facilities, Skilled Nursing Facilities, Home Health Agencies, Hospices, Inpatient Rehabilitation Facilities, Long-Term Care Hospitals, Ambulatory Surgical Centers, Renal Dialysis Facilities, and MIPS Eligible Clinicians Affected by COVID–19. Available at: *https://www.cms.gov/files/document/guidance-memo-exceptions-and-extensions-quality-reporting-and-value-based-purchasing-programs.pdf.*

TABLE 5: Quality Measures finalized in the FY 2022 Hospice Wage Index Final Rule and in Effect for FY 2023 for the Hospice Quality Reporting Program

Hospice Quality Reporting Program	
NQF#	**Hospice Item Set**
3235	Hospice and Palliative Care Composite Process Measure—HIS-Comprehensive Assessment Measure at Admission includes: 1. Patients Treated with an Opioid who are Given a Bowel Regimen (NQF #1617) 2. Pain Screening 3. Pain Assessment 4. Dyspnea Treatment 5. Dyspnea Screening 6. Treatment Preferences 7. Beliefs/Values Addressed (if desired by the patient)
Administrative Data, including Claims-based Measures	
Pending NQF endorsement	Hospice Visits in Last Days of Life (HVLDL)
Pending NQF endorsement	Hospice Care Index (HCI) 1. Continuous Home Care (CHC) or General Inpatient (GIP) Provided 2. Gaps in Skilled Nursing Visits 3. Early Live Discharges 4. Late Live Discharges 5. Burdensome Transitions (Type 1) – Live Discharges from Hospice Followed by Hospitalization and Subsequent Hospice Readmission 6. Burdensome Transitions (Type 2) – Live Discharges from Hospice Followed by Hospitalization with the Patient Dying in the Hospital 7. Per-beneficiary Medicare Spending 8. Skilled Nursing Care Minutes per Routine Home Care (RHC) Day 9. Skilled Nursing Minutes on Weekends 10. Visits Near Death
CAHPS Hospice Survey	
2651	CAHPS Hospice Survey 1. Communication with Family 2. Getting timely help 3. Treating patient with respect 4. Emotional and spiritual support 5. Help for pain and symptoms 6. Training family to care for the patient 7. Rating of this hospice 8. Willing to recommend this hospice

2. Hospice Outcomes & Patient Evaluation (HOPE) Update

As finalized in the FY 2020 Hospice Wage Index and Payment Rate Update and Hospice Quality Reporting Requirements final rule (84 FR 38484), we are developing a hospice patient assessment instrument identified as HOPE. HOPE would contribute to the patient's plan of care through patient assessments ongoing throughout the hospice stay. HOPE is intended to support the hospice conditions of participation (CoPs), including hospices' quality assessment and performance improvement (QAPI) programs and provide quality data to calculate outcome and other types of quality measures. Our primary objectives for HOPE are to provide quality data for the HQRP requirements through standardized data collection; support survey and certification processes; and provide additional clinical data that could inform future payment refinements.

HOPE would include key items from the HIS and demographics like gender and race. Some HIS items would be modified for inclusion in HOPE to increase specificity. This approach to include key demographic information reflects stakeholder feedback discussed in the FYs 2017 and 2018 Hospice Wage Index and Payment Rate Update final rules (81 FR 52171 and 82 FR 36669, respectively).

HOPE is multidisciplinary: the assessment instrument would be completed by nursing, social work, and spiritual care staff. We are undergoing testing with three distinct disciplinary assessments in beta field testing described in this section. We stated in the FY 2022 Hospice Wage Index and

Payment Update final rule (86 FR 42528) that while the standardized patient assessment data elements for certain post-acute care providers required under the IMPACT Act of 2014 are not applicable to hospices, it would be reasonable to include some of those standardized elements that appropriately and feasibly apply to hospice to the extent permitted by our statutory authority. Some patients may move through the healthcare system to hospice. Therefore, considering tracking key demographic and social risk factor items that apply to hospice could support our goals for continuity of care, overall patient care and well-being, interoperability of electronic health information, and health equity that is also discussed in this rule.

The draft of HOPE has undergone cognitive, pilot, and alpha testing, and is undergoing national beta field testing to establish reliability, validity, and feasibility of the assessment instrument. The purpose of the alpha test was to establish preliminary reliability and validity of the draft assessment items, and feasibility of implementing future requirements for hospices to utilize the HOPE assessment. Specifically, the objectives were to:

- Establish inter-rater reliability (IRR) of the assessment items.
- Demonstrate validity of the assessment items.
- Demonstrate feasibility of completing the assessment and time points during the hospice stay for data collection.

HOPE alpha testing was completed at the end of January 2021. Based on the quantitative data analyses and feedback from assessors in alpha testing, the items generally support the feasibility of collecting the data items. Alpha testing also showed that HOPE exhibited acceptable inter-rater reliability ranging from moderate to very good with few exceptions and demonstrated evidence of convergent validity. We used findings of the alpha test to inform decisions about the next draft of the HOPE assessment, which are being tested in the national beta test that began in late fall 2021 and will continue through 2022.

National beta testing allows us to obtain input from participating hospice teams about the assessment instrument and field testing to refine and support the final draft items and assessment time points for HOPE. It also allows us to estimate the time to complete the HOPE data items. We anticipate proposing HOPE in future rulemaking after testing and analyses are complete.

We continue HOPE development in accordance with the Blueprint for the CMS Measures Management System. HOPE development is grounded in information gathering activities to identify and refine hospice assessment domains and candidate assessment items. We appreciate the industry's and national associations' engagement in providing input through information sharing activities, including listening sessions, expert interviews, key stakeholder interviews, and focus groups to support HOPE development. As CMS proceeds with field testing HOPE, we will continue to engage with stakeholders through sub-regulatory channels. In particular, we will continue to host HQRP Forums to allow hospices and other interested parties to engage with us on the latest updates and ask questions on the development of HOPE and related quality measures. We also have a dedicated email account, *HospiceAssessment@cms.hhs.gov,* for comments about HOPE.

We will use field test results to create a final version of HOPE to propose in future rulemaking for national implementation. We will continue to engage all stakeholders throughout this process that includes a variety of sub-regulatory channels and regular HQRP communication strategies, such as Open Door Forums (ODF), Medicare Learning Network (MLN), *CMS.gov* website announcements, listserv messaging, and other ad hoc publicly announced opportunities. We appreciate the support for HOPE and reiterate our commitment to providing updates and engaging stakeholders through sub-regulatory means. HOPE updates can be found at: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting/HOPE* and engagement opportunities, including those regarding HOPE are at: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting/Hospice-QRP-Provider-Engagement-Opportunities.*

We received many comments related to HQRP. A summary of these comments and our responses to those comments as it relates to the HOPE update are as follows:

Comment: Commenters were generally supportive of HOPE and ongoing beta testing. Many commenters asked CMS to release additional information on HOPE, including reports and data, ahead of the official proposal to allow time for education, programming, and implementation of HOPE. Specifically, commenters asked for information regarding the timeline for HOPE implementation. There were numerous suggestions that HOPE could include health equity and social determinants of health (SDOH) data points, including those to support a structural health equity measure and assist hospices in assessing their own progress on health equity goals. One comment suggested HOPE as an opportunity to collect uniform self-reported data to support a future health equity structural measure.

A few comments raised concerns about the potential additional regulatory burden of HOPE, such as duplicative documentation. Another comment suggested HOPE leverage certified health IT capabilities to reduce administrative burden. Some comments noted concerns about conducting beta testing during the COVID–19 pandemic, stating that staffing concerns have exacerbated the administrative burden of HOPE beta testing. There was one comment suggesting the inclusion of occupational therapy practitioners among the providers who can complete HOPE assessments.

Response: We appreciate all stakeholders' input regarding HOPE development, and will take these comments into consideration for future rulemaking. We are committed to developing and implementing HOPE with a minimum burden to stakeholders. Additional information about HOPE will be presented to the public via sub-regulatory means, such as ODFs, Hospice Quality Reporting Program Forums, our HQRP web page, and other appropriate communications. We will propose HOPE in future rulemaking.

3. Update on Future Quality Measure (QM) Development

In the FY 2020 Hospice Wage Index and Payment Rate Update final rule (84 FR 38484), we provided updates related to CMS's process for identifying high priority areas of quality measurement and improvement and for developing quality measures that address those priorities. Information on the current HQRP quality measures can be found at: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting/Current-Measures.* In this final rule, we provide updates for hospice quality measure concepts based on future use of HOPE and administrative data. In section III.B.6, we summarize the public comments from hospices on the Request for Information (RFI) related to their health equity initiatives and a structural composite measure concept to inform future measure development.

To support new measure development, our contractor convened two technical expert panel (TEP)

meetings in 2021. The TEP considered HOPE-based process measures that may be proposed with HOPE in future rulemaking. The TEP meetings in 2021 included HOPE-based process measures intended to: (1) evaluate the rate at which hospices' use specific processes of care; (2) assist in reducing variation in care delivery; and (3) determine hospices' compliance with practices that are expected to improve outcomes. The TEP also considered potential areas for future quality measure development. We refer readers to the ''2021 Technical Expert Panel Meetings: Hospice Quality Reporting Program Summary Report'' available at: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting/Hospice-QRP-Provider-Engagement-Opportunities*.

As stated in the FY 2022 Hospice Wage Index and Rate Update final rule (86 FR 42528), We continue to consider developing hybrid quality measures that could be calculated from multiple data sources: for example, claims, assessments (HOPE), or other data sources. Hybrid quality measures allow for a more comprehensive set of information about care processes and outcomes than can be calculated using claims data alone. As described in the ''2021 Technical Expert Panel Meetings: Hospice Quality Reporting Program Summary Report,'' the TEP discussed hybrid concepts such as hospitalizations during a hospice election and patterns of live discharge using claims data and HOPE data elements.

We received several comments regarding the update on future QM development. A summary of these comments and our responses to those comments are as follows:

Comment: Several commenters suggested CMS develop measures to monitor hospice telehealth services and to add telehealth to claims. Some commenters indicated that existing measures, such as the claims-based HVLDL should be modified to recognize telehealth.

Other commenters suggested that CMS develop or revise quality measures to better reflect how hospices meet patient care goals. These suggestions included new quality measures for advance care planning and patient-reported measures related to how much patients felt understood and whether patients received the pain help they wanted. Related to these care goals and for future quality measure consideration, commenters seek to recognize visits by the full interdisciplinary care team, add spiritual care to claims, and consider occupational therapy and/or include it in the NQF #3235, the HIS Comprehensive Assessment Measure.

Commenters also recommended changes to the existing HVLDL measure, such as revising the specifications to recognize more hospice disciplines, including telehealth visits, or changing the timeframe the measure reflects.

In addition, commenters suggested changes to the existing HCI measure, such as differentiating when patients refuse provider visits from when providers fail to offer visits, or changing the timeframe of the ''Visits Near Death'' indicator.

Commenters made suggestions regarding how future QMs should be designed. These suggestions included considerations for hybrid measures and requests for more clarity on how CMS determines if proposed measures address quality of care. Other commenters emphasized the importance of minimizing the administrative burden of new quality measure implementation and data collection.

Response: We appreciate the input regarding quality measure development, and will take these comments into consideration for future QM development initiatives. We are committed to the Meaningful Measures Initiative (*https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/QualityInitiativesGenInfo/CMS-Quality-Strategy*) and Measures Management System Blueprint (*https://mmshub.cms.gov/blueprint-measure-lifecycle-overview*) that informs and guides quality measure development priorities and processes.

4. Updates to the CAHPS Hospice Survey Participation Requirements for the FY 2023 APU and Subsequent Years

a. Background and Description of the CAHPS Hospice Survey

The CAHPS Hospice Survey is a component of the CMS HQRP, which is used to collect data on the experiences of hospice patients and the primary caregivers listed in their hospice records. We refer readers who may want more information about the development of the survey, originally called the Hospice Experience of Care Survey to see our discussions of the survey in the FY 2015 Hospice Wage Index final rule (79 FR 50452, 50491) and the FY 2014 Hospice Wage Index final rule (78 FR 48234, 48261).).

b. Overview of the ''CAHPS Hospice Survey Measures''

The CAHPS Hospice Survey measures were re-endorsed by NQF on November 20, 2020. The re-endorsement can be found on the NQF website at: *https://www.qualityforum.org/Measures_Reports_Tools.aspx.* The survey received its initial NQF endorsement on October 26, 2016 (NQF #2651). We adopted 8 survey-based measures for the CY 2018 data collection period and for subsequent years. These eight measures are publicly reported on a designated CMS website, Care Compare, *https://www.medicare.gov/care-compare/.*

c. CAHPS Hospice Survey Mode Experiment

CMS recently conducted a mode experiment with the goal of testing the effects of adding a web-based mode to the CAHPS Hospice Survey. We are examining the impact of a web-based mode on survey response rates and scores. The survey currently has three approved modes without any web component (mail, telephone, and mail with telephone follow-up). In addition, the test will allow for examination of the effects of a shortened survey (that is, removing existing survey items) on response rate and scores; assessment of the measure properties of a limited number of supplemental survey items suggested by stakeholders; and calculation of item-level mode adjustments for the shortened survey in the currently-approved modes of CAHPS Hospice Survey administration, as well as the proposed new web-based mode.

The mode experiment design applied all of the existing CAHPS Hospice Survey eligibility criteria, and sampled patients/caregivers across five arms. The first arm tested a new web-mail mode, in which invitations to the web survey were sent by email to those with email addresses. The email was personalized to the respondent and included a link to the web version of the survey, which can be completed on either a computer or a mobile device such as a smartphone or tablet. If the respondent did not complete the web survey after one week, or did not have a valid email address in which to send an email, up to two surveys were sent by mail. This arm used a shortened version of the CAHPS Hospice Survey.

In the next three arms, the shortened version of the CAHPS Hospice Survey instrument was administered in the three currently-approved modes: mail only; telephone-only; and mixed mode (mail with telephone follow up). The fifth arm, in which the current survey instrument was administered via mail only served as a comparison for all other arms. Across all arms, half of sampled caregivers received a pre-notification letter to examine the effects of such a letter on response rates.

Overall (across the five arms), CMS sampled 15,000 eligible caregivers from around 50 hospices over a six- to seven-month period. Caregivers were randomized within each hospice to one of the five arms.

We continue to analyze the results of the mode experiment and will keep stakeholders informed on any plans for changes to the survey content or administration options through our regular stakeholder communication channels. In this final rule, there are no changes to the administration procedures or content for the CAHPS Hospice Survey. Any changes to the CAHPS Hospice Survey will be proposed in future rulemaking.

We received several comments regarding the CAHPS Hospice Survey Mode Experiment. A summary of these comments and our responses to those comments are as follows:

Comment: Most commenters support the development and testing of a web-based mode and a shortened version of the CAHPS Hospice Survey.

Response: We appreciate the support of a web-based mode of survey administration and shorter CAHPS Hospice Survey instrument. Currently, CMS is completing analyses of data collected through a field test that included the web-based mode of survey administration and revisions to the survey. If and when a web-based mode is made available as one of the approved modes of CAHPS Hospice Survey administration, hospices would continue to have the option to choose among all approved modes (that is, web-based mode would not be required). Prior to introducing a revised survey instrument and/or new approved mode of administration, CMS will release detailed information regarding proposed changes to survey instrument content, survey administration protocols, and data adjustment procedures needed to promote fair comparisons between hospices selecting different modes of survey administration.

Comment: Some commenters stated that CMS should examine the CAHPS Hospice Survey to ensure questions are appropriate for ethnically diverse families and provide information that can be used to address health equity.

Response: We will continue to use data from hospices participating in the CAHPS Hospice Survey to assess how care experiences vary for subpopulations across hospices. In 2021, CMS conducted an experiment of a revised version of the CAHPS Hospice Survey that included new survey questions designed to assess cultural sensitivity of care and identify disparities in care by race and ethnicity. We will share information about the results of this test as it becomes available.

Comment: Some commenters stated that CMS should compare response rates to the CAHPS Hospice Survey and other CAHPS surveys for non-English speaking individuals to assess whether these rates vary from English-speaking individuals.

Response: We thank commenters for this feedback and will take this suggestion into consideration. Data has shown for other CAHPS surveys that the likelihood of responding to survey differs by race/ethnicity and mode. We encourage hospices to consider their patient/caregiver population and work with their survey vendor to determine the best mode of data collection.

Comment: One commenter stated that the CAHPS Hospice Survey is not an accurate reflection of care received since the primary caregiver completes the survey.

Response: The Hospice CAHPS Survey is completed by the primary caregiver out of respect for the patient receiving end of life care. We do not feel it would be appropriate to have hospice patients fill out a survey about the care they are receiving at the very end of their life.

d. Data Sources

In the FY 2020 Hospice Wage Index and Rate Update final rule (84 FR 38484), we finalized the participation requirements for the CAHPS Hospice Survey. To meet the CAHPS Hospice Survey requirements for the HQRP, hospice facilities must contract with a CMS-approved vendor to collect survey data for eligible patients on a monthly basis and report that data to CMS on the hospice's behalf by the quarterly deadlines established for each data collection period.

e. Public Reporting of CAHPS Hospice Survey Results

We began public reporting of the results of the CAHPS Hospice Survey on Hospice Compare as of February 2018. Before the COVID–19 PHE, we reported the most recent 8 quarters of data on the basis of a rolling average, with the most recent quarter of data being added and the oldest quarter of data removed from the averages for each data refresh. As finalized in the FY 2022 Hospice Wage Index and Payment Rule Update (86 FR 42528), we are not reporting Q1 2020 and Q2 2020 data due to the COVID–19 PHE. Therefore, we have publicly reported the most recently available 8 quarters of CAHPS data that excluded Q1 2020 and Q2 2020 data. These data were publicly reported starting with the February 2022 refresh and will continue through the May 2023 refresh on Care Compare. The Second Edition HQRP Public Reporting Tip Sheet dated Dec. 2021 on the *HQRP Requirements and Best Practices web page* summarizes CMS' approach to the HQRP as public reporting has resumed in February 2022. It also explains the HQRP public reporting changes associated with the FY 2022 Hospice Wage Index and Payment Rule Update final rule and provides a summary of the data refreshes.

f. Volume-Based Exemption for CAHPS Hospice Survey Data Collection and Reporting Requirements

In the FY 2020 Hospice Wage Index and Rate Update final rule (84 FR 38526), we finalized a policy making a volume-based exemption for CAHPS Hospice Survey Data Collection and Reporting requirements for FY 2021 and every year thereafter.

In this final rule, there will be no changes to this exemption. The exemption request form is available on the official CAHPS Hospice Survey website: *http://www.hospiceCAHPSsurvey.org.* Hospices that intend to claim the size exemption are required to submit to CMS their completed exemption request form by December 31, of the data collection year.

Hospices that served a total of fewer than 50 survey-eligible decedent/caregiver pairs in the year before the data collection year are eligible to apply for the size exemption. Hospices may apply for a size exemption by submitting the size exemption request form. The size exemption is only valid for the year on the size exemption request form. If the hospice remains eligible for the size exemption, the hospice must complete the size exemption request form for every applicable FY APU period, as shown in Table 6.

TABLE 6: Size Exemption Key Dates FY 2023 Through FY 2026

Fiscal year	Data collection year	Reference year	Size exemption form submission deadline
FY 2023	CY 2021	CY 2020	December 31, 2021
FY 2024	CY 2022	CY 2021	December 31, 2022
FY 2025	CY 2023	CY 2022	December 31, 2023
FY 2026	CY 2024	CY 2023	December 31, 2024

g. Newness Exemption for CAHPS Hospice Survey Data Collection and Public Reporting Requirements

We previously finalized a one-time newness exemption for hospices that meet the criteria as stated in the FY 2017 Hospice Wage Index and Payment Rate Update final rule (81 FR 52181). In the FY 2019 Hospice Wage Index and Payment Rate Update final rule (83 FR 38642), we continued the newness exemption for FY 2023, and all subsequent years. We encourage hospices to keep the letter they receive providing them with their CMS Certification Number (CCN). The letter can be used to show when you received your number.

h. Survey Participation Requirements

We previously finalized survey participation requirements for FY 2022 through FY 2025 as stated in the FY 2018 and FY 2019 Hospice Wage Index and Payment Rate Update final rules (82 FR 36670 and 83 FR 38642 through 38643). We also continued those requirements in all subsequent years (84 FR 38526). Table 7 restates the data submission dates for FY 2023 through FY 2025.

TABLE 7: CAHPS Hospice Survey Data Submission Dates for the APU in FY 2023, FY 2024, and FY 2025

Sample months (month of death)*	CAHPS Quarterly Data Submission Deadlines**
FY 2023 APU	
CY January-March 2021 (Quarter 1)	August 11, 2021
CY April-June 2021 (Quarter 2)	November 10, 2021
CY July-September 2021 (Quarter 3)	February 9, 2022
CY October-December 2021 (Quarter 4)	May 11, 2022
FY 2024 APU	
CY January-March 2022 (Quarter 1)	August 10, 2022
CY April-June 2022 (Quarter 2)	November 9, 2022
CY July-September 2022 (Quarter 3)	February 8, 2023
CY October-December 2022 (Quarter 4)	May 10, 2023
FY 2025 APU	
CY January-March 2023 (Quarter 1)	August 9, 2023
CY April-June 2023 (Quarter 2)	November 8, 2023
CY July-September 2023 (Quarter 3)	February 14, 2024
CY October-December 2023 (Quarter 4)	May 8, 2024

* Data collection for each sample month initiates 2 months following the month of patient death (for example, in April for deaths occurring in January).

** Data submission deadlines are the second Wednesday of the submission months, which are the months August, November, February, and May.

For further information about the CAHPS Hospice Survey, we encourage hospices and other entities to visit: *https://www.hospiceCAHPSsurvey.org.* For direct questions, contact the CAHPS Hospice Survey Team at *hospicecahpssurvey@hsag.com* or call 1 (844) 472–4621.

i. CAHPS Hospice Survey Star Ratings

We previously finalized a policy requiring us to display Hospice CAHPS Survey Star Ratings no sooner than FY 2022 as stated in the FY 2022 Hospice Wage Index and Payment Rule Update rule (86 FR 42528). Star Ratings will be publicly reported on Care Compare on Medicare.gov beginning with the August 2022 refresh. This start date allowed CMS to conduct a dry run of the Star Ratings with reporting to hospices via preview reports. Hospices first saw their Star Ratings in their preview reports during the November 2021 and March 2022 preview periods for the February 2022 and May 2022 updates of Care Compare on *Medicare.gov*. However, the CAHPS Hospice Survey Star Ratings will not be publicly reported in February or May 2022. The reporting period for the dry run covers data from Q4 2018 through Q4 2019 and Q3 2020 through Q1 2021. Detailed information about the calculation and display of Hospice CAHPS Survey Star Ratings can be found on the official CAHPS Hospice Survey website: *http://www.hospiceCAHPSsurvey.org.* There are no changes to the Hospice CAHPS Survey Star Ratings for FY 2023.

We received several comments regarding the CAHPS Survey Star Ratings. A summary of these comments and our responses to those comments are as follows:

Comment: Some commenters expressed concerns that Star Ratings will only include data from the CAHPS Hospice Survey and therefore will not provide consumers with all the relevant information to decide on selecting a hospice.

Response: Star Ratings using CAHPS Hospice Survey data is an initial step CMS is taking to provide consumers with an easy to understand method for comparing hospices. We will take the feedback to include other data sources into consideration as enhancements are made over time.

Comment: A handful of commenters raised concern that low survey response rates will prevent hospices from being assigned a Star Rating and this could result in fewer hospices having Star Ratings. Several commenters stated that it is not clear how a consumer will perceive a hospice that is not assigned a Star Ratings.

Response: CMS recently tested a web mode and shortened questionnaire with the goal of improving response rates. We are analyzing the data for potential future changes to the Hospice CAHPS Survey. For the August 2022 reporting period, most hospices with publicly reported CAHPS Hospice Survey measure scores (68 percent) met the threshold of 75 completed surveys and were assigned a Star Rating. The vast majority of 2020 Medicare decedents (approximately nine out of ten) received care from hospices that received a Star Rating in August 2022. CMS presents footnotes and other documentation on the Care Compare website to clearly indicate why hospices with smaller numbers of completed surveys do not have Star Ratings.

Comment: A commenter suggested that Star Ratings be calculated based on absolute rather than relative performance.

Response: Similar to other CMS CAHPS Star Ratings, CMS finalized that the cut-point methodology used to determine CAHPS Hospice Survey stars use statistical clustering procedures that minimize the score differences within a star category and maximize the differences across star categories. This ensures that star assignments clearly differentiate performance across groups of hospices. Such comparative Star Ratings help consumers identify high and low performing hospices. Statistical clustering also allows cut points to adjust for unanticipated changes in performance within the industry. Setting absolute cut points has multiple issues, including variation in industry performance across measures, external or structural factors can lead to substantial changes from period to period rather than steady, slow year-over-year improvement, and diminished incentive to improve when a hospice knows they have reached a certain pre-established performance threshold.

Comment: A couple of commenters shared concerns that the time period of data used to calculate quality measures, including Star Ratings for the CAHPS Hospice Survey, includes data up to 3 years old which undermines the usefulness of the information being publicly reported.

Response: Rolling up eight quarters of data instead of four ensures that measure scores are available for many more hospices, which improves the usefulness of the Compare web tools for hospice consumers. The eight-quarter approach does not result in a delay of when data becomes available (since the most recent quarters of data are included in the rolled-up score), but it does ensure more accurate measurement. The decision to use eight quarters of rolling data for hospices reflects sample size issues that are specific to hospice organizations, which differ in size and other dimensions from other types of entities, such as hospitals and MA contracts, for which CMS publicly reports scores and Star Ratings.

5. Form, Manner, and Timing of Quality Data Submission

a. Statutory Penalty for Failure To Report

Section 1814(i)(5)(C) of the Act requires that each hospice submit data to the Secretary on quality measures specified by the Secretary. Such data must be submitted in a form and manner, and at a time specified by the Secretary. Section 1814(i)(5)(A)(i) of the Act was amended by the CAA 2021 and the payment reduction for failing to meet hospice quality reporting requirements is increased from 2 percent to 4 percent beginning with FY 2024. The Act requires that, beginning with FY 2014 through FY 2023, the Secretary shall reduce the market basket update by 2 percentage points and then beginning in FY 2024 and for each subsequent year, the Secretary shall reduce the market basket update by 4 percentage points for any hospice that does not comply with the quality data submission requirements for that fiscal year. Last year, we revised our rule at § 418.306(b)(2) in accordance with this statutory change (86 FR 42605).

b. Compliance

HQRP Compliance requires understanding three timeframes for both HIS and CAHPS: (1) The relevant Reporting Year, payment FY and the Reference Year. The ''Reporting Year'' (HIS)/''Data Collection Year'' (CAHPS). This timeframe is based on the calendar year. It is the same CY for both HIS and CAHPS. If the CAHPS Data Collection year is CY 2023, then the HIS reporting year is also CY 2023; (2) The APU is subsequently applied to FY payments based on compliance in the corresponding Reporting Year/Data Collection Year; and (3) For the CAHPS Hospice Survey, the Reference Year is the CY prior to the Data Collection Year. The Reference Year applies to hospices submitting a size exemption from the CAHPS survey (there is no similar exemption for HIS). For example, for the CY 2023 data collection year, the Reference Year, is CY 2022. This means providers seeking a size exemption for CAHPS in CY 2023 will base it on their hospice size in CY 2022. Submission requirements are codified in § 418.312.

For every CY all Medicare-certified hospices are required to submit HIS and CAHPS data according to the requirements in § 418.312. Table 8 summarizes the three timeframes. It illustrates how the CY interacts with the FY payments, covering the CY 2021 through CY 2024 data collection periods and the corresponding APU application from FY 2023 through FY 2026.

TABLE 8: HQRP Reporting Requirements and Corresponding Annual Payment Updates

Reporting Year for HIS and Data Collection Year for CAHPS data (Calendar year)	Annual Payment Update Impacts Payments for the FY	Reference Year for CAHPS Size Exemption (CAHPS only)
CY 2021	FY 2023 APU	CY 2020
CY 2022	FY 2024 APU*	CY 2021
CY 2023	FY 2025 APU	CY 2022
CY 2024	FY 2026 APU	CY 2023

* Beginning in FY 2024 and all subsequent years, the payment penalty is 4 percent. Prior to FY 2024, the payment penalty is 2 percent.

As illustrated in Table 8, CY 2021 data submissions compliance impacts the FY 2023 APU. CY 2022 data submissions compliance impacts the FY 2024 APU. CY 2023 data submissions compliance impacts FY 2025 APU. This CY data submission impacting FY APU pattern follows for subsequent years.

c. Submission Data and Requirements

As finalized in the FY 2016 Hospice Wage Index and Payment Rate Update final rule (80 FR 47142, 47192), hospices' compliance with HIS requirements beginning with the FY 2020 APU determination (that is, based on HIS–Admission and Discharge records submitted in CY 2018) are based on a timeliness threshold of 90 percent. This means CMS requires that hospices submit 90 percent of all required HIS records within 30-days of the event (that is, patient's admission or discharge). The 90-percent threshold is hereafter referred to as the timeliness compliance threshold. Ninety percent of all required HIS records must be submitted and accepted within the 30-day submission deadline to avoid the statutorily-mandated payment penalty. Hospice compliance with claims data requirements is based on administrative data collection. Since Medicare claims data are already collected from claims, hospices are considered 100 percent compliant with the submission of these data for the HQRP. There is no additional submission requirement for administrative data.

To comply with CMS' quality reporting requirements for CAHPS, hospices are required to collect data monthly using the CAHPS Hospice Survey. Hospices comply by utilizing a CMS-approved third-party vendor. Approved Hospice CAHPS vendors must successfully submit data on the hospice's behalf to the CAHPS Hospice Survey Data Center. A list of the approved vendors can be found on the CAHPS Hospice Survey website: *www.hospicecahpssurvey.org.* Table 9. HQRP Compliance Checklist illustrates the APU and timeliness threshold requirements.

TABLE 9: HQRP Compliance Checklist

Annual Payment Update	HIS	CAHPS
FY 2023	Submit at least 90 percent of all HIS records within 30 days of the event date (patient's admission or discharge) for patient admissions/discharges occurring 1/1/21 – 12/31/21.	Ongoing monthly participation in the Hospice CAHPS survey 1/1/2021 – 12/31/2021
FY 2024	Submit at least 90 percent of all HIS records or its successor instrument within 30 days of the event date (patient's admission or discharge) for patient admissions/discharges occurring 1/1/22 – 12/31/22.	Ongoing monthly participation in the Hospice CAHPS survey 1/1/2022 – 12/31/2022
FY 2025	Submit at least 90 percent of all HIS records or its successor instrument within 30 days of the event date (patient's admission or discharge) for patient admissions/discharges occurring 1/1/23 – 12/31/23.	Ongoing monthly participation in the Hospice CAHPS survey 1/1/2023 – 12/31/2023

Note: The data source for the claims-based measures will be Medicare claims data that are already collected and submitted to CMS. There is no additional submission requirement for administrative data (Medicare claims), and hospices with claims data are 100-percent compliant with this requirement.

Most hospices that fail to meet HQRP requirements do so because they miss the 90 percent threshold. We offer many training and education opportunities through our website, which are available 24/7, 365 days per year, to

enable hospice staff to learn at the pace and time of their choice. We want hospices to be successful with meeting the HQRP requirements. We encourage hospices to use the website at: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting/Hospice-Quality-Reporting-Training-Training-and-Education-Library.* For more information about HQRP Requirements, we refer readers to visit the frequently-updated HQRP website and especially the Best Practice, Education and Training Library, and Help Desk web pages at: *https://www.cms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/Hospice-Quality-Reporting.* We also encourage readers to visit the HQRP web page and sign-up for the Hospice Quality ListServ to stay informed about HQRP.

6. Request for Information Related to the HQRP Health Equity Initiative

CMS defines health equity as ''the attainment of the highest level of health for all people, where everyone has a fair and just opportunity to attain their optimal health regardless of race, ethnicity, disability, sexual orientation, gender identity, socioeconomic status, geography, preferred language, or other factors that affect access to care and health outcomes.'' CMS is working to advance health equity by designing, implementing, and operationalizing policies and programs that support health for all the people served by our programs, eliminating avoidable differences in health outcomes experienced by people who are disadvantaged or underserved, and providing the care and support that our enrollees need to thrive. CMS' goals are in line with Executive Order 13985, on Advancing Racial Equity and Support for Underserved Communities Through the Federal Government, which can be found at: *https://www.whitehouse.gov/briefing-room/presidential-actions/2021/01/20/executive-order-advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government/.*

Belonging to an underserved community is often associated with worse health outcomes.[4] [5] [6] [7] [8] [9] [10] [11] Such disparities in health outcomes are the result of multiple factors. Although not the sole determinants, poor access to care and provision of lower quality health care are important contributors to health disparities notable for CMS programs. Health inequities persist in hospice and palliative care, where Black and Hispanic populations are less likely to utilize care and over 80 percent of patients are White.[12] [13] [14] [15] After hospice admission, racial and ethnic disparities appear to impact quality of care and health outcomes.[16] Black patients may receive fewer supportive care medications despite higher symptom burdens, experience care less consistent with their expressed preferences, and encounter worse end-of-life communication.[17] [18] [19] [20] [21] In response to a survey regarding these disparities, 70 percent of home health organizations, including 22 percent that are hospices, indicated they would increase the resources dedicated to diversity, equity, and inclusion starting in 2021.[22] One important strategy for addressing these disparities is improving data collection to allow for better measurement and reporting on equity across our programs and policies.[23] [24]

We are committed to achieving equity in health care outcomes for our beneficiaries by supporting providers in quality improvement activities to reduce health inequities, enabling beneficiaries to make more informed decisions, and promoting provider accountability for health care disparities.[25] [26] CMS is committed to closing the equity gap in CMS quality programs. As discussed in the RFI from the FY 2022 Hospice Wage Index and Rate Update proposed rule (86 FR 19700), we are focused at making information on the quality of health care providers and services, including disparities, more transparent.

In the FY 2022 Hospice Wage Index and Rate Update final rule, we received comments supportive of gathering standardized patient assessment data elements and additional SDOH data to improve health equity. In parallel, commenters advocated for education efforts for beneficiaries, providers, and stakeholders on the benefits of collecting and reporting demographic and social risk factor data. We received many comments about the use of standardized patient assessment data elements in the hospice setting to assess health equity and SDOH, some of which raised concerns around whether such use may have unintended consequences. Many commenters noted that hospice patients have different goals of care than non-hospice patients, which does not align with standardized

data elements for patient assessment. Commenters encouraged CMS to only utilize certain aspects of standardized data elements for patient assessment (specifically, Z-codes 55–65) in collecting health equity data. We refer the readers to review the summary of public comments received in the FY 2022 Hospice Wage Index and Rate Update final rule (86 FR 42528).

We will continue to take all comments and suggestions into account as we work to develop policies on this important topic. We appreciate hospices and national organizations sharing their support and commitment to addressing health disparities and offering meaningful comments for consideration in the FY 2022 Hospice Wage Index and Rate Update final rule (86 FR 42528). Given the value of the comments thus far and the ongoing development of activities to improve health equity, we solicited public comment in the proposed rule on the following questions:

- What efforts does your hospice employ to recruit staff, volunteers, and board members from diverse populations to represent and serve underserved populations?
- How does your hospice attempt to bridge any cultural gaps between your personnel and beneficiaries/clients?
- How does your hospice measure whether this has an impact on health equity?
- How does your hospice currently identify barriers to access in your community or service area?
- What are barriers to collecting data related to disparities, social determinants of health, and equity?
- What steps does your hospice take to address these barriers?
- How does your hospice collect self-reported data such as race/ethnicity, veteran status, socioeconomic status, housing, food security, access to interpreter services, caregiving status, and marital status and use this to inform its health equity initiatives?
- How is your hospice using qualitative data collection and analysis methods to measure the impact of its health equity initiatives?

We received several comments in response to our request for information on the HQRP Health Equity initiative. A summary of these comments and our responses to those comments are as follows:

Comment: Many commenters supported CMS's efforts to create health equity measures. However, commenters wanted more clarity on CMS's plans for health equity measures and what measurement criteria CMS would consider applying to hospices. Comments suggested that CMS should encourage all health care providers and organizations across the continuum of care to collect and stratify patient and caregiver data based on key variables of inequities in patient care for all types of measures.

Comment: Commenters reiterated and acknowledged health disparities in hospice care and were broadly supportive of CMS' efforts to advance health equity and generally expressed appreciation for the opportunity to partner with CMS to address disparities in hospice settings. Many shared their organization's efforts to promote health equity, including staff training and hiring. Despite the overall appreciation, commenters noted that there is great variation in organizational readiness to develop and implement health equity initiatives; for example, hospice providers serving smaller rural communities may not be as far along in integrating health equity activities as larger providers associated with robust hospital systems. Similarly, other comments noted that, to varying degrees, providers may experience the following challenges in implementing a health equity framework and respective quality improvement activities: financial limitations, data collection burden, and workforce shortages. In light of these considerations, commenters requested CMS support in the form of financial and other resources (for example, trainings), ample time for hospices to develop and implement activities to improve health equity, and the use of incentive-based rather than punitive measures to promote reporting. One commenter recommended stratifying the volume and detail of data collected based on the size, independence, and geographic profile of a given hospice. Some suggested convening a Technical Expert Panel (TEP) to inform the development of health equity measures until after HOPE becomes available.

Several commenters highlighted the need for more sociodemographic and social determinants of health (SDOH) data to effectively evaluate health equity in hospice settings. Commenters suggested efforts to standardize the sociodemographic and SDOH data collected across provider settings and across third party vendors (for example, EMRs) and other tools. There was some support for the stratification of confidential data reports by sociodemographic factors. Multiple commenters also recommended incorporating SDOH items into HOPE and delaying public reporting of a health equity measure until HOPE is available.

Comment: Commenters stated that some hospice providers have made progress in recruiting and employing diverse staff to better represent historically underserved populations. Successful strategies have included job marketing and community outreach, educational efforts and partnering with colleges and universities, developing partnerships with groups and associations to promote employment and leadership opportunities, development of diversity, equity, and inclusion (DEI) recruitment teams,[27] sign on bonuses for certain qualifications (for example, bilingual), and scholarships for staff who are members of disproportionately affected populations. Several commenters highlighted the wide variation across hospices with regards to resources and progress made in diversity of staff and leadership and stated that smaller organizations may need additional resources and support to implement recruitment and retention efforts. Other commenters stated that a limited pool of applicants due to workforce shortages is a major challenge across all organizations. One commenter stated that hospice workforce diversity is not necessarily reflective of the diversity in the underlying community and that this is a broader issue which will need to be addressed through coordinated efforts, such as, to recruit more diverse student populations in healthcare and social work programs. Approaches to bridge cultural gaps between personnel and beneficiaries include community outreach and partnerships, DEI training for staff and leadership, DEI organizational assessments, centering equity in organizational mission, values, and goals, and expansion of linguistic capacities.

Comment: Several commenters responded to CMS's request for information about barriers that might prevent community members from seeking hospice care. Commenters reported that strategies to identify and address barriers include training staff, building partnerships, employing community liaisons to work with patients and caretakers, including social determinant of health (SDOH) information in social work assessments and workplans (for example, housing and food insecurity), using toolkits and resources freely available to the public on websites, including national hospice organizations' websites, and working

[27] Diversity recruiting is the practice of hiring candidates using a process that is free from bias for or against any individual or group of candidates. Diverse teams help companies to be more innovative, be more creative, and achieve better results. *https://www.dictionary.com/*.

with EMR vendors to better collect sociodemographic information.

Comment: Many commenters cited barriers to collecting data related to disparities, social determinants of health, and equity. Those barriers included a lack of uniformity and interoperability across EMRs and other tools, lack of standard definitions for sociodemographic and SDOH variables, limited communication channels for administering CAHPS and other data collection instruments, patient mistrust in providing these data, and the administrative burden of data collection.

Commenters provided recommendations to address these barriers such as the standardization of sociodemographic and SDOH data collected across systems, the use of a universal database, and the inclusion of new codes that measure patients' SDOH needs (Z codes) into hospice claims.

Comment: Commenters reported variation in how self-reported data to inform health equity are collected across hospice providers; some collect these data at referral or admissions, while others collect during social work or psychosocial assessments. Some providers are not yet collecting these data and request additional guidance. Although certain sociodemographic or social determinant of health (SDOH) data points are collected through EMR fields, commenters identified issues related to the use of these data. The issues include lack of industry standards noted by several commenters in definitions for these variables and the limits of the EMR system in how the data is stored that impacts the ability to share the data. For example, one commenter described limits with sharing the data because some self-reported variables (for example, race/ethnicity) are collected in parts of the EMR that cannot be easily shared while other variables (for example, need for interpreter services and food insecurity) are collected through other parts of the EMR system and can be shared with partner organizations for referrals and other purposes. Another commenter stated that staff at an organization can use different versions of an EMR, which results in inconsistencies in data.

Many commenters expressed a need for guidance on how to collect health equity related data (for example, sociodemographic and SDOH data points) and how to effectively use them to assess health equity impacts. Commenters indicated a strong need to identify effective methods for collecting sociodemographic and SDOH data among hospice providers. Specifically, several commenters recommended the inclusion of languages other than English (for example, need for bilingual services), whether culture was respected, sexual orientation and gender identity, expanded racial/ethnic categories to capture more detailed information, socioeconomic status, food security, community deprivation level, and caregiving status information. Suggested tools for collecting some of these data points included the CAHPS® Hospice Survey, the anticipated HOPE tool, and use of Z codes on hospice claims.

Comment: Commenters stated that most hospice providers have not yet implemented initiatives to measure the impact of health equity initiatives with qualitative data. Some hospice providers stated that they collect qualitative social determinant of health information through admissions or social work assessments. Commenters requested guidance to support better qualitative data collection and analysis and sought examples of how this has been done. Several commenters requested consideration of the wide variety of existing support, infrastructure, and funding across hospice providers when determining support, flexibility, and requirements related to health equity measurement initiatives.

Response: CMS appreciates all stakeholder feedback received on this request for information. These comments will help inform CMS's future efforts to incorporate health equity and social determinants of health into the HQRP. CMS remains committed to creating meaningful quality measures based on robust and accurate data that follows the Meaningful Measures Framework and Blueprint, without imposing unnecessary burden on providers.

In addition, we sought comments on a future structural composite measure that would address aspects of health equity. Specifically, the structural composite measure could include organizational activities to address access to and the quality of hospice care for underserved populations. The composite structural measure concept could include hospice reported data on hospice activities to address underserved populations' access to hospice care. For example, a hospice could receive a point for each domain where data are submitted to a CMS portal, regardless of the hospice's action in that domain (such as, reporting whether or not the hospice provided training for board members, leaders, staff and volunteers in culturally and linguistically appropriate services (CLAS), health equity, and implicit bias). The data could reflect the hospice's completed actions for each corresponding domain (for a total of three points) in a reporting year. A hospice could submit information such as documentation, examples, or narratives to qualify for the measure numerator. We solicited comments on how to score a domain for a hospice that submitted data reflecting no actions or partial actions in the given domain.

Examples of the domains we considered are described in the following outline. We solicited comment on each of these domains.

Domain 1: Hospice commitment to reducing disparities is strengthened when equity is a key organizational priority. Candidate domain 1 could be satisfied when a hospice submits data on its actions regarding the role of health equity and community engagement in their strategic plan. Hospices could self-report data in the reporting year about their actions in each of the following areas, and submission of data for all elements could be required to qualify for the measure numerator.

- Hospice attests whether its strategic plan includes approaches to address health equity in the reporting year.
- Hospice reports community engagement and key stakeholder activities in the reporting year.
- Hospice reports on any attempts to measure input from patients and caregivers about care disparities it may experience and recommendations or suggestions.

Domain 2: Training board members, leaders, staff and volunteers in culturally and linguistically appropriate services (CLAS),[28] health equity, and implicit bias is an important step hospices take to provide quality care to diverse populations. Candidate domain 2 could focus on hospices' diversity, equity, inclusion and CLAS training for board members, employed staff, and volunteers by capturing the following self-reported actions in the reporting year. Submission of relevant data for all elements could be required to qualify for the measure numerator.

- Hospice attests whether employed staff were trained in CLAS and culturally sensitive care mindful of social determinants of health (SDOH) in the reporting year. Example data include specific training programs or training requirements for staff.
- Hospice attests whether it provided resources to staff and volunteers about health equity, SDOH, and equity

[28] *https://www.cms.gov/About-CMS/Agency-Information/OMH/Downloads/CLAS-Toolkit-12-7-16.pdf.*

initiatives in the reporting year. Examples include the materials provided, webinars, or learning opportunities.

Domain 3: Leaders and staff could improve their capacity to address disparities by demonstrating routine and thorough attention to equity and setting an organizational culture of equity. This candidate domain could capture activities related to organizational inclusion initiatives and capacity to promote health equity. Examples of equity-focused factors include proficiency in languages other than English, experience working with populations in the service area, experience working on health equity issues, and experience working with individuals with disabilities.

Submission of relevant data for all elements could be required to qualify for the measure numerator.

- Hospice attests whether equity-focused factors were included in the hiring of hospice senior leadership, including chief executives and board of trustees, in the previous reporting year.
- Hospice attests whether equity-focused factors were included in the hiring of hospice senior leadership, including chief executives and board of trustees, is more reflective of the services area patient than in the previous reporting year.
- Hospice attests whether equity-focused factors were included in the hiring of direct patient care staff (for example, RNs, medical social workers, aides, volunteers, chaplains, or therapists) in the previous reporting year.
- Hospice attests whether equity focused factors were included in the hiring of indirect care or support staff (for example. administrative, clerical, or human resources) in the previous reporting year.

We stated that we are interested in developing health equity measures based on information collected by hospices not currently available on claims, assessments, or other publicly available data sources to support development of future quality measures. We solicited public comments on the conceptual domains and quality measures described in this section. Furthermore, we solicited public comments on publicly reporting a composite structural health equity quality measure; displaying descriptive information on Care Compare from the data hospices provide to support health equity measures; and the impact of the domains and quality measure concepts on organizational culture change.

We received several comments regarding the request for information related to a health equity structural composite measure. A summary of the comments and our responses to those comments are as follows:

Comment: Commenters were generally supportive of developing a health equity structural composite measure but recommended a number of steps for CMS to take prior to implementation and publishing of the measure. Commenters emphasized the need to engage stakeholders and strongly supported the convening of a TEP to guide the development of the health equity structural composite measure. Several commenters also requested that providers have an opportunity to review, analyze, and learn from results of the structural measure prior to CMS implementation.

Comments focused on balancing administrative and resource burdens with the benefit of the information gathered. It was suggested that CMS leverage existing data collection tools and prioritize standardization of data collected across providers. Commenters also requested assurance that the data gathered be accurate, meaningful, and actionable. Several commenters recommended that the measure more explicitly incorporate social determinants of health data. Some commenters stated that there should be a focus on the impact of health equity-related activities on patient outcomes and disparities, in addition to the domains that are discussed.

Several commenters suggested that hospice providers will need tools such as trainings, improved health IT interoperability, or other additional resources, and sufficient time to incorporate a health equity framework into their daily practice prior to beginning data collection for a structural composite measure. This was especially highlighted as a concern for under-resourced providers serving smaller and rural communities. Additionally, commenters requested that CMS postpone public reporting of hospice health equity measures to allow for HOPE implementation, testing of health equity metrics in other settings of care, and pilot testing of the structural composite measure.

Comment: Commenters recognized strategic plans are a starting point to improve health equity, and supported a structural measure domain based on organizational commitment to health equity and community engagement in strategic planning. Some commenters recommended that CMS provide more specifics regarding information to be collected from the strategic plan, such as how disparities are being measured and by which tools. Some commenters encouraged CMS to ensure that measures related to this domain provide meaningful information about an organization's engagement and partnership with stakeholders. Commenters suggested measures such as providing education on the hospice benefit to targeted demographics, facilitating communication among providers and community partners, and finding ways to engage community members in nontraditional settings to reach patients who might not otherwise receive needed hospice care. There was also a concern that this domain would not assess whether outcomes are improved as a result of making equity a key organizational priority.

Some commenters suggested that the CAHPS® Hospice Survey could be revised to include additional questions regarding caregiver experience and recommendation for improvement, but also pointed out that caregivers may not be able to answer such questions due to limited exposure to hospice before hospice election. Commenters requested hospices be afforded the time and tools to incorporate a health equity framework into their daily practices before data collection for this domain commences. One commenter recommended that CMS develop standards related to this data collection, to facilitate hospice implementation. Another commenter requested the opportunity to provide feedback on the measure once developed and prior to public reporting of data for this domain. Additionally, some commenters suggested convening a TEP to further develop this domain.

Comment: Commenters generally supported and appreciated the attention toward culturally and linguistically appropriate services (CLAS) training and other health equity trainings. In addition to supporting cultural sensitivity efforts, several commenters recognized that efforts to improve organizational understanding of social determinants of health (SDOH) are equally needed. They recommended collecting data on SDOH and sociodemographic factors that may lead to poor outcomes. Specifically, respondents suggested collecting data on access to healthy foods, neighborhood safety, housing stability, income level, education quality, and transportation availability.

Regarding CLAS and health equity trainings, one commenter suggested requesting more specific information such as training content, frequency, training evaluation results, and any documentation of patient or family member experience with CLAS received. Some commenters suggested

CMS develop or approve evidence-based trainings and/or certification available without imposing a financial burden on hospices.

Comments were mixed when considering the collection of information for this domain, with some respondents asking for more detailed data collection requirements. There was some concern about the financial burden of providing additional trainings for certain staff. Lastly, there was a request to allow hospices a period of time to become familiar with CLAS and other health equity approaches prior to implementing required reporting for this domain.

Comment: Commenters were generally supportive of the concept of setting an organizational culture of equity and of considering health equity in hiring across all levels as a means of achieving equity. Some comments particularly highlighted the importance of incorporating equity-focused factors in the hiring of senior leadership roles. However, several commenters also noted that hiring practices are not the only area in which a culture of equity can be promoted. These comments stated that the current workforce shortages are leaving employers with limited applicant pools and reduced potential to give adequate weight to equity considerations during the hiring process. Given this context, these commenters stated that focusing solely on hiring practices may not be the most appropriate approach to assessing organizational culture of equity. Commenters offered several suggestions, such as evaluating existing staff capacity to address disparities, assessing patient profile concordance with community profile, and borrowing from proposed measures in hospital and skilled nursing facility settings for this domain.

Commenters recommended providing more specific definitions of each ''equity focused factor'' and asking hospice providers to report on each of the factors. Some commenters also recommended that a TEP be convened to guide the development of the measures for this domain. Lastly, some comments noted that organizational readiness and capacity may be difficult to achieve and CMS should allow hospices time to build a culture of equity prior to adopting this domain. To facilitate the institutionalization of a culture of equity, commenters recommended that CMS develop educational opportunities for providers and establish health equity board committees to provide resources and support providers' equity work.

Response: CMS appreciates the stakeholder comments received regarding a potential structural composite measure of health equity. Public input is very valuable for the continuing development of CMS' health equity quality measurement efforts and broader commitment to health equity; a key pillar of our strategic vision as further described here, *https://www.cms.gov/files/document/health-equity-fact-sheet.pdf.* CMS will take these questions and suggestions into consideration when further refining the measure concept. CMS remains committed to creating meaningful quality measures based on robust and accurate data that follows the Meaningful Measures Framework and Blueprint, without imposing unnecessary burden on providers. Continued stakeholder engagement and measure testing will be an important component of CMS's efforts to develop this structural measure.

7. Advancing Health Information Exchange Update

The Department of Health and Human Services (HHS) has a number of initiatives designed to encourage and support the adoption of interoperable health information technology and to promote nationwide health information exchange to improve health care and patient access to their digital health information.

To further interoperability in post-acute care settings, CMS and the Office of the National Coordinator for Health Information Technology (ONC) participate in the Post-Acute Care Interoperability Workgroup (PACIO) to facilitate collaboration with industry stakeholders to develop Health Level Seven International® (HL7) Fast Healthcare Interoperability Resources® (FHIR) standards.[29] These standards could support the exchange and reuse of patient assessment data derived from the Minimum Data Set (MDS), Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF–PAI), LTCH Continuity Assessment Record and Evaluation (CARE) Data Set (LCDS), Outcome and Assessment Information Set (OASIS), and other sources. The PACIO Project has focused on HL7 FHIR implementation guides for functional status, cognitive status and new use cases on advance directives, re-assessment timepoints, and Speech Language, Swallowing, Cognitive communication and Hearing (SPLASCH) pathology. We encourage PAC provider and health IT vendor participation as the efforts advance.

The CMS Data Element Library (DEL) continues to be updated and serves as a resource for PAC assessment data elements and their associated mappings to health IT standards, such as Logical Observation Identifiers Names and Codes (LOINC) and Systematized Nomenclature of Medicine Clinical Terms (SNOMED). The DEL furthers CMS' goal of data standardization and interoperability. Standards in the DEL (*https://del.cms.gov/DELWeb/pubHome*) can be referenced on the CMS website and in the ONC Interoperability Standards Advisory (ISA). The 2022 ISA is available at *https://www.healthit.gov/isa*.

The 21st Century Cures Act (Cures Act) (Pub. L. 114–255, enacted December 13, 2016) required HHS and ONC to take steps to further interoperability for providers and settings across the care continuum. Section 4003(b) of the Cures Act required ONC to take steps to advance interoperability through the development of a trusted exchange framework and common agreement aimed at establishing full network-to-network exchange of health information nationally. On January 18, 2022, ONC announced a significant milestone by releasing the Trusted Exchange Framework [30] and Common Agreement Version 1.[31] The Trusted Exchange Framework is a set of non-binding principles for health information exchange, and the Common Agreement is a contract that advances those principles. The Common Agreement and the incorporated by reference Qualified Health Information Network Technical Framework Version 1 [32] establish the technical infrastructure model and governing approach for different health information networks and their users to securely share clinical information with each other—all under commonly agreed to terms. The technical and policy architecture of how exchange occurs under the Common Agreement follows a network-of-networks structure, which allows for connections at different levels and is inclusive of many different types of entities at those different levels, such as health information networks, healthcare practices, hospitals, public health agencies, and Individual Access

[31] Common Agreement for Nationwide Health Information Interoperability Version 1 (Jan. 2022), *https://www.healthit.gov/sites/default/files/page/2022-01/Common_Agreement_for_Nationwide_Health_Information_Interoperability_Version_1.pdf.*

[32] Qualified Health Information Network (QHIN) Technical Framework (QTF) Version 1.0 (Jan. 2022), *https://rce.sequoiaproject.org/wp-content/uploads/2022/01/QTF_0122.pdf.*

Services (IAS). For more information, we refer readers to *https://www.healthit.gov/topic/interoperability/trusted-exchange-framework-and-common-agreement.*

We invited readers to learn more about these important developments and how they are likely to affect hospices.

Comment: We received several comments on the information provided in this section. Commenters expressed support for efforts across CMS and ONC to advance development of standards and certification for health IT promoting health information exchange focused on enhancing person-centered longitudinal care and exchange of clinical data. Commenters specifically recommended that CMS and ONC develop guidance and expectations around the collection and sharing of SDOH information for hospices and other post-acute care providers, as well as health IT vendors serving these providers, to ensure there are consistent requirements supporting interoperability of this data.

However, commenters identified a lack of interoperable health IT in hospices and other post-acute care settings as a major barrier to sharing health information quickly and easily across care settings. Commenters indicated that hospice and other post-acute care settings were not eligible for previous incentives to purchase technology certified under the ONC Health IT Certification Program, and that this has led to disparities in adoption between post-acute care and other settings that have received incentives. Commenters recommended that HHS continue to explore opportunities to use existing authorities to support technology adoption by hospice and other post-acute care providers in order to advance interoperability. Specific to exchange of SDOH information, commenters highlighted lack of clarity among stakeholders around how privacy rules apply to the sharing of this data as a potential barrier.

Finally, commenters provided a number of specific recommendations for new resources and enhancements to existing resources that HHS could pursue to assist hospice and other post-acute care providers with advancing data standardization.

Response: We appreciate the comments provided on interoperability initiatives and will take these comments into consideration as we coordinate with Federal partners, including ONC, on these initiatives, and to inform future rulemaking.

C. CAA 2021, Section 407. Establishing Hospice Program Survey and Enforcement Procedures Under the Medicare Program; Provisions Update

Division CC, section 407 of the CAA 2021, amended Part A of Title XVIII of the Act to add a new section 1822, and amended sections 1864(a) and 1865(b) of the Act, establishing new hospice program survey and enforcement requirements, required public reporting of survey information, and a new hospice hotline.

This law (CAA 2021) requires public reporting of hospice program surveys conducted by both State Agencies (SAs) and Accrediting Organizations (AOs), as well as enforcement actions taken as a result of these surveys, on the CMS website in a manner that is prominent, easily accessible, searchable, and presented in a readily understandable format. It removes the prohibition at section 1865(b) of the Act of public disclosure of hospice surveys performed by AOs, and requires that AOs use the same survey deficiency reports as SAs (Form CMS–2567, ''Statement of Deficiencies'' or a successor form) to report survey findings.

The law also requires hospice programs to measure and reduce inconsistency in the application of survey results among all surveyors, and requires the Secretary to provide comprehensive training and testing of SA and AO hospice program surveyors, including training with respect to review of written plans of care. The statute prohibits SA surveyors from surveying hospice programs for which they have worked in the last 2 years or in which they have a financial interest, requires hospice program SAs and AOs to use a multidisciplinary team of individuals for surveys conducted with more than one surveyor to include at least one registered nurse, and provides that each SA must establish a dedicated toll-free hotline to collect, maintain, and update information on hospice programs and to receive complaints.

The provisions in the CAA 2021 also direct the Secretary to create a Special Focus Program (SFP) for poor-performing hospice programs, set out authority for imposing enforcement remedies for noncompliant hospice programs, and require the development and implementation of a range of remedies as well as procedures for appealing determinations regarding these remedies. These remedies can be imposed instead of, or in addition to, termination of the hospice programs' participation in the Medicare program. The remedies include civil money penalties (CMPs), suspension of all or part of payments, and appointment of temporary management to oversee operations.

In the CY 2022 Home Health Prospective Payment System (HH PPS) final rule (86 FR 62240), we addressed provisions related to the hospice survey enforcement and other activities described in this section. A summary of the finalized CAA provisions can be found in the CY 2022 HH PPS final rule: *https://www.govinfo.gov/content/pkg/FR-2021-11-09/pdf/2021-23993.pdf.* We finalized all the CAA provisions in CY 2022 rulemaking except for the SFP. As outlined in the CY 2022 HH PPS final rule, we stated that we would take into account comments that we received and work on a revised proposal, seeking additional collaboration with stakeholders to further develop the methodology for the SFP. Since the publication of the CY 2022 HH PPS final rule, we have decided to initiate a hospice Technical Expert Panel (TEP) in CY 2022. Accordingly, CMS plans to use the TEP findings to further develop a proposal on the methodology for establishing the hospice SFP, and we plan to include a proposal implementing an SFP in the FY 2024 Hospice Wage Index and Payment Rate Update proposed rule.

We received several comments regarding the SFP. A summary of those comments and our responses to those comments are as follows:

Comment: Commenters were generally supportive of CMS's efforts to establish an SFP and convene a TEP to provide feedback on a potential methodology for identifying hospices in the SFP. Many of these commenters expressed support for the inclusion of a wide range of stakeholders to be considered for TEP with knowledge related to the hospice survey process including hospice staff who directly interact with patients and surveyors.

A couple of commenters encouraged CMS to forgo the use of a quota system, as utilized in the Special Focus Facility (SFF) Program for nursing homes, in the new SFP for hospices. The commenters recommended CMS consider a national centralized SFP selection methodology rather than deferring to state priorities or agencies. Other commenters expressed support for standardizing the survey process, including standardizing surveyor training, before fully implementing the SFP to ensure there are no variances to how entities conduct their surveys.

Response: We appreciate the commenters support for the SFP. We will consider the comments and TEP feedback as CMS develops the SFP methodology.

V. Collection of Information

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

VI. Regulatory Impact Analysis

A. Statement of Need

This final rule meets the requirements of our regulations at § 418.306(c) and (d), which require annual issuance, in the **Federal Register**, of the hospice wage index based on the most current available CMS hospital wage data, including any changes to the definitions of CBSAs or previously used MSAs, as well as any changes to the methodology for determining the per diem payment rates. This final rule also updates payment rates for each of the categories of hospice care, described in § 418.302(b), for FY 2023 as required under section 1814(i)(1)(C)(ii)(VII) of the Act. The payment rate updates are subject to changes in economy-wide productivity as specified in section 1886(b)(3)(B)(xi)(II) of the Act. Lastly, section 3004 of the Affordable Care Act amended the Act to authorize a quality reporting program for hospices, and this rule does not change the requirements for the HQRP in accordance with section 1814(i)(5) of the Act.

B. Overall Impacts

We estimate that the aggregate impact of the payment provisions in this final rule would result in an estimated increase of $825 million in payments to hospices, resulting from the hospice payment update percentage of 3.8 percent for FY 2023. The impact analysis of this rule represents the projected effects of the changes in hospice payments from FY 2022 to FY 2023. In order to calculate the wage index standardization factor, we simulate total payments using FY 2021 hospice utilization claims data; in this case claims accessed from the CCW on May 10, 2022 with the FY 2022 wage index (pre-floor, pre-reclassified hospital wage index with the hospice floor, without the 5-percent cap on wage index decreases) and FY 2022 payment rates, and compare it to our simulation of total payments using the FY 2023 hospice wage index (pre-floor, pre-reclassified hospital wage index with hospice floor, with the 5-percent cap on wage index decreases) and FY 2022 payment rates. By dividing payments for each level of care (RHC days 1 through 60, RHC days 61+, CHC, IRC, and GIP) using the FY 2022 wage index and payment rates for each level of care by the FY 2023 wage index and FY 2022 payment rates, we obtain a wage index standardization factor for each level of care.

Certain events may limit the scope or accuracy of our impact analysis, because such an analysis is susceptible to forecasting errors due to other changes in the forecasted impact time period. The nature of the Medicare program is such that the changes may interact, and the complexity of the interaction of these changes could make it difficult to predict accurately the full scope of the impact upon hospices.

We have examined the impacts of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action that is likely to result in a rule: (1) having an annual effect on the economy of $100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as ''economically significant''); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). Based on our estimates, OMB's Office of Information and Regulatory Affairs has determined this final rule is ''economically significant'' as measured by the $100 million threshold, and hence also a major rule under Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act). Accordingly, we have prepared an RIA that, to the best of our ability, presents the costs and benefits of the rulemaking.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.

A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). We estimate that this rulemaking is ''economically significant'' as measured by the $100 million threshold, and hence also a major rule under the Congressional Review Act. Accordingly, we have prepared a RIA that, to the best of our ability presents the costs and benefits of the rulemaking.

C. Detailed Economic Analysis

1. Hospice Payment Update for FY 2023

The FY 2023 hospice payment impacts appear in Table 10. We tabulate the resulting payments according to the classifications (for example, provider type, geographic region, facility size), and compare the difference between current and future payments to determine the overall impact. The first column shows the breakdown of all hospices by provider type and control (non-profit, for-profit, government, other), facility location, facility size. The second column shows the number of hospices in each of the categories in the first column. The third column shows the effect of using the FY 2023 updated wage index data with a 5-percent cap on wage index decreases. This represents the effect of moving from the FY 2022 hospice wage index to the FY 2023 hospice wage index with a 5-percent cap on wage index decreases. The aggregate impact of the changes in column three is zero percent, due to the hospice wage index standardization factor. However, there are distributional effects of the FY 2023 hospice wage index. The fourth column shows the effect of the hospice payment update percentage as mandated by section 1814(i)(1)(C) of the Act, and is consistent for all providers. The hospice payment update percentage of 3.8 percent is based on the 4.1 percent inpatient hospital market basket update,

reduced by a 0.3 percentage point productivity adjustment. The fifth column shows the effect of all the changes on FY 2023 hospice payments. It is projected that aggregate payments would increase by 3.8 percent; assuming hospices do not change their billing practices. As illustrated in Table 10, the combined effects of all the proposals vary by specific types of providers and by location. We note that simulated payments are based on utilization in FY 2021 as seen on Medicare hospice claims (accessed from the CCW in May 10, 2022) and only include payments related to the level of care and do not include payments related to the service intensity add-on.

As illustrated in Table 10, the combined effects of all the proposals vary by specific types of providers and by location.

TABLE 10: Impact to Hospices for FY 2023

Hospice Subgroup	Hospices	FY 2023 Updated Wage Data With 5% Cap	FY 2023 Hospice Payment Update (%)	Overall Total Impact for FY 2023

2. Regulatory Review Cost Estimation

If regulations impose administrative costs on private entities, such as the time needed to read and interpret this rule, we should estimate the cost associated with regulatory review. Due to the uncertainty involved with accurately quantifying the number of entities that will review the rule, we assume that the total number of unique commenters on ~~last~~ this year's proposed rule will be the number of reviewers of this final rule. We acknowledge that this assumption may understate or overstate the costs of reviewing this rule. It is possible that not all commenters reviewed ~~last~~ this year's proposed rule in detail, and it is also possible that some reviewers chose not to comment on the proposed rule. For these reasons we thought that the number of past commenters would be a fair estimate of the number of reviewers of this final rule. We also recognize that different types of entities are in many cases affected by mutually exclusive sections of this rule, and therefore for the purposes of our estimate we assume that each reviewer reads approximately 50 percent of the rule.

Using the occupational wage information from the BLS for medical and health service managers (Code 11–9111) from May 2020; we estimate that the cost of reviewing this rule is $115.22 per hour, including overhead and fringe

benefits (*https://www.bls.gov/oes/current/oes_nat.htm*). This rule consists of approximately 29,289 words. Assuming an average reading speed of 250 words per minute, it would take approximately 0.98 hours for the staff to review half of it. For each hospice that reviews the rule, the estimated cost is $112.49 (0.98 hours × $115.22). Therefore, we estimate that the total cost of reviewing this regulation is $8,211.72 ($112.49 × 73 reviewers).

D. Alternatives Considered

Since the hospice payment update percentage is determined based on statutory requirements, we did not consider not updating hospice payment rates by the payment update percentage. The 3.8 percent hospice payment update percentage for FY 2023 is based on a 4.1 percent inpatient hospital market basket update, reduced by a 0.3 percentage point productivity adjustment. Payment rates since FY 2002 have been updated according to section 1814(i)(1)(C)(ii)(VII) of the Act, which states that the update to the payment rates for subsequent years must be the market basket percentage for that FY. Section 3401(g) of the Affordable Care Act also mandates that, starting with FY 2013 (and in subsequent years), the hospice payment update percentage will be annually reduced by changes in economy-wide productivity as specified in section 1886(b)(3)(B)(xi)(II) of the Act.

E. Accounting Statement

As required by OMB Circular A–4 (available at *https://www.whitehouse.gov/wp-content/uploads/legacy_drupal_files/omb/circulars/A4/a-4.pdf*), in Table 11, we have prepared an accounting statement showing the classification of the expenditures associated with the provisions of this rule. Table 11 provides our best estimate of the possible changes in Medicare payments under the hospice benefit as a result of the policies in this rule. This estimate is based on the data for 5,253 hospices in our impact analysis file, which was constructed using FY 2021 claims available in May 2022. All expenditures are classified as transfers to hospices.

TABLE 11: Accounting Statement: Classification of Estimated Transfers and Costs, From FY 2022 to FY 2023

Category	Transfers
Annualized Monetized Transfers	$ 825 million*
From Whom to Whom?	Federal Government to Medicare Hospices

*The increase of $825 million in transfer payments is a result of the 3.8 percent hospice payment update compared to payments in FY 2022.

F. Regulatory Flexibility Act (RFA)

The RFA requires agencies to analyze options for regulatory relief of small businesses if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. We consider all hospices as small entities as that term is used in the RFA. The North American Industry Classification System (NAICS) was adopted in 1997 and is the current standard used by the Federal statistical agencies related to the United States business economy. There is no NAICS code specific to hospice services. Therefore, we utilized the NAICS United States industry title ''Home Health Care Services'' and corresponding NAICS code 621610 in determining impacts for small entities. The NAICS code 621610 has a size standard of $16.5 million.[33] Table 12 shows the number of firms, revenue, and estimated impact per home health care service category.

[33] *https://www.sba.gov/sites/default/files/2019-08/SBA%20Table%20of%20Size%20Standards_Effective%20Aug%2019%2C%202019_Rev.pdf.*

TABLE 12: NUMMBER OF FIRMS, REVENUE, AND ESTIMATED IMPACT OF HOME HEALTH CARE SERVICES BY NAICS CODE 621610

NAICS Code	NAICS Description	Enterprise Size	Number of Firms	Receipts ($1,000)	Estimated Impact ($1,000) per Enterprise Size
621610	Home Health Care Services	<100	5,861	210,697	$35.95
621610	Home Health Care Services	100-499	5,687	1,504,668	$264.58
621610	Home Health Care Services	500-999	3,342	2,430,807	$727.35
621610	Home Health Care Services	1,000-2,499	4,434	7,040,174	$1,587.77
621610	Home Health Care Services	2,500-4,999	1,951	6,657,387	$3,412.29
621610	Home Health Care Services	5,000-7,499	672	3,912,082	$5,821.55
621610	Home Health Care Services	7,500-9,999	356	2,910,943	$8,176.81
621610	Home Health Care Services	10,000-14,999	346	3,767,710	$10,889.34
621610	Home Health Care Services	15,000-19,999	191	2,750,180	$14,398.85
621610	Home Health Care Services	≥20,000	961	51,776,636	$53,877.87
621610	Home Health Care Services	Total	23,801	82,961,284	$3,485.62

Source: Data obtained from United States Census Bureau table "us_6digitnaics_rcptsize_2017" (SOURCE: 2017 County Business Patterns and Economic Census) Release Date: 5/28/2021: https://www2.census.gov/programs-surveys/susb/tables/2017/
Notes: Estimated impact is calculated as Receipts ($1,000)/Number of firms.

The Department of Health and Human Services practice in interpreting the RFA is to consider effects economically ''significant'' only if greater than 5 percent of providers reach a threshold of 3 to 5 percent or more of total revenue or total costs. The majority of hospice visits are Medicare paid visits and therefore the majority of hospice's revenue consists of Medicare payments. Based on our analysis, we conclude that the policies finalized in this rule would result in an estimated total impact of 3 to 5 percent or more on Medicare revenue for greater than 5 percent of hospices. Therefore, the Secretary has determined that this hospice final rule would have significant economic impact on a substantial number of small entities. We estimate that the net impact of the policies in this rule is a 3.8 percent or approximately $825 million in increased revenue to hospices in FY 2023. The 3.8 percent increase in expenditures when comparing FY 2023 payments to estimated FY 2022 payments is reflected in the last column of the first row in Table 10 and is driven solely by the impact of the hospice payment update percentage reflected in the fourth column of the impact table. In addition, small hospices would experience a greater estimated increase (4.1 percent), compared to large hospices (3.8 percent) due to the policy to cap wage index decreases at 5 percent. Further detail is presented in Table 10, by hospice type and location.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of an MSA and has fewer than 100 beds. This rule will only affect hospices; therefore, the Secretary has determined that this rule will not have a significant impact on the operations of a substantial number of small rural hospitals (see Table 10).

G. Unfunded Mandates Reform Act (UMRA)

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2022, that threshold is approximately $165 million. This rule is not anticipated to have an effect on state, local, or tribal governments, in the aggregate, or on the private sector of $165 million or more in any 1 year.

H. Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has Federalism implications. We have reviewed this rule under these criteria of Executive Order 13132, and have determined that it will not impose substantial direct costs on state or local governments.

I. Conclusion

We estimate that aggregate payments to hospices in FY 2023 will increase by $825 million as a result of the market basket update, compared to payments in FY 2022. We estimate that in FY 2023, hospices in both rural and urban areas will experience, on average, a 3.8 percent increase in estimated payments compared to FY 2022. Hospices providing services in the Pacific and West South Central regions would experience the largest estimated increases in payments of 4.4 percent and 4.3 percent, respectively. Hospices serving patients in areas in the New England region would experience, on average, the lowest estimated increase of 3.3 percent in FY 2023 payments.

This final regulation is subject to the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*) and has been transmitted to the Congress and the Comptroller General for review.

Chiquita Brooks-LaSure, Administrator of the Centers for Medicare & Medicaid Services, approved this document on July 22, 2022.

List of Subjects in 42 CFR Part 418

Health facilities, Hospice care, Medicare, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR part 418 as set forth below.

PART 418—HOSPICE CARE

■ 1. The authority citation for part 418 continues to read as follows:

Authority: 42 U.S.C. 1302 and 1395hh.

■ 2. Section § 418.306 is amended by revising paragraph (c) to read as follows:

§ 418.306 Annual update of the payment rates and adjustment for area wage differences.

* * * * *

(c) *Adjustment for wage differences.* (1) Each hospice's labor market is determined based on definitions of Metropolitan Statistical Areas (MSAs) issued by OMB. CMS will issue annually, in the **Federal Register**, a hospice wage index based on the most current available CMS hospital wage data, including changes to the definition of MSAs. The urban and rural area geographic classifications are defined in § 412.64(b)(1)(ii)(A) through (C) of this chapter. The payment rates established by CMS are adjusted by the Medicare contractor to reflect local differences in wages according to the revised wage data.

(2) Beginning on October 1, 2022, CMS applies a cap on decreases to the hospice wage index such that the wage index applied to a geographic area is not less than 95 percent of the wage index applied to that geographic area in the prior fiscal year.

BILLING CODE 4120–01–P

Proposed Rules

Federal Register
Vol. 87, No. 145
Friday, July 29, 2022

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Part 431

Appliance Standards and Rulemaking Federal Advisory Committee: Notice of Intent To Establish a Working Group for Commercial Unitary Air Conditioners and Heat Pumps To Negotiate a Notice of Proposed Rulemaking for Test Procedures and Energy Conservation Standards

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of intent and solicitation of nominations for membership.

SUMMARY: The U.S. Department of Energy (''DOE'' or ''the Department'') is giving notice that DOE intends to establish a negotiated rulemaking working group under the Appliance Standards and Rulemaking Federal Advisory Committee (''ASRAC'') in accordance with the Federal Advisory Committee Act (''FACA'') and the Negotiated Rulemaking Act (''NRA'') to negotiate proposed test procedures and amended energy conservation standards commercial unitary air conditioners and heat pumps (''CUACs and CUHPs''). The purpose of the working group will be to discuss and, if possible, reach consensus on a proposed rule regarding test procedures and energy conservation standards for CUACs and CUHPs, as authorized by the Energy Policy and Conservation Act, as amended (''EPCA''). The working group will consist of representatives of parties having a defined stake in the outcome of the proposed standards and/or test procedure, and will consult as appropriate with a range of experts on technical issues. DOE is hereby soliciting nominations for members of the CUAC and CUHP working group. Application packages should be submitted to DOE by August 12, 2022.

DATES: Nominations of membership must be received on or before August 12, 2022. DOE will not consider any nominations received via mail or after midnight on August 12, 2022.

ADDRESSES: The nominee's name, resume, biography, and any letters of support must be submitted in electronic format via email to *asrac@ee.doe.gov.* Any requests for further information should also be sent via email to *asrac@ee.doe.gov*

FOR FURTHER INFORMATION CONTACT: John Cymbalsky, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 586–7335. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Authority
II. Background
III. Proposed Negotiating Procedures
IV. Comments Requested
V. Public Participation

I. Authority

DOE is announcing its intent to negotiate proposed test procedures and amended energy conservation standards for CUACs and CUHPs under the authority of sections 563 and 564 of the NRA (5 U.S.C. 561–570, Pub. L. 104–320). DOE is seeking to develop proposals to amend the current test procedures and standards through a negotiated rulemaking process under the authority of EPCA, 42 U.S.C. 6311(1) and 42 U.S.C. 6291 *et seq.*

II. Background

On July 21, 2022, the ASRAC met and made a recommendation to form a CUAC and CUHP subcommittee to meet, discuss, and, if possible, reach consensus on a proposed rule for the test procedures and energy efficiency standards for CUACs and CUHPs. For purposes of this document, the ASRAC subcommittee at issue will be referred to as the ''working group.'' As required by the NRA, DOE is giving notice that it is establishing a working group under ASRAC to discuss proposed amended test procedures and energy efficiency requirements for CUACs and CUHPs. The working group will be established and function as a subcommittee of ASRAC in accordance with the provisions of the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App. 2.

A. Negotiated Rulemaking

DOE is supporting the use of the negotiated rulemaking process to discuss and develop proposed test procedures and amended energy conservation standards for CUACs and CUHPs. The primary reason for using the negotiated rulemaking process for this equipment is that stakeholders strongly support a consensual rulemaking effort. DOE believes such a regulatory negotiation process will be less adversarial and better suited to resolving complex technical issues. An important virtue of negotiated rulemaking is that it allows expert dialog that is much better than traditional techniques at getting the facts and issues right and will result in a proposed rule that will effectively reflect Congressional intent.

A regulatory negotiation will enable DOE to engage in direct and sustained dialog with informed, interested, and affected parties when drafting the regulation, rather than obtaining input during a public comment period after developing and publishing a proposed rule. A rule drafted by negotiation with informed and affected parties is expected to be potentially more pragmatic and more easily implemented than a rule arising from the traditional process. Such rulemaking improvement is likely to provide the public with the full benefits of the rule while minimizing the potential negative impact of a proposed regulation conceived or drafted without the full prior input of outside knowledgeable parties. Because a negotiating working group includes representatives from the major stakeholder groups, including consumers, affected by or interested in the rule, the number of public comments on the proposed rule may be decreased. DOE anticipates that there will be a need for fewer substantive changes to a proposed rule developed under a regulatory negotiation process prior to the publication of a final rule.

B. The Concept of Negotiated Rulemaking

Usually, DOE develops a proposed rulemaking using Department staff and consultant resources. Congress noted in the NRA, however, that regulatory development may ''discourage the affected parties from meeting and

communicating with each other, and may cause parties with different interests to assume conflicting and antagonistic positions * * *.'' 5 U.S.C. 561(2)(2). Congress also stated that ''adversarial rulemaking deprives the affected parties and the public of the benefits of face-to-face negotiations and cooperation in developing and reaching agreement on a rule. It also deprives them of the benefits of shared information, knowledge, expertise, and technical abilities possessed by the affected parties.'' 5 U.S.C. 561(2)(3).

Using negotiated rulemaking to develop a proposed rule differs fundamentally from the Department centered process. In negotiated rulemaking, a proposed rule is developed by an advisory committee or a working group established by the advisory committee, in accordance with the provisions of FACA, 5 U.S.C. App. 2, composed of members chosen to represent the various interests that will be significantly affected by the rule. The goal of the advisory committee or its working group is to reach consensus on the treatment of the major issues involved with the rule. The process starts with the Department's careful identification of all interests potentially affected by the rulemaking under consideration. To help with this identification, the Department publishes a notice of intent such as this one in the **Federal Register**, identifying a preliminary list of interested parties and requesting public comment on that list. Following receipt of comments, the Department establishes an advisory committee or advisory committee working group representing the full range of stakeholders to negotiate a consensus on the terms of a proposed rule. Representation on the advisory committee or its working group may be direct; that is, each member may represent a specific interest, or may be indirect, such as through trade associations and/or similarly situated parties with common interests. The Department is a member of the advisory committee or working group and represents the Federal government's interests. The advisory committee or working group chair is assisted by a neutral mediator who facilitates the negotiation process. The role of the mediator, also called a facilitator, is to apply proven consensus-building techniques to the advisory committee or working group process.

If the advisory committee itself is undertaking the negotiation, once the committee reaches consensus on the provisions of a proposed rule and recommends such consensus to the Department, the Department, consistent with its legal obligations, may use such consensus as the basis of its proposed rule, which then is published in the **Federal Register**. If a working group of the advisory committee is undertaking the negotiation, once the working group reaches consensus on the provisions of a proposed rule, a recommendation is made to the advisory committee. The advisory committee may then, consistent with its legal obligations, use such consensus as the basis for making a recommendation to the Department of a proposed rule. The Department, consistent with its legal obligations, may use such consensus as the basis of its proposed rule, which then is published in the **Federal Register**. This publication provides the required public notice and provides for a public comment period. Other participants and other interested parties retain their rights to comment, participate in an informal hearing (if requested), and request judicial review. DOE anticipates, however, that the preproposal consensus agreed upon by the advisory committee will narrow any issues in the subsequent rulemaking.

C. Proposed Rulemaking for Test Procedures and Energy Conservation Standards and Energy Conservation Standards Regarding CUACs and CUHPs

The NRA enables DOE to establish an advisory committee or working group under the advisory committee if it is determined that the use of the negotiated rulemaking process is in the public interest. DOE intends to develop Federal regulations that build on the depth of experience accrued in both the public and private sectors in implementing standards and programs.

DOE is supporting the use of the regulatory negotiation process in order to provide for obtaining a diverse array of in-depth input, as well as an opportunity for increased collaborative discussion from both private-sector stakeholders and government officials who are familiar with the energy efficiency of CUACs and CUHPs.

D. Department Commitment

In initiating this regulatory negotiation process to develop test procedures and amended energy conservation standards for CUACs and CUHPs, DOE is making a commitment to provide adequate resources to facilitate timely and successful completion of the process. This commitment includes making the process a priority activity for all representatives, components, officials, and personnel of the Department who need to be involved in the rulemaking, from the time of initiation until such time as a final rule is issued or the process is expressly terminated. DOE will provide administrative support for the process and will take steps to ensure that the advisory committee or its working group has the dedicated resources it requires to complete its work in a timely fashion. Specifically, DOE will make available the following support services: properly equipped space adequate for public meetings and caucuses; logistical support; word processing and distribution of background information; the service of a facilitator; and such additional research and other technical assistance as may be necessary. All meetings will provide an opportunity for all members of the working group and other interested parties to participate by webinar. While DOE strongly encourages members to participate in person, DOE realizes that travel costs may prohibit in-person attendance. Prospective members, therefore, should not allow travel costs to affect their decision to apply for membership.

To the maximum extent possible consistent with the legal obligations of the Department, DOE will use the consensus of the advisory committee as the basis for the rule the Department proposes for public notice and comment.

E. Negotiating Consensus

As discussed, the negotiated rulemaking process differs fundamentally from the usual process for developing a proposed rule. Negotiation enables interested and affected parties to discuss various approaches to issues rather than asking them only to respond to a proposal developed by the Department. The negotiation process involves a mutual education of the various parties on the practical concerns about the impact of standards. Each advisory committee or working group member participates in resolving the interests and concerns of other members, rather than leaving it up to DOE to evaluate and incorporate different points of view.

A key principle of negotiated rulemaking is that agreement is by consensus of all the interests. Thus, no one interest, or group of interests is able to control the process. The NRA defines consensus as the unanimous concurrence among interests represented on a negotiated rulemaking committee or working group, unless the committee or its working group itself unanimously agrees to use a different definition. 5 U.S.C. 562. In addition, experience has demonstrated that using a trained mediator to facilitate this

process will assist all parties, including DOE, in identifying their real interests in the rule, and thus will enable parties to focus on and resolve the important issues.

III. Proposed Negotiating Procedures

A. Key Issues for Negotiation

The following issues and concerns will underlie the work of the Negotiated Rulemaking Committee on CUACs and CUHPs:

- Test procedures for CUACs and CUHPs; and
- Energy Conservation Standards for CUACs and CUHPs.

To examine the underlying issues outlined above, and others not yet articulated, all parties in the negotiation will need DOE to provide data and an analytic framework complete and accurate enough to support their deliberations. DOE's analyses must be adequate to inform a prospective negotiation.

B. Formation of Working Group

A working group will be formed and operated in full compliance with the requirements of FACA and in a manner consistent with the requirements of the NRA. DOE has determined that the working group shall not exceed 25 members. The Department believes that more than 25 members would make it difficult to conduct effective negotiations. DOE is aware that there may be many more potential participants than there are membership slots on the working group. The Department does not believe, nor does the NRA contemplate, that each potentially affected group must participate directly in the negotiations; nevertheless, each affected interest can be adequately represented. To have a successful negotiation, it is important for interested parties to identify and form coalitions that adequately represent significantly affected interests. To provide adequate representation, those coalitions must agree to support, both financially and technically, a member of the working group whom they choose to represent their interests.

DOE recognizes that when it establishes or amends energy efficiency standards and test procedures for residential products and commercial equipment, various segments of society may be affected in different ways, in some cases producing unique ''interests'' in a proposed rule based on income, gender, or other factors. The Department will pay attention to providing that any unique interests that have been identified, and that may be significantly affected by the proposed rule, are represented.

FACA also requires that members of the public have the opportunity to attend meetings of the full committee and speak or otherwise address the committee during the public comment period. In addition, any member of the public is permitted to file a written statement with the advisory committee. DOE plans to follow these same procedures in conducting meetings of the working group.

C. Interests Involved/Working Group Membership

DOE anticipates that the working group will comprise no more than 25 members who represent affected and interested stakeholder groups, at least one of whom must be a member of the ASRAC. As required by FACA, the Department will conduct the negotiated rulemaking with particular attention to ensuring full and balanced representation of those interests that may be significantly affected by the proposed rule amending standards for CUACs and CUHPs. Section 562 of the NRA defines the term ''interest'' as ''with respect to an issue or matter, multiple parties which have a similar point of view or which are likely to be affected in a similar manner.'' Listed are parties the Department to date has identified as being ''significantly affected'' by a proposed rule regarding the energy efficiency of CUACs and CUHPs.

- The Department of Energy;
- States;
- Trade associations representing installers and distributors of CUACs and CUHPs;
- Heating and cooling system designers and engineers;
- Component manufacturers and related suppliers;
- Utilities;
- Energy efficiency/environmental advocacy groups;
- Commercial building owners; and
- Commercial building tenants.

One purpose of this notice of intent is to determine whether Federal regulations for CUACs and CUHPs will significantly affect interests that are not listed previously. DOE invites comment and suggestions on its initial list of significantly affected interests and encourages all interested parties and interests to apply for the Working Group.

Members may be individuals or organizations. If the effort is to be fruitful, participants on the working group should be able to fully and adequately represent the viewpoints of their respective interests. This document gives notice of DOE's process to other potential participants and affords them the opportunity to request representation in the negotiations. Those who wish to nominate members to the working group, should submit an application package to DOE, in accordance with the public participation procedures outlined in the **DATES** and **ADDRESSES** sections of this notice of intent. Qualified individuals can self-nominate or be nominated by any individual or organization. Nominators should submit an application package which includes:

- The nominee's current resume or curriculum vitae and contact information, including mailing address, email address, and telephone number;
- A letter of interest, which includes:
  - A summary of how the nominee's experience and expertise would support the working group's objectives;
  - The interest the nominee would represent in the working group; and
  - A description of other assets (such as data or modeling tools) the nominee could provide to support the working group's objectives.

Membership of the working group is likely to involve:

- Attendance (in person preferable) at approximately ten (10), one (1)- to two (2)- day meetings (with the potential for two (2) additional one (1)- or two (2)-day meetings);
- Travel costs to those meetings, if participating in person; and
- Preparation time for those meetings.

Members serving on the working group will not receive compensation for their services. Interested parties who are not selected for membership on the working group may make valuable contributions to this negotiated rulemaking effort in any of the following ways:

- The person may request to be placed on the working group mailing list and submit written comments as appropriate.
- The person may attend working group meetings, which are open to the public; caucus with his or her interest's member on the working group; or even address the working group during the public comment portion of the working group meeting.
- The person could assist the efforts of a workgroup that the working group might establish.

A working group may establish informal workgroups, which usually are asked to facilitate committee deliberations by assisting with various technical matters (*e.g.,* researching or preparing summaries of the technical literature or comments on specific matters such as economic issues). Workgroups also might assist in estimating costs or drafting regulatory

text on issues associated with the analysis of the costs and benefits addressed, or formulating drafts of the various provisions and their justifications as previously developed by the working group. Given their support function, workgroups usually consist of participants who have expertise or particular interest in the technical matter(s) being studied. Because it recognizes the importance of this support work for the working group, DOE will provide appropriate technical expertise for such workgroups.

D. Good Faith Negotiation

Every working group member must be willing to negotiate in good faith and have the authority, granted by his or her constituency, to do so. The first step is to ensure that each member has good communications with his or her constituencies. An intra-interest network of communication should be established to bring information from the support organization to the member at the table, and to take information from the table back to the support organization. Second, each organization or coalition therefore should designate as its representative a person having the credibility and authority to ensure that needed information is provided and decisions are made in a timely fashion. Negotiated rulemaking can require the appointed members to give a significant sustained time commitment for as long as the duration of the negotiated rulemaking. Other qualities of members that can be helpful are negotiating experience and skills, familiarity with using CUACs and CUHPs systems as a consumer, and/or sufficient technical knowledge to participate in substantive negotiations.

Certain concepts are central to negotiating in good faith. One is the willingness to bring all issues to the bargaining table in an attempt to reach a consensus, as opposed to keeping key issues in reserve. The second is a willingness to keep the issues at the table and not take them to other forums. Finally, good faith includes a willingness to move away from some of the positions often taken in a more traditional rulemaking process, and instead explore openly with other parties all ideas that may emerge from the working group's discussions.

E. Facilitator

The facilitator will act as a neutral in the substantive development of the proposed standard. The facilitator's role generally includes:

- Impartially assisting the members of the working group in conducting discussions and negotiations; and
- Impartially assisting in performing the duties of the Designated Federal Official under FACA.

F. Department Representative

The DOE representative will be a full and active participant in the consensus building negotiations. The Department's representative will meet regularly with senior Department officials, briefing them on the negotiations and receiving their suggestions and advice so that he or she can effectively represent the Department's views regarding the issues before the working group. DOE's representative also will ensure that the entire spectrum of governmental interests affected by the standards rulemaking, including the Office of Management and Budget, the Attorney General, and other Departmental offices, are kept informed of the negotiations and encouraged to make their concerns known in a timely fashion.

G. Working Group and Schedule

After evaluating the comments submitted in response to this notice of intent and the requests for nominations, DOE will either inform the members of the working group that they have been selected or determine that conducting a negotiated rulemaking is inappropriate.

The working group is expected to make a concerted effort to negotiate a first term sheet on the test procedure and a second term sheet on energy conservation standards within six (6) months of its first meeting. The working group's negotiations will take place around two discrete tasks. The test procedure term sheet, if completed, is to be approved by the working group and transmitted to ASRAC prior to commencement of negotiations regarding the energy conservation standards. At the completion of the negotiations for each discrete task, the term sheet, if completed, will be presented to ASRAC at an open meeting for its deliberation and decision on whether to approve it and submit it to DOE as a formal recommendation.

DOE will advise working group members of administrative matters related to the functions of the working group before beginning. While the negotiated rulemaking process is underway, DOE is committed to performing much of the same analysis as it would during a normal standards rulemaking process and to providing information and technical support to the working group.

IV. Comments Requested

DOE requests comments on which parties should be included in a negotiated rulemaking to develop draft language pertaining to the energy efficiency of CUACs and CUHPs and suggestions of additional interests and/or stakeholders that should be represented on the working group. All who wish to participate as members of the working group should submit a request for nomination to DOE.

V. Public Participation

Members of the public are welcome to observe the business of the meeting and, if time allows, may make oral statements during the specified period for public comment. To attend the meeting and/or to make oral statements regarding any of the items on the agenda, email *asrac@ee.doe.gov.* In the email, please indicate your name, organization (if appropriate), citizenship, and contact information. Please note that foreign nationals participating in the public meeting are subject to advance security screening procedures which require advance notice prior to attendance at the public meeting. If a foreign national wishes to participate in the public meeting, please inform DOE as soon as possible by contacting Ms. Regina Washington at (202) 586–1214 or by email: *Regina.Washington@ee.doe.gov* so that the necessary procedures can be completed. Anyone attending the meeting will be required to present a government photo identification, such as a passport, driver's license, or government identification. Due to the required security screening upon entry, individuals attending should arrive early to allow for the extra time needed.

IV. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this notice of intent and solicitation of nominations for membership.

Signing Authority

This document of the Department of Energy was signed on July 25, 2022, by Kelly J. Speakes-Backman, Principal Deputy Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters

the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on July 26, 2022.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

[Docket No. FAA–2022–0984; Project Identifier MCAI–2022–00236–T]

RIN 2120–AA64

Airworthiness Directives; Embraer S.A. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Embraer S.A. Model EMB–545 airplanes. This proposed AD was prompted by an error that was detected in the airplane takeoff configuration warning logic. The error prevents the system from sounding an aural alert ''No Takeoff Trim'' for the flightcrew. This proposed AD would require installation of a new software version of engine indication and crew alert system (EICAS), as specified in an Agência Nacional de Aviação Civil (ANAC) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by September 12, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material that will be incorporated by reference (IBR) in this AD, contact National Civil Aviation Agency (ANAC), Aeronautical Products Certification Branch (GGCP), Rua Dr. Orlando Feirabend Filho, 230—Centro Empresarial Aquarius—Torre B—Andares 14 a 18, Parque Residencial Aquarius, CEP 12.246–190—São José dos Campos—SP, Brazil; telephone 55 (12) 3203–6600; email *pac@anac.gov.br;* internet *www.anac.gov.br/en/.* You may find this material on the ANAC website at *https://sistemas.anac.gov.br/certificacao/DA/DAE.asp.* You may find this material on the ANAC website at *https://sistemas.anac.gov.br/certificacao/DA/DAE.asp.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0984.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0984; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Ho-Joon Lim, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206–231–3405; email *Ho-Joon.Lim@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2022–0984; Project Identifier MCAI–2022–00236–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Ho-Joon Lim, Aerospace Engineer, Large Aircraft Section, FAA, International Validation Branch, 2200 South 216th St., Des Moines, WA 98198; telephone 206 231 3405; email *Ho-Joon.Lim@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

ANAC, which is the aviation authority for Brazil, has issued AD 2022–02–02, effective February 23, 2022 (ANAC AD 2022–02–02) (also referred to as the MCAI), to correct an unsafe condition for certain Embraer S.A. Model EMB–545 airplanes.

This proposed AD was prompted by an error that was detected in the airplane takeoff configuration warning logic. The error prevents the system from sounding an aural alert ''No Takeoff Trim'' for the flightcrew, if the pitch trim is in a position that would not allow a safe takeoff (positioned out of the green band indication). The FAA is proposing this AD to address the lack of the aural alert ''No Takeoff Trim'' to the flightcrew on a possibly misconfigured airplane, which could result in loss of airplane controllability. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

ANAC AD 2022–02–02 specifies procedures for installation of a new software version of EICAS.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in ANAC AD 2022–02–02 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate ANAC AD 2022–02–02 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with ANAC AD 2022–02–02 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Service information required by ANAC AD 2022–02–02 for compliance will be available at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0984 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this proposed AD would affect 41 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
3.5 work-hours × $85 per hour = $297.50	(*)	$297.50	$12,197.50

* The FAA has received no definitive data on which to base the cost estimates for the parts specified in this proposed AD.

According to the manufacturer, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. The FAA does not control warranty coverage for affected individuals. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Embraer S.A.: Docket No. FAA–2022–0984; Project Identifier MCAI–2022–00236–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by September 12, 2022.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Embraer S.A. Model EMB–545 airplanes, certificated in any category, as identified in Agência Nacional de Aviação Civil (ANAC) AD 2022–02–02, effective February 23, 2022 (ANAC AD 2022–02–02).

(d) Subject

Air Transport Association (ATA) of America Code 27, Flight Controls.

(e) Unsafe Condition

This AD was prompted by an error that was detected in the airplane takeoff configuration warning logic. The error prevents the system from sounding an aural

alert ''No Takeoff Trim'' for the flightcrew, if the pitch trim is in a position that would not allow a safe takeoff (positioned out of the green band indication). The FAA is issuing this AD to address the lack of sound aural alert ''No Takeoff Trim'' to the flightcrew on a possibly misconfigured airplane, which could result in loss of airplane controllability.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraphs (h) and (i) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, ANAC AD 2022–02–02.

(h) Exceptions to ANAC AD 2022–02–02

(1) Where ANAC AD 2022–02–02 refers to its effective date, this AD requires using the effective date of this AD.

(2) The ''Alternative methods of compliance (AMOC)'' section of ANAC AD 2022–02–02 does not apply to this AD.

(3) Where paragraph (b) of ANAC AD 2022–02–02 specifies acceptable higher software versions, replace ''For higher software versions, use the applicable Service Bulletin recommended by the Manufacturer'' with ''For higher software versions, use the applicable Service Bulletin approved by ANAC and recommended by the Manufacturer.''

(i) No Reporting Required

Although the service information referenced in ANAC AD 2022–02–02 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (k)(2) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or ANAC; or ANAC's authorized Designee. If approved by the ANAC Designee, the approval must include the Designee's authorized signature.

(k) Related Information

(1) For ANAC AD 2022–02–02, contact National Civil Aviation Agency (ANAC), Aeronautical Products Certification Branch (GGCP), Rua Dr. Orlando Feirabend Filho, 230—Centro Empresarial Aquarius—Torre B—Andares 14 a 18, Parque Residencial Aquarius, CEP 12.246–190—São José dos Campos—SP, Brazil; telephone 55 (12) 3203–6600; email *pac@anac.gov.br;* internet *www.anac.gov.br/en/.* You may find this IBR material on the ANAC website at *https://sistemas.anac.gov.br/certificacao/DA/DAE.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0984.

(2) For more information about this AD, contact Ho-Joon Lim, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th Street, Des Moines, WA 98198; telephone 206–231–3405; email *Ho-Joon.Lim@faa.gov.*

Issued on July 26, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

Airworthiness Directives; Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. This proposed AD was prompted by reports of flight control (horizontal stabilizer, rudder, and elevator) decals degrading and peeling (damage), reports of operators painting over these decals, and reports that procedures to replace these decals were inaccurate, potentially causing incorrect positioning of replacement decals. This proposed AD would require inspecting the left and right horizontal stabilizer decals for visibility and damage; and for certain airplanes, inspecting the rudder and left and right elevator decals for visibility and damage; and doing applicable corrective actions, as specified in a Transport Canada Civil Aviation (TCCA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by September 12, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material that will be incorporated by reference (IBR) in this AD, contact TCCA, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *AD-CN@tc.gc.ca;* internet *https://tc.canada.ca/en/aviation.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Gabriel Kim, Aerospace Engineer, Mechanical Systems and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *gabriel.d.kim@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

TCCA, which is the aviation authority for Canada, has issued TCCA AD CF–2022–01, dated January 7, 2022 (TCCA AD CF–2022–01) (also referred to as the MCAI), to correct an unsafe condition for certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes.

This proposed AD was prompted by reports of flight control decals degrading and peeling, reports of operators painting over these decals, and reports that procedures to replace these decals were inaccurate, potentially causing incorrect positioning of replacement decals. An investigation determined that the degradation and peeling of the flight control decals was caused by an incorrect clear protective coating being applied during production, and that flight control decals were being painted over because of unclear in-service procedures. Additionally, the in-service procedures used for replacing these decals were not accurate, potentially causing incorrect positioning of the replacement decals. The in-service procedures were revised to clearly state that the flight control decals are to be masked prior to painting, and to ensure the flight control decals are properly placed going forward.

The FAA is proposing this AD to address flight control decals that are damaged or incorrectly positioned, which could introduce rigging offset of flight control surfaces, and when combined with other failures or severe maneuvers, could result in loss of flight control surface effectiveness or structural loading that exceeds the airframe's capability. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

TCCA CF–2022–01 specifies procedures for inspecting the left and right horizontal stabilizer decals for visibility and damage, and corrective actions. For certain airplanes, TCCA CF–2022–01 specifies procedures for inspecting the rudder and left and right elevator decals for visibility and damage. The corrective actions include replacing, restoring, and preserving the condition and placement of the flight control decals, and re-rigging the rudder and elevator control surfaces. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in TCCA AD CF–2022–01 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate TCCA AD CF–2022–01 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with TCCA AD CF–2022–01 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Service information required by TCCA AD CF–2022–01 for compliance will be available at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0981 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this proposed AD would affect 56 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
10 work-hours × $85 per hour = $850	$0	$850	$47,600

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
4 work-hours × $85 per hour = $340	$220	$560

The FAA has received no definitive data on which to base the cost estimates for the on-condition re-rigging actions specified in this proposed AD.

According to the manufacturer, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. The FAA does not control warranty coverage for affected individuals. As a result, the FAA has included all known costs in the cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.): Docket No. FAA–2022–0981; Project Identifier MCAI–2022–00032–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by September 12, 2022.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Canada Limited Partnership (Type certificate previously held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Model BD–500–1A10 and BD–500–1A11 airplanes, certificated in any category, as identified in Transport Canada Civil Aviation (TCCA) AD CF–2022–01, dated January 7, 2022 (TCCA AD CF–2022–01).

(d) Subject

Air Transport Association (ATA) of America Code 11, Placards and markings.

(e) Unsafe Condition

This AD was prompted by reports of flight control (horizontal stabilizer, rudder, and elevator) decals degrading and peeling (damage), reports of operators painting over these decals, and reports that procedures to replace these decals were inaccurate, potentially causing incorrect positioning of replacement decals. The FAA is issuing this AD to address flight control decals that are damaged or incorrectly positioned, which could introduce rigging offset of flight control surfaces, and when combined with other failures or severe maneuvers, could result in loss of flight control surface effectiveness or structural loading that exceeds the airframe's capability.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, TCCA AD CF–2022–01.

(h) Exceptions to TCCA AD CF–2022–01

(1) Where TCCA AD CF–2022–01 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where TCCA AD CF–2022–01 refers to ''hours air time,'' this AD requires using ''flight hours.''

(i) Additional FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300. Before using any approved AMOC, notify your appropriate principal

inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or TCCA; or Airbus Canada Limited Partnership's TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (i)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(j) Related Information

(1) For TCCA AD CF–2022–01, contact TCCA, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *AD-CN@tc.gc.ca;* internet *https://tc.canada.ca/en/aviation.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0981.

(2) For more information about this AD, contact Gabriel Kim, Aerospace Engineer, Mechanical Systems and Administrative Services Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; email *gabriel.d.kim@faa.gov.*

Issued on July 22, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.) Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to adopt a new airworthiness directive (AD) for certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes. This proposed AD was prompted by reports that the engine feed pressure switches were installed with no secondary locking mechanism and can become loose and cause a fuel leak. This proposed AD would require initial and repetitive inspections at the engine feed pressure switch locations and installation of a flange adaptor with lockwire to terminate the repetitive inspection, as specified in a Transport Canada Civil Aviation (TCCA) AD, which is proposed for incorporation by reference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by September 12, 2022

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material that will be incorporated by reference (IBR) in this AD, contact TCCA, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *AD-CN@tc.gc.ca;* internet *https://tc.canada.ca/en/aviation.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0982.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0982; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Joseph Catanzaro, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7366; email *9-avs-nyaco-cos@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2022–0982; Project Identifier MCAI–2021–00787–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this NPRM.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial

information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Joseph Catanzaro, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7366; email *9-avs-nyaco-cos@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The TCCA, which is the aviation authority for Canada, has issued TCCA AD CF–2021–50, dated December 21, 2021 (TCCA AD CF–2021–50) (also referred to as the MCAI), to correct an unsafe condition for certain Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes.

This proposed AD was prompted by reports that certain fuel system pressure switches have been installed without a secondary locking feature (lockwire). The fuel pressure switches are installed on the alternating current (AC) boost pump cartridge located in the wing dry bay (outboard of rib 6) and near the engine feed pressure switch, on the rear spar (between ribs 8 and 9). Both installations exist on the left-hand and right-hand wings for a total of four affected locations on the airplane. The FAA is proposing this AD to address the absence of a secondary locking feature (lockwire) on the fuel pressure switches, which may allow them to become loose and allow fuel to leak in the affected areas, creating a fire hazard. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

TCCA AD CF–2021–50 specifies procedures for repetitive general visual inspections of the torque identification stripes, torquing of the fuel pressure switches, and installation of lockwire at the two AC boost pump cartridges; repetitive general visual inspections of the torque identification stripes and torquing of the fuel pressure switches at the two engine feed pressure switches; and installation of a new flange adaptor and lockwire, which terminates the repetitive inspections. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

These products have been approved by the aviation authority of another country and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

Proposed AD Requirements in This NPRM

This proposed AD would require accomplishing the actions specified in TCCA AD CF–2021–50 described previously, except for any differences identified as exceptions in the regulatory text of this proposed AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, the FAA proposes to incorporate TCCA AD CF–2021–50 by reference in the FAA final rule. This proposed AD would, therefore, require compliance with TCCA AD CF–2021–50 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this proposed AD. Service information required by TCCA AD CF–2021–50 for compliance will be available at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0982 after the FAA final rule is published.

Costs of Compliance

The FAA estimates that this proposed AD would affect 60 airplanes of U.S. registry. The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 27 work-hours × $85 per hour = $2,295	$811	Up to $2,295 ..	$137,700

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need these on-condition action:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
14 work-hours × $85 per hour = $1,190	$0	$1,190

The FAA has included all known costs in its cost estimate. According to the manufacturer, however, some or all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected operators.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

Airbus Canada Limited Partnership (Type Certificate Previously Held by C Series Aircraft Limited Partnership (CSALP); Bombardier, Inc.): Docket No. FAA–2022–0982; Project Identifier MCAI–2021–00787–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by September 12, 2022.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Canada Limited Partnership Model BD–500–1A10 and BD–500–1A11 airplanes, certificated in any category, as identified in Transport Canada Civil Aviation (TCCA) AD CF–2021–50, dated December 21, 2021 (TCCA AD CF–2021–50).

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Unsafe Condition

This AD was prompted by reports that the engine feed pressure switches were installed with no secondary locking mechanism and can become loose and cause a fuel leak. The FAA is issuing this AD to address the absence of a secondary locking feature (lockwire) on the fuel pressure switches, which may allow them to become loose and allow fuel to leak in the affected areas, creating a fire hazard.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, TCCA AD CF–2021–50.

(h) Exception to TCCA AD CF–2021–50

(1) Where TCCA AD CF–2021–50 refers to hours air time, this AD requires using flight hours.

(2) Where TCCA AD CF–2021–50 refers to its effective date, or 14 July 2021, the effective date of AD CF–2021–21, this AD requires using the effective date of this AD.

(i) Additional AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, New York ACO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the certification office, send it to ATTN: Program Manager, Continuing Operational Safety, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7300; fax 516–794–5531. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, New York ACO Branch, FAA; or TCCA; or Airbus Canada Limited Partnership's TCCA Design Approval Organization (DAO). If approved by the DAO, the approval must include the DAO-authorized signature.

(j) Related Information

(1) For TCCA AD CF–2021–50, contact TCCA, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *AD-CN@tc.gc.ca;* internet *https://tc.canada.ca/en/aviation.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0982.

(2) For more information about this AD, contact Joseph Catanzaro, Aerospace Engineer, Airframe and Propulsion Section, FAA, New York ACO Branch, 1600 Stewart Avenue, Suite 410, Westbury, NY 11590; telephone 516–228–7366; email *9-avs-nyaco-cos@faa.gov.*

(3) For service information identified in this AD, contact TCCA, Transport Canada National Aircraft Certification, 159 Cleopatra Drive, Nepean, Ontario K1A 0N5, Canada; telephone 888–663–3639; email *AD-CN@tc.gc.ca;* internet *https://tc.canada.ca/en/aviation.* You may view this service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued on July 22, 2022.

Christina Underwood,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2022–0015; Project Identifier AD–2021–00832–R]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM).

SUMMARY: The FAA is revising a notice of proposed rulemaking (NPRM) that would have applied to certain Airbus Helicopters Model EC225LP helicopters. This action revises the NPRM by removing the requirement to remove main rotor (M/R) rotating swashplates (swashplates) from service that have accumulated less than 7 years since the date of manufacture; increasing the life limit for certain swashplates; requiring additional visual inspections, and adding repetitive inspections for certain swashplates that have accumulated 7 or more years, but less than 13 years, since the date of manufacture; and updating the service information. The FAA is proposing this airworthiness directive (AD) to address the unsafe condition on these products. Since these actions would impose an additional burden over those in the NPRM, the agency is requesting comments on this SNPRM.

DATES: The FAA must receive comments on this SNPRM by September 12, 2022.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this SNPRM, contact Airbus Helicopters, 2701 North Forum Drive, Grand Prairie, TX 75052; phone: (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *www.airbus.com/helicopters/technical-services/support.html.* You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

Examining the AD Docket

You may examine the AD docket at *www.regulations.gov* by searching for and locating Docket No. FAA–2022–0015; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, this SNPRM, the European Union Aviation Safety Agency (EASA) AD, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Hal Jensen, Aerospace Engineer, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 950 L'Enfant Plaza N SW, Washington, DC 20024; phone: (202) 267–9167; email: *hal.jensen@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2022–0015; Project Identifier AD–2021–00832–R'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may again revise this proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this SNPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this SNPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this SNPRM. Submissions containing CBI should be sent to Hal Jensen, Aerospace Engineer, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 950 L'Enfant Plaza N SW, Washington, DC 20024; telephone: (202) 267–9167; email: *hal.jensen@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued an NPRM to amend 14 CFR part 39 by adding an AD that would apply to Airbus Helicopters Model EC225LP helicopters, with an M/R swashplate part number (P/N) 332A31–3074–00 or P/N 332A31–3074–01 installed. The NPRM published in the **Federal Register** on January 26, 2022 (87 FR 3943). The NPRM proposed to supersede AD 2020–23–05, Amendment 39–21321 (85 FR 73604, November 19, 2020) (AD 2020–23–05), which applies to certain Airbus Helicopters Model EC225LP helicopters. AD 2020–23–05 requires inspecting the swashplate control rod attachment yokes (yokes) of certain swashplates, establishing a life limit, performing a one-time inspection of stripped yokes, and applicable corrective actions. AD 2020–23–05 was prompted by a crack in a yoke, which could result in failure of the yoke, loss of M/R control, and subsequent loss of control of the helicopter. AD 2020–23–05 was also prompted by EASA AD 2019–0074, dated March 28, 2019 (EASA AD 2019–0074), issued by EASA, which is the Technical Agent for the Member States of the European Union, to correct an unsafe condition for Airbus Helicopters (AH), formerly Eurocopter, Eurocopter France, Model EC 225 LP helicopters. EASA advised that Airbus Helicopters established a life limit (also called a service life limit) of 12 years for the swashplate and added a reporting requirement if there is a crack or corrosion in a yoke. EASA further advised that additional analysis determined that it is necessary to introduce a new life limit for the affected swashplates.

In the NPRM, the FAA proposed to retain all the requirements of AD 2020–23–05. The NPRM also proposed to include a revised compliance time for the initial visual inspection of the yokes

on swashplates that have accumulated less than seven years since the date of manufacture; and clarification that dye penetrant inspection of the yoke is required before further flight if no cracks are detected during the visual inspection.

The NPRM was prompted by the determination that a revised compliance time is necessary for swashplates that have accumulated less than seven years since the date of manufacture. The FAA has also determined that clarification is necessary regarding when it is necessary to do a dye penetrant inspection of the yoke.

Actions Since the NPRM Was Issued

Since the NPRM was issued, EASA issued EASA AD 2019–0074R1, dated March 8, 2022 (EASA AD 2019–0074R1), which supersedes EASA AD 2019–0074. EASA advises that additional investigation confirmed that the life limit of certain swashplates can be extended and Airbus Helicopters has issued updated service information to reflect the new life limit.

Also, since the NPRM was issued, the FAA determined that swashplates that have accumulated less than 7 years since the date of manufacture are not susceptible to the unsafe condition and should be removed from paragraph (g) of the proposed AD. The FAA also determined that paragraph (g) of the proposed AD needs to be revised to include repetitive inspections for swashplates that have accumulated 7 or more years, but less than 13 years, since the date of manufacture, and the criteria for when to perform a dye penetrant inspection needs to be revised.

The FAA determined there was an error in the Background section of the NPRM, which stated, ''AD 2020–23–05 was prompted by a crack in a swashplate yoke.'' The FAA determined AD 2020–23–05 was not prompted by a crack in a yoke, but was prompted by testing conducted by Airbus Helicopters, which determined cracks may develop overtime. The FAA also determined that the applicable service information required by the proposed AD needs to be revised in order to include the updated revision.

Finally, the FAA determined that the time estimated for inspecting the yokes needed to be increased from 0.25 work-hour to 0.50 work-hour, which increased the estimated cost for that inspection from $21 to $43 per helicopter per inspection cycle.

Comments

The following discussion presents the comments received on the NPRM and the FAA's response.

Request To Revise the Required Actions Paragraph of the Proposed AD

Five commenters requested the FAA revise the Required Actions paragraph of the proposed AD by removing the visual inspection for swashplates that have accumulated less than 7 years since the date of manufacture. Airbus Helicopters stated that testing was performed for certain aluminum alloys and as a result Airbus Helicopters defined a calendar threshold of 7 years, after which the swashplate may present crack initiation. Airbus Helicopters further explained due to this testing, there is no rationale to require the visual inspection prior to the 7 year threshold. An additional commenter stated the inspection for swashplates that have accumulated less than 7 years since the date of manufacture is not in line with the required service information. Additionally, Air Center Helicopters Inc., explained that the EASA AD and the service information do not require repetitive visual inspections for any swashplates that have accumulated less than 7 years since the date of manufacture and that these repetitive inspections are not required until after the swashplate has accumulated 7 or more years since the date of manufacture.

The FAA agrees and has revised the Required Actions paragraph of this proposed AD by removing the inspection requirements for swashplates that have accumulated less than 7 years since the date of manufacture.

Four commenters requested the FAA revise the Required Actions paragraph to include a repetitive visual inspection, at intervals not to exceed 15 hours time-in-service (TIS) or 7 days, after certain swashplates have accumulated 7 or more years since the date of manufacture. Three commenters also requested that the FAA revise the Required Actions paragraph of this proposed AD to require that this repetitive visual inspection be performed utilizing a bright light and 10X magnifying glass.

The FAA partially agrees. The FAA agrees to revise the Required Actions paragraph of this proposed AD to include a repetitive visual inspection, at intervals not to exceed 15 hours TIS or 7 days, whichever occurs first, for swashplates that have accumulated 7 or more years, but less than 13 years, since the date of manufacture, until the swashplate accumulates 13 years since the date of manufacture. The FAA disagrees with mandating the use of a bright light and 10X magnifying glass for this repetitive visual inspection because the FAA has not determined that a bright light or 10X magnifying glass are necessary for this repetitive visual inspection; however an operator may choose to use this inspection method.

Five commenters requested the FAA revise the Required Actions paragraph to remove the dye penetrant inspection in situations where no crack is detected. Airbus Helicopters stated with regards to crack detectability, the dye penetrant inspection creates an unnecessary burden if no crack is detected visually, and should only be performed if a scratch or surface degradation is detected. Two commenters also stated performing the dye penetrant inspection, if a crack is not detected, would increase the estimated costs and downtime for operators.

The FAA agrees to revise the Required Actions paragraph of this proposed AD to include an additional visual inspection for a scratch and surface degradation, if no crack is detected. The FAA determined if any indications of scratches or surface degradation are detected during the visual inspection, a dye penetrant inspection must be performed to address the unsafe condition. Accordingly, the FAA has revised the Required Actions paragraph to require a visual inspection for a scratch and surface degradation if no cracks are visually detected, and a dye penetrant inspection if there is any scratch or surface degradation.

Five commenters requested the FAA revise the Required Actions paragraph to extend the life limit of the swashplate from 12 years to 13 years, in accordance with the revised service information.

The FAA agrees and has revised the Required Actions paragraph of this proposed AD by increasing the life limit of the swashplate to 13 years.

Request To Use Latest Revision of the Applicable Service Information

Three commenters requested that the FAA revise the proposed AD to reference EASA AD 2019–0074R1 instead of EASA AD 2019–0074. The commenters also requested that the FAA revise the proposed AD to reference Airbus Helicopters Emergency Alert Service Bulletin (EASB) No. 05A051, Revision 4, dated February 28, 2022 (EASB 05A051 Rev 4), instead of Airbus Helicopters EASB No. 05A051 and EASB No. 05A046, each Revision 2, and dated February 26, 2019.

The FAA agrees EASA AD 2019–0074R1 and EASB 05A051 Rev 4 are the appropriate sources of related information for the actions specified, and has revised this proposed AD to reference this updated information.

Request To Approve Future Revisions of the Service Information

Three commenters requested that the FAA revise the proposed AD to consider the accomplishment of future revisions of EASB 05A051 Rev 4 as acceptable for compliance with the proposed AD. Two commenters stated EASA AD 2019–0074R1 allows the use of future revisions of the applicable service information and requested that the FAA also allow compliance with later revisions. One commenter stated later revisions of the applicable service information should be allowed in order to capture future applicable appendixes, swashplate serial numbers, and swashplate manufacture dates.

The FAA disagrees with the request to allow future revisions of the applicable service information as acceptable for compliance with the proposed AD. Referring to documents that do not exist at the time the final rule is published violates Office of the Federal Register (OFR) regulations regarding approval of materials ''incorporated by reference'' in rules. These OFR regulations require that either the service document be submitted for approval by the OFR as ''referenced'' material, in which case it may be simply called out in the text of an AD, or the service document contents be published as part of the actual AD language. An AD may reference only the specific service document that was submitted and approved by the OFR for ''incorporation by reference.'' In order for operators to use later revisions of the referenced document (issued after the publication of the AD), either the FAA must revise the AD to reference the specific later revisions, or operators must request the approval of their use as an alternative method of compliance under the provisions of paragraph (j) of this proposed AD.

Request To Revise the Background Section of the Proposed AD

One commenter requested that the FAA revise the background section of the NPRM to indicate that no cracks to the swashplate have been detected in service, but testing by Airbus Helicopters determined that cracks could develop over time.

The FAA agrees with the commenter and has revised the Actions Since the NPRM was Issued section in this proposed AD accordingly.

FAA's Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the European Union, EASA has notified the FAA about the unsafe condition described in its AD. The FAA is proposing this AD after determining the unsafe condition described previously is likely to exist or develop in other helicopters of the same type design. Certain changes described above expand the scope of the NPRM. As a result, it is necessary to reopen the comment period to provide additional opportunity for the public to comment on this SNPRM.

Related Service Information Under 1 CFR Part 51

The FAA reviewed one document that co-publishes two Airbus Helicopters EASB identification numbers: EASB 05A051 Rev 4 for Model EC225LP helicopters and EASB No. 05A046 for non-FAA type-certificated Model EC725AP helicopters, Revision 4, dated February 28, 2022 (EASB 05A046 Rev 4). This service information specifies inspections for swashplate P/N 332A31–3074–00 and P/N 332A31–3074–01. This service information specifies procedures for a repetitive inspection of the yokes for a crack and a one-time inspection of the stripped yokes for corrosion and a crack. If in doubt about whether there is a crack, this service information specifies performing a nondestructive inspection.

Additionally, this service information specifies touching up the swashplate with varnish if there is corrosion, removing any damage within allowable limits, and refinishing the yokes. If there is a crack in a yoke, this service information specifies replacing the swashplate. This service information also specifies a life limit of 13 years since the date of manufacture for the swashplates and reporting requirements if a crack or corrosion is discovered. EASB 05A051 Rev 4 also updates the list of serial numbers and manufacture dates of the swashplates. EASB 05A046 Rev 4, dated February 28, 2022, is not proposed for incorporation by reference in this SNPRM.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Proposed AD Requirements in This SNPRM

This proposed AD would retain some of the requirements of AD 2020–23–05. This proposed AD would also require compliance with a revised life limit, a repetitive visual inspection of the yokes on swashplates that have accumulated 7 or more years, but less than 13 years, since the date of manufacture; and if a crack is detected, removing the swashplate from service. If no cracks are detected but a scratch or surface degradation is detected, this proposed AD would require performing a dye penetrant inspection of the yoke. If a crack is detected during the dye penetrant inspection, this proposed AD would require removing the swashplate from service.

Differences Between This SNPRM and EASA AD 2019–0074R1 or the Service Information

EASB 05A051 Rev 4 requires performing a non-destructive inspection if in doubt about whether there is a crack in a yoke. This proposed AD would require a visual inspection and if no cracks are detected, visually inspecting for a scratch and surface degradation. If a scratch or surface degradation is detected, this proposed AD would require a non-destructive inspection (dye penetrant inspection). EASB 05A051 Rev 4 also specifies sending the swashplate back to Airbus Helicopters if cracks are found, whereas this proposed AD would not require sending any affected parts back to Airbus Helicopters.

EASA AD 2019–0074R1 specifies instructions for reporting inspection results, whereas this proposed AD would not require reporting inspection results.

Costs of Compliance

The FAA estimates that this AD, if adopted as proposed, would affect 28 helicopters of U.S. Registry. Labor rates are estimated at $85 per work-hour. Based on these numbers, the FAA estimates the following costs to comply with this proposed AD.

ESTIMATED COSTS FOR REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Determination of the manufacture date of the swashplate.	0.5 work-hour × $85 per hour = $43	$0	$43	$1,204.

ESTIMATED COSTS FOR REQUIRED ACTIONS—Continued

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspecting the yokes	0.5 work-hour × $85 per hour = $43 per inspection cycle.	0	43 per inspection cycle.	1,204 per inspection cycle.
Removing grease, stripping the yokes, and inspecting the stripped yokes.	8 work-hours × $85 per hour = $680	0	680	19,040.
Creating a life limit record	1 work-hour × $85 per hour = $85	0	85	2,380.

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on the results of any required actions. The FAA has no way of determining the number of aircraft that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Action	Labor cost	Parts cost	Cost per product
Removing any corrosion or repairing damage within the allowable limit.	3 work-hours × $85 per hour = $255	$0	$255
Replacing the swashplate	6 work-hours × $85 per hour = $510	85,661	86,171
Dye-penetrant inspection	6 work-hours × $85 per hour = $510	50	560

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive 2020–23–05, Amendment 39–21321 (85 FR 73604, November 19, 2020; and

■ b. Adding the following new airworthiness directive:

Airbus Helicopters: Docket No. FAA–2022–0015; Project Identifier AD–2021–00832–R.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) action by September 12, 2022.

(b) Affected ADs

This AD replaces AD 2020–23–05, Amendment 39–21321 (85 FR 73604, November 19, 2020) (AD 2020–23–05).

(c) Applicability

This AD applies to Airbus Helicopters Model EC225LP helicopters, certificated in any category, with a main rotor (M/R) rotating swashplate (swashplate) part number (P/N) 332A31–3074–00 or P/N 332A31–3074–01 installed.

(d) Subject

Joint Aircraft Service Component (JASC) Code: 6230, Main Rotor Mast/Swashplate.

(e) Unsafe Condition

This AD was prompted by results of testing, which determined that a crack could develop in a swashplate control rod attachment yoke (yoke), and the notification of a new life limit for certain swashplates. The FAA is issuing this AD to detect and correct a crack in a yoke. The unsafe condition, if not addressed, could result in failure of the yoke, loss of M/R control, and subsequent loss of control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

Before further flight, review Appendix 4.A. of Airbus Helicopters Emergency Alert Service Bulletin (EASB) No. 05A051, Revision 4, dated February 28, 2022 (EASB 05A051 Rev 4) to determine the date of manufacture of the swashplate.

(1) If the swashplate has accumulated 13 or more years since the date of manufacture, remove the swashplate from service.

(2) If the swashplate has accumulated less than 13 years since the date of manufacture, create a component history card or equivalent record indicating a life limit of 13 years since the date of manufacture. Thereafter, continue to record the life limit of the swashplate on its component history card or equivalent record and remove any

swashplate from service before accumulating 13 years since the date of manufacture.

(3) For each swashplate that has accumulated 7 or more years, but less than 13 years, since the date of manufacture, within 15 hours time-in-service (TIS) or 7 days, whichever occurs first after the effective date of this AD, and thereafter at intervals not to exceed 15 hours TIS or 7 days, whichever occurs first, until the swashplate accumulates 13 years since the date of manufacture, visually inspect each yoke for a crack, paying particular attention to the areas shown in Details B, C, and D of Figure 1 of EASB 05A051 Rev 4. If there is any crack on the yoke, before further flight, remove the swashplate from service.

(i) If no cracks are visually detected, before further flight, visually inspect for a scratch and surface degradation on the yoke.

(ii) If there is any scratch or surface degradation on the yoke, before further flight, perform a dye penetrant inspection of the yoke for a crack.

(iii) If there is any crack on the yoke, before further flight, remove the swashplate from service.

(4) For each swashplate that has accumulated 7 or more years, but less than 13 years, since the date of manufacture, within 100 hours TIS after the effective date of this AD:

(i) Remove the grease from areas (E), (F), (G), (H), (J), and (K) of each yoke as shown in Details B, C, and D of Figure 1 of EASB 05A051 Rev 4. Using a plastic spatula, strip areas (E), (F), (G), (H), (J), and (K) of each yoke as shown in Details B, C, and D of Figure 1 of EASB 05A051 Rev 4. Do not use a metal tool to strip any area of a yoke.

(ii) Inspect areas (E), (F), (G), (H), (J), and (K) of each yoke as shown in Details B, C, and D of Figure 1 of EASB 05A051 Rev 4 for corrosion, pitting, and loss of material.

(A) If there is any corrosion less than 0.0078 in. (0.2 mm), before further flight, remove the corrosion and apply varnish (Vernelec 43022 or equivalent) to the surface of areas (E), (F), (G), (H), (J), and (K).

(B) If there is any pitting or loss of material of less than 0.0078 in. (0.2 mm), before further flight, remove the damage by sanding with sandpaper 200/400 or 330.

(C) If there is any corrosion, pitting, or loss of material of 0.0078 in. (0.2 mm) or greater, before further flight, remove the swashplate from service.

(iii) Visually inspect each yoke for a crack, paying particular attention to the areas shown in Details B, C, and D of Figure 1 of EASB 05A051 Rev 4.

(A) If there is any crack on the yoke, before further flight, remove the swashplate from service.

(B) If no cracks are visually detected, before further flight, perform the actions as required in paragraphs (g)(3)(i) through (iii) of this AD.

(h) Credit for Previous Actions

If you performed the actions in paragraph (g)(4) of this AD before the effective date of this AD using Airbus Helicopters EASB No. 05A051, Revision 1, dated November 16, 2017; Airbus Helicopters EASB No. 05A051, Revision 2, dated February 26, 2019; or Airbus Helicopters EASB No. 05A051 Revision 3, dated December 7, 2021, you have met the requirements of paragraph (g)(4) of this AD.

(i) Special Flight Permit

Special flight permits are prohibited.

(j) Alternative Methods of Compliance (AMOCs)

(1) The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the International Validation Branch, send it to the attention of the person identified in paragraph (k)(1) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

(1) For more information about this AD, contact Hal Jensen, Aerospace Engineer, Operational Safety Branch, Compliance & Airworthiness Division, FAA, 950 L'Enfant Plaza N SW, Washington, DC 20024; telephone: (202) 267–9167; email: *hal.jensen@faa.gov.*

(2) For service information identified in this AD, contact Airbus Helicopters, 2701 North Forum Drive, Grand Prairie, TX 75052; phone: (972) 641–0000 or (800) 232–0323; fax (972) 641–3775; or at *www.airbus.com/helicopters/services/technical-support.html.* You may view this referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call (817) 222–5110.

(3) The subject of this AD is addressed in European Union Aviation Safety Agency (EASA) AD 2019–0074R1, dated March 8, 2022. You may view the EASA AD at *www.regulations.gov* in Docket No. FAA–2022–0015.

Issued on July 22, 2022.

Gaetano A. Sciortino,

Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2022–0858; Airspace Docket No. 22–AEA–5]

RIN 2120–AA66

Proposed Establishment and Amendment of Area Navigation (RNAV) Routes; Eastern United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to establish Area Navigation (RNAV) route Q–141 and amend RNAV route Q–437 in support of the Northeast Corridor Atlantic Coast Route Project.

DATES: Comments must be received on or before September 12, 2022.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527 or (202) 366–9826. You must identify FAA Docket No. FAA–2022–0858; Airspace Docket No. 22–AEA–5 at the beginning of your comments. You may also submit comments through the internet at *www.regulations.gov.*

FAA Order JO 7400.11F, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* For further information, you can contact the Rules and Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

Authority for This Rulemaking

SUPPLEMENTARY INFORMATION: The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the

safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it expands the availability of RNAV routes in the National Airspace System, increases airspace capacity, and reduces complexity in high air traffic volume areas.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2022–0858; Airspace Docket No. 22–AEA–5) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at *www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2022–0858; Airspace Docket No. 22–AEA–5.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11F, Airspace Designations and Reporting Points, issued August 10. 2021, and effective September 15, 2021. FAA Order JO 7400.11F is publicly available as listed in the **ADDRESSES** section of this proposed rule. FAA Order JO 7400.11F lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to establish RNAV route Q–141, and amend RNAV route Q–437 in the eastern United States in support of the Northeast Corridor Atlantic Coast Route project.

Q–141: Q–141 is a proposed new route that would extend from the HOUKY, VA waypoint (WP) (located in the vicinity of the Hopewell, VA (HPW), VOR and Tactical Air Navigational System (VORTAC)) to the NALES, DE, WP. Q–141 would expand the availability of RNAV routing in the area.

Q–437: Q–437 extends from the VILLS, NJ, Fix, (located northwest of the Sea Isle, NJ (SIE), VORTAC to the SLANG, VT, WP (located northeast of the Cambridge, NY (CAM), VHF Omnidirectional Range/Distance Measuring Equipment (VOR/DME)). The FAA proposes to terminate the route at the LLUND, NY, Fix (located north of the Kennedy, NY (JFK), VOR/DME). All points north of the LLUND Fix (*i.e.,* BINGS, WARUV, and SLANG) would be removed from the route. This is based on low demand for those segments and would better fit traffic flows in the area. Additionally, the LUIGI, NJ, Fix would be removed from the route description because it does not mark a turn point.

The proposed full route descriptions of Q–141 and Q–437 are listed in the amendments to part 71 set forth below.

United States Area Navigation Routes are published in paragraph 2006 of FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021, which is incorporated by reference in 14 CFR 71.1. The routes listed in this document would be subsequently published in FAA Order JO 7400.11.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR part 71 of FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021 and effective September 15, 2021, is amended as follows:

Paragraph 2006 United States Area Navigation Routes.

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2022–0857; Airspace Docket No. 21–AEA–28]

RIN 2120–AA66

Proposed Amendment and Establishment of Area Navigation (RNAV) Routes; Northeast United States.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend one low altitude area navigation (RNAV) route (T-route), and establish four new T-routes in the northeast United States. The routes would augment the VHF Omnidirectional Range (VOR) Minimum Operational Network (MON) Program. The purpose is to enhance the efficiency of the National Airspace System (NAS) by transitioning from a ground-based to a satellite-based navigation system.

DATES: Comments must be received on or before September 12, 2022.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2022–0857; Airspace Docket No. 21–AEA–28 at the beginning of your comments. You may also submit comments through the internet at *www.regulations.gov.*

FAA Order JO 7400.11F, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications/.* For further information, you can contact the Rules and Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Rules and Regulations Group, Office of Policy, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would expand the availability of RNAV routes in the northeast United States and improve the efficient flow of air traffic within the NAS by lessening the dependency on ground-based navigation.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2022–0857; Airspace Docket No. 21–AEA–28) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at *www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2022–0857; Airspace Docket No. 21–AEA–28.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through

the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Eastern Service Center, Federal Aviation Administration, Room 210, 1701 Columbia Ave., College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021. FAA Order JO 7400.11F is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11F lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to amend one low altitude RNAV T-route, and establish four T-routes in the northeast United States to augment the VOR MON Program.

T–356: T–356 extends from the WOOLY, MD, Fix to the ELUDE, MD, Fix. The FAA proposes to extend T–356 at both ends. The start point would be moved from the WOOLY Fix to the HOGZZ, MD, waypoint (WP). The HOGZZ WP is being renamed TWIRK, MD, WP. From the TWIRK WP, the route would proceed to the BRILA, MD, WP, then to the WOOLY, MD, Fix where T–356 would join the route as currently charted to the SWANN, MD, Fix. The GATBY, MD, Fix and the KERNO, MD, Fix would be removed from the route description. From the SWANN Fix, the route would go to the ODESA, MD, Fix. The ELUDE, MD, Fix would be removed from the description. After the ODESA Fix, T–356 would be extended northward to the WIGGZ, PA, WP (which will replace the Slate Run, PA (SLT), VOR and Tactical Air Navigational System (VORTAC)). The following points would be added after the ODESA Fix: APEER, MD,WP; REESY, PA, WP; FOLEZ, PA, WP; PIKKE, PA, WP; BOYER, PA, WP; Ravine, PA (RAV), VORTAC; Selinsgrove, PA (SEG), VHF Omnidirectional Range/Distance Measuring Equipment (VOR/DME); and the WIGGZ, PA, WP. T–356 would overlay airway V–170 from the PIKKE, PA, WP to the WIGGZ, PA, WP. As amended, T–356 would extend from the TWIRK, MD, WP to the WIGGZ, PA, WP.

The following are proposed new T routes:

T–448: T–448 would extend from the TOMYD, PA, WP to the FOLEZ, PA, WP. The TOMYD WP is being moved 2.8 NM north of its current location. T–448 would serve as a replacement for a portion of airway V–408 (but not an exact overlay).

T–451: T–451 would extend from the ROBRT, MD, Fix to the ELIOT, PA, Fix. It would overlay a portion of airway V–39 from the ROBRT WP to the ELIOT WP. The HEXSN, PA, WP is used in the route description in place of the Lancaster, PA (LRP), VOR/DME.

T–453: T–453 would extend from the VINNY, PA, Fix to the PARKE, NJ, WP. T–453 would overlay airway V–457 from the VINNY Fix to the PARKE WP.

T–460: T–460 would extend from the Philipsburg, PA (PSB), VORTAC to the GLYDE, MA, Fix. It would overlay a portion of airway V–576 from Philipsburg to the ARRKK, NY, WP; and airway V–292 from the ARRKK WP to the GLYDE, MA, WP.

United States Area Navigation Routes are published in paragraph 6011 of FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021, which is incorporated by reference in 14 CFR 71.1. The routes listed in this document would be subsequently published in FAA Order JO 7400.11.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 14 CFR 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR part 71 of FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021, is amended as follows:

Paragraph 6011 United States Area Navigation Routes.

Proposed Amendment of Class E Airspace; Colorado Plains Regional Airport, CO

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class E airspace designated as a surface area, modify the Class E airspace extending upward from 700 feet above the surface, and remove the Class E airspace extending upward from 1,200 feet above the surface at Colorado Plains Regional Airport, CO. Additionally, this action proposes several administrative amendments to update the airport's existing Class E airspace legal descriptions. These actions will ensure the safety and management of instrument flight rule (IFR) operations at the airport.

DATES: Comments must be received on or before September 12, 2022.

ADDRESSES: Send comments on this proposal to the U.S. DOT, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: (800) 647–5527, or (202) 366–9826. You must identify ''FAA Docket No. FAA–2022–0711; Airspace Docket No. 21–ANM–64,'' at the beginning of your comments. You may also submit comments through the internet at *www.regulations.gov.*

FAA Order JO 7400.11F, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Nathan A. Chaffman, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3460.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code (U.S.C.). Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would modify Class E airspace at Colorado Plains Regional Airport, CO, to support IFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related

aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2022–0711; Airspace Docket No. 21–ANM–64.'' The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021. FAA Order JO 7400.11F is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11F lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying the Class E airspace designated as a surface area, modifying the Class E airspace extending upward from 700 feet above the surface, and removing the Class E airspace extending upward from 1,200 feet above the surface at Colorado Plains Regional Airport, CO.

The Class E airspace designated as a surface area should be expanded to more appropriately contain circling maneuvers.

The Class E airspace extending upward from 700 feet above the surface should be expanded to the southeast to contain aircraft conducting procedure turns for the VOR RWY 29 approach, as terrain exists within 1,500 feet of the minimum procedure turn altitude.

The Class E airspace extending upward from 1,200 feet above the surface should be removed, as this area is already contained within the Denver en route domestic airspace area, and duplication is not necessary.

Finally, this action proposes several administrative modifications to airport's legal descriptions. The airport name in the text header is incorrect in the existing Class E2 and E5 legal descriptions. They should read: ''Colorado Plains Regional Airport, CO.'' The geographic coordinates for the airport should be updated to match the FAA's database. The navigational aid (NAVAID) used in the existing Class E2 legal description should be removed. The NAVAID has been reclassified, and is not needed to describe the airspace. Its removal will simplify the airspace description.

Class E2 and E5 airspace designations are published in paragraphs 6002 and 6005, respectively, of FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in FAA Order JO 7400.11, which is published yearly and becomes effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, Environmental Impacts: Policies and Procedures, prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021, is amended as follows:

Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.

* * * * *

ANM CO E2 Akron, CO [Amended]

Colorado Plains Regional Airport, CO

(Lat. 40°10′32″ N, long. 103°13′19″ W)

That airspace extending upward from the surface within a 4.6-mile radius of the airport.

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM CO E5 Akron, CO [Amended]

Colorado Plains Regional Airport, CO

(Lat. 40°10′32″ N, long. 103°13′19″ W)

That airspace extending upward from 700 feet above the surface within 6.6 miles of the Colorado Plains Regional Airport, and that airspace between 4 miles southwest and 8 miles northeast of the 123° bearing from the airport, extending from the 6.6-mile radius to 18.3 miles southeast of the airport.

Issued in Des Moines, Washington, on July 19, 2022.

B.G. Chew,

Acting Group Manager, Operations Support Group, Western Service Center.

RIN 2120–AA66

Proposed Amendment of Class D and Class E Airspace; Bozeman Yellowstone International Airport, MT

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify the Class D and E surface areas, the Class E airspace area designated as an extension to a Class D or Class E surface area, and the Class E airspace extending upward from 700 feet above the surface at Bozeman Yellowstone International Airport, MT. Additionally, this action proposes several administrative amendments to update the airport's legal descriptions. These actions will ensure the safety and management of instrument flight rules (IFR) and visual flight rules (VFR) operations at the airport.

DATES: Comments must be received on or before September 12, 2022.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: 1–800–647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2022–0764; Airspace Docket No. 21–ANM–37, at the beginning of your comments. You may also submit comments through the internet at *www.regulations.gov.*

FAA Order JO 7400.11F, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *www.faa.gov/air_traffic/publications.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; telephone: (202) 267–8783.

FOR FURTHER INFORMATION CONTACT: Nathan A. Chaffman, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198; telephone (206) 231–3460.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority, as it would modify Class D and Class E airspace at Bozeman Yellowstone International Airport, MT, to support IFR and VFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to Docket No. FAA–2022–0764; Airspace Docket No. 21–ANM–37.'' The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *www.faa.gov/air_traffic/publications/airspace_amendments.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S 216th Street, Des Moines, WA 98198.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021. FAA Order JO 7400.11F is publicly available as listed in the **ADDRESSES** section of this document. FAA Order JO 7400.11F lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 by modifying Class D and Class E surface areas, the Class E airspace area designated as an extension to a Class D or Class E surface area, the Class E airspace extending upward from 700 feet above the surface, and the Class E airspace designated as en route domestic airspace area at Bozeman Yellowstone International Airport, MT.

Class D airspace is intended to contain IFR arrival operations while between the surface and 1,000 feet above the surface, and IFR departure operations while between the surface and the base of adjacent controlled airspace. The current Class D airspace radius is 5.4 miles, which is excessive. This radius should be reduced to 4.9 miles, as additional airspace is not necessary. The Class D airspace should be expanded to the southeast of the airport due to rising terrain, as it's needed to contain departures until reaching 700 feet above the surface.

The Class E surface airspace should be amended to be coincident with the

Bozeman Yellowstone International Airport's Class D airspace legal description.

The Class E airspace area designated as an extension to a Class D or Class E surface area should be removed southwest of the airport, as it is no longer needed. The Class E airspace area designated as an extension to a Class D or Class E surface area northwest of the airport should be modified to more appropriately contain arrivals on the ILS/LOC RWY 12 approach.

The Class E airspace extending upward from 700 feet above the surface around Bozeman Yellowstone International Airport should be reduced from a 13.5-mile radius to a 6.9-mile radius around the airport, as additional airspace is not necessary to contain IFR departures flying toward or over rising terrain. The Class E airspace extending upward from 700 feet above the surface northwest of the airport should be reduced, as the existing airspace is excessive and not necessary. Class E airspace extending upward from 700 feet above the surface should be extended southeast of the airport to contain IFR departures until reaching 1,200 feet above the surface, and IFR arrivals descending below 1,500 feet above the surface.

Finally, the FAA proposes several administrative modifications to the airport's legal descriptions. The Bozeman Yellowstone International Airport geographic coordinates in the Class D and Class E legal descriptions should be updated to match the FAA's database. The Class D and Class E2 legal descriptions should also be updated to replace the outdated use of the phrases ''Notice to Airmen,'' and ''Airport/Facility Directory.'' These phrases should be amended to read ''Notice to Air Missions'' and ''Chart Supplement,'' respectively, to align with the FAA's current nomenclature.

Class D, E2, E4, E5, and E6 airspace designations are published in paragraphs 5000, 6002, 6004, 6005, and 6006, respectively, of FAA Order JO 7400.11F, dated August 10, 2021, and effective September 15, 2021, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in FAA Order JO 7400.11.

FAA Order JO 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial, and unlikely to result in adverse or negative comments. It, therefore: (1) is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ''Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order JO 7400.11F, Airspace Designations and Reporting Points, dated August 10, 2021, and effective September 15, 2021, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ANM MT D Bozeman, MT [Amended]

Bozeman Yellowstone International Airport, MT
(Lat. 45°46′38″ N, long. 111°09′01″ W)

That airspace extending upward from the surface to and including 7,000 feet MSL within a 4.9-mile radius of Bozeman Yellowstone International Airport, and within 2.0 miles each side of the 146° bearing from the airport extending from the 4.9-mile radius of the airport to 6.5 miles southeast of the airport. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective date and time will thereafter be continuously published in the Chart Supplement.

Paragraph 6002 Class E Airspace Areas Designated as a Surface Area.

* * * * *

ANM MT E2 Bozeman, MT [Amended]

Bozeman Yellowstone International Airport, MT
(Lat. 45°46′38″ N, long. 111°09′01″ W)

That airspace extending upward from the surface within a 4.9-mile radius of Bozeman Yellowstone International Airport, and within 2.0 miles each side of the 146° bearing from the airport extending from the 4.9-mile radius of the airport to 6.5 miles southeast of the airport. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Air Missions. The effective date and time will thereafter be continuously published in the Chart Supplement.

Paragraph 6004 Class E Airspace Areas Designated as an Extension to a Class D or Class E.

* * * * *

ANM MT E4 Bozeman, MT [Amended]

Bozeman Yellowstone International Airport, MT
(Lat. 45°46′38″ N, long. 111°09′01″ W)

That airspace extending upward from the surface within 3.4 miles each side of the 316° bearing from the Bozeman Yellowstone International Airport extending from the 4.9-mile radius of the airport to 13.5 miles northwest of the airport.

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANM MT E5 Bozeman, MT [Amended]

Bozeman Yellowstone International Airport, MT
(Lat. 45°46′38″ N, long. 111°09′01″ W)

That airspace extending upward from 700 feet above the surface within a 6.9-mile radius from the Bozeman Yellowstone International Airport, and within 1.8 miles each side of the 131° bearing from the airport extending from the 6.9-mile radius to 14.3 miles southeast of the airport, and within 2.7 miles northeast and 2.9 miles southwest of the 155° bearing from the airport extending from the 6.9-mile radius to 10.6 miles southeast of the airport, and within 3.6 miles each side of the 316° bearing from the airport extending from the 6.9-mile radius to 15.5 miles northwest of the airport.

Paragraph 6006 En Route Domestic Airspace Areas.

* * * * *

ANM MT E6 Bozeman, MT [Amended]

Bozeman Yellowstone International Airport, MT

(Lat. 45°46′38″ N, long. 111°09′01″ W)

That airspace extending upward from 1,200 feet above the surface within a 50-mile radius of the Bozeman Yellowstone International Airport, excluding existing lateral limits of controlled airspace 12,000 feet MSL and above.

Issued in Des Moines, Washington, on July 19, 2022.

B.G. Chew,

RIN 1513–AC88

Proposed Addition of American Single Malt Whisky to the Standards of Identity for Distilled Spirits

AGENCY: Alcohol and Tobacco Tax and Trade Bureau, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Alcohol and Tobacco Tax and Trade Bureau (TTB) proposes to amend the regulations that set forth the standards of identity for distilled spirits to include ''American single malt whisky'' as a type of whisky that is a distinctive product of the United States. This proposal follows petitions and comments submitted by several distillers and the American Single Malt Whisky Commission. TTB invites comments on this proposed amendment to its regulations.

DATES: Comments must be received on or before September 27, 2022.

ADDRESSES: You may electronically submit comments to TTB on this proposal, and view copies of this document, its supporting materials, and any comments TTB receives on it within Docket No. TTB–2022–0007 as posted at *https://www.regulations.gov.* A direct link to that docket is available on the TTB website at *https://www.ttb.gov/distilled-spirits/notices-of-proposed-rulemaking* under Notice No. 213. Alternatively, you may submit comments via postal mail to the Director, Regulations and Ruling Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005. Please see the Public Participation section of this document for further information on the comments requested regarding this proposal and on the submission, confidentiality, and public disclosure of comments.

FOR FURTHER INFORMATION CONTACT: Christopher M. Thiemann, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005; telephone 202–453–2265.

SUPPLEMENTARY INFORMATION:

Background on the Labeling of Distilled Spirits

TTB Authority

The Alcohol and Tobacco Tax and Trade Bureau (TTB) administers regulations regarding the labeling of distilled spirits that include setting forth ''standards of identity.'' The authority to establish these standards is based on section 105(e) of the Federal Alcohol Administration Act (FAA Act), codified in the United States Code at 27 U.S.C. 205(e). That section authorizes the Secretary of the Treasury (the Secretary) to prescribe regulations relating to the ''packaging, marking, branding, and labeling and size and fill'' of alcohol beverage containers ''as will prohibit deception of the consumer with respect to such products'' and ''as will provide consumers with adequate information as to the identity and quality of the products * * *.'' Section 105(e) of the FAA Act also generally requires bottlers and importers of alcohol beverages to obtain certificates of label approval (COLAs) prior to bottling or importing alcohol beverages for sale in interstate commerce.

TTB administers these FAA Act provisions pursuant to section 1111(d)

of the Homeland Security Act of 2002, as codified at 6 U.S.C. 531(d). In addition, the Secretary has delegated certain administrative and enforcement authorities to TTB through Treasury Department Order 120–01.

Part 5 of title 27 of the Code of Federal Regulations (27 CFR part 5) sets forth the regulations implementing those provisions of section 105(e) of the FAA Act as they pertain to distilled spirits.

Classes and Types of Spirits

Subpart I of part 5 of the TTB regulations (27 CFR part 5) establishes standards of identity for distilled spirits products and categorizes these products according to various classes and types. As used in § 5.141, the term ''class'' refers to a general category of spirits. Currently, there are 12 different classes of distilled spirits set out in §§ 5.142–5.156, such as whisky, rum, gin, and brandy. As used in § 5.141, the term ''type'' refers to a subcategory within a class of spirits. For example, ''Cognac'' and ''fruit brandy'' are types of brandy, and ''Cachaça'' is a type of rum.

The TTB labeling regulations at 27 CFR 5.63(a)(2) require that the class and type of distilled spirits appear on the product's label. These regulations provide that the class and type must be stated in conformity with Part 5, Subpart I of the TTB regulations.

Classification of Malt Whisky

Section 5.143(a) sets forth the standard of identity for whisky as follows:

> (a) The *class whisky.* ''Whisky'' or ''whiskey'' is distilled spirits that is an alcoholic distillate from a fermented mash of any grain distilled at less than 95 percent alcohol by volume (190° proof) having the taste, aroma, and characteristics generally attributed to whisky, stored in oak barrels (except that corn whisky need not be so stored), and bottled at not less than 40 percent alcohol by volume (80° proof), and also includes mixtures of such distillates for which no specific standards of identity are prescribed.

In § 5.143, paragraphs (c)(1) through (18) categorize the specific types of whisky, such as Bourbon whisky, spirit whisky, and Scotch whisky. Currently, ''malt whisky'' is found in paragraph (c)(2) and is described as whisky produced at not more than 160° proof from a fermented mash of not less than 51 percent malted barley and stored at not more than 125° proof in charred new oak barrels. Such whisky stored in charred new oak barrels for a period of 2 years or more may optionally be further designated as ''straight.'' See 27 CFR 5.143(c)(5). Paragraph (c)(7) sets forth the standard for whisky distilled from malt mash, which is whisky produced in the United States at not exceeding 160° proof from a fermented mash of not less than 51 percent malted barley and stored in used oak barrels. As a result, the labeling regulations provide standards for identifying whisky as ''malt whisky'' and ''whisky distilled from malt mash'' but do not further specify standards for ''single malt whisky.''

Section 5.154(a)(3) provides that geographical names that are not names for distinctive types of distilled spirits, and that have not become generic, may not be used unless the product is produced in the particular place or region indicated in the name. Accordingly, a product designated as ''American whisky'' (or ''American single malt whisky'') must have been produced in the United States.

American Single Malt Whisky Petitions and Comments

Petitions

In October 2017, TTB received three petitions with similar content from XO Alambic, Rémy Cointreau, and Westland Distillery. Each of these petitioners noted that they were filing the petition on behalf of, or with, the American Single Malt Whiskey Commission (ASMWC), an association of at least seventy-five producers of whisky in the United States.

In their petitions, the distillers requested the establishment of a standard of identity to define the ''American single malt whisky'' category for producers and consumers alike. They noted that the American whisky category has been growing over the past decade and continues to expand, and that recognition of American single malt whisky is at an all-time high, with U.S. distillers winning international competitions with products in these categories. They stated that establishment of a standard of identity would benefit consumers, as it would provide a definition for the product, establish trust in the category, clarify label declarations, and equip consumers with the necessary information to make informed decisions so they can have confidence in the products they are choosing to buy in a similar way that Scotch whisky standards provide such information to American consumer. They also believe establishment of a standard of identity would strengthen the U.S. economy by increasing tax revenue related to the sale of American Single Malt Whiskey, and by creating jobs related to producing, distributing, and selling such a product and the ingredients used in this product.

With some slight, non-substantive variations, these petitions requested that TTB add a standard of identity as follows:

> American Single Malt Whisky is whisky that is mashed, matured and distilled at a single United States distillery, is so distilled to a proof not exceeding 160° proof from a fermented mash of 100% malted barley, is stored in oak containers not exceeding a capacity of 700 liters, and is bottled at not less than 80° proof.

The petitioners conveyed that they believe the proposed language is complementary to the long-standing regulatory definitions for whiskies such as bourbon, but is distinctive enough to add value to the new designation while not inhibiting innovation among producers of American Single Malt Whisky.

TTB's Rulemaking on Modernizing Its Labeling Regulations

On November 26, 2018, TTB published in the **Federal Register** a Notice of Proposed Rulemaking (Notice No. 176, 83 FR 60562) proposing to amend its regulations governing the labeling and advertising of wine, distilled spirits, and malt beverages to reorganize and recodify these regulations. TTB undertook this action in order to simplify and clarify its regulatory standards, incorporate guidance documents and current policy into the regulations, and reduce the regulatory burden on industry members where possible. In Notice No. 176, TTB sought comments from the public on the regulatory proposals and TTB received over 1,100 comments.

TTB did not include a standard of identity for American single malt whisky in the regulatory amendments proposed in Notice No. 176. Regardless, TTB received over 200 comments in support of a new standard for American single malt whisky, including one from the ASMWC, which was mirrored in a number of other comments, urging TTB to add such a standard. The ASMWC's comment in response to Notice No. 176 proposed a standard slightly modified from the original petitioned-for standard. This new proposal would require that the distillation, mashing, and maturation of American Single Malt Whisky take place in the United States, but would require only that the distillation take place at a single United States distillery. The ASMWC stated in their comment that it has the support of more than 130 producers of single malt whisky. They restated their view that the proposed language is complementary to existing definitions

for bourbon whisky and whisky, but distinctive enough to add value to the new designation while not inhibiting innovation among producers of American Single Malt Whisky.

On February 9, 2022, TTB published T.D. TTB–176, which finalized the updates to the regulations proposed in Notice No. 176 with regard to distilled spirits and malt beverages. TTB did not finalize a standard for American single malt whisky in that final rule because TTB had not yet published such a standard in a notice of proposed rulemaking.

TTB Regulatory Proposal

After reviewing the petitions and comments, the regulations on the standards of identity in 27 CFR part 5, and TTB's database of approved Certificates of Label Approval (COLAs) (as discussed below), TTB has determined that amending the standards of identity regulations at § 5.143 to provide for a new standard of identity for American Single Malt Whisky merits consideration and public comment, as invited in this notice of proposed rulemaking.

Therefore, this document proposes to amend the standard of identity in § 5.143(c) by adding American Single Malt Whisky as a type of whisky in paragraph (15), generally incorporating the proposal in the comments to Notice No. 176. Of note, TTB is proposing that American Single Malt Whisky could be stored in any oak barrel (used, uncharred new, or charred new) not exceeding 700 liters, as the petitioners requested.

Effect on Currently Approved Labels

If finalized, this amendment to the TTB regulations would revoke by operation of regulation any COLA that uses the term ''American single malt whisky'' as a designation for a distilled spirits product that does not meet the proposed standard of identity. TTB has searched its COLA database and does not believe that this rulemaking will affect any existing labels. To minimize the adverse effect on industry members who hold COLAs for labels that conflict with the proposed ''American single malt whisky'' designation and that would therefore be revoked by operation of regulation, however, TTB could allow for a time-limited use up of such labels by delaying the effective date of the rule establishing this designation. Additionally, TTB specifically seeks comments on the impact on current producers, including whether this rulemaking would affect any existing labels. TTB notes that distillers currently using the designations ''malt whisky,'' ''American malt whisky,'' ''whisky distilled from malt mash,'' or ''American whisky distilled from malt mash'' on their labels may continue to do so.

Public Participation

Comments Invited

TTB invites comments from interested members of the public on this proposed rule, including on whether the proposed amendment would have an adverse impact on owners of U.S. trademarks and current producers of malt whisky. In addition, TTB specifically seeks comments on the following questions:

- Noting that other whisky standards do not incorporate size restrictions for barrels, is a 700-liter limit for oak barrels for aging American single malt whisky necessary or appropriate?
- What impact, if any, would this new standard of identity have on current producers of malt whisky?
- If TTB adopts this proposed amendment, and if any previously approved labels are impacted, for how long should TTB allow the use of previously approved labels for American single malt whisky that do not meet the new standard of identity before they are revoked by operation of regulation?
- Is it appropriate that the new standard of identity allows the use of used, uncharred new, and charred new oak barrels?
- Should TTB amend its regulations to allow for the designation ''straight'' to be used with American Single Malt Whisky?
- Should the use of coloring, flavoring, or blending materials be allowed in the production of American single malt whisky? If so, what coloring, flavoring, or blending materials are ''customarily employed'' in the production of American single malt whisky, in accordance with 27 CFR 5.155? Please provide any available evidence of their use.
- Should TTB amend its regulations to allow for mixtures of American single malt whisky to be labeled as ''blended American single malt whisky,'' similar to how TTB regulations allow for blended Scotch whisky and blended Canadian whisky to be labeled, respectively, ''blended Scotch whisky'' and ''blended Canadian whisky''?
- On February 9, 2022, the Department of the Treasury released a report, ''Competition in the Markets for Beer, Wine, and Spirits,'' which was produced in response to Executive Order 14036, ''Promoting Competition in the American Economy'' (86 FR 36987, July 9, 2021). Would the addition of a standard of identity for American Single Malt Whisky affect competition in the alcohol beverage market?

Submitting Comments

You may submit comments on this proposal as an individual or on behalf of a business or other organization via the *Regulations.gov* website or via postal mail, as described in the **ADDRESSES** section of this document. Your comment must reference Notice No. 213 and must be submitted or postmarked by the closing date shown in the **DATES** section of this document. You may upload or include attachments with your comment. You also may submit a comment requesting a public hearing on this proposal. The TTB Administrator reserves the right to determine whether to hold a public hearing. If TTB schedules a public hearing, it will publish a notice of the date, time, and place for the hearing in the **Federal Register**.

Confidentiality and Disclosure of Comments

All submitted comments and attachments are part of the rulemaking record and are subject to public disclosure. Do not enclose any material in your comments that you consider confidential or that is inappropriate for disclosure.

TTB will post, and you may view, copies of this document, its supporting materials, and any comments TTB receives about this proposal within the related *Regulations.gov* docket. In general, TTB will post comments as submitted, and it will not redact any identifying or contact information from the body of a comment or attachment.

Please contact TTB's Regulations and Rulings division by email using the web form available at *https://www.ttb.gov/contact-rrd,* or by telephone at 202–453–2265, if you have any questions regarding how to comment on this proposal or to request copies of this document, its supporting materials, or the comments received in response.

Regulatory Analysis and Notices

Regulatory Flexibility Act

Pursuant to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), TTB certifies that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The proposed rule only adds a new standard of identity for whisky at 27 CFR 5.143, which allows for the designation of a new class and type designation on labels, and it imposes no new reporting, recordkeeping, or other

administrative requirements. TTB searched the COLAs Online database and did not find any labels that we believe would be affected, but we are taking public comment on the issue of affected labels to get more information about the potential economic effects of the rulemaking. Therefore, no regulatory flexibility analysis is required.

Executive Order 12866

It has been determined that this proposed rule is not a significant regulatory action as defined by Executive Order 12866 of September 30, 1993. Therefore, no regulatory assessment is required.

Drafting Information

Christopher M. Thiemann of the Regulations and Rulings Division drafted this notice of proposed rulemaking.

List of Subjects in 27 CFR Part 5

Advertising, Alcohol and alcoholic beverages, Consumer protection, Customs duties and inspection, Imports, Labeling, Liquors, Packaging and containers, and Reporting and recordkeeping requirements.

Proposed Regulatory Amendment

For the reasons discussed in the preamble, TTB proposes to amend title 27, chapter I, part 5, Code of Federal Regulations, as follows:

PART 5—LABELING AND ADVERTISING OF DISTILLED SPIRITS

■ 1. The authority citation for part 5 continues to read as follows:

Authority: 26 U.S.C. 5301, 7805, 27 U.S.C. 205 and 207.

Subpart C—Standards of Identity for Distilled Spirits

■ 2. Section 5.143 is amended by:

■ a. Adding a sentence at the end of paragraph (b); and

■ b. In Table 1 to paragraph (c), adding paragraph (15).

The additions read as follows:

§ 5.143 Whisky.

* * * * *

(b) * * * ''American single malt whisky'' must be distilled entirely at one U.S. distillery, and must be mashed, distilled, and aged in the United States.

(c) * * *

TABLE 1 TO PARAGRAPH (c)—TYPES OF WHISKY AND PRODUCTION, STORAGE, AND PROCESSING STANDARDS

Type	Source	Distillation proof	Storage	Neutral spirits permitted	Allowable coloring, flavoring, blending materials permitted
*	*	*	*	*	*
(15) American single malt whisky.	Fermented mash of 100 percent malted barley.	160° or less ...	Oak barrels not exceeding 700 liters.	No	Yes.

* * * * *

Signed: July 20, 2022.

Mary G. Ryan,

Administrator.

Approved: July 20, 2022.

Thomas C. West, Jr.,

Deputy Assistant Secretary (Tax Policy).

[FR Doc. 2022–16244 Filed 7–28–22; 8:45 am]

BILLING CODE 4810–31–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR part 52

[EPA–R09–OAR–2022–0420; FRL–9970–01–R9]

Limited Approval and Limited Disapproval of California Air Plan Revisions; San Joaquin Valley Air Pollution Control District; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing a limited approval and limited disapproval of revisions to the San Joaquin Valley Air Pollution Control District (SJVAPCD or ''District'') portion of the California State Implementation Plan (SIP). These revisions concern volatile organic compounds (VOC), oxides of nitrogen (NO_X), particulate matter (PM) (including PM equal to or less than 2.5 microns in diameter ($PM_{2.5}$) and PM equal to or less than 10 microns in diameter (PM_{10})), and their precursors. This action addresses a revised rule governing the issuance of permits for stationary sources, focusing on the preconstruction review and permitting of major sources and major modifications under part D of title I of the Clean Air Act (CAA or ''Act''). We are taking comments on this proposal and a final action will follow.

DATES: Written comments must be received on or before August 29, 2022.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2022–0420 at *www.regulations*. For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be removed or edited from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI and multimedia submissions, and general guidance on making effective comments, please visit *www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Laura Yannayon, EPA Region IX, 75 Hawthorne St., San Francisco, CA

94105. By phone: (415) 972–3534, or by email at *yannayon.laura@epa.gov.*

SUPPLEMENTARY INFORMATION:

Throughout this document, the terms ''we,'' ''us,'' and ''our'' refer to the EPA.

I. The State's Submittal

A. What rule did the State submit?

Table 1 lists the rule addressed by this proposal including the date it was adopted by the District and submitted to the EPA by the California Air Resources Board (CARB), which is the governor's designee for California SIP submittals. This rule constitutes part of the SJVAPCD's program for preconstruction review and permitting of new or modified stationary sources under its jurisdiction. The rule revisions that are the subject of this action represent an update to the SJVAPCD's preconstruction review and permitting program and are intended to satisfy the requirements under part D of title I of the Act, ''nonattainment new source review (''NNSR'') as well as the general preconstruction review requirements under section 110(a)(2)(C) of the Act, minor new source review (''NSR'').

TABLE 1—SUBMITTED RULE

Rule No.	Rule title	Adopted	Submitted
Rule 2201	New and Modified Stationary Source Review Rule	08/15/19	11/20/19 [1]

On May 7, 2020, the submittal for Rule 2201 was found to meet the completeness criteria in 40 CFR part 51, appendix V, which must be met before formal EPA review.[2]

B. Are there other versions of this rule?

Rule 2201 was previously approved into the California SIP on September 17, 2014.[3] If the EPA finalizes the action proposed herein, this prior version of the rule will be replaced in the SIP by the submitted rule identified in Table 1.

C. What is the purpose of the submitted rule?

As noted above and described in further detail below, the submitted rule is intended to satisfy the minor NSR and NNSR requirements of section 110(a)(2)(C) and part D of title I of the Act, and related EPA regulations. Minor NSR requirements are generally applicable for SIPs in all areas, while NNSR requirements apply only for areas designated as nonattainment for one or more National Ambient Air Quality Standards (NAAQS). The San Joaquin Valley is currently designated ''Extreme'' nonattainment for the 1997, 2008 and 2015 ozone NAAQS and ''Serious'' nonattainment for the 1997, 2006, and 2012 $PM_{2.5}$ NAAQS. See 40 CFR 81.305. Therefore, the designation of San Joaquin Valley as federal ozone and $PM_{2.5}$ nonattainment areas triggered the requirement for the District to develop and submit an NNSR program to the EPA for approval into the California SIP.

The EPA issued a final rule on December 6, 2018, that found that the District had failed to submit a SIP submittal addressing NNSR requirements for $PM_{2.5}$.[4] This finding of failure to submit triggered sanctions clocks under CAA section 179. The EPA's May 7, 2020 finding of completeness represented the EPA's determination that the District had corrected the deficiencies related to NNSR requirements for the 2006 and 2012 $PM_{2.5}$ NAAQS that formed the basis for the EPA's December 6, 2018 finding of failure to submit, and as a result, the associated sanctions and running of the sanctions clocks were permanently stopped.[5] The EPA's Technical Support Document (TSD) has more information about the purpose of the submitted rule.

II. The EPA's Evaluation and Action

A. How is the EPA evaluating the rule?

The EPA has evaluated Rule 2201 for compliance with the applicable requirements of section 110(a)(2)(C) and part D of title I of the CAA and the associated regulations at 40 CFR 51.160–165, consistent with the District's classification as an Extreme ozone nonattainment area and Serious $PM_{2.5}$ nonattainment area. We have also considered whether the rule meets the federal visibility requirements related to state NNSR programs as described in 40 CFR 51.307. Additionally, we have reviewed the rule for consistency with other CAA general requirements for SIP submittals, including requirements at section 110(a)(2) regarding rule enforceability, and requirements at sections 110(l) and 193 for SIP revisions.

Part D and title I of the CAA and the implementing regulations at 40 CFR 51.165 contain the NNSR program requirements for major stationary sources and major modifications for the pollutants for which the area has been designated nonattainment. The applicable provisions of 40 CFR 51.307 establish requirements for state NNSR programs to provide for review of major stationary sources and major modifications that may have an impact on visibility in any mandatory Class I Federal area, consistent with CAA section 169A. Section 110(a)(2)(A) of the Act requires that regulations submitted to the EPA for SIP approval must be clear and legally enforceable. Section 110(l) of the Act prohibits the EPA from approving SIP revisions that would interfere with any applicable requirement concerning attainment and reasonable further progress (RFP) or any other applicable requirement of the CAA. Section 193 of the Act prohibits the modification of a SIP-approved control requirement in effect before November 15, 1990, in a nonattainment area, unless the modification ensures equivalent or greater emission reductions of the relevant pollutant(s). With respect to procedures, CAA sections 110(a) and 110(l) require that a state conduct reasonable notice and hearing before adopting a SIP revision.

[1] The submittal was transmitted to the EPA via a letter from CARB dated November 15, 2019.

[2] See letter dated May 7, 2020, from Elizabeth J. Adams, U.S. EPA Region 9, to Richard Corey, CARB, regarding the November 20, 2019, submittal of District Rule 2201.

[3] 79 FR 55637.

[4] 83 FR 62720.

[5] See 40 CFR 52.31(d)(5).

B. Does the rule meet the evaluation criteria?

With the exceptions noted below, the EPA finds that Rule 2201 generally satisfies the applicable CAA and regulatory requirements for sources subject to NNSR permit program requirements for Extreme ozone nonattainment areas and Serious $PM_{2.5}$ nonattainment areas. Although the rule does not satisfy the related visibility requirements in 40 CFR 51.307, the San Joaquin Valley is subject to a Federal Implementation Plan that addresses these requirements.[6]

Rule 2201 complies with the substantive and procedural requirements of CAA section 110(l). With respect to the procedural requirements, based on our review of the public process documentation included with the submitted rules, we find that the SJVAPCD has provided sufficient evidence of public notice and opportunity for comment and public hearings prior to submittal of this SIP revision and has satisfied these procedural requirements under CAA section 110(l). With respect to the substantive requirements of CAA section 110(l), we have determined that our approval of Rule 2201 would not interfere with the area's ability to attain or maintain the NAAQS or with any other applicable requirements of the CAA.

Similarly, we find that Rule 2201 is approvable under section 193 of the Act because it does not modify any control requirement in effect before November 15, 1990.

Rule 2201 is generally consistent with criteria for the EPA's approval of regulations submitted for inclusion in the SIP, including the requirement in CAA section 110(a)(2)(A) that submitted regulations be clear and legally enforceable.

For the reasons stated above and explained further in our technical support document (TSD), we find that the submitted rule generally satisfies the applicable CAA and regulatory requirements for minor NSR and NNSR permit programs under CAA section 110(a)(2)(C) and part D of title I of the Act and other applicable requirements, subject to the exceptions noted below where the EPA has identified deficiencies. Because Rule 2201 is not fully consistent with these requirements, we are proposing a limited approval and limited disapproval of Rule 2201 under CAA sections 110(k)(3) and 301(a). Rule 2201 provisions that do not meet the evaluation criteria are summarized in the following section and described in more detail in the TSD included in the docket for this proposed action.

C. What are the rule deficiencies?

The following provisions of Rule 2201 do not satisfy the requirements of section 110 and/or part D of title I of the Act, and prevent full approval of the Rule 2201:

1. Definitions

Section 3.18 of Rule 2201 incorporates the federal definition of ''major modification'' through the definition of ''Federal Major Modification,'' but omits several other definitions necessary for proper application of this term and related calculation provisions. These missing definitions are listed in the TSD for this proposed rulemaking. The District must either include definitions for these terms, or explicitly state that for the purposes of the Rule 2201 definition of ''Federal Major Modification,'' all terms used in the definition are as defined in 40 CFR 51.165, as it exists on the date of adoption.

Additionally, Rule 2201 contains deficient definitions for the following terms: Major Source; Routine Maintenance, Repair and Replacement; PM_{10} Emissions; Secondary Emissions; and Volatile Organic Compounds. The specific deficiencies associated with these terms, and the necessary revisions necessary to correct the deficiencies, are described in the TSD for this proposed action.

2. Interpollutant Offset Requirements

Section 4.13.3.1 allows the District to approve interprecursor trading (IPT) of ozone precursors to satisfy emission offset requirements, provided certain conditions are satisfied. However, on January 29, 2021, the D.C. Circuit Court of Appeals in *Sierra Club* v. *EPA,* 984 F.3d 1055, issued a decision holding that the CAA does not allow IPT for ozone precursors and vacating the provisions in the EPA's NNSR regulations allowing IPT for ozone precursors. In light of the Court's decision, the provision in section 4.13.3.1 allowing for IPT for ozone precursors is no longer permissible. The District must revise section 4.13.3.1 to ensure it is consistent with the Courts decision and the provisions of 40 CFR 51.165(a)(11) as it pertains to ozone precursors.

3. Offset Exemptions

Sections 4.6.6 and 4.6.7 both allow exemptions from otherwise applicable offset requirements for the relocation of an entire stationary source or emission unit, respectively, if certain conditions are met. Because federal requirements do not allow any exemptions from offset requirements for relocation projects, we find these provisions deficient. The District may allow a source or emission unit to obtain emission reduction credits for the quantity of actual emissions previously emitted at the old location and use them as offsets at the new location. However, the full potential to emit (PTE) of the source or emission unit at the new location must be offset at the appropriate offset ratio. Alternatively, the District may limit the applicability of these exemptions to minor sources that are not subject to the NNSR offsetting requirements.

Section 4.6.8 provides an offset exemption for the installation or modification of required emission control equipment. Paragraph 4.6.8.4 establishes emissions increase limits for a project to qualify for this exemption but does not include a limit for $PM_{2.5}$ emissions and is therefore deficient. The District must update this provision to add a limit on increases in permitted emissions or potential to emit of no more than 10 tpy of $PM_{2.5}$. This will ensure that the exemption only applies to emission control projects that will not trigger a $PM_{2.5}$ major modification.

4. Public Notice Requirements for Minor Source Permits Emitting Ozone Precursors

Section 5.4.5 requires public notice for any project resulting in an increase in permitted emissions of any pollutant exceeding 20,000 pounds per year (10 tpy). As an extreme ozone nonattainment area, the major source threshold for ozone precursors is also 10 tpy, meaning that the rule currently does not require any public notice for minor sources of NO_X and VOC, whose emissions may contribute to ozone nonattainment in the San Joaquin Valley. Therefore, the public notice threshold does not adequately address the minor source and minor modification public notice requirements for VOC and NO_X. The District must demonstrate that its public notice threshold for minor sources of NO_X and VOC is sufficiently stringent to exclude only sources whose emissions are inconsequential to attainment.

5. District Equivalency With Federal Offset Requirements

Section 173 of the CAA and the EPA's implementing NSR regulations at 40 CFR 51.165 require emissions increases associated with new major sources and major modifications to be offset through corresponding decreases in emissions.

[6] 40 CFR 52.281(d).

To be creditable as offsets, these offsetting emissions reductions must be surplus, permanent, quantifiable, and federally enforceable,[7] and meet other federal requirements.

The EPA allows local permitting authorities flexibility in designing and implementing emissions offset programs, so long as these programs achieve an equal or greater amount of creditable emissions reductions as would be required under the offset program described in the federal NSR regulations. Rule 2201 differs from the federal offset requirements in several respects, including especially how it calculates ''surplus'' emission reductions required to offset emissions increases from new major sources and major modifications.

To account for these differences, Rule 2201 includes an offset equivalency tracking system in Section 7, which requires the District to submit an annual report comparing the offsets actually required by the District to those that would have been required under the federal requirements in terms of both the quantity of offsets required (''Test 1'') and the creditable ''time-of-use'' surplus value of the offsets (''Test 2'').[8]

If there is a shortfall under either Test 1 or Test 2, the District may supplement the demonstration by retiring additional creditable emission reductions that have not been used as offsets.[9] If the District cannot produce sufficient additional creditable emission reductions to make up a shortfall under either test, the failure triggers specific remedies under section 7.4. For a shortfall under Test 1, all new major source and major modification authority to construct (ATC) permits issued after the report deadline must apply the federal offset calculation requirements from 40 CFR 51.165 and part D of title I of the CAA, including the requirements to provide the federally required quantity of offsets and to ensure that these offsets are time-of-use surplus adjusted.[10] For a shortfall under Test 2, all new major source and major modification ATC permits issued after the report deadline must ensure that emissions reductions used to satisfy offset requirements are creditable and time-of-use surplus adjusted.[11]

The EPA first approved these provisions in 2004.[12] In the years since, the District has submitted annual equivalency demonstrations as described under the rule, showing equivalency under Test 1 and Test 2.[13] For many pollutants and years, the District has demonstrated equivalency on an annual basis, by collecting more offsets annually than required under the federal program.[14] However, tightened federal requirements resulting from the San Joaquin Valley's 2010 reclassification to Extreme ozone nonattainment has resulted in the District collecting, in some years, fewer annual offsets for VOC and NO_X than federally required. As a result, recent VOC and NO_X equivalency demonstrations have relied on ''carryover'' offsets collected in previous reporting years, as well as additional creditable emission reductions from facility closures that have not been claimed for offset credit by the facility operators (often termed ''orphan shutdowns''), and agricultural engine electrification projects.

The District's 2019–2020 Annual Offset Equivalency Report (''2019—2020 Report'') was the first to demonstrate a shortfall for any pollutant.[15] The 2019–2020 Report showed a failure of Test 1 and Test 2 for VOC, and a Test 2 failure for NO_X, and attributed these failures to the District's provisional removal of the additional creditable emission reductions associated with orphan shutdowns and engine electrification projects.[16] In response to the Report's VOC and NO_X failures, the District began implementing the federal offset requirements for VOC, and the federal requirements for offset surplus value (but not offset quantity) for NO_X, as described in the section 7 remedy provisions.[17]

The District's 2020–2021 Annual Offset Equivalency Report (''2020–2021 Report'') showed offset equivalency for PM_{10}, $PM_{2.5}$, CO, and SO_X.[18] The 2020–2021 Report did not include a Test 1 or Test 2 demonstration for VOC, or a Test 2 demonstration for NO_X, since the 2019–2020 Report found that the District's program was no longer showing equivalency under these tests. The 2020–2021 Report's Test 1 demonstration for NO_X showed that the District required fewer offsets in the reporting year than would have been required under federal offset requirements, but that the District's offset program maintained a sufficient balance of carryover offsets from previous reporting years to make up the difference. Critically, however, while NO_X offsets collected in the most recent reporting year were surplus adjusted to time-of-use pursuant to federal requirements (per the District's response to the prior year's Test 2 failure), the carryover offsets were credited at their full time-of-issuance value (*i.e.,* these offsets were not federally surplus-adjusted). Since the District's previous report had shown a Test 2 shortfall for NO_X offsets, these carryover offsets no longer retained any surplus balance that could be counted toward equivalency. The District subsequently issued a revised report withdrawing the NO_X portion of the 2020–2021 Report, based on the District's concern that the remedy of requiring a federal time-of use surplus adjustment was not adequate to ensure full federal equivalency.[19]

Since the shortfalls from the 2019–2020 and 2020–2021 Reports, several shortcomings in the District's equivalency system have become apparent. As an initial matter, the equivalency failures for VOC and NO_X mean that the District must update the rule to apply federal applicability and

[7] 40 CFR 51.165(a)(3)(ii)(C)(*1*)(*i*).

[8] ''Time-of-use'' surplus signifies that the offsetting emissions reductions are surplus of applicable requirements as of the issuance date of the ATC permit for the project whose emission increases the reductions are used to offset. The federal offset program requires all offsets to be time-of-use surplus. CAA 173(c)(2). In contrast, the quantity of offsets surrendered for construction permits issued by the District, as measured in Test 1, are surplus-adjusted only at the time the emission reduction credit is initially issued (''time-of-issuance'' surplus). Rule 2201 at section 3.2.2. Since emissions reductions may be credited years before they are used to offset a project, more stringent control requirements implemented in the interim period may significantly reduce the time-of-use surplus value relative to the time-of-issuance surplus value. Therefore, the District's allowance of ERCs valued at time-of-issuance is generally less stringent than federal requirements because it may assign higher value to a credit than is federally creditable.

[10] *Id.* at section 7.4.1.2.

[11] *Id.* at section 7.4.2.1.

[12] 69 FR 27837 (May 17, 2004). The TSD for this proposed action includes more detail on the history of the Section 7 provisions and EPA's approval of the equivalency system.

[13] These reports are generally available at *www.valleyair.org/busind/pto/annual_offset_report/annual_offset_report.htm.*

[14] This has been most common for PM_{10}, CO, and SO_X, when the District has applied lower offsetting thresholds than applicable under the federal major source definitions at 40 CFR 51.165(a)(1)(iv)(A).

[15] SJVAPCD, ''2019–2020 Annual Offset Equivalency Report,'' November 20, 2020.

[16] Id. at 4–5. The District withdrew these credits in response to a CARB report that identified concerns about the assumptions and calculations that the District applied in crediting these reductions, among other issues associated with the District's implementation of its offset program. See CARB, ''Review of the San Joaquin Valley Air Pollution Control District Emission Reduction Credit System,'' June 2020.

[17] Rule 2201, section 7.4.1.2 and 7.4.2.1.

[18] SJVAPCD, ''2020–2021 Annual Offset Equivalency Report,'' November 19, 2021.

[19] SJVAPCD, ''2020–2021 Revised Annual Offset Equivalency Report,'' March 1, 2022 (''2020–2021 Revised Report''). See also letter dated March 21, 2022, from Elizabeth J. Adams, Director, EPA Region IX Air and Radiation Division, to Samir Sheikh, Executive Director, SJVAPCD (conveying EPA concerns about 2020–2021 Report NO_X demonstration, and supporting District decision to withdraw through 2020–2021 Revised Report).

offset requirements for these pollutants.[20] More generally, the 2020–2021 Report showed a significant disconnect between the section 7 tests and remedies for all pollutants. Specifically, once the District has failed Test 2, it has effectively demonstrated that its program is less stringent than the federal requirements because it has not provided an equivalent amount of time-of-use surplus emissions reductions as would have been required under the federal program.[21] However, the remedy for a Test 2 failure provides only that the District must require the offsets collected for future permits to be time-of-use surplus adjusted, and does not contain any explicit requirement for the District to collect the federal quantity of time-of-use surplus offsets for those permits. Therefore, the Test 2 remedy does not ensure full offset equivalency following a Test 2 failure.

Additionally, we identified a deficiency in Rule 2201 in that it does not contain any requirement to prevent the equivalency system from continuing to operate at a deficit once available carryover offsets and additional creditable emission reductions are exhausted. Because the rule only requires the District to demonstrate equivalency on an annual (rather than ongoing) basis, the District may continue to issue permits that require less than the federal quantity of surplus offsets even after the equivalency system has run out of excess offsets and emission reductions that can be used to restore the difference. This could allow the District to incur an increasing deficit for up to 15 months before any remedy is in place, since the rule's remedies become effective only after the submission deadline for the annual offset equivalency report.[22]

As described above, our 2004 approval of Rule 2201 found that an annual aggregate demonstration was generally appropriate and would not cause significant delay in implementing a remedy. However, this finding relies on demonstrations involving an annual shortfall that could be made up using carryover offsets, rather than a shortfall that exceeds the balance of available carryover offsets and additional creditable emission reductions within the equivalency system, as happened in the 2019–2020 Report.[23] On reconsideration, we find that an annual aggregate system may be inappropriate because it does not ensure that sufficient creditable emission reductions are available to offset emissions from new construction prior to an ATC permit being issued.[24] Moreover, we find that the specific provisions of Rule 2201 are inadequate because they do not contain any safeguards to prevent the District from continuing to operate its equivalency system with a negative balance during a reporting period.

Finally, because neither remedy provides a mechanism to require the District to quantify or restore a negative balance in the equivalency system, both remedies fail to ensure full federal offset equivalency in the event of a shortfall. Thus, even where the District adopts all offset requirements of the federal program in response to an equivalency failure, it will retain an historic deficit relative to the federal program, which is not made whole under the rule. Therefore, the EPA finds that the District must revise the rule to address these deficiencies.

The TSD for this proposed action includes suggestions for how the District can correct these deficiencies. We encourage the District to consult with Region 9 during the rule development process to ensure that all deficiencies are properly addressed.

6. Temporary Replacement Emission Units

The submitted version of Rule 2201 includes revisions to section 8.1.3 to provide an ''application shield'' for Temporary Replacement Emission Units (TREUs). An application shield is an administrative mechanism that allows a source to operate prior to submitting an application and obtaining an ATC, if certain conditions are met. While this provision is generally approvable, we have identified two deficiencies. First, the provision specifies that TREUs must be addressed by a best available retrofit control technology (BARCT) rule, but ''BARCT'' is not defined in Rule 2201 or the approved SIP. Second, the provision specifies that a TREU must be equipped with a control device that is ''capable'' of at least 85% emission control but does not specify any required minimum level of control that must actually be achieved. The definition of Routine Replacement Emissions Unit in section 3.35.5 of the existing rule also contains these same two deficiencies. These provisions must be revised to incorporate a definition of ''BARCT'' and to specify a minimum level of emission control to be achieved.

7. Other Deficiencies

The TSD for this proposed action describes several other federal NNSR requirements not addressed in Rule 2201. These include the following: stack height requirements at 40 CFR 51.164; enforceable procedures as provided at 40 CFR 51.165(a)(5)(i) and (ii); and permit issuance restrictions based on inadequate SIP implementation at CAA section 173(a)(4). This section of the TSD also notes that the rule contains a cross-reference to a State statutory provision that should be clarified with an applicable date. See our discussion in Section 6.3.6 of the TSD for more information on these deficiencies.

D. EPA Recommendations to Further Improve the Rule

The TSD includes recommendations for the next time the SJVAPCD modifies Rule 2201.

E. Proposed Action and Public Comment

As authorized in sections 110(k)(3) and 301(a) of the Act, the EPA is proposing a limited approval and limited disapproval of Rule 2201. We will accept comments from the public on this proposal until August 29, 2022. If we finalize this action as proposed, this action will incorporate Rule 2201 into the SIP, including those provisions identified as deficient. This approval is limited because EPA is simultaneously proposing a limited disapproval of the rule under section 110(k)(3). If finalized as proposed, our limited disapproval action would trigger an obligation on the EPA to promulgate a Federal Implementation Plan unless the State corrects the deficiencies, and the EPA approves the related plan revisions, within two years of the final action. Additionally, because the deficiency relates to NNSR requirements under part D of title I of the Act, the offset sanction in CAA section 179(b)(2) would apply in the San Joaquin Valley 18 months after the effective date of a

[20] See Rule 2201, section 7.4.1.2.

[21] See CAA 173(a)(1)(A) (requiring state NSR programs to obtain ''sufficient offsetting emissions reductions'' as determined by federal NSR regulations).

[22] See Rule 2201 at section 7.4.1.2 and 7.4.2.1. Fifteen months represents the outermost time for a shortfall to be addressed, running from the start of a reporting year (August 20) to the reporting deadline (November 20 of the following year). We note that the District initiated federal time-of-use surplus adjustments for VOC and NO_X once it could no longer demonstrate Test 2 equivalency for these pollutants, consistent with the Test 2 remedy but prior to the reporting deadline. We recognize this as a voluntary correction consistent with the District's provisional withdrawal of additional creditable reductions of these pollutants, rather than a requirement of the existing rule text.

[23] See 69 FR 27837, 27841.

[24] See CAA sections 173(a) and 173(c)(1) (specifying that emission reductions used to offset a new or modified major source must be federally enforceable before a permit for the source is issued, and must be in effect and enforceable by the time the source commences operation). See also CAA section 173(a)(1)(A) (requiring sufficient emissions reductions to have been ''obtained'' by the time the source commences operation).

final limited disapproval, and the highway funding sanctions in CAA section 179(b)(1) would apply in the area six months after the offset sanction is imposed. Neither sanction will be imposed under the CAA if the State submits and we approve, prior to the implementation of the sanctions, a SIP revision that corrects the deficiencies we identify in our final action. The EPA intends to work with the SJVAPCD to correct the deficiencies in a timely manner.

Note that Rule 2201 has been adopted by the SJVAPCD, and the EPA's final limited disapproval would not prevent the local agency from enforcing it. The limited disapproval would also not prevent any portion of the rule from being incorporated by reference into the federally enforceable SIP.[25]

III. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the rule discussed in Section I. and listed in Table 1 of this preamble. The EPA has made, and will continue to make, this document available electronically through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *www.epa.gov/laws-regulations/laws-and-executive-orders.*

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action and was therefore not submitted to the Office of Management and Budget (OMB) for review.

B. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because this action does not impose additional requirements beyond those imposed by state law.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities beyond those imposed by state law.

D. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action does not impose additional requirements beyond those imposed by state law. Accordingly, no additional costs to state, local, or tribal governments, or to the private sector, will result from this action.

E. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175, because the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it does not impose additional requirements beyond those imposed by state law.

H. Executive Order 13211: Actions That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act (NTTAA)

Section 12(d) of the NTTAA directs the EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. The EPA believes that this action is not subject to the requirements of section 12(d) of the NTTAA because application of those requirements would be inconsistent with the CAA.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

The EPA lacks the discretionary authority to address environmental justice in this rulemaking.

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur dioxide, Volatile organic compounds.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 29, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Family Day Care Home (FDCH) Participation Study.

OMB Control Number: 0584–NEW.

Summary of Collection: The Child and Adult Care Food Program (CACFP), administered by the Food and Nutrition Service (FNS), plays a critical role in supporting the health and wellness of children by reimbursing providers for nutritious meals served to eligible children in their care. The FDCH Participation Study aims to understand FDCH provider experiences with the CACFP by asking a nationally representative sample of both current and former CACFP-participating FDCH providers about their experiences with the program.

Need and Use of the Information: The primary data collection activity will include the FDCH Provider Experience Survey, designed to gather information from FDCH providers to address the three main objectives for the study:

1. Identify and describe the reasons why FDCH providers discontinue their participation in CACFP;

2. Determine and describe CACFP program statutory and regulatory requirements, operational and financial considerations, and Federal, State, and local specifics frequently cited as burdensome by stakeholders. Classify challenges as Federal, State, and local and describe in detail; and

3. Gather and summarize recommendations from FDCH providers on how to reduce barriers or challenges to CACFP participation.

Description of Respondents: State, Local, or Tribal government, Businesses or other For- Profit and Not-for-Profit.

Number of Respondents: 5,921.

Frequency of Responses: Reporting: Once.

Total Burden Hours: 4,623.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding; whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 29, 2022 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number, and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: Standards for Privately Owned Quarantine Facilities for Ruminants.

OMB Control Number: 0579–0232.

Summary of Collection: The Animal Health Protection Act (AHPA) of 2002 is the primary Federal law governing the protection of animal health. The law

gives the Secretary of Agriculture broad authority to detect, control, or eradicate pests or diseases of livestock or poultry. The Secretary may also prohibit or restrict import or export of any animal or related material to prevent the spread of any livestock or poultry pest or disease. The Animal and Plant Health Inspection Service (APHIS) provides standards for the approval, operation, and oversight of privately owned quarantine facilities for imported ruminants prior to their release into the United States. The AHPA is contained in Title X, Subtitle E, Sections 10401–18 of Public Law 107–171, May 13, 2002, the Farm Security and Rural Investment Act of 2002 [7 U.S.C. 8301 *et seq.*].

Need and Use of the Information: APHIS uses the following information activities with its efforts to maintain a system whereby private individuals can operate (with APHIS oversight) their own facilities for the quarantine of imported ruminants: (1) Application Letter; (2) Cooperative Service Agreement; (3) Daily Log and Recordkeeping; (4) Request for Variance; and (5) Operating Procedures and Recordkeeping. Without the information, APHIS would be forced to discontinue its program of allowing the operation of privately owned quarantine facilities for ruminants, a development that would hamper U.S. animal import activities.

Description of Respondents: Business or other for-profit and State.

Number of Respondents: 5.

Frequency of Responses: Recordkeeping; Reporting: On occasion.

Total Burden Hours: 64.

Animal and Plant Health Inspection Service

Title: Irradiation Treatment; Location of Facilities in the United States.

OMB Control Number: 0579–0383.

Summary of Collection: The United States Department of Agriculture (USDA) is responsible for preventing plant diseases or insect pests from entering into the United States, preventing the spread of pests and noxious weeds not widely distributed into the United States, and eradicating those imported pests when eradication is feasible. The Plant Protection Act (7 U.S.C. 7701 *et seq.*) authorizes USDA to carry out this mission. Under the Plant Protection Act, the Animal and Plant Health Inspection Service (APHIS) is authorized, among other things, to regulate the importation of plants, plant products, and other articles to prevent the introduction of plant pests in the United States.

Need and Use of the Information: APHIS will use the following information collection activities to provide criteria for the approval/certification of irradiation treatment facilities in an effort to prevent the introduction or spread of plant pests and plant diseases in the United States: Request for Initial Certification and Inspection of Facility; Certification and Recertification of Facility; Denial and Withdrawal of Certification; Compliance Agreement; Irradiation Facilities Treating Imported Articles; Irradiation Treatment Framework Equivalency Work plan; Irradiation Facilities Notification; Recordkeeping; Facility to Maintain and Provide Updated Map Identifying Places Horticultural/Crops are Grown; Facility Contingency Plan; Letter of Concurrence or Non-Agreement; Treatment Arrangements; Pest Management Plan; and Facility Map—Detailed Layout of Facility. If the information is not collected, APHIS would have no practical way of determining that any given commodity had actually been irradiated.

Description of Respondents: Business or other for-profits; Federal Government; State, Local or Tribal Government.

Number of Respondents: 24.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 988.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Supplemental Nutrition Assistance Program Waivers Under the Food and Nutrition Act

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this planned information collection. This is a revision of a currently approved collection. Section 6(o) of the Food and Nutrition Act establishes a time limit of the receipt of benefits under the Supplemental Nutrition Assistance Program (SNAP) for certain able-bodied adults without dependents (ABAWDs) who are not working. The provision authorizes the Secretary of Agriculture, upon a State agency's request, to waive the time limit for any group of individuals if the Secretary determines ''that the area in which the individuals reside has an unemployment rate of over 10 percent, or does not have a sufficient number of jobs to provide employment for the individuals.'' As required by the statute, to receive a waiver, the State agency must submit sufficient supporting information so that the United States Department of Agriculture (USDA) can make the required determination as to the area's unemployment rate or insufficiency of available jobs. This collection of information is, therefore, necessary to obtain waivers of the SNAP time limit. In October 2020, the U.S. District Court in District of Columbia vacated the final rule titled, ''Supplemental Nutrition Assistance Program: Requirements for Able-Bodied Adults Without Dependents''. USDA is revising the hours associated with this collection to reflect the return to regulations prior to the final rule.

DATES: Written comments must be received on or before September 27, 2022.

ADDRESSES: Comments may be sent to: Certification Policy Branch, Program Development Division, Food and Nutrition Service, U.S. Department of Agriculture, 1320 Braddock Place, 5th Floor, Alexandria, VA 22314. Comments may also be submitted via fax to the attention of the Certification Policy Branch or via email to *SNAPCPBRules@usda.gov.* Comments will also be accepted through the Federal eRulemaking Portal. Go to *http://www.regulations.gov,* and follow the online instructions for submitting comments electronically.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to the Alison Conrad at 703–305–2022.

SUPPLEMENTARY INFORMATION:

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality,

utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Title: Supplemental Nutrition Assistance Program Waivers of Section 6(o) of the Food and Nutrition Act.

Form Number: N/A.

OMB Control Number: 0584–0479.

Expiration Date: 1/31/2023.

Type of Request: Revision of a currently approved collection.

Abstract: Section 6(o) of the Food and Nutrition Act of 2008 establishes a time limit for the receipt of Supplemental Nutrition Assistance Program (SNAP) benefits for certain able-bodied adults without dependents (ABAWDs) who are not working at least 20 hours per week. This time limit applies only to adults between 18 and 50 years of age that do not have children or adult dependents in their SNAP household. ABAWD recipient eligibility is limited to three months within a 36-month period, unless the individual is working, or participating in a designated employment and training activity, for 20 hours per week.

The provision authorizes that upon the request of a State agency, the Secretary of Agriculture may waive this provision for any group of individuals if the Secretary determines ''that the area in which the individuals reside has an unemployment rate of over 10 percent or does not have a sufficient number of jobs to provide employment for the individuals.'' As required in the statute, to receive a waiver, the State agency must submit sufficient supporting information so that the Secretary can make the required determination as to the area's unemployment rate or insufficiency of available jobs. This collection of information is necessary to obtain waivers of the SNAP ABAWD time limit.

State agencies submit formal requests to waive the ABAWD time limit to the Food and Nutrition Service (FNS) for approval through the electronic Waiver Information Management System (WIMS). In their requests, State agencies (1) designate the areas where they wish to waive the time limit, (2) explain the criteria for which those areas qualify for a waiver, and (3) provide required data to justify their request. A typical State waiver request includes several geographic areas, and each geographic area may include multiple cities or counties. FNS reviews the requests and supporting information to ensure that all necessary requirements to waive the time limit are met.

On December 5, 2019, FNS published the final rule, ''Supplemental Nutrition Assistance Program: Requirements for Able-Bodied Adults Without Dependents'' (84 FR 66782). This rule significantly increased the reporting burden associated with this information collection, primarily because of the start-up costs associated with the rule, and adjusted the estimates of the type of data States would use to support their ABAWD waiver requests. When the U.S. District Court for the District of Columbia vacated this rule on October 18, 2020, the previous regulations were reinstated. As a result, the reporting burden estimates for this information collection have decreased with this revision to reflect the return to regulations prior to the final rule.

Based on FNS's experience in Fiscal Years (FY) 2018 through 2021, FNS projects that 35 out of 53 State agencies will submit requests for a waiver of the time limit for ABAWD recipients based on a high unemployment rate or an insufficient number of jobs. Based on requests submitted and approved in FY 2019, FNS projects that of the 35 requests each year, 33 will use labor market data and two will use the Department of Labor's (DOL) Labor Surplus Area (LSA) designations or an extended unemployment benefits (EB) trigger notice to request a waiver. FNS is using only FY 2019 as the baseline for this part of the estimate because of the unique circumstances affecting the data States submitted to support their ABAWD waiver requests in FYs 2020 through 2022, as explained below.

In late FY 2019 through late FY 2020, States submitted ABAWD waiver requests using the criteria outlined in the final rule titled, ''Supplemental Nutrition Assistance Program: Requirements for Able-Bodied Adults Without Dependents'' (84 FR 66782). As mentioned above, the U.S. District Court for the District of Columbia vacated this rule on October 18, 2020, and States no longer request ABAWD waivers using these methods. In FY 2020 through FY 2022, the ABAWD time limit was partially suspended by the Families First Coronavirus Relief Act (Pub. L. 116–127), and States primarily supported their waivers using EB trigger notices because of the economic impact of the COVID–19 pandemic. This simplified the waiver request process for States and reduced the amount of time it takes to compile and share the data to support the waiver request. FNS does not expect a significant number of States to qualify for EB trigger notices beyond FY 2022, having already seen a drop-off in calendar year 2022 qualifications. FNS anticipates States currently using this criterion to switch to requests using labor market data in the future, which takes more time to compile.

In line with the estimates included in the 2018 renewal of this information collection, FNS provides two estimates for the burden of preparing and submitting waiver requests based on the waiver criteria used. For the first waiver criteria in the burden chart below, FNS estimates a response time for this activity is approximately 35 hours to prepare and submit via WIMS for each waiver request based on labor market data, which require detailed analysis of labor markets within the State using Bureau of Labor Statistics or a cooperating agency's data.

For the second criteria in the burden chart below, FNS estimates a burden of four hours per respondent to prepare and submit via WIMS waivers based on an LSA designation or an EB trigger notice, as the data required to support these waivers is readily available from the DOL website and requires minimal preparation by State agencies.. FNS projects a total annual burden of 1,163 hours and 35 responses (33 responses based on labor market data and two responses based on an LSA designation or EB trigger notice). This revision results in a decrease of 170,093 hours and 2,174,037 responses as a result of program changes.

Reporting

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Forest Service

Final Record of Decision for the Santa Fe Forest

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of approval of the Revised Land Management Plan for the Santa Fe National Forest.

SUMMARY: James Duran, the Acting Forest Supervisor for the Santa Fe National Forest, Southwestern Region, signed the final record of decision (ROD) for the Santa Fe National Forest Land Management Plan (LMP). The final ROD documents the rationale for approving the LMP and is consistent with the Reviewing Officer's responses to objections and instructions.

DATES: The revised LMP for the Santa Fe National Forest will become effective [30 days after the publication of this notice of approval in the **Federal Register** (36 CFR 219.17(a)(1)).

ADDRESSES: To view the final ROD, final environmental impact statement (FEIS), the revised LMP, and other related documents, please visit the Santa Fe National Forest website at: *www.fs.usda.gov/goto/santafeforestplan.*

A legal notice of approval is also being published in the newspaper of record, *The Albuquerque Journal.* A copy of this legal notice will be posted on the Santa Fe National Forest's website described above.

FOR FURTHER INFORMATION CONTACT: Sarah Browne, Acting Forest Planner, Santa Fe National Forest, by telephone 505–438–5442, or via email at *santafeforestplan@usda.gov.*

Individuals who use telecommunication devices for the deaf or hard of hearing (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339, 24 hours a day, every day of the year, including holidays. Written requests for information may be sent to Santa Fe National Forest, Attn: Santa Fe National Forest Plan Revision, 11 Forest Lane, Santa Fe, NM 87508.

SUPPLEMENTARY INFORMATION: The Santa Fe National Forest covers five ranger districts and more than 1.6 million acres across six counties in northern New Mexico. The LMP was developed pursuant to the 2012 Forest Service Planning Rule (36 CFR 219) and will replace the 1987 LMP. The LMP describes desired conditions, objectives, standards, guidelines, and land suitability for project and activity decision-making and will guide all resource management activities on the Forest. The Santa Fe National Forest plays an important role supporting and partnering with communities in northern New Mexico and throughout the southwestern United States by providing economic benefits including fuelwood gathering, livestock grazing, and abundant recreational opportunities. The development of the LMP was shaped by the best available scientific information, current laws, and public input.

The Santa Fe National Forest initiated plan revision in 2014 and engaged the public frequently throughout the process. This engagement effort has included conventional public meetings, collaborative work sessions and technical meetings, information sharing via social media, and working with cooperating agencies. The Forest invited State, local, Tribal governments, and other Federal agencies from around the region to participate in the process to revise the LMP. The Forest engaged in government-to-government consultation with 24 tribes during LMP revision, ensuring tribal-related plan direction accurately reflects the Santa Fe National Forest's trust responsibilities and government-to-government relationship with tribes. An interagency working group met regularly throughout the plan revision effort. During the 90-day comment period in 2019 for the draft LMP and draft EIS, the Santa Fe National Forest received over 13,600 comments which helped refine the preferred alternative and augment plan content based on response to comments.

A draft ROD, LMP, and FEIS were released in September 2021, initiating a 60-day objection filing period that closed November 2, 2021. The Santa Fe received 15 eligible objections. Through a comprehensive review of each objection, a variety of issues were identified. Following the objection review, the Reviewing Officer held objection resolution meetings with objectors and interested persons. Based on these meetings, the Reviewing Officer issued a written response on May 24, 2022. The instructions from the Reviewing Officer were addressed in the ROD, LMP, and FEIS.

Responsible Official: The Responsible Official for approving the LMP is James Duran, Acting Forest Supervisor, Santa Fe National Forest. The Responsible Official approving the list of species of conservation concern is Michiko Martin, Regional Forester, Southwestern Region.

Dated: July 26 2022.

Deborah Hollen,

Acting Associate Deputy Chief, National Forest System.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Community Wildfire Defense Grant Program

AGENCY: Forest Service, Department of Agriculture (USDA).

ACTION: Notice of funding opportunity; emergency collection; request for comment.

SUMMARY: U.S. Department of Agriculture's Forest Service announces the availability of up to $1 billion in grant funding, appropriated under the Infrastructure Investment and Jobs Act, for the establishment of the Community Wildfire Defense Grant (CDWG) Program. As authorized under the Infrastructure Investment and Jobs Act,

funds will be made available and distributed to eligible applicants within the footprints of the Western States, Northeast-Midwest States, Southern States, and Indian Tribes/Alaska Native Corporations. There are two primary project types for which the CDWG provides funding: the development and revising of Community Wildfire Protection Plans (CWPP) and the implementation of projects described in a CWPP that is less than ten years old. The Act prioritizes at-risk communities that are in an area identified as having high or very high wildfire hazard potential, are low-income, and/or have been impacted by a severe disaster.

DATES: Applications for the FY2022 CDWG must be submitted per the included instructions on *grants.gov* by 11:59 p.m., Eastern Time zone, October 7, 2022.

- For Indian Tribes/Alaska Native Corporations, search for the following grant Opportunity Number in *grants.gov* and follow the included instructions: USDA–FS–2022–CWDG–TRIBES. Please note that Indian Tribes/Alaska Native Corporations can apply through either this specific grant opportunity or the applicable regional notice (Western States, Northeast-Midwest States, or Southern States) listed below.
- For the Western States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming, and for the Territory of American Samoa, the Republic of Palau, the Federated States of Micronesia, the Territory of Guam, the Commonwealth of Northern Mariana Islands, and the Republic of the Marshall Islands, search for the following grant Opportunity Number in *grants.gov* and follow the included instructions: USDA–FS–2022–CWDG–CWSF.
- For the Northeast-Midwest States of Connecticut, Delaware, Illinois, Indiana, Iowa, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, West Virginia and Wisconsin, and for the District of Columbia, search for the following grant Opportunity Number in *grants.gov* and follow the included instructions: USDA–FS–2022–CWDG–NEMW.
- For the Southern States of Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and Virginia, and for Puerto Rico and the U.S. Virgin Islands, search for the following grant Opportunity Number in *grants.gov* and follow the included instructions: USDA–FS–2022–CWDG–SGSF.

Applications received after 11:59 p.m., Eastern Time zone, October 7, 2022, will not be considered.

Comments related to the collection of information must be submitted by September 27, 2022 to be assured of consideration. Comments received after that date will be considered to the extent practicable. Please follow the directions provided in Paperwork Reduction Act section of this notice.

ADDRESSES: This funding opportunity will be made available on *grants.gov.* Applicants are strongly encouraged to reach out to the relevant State Forester and Forest Service Cooperative Fire Specialist during application development to ensure the project aligns with program purpose and eligibility and receive input to strengthen your application.

Comments concerning this notice should be addressed to: USDA, Forest Service, Attention Sheila Walker, USDA Forest Service, Washington Office, Fire and Aviation Management (FAM), 1400 Independence Avenue Southwest, Mailstop 1107, Washington, DC 20250. Comments may also be submitted via email to: *Sheila.Walker2@usda.gov.* The public may inspect comments received at USDA Forest Service, Washington Office during normal business hours. Visitors are encouraged to call ahead to 202–205–0995 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT: Sheila Walker, Fire and Aviation Management by phone at 503–313–2784 or email at *Sheila.Walker2@usda.gov.* Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (also known as the Congressional Review Act or CRA), 5 U.S.C. 801 *et seq.,* the Office of Information and Regulatory Affairs in the Office of Management and Budget designated this action as a major rule as defined by 5 U.S.C. 804(2), (Pub. L. 104–121), because it is likely to result in an annual effect on the economy of $100,000,000 or more. Accordingly, there is a 60-day delay in the effective date of this action. Application rating, ranking, and selection will not begin until after October 7, 2022. Therefore, the 60-day delay required by the CRA is not expected to have a material impact upon the administration and/or implementation of the Community Wildfire Defense Grant Program.

Overview

Federal Agency: Forest Service, USDA.

Funding Opportunity Title: Community Wildfire Defense Grant (CDWG) Program.

Funding Opportunity Numbers: USDA–FS–2022–CWDG–TRIBES, USDA–FS–2022–CWDG–CWSF, USDA–FS–2022–CWDG–NEMW, and USDA–FS–2022–CWDG–SGSF.

Announcement Type: Notice of Funds Opportunity.

Assistance Listings (AL) Number: 10.720.

Due Date for Applications: Applications for the FY2022 CDWG must be submitted per the included instructions on *grants.gov* by 11:59 p.m., Eastern Time zone, October 7, 2022. Applications received after 11:59 p.m., Eastern Time zone, October 7, 2022, will not be considered.

Informational Webinars: Four (4) informational webinars will be provided to any interested applicants, one designed for each separate Notice of Funding Opportunity. These webinars will occur during the first two weeks of August 2022 and will be recorded for future viewing. Specific information regarding the webinars, including dates, times, and registration information, will be made available on the following web page: *www.fs.usda.gov/managing-land/fire/grants.*

Background

The purpose of the Community Wildfire Defense Grant (CWDG) is to assist at-risk local communities and Indian Tribes with planning for and mitigating against the risk created by wildfire. This program is authorized in H.R. 3684, ''An Act to authorize funds for Federal-aid highways, highway safety programs, and transit programs, and for other purposes,'' commonly referred to as the Infrastructure Investment and Jobs Act. Specifically, the CWDG is provided for in Title VIII, Section 40803. There are two primary project types for which the grant provides funding: the development and revising of Community Wildfire Protection Plans (CWPP) and the implementation of projects described in a CWPP that is less than ten years old. The Act prioritizes at-risk communities that are in an area identified as having high or very high wildfire hazard potential, are low-income, and/or have been impacted by a severe disaster.

More details on these three priorities can be found on *grants.gov*.

The CWDG helps communities in the wildland urban interface (WUI) implement the three goals of the National Cohesive Wildland Fire Management Strategy (Cohesive Strategy):

- *Restore and Maintain Landscapes:* Landscapes across all jurisdictions are resilient to fire-related disturbances, in accordance with management objectives.
- *Create Fire Adapted Communities:* Human populations and infrastructure can withstand a wildfire without loss of life and property.
- *Improve Wildfire Response:* All jurisdictions participate in making and implementing safe, effective, efficient risk-based wildfire management decisions.

Key Points

- *Who Can Apply:* Entities eligible to apply for funding under the CWDG include:

a. Units of local governments representing communities located in an area with a risk of wildfires,

b. Indian Tribes (please apply through either the Indian Tribes/Alaska Native Corporations specific notice or the applicable regional notice),

c. Non-profit organizations including homeowner associations that assist such communities,

d. State forestry agencies (including U.S. territories and interests), and

e. Alaska Native Corporations (please apply through either the Indian Tribes/ Alaska Native Corporations specific notice or the applicable regional notice).

For-profit entities are not eligible to apply for this funding opportunity.

- *Eligible Lands:* Eligible applicants may apply for grant funding for a project proposal to be conducted on lands with the following ownership types, as long as the project proposal directly reduces wildfire risk to a community:

a. Private lands,

b. Local government,

c. Homeowner associations,

d. State government, and

e. Tribal/Alaska native corporation (includes Trust lands).

Lands administered by the federal government are not eligible for this funding opportunity with the exception of lands held in trust for Native American Tribes and individuals (Trust lands).

- *State Forest Action Plans and the Cohesive Wildland Fire Management Strategy:* Projects should further the priorities, *e.g.,* goal, strategy, and/or priority landscape, in the most recent State Forest Action Plans as well as the relevant regional cohesive wildland fire management strategy document.
- *Executive Order 13985: Advancing Racial Equity and Support for Underserved Communities Through the Federal Government:* We prioritize applications that show a clear benefit to underserved people and the communities where they reside or the forest areas that they value. Where this is the case, this should be described in the ''Project Narrative Form.'' Underserved communities are also eligible to request a waiver of match requirements.
- *Minimum and Maximum Funding Levels:*

a. There is no *minimum* Federal funding limit for projects under CWDG.

b. The *maximum* amount of Federal funding awarded to any one community or Tribe via this competitive process is:

- $250,000 for the creation or updating of a Community Wildfire Protection Plan, and
- $10 million for a project described within a Community Wildfire Protection Plan less than 10 years old.

c. For planning purposes, the Federal funding allocated through the CWDG competitive process is expected to be approximately $160 million annually for the next five years.

- *Required Matching Funds:* The CWDG program has differing levels of match dependent upon the proposal for which is being applied. For proposals to develop or update a CWPP, the required match is 10%. For proposals to implement projects described within a CWPP, the required match is 25%. Matching funds must be derived entirely from non-Federal sources (unless expressly authorized in law by the other federal program). The match must be met by eligible and allowable costs and is subject to match provisions in grant regulations (Code of Federal Regulations Title 2 Part 200.306 and Subpart E for Cost Principles). Match must meet all the same requirements as the Federal share and be documented sufficiently to support financial tracking and accountability. *Communities meeting the definition of underserved may request a waiver of match;* no other waiver requests are allowable under this program.
- *Lead Agency or Organization:* All applications must identify the lead agency or organization that will have primary responsibility for coordinating project work and reporting. The lead agency may pass funds to other partners performing work as relevant.
- *Grant Timeframes:* Projects must be completed within five (5) years.
- *For Proposals including multiple communities:* For separate projects in separate communities, a separate narrative form and included budget will need to be filled out for each community for purposes of determining eligibility, prioritization, and ranking. For an application consisting of a single project that spans multiple communities, the project can be applied for and described within the same application and narrative form.
- *Scoring and Ranking of applications:* Applications will be scored by members of a regional review panel. Individual reviewer scores will be normalized. All regionally-scored applications will be compiled in a single nationally-ranked list, which will be used to distribute funding.
- *Reporting:* Funded CWDG projects will be required to provide financial reports to the grant's administrator on a quarterly basis, and project performance reports on an annual basis. The annual performance report shall include a spatial data component. This requires both Forest Service grant monitors and CWDG grant recipients to coordinate in entering project information.
- *Build America/Buy America:* The Build America, Buy America Act, enacted as part of the Infrastructure Investment and Jobs Act, established a domestic content procurement preference for all Federal financial assistance obligated for infrastructure projects after May 14, 2022. The Buy America preference requires that all iron, steel, manufactured products, and construction materials used in infrastructure projects are produced in the United States. If a recipient proposes a waiver of the Buy America preference, they must identify the items for which a waiver will be sought in the application. Applicants should not proceed with the expectation that waivers will be granted.
- *Environmental Compliance:* The requirements of the National Environmental Policy Act (NEPA) apply to proposed ''Federal'' actions. Whether an action under the CWDG program may be subject to NEPA analysis is dependent upon the level of federal (Forest Service) control and authority over the action. Deciding whether or not the Forest Service is responsible for performing NEPA analysis is determining whether the Forest Service exercises control over the implementation of the action to be funded, and to what degree implementation of the action is dependent upon Forest Service funding. For example, where the Forest Service provides funding, but does not exercise control or decision making over the specific projects and actions funded by the CWDG grant, it is unlikely to be

deemed a Federal action for purposes of requiring NEPA analysis. Similarly, where the Forest Service provides only a small percentage of the funding for a project, it is unlikely that environmental analysis will be required under NEPA due to limited control and responsibility.

• *Floodplain Management Criteria:* If applicable and appropriate, a project located in a Special Flood Hazard Area must implement and meet the conditions contained within the Federal Flood Risk Management Standard (FFRMS).

• *Labor Standards:* All laborers and mechanics employed by the applicant, subrecipients, contractors or subcontractors in the performance of construction, alteration, or repair work on an award or project in excess of $2,000 funded directly by or assisted in whole or in part by funds made available under this grant program shall be paid wages at rates not less than those prevailing on similar projects in the locality, as determined by the Secretary of Labor in accordance with subchapter IV of chapter 31 of title 40, United States Code commonly referred to as the ''Davis-Bacon Act'' (DBA).

Applicants shall provide written assurance acknowledging the DBA requirements for the award or project and confirming that all laborers and mechanics performing construction, alteration, or repair work on projects in excess of $2,000 funded directly by or assisted in whole or in part by and through funding under the award are paid or will be paid wages at rates not less than those prevailing on projects of a character similar in the locality as determined by the Secretary of Labor in accordance with Subchapter IV of Chapter 31 of Title 40, United States Code (Davis-Bacon Act).

Recipients of funding will also be required to undergo DBA compliance training and to maintain competency in DBA compliance. The U.S. Department of Labor offers free Prevailing Wage Seminars several times a year that meet this requirement, at *https://www.dol.gov/agencies/whd/government-contracts/construction/seminars/events.*

For additional guidance on how to comply with DBA provisions and clauses, see *https://www.dol.gov/agencies/whd/government-contracts/construction* and *https://www.dol.gov/agencies/whd/government-contracts/protections-for-workers-in-construction.*

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), USDA requested that the Office of Management and Budget (OMB) conduct an emergency review by July 26, 2022, of a new information collection that contains the CDWG Information Collection and Recordkeeping requirements.

In addition to the emergency clearance, the regular clearance process is hereby being initiated to provide the public with the opportunity to comment under a full comment period, as the Agency intends to request regular approval from OMB for this information collection. Comments from the public on new, proposed, revised, and continuing collections of information help us assess the impact of our information collection requirements and minimize the public's reporting burden. Comments may be submitted regarding this information collection by the following method:

• *Federal eRulemaking Portal:* Go to *https://www.regulations.gov* and, in the ''Search'' box, type in the Docket No. USDA–2022–0017. Follow the online instructions at that site for submitting comments. This website provides the ability to type short comments directly into the comment field on this web page or attach a file for lengthier comments. Information on using *regulations.gov,* including instructions for accessing documents, submitting comments, and viewing the docket after the close of the comment period, is available through the site's ''FAQ'' link at the bottom. Comments on this information collection must be submitted by September 27, 2022 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number. Data furnished by the applicants will be used to determine eligibility for program benefits. Furnishing the data is voluntary; however, failure to provide data could result in program benefits being withheld or denied.

Title: Community Wildfire Defense Grant Program.

OMB Number: 0596–NEW.

Type of Request: New Information Collection.

Abstract: The Community Wildfire Defense Grant Program forms will be used by applicants to apply for the Community Wildfire Defense Grant (CWDG) Program. The purpose of the CWDG Program is to assist at-risk local communities and Indian Tribes with planning and mitigating against the risk created by wildfire. This program is authorized in the Infrastructure Investment and Jobs Act (Pub. L. 117–58), commonly referred to as the Bipartisan Infrastructure Law (BIL). Specifically, the CWDG Program is provided for in Title VIII, Section 40803. There are two primary project types for which the grant provides funding: the development and revision of Community Wildfire Protection Plans (CWPP) and the implementation of projects described in a CWPP that is less than ten years old. The Act prioritizes at-risk communities that are in an area identified as having high or very high wildfire hazard potential, are low-income, and/or have been impacted by a severe disaster.

Burden Hours for Community Wildfire Defense Grant Program Project Narrative Form

Estimate of Annual Burden: 1.25 hours.

Type of Respondents: Public applicants.

Estimated Annual Number of Respondents: 500.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 625 hours.

The burden for the Narrative Form includes submission of documentation of at-risk community, wildfire hazard potential, low-income, and/or impacted by a severe disaster as well as any maps or photos to accompany the narrative.

Burden Hours for Community Wildfire Defense Grant Program Project Narrative Form

Estimate of Annual Burden: 1.25 hours.

Type of Respondents: Tribal applicants.

Estimated Annual Number of Respondents: 100.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 125 hours.

The burden for the Narrative Form includes submission of documentation of at-risk community, wildfire hazard potential, low-income, and/or impacted by a severe disaster as well as any maps or photos to accompany the narrative.

Burden Hours for Application for Federal Assistance 424

Estimate of Annual Burden: 1 hour.

Type of Respondents: Public applicants.

Estimated Annual Number of Respondents: 100.

Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 100 hours.

Burden Hours for Application for Federal Assistance 424:

Estimate of Annual Burden: 1 hour.
Type of Respondents: Tribal applicants.
Estimated Annual Number of Respondents: 100.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 100 hours.

Burden Hours for BUDGET INFORMATION—Non-Construction Programs 424a

Estimate of Annual Burden: 1 hour.
Type of Respondents: Public applicants.
Estimated Annual Number of Respondents: 100.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 100 hours.

Burden Hours for BUDGET INFORMATION—Non-Construction Programs 424a

Estimate of Annual Burden: 1 hour.
Type of Respondents: Tribal applicants.
Estimated Annual Number of Respondents: 100.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 100 hours.

Burden Hours for Community Wildfire Defense Grant Program Annual Performance Report

Estimate of Annual Burden: 2.00 hours.
Type of Respondents: Public applicants.
Estimated Annual Number of Respondents: 400.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 800 hours.

Burden Hours for Community Wildfire Defense Grant Program Annual Performance Report

Estimate of Annual Burden: 2.00 hours.
Type of Respondents: Tribal applicants.
Estimated Annual Number of Respondents: 80.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 160 hours.

Burden Hours for Community Wildfire Defense Grant Program System for Award Management Screenshot

Estimate of Annual Burden: 0.10 hours.
Type of Respondents: Public applicants.
Estimated Annual Number of Respondents: 400.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 40 hours.

Burden Hours for Community Wildfire Defense Grant Program System for Award Management Screenshot

Estimate of Annual Burden: 0.10 hours.
Type of Respondents: Tribal applicants.
Estimated Annual Number of Respondents: 80.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 8 hours.

Burden Hours for Community Wildfire Defense Grant Program Davis-Bacon Act Written Assurance

Estimate of Annual Burden: 0.10 hours.
Type of Respondents: Public applicants.
Estimated Annual Number of Respondents: 500.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 50 hours.

Burden Hours for Community Wildfire Defense Grant Program Davis-Bacon Act Written Assurance

Estimate of Annual Burden: 0.10 hours.
Type of Respondents: Tribal applicants.
Estimated Annual Number of Respondents: 100.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 10 hours.

Burden Hours for Community Wildfire Defense Grant Program Audit Requirements

Estimate of Annual Burden: 24.00 hours.
Type of Respondents: Public applicants.
Estimated Annual Number of Respondents: 25.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 600 hours.

Burden Hours for Community Wildfire Defense Grant Program Audit Requirements:

Estimate of Annual Burden: 24.00 hours.
Type of Respondents: Tribal applicants.
Estimated Annual Number of Respondents: 10.
Estimated Annual Number of Responses per Respondent: 1.
Estimated Total Annual Burden on Respondents: 240 hours.

Comment Is Invited: Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Civil Rights

Programs referenced in this Notice are subject to applicable Civil Rights Laws. These laws include the Equal Credit Opportunity Act, Title VI of the Civil Rights Act of 1964, Title VIII of the Civil Rights Act of 1968, and Section 504 of the Rehabilitation Act of 1973.

Intergovernmental Review

The CDWG Program is subject to Executive Order 12372, ''Intergovernmental Review of Federal Programs.'' Submit one copy of the application to the State government single point of contact, if one has been designated, at the same time as application submission to the Agency. If the project is located in more than one state, submit a copy to each applicable state government single point of contact. Go to *https://www.whitehouse.gov/wp-content/uploads/2020/04/SPOC-4-13-20.pdf* for state office contact information. Applications from Federally recognized Indian tribes are not subject to this requirement.

Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

Executive Order 13175 requires federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications. The Forest Service consulted and provided an overview of the CWDG program to Tribal entities in coordination with the FS Office of Tribal Relations. In addition, a tribal liaison was a member of the stakeholder group developing the program. An informational webinar specific to Tribes will occur during the first two weeks of August 2022 and will be recorded for future viewing. The webinar's date, time, and registration information will be made available on the following web page: *www.fs.usda.gov/managing-land/fire/grants.* Cost-sharing requirements are mandated in the Infrastructure Investment and Jobs Act. Communities meeting the definition of underserved per Executive Order 13985 are eligible to request a waiver of match requirements.

Non-Discrimination Statement

In accordance with Federal civil rights laws and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Mission Areas, agencies, staff offices, employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, familial status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Program information may be made available in languages other than English. Persons with disabilities who require alternative means of communication to obtain program information (*e.g.,* Braille, large print, audiotape, American Sign Language) should contact the responsible Mission Area, agency, or staff office; the USDA TARGET Center at (202) 720–2600 (voice and TTY); or the Federal Relay Service at (800) 877–8339.

To file a program discrimination complaint, a complainant should complete a Form AD–3027, *USDA Program Discrimination Complaint Form,* which can be obtained online at *https://www.usda.gov/sites/default/files/documents/usda-program-discrimination-complaint-form.pdf,* from any USDA office, by calling (866) 632–9992, or by writing a letter addressed to USDA. The letter must contain the complainant's name, address, telephone number, and a written description of the alleged discriminatory action in sufficient detail to inform the Assistant Secretary for Civil Rights about the nature and date of an alleged civil rights violation. The completed AD–3027 form or letter must be submitted to USDA by:

(1) *Mail:* U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue SW, Washington, DC 20250–9410; or

(2) *Fax:* (833) 256–1665 or (202) 690–7442; or

(3) *Email: program.intake@usda.gov.*

USDA is an equal opportunity provider, employer, and lender.

Authority: This solicitation is authorized pursuant to the Infrastructure Investment and Jobs Act (Pub. L. 117–58).

John Crockett,

Acting Deputy Chief,State and Private Forestry.

BILLING CODE 3411–15–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Hawai'i Advisory Committee

AGENCY: U.S. Commission on Civil Rights

ACTION: Announcement of meeting

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that a meeting of the Hawai'i Advisory Committee to the Commission will convene by Zoom virtual platform on Tuesday, August 23, 2022, from 1:00 p.m. to 2:30 p.m. HST, to discuss potential civil rights topics to study.

DATES: Tuesday, August 23, 2022, from 1:00 p.m.–2:30 p.m. HST.

Zoom Link: *https://www.zoomgov.com/j/1606975943.*

FOR FURTHER INFORMATION CONTACT: Kayla Fagota, Designated Federal Officer (DFO) at *kfagota@usccr.gov* or by phone at (434) 515–2395.

SUPPLEMENTARY INFORMATION: This meeting is available to the public through the Zoom link above. Persons with hearing impairments may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the call-in number found through registering at the web link provided for this meeting.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments may be emailed to Kayla Fagota at *kfajota@usccr.gov.*

Records and documents discussed during the meeting will be available for public viewing prior to and after the meeting at *https://www.facadatabase.gov/FACA/FACAPublicViewCommitteeDetails?id=a10t0000001gzl0AAA.*

Please click on ''Committee Meetings'' tab. Records generated from this meeting may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meeting. Persons interested in the work of this Committee are directed to the Commission's website, *https://www.usccr.gov,* or may contact the Regional Programs Unit at the above phone number or email address.

Agenda

I. Welcome and Roll Call
II. Introductions
III. Overview of Project Process; Concept Stage
IV. Discussion of Topic Choice
V. Next Steps
VI. Public Comment
VII. Adjournment

Dated: July 26, 2022.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

[FR Doc. 2022–16343 Filed 7–28–22; 8:45 am]

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Guam Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of virtual business meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Guam Advisory Committee

(Committee) to the U.S. Commission on Civil Rights will hold a virtual business meeting via Webex at 9:00 a.m. ChST on Tuesday, August 16, 2022, (7:00 p.m. ET on Monday, August 15, 2022) to discuss civil rights concerns in the territory.

DATES: The meeting will take place on Tuesday, August 16, 2022, from 9:00 a.m.–10:30 a.m. ChST (Monday, August 15, 2022, from 7:00 p.m.–8:30 p.m. ET).

Link to Join (*Audio/Visual*): *https://tinyurl.com/yj8sz88r.*

Telephone (*Audio Only*): Dial (800) 360–9505 USA Toll Free; Access Code: 2764 425 4150.

FOR FURTHER INFORMATION CONTACT: Kayla Fajota, DFO, at *kfajota@usccr.gov* or (434) 515–2395.

SUPPLEMENTARY INFORMATION: Committee meetings are available to the public through the conference link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Individuals who are deaf, deafblind, and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at (800) 877–8339 and providing the Service with the conference details found through registering at the web link above. To request additional accommodations, please email *kfajota@usccr.gov* at least ten (10) days prior to the meeting.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Liliana Schiller at *lschiller@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Guam Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at the above phone number.

Agenda

I. Welcome & Roll Call
II. Announcements and Updates
III. Approval of May 24, 2022, and June 21, 2022, Meeting Minutes
IV. Election of Vice-Chair
V. Discussion: Potential Project Ideas
VI. Next Steps
VII. Public Comment
VIII. Adjournment

Dated: July 26, 2022.

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meetings of the Virginia Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Virginia Advisory Committee (Committee) will hold a web meeting via Zoom on Monday, September 12, 2022, at 2:00 p.m. Eastern Time. The purpose of the meeting is to discuss identified findings and recommendations from previous panels on police oversight and accountability in Virginia.

DATES: The meeting will be held on: Monday, September 12, 2022, at 2:00 p.m. Eastern Time

Online Registration: https://bit.ly/3PK6pN8.

Join by Phone: 1–551–285–1373 US; Meeting ID: 160 754 1541.

FOR FURTHER INFORMATION CONTACT: Melissa Wojnaroski, DFO, at *mwojnaroski@usccr.gov* or 1–202–618–4158.

SUPPLEMENTARY INFORMATION: Members of the public may listen to this discussion through the above call-in number (audio only) or online registration link (audio/visual). An open comment period will be provided to allow members of the public to make a statement as time allows. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Individual who is deaf, deafblind, and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Melissa Wojnaroski at *mwojnaroski@usccr.gov.*

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Virginia Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

Agenda

I. Welcome & Roll Call
II. Approval of Minutes
III. Announcements and Updates
IV. Discussion: Testimony from Previous Panels
V. Next Steps
VI. Public Comments
VII. Adjournment

Dated: July 26, 2022.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the South Dakota Advisory Committee

AGENCY: Commission on Civil Rights.

ACTION: Announcement of public meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission), and the Federal Advisory Committee Act (FACA), that the South Dakota State Advisory Committee to the Commission will convene a meeting on Monday, August 8, 2022, at 3:30 p.m. (CT). The purpose of the meeting is to debrief after the committee's July briefing panel and continue planning future panels. The topic of study is voting rights and voting access in South Dakota.

DATES: Monday, August 8, 2022, at 3:30 p.m. (CT).

Public Web Conference Registration Link (video and audio): https://tinyurl.com/2p93tu84; password, if needed: USCCR–SD.

If Joining By Phone Only, Dial: 1–551–285–1373; Meeting ID: 161 950 2444#.

FOR FURTHER INFORMATION CONTACT: Kayla Fajota at *kfajota@usccr.gov* or by phone at (202) 809–9618.

SUPPLEMENTARY INFORMATION: The meeting is available to the public through the web link above. If joining only via phone, callers can expect to incur charges for calls they initiate over wireless lines, and the Commission will not refund any incurred charges. Individuals who are deaf, deafblind and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with conference details found through registering at the web link above. To request other accommodations, please email *kfajota@usccr.gov* at least 7 days prior to the meeting for which accommodations are requested.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments may be emailed to Kayla Fajota at *kfajota@usccr.gov.* Persons who desire additional information may contact the Regional Programs Unit at (202) 809–9618. Records and documents discussed during the meeting will be available for public viewing as they become available at *www.facadatabase.gov.* Persons interested in the work of this advisory committee are advised to go to the Commission's website, *www.usccr.gov,* or to contact the Regional Programs Unit at the above phone number or email address.

Agenda

Monday, August 8, 2022, from 3:30 p.m. (CT)

I. Welcome and Roll Call
II. Announcements and Updates
III. Approval of Minutes
IV. Planning Meeting: Debrief of July Panel on Voting Rights and Access in South Dakota and Discuss Future Briefing Panels on the Same Topic
V. Public Comment
VI. Next Steps
VII. Adjournment

Dated: July 26, 2022.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–093]

Refillable Stainless Steel Kegs From the People's Republic of China: Final Results of the Antidumping Duty Administrative Review; 2019–2020; Correction

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

ACTION: Notice; correction.

SUMMARY: The U.S. Department of Commerce (Commerce) published notice in the **Federal Register** of July 8, 2022, in which Commerce announced the final results of the 2019–2020 administrative review of the antidumping duty (AD) order on refillable stainless steel kegs (kegs) from the People's Republic of China (China). This notice contained incorrect assessment and cash deposit rates for the China-wide entity.

FOR FURTHER INFORMATION CONTACT: Konrad Ptaszynski, AD/CVD Operations, Office I, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6187.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of July 8, 2022, in FR Doc 2022–14566, on page 40785, in the second column, correct the second paragraph of the ''Assessment Rates'' caption to state the correct assessment rate of 63.60 percent for the China-wide entity. Also on page 40785, in the third column, correct the first paragraph of the ''Cash Deposit Requirements'' caption to state the correct cash deposit rate of 63.60 percent for the China-wide entity.

Background

On July 8, 2022, Commerce published in the **Federal Register** the final results of the 2019–2020 administrative review of the AD order on kegs from China.[1] Under the ''Assessment Rates'' section, we incorrectly stated the assessment rate of 77.13 percent for the China-wide entity. We also incorrectly stated the cash deposit rate of 77.13 percent for the China-wide entity in the ''Cash Deposit Requirements'' section. The 77.13

[1] *See Refillable Stainless Steel Kegs from the People's Republic of China: Final Results of the Antidumping Duty Administrative Review; 2019–2020,* 87 FR 40784 (July 8, 2022).

percent rate should instead state the correct assessment and cash deposit rate of 63.60 percent for the China-wide entity.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(l), 751(a)(2)(B), and 777(i) of the Tariff Act of 1930, as amended.

Dated: July 25, 2022.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations.

Multilayered Wood Flooring From the People's Republic of China: Preliminary Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: In response to a request from Zhejiang Yuhua Timber Co. Ltd. (Yuhua), A-Timber Flooring Company Limited (A-Timber), and Mullican Flooring Co. (Mullican) (collectively, Yuhua *et al.*), the U.S. Department of Commerce (Commerce) is issuing these preliminary results of the changed circumstances review (CCR) of the antidumping duty (AD) order on multilayered wood flooring (MLWF) from the People's Republic of China (China). Commerce preliminarily determines that the MLWF sold through A-Timber and described below is produced and exported by Yuhua; as such, it is excluded from the AD order. We invite interested parties to comment on these preliminary results.

DATES: Applicable July 29, 2022.

FOR FURTHER INFORMATION CONTACT: Sergio Balbontin or Max Goldman, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6478 or (202) 482–3896, respectively.

SUPPLEMENTARY INFORMATION:

Background

On December 8, 2011, Commerce published the *Order.*[1] On September 1, 2021, Yuhua, a Chinese producer and exporter of MLWF, A-Timber, an unaffiliated company through which Yuhua's MLWF is sold to the United States, and Mullican, an unaffiliated U.S. importer of this MLWF, requested that Commerce initiate an expedited CCR, pursuant to section 751(b)(1) of the Tariff Act of 1930, as amended (the Act), 19 CFR 351.216 and 351.221(c)(3).[2] In this CCR Request, Yuhua *et al.* requested that Commerce ''clearly state and provide clarifying instruction to U.S. Customs and Border Protection (CBP) that {MLWF} produced by {Yuhua} and sold to {Mullican} by A-Timber Flooring is excluded from the {*Order*}.'' [3]

According to Yuhua *et al.,* in the underlying less-than-fair-value investigation of MLWF from China, Yuhua, a mandatory respondent, reported that during the period of investigation (POI), it produced MLWF in China and engaged A-Timber as its sales agent. Yuhua *et al.* stated that A-Timber conducted all sales negotiations with unaffiliated U.S. customers and issued the invoices, and, upon confirmation of the sale, Yuhua exported the MLWF from China for delivery to the U.S. customers.[4] Based on this sales channel that Commerce examined in the investigation, Commerce calculated a dumping margin of zero percent for subject merchandise produced and exported by Yuhua which was sold to the United States through A-Timber, and excluded subject merchandise produced and exported by Yuhua from the *Order.* In their CCR Request, Yuhua *et al.* claim that the sales channel on which Commerce based the *Final Determination* has not changed since the POI.[5] However, starting in late 2020, CBP ceased implementing the cash deposit instructions issued by Commerce with respect to the *Final Determination,* which excluded from the *Order* MLWF produced and exported by Yuhua.[6] According to Yuhua *et al.,* CBP is now demanding the posting of cash deposits and requiring the entry of Yuhua's MLWF to be classified as ''Type 3'' entries subject to ADs.[7]

In its CCR Request, Yuhua *et al.* argue that Commerce intended to exclude from the *Order* MLWF produced and exported by Yuhua and sold through A-Timber, as Commerce determined that Yuhua was the ''exporter'' for such sales. Yuhua *et al.* argue that any other interpretation would mean that that Commerce was ''applying the zero rate to a company (Yuhua) that had not issued one invoice or made one sale to the U.S. during the POI.'' [8] Accordingly, Yuhua *et al.* now seek clarification that any MLWF sales transaction where Yuhua is the producer and exporter, as listed in the shipping documents, and where A-Timber is the sales agent, is excluded from the *Order.*[9]

On October 14, 2021, the American Manufacturers of Multilayered Wood Flooring (the petitioner) filed a letter in support of Yuhua *et al.'s* CCR Request, stating that Commerce should confirm that MLWF sold through Yuhua's ''sales agent, A-Timber . . . is excluded from the *Order,* consistent with {Commerce}'s prior determination . . . .'' [10] On October 15, 2021, Commerce extended the deadline to initiate this CCR and, on December 2, 2021, Commerce initiated this CCR, noting that it was not combining the initiation with the preliminary results because it was necessary to solicit additional information from Yuhua *et al.* regarding A-Timber's role in the sales channel of MLWF produced and exported by Yuhua.[11] On February 22, 2022, Yuhua *et al.* responded to Commerce's post-initiation questionnaire.[12] In its questionnaire response, Yuhua *et al.* reported, *inter alia,* the following information:

---

[11] *See* Commerce's Letter, ''Request for a Changed Circumstance Review Antidumping Duty Order on Multilayered Wood Flooring from the People's Republic of China: Extension of Initiation Deadline,'' dated October 15, 2021; and *Multilayered Wood Flooring from the People's Republic of China: Notice of Initiation of Changed Circumstances Review,* 86 FR 68475 (December 2, 2021).

[12] *See* Yuhua *et al.'s* Letter, ''Supplemental Questionnaire Response,'' dated February 22, 2022.

• Yuhua sells MLWF to the United States exclusively through A-Timber and A-Timber conducts the marketing and price negotiations. Yuhua provides A-Timber U.S. sales targets and Yuhua and A-Timber strategize sales prices to the United States.
• The MLWF sold through A-Timber to the United States must be produced by Yuhua.
• A-Timber represents Yuhua at sales exhibitions where both Yuhua's and A-Timber's names are displayed on the information booths. A-Timber also represents Yuhua's ''Parrot Brand'' trademark.
• Mullican frequently visits Yuhua's factory and Yuhua promotes its products directly to Mullican.
• Yuhua is the exporter of record (*e.g.,* it is listed in the shipping documents) and ships directly to U.S. customers from its plant. A-Timber does not take title to the merchandise.
• The sales contract is between A-Timber and Mullican.
• Yuhua issues an invoice to A-Timber, and A-Timber adds a markup and issues its own sales invoice to Mullican.[13]

Scope of the Order

Multilayered wood flooring is composed of an assembly of two or more layers or plies of wood veneer(s)[14] in combination with a core.[15] The several layers, along with the core, are glued or otherwise bonded together to form a final assembled product. Multilayered wood flooring is often referred to by other terms, *e.g.,* ''engineered wood flooring'' or ''plywood flooring.'' Regardless of the particular terminology, all products that meet the description set forth herein are intended for inclusion within the definition of subject merchandise.

All multilayered wood flooring is included within the definition of subject merchandise, without regard to: dimension (overall thickness, thickness of face ply, thickness of back ply, thickness of core, and thickness of inner plies; width; and length); wood species used for the face, back and inner veneers; core composition; and face grade. Multilayered wood flooring included within the definition of subject merchandise may be unfinished (*i.e.,* without a finally finished surface to protect the face veneer from wear and tear) or ''prefinished'' (*i.e.,* a coating applied to the face veneer, including, but not exclusively, oil or oil-modified or water-based polyurethanes, ultra-violet light cured polyurethanes, wax, epoxy-ester finishes, moisture-cured urethanes and acid-curing formaldehyde finishes). The veneers may be also soaked in an acrylic-impregnated finish. All multilayered wood flooring is included within the definition of subject merchandise regardless of whether the face (or back) of the product is smooth, wire brushed, distressed by any method or multiple methods, or hand-scraped. In addition, all multilayered wood flooring is included within the definition of subject merchandise regardless of whether or not it is manufactured with any interlocking or connecting mechanism (for example, tongue-and-groove construction or locking joints). All multilayered wood flooring is included within the definition of the subject merchandise regardless of whether the product meets a particular industry or similar standard.

The core of multilayered wood flooring may be composed of a range of materials, including but not limited to hardwood or softwood veneer, particleboard, medium-density fiberboard, high-density fiberboard (HDF), stone and/or plastic composite, or strips of lumber placed edge-to-edge.

Multilayered wood flooring products generally, but not exclusively, may be in the form of a strip, plank, or other geometrical patterns (*e.g.,* circular, hexagonal). All multilayered wood flooring products are included within this definition regardless of the actual or nominal dimensions or form of the product. Specifically excluded from the scope are cork flooring and bamboo flooring, regardless of whether any of the sub-surface layers of either flooring are made from wood. Also excluded is laminate flooring. Laminate flooring consists of a top wear layer sheet not made of wood, a decorative paper layer, a core-layer of HDF, and a stabilizing bottom layer.

Imports of the subject merchandise are provided for under the following subheadings of the Harmonized Tariff Schedule of the United States (HTSUS): [16] 4412.31.0520; 4412.31.0540; 4412.31.0560; 4412.31.0620; 4412.31.0640; 4412.31.0660; 4412.31.2510; 4412.31.2520; 4412.31.2610; 4412.31.2620; 4412.31.3175; 4412.31.4040; 4412.31.4050; 4412.31.4060; 4412.31.4070; 4412.31.4075; 4412.31.4080; 4412.31.4140; 4412.31.4160; 4412.31.4175; 4412.31.5125; 4412.31.5135; 4412.31.5155; 4412.31.5165; 4412.31.5175; 4412.31.5225; 4412.31.6000; 4412.31.9100; 4412.32.0520; 4412.32.0540; 4412.32.0560; 4412.32.0565; 4412.32.0570; 4412.32.0640; 4412.32.0665; 4412.32.2510; 4412.32.2520; 4412.32.2525; 4412.32.2530; 4412.32.2610; 4412.32.2625; 4412.32.3125; 4412.32.3135; 4412.32.3155; 4412.32.3165; 4412.32.3175; 4412.32.3185; 4412.32.3225; 4412.32.5600; 4412.32.5700; 4412.39.1000; 4412.39.3000; 4412.39.4011; 4412.39.4012; 4412.39.4019; 4412.39.4031; 4412.39.4032; 4412.39.4039; 4412.39.4051; 4412.39.4052; 4412.39.4059; 4412.39.4061; 4412.39.4062; 4412.39.4069; 4412.39.5010; 4412.39.5030; 4412.39.5050; 4412.94.1030; 4412.94.1050; 4412.94.3105; 4412.94.3111; 4412.94.3121; 4412.94.3131; 4412.94.3141; 4412.94.3160; 4412.94.3171; 4412.94.4100; 4412.94.5100; 4412.94.6000; 4412.94.7000; 4412.94.8000; 4412.94.9000; 4412.94.9500; 4412.99.0600; 4412.99.1020; 4412.99.1030; 4412.99.1040; 4412.99.3110; 4412.99.3120; 4412.99.3130; 4412.99.3140; 4412.99.3150; 4412.99.3160; 4412.99.3170; 4412.99.4100; 4412.99.5100; 4412.99.5105; 4412.99.5115; 4412.99.5710; 4412.99.6000; 4412.99.7000; 4412.99.8000; 4412.99.9000; 4412.99.9500; 4418.71.2000; 4418.71.9000; 4418.72.2000; 4418.72.9500; 4418.74.2000; 4412.59.6000, 4412.59.7000, 4412.59.8000, 4412.59.9000, 4412.59.9500, 4412.91.0600, 4412.91.1030, 4412.91.1040, 4412.91.3110, 4412.91.3120, 4412.91.3130, 4412.91.3140, 4412.91.3160, 4412.91.3170, 4412.91.5105, 4412.92.0700, 4412.92.1130, 4412.92.1140, 4412.92.3120, 4412.92.3160, 4412.92.3170, 4412.92.4200, 4412.92.5205, 4412.99.5800, 4412.99.6100, 4412.99.7100, 4412.99.8100, 4412.99.9100, 4412.99.9700, 4418.74.2000, 4412.74.9000, 4418.75.4000, and 4418.75.7000. *See* Memoranda ''Request from Customs and Border Protection to Update the ACE AD/CVD Case Reference File,'' dated October 31, 2018; and ''Request from Customs and Border Protection to Update the ACE AD/CVD Case Reference File,'' dated March 10, 2022.

[13] *Id.*

[14] A ''veneer'' is a thin slice of wood, rotary cut, sliced or sawed from a log, bolt or flitch. Veneer is referred to as a ply when assembled.

[15] Commerce Interpretive Note: Commerce interprets this language to refer to wood flooring products with a minimum of three layers.

[16] On October 31, 2018 and March 10, 2022, we added the following HTSUS subheadings to update the ACE Case Reference File: 4412.33.0640, 4412.33.0665, 4412.33.0670, 4412.33.2625, 4412.33.2630, 4412.33.3225, 4412.33.3235, 4412.33.3255, 4412.33.3275, 4412.33.3285, 4412.33.5700, 4412.34.2600, 4412.34.3225, 4412.34.3235, 4412.34.3255, 4412.34.3275, 4412.34.3285, 4412.34.5700, 4412.51.1030, 4412.51.1050, 4412.51.3105, 4412.51.4100, 4412.51.5100, 4412.52.1030, 4412.52.1050, 4412.52.3105, 4412.52.4100, 4412.52.5100,

4418.74.9000; 4418.75.4000; 4418.75.7000; 4418.79.0100; and 9801.00.2500.

While HTSUS subheadings are provided for convenience and customs purposes, the written description of the subject merchandise is dispositive.

Preliminary Results of Changed Circumstances Reviews

Commerce's *Final Determination* specified that entries produced and exported by Yuhua are excluded from the *Order*.[17] After reviewing the information on the record of this CCR, *e.g.,* that Yuhua *et al.'s* sales channel has not changed from that which we examined in the investigation, Commerce preliminarily determines that Yuhua is the producer and exporter of MLWF sold to the United States through A-Timber.

Should we reach the same determination in the final results, we will instruct CBP that, because Yuhua is the producer and exporter of MLWF sold through A-Timber, Yuhua's exclusion from the *Order* applies to entries of such merchandise. That is, the exclusion would not apply to MLWF produced and/or exported by a Chinese entity other than Yuhua and sold through A-Timber. We also preliminarily determine that it is appropriate to terminate any suspension of liquidation on MLWF produced and exported by Yuhua and sold through A-Timber, and retroactively apply this determination to all unliquidated entries of such merchandise. We intend to release draft CBP instructions to parties at the same time as these preliminary results and allow a period of time for comments.

Public Comment

Interested parties may submit case briefs not later than 14 days after the date of publication of this notice.[18] Rebuttal briefs, which must be limited to issues raised in case briefs, may be filed not later than seven days after the due date for case briefs.[19] All submissions must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* An electronically filed document must be received successfully in its entirety in ACCESS by 5:00 p.m. Eastern Time on the deadlines set forth in this notice.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to the issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically-filed request must be received successfully in its entirely by 5:00 p.m. Eastern Time within 14 days of publication of this notice.[20] Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.[21] Parties should confirm the date, time and location of the hearing by telephone two days before the scheduled date.

Unless extended, consistent with 19 CFR 351.216(e), we intend to issue the final results of this CCR no later than 270 days after the date on which this review was initiated.

Notification to Interested Parties

This notice is published in accordance with sections 751(b)(1) and 777(i)(1) of the Act, and 19 CFR 351.216 and 351.221(c)(3)(i).

Dated: July 22, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Citric Acid and Certain Citrate Salts From Belgium: Final Results of Antidumping Duty Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On June 13, 2022, the U.S. Department of Commerce (Commerce) published the notice of initiation and preliminary results of the changed circumstances review (CCR) of the antidumping duty (AD) order on citric acid and certain citrate salts (citric acid) from Belgium. Commerce preliminarily determined that Citribel nv (Citribel) is the successor-in-interest to S.A. Citrique Belge N.V. (Citrique Belge) and, as a result, should be accorded the same AD cash deposit treatment as Citrique Belge with respect to subject merchandise. For these final results, Commerce continues to find that Citribel is the successor-in-interest to Citrique Belge and is entitled to the same cash deposit treatment as Citrique Belge under the AD order on citric acid from Belgium.

DATES: Applicable July 29, 2022.

FOR FURTHER INFORMATION CONTACT: Deborah Cohen, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4521.

SUPPLEMENTARY INFORMATION:

Background

On June 13, 2022, Commerce published the *Initiation and Preliminary Results* [1] of this CCR, finding that Citribel is the successor-in-interest to Citrique Belge and, as such, that Citribel is entitled to Citrique Belge's AD cash deposit rate with respect to entries of subject merchandise.[2] In the *Initiation and Preliminary Results,* we provided all interested parties with an opportunity to comment and request a public hearing regarding our preliminary results. No party requested a hearing, submitted a case brief, or otherwise commented on the *Initiation and Preliminary Results.*

Scope of the Order [3]

The merchandise covered by this *Order* includes all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type. The scope also includes blends of citric acid, sodium citrate, and potassium citrate; as well as blends with other ingredients, such as sugar, where the unblended form(s) of citric acid, sodium citrate, and potassium citrate constitute 40 percent or more, by weight, of the blend.

The scope also includes all forms of crude calcium citrate, including dicalcium citrate monohydrate, and tricalcium citrate tetrahydrate, which are intermediate products in the

[17] *See* CCR Request at Exhibit 2 (Investigation CBP Cash Deposit Instructions).

[18] Commerce is exercising its discretion under 19 CFR 351.309(c)(1)(ii) to alter the time limit for filing of case briefs.

[19] Commerce is exercising its discretion under 19 CFR 351.309(d)(1) to alter the time limit for filing of rebuttal briefs.

[20] *See* 19 CFR 351.310(c).

[21] *See* 19 CFR 351.310(d).

[1] *See Citric Acid and Certain Citrate Salts from Belgium: Notice of Initiation and Preliminary Results of Antidumping Duty Changed Circumstances Review,* 87 FR 35738 (June 13, 2022) (*Initiation and Preliminary Results*).

[2] *Id.*

[3] *See Citric Acid and Certain Citrate Salts from Belgium, Colombia and Thailand: Antidumping Duty Orders,* 83 FR 35214 (July 25, 2018) (*Order*).

production of citric acid, sodium citrate, and potassium citrate.

The scope includes the hydrous and anhydrous forms of citric acid, the dihydrate and anhydrous forms of sodium citrate, otherwise known as citric acid sodium salt, and the monohydrate and monopotassium forms of potassium citrate. Sodium citrate also includes both trisodium citrate and monosodium citrate which are also known as citric acid trisodium salt and citric acid monosodium salt, respectively.

The scope does not include calcium citrate that satisfies the standards set forth in the United States Pharmacopeia and has been mixed with a functional excipient, such as dextrose or starch, where the excipient constitutes at least 2 percent, by weight, of the product.

Citric acid and sodium citrate are classifiable under 2918.14.0000 and 2918.15.1000 of the Harmonized Tariff Schedule of the United States (HTSUS), respectively. Potassium citrate and crude calcium citrate are classifiable under 2918.15.5000 and, if included in a mixture or blend, 3824.99.9295 of the HTSUS. Blends that include citric acid, sodium citrate, and potassium citrate are classifiable under 3824.99.9295 of the HTSUS. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise is dispositive.

Final Results of Changed Circumstances Review

Having received no comments from interested parties and finding no information or evidence on the record that calls into question the preliminary results, we continue to find that Citribel is the successor-in-interest to Citrique Belge and, as such, that Citribel is entitled to Citrique Belge's AD cash deposit rate with respect to entries of subject merchandise for the reasons stated in the *Initiation and Preliminary Results.*[4] As a result of this determination and consistent with established practice, we find that Citribel should receive the AD cash deposit rate previously assigned to Citrique Belge. Consequently, Commerce will instruct U.S. Customs and Border Protection to suspend liquidation of all shipments of subject merchandise produced and/or exported by Citribel and entered, or withdrawn from warehouse, for consumption on or after the publication date of this notice in the **Federal Register** at the AD cash deposit rate in effect for Citrique Belge. This cash deposit requirement shall remain in effect until further notice.

[4] *Initiation and Preliminary Results.*

Administrative Protective Order

This notice serves as a final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is published in accordance with sections 751(b)(1) and 777(i) of the Tariff Act of 1930, as amended, and 19 CFR 351.216(e).

Dated: July 22, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Citric Acid and Certain Citrate Salts from Belgium: Preliminary Results of Antidumping Duty Administrative Review; 2020–2021

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that S.A. Citrique Belge N.V. (Citrique Belge) did not sell subject merchandise in the United States at prices below normal value during the July 1, 2020, through June 30, 2021, period of review (POR). We invite interested parties to comment on these preliminary results.

DATES: Applicable July 29, 2022.

FOR FURTHER INFORMATION CONTACT: David Lindgren and Deborah Cohen, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1671 and 202–482–4521, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 2018, Commerce published the antidumping duty (AD) order on citric acid and certain citrate salts (citric acid) from Belgium in the **Federal Register**.[1] On September 7, 2021, pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (the Act), Commerce initiated an AD administrative review of the *Order*.[2] During the course of this administrative review, Citrique Belge responded to Commerce's questionnaire and supplemental questionnaires. On March 8, 2022, Commerce extended the deadline for issuing the preliminary results of this review.[3] For further details, *see* the Preliminary Decision Memorandum.[4]

Scope of the Order

The merchandise covered by this *Order* includes all grades and granulation sizes of citric acid, sodium citrate, and potassium citrate in their unblended forms, whether dry or in solution, and regardless of packaging type. For a full description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this review in accordance with section 751(a) of the Act. Export price has been calculated in accordance with section 772(a) of the Act and normal value was calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum. A list of the topics discussed in the Preliminary Decision Memorandum is attached as an appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed at

Preliminary Results of the Review

Commerce preliminarily determines that the following weighted-average dumping margin exists for the period July 1, 2020, through June 30, 2021:

Exporter/producer	Estimated weighted-average dumping margin (percent)
S.A. Citrique Belge N.V	0.00

Disclosure and Public Comment

Commerce intends to disclose the calculations performed in these preliminary results to parties in this proceeding within five days of the date of publication of this notice.[5] Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs not later than 30 days after the date of publication of this notice. Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than seven days after the date for filing case briefs.[6] Parties who submit case or rebuttal briefs in this proceeding are requested to submit with each argument: (1) a statement of the issue, (2) a brief summary of the argument, and (3) a table of authorities.[7] Executive summaries should be limited to five pages total, including footnotes. Case and rebuttal briefs should be filed using ACCESS. Note that Commerce has temporarily modified certain portions of its requirements for serving documents containing business proprietary information, until further notice.[8]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically-filed request must be received successfully in its entirely by 5:00 p.m. Eastern Time within 30 days of the date of publication of this notice in the **Federal Register**.[9] Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.[10] Parties should confirm the date, time and location of the hearing by telephone two days before the scheduled date.

Commerce intends to issue the final results of this administrative review, including the results of our analysis of the issues raised in any the written briefs, no later than 120 days after the date of publication of this notice, unless otherwise extended.[11]

Assessment Rates

Upon completion of the administrative review, Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries. If the weighted-average dumping margin for Citrique Belge (*i.e.,* the sole individually-examined respondent in this review) is not zero or *de minimis* (*i.e.,* greater than or equal to 0.5 percent) in the final results of this review, we will calculate importer-specific *ad valorem* assessment rates for the merchandise based on the ratio of the total amount of dumping calculated for the examined sales made during the POR to each importer and the total entered value of those same sales, in accordance with 19 CFR 351.212(b)(1). Where an importer-specific *ad valorem* assessment rate is zero or *de minimis* in the final results of the review, we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.[12] If Citrique Belge's weighted-average dumping margin is zero or *de minimis* in the final results of the review, we will instruct CBP not to assess duties on any of its entries in accordance with the *Final Modification for Reviews, i.e.,* ''{w}here the weighted-average margin of dumping for the exporter is determined to be zero or *de minimis,* no antidumping duties will be assessed.'' [13]

For entries of subject merchandise during the POR produced by Citrique Belge for which the producer did not know its merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediate company (or companies) involved in the transaction.[14]

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for Citrique Belge [15] will be equal to the weighted-average dumping margin established in the final results of this administrative review, except if the rate is less than 0.50 percent, and therefore *de minimis* within the meaning of 19 CFR 351.106(c)(1), in which case the cash deposit rate will be zero; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which the company participated; (3) if the exporter is not a firm covered in this review, a prior review, or in the investigation but the producer is, the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be the all-others rate of 19.30 percent, the rate established in the less-than-fair-value investigation of this proceeding.[16] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing these preliminary results in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.213(h)(1).

Dated: July 22, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Certain Hardwood Plywood Products From the People's Republic of China: Preliminary Scope Determination and Affirmative Preliminary Determination of Circumvention of the Antidumping and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that certain hardwood plywood products and veneered panels (hardwood plywood) exported from the Socialist Republic of Vietnam (Vietnam), which were assembled in Vietnam using hardwood plywood inputs sourced from the People's Republic of China (China) are products of China and are subject to the antidumping duty (AD) and countervailing duty (CVD) orders on hardwood plywood from China. Additionally, Commerce preliminarily determines that certain hardwood plywood assembled in Vietnam using hardwood plywood inputs sourced from China are circumventing the AD and CVD orders on hardwood plywood from China.

DATES: Applicable July 29, 2022.

FOR FURTHER INFORMATION CONTACT: Kabir Archuletta, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2593.

SUPPLEMENTARY INFORMATION:

Background

On January 4, 2018, Commerce issued the *Orders* on imports of hardwood plywood from China.[1] On February 25, 2020, the Coalition for Fair Trade in Hardwood Plywood (the petitioner) alleged that imports of hardwood plywood that was assembled in Vietnam using core veneers, multi-ply core veneered panels, and/or veneer core platforms sourced from China are circumventing the *Orders.*[2] In their allegation, the petitioner requested that Commerce issue a scope ruling that certain hardwood plywood completed in Vietnam using hardwood plywood inputs manufactured in China, and imported into the United States as Vietnamese-origin plywood is within the scope of the *Orders.* In the alternative, the petitioner requested that Commerce initiate an anti-circumvention inquiry, pursuant to section 781(b) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.225(h),[3] to determine whether these products constitute merchandise completed or assembled in a third country that is circumventing, and should be included within, the scope of the *Orders.*

On June 17, 2020, Commerce published in the **Federal Register** the notice of initiation of these scope and anti-circumvention inquiries.[4] In that notice Commerce explained that it intended to examine the scope inquiry request filed by the petitioner under 19 CFR 351.225(c) as part of this anti-circumvention inquiry, and that we will make a final finding with regard to the scope inquiry to determine whether any of the production scenarios identified by the petitioner are already properly considered subject to the scope of the *Orders.*[5]

On April 15, 2022, Commerce extended the deadline to issue a final determination in these inquiries to October 17, 2022.[6] For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[7] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Orders

The products subject to these *Orders* are hardwood and decorative plywood, and certain veneered panels. For a full description of the scope, *see* the Preliminary Decision Memorandum.

Merchandise Subject to the Scope and Anti-Circumvention Inquiries

These scope and anti-circumvention inquiries cover hardwood plywood

[1] *See Certain Hardwood Plywood Products from the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value, and Antidumping Duty Order,* 83 FR 504 (January 4, 2018); and *Certain Hardwood Plywood Products from the People's Republic of China: Countervailing Duty Order,* 83 FR 513 (January 4, 2018) (collectively, the *Orders*).

[2] *See* Petitioner's Letter, ''Certain Hardwood Plywood Products from The People's Republic of China: Request from Scope Ruling/Anti-Circumvention ruling,'' dated February 25, 2020 (Petitioner's Request).

[3] Commerce significantly revised its scope regulations on September 20, 2021, with an effective date of November 4, 2021. *See Regulations to Improve Administration and Enforcement of Antidumping and Countervailing Duty Laws,* 86 FR 52300 (September 20, 2021). The amendments to 19 CFR 351.225 apply to scope inquiries for which a scope ruling application is filed, as well as any scope inquiry self-initiated by Commerce, on or after November 4, 2021. The newly promulgated 19 CFR 351.226 applies to circumvention inquiries for which a circumvention request is filed, as well as any circumvention inquiry self-initiated by Commerce, on or after November 4, 2021. We note that these scope and circumvention inquiries were initiated prior to the effective date of the new regulations, and, thus, any reference to the regulations is to the prior version of the regulations.

[4] *See Certain Hardwood Plywood Products from the People's Republic of China: Initiation of Anti-circumvention Inquiries and Scope Inquiries on the Antidumping Duty and Countervailing Duty Orders; Vietnam Assembly,* 85 FR 36530 (June 17, 2020) (*Initiation Notice*).

[5] *Id.,* 85 FR at 36533.

[6] *See* Memorandum, ''Extension of Deadline,'' dated April 18, 2022.

[7] *See* Memorandum, ''Preliminary Decision Memorandum for the Anti-Circumvention and Scope Inquiries on the Antidumping Duty and Countervailing Duty Orders on Certain Harwood Plywood Products from the People's Republic of China,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

exported to the United States that was completed in Vietnam using: (1) face/back veneers and assembled core components (*e.g.,* veneer core platforms) manufactured in China; (2) fully assembled veneer core platforms manufactured in China and face/back veneer produced in Vietnam or third countries; (3) multi-ply panels of glued core veneers manufactured in China and combined in Vietnam to produce veneer core platforms and combined with either face and/or back veneer produced in China, Vietnam, or a third country; (4) face/back veneers and individual core veneers produced in China; and (5) individual core veneers manufactured in China and processed into a veneer core platform [8] in Vietnam and combined with face/back veneer produced in Vietnam or a third country.

Scope Determination

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that hardwood plywood produced under three of the five production scenarios that are subject to these inquiries are covered by the scope of the *Orders.* Specifically, these in-scope products include hardwood plywood exported to the United States that is composed of: (1) face veneer, back veneer, and assembled core components (*e.g.,* veneer core platforms) manufactured in China and assembled in Vietnam; (2) fully assembled veneer core platforms manufactured in China that are combined in Vietnam with face and/or back veneers produced in Vietnam or third countries; and (3) multi-ply panels of glued core veneers manufactured in China that are combined in Vietnam to produce veneer core platforms and combined with either a face and/or back veneer produced in China, Vietnam, or a third country. In reaching this determination we relied, in part, on our recent Finewood Scope Ruling, in which we determined that the country of origin of plywood is imparted at the location where the veneers are first glued/assembled,[9] as well as additional record evidence and analysis.[10]

As a result, we preliminarily determine that this merchandise is within the *Orders* and will instruct U.S. Customs and Border Protection (CBP) to suspend entries of hardwood plywood from Vietnam, which were assembled in Vietnam under the three production scenarios above. To administer this preliminary affirmative scope determination, exporters and importers of hardwood plywood completed in Vietnam using non-Chinese origin hardwood plywood inputs will be permitted to certify that the exported products were not produced under any of the three scenarios that result in subject merchandise. If an importer files such certifications, it will be required to maintain those certifications and supporting documentation to provide to CBP and/or Commerce upon request.[11] Properly certified entries are not subject to AD and CVD duties under the *Orders.* Exemption from AD and CVD duties under the *Orders* is permitted only if the certification and documentation requirements specified in Appendix II are met.

Affirmative Preliminary Determination of Circumvention

As detailed in the Preliminary Decision Memorandum, we preliminarily determine that products produced under the remaining two of the five production scenarios that are subject to these inquiries are circumventing the *Orders.* Specifically, these products include hardwood plywood exported to the United States that was assembled in Vietnam and composed of: (1) face/back veneers and individual core veneers produced in China; and (2) individual core veneers manufactured in China and processed into a veneer core platform in Vietnam and combined with face/back veneer produced in Vietnam or a third country.

As a result, we preliminarily determine that it is also appropriate to include this merchandise within the *Orders* and to instruct CBP to suspend entries of hardwood plywood from Vietnam, which were assembled in Vietnam under the two production scenarios above. To administer this preliminary affirmative determination of circumvention, exporters and importers of hardwood plywood completed in Vietnam using non-Chinese origin hardwood plywood inputs will be permitted to certify that the exported products were not produced under either of the two scenarios that result in merchandise circumventing the *Orders.* As noted above, if an importer files such certifications, it will also be required to maintain the certifications and supporting documentation to provide to CBP and/or Commerce upon request.[12] Properly certified entries are not subject to AD and CVD duties under the *Orders.* Exemption from AD and CVD duties under the *Orders* is permitted only if the certification and documentation requirements specified in Appendix II are met.

Methodology

Commerce made these preliminary scope and circumvention findings in accordance with section 781(b) of the Act and 19 CFR 351.225(g). We relied on information placed on the record by the petitioner and the Government of Vietnam, and information we placed on the record. We also relied on the facts available under section 776(a) of the Act, including facts available with adverse inferences under section 776(b) of the Act, where appropriate.

In particular, we requested information from numerous companies in Vietnam in conducting these inquiries. While we received responses from the majority of these companies, 14 companies failed to respond to our initial questionnaire and/or a supplemental questionnaire and an additional 22 companies provided information that either contained significant discrepancies and inconsistencies or was misleading.[13] Therefore, we preliminarily find that these 36 companies withheld information, failed to provide information by the deadline or in the form and manner requested, and significantly impeded these inquiries. Thus, we find that they failed to cooperate to the best of their abilities; thereby, we have used adverse inferences when selecting from among the facts otherwise available on the record for certain aspects of this preliminary determination, pursuant to sections 776(a) and (b) of the Act. As adverse facts available, we have preliminarily determined that these 36 companies produce hardwood plywood under all five of the production scenarios subject to these inquiries. Additionally, we preliminarily determine that these 36 companies [14] are precluded from participating in the certification program we are establishing for applicable exports of

[8] A veneer core platform is defined as two or more wood veneers that form the core of an otherwise completed hardwood plywood product (*i.e.,* a hardwood plywood product to which the outer (face and back) veneers have not yet been affixed). *See* Petitioner's Request at Exhibit 11.

[9] *See* Memorandum, ''Placing Documents Relevant to this Proceeding on the Record,'' dated February 18, 2022, at Attachment (Memorandum, ''Antidumping Duty and Countervailing Duty Orders on Certain Hardwood Plywood Products from the People's Republic of China, Enforcement and Protect Act (EAPA) Investigation No. 7252: Final Scope Ruling,'' dated January 21, 2022 (Finewood Scope Ruling)).

[10] *See* Preliminary Decision Memorandum.

[11] The importer certification is provided at Appendix III and the exporter certification is provided at Appendix IV.

[12] The importer certification is provided at Appendix III and the exporter certification is provided at Appendix IV.

[13] *See* Appendix V for a list of companies that either failed to respond to our requests for information or provided unreliable information.

[14] *Id.*

hardwood plywood from Vietnam. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

Suspension of Liquidation

In accordance with 19 CFR 351.225(l)(2), for entries of hardwood plywood from Vietnam that were produced under any of the three production scenarios that we preliminarily determined are subject merchandise, Commerce will instruct CBP to continue to suspend liquidation and require a cash deposit of estimated duties, at the applicable rate, that are entered, or withdrawn from warehouse, for consumption on or after June 17, 2020, the date of publication of initiation of the scope inquiries in the **Federal Register**.[15] Similarly, for entries of hardwood plywood from Vietnam that were produced under either of the two production scenarios that we preliminarily determined are circumventing the *Orders,* and therefore should be included within the *Orders,* we will instruct CBP to suspend liquidation and require a cash deposit of estimated duties, at the applicable rates, that are entered, or withdrawn from warehouse, for consumption on or after June 17, 2020, the date of publication of initiation of the anti-circumvention inquiries in the **Federal Register**.[16]

Where companies subject to these inquiries have their own company-specific rate under the *Orders,* the cash deposit rate will be the company-specific rate. Otherwise, Commerce will instruct CBP to require AD cash deposits equal to the China-wide rate of 183.36 percent and CVD cash deposits equal to the all-others rate of 22.98 percent.

Hardwood plywood assembled in Vietnam under scenarios other than the five production scenarios identified above are not subject to these inquiries. Therefore, cash deposits are not required for such merchandise, subject to the following certification requirements.[17] Note that, as further described below, the 36 non-cooperative exporters listed in Appendix V are not eligible to participate in this certification program.[18]

If an importer of hardwood plywood assembled in Vietnam claims that the hardwood plywood was not produced using any of the Chinese hardwood plywood input scenarios subject to these inquiries, the importer and exporter must meet the certification and documentation requirements described in Appendix II. An exporter of hardwood plywood assembled in Vietnam claiming that its hardwood plywood was not produced using any of the Chinese hardwood plywood input scenarios subject to these inquiries must prepare and maintain an Exporter Certification and documentation supporting the exporter certification (*see* Appendix IV). In addition, importers of such hardwood plywood must prepare and maintain an importer certification (*see* Appendix III) as well as documentation supporting the importer certification. Besides the importer certification, the importer must also maintain a copy of the exporter certification (*see* Appendix IV), and relevant supporting documentation from its exporter of hardwood plywood assembled in Vietnam that was not produced using any of the Chinese hardwood plywood input scenarios subject to these inquiries.

Verification

As provided in 19 CFR 351.307, Commerce intends to verify information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Commerce will notify interested parties of the timeline for the submission of case briefs and written comments at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline for case briefs.[19] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in these scope and anti-circumvention inquiries are encouraged to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.[20]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; (3) whether any participant is a foreign national; and (4) a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

International Trade Commission Notification

Commerce, consistent with section 781(e) of the Act, has notified the International Trade Commission (ITC) of this preliminary determination to include the merchandise subject to these anti-circumvention inquiries within the *Orders.* Pursuant to section 781(e) of the Act, the ITC may request consultations concerning Commerce's proposed inclusion of the inquiry merchandise. If, after consultations, the ITC believes that a significant injury issue is presented by the proposed inclusion, it will have 60 days from the date of notification by Commerce to provide written advice.

Notification to Interested Parties

This determination is issued and published in accordance with section 781(b) of the Act and 19 CFR 351.225(f) and (h).

Dated: July 22, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Certification Requirements

If a company imports hardwood plywood from the Socialist Republic of Vietnam (Vietnam) and claims that the hardwood plywood was completed in Vietnam using a production scenario other than those subject to these inquiries, the importer is required to complete and maintain the importer certification, attached as Appendix III, and retain all supporting documentation. The importer is further required to maintain a copy of the exporter certification, attached as Appendix IV, and retain all supporting documentation. The importer certification must be completed, signed, and dated by the time of filing of the entry summary for the relevant importation. Where the importer uses a broker to facilitate the entry process, it should obtain the entry summary number from the broker. Agents of the importer, such as brokers, however, are not permitted to make this certification on behalf of the importer.

The exporter is required to complete and maintain the exporter certification, attached as Appendix IV, and is further required to provide the importer a copy of that certification and all supporting documentation (*e.g.,* invoice, purchase order, production records, *etc.*). The exporter certification must be completed, signed, and dated by the time of shipment of the relevant entries (except as noted below). The exporter certification should be completed by the party selling the subject merchandise manufactured in Vietnam to the United States.

The importer will not be required to submit the certifications or supporting documentation to U.S. Customs and Border Protection (CBP) as part of the entry process. However, the importer and exporter will be required to present the certifications, and supporting documentation, to the Department of Commerce and/or U.S. Customs and Border Protection (CBP), as applicable, upon request by the respective agency. Additionally, the claims made in the certifications and any supporting documentation are subject to verification by Commerce and/or CBP. The importer and exporter are required to maintain the certifications and supporting documentation for the later of: (1) a period of five years from the date of entry; or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries.

For hardwood plywood completed in Vietnam under the two production scenarios subject to these inquiries that we have found to be circumventing the *Orders,* Commerce has established the following third-country case numbers in the Automated Commercial Environment (ACE): A–552–006 and C–552–007.

If it is determined that the certification and/or documentation requirements in a certification have not been met, Commerce intends to instruct CBP to suspend, under the antidumping duty (AD) and countervailing duty (CVD) *Orders*[21] on hardwood plywood from the People's Republic of China, A–570–051/C–570–052 or A–552–006/C–552–007, all unliquidated entries for which these requirements were not met and require the importer to post applicable AD and CVD cash deposits equal to the rates as determined by Commerce. Entries suspended under A–570–051/C–570–052 or A–552–006/C–552–007 will be liquidated pursuant to applicable administrative reviews of the *Orders* or through the automatic liquidation process.

For entries suspended pursuant to the preliminary determination of these scope and anti-circumvention inquiries that were shipped and/or entered, or withdrawn from warehouse, for consumption during the period, June 17, 2020 (the date of initiation of these scope and anti-circumvention inquiries) through the date of publication of the preliminary determination in the **Federal Register**, for which certifications are required, the exporter certifications should be completed as soon as practicable, but not later than 45 days after publication of the preliminary determination in the **Federal Register**. Accordingly, the relevant paragraph in the certification should be edited to reflect that the certification was completed within this time frame. Specifically, exporters should complete the language in paragraph G in the exporter certification that reads: ''The shipments/products referenced herein shipped before mm/dd/yyyy, the date on which Commerce published notice of its preliminary scope and anti-circumvention findings in the **Federal Register**. This certification was completed on mm/dd/yyyy, within 45 days of the **Federal Register** notice publication.'' For such entries, exporters each have the option to complete a blanket certification covering multiple entries, individual certifications for each entry, or a combination thereof. The exporter certifications should be maintained by both the importer and exporter and provided to CBP or Commerce only upon request by the respective agency. The exporter must provide the importer a copy of the exporter certification within 45 days of the publication of the preliminary determination in the **Federal Register**.

For unliquidated entries (and entries for which liquidation has not become final) of merchandise entered as non-AD/CVD type entries (*e.g.* type 01) that were shipped and/or entered, or withdrawn from warehouse, for consumption in the United States during the period, June 17, 2020 (the date of initiation of these scope and anti-circumvention inquiries) through the date of publication of the preliminary determination in the **Federal Register**, manufactured using any of the production scenarios subject to these inquiries, importers should file a Post Summary Correction with CBP, in accordance with CBP's regulations, regarding conversion of such entries from non-AD/CVD type entries to AD/CVD type entries (*e.g.,* type 01 to type 03). For such shipments, the exporter certifications should be completed as soon as practicable, but not later than 45 days after publication of the preliminary determination in the **Federal Register**. Importers should report those AD/CVD type entries that were produced under production scenarios 1, 2, or 3, which we have found to be covered by the scope of the *Orders,* under the case numbers for the *Orders* on hardwood plywood from the People's Republic of China, A–570–051/C–570–052. Importers should report those AD/CVD type entries that were produced under production scenarios 4 or 5, which we have found to be circumventing the *Orders,* using the third-country case numbers, A–552–006/C–552–007. Similarly, the importer should pay cash deposits on those entries consistent with the regulations governing post summary corrections that require payment of additional duties.

[21] *See Certain Hardwood Plywood Products from the People's Republic of China: Amended Final Determination of Sales at Less Than Fair Value, and Antidumping Duty Order,* 83 FR 504 (January 4, 2018); and *Certain Hardwood Plywood Products from the People's Republic of China: Countervailing Duty Order,* 83 FR 513 (January 4, 2018) (collectively, the *Orders*).

Appendix III

IMPORTER CERTIFICATION

I hereby certify that:

(A) My name is {IMPORTING COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF IMPORTING COMPANY}, located at {ADDRESS OF IMPORTING COMPANY}.

(B) I have direct personal knowledge of the facts regarding the importation into the Customs territory of the United States of the hardwood plywood completed in Vietnam that entered under entry summary number(s), identified below, and are covered by this certification. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own records. For example, the importer should have ''direct personal knowledge'' of the importation of the product (*e.g.,* the name of the exporter) in its records;

(C) I have personal knowledge of the facts regarding the production of the imported products covered by this certification. ''Personal knowledge'' includes facts obtained from another party, (*e.g.,* correspondence received by the importer (or exporter) from the producer regarding the source of the hardwood plywood inputs used to produce the imported products);

(D) This certification applies to the following entries (repeat this block as many times as necessary):

Entry Summary #:
Entry Summary Line Item #:
Foreign Seller:
Foreign Seller's Address:
Foreign Seller's Invoice #:
Foreign Seller's Invoice Line Item #:
Country of Origin of core veneers/veneered panels/veneer core platforms:

(E) The hardwood plywood completed in Vietnam was not produced under any of the production scenarios subject to these certifications:

1. Face veneer, back veneer, and assembled core components (*e.g.,* veneer core platforms (see note below)) manufactured in China and assembled in Vietnam;

2. Fully assembled veneer core platforms manufactured in China that are combined in Vietnam with face and/or back veneers produced in Vietnam or third countries;

3. Multi-ply panels of glued core veneers manufactured in China that are combined in Vietnam to produce veneer core platforms and combined with either a face and/or back veneer produced in China, Vietnam, or a third country;

4. Face veneer, back veneer, and individual core veneers produced in China and assembled into hardwood plywood in Vietnam; and

5. Individual core veneers manufactured in China and processed into a veneer core platform in Vietnam and combined with a face and/or back veneer produced in Vietnam or other third country;

Note: A veneer core platform is defined as two or more wood veneers that form the core of an otherwise completed hardwood plywood product (*i.e.,* a hardwood plywood product to which the outer (face and back) veneers have not yet been affixed).

(F) I understand that {IMPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, certificates of origin, production records, invoices, USDA Plant and Plant Product Declaration Form *etc.*) for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;

(G) I understand that {IMPORTING COMPANY} is required to provide this certification and supporting records, upon request, to U.S. Customs and Border Protection (CBP) and/or the Department of Commerce (Commerce);

(H) I understand that {IMPORTING COMPANY} is required to maintain a copy of the exporter's certification (attesting to the production and/or export of the imported merchandise identified above) and supporting documentation, for the later of (1) a period of five years from the date of entry or (2) a period of three years after the conclusion of any litigation in United States courts regarding such entries;

(I) I understand that {IMPORTING COMPANY} is required to maintain and provide a copy of the exporter's certification and supporting documentation, upon request, to CBP and/or Commerce;

(J) I understand that the claims made herein, and the substantiating documentation, are subject to verification by CBP and/or Commerce;

(K) I understand that failure to maintain the required certification and supporting documentation and/or failure to substantiate the claims made herein and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a *de facto* determination that all entries to which this certification applies are within the scope of the antidumping/countervailing duty orders on hardwood plywood from China. I understand that such finding will result in:

○ suspension of liquidation of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met;

○ the requirement that the importer post applicable antidumping duty and/or countervailing duty cash deposits (as appropriate) equal to the rates determined by Commerce; and

○ the revocation of {NAME OF IMPORTING COMPANY}'s privilege to certify that future imports of hardwood plywood are not produced under any of the production scenarios subject to these certifications.

(L) I understand that agents of the importer, such as brokers, are not permitted to make this certification;

(M) This certification was completed by the time of filing the entry summary or within 45 days of the date on which Commerce published notice of its preliminary scope and anti-circumvention findings in the **Federal Register**; and

(N) I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

Appendix IV

EXPORTER CERTIFICATION

I hereby certify that:

(A) My name is {COMPANY OFFICIAL'S NAME} and I am an official of {NAME OF EXPORTING COMPANY}, located at {ADDRESS OF EXPORTING COMPANY}.

(B) I have direct personal knowledge of the facts regarding the production and exportation in the Customs territory of the United States of the hardwood plywood identified below. ''Direct personal knowledge'' refers to facts the certifying party is expected to have in its own books and records. For example, an exporter should have ''direct personal knowledge'' of the producer's identity and location;

(C) The hardwood plywood completed in Vietnam was not produced under any of the following production scenarios:

1. Face veneer, back veneer, and assembled core components (*e.g.,* veneer core platforms (see note below) manufactured in China and assembled in Vietnam;

2. Fully assembled veneer core platforms manufactured in China that are combined in Vietnam with face and/or back veneers produced in Vietnam or third countries;

3. Multi-ply panels of glued core veneers manufactured in China that are combined in Vietnam to produce veneer core platforms and combined with either a face and/or back veneer produced in China, Vietnam, or a third country;

4. Face veneer, back veneer, and individual core veneers produced in China and assembled into hardwood plywood in Vietnam; and

5. Individual core veneers manufactured in China and processed into a veneer core platform in Vietnam and combined with a face and/or back veneer produced in Vietnam or other third country;

Note: A veneer core platform is defined as two or more wood veneers that form the core of an otherwise completed hardwood plywood product (*i.e.,* a hardwood plywood product to which the outer (face and back) veneers have not yet been affixed).

(D) This certification applies to the following sales to {NAME OF U.S. CUSTOMER}, located at {ADDRESS OF U.S. CUSTOMER} (repeat this block as many times as necessary):

Foreign Seller's Invoice # to U.S. Customer:

Foreign Seller's Invoice to U.S. Customer Line item #:

Producer's Invoice # to Foreign Seller: (If the foreign seller and the producer are the same party, put NA here.)

Producer's Invoice # Foreign Seller: (If the foreign seller and the producer are the same party, put NA here.)

Name of core veneers/veneered panel/ veneer core platform producer:

(E) The hardwood plywood products covered by this certification were shipped to {NAME OF U.S. PARTY TO WHOM MERCHANDISE WAS SHIPPED}, located at {U.S. ADDRESS TO WHICH MERCHANDISE WAS SHIPPED}.

(F) I understand that {NAME OF EXPORTING COMPANY} is required to maintain a copy of this certification and sufficient documentation supporting this certification (*i.e.,* documents maintained in the normal course of business, or documents obtained by the certifying party, for example, production records, invoices, *etc.*) for the later of: (1) a period of five years from the date of entry; or (2) a period of three years after the conclusion of any litigation in the United States courts regarding such entries;

(G) I understand that {NAME OF EXPORTING COMPANY} must provide this Exporter Certification to the U.S. importer by the time of shipment. {Or}

The shipments/products referenced herein shipped before the mm/dd/yyyy, the date on which Commerce published notice of its preliminary scope and anti-circumvention findings in the **Federal Register**. This certification was completed on mm/dd/yyyy, within 45 days of the **Federal Register** notice publication;

(H) I understand that failure to maintain the required certification and supporting documentation, failure to substantiate the claims made herein, and/or failure to allow CBP and/or Commerce to verify the claims made herein, may result in a *de facto* determination that all entries to which this certification applies are within the scope of the antidumping (AD)/countervailing duty (CVD) orders on hardwood plywood from China. I understand that such a finding will result in:

(i) suspension of all unliquidated entries (and entries for which liquidation has not become final) for which these requirements were not met;

(ii) the requirement that the importer post applicable AD and/or CVD cash deposits (as appropriate) equal to the rates as determined by Commerce; and

(iii) the revocation of {NAME OF EXPORTING COMPANY}'s privilege to

certify that future imports of hardwood plywood are not produced under any of the production scenarios subject to these certifications.

(J) This certification was completed at time of shipment or within 45 days of the date on which Commerce published notice of its preliminary scope and anti-circumvention findings in the **Federal Register***;*

(K) I am aware that U.S. law (including, but not limited to, 18 U.S.C. 1001) imposes criminal sanctions on individuals who knowingly and willfully make material false statements to the U.S. government.

[A–583–854]

Certain Steel Nails From Taiwan: Notice of Court Decision Not in Harmony With the Results of Antidumping Duty Administrative Review; Notice of Amended Final Results

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On July 15, 2022, the U.S. Court of International Trade (the Court or CIT) issued its final judgment in *Pro-Team Coil Nail Enter.* v. *United States,* Consol. Court No. 18–00027, Slip Op. 22–84 (*Pro-Team IV*), sustaining the U.S. Department of Commerce's (Commerce) remand results pertaining to the administrative review of the antidumping duty (AD) order on certain steel nails from Taiwan covering the period May 20, 2015, to June 30, 2016. Commerce is notifying the public that the CIT's final judgment is not in harmony with Commerce's *Final Results* of the administrative review, and that Commerce is amending the *Final Results* with respect to the dumping margin assigned to the mandatory respondent, PT Enterprise, Inc./Pro-Team Coil Nail Enterprise, Inc. and to the respondents that were not selected for individual examination (*i.e.,* the non-examined companies), Hor Liang Industrial Corp. and Romp Coil Nails Industries Inc.

DATES: Applicable July 25, 2022.

FOR FURTHER INFORMATION CONTACT: Erin Kearney or George McMahon, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0167 or (202) 482–1167, respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 13, 2018, Commerce published its *Final Results* in the 2015–2016 AD administrative review of certain steel nails from Taiwan.[1] In this administrative review, Commerce selected three mandatory respondents for individual examination: PT Enterprise, Inc./Pro-Team Coil Nail Enterprise, Inc. (PT/Pro-Team); Unicatch Industrial Co., Ltd. (Unicatch); and Bonuts Hardware Logistics Co., LLC (Bonuts). Based on the mandatory respondents' failure to cooperate to the best of their abilities in responding to Commerce's requests for information, Commerce initially relied on the petition rate as adverse facts available (AFA) to determine the dumping rates for each of the mandatory respondents. Commerce assigned to the non-examined companies the dumping margin assigned to the mandatory respondents, 78.17 percent, in the *Final Results*.[2]

PT/Pro-Team and Unicatch challenged the application of AFA. Bonuts did not challenge the AFA rate it was assigned.[3]

In its *First Remand Order,* the Court sustained Commerce's use of facts available to determine the margin for Unicatch, but remanded two issues to Commerce: (1) the application of AFA to determine the AD margin of PT/Pro-Team; and (2) to explain the use of an adverse inference when using facts available to determine the AD margin of Unicatch.[4]

In its first remand redetermination issued on March 25, 2020, Commerce reconsidered its AFA determinations.[5] Commerce calculated a dumping margin for PT/Pro-Team that was *de minimis,* but continued to apply AFA to Unicatch.[6] Commerce used the AFA rate that it corroborated in the *Final Results* and recalculated the non-examined companies' rate using the ''expected method'' of averaging PT's and Unicatch's rates. Commerce calculated the non-examined companies' rate using a simple average of PT/Pro-Team's calculated zero percent margin and the 78.17 percent AFA rate applied to Unicatch.[7]

In the *Second Remand Order,* the Court sustained Commerce's calculation of a weighted-average dumping margin of zero percent for PT/Pro-Team and Commerce's application of a rate based on AFA for Unicatch.[8] The Court

[1] *See Certain Steel Nails from Taiwan: Final Results of Antidumping Duty Administrative Review and Partial Rescission of Administrative Review;* 2015–2016, 83 FR 6163 (February 13, 2018) (*Final Results*), and accompanying Issues and Decision Memorandum (IDM).

[2] *Id.*

[3] *See Pro-Team Coil Nail Enter.* v. *United States* (*Pro-Team I*), 419 F. Supp. 3d 1319, 1323–25 (CIT 2019) (*First Remand Order*).

[4] *Id.*

[5] *See Final Results of Redetermination Pursuant to Court Remand, Pro-Team Coil Nail Enter.* v. *United States,* Consol. Court No. 18–00027, Slip Op. 19–169 (CIT December 19, 2019), dated March 25, 2020 (*First Redetermination*).

[6] Bonuts did not challenge the application of AFA to its company, and the AFA rate assigned to Bonuts has remained unchanged in this segment of the proceeding.

[7] *See First Redetermination* at 32.

[8] *See Pro-Team Coil Nail Enterprise, Inc.* v. *United States,* 483 F. Supp. 3d 1242 (CIT 2020) (*Second Remand Order*).

remanded Commerce's selection of the 78.17 percent rate applied as AFA, which the Court found Commerce did not adequately corroborate.[9] The Court also stated that ''Commerce largely ignored Unicatch's arguments that the 78.17 percent rate was punitive, aberrational, and lacking consideration of the totality of the circumstances or the seriousness of Unicatch's conduct,'' but deferred further consideration of Unicatch's arguments that the petition rate was unduly punitive.[10]

In its second remand redetermination issued on February 23, 2021, Commerce provided additional analysis concerning the corroboration of the margin assigned to Unicatch as AFA. Commerce also recalculated the rate assigned to the non-examined companies using a simple average of the mandatory respondents' rates.[11]

In *Pro-Team III,* the non-examined companies challenged Commerce's decision to use a simple average of the mandatory respondents' AFA and *de minimis* rates to calculate the rate for non-examined companies. The CIT remanded Commerce's use of a simple average to calculate the rate for non-examined companies.[12] The CIT found that substantial evidence did not support Commerce's departure from the expected method [13] (*i.e.,* using a weighted average to calculate the non-examined companies' rate) because Commerce had not explained why the U.S. Customs and Border Protection (CBP) import volume data it had relied on for selecting mandatory respondents was not reliable for the purpose of calculating a dumping rate using the expected method.[14]

In its third remand redetermination issued on October 13, 2021, Commerce continued to assign rates based on total AFA to two selected respondents (Bonuts and Unicatch), calculated a zero percent margin for a third selected respondent (PT/Pro-Team), and calculated the weighted-average of the rates of these three mandatory respondents to apply to the non-examined companies.[15] This use of the expected method resulted in an AD rate of 35.30 percent for the non-examined companies.[16]

In *Pro-Team IV,* the Court explained that the statute, SAA, and case law supported the legal framework in which the mandatory respondents are assumed representative of the non- examined companies and also explained that Commerce does not bear a burden of data collection to determine non-examined companies' potential dumping margins.[17] The CIT agreed with Commerce's finding that substantial evidence did not support a finding that the mandatory respondents' rates were not representative because the history of the rates showed fluctuations from administrative review to administrative review. Moreover, the CIT held that Commerce's determination to include in the calculation of the rate applicable to non-selected respondents Bonuts' AFA rate was lawful because absent Bonuts' cooperation, Commerce could not verify Bonuts' claim that it was not representative.[18]

On July 15, 2022, the Court sustained Commerce's *Third Redetermination,* and entered a final judgment.[19]

Timken Notice

In its decision in *Timken,*[20] as clarified by *Diamond Sawblades,*[21] the U.S. Court of Appeals for the Federal Circuit held that, pursuant to section 516A(e) of the Tariff Act of 1930, as amended (the Act), Commerce must publish a notice of a court decision not ''in harmony'' with a Commerce determination and must suspend liquidation of entries pending a ''conclusive'' court decision. The Court's July 15, 2022, judgment sustaining the *Third Redetermination* constitutes a final decision of the Court that is not in harmony with Commerce's *Final Results.* This notice is published in fulfillment of the publication requirement of *Timken.*

Amended Final Results

Because there is now a final court decision, Commerce is amending the *Final Results* with respect to PT/Pro-Team and the non-examined companies for the period May 20, 2015, through June 30, 2016. The revised rates for PT/Pro-Team and the non-examined companies are as follows:

Producer/exporter	Weighted average dumping margin (percent)
PT Enterprise, Inc./Pro-Team	
Coil Nail Enterprise, Inc	0.00
Non-examined companies [22]	35.30

Cash Deposit Requirements

Because PT/Pro-Team and the non-examined companies have superseding cash deposit rates, *i.e.,* there have been final results published in a subsequent administrative review, we will not issue revised cash deposit instructions to CBP. This notice will not affect the current cash deposit rates.

Liquidation of Suspended Entries

At this time, Commerce remains enjoined by CIT order from liquidating entries that: were imported by PrimeSource Building Products, Inc.; produced and exported by Pro-Team Coil Nail Enterprise, Inc. and/or PT Enterprise Inc.; produced and exported by Hor Liang Industrial Corp. or Romp Coil Nails Industries Inc.; or produced and exported by Unicatch Industrial Co., Ltd., and were entered, or withdrawn from warehouse, for consumption during the period May 20, 2015 through June 30, 2016. Liquidation of these entries will remain enjoined pursuant to the terms of the injunction during the pendency of any appeals process.

In the event the CIT's ruling is not appealed, or, if appealed, upheld by a final and conclusive court decision,

[9] *Id.,* 483 F. Supp. 3d at 1245, 1251

[10] *Id.,* 483 F. Supp. 3d at 1251.

[11] *See Final Results of Redetermination Pursuant to Court Remand, Pro-Team Coil Nail Enter.* v. *United States,* Consol. Court No. 18–00027, Slip Op. 20–163 (CIT November 16, 2020), dated February 23, 2021 (*Second Redetermination*), at 12. Upon review of the calculation of the non-examined companies' rate, we found that Commerce erred in the *First Redetermination* by inadvertently omitting Bonuts' rate from the calculation.

[12] *See Pro-Team Coil Nail Enter.* v. *United States,* 532 F. Supp. 3d 1281, 1294 (CIT 2021) (*Pro-Team III*).

[13] The Statement of Administrative Action accompanying the Uruguay Round Agreements Act (URAA), which Congress has approved as an authoritative interpretation of the statute, *Id.* § 3512(d), provides an ''expected method'' to determine the all-others rate in these situations. *See* Statement of Administrative Action Accompanying the Uruguay Round Agreements Act, H.R. Doc. No. 103–316, Vol. 1 (1994) (SAA), at 873. When the dumping margins for all individually investigated exporters and producers are determined entirely on the basis of facts available or are zero or *de minimis,* ''{t}he expected method in such cases will be to weight-average the zero and *de minimis* margins and margins determined pursuant to the facts available, provided that volume data is available.'' *Id.* The SAA further provides that ''if this method is not feasible, or if it results in an average that would not be reasonably reflective of potential dumping margins for non-investigated exporters or producers, Commerce may use other reasonable methods.'' *Id.*

[14] *See Pro-Team III,* 532 F. Supp. 3d at 1293–94.

[15] *See Final Results of Redetermination Pursuant to Court Remand, Pro-Team Coil Nail Enter.* v. *United States,* Consol. Court No. 18–00027, Slip Op. 21–93 (CIT July 20, 2021), dated October 13, 2021 (*Third Redetermination*).

[16] *Id.* at 17.

[17] *See Pro-Team Coil Nail Enter.* v. *United States,* Consol. Court No. 18–00027, Slip Op. 22–84 (CIT July 15, 2022) (*Pro-Team IV*).

[18] *Id.* at 18.

[19] *Id.*

[20] *See Timken Co.* v. *United States,* 893 F.2d 337, 341 (Fed. Cir. 1990) (*Timken*).

[21] *See Diamond Sawblades Mfrs. Coalition* v. *United States,* 626 F.3d 1374 (Fed. Cir. 2010) (*Diamond Sawblades*).

[22] The non-examined companies are Hor Liang Industrial Corp. and Romp Coil Nails Industries Inc.

Commerce intends to instruct CBP to assess ADs on unliquidated entries of subject merchandise imported by PrimeSource Building Products, Inc.; produced and exported by Pro-Team Coil Nail Enterprise, Inc. and/or PT Enterprise Inc.; produced and exported by Hor Liang Industrial Corp. or Romp Coil Nails Industries Inc.; or produced and exported by Unicatch Industrial Co., Ltd., in accordance with 19 CFR 351.212(b). We will instruct CBP to assess ADs on all appropriate entries covered by this review when the importer-specific *ad valorem* assessment rate is not zero or *de minimis.* Where an importer-specific *ad valorem* assessment rate is zero or *de minimis,*[23] we will instruct CBP to liquidate the appropriate entries without regard to ADs.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516(A)(c) and (e) and 777(i)(1) of the Act.

Dated: July 25, 2022.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Gas Flow Meter Calibrations

AGENCY: National Institute of Standards and Technology (NIST), Commerce.

ACTION: Notice of workshop; request for comments.

SUMMARY: The National Institute of Standards and Technology (NIST), an agency of the United States Department of Commerce, is examining the economic impact and continued need for gas flow calibration services as provided to U.S. industry by the Fluid Metrology Group on NIST's campus in Gaithersburg, Maryland. NIST is also interested in whether there is a need for gas flow meter calibration services not presently offered by NIST. NIST publishes this notice to announce a workshop that will guide NIST planning for the future of its gas flow calibration capabilities, and to request comments on government and industry interest in and needs for (1) gas flow calibrations and whether the present services are meeting those needs, (2) new gas flow calibrations and standards not presently available from NIST, and (3) calibrations and standards for multiphase flows. This is part of the effort to systematically review NIST's Measurement Services to assess gaps and ensure alignment with stakeholders' needs as discussed in the Government Accounting Office report GAO–18–445.

DATES: NIST will accept written responses to this request for information until 11:59 p.m. Eastern Time on September 16, 2022. Submissions received after that date may not be considered. All submissions, including attachments and other supporting materials, may become part of the public record and may be subject to public disclosure. NIST reserves the right to publish relevant comments publicly, unedited and in their entirety. Personal information, such as account numbers or Social Security numbers, or names of other individuals, should not be included. Do not submit confidential business information, or otherwise sensitive or protected information. Comments that contain profanity, vulgarity, threats, or other inappropriate language or content will not be considered.

A public workshop will be held on Wednesday, September 7, 2022, from 1:00 p.m. to 4:00 p.m. Eastern Time, virtually by web conferencing. Interested parties must register to participate in the public workshop by 5:00 p.m. Eastern Time on Tuesday, September 6, 2022, and may register by sending an email to *john.wright@nist.gov* prior to 5:00 p.m. Eastern Time on Tuesday, September 6, 2022.

ADDRESSES: Comments should be submitted to Dr. John Wright, Sensor Science Division, Physical Measurement Laboratory, National Institute of Standards and Technology, 100 Bureau Drive, Mail Stop 8361, Gaithersburg, Maryland 20899, or by electronic mail to *john.wright@nist.gov.* Individuals or groups interested in touring the gas flow standards in person are welcome and can schedule tours by writing to the email address, *john.wright@nist.gov,* before or after the workshops.

FOR FURTHER INFORMATION CONTACT: Mail: Chief, Sensor Science Division, Gas Flow Calibrations, 100 Bureau Drive, Mail Stop 8440, Gaithersburg, Maryland 20899. Email: John Wright at *john.wright@nist.gov.* Phone number: 301 975–5937.

SUPPLEMENTARY INFORMATION: NIST's gas flow standards use the pressure, volume, temperature, and time (PVTt) method and working standard flow meters to conduct research and perform customer calibrations at flows ranging from 0.1 cm^3/min to 4 x 10^4 m^3/min with uncertainties as low as 0.025%. The smaller flows in this range are used by the semiconductor, pharmaceutical, and aerospace manufacturing sectors. The largest flows in the range are performed using high pressure natural gas to support reliable trade of this fuel. More information on NIST's gas flow standards and print publications about them can be found at *https://www.nist.gov/laboratories/tools-instruments/gas-flow-standards.*

NIST is seeking to better understand the impact of its gas flow calibrations on the U.S. economy, manufacturing infrastructure, and technological base, and whether the magnitude of this impact necessitates that NIST should: expand or reduce the calibrations offered; expand the variety of gases used in calibrations beyond nitrogen, noble gases, and natural gas to include semiconductor gases and other hazardous and corrosive gases; and/or improve the uncertainties of the present calibrations.

To measure the impact of NIST gas flow calibration services on the U.S. economy and U.S. manufacturing, NIST welcomes information about the ''leverage'' of NIST calibrations (*i.e.,* cases where a few instruments calibrated by NIST are subsequently used by a commercial laboratory or a flow meter manufacturer to provide traceability and accuracy for a large number of instruments) and ''impact'' of NIST calibrations (*i.e.,* cases where a single calibration has a major impact on a specific commercial, technology, or government application or project).

The following list of topics covers the major areas about which NIST is seeking comments. The listed areas are not intended to limit the topics that may be addressed by respondents so long as they address a topic that would be useful in NIST's planning relative to our offerings of gas flow calibrations. When addressing the topics below, respondents may describe the practices of their organization or organizations with which they are familiar. Providing such information is optional and will not affect NIST's full consideration of the comment.

Topics of Interest

1. Which NIST gas flow calibrations you have purchased, if any, including:

a. If you have purchased calibrations from NIST, whether you purchased from NIST due to convenience, accuracy, cost, customer service, regulatory requirement, or some other reason;

b. If NIST was to terminate the calibration service(s) you presently use, whether you have another source lined

[23] *See* 19 CFR 351.106(c)(2).

up that would meet your requirements; and

c. Whether it would pose a problem to your organization if the calibration service was not available at NIST.

2. How NIST calibration results are applied in your organization, including numerical examples of ''leverage'' to assess the economic impact of NIST flow calibration services. For example: ''Three working standard flow meters periodically calibrated by NIST are the source of calibration traceability for 2,000 flow meters manufactured at our facilities,'' or ''Proficiency testing allows ISO 17025 accreditation of our calibration capabilities that are applied to $1M worth of products annually.''

3. Whether flow calibrations in your organization are traceable to NIST, including:

a. Whether you refer to NIST flow publications or research to support your gas flow measurements; and

b. If not directly traceable to NIST, whether you know how your flow measurements compare to NIST flow standards (for example by comparison against a flow meter traceable to a NIST calibration).

4. Feedback on the cost, availability, turn-around time, business systems, and customer service provided by NIST gas flow calibration services.

5. Whether you purchase gas flow calibrations from another National Metrology Institute (NMI) or from another calibration laboratory, and your organization's experience with this approach.

6. Your opinions about the range, uncertainty, quality and cost of the NIST gas flow calibration services, and whether there are specific, new flow calibration capabilities that NIST should consider offering to better serve your needs. Possibilities include calibrations involving toxic semiconductor gases, multiphase flows, gas mixtures, smaller or larger flows, and wider temperature or pressure ranges. Details about flow ranges and uncertainties of interest, expected frequency of use of the service, and maximum price that you might be willing to pay for the service are also useful.

7. Whether you manufacture and sell gas flow meters or sell calibrations of such meters; if so, whether your meter flow values are traceable to NIST; and, if not NIST, whether you use a secondary laboratory, another NMI, or have your own primary standard(s).

8. Whether there are flow measurement research topics that are not presently being studied that you would like NIST to research, and the potential impact of such research on your organization.

Authority: 15 U.S.C. 272(b) & (c).

Alicia Chambers,

NIST Executive Secretariat.

BILLING CODE 3510–13–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XC209]

Endangered Species; File No. 26268

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Kate Mansfield, Ph.D., University of Central Florida, Biology, 4000 Central Florida Blvd., Bldg. 20, Room 301, Orlando, FL 32816–2368, has applied in due form for a permit to take green (*Chelonia mydas*), hawksbill (*Eretmochelys imbricata*), Kemp's ridley (*Lepidochelys kempii*), leatherback (*Dermochelys coriacea*), and loggerhead (*Caretta caretta*) sea turtles for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before August 29, 2022.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov,* and then selecting File No. 26268 from the list of available applications. These documents are also available upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 26268 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments@noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman or Erin Markin, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant proposes to continue three long-term projects on juvenile, subadult, and adult sea turtle populations in the central Indian River Lagoon (Project 1); Trident Turning Basin, Cape Canaveral Space Force Station (Project 2); and Gulf of Mexico waters offshore Louisiana to western Florida (Project 3). Researchers would assess sea turtle population structure, abundance, distribution, habitat, sex ratios, physiology, genetics, epidemiology, and foraging ecology. For Project 1, up to 150 green, two hawksbill, three Kemp's ridley, one leatherback, and 100 loggerhead sea turtles would be captured by tangle or dip net, marked, photographed, measured, weighed, have cloacal temperature measured, and biologically sampled (blood; skin, tumor, and scute biopsy; gastric lavage; voided feces; and/or cloacal, oral, skin and ocular swabs) prior to release. A subset of loggerhead and green sea turtles may receive two transmitter types (satellite, acoustic, or radio) at a time. For Project 2, up to 135 green, one hawksbill, one Kemp's ridley, one leatherback, and 10 loggerhead sea turtles would be captured by tangle or dip net, marked, photographed, measured, weighed, have cloacal temperature measured, and biologically sampled (blood; skin, tumor, and scute biopsy; gastric lavage; voided feces; and/or cloacal, oral, skin and ocular swabs) prior to release. A subset of green sea turtles may receive two transmitter types (satellite, acoustic, or radio) at a time. For Project 3, up to 25 green, five hawksbill, 25 Kemp's ridley, and five loggerhead sea turtles would be captured by dip net, marked, photographed, measured, weighed, have cloacal temperature measured, biologically sampled (blood; skin, tumor, and scute biopsy; gastric lavage; voided feces; and cloacal, oral, skin and ocular swabs), and outfitted with up to two transmitters types (satellite, acoustic, or radio) at a time prior to release. The permit would be valid for 10 years.

Dated: July 26, 2022.

Julia M. Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID: 0648–XC064]

Taking and Importing of Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; new five-year affirmative finding for Peru.

SUMMARY: The NMFS Assistant Administrator (Assistant Administrator) has issued a new 5-year affirmative finding for the Government of Peru under the Marine Mammal Protection Act (MMPA). This affirmative finding will allow the importation into the United States of yellowfin tuna and yellowfin tuna products harvested in the eastern tropical Pacific Ocean (ETP), in compliance with the Agreement on the International Dolphin Conservation Program (AIDCP), by purse seine vessels operating under Peru's jurisdiction or exported from Peru. NMFS bases the affirmative finding determination on reviews of documentary evidence submitted by the Government of Peru and of information obtained from the Inter-American Tropical Tuna Commission (IATTC).

DATES: This new affirmative finding is effective for the five-year period of April 1, 2022, through March 31, 2027.

FOR FURTHER INFORMATION CONTACT: Justin Greenman, West Coast Region, NMFS, by mail: 501 W Ocean Blvd., Suite 4200, Long Beach, CA 90802, email: *justin.greenman@noaa.gov,* or phone: (562) 980–3264.

SUPPLEMENTARY INFORMATION: The MMPA, 16 U.S.C. 1361 *et seq.,* allows for importation into the United States of yellowfin tuna harvested by purse seine vessels in the ETP from a nation with jurisdiction over purse seine vessels with carrying capacity greater than 400 short tons that harvest tuna in the ETP only if the nation has an ''affirmative finding'' issued by the NMFS Assistant Administrator. *See* Section 101(a)(2)(B) of the MMPA, 16 U.S.C. 1371(a)(2)(B); *see also* 50 CFR 216.24(f)(6)(i). If requested by the government of such a nation, the Assistant Administrator will determine whether to make an affirmative finding based upon documentary evidence provided by the government, the IATTC, or the Department of State.

The affirmative finding process requires that the harvesting nation is meeting its obligations under the AIDCP and its obligations of membership in the IATTC. Every 5 years, the government of the harvesting nation must request a new affirmative finding and submit the required documentary evidence directly to the Assistant Administrator. On an annual basis, NMFS must determine whether the harvesting nation continues to meet the requirements of their 5-year affirmative finding. NMFS does this by reviewing the documentary evidence from the last year. A nation may provide information related to compliance with AIDCP and IATTC measures directly to NMFS on an annual basis or may authorize the IATTC to release the information to NMFS to annually renew an affirmative finding determination without an application from the harvesting nation.

An affirmative finding will be terminated, in consultation with the Secretary of State, if the Assistant Administrator determines that the requirements of 50 CFR 216.24(f) are no longer being met or that a nation is consistently failing to take enforcement actions on violations, thereby diminishing the effectiveness of the AIDCP.

As a part of the affirmative finding process set forth in 50 CFR 216.24(f)(8), the Assistant Administrator considered documentary evidence submitted by the Government of Peru and obtained from the IATTC and has determined that Peru has met the MMPA's requirements to receive a new five-year affirmative finding.

After consultation with the Department of State, the Assistant Administrator issued a new 5-year affirmative finding to Peru, allowing the importation into the United States of yellowfin tuna and products derived from yellowfin tuna harvested in the ETP by purse seine vessels operating under Peru's jurisdiction or exported from Peru. Issuance of a new five-year affirmative finding for Peru does not affect implementation of an intermediary nation embargo under 50 CFR 216.24(f)(9), which applies to exports from a nation that exports to the United States yellowfin tuna or yellowfin tuna products that was subject to a ban on importation into the United States under section 101(a)(2)(B) of the MMPA, 16 U.S.C. 1371(a)(2)(B).

This new affirmative finding for Peru is for the five-year period of April 1, 2022, through March 31, 2027, subject to subsequent annual reviews by NMFS.

Dated: July 26, 2022.

Janet Coit,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

Taking and Importing of Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; affirmative finding annual renewals for Colombia, Ecuador, El Salvador, Guatemala, Mexico, and Spain.

SUMMARY: The NMFS Assistant Administrator (Assistant Administrator) has completed an affirmative finding annual renewal for the Governments of Colombia, Ecuador, El Salvador, Guatemala, Mexico, and Spain (referred to hereafter as ''The Nations'') under the Marine Mammal Protection Act (MMPA). These affirmative findings will continue to allow the importation into the United States of yellowfin tuna and yellowfin tuna products harvested in the eastern tropical Pacific Ocean (ETP) for 1 year, in compliance with the Agreement on the International Dolphin Conservation Program (AIDCP), by purse seine vessels operating under The Nations' jurisdiction or exported from The Nations. NMFS bases the affirmative finding annual renewals on reviews of documentary evidence submitted by the Governments of The Nations and of information obtained from the Inter-American Tropical Tuna Commission (IATTC).

DATES: These affirmative finding annual renewals are effective for the one-year period of April 1, 2022, through March 31, 2023.

FOR FURTHER INFORMATION CONTACT: Justin Greenman, West Coast Region, NMFS, by mail: 501 W Ocean Blvd., Suite 4200, Long Beach, CA 90802, email: *justin.greenman@noaa.gov,* or phone: (562) 980–3264.

SUPPLEMENTARY INFORMATION: The MMPA, 16 U.S.C. 1361 *et seq.,* allows for importation into the United States of yellowfin tuna harvested by purse seine vessels in the ETP from a nation with jurisdiction over purse seine vessels with carrying capacity greater than 400

short tons that harvest tuna in the ETP only if the nation has an ''affirmative finding'' issued by the NMFS Assistant Administrator. *See* Section 101(a)(2)(B) of the MMPA, 16 U.S.C. 1371(a)(2)(B); *see also* 50 CFR 216.24(f)(6)(i). If requested by the government of such a nation, the Assistant Administrator will determine whether to make an affirmative finding based upon documentary evidence provided by the government, the IATTC, or the Department of State.

The affirmative finding process requires that the harvesting nation is meeting its obligations under the AIDCP and its obligations of membership in the IATTC. Every 5 years, the government of the harvesting nation must request a new affirmative finding and submit the required documentary evidence directly to the Assistant Administrator. On an annual basis, NMFS must determine whether the harvesting nation continues to meet the requirements of their 5-year affirmative finding. NMFS does this by reviewing the documentary evidence from the last year. A nation may provide information related to compliance with AIDCP and IATTC measures directly to NMFS on an annual basis or may authorize the IATTC to release the information to NMFS to annually renew an affirmative finding determination without an application from the harvesting nation.

An affirmative finding will be terminated, in consultation with the Secretary of State, if the Assistant Administrator determines that the requirements of 50 CFR 216.24(f) are no longer being met or that a nation is consistently failing to take enforcement actions on violations, thereby diminishing the effectiveness of the AIDCP.

As a part of the affirmative finding process set forth in 50 CFR 216.24(f)(8), for this annual renewal, the Assistant Administrator considered documentary evidence submitted by the Governments of The Nations and obtained from the IATTC and has determined that The Nations have met the MMPA's requirements to receive affirmative finding annual renewals.

After consultation with the Department of State, the Assistant Administrator issued affirmative finding annual renewals to The Nations, allowing the continued importation into the United States of yellowfin tuna and products derived from yellowfin tuna harvested in the ETP by purse seine vessels operating under The Nations' jurisdiction or exported from The Nations. Issuance of affirmative finding annual renewals for The Nations does not affect implementation of an intermediary nation embargo under 50 CFR 216.24(f)(9), which applies to exports from a nation that exports to the United States yellowfin tuna or yellowfin tuna products that was subject to a ban on importation into the United States under section 101(a)(2)(B) of the MMPA, 16 U.S.C. 1371(a)(2)(B).

These affirmative finding annual renewals for The Nations are for the 1-year period of April 1, 2022, through March 31, 2023. The Nations' individual 5-year affirmative findings, which have varying start and end dates, remain valid. Ecuador, Guatemala, Mexico, and Spain's 5-year affirmative findings will remain valid through March 31, 2025. Colombia's 5-year affirmative finding will remain valid through March 31, 2024, and El Salvador's 5-year affirmative finding will remain valid through March 31, 2023, subject to subsequent annual reviews by NMFS.

Dated: July 26, 2022.

National Oceanic and Atmospheric Administration

Public Meeting of the Science Advisory Board

AGENCY: Office of Oceanic and Atmospheric Research (OAR), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda for the meeting of the Science Advisory Board (SAB). The members will discuss issues outlined in the section on Matters to be Considered.

DATES: The meeting is scheduled for Tuesday, August 30, 2022, 9:30 a.m.–5:00 p.m. Eastern Daylight Time (EDT) and Wednesday, August 31, 2022, 9:00 a.m.–12:30 p.m. Eastern Daylight Time (EDT). The time and the agenda topics described below are subject to change. For the latest agenda, please refer to the SAB website: *https://sab.noaa.gov/index.php/current-meetings/.*

ADDRESSES: The August 30–31, 2022 meeting will be held at the Double Tree by Hilton Silver Spring Washington, DC North located at 8777 Georgia Ave., Silver Spring, MD 20910. The link for the webinar registration for the August 30–31, 2022 meeting may be found here: *https://sab.noaa.gov/index.php/current-meetings/.*

FOR FURTHER INFORMATION CONTACT: Dr. Cynthia Decker, Executive Director, SSMC3, Room 11230, 1315 East-West Hwy., Silver Spring, MD 20910; Phone Number: 202–936–5847; Email: *Cynthia.Decker@noaa.gov;* or visit the SAB website at *https://sab.noaa.gov/index.php/current-meetings/.*

SUPPLEMENTARY INFORMATION: The NOAA Science Advisory Board (SAB) was established by a Decision Memorandum dated September 25, 1997, and is the only Federal Advisory Committee with responsibility to advise the Under Secretary of Commerce for Oceans and Atmosphere on strategies for research, education, and application of science to operations and information services. SAB activities and advice provide necessary input to ensure that National Oceanic and Atmospheric Administration (NOAA) science programs are of the highest quality and provide optimal support to resource management.

Status: The August 30–31, 2022 meeting will be open to public participation with a 15-minute public comment period at 4:45 p.m. Eastern Daylight Time (EDT) on Tuesday, August 30, 2022. The SAB expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three minutes. Written comments for the August 30–31, 2022 meeting should be received in the SAB Executive Director's Office by August 18, 2022 to provide sufficient time for SAB review. Written comments received by the SAB Executive Director after this date will be distributed to the SAB, but may not be reviewed prior to the meeting date.

Special Accommodations: This meeting is physically accessible to people with disabilities. Requests for special accommodations may be directed to the Executive Director no later than 12 p.m. on August 18, 2022.

Matters to be Considered: The meeting on August 30–31, 2022 will include the (1) NOAA Update; (2) NOAA Science Update; (3) Review of the Cooperative Institute for Modelling the Earth System (CIMES); (4) NOAA Response to SAB Climate Working Group Report: Advancing Earth System Prediction; (5) Tsunami Science & Technology Advisory Panel Strategic Plan; (6) NOAA Response to SAB Climate Working Group Review of the Climate and Fisheries Initiative Implementation Approach; (7) Updates

from SAB 2022 Work Plan Topics; (8) Environmental Information Services Working Group Report Review of the NOAA Subseasonal to Seasonal (S2S) Report to Congress; (9) NOAA Response to SAB Climate Working Group Review of the Coastal Inundation at Climate Timescales White Paper. Meeting materials, including work products, will be made available on the SAB website: *https://sab.noaa.gov/index.php/current-meetings/.*

Dave Holst,

Chief Financial Officer/Administrative Officer, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

[RTID 0648–XC213]

Marine Mammals; File No. 26170

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Keith Ellenbogen, Blue Reef, 189 Schermerhorn Street, 8E; Brooklyn, NY 11201, in due form for a permit to conduct commercial and educational photography on marine mammals.

DATES: Written, telefaxed, or email comments must be received on or before August 29, 2022.

ADDRESSES: These documents are available upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 26170 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments@noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Courtney Smith, Ph.D., or Amy Hapeman, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to observe, film, and photograph cetaceans and seals within the U.S. northeast Atlantic waters of the U.S., from the Gulf of Maine (including Cape Cod Bay and Stellwagen Bank National Marine Sanctuary) through the New York Bight (Montauk, NY to Cape May, NJ), including the Hudson Canyon. Up to 405 humpback (*Megaptera novaeangliae;* West Indies Distinct Population Segment) and long-finned pilot (*Globicephala melaena*) whales; harbor porpoise (*Phocoena phocoena*); and Atlantic white-sided (*Lagenorhyncus acutus*), bottlenose (*Tursiops truncatus*), long-beaked common (*Delphinus capensis*), Risso's (*Grampus griseus*), short-beaked common (*Delphinus delphis*), and striped (*Stenella coeruleoalba*) dolphins; and up to 675 harbor (*Phoca vitulina*) and gray (*Halichoerus grypus*) seals may be harassed annually from close approaches by marine vessels, experienced swimmers/divers, and during ground surveys for photography and filming purposes. The permit is requested for five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: July 26, 2022.

Julia M. Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

Patent and Trademark Office

[Docket No. PTO–P–2021–0058]

Duties of Disclosure and Reasonable Inquiry During Examination, Reexamination, and Reissue, and for Proceedings Before the Patent Trial and Appeal Board

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice.

SUMMARY: The duty of candor and good faith in dealing with the United States Patent and Trademark Office (USPTO) includes the duty to disclose to the USPTO information material to the patentability of a claimed invention. Each party submitting a paper to the USPTO has an additional duty to perform an inquiry that is reasonable under the circumstances, including reviewing documents to identify information that is material to the patentability of a claimed invention. The USPTO relies on each individual who is subject to these duties to abide by them. The duties are imposed to assist patent examiners and administrative patent judges in evaluating patentability effectively and efficiently. The duties promote robust and reliable patents, and drive competition and economic growth. In the pharmaceutical space, the duties promote robust and reliable patents that incentivize and protect innovation that brings life-saving drugs to the American people while not unnecessarily delaying more affordable generic drugs. This notice is intended to clarify the duties, including as to materials or statements material to patentability or statements made to the USPTO that are inconsistent with statements submitted to the FDA and other governmental agencies.

FOR FURTHER INFORMATION CONTACT: Ali Salimi, Senior Legal Advisor, Office of Patent Legal Administration, Office of the Deputy Commissioner for Patents, at 571–272–0909.

SUPPLEMENTARY INFORMATION:

I. *Background:* On July 9, 2021, President Biden issued an *Executive Order on Promoting Competition in the American Economy,* 86 FR 36987 (2021). President Biden expressed concern that ''too often, patent and other laws have been misused to inhibit or delay—for years and even decades—competition from generic drugs and biosimilars, denying Americans access to lower-cost drugs.'' The President called for action ''to help ensure that the patent system, while incentivizing innovation, does not also unjustifiably delay generic drug and biosimilar competition beyond that reasonably contemplated by applicable law.''

On September 9, 2021, Senator Patrick Leahy and Senator Thom Tillis sent a letter to Mr. Andrew Hirshfeld, Performing the Functions and Duties of the Under Secretary of Commerce for Intellectual Property and Director of the USPTO, requesting that the Office ''take steps to reduce patent applicants'

making inappropriate conflicting statements in submissions to the [USPTO] and other federal agencies.'' The letter provided a specific example in which ''inconsistent statements submitted to the Food and Drug Administration (FDA) to secure approval of a product—asserting that the product is the same as a prior product that is already on the market—can then be directly contradicted by statements made to the [USPTO] to secure a patent on the product.'' The letter noted that such inconsistent statements ''should be cause for rejecting the application and, when made knowingly and with bad intent, potentially other sanctions.''

This notice is part of the USPTO's efforts to put into effect the Administration's goals and address the Senators' concerns. It is also part of the USPTO's ongoing mission to issue robust and reliable patents and to make sure our intellectual property ecosystem works to bring more innovation to impact—in every technological space including the critical pharmaceutical space. This notice clarifies the ''duty of disclosure'' and ''duty of reasonable inquiry'' owed to the USPTO and American public. This notice specifically addresses these duties as they relate to information and statements material to patentability including, but not limited to, those received from or submitted to the FDA and other governmental agencies.

II. *Who Has a Duty to Disclose Material Information:* The duty to disclose applies to matters pending before the USPTO and extends broadly to ''[e]ach individual associated with the filing and prosecution of a patent application'' and ''[e]ach individual associated with the patent owner in a reexamination proceeding.'' 37 CFR 1.56(a) and 1.555(a). For patent applications, including reissue applications, these individuals include each inventor named in the application, each attorney or agent who prepares or prosecutes the application, and ''[e]very other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, the applicant, an assignee, or anyone to whom there is an obligation to assign the application.'' 37 CFR 1.56(c); *see* 37 CFR 1.171. For reexamination proceedings, these individuals include ''the patent owner, each attorney or agent who represents the patent owner, and every other individual who is substantively involved on behalf of the patent owner in a reexamination proceeding.'' 37 CFR 1.555(a).

The duty to disclose also extends to parties and individuals involved in a proceeding before the Patent Trial and Appeal Board (PTAB). According to 37 CFR 42.11(a), ''Parties and individuals involved in the proceeding have a duty of candor and good faith to the Office during the course of a proceeding.'' Not only does the duty apply to each individual associated with a patent application (including a reissue application) or reexamination proceeding that is on appeal to the PTAB, but the duty to disclose also extends to patent owners presenting substitute claims in an inter partes review or post grant review proceeding. ''Under 37 CFR 42.11, all parties have a duty of candor, which includes a patent owner's duty to disclose to the Board information of which the patent owner is aware that is material to the patentability of substitute claims, if such information is not already of record in the case.'' *Lectrosonics, Inc.* v. *Zaxcom, Inc.,* IPR2018–001129, 001130, Paper 15 at 9–10 (PTAB Feb. 25, 2019) (precedential).

III. *What Material Information Must Be Disclosed:* ''[I]nformation is material to patentability when it is not cumulative to information already of record or being made of record in the application, and (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or (2) It refutes, or is inconsistent with, a position the applicant takes in: (i) Opposing an argument of unpatentability relied on by the Office, or (ii) Asserting an argument of patentability.'' 37 CFR 1.56(b). The USPTO holds those individuals subject to this duty to the highest standards. In close cases where the materiality or consistency of the information is in question, the applicant should consider submitting this information to the USPTO. *See* Manual of Patent Examining Procedure (9th ed. Rev. 10.2019) (MPEP) § 2004, item 10.

Specifically, the duty of candor and good faith, and by extension the duty to disclose, applies to positions taken by applicants or parties involving the claimed subject matter. For instance, in PTAB proceedings, parties should not take a position about the patentability of challenged claims that is inconsistent with positions taken in submissions to other Government agencies regarding the same subject matter. *See, e.g.,* Rules of Practice for Trials Before the Patent Trial and Appeal Board and Judicial Review of Patent Trial and Appeal Board Decisions, Final Rule, 77 FR 48612, 48630 (Aug. 14, 2012) (''The scope of the duty [of candor and good faith] is comparable to the obligations toward the tribunal imposed by Rule 11 of the Federal Rules of Civil Procedure.'').

If a party to a USPTO proceeding discovers that an earlier position taken in a submission to the USPTO or another Government agency was incorrect or inconsistent with other statements made by the party, the party must promptly correct the record. *See, e.g., In re Tendler,* Proceeding No. D2013–17 (USPTO Jan. 1, 2014) (suspending a practitioner for four years for failure to correct the written record after learning of inaccuracies in a declaration the practitioner had filed). In the context of prosecution, an applicant must disclose to the USPTO any information that refutes, or is inconsistent with, a position the applicant takes in: (i) opposing an argument of unpatentability relied on by the Office, or (ii) asserting an argument of patentability. *See* 37 CFR 1.56(b)(2). In the context of PTAB proceedings, if the party is or becomes aware of incorrect or inconsistent positions, the party must make the PTAB panel aware of the incorrect or inconsistent positions and must submit the inconsistent information. Patent owners may bring information, including prior art and incorrect or inconsistent positions, to the attention of the USPTO through supplemental examination, *ex parte* reexamination, reissue applications, or submissions under 37 CFR 1.501. During prosecution, third parties may have an opportunity to disclose information to the USPTO through third party submissions under 37 CFR 1.290 and protests under 37 CFR 1.291. After issuance, third parties may disclose information directed to issued patents to the USPTO via submissions under 37 CFR 1.501, in *ex parte* reexamination, or in PTAB trial proceedings. A finding of ''fraud,'' ''inequitable conduct,'' or violation of duty of disclosure through bad faith or intentional misconduct with respect to any claim in an application or patent, renders all the claims thereof unpatentable or invalid. MPEP § 2016.

Patent examiners also have the ability to require submission of information that may be reasonably necessary to properly examine or treat a matter in a pending or abandoned application. 37 CFR 1.105(a)(1). The information that must be submitted to comply with a requirement for information under 37 CFR 1.105 may not be material to patentability in itself under 37 CFR 1.56, but it is necessary to obtain a complete record from which a determination of patentability may be made. MPEP § 704.12(a). Therefore, when an examiner has a reasonable

basis to conclude that an individual identified under 37 CFR 1.56(c) or any assignee has information that would aid in the examination of the application or treatment of some matter, the examiner may require submission of information that is not necessarily material to patentability. This requirement could include statements made or information submitted to other Government agencies such as the FDA. For example, when examining a claim directed to a process of manufacturing a particular drug product that was effectively filed more than one year after FDA approval of the drug product, an examiner may appropriately require an applicant to submit to the USPTO information submitted to the FDA (*e.g.,* in a New Drug Application or Biologics License Application) on how the drug product was manufactured.

IV. *What Is the Duty of Reasonable Inquiry:* ''The presentation to the Office (whether by signing, filing, submitting, or later advocating) of any paper by a party, whether a practitioner or non-practitioner, constitutes a certification under § 11.18(b).'' 37 CFR 1.4(d)(4)(i). Section 11.18(b) includes 11.18(b)(2), which calls for a duty of reasonable inquiry to ensure that the paper is not being presented for any improper purpose, the legal contentions are warranted by law, the allegations and other factual contentions have evidentiary support, and the denials of factual contentions are warranted on the evidence.[1]

Accordingly, each party presenting a paper to the USPTO, whether a practitioner or non-practitioner, has a duty to perform an inquiry that is reasonable under the circumstances. This reasonable inquiry may comprise reviewing documents that are submitted to or received from other Government agencies, including the FDA. If any reviewed document is material to the patentability of a pending matter before the Office, such as a patent application (including a reissue application), a reexamination proceeding, or an issue pending before the PTAB, the party has a duty to submit the information to the USPTO. 37 CFR 1.56, 1.555, 42.11(a); *see* 37 CFR 42.11(c), 11.18(b)(2). A duty of reasonable inquiry may exist based on circumstances known to the party presenting the paper to the USPTO. Failing to inquire when the circumstances warrant it could result in sanctions or other action under 37 CFR 11.18(c), which may include: (1) striking the offending paper; (2) referring a practitioner's conduct to the Director of Enrollment and Discipline for appropriate action; (3) precluding a party or practitioner from submitting a paper, or presenting or contesting an issue; (4) affecting the weight given to the offending paper; or (5) terminating the proceedings in the Office. *See, e.g., In re Hao,* Proceeding No. D2021–14 (USPTO Apr. 27, 2022) (involving disciplinary sanctions predicated on non-compliance with 37 CFR 11.18).

V. *When the Duties of Disclosure and Reasonable Inquiry Arise in Dealings With Other Government Agencies:* Each individual with a duty to disclose, or party with a duty of reasonable inquiry, should ensure that the statements made to the USPTO and other Government agencies, or any statements made on their behalf to other Government agencies regarding the claimed subject matter, are consistent. *See Belcher Pharms., LLC* v. *Hospira, Inc.,* 11 F.4th 1345 (Fed. Cir. 2021) (affirming a district court's determination of inequitable conduct because the patent owner's Chief Science Officer failed to provide to the USPTO submissions he made to the FDA about the prior art that were inconsistent with positions taken before the USPTO during the prosecution of a pending patent application). Furthermore, providing material information to other Government agencies, including the FDA, while simultaneously withholding the same information from the USPTO undermines both the intent and spirit of the duty of disclosure and violates those duties. For example, in *Bruno Independent Living Aids, Inc.* v. *Acorn Mobility Services, Ltd.,* 394 F.3d 1348, 1354 (Fed. Cir. 2005), the U.S. Court of Appeals for the Federal Circuit inferred intent to deceive and found inequitable conduct occurred when an official involved in both the FDA and the USPTO submissions chose to disclose material prior art to the FDA but not to the USPTO.

Activities or documents associated with market testing, marketing, or commercialization by the patent applicant can also be material to patentability, and therefore, when material, should be disclosed to the USPTO. *See GS Cleantech Corp.* v. *Adkins Energy LLC,* 951 F.3d 1310, 1330–1332 (Fed. Cir. 2020) (finding that a district court did not abuse its discretion in reaching its inequitable conduct determination where the district court concluded that the inventors and their lawyers made a deliberate decision to withhold material information from the USPTO regarding an offer for sale and reduction to practice of the claimed invention that would have implicated an on-sale bar to the granting of a patent; the lawyers filed with the USPTO a declaration containing a false statement about the timing of an offer for sale despite having in their possession materials that would call into question the veracity of the statement; and the inventors and lawyers subsequently failed to correct the false declaration). By following the guidance in this notice, it is expected that patent applicants can obtain more reliable patent protection and avoid the findings of inequitable conduct and sanctions noted above.

Similarly, each individual with a duty to disclose, or party with a duty of reasonable inquiry, should review documents it receives from other Government agencies to determine whether the information should be submitted to the USPTO. For example, when a company seeks FDA approval to market a generic drug before the expiration of patents related to the drug, the generic drug application (*e.g.,* an Abbreviated New Drug Application (ANDA)) must contain a ''paragraph IV certification'' that the patents submitted to the FDA by the brand-name drug's sponsor, listed in the FDA's Approved Drug Products with Therapeutic Equivalence Evaluations (the Orange Book), and related to the drug are invalid, are unenforceable, or will not be infringed by the generic product. Except in limited circumstances, notice of a paragraph IV certification must also be communicated to the owner of the patent subject to the certification and to the New Drug Application holder. Such a notice includes a detailed statement providing factual and legal bases for the paragraph IV certification. 21 CFR 314.95(c)(7). Consequently, to assist USPTO staff in evaluating patentability effectively and efficiently, the party receiving a paragraph IV certification should review such documents to determine whether they are material to the patentability of any pending matters before the USPTO, such as pending patent applications, reexamination proceedings, or issues in proceedings pending before the PTAB. If the content

[1] ''To the best of the party's knowledge, information and belief, formed after an inquiry reasonable under the circumstances, (i) The paper is not being presented for any improper purpose, such as to harass someone or to cause unnecessary delay or needless increase in the cost of any proceeding before the Office; (ii) The other legal contentions therein are warranted by existing law or by a nonfrivolous argument for the extension, modification, or reversal of existing law or the establishment of new law; (iii) The allegations and other factual contentions have evidentiary support or, if specifically so identified, are likely to have evidentiary support after a reasonable opportunity for further investigation or discovery; and (iv) The denials of factual contentions are warranted on the evidence, or if specifically so identified, are reasonably based on a lack of information or belief.'' 37 CFR 11.18(b)(2).

of the detailed statement, or other information that is part of the ANDA process, is deemed material to patentability in a pending USPTO matter, then such information must be submitted to the USPTO during the pendency of the matter, to meet the duties of candor and good faith and disclosure under 37 CFR 1.56, 1.555, 42.11(a) or (c), or 11.18(b)(2).

Deliberate schemes or established practices to prevent 37 CFR 1.56(c) individuals from obtaining knowledge of material information is not acting in accordance with candor and good faith under 37 CFR 1.56(a). For example, walling off the patent prosecution practitioners from the attorneys seeking FDA approval, as a way to prevent material information from being exchanged between the practitioners and attorneys, is inappropriate. The U.S. Supreme Court has refused to enforce patents where deliberate steps were taken to suppress material information. *See, e.g., Keystone Driller Co.* v. *Gen. Excavator Co.,* 290 U.S. 240 (1933) (patent owner's suit dismissed where the patent owner paid a third party to keep a prior use secret); *Precision Instruments Mfg. Co.* v. *Auto. Maint. Mach. Co.,* 324 U.S. 806 (1945) (suit dismissed where patent owner actively suppressed evidence of perjury to the USPTO).

Though the FDA compiles paragraph IV certifications and publishes a list on its website, submitting this list to the USPTO does not satisfy the duty of disclosure for any material information submitted with the paragraph IV certification. These lists do not include patent numbers, relevant claims, or an explanation of the basis for the certification. Therefore, information and documents submitted with the paragraph IV certification that are material to patentability or to issues in proceedings pending before the USPTO, including the PTAB, must be submitted directly to the USPTO and as described above, the examiner may appropriately require submission of information concerning the certifications in certain situations.

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

BILLING CODE 3510–16–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds service(s) to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: *Date added to and deleted from the Procurement List:* August 28, 2022.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20024–3243.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 785–6404 or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION:

Additions

On 4/29/2022, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice of proposed additions to the Procurement List. This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the product(s) and service(s) and impact of the additions on the current or most recent contractors, the Committee has determined that the product(s) and service(s) listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501–8506 and 41 CFR 51–2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the product(s) and service(s) to the Government.

2. The action will result in authorizing small entities to furnish the product(s) and service(s) to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501–8506) in connection with the product(s) and service(s) proposed for addition to the Procurement List.

End of Certification

Accordingly, the following service(s) are added to the Procurement List:

Service(s)

Service Type: Facility Support Services
Mandatory for: U.S. Navy, DFAS Command Building, Bratenahl, Ohio
Designated Source of Supply: VGS, Inc., Cleveland, OH
Contracting Activity: DEPT OF THE NAVY, NAVAL FAC ENGINEERING CMD MID LANT

Michael R. Jurkowski,

Acting Director, Business Operations.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed deletions from the Procurement List.

SUMMARY: The Committee is proposing to delete product(s) from the Procurement List that were previously furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: Comments must be received on or before: August 28, 2022.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20024–3243.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 785–6404 or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Deletions

The following product(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):
8465–00–262–5237—Lanyard, Pistol, White
8465–00–965–1705—Lanyard, Pistol, Olive Green

Mandatory Source of Supply: Work, Incorporated, Dorchester, MA
Contracting Activity: DLA TROOP SUPPORT, PHILADELPHIA, PA

Michael R. Jurkowski,

Acting Director, Business Operations.

BILLING CODE 6353–01–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NCCC Service Project Application

AGENCY: Corporation for National and Community Service.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Corporation for National and Community Service, operating as AmeriCorps, has submitted a public information collection request (ICR) entitled NCCC Service Project Application for review and approval in accordance with the Paperwork Reduction Act.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by August 29, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Copies of this ICR, with applicable supporting documentation, may be obtained by calling the Corporation for National and Community Service, Ken Goodson, at 202–489–5766 or by email to *kgoodson@cns.gov.*

SUPPLEMENTARY INFORMATION: The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions;
- Propose ways to enhance the quality, utility, and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments

A 60-day Notice requesting public comment was published in the **Federal Register** on May 23, 2022 at Vol. 87, 3218. This comment period ended July, 23, 2022. Zero public comments were received from this Notice.

Title of Collection: NCCC Service Project Application.

OMB Control Number: 3045–0010. Type of Review: Renewal.

Respondents/Affected Public: Current and prospective AmeriCorps NCCC sponsors.

Total Estimated Number of Annual Responses: 1,800.

Total Estimated Number of Annual Burden Hours: 17,100.

Abstract: The AmeriCorps NCCC Service Project Application is completed by organizations interested in sponsoring an AmeriCorps National Civilian Community Corps (NCCC) team. Each year, AmeriCorps NCCC engages teams of members in projects in communities across the United States. Service projects, which typically last from six to eight weeks, address critical needs in natural and other disasters, infrastructure improvement, environmental stewardship and conservation, energy conservation, and urban and rural development. Members construct and rehabilitate low-income housing, respond to natural disasters, clean up streams, help communities develop emergency plans, and address other local needs.

AmeriCorps has made several changes to the application in an effort to streamline it for users. Based on feedback from stakeholders, the application now has additional project objective options users may select, and the radio buttons have been changed to check boxes to allow users to select as many objectives as they would like. The NCCC Service Project Application was also simplified by deleting the ''Organizational Capacity'' and ''Needs'' narrative pages.

AmeriCorps seeks to renew the current information collection.The revisions are intended to simplify the application process for prospective sponsors. The information collection will otherwise be used in the same manner as the existing application. AmeriCorps also seeks to continue using the current application until the revised application is approved by OMB. The current application is due to expire on 10/31/2022.

Dated: July 26, 2022.

Walter Goodson,

Director, AmeriCorps NCCC.

BILLING CODE 6050–28–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Advisory Committee on Women in the Services; Notice of Federal Advisory Committee Meeting

AGENCY: Under Secretary of Defense for Personnel and Readiness, Department of Defense (DoD).

ACTION: Notice of Federal advisory committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the Defense Advisory Committee on Women in the Services (DACOWITS) will take place.

DATES:

Day 1—Open to the public Tuesday, September 13, 2022 from 8 a.m. to 12:30 p.m.

Day 2—Open to the public Wednesday, September 14, 2022 from 8 a.m. to 12 p.m.

ADDRESSES: The address of the open meeting is the Association of the United States Army Conference Center, located at 2425 Wilson Boulevard, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: COL Seana Jardin, (571) 232–7415 (voice), *seana.m.jardin.mil@mail.mil* (email). Website: *https://dacowits.defense.gov.*

The most up-to-date changes to the meeting agenda can be found on the website.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.140 and 102–3.150.

Availability of Materials for the Meeting: Additional information, including the agenda or any updates to the agenda, is available at the DACOWITS website, *https://dacowits.defense.gov/.* Materials presented in the meeting may also be obtained on the DACOWITS website.

Purpose of the Meeting: The purpose of the meeting is for the DACOWITS to receive briefings and have discussions on topics related to the recruitment, retention, employment, integration, well-being, and treatment of women in the Armed Forces of the United States.

Agenda:

Tuesday, September 13, 2022, from 8 a.m. to 12:30 p.m.—Welcome, Introductions, Announcements, Request for Information Status Update, Briefings, DACOWITS discussion, and a Public Comment Period.

Wednesday, September 14, 2022, from 8 a.m. to 12 p.m.—Welcome, Introductions, Announcements, Briefings, and DACOWITS discussion.

Meeting Accessibility: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, this meeting is open to the public, subject to availability of space, from 8 a.m. to 12:30 p.m. on September 13, 2022 and 8 a.m. to 12 p.m. on September 14, 2022.

Special Accommodations: Individuals requiring special accommodations to access the public meeting should contact Mr. Robert Bowling no later than Tuesday, September 6, 2022 so that appropriate arrangements can be made.

Written Statements: Pursuant to 41 CFR 102–3.140, and section 10(a)(3) of the FACA, interested persons may submit a written statement to the DACOWITS. Individuals submitting a written statement must submit their statement no later than 5 p.m., Tuesday, September 6, 2022 to Mr. Robert Bowling (703) 380–0116 (voice) or to *robert.d.bowling1.mil@mail.mil* (email). Mailing address is 4800 Mark Center Drive, Suite 04J25–01, Alexandria, VA 22350. If members of the public are interested in making an oral statement, a written statement must be submitted. If a statement is not received by Tuesday, September 6, 2022, prior to the meeting, which is the subject of this notice, then it may not be provided to or considered by the DACOWITS during this quarterly business meeting. After reviewing the written statements, the Chair and the Designated Federal Officer (DFO) will determine if the requesting persons are permitted to make an oral presentation The DFO will review all timely submissions with the DACOWITS Chair and ensure they are provided to the members of the DACOWITS.

Dated: July 25, 2022.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9874–01–OW]

Notice of Availability of the Deepwater Horizon Oil Spill Texas Trustee Implementation Group Final Restoration Plan/Environmental Assessment #2: Restoration of Wetlands, Coastal, and Nearshore Habitats; Nutrient Reduction; Oysters; Sea Turtles; and Birds and Finding of No Significant Impact

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: In accordance with the Oil Pollution Act of 1990 (OPA) and the National Environmental Policy Act (NEPA), the Federal and State natural resource trustee agencies for the Texas Trustee Implementation Group (Texas TIG) prepared the Final Restoration Plan/Environmental Assessment #2: Restoration of Wetlands, Coastal, and Nearshore Habitats; Nutrient Reduction; Oysters; Sea Turtles; and Birds (Final RP/EA #2). The Final RP/EA #2 describes and, in conjunction with the associated Finding of No Significant Impact (FONSI), selects thirteen restoration project alternatives considered by the Texas TIG to restore natural resources and ecological services injured or lost as a result of the *Deepwater Horizon* oil spill. The Texas TIG evaluated these alternatives in accordance with the OPA, including

criteria set forth in the OPA natural resource damage assessment (NRDA) regulations, and evaluated the environmental consequences of the restoration alternatives in accordance with the NEPA. The selected projects are consistent with the restoration alternatives selected in the Deepwater Horizon Oil Spill: Final Programmatic Damage Assessment and Restoration Plan and Final Programmatic Environmental Impact Statement (PDARP/PEIS). The Federal Trustees of the Texas TIG have determined that implementation of the Final RP/EA #2 is not a major Federal action significantly affecting the quality of the human environment within the context of the NEPA. They have concluded a FONSI is appropriate, and, therefore, an Environmental Impact Statement will not be prepared. This notice informs the public of the approval and availability of the Final RP/EA #2 and FONSI.

ADDRESSES: *Obtaining Documents:* You may download the Final RP/EA #2 and FONSI at *https://www.gulfspillrestoration.noaa.gov/restoration-areas/texas.* Alternatively, you may request a compact disc (CD) of the Final RP/EA #2 and FONSI (see **FOR FURTHER INFORMATION CONTACT** section). You may also view the Final RP/EA #2 and FONSI at the following locations:

SUPPLEMENTARY INFORMATION:

Introduction

On April 20, 2010, the mobile offshore drilling unit *Deepwater Horizon,* which was being used to drill a well for BP Exploration and Production, Inc. (BP), in the Macondo prospect (Mississippi Canyon 252–MC252), experienced a significant explosion, fire, and subsequent sinking in the Gulf of Mexico, resulting in the release of an unprecedented volume of oil and other discharges from the rig and from the wellhead on the seabed. The *Deepwater Horizon* oil spill is the largest offshore oil spill in U.S. history, discharging millions of barrels of oil over a period of 87 days. The Trustees conducted the natural resource damage assessment for the *Deepwater Horizon* oil spill under the OPA. Under the OPA, Federal and State agencies act as trustees on behalf of the public to assess natural resource injuries and losses and to determine the actions required to compensate the public for those injuries and losses. The OPA further instructs the designated trustees to develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the injured natural resources under their trusteeship, including the loss of use and services from those resources from the time of injury until the time restoration to baseline (*i.e.,* the resource quality and conditions that would exist if the spill had not occurred) is complete.

The *Deepwater Horizon* oil spill Trustees are:

- U.S. Environmental Protection Agency (EPA);
- U.S. Department of the Interior (DOI), as represented by the National Park Service, U.S. Fish and Wildlife Service, and Bureau of Land Management;
- National Oceanic and Atmospheric Administration (NOAA), on behalf of the U.S. Department of Commerce;
- U.S. Department of Agriculture (USDA);
- State of Texas Parks and Wildlife Department (TPWD), General Land Office (TGLO), and Commission on Environmental Quality (TCEQ);
- State of Louisiana Coastal Protection and Restoration Authority, Oil Spill Coordinator's Office, Department of Environmental Quality, Department of Wildlife and Fisheries, and Department of Natural Resources;
- State of Mississippi Department of Environmental Quality;
- State of Alabama Department of Conservation and Natural Resources and Geological Survey of Alabama; and
- State of Florida Department of Environmental Protection and Fish and Wildlife Conservation Commission.

On April 4, 2016, the Trustees reached and finalized a settlement of their natural resource damage claims with BP in a Consent Decree approved by the United States District Court for the Eastern District of Louisiana. Pursuant to that Consent Decree, restoration projects in the Texas Restoration Area are chosen and managed by the Texas TIG. The Texas TIG is composed of the following Trustees: TPWD, TGLO, TCEQ, EPA, DOI, NOAA, and USDA.

Background

A Notice of Availability of the Deepwater Horizon Oil Spill Texas Trustee Implementation Group Draft Restoration Plan/Environmental Assessment #2: Restoration of Wetlands, Coastal, and Nearshore Habitats; Nutrient Reduction; Oysters; Sea Turtles; and Birds (Draft RP/EA #2) was published in the **Federal Register** at 87 FR 10787 on February 25, 2022. The Texas TIG hosted a public webinar on March 9, 2022, and the public comment period for the Draft RP/EA #2 closed on March 28, 2022. In the Draft RP/EA #2, the Texas TIG evaluated eighteen restoration project alternatives in accordance with the OPA and the NEPA. Of these restoration project alternatives, thirteen were identified as preferred, and five were identified as non-preferred. The Draft RP/EA #2 also evaluated a no-action alternative. The Texas TIG considered the public comments received on the Draft RP/EA #2 which informed the Texas TIG's analyses and selection of thirteen restoration projects for implementation in the Final RP/EA #2. A summary of the public comments received and the Trustees' responses to those comments are included in Chapter 7 of the Final RP/EA #2.

Overview of the Final RP/EA

The Final RP/EA #2 is being released in accordance with the OPA, its NRDA implementing regulations, and the NEPA. In the Final RP/EA #2, the Texas TIG selects the following preferred project alternatives for each restoration type:

Wetlands, Coastal, and Nearshore Habitats

- Bird Island Cove Habitat Restoration—Construction;
- Bahia Grande Channel F Hydrologic Restoration;
- Follets Island Habitat Acquisition Phase 2; and
- Galveston Island Habitat Acquisition.

Nutrient Reduction

- Petronila Creek Constructed Wetlands Planning; and
- Petronila Creek Watershed Nutrient Reduction Initiative.

Oysters

- Landscape Scale Oyster Restoration in Galveston Bay.

Sea Turtles

- Upper Texas Coast Sea Turtle Rehabilitation Facility; and
- Reducing Sea Turtle Mortality through Removal of Illegal Fishing Gear.

Birds

- Laguna Vista Rookery Island

Habitat Protection;
- Jones Bay Oystercatcher Habitat Restoration;
- San Antonio Bay Bird Island; and
- Texas Breeding Shorebird and Seabird Stewardship.

The total estimated cost of the selected restoration projects is approximately $39 million. The Texas TIG has examined the injuries assessed by the *Deepwater Horizon* Trustees and evaluated restoration alternatives to address the injuries. In the Final RP/EA #2, the Texas TIG presents to the public the Texas TIG's most recent plan to restore natural resources and ecological services injured or lost as a result of the *Deepwater Horizon* oil spill. Additional restoration planning for the Texas Restoration Area will continue.

Administrative Record

The documents comprising the Administrative Record for the Final RP/EA #2 and FONSI can be viewed electronically at *https://www.doi.gov/deepwaterhorizon/adminrecord* under folder 6.5.7.2.2.

Authority

The authority for this action is the OPA (33 U.S.C. 2701 *et seq.*), its implementing NRDA regulations found at 15 CFR part 990, and the NEPA (42 U.S.C. 4321 *et seq.*).

Benita Best-Wong,

Deputy Assistant Administrator, Office of Water.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2011–0234; FRL–10101–01–OMS]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Petroleum Refineries (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), NESHAP for Petroleum Refineries (EPA ICR Number 1692.13, OMB Control Number 2060–0340), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through July 31, 2021. Public comments were previously requested via the **Federal Register** on May 12, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 29, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2011–0234, online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564–2970; fax number: (202) 564–0050; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov,* or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: Owners and operators of affected facilities at petroleum refineries are required to comply with reporting and record keeping requirements for the

General Provisions (40 CFR part 63, subpart A), as well as the specific requirements at 40 CFR part 63, subpart CC. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Petroleum refineries that are major sources of hazardous air pollutants (HAP).

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart CC).

Estimated number of respondents: 142 (total).

Frequency of response: Initially, quarterly, semiannually, and annually.

Total estimated burden: 614,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $98,000,000 (per year), which includes $32,600,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates:

This ICR incorporates the burden from both ICR 1692.10 and ICR 1692.12, which detail the additional burden to petroleum refineries from the December 1, 2015 (80 FR 75178) and November 18, 2018 (83 FR 60696) amendments to the rule, respectively. The 2015 rule amendments added new recordkeeping and reporting requirements for delayed coking unit vents, flares used as control devices, and fenceline monitoring, as well as additional requirements for storage vessels. The 2018 rule amendments revised the recordkeeping requirements for maintenance vents associated with equipment containing less than 72 lbs of VOC. This ICR accounts for the full burden of the current rule and reflects an increase in burden hours and responses.

This ICR, by in large, reflects the on-going burden and costs for existing facilities, with the exception of a small number of facilities with reconstructed units that must meet initial compliance requirements. The burden in this ICR accounts for implementation of the 2015 amendments, which have been in effect for more than three years. The previous ICR reflected those burdens and costs associated with the initial activities for subject facilities, such as purchasing monitoring equipment and establishing recordkeeping systems. As such, the capital/startup costs as calculated in section 6(b)(iii) in this ICR have decreased compared with the costs in the previous ICRs (ICR 1692.10 and ICR 1692.12). In the next three years, the ongoing O&M costs for affected existing facilities at refineries from the 2015 amendments have been adjusted to include the O&M costs for pressure relief valves to address API/APEM comments. In addition, this ICR also adjusts the estimated number of Group 1 storage vessels subject to requirements from 9 to 12 for each facility, per consideration of comments by API/APFM in a letter dated February 14, 2019 and confirmed through Agency analysis.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Municipal Solid Waste Landfills (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), NESHAP for Municipal Solid Waste Landfills (EPA ICR Number 1938.08, OMB Control Number 2060–0505) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through July 31, 2022. Public comments were previously requested via the **Federal Register** on April 13, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before August 29, 2022.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OAR–2021–0097, to EPA using *https://www.regulations.gov/* (our preferred method), by email to *a-and-r-docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

The EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Muntasir Ali, Sector Policies and Program Division (D243–05), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina, 27711; telephone number: (919) 541–0833; email address: *ali.muntasir@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at *https://www.regulations.gov* or in person at the EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit *http://www.epa.gov/dockets.*

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Municipal Solid Waste Landfills (40 CFR part 63, subpart AAAA) apply to existing and new municipal solid waste (MSW) landfills that have accepted waste since November 8, 1987 or have additional capacity for waste deposition, including those that operate as bioreactors, and the landfill either: (1) is a major source or is collocated with a major source; or (2) is an area source with a design capacity of 2.5 million megagrams (Mg) and 2.5 million cubic meters (m^3), and emits either equal to or greater than 50 tons per year of non-methane organic compounds (NMOC). In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of any period during which the monitoring system is inoperative. These notifications, reports, and records are

essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: 5900–522.

Respondents/affected entities: Municipal solid waste (MSW) landfills.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart AAAA).

Estimated number of respondents: 1,169 (total).

Frequency of response: Annual, semi-annual.

Total estimated burden: 35,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $3,290,000 (per year), includes $11,100 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a small decrease in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to several considerations. The regulations have been amended in the past three years. The March 26, 2020 amendments revised NESHAP Subpart AAAA, NSPS Subpart XXX and EG Subpart Cf to allow affected sources to demonstrate compliance with landfill gas control, operating, monitoring, recordkeeping, and reporting requirements by following the corresponding requirements in the MSW Landfills NESHAP, harmonizing the control requirements across all of the landfill rules. The 2020 amendments removed the SSM requirements from Subpart AAAA, resulting in a decrease in labor burden. The 2020 amendments added a new semiannual wet landfill monitoring report requirement, resulting in an increase in burden. Since the 2020 amendments also added an annual wet landfill monitoring report requirement to Subparts Cf and XXX, the additional burden to Subpart AAAA sources for this report consists of one additional report per year. The growth rate for this industry is low (two new landfills per year), resulting in a small increase in burden. There are no changes in the capital/startup or operation and maintenance (O&M) costs. The labor burden for re-familiarizing with the regulatory requirements each year was increased from 1 hour to 5 hours, so that the labor burden for this requirement is consistent with that of other NESHAPs. These changes resulted in a small decrease in labor burden (hours), and a small increase in labor costs, resulting in a small increase in costs from the previous ICR.

Courtney Kerwin,

Director, Regulatory Support Division.

BILLING CODE P

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–0283; Docket No. 2022–0001; Sequence No. 4]

Submission for OMB Review; Contractor Information Worksheet; GSA Form 850

AGENCY: Identity, Credential, and Access Management (ICAM) Division, Office of Security, Office of Mission Assurance (OMA), General Services Administration (GSA).

ACTION: Notice of request for comments regarding an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve a previously approved information collection requirement, with changes, expanding the coverage of the information collection of the Contractor Information Worksheet; GSA Form 850. GSA requires OMB approval for this collection to make determinations on granting unescorted physical access to GSA-controlled facilities and/or logical access to GSA-controlled information systems. The approval is critical for GSA to continue following contractor onboarding processes required for working on GSA contracts.

DATES: Submit comments on or before August 29, 2022.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments''; or by using the search function.

FOR FURTHER INFORMATION CONTACT: Mr. Phil Ahn, Deputy Director, OMA Identity Credential and Access Management Division, GSA, telephone 202–501–2447 or via email at *phillip.ahn@gsa.gov.*

SUPPLEMENTARY INFORMATION:

A. Purpose

The U.S. Government conducts criminal checks to establish that applicants or incumbents working for the Government under contract may have unescorted access to federally controlled facilities. GSA uses the Contractor Information Worksheet; GSA Form 850, and digitally captured fingerprints to conduct an FBI National Criminal Information Check (NCIC) for each contractor's physical access determination to GSA-controlled facilities and/or logical access to GSA-controlled information systems. Manual fingerprint card SF–87 is used for exception cases such as contractor's significant geographical distance from fingerprint enrollment sites.

The Office of Management and Budget (OMB) Guidance M–05–24 for Homeland Security Presidential Directive (HSPD) 12, authorizes Federal departments and agencies to ensure that contractors have limited/controlled access to facilities and information systems. GSA Directive CIO P 2181.1 Homeland Security Presidential Directive-12, Personal Identity Verification and Credentialing (available at *http://www.gsa.gov/hspd12*), states that GSA contractors must undergo a minimum of an FBI National Criminal Information Check (NCIC) to receive unescorted physical access to GSA-controlled facilities and/or logical access to GSA-controlled information systems.

Contractors' Social Security Number is needed to keep records accurate, because other people may have the same name and birth date. Executive Order 9397, Numbering System for Federal Accounts Relating to Individual Persons, also allows Federal agencies to use this number to help identify individuals in agency records.

B. Annual Reporting Burden

Respondents: 25,000.
Responses per Respondent: 1.
Total Annual Responses: 25,000.
Hours per Response: .25.
Total Burden Hours: 6,250.

C. Public Comments

A 60-day notice published in the **Federal Register** at 87 FR 23863 on April 21, 2022. No comments were received.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the GSA Regulatory Secretariat Division, by calling 202–501–4755 or emailing *GSARegSec@gsa.gov.* Please cite OMB Control No. 3090–0283, Contractor Information Worksheet; GSA Form 850 in all correspondence. The form can be downloaded from the GSA Forms Library at *http://www.gsa.gov/forms.* Type GSA 850 in the form search field.

Beth Anne Killoran,

Deputy Chief Information Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Board of Scientific Counselors, National Center for Injury Prevention and Control (BSC, NCIPC)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the CDC announces the following meeting for the Board of Scientific Counselors, National Center for Injury Prevention and Control (BSC, NCIPC or Board). This meeting is partially open to the public. There will be 15 minutes allotted for public comments at the end of the open session from 1:00 p.m. to 1:15 p.m., EDT.

DATES: The meeting will be held on August 23, 2022, from 11:00 a.m. to 1:15 p.m., EDT (OPEN); and from 1:30 p.m. to 4:30 p.m., EDT (CLOSED).

ADDRESSES: Open Session: Webinar, Atlanta, Georgia. All participants must register using the link provided to attend the open meeting: *https://dceproductions.zoom.us/meeting/register/tZYtd-iurzIvHNDz3Nb2Kl4NqksXHAhcwZnV.*

Closed Session: Teleconference.

FOR FURTHER INFORMATION CONTACT: Arlene Greenspan, DrPH, MPH, PT, Associate Director for Science, NCIPC, CDC, 4770 Buford Highway, NE, Mailstop S–1069, Atlanta, Georgia 30341; Telephone: (770) 488–1279; Email: *ncipcbsc@cdc.gov.*

SUPPLEMENTARY INFORMATION: Portions of the meeting referenced above will be closed to the public in accordance with provisions set forth in Section 552b(c)(4) and (6), Title 5 U.S.C., and the Determination of the Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer,

CDC, pursuant to Public Law 92–463 (5 U.S.C. app. 2).

Purpose: The Board will: (1) conduct, encourage, cooperate with, and assist other appropriate public health authorities, scientific institutions, and scientists in the conduct of research, investigations, experiments, demonstrations, and studies relating to the causes and strategies related to the prevention of injury and violence; (2) assist States and other entities in preventing intentional and unintentional injuries and in promoting health and well-being; and (3) conduct and assist in research and control activities related to injury.

The BSC, NCIPC makes recommendations regarding policies, strategies, objectives, and priorities, and reviews progress toward injury and violence prevention. The Board provides advice on the appropriate balance of intramural and extramural research, and guidance on the needs, structure, progress, and performance of intramural programs. The Board also provides guidance on extramural scientific program matters, including the: (1) review of extramural research concepts for funding opportunity announcements; (2) conduct of Secondary Peer Review of extramural research grant applications, cooperative agreement applications, and contract applications received in response to funding opportunity announcements as they relate to the Center's programmatic balance and mission; (3) submission of secondary review recommendations to the Center Director of applications to be considered for funding support; (4) review of research portfolios; and (5) review of program proposals.

Matters To Be Considered: The open session of the meeting will include discussions on an NCIPC update on Motor Vehicle Injury Prevention Research Priorities and on an NCIPC presentation on new research priorities in Drowning Prevention Research. The closed session of the meeting will focus on the Secondary Peer Review of extramural research grant applications received in response to four (4) Notices of Funding Opportunities (NOFOs): (1) RFA–CE–22–009—''Rigorous Evaluation of Community-Level Substance Use and Overdose Prevention Frameworks that Incorporate ACE-Related Prevention Strategies''; (2) RFA–CE–22–010—''Rigorous Evaluation of Strategies to Prevent Overdose through Linking People with Illicit Substance Use Disorders to Recovery Support Services''; (3) RFA–CE–22–011—''Understanding Polydrug Use Risk and Protective Factors, Patterns, and Trajectories to Prevent Drug Overdose''; and (4) RFA–CE–22–013—''Rigorous Evaluation of Community-Centered Approaches for the Prevention of Community Violence.'' Agenda items are subject to change as priorities dictate.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Solicitation of Nominations for Appointment to the Lead Exposure and Prevention Advisory Committee (LEPAC)

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC) is soliciting nominations for membership on the LEPAC. The LEPAC is composed of 15 Federal and non-Federal experts in fields associated with lead screening, prevention of lead exposure, and services for individuals and communities affected by lead exposure. Nominations are being sought for individuals with expertise in the fields of epidemiology, toxicology, mental health, pediatrics, early childhood education, special education, diet and nutrition, and environmental health. Members may be invited to serve for three-year terms. Selection of members is based on candidates' qualifications to contribute to the accomplishment of LEPAC objectives.

DATES: Nominations for membership on the LEPAC must be received no later than November 4, 2022. Packages received after this time will not be considered for the current membership cycle.

ADDRESSES: All nominations should be emailed to *LEPAC@cdc.gov.*

FOR FURTHER INFORMATION CONTACT: Paul Allwood, Ph.D., M.P.H., Designated Federal Officer, National Center for Environmental Health, CDC, 4770 Buford Highway, Atlanta, GA, 30329–4018, 770–488–6774, *PAllwood@cdc.gov.*

SUPPLEMENTARY INFORMATION: The members of this Committee are selected by the Secretary of the U.S. Department of Health and Human Services (HHS). The Committee's objective is to provide advice and recommendations to the Secretary, HHS and the Director, Centers for Disease Control and Prevention/Administrator, Agency for Toxic Substances and Disease Registry on a range of activities to include: (1) Review of Federal programs and services available to individuals and communities exposed to lead; (2) review of the current research on lead exposure to identify additional research needs; (3) review of and identification of best practices, or the need for best practices regarding lead screening and the prevention of lead exposure; (4) identification of effective services, including services relating to healthcare, education, and nutrition for individuals and communities affected by lead exposure and lead poisoning, including in consultation with, as appropriate, the lead exposure registry as established in Public Law 114–322 Section 2203(b) (42 U.S.C. 300j–27); and (5) undertaking of any other review or activities that the Secretary determines to be appropriate.

Annually as determined necessary by the Secretary or as required by Congress, the Committee shall submit a report to include: (1) An evaluation of the effectiveness of the Federal programs and services available to individuals and communities exposed to lead; (2) an evaluation of additional lead exposure research needs; (3) an assessment of any effective screening methods or best practices used or developed to prevent or screen for lead exposure; (4) input and recommendations for improved access to effective services relating to health care, education, or nutrition for individuals and communities impacted by lead exposure; and (5) any other recommendations for communities affected by lead exposure, as appropriate.

At least half of the voting committee members will consist of Federal representatives from a range of agencies that may include the Department of Housing and Urban Development; the Environmental Protection Agency; the Consumer Product Safety Commission; the Centers for Medicare and Medicaid Services; the Health Resources and Services Administration; the Food and Drug Administration; the U.S. Department of Agriculture; the Occupational Safety and Health

Administration; the National Institute of Environmental Health Sciences; the U.S. Geological Survey; and such additional federal, state, tribal, and local public and private officials as the Secretary deems necessary for the committee to carry out its function. The rest of the voting committee members will consist of non-Federal members. Only non-Federal voting members are being solicited with this announcement.

The U.S. Department of Health and Human Services policy stipulates that committee membership be balanced in terms of points of view represented and the committee's function.

Appointments shall be made without discrimination on the basis of age, race, ethnicity, gender, sexual orientation, gender identity, HIV status, disability, and cultural, religious, or socioeconomic status. Nominees must be U.S. citizens and cannot be full-time employees of the U.S. Government. Current participation on federal workgroups or prior experience serving on a federal advisory committee does not disqualify a candidate; however, HHS policy is to avoid excessive individual service on advisory committees and multiple committee memberships.

Committee members are Special Government Employees, requiring the filing of financial disclosure reports at the beginning and annually during their terms. CDC reviews potential candidates for LEPAC membership each year and provides a slate of nominees for consideration to the Secretary of HHS for final selection. HHS notifies selected candidates of their appointment as soon as the HHS selection process is completed. Note that the need for different expertise varies from year to year and a candidate who is not selected in one year may be reconsidered in a subsequent year. Candidates should submit the following items:

- Current curriculum vitae, including complete contact information (telephone numbers, mailing address, email address).
- At least one letter of recommendation from person(s) not employed by the U.S. Department of Health and Human Services. (Candidates may submit letter(s) from current HHS employees if they wish, but at least one letter must be submitted by a person not employed by an HHS agency (*e.g.,* CDC, NIH, FDA, etc.)

Nominations may be submitted by the candidate him- or herself or by the person/organization recommending the candidate. The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers CMS–10464]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by August 29, 2022.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension of a currently approved information collection; *Title of Information Collection:* Agent/Broker Data Collection in Federally-Facilitated Health Insurance Exchanges; *Use:* The Patient Protection and Affordable Care Act, Public Law 111–148, enacted on March 23, 2010, and the Health Care and Education Reconciliation Act, Public Law 111–152, enacted on March 30, 2010 (collectively, ''Affordable Care Act''), expands access to health insurance for individuals and employees of small businesses through the establishment of new Affordable Insurance Exchanges (Exchanges), also called Marketplaces, including the Small Business Health Options Program (SHOP).

The Centers for Medicare & Medicaid Services (CMS) recognizes the longstanding role that agents/brokers have played in connecting individuals and small businesses with health insurance products. Section 1312(e) of

the Affordable Care Act and 45 CFR 155.220(a)(1) expands the role of agents/brokers by permitting them to enroll qualified individuals or small employers/employees in qualified health plans (QHPs) through the Exchanges, and assist individuals in applying for Advance Premium Tax Credits (APTCs) and Cost Sharing Reductions (CSRs). To participate as facilitators to enrollment, agents/brokers must register with the FFE, complete a training course covering eligibility and enrollment criteria for assisting in QHP enrollment, and sign agreements that formalize their understanding and commitment to adhere to the rules of the program. This requirement is specific to the FFE and does not automatically apply to State-based Exchanges (SBEs). This ICR serves as the formal request for renewal of the existing data collection. *Form Number:* CMS–10464 (OMB control number: 0938–1204); *Frequency:* Annually; *Affected Public:* Private Sector (Business or other for-profits) *Number of Respondents:* 64,000; *Number of Responses:* 64,000; *Total Annual Hours:* 15,360. (For questions regarding this collection contact Madeline Pellish at 301–492–4390).

Dated: July 26, 2022.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–N–0766]

Hospira, Inc., et al.; Withdrawal of Approval of 21 Abbreviated New Drug Applications; Correction

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; correction.

SUMMARY: The Food and Drug Administration (FDA) is correcting a notice that appeared in the **Federal Register** on May 20, 2022. The document announced the withdrawal of approval (as of June 21, 2022) of 21 abbreviated new drug applications (ANDAs) from multiple applicants. The document indicated that FDA was withdrawing approval of the following ANDAs after receiving withdrawal requests from Bionpharma Inc., 600 Alexander Rd., Suite 2–4B, Princeton, NJ 08540: ANDA 065301, Cefadroxil Tablets, Equivalent to (EQ) 1 gram (g) base; ANDA 065307, Cefadroxil Oral Suspension, EQ 250 milligrams (mg) base/5 milliliters (mL) and EQ 500 mg base/5 mL; ANDA 065309, Cefadroxil Capsules, EQ 500 mg base; ANDA 065326, Cephalexin Oral Suspension, EQ 125 mg base/5 mL and EQ 250 mg base/5 mL; from Sunny Pharmtech Inc., 175 SW 166th Ave., Pembroke Pines, FL 33027: ANDA 203581, Glyburide Tablets, 1.25 mg, 2.5 mg, and 5 mg; and from Unicorn Pharmaceuticals, 5 Links Circle, Durham, NC, 27707: ANDA 204137, Omeprazole and Sodium Bicarbonate Capsules, 20 mg; 1.1 g. Before FDA withdrew the approval of these ANDAs, Bionpharma Inc., Sunny Pharmtech Inc., and Unicorn Pharmaceuticals informed FDA that they did not want the approval of the ANDAs withdrawn. Because Bionpharma Inc. timely requested that approval of ANDAs 065301, 065307, 065309, and 065326 not be withdrawn, the approvals are still in effect. Because Sunny Pharmtech Inc. timely requested that ANDA 203581 not be withdrawn, the approval is still in effect. Because Unicorn Pharmaceuticals timely requested that ANDA 204137 not be withdrawn, the approval is still in effect.

FOR FURTHER INFORMATION CONTACT: Martha Nguyen, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 1676, Silver Spring, MD 20993–0002, 240–402–6980, *Martha.Nguyen@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In the **Federal Register** of Friday, May 20, 2022 (87 FR 30962), in FR Doc. 2022–10924, the following correction is made:

On page 30963, in the table, the entries for ANDAs 065301, 065307, 065309, 065326, 203581, and 204137 are removed.

Dated: July 25, 2022.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Special Diabetes Program for Indians

Announcement Type: New.

Funding Announcement Number: HHS–2023–IHS–SDPI–0001.

Assistance Listing (Catalog of Federal Domestic Assistance or CFDA) Number: 93.237.

Key Dates

Application Deadline Date: October 7, 2022.

Earliest Anticipated Start Date: January 1, 2023.

I. Funding Opportunity Description

Statutory Authority

The Indian Health Service (IHS) is accepting applications for the Special Diabetes Program for Indians (SDPI—formerly Community-Directed SDPI). This program is authorized under the Snyder Act, 25 U.S.C. 13; the Transfer Act, 42 U.S.C. 2001(a); and section 330C of the Public Health Service Act, codified at 42 U.S.C. 254c–3. This program is described in the Assistance Listings located at *https://sam.gov/content/home/* (formerly known as the CFDA) under 93.237.

Background

Diabetes is a complex and costly chronic disease that requires tremendous long-term efforts to prevent and treat. Although diabetes is a nationwide public health problem, American Indian/Alaska Native (AI/AN) people are disproportionately affected. In 2019, 14.5 percent of AI/AN people aged 18 years or older had diagnosed diabetes, compared to 7.4 percent of non-Hispanic white people [CDC, 2021. *https://www.cdc.gov/diabetes/data/statistics-report/diagnosed-diabetes.html*]. In addition, AI/AN people have higher rates of diabetes-related morbidity and mortality than the general U.S. population [O'Connell, 2010 (*https://diabetesjournals.org/care/article/33/7/1463/39326/Racial-Disparities-in-Health-StatusA-comparison-of*); Cho, 2014 (*http://ajph.aphapublications.org/doi/full/10.2105/AJPH.2014.301968*)]. Strategies to address the prevention and treatment of diabetes in AI/AN communities are urgently needed.

In response to the burgeoning diabetes epidemic among AI/AN people, Congress established the SDPI through the Balanced Budget Act of 1997. SDPI is a $150 million per year program that provides awards for diabetes treatment and prevention services. The IHS administers SDPI, with programmatic oversight provided by the IHS Division of Diabetes Treatment and Prevention (DDTP).

Purpose

The purpose of this program is to provide diabetes treatment and/or prevention activities and/or services (also referred to as ''activities/services'') for AI/AN communities. Awardees will implement one SDPI Diabetes Best

Practice (also referred to as ''Best Practice'') and report data on the Best Practice's Required Key Measure (RKM). Awardees may also implement other activities/services based on diabetes-related community needs and develop an evaluation plan. Activities/services will be aimed at reducing the risk of diabetes in at-risk individuals, providing high quality care to those with diagnosed diabetes, and/or reducing the complications of diabetes.

II. Award Information

Funding Instrument—Cooperative Agreement

Estimated Funds Available

The total funding identified for fiscal year (FY) 2023 is approximately $136 million. Individual award amounts for the first budget year are anticipated to be between $12,500 and $7.5 million.

The funding formula which determines the funds available to each IHS area has been determined through Tribal consultation. Within each area, awardee Tribes provide input on the formula which determines the amount of funding available for each successful applicant.

- Current SDPI awardees should budget for the same amount as they received in FY 2022. However, funding amounts may change. See the paragraph below for additional information.
- New SDPI award applicants should apply for a $12,500 base amount.

The funding available for competing and subsequent continuation awards issued under this announcement is subject to the availability of appropriations and budgetary priorities of the Agency. The IHS is under no obligation to make awards to applicants selected for funding under this announcement.

Anticipated Number of Awards

Approximately 325–450 awards will be issued under this program announcement.

Period of Performance

The period of performance is for 5 years.

Cooperative Agreement

Cooperative agreements awarded by the Department of Health and Human Services (HHS) are administered under the same policies as grants. However, the funding agency, IHS, is anticipated to have substantial programmatic involvement in the project during the entire period of performance. Below is a detailed description of the level of involvement required of the IHS.

Substantial Agency Involvement Description for Cooperative Agreement

A. DDTP will provide programmatic oversight, including:

1. Award Requirements

a. Create and maintain Best Practices: focused areas for improvement of diabetes prevention and treatment outcomes in communities and clinics.

b. Annual Progress Report: Create and provide instructions and template(s).

2. Data Collection and Analysis

a. IHS Diabetes Care and Outcomes Audit: Provide resources, tools, support, and training.

b. SDPI Outcomes System (SOS): Create and provide resources, tools, support, and training. Awardees will use the SOS to track and report on RKM data for their selected Best Practice.

3. Training, Communication, and Technical Assistance

a. Provide extensive SDPI award-related trainings: Topics include, Application, Annual Progress Report, and others. Most trainings are provided via live webinars. Webinars will be recorded and made available on the SDPI website based on importance.

b. Provide updates and announcements via email.

c. Maintain and update the IHS SDPI website (*https://www.ihs.gov/sdpi/*), which provides information and resources regarding this cooperative agreement, including:

i. Best Practices

ii. Additional resources—Documents and links from DDTP and the Division of Grants Management (DGM).

iii. New to SDPI—Information for new awardees and/or staff.

4. Diabetes Trainings and Resources

a. Provide diabetes-related live, recorded, and online education developed by the DDTP, designed for clinicians and other health professionals serving in the Indian health system.

b. Provide clinical updates and announcements via email.

c. Maintain and update the DDTP website, which provides additional resources for awardees including:

i. Clinician resources—online continuing education opportunities, diabetes treatment algorithms, IHS Standards of Care and Clinical Practice Recommendations for Type 2 Diabetes, and IHS Diabetes Care and Outcomes Audit resources.

ii. Patient education resources—free materials that can be ordered, printed, or downloaded from the online catalog.

B. The Indian Health Care Improvement Act, amended in 1987, established that each of the 12 IHS Areas should have an Area Diabetes Consultant (ADC). The ADCs are health care professionals with expertise in diabetes. They play a critical role in supporting SDPI diabetes treatment and prevention activities for their Area including:

1. Oversee SDPI awards within their specified Area to ensure compliance with programmatic Terms and Conditions.

2. Serve as a liaison between the SDPI award programs, DDTP, and DGM.

3. Provide training and resources to SDPI awardees. Some resources may be in the form of additional staff serving as ADC support.

4. Review or assign a designee to review annual continuation applications.

5. May serve as the Program Officer for the SDPI award programs in their IHS Area. The Program Officer is a Federal staff person who is responsible for managing and monitoring the progress of awardees in GrantSolutions. If the ADC is not eligible (*i.e.,* not Federal program staff), another individual may serve as the Program Officer in a limited capacity. Program Officer's duties include: creating funding commitments and memos, providing programmatic review/approval of amendments, and assisting in uploading documents and information as Grant Notes in GrantSolutions.

Required, Optional, and Allowable Activities

Required

All awardees will need to meet the following requirements:

1. *Activities/Services:* Awardees must provide activities/services that:

a. meet the purpose of the SDPI, which is to provide diabetes treatment and/or prevention services and activities for AI/AN communities;

b. are targeted at reducing risk factors for diabetes and diabetes-related conditions;

c. address diabetes-related issues as identified in the awardee's application; and

d. use SDPI funds as outlined in the awardee's Budget Narrative.

2. IHS Diabetes Care and Outcomes Audit (Diabetes Audit): SDPI awardees are required to participate in the Annual Diabetes Audit (*https://www.ihs.gov/diabetes/audit/*). Awardees will submit data, review results, and provide a copy of their Annual Diabetes Audit Report with their Continuation Applications. Non-clinical or community-based awardees that are not able to directly

participate in the Diabetes Audit, will need to obtain a copy of the Annual Diabetes Audit Report from their local facility or Area Diabetes Consultant (*https://www.ihs.gov/diabetes/about-us/area-diabetes-consultants-adc/*).

3. *Best Practices:* The Best Practices (*https://www.ihs.gov/sdpi/sdpi-community-directed/diabetes-best-practices/*) include the latest scientific findings and recommendations. Awardees must select one Best Practice and implement activities/services aimed at improving the associated RKM. Awardees will report on RKM data via the SOS.

4. *Collaboration:* Awardees must:

a. Consult with and accept guidance from DDTP, DGM, and their ADC/ADC Support/Federal Program Officer(s) and/or designated assignee(s).

b. Respond promptly to requests for information.

c. Attend required meetings and trainings.

d. Provide short presentations on their processes and successes, as requested.

e. Keep the entities (see item a. above) informed of emerging issues, developments, and challenges that may affect the awardee's ability to comply with the award Terms and Conditions and/or any requirements.

5. *Project Director:* Awardees must have an officially approved Project Director (approved by the Grants Management Officer in consultation with the Program Official) who has the following qualifications:

a. Relevant health or wellness education and/or experience.

b. Experience with award program management, including skills in program coordination, budgeting, reporting, and staff supervision.

c. Working knowledge of diabetes.

The Project Director should routinely update relevant SDPI award program staff with information and requirements regarding their program's activities/services.

6. *Annual Progress Report:* Per DGM policy, this report must be completed and submitted by attaching it as a Grant Note in GrantSolutions within 90 days after the end of the award program's budget period. Instructions, template(s), and other information will be posted on the SDPI Application/Report website (*https://www.ihs.gov/sdpi/sdpi-community-directed/application-reports/*).

7. *Required Trainings:* Awardees must participate in SDPI required trainings provided by DDTP. These will primarily be live webinars, which will be recorded and posted on the SDPI website for those not able to attend. Awardees will be expected to keep track of participation (both live and recorded webinars). Information about the SDPI awardee training requirements will be provided on the SDPI Grant Training website (*https://www.ihs.gov/sdpi/sdpi-community-directed/sdpi-grant-training/*).

Optional

1. *Optional Trainings:* In addition to required training, DDTP also provides optional trainings. Awardees may participate in SDPI optional trainings depending on their need for the information that will be presented. These will primarily be live webinars, which will be recorded and posted on the SDPI website for those not able to attend. Awardees are not expected to keep track of participation, but a training tracking tool is made available and updated regularly, providing all required and optional trainings hosted by DDTP for the year.

Information about the SDPI awardee training requirements will be provided on the SDPI Grant Training website (*https://www.ihs.gov/sdpi/sdpi-community-directed/sdpi-grant-training/*).

2. *Diabetes in Indian Country Conference:* DDTP occasionally hosts a conference that provides continuing education opportunities and collaboration on issues related to improving outcomes for people with diabetes and those at risk for developing diabetes. SDPI award training sessions are provided during this conference. SDPI awardee attendance is encouraged but not required.

Allowable

1. *Allowable Activities/Services:* There are many types of activities/services allowed under this award as long as they meet the activities/services requirement (see Required.1. above) and are within the scope of work defined in the Project Narrative. For questions, contact DDTP.

III. Eligibility Information

1. Eligibility

To be eligible for this FY 2023 funding opportunity, applicants must be one of the following as required by 42 U.S.C. 254c–3(b):

- An Indian health program operated by an Indian Tribe or Tribal organization pursuant to a contract, grant, cooperative agreement, or compact with the Indian Health Service pursuant to the Indian Self-Determination and Education Assistance Act [25 U.S.C. 5321 *et seq.*].
- An urban Indian health program operated by an urban Indian Organization pursuant to a grant or contract with the Indian Health Service pursuant to title V of the Indian Health Care Improvement Act [25 U.S.C. 1651 *et seq.*].
- The Indian Health Service.

The program office will notify any applicants deemed ineligible.

Note: Please refer to Section IV.2 (Application and Submission Information/Subsection 2, Content and Form of Application Submission) for additional proof of applicant status documents required, such as Tribal Resolutions, proof of nonprofit status, etc.

2. Cost Sharing or Matching

The IHS does not require matching funds or cost sharing for grants or cooperative agreements.

3. Other Requirements

Applications with budget requests that exceed the highest dollar amount outlined under Section II Award Information, Estimated Funds Available, or exceed the period of performance outlined under Section II Award Information, Period of Performance, are considered not responsive and will not be reviewed. The DGM will notify the applicant.

Additional Required Documentation

Tribes and Tribal Organizations

Tribal Resolution

The DGM must receive an official, signed Tribal Resolution prior to issuing a Notice of Award (NoA) to any Tribe or Tribal organization selected for funding. An applicant that is proposing a project affecting another Indian Tribe must include resolutions from all affected Tribes to be served. However, if an official signed Tribal Resolution cannot be submitted with the application prior to the application deadline date, a draft Tribal Resolution must be submitted with the application by the deadline date in order for the application to be considered complete and eligible for review. The draft Tribal Resolution is not in lieu of the required signed resolution, but is acceptable until a signed resolution is received. If an application without a signed Tribal Resolution is selected for funding, the applicant will be contacted by the Grants Management Specialist (GMS) listed in this funding announcement and given 90 days to submit an official, signed Tribal Resolution to the GMS. If the signed Tribal Resolution is not received within 90 days, the award will be forfeited.

Applicants organized with a governing structure other than a Tribal

council may submit an equivalent document commensurate with their governing organization.

Proof of Nonprofit Status

Organizations claiming nonprofit status must submit a current copy of the 501(c)(3) Certificate with the application.

IV. Application and Submission Information

Grants.gov uses a Workspace model for accepting applications. The Workspace consists of several online forms and three forms in which to upload documents—Project Narrative, Budget Narrative, and Other Documents. Give your files brief descriptive names. The filenames are key in finding specific documents during the objective review and in processing awards. Upload all requested and optional documents individually, rather than combining them into a package. Creating a package creates confusion when trying to find specific documents. Such confusion can contribute to delays in processing awards, and could lead to lower scores during the objective review.

1. Obtaining Application Materials

The application package and detailed instructions for this announcement are available at *https://www.Grants.gov.*

Please direct questions regarding the application process to *DGM@ihs.gov.*

2. Content and Form Application Submission

Mandatory documents for all applicants include:

- Application forms:

1. SF–424, Application for Federal Assistance.
2. SF–424A, Budget Information—Non-Construction Programs.
3. SF–424B, Assurances—Non-Construction Programs.
4. Project Abstract Summary Form

- Project Narrative (not to exceed 18 pages). See Section IV.2.A, Project Narrative for more information.
- Budget Justification and Narrative (not to exceed 7 pages). See Section IV.2.B, Budget Narrative for instructions.
- One-page Timeframe Chart.
- 2021 and 2022 Annual Diabetes Audit reports (DRAFT report for 2022 is acceptable) or copies of Audit waivers provided by DDTP.
- Tribal Resolution(s) (Tribes and/or Tribal organizations).
- Letter(s) of Support from one or more of the following:

1. Board of Directors (Urban Indian health programs).
2. Chief Executive Officer (IHS facilities).
3. Tribes served (highly recommended for IHS facilities)

- 501(c)(3) Certificate (if applicable).
- Biographical sketches for all Key Personnel.
- Key contacts form for diabetes program coordinator.
- Contractor/Consultant resumes or qualifications and scope of work (if applicable).
- Disclosure of Lobbying Activities (SF–LLL), if applicant conducts reportable lobbying.
- Certification Regarding Lobbying (GG-Lobbying Form).
- Copy of current Negotiated Indirect Cost (IDC) rate agreement (required in order to receive IDC).
- Organizational chart or written information that shows where the SDPI Program fits into the larger organization (optional).
- Documentation of current Office of Management and Budget (OMB) Financial Audit (not applicable to IHS facilities).

Acceptable forms of documentation include:

1. Email confirmation from Federal Audit Clearinghouse (FAC) that audits were submitted; or
2. Face sheets from audit reports. Applicants can find these on the FAC website at *https://harvester.census.gov/facdissem/Main.aspx.*

Public Policy Requirements

All Federal public policies apply to IHS grants and cooperative agreements. Pursuant to 45 CFR 80.3(d), an individual shall not be deemed subjected to discrimination by reason of their exclusion from benefits limited by Federal law to individuals eligible for benefits and services from the IHS. See *https://www.hhs.gov/grants/grants/grants-policies-regulations/index.html.*

Requirements for Project and Budget Narratives and Other Programmatic Reports

A. *Project Narrative*

This narrative should be a separate document that is no more than 18 pages and must: (1) have consecutively numbered pages; (2) use black font 12 points or larger (applicants may use 10 point font for tables); (3) be single-spaced; and (4) be formatted to fit standard letter paper (8-1/2 x 11 inches). DDTP provides an optional PDF template on the SDPI Application website at *https://www.ihs.gov/sdpi/sdpi-community-directed/application-reports/*, which applicants can use to provide the required information instead of developing their own format.

Be sure to succinctly answer all questions listed under the evaluation criteria (refer to Section V.1, Evaluation Criteria) and place all responses and required information in the correct section noted below or they will not be considered or scored. If the narrative exceeds the overall page limit, the application will be considered not responsive and will not be reviewed. The 18-page limit for the narrative does not include the work plan, standard forms, Tribal Resolutions, budget, budget justifications, narratives, and/or other items. Page limits for each section within the project narrative are guidelines, not hard limits.

There are six parts to the Project Narrative:

Part A: Program Identifiers/Experience (Limit—2 Pages)

Information to identify your program including past experience with diabetes treatment and preventions in AI/AN Communities (include years of experience), geographic location, food resources, and relationship or role with local Indian health clinic.

Part B: Needs Assessment (Limit—3 Pages)

Section 1: Diabetes Needs

Assessment—identify key diabetes-related health issues and diabetes prevalence.

Section 2: Review of Diabetes Audit Reports

Obtain and review of 2021 and 2022 Annual Diabetes Audit Reports to provide 2—3 items/elements that need to be improved and how your program will address those items/elements.

Section 3: Challenges

Identify and describe challenges your program experiences or may face related to prevention and/or treatment of diabetes.

Part C: Program Support and Resources (Limit—3 Pages)

Section 1: Leadership Support

Identify at least one organization administrator or Tribal leaders (other than your Program Coordinator) who has agreed to support your SDPI program for 2023 and describe how they will be actively involved with your program.

Section 2: Key Personnel

List all key personnel that will be involved in your program's activities/services. This may be your ''Diabetes Team.'' You must also separately provide a brief resume or biographical sketch for all key personnel listed.

Section 3: Partnerships and Collaborations

List current active partnerships related to your SDPI program and describe any new partnerships and collaborations that your SDPI program is planning to implement. Include information about how these partners and collaborators will contribute to the activities/services you plan to provide.

Part D: SDPI Diabetes Best Practice (Limit—3 Pages)

Section 1: Best Practice Selection

Applicants must select one Best Practice that addresses one of the needs that was identified in the needs assessment (Part B). There is a list of all the Best Practices on the Best Practices website: *https://www.ihs.gov/sdpi/sdpi-community-directed/diabetes-best-practices/.* For each Best Practice, there is a brief statement on the importance, RKM information, and guidance for selecting a Target Group, and tools and resources.

Section 2: Best Practice Activities

Provide a list of activity(ies)/service(s) to implement that would improve the RKM of the selected Best Practice. Each activity/service should include a brief description and a timeline for implementation.

Section 3: Target Group Number and Description

Awardees will be required to report RKM data for one Target Group for their selected Best Practice. A Target Group is the largest number of patients/participants that you can realistically include in the activities/services you provided in the Best Practice activities for the budget period. The following should be considered in selecting your Target Group:

a. The size and characteristics (*e.g.,* ages, health status, settings, locations) of the community or patient population that you are going to draw your Target Group from;

b. Intensity of the activities/services you plan to do; and

c. SDPI funding and other resources available to provide activities/services.

Part E: Activities/Services not related to selected Best Practice (Optional. Limit—5 Pages)

Provide information for up to five major activities/services, supported by SDPI funds, to address needs that were identified in the needs assessment (Part B). Activities/services reported here should be based on the following criteria:

a. Use the most award funding and program time.

b. Address significant needs/challenges.

Part F: Additional Information (Limit—2 Pages)

Provide additional information as specified by program office.

B. Budget Narrative (Limit—7 Pages)

Provide a budget narrative that explains the amounts requested for each line item of the budget from the SF–424A (Budget Information for Non-Construction Programs) for the first year of the project. The applicant can submit with the budget narrative a more detailed spreadsheet than is provided by the SF–424A (the spreadsheet will not be considered part of the budget narrative). The budget narrative should specifically describe how each item will support the achievement of proposed objectives. Be very careful about showing how each item in the ''Other'' category is justified. For subsequent budget years (see Multi-Year Project Requirements in Section V.1, Application Review Information, Evaluation Criteria), the additional pages should highlight the changes from the first year or clearly indicate that there are no substantive budget changes during the period of performance. Do NOT use the budget narrative to expand the project narrative.

C. IHS Diabetes Care and Outcomes Audit

The IHS Diabetes Care and Outcomes Audit is a process to assess care and health outcomes for AI/AN people with diagnosed diabetes. IHS, Tribal, and Urban Indian health care facilities nationwide participate in this process each year by auditing medical records for their patients with diabetes. Applicants who are able to must submit copies of their local facility's 2021 and 2022 Annual Diabetes Audit reports or copies of the Audit waivers provided by DDTP.

Annual Diabetes Audit reports can be obtained in the following ways:

a. Via the WebAudit: *https://www.ihs.gov/diabetes/audit/.*

b. Request from their local facility.

c. Request from their ADC: *https://www.ihs.gov/diabetes/about-us/area-diabetes-consultants-adc/.*

For programs that received Audit waivers, these can be found in GrantSolutions (as a Grant Note).

If the applicant is unable to obtain their local facility's 2021 and 2022 Annual Diabetes Audit Reports, they must provide an explanation in their Project Narrative (Part B). For any questions, contact DDTP.

3. Submission Dates and Times

Applications must be submitted through *Grants.gov* by 11:59 p.m. Eastern Time on the Application Deadline Date. Any application received after the application deadline will not be accepted for review. *Grants.gov* will notify the applicant via email if the application is rejected.

If technical challenges arise and assistance is required with the application process, contact *Grants.gov* Customer Support (see contact information at *https://www.Grants.gov*). If problems persist, contact Mr. Paul Gettys (*Paul.Gettys@ihs.gov*), Deputy Director, DGM, by telephone at (301) 443–2114. Please be sure to contact Mr. Gettys at least 10 days prior to the application deadline. Please do not contact the DGM until you have received a *Grants.gov* tracking number. In the event you are not able to obtain a tracking number, call the DGM as soon as possible.

The IHS will not acknowledge receipt of applications.

4. Intergovernmental Review

Executive Order 12372 requiring intergovernmental review is not applicable to this program.

5. Funding Restrictions

- Pre-award costs are allowable up to 90 days before the start date of the award provided the costs are otherwise allowable if awarded. Pre-award costs are incurred at the risk of the applicant.
- The available funds are inclusive of direct and indirect costs.
- Only one cooperative agreement will be awarded per applicant.

6. Electronic Submission Requirements

All applications must be submitted via *Grants.gov*. Please use the *https://www.Grants.gov* website to submit an application. Find the application by selecting the ''Search Grants'' link on the homepage. Follow the instructions for submitting an application under the Package tab. No other method of application submission is acceptable.

If you cannot submit an application through *Grants.gov*, you must request a waiver prior to the application due date. This contact must be initiated prior to the application due date or your waiver request will be denied. Prior approval must be requested and obtained from Mr. Paul Gettys, Deputy Director, DGM. You must send a written waiver request to *DGM@ihs.gov* with a copy to *Paul.Gettys@ihs.gov*. The waiver request must be documented in writing (emails are acceptable) before submitting an application by some other method, and must include clear justification for the

need to deviate from the required application submission process.

If the DGM approves your waiver request, you will receive a confirmation of approval email containing submission instructions. You must include a copy of the written approval with the application submitted to the DGM. Applications that do not include a copy of the signed waiver from the Deputy Director of the DGM will not be reviewed. The Grants Management Officer of the DGM will notify the applicant via email of this decision. Applications submitted under waiver must be received by the DGM no later than 5:00 p.m. Eastern Time on the Application Deadline Date. Late applications will not be accepted for processing. Applicants that do not register for both the System for Award Management (SAM) and *Grants.gov* and/or fail to request timely assistance with technical issues will not be considered for a waiver to submit an application via alternative method.

Please be aware of the following:

- Please search for the application package at *https://www.Grants.gov* by entering the Assistance Listing (CFDA) number or the Funding Opportunity Number. Both numbers are located in the header of this announcement.
- If you experience technical challenges while submitting your application, please contact *Grants.gov* Customer Support (see contact information at *https://www.grants.gov*).
- Upon contacting *Grants.gov*, obtain a tracking number as proof of contact. The tracking number is helpful if there are technical issues that cannot be resolved and a waiver from the agency must be obtained.
- Applicants are strongly encouraged not to wait until the deadline date to begin the application process through *Grants.gov* as the registration process for SAM and *Grants.gov* could take up to 20 working days.
- Please follow the instructions on *Grants.gov* to include additional documentation that may be requested by this funding announcement.
- Applicants must comply with any page limits described in this funding announcement.
- After submitting the application, the applicant will receive an automatic acknowledgment from *Grants.gov* that contains a *Grants.gov* tracking number. The IHS will not notify the applicant that the application has been received.

System for Award Management (SAM)

Organizations that are not registered with SAM must access the SAM online registration through the SAM home page at *https://sam.gov.* United States (U.S.) organizations will also need to provide an Employer Identification Number from the Internal Revenue Service that may take an additional 2–5 weeks to become active. Please see *SAM.gov* for details on the registration process and timeline. Registration with the SAM is free of charge but can take several weeks to process. Applicants may register online at *https://sam.gov.*

Unique Entity Identifier

Your *SAM.gov* registration now includes a Unique Entity Identifier (UEI), generated by *SAM.gov*, which replaces the DUNS number obtained from Dun and Bradstreet. *SAM.gov* registration no longer requires a DUNS number. Check your organization's *SAM.gov* registration as soon as you decide to apply for this program. If your *SAM.gov* registration is expired, you will not be able to submit an application. It can take several weeks to renew it or resolve any issues with your registration, so do not wait.

Check your *Grants.gov* registration. Registration and role assignments in *Grants.gov* are self-serve functions. One user for your organization will have the authority to approve role assignments, and these must be approved for active users in order to ensure someone in your organization has the necessary access to submit an application.

The Federal Funding Accountability and Transparency Act of 2006, as amended (''Transparency Act''), requires all HHS awardees to report information on sub-awards. Accordingly, all IHS awardees must notify potential first-tier sub-awardees that no entity may receive a first-tier sub-award unless the entity has provided its UEI number to the prime awardee organization. This requirement ensures the use of a universal identifier to enhance the quality of information available to the public pursuant to the Transparency Act.

Additional information on implementing the Transparency Act, including the specific requirements for SAM, are available on the DGM Grants Management, Policy Topics web page at *https://www.ihs.gov/dgm/policytopics/.*

V. Application Review Information

Possible points assigned to each section are noted in parentheses. The project narrative and budget narrative should include only the first year of activities; information for multi-year projects should be included as a separate document. See ''Multi-year Project Requirements'' at the end of this section for more information. The project narrative should be written in a manner that is clear to outside reviewers unfamiliar with prior related activities of the applicant. It should be well organized, succinct, and contain all information necessary for reviewers to fully understand the project. Attachments requested in the criteria do not count toward the page limit for the narratives. Points will be assigned to each evaluation criteria adding up to a total of 100 possible points. Points are assigned as follows:

1. Evaluation Criteria

A. Introduction and Need for Assistance (15 Points)

(i) Program Identifiers/Experience (Project Narrative Part A)

(1) Was program identifier information adequately provided?

(2) Did applicant provide sufficient information to establish their location and relationship to their local Indian Health Clinic?

(ii) Needs Assessment (Project Narrative Part B)

(1) Did the applicant adequately describe the key diabetes-related health issues identified by their community/leadership?

(2) Were numbers provided for applicant's local user population and people with diagnosed diabetes?

(3) Did the applicant appropriately identify Diabetes Audit items (or diabetes-related issues if Audit Reports were not provided) that need to be improved?

(4) Did the applicant adequately describe how they will address the Diabetes Audit items or diabetes-related issues that need to be improved?

(5) Did the applicant adequately describe challenges?

B. Project Objective(s), Work Plan and Approach (30 Points)

(i) SDPI Diabetes Best Practice (Project Narrative Part D)

(1) Did the applicant provide an adequate description of activities/services to improve the RKM?

(2) Are the activities/services proposed appropriate for the selected Best Practice and Target Group?

(3) Do the planned activities/services appear to be reasonable given the constraints of timeframe, resources, and staff?

(ii) If Applicable: Activities/Services Not Related to Selected Best Practice (Project Narrative Part E)

(1) Do activities/services address diabetes-related issues identified in the needs assessment in Part B?

(2) Are activities/services aimed at reducing risk factors for diabetes and/or related conditions?

(3) Are activities/services adequately described?

(4) Do the planned activities/services appear to be reasonable given the constraints of timeframe, resources, and staff?

C. Program Evaluation (15 Points)

(i) SDPI Diabetes Best Practice (Project Narrative Part D)

(1) Was a Best Practice selected?

(2) Was the number of patients/participants in the Target Group provided?

(3) Was the Target Group adequately described?

(4) Are the Target Group and number of patients/participants reasonable given the information the applicant provided in their needs assessment and program resources sections?

(ii) If Applicable: Activities/Services Not Related to Selected Best Practice (Project Narrative Part E)

(1) Was an appropriate target group identified for each activity/service?

(2) Did the applicant specify how improvement and reduction in risk factors will be evaluated?

D. Organizational Capabilities, Key Personnel, and Qualifications (30 Points)

(i) Program Identifiers/Experience (Project Narrative Part A)

(1) Does the applicant have experience with diabetes treatment and prevention services in AI/AN communities.

(2) Is the experience provided recent? (within 5 years)

(ii) Program Support (Project Narrative Part C)

(1) Does the program propose to provide sufficient and appropriate staff to carry out planned activities?

(2) Did the applicant identify an appropriate organization administrator or Tribal leader, other than the Program Coordinator, to support their SDPI program?

(3) Did the applicant describe how this leader will be involved with the SDPI program?

(4) Did the applicant provide appropriate and adequate information about key personnel in the Project Narrative?

(5) Did the applicant provide appropriate and adequate information about partnerships and collaborations in the Project Narrative?

E. Categorical Budget and Budget Justification (10 Points)

(i) Does the budget match the scope of work described in the Project Narrative?

(ii) Was each line item adequately specified and justified?

(iii) Do funding totals match between the SF–424A, budget line item, and justification?

(iv) Is the budget reasonable and realistic?

Multi-Year Project Requirements

Applications must include a brief project narrative and budget (one additional page per year) addressing the developmental plans for each additional year of the project. This attachment will not count as part of the project narrative or the budget narrative.

Additional documents can be uploaded as Other Attachments in *Grants.gov*.

These can include:

- Work plan, logic model, and/or time line for proposed objectives.
- Position descriptions for key staff.
- Resumes of key staff that reflect current duties.
- Consultant or contractor proposed scope of work and letter of commitment (if applicable).
- Current Indirect Cost Rate Agreement.
- Organizational chart.
- Map of area identifying project location(s).
- Additional documents to support narrative (*i.e.,* data tables, key news articles, etc.).

2. Review and Selection

Each application will be prescreened for eligibility and completeness as outlined in the funding announcement. Applications that meet the eligibility criteria shall be reviewed for merit by the Objective Review Committee (ORC) based on the evaluation criteria. Incomplete applications and applications that are not responsive to the administrative thresholds (budget limit, period of performance limit) will not be referred to the ORC and will not be funded. The program office will notify the applicant of this determination.

Applicants must address all program requirements and provide all required documentation.

3. Notifications of Disposition

All applicants will receive an Executive Summary Statement from the IHS DDTP within 30 days of the conclusion of the ORC outlining the strengths and weaknesses of their application. The summary statement will be sent to the Authorizing Official identified on the face page (SF–424) of the application.

A. Award Notices for Funded Applications

The NoA is the authorizing document for which funds are dispersed to the approved entities and reflects the amount of Federal funds awarded, the purpose of the award, the terms and conditions of the award, the effective date of the award, the budget period, and period of performance. Each entity approved for funding must have a user account in GrantSolutions in order to retrieve the NoA. Please see the Agency Contacts list in Section VII for the systems contact information.

B. Approved But Unfunded Applications

Approved applications not funded due to lack of available funds will be held for 1 year. If funding becomes available during the course of the year, the application may be reconsidered.

Note: Any correspondence other than the official NoA executed by an IHS grants management official announcing to the project director that an award has been made to their organization is not an authorization to implement their program on behalf of the IHS.

VI. Award Administration Information

1. Administrative Requirements

Awards issued under this announcement are subject to, and are administered in accordance with, the following regulations and policies:

A. The criteria as outlined in this program announcement.

B. Administrative Regulations for Grants:

- Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards currently in effect or implemented during the period of award, other Department regulations and policies in effect at the time of award, and applicable statutory provisions. At the time of publication, this includes 45 CFR part 75, at *https://www.govinfo.gov/content/pkg/CFR-2020-title45-vol1/pdf/CFR-2020-title45-vol1-part75.pdf.*
- Please review all HHS regulatory provisions for Termination at 45 CFR 75.372, at *https://www.ecfr.gov/cgi-bin/retrieveECFR?gp&SID=2970eec67399fab1413ede53d7895d99&mc=true&n=pt45.1.75&r=PART&ty=HTML&se45.1.75_1372#se45.1.75_1372.*

C. Grants Policy:

- HHS Grants Policy Statement, Revised January 2007, at *https://www.hhs.gov/sites/default/files/grants/grants/policies-regulations/hhsgps107.pdf.*

D. Cost Principles:

• Uniform Administrative Requirements for HHS Awards, ''Cost Principles,'' located at 45 CFR part 75 subpart E.

E. Audit Requirements:

• Uniform Administrative Requirements for HHS Awards, ''Audit Requirements,'' located at 45 CFR part 75 subpart F.

F. As of August 13, 2020, 2 CFR 200 was updated to include a prohibition on certain telecommunications and video surveillance services or equipment. This prohibition is described in 2 CFR 200.216. This will also be described in the terms and conditions of every IHS grant and cooperative agreement awarded on or after August 13, 2020.

2. Indirect Costs

This section applies to all awardees that request reimbursement of IDC in their application budget. In accordance with HHS Grants Policy Statement, Part II–27, the IHS requires applicants to obtain a current IDC rate agreement and submit it to the DGM prior to the DGM issuing an award. The rate agreement must be prepared in accordance with the applicable cost principles and guidance as provided by the cognizant agency or office. A current rate covers the applicable grant activities under the current award's budget period. If the current rate agreement is not on file with the DGM at the time of award, the IDC portion of the budget will be restricted. The restrictions remain in place until the current rate agreement is provided to the DGM.

Per 45 CFR 75.414(f) Indirect (F&A) costs, ''any non-Federal entity (NFE) [*i.e.,* applicant] that has never received a negotiated indirect cost rate, . . . may elect to charge a de minimis rate of 10 percent of modified total direct costs which may be used indefinitely. As described in Section 75.403, costs must be consistently charged as either indirect or direct costs, but may not be double charged or inconsistently charged as both. If chosen, this methodology once elected must be used consistently for all Federal awards until such time as the NFE chooses to negotiate for a rate, which the NFE may apply to do at any time.''

Electing to charge a de minimis rate of 10 percent only applies to applicants that have never received an approved negotiated indirect cost rate from HHS or another cognizant Federal agency. Applicants awaiting approval of their indirect cost proposal may request the 10 percent de minimis rate. When the applicant chooses this method, costs included in the indirect cost pool must not be charged as direct costs to the grant.

Available funds are inclusive of direct and appropriate indirect costs. Approved indirect funds are awarded as part of the award amount, and no additional funds will be provided.

Generally, IDC rates for IHS awardees are negotiated with the Division of Cost Allocation at *https://rates.psc.gov/* or the Department of the Interior (Interior Business Center) at *https://ibc.doi.gov/ICS/tribal.* For questions regarding the indirect cost policy, please call the Grants Management Specialist listed under ''Agency Contacts'' or write to *DGM@ihs.gov.*

3. Reporting Requirements

The awardee must submit required reports consistent with the applicable deadlines. Failure to submit required reports within the time allowed may result in suspension or termination of an active award, withholding of additional awards for the project, or other enforcement actions such as withholding of payments or converting to the reimbursement method of payment. Continued failure to submit required reports may result in the imposition of special award provisions and/or the non-funding or non-award of other eligible projects or activities. This requirement applies whether the delinquency is attributable to the failure of the awardee organization or the individual responsible for preparation of the reports. Per DGM policy, all reports must be submitted electronically by attaching them as a ''Grant Note'' in GrantSolutions. Personnel responsible for submitting reports will be required to obtain a login and password for GrantSolutions. Please use the form under the Recipient User section of *https://www.grantsolutions.gov/home/getting-started-request-a-user-account/.* Download the Recipient User Account Request Form, fill it out completely, and submit it as described on the web page and in the form.

The reporting requirements for this program are noted below.

A. Progress Reports

Program progress reports are required annually. The progress reports are due within 30 days after the budget period ends (specific dates will be listed in the NoA Terms and Conditions). These reports must include a brief comparison of actual accomplishments to the goals established for the period, a summary of progress to date or, if applicable, provide sound justification for the lack of progress, and other pertinent information as required. A final report must be submitted within 90 days of expiration of the period of performance. Instructions, template(s), and other information will be posted on the SDPI website at *https://www.ihs.gov/sdpi/sdpi-community-directed/application-reports/.*

B. Financial Reports

Federal Financial Reports are due 30 days after the end of each budget period, and a final report is due 90 days after the end of the period of performance. Awardees are responsible and accountable for reporting accurate information on all required reports: the Progress Reports and the Federal Financial Report.

C. Data Collection and Reporting

SOS RKM Data Requirements: Data for the selected Best Practice RKM will be submitted using the SOS. Awardees will submit results for their RKM for their selected Best Practice into this system at the start (baseline) and end (final) of the budget period, with the option to submit more frequently. The system will generate SOS RKM data reports to meet the SDPI outcomes reporting requirements. These results will be stored in the system and will be accessible to program staff, as needed. Awardees will need to appoint at least one person in their program to get access to and submit data into the SOS.

i. *Baseline data:* Data is to be submitted into the SOS by the last business day of February each year (*e.g.,* 2023 baseline data will be by Tuesday, February 28, 2023). A report from the SOS showing baseline data submission will be due with continuation applications.

ii. *Final data:* Data for the prior budget period is to be submitted into the SOS by the last business day of January, each year (*e.g.,* 2023 final data will be due by Wednesday, January 31, 2024). A report from the SOS showing baseline and final data submission will be due with the Annual Progress Report.

Refer to the SDPI website (*https://www.ihs.gov/sdpi/*) for the latest information on report templates, due dates, webinars and submission instructions.

Diabetes Care and Outcomes Audit: SDPI awardees are required to participate in the Annual Diabetes Audit (*https://www.ihs.gov/diabetes/audit/*). Awardees will submit data, review results, and provide a copy of their Annual Diabetes Audit Report with their annual SDPI applications. Diabetes Annual Audit data are to be submitted into the WebAudit each year around mid-March, (*e.g.,* 2023 Audit data collecting annual data will be due approximately March 15, 2023). Non-

clinical or community-based awardees, that are not able to directly participate in the Diabetes Audit, will need to obtain a copy of the Annual Diabetes Audit Report from their local facility or Area Diabetes Consultant (*https://www.ihs.gov/diabetes/about-us/area-diabetes-consultants-adc/*).

D. Federal Sub-Award Reporting System (FSRS)

This award may be subject to the Transparency Act sub-award and executive compensation reporting requirements of 2 CFR part 170.

The Transparency Act requires the OMB to establish a single searchable database, accessible to the public, with information on financial assistance awards made by Federal agencies. The Transparency Act also includes a requirement for awardees of Federal grants to report information about first-tier sub-awards and executive compensation under Federal assistance awards. The IHS has implemented a Term of Award into all IHS Standard Terms and Conditions, NoAs, and funding announcements regarding the FSRS reporting requirement. This IHS Term of Award is applicable to all IHS grant and cooperative agreements issued on or after October 1, 2010, with a $25,000 sub-award obligation threshold met for any specific reporting period. For the full IHS award term implementing this requirement and additional award applicability information, visit the DGM Grants Management website at *https://www.ihs.gov/dgm/policytopics/*.

E. Non-Discrimination Legal Requirements for Awardees of Federal Financial Assistance

Should you successfully compete for an award, recipients of Federal financial assistance (FFA) from HHS must administer their programs in compliance with Federal civil rights laws that prohibit discrimination on the basis of race, color, national origin, disability, age and, in some circumstances, religion, conscience, and sex (including gender identity, sexual orientation, and pregnancy). This includes ensuring programs are accessible to persons with limited English proficiency and persons with disabilities. The HHS Office for Civil Rights provides guidance on complying with civil rights laws enforced by HHS. Please see *https://www.hhs.gov/civil-rights/for-providers/provider-obligations/index.html* and *https://www.hhs.gov/civil-rights/for-individuals/nondiscrimination/index.html.*

- Recipients of FFA must ensure that their programs are accessible to persons with limited English proficiency. For guidance on meeting your legal obligation to take reasonable steps to ensure meaningful access to your programs or activities by limited English proficiency individuals, see *https://www.hhs.gov/civil-rights/for-individuals/special-topics/limited-english-proficiency/fact-sheet-guidance/index.html* and *https://www.lep.gov.*
- For information on your specific legal obligations for serving qualified individuals with disabilities, including reasonable modifications and making services accessible to them, see *https://www.hhs.gov/civil-rights/for-individuals/disability/index.html.*
- HHS funded health and education programs must be administered in an environment free of sexual harassment. See *https://www.hhs.gov/civil-rights/for-individuals/sex-discrimination/index.html.*
- For guidance on administering your program in compliance with applicable Federal religious nondiscrimination laws and applicable Federal conscience protection and associated anti-discrimination laws, see *https://www.hhs.gov/conscience/conscience-protections/index.html* and *https://www.hhs.gov/conscience/religious-freedom/index.html.*

F. Federal Awardee Performance and Integrity Information System (FAPIIS)

The IHS is required to review and consider any information about the applicant that is in the FAPIIS at *https://www.fapiis.gov/fapiis/#/home* before making any award in excess of the simplified acquisition threshold (currently $250,000) over the period of performance. An applicant may review and comment on any information about itself that a Federal awarding agency previously entered. The IHS will consider any comments by the applicant, in addition to other information in FAPIIS, in making a judgment about the applicant's integrity, business ethics, and record of performance under Federal awards when completing the review of risk posed by applicants, as described in 45 CFR 75.205.

As required by 45 CFR part 75 Appendix XII of the Uniform Guidance, NFEs are required to disclose in FAPIIS any information about criminal, civil, and administrative proceedings, and/or affirm that there is no new information to provide. This applies to NFEs that receive Federal awards (currently active grants, cooperative agreements, and procurement contracts) greater than $10,000,000 for any period of time during the period of performance of an award/project.

Mandatory Disclosure Requirements

As required by 2 CFR part 200 of the Uniform Guidance, and the HHS implementing regulations at 45 CFR part 75, the IHS must require an NFE or an applicant for a Federal award to disclose, in a timely manner, in writing to the IHS or pass-through entity all violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. All applicants and awardees must disclose in writing, in a timely manner, to the IHS and to the HHS Office of Inspector General all information related to violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. 45 CFR 75.113.

Disclosures must be sent in writing to:

U.S. Department of Health and Human Services, Indian Health Service, Division of Grants Management, ATTN: Marsha Brookins, Director, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857, (Include ''Mandatory Grant Disclosures'' in subject line), Office: (301) 443–4750, Fax: (301) 594–0899, Email: *DGM@ihs.gov*

AND

U.S. Department of Health and Human Services, Office of Inspector General, ATTN: Mandatory Grant Disclosures, Intake Coordinator, 330 Independence Avenue SW, Cohen Building, Room 5527, Washington, DC 20201, URL: *https://oig.hhs.gov/fraud/report-fraud/*, (Include ''Mandatory Grant Disclosures'' in subject line), Fax: (202) 205–0604 (Include ''Mandatory Grant Disclosures'' in subject line) or Email: *MandatoryGrantee Disclosures@oig.hhs.gov*

Failure to make required disclosures can result in any of the remedies described in 45 CFR 75.371 Remedies for noncompliance, including suspension or debarment (see 2 CFR part 180 and 2 CFR part 376).

VII. Agency Contacts

1. Questions on the programmatic issues may be directed to:

Applicant's Area Diabetes Consultant: *https://www.ihs.gov/diabetes/about-us/area-diabetes-consultants-adc/*, IHS Division of Diabetes Treatment and Prevention, 5600 Fishers Lane, Mailstop: 08N34A, Rockville, MD 20857, Phone: (844) 447–3387, Fax: (301) 594–6213, Email: *diabetesprogram@ihs.gov* and *sdpi@ihs.gov*, Division of Diabetes website: *https://www.ihs.gov/diabetes/* and *https://www.ihs.gov/sdpi/*

2. Questions on grants management and fiscal matters may be directed to:

For IHS Area: Albuquerque, Donald Gooding, Grants Management Specialist, Phone: (301) 443–2298, Email: *Donald.Gooding@ihs.gov*

For IHS Areas: Nashville, Tucson, Andrew Diggs, Grants Management Specialist, Phone: (301) 443–2241, Email: *Andrew.diggs@ihs.gov*

For IHS Areas: Great Plains, Oklahoma City, Phoenix, and Portland, Cherron Smith, Grants Management Specialist, Phone: (301) 443–2192, Email: *Cherron.Smith@ihs.gov*

For IHS Areas: Alaska, Bemidji, and Billings, Patience Musikikongo, Grants Management Specialist, Phone: (301) 443–2059, Email: *Patience.Musikikongo@ihs.gov*

For Urban, Navajo, and California, Pallop Chareonvootitam, Grants Management Specialist, Phone: (301) 443–2195, Email: *Pallop.Chareonvootitam@ihs.gov*, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857

3. Questions on systems matters may be directed to:

Paul Gettys, Deputy Director, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857, Phone: (301) 443–2114, E-Mail: *Paul.Gettys@ihs.gov*

VIII. Other Information

The Public Health Service strongly encourages all grant, cooperative agreement, and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of the facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the HHS mission to protect and advance the physical and mental health of the American people.

Elizabeth A. Fowler,

Acting Director, Indian Health Service.

[FR Doc. 2022–16264 Filed 7–28–22; 8:45 am]

BILLING CODE 4165–16–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2022–0042]

Faith-Based Security Advisory Council

AGENCY: The Office of Partnership and Engagement (OPE), The Department of Homeland Security (DHS).

ACTION: Notice of charter renewal with amendments.

SUMMARY: This notice announces the renewal of the Faith-Based Security Advisory Council (FBSAC) for an additional two years and amendment of its charter.

FOR FURTHER INFORMATION CONTACT: Michael J. Miron at *HSAC@hq.dhs.gov* or at 202–891–2876.

SUPPLEMENTARY INFORMATION: The Faith-Based Security Advisory Council (FBSAC) charter is established under the authority of 6 U.S.C. 451. This discretionary committee is established in accordance with and operates under the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C., Appendix. The FBSAC is renewed for an additional two years and its charter has been amended.

Amendments to the charter include:

(1) The previous charter stated that there were 25 members. It is now amended to 30 members.

(2) All FBSAC members will now serve as Representative Members, except the Member from the Department of Justice or Federal Bureau of Investigation who is appointed as a non-voting ex officio member.

(3) The previous charter allowed for members to be drawn from seven government offices. This has been amended to only include one non-voting ex officio member to be appointed from the Department of Justice of Federal Bureau of Investigation.

(4) In compliance with Executive Order 14035 on Diversity, Equity, Inclusion & Accessibility in the Federal Workforce (herein referenced as DEIA), the amended charter will state:

In order for DHS to fully leverage broad-ranging experience and education, the Council must be diverse with regard to professional and technical expertise. DHS is committed to pursuing opportunities, consistent with applicable law, to compose a committee that reflects the diversity of the nation's people.

In addition to the aforementioned amendments, the renewed charter contains certain technical and organizational but non-substantive changes in terms of format and wording. For any questions regarding the amendments, please contact the individual in the **FOR FURTHER INFORMATION CONTACT** section.

Dated: July 26, 2022.

Michael J. Miron,

Committee Management Officer, Department of Homeland Security.

BILLING CODE 9112–FN–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0009]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Petition for Nonimmigrant Worker

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until August 29, 2022.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2005–0030. All submissions received must include the OMB Control Number 1615–0009 in the body of the letter, the agency name and Docket ID USCIS–2005–0030.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief,

Telephone number (240) 721–3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS Contact Center at (800) 375–5283; TTY (800) 767–1833.

SUPPLEMENTARY INFORMATION:

Comments

The information collection notice was previously published in the **Federal Register** on May 22, 2022, at 87 FR 31257, allowing for a 60-day public comment period. USCIS did not receive any comment(s) in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2005–0030 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition for Nonimmigrant Worker.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–129; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Business or other for-profit. USCIS uses the data collected on this form to determine eligibility for the requested nonimmigrant petition and/or requests to extend or change nonimmigrant status. An employer (or agent, where applicable) uses this form to petition USCIS for an alien to temporarily enter as a nonimmigrant worker. An employer (or agent, where applicable) also uses this form to request an extension of stay or change of status on behalf of the nonimmigrant worker. The form serves the purpose of standardizing requests for nonimmigrant workers and ensuring that basic information required for assessing eligibility is provided by the petitioner while requesting that beneficiaries be classified under certain nonimmigrant employment categories. It also assists USCIS in compiling information required by Congress annually to assess effectiveness and utilization of certain nonimmigrant classifications.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–129 is 294,751 and the estimated hour burden per response is 2.34 hours; the estimated total number of respondents for the information collection E–1/E–2 Classification Supplement to Form I–129 is 4,760 and the estimated hour burden per response is 0.67 hours; the estimated total number of respondents for the information collection Trade Agreement Supplement to Form I–129 is 3,057 and the estimated hour burden per response is 0.67 hours; the estimated total number of respondents for the information collection H Classification Supplement to Form I–129 is 96,291 and the estimated hour burden per response is 2 hours; the estimated total number of respondents for the information collection H–1B and H–1B1 Data Collection and Filing Fee Exemption Supplement is 96,291 and the estimated hour burden per response is 1 hour; the estimated total number of respondents for the information collection L Classification Supplement to Form I–129 is 37,831 and the estimated hour burden per response is 1.34 hours; the estimated total number of respondents for the information collection O and P Classifications Supplement to Form I–129 is 22,710 and the estimated hour burden per response is 1 hour; the estimated total number of respondents for the information collection Q–1 Classification Supplement to Form I–129 is 155 and the estimated hour burden per response is 0.34 hours; and the estimated total number of respondents for the information collection R–1 Classification Supplement to Form I–129 is 6,635 and the estimated hour burden per response is 2.34 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 1,072,810 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $70,681,290.

Dated: July 26, 2022.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7050–N–39; OMB Control Number 2502–0507]

30-Day Notice of Proposed Information Collection: Annual Adjustment Factors (AAF) Rent Increase Requirement

AGENCY: Office of Policy Development and Research, Chief Data Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection

described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for additional 30 days of public comment.

DATES: *Comments Due Date:* August 29, 2022.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_submission@omb.eop.gov* or *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Colette Pollard, Reports Management Officer, PD&R, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on January 5, 2022, at 87 FR 473.

A. Overview of Information Collection

Title of Information Collection: Annual Adjustment Factors (AAF) Rent Increase Requirement.

OMB Approval Number: 2502–0507.

Type of Request: Reinstatement, with change, of previously approved collection for which approval has expired.

Form Number: HUD–92273–S8.

Description of the need for the information and proposed use: Owners of project-based section 8 contracts that utilize the AAF as the method of rent adjustment provide this information which is necessary to determine whether or not the subject properties' rents are to be adjusted and, if so, the amount of the adjustment.

Respondents: Business, not for profit institutions.

Estimated Number of Respondents: 1,080.

Estimated Number of Responses: 8.

Frequency of Response: On occasion.

Average Hours per Response: 1.5 hours.

Total Estimated Burden: 12.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

(5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Colette Pollard,

Department Reports Management Officer, Office of Policy Development and Research, Chief Data Officer.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

[223A2100DD/AAKC001030/A0A501010.999900 253G]

Rate Adjustments for Indian Irrigation Projects

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Indian Affairs (BIA) owns or has an interest in irrigation projects located on or associated with various Indian reservations throughout the United States. We are required to establish irrigation assessment rates to recover the costs to administer, operate, maintain, and rehabilitate these projects. We are notifying you that we have adjusted the irrigation assessment rates at several of our irrigation projects and facilities to reflect current costs of administration, operation, maintenance, and rehabilitation.

DATES: The 2023 Irrigation Assessment Rates are effective on January 1, 2023.

FOR FURTHER INFORMATION CONTACT: David Fisher, Chief, Division of Water and Power, (406) 657–5985. For details about a particular BIA irrigation project, please use the tables in the **SUPPLEMENTARY INFORMATION** section to contact the BIA regional or local office where the irrigation project is located.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rate Adjustment was published in the **Federal Register** on April 1, 2022 (87 FR 19116) to propose adjustments to the irrigation assessment rates at several BIA irrigation projects. The public and interested parties were provided an opportunity to submit written comments during the 60-day period that ended May 31, 2022.

Did BIA defer or change any proposed rate increases?

No. BIA did not defer or change any proposed rate increases.

Did BIA receive any comments on the proposed irrigation assessment rate adjustments?

Yes. BIA received nine (9) written comments related to the proposed 2023 irrigation assessment rate adjustment for the Flathead Indian Irrigation Project (FIIP). Comments were received by letter and email.

What issues were of concern to the commenters?

Comments received relate specifically to the proposed 2023 irrigation assessment rate adjustment for FIIP. BIA's summary of the issues and responses are provided below.

Comment: Commenters state a general opposition to the FIIP irrigation assessment rate adjustment and BIA's methodology for determining FIIP's budget, including a specific concern that available funds from October 2021 should be depleted and the budget should not include funding for all vacant personnel positions.

Response: As noted when rates were proposed in the **Federal Register** on April 1, 2022 (87 FR 19116), BIA is required to establish irrigation

assessment rates that recover the costs to administer, operate, maintain, and rehabilitate our projects. As owner of FIIP, it is BIA's responsibility to ensure adequate resources are made available to meet the requirements noted above. BIA's authority to assess rates is codified at 25 U.S.C. 381 *et seq.* and is addressed in BIA's regulations at 25 CFR part 171. *See also* 73 FR 11,028, 11,030 (February 29, 2008). Additionally, the repayment contracts between the respective irrigation districts and the Department of the Interior explicitly state that operation and maintenance (O&M) expenses ''shall be paid . . . as provided . . . by rules made or to be made . . . by the Secretary of the Interior.'' The procedures followed by BIA in adjusting its irrigation assessment rates are consistent with applicable law and past practice, and the methodology used by BIA to determine the O&M assessment rates for FIIP is reasonable.

The proposed 2023 irrigation assessment adjustments for FIIP's basic per acre rate categories are necessary and justified due to the increased costs associated with administering, operating, maintaining, and rehabilitating FIIP. In accordance with BIA financial guidelines and 25 CFR part 171, BIA developed the FIIP budget for 2023 expenditures and income approximately two years in advance. BIA relied on financial reports generated by the Financial and Business Management System and procurement files to review past expenditures and project a future budget. The FIIP Project Manager also used his discretion to assess and anticipate upcoming financial needs and priorities. The 2023 expenses were then divided by the total assessable acres within FIIP. The $2 per acre assessment increase for the ''basic per acre—A'' rate category is necessary to ensure FIIP can pay its anticipated expenses for 2023.

Following BIA policy, the FIIP Project Manager held two meetings in April 2022 with representatives of the Flathead Irrigation District, Mission Irrigation District, and Jocko Irrigation District to discuss the proposed 2023 irrigation assessment increase from $33.50 to $35.50 per acre. During these meetings, BIA provided details supporting the 2023 budget, justifications, and proposed O&M assessment.

Some commenters submitted a copy of FIIP's account balances as of October 2021 that did not include the account purposes or expenses. While FIIP's account balances totaled nearly $6.3 million in October 2021, this money was allocated for specific purposes and upcoming expenses. BIA irrigation projects are required to maintain a sinking fund for heavy equipment replacement and maintenance, a reserve fund for emergencies and contingencies, and funding for environmental compliance activities; $4.2 million of the $6.3 million was allocated for these purposes. Approximately $400,000 of the $6.3 million was allocated for scheduled construction activities on FIIP's aging infrastructure. The remaining $1.7 million of the $6.3 million was budgeted for 2021, 2022, and 2023 O&M expenses, including: personnel, equipment costs, acquisition costs, and materials and supplies. We believe FIIP's account balances in October 2021 were reasonable and appropriate because FIIP receives the bulk of its O&M collections twice annually, its account balance fluctuates throughout the year, and actual expenditures may vary from budgeted or estimated expenses. Although a small portion of the October 2021 available funds were intended for 2023 O&M expenses, FIIP must increase its 2023 assessment rates to avoid a deficit and ensure it has sufficient funds for the remainder of its O&M expenditures in 2023.

Regarding funding for personnel, the proposed 2023 O&M assessment does not include funding for all vacant positions. The 2023 budget includes personnel salary, benefits, and overtime for FIIP's 32 employees as well as two vacant positions. The remaining 23 vacant positions in FIIP's organizational chart are not accounted for in the 2023 budget.

Comment: Two commenters state the quality of irrigation service and water flow need to improve before assessments are increased.

Response: FIIP provides irrigation service commensurate with its resources which means the $2 per acre assessment increase is needed to improve the project's quality of service. The increased revenue will allow FIIP to fill two vacant personnel positions—one hydrologist and one civil engineer. The quality of irrigation service will improve as funding becomes available to fill additional personnel positions, while also retaining and increasing experience levels of existing FIIP staff. FIIP is actively working with the BIA Northwest Region and BIA human resources offices to fill its vacant personnel positions subject to available funding.

The FIIP rate adjustment is also needed to maintain the project's existing quality of service and assure its water delivery obligations are satisfied. Many O&M expenses are not consistent from year to year or under BIA's control, including the costs of existing personnel, pumping, materials and supplies, and repairs. Federal personnel expenses require the use of local area pay tables for General Schedule and Federal Wage System employees, maintained and managed by the Office of Personnel Management, and factor in the annual cost of living increases, annual wage board estimates, and annual overtime estimates. Power expenses for pumping are weather dependent and vary widely from year to year. And the costs of materials, supplies, and repairs are subject to depreciation and inflation.

Comment: One commenter recommends using the Confederated Salish and Kootenai Tribes' water settlement funds to pay for O&M instead of increasing assessment rates.

Response: The Montana Water Rights Protection Act (Consolidated Appropriations Act of 2021, Division DD, Pub. L. 116–260, 134 stat. 1182) authorized funds to implement the Act as well as the water rights compact entered into by the Confederated Salish and Kootenai Tribes, the State of Montana, and the United States. The Act authorizes the use of appropriated funds for certain activities, including certain rehabilitation, modernization, mitigation, reclamation, and restoration activities set forth in section 7 of the Act. The Act does not, however, authorize the use of those funds for O&M costs of FIIP.

Does this notice affect me?

This notice affects you if you own or lease land within the assessable acreage of one of our irrigation projects or if you have a carriage agreement with one of our irrigation projects.

Where can I get information on the regulatory and legal citations in this notice?

You can contact the appropriate office(s) stated in the tables for the irrigation project that serves you, or you can use the internet site for the Government Publishing Office at *www.gpo.gov.*

What authorizes you to issue this notice?

Our authority to issue this notice is vested in the Secretary of the Interior (Secretary) by 5 U.S.C. 301 and the Act of August 14, 1914 (38 stat. 583; 25 U.S.C. 385). The Secretary has in turn delegated this authority to the Assistant Secretary—Indian Affairs under Part 209, Chapter 8.1A, of the Department of the Interior's Departmental Manual.

Whom can I contact for further information?

The following tables are the regional and project/agency contacts for our irrigation facilities.

Project name	Project/Agency contacts
Northwest Region Contacts	
Bryan Mercier, Regional Director, Bureau of Indian Affairs, Northwest Regional Office, 911 NE 11th Avenue, Portland, OR 97232–4169, Telephone: (503) 231–6702.	
Flathead Indian Irrigation Project	Larry Nelson, Acting Irrigation Project Manager, 220 Project Drive, St. Ignatius, MT 59865, Telephone: (406) 745–2661.
Fort Hall Irrigation Project	David Bollinger, Irrigation Project Manager, 36 Bannock Avenue, Fort Hall, ID 83203–0220, Telephone: (208) 238–1992.
Wapato Irrigation Project	Pete Plant, Project Administrator, 413 South Camas Avenue, Wapato, WA 98951–0220, Telephone: (509) 877–3155.
Rocky Mountain Region Contacts	
Susan Messerly, Regional Director, Bureau of Indian Affairs, Rocky Mountain Regional Office, 2021 4th Avenue North, Billings, MT 59101, Telephone: (406) 247–7943.	
Blackfeet Irrigation Project	Kenneth Bird, Acting Superintendent, Greg Tatsey, Irrigation Project Manager, P.O. Box 880, Browning, MT 59417, Telephones: (406) 338–7544 Superintendent, (406) 338–7519 Irrigation Project Manager.
Crow Irrigation Project	Clifford Serawop, Superintendent, Jim Gappa, Acting Irrigation Project Manager (BIA), (Project O&M performed by Water Users Association), P.O. Box 69, Crow Agency, MT 59022, Telephones: (406) 638–2672 Superintendent, (406) 247–7998 Acting Irrigation Project Manager.
Fort Belknap Irrigation Project	Mark Azure, Superintendent, Jim Gappa, Acting Irrigation Project Manager (BIA), (Project O&M contracted to Tribes under Pub. L. 93–638), 158 Tribal Way, Suite B, Harlem, MT 59526, Telephone: (406) 353–2901 Superintendent, (406) 353–8454 Irrigation Project Manager (Tribal Office).
Fort Peck Irrigation Project	Anna Eder, Superintendent, Jim Gappa, Acting Irrigation Project Manager (BIA), (Project O&M performed by Fort Peck Water Users Association), P.O. Box 637, Poplar, MT 59255, Telephones: (406) 768–5312 Superintendent, (406) 247–7998 Acting Irrigation Project Manager, (406) 653–1752 Lead ISO—Huber Wright.
Wind River Irrigation Project	Leslie Shakespeare, Superintendent, Jim Gappa, Acting Irrigation Project Manager (BIA), (Project O&M for Little Wind, Johnstown, and Lefthand Units contracted to Tribes under Pub. L. 93–638; Little Wind-Ray and Upper Wind Units O&M performed by Ray Canal, A Canal, and Crowheart Water Users Associations), P.O. Box 158, Fort Washakie, WY 82514, Telephones: (307) 332–7810 Superintendent, (406) 247–7998 Acting Irrigation Project Manager.
Southwest Region Contacts	
Patricia L. Mattingly, Regional Director, Bureau of Indian Affairs, Southwest Regional Office, 1001 Indian School Road NW, Albuquerque, NM 87104, Telephone: (505) 563–3100.

What irrigation assessments or charges are adjusted by this notice?

The rate table below contains final rates for the 2022 and 2023 calendar years for all irrigation projects where we recover costs of administering, operating, maintaining, and rehabilitating them. An asterisk immediately following the rate category notes the irrigation projects where 2022 rates are different from the 2023 rates.

Project name	Rate category	Final 2022 rate	Final 2023 rate
Northwest Region Rate Table			
Flathead Irrigation Project	Basic per acre—A *	$33.50	$35.50
	Basic per acre—B *	16.75	17.75
	Minimum Charge per tract	75.00	75.00
Fort Hall Irrigation Project	Basic per acre *	62.50	64.50
	Minimum Charge per tract *	40.00	41.00
Fort Hall Irrigation Project—Minor Units	Basic per acre *	41.00	45.00
	Minimum Charge per tract *	40.00	41.00
Fort Hall Irrigation Project—Michaud Unit	Basic per acre *	68.50	73.50
	Pressure per acre *	106.50	114.00
	Minimum Charge per tract *	40.00	41.00
Wapato Irrigation Project—Toppenish/Simcoe Units	Minimum Charge per bill	25.00	25.00
	Basic per acre	25.00	25.00
Wapato Irrigation Project—Ahtanum Units	Minimum Charge per bill	30.00	30.00
	Basic per acre	30.00	30.00
Wapato Irrigation Project—Satus Unit	Minimum Charge per bill	79.00	79.00
	"A" Basic per acre	79.00	79.00
	"B" Basic per acre	85.00	85.00
Wapato Irrigation Project—Additional Works	Minimum Charge per bill	80.00	80.00
	Basic per acre	80.00	80.00
Wapato Irrigation Project—Water Rental	Minimum Charge per bill *	86.00	90.00
	Basic per acre *	86.00	90.00
Rocky Mountain Region Rate Table			
Blackfeet Irrigation Project	Basic-per acre	20.50	20.50
Crow Irrigation Project—Willow Creek O&M (includes Agency, Lodge Grass #1, Lodge Grass #2, Reno, Upper Little Horn, and Forty Mile Units).	Basic-per acre *	28.50	29.00
Crow Irrigation Project—All Others (includes Bighorn, Soap Creek, and Pryor Units).	Basic-per acre *	28.50	29.00
Crow Irrigation Project—Two Leggins Unit	Basic-per acre	14.00	14.00
Crow Irrigation Two Leggins Drainage District	Basic-per acre	2.00	2.00
Fort Belknap Irrigation Project	Basic-per acre *	18.00	19.00
Fort Peck Irrigation Project	Basic-per acre *	27.00	28.00
Wind River Irrigation Project—Units 2, 3 and 4	Basic-per acre	25.00	25.00
Wind River Irrigation Project—Unit 6	Basic-per acre	22.00	22.00
Wind River Irrigation Project—LeClair District (See Note #1)	Basic-per acre	47.00	47.00
Wind River Irrigation Project—Crow Heart Unit	Basic-per acre	16.50	16.50
Wind River Irrigation Project—A Canal Unit	Basic-per acre	16.50	16.50
Wind River Irrigation Project—Riverton Valley Irrigation District (See Note #1).	Basic-per acre	30.65	30.65
Southwest Region Rate Table			
Pine River Irrigation Project	Minimum Charge per tract *	50.00	75.00
	Basic-per acre *	22.50	23.00
Western Region Rate Table			
Colorado River Irrigation Project	Basic per acre up to 5.75 acre-feet	64.00	64.00
	Excess Water per acre-foot over 5.75 acre-feet.	18.00	18.00
Duck Valley Irrigation Project	Basic per acre	5.30	5.30
Yuma Project, Indian Unit (See Note #2)	Basic per acre up to 5.0 acre-feet	157.00	(+)
	Excess Water per acre-foot over 5.0 acre-feet.	30.00	(+)
	Basic per acre up to 5.0 acre-feet (Ranch 5).	157.00	(+)

San Carlos Irrigation Project (Joint Works) (See Note #3)	Basic per acre		$26.00	$26.00
	2023 Construction Water Rate Schedule:			
		Off project construction	On project construction—gravity water	On project construction—pump water
	Administrative Fee.	$300.00	$300.00	$300.00.
	Usage Fee	$250.00 per month.	No Fee	$100.00 per acre foot.
	Excess Water Rate †.	$5.00 per 1,000 gal.	No Charge	No Charge.

Project name	Rate category	Final 2022 rate	Final 2023 rate
San Carlos Irrigation Project (Indian Works) (See Note #4)	Basic per acre *	$90.50	$99.44
Uintah Irrigation Project	Basic per acre	23.00	23.00
	Minimum Bill	25.00	25.00
Walker River Irrigation Project	Basic per acre	31.00	31.00

* Notes irrigation projects where rates are adjusted.
+ These rates have not yet been determined.
† The excess water rate applies to all water used in excess of 50,000 gallons in any one month.

Note #1: O&M rates for LeClair and Riverton Valley Irrigation Districts apply to Trust lands that are serviced by each irrigation district. The annual O&M rates are based on budgets submitted by LeClair and Riverton Valley Irrigation Districts, respectively.

Note #2: The O&M rate for the Yuma Project, Indian Unit has two components. The first component of the O&M rate is established by the Bureau of Reclamation (BOR), the owner and operator of the Project. BOR's rate, which is based upon the annual budget submitted by BOR is $153.00 for 2022 but has not been established for 2023. The second component of the O&M rate is established by BIA to cover administrative costs, which includes billing and collections for the Project. The 2022 BIA rate component is $4.00/acre. The final 2023 BIA rate component is $4.00/acre.

Note #3: The Construction Water Rate Schedule identifies fees assessed for use of irrigation water for non-irrigation purposes.

Note #4: The O&M rate for the San Carlos Irrigation Project—Indian Works has three components. The first component is established by BIA San Carlos Irrigation Project—Indian Works, the owner and operator of the Project; the 2022 rate is $56.50 per acre, and the final 2023 rate is $56.50 per acre. The second component is established by BIA San Carlos Irrigation Project—Joint Works; the 2022 rate is $26.00 per acre, and the final 2023 rate is $26.00 per acre. The third component is established by the San Carlos Irrigation Project Joint Control Board (comprised of representatives from the Gila River Indian Community and the San Carlos Irrigation and Drainage District); the 2022 rate is $8.00 per acre, and 2023 rate is $16.94 per acre.

Consultation and Coordination With Tribal Governments (Executive Order 13175)

The Department of the Interior strives to strengthen its government-to-government relationship with Indian Tribes through a commitment to consultation with Indian Tribes and recognition of their right to self-governance and Tribal sovereignty. We have evaluated this notice under the Department's consultation policy and under the criteria of Executive Order 13175 and have determined there to be substantial direct effects on federally recognized Tribes because the irrigation projects are located on or associated with Indian reservations. To fulfill its consultation responsibility to Tribes and Tribal organizations, BIA communicates, coordinates, and consults on a continuing basis with these entities on issues of water delivery, water availability, and costs of administration, operation, maintenance, and rehabilitation of projects that concern them. This is accomplished at the individual irrigation project by project, agency, and regional representatives, as appropriate, in accordance with local protocol and procedures. This notice is one component of our overall coordination and consultation process to provide notice to, and request comments from, these entities when we adjust irrigation assessment rates.

Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use (Executive Order 13211)

These rate adjustments are not a significant energy action under the definition in Executive Order 13211. A Statement of Energy Effects is not required.

Regulatory Planning and Review (Executive Order 12866)

These rate adjustments are not a significant regulatory action and do not need to be reviewed by the Office of Management and Budget under Executive Order 12866.

Regulatory Flexibility Act

These rate adjustments are not a rule for the purposes of the Regulatory Flexibility Act because they establish ''a rule of particular applicability relating to rates.'' 5 U.S.C. 601(2).

Unfunded Mandates Reform Act of 1995

These rate adjustments do not impose an unfunded mandate on state, local, or Tribal governments in the aggregate, or on the private sector, of more than $130 million per year. They do not have a significant or unique effect on State, local, or Tribal governments or the private sector. Therefore, the Department is not required to prepare a statement containing the information required by the Unfunded Mandates Reform Act (2 U.S.C. 1531 *et seq.*).

Takings (Executive Order 12630)

These rate adjustments do not affect a taking of private property or otherwise have ''takings'' implications under Executive Order 12630. The rate adjustments do not deprive the public, State, or local governments of rights or property.

Federalism (Executive Order 13132)

Under the criteria in section 1 of Executive Order 13132, these rate adjustments do not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement because they will not

affect the States, the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. A federalism summary impact statement is not required.

Civil Justice Reform (Executive Order 12988)

This notice complies with the requirements of Executive Order 12988. Specifically, in issuing this notice, the Department has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct as required by section 3 of Executive Order 12988.

Paperwork Reduction Act of 1995

These rate adjustments do not affect the collections of information which have been approved by the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995. The OMB Control Number is 1076–0141 and expires January 31, 2023.

National Environmental Policy Act

The Department has determined that these rate adjustments do not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required under the National Environmental Policy Act of 1969, 42 U.S.C. 4321–4370(d)), pursuant to 43 CFR 46.210(i). In addition, the rate adjustments do not present any of the 12 extraordinary circumstances listed at 43 CFR 46.215.

Bryan Newland,

Assistant Secretary—Indian Affairs.

Notice of Proposed Filing of Plats of Survey; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of proposed official filing.

SUMMARY: The plats of surveys for the lands described in this notice are scheduled to be officially filed 30 calendar days after the date of this publication in the BLM Montana State Office, Billings, Montana. The surveys, which were executed at the request of the United States Forest Service Office, Ashland Ranger District, Montana are necessary for the management of these lands.

DATES: A person or party who wishes to protest this decision must file a notice of protest in time for it to be received in the BLM Montana State Office no later than August 29, 2022.

ADDRESSES: A copy of the plats may be obtained from the Public Room at the BLM Montana State Office, 5001 Southgate Drive, Billings, Montana 59101, upon required payment. The plats may be viewed at this location at no cost.

FOR FURTHER INFORMATION CONTACT: Joshua Alexander, BLM Chief Cadastral Surveyor for Montana; telephone: (406) 896–5123; email: *jalexand@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Alexander. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The lands surveyed are:

Principal Meridian, Montana

T. 5 S., R. 46 E.

Secs. 20, 21, 27 thru 30, and 32 thru 36.

T. 6 S., R. 47 E.

Secs. 7, 17, 18, 19, and 20.

A person or party who wishes to protest an official filing of a plat of survey identified earlier must file a written notice of protest with the BLM Chief Cadastral Surveyor for Montana at the address listed in the **ADDRESSES** section of this notice. The notice of protest must identify the plat(s) of survey that the person or party wishes to protest. The notice of protest must be received in the BLM Montana State Office no later than the date described in the **DATES** section of this notice; If received after regular business hours, a notice of protest will be considered filed the next business day. A written statement of reasons in support of the protest, if not filed with the notice of protest, must be filed with the BLM Chief Cadastral Surveyor for Montana within 30 calendar days after the notice of protest is received.

If a notice of protest of the plat(s) of survey is received prior to the scheduled date of official filing or during the 10 calendar day grace period provided in 43 CFR 4.401(a) and the delay in filing is waived, the official filing of the plat(s) of survey identified in the notice of protest will be stayed pending consideration of the protest. Upon receipt of a timely protest, and after a review of the protest, the Authorized Officer will issue a decision either dismissing or otherwise resolving the protest. A plat of survey will then be officially filed 30 days after the protest decision has been issued in accordance with 43 CFR part 4.

If a notice of protest is received after the date described in the **DATES** section of this notice and the 10-calendar-day grace period provided in 43 CFR 4.401(a), the notice of protest will be untimely, may not be considered, and may be dismissed.

Before including your address, phone number, email address, or other personal identifying information in a notice of protest or statement of reasons, you should be aware that the documents you submit—including your personal identifying information—may be made publicly available in their entirety at any time. While you can ask us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Notice of Intent To Prepare a Resource Management Plan for the Grand Staircase-Escalante National Monument in Utah and an Associated Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), the Federal Land Policy and Management Act of 1976, as amended (FLPMA), and Presidential Proclamation 10286, the Bureau of Land Management (BLM) Utah State Director intends to revise a Resource Management Plan (RMP) with an associated Environmental Impact Statement (EIS) for the Grand Staircase-Escalante National Monument (GSENM) and by this notice is announcing the beginning of the scoping period to solicit public comments and identify issues, is providing the planning criteria for public review, and is issuing a call for nominations for areas of critical environmental concern (ACECs). The RMP revision would replace the existing 2020 GSENM RMP and 2020 Kanab-Escalante Planning Area RMP.

DATES: The BLM requests the public submit comments concerning the scope of the analysis, potential alternatives, and identification of relevant information, studies, and ACEC nominations by September 27, 2022. To afford the BLM the opportunity to consider this information and ACEC nominations raised by commenters in the Draft RMP/EIS, please ensure your comments are received prior to the close of the 60-day scoping period or 15 days after the last public meeting, whichever is later.

The BLM also requests the public submit comments on the planning criteria by the same date identified above. The planning criteria will be made available to the public within the first 30 days of the 60-day comment period to ensure the public has at least 30 days to comment on the planning criteria as required by the planning regulations at 43 CFR 1610.2(e). To afford the BLM the opportunity to consider this information and ACEC nominations raised by commenters in the Draft RMP/EIS, please ensure your comments are received prior to the close of the 60-day scoping period or 15 days after the last public meeting, whichever is later.

ADDRESSES: You may submit comments on issues and planning criteria related to the GSENM RMP and nominations of new ACECs by any of the following methods:

- *Website: https://eplanning.blm.gov/eplanning-ui/project/2020343/510*
- *Mail:* ATTN: GSENM RMP Project Manager, BLM Paria River District, 669 S Highway 89A, Kanab, UT 84741

Documents pertinent to this proposal may be examined online at *https://eplanning.blm.gov/eplanning-ui/project/2020343/510* and at the BLM Paria River District Office, 669 US–89A, Kanab, Utah 84741.

FOR FURTHER INFORMATION CONTACT: Scott M. Whitesides, Project Manager, telephone 801–539–4054; address Bureau of Land Management Utah, 440 West 200 South Suite 500, Salt Lake City, Utah 84101; email *swhitesides@blm.gov.* Contact Mr. Whitesides to have your name added to our mailing list. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Mr. Whitesides. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: This document provides notice that the BLM Utah State Director intends to prepare an RMP with an associated EIS for GSENM, announces the beginning of the scoping process, seeks public input on issues and relevant planning criteria, and invites the public to nominate ACECs. The planning area is located in Kane and Garfield counties and encompasses approximately 1.87 million acres of public land.

Purpose and Need for the RMP

This RMP will provide a management framework, including goals, objectives, and management direction, to guide Monument management. Purposes and needs serve to frame issue identification, alternatives development, and effects analyses. The following purposes and desired outcomes are set forward explicitly in Presidential Proclamation 10286 or have been identified based on key present and historical GSENM management challenges. Planning for these desired outcomes will be crucial for development of an RMP that provides direction for addressing critical management challenges. Associated needs and challenges that the RMP will address are also summarized.

1. Protect and restore the entirety of the large, remote, rugged, and markedly impenetrable landscapes, including dark skies and natural soundscapes. The Monument's fundamental values and objects include a rich mosaic of objects of natural, historic, and scientific interest.

Needs and challenges: The immense scale and unspoiled naturalness of the Monument serves as a foundation for the rest of the Monument objects and values, including the diversity of ecotypes and extent and diversity of geological and paleontological resources, vegetation, and wildlife. Through the latter half of the 20th century, Utah's large extent of unspoiled natural, roadless areas was unique in the lower 48 states, ultimately providing for the 1996 GSENM proclamation. Monument visitation is steadily increasing, mostly due to recreational use. International and regional tourism is rising, and Utah is the state with the fastest growing population in the last decade (18.4%); in 2021 Utah's growth was 1.7% while the national population growth was 0.1%. These increases in human presence pose diverse challenges to preservation of resources (*e.g.,* vegetation and soil impacts, loss of potential for human solitude, adverse effects on certain wildlife species, increases in noise). Effects such as these tend to be incremental, and gradual degradation of resources over time can easily occur, almost unnoticed, without adequate management sidebars, as well as overall management goals and objectives for the landscape as a whole. Avoidance of incremental degradation, so that the unique value of a largely unspoiled, natural landscape is retained given ongoing multiple uses, warrants substantial consideration in the planning process.

2. Emphasize the Monument as a living, outdoor laboratory to be used for diverse and significant research and discovery related to the Monument's varied resources, objects, and values.

Needs and challenges: The proclamation that originally designated the Monument in 1996 explained, ''Even today, this unspoiled natural area remains a frontier, a quality that greatly enhances the monument's value for scientific study.'' However, the circumstances surrounding and within the Monument have changed substantially in the past 25 years (see purpose *1,* above). There are substantial management challenges regarding how to maintain the unspoiled naturalness, which is essential to the Monument's purposes of science. Given the intensification of anthropogenic change in the world, natural refugia on the scale of this Monument are increasingly essential, rare, and hard to maintain. Areas such as the Monument are a cornerstone for scientific understanding of the past, and they are equally important for understanding changes and trends that allow us to appropriately plan for the future.

3. Protect and restore biological resources including five life zones, a variety of habitats, and multiple eco-regions, due largely to the remoteness and substantial variation in elevation and topography of the Monument. The Monument contains unique and isolated plant communities, various floristic communities, relic and endemic plants, diverse wildlife including unique species of invertebrates, and a biodiversity of bees, as well as amphibians, birds, and mammals including mountain lion and desert bighorn sheep.

Needs and challenges: Management of living individuals, populations, and interconnected communities and ecosystems must address a spectrum of needs and challenges. The Monument supports a range of ecotypes, as well as remnant, relic, and refugia populations across the landscape's substantial ranges of elevation and large geographic extent. Additionally, climate change and drought are outside the historic range of variability, affecting vegetation and thereby habitat and species. A key component of this planning effort will be identification of appropriate management for changing ecotypes and populations, especially given the scientific emphasis of this Monument.

4. Protect and restore the historical and cultural understanding and appreciation related to Monument objects and values. These objects and values include an exceedingly high density of archaeological sites, modern tribal uses, numerous historic routes and trails including Powell expedition routes and Mormon pioneer trails, historic inscriptions, ghost towns, cowboy line camps, and historic townsites.

This topic focuses on restoration, retention, and education/appreciation of historic and cultural resources.

Needs and challenges: Protection, restoration, identification, and appreciation of such objects and values often requires substantial on-the-ground work, such as inventories, stabilization work, and sometimes development of educational interpretive materials. The RMP planning process should clarify how to select and prioritize such efforts, as well as consider the role of collaboration with outside entities and consultation with Tribal Nations that could both (1) further the aims of understanding and appreciation of these resources and (2) support the work of protection and restoration.

5. Protect the Monument's varied geology and associated scenery with numerous unique areas and features and abundant, important paleontological resources. The entire landscape affords extraordinary visual landscapes and rich geologic and world-class paleontological resources. Reasonably accommodate challenges of remote paleontological research (e.g., transport of large fossils).

Needs and challenges: Extensive scenic exploration can be accessed via paved roads, which serve as the main arteries through the Monument. Paved roads are augmented by several maintained, unpaved roads and some lesser dirt roads. Scenic geology itself, and the opportunity for visual appreciation, is relatively easy to preserve, while other uses of these resources, for example scientific study and personal collection, will require consideration during planning in order to provide for appropriate access, use, and protection. This is important in view of the scientific purposes of the Monument.

6. Protect and restore world-class outdoor recreation opportunities, including hiking and backpacking, hunting, canyoneering, mountain biking, and horseback riding associated with a substantial, regional socioeconomic sector. Serve visitors via several visitor centers with diverse emphases, as well as provide basic facilities to ensure human health and safety (e.g., restrooms).

Needs and challenges: The majority of the direct human visitation to the Monument is recreational. While not identified as an object in need of protection, Proclamation 10286 acknowledges the world class recreational opportunities within the monument that support a travel and tourism sector that is a source of economic opportunity for the region. However, high and increasing levels of recreational visitation are a top management challenge, and appropriate management of recreational use is a central concern to be addressed by the RMP. Large numbers of visitors can degrade visitor experience, raise human safety and health issues (such as related to human waste), and may harm ecologically sensitive areas and species. Challenges in finding a balance between Proclamation objectives and rapidly rising visitation levels means that use quotas or other mitigating management actions will be considered. Additionally, substantial step-down recreation planning is needed, such as for Special Recreation Management Areas. Yet such planning has never occurred on the Monument due to the substantial time and resources it requires.

7. Protect and restore Monument objects and values within a multiple-use context. Monument lands have served multiple-use purposes since Anglo settlement in what is now the State of Utah. Such uses include, for example, grazing, hunting, and recreating. Monument lands were a combination of BLM and Utah School and Institutional Trust Lands Administration lands prior to Monument designation. Some of these lands were being used related to mining, rock hounding for alabaster, and other purposes.

Needs and challenges: Since the time of Monument designation in 1996, controversy and disputes have existed among stakeholders regarding BLM's discretionary uses. Such controversy spans the spectrum of use: allowing for uses such as mining and livestock grazing while also supporting conservation and recreation uses and promoting strong preservation interests. Establishing management that ensures protection of monument objects and values and serves other monument purposes while accommodating other uses, as appropriate, is vital in this planning process.

Preliminary Alternatives

The BLM will be analyzing alternatives that explore and evaluate different ways of achieving the purpose and need listed above. The alternatives will explore different outcomes to be addressed during this planning effort to understand the trade-offs of different land management approaches. The BLM welcomes comments on all preliminary

alternatives as well as suggestions for additional alternatives.

Planning Criteria

The planning criteria guide the planning effort and lay the groundwork for effects analysis by identifying the preliminary issues and their analytical frameworks. Preliminary issues for the planning area have been identified by BLM personnel and from early engagement conducted for this planning effort with Federal, State, and local agencies; Tribes; and other stakeholders. The BLM has identified several preliminary issues for this planning effort's analysis and will provide them for public review as part of the planning criteria within the timeframe identified in **DATES** above. The planning criteria are available for public review and comment at the ePlanning website (see **ADDRESSES**).

Summary of Expected Impacts

Consistent with protection of GSENM objects identified in Proclamation 10286, implementation of a new RMP may impact, either beneficially or adversely, resources and uses within GSENM, including recreation, livestock grazing, soils, water, vegetation, cultural and historic resources, paleontological resources, visual resources, designated areas, social and economic values, and other human and environmental resources. Planning decisions related to livestock grazing will also consider portions of Glen Canyon National Recreation Area because portions of livestock grazing allotments administered by the BLM cross these administrative boundaries.

Schedule for the Decision-Making Process

The BLM will provide additional opportunities for public participation consistent with NEPA and land use planning processes, including a 90-day comment period on the Draft RMP/EIS and a concurrent 30-day public protest period and a 60-day Governor's consistency review on the Proposed RMP. The Draft RMP/EIS is anticipated to be available for public review in the spring of 2023, and the Proposed RMP/Final EIS is anticipated to be available for public protest of the Proposed RMP in late 2023 with an Approved RMP and Record of Decision in spring 2024.

Public Scoping Process

This notice of intent initiates the scoping period and public review of the planning criteria, which guide the development and analysis of the Draft RMP/EIS.

The BLM will be holding a total of five scoping meetings. Two scoping meetings will be held virtually. Three scoping meetings will be conducted in-person: one in Kanab, one in Escalante, and a third meeting held at a yet-to-be-determined location. Details of all meetings will be announced once known. In compliance with Department of the Interior public health guidelines, the BLM may need to hold public meetings in a virtual format if county-level transmission of COVID–19 is ''high'' at the time of the public meetings. In that case, the BLM will hold five virtual public meetings.

The specific dates and locations of these scoping meetings will be announced at least 15 days in advance through local media, social media, and the ePlanning website (see **ADDRESSES**).

The ePlanning website (see **ADDRESSES**) also includes, or will include background information on GSENM, a planning process overview, preliminary planning criteria and interim management guidance. You may submit comments on issues, potential alternatives, relevant information and analyses, and the preliminary planning criteria in writing to the BLM at any public scoping meeting or to the BLM using one of the methods listed in the **ADDRESSES** section.

ACECs

There are currently no designated ACECs within GSENM because the BLM determined under the previous planning efforts that the management provided through those RMPs were sufficient without warranting the designation of ACECs. No areas were identified during preplanning and early engagement for consideration as ACECs.

This notice invites the public to nominate areas for ACEC consideration. To assist the BLM in evaluating nominations for consideration in the Draft RMP/EIS, please provide supporting descriptive materials, maps, and evidence of the relevance and importance of resources or hazards by the close of the public scoping period to facilitate timely evaluation (see **DATES** and **ADDRESSES**). The BLM has identified the anticipated issues related to the consideration of ACECs in the planning criteria.

Cooperating Agencies

Federal, State, and local agencies, along with Tribal Nations may request or be asked by the BLM to participate as a cooperating agency. At this time the BLM has identified the following potential cooperating agencies:

- National Park Service
- United States Fish and Wildlife Service
- USDA Forest Service
- Utah's Public Lands Policy Coordinating Office
- State of Utah School and Institutional Trust Lands Administration
- Utah State Historic Preservation Office
- Kane County, Utah
- Garfield County, Utah
- Washington County Water Conservancy District
- Kaibab Band of Paiute Indians
- Navajo Nation
- Paiute Indian Tribe of Utah
- Pueblo of Acoma
- Pueblo of San Felipe
- Pueblo of Tesuque
- Pueblo of Zuni
- San Juan Southern Paiute Tribe of Arizona
- Hopi Tribe
- Ute Indian Tribe of the Uintah and Ouray Reservation

Responsible Official

The Utah State Director is the deciding official for this planning effort.

Nature of Decision To Be Made

The nature of the decision to be made will be the State Director's selection of land use planning decisions for managing BLM-administered lands under the principles of multiple use and sustained yield in a manner that best addresses the purpose and need.

Interdisciplinary Team

The BLM will use an interdisciplinary approach to develop the plan in order to consider the variety of resource issues and concerns identified. Specialists with expertise in the following disciplines will be involved in this planning effort: cultural resources, Native American concerns, paleontology, minerals, lands/access, recreation, special designations, wildlife, livestock grazing, soils, water resources, vegetation, rangeland management, fisheries, fire management, woodlands/forestry, socioeconomics, environmental justice, visual resources, night sky, soundscapes, air quality, and climate change.

Additional Information

The BLM will identify, analyze, and consider mitigation to address the reasonably foreseeable impacts to resources from the proposed plan and all analyzed alternatives and, in accordance with 40 CFR 1502.14(f), include appropriate mitigation measures not already included in the proposed plan or alternatives. Mitigation may

include avoidance, minimization, rectification, reduction or elimination over time, and compensation; it may be considered at multiple scales, including the landscape scale.

The BLM will utilize and coordinate the NEPA and land use planning processes for this planning effort to help support compliance with applicable procedural requirements under the Endangered Species Act (16 U.S.C. 1536) and Section 106 of the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3), including the public involvement requirements of Section 106. The information about historic and cultural resources and threatened and endangered species within the area potentially affected by the proposed plan will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM MS 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts on cultural resources, will be given due consideration. Federal, State, and local agencies, along with Indian Tribal Nations and other stakeholders that may be interested in or affected by the proposed GSENM RMP that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency. The BLM intends to hold a series of government-to-government consultation meetings. The BLM will send invitations to potentially affected Tribal Nations prior to the meetings. The BLM will provide additional opportunities for government-to-government consultation during the NEPA process.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 40 CFR 1501.9 and 43 CFR 1610.2)

Gregory Sheehan,

State Director.

BILLING CODE 4331–25–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1244]

Certain Batteries and Products Containing Same; Notice of a Commission Final Determination of Violation of Section 337; Issuance of a General Exclusion Order; Termination of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined that there is a violation of Section 337 of the Tariff Act of 1930, as amended, in the above-captioned investigation. The Commission has issued a general exclusion order (''GEO'') barring entry of certain batteries and products containing same that infringe the patents asserted in this investigation. The Commission has terminated this investigation.

FOR FURTHER INFORMATION CONTACT: Michael Liberman, Esq., Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2392. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on February 5, 2021, under Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''Section 337''), based on a complaint filed by One World Technologies, Inc. (''One World'') and Techtronic Power Tools Technology Ltd. (''TTT'') (collectively, ''Complainants''). 86 FR 8379–80 (Feb. 5, 2021). The complaint, as supplemented, alleges a violation of Section 337 based upon the importation into the United States, the sale for importation, or the sale within the United States after importation of certain batteries and products containing same by reason of infringement of the sole claims of U.S. Patent Nos. D579,868 (''the '868 patent''); D580,353 (''the '353 patent''); and D593,944 (''the '944 patent''). *Id.* at 8379. The complaint further alleges that a domestic industry exists. *Id.* The notice of investigation (''NOI'') names thirteen (13) respondents: Darui Development Limited (''Darui Development''); Dongguan Xinjitong Electronic Technology Co., Ltd. (''Dongguan Electronic''); Shenzhen Laipaili Electronics Co., Ltd.; Shenzhen MingYang Creation Electronic Co., Ltd.; Shenzhen Rich Hao Yuan Energy Technology Co., Ltd. (''Shenzhen Rich Hao''); Shenzhen Runsensheng Trading Co., Ltd.; Shenzhen Saen Trading Co., Ltd. (''Shenzhen Saen''); Shenzhen Shengruixiang E-Commerce Co., Ltd.; Shenzhen Uni-Sun Electronics Co., Ltd.; and Shenzhen Vmartego Electronic Commerce Co., Ltd. (collectively, the ''Defaulted Respondents''); Shenzhen Liancheng Weiye Industrial Co., Ltd.; Shenzhen Ollop Technology Co. Ltd.; and Shenzhen Tuo Yu Technology Co., Ltd. *Id.* The Office of Unfair Import Investigations (''OUII'') is participating in this investigation. *Id.*

On May 17, 2021, Commission terminated the investigation based upon the withdrawal of the complaint with respect to respondents Shenzhen Liancheng Weiye Industrial Co., Ltd., Shenzhen Ollop Technology Co. Ltd., and Shenzhen Tuo Yu Technology Co., Ltd., after Complainants were unable to serve these respondents with copies of the Complaint and NOI. Order No. 7 (Apr. 21, 2021), *unreviewed by* Notice (May 17, 2021).

On April 20, 2021, Complainants filed a motion for an order to show cause why the remaining ten (10) named respondents (*i.e.,* the Defaulted Respondents) should not be found in default after failing to respond to the Complaint and NOI, which had been duly served upon them. On May 4, 2021, the motion was granted and an order to show cause was issued. Order No. 8 (May 4, 2021). On June 3, 2021, after they failed to respond to the order to show cause, ALJ issued an ID finding all ten Defaulted Respondents to be in default. Order No. 9 (June 3, 2021), *unreviewed by* Notice (June 23, 2021).

On June 21, 2021, Complainants moved for a summary determination of violation of Section 337 by the Defaulted Respondents and for a recommended determination recommending entry of a GEO and a bond at the rate of 100 percent during the Presidential review period. Complainants did not request issuance of any cease and desist orders.

On July 16, 2021, OUII filed a response to Complainants' motion supporting a finding of summary

determination against only four (4) of the Defaulted Respondents: Darui Development, Dongguan Electronic, Shenzhen Rich Hao, and Shenzhen Saen. Specifically, OUII argued Complainants did not sufficiently connect the importation, sale, or sale after importation of certain of the Accused Products to the Defaulted Respondents. Otherwise, OUII stated it generally supports a finding that Complainants have satisfied the economic prong of the domestic industry requirement under Section 337(a)(3)(A) and (B) (19 U.S.C. 1337(a)(3)(A), (B)) and also supports Complainants' remedy requests.

On March 25, 2022, the presiding administrative law judge (''ALJ'') issued an initial determination (Order No. 15) granting in part and denying in part Complainants' motion for summary determination. The ID finds that Complainants have shown by reliable, probative, and substantial evidence that a violation of Section 337 has occurred with respect to the Asserted Patents as to the following four Defaulted Respondents: Darui Development, Dongguan Electronic, Shenzhen Rich Hao, and Shenzhen Saen. The ID finds that no violation has been established as to any other respondent. The ALJ's recommended determination on remedy and bonding (''RD'') recommends issuance of a GEO with respect to the asserted patents. The RD does not recommend issuance of any cease and desist order.

On April 6, 2022, OUII petitioned for review of certain aspects of the subject ID. No other petitions or responses to petitions were filed.

On May 11, 2022, the Commission determined to review the subject ID in part. *See* 87 FR 29879–80 (May 17, 2022). Specifically, the Commission determined to review the ID's finding regarding the economic prong of the domestic industry requirement and requested briefing. *Id.* at 29880. In addition, the Commission determined to review in part the ID for the limited purpose of making certain corrections in the ID. *Id.* The Commission also requested written submissions on remedy, the public interest, and bonding. *Id.*

On May 25, 2022, Complainants and OUII filed their opening written submissions on the issue under review and on remedy, the public interest, and bonding. On June 1, 2022, OUII filed a reply remedy submission. No other submissions were received by the Commission.

Having reviewed the submissions filed in response to the Commission notice, *see id.,* and the evidentiary record, the Commission has determined to affirm the ID's finding of a violation of Section 337 in this investigation. The Commission has also determined that the appropriate form of relief in this investigation is a GEO prohibiting the unlicensed importation of certain batteries and products containing same that infringe the '868 patent, the '353 patent, and the '944 patent.

The Commission has further determined that the public interest factors enumerated in Subsection (d)(1) (19 U.S.C. 1337(d)(1)) do not preclude issuance of the above-referenced remedial order. Finally, the Commission has determined that a bond in the amount of one hundred (100) percent of the entered value is required to permit temporary importation of the articles in question during the period of Presidential review (19 U.S.C. 1337(j)). The investigation is terminated.

The Commission's order and the record upon which it based its determination were delivered to the President and to the United States Trade Representative on the day of their issuance. The Commission has also notified the Secretary of the Treasury of the order.

The Commission vote for this determination took place on July 25, 2022.

The authority for the Commission's determination is contained in Section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in Part 210 of the Commission's Rules of Practice and Procedure, 19 CFR part 210.

By order of the Commission.

Issued: July 25, 2022.

Katherine M. Hiner,

Acting Secretary to the Commission.

[FR Doc. 2022–16262 Filed 7–28–22; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1239]

Certain Gabapentin Immunoassay Kits and Test Strips, Components Thereof, and Methods Therefor; Notice of Commission Determination To Issue a Limited Exclusion Order Against Defaulting Respondent; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined to issue a limited exclusion order against Kappa City Biotech, SAS of Montlucon, France (''Kappa City''). The Commission has also determined to impose a bond equal to one hundred (100) percent of the entered value of the infringing products imported during the period of Presidential review. The investigation is hereby terminated.

FOR FURTHER INFORMATION CONTACT: Lynde Herzbach, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3228. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On January 25, 2021, the Commission instituted this investigation under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), based on a complaint filed by ARK Diagnostics, Inc. of Fremont, California (''ARK''). *See* 86 FR 6918–19. The complaint, as supplemented, alleges a violation of section 337 based upon the importation into the United States, sale for importation, or sale after importation into the United States of certain gabapentin immunoassay kits and test strips, components thereof, and methods therefor by reason of infringement of certain claims of U.S. Patent Nos. 8,828,665 and 10,203,345. *Id.* The complaint further alleges that a domestic industry exists. *Id.* The notice of investigation names fourteen respondents, including Kappa City; Healgen Scientific, LLC of Houston, Texas; 12PanelMedical, Inc. of Sarasota, Florida; Acro Biotech, Inc. of Rancho Cucamonga, California; AlcoPro, Inc. of Knoxville, Tennessee; American Screening, LLC of Shreveport, Louisiana; Chemtron Biotech Co., Ltd. of San Diego, California; Confirm Biosciences, Inc. of San Diego, California; Hangzhou All Test Biotech Co., Ltd. of Hangzhou, China; Mercedes Medical, LLC of Lakewood Ranch, Florida; TransMed Co., LLC of Alpharetta, Georgia; Transmetron, Inc. of Salt Lake City, Utah; Zhejiang Orient Gene Biotech Co., Ltd. of Huzhou, China; and Shanghai Chemtron Biotech

Co., Ltd. of Shanghai, China (''Shanghai Chemtron''). *See id.* The complaint and notice of investigation were later amended to add two respondents, 12Panel Now, Inc. and Hospital Connect, Inc., both of Boynton Beach, Florida. Order No. 8 (March 9, 2021), *unreviewed by* 86 FR 16640–41 (March 30, 2021).

The Commission previously terminated six respondents based on consent orders. Order Nos. 11 and 12 (Mar. 31, 2021), *unreviewed by* Comm'n Notice (Apr. 15, 2021) (TransMed Co., LLC, 12PanelMedical, Inc., 12Panel Now, Inc., and Hospital Connect, Inc.); Order No. 14 (April 9, 2021), *unreviewed by* Comm'n Notice (Apr. 22, 2021) (Mercedes Medical, LLC); Order No. 15 (April 12, 2021), *unreviewed by* Comm'n Notice (May 12, 2021) (Transmetron Inc.). The Commission also previously terminated four respondents based on settlement agreements. Order No. 13 (Apr. 5, 2021), *unreviewed by* Comm'n Notice (Apr. 19, 2021) (Confirm Biosciences, Inc.); Order No. 17 (May 5, 2021), *unreviewed by* Comm'n Notice (May 18, 2021) (AlcoPro, Inc.); Order No. 18 (May 20, 2021), *unreviewed by* Comm'n Notice (June 21, 2021) (American Screening, LLC); Order No. 29 (Jan. 31, 2022), *unreviewed by* 87 FR 11096–98 (Feb. 28, 2022) (Shanghai Chemtron). The Commission also terminated five respondents based on partial withdrawal of the complaint. Order No. 20 (June 4, 2021), *unreviewed by* Comm'n Notice (June 28, 2021) (Chemtron Biotech, Inc.); Order No. 21 (June 14, 2021), *unreviewed by* Comm'n Notice (July 1, 2021) (Hangzhou AllTest Biotech Co., Ltd.; Acro Biotech, Inc.; Zhejiang Orient Gene Biotech Co, Ltd.; Healgen Scientific, LLC).

On May 18, 2021, the Commission determined not to review an initial determination (Order No. 16) finding Kappa City in default. Order No. 16 (Apr. 30, 2021), *unreviewed by* Comm'n Notice (May 18, 2021).

On December 7, 2021, ARK filed a declaration seeking immediate entry of a limited exclusion order and cease and desist order against Kappa City.

On February 22, 2022, the Commission determined not to review an initial determination granting a motion to terminate Shanghai Chemtron based on settlement. *See* Order No. 29 (Jan. 31, 2022), *unreviewed by* 87 FR 11096–98 (Feb. 28, 2022). The Commission concurrently determined that ARK's declaration was moot given the termination of the final remaining non-defaulting respondent in this investigation. 87 FR at 11097. The Commission also requested briefing on the issues of remedy, bonding, and the public interest. *Id.*

On March 8, 2022, ARK filed the sole response to the Commission's request for briefing. No replies or other submissions were received.

Upon review of the record, including ARK's submission, and in the absence of any response from Kappa City or from other interested persons or government agencies, the Commission has determined to issue a limited exclusion order against Kappa City pursuant to section 337(g)(1). The Commission has determined not to issue a cease and desist order against Kappa City, which is a foreign respondent. *See, e.g., In the Matter of Certain Powered Cover Plates,* Inv. No. 337–TA–1124, Comm'n Op. at 24–28 (July 10, 2020); *Certain Earpiece Devices and Components Thereof,* Inv. No. 337–TA-1121, Comm'n Op. at 42–44 (Nov. 9, 2019); *Certain Electric Skin Care Devices, Brushes and Chargers Therefore, and Kits Containing the Same,* Inv. No. 337–TA–959, Comm'n Op. at 28–33 (Feb. 13, 2017). The Commission has determined that the public interest factors do not preclude issuance of the remedial order. The Commission has further determined to set a bond in the amount of one hundred (100) percent of the entered value of the covered products imported during the period of Presidential review (19 U.S.C. 1337(j)). The Commission's order was delivered to the President and the United States Trade Representative on the day of its issuance. The investigation is hereby terminated.

Commissioners Schmidtlein and Karpel would issue both a limited exclusion order and a cease and desist order against Kappa City pursuant to section 337(g)(1) because all requirements of this provision are met. 19 U.S.C. 1337(g)(1)(A)–(E). Specifically, Kappa City was named in the complaint and was served the complaint and notice of investigation. *See* Order No. 16 (Apr. 30, 2021), *unreviewed by* Comm'n Notice (May 18, 2021). Kappa City failed to show good cause why it should not be held in default for failing to respond to the complaint and notice of investigation. *See id.* These findings satisfy subsections 337(g)(1)(A)–(D). ARK requested a limited exclusion order and a cease and desist order against Kappa City satisfying subsection 337(g)(1)(E). Given that subsections 337(g)(1)(A)–(E) are satisfied, the statute directs the Commission to issue the requested limited exclusion order and cease and desist order, subject to consideration of the public interest. Commissioners Schmidtlein and Karpel find that issuance of the requested relief would not adversely impact the public interest factors.

While temporary remote operating procedures are in place in response to COVID–19, the Office of the Secretary is not able to serve parties that have not retained counsel or otherwise provided a point of contact for electronic service. Accordingly, pursuant to Commission Rules 201.16(a) and 210.7(a)(1) (19 CFR 201.16(a), 210.7(a)(1)), the Commission orders that the complainant complete service for any party/parties without a method of electronic service noted on the attached Certificate of Service and shall file proof of service on the Electronic Document Information System (EDIS).

The Commission vote for this determination took place on July 25, 2022.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: July 25, 2022.

Katherine Hiner,

Acting Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–1020]

Importer of Controlled Substances Application: Usona Institute

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Usona Institute has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to **SUPPLEMENTARY INFORMATION** listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may submit electronic comments on or objections to the issuance of the proposed registration on or before August 29, 2022. Such persons may also file a written request for a hearing on the application on or before August 29, 2022.

ADDRESSES: The Drug Enforcement Administration requires that all comments be submitted electronically through the Federal eRulemaking Portal,

which provides the ability to type short comments directly into the comment field on the web page or attach a file for lengthier comments. Please go to *https://www.regulations.gov* and follow the online instructions at that site for submitting comments. Upon submission of your comment, you will receive a Comment Tracking Number. Please be aware that submitted comments are not instantaneously available for public view on *https://www.regulations.gov.* If you have received a Comment Tracking Number, your comment has been successfully submitted and there is no need to resubmit the same comment. All requests for a hearing must be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrissette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152. All requests for a hearing should also be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on April 27, 2022, Usona Institute, 2780 Woods Hollow Road, Room 2412, Fitchburg, Wisconsin 53711–5370, applied to be registered as an importer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
5-Methoxy-N-N-dimethyltryptamine.	7431	I
Dimethyltryptamine ...	7435	I
Psilocybin	7437	I
Psilocyn	7438	I

The institute plans to import the listed controlled substances to be used for research and analytical purposes. The materials will not be used for clinical trials or bulk manufacture. No other activity for these drug codes is authorized for this registration.

Approval of permit applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of Food and Drug Administration-approved or non-approved finished dosage forms for commercial sale.

Kristi O'Malley,

Assistant Administrator.

BILLING CODE P

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

[OMB Number 1110–NEW]

Agency Information Collection Activities; Proposed eCollection eComments Requested; New Collection

AGENCY: Laboratory Division-RSU, Federal Bureau of Investigation, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Laboratory Division-RSU, Federal Bureau of Investigation, Department of Justice, is submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: The Department of Justice encourages public comment and will accept input until September 27, 2022.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Libby Stern, Research Chemist, Federal Bureau of Investigation Laboratory Division, Research and Support Unit, 2501 Investigation Ave, Quantico, VA 22135, *geophysics@fbi.gov,* 703–632–7825.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

➢ Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Federal Bureau of Investigation, Laboratory Division-RSU, including whether the information will have practical utility;

➢ Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

➢ Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

➢ Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection*: New collection.

2. *The Title of the Form/Collection*: Metal Detector Use in Crime Scene Investigations

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection*: FBI IRB number 644–22. The applicable component within the Department of Justice is the Federal Bureau of Investigation, Laboratory Division-RSU.

4. *Affected public who will be asked or required to respond, as well as a brief abstract*: Federal Government, State, Local or Tribal Government. Those completing the questionnaires are either active or retired law enforcement personnel. This research study consists of a questionnaire to gather information on the applications metal detectors for law enforcement at crime scene investigations. Participants will be asked what were the composition of law enforcement targets and the environment which they are searching for said targets. An objective of the questionnaire is to learn if advance methods of detection were used to identify suspected targets such as a ground penetrating radar or magnetometer. The results may be published and used to understand applications of metal detectors by law enforcement at crime scenes.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond*: We expect no more than 100 individuals completing the questionnaire. On average, we expect an average of 10–15 minutes to complete the questionnaire.

6. *An estimate of the total public burden (in hours) associated with the collection*: 25 hours.

If additional information is required contact: Robert Houser, Assistant Director, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: July 26, 2022.

Robert Houser,

Assistant Director, Policy and Planning Staff, Office of the Chief Information Officer, U.S. Department of Justice.

Overview of This Information Collection

1. *Type of Information Collection:* New collection.

2. *The Title of the Form/Collection:* Law Enforcement Use of Geophysical Methods.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* FBI IRB number 645–22. The applicable component within the Department of Justice is the Laboratory Division-RSU, Federal Bureau of Investigation.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Federal Government, State, Local or Tribal Government. This questionnaire is to gather information from active and retired law enforcement on the applications of geophysical methodologies, such as ground penetrating radar (GPR) and magnetometers, to detect concealed targets (for example: homicide graves, drugs, or weapons) as part of criminal investigations. The respondents will give insight on who performed the geophysical surveys, the suspected targets, the survey environment, along with summaries of 1 to 3 geophysical surveys conducted. The results may be published and used to understand practical uses of geophysical methods for law enforcement investigations.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* We expect no more than 100 individuals completing the questionnaire. On average we expect an average of 10–15 minutes to complete the survey.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 25 hours.

If additional information is required contact: Robert Houser, Assistant Director, Policy and Planning Staff, Justice Management Division, Department of Justice, Two Constitution Square, 145 N Street NE, 3E.206, Washington, DC 20530.

Dated: July 22, 2022.

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On July 25, 2022, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of Colorado in the lawsuit entitled *United States and State of Colorado* v. *DCP Operating Company, LP, et al.,* Civil Action No. 1:22–cv–01829–NRN.

The United States and the State of Colorado jointly filed this lawsuit under the Clean Air Act against Defendants DCP Operating Company, LP; DCP Midstream Holding, LLC; DCP LP Holdings, LLC; DCP Partners Colorado LLC; DCP Assets Holding, LP; and DCP Lucerne 2 Plant LLC, alleging violations of leak detection and repair requirements at seven natural gas processing plants in Colorado. The complaint seeks injunctive relief and civil penalties for the defendants' alleged failures to monitor and repair leaking equipment across the seven natural gas processing plants. The consent decree requires the defendants to perform injunctive relief to address the alleged violations, implement a mitigation project to help offset excess emissions caused by the alleged violations, and pay a $3,250,000 civil penalty. The civil penalty will be split evenly between the United States and the State of Colorado.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and State of Colorado* v. *DCP Operating Company, LP, et al.,* D.J. Ref. No. 90–5–2–1–12335. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the consent decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the

consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $23.50 (25 cents per page reproduction cost) payable to the United States Treasury.

Jeffrey Sands,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 2022–16259 Filed 7–28–22; 8:45 am]

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Modification of Consent Decree Under the Comprehensive Environmental Response Compensation and Liability Act

On July 1, 2022, the Department of Justice lodged a proposed Modification of Consent Decree with the United States District Court for the Western District of Pennsylvania in the lawsuit entitled *United States and the Territory of American Samoa* v. *Starkist Co. and Starkist Samoa Co.,* Civil Action No. 2:17 CV 01190–DSC.

The proposed Modification of Consent Decree pertains to a consent decree entered by the United States District Court for the Western District of Pennsylvania, Pittsburgh Division on March 7, 2018, (''Modification''), which resolved claims arising under sections 301(a) and 311(j) of the Clean Water Act, 42 U.S.C. 7412, sections 312 and 313 of the Emergency Planning and Community Right-to-Know Act, 42 U.S.C. 11022 and 11023, and section 3010 of the Resource Conservation and Recovery Act, 42 U.S.C. 6930, and the regulations promulgated under those statutes. The Modification would, among other things, require Starkist Co. and Starkist Samoa, Co. to achieve and maintain compliance with the effluent limits in its National Pollution Discharge Elimination System (NPDES) permit in an alternative manner than that set forth in the original consent decree.

Pursuant to 28 U.S.C. 50.7, the United States will publish a notice of the lodging of the proposed Modification of the consent decree in the **Federal Register**. The date that notice is published will open a 30-day period for public comment on the proposed Modification of the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and Territory of American Samoa* v. *StarKist Co.* and Starkist Samoa Co., D.J. Ref. No. 90–5–1–1–11357. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Modification may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* An unofficial translation of the Modification is available along with the official English version on our website. O loo i la matou laupepa o upega tafa'ilagi se faaliliuga e le'i faaaloa'ia o le Teuteuga faatasi ma lona tusitusiga i le gagana Peretania. We will provide a paper copy of the consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $11.25 (25 cents per page reproduction cost) payable to the United States Treasury.

Lori Jonas,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2022–058]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice.

SUMMARY: NARA is proposing to request that the Office of Management and Budget (OMB) renew approval of an information collection our Office of Government Information Services (OGIS) uses to obtain customer intake information and consent as part of its mediation services program. OGIS collects customer name, contact information, case number, information on the customer's concern areas/resolution goals, and documents relating to the underlying Freedom of Information Act/Privacy Act request or appeal as part of its intake process in order to provide mediation services. In some cases, customers also complete a privacy consent form, NA Form 10003, authorizing OGIS to make inquiries on the customer's behalf and authorizing agencies to release to OGIS information and records related to their FOIA/Privacy Act requests and appeals. We invite you to comment on this proposed information collection.

DATES: We must receive written comments on or before September 27, 2022.

ADDRESSES: Send comments to Paperwork Reduction Act Comments (MP), Room 4100; National Archives and Records Administration; 8601 Adelphi Road; College Park, MD 20740–6001, or email them to *tamee.fechhelm@nara.gov.*

FOR FURTHER INFORMATION CONTACT: Contact Tamee Fechhelm by telephone at 301–837–1694 with requests for additional information or copies of the proposed information collection and supporting statement.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), we invite the public and other Federal agencies to comment on proposed information collections. The comments and suggestions should address one or more of the following points: (a) whether we need the proposed information collection to properly perform our agency functions; (b) our estimate of the burden of the proposed information collection and its accuracy; (c) ways we could enhance the quality, utility, and clarity of the information we collect; (d) ways we could minimize the burden on respondents of collecting the information, including through information technology; and (e) whether this collection affects small businesses. We will summarize any comments you submit and include the summary in our request for OMB approval. All comments will become a matter of public record. In this notice, we solicit comments concerning the following information collection:

Title: Freedom of Information Act (FOIA) Request for Assistance and Consent.

OMB number: 3095–0068.

Agency form number: NA Form 10003.

Type of review: Regular.

Affected public: Individuals or households, business or other for-profit,

not-for-profit institutions, and Federal Government.

Estimated number of respondents: 3,676.

Estimated time per response: Ten minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 609 hours (3,646 responses × 10 minutes/by 60 = 608 and 30 responses × 2 minutes/by 60 = 1).

Abstract: In order to fulfill its Government-wide statutory mission to mediate FOIA disputes between requesters and agencies, OGIS must communicate with Government departments and agencies regarding the customer's Freedom of Information Act (FOIA)/Privacy Act of 1974 request or appeal. As a result, OGIS collects intake information from customers who request OGIS's mediation services. This information includes the customer's name, contact information, FOIA case number, information on the customer's concern areas/resolution goals, and documents relating to the underlying Freedom of Information Act/Privacy Act request or appeal. Customers provide this information by phone, fax, email, or mail.

OGIS and other agencies must handle FOIA and Privacy Act-protected case information in conformity with the requirements of the FOIA and Privacy Act, including 5 U.S.C. 552a(b), which prohibits agencies from releasing Privacy Act-protected information without an already-established routine use or consent of the person to whom the information pertains. In accord with this requirement, a subset of customers also must fill out a privacy consent form, NA Form 10003, if dealing with an agency that has not published a system of records notice with a routine use for release of information to OGIS.

OGIS uses the information customers provide in this information collection to contact customers, request information on the customer's case from other Federal agencies, and provide the requested assistance. Without the information submitted in the intake process and the consent form, OGIS would be unable to get the information from other agencies or fulfill its mediation mission.

Swarnali Haldar,

Executive for Information Services/CIO.

NATIONAL SCIENCE FOUNDATION

Sunshine Act Meetings

The National Science Board (NSB) hereby gives notice of the scheduling of meetings for the transaction of National Science Board business pursuant to the National Science Foundation Act and the Government in the Sunshine Act.

TIME AND DATE: Wednesday, August 3, 2022, from 1:00 p.m.–5:45 p.m., and Thursday, August 4, 2022, from 9:00 a.m.–2:30 p.m. EDT.

PLACE: These meetings will be held at NSF headquarters, 2415 Eisenhower Avenue, Alexandria, VA 22314, and by videoconference. To attend in-person, please email your name as it appears on your photo ID, along with your affiliation, at least 24 hours in advance to *nationalsciencebrd@nsf.gov.* If the COVID status for Alexandria, Virginia remains ''medium'' or goes to ''high,'' please fill out and bring OMB's certification of vaccination form with you. Visitors who are not vaccinated or refuse to divulge their vaccination status will not be admitted. All open sessions of the meeting will be webcast live on the NSB YouTube channel.

August 3, 2022: *https://youtu.be/xz85K4mCmSs.*

August 4, 2022: *https://youtu.be/DS6jsZexews.*

STATUS: Parts of these meetings will be open to the public. The rest of the meetings will be closed to the public. See full description below.

MATTERS TO BE CONSIDERED:

Wednesday, August 3, 2022

Plenary Board Meeting

Open Session: 1:00 p.m.–3:35 p.m.

- NSB Chair's Remarks
- NSF Director's Remarks
  - Cool Science presentations
- Discussion with Under Secretary for Science and Innovation, US Department of Energy, Geraldine Richmond
- Antarctic Science Strategy

Closed Session: 3:35 p.m.–5:45 p.m.

- Antarctic Science Strategy
- NSB Chair's Remarks
- Approval of Prior Closed Meeting Minutes
- NSF Director's Remarks
  Agency Operating Status
- Research Security Update
- Vote to Enter Executive Plenary Closed
- Executive Plenary Closed
  - NSB Chair's Opening Remarks
- Approval of Prior Meeting Minutes
- Director's Remarks, including organizational updates

Thursday, August 4, 2022

Plenary Board

Open Session: 9:00 a.m.–10:05 a.m.

- NSB Chair Welcome and Remarks
- NSF Director's Remarks
  Senior Staff Updates
  OLPA Update Information Item
- Committee and Working Group Reports
  - Committee on Oversight
  - Committee on External Engagement
  - Committee on Science and Engineering Policy
  - Socioeconomic Status Working Group

Closed Session: 12:15 p.m.–1:55 p.m.

- NSB Chair's Opening Remarks
- Committee Reports
- Committee on Awards and Facilities Report
  - MAGLab Vote
  - NOIRLab Vote
  - RCRV Vote
  - SAGE–GAGE Vote
  - LCCF Vote
- Committee on Strategy Report
- Subcommittee on Technology, Innovation, and Partnerships Report

Open Session: 2:05 p.m.–2:30 p.m.

- NSB Chair's Activities
- NSB 2023 Meeting Dates Vote
- Approval of Prior Meeting Minutes
- NSB Chair's Closing Remarks
- NSF Director's Closing Remarks

Meeting Adjourns: 2:30 p.m.

PORTIONS OPEN TO THE PUBLIC:

Wednesday, August 3, 2022

1:00 p.m.–3:35 p.m. Plenary NSB

Thursday, August 4, 2022

9:00 a.m.–10:05 a.m. Plenary NSB
2:05 p.m.—2:30 p.m. Plenary NSB

PORTIONS CLOSED TO THE PUBLIC:

Wednesday, August 3, 2022

3:35 p.m.–5:45 p.m. Plenary NSB, including executive closed items

Thursday, August 4, 2022

12:15 p.m.–1:55 p.m. Plenary NSB

Members of the public are advised that the NSB provides some flexibility around start and end times. A session may be allowed to run over by as much as 15 minutes if the Chair decides the extra time is warranted. The next session will start no later than 15 minutes after the noticed start time. If a session ends early, the next meeting may start up to 15 minutes earlier than the noticed start time. Sessions will not vary from noticed times by more than 15 minutes.

CONTACT PERSON FOR MORE INFORMATION: The NSB Office contact is Chris Blair, *cblair@nsf.gov,* 703–292–7000. The NSB Public Affairs contact is Nadine Lymn, *nlymn@nsf.gov,* 703–292–2490. Please refer to the NSB website for additional information: *https://www.nsf.gov/nsb.*

NATIONAL SCIENCE FOUNDATION

Service Contract Inventory; Notice of Availability

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The Division of Acquisition and Cooperative Support within the National Science Foundation (NSF) is publishing this notice to advise the public of the availability of its Fiscal Year (FY) 2021 Service Contracts Inventory Analysis Report.

FOR FURTHER INFORMATION CONTACT: Raymond McCollum, Policy Branch Chief, Division of Acquisition and Cooperative Support, National Science Foundation. Phone: 703–292–4225; email: *rmccollu@nsf.gov.*

SUPPLEMENTARY INFORMATION: NSF's FY 2021 Service Contract Inventory Analysis Report is included as part of a governmentwide service contract inventory. The inventory includes covered service contracts that were awarded in FY 2021. The NSF analyzes this data for the purpose of determining whether its contract labor is being used in an effective and appropriate manner and if the mix of federal employees and contractors in the agency is effectively balanced. The report does not include contractor proprietary or sensitive information.

The FY 2021 Service Contract Inventory Analysis Report is provided at the following link: *https://www.nsf.gov/bfa/dcca/contracts/index.jsp.*

Authority: 42 U.S.C. 1861, *et seq.*

Dated: July 26, 2022.

Raymond L. McCollum,

Policy Branch Chief, National Science Foundation.

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0130]

High Energy Arcing Fault Hazard Frequency and Consequence Modeling

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft NUREG; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft NUREG–2262, ''High Energy Arcing Fault Frequency and Consequence Modeling.''

DATES: Submit comments by August 29, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0130. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Gabriel J. Taylor, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–0781, email: *Gabriel.Taylor@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2022–0130 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2022–0130.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The draft NUREG–2262 ''High Energy Arcing Fault Frequency and Consequence Modeling'' is available in ADAMS under Accession No. ML22158A071.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2022–0130 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

The NRC Office of Nuclear Regulatory Research and the Electrical Power Research Institute (EPRI) are advancing the understanding and state-of-practice for modeling High Energy Arcing Faults (HEAF) in fire Probabilistic Risk Assessment. NUREG/CR–6850 and NUREG/CR–6850 Supplement 1 provide the basic methods to analyze the risk associated with HEAFs in power distribution equipment (switchgear and load centers) and bus ducts (including iso-phase bus ducts), respectively. Since the publication of these two reports, the state of knowledge of the HEAF phenomena has advanced significantly. A thorough understanding of the nuclear power plant electrical distribution system and its performance during faulted conditions along with a review and categorization of industry events has occurred. Additionally, experimentation—including full scale testing on HEAF-susceptible equipment, small scale testing, and hazard estimation have increased the understanding of parameters that affect the dimensions of the zone of influence (ZOI).

In draft NUREG–2262 titled, ''High Energy Arcing Fault Frequency and Consequence Modeling,'' the NRC worked with the EPRI to combine previous HEAF-related research, methods, and data to improve realism in calculating plant risk due to HEAFs. Ignition frequency and non-suppression estimates are updated with the most recently available industry operating experience. The ZOI configurations are expanded. Previous guidance postulated one ZOI for each category of equipment (switchgear and load centers, bus ducts, and iso-phase bus ducts). The development and use of HEAF hazard estimation tools allowed for the expansion of ZOI configurations by using scenario specific parameters such as fault current magnitude, arc voltage, duration, location, electrode composition, and type of equipment, to more accurately predict the ZOI. The ZOIs results are grouped by the working group to determine consensus ZOIs for the three classes of equipment with varying levels of detail commensurate with potential risk significance.

The information contained within the draft research information letter is expected to be used in the future as the state-of-the-art method for characterizing the risk to nuclear facilities from a HEAF.

Dated: July 25, 2022.

For the Nuclear Regulatory Commission.

Mark H. Salley,

Chief, Fire and External Hazards Analysis Branch, Division of Risk Analysis, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2021–0202]

Information Collection: Safeguards on Nuclear Material, Implementation of US/IAEA Agreement

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''Safeguards on Nuclear Material, Implementation of US/IAEA Agreement.''

DATES: Submit comments by August 29, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–

0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0202 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0202.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The final supporting statement is available in ADAMS under Accession No. ML22165A166.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''Safeguards on Nuclear Material, Implementation of US/IAEA Agreement.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on March 15, 2022 (87 FR 14585).

1. *The title of the information collection:* Part 75 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Safeguards on Nuclear Material, Implementation of US/IAEA Agreement.''
2. *OMB approval number:* 3150–0055.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not applicable.
5. *How often the collection is required or requested:* Selected licensees are required to provide reports of nuclear material inventory and flow for selected facilities under the US/IAEA Safeguards Agreement, permit inspections by International Atomic Energy Agency Agreement (IAEA) inspectors, complementary access of IAEA inspectors under the Additional Protocol, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified amounts of nuclear material. Reporting is done when specified events occur. Recordkeeping for nuclear material accounting and control information is done in accordance with specific instructions.
6. *Who will be required or asked to respond:* Licensees required to report information required by the U.S. Additional Protocol. Licensed possessors of nuclear material outside facilities in the U.S. Caribbean Territories.
7. *The estimated number of annual responses:* 22 (12 reporting responses + 10 recordkeepers).
8. *The estimated number of annual respondents:* 10.
9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 3,234.
10. *Abstract:* 10 CFR part 75, requires selected licensees to provide reports of nuclear material inventory and flow for selected facilities under the US/IAEA Safeguards Agreement, permit inspections by IAEA inspectors, complementary access of IAEA inspectors under the Additional Protocol, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified amounts of nuclear material. In addition, this collection is being renewed to include approximately 6 entities subject to the U.S.–IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366). These licensees will provide reports of nuclear material inventory and flow for entities under the U.S.–IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366), permit inspections by IAEA inspectors, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified amounts of nuclear material. These licensees will also follow written material accounting and control procedures, although actual reporting of transfer and material balance records to the IAEA will be done through the U.S. State system (Nuclear Materials Management and Safeguards System, collected under OMB clearance numbers 3150–0003, 3150–0004, 3150–0057, and 3150–0058). The NRC needs this information to implement its responsibilities under the US/IAEA agreement.

Dated: July 26, 2022.

For the Nuclear Regulatory Commission.

Kristen E. Benney,

Acting NRC Clearance Officer, Office of the Chief Information Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2022–0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of August 1, 8, 15, 22, 29, September 5, 2022. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: *https://www.nrc.gov/public-involve/public-meetings/schedule.html.*

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (*e.g.,* braille, large print), please notify Anne Silk, NRC Disability Program Specialist, at 301–287–0745, by videophone at 240–428–3217, or by email at *Anne.Silk@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301–415–1969, or by email at *Wendy.Moore@nrc.gov* or *Betty.Thweatt@nrc.gov.*

MATTERS TO BE CONSIDERED:

Week of August 1, 2022

There are no meetings scheduled for the week of August 1, 2022.

Week of August 8, 2022—Tentative

There are no meetings scheduled for the week of August 8, 2022.

Week of August 15, 2022—Tentative

There are no meetings scheduled for the week of August 15, 2022.

Week of August 22, 2022—Tentative

There are no meetings scheduled for the week of August 22, 2022.

Week of August 29, 2022—Tentative

There are no meetings scheduled for the week of August 29, 2022.

Week of September 5, 2022—Tentative

There are no meetings scheduled for the week of September 5, 2022.

CONTACT PERSON FOR MORE INFORMATION: For more information or to verify the status of meetings, contact Wesley Held at 301–287–3591 or via email at *Wesley.Held@nrc.gov.*

The NRC is holding the meetings under the authority of the Government in the Sunshine Act, 5 U.S.C. 552b.

Dated: July 27, 2022.

For the Nuclear Regulatory Commission.

Monika G. Coflin,

Technical Coordinator, Office of the Secretary.

NUCLEAR REGULATORY COMMISSION

[NRC–2021–0181]

Information Collection: Packaging and Transportation of Radioactive Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, ''Packaging and Transportation of Radioactive Material.''

DATES: Submit comments by August 29, 2022. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David C. Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0181 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0181.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The final supporting statement and part 71 of title 10 of the *Code of Federal Regulations* (10 CFR) burden spreadsheet are available in ADAMS under Accession Nos. ML22138A184 and ML22138A186.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David C. Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *Infocollects.Resource@nrc.gov.*

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to

include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''Packaging and Transportation of Radioactive Material.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on March 15, 2022 (87 FR 14587).

1. *The title of the information collection:* 10 CFR part 71 ''Packaging and Transportation of Radioactive Material.''

2. *OMB approval number:* 3150–0008.

3. *Type of submission:* Extension.

4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* On occasion. Application for package certification may be made at any time. Required reports are collected and evaluated on a continuous basis as events occur.

6. *Who will be required or asked to respond:* All NRC specific licensees who place byproduct, source, or special nuclear material into transportation, and all persons who wish to apply for NRC approval of package designs for use in such transportation.

7. *The estimated number of annual responses:* 611.

8. *The estimated number of annual respondents:* 225.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 30,619 hours (25,913 hours reporting + 4,575 hours recordkeeping + 131 hours third-party disclosure).

10. *Abstract:* The NRC regulations in 10 CFR part 71 establish requirements for packaging, preparation for shipment, and transportation of licensed material, and prescribe procedures, standards, and requirements for approval by NRC of packaging and shipping procedures for fissile material and for quantities of licensed material in excess of Type A quantities. The NRC collects information pertinent to 10 CFR part 71 for three reasons: to issue a package approval; to ensure that any incidents or package degradation or defect are appropriately captured, evaluated and if necessary, corrected to minimize future potential occurrences; and to ensure that all activities are completed using an NRC-approval quality assurance program.

Dated: July 26, 2022.

For the Nuclear Regulatory Commission.

Kristen E. Benney,

Acting NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–93, OMB Control No. 3235–0087]

Submission for OMB Review; Comment Request: Extension: Rule 15Bc3–1 and Form MDSW, Withdrawal From Registration of Municipal Securities Dealers

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the previously approved collection of information provided for in Rule 15Bc3–1 (17 CFR 240.15Bc3–1) and Form MSDW (17 CFR 249.1110) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 15Bc3–1 provides that a notice of withdrawal from registration with the Commission as a bank municipal securities dealer must be filed on Form MSDW. The Commission uses the information contained in Form MSDW in determining whether it is in the public interest to permit a bank municipal securities dealer to withdraw its registration. This information is also important to the municipal securities dealer's customers and to the public because it provides, among other things, the name and address of a person to contact regarding any of the municipal securities dealer's unfinished business.

Based upon past submissions of two filings in 2019, zero filings in 2020, zero filings in 2021, and zero filings so far in 2022, the Commission estimates that approximately one respondent will use Form MSDW annually, with a total hour burden for all respondents of approximately 1 hour per year (0.5 hours rounded up to 1 hour). This estimate is based on the Commission staff's experience in administering the form. The form is available from the Commission, and can usually be completed by checking appropriate boxes and writing the name and address of the bank municipal securities dealer, and the name and address of the person who has or will have custody of the bank municipal securities dealer's books and records. The staff estimates that the average internal compliance cost per hour is approximately $406.[1] Therefore, the estimated total annual internal cost of compliance is approximately $203 per year (0.5 hours/year × $406/hour = $203/year).

Rule 15Bc3–1 does not contain an explicit recordkeeping requirement, but the instructions for filing Form MSDW state that an exact copy should be retained by the registrant. Providing the information on the application is mandatory in order to withdraw from registration with the Commission as a bank municipal securities dealer. The information contained in the notice will not be kept confidential.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent by August 29, 2022 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

[1] The estimate of $406 per hour is for a compliance attorney, based on the Securities Industry and Financial Markets Association's Management & Professional Earnings in the Securities Industry 2013, modified by Commission staff to account for an 1800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

July 25, 2022.

J. Matthew DeLesDernier,

Deputy Secretary.

[FR Doc. 2022–16258 Filed 7–28–22; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95361; File No. SR–NYSECHX–2022–17]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Fee Schedule

July 25, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 12, 2022, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Fee Schedule (the ''Fee Schedule'') related to colocation to remove obsolete text. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule related to colocation to remove obsolete text.[4]

(1) Proposal To Change Names of Select Third Party Systems and Third Party Data Feeds

As set forth in the Fee Schedule, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[5] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Fee Schedule.

The Exchange proposes to amend the list of Third Party Systems in the Fee Schedule to reflect the following updated names for existing Third Party Systems:

- Change the name of the ''Miami International Securities Exchange'' to ''MIAX Options,'' and
- Change the name of the ''MIAX PEARL'' to ''MIAX PEARL Options.''

The Exchange also proposes to amend the list of Third Party Data Feeds in the Fee Schedule to reflect the following updated names for existing Third Party Data Feeds:

- Change the name ''Miami International Securities Exchange/MIAX PEARL'' to ''MIAX Options/MIAX PEARL Options;'' and
- Change ''SR Labs—SuperFeed'' data feeds to ''Vela—SuperFeed,'' to reflect the content provider's recent change to the name of these products.

This change would update the names of these services, but would not make any change to the services provided.

(2) Proposal To Delete Discontinued Third Party Data Feed

The Exchange proposes to delete the ''NASDAQ OMDF'' data feed from the list of available Third Party Data Feeds, as it is no longer offered by the content service provider.

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE National, Inc. has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–30, SR–NYSEAMER–2022–31, SR–NYSEArca–2022–41, and SR–NYSENAT–2022–12.

[5] *See* Securities Exchange Act Release No. 87408 (October 28, 2019), 84 FR 58778 (November 1, 2019) (SR–NYSECHX–2019–27).

(3) Proposal To Remove References to ICE Data Global Index

The Exchange proposes to remove obsolete references to the ICE Data Global Index (the ''GIF'') from the list of Third Party Data Feeds available for connectivity and related text.

In May 2020, ICE, which publishes the GIF, announced to its customers that before the end of 2020, it would cease offering the GIF as a stand-alone product. The Exchange accordingly amended its Fee Schedule to inform customers that it would cease offering connectivity to the GIF once it is no longer available.[6]

ICE has informed the Exchange that it ceased offering the GIF as a stand-alone product, making the references to the GIF obsolete. The operative date was announced through a customer notice. Accordingly, the Exchange proposes to remove ''ICE Data Global Index * '' and the corresponding asterisked note from the Fee Schedule.

In order to implement the proposed change, the Exchange proposes to make the following changes to the section of the Fee Schedule entitled ''Connectivity to Third Party Data Feeds'':

- In the first paragraph and in the table of Third Party Data Feeds, delete ''ICE Data Global Index * ''.
- Following the table of Third Party Data Feeds, delete the following text:

** ICE will cease to offer the GIF as a stand-alone product, which the Exchange has been informed by ICE is currently expected to occur before the end of 2020. The Exchange will announce the operative date through a customer notice. Any change fees that a User would otherwise incur as a result of the proposed change will be waived.*

(4) Proposal To Remove the Temporary Waiver of Hot Hands Fees

The Exchange proposes to remove the obsolete reference to the waiver of Hot Hands fees in light of the reopening of the data center in Mahwah, New Jersey (''Mahwah Data Center'' or ''MDC'').

In March 2020, ICE announced to each User that, starting on March 16, 2020, the MDC would be closed to third parties in response to COVID–19. The Exchange temporarily waived all Hot Hands fees from the date of the closing through the date of the reopening of the MDC, and added a note to the fees for the Hot Hands service stating as much.[7]

[6] *See* Securities Exchange Act Release No. 88990 (June 2, 2020), 85 FR 34778 (June 8, 2020) (SR–NYSECHX–2020–17).

[7] The Exchange first waived the Hot Hands Fee in a March 17, 2020 filing, and subsequently extended the waiver four times. *See* Securities Exchange Act Release Nos. 88400 (March 17, 2020),

Continued

The MDC reopened on October 1, 2020. The date of the reopening was announced through a customer notice. As a result of the reopening, the waiver of Hot Hands fees ceased, and the note became obsolete. The Exchange now proposes to remove the obsolete text.

In order to implement this proposed change, the Exchange proposes to make the following changes to the Fee Schedule:

• In the Types of Service table, remove the ''†'' symbol after ''Hot Hands Service *** ''.

• Following the Types of Service table, remove the following text:

† Fees for Hot Hands Services will be waived beginning on March 16, 2020 through the reopening of the Mahwah, New Jersey data center. The date of the reopening will be announced through a customer notice.

(5) Proposal To Remove Obsolete Text About Transition Period for Suspended Services

The Exchange proposes to remove obsolete text regarding the transition period that expired on May 24, 2021 concerning the Exchange's provision of suspended services at no charge.

As background, on March 10, 2021, the Exchange filed with the Commission a proposed rule change for immediate effectiveness that amended the colocation services offered by the Exchange to provide Users the option to access the systems and data feeds of various additional third parties.[8] The proposed rule change became operative on April 9, 2021, and five Users subsequently contracted to receive the services that were added in the filing.

On May 7, 2021, the Commission suspended the filing and instituted proceedings to determine whether the proposed rule change should be approved or disapproved.[9] Such action suspended the Exchange's ability to offer access to Third Party Systems from Long Term Stock Exchange, Members Exchange, MIAX Emerald, MIAX PEARL Equities, Morgan Stanley, and TD Ameritrade, and to offer connectivity to Third Party Data Feeds from ICE Data Services—ICE TMC, Members Exchange, MIAX Emerald, and MIAX PEARL Equities (together, the ''Suspended Services'').

On May 12, 2021, the Commission approved for immediate effectiveness the Exchange's filing proposing to provide the Suspended Services to all Users, at no charge, for a period of 14 days (''Transition Period'') through May 24, 2021, to enable current Users to maintain their connectivity while establishing alternate connectivity.[10]

Given that the Transition Period has expired, the Exchange proposes to remove the obsolete text regarding this provision. To that end, the Exchange proposes to delete the following text:

Connectivity to Suspended Third Party Systems and Suspended Third Party Data Feeds

Connectivity to the Third Party Systems and Third Party Data Feeds listed below (''Suspended Services'') is available until May 24, 2021 (''Transition Period''). During the Transition Period, the Exchange will not charge any fees for the Suspended Services. At the conclusion of the Transition Period, any remaining customers of Suspended Services will have their Suspended Services terminated.

Suspended Third Party Systems
Long Term Stock Exchange (LTSE)
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities
Morgan Stanley
TD Ameritrade

Suspended Third Party Data Feeds
ICE Data Services—ICE TMC
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities

(6) Proposal To Remove LCN Access—1 Gb Circuit

The Exchange proposes to delete the service ''LCN Access—1 Gb Circuit'' from the list of available types of services. The number of 1 Gb LCN ports purchased by Users has steadily declined from 4 in 2017, to 2 in 2018, to 1 in 2021, to zero currently. The Exchange understands that this fall-off in demand for the 1 Gb LCN port is due to the fact that market data feeds continue to increase in bandwidth, such that Users prefer to purchase larger port sizes. Indeed, the last remaining User with a 1 Gb LCN port discontinued that port in June 2022 and has switched to a 10 Gb LCN port instead. The Exchange believes that there is no remaining User demand for the 1 Gb LCN port, and accordingly, the Exchange proposes to discontinue the service as obsolete.

Application and Impact of the Proposed Changes

The Exchange does not expect that the proposed changes would have any impact. The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users[11] equally. As is currently the case, the purchase of any colocation service is completely voluntary and the Fee Schedule is applied uniformly to all Users.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that updating the names of existing Third Party Services and Third Party Data Feeds and removing obsolete text from the Fee Schedule would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Updating the names of the Third Party Services and Third Party Data Feeds at issue will enhance the clarity and transparency of the Fee Schedule and reduce potential customer confusion. Removing obsolete references to (i) the

85 FR 16434 (March 23, 2020) (SRNYSECHX–2020–07); 88522 (March 31, 2020), 85 FR 19191 (April 6, 2020) (SR–NYSECHX–2020–10); 88957 (May 27, 2020), 85 FR 33766 (June 2, 2020) (SR–NYSECHX–2020–15); 89176 (June 29, 2020), 85 FR 40377 (July 6, 2020) (SR–NYSECHX–2020–19); and 89654 (August 25, 2020), 85 FR 53879 (August 31, 2020) (SR–NYSECHX–2020–25).

[8] *See* Securities Exchange Act Release No. 91390 (March 23, 2021), 86 FR 16424 (March 29, 2021) (SR–NYSECHX–2021–04).

[9] *See* Securities Exchange Act Release No. 91790 (May 7, 2021) (SR–NYSE–2021–15, SR–NYSEAMER–2021–13, SR–NYSEArca-2021–15, SR–NYSECHX–2021–04, SR–NYSENAT–2021–05).

[10] *See* Securities Exchange Act Release No. 91862 (May 12, 2021) (SR–NYSECHX–2021–10).

[11] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* 84 FR 58778, *supra* note 4, at 58778 n.6. As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

GIF and its associated fee, (ii) the note regarding the Hot Hands service, and (iii) the availability of the Suspended Services would make it easier to read, understand, and administer the Fee Schedule, enhancing its clarity and transparency and alleviating possible customer confusion.

Similarly, the Exchange believes that discontinuing offering the 1 Gb LCN connection would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Demand for the 1 Gb LCN connection has declined in recent years and there are currently no Users that subscribe to the service. The Exchange does not expect demand to rebound given Users' overall preference for larger port sizes to accommodate larger market data feeds. Removing references to the fees for this obsolete service from the Price List would make the Price List easier to read, understand, and administer.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would update obsolete product names, delete obsolete services, and remove obsolete text from the Fee Schedule, in order to enhance transparency and alleviate potential customer confusion.

The Exchange believes that updating the names of existing Third Party Systems and Third Party Data Feeds and removing obsolete text from the Fee Schedule would not permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed changes would apply equally to all Users: the names of the existing systems and data feeds at issue would be updated and clarified in the Fee Schedule for all Users; the obsolete 1 Gb LCN connection would be removed for all Users; and obsolete text regarding the GIF, the note to the Hot Hands service, and the availability of the Suspended Services would be removed from the Fee Schedule as to all Users.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[14] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues but rather is designed to enhance the clarity and transparency of the Fee Schedule and alleviate possible customer confusion that may arise from the inclusion of obsolete services and product names.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and Rule 19b–4(f)(6) thereunder.[16] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[17]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [18] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NYSECHX–2022–17 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSECHX–2022–17. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSECHX–2022–17 and should be submitted on or before August 19, 2022.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95363; File No. SR–MRX–2022–10]

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing of a Proposed Rule Change Relating to Complex Orders In Connection With a Technology Migration

July 25, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 18, 2022, Nasdaq MRX, LLC (''MRX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Options 3, Section 7, Types of Orders and Order and Quote Protocols; Options 3, Section 10, Priority of Quotes and Orders; Options 3, Section 13, Price Improvement Mechanisms for Crossing Transactions; Options 3, Section 14, Complex Orders; and Options 3, Section 16, Complex Risk Protections.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/mrx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In connection with a technology migration to an enhanced Nasdaq, Inc. (''Nasdaq'') functionality which will result in higher performance, scalability, and more robust architecture, the Exchange intends to adopt certain trading functionality currently utilized at Nasdaq affiliate exchanges. Also, the Exchange intends to remove certain functionality. Specifically, the following sections would be amended: Options 3, Section 7, Types of Orders and Order and Quote Protocols, Options 3, Section 10, Priority of Quotes and Orders; Options 3, Section 13, Price Improvement Mechanisms for Crossing Transactions; Options 3, Section 14, Complex Orders; and Options 3, Section 16, Complex Risk Protections. Each change will be described below.

Legging Order

The Exchange proposes to amend Options 3, Section 7(k)(1) to add a provision which states that a Legging Order[3] will not be generated during a Posting Period, as described in detail below, in progress on the same side in the series pursuant to Options 3, Section 15 regarding Acceptable Trade Range (''ATR''). A Legging Order would not be generated because it would no longer be at the Exchange's displayed best bid or offer, therefore, generating a Legging Order during a Posting Period in progress, on the same side in the series, would lead to its immediate removal, making it superfluous to have been generated.

ATR is a risk protection, that sets dynamic boundaries within which quotes and orders may trade. It is designed to guard the System[4] from experiencing dramatic price swings by preventing the immediate execution of quotes and orders beyond the thresholds set by this risk protection. In a separate proposal, the Exchange proposes to amend MRX's ATR to adopt an iterative process wherein an order/quote that reaches its ATR boundary will be paused for a brief period of time to allow more liquidity to be collected, before the order/quote is automatically re-priced and a new ATR is calculated.[5]

Specifically, in MRX–2022–5P, the Exchange proposes to amend current Options 3, Section 15(a)(2)(A)(iii) to provide that if an order or quote reaches the outer limit of the ATR (''Threshold Price'') without being fully executed, it will be posted at the Threshold Price for a brief period, not to exceed one second (''Posting Period''), to allow the market to refresh and determine whether or not more liquidity will become available (on the Exchange or any other exchange if the order is designated as routable) within the posted price of the order or quote before moving on to a new Threshold Price.[6] Upon posting, either the current Threshold Price of the order/quote or an updated NBB for buy orders/quotes or the NBO for sell orders/quotes (whichever is higher for a buy order/quote or lower for a sell order/quote) would become the reference price for calculating a new ATR. If the order remains unexecuted, a new ATR will be calculated and the order will execute, route, or post up to the new Threshold Price. This process will repeat until either (1) the order/quote is executed, cancelled, or posted at its limit price or (2) the order/quote has been subject to a configurable number of instances of the ATR as determined by the Exchange (in which case it will be returned). During the proposed Posting Period, an order would be in flux and would potentially increase (decrease) past the price of any Legging Order generated on the bid (offer) as the order works its way through the book. Legging Orders are removed from the order book when they are no longer at the Exchange's displayed best bid or offer and, therefore, generating a Legging Order during a Posting Period in progress on the same side in the series would lead to its immediate removal. Accordingly, in the current proposal, the Exchange proposes to amend Options 3, Section 7(k)(1) to provide that a Legging Order would not be created during the Posting

[19] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] A Legging Order is a limit order on the regular limit order book that represents one side of a Complex Options Order that is to buy or sell an equal quantity of two options series resting on the Exchange's Complex Order Book. *See* Options 3, Section 7(k).

[4] The term ''System'' means the electronic system operated by the Exchange that receives and disseminates quotes, executes orders and reports transactions. See MRX Options 1, Section 1(a)(49).

[5] MRX has separately filed to amend ATR within SR–MRX–2022–5P. Within SR–MRX–2022–5P, MRX proposes an iterative process for ATR wherein the Exchange will attempt to execute interest that exceeds the outer limit of the ATR for a brief period of time while that interest is automatically re-priced as described herein. Today, MRX would cancel, rather than re-price, any interest that exceeds the outer limit of the ATR.

[6] *See* SR–MRX–2022–5P.

Period in progress on the same side in the series. By way of example, assume that the ATR is set for $0.05, the MPV is $0.01 and the following quotations are posted on MRX and away markets:

AWAY EXCHANGE QUOTES

Exchange	Bid size	Bid price	Offer price	Offer size
ISE	10	$0.75	$0.90	10
AMEX	10	0.75	0.92	10
PHLX	10	0.75	0.94	10

MRX PRICE LEVELS

Exchange	Bid size	Bid price	Offer price	Offer size
MRX	10	$0.75	$0.90	10
MRX	10	0.75	0.95	10
MRX	10	0.75	1.00	10
MRX	10	0.75	1.05	10

MRX receives a routable order to buy 70 contracts at $1.10. The ATR is $0.05 and the reference price is the National Best Offer − $0.90. The ATR threshold is then $0.90 + $0.05 = $0.95. The order is allowed to execute up to and including $0.95. The System then pauses for a brief period not to exceed one second to allow the market (including other exchanges) to refresh and to determine whether additional liquidity will become available within the order's posted price. If additional liquidity becomes available on MRX or any away market, that liquidity will be accessed and executed.

- 10 contracts will be executed at $0.90 against MRX.
- 10 contracts will be executed at $0.90 against ISE.
- 10 contracts will be executed at $0.92 against AMEX.
- 10 contracts will be executed at $0.94 against PHLX.
- 10 contracts will be executed at $0.95 against MRX.
- Then, after executing at multiple price levels, the order is posted at $0.95 for a brief period not to exceed one second to determine whether additional liquidity will become available.
- During this pause, the MRX BBO for this option is 0.95×1.00.
- Assume the leg above with the Posting Period in process is Leg A of an A–B complex strategy.
- Leg B has a BBO of 0.85×0.88.
- Therefore, the cBBO[7] of this A–B complex strategy is 0.07×0.15.
  - (Leg A Bid 0.95 − Leg B Offer 0.88 = 0.07).
  - (Leg A Offer 1.00 − Leg B Bid 0.85 = 0.15).
- Also during the pause, a Complex Options Order to buy A–B arrives for net price of $0.11.
- The Complex Options Order could generate a Legging Order at $0.96 on the bid of Leg A, relying on the $0.85 bid to sell Leg B and achieve a net price $0.11, however the Legging Order is not generated because Leg A has an order on the bid side in an ATR Posting Period which will continue to move through the order book, and would ultimately lead to the immediate removal of the Legging Order once it is no longer at the Exchange's displayed best bid.
- A new ATR Threshold Price of $1.00 is determined (new reference price of $0.95 + $0.05 = $1.00).
- If, during the brief pause not to exceed 1 second, no liquidity becomes available within the order's posted price of $0.95, the System will then execute 10 contracts at $1.00.
- Then, after executing at multiple price levels, the order is posted at $1.00 for a brief period not to exceed one second to determine whether additional liquidity will become available.
- A new ATR Threshold Price of $1.05 is determined (new reference price of $1.00 + $0.05 = $1.05).
- During this time the MRX BBO would be $1.00 \times $1.05.
- If, during the brief pause not to exceed 1 second, no liquidity becomes available within the order's posted price of $1.00, the System will then execute 10 contracts at $1.05.

The Exchange believes from a System processing and user acceptance standpoint, the best practice is to wait for the ATR Posting Period to complete before attempting to generate a Legging Order on the same side in the series, as the time required to complete the ATR Posting Period is minimal. Nasdaq Phlx LLC's (''Phlx'') legging order rule in Options 3, Section 14(f)(iii)(C)(2) has the same restriction on generating legging orders during the ATR Posting Period as proposed to be added to MRX's Legging Order rule.[8]

Changes to the Single-Leg Price Improvement Mechanism for Crossing Transactions

The Price Improvement Mechanism (''PIM'') is a process by which an Electronic Access Member can provide price improvement opportunities for a transaction wherein the Electronic Access Member seeks to facilitate an order it represents as agent, and/or a transaction wherein the Electronic Access Member solicited interest to execute against an order it represents as agent (a ''Crossing Transaction''). The Exchange provides a PIM for single-leg[9] orders and for Complex Orders[10] and proposes to amend both single-leg and Complex PIM rules. The Exchange proposes to amend the single-leg PIM in Options 3, Section 13(d)(4) which currently provides,

> When a market order or marketable limit order on the opposite side of the market from the Agency Order ends the exposure period, it will participate in the execution of the Agency Order at the price that is mid-way between the best counter-side interest and the NBBO, so that both the market or marketable limit order and the Agency Order receive price improvement. Transactions will be rounded, when necessary, to the $.01 increment that favors the Agency Order.

Today, unrelated interest in the form of a market order or marketable limit order, on the opposite side of the market

[7] The ''cBBO'' represents the net price of a complex strategy comprised of the best bids and offers of the individual legs.

[8] Phlx Options 3, Section 14(f)(iii)(C)(2) provides that a Legging Order will not be created, ''. . .(ii) if there is . . . a Posting Period under Options 3, Section 15 regarding Acceptable Trade Range on the same side in progress in the series. . .''.

[9] *See* MRX Options 3, Section 13(a)–(d).

[10] *See* MRX Options 3, Section 13(e).

from an Agency Order,[11] may end an exposure period [12] within a single-leg PIM and participate in the execution of the Agency Order. The unrelated order would participate at the price that is mid-way between the best counter-side interest and the NBBO, so that both the market order or marketable limit order and the Agency Order receive price improvement.

First, the Exchange proposes to *not* permit unrelated marketable interest on the opposite side of the market from the Agency Order, which is received during a single-leg PIM, to early terminate a PIM. The Exchange proposes to amend MRX Options 3, Section 13(d)(4) to instead provide,

Unrelated market or marketable interest (against the MRX BBO) on the opposite side of the market from the Agency Order received during the exposure period will not cause the Crossing Transaction to end early and will execute against interest outside of the Crossing Transaction. If contracts remain from such unrelated order at the time the auction exposure period ends, they will be considered for participation in the order allocation process described in sub-paragraph (3).[13]

[11] An Agency Order is the part of a Crossing Transaction that an Electronic Access Member represents as agent. *See* MRX Options 3, Section 13(b).

[12] Upon entry of a Crossing Transaction into the PIM, a broadcast message that includes the series, price and size of the Agency Order, and whether it is to buy or sell, will be sent to all Members. The Exchange designates a time of no less than 100 milliseconds and no more than 1 second for Members to indicate the size and price at which they want to participate in the execution of the Agency Order (''Improvement Orders''). During the exposure period, Improvement Orders may not be canceled, but may be modified to (i) increase the size at the same price, or (ii) improve the price of the Improvement Order for any size up to the size of the Agency Order. During the exposure period, responses (including the Counter-Side Order, Improvement Orders, and any changes to either) submitted by Members shall not be visible to other auction participants. The exposure period will automatically terminate (i) at the end of the time period designated by the Exchange pursuant to Options 3, Section 13(c)(1) above, (ii) upon the receipt of a market or marketable limit order on the Exchange in the same series, or (iii) upon the receipt of a non-marketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange. *See* MRX Options 3, Section 13(c).

[13] Subparagraph (3) of Options 3, Section 13(d) describes the manner in which a Counter-Side Order would be allocated. The Counter Side Order is one part of a Crossing Transaction and represents the full size of the Agency Order. The Counter-Side Order may represent interest for the Member's own account, or interest the Member has solicited from one or more other parties, or a combination of both. *See* MRX Options 3, Section 13(b).

Today, Phlx [14] and Nasdaq BX, Inc. (''BX'') [15] similarly do not permit unrelated interest on the opposite side of the market from the Agency Order to early terminate their price improvement auctions. With this proposed change, the single-leg PIM exposure period would continue for the full period despite the receipt of unrelated marketable interest on the opposite side of the market from the Agency Order. Allowing the single-leg PIM to run its full course would provide an opportunity for additional price improvement to the Crossing Transaction. Further, the unrelated interest would participate in the single-leg PIM allocation with any residual contracts remaining after interacting with the order book pursuant to MRX Options 3, Section 13(d). The aforementioned residual contracts are contracts that remain available for execution after the unrelated order on the opposite side of market as the Agency Order, which was marketable with bids and offers on the same side of the market as the Agency Order, executed against bids and offers on the Exchange's order book.

Second, the Exchange also proposes to amend current MRX Options 3, Section 13(c)(5) which states,

The exposure period will automatically terminate (i) at the end of the time period designated by the Exchange pursuant to Options 3, Section 13(c)(1) above, (ii) upon the receipt of a market or marketable limit order on the Exchange in the same series, or (iii) upon the receipt of a non-marketable limit order in the same series on the same side of the market as the Agency Order that would cause the price of the Crossing Transaction to be outside of the best bid or offer on the Exchange.

Specifically, the Exchange proposes to remove ''(ii),'' which provides the exposure period will automatically terminate ''. . . (ii) upon the receipt of a market or marketable limit order on the Exchange in the same series . . .''. The Exchange notes that this sentence applies to the receipt of marketable orders both on the same side and opposite side of the Agency order. As described above, the Exchange proposes to *not* permit unrelated marketable interest on the opposite side of the market from the Agency Order, which is received during a single-leg PIM, to early terminate a PIM. Therefore, with respect to the opposite side of the Agency Order, the termination of the auction will no longer be possible with the proposed change to MRX Options 3, Section 13(d)(4). With respect to the same side of the Agency Order, today, an unrelated market or marketable limit order in the same series on the same side of the Agency Order would cause the PIM to early terminate as well. At this time the Exchange proposes to *not* permit an unrelated market or marketable limit order in the same series *on the same side* of the Agency Order to cause the PIM to early terminate. This proposed change will align the functionality of MRX's PIM to that of BX's PRISM and Phlx's PIXL,[16] which do not permit an unrelated market or marketable limit order in the same series on the same side of the Agency Order to cause the PRISM or PIXL to early terminate, unless the BBO improves beyond the price of the Crossing Transaction on the same side. The Exchange notes that a market or marketable limit order in the same series on the same side of the Agency Order cannot interact with a PIM auction. The market or marketable limit order may interact with the single-leg order book, and if there are residual contracts that remain from the market or marketable limit order in the same series on the same side of the Agency Order, they could rest on the order book and improve the BBO beyond the price of the Crossing Transaction which would cause early termination pursuant to proposed Options 3, Section 13(c)(5)(ii) as discussed below. In this instance, residual contracts are contracts

[14] Phlx Options 3, Section 13(b)(4) provides that an unrelated market or marketable Limit Order (against the PBBO) on the opposite side of the market from the PIXL Order received during the Auction will not cause the Auction to end early and will execute against interest outside of the Auction. *See* Securities Exchange Act Releases No. 79835 (January 18, 2017), 82 FR 8445 (January 25, 2017) (SR–Phlx–2016–119) (Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1 Thereto, To Amend the PIXL Price Improvement Auction in Phlx Rule 1080(n) and To Make Pilot Program Permanent) and 63027 (October 1, 2010), 75 FR 62160 (October 7, 2010) (SR–Phlx–2010–108) (''PIXL Approval Order''). The Commission noted in SR–Phlx–2016–119 that, ''In approving this feature on a pilot basis, the Commission found that 'allowing the PIXL auction to continue for the full auction period despite receipt of unrelated orders outside the Auction would allow the auction to run its full course and, in so doing, will provide a full opportunity for price improvement to the PIXL Order. Further, the unrelated order would be available to participate in the PIXL order allocation.' The Exchange does not believe that this provision has had a significant impact on either the unrelated order or the PIXL Auction process, either for simple or Complex PIXL Orders. The Exchange therefore has requested that the Commission approve this aspect of the Pilot on a permanent basis for both simple and Complex PIXL Orders.''

[15] BX Options 3, Section 13(ii)(D) provides that unrelated market or marketable interest (against the BX BBO) on the opposite side of the market from the PRISM Order received during the Auction will not cause the Auction to end early and will execute against interest outside of the Auction.

[16] *See* Options 3, Section 13 of BX's PRISM Rules and Phlx's PIXL Rules.

that remain available for execution after the unrelated order on the same side of market as the Agency Order, which was marketable with bids and offers on the opposite side of the market as the Agency Order, executed against bids and offers on the Exchange's order book. The Exchange believes that this outcome would allow for the single-leg PIM exposure period to continue for the full period despite the receipt of unrelated marketable interest on the same side of the market from the Agency Order, provided residual interest does not go on to rest on the order book, improving the BBO beyond the price of the Crossing Transaction. Allowing the single-leg PIM to run its full course (unless the BBO improves beyond the price of the Crossing Transaction on the same side), rather than early terminate, would provide an opportunity for price improvement to the Agency Order.

Third, the Exchange proposes to amend current MRX Options 3, Section 13(c)(iii) to align the rule text more closely with language in BX Options 3, Section 13(ii)(B)(2).[17] Specifically, the Exchange proposes to amend Options 3, Section 13(c)(5) to delete current ''iii'' and renumber as ''ii''. Proposed new Options 3, Section 13(c)(5)(ii) would state, ''The exposure period will automatically terminate . . . (ii) any time the Exchange best bid or offer improves beyond the price of the Crossing Transaction on the same side of the market as the Agency Order . . .'' The proposed rule is designed to align to BX's rule text to remove any ambiguity that a market or marketable limit order priced more aggressively than the Agency Order could ultimately rest on the order book, improving the BBO beyond the price of the Crossing Transaction and, therefore, cause the early termination of a PIM auction.

By way of example, assume: MRX 1.00 x 2.00 (10) and a second MRX Market Maker's quote is 1.00 x 2.10 (10). If a PIM auction starts with a buy at 1.50, and subsequently an order to buy for 20 @2.00 arrives, the incoming order would trade with the quote, and the remaining 10 contracts would rest on the order book. Thereafter, the MRX BBO would update to 2.00 x 2.10 and trigger the early termination of the single-leg PIM pursuant to Options 3, Section 13(c)(5)(iii), which is being renumbered to Options 3, Section 13(c)(5)(ii). Early terminating the single-leg PIM in this example is necessary because the price of the single-leg PIM is no longer at the top of book (best price) and would not have execution priority with respect to responses or unrelated interest that arrive. By early terminating the single-leg PIM, MRX allows responses to the single-leg PIM, which arrived prior to the time the Exchange's best bid and offer improved beyond the Crossing Transaction, to execute.

The Exchange believes the proposed rule text will provide greater clarity to the manner in which the System operates today with respect to early termination of single-leg PIMs when the BBO on the same side improves beyond the price of the Crossing Transaction. The proposed amendment to the rule text is not intended to amend the current System functionality, rather it is intended to make clear that a market or marketable limit order could ultimately rest on the order book with residual interest and improve the BBO on the same side as the Agency Order beyond the price of the Crossing Transaction and cause the single-leg PIM to early terminate.

Fourth, the Exchange proposes to add a new MRX Options 3, Section 13(c)(5)(iii) which states, ''. . . (iii) any time there is a trading halt on the Exchange in the affected series . . .''. This proposed rule text is not modifying how the System currently operates.[18] Today, a trading halt would cause a single-leg PIM to early terminate. Current MRX Options 3, Section 13(d)(5) notes such an early termination as a result of the aforementioned trading halt. Adding this circumstance to the list of events that would terminate the exposure period would make the list complete and add clarity to the rule. Furthermore, the Exchange notes that in a separate rule change, SR–MRX–2022–5P,[19] the Exchange is proposing to amend Options 3, Section 13(d)(5) to change the System behavior such that if a trading halt is initiated after an order is entered into the PIM, such auction will be automatically terminated with execution solely with the Counter-Side Order. Today, if a trading halt is initiated after an order is entered into the PIM, such auction will be automatically terminated without execution.[20]

Changes to the Complex PIM

In accordance with the proposed rule change regarding the early termination provisions of a single-leg PIM auction explained above, the Exchange also proposes to remove a paragraph related to Complex PIM in current MRX Options 3, Section 13(e)(4)(vi) which provides,

> A Complex Price Improvement Mechanism in a complex strategy may be ongoing at the same time as a Price Improvement Auction pursuant to this Rule or during an exposure period pursuant to Supplementary Material .02 to Options 5, Section 2 in a component leg(s) of such Complex Order. If a Complex Price Improvement Mechanism is early terminated pursuant to paragraph (iv) above, and the incoming Complex Order that causes the early termination in the complex strategy is also marketable against a component leg(s) of the complex strategy that is the subject of a concurrent ongoing Price Improvement Auction pursuant to this Rule or an exposure period pursuant to Supplementary Material .02 to Options 5, Section 2, then the concurrent Complex Price Improvement Mechanism and component leg auction(s) are processed in the following sequence: (1) the Complex Price Improvement Mechanism is early terminated; (2) the component leg auction(s) are early terminated and processed; and (3) legging of residual incoming Complex Order interest occurs, except with respect to Stock Option Orders and Stock Complex Orders.

Today, unrelated marketable interest may cause the early termination of a single-leg PIM, if a component leg of a Complex Order is marketable against the order book in the same series as the single-leg PIM. An example is provided below.

Example #1 (Complex PIM Early Termination Elimination—Opposite Side)[21]

Complex Order Strategy A–B
MM Quote Leg A 4.20 (100) × 4.50 (100)

[17] BX Options 3, Section 13(ii)(B) provides ''Conclusion of Auction. The PRISM Auction shall conclude at the earlier to occur of (1) through (3) below, with the PRISM Order executing pursuant to paragraph (C)(1) or (C)(2) below if it concludes pursuant to (2) or (3) of this paragraph. (1) The end of the Auction period; (2) For a PRISM Auction any time the BX BBO crosses the PRISM Order stop price on the same side of the market as the PRISM Order; (3) Any time there is a trading halt on the Exchange in the affected series.''

[18] MRX Options 3, Section 13(d)(5) currently states that, ''If a trading halt is initiated after an order is entered into the Price Improvement Mechanism, such auction will be automatically terminated without execution.'' Of note, the Exchange is proposing to amend MRX's PIM within a separate rule change, SR–MRX–2022–5P. Among other things, the Exchange proposes to amend the PIM functionality so that if a trading halt is initiated after an order is entered into the PIM, the auction will be automatically terminated with an execution. Specifically, SR–MRX–2022–5P proposes to renumber current MRX Options 3, Section 13(d) to Options 3, Section 13(d)(6) and proposes to state, ''If a trading halt is initiated after an order is entered into the Price Improvement Mechanism, such auction will be automatically terminated with execution solely with the Counter-Side Order.''

[19] MRX has separately filed to amend Options 3, Section 13(d)(5) within SR–MRX–2022–5P. SR–MRX–2022–5P amends, among other things, the rule text in Options 3, Section 13, except that it does not amend Options 3, Section 13(c)(5).

[20] *See* current MRX Options 3, Section 13(d)(5).

[21] Example 1 addresses an order on the opposite side of the Agency Order, although the same early termination would apply to an order on the same side of an Agency Order pursuant to MRX Options 3, Section 13(e)(4)(vi).

MM Quote Leg B 4.00 (100) × 4.10 (100)
cBBO 0.10 × 0.50
(Leg A Bid 4.20 − Leg B Offer 4.10 = 0.10)
(Leg A Offer 4.50 − Leg B Bid 4.00 = 0.50)
Complex PIM to Buy A–B 10 @0.20, with an election to automatically match to a net price of 0.10

Complex PIM Begins

Single-leg PIM Auction on Leg A to Buy 100 @ 4.25

Single-Leg PIM Begins

During both auction timers, an unrelated marketable Complex Order A–B to sell 50 @ a net price of 0.10 arrives (the individual legs of the marketable Complex Order would be selling A @ 4.20 and buying B @ 4.10).

Complex Order PIM is early terminated and trades 4 with the Counter-Side Order @ a net price of 0.10 and 6 with the unrelated Complex Order @ a net price of 0.15.

Today, the unrelated Complex Order would have legged-in after trading with the Complex PIM and caused the single-leg PIM to early terminate because one leg of the Complex Order was marketable against the Leg A bid of 4.20.

With the proposed amendment, the unrelated Complex Order will not cause the single-leg PIM to early terminate as a result of trading with an unrelated order on the opposite side in the same series. The unrelated marketable Complex Order will trade with the Complex PIM as well as the best bids and offers from the single-leg order book. In this case, the remaining quantity of the unrelated Complex Order would leg-in and trade with the single-leg quotes without impacting the single-leg PIM; the single-leg PIM auction timer would conclude after running its full course. Thereafter, if there are no responses to the single-leg PIM, the Agency Order would trade 100 @ 4.25 with the Counter-Side Order.

Today, if a Complex PIM is early terminated pursuant to MRX Options 3, Section 14(e)(4)(iv) [22] and the incoming Complex Order that causes the early termination in the complex strategy is also marketable against a component leg(s) of the complex strategy that is the subject of a concurrent ongoing single-leg PIM, or an exposure period pursuant to flash functionality as provided for in Supplementary Material .02 to Options 5, Section 2,[23] then the concurrent Complex PIM and component leg auction(s) are processed in accordance with MRX Options 3, Section 14(e)(4)(vi).

With this proposed change, a single-leg PIM will no longer early terminate as a result of the arrival of unrelated marketable interest on either the same or the opposite side of the market from the Agency Order. Because a single-leg PIM will no longer early terminate from the arrival of unrelated marketable interest on either the same or the opposite side of the market from the Agency Order, and because the flash functionality will no longer exist,[24] the Exchange proposes to delete MRX Options 3, Section 13(e)(4)(vi) in its entirety.

Additionally, the Exchange proposes to remove a related paragraph in current Supplementary Material .01(b)(iii) of MRX Options 3, Section 14 describing Complex Order Exposure, which states,

A Complex Order Exposure in a complex strategy may be ongoing in a complex strategy at the same time as a Price Improvement Auction pursuant to Options 3, Section 13 or during an exposure period pursuant to Supplementary Material .02 to Options 5, Section 2 in a component leg(s) of such complex strategy. If a Complex Order Exposure is early terminated pursuant to paragraph (ii) above, and the incoming Complex Order that causes the early termination in the complex strategy is also marketable against a component leg(s) of the complex strategy that is the subject of a concurrent ongoing Price Improvement Auction pursuant to Options 3, Section 13 or an exposure period pursuant to Supplementary Material .02 to Options 5, Section 2, then the concurrent Complex Order and component leg auction(s) are processed in the following sequence: (1) the Complex Order exposure is early terminated; (2) the component leg auction(s), which are early terminated and processed; and (3) legging of residual incoming Complex Order interest occurs.

Today, unrelated marketable interest may cause the early termination of a single-leg PIM, therefore, when a Complex Order legs into the single-leg order book, it may cause the early termination of a single-leg PIM if that leg was on either the same or the opposite side of the market from the single-leg PIM. An example is provided below.

Example # 2 (Complex Exposure Early Termination Elimination—Opposite Side) [25]
Complex Order Strategy A–B
MM Quote Leg A 4.20 (100) × 4.50 (100)
MM Quote Leg B 4.00 (100) × 4.10 (100)
cBBO 0.10 × 0.50
(Leg A Bid 4.20 − Leg B Offer 4.10 = 0.10)
(Leg A Offer 4.50 − Leg B Bid 4.00 = 0.50)
Complex Order in A–B Strategy marked for Complex Order Exposure to buy 10 @ 0.20

Complex Order Exposure Auction Begins

Single-leg PIM Auction on Leg A to Buy 100 @ 4.25
Single-Leg PIM Begins

During both auction timers, unrelated marketable Complex Order A–B Sell 50 @ 0.10 arrives.

Complex Order Exposure is early terminated and the exposed order to buy A–B 10 @ 0.20 and trades with the unrelated Complex Order 10 @ net price of 0.10.

Today, the unrelated marketable Complex Order would have legged-in after trading with the Complex Order Exposure and caused the single-leg PIM to early terminate because one leg of the marketable Complex Order on the opposite side was marketable against the Leg A bid of 4.20.

With the proposed amendment, the unrelated marketable Complex Order will not cause the single-leg PIM on the opposite side in the same series to early terminate as a result of the component leg of the Complex Order being marketable against the bid in the same series as the single-leg PIM. The unrelated marketable Complex Order will trade with the Complex Order Exposure order as well as the best bids and offers from the single-leg order book. In this case, the remaining quantity would leg-in and trade with the single-leg quotes without impacting the single-leg PIM; the auction timer would conclude after running its full course. Thereafter, the Crossing Transaction would trade 100 @ 4.25 Agency Order with the Counter-Side Order.

Today, when a Complex Order Exposure early terminates, as a result of the arrival of unrelated marketable Complex Order interest that trades against the exposed Complex Order and the best bids and offers on the single-leg order book (as described in Supplementary Material .01(b)(ii) of MRX Options 3, Section 14), the component legs of the unrelated marketable Complex Order on either the same or the opposite side of the single-leg PIM may leg-in and cause early termination of the single-leg PIM. Thereafter, the component leg auction(s) would be processed pursuant to

[22] MRX Options 3, Section 14(e)(4)(iv) provides, ''The exposure period will automatically terminate (A) at the end of the time period designated by the Exchange pursuant to subparagraph (4)(i) above, (B) upon the receipt of a Complex Order in the same complex strategy on either side of the market that is marketable against the Complex Order Book or bids and offers for the individual legs, or (C) upon the receipt of a non-marketable Complex Order in the same complex strategy on the same side of the market as the Agency Complex Order that would cause the execution of the Agency Complex Order to be outside of the best bid or offer on the Complex Order Book.''

[23] Pursuant to Supplementary Material .02 to ISE Options 5, Section 2, ISE permits certain orders to first be exposed at the NBBO to all Members for execution at the National Best Bid or Offer (''NBBO'') before the order would be routed to another market for execution (''flash functionality''). MRX Options 5 Rules are incorporated by reference to ISE Options 5 Rules.

[24] MRX filed a rule change to eliminate its flash functionality. *See* Securities Exchange Act Release No. 94897 (May 12, 2022), 87 FR 30294 (May 18, 2022) (SR–ISE–2022–11) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Routing Functionality in Connection With a Technology Migration). MRX's rule regarding flash functionality at Supplementary Material .02 to Options 5, Section 2 is incorporated by reference to Nasdaq ISE, LLC Options 5 rules. Therefore, eliminating the flash functionality from ISE Options 5 rules also eliminates the flash functionality from MRX's Options 5 rules.

[25] Example 2 addresses an order on the opposite side of the Agency Order, although the same early termination would apply to an order on the same side of the Agency Order pursuant to Supplementary Material .01(b)(iii) of MRX Options 3, Section 14.

Supplementary Material .01(b)(iii) of MRX Options 3, Section 14. With this proposed change to MRX Options 3, Section 13(d)(4), a single-leg PIM will no longer early terminate from the arrival of unrelated marketable interest on either the same or opposite side of the market from the Agency Order. Therefore, because a single-leg PIM will no longer early terminate from the arrival of unrelated marketable interest on either the same or opposite side of the market from the Agency Order, and because the flash functionality will no longer exist,[26] the early termination provisions addressed in Supplementary Material .01(b)(iii) of MRX Options 3, Section 14 will no longer arise, accordingly, the Exchange proposes to delete Supplementary Material .01(b)(iii) of MRX Options 3, Section 14 in its entirety.

Complex Orders Delayed Functionality

The Exchange proposes to delay the implementation of certain functionality in connection with the technology migration. Specifically, Stock-Option Strategies,[27] Stock-Complex Strategies,[28] Complex QCC with Stock Orders,[29] and QCC with Stock Orders,[30] as defined in MRX Options 3, Sections 14(a)(2) and (3) and (b)(15) and Options 3, Section 7(t), respectively, and Trade Value Allowance,[31] as defined in Supplementary Material .03 of MRX Options 3, Section 14, would not be available for symbols that migrated to the platform (''Delayed Functionalities''). Today, these Delayed Functionalities are available to Members.

The Delayed Functionalities would not be available for symbols that migrated to the platform and thereafter, until such time as the Exchange recommenced their availability by announcing a date in an Options Trader Alert, which date would be prior to one year from the start of the migration of the symbols to the platform. The Exchange is staging the migration to provide maximum benefit to its Members while also ensuring a successful rollout. The Delayed Functionalities will provide the Exchange additional time to code, test and implement this functionality on the enhanced platform.

Other Complex Order Amendments

Opening Only Complex Order

Currently, MRX Options 3, Section 14(b)(10) states, ''An Opening Only Complex Order is a Limit Order that may be entered for execution during the Complex Opening Process described in Supplementary Material .04 to Options 3, Section 14. Any portion of the order that is not executed during the Complex Opening Process is cancelled.'' The Exchange proposes to amend MRX Options 3, Section 14(b)(10) to remove the word ''Limit'' within the description of the Opening Only Complex Order to allow Opening Only Complex Orders to be submitted as Market Orders or Limit Orders. This amendment is consistent with current System operations. The Exchange believes that both Market and Limit Orders should be permitted in the Complex Opening Process.[32] Market Orders are typically the most aggressively priced orders, while Limit Orders have a limit price contingency that Market Orders do not have. Allowing both of these order types to participate in the Complex Opening Process allows greater liquidity to be present to determine the Opening Price.[33] All Members may enter both Market Orders and Limit Orders during the Complex Opening Process, as well as intra-day.

Complex QCC With Stock Orders

The Exchange proposes to correct a non-substantive citation with MRX Options 3, Section 14(b)(15) related to Complex QCC with Stock Orders. The current citation to MRX Options 3, Section 12(e) within the description of this order type is incorrect. The citation should be to MRX Options 3, Section 12(f). Correcting this cross reference will clarify the description of the order type.

Complex Preferenced Orders

The Exchange proposes to add ''Complex Preferenced Orders'' to the list of Complex Order Types in Options 3, Section 14(b). This proposal describes how Complex Preferenced Orders will work. MRX Options 2, Section 10 currently describes Preferenced Orders which may be Complex Preferenced Orders.[34] To complete the list of Complex Order types, the Exchange proposes to state in MRX Options 3, Section 14(b)(19) that,

[a] Complex Preferenced Order is a Complex Order for which an Electronic Access Member has designated a Preferred Market Maker as described in Options 2, Section 10. The component leg(s) of a Complex Order with a Preferenced Order instruction may allocate pursuant to Options 3, Section 10(c)(1)(C) when the Complex Preferenced Order legs into the single-leg market provided that the Preferred Market Maker is

[26] *Id.* [sic]

[27] A Stock-Option Strategy is the purchase or sale of a stated number of units of an underlying stock or a security convertible into the underlying stock (''convertible security'') coupled with the purchase or sale of options contract(s) on the opposite side of the market representing either (A) the same number of units of the underlying stock or convertible security, or (B) the number of units of the underlying stock necessary to create a delta neutral position, but in no case in a ratio greater than eight-to-one (8.00), where the ratio represents the total number of units of the underlying stock or convertible security in the option leg to the total number of units of the underlying stock or convertible security in the stock leg. *See* MRX Options 3, Section 14(a)(2).

[28] A Stock-Complex Strategy is the purchase or sale of a stated number of units of an underlying stock or a security convertible into the underlying stock (''convertible security'') coupled with the purchase or sale of a Complex Options Strategy on the opposite side of the market representing either (A) the same number of units of the underlying stock or convertible security, or (B) the number of units of the underlying stock necessary to create a delta neutral position, but in no case in a ratio greater than eight-to-one (8.00), where the ratio represents the total number of units of the underlying stock or convertible security in the option legs to the total number of units of the underlying stock or convertible security in the stock leg. Only those Stock-Complex Strategies with no more than the applicable number of legs, as determined by the Exchange on a class-by-class basis, are eligible for processing. *See* MRX Options 3, Section 14(a)(3).

[29] A Complex QCC with Stock Order is a Qualified Contingent Cross Complex Order, as defined in subparagraph (b)(6) of Options 3, Section 14, entered with a stock component to be communicated to a designated broker-dealer for execution pursuant to MRX Options 3, Section 12(f).

[30] A QCC with Stock Order is a Qualified Contingent Cross Order, as defined in Options 3, Section 7(j), entered with a stock component to be communicated to a designated broker-dealer for execution pursuant to Options 3, Section 12(c). *See* Options 3, Section 7(t).

[31] Trade Value Allowance permits Stock-Option Strategies and Stock-Complex Strategies at valid increments Options 3, Section 14(c)(1), Stock-Option Strategies and Stock-Complex Strategies to trade outside of their expected notional trade value by a specified amount, in order to facilitate the execution of the stock leg and options leg(s). The Trade Value Allowance is the percentage difference between the expected notional value of a trade and the actual notional value of the trade. The amount of Trade Value Allowance permitted may be determined by the Member, or a default value determined by the Exchange and announced to Members; provided that any amount of Trade Value Allowance is permitted in mechanisms pursuant to Options 3, Sections 11 and 13 when auction orders do not trade solely with their contra-side order. *See* Supplementary Material .03 of MRX Options 3, Section 14.

[32] The Complex Opening Process is described in Supplementary Material .04 of MRX Options 3, Section 14.

[33] The Opening Price is described in MRX Options 3, Section 14(a)(2).

[34] MRX Options 2, Section 10 provides, ''Preferenced Orders. An Electronic Access Member may designate a ''Preferred Market Maker'' on orders it enters into the System (''Preferenced Orders''). (1) A Preferred Market Maker may be the Primary Market Maker appointed to the options class or any Competitive Market Maker appointed to the options class. (2) If the Preferred Market Maker is not quoting at a price equal to the NBBO at the time the Preferenced Order is received, the allocation procedure described in Options 3, Section 10(c)(1)(C) shall not be applied to the execution of the Preferenced Order. (3) If the Preferred Market Maker is quoting at the NBBO at the time the Preferenced Order is received, the allocation procedure described in Options 3, Section 10(c)(1)(C) shall be applied to the execution of the Preferenced Order.''

quoting at the NBBO for a component leg(s) of the Complex Preferenced Order at the time the Complex Preferenced Order is received. A Preferred Market Maker will not receive an allocation pursuant to Options 3, Section 10(c)(1)(C) for a component leg(s) of a Complex Preferenced Order if the Preferred Market Maker is not quoting at the NBBO for that leg at the time the Complex Preferenced Order is received.

Allocation of a leg(s) of a Complex Preferenced Order, pursuant to MRX Options 3, Section 10, would occur when a leg(s) of a Complex Order trades synthetically with the Preferred Market Maker's [35] quote that was at the NBBO on the single-leg order book in accordance with MRX Options 3, Section 10. A Preferred Market Maker must be quoting at the NBBO for a component leg(s) of the Complex Preferenced Order at the time the Complex Preferenced Order is received. As is the case for single-leg orders, a Preferred Market Maker will not receive an allocation pursuant to Options 3, Section 10(c)(1)(C) for a component leg(s) of a Complex Preferenced Order if the Preferred Market Maker is not quoting at the NBBO for that leg at the time the Complex Preferenced Order is received.

With respect to orders which leg into the single-leg order book, MRX Options 3, Section 14(c) states that, ''Except as otherwise provided in this Rule, complex strategies shall be subject to all other Exchange Rules that pertain to orders and quotes generally.'' Additionally, the Exchange notes that orders that execute against interest on the single-leg order book, including the options leg of Complex Options Strategies are subject to the provisions of MRX Options 3, Section 5 which, among other things, describes the NBBO Price Protection and Trade-Through Compliance and Locked or Crossed Markets.

Further, Supplementary Material .01 to Options 9, Section 1 provides,

[i]t will be a violation of this Rule for a Member to have a relationship with a third party regarding the disclosure of agency orders. Specifically, a Member may not disclose to a third party information regarding agency orders represented by the Member prior to entering such orders into the System to allow such third party to attempt to execute against the Member's agency orders. A Member's disclosing information regarding agency orders prior to the execution of such orders on the Exchange would provide an inappropriate informational advantage to the third party in violation of this Rule. For purposes of this paragraph .01, a third party includes any other person or entity, including affiliates of the Member. Nothing in this paragraph is intended to prohibit a Member from soliciting interest to execute against an order it represents as agent (a ''solicited order''), the execution of which is governed by Options 3, Section 22(e) and paragraph .02 of Supplementary Material to Options 3, Section 22.

This rule prohibits a Member from notifying a Preferred Market Maker of an intention to submit a Complex Preferenced Order so that the Preferred Market Maker could change its quotation to match the NBBO immediately prior to submission of the Complex Preferenced Order, and then fade its quote. The Exchange represents that it proactively conducts surveillance for, and enforces against, violations of Supplementary Material .01 to Options 9, Section 1.

The Exchange's proposal to add ''Complex Preferenced Orders'' to the list of Complex Order Types in MRX Options 3, Section 14(b) will continue to encourage Preferred Market Makers to quote aggressively in an effort to execute against the Complex Preferenced Order. Preferred Marker Makers are not able to ascertain if a particular order is a Complex Preferenced Order. The Exchange believes the proposal will encourage Market Makers to quote tighter and add a greater amount of liquidity on MRX in an attempt to interact with Complex Preferenced Orders that are sent to the Exchange. This order flow will benefit all market participants on the Exchange because any MRX Member may interact with that order flow.

The addition of Complex Preferenced Orders to the list of order types in MRX Options 3, Section 14(b) will make clear to Members the availability of Complex Preferenced Orders. Both Phlx [36] and MIAX [37] have a similar order type.

Options 3, Section 14(c)(2) and MRX Supplementary Material .02 to Options 3, Section 14

The Exchange proposes a non-substantive amendment in MRX Options 3, Section 14(c)(2) to amend an incorrect reference to ''ISE''. The reference should be to ''MRX''. Also, the Exchange proposes to make a non-substantive technical correction in Supplementary Material .02 of MRX Options 3, Section 14 to make a grammatical amendment to change the word ''which'' to ''whom''.

Complex Opening Price Determination

The Exchange proposes to amend the citation within Supplementary Material .05(d)(2) to Options 3, Section 14 which states, ''*Potential Opening Price.* The System will calculate the Potential Opening Price by identifying the price(s) at which the maximum number of contracts can trade (''maximum quantity criterion'') taking into consideration all eligible interest pursuant to Supplementary Material .06(b) to this Rule.'' The citation to Supplementary Material .06(b), related to Uncrossing is incorrect. The citation should be to Supplementary Material .05(b), related to Complex Opening Price Determination. The citation is referring is [sic] to eligible interest during the Complex Opening Price Determination.

The Exchange proposes to amend the Complex Opening Price Determination in Supplementary Material .05(d)(3) to Options 3, Section 14 to allow for additional contracts to be included in the Potential Opening Price calculation leading to better price discovery and more contracts executing as part of the Complex Opening Price Determination process.

With this proposal, when the interest does not match the size and there is more than one Potential Opening Price at which the interest may execute, the Exchange would calculate a Potential Opening Price using the mid-point of the highest (lowest) executable offer (bid) price and the next available executable offer (bid) price rounded, if necessary, down (up) to the closest minimum trading increment. As a result, more options contracts are likely to be executed at better prices than under the current rule. Example number 3 below demonstrates this behavior. This behavior differs from current rules in that, today, the Exchange would calculate the Potential Opening Price as the highest (lowest) executable bid (offer) when there would be contracts left unexecuted on the bid (offer) side of the complex market.

[35] Preferred Market Maker may be the Primary Market Maker appointed to the options class or any Competitive Market Maker appointed to the options class. *See* MRX Options 2, Section 10(a)(1).

[36] *See* Phlx Options 3, Section 14(b)(v) which specifies that a Directed Order may be submitted as a Complex Order. *See also* Phlx Options 3, Section 7(b)(11) which describes a Directed Order. Phlx's Options 2, Section 10 Directed Order rule is similar to MRX's Options 2, Section 10 Preferenced Order rule.

[37] A ''Directed Order'' is an order entered into the System by an Electronic Exchange Member with a designation for a Lead Market Maker (referred to as a ''Directed Lead Market Maker''). Only Priority Customer Orders will be eligible to be entered into the System as a Directed Order by an Electronic Exchange Member. *See* MIAX Rule 100. *See also* MIAX Rule 514(h) which describes allocation. Today, MIAX permits Directed Orders to be submitted as a New Order—Multileg. *See https://www.miaxoptions.com/sites/default/files/page-files/FIX%20Order%20Interface_FOI_v2.5a_re.pdf.* Pursuant to MIAX's specifications, ''AllocAccount (Tag 79) is defined as MIAX assigned directed firm code of the designated participant for directed order flow.''

Further, the proposed amendment will allow Market Complex Orders to participate in the Opening Price Determination process in a broader capacity than the rule allows for today. Today, if there are only Market Complex Orders on both sides of the market, or if there are Market Complex Orders on the bid (offer) side of the market for greater than the total size of Complex Orders on the offer (bid) side of the market, then MRX will not trade in the Complex Opening Price Determination process and would instead open pursuant to an Uncrossing as provide [sic] for in Supplementary Material .06(b) of MRX Options 3, Section 14. With the proposed amendment Market Complex Orders will be included in the Complex Opening Price Determination process in both situations described above, leading to more contracts being able to trade in the Complex Opening Price Determination with better price discovery. Example 5 below illustrates this point.

Finally, the proposed amendment considers the Boundary Price earlier in the Complex Opening Process. Today, the rule seeks to satisfy the maximum quantity criterion first and then consider Boundary Prices. With the proposed change, the Exchange will consider the Boundary Price while determining the Potential Opening Price, thereby enabling as many contracts as possible to trade sooner, which reduces risk for market participants awaiting executions. With this proposal, the Complex Opening Process considers the Boundary Price earlier in the process and the Boundary Price becomes the limit price for Market Complex Orders. This proposal should maximize the number of contracts executed, to the benefit of those Members participating in that complex strategy.

Current Supplementary Material .05 of MRX Options 3, Section 14 describes how Complex Orders arrive at an Opening Price. Specifically, Supplementary .05(b) of MRX Options 3, Section 14 describes the interest that is eligible within the Complex Opening Price Determination. The rule text provides that the System would calculate Boundary Prices [38] at or within which Complex Orders may be executed during the Complex Opening Price Determination.[39] Current Supplementary Material .05(d)(2) of MRX Options 3, Section 14 provides,

''The System will calculate the Potential Opening Price [40] by identifying the price(s) at which the maximum number of contracts can trade (''maximum quantity criterion'') taking into consideration all eligible interest pursuant to Supplementary Material .06(b) to this Rule.'' [41] The System takes into consideration all Complex Orders, identifies the price at which the maximum number of contracts can trade, and calculates the Potential Opening Price as described in Supplementary Material .05(d)(2) of MRX Options 3, Section 14. Supplementary Material .05(d)(3) of MRX Options 3, Section 14 further describes the way the System handles more than one Potential Opening Price. Current Supplementary Material .05(d)(3) of MRX Options 3, Section 14 states,

When two or more Potential Opening Prices would satisfy the maximum quantity criterion: (A) without leaving unexecuted contracts on the bid or offer side of the market of Complex Orders to be traded at those prices, the System takes the highest and lowest of those prices and takes the mid-point; provided that (1) if the highest and/or lowest price described above is through the price of a bid or offer that is priced to not allocate in the Complex Opening Price Determination, the highest and/or lowest price will be rounded to the price of such bid or offer that is priced to not allocate before taking the mid-point, and (2) if the midpoint is not expressed as a permitted minimum trading increment, it will be rounded down to the nearest permissible minimum trading increment; or (B) leaving unexecuted contracts on the bid (offer) side of the market of Complex Orders to be traded at those prices, the Potential Opening Price is the highest (lowest) executable bid (offer) price. Notwithstanding the foregoing: (C) if there are Market Complex Orders on the bid (offer) side of the market that would equal the full quantity of Complex Orders on offer (bid) side of the market, the limit price of the highest (lowest) priced Limit Complex Order is the Potential Opening Price; and (D) if there are only Market Complex Orders on both sides of the market, or if there are Market Complex Orders on the bid (offer) side of the market for greater than the total size of Complex Orders on the offer (bid) side of the market, there will be no trade in the Complex Opening Price Determination and the complex strategy will open pursuant to the Complex Uncrossing Process described in Supplementary Material .06(b) to this Rule.

At this time, the Exchange proposes to amend the System handling within the Complex Opening Process by replacing Supplementary Material .05(d)(3) of MRX Options 3, Section 14 with the following proposed rule text,

Opening Price Determination. When interest crosses and does not match in size, the System will calculate the Potential Opening Price based on the highest (lowest) executable offer (bid) price when the larger sized interest is offering (bidding), provided, however, that if there is more than one price at which the interest may execute, the Potential Opening Price when the larger sized interest is offering (bidding) shall be the mid-point of the highest (lowest) executable offer (bid) price and the next available executable offer (bid) price rounded, if necessary, down (up) to the closest minimum trading increment; or

When interest crosses and is equal in size, the System will calculate the Potential Opening Price based on the mid-point of lowest executable bid price and the highest executable offer price, rounded, if necessary, up to the closest minimum trading increment.

(A) Executable bids/offers include any interest which could be executed at the Potential Opening Price without trading through residual interest or the Boundary Price or without trading at the Boundary Price where there is Priority Customer interest at the best bid or offer for any leg, consistent with paragraph Options 3, Section 14(c)(2).

(B) Executable bids/offers will be bounded by the Boundary Price on the contra-side of the interest, for determination of the Potential Opening Price described above.

This proposed new Complex Opening Process seeks to maximize the interest which is traded during the Complex Opening Price Determination process and deliver a rational price for the available interest at the opening. The Complex Opening Price Determination process maximizes the number of contracts executed during the Complex Opening Process and ensures that residual contracts of partially executed orders or quotes are at a price equal to or inferior to the Opening Price. In other words, the logic ensures there is no remaining unexecuted interest available at a price which crosses the Opening Price. If multiple prices exist that ensure that there is no remaining unexecuted interest available through such price(s), the opening logic selects the mid-point of such price points. Below are some examples.

Example # 3 (More Than One Potential Opening Price—Mid-Point of Larger-Sized Interest)

''*if there is more than one price at which the interest may execute, the Potential Opening Price when the larger sized interest is offering (bidding) is the mid-point of the highest (lowest) executable offer (bid) price and the next available executable offer (bid) price*

[38] The Boundary Price is described in Supplementary Material .05(d)(1) of MRX Options 3, Section 14(a)(1).

[39] *See* Supplementary Material .05(d)(1) of MRX Options 3, Section 14.

[40] The Potential Opening Price is described in Supplementary Material .05(d)(2) of MRX Options 3, Section 14.

[41] The Exchange proposes to amend the citation within Supplementary Material .05(d)(2) to Options 3, Section 14 within this proposal. The citation to Supplementary Material .06(b), related to Uncrossing, should be to Supplementary Material .05(b), related to Complex Opening Price Determination. Specifically, the reference is to Eligible Interest during the Complex Opening Price Determination.

rounded, if necessary, down (up) to the closest minimum trading increment''

Assume

Complex Order Strategy: A+B strategy
Quote for Leg A @ 1.75 × 1.95
Quote for Leg B @ 1.75 × 1.95
Boundary Price = 3.50 (10) − 3.90 (10)
(Leg A Bid 1.75 + Leg B Bid 1.75 = 3.50)
(Leg A Offer 1.95 + Leg B Offer 1.95 = 3.90)
Complex Order #1: Buy 20 for $3.79
Complex Order #2: Buy 20 at $3.73
Complex Order #3: Sell 20 at $3.60

With the proposed amendment, Opening Price would be for 20 strategies at a price of $3.76. The execution price of $3.76 is derived from the mid-point of the lowest executable bid price of $3.73 and the next available executable bid price of $3.79. In this example, 20 strategies can be opened at multiple price points ranging from $3.73 up to $3.79. None of these Potential Opening Prices would cause the unexecuted $3.73 buy order to be available at a price which crosses the Opening Price, therefore, the System opens at the mid-point of such prices, $3.76.

Today, with this same example, the Opening Price would be 3.79, the highest executable bid price, which provides the offer side with all price improvement. With the proposed amendment, the Opening Price seeks to distribute to the extent possible price improvement to both the bid and offer side of the transaction.

Example # 4 (Mid-Point When Interest is Equal In Size)

''*Provided such crossing interest is equal in size, the System will calculate the Potential Opening Price based on the mid-point of lowest executable bid price and the highest executable offer price, rounded, if necessary, up to the closest minimum trading increment*''

Complex Order Strategy: A+B strategy
Quote for Leg A @ 1.75 × 1.95 each
Quote for Leg B @ 1.75 × 1.95 each
Boundary Price= 3.50 (10) − 3.90 (10)
(Leg A Bid 1.75 + Leg B Bid 1.75 = 3.50)
(Leg A Offer 1.95 + Leg B Offer 1.95 = 3.90)
Complex Order #1: Buy 10 for $3.78
Complex Order #2: Buy 20 for $3.74
Complex Order #3: Buy 10 at $3.71
Complex Order #4: Sell 20 at $3.64
Complex Order #5: Sell 20 at $3.66

With the proposed amendment, the Opening Price will be for 40 strategies at a price of $3.69. The execution price of $3.69 is derived from the mid-point of the lowest executable bid price of $3.71 and the highest executable offer price of $3.66, rounded up to the closest minimum trading increment. Today, rounding would be down and with this proposal the rounding would be up. If the example were changed slightly such that Complex Order #4 and Complex Order #5 were Market Complex Orders rather than Limit Orders, the Opening Price for the 40 strategies would be $3.61, which is derived from the mid-point of the lowest executable bid price of $3.71 and the highest executable offer of $3.50 (which is the Boundary Price of the sell Market Complex Orders), rounded up to the closest minimum trading increment.

The Exchange notes that executable bids/offers include any interest that could be executed at the net price without trading through residual interest or the Boundary Price, or without trading at the Boundary Price where there is Priority Customer interest at the best bid or offer for any leg, consistent with current MRX Options 3, Section 14(c)(2).[42] Further, executable bids/offers would be bounded to the Boundary Price on the contra-side of the interest, for determination of the Opening Price described above when crossing interest is different in size and when crossing interest is equal in size.

The amendment will benefit Members by smoothing the way for the complex strategy to open with Market Complex Orders. Today, Market Complex Orders participate in the Complex Opening Process in a limited capacity as explained above. By permitting Market Complex Orders to participate in the Complex Opening Price Determination process in more situations, the Exchange can provide more opportunity for Complex Orders to trade in the Opening Process without having to go to the Uncrossing process. Market conditions can change between the Complex Opening Price Determination process and the Uncrossing process, which can lead to missed opportunities for execution. The proposed rule would have the Boundary Price assign limits to the Opening Price and therefore permit Market Complex Orders to participate in the Complex Opening Process to the extent that they are within the Boundary Prices. With this change, MRX would permit a complex strategy to calculate an Opening Price utilizing a greater number of Market Complex Orders, which benefits the Opening Process by taking into account these more aggressively priced orders[43] while also bringing more liquidity into the Opening Price calculation.

Example # 5 (Market Complex Orders Trading in Opening Price Determination)

''*Provided interest crosses and does not match in size, the System will calculate the Potential Opening Price based on the highest (lowest) executable offer (bid) price when the larger sized interest is offering (bidding)*''

As referenced above,

Assume

Complex Order Strategy: A+B strategy
Quote for Leg A @ 1.75 × 2.00
Quote for Leg B @ 1.75 × 2.00
Boundary Price = 3.50 (10) − 4.00 (10)
(Leg A Bid 1.75 + Leg B Bid 1.75 = 3.50)
(Leg A Offer 2.00 + Leg B Offer 2.00 = 4.00)
Market Complex Order #1: Buy 30
Complex Order #2: Sell 20 at $3.95
After Complex Opening Price Determination process, but before Uncrossing
ABBO for Leg A updates: 1.85 x 1.90
ABBO for Leg B updates 1.85 x 1.90
cNBBO: 3.70 x 3.80
(ABBO Leg A Bid 1.85 + Leg B Bid 1.85 = 3.70)
(ABBO Leg A Offer 1.90 + Leg B Offer 1.90 = 3.80)

With the proposed amendment the Market Complex Order can be considered in the Complex Opening Price Determination process and therefore is able to trade at the Opening Price of $4.00 for 20 strategies with Complex Order #2 and also able to trade 10 strategies at a net price $4.00 with the individual legs at the best bids and offers before the ABBO updates, leaving no place for this complex strategy to trade. The Opening Price in this example is determined as the lowest executable bid because the bid side is the larger sized interest, which is limited by the Boundary Price on the offer side at 4.00.

Today, Market Complex Orders with a larger quantity than the quantity of interest on the contra side of the market do not participate in the Complex Opening Price Determination and can only execute during the Uncrossing pursuant to Supplementary Material .05(d)(6) of MRX Options 3, Section 14. In the example above, the ABBO of each leg updates after the Complex Opening Price Determination process and restricts the Market Complex Order and Complex Limit Order from trading in the Uncrossing because they cannot match at a price that would be within the Price Limits for Complex Orders

[42] MRX Options 3, Section 14(c)(2) provides, ''Complex strategies will not be executed at prices inferior to the best net price achievable from the best ISE bids and offers for the individual legs. Notwithstanding the provisions of Options 3, Section 10: (i) a Complex Options Strategies may be executed at a total credit or debit price with one other Member without giving priority to bids or offers established on the Exchange that are no better than the bids or offers in the individual options series comprising such total credit or debit; provided, however, that if any of the bids or offers established on the Exchange consist of a Priority Customer Order, the price of at least one leg of the complex strategy must trade at a price that is better than the corresponding bid or offer on the Exchange by at least one minimum trading increment for the series as defined in Options 3, Section 3; (ii) the option leg of a Stock-Option Strategy has priority over bids and offers for the individual options series established on the Exchange by Professional Orders and market maker quotes that are no better than the price of the options leg, but not over such bids and offers established by Priority Customer Orders; and (iii) the options legs of a Stock-Complex Strategy are executed in accordance with subparagraph (c)(2)(i).

[43] The allowance of a greater number of Market Complex Orders within the Opening Process provides a greater depth of price discovery for an options series. As noted above, the Boundary Price would assign limits to the Opening Price, therefore preventing Market Complex Orders which are aggressively priced from negatively impacting the Opening Price.

pursuant to MRX Options 3, Section 16(a).

Finally, with this proposal and as demonstrated in Example 5 above, a complex strategy would open pursuant to Supplementary Material .05(d)(5) of MRX Options 3, Section 14, with less contracts becoming subject to the Uncrossing pursuant to Supplementary Material .05(d)(6) of MRX Options 3, Section 14. As a result of this change, more interest would be able to trade within the Opening Process, ensuring a greater number of contracts are executed on MRX at the Complex Opening and lessening the likelihood that contracts which remain unmatched during the Complex Opening Price Determination process receive no execution in the Uncrossing due to changing market conditions.[44]

Phlx has a similar methodology to arrive at a complex opening price at Phlx Options 3, Section 14(d)(ii)(C)(2)[45] as compared to proposed Supplementary Material .05(d)(3) of MRX Options 3, Section 14. Phlx's COOP Evaluation and MRX's proposed Opening Price Determination both seek the price at which the maximum number of contracts can trade. Phlx's COOP Evaluation is an auction with a timer, unlike MRX's Opening Price Determination.[46] Proposed Supplementary Material .05(d)(3)(A) and (B) of MRX Options 3, Section 14 differs from Phlx Options 3, Section 14(d)(ii)(C)(2). MRX will open a complex strategy with the Complex Order Book crossed if an Opening Price cannot be found within the Boundary Prices and remain crossed while attempting to uncross the Complex Order Book on a best effort basis, pursuant to Supplementary Material .06 of MRX Options 3, Section 14, until all interest can be executed. Today, Phlx will open a complex strategy crossed when a price cannot be found within Phlx's cPBBO during the COOP Evaluation period and there are more aggressive away market prices that are limiting the ability to leg into the single-leg book, but will not remain crossed as complex orders that are through Phlx's cPBBO would be cancelled pursuant to Phlx Options 3, Section 14(f)(i)(A).[47]

The Exchange also proposes to amend the Opening Price in Supplementary Material .05(d)(4) of MRX Options 3, Section 14 that currently provides,

Opening Price. If the Potential Opening Price is at or within the Boundary Prices, the Potential Opening Price becomes the Opening Price. If the Potential Opening Price is not at or within the Boundary Prices, the Opening Price will be the price closest to the Potential Opening Price that satisfies the maximum quantity criteria without leaving unexecuted contracts on the bid or offer side of the market at that price and is at or within the Boundary Prices. If the bid Boundary Price is higher than the offer Boundary Price, or if no valid Opening Price can be found at or within the Boundary Prices, there will be no trade in the Complex Opening Price Determination and the complex strategy will open pursuant to the Complex Uncrossing Process described in Supplementary Material .06(b) to this Rule.

The Exchange proposes to amend this rule to instead provide,

If the Potential Opening Price is at or within the Boundary Prices, the Potential Opening Price becomes the Opening Price and the complex strategy will open pursuant to Supplementary Material .05(d)(5) to this Rule. If the bid Boundary Price is higher than the offer Boundary Price, or if no valid Potential Opening Price can be found at or within the Boundary Prices, there will be no trade in the Complex Opening Price Determination and the complex strategy will open pursuant to the Complex Uncrossing Process described in Supplementary Material .06(b) to this Rule.

With the proposed change, if the Potential Opening Price is at or within the Boundary Prices, the Potential Opening Price becomes the Opening Price and the complex strategy will open pursuant to the Uncrossing described in Supplementary Material .05(d)(5) of MRX Options 3, Section 14, as is the case today. However, as is the case today, if the bid Boundary Price is higher than the offer Boundary Price, or if no valid Potential Opening Price can be found at or within the Boundary Prices, there will be no trade in the Complex Opening Price Determination and the complex strategy will open pursuant to the Complex Uncrossing process described in Supplementary Material .06(b) of MRX Options 3, Section 14 pursuant to the proposed amendment to the Complex Opening Price Determination.

[44] Unmatched orders would rest on the Order Book with the potential to execute intra-day.

[45] COOP Evaluation. Upon expiration of the COOP Timer, the System will conduct a COOP Evaluation to determine, for a Complex Order Strategy, the price at which the maximum number of contracts can trade, taking into account Complex Orders marked All-or-None (which will be executed if possible) unless the maximum number of contracts can only trade without including All-or-None Orders. The Exchange will open the Complex Order Strategy at that price, executing marketable trading interest, in the following order: first, to Public Customers in time priority; next to Phlx electronic market makers on a pro rata basis; and then to all other participants on a pro rata basis. The imbalance of Complex Orders that are unexecutable at that price are placed on the CBOOK. (1) No trade possible. If at the end of the COOP Timer the System determines that no market or marketable limit Complex Orders or COOP Sweeps, Complex Orders or COOP Sweeps that are equal to or improve the cPBBO, and/or Complex Orders or COOP Sweeps that cross within the cPBBO exist in the System, all Complex Orders received during the COOP Timer will be placed on the CBOOK, as described in paragraph (f) below. (2) Trade is possible. If at the end of the COOP Timer the System determines that there are market or marketable limit Complex Orders or COOP Sweeps, Complex Orders or COOP Sweeps that are equal to or improve the cPBBO, and/or Complex Orders or COOP Sweeps that cross within the cPBBO in the System, the System will do the following: if such interest crosses and does not match in size, the execution price is based on the highest (lowest) executable offer (bid) price when the larger sized interest is offering (bidding), provided, however, that if there is more than one price at which the interest may execute, the execution price when the larger sized interest is offering (bidding) is the midpoint of the highest (lowest) executable offer (bid) price and the next available executable offer (bid) price rounded, if necessary, down (up) to the closest minimum trading increment. If the crossing interest is equal in size, the execution price is the midpoint of lowest executable bid price and the highest executable offer price, rounded, if necessary, up to the closest minimum trading increment. Executable bids/offers include any interest which could be executed at the net price without trading through residual interest or the cPBBO or without trading at the cPBBO where there is Public Customer interest at the best bid or offer for any leg, consistent with paragraph (c)(iii). If there is any remaining interest and there is no component that consists of the underlying security and provided that the order is not marked all-or-none, such interest may ''leg'' whereby each options component may trade at the PBBO with existing quotes and/or Limit Orders on the Limit Order book for the individual components of the Complex Order; provided that remaining interest may execute against any eligible Complex Orders received before legging occurs. If the remaining interest has a component that consists of the underlying security, such Complex Order will be placed on the CBOOK (as defined below). (3) The Complex Order Strategy will be open after the COOP even if no executions occur.

[46] Phlx's All-or-None order type differs from MRX's All-or-None order in that only Public Customers may utilize the Phlx All-or-None order type and Phlx's All-or-None order may rest on the order book. *See* Phlx Option 3, Section 7(b)(5). MRX's All-or-None order is a limit or market order that is to be executed in its entirety or not at all. *See* MRX Options 3, Section 7(c).

[47] By way of example, assume Phlx cPBBO is 1.00 × 2.00 and cNBBO is 1.45 × 1.50. Also, assume Phlx complex Day Order to buy the strategy @ $0.50 which begins a COOP timer. Next, a complex day order to sell the strategy @ $0.50 arrives during the COOP timer. These orders are crossed, but are not within Phlx's cPBBO, and, therefore, both orders cannot trade as part of the COOP Evaluation. Additionally, the sell order cannot leg into Phlx's simple order book because of the more aggressive cNBBO which would limit legging as part of the ACE price protection described within Phlx Options 3, Section 16(b)(i), and, therefore, the sell order that is crossed with Phlx's cPBBO cannot remain on the Complex Order Book and is ultimately cancelled. In contrast, on MRX, this sell order would remain crossed on the Complex Order Book while continuously looking for an opportunity to uncross and trade these Complex Orders as new orders arrive or the market moves. Options 3, Section 14 (f)(i)(A) provides that Complex Orders must be entered onto the CBOOK in increments of $0.01. The individual components of a Complex Order may be executed in minimum increments of $0.01, regardless of the minimum increments applicable to such components. Such orders will be placed on the CBOOK by the System when the following conditions exist: (A) When the Complex Order does not price-improve upon the cPBBO upon receipt. . .''.

Complex Order Risk Protections

The Exchange proposes a non-substantive amendment to the title of a Complex Order Risk Protection in MRX Options 3, Section 16, Complex Order Risk Protections. Specifically, the Exchange proposes to amend MRX Options 3, Section 16(c)(1) to change the title from ''Limit Order Price Protection'' to ''Complex Order Price Protection.'' The Exchange believes the proposed title more accurately describes the risk protection. The Exchange also proposes a non-substantive amendment to correct an incorrect citation in MRX Options 3, Section 16(b) to ''Options 2, Section 11.'' The correct citation is ''Options 3, Section 11.'' Correcting this citation will make clear what was [sic] section was being referenced.

Implementation

The Exchange intends to begin implementation of the proposed rule change prior to December 23, 2022. The implementation would commence with a limited symbol migration and continue to migrate symbols over several weeks. The Exchange will issue an Options Trader Alert to Members to provide notification of the symbols that will migrate and the relevant dates.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[48] in general, and furthers the objectives of Section 6(b)(5) of the Act,[49] in particular, in that it is designed to promote just and equitable principles of trade and to protect investors and the public interest for the reasons discussed below.

Legging Order

Amending MRX Options 3, Section 7(k)(1) to add a provision which states that a Legging Order will not be generated during a Posting Period in progress on the same side in the series pursuant to Options 3, Section 15 regarding Acceptable Trade Range, is consistent with the Act because from a System processing and user acceptance standpoint, the best practice is to wait for the ATR Posting Period to complete before attempting to generate a Legging Order on the same side in the series, as the time required to complete the ATR Posting Period is minimal. The proposed change is designed to protect investors and the public interest as automatically generated Legging Orders would be removed from the single-leg order book when they are no longer at the Exchange's displayed best bid or offer. Generating a Legging Order during a Posting Period in progress on the same side in the series would lead to the immediate removal of the Legging Order from the single-leg order book, making it superfluous to have been generated. Phlx's legging order rule in Options 3, Section 14(f)(iii)(C)(2)[50] has the same restriction on generating legging orders as proposed herein.

Changes to the Single-Leg Price Improvement Mechanism for Crossing Transactions

The Exchange's proposal to amend MRX Options 3, Section 13(d)(4), related to single-leg PIM, to not permit unrelated marketable interest, on the opposite side of the market from the Agency Order, which is received during a single-leg PIM to early terminate a single-leg PIM is consistent with the Act and promotes just and equitable principles because allowing the auction to run its full course would provide a full opportunity for price improvement to the Crossing Transaction. The unrelated interest would participate in the single-leg PIM allocation pursuant to MRX Options 3, Section 13(d), if residual contracts remain after executing with interest on the single-leg order book. Today, Phlx[51] and BX[52] do not permit unrelated interest on the same or opposite side of an Agency Order to early terminate their simple price improvement auctions.

The proposed amendment in MRX Options 3, Section 13(c)(5)(ii), related to single-leg PIM, applies to the receipt of marketable orders both on the same side and opposite side of the Agency order. With respect to the same side of the Agency Order, today, an unrelated market or marketable limit order in the same series on the same side of the Agency Order would cause the single-leg PIM to early terminate as well. The proposal promotes just and equitable principles of trade because a market or marketable limit order in the same series on the same side of the Agency Order cannot interact with a single-leg PIM auction. The market or marketable limit order may interact with the order book, and if there are residual contracts that remain from the market or marketable order in the same series on the same side of the Agency Order, they will rest on the order book and improve the BBO beyond the price of the Crossing Transaction which will cause early termination of the single-leg PIM pursuant to proposed MRX Options 3, Section 13(c)(5)(ii). The Exchange believes that this outcome would allow for the single-leg PIM exposure period to continue for the full period despite the receipt of unrelated marketable interest on the same side of the market from the Agency Order, provided residual interest does not go on to rest on the order book improving the BBO beyond the price of the Crossing Transaction of the PIM. Allowing the single-leg PIM to run its full course protects investors and the general public because it would provide an opportunity for price improvement to the Agency Order.

Amending current MRX Options 3, Section 13(c)(5)(iii) to align the rule text more closely with BX Options 3, Section 13(ii)(B)(2)[53] is consistent with the Act because it removes any ambiguity that a market or marketable limit order priced more aggressively than the Agency Order on the same side could ultimately rest on the order book, improving the BBO beyond the price of the Crossing Transaction of the PIM and, therefore, cause the early termination of a single-leg PIM. Continuing to not permit a single-leg PIM to early terminate any time the Exchange best bid or offer improves beyond the price of the Crossing Transaction on the same side of the market as the Agency Order protects investors and the general public because the Crossing Transaction Agency Order's price is inferior to the Exchange's best bid or offer on the same side of the market as the Agency Order. Upon early termination of the single-leg PIM, the Crossing Transaction would execute against responses that arrived prior to the time the Exchange's best bid or offer improved beyond the Crossing Transaction. The proposed amendment to the rule text is not intended to amend the current System functionality, rather it is intended to make clear that a market or marketable limit order could ultimately rest on the order book and improve the BBO beyond the price of the Crossing Transaction.

Adding proposed new MRX Options 3, Section 13(c)(5)(iii), which describes the automatic termination of the exposure period resulting from a trading halt on the Exchange in the affected series, is consistent with the Act because a trading halt would cause an option series to stop trading on MRX and thereby impact the PIM auction. Today, if a trading halt is initiated after an order is entered into the single-leg PIM, such auction will be automatically terminated without execution. Of note, the Exchange is separately[54] proposing to amend MRX Options 3, Section

[48] 15 U.S.C. 78f(b).

[49] 15 U.S.C. 78f(b)(5).

[50] *See* note 8 above.

[51] *See* note 14 above.

[52] *See* note 15 above.

[53] *See* note 17 above.

[54] *See* note 19 above.

13(d)(5) to change System behavior such that if a trading halt is initiated after an order is entered into the single-leg PIM, such auction will be automatically terminated with execution solely with the Counter-Side Order.[55] The proposed amendment to MRX Options 3, Section 13(c)(5)(iii) protects investors and the general public by making clear that a trading halt would lead to early termination of a single-leg PIM. This amendment is not intended to amend the current System functionality, rather it is intended to make clear that a trading halt will cause the single-leg PIM to early terminate.

Changes to the Complex PIM

Deleting MRX Options 3, Section 13(e)(4)(vi) within Complex PIM, as well as a paragraph in Supplementary Material .01(b)(ii) of MRX Options 3, Section 14 discussing Complex Order Exposure, related to the early termination of single-leg PIM from the arrival of unrelated marketable interest on either the same or opposite side of the market from the Agency Order, is consistent with the Act because a single-leg PIM will no longer early terminate from the arrival of unrelated marketable interest on either the same or opposite side of the market from the Agency Order and because the flash functionality will no longer exist.[56] The removal of the aforementioned rule text will protect investors and the public by avoiding confusion as the scenarios contemplated by MRX Options 3, Section 13(e)(4)(vi) and Supplementary Material .01(b)(ii) of MRX Options 3, Section 14 will no longer be able to occur.

Complex Orders Delayed Functionality

The Exchange's proposal to delay the implementation of certain stock-tied functionality in connection with the technology migration is consistent with the Act as it will allow the Exchange additional time to code, test and implement this functionality on the enhanced platform. Delayed Functionalities would not be available for symbols that migrated to the platform and thereafter, until such time as the Exchange recommenced their availability by announcing a date in an Options Trader Alert, which date would be prior to one year from the start of the migration of the symbols to the platform. The Exchange's proposal to delay these functionalities protects investor and the general public by allowing the Exchange to stage the migration, thereby providing maximum benefit to its Members while also ensuring a successful rollout.

Other Complex Order Amendments

Opening Only Complex Order

The Exchange's proposal to remove the word ''Limit'' within the description of the Opening Only Complex Order Type in MRX Options 3, Section 14(b)(10) is consistent with the Act because it allows Opening Only Complex Orders to be submitted as Market Orders or Limit Orders. The Exchange believes that allowing Market and Limit Orders to be submitted within the Complex Opening Process promotes just and equitable principles of trade. Market Orders are typically the most aggressively priced orders while Limit Orders have a limit price contingency that Market Orders do not have. Allowing both of these order types to participate in the Complex Opening Process protects investors and the general public because it allows greater liquidity to be present to determine the Opening Price. All Members may enter both Market Orders and Limit Orders in the Complex Opening Process as well as intra-day. This proposal is consistent with current System operations.

Complex QCC With Stock Orders

The Exchange's proposal to amend an incorrect citation with MRX Options 3, Section 14(b)(15), related to Complex QCC with Stock Orders, is consistent with the Act because the current citation to MRX Options 3, Section 12(e) in the description of this order type should be to MRX Options 3, Section 12(f). This non-substantive amendment will make clear what was meant by the reference.

Complex Preferenced Orders

The Exchange's proposal to add ''Complex Preferenced Orders'' to the list of Complex Order Types in MRX Options 3, Section 14(b) is consistent with the Act because the Exchange believes that this order type will promote just and equitable principles of trade because the order type will continue to encourage Preferred Market Makers to quote aggressively in an effort to execute against the Complex Preferenced Order. Preferred Marker Makers are not able to ascertain if a particular order is a Complex Preferenced Order. The Exchange believes the proposal will protect investors and the general public by encouraging greater order flow to be sent to the Exchange through Complex Preferenced Orders and that this increased order flow will benefit all market participants on the Exchange because they may interact with that order flow.

The proposal promotes just and equitable principles of trade because it continues to prioritize Priority Customer[57] Orders on the single-leg order book. Priority Customers have priority over non-Priority Customer interest at the same price in the same options series on the single-leg order book.[58] Complex Preferenced Orders are allocated based on the competitive bidding of market participants. The Exchange's proposal promotes just and equitable principles of trade as a Preferred Marker Maker must be at the NBBO for a component leg(s) of the Complex Preferenced Order at the time the Complex Preferenced Order is received. Moreover, participation entitlements for Preferred Market Makers are designed to balance the obligations[59] that the Preferred Market Maker has to the market with corresponding benefits. In its approval of other options exchange preferenced or directed order programs, the Commission has, like proposals to amend a specialist guarantee, focused on whether the percentage of the ''entitlement'' would rise to a level that could have a material adverse impact on quote competition within a particular exchange, and concluded that such programs do not jeopardize market integrity or the incentive for market participants to post competitive quotes.[60]

Further, adding this existing order type, which is described in MRX Options 2, Section 10, would complete the list of Complex Order types in MRX

[55] SR–MRX–2022–5P proposes to renumber MRX Options 3, Section 13(d)(5) as Options 3, Section 13(d)(6), and proposes to state, ''Specifically, current MRX Options 3, Section 13(d) is proposed to be renumbered within SR–MRX–2022–5P to Options 3, Section 13(d)(6) and proposes to state, ''If a trading halt is initiated after an order is entered into the Price Improvement Mechanism, such auction will be automatically terminated with execution solely with the Counter-Side Order.''

[56] *See* note 24 above.

[57] The term ''Priority Customer'' means a person or entity that (i) is not a broker or dealer in securities, and (ii) does not place more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). *See* Options 1, Section 1(a)(36).

[58] *See* MRX Options 3, Section 10(c)(1)(A).

[59] Primary Market Makers are obligated to quote in the Opening Process pursuant to MRX Options 3, Section 8(c) as well as intra-day pursuant to Options 2, Section 5(e), in addition to other obligations noted within MRX Options 2, Sections 4–8.

[60] *See* Securities Exchange Act Release Nos. 74129 (January 23, 2015), 80 FR 4954 at 4955 (January 29, 2015) (SR–BX–2014–049) (Order Approving Proposed Rule Change Relating to Directed Market Makers); and 51759 (May 27, 2005), 70 FR 32860 at 32861(June 6, 2005) (SR–Phlx–2004–91) (Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 1 Thereto To Establish a Directed Order Process for Orders Delivered to the Phlx Via AUTOM).

Options 3, Section 14(b). The addition of Complex Preferenced Orders to the list of order types in MRX Options 3, Section 14(b) will make clear to Members the availability of Complex Preferenced Orders. Both Phlx [61] and MIAX [62] have a similar order type.

Options 3, Section 14(c)(2) and MRX Supplementary Material .02 to Options 3, Section 14

Correcting an incorrect reference to ''ISE'' with MRX Options 3, Section 14(c)(2), which should be to ''MRX,'' will add clarity to the rule; this amendment is non-substantive. The Exchange's proposal to make a technical correction in Supplementary Material .02 of MRX Options 3, Section 14 to amend the word ''which'' to ''whom'' is a non-substantive amendment.

Complex Opening Price Determination

The Exchange's proposal to amend the citation within Supplementary Material .05(d)(2) to Options 3, Section 14, related to the Potential Opening Price, is consistent with the Act because the current citation to Supplementary Material .06(b) should be to Supplementary Material .05(b). This non-substantive amendment will make clear what was meant by the reference.

The Exchange's proposal to amend Supplementary Material .05(d)(3) of MRX Options 3, Section 14, which describes the Complex Opening Price Determination, is consistent with the Act because the proposed new Complex Opening Process would allow for additional contracts to be included in the Potential Opening Price calculation. This proposed methodology would protect investors and the general public by leading to better price discovery and more contracts executing as part of the Complex Opening Price Determination. With this proposal, when the interest does not match the size and there is more than one Potential Opening Price at which the interest may execute, then the Exchange would calculate a Potential Opening Price using the mid-point of the highest (lowest) executable offer (bid) price and the next available executable offer (bid) price rounded, if necessary, down (up) to the closest minimum trading increment. As a result, the proposal promotes just and equitable principles of trade as more options contracts are likely to be executed at better prices than under current rule. This behavior differs from MRX's current opening rule in that, today, the Exchange would calculate the Potential Opening Price as the highest (lowest) executable bid (offer) when there would be contracts left unexecuted on the bid (offer) side of the complex market. The proposed methodology is similar to Phlx.[63]

Further, the proposed amendment promotes just and equitable principles of trade by allowing Market Complex Orders to participate in the Opening Price Determination process in a broader capacity than the MRX opening rule allows for today. Today, if there are only Market Complex Orders on both sides of the market, or if there are Market Complex Orders on the bid (offer) side of the market for greater than the total size of Complex Orders on the offer (bid) side of the market, then MRX will not trade in the Complex Opening Price Determination process and would instead open pursuant to an Uncrossing pursuant to Supplementary Material .06(b) of MRX Options 3, Section 14. The proposed rule would have the Boundary Price assign limits to the Opening Price and, therefore, permit Market Complex Orders to participate in the Complex Opening Process, without limitation to the benefit of investors and the public interest. With this change, MRX would permit a complex strategy to calculate an Opening Price utilizing a greater number of Market Complex Orders, which benefits the Opening Process by taking into account these more aggressively priced orders [64] while also bringing more liquidity into the Opening Price calculation. The amendment is designed to promote just and equitable principles of trade as it will benefit Members by smoothing the way for the complex strategy to open with Market Complex Orders.

Finally, the proposed amendments to the Complex Opening Process should promote just and equitable principles by allowing a complex strategy to open pursuant to Supplementary Material .05(d)(4) of MRX Options 3, Section 14, with less contracts becoming subject to the Uncrossing pursuant to Supplementary Material .05(d)(5) of MRX Options 3, Section 14. As a result of this change, more interest would be able to trade within the Opening Process, ensuring a greater number of contracts are executed on MRX at the opening and lessening the likelihood that contracts which remain unmatched during the Uncrossing receive no execution.[65]

Complex Order Risk Protections

The Exchange's proposal to amend the title of a Complex Order Risk Protection in Options 3, Section 16, Complex Order Risk Protections is a non-substantive amendment.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Legging Orders

Amending MRX Options 3, Section 7(k)(1) to add a provision which states that a Legging Order will not be generated during a Posting Period in progress on the same side in the series pursuant to Options 3, Section 15 regarding Acceptable Trade Range does not impose an undue burden on intra-market competition because the amendment will apply equally to all Members as Legging Orders are generated by the System.

Additionally, this proposal does not impose an undue burden on inter-market competition as other options exchanges may adopt Legging Orders and similar rules for the generation of such orders. Today, Phlx's legging order rule in Options 3, Section 14(f)(iii)(C)(2) has the same restriction as proposed to be added to MRX's Legging Order rule in MRX Options 3, Section 7(k)(1).[66]

Changes to the Single-Leg Price Improvement Mechanism for Crossing Transactions

The Exchange's proposal to amend MRX Options 3, Section 13(d)(4), MRX Options 3, Section 13(c)(5)(ii) and (iii), and add a proposed new MRX Options 3, Section 13(c)(5)(iii), related to single-leg PIM, does not impose an undue burden on intra-market competition because the amendment will apply equally to all Members. All Members may utilize PIM.

The Exchange's proposal to amend MRX Options 3, Section 13(d)(4), MRX Options 3, Section 13(c)(5)(ii) and (iii), and add a proposed new MRX Options 3, Section 13(c)(5)(iii), related to single-leg PIM, does not impose an undue burden on inter-market competition because other options exchanges may adopt similar rules. Today, Phlx [67] and

[61] *See* note 36 above.

[62] *See* note 37 above.

[63] *See* Phlx Options 3, Section 14(d)(ii)(C)(2).

[64] The allowance of a greater number of Market Complex Orders within the Opening Process provides a greater depth of price discovery for an options series. As noted above, the Boundary Price would assign limits to the Opening Price, therefore preventing Market Complex Orders which are aggressively priced from negatively impacting the Opening Price.

[65] Unmatched orders would rest on the order book with the potential to execute intra-day.

[66] *See* note 8 above.

[67] *See* note 14 above.

BX[68] do not permit unrelated marketable interest on either the same or opposite side of the market from an Agency Order to early terminate their simple price improvement auctions.

Changes to the Complex PIM

Deleting MRX Options 3, Section 13(e)(4)(vi) within Complex PIM, as well as a related paragraph in Supplementary Material .01(b)(ii) of MRX Options 3, Section 14, which describes Complex Order Exposure, related to the early termination of single-leg PIM as a result of the arrival of unrelated marketable interest on either the same or the opposite side of the market from the Agency Order does not impose an undue burden on intra-market competition because the amendment will apply equally to all Members. All Members may utilize Complex PIM.

Deleting MRX Options 3, Section 13(e)(4)(vi) within Complex PIM, as well as a related paragraph in Supplementary Material .01(b)(ii) of MRX Options 3, Section 14, which describes Complex Order Exposure, related to the early termination of single-leg PIM from the arrival of unrelated marketable interest on either the same or opposite side of the market from the Agency Order does not impose an undue burden on inter-market competition as other options exchanges may adopt similar rules. Today, Phlx[69] and BX[70] do not permit unrelated marketable interest on either the same or opposite side of the market from an Agency Order to early terminate their simple price improvement auctions.

Complex Orders Delayed Functionality

The Exchange's proposal to delay the implementation of certain stock-tied functionality in connection with the technology migration does not impose an undue burden on intra-market competition because no Member will be able to utilize the Delayed Functionalities.

The Exchange's proposal to delay the implementation of certain stock-tied functionality in connection with the technology migration does not impose an undue burden on inter-market competition because the Exchange does not believe that the proposed rule change will impact the intense competition that exists in the options market. Today, ISE offers the Delayed Functionalities.

Other Complex Order Amendments

The Exchange does not believe that the proposed amendments to the Complex Orders rule will impose any significant burden on inter-market competition. Other exchanges today offer complex order functionalities. These options markets may amend their rules to mirror those of MRX. Other options exchanges offer orders similar to Complex Preferenced Orders.[71] Additionally, the proposed Complex Opening Process is similar to Phlx.[72] Finally, the proposed Complex Opening Process methodology would allow MRX to compete with other options exchanges that offer Complex Order functionality.

Opening Only Complex Order

The Exchange's proposal to remove the word ''Limit'' within the description of the Opening Only Complex Order Type in MRX Options 3, Section 14(b)(10) does not impose an undue burden on intra-market competition because this proposed change will apply to all Members.

Complex QCC With Stock Orders

The Exchange's proposal to amend an incorrect citation with MRX Options 3, Section 14(b)(15), related to Complex QCC with Stock Orders, does not impose an undue burden on intra-market competition because the amendment is non-substantive.

Complex Preferenced Orders

The Exchange's proposal to add ''Complex Preferenced Orders'' to the list of Complex Order Types in MRX Options 3, Section 14(b) does not impose an undue burden on intra-market competition. Preferred Market Makers have obligations[73] unlike other market participants. The allocation entitlements for Preferred Market Makers are designed to balance the obligations that the Preferred Market Makers has to the market with corresponding benefits. In order to receive the participation entitlement for a Complex Preferenced Order, Preferred Market Makers are required to quote 90% of the trading day as compared to Market Makers who are required to quote 60% of the trading day.[74] Further, Priority Customers[75] have priority over non-Priority Customer interest at the same price in the same options series on the single-leg order book.[76]

At the time of receipt of the Complex Preferenced Order, a Preferred Market Maker would have to be quoting at the NBBO, which is intended to incentivize the Preferred Market Maker to quote aggressively in order to execute against the Complex Preferenced Order. Preferred Marker Makers are not able to ascertain if a particular order is a Complex Preferenced Order. The Exchange believes the proposal will encourage Market Makers to quote tighter and add a greater amount of liquidity on MRX in an attempt to interact with Complex Preferenced Orders that are sent to the Exchange. This order flow will benefit all market participants on the Exchange because any MRX Member may interact with that order flow. Finally, any MRX Member on the single-leg or Complex Order Book may trade with a Complex Preferenced Order. Also, any MRX Market Maker may elect to receive Preferenced Order.

Options 3, Section 14(c)(2) and MRX Supplementary Material .02 to Options 3, Section 14

Correcting an incorrect reference to ''ISE'' with MRX Options 3, Section 14(c)(2), which should be to ''MRX,'' will add clarity to the rule; this amendment is non-substantive. The Exchange's proposal to make a technical correction in Supplementary Material .02 of MRX Options 3, Section 14 to amend the word ''which'' to ''whom'' is a non-substantive amendment.

Complex Opening Price Determination

The Exchange's proposal to amend an incorrect citation within Supplementary Material .05(d)(2) to Options 3, Section 14, related to the Potential Opening Price, does not impose an undue burden on intra-market competition because the amendment is non-substantive.

The Exchange's proposal to amend Supplementary Material .05(d)(3) to MRX Options 3, Section 14, which describes the Complex Opening Price Determination, does not impose an undue burden on intra-market competition because all Members may submit interest into the Complex Opening Process.

Complex Order Risk Protections

The Exchange's proposal to amend the title of a Complex Order Risk Protection in Options 3, Section 16, Complex Order Risk Protections is a non-substantive amendment.

[68] *See* note 15 above.

[69] *See* note 14 above.

[70] *See* note 15 above.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) by order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MRX–2022–10 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–MRX–2022–10. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MRX–2022–10, and should be submitted on or before August 19, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[77]

J. Matthew DeLesDernier,

Deputy Secretary.

[FR Doc. 2022–16257 Filed 7–28–22; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95362; File No. SR–NYSENAT–2022–12]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Schedule of Fees and Rebates

July 25, 2022.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 12, 2022, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Schedule of Fees and Rebates (''Fee Schedule'') related to colocation to remove obsolete text. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule related to colocation to remove obsolete text.[4]

(1) Proposal To Change Names of Select Third Party Systems and Third Party Data Feeds

As set forth in the Fee Schedule, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[5] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Fee Schedule.

The Exchange proposes to amend the list of Third Party Systems in the Fee Schedule to reflect the following updated names for existing Third Party Systems:

- Change the name of the ''Miami International Securities Exchange'' to ''MIAX Options,'' and
- Change the name of the ''MIAX PEARL'' to ''MIAX PEARL Options.''

The Exchange also proposes to amend the list of Third Party Data Feeds in the Fee Schedule to reflect the following

[77] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE American LLC, NYSE Arca, Inc., and NYSE Chicago, Inc., has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–30, SR–NYSEAMER–2022–31, SR–NYSEArca–2022–41, and SR–NYSECHX–2022–17.

[5] *See* Securities Exchange Act Release No. 83351 (May 31, 2018), 83 FR 26314 (June 6, 2018) (SR–NYSENAT–2018–07).

updated names for existing Third Party Data Feeds:

• Change the name ''Miami International Securities Exchange/MIAX PEARL'' to ''MIAX Options/MIAX PEARL Options;'' and

• Change ''SR Labs—SuperFeed'' data feeds to ''Vela—SuperFeed,'' to reflect the content provider's recent change to the name of these products.

This change would update the names of these services, but would not make any change to the services provided.

(2) Proposal To Delete Discontinued Third Party Data Feed

The Exchange proposes to delete the ''NASDAQ OMDF'' data feed from the list of available Third Party Data Feeds, as it is no longer offered by the content service provider.

(3) Proposal To Remove References to ICE Data Global Index

The Exchange proposes to remove obsolete references to the ICE Data Global Index (the ''GIF'') from the list of Third Party Data Feeds available for connectivity and related text.

In May 2020, ICE, which publishes the GIF, announced to its customers that before the end of 2020, it would cease offering the GIF as a stand-alone product. The Exchange accordingly amended its Fee Schedule to inform customers that it would cease offering connectivity to the GIF once it is no longer available.[6]

ICE has informed the Exchange that it ceased offering the GIF as a stand-alone product, making the references to the GIF obsolete. The operative date was announced through a customer notice. Accordingly, the Exchange proposes to remove ''ICE Data Global Index*'' and the corresponding asterisked note from the Fee Schedule.

In order to implement the proposed change, the Exchange proposes to make the following changes to the section of the Fee Schedule entitled ''Connectivity to Third Party Data Feeds'':

• In the first paragraph and in the table of Third Party Data Feeds, delete ''ICE Data Global Index * ''.

• Following the table of Third Party Data Feeds, delete the following text:

** ICE will cease to offer the GIF as a stand-alone product, which the Exchange has been informed by ICE is currently expected to occur before the end of 2020. The Exchange will announce the operative date through a customer notice. Any change fees that a User would otherwise incur as a result of the proposed change will be waived.*

(4) Proposal To Remove the Temporary Waiver of Hot Hands Fees

The Exchange proposes to remove the obsolete reference to the waiver of Hot Hands fees in light of the reopening of the data center in Mahwah, New Jersey (''Mahwah Data Center'' or ''MDC'').

In March 2020, ICE announced to each User that, starting on March 16, 2020, the MDC would be closed to third parties in response to COVID–19. The Exchange temporarily waived all Hot Hands fees from the date of the closing through the date of the reopening of the MDC, and added a note to the fees for the Hot Hands service stating as much.[7]

The MDC reopened on October 1, 2020. The date of the reopening was announced through a customer notice. As a result of the reopening, the waiver of Hot Hands fees ceased, and the note became obsolete. The Exchange now proposes to remove the obsolete text.

In order to implement this proposed change, the Exchange proposes to make the following changes to the Fee Schedule:

• In the Types of Service table, remove the ''†'' symbol after ''Hot Hands Service ***''.

• Following the Types of Service table, remove the following text:

† Fees for Hot Hands Services will be waived beginning on March 16, 2020 through the reopening of the Mahwah, New Jersey data center. The date of the reopening will be announced through a customer notice.

(5) Proposal To Remove Obsolete Text About Transition Period for Suspended Services

The Exchange proposes to remove obsolete text regarding the transition period that expired on May 24, 2021 concerning the Exchange's provision of suspended services at no charge.

As background, on March 10, 2021, the Exchange filed with the Commission a proposed rule change for immediate effectiveness that amended the colocation services offered by the Exchange to provide Users the option to access the systems and data feeds of various additional third parties.[8] The proposed rule change became operative on April 9, 2021, and five Users subsequently contracted to receive the services that were added in the filing.

On May 7, 2021, the Commission suspended the filing and instituted proceedings to determine whether the proposed rule change should be approved or disapproved.[9] Such action suspended the Exchange's ability to offer access to Third Party Systems from Long Term Stock Exchange, Members Exchange, MIAX Emerald, MIAX PEARL Equities, Morgan Stanley, and TD Ameritrade, and to offer connectivity to Third Party Data Feeds from ICE Data Services—ICE TMC, Members Exchange, MIAX Emerald, and MIAX PEARL Equities (together, the ''Suspended Services'').

On May 12, 2021, the Commission approved for immediate effectiveness the Exchange's filing proposing to provide the Suspended Services to all Users, at no charge, for a period of 14 days (''Transition Period'') through May 24, 2021, to enable current Users to maintain their connectivity while establishing alternate connectivity.[10]

Given that the Transition Period has expired, the Exchange proposes to remove the obsolete text regarding this provision. To that end, the Exchange proposes to delete the following text:

Connectivity to Suspended Third Party Systems and Suspended Third Party Data Feeds

Connectivity to the Third Party Systems and Third Party Data Feeds listed below (''Suspended Services'') is available until May 24, 2021 (''Transition Period''). During the Transition Period, the Exchange will not charge any fees for the Suspended Services. At the conclusion of the Transition Period, any remaining customers of Suspended Services will have their Suspended Services terminated.

Suspended Third Party Systems
Long Term Stock Exchange (LTSE)
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities
Morgan Stanley
TD Ameritrade

Suspended Third Party Data Feeds
ICE Data Services—ICE TMC
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities

(6) Proposal To Remove LCN Access—1 Gb Circuit

The Exchange proposes to delete the service ''LCN Access—1 Gb Circuit''

[6] *See* Securities Exchange Act Release No. 88981 (June 1, 2020), 85 FR 34690 (June 5, 2020) (SR–NYSENAT–2020–19).

[7] The Exchange first waived the Hot Hands Fee in a March 17, 2020 filing, and subsequently extended the waiver four times. *See* Securities Exchange Act Release Nos. 88399 (March 17, 2020), 85 FR 16428 (March 23, 2020) (SRNYSENAT–2020–10); 88521 (March 31, 2020), 85 FR 19194 (April 6, 2020) (SR–NYSENAT–2020–14); 88958 (May 27, 2020), 85 FR 33764 (June 2, 2020) (SR–NYSENAT–2020–18); 89175 (June 29, 2020), 85 FR 40354 (July 6, 2020) (SR–NYSENAT–2020–20); and 89653 (August 25, 2020), 85 FR 53874 (SRNYSENAT–2020–26).

[8] *See* Securities Exchange Act Release No. 91389 (March 23, 2021), 86 FR 16403 (March 29, 2021) (SR–NYSENat–2021–05).

[9] *See* Securities Exchange Act Release No. 91790 (May 7, 2021) (SR–NYSE–2021–15, SR–NYSEAMER–2021–13, SR–NYSEArca–2021–15, SR–NYSECHX–2021–04, SR–NYSENAT–2021–05).

[10] *See* Securities Exchange Act Release No. 91863 (May 12, 2021) (SR–NYSE–2021–13).

from the list of available types of services. The number of 1 Gb LCN ports purchased by Users has steadily declined from 4 in 2017, to 2 in 2018, to 1 in 2021, to zero currently. The Exchange understands that this fall-off in demand for the 1 Gb LCN port is due to the fact that market data feeds continue to increase in bandwidth, such that Users prefer to purchase larger port sizes. Indeed, the last remaining User with a 1 Gb LCN port discontinued that port in June 2022 and has switched to a 10 Gb LCN port instead. The Exchange believes that there is no remaining User demand for the 1 Gb LCN port, and accordingly, the Exchange proposes to discontinue the service as obsolete.

Application and Impact of the Proposed Changes

The Exchange does not expect that the proposed changes would have any impact. The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users [11] equally. As is currently the case, the purchase of any colocation service is completely voluntary and the Fee Schedule is applied uniformly to all Users.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that updating the names of existing Third Party Services and Third Party Data Feeds and removing obsolete text from the Fee Schedule would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Updating the names of the Third Party Services and Third Party Data Feeds at issue will enhance the clarity and transparency of the Fee Schedule and reduce potential customer confusion. Removing obsolete references to (i) the GIF and its associated fee, (ii) the note regarding the Hot Hands service, and (iii) the availability of the Suspended Services would make it easier to read, understand, and administer the Fee Schedule, enhancing its clarity and transparency and alleviating possible customer confusion.

Similarly, the Exchange believes that discontinuing offering the 1 Gb LCN connection would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Demand for the 1 Gb LCN connection has declined in recent years and there are currently no Users that subscribe to the service. The Exchange does not expect demand to rebound given Users' overall preference for larger port sizes to accommodate larger market data feeds. Removing references to the fees for this obsolete service from the Price List would make the Price List easier to read, understand, and administer.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would update obsolete product names, delete obsolete services, and remove obsolete text from the Fee Schedule, in order to enhance transparency and alleviate potential customer confusion.

The Exchange believes that updating the names of existing Third Party Systems and Third Party Data Feeds and removing obsolete text from the Fee Schedule would not permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed changes would apply equally to all Users: the names of the existing systems and data feeds at issue would be updated and clarified in the Fee Schedule for all Users; the obsolete 1 Gb LCN connection would be removed for all Users; and obsolete text regarding the GIF, the note to the Hot Hands service, and the availability of the Suspended Services would be removed from the Fee Schedule as to all Users.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[14] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues but rather is designed to enhance the clarity and transparency of the Fee Schedule and alleviate possible customer confusion that may arise from the inclusion of obsolete services and product names.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and Rule 19b–4(f)(6) thereunder.[16] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[17]

[11] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* 83 FR 26314, *supra* note 4, at 26314 n.9. As specified in the Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[13] 15 U.S.C. 78f(b)(5).

[14] 15 U.S.C. 78f(b)(8).

[15] 15 U.S.C. 78s(b)(3)(A)(iii).

[16] 17 CFR 240.19b–4(f)(6).

[17] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [18] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2022–12 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2022–12. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2022–12 and should be submitted on or before August 19, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95360; File No. SR–NYSEArca–2022–41]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the NYSE Arca Equities Fees and Charges and the NYSE Arca Options Fees and Charges

July 25, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 12, 2022, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Equities Fees and Charges and the NYSE Arca Options Fees and Charges (together, the ''Fee Schedules'') related to co-location to related to colocation to remove obsolete text. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedules related to colocation to remove obsolete text.[4]

(1) Proposal To Change Names of Select Third Party Systems and Third Party Data Feeds

As set forth in the Fee Schedules, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[5] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Fee Schedules.

The Exchange proposes to amend the list of Third Party Systems in the Fee Schedules to reflect the following updated names for existing Third Party Systems:

- Change the name of the ''Miami International Securities Exchange'' to ''MIAX Options,'' and
- Change the name of the ''MIAX PEARL'' to ''MIAX PEARL Options.''

The Exchange also proposes to amend the list of Third Party Data Feeds in the Fee Schedules to reflect the following updated names for existing Third Party Data Feeds:

- Change the name ''Miami International Securities Exchange/MIAX PEARL'' to ''MIAX Options/MIAX PEARL Options;'' and

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE American LLC, NYSE Chicago, Inc., and NYSE National, Inc. has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–30, SR–NYSEAMER–2022–31, SR–NYSECHX–2022–17, and SR–NYSENAT–2022–12.

[5] *See* Securities Exchange Act Release No. 80310 (March 24, 2017, 82 FR 15763 (March 30, 2017) (SR–NYSEArca–2016–89).

• Change ''SR Labs—SuperFeed'' data feeds to ''Vela—SuperFeed,'' to reflect the content provider's recent change to the name of these products.

This change would update the names of these services, but would not make any change to the services provided.

(2) Proposal To Delete Discontinued Third Party Data Feed

The Exchange proposes to delete the ''NASDAQ OMDF'' data feed from the list of available Third Party Data Feeds, as it is no longer offered by the content service provider.

(3) Proposal To Remove References to ICE Data Global Index

The Exchange proposes to remove obsolete references to the ICE Data Global Index (the ''GIF'') from the list of Third Party Data Feeds available for connectivity and related text.

In May 2020, ICE, which publishes the GIF, announced to its customers that before the end of 2020, it would cease offering the GIF as a stand-alone product. The Exchange accordingly amended the Fee Schedules to inform customers that it would cease offering connectivity to the GIF once it is no longer available.[6]

ICE has informed the Exchange that it ceased offering the GIF as a stand-alone product, making the references to the GIF obsolete. The operative date was announced through a customer notice. Accordingly, the Exchange proposes to remove ''ICE Data Global Index*'' and the corresponding asterisked note from the Fee Schedules.

In order to implement the proposed change, the Exchange proposes to make the following changes to the sections of the Fee Schedules entitled ''Connectivity to Third Party Data Feeds'':

• In the first paragraph and in the table of Third Party Data Feeds, delete ''ICE Data Global Index*''.

• Following the table of Third Party Data Feeds, delete the following text:

** ICE will cease to offer the GIF as a stand-alone product, which the Exchange has been informed by ICE is currently expected to occur before the end of 2020. The Exchange will announce the operative date through a customer notice. Any change fees that a User would otherwise incur as a result of the proposed change will be waived.*

(4) Proposal To Remove the Temporary Waiver of Hot Hands Fees

The Exchange proposes to remove the obsolete reference to the waiver of Hot Hands fees in light of the reopening of the data center in Mahwah, New Jersey (''Mahwah Data Center'' or ''MDC'').

In March 2020, ICE announced to each User that, starting on March 16, 2020, the MDC would be closed to third parties in response to COVID–19. The Exchange temporarily waived all Hot Hands fees from the date of the closing through the date of the reopening of the MDC, and added a note to the fees for the Hot Hands service stating as much.[7]

The MDC reopened on October 1, 2020. The date of the reopening was announced through a customer notice. As a result of the reopening, the waiver of Hot Hands fees ceased, and the note became obsolete. The Exchange now proposes to remove the obsolete text.

In order to implement this proposed change, the Exchange proposes to make the following changes to the Fee Schedules:

• In the Types of Service table, remove the ''†'' symbol after ''Hot Hands Service* * *''.

• Following the Types of Service table, remove the following text:

† Fees for Hot Hands Services will be waived beginning on March 16, 2020 through the reopening of the Mahwah, New Jersey data center. The date of the reopening will be announced through a customer notice.

(5) Proposal To Remove Obsolete Text About Transition Period for Suspended Services

The Exchange proposes to remove obsolete text regarding the transition period that expired on May 24, 2021 concerning the Exchange's provision of suspended services at no charge.

As background, on March 10, 2021, the Exchange filed with the Commission a proposed rule change for immediate effectiveness that amended the colocation services offered by the Exchange to provide Users the option to access the systems and data feeds of various additional third parties.[8] The proposed rule change became operative on April 9, 2021, and five Users subsequently contracted to receive the services that were added in the filing.

On May 7, 2021, the Commission suspended the filing and instituted proceedings to determine whether the proposed rule change should be approved or disapproved.[9] Such action suspended the Exchange's ability to offer access to Third Party Systems from Long Term Stock Exchange, Members Exchange, MIAX Emerald, MIAX PEARL Equities, Morgan Stanley, and TD Ameritrade, and to offer connectivity to Third Party Data Feeds from ICE Data Services—ICE TMC, Members Exchange, MIAX Emerald, and MIAX PEARL Equities (together, the ''Suspended Services'').

On May 12, 2021, the Commission approved for immediate effectiveness the Exchange's filing proposing to provide the Suspended Services to all Users, at no charge, for a period of 14 days (''Transition Period'') through May 24, 2021, to enable current Users to maintain their connectivity while establishing alternate connectivity.[10]

Given that the Transition Period has expired, the Exchange proposes to remove the obsolete text regarding this provision. To that end, the Exchange proposes to delete the following text:

Connectivity to Suspended Third Party Systems and Suspended Third Party Data Feeds

Connectivity to the Third Party Systems and Third Party Data Feeds listed below (''Suspended Services'') is available until May 24, 2021 (''Transition Period''). During the Transition Period, the Exchange will not charge any fees for the Suspended Services. At the conclusion of the Transition Period, any remaining customers of Suspended Services will have their Suspended Services terminated.

Suspended Third Party Systems
Long Term Stock Exchange (LTSE)
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities
Morgan Stanley
TD Ameritrade

Suspended Third Party Data Feeds
ICE Data Services—ICE TMC
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities

(6) Proposal To Remove LCN Access—1 Gb Circuit

The Exchange proposes to delete the service ''LCN Access—1 Gb Circuit'' from the list of available types of services. The number of 1 Gb LCN ports purchased by Users has steadily declined from 4 in 2017, to 2 in 2018,

[6] *See* Securities Exchange Act Release No. 88980 (June 1, 2020), 85 FR 34697 (June 5, 2020) (SR–NYSEArca–2020–49).

[7] The Exchange first waived the Hot Hands Fee in a March 17, 2020 filing, and subsequently extended the waiver four times. *See* Securities Exchange Act Release Nos. 88398 (March 17, 2020), 85 FR 16398 (March 23, 2020) (SRNYSEArca–2020–22); 88520 (March 31, 2020), 85 FR 19208 (April 6, 2020) (SRNYSEArca–2020–26); 88961 (May 27, 2020), 85 FR 33755 (June 2, 2020) (SRNYSEArca–2020–47); 89174 (June 29, 2020), 85 FR 40349 (July 6, 2020) (SRNYSEArca–2020–58); and 89652 (August 25, 2020), 85 FR 53885 (August 31, 2020) (SR–NYSEArca–2020–74).

[8] *See* Securities Exchange Act Release No. 91388 (March 23, 2021), 86 FR 16433 (March 29, 2021) (NYSEArca–2021–15).

[9] *See* Securities Exchange Act Release No. 91790 (May 7, 2021) (SR–NYSE–2021–15, SR–NYSEAMER–2021–13, SR–NYSEArca–2021–15, SR–NYSECHX–2021–04, SR–NYSENAT–2021–05).

[10] *See* Securities Exchange Act Release No. 91861 (May 12, 2021) (SR–NYSEArca–2021–38).

to 1 in 2021, to zero currently. The Exchange understands that this fall-off in demand for the 1 Gb LCN port is due to the fact that market data feeds continue to increase in bandwidth, such that Users prefer to purchase larger port sizes. Indeed, the last remaining User with a 1 Gb LCN port discontinued that port in June 2022 and has switched to a 10 Gb LCN port instead. The Exchange believes that there is no remaining User demand for the 1 Gb LCN port, and accordingly, the Exchange proposes to discontinue the service as obsolete.

Application and Impact of the Proposed Changes

The Exchange does not expect that the proposed changes would have any impact. The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users [11] equally. As is currently the case, the purchase of any colocation service is completely voluntary and the Fee Schedules are applied uniformly to all Users.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that updating the names of existing Third Party Services and Third Party Data Feeds and removing obsolete text from the Fee Schedules would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Updating the names of the Third Party Services and Third Party Data Feeds at issue will enhance the clarity and transparency of the Fee Schedules and reduce potential customer confusion. Removing obsolete references to (i) the GIF and its associated fee, (ii) the note regarding the Hot Hands service, and (iii) the availability of the Suspended Services would make it easier to read, understand, and administer the Fee Schedules, enhancing their clarity and transparency and alleviating possible customer confusion.

Similarly, the Exchange believes that discontinuing offering the 1 Gb LCN connection would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Demand for the 1 Gb LCN connection has declined in recent years and there are currently no Users that subscribe to the service. The Exchange does not expect demand to rebound given Users' overall preference for larger port sizes to accommodate larger market data feeds. Removing references to the fees for this obsolete service from the Price List would make the Price List easier to read, understand, and administer.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would update obsolete product names, delete obsolete services, and remove obsolete text from the Fee Schedules, in order to enhance transparency and alleviate potential customer confusion.

The Exchange believes that updating the names of existing Third Party Systems and Third Party Data Feeds and removing obsolete text from the Fee Schedules would not permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed changes would apply equally to all Users: the names of the existing systems and data feeds at issue would be updated and clarified in the Fee Schedules for all Users; the obsolete 1 Gb LCN connection would be removed for all Users; and obsolete text regarding the GIF, the note to the Hot Hands service, and the availability of the Suspended Services would be removed from the Fee Schedules as to all Users.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[14] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues but rather is designed to enhance the clarity and transparency of the Fee Schedules and alleviate possible customer confusion that may arise from the inclusion of obsolete services and product names.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and Rule 19b–4(f)(6) thereunder.[16] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[17]

[11] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76010 (September 29, 2015), 80 FR 60197 (October 5, 2015) (SR–NYSEArca–2015–82). As specified in the Fee Schedules, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

[14] 15 U.S.C. 78f(b)(8).

[15] 15 U.S.C. 78s(b)(3)(A)(iii).

[16] 17 CFR 240.19b–4(f)(6).

[17] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [18] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2022–41 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2022–41. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2022–41 and should be submitted on or before August 19, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95359; File No. SR–NYSEAMER–2022–31]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the NYSE American Equities Price List and Fee Schedule and the NYSE American Options Fee Schedule

July 25, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 12, 2022, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE American Equities Price List and Fee Schedule and the NYSE American Options Fee Schedule (together, the ''Price List and Fee Schedule'') related to colocation to remove obsolete text. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Price List and Fee Schedule related to colocation to remove obsolete text.[4]

(1) Proposal To Change Names of Select Third Party Systems and Third Party Data Feeds

As set forth in the Price List and Fee Schedule, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[5] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Price List and Fee Schedule.

The Exchange proposes to amend the list of Third Party Systems in the Price List and Fee Schedule to reflect the following updated names for existing Third Party Systems:

- Change the name of the ''Miami International Securities Exchange'' to ''MIAX Options,'' and
- Change the name of the ''MIAX PEARL'' to ''MIAX PEARL Options.''

The Exchange also proposes to amend the list of Third Party Data Feeds in the Price List and Fee Schedule to reflect the following updated names for existing Third Party Data Feeds:

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates New York Stock Exchange LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2022–30, SR–NYSEArca–2022–41, SR–NYSECHX–2022–17, and SR–NYSENAT–2022–12.

[5] *See* Securities Exchange Act Release No. 80309 (March 24, 2017), 82 FR 15725 (March 30, 2017) (NYSEMKT–2016–63).

• Change the name ''Miami International Securities Exchange/MIAX PEARL'' to ''MIAX Options/MIAX PEARL Options;'' and

• Change ''SR Labs—SuperFeed'' data feeds to ''Vela—SuperFeed,'' to reflect the content provider's recent change to the name of these products.

This change would update the names of these services, but would not make any change to the services provided.

(2) Proposal To Delete Discontinued Third Party Data Feed

The Exchange proposes to delete the ''NASDAQ OMDF'' data feed from the list of available Third Party Data Feeds, as it is no longer offered by the content service provider.

(3) Proposal To Remove References to ICE Data Global Index

The Exchange proposes to remove obsolete references to the ICE Data Global Index (the ''GIF'') from the list of Third Party Data Feeds available for connectivity and related text.

In May 2020, ICE, which publishes the GIF, announced to its customers that before the end of 2020, it would cease offering the GIF as a stand-alone product. The Exchange accordingly amended the Price List and Fee Schedule to inform customers that it would cease offering connectivity to the GIF once it is no longer available.[6]

ICE has informed the Exchange that it ceased offering the GIF as a stand-alone product, making the references to the GIF obsolete. The operative date was announced through a customer notice. Accordingly, the Exchange proposes to remove ''ICE Data Global Index *'' and the corresponding asterisked note from the Price List and Fee Schedule.

In order to implement the proposed change, the Exchange proposes to make the following changes to the sections of the Price List and Fee Schedule entitled ''Connectivity to Third Party Data Feeds'':

• In the first paragraph and in the table of Third Party Data Feeds, delete ''ICE Data Global Index *''.

• Following the table of Third Party Data Feeds, delete the following text:

** ICE will cease to offer the GIF as a stand-alone product, which the Exchange has been informed by ICE is currently expected to occur before the end of 2020. The Exchange will announce the operative date through a customer notice. Any change fees that a User would otherwise incur as a result of the proposed change will be waived.*

(4) Proposal To Remove the Temporary Waiver of Hot Hands Fees

The Exchange proposes to remove the obsolete reference to the waiver of Hot Hands fees in light of the reopening of the data center in Mahwah, New Jersey (''Mahwah Data Center'' or ''MDC'').

In March 2020, ICE announced to each User that, starting on March 16, 2020, the MDC would be closed to third parties in response to COVID–19. The Exchange temporarily waived all Hot Hands fees from the date of the closing through the date of the reopening of the MDC, and added a note to the fees for the Hot Hands service stating as much.[7]

The MDC reopened on October 1, 2020. The date of the reopening was announced through a customer notice. As a result of the reopening, the waiver of Hot Hands fees ceased, and the note became obsolete. The Exchange now proposes to remove the obsolete text.

In order to implement this proposed change, the Exchange proposes to make the following changes to the Price List and Fee Schedule:

• In the Types of Service table, remove the ''†'' symbol after ''Hot Hands Service ***''.

• Following the Types of Service table, remove the following text:

† Fees for Hot Hands Services will be waived beginning on March 16, 2020 through the reopening of the Mahwah, New Jersey data center. The date of the reopening will be announced through a customer notice.

(5) Proposal To Remove Obsolete Text About Transition Period for Suspended Services

The Exchange proposes to remove obsolete text regarding the transition period that expired on May 24, 2021 concerning the Exchange's provision of suspended services at no charge.

As background, on March 10, 2021, the Exchange filed with the Commission a proposed rule change for immediate effectiveness that amended the colocation services offered by the Exchange to provide Users the option to access the systems and data feeds of various additional third parties.[8] The proposed rule change became operative on April 9, 2021, and five Users subsequently contracted to receive the services that were added in the filing.

On May 7, 2021, the Commission suspended the filing and instituted proceedings to determine whether the proposed rule change should be approved or disapproved.[9] Such action suspended the Exchange's ability to offer access to Third Party Systems from Long Term Stock Exchange, Members Exchange, MIAX Emerald, MIAX PEARL Equities, Morgan Stanley, and TD Ameritrade, and to offer connectivity to Third Party Data Feeds from ICE Data Services—ICE TMC, Members Exchange, MIAX Emerald, and MIAX PEARL Equities (together, the ''Suspended Services'').

On May 12, 2021, the Commission approved for immediate effectiveness the Exchange's filing proposing to provide the Suspended Services to all Users, at no charge, for a period of 14 days (''Transition Period'') through May 24, 2021, to enable current Users to maintain their connectivity while establishing alternate connectivity.[10]

Given that the Transition Period has expired, the Exchange proposes to remove the obsolete text regarding this provision. To that end, the Exchange proposes to delete the following text:

Connectivity to Suspended Third Party Systems and Suspended Third Party Data Feeds

Connectivity to the Third Party Systems and Third Party Data Feeds listed below (''Suspended Services'') is available until May 24, 2021 (''Transition Period''). During the Transition Period, the Exchange will not charge any fees for the Suspended Services. At the conclusion of the Transition Period, any remaining customers of Suspended Services will have their Suspended Services terminated.

Suspended Third Party Systems
Long Term Stock Exchange (LTSE)
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities
Morgan Stanley
TD Ameritrade

Suspended Third Party Data Feeds
ICE Data Services—ICE TMC
Members Exchange (MEMX)
MIAX Emerald
MIAX PEARL Equities

(6) Proposal To Remove LCN Access—1 Gb Circuit

The Exchange proposes to delete the service ''LCN Access—1 Gb Circuit''

[6] *See* Securities Exchange Act Release No. 88979 (June 1, 2020), 85 FR 34663 (June 5, 2020) (SR–NYSEAMER–2020–40).

[7] The Exchange first waived the Hot Hands Fee in a March 17, 2020 filing, and subsequently extended the waiver four times. *See* Securities Exchange Act Release Nos. 88403 (March 17, 2020), 85 FR 16400 (March 23, 2020) (SRNYSEAMER–2020–19); 88523 (March 31, 2020), 85 FR 19179 (April 6, 2020) (SR–NYSEAMER–2020–23); 88956 (May 27, 2020), 85 FR 33760 (June 2, 2020) (SR–NYSEAMER–2020–39); 89173 (June 29, 2020), 85 FR 40352 (July 6, 2020) (SR–NYSEAMER–2020–46); and 89651 (August 25, 2020), 85 FR 53896 (August 31, 2020) (SR–NYSEAMER–2020–63).

[8] *See* Securities Exchange Act Release No. 91387 (March 23, 2021), 86 FR 16417 (March 29, 2021) (NYSEAMER–2021–2021–13).

[9] *See* Securities Exchange Act Release No. 91790 (May 7, 2021) (SR–NYSE–2021–15, SR–NYSEAMER–2021–13, SR–NYSEArca–2021–15, SR–NYSECHX–2021–04, SR–NYSENAT–2021–05).

[10] *See* Securities Exchange Act Release No. 91860 (May 12, 2021) (SR–NYSEAMER–2021–26).

from the list of available types of services. The number of 1 Gb LCN ports purchased by Users has steadily declined from 4 in 2017, to 2 in 2018, to 1 in 2021, to zero currently. The Exchange understands that this fall-off in demand for the 1 Gb LCN port is due to the fact that market data feeds continue to increase in bandwidth, such that Users prefer to purchase larger port sizes. Indeed, the last remaining User with a 1 Gb LCN port discontinued that port in June 2022 and has switched to a 10 Gb LCN port instead. The Exchange believes that there is no remaining User demand for the 1 Gb LCN port, and accordingly, the Exchange proposes to discontinue the service as obsolete.

Application and Impact of the Proposed Changes

The Exchange does not expect that the proposed changes would have any impact. The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users [11] equally. As is currently the case, the purchase of any colocation service is completely voluntary and the Price List and Fee Schedule are applied uniformly to all Users.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that updating the names of existing Third Party Services and Third Party Data Feeds and removing obsolete text from the Price List and Fee Schedule would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Updating the names of the Third Party Services and Third Party Data Feeds at issue will enhance the clarity and transparency of the Price List and Fee Schedule and reduce potential customer confusion. Removing obsolete references to (i) the GIF and its associated fee, (ii) the note regarding the Hot Hands service, and (iii) the availability of the Suspended Services would make it easier to read, understand, and administer the Price List and Fee Schedule, enhancing their clarity and transparency and alleviating possible customer confusion.

Similarly, the Exchange believes that discontinuing offering the 1 Gb LCN connection would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Demand for the 1 Gb LCN connection has declined in recent years and there are currently no Users that subscribe to the service. The Exchange does not expect demand to rebound given Users' overall preference for larger port sizes to accommodate larger market data feeds. Removing references to the fees for this obsolete service from the Price List would make the Price List easier to read, understand, and administer.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would update obsolete product names, delete obsolete services, and remove obsolete text from the Price List and Fee Schedule, in order to enhance transparency and alleviate potential customer confusion.

The Exchange believes that updating the names of existing Third Party Systems and Third Party Data Feeds and removing obsolete text from the Price List and Fee Schedule would not permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed changes would apply equally to all Users: the names of the existing systems and data feeds at issue would be updated and clarified in the Price List and Fee Schedule for all Users; the obsolete 1 Gb LCN connection would be removed for all Users; and obsolete text regarding the GIF, the note to the Hot Hands service, and the availability of the Suspended Services would be removed from the Price List and Fee Schedule as to all Users.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[14] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues but rather is designed to enhance the clarity and transparency of the Price List and Fee Schedule and alleviate possible customer confusion that may arise from the inclusion of obsolete services and product names.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and Rule 19b–4(f)(6) thereunder.[16] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[17]

[11] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76009 (September 29, 2015), 80 FR 60213 (October 5, 2015) (SR–NYSEMKT–2015–67). As specified in the Price List and Fee Schedule, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [18] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2022–31 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2022–31. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2022–31 and should be submitted on or before August 19, 2022.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95358; File No. SR–NYSE–2022–30]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its Price List Related to Colocation

July 25, 2022.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 12, 2022, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Price List related to colocation to remove obsolete text. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Price List related to colocation to remove obsolete text.[4]

(1) Proposal To Change Names of Select Third Party Systems and Third Party Data Feeds

As set forth in the Price List, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[5] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Price List.

The Exchange proposes to amend the list of Third Party Systems in the Price List to reflect the following updated names for existing Third Party Systems:

- Change the name of the ''Miami International Securities Exchange'' to ''MIAX Options,'' and
- Change the name of the ''MIAX PEARL'' to ''MIAX PEARL Options.''

The Exchange also proposes to amend the list of Third Party Data Feeds in the Price List to reflect the following updated names for existing Third Party Data Feeds:

[4] The Exchange is an indirect subsidiary of Intercontinental Exchange, Inc. (''ICE''). Each of the Exchange's affiliates NYSE American LLC, NYSE Arca, Inc., NYSE Chicago, Inc., and NYSE National, Inc. has submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–SR–NYSEAMER–2022–31, SR–NYSEArca–2022–41, SR–NYSECHX–2022–17, and SR–NYSENAT–2022–12.

[5] *See* Securities Exchange Act Release No. 80311 (March 24, 2017), 82 FR 15741 (March 30, 2017) (SR–NYSE–2016–45).

• Change the name ''Miami International Securities Exchange/MIAX PEARL'' to ''MIAX Options/MIAX PEARL Options;'' and

• Change ''SR Labs—SuperFeed'' data feeds to ''Vela—SuperFeed,'' to reflect the content provider's recent change to the name of these products.

This change would update the names of these services, but would not make any change to the services provided.

(2) Proposal To Delete Discontinued Third Party Data Feed

The Exchange proposes to delete the ''NASDAQ OMDF'' data feed from the list of available Third Party Data Feeds, as it is no longer offered by the content service provider.

(3) Proposal To Remove References to ICE Data Global Index

The Exchange proposes to remove obsolete references to the ICE Data Global Index (the ''GIF'') from the list of Third Party Data Feeds available for connectivity and related text.

In May 2020, ICE, which publishes the GIF, announced to its customers that before the end of 2020, it would cease offering the GIF as a stand-alone product. The Exchange accordingly amended its Price List to inform customers that it would cease offering connectivity to the GIF once it is no longer available.[6]

ICE has informed the Exchange that it ceased offering the GIF as a stand-alone product, making the references to the GIF obsolete. The operative date was announced through a customer notice. Accordingly, the Exchange proposes to remove ''ICE Data Global Index *'' and the corresponding asterisked note from the Price List.

In order to implement the proposed change, the Exchange proposes to make the following changes to the section of the Price List entitled ''Connectivity to Third Party Data Feeds'':

• In the first paragraph and in the table of Third Party Data Feeds, delete ''ICE Data Global Index *''.

• Following the table of Third Party Data Feeds, delete the following text:

** ICE will cease to offer the GIF as a stand-alone product, which the Exchange has been informed by ICE is currently expected to occur before the end of 2020. The Exchange will announce the operative date through a customer notice. Any change fees that a User would otherwise incur as a result of the proposed change will be waived.*

(4) Proposal To Remove the Temporary Waiver of Hot Hands Fees

The Exchange proposes to remove the obsolete reference to the waiver of Hot Hands fees in light of the reopening of the data center in Mahwah, New Jersey (''Mahwah Data Center'' or ''MDC'').

In March 2020, ICE announced to each User that, starting on March 16, 2020, the MDC would be closed to third parties in response to COVID–19. The Exchange temporarily waived all Hot Hands fees from the date of the closing through the date of the reopening of the MDC, and added a note to the fees for the Hot Hands service stating as much.[7]

The MDC reopened on October 1, 2020. The date of the reopening was announced through a customer notice. As a result of the reopening, the waiver of Hot Hands fees ceased, and the note became obsolete. The Exchange now proposes to remove the obsolete text.

In order to implement this proposed change, the Exchange proposes to make the following changes to the Price List:

• In the Types of Service table, remove the ''†'' symbol after ''Hot Hands Service ***''.

• Following the Types of Service table, remove the following text:

† Fees for Hot Hands Services will be waived beginning on March 16, 2020 through the reopening of the Mahwah, New Jersey data center. The date of the reopening will be announced through a customer notice.

(5) Proposal To Remove Obsolete Text About Transition Period for Suspended Services

The Exchange proposes to remove obsolete text regarding the transition period that expired on May 24, 2021 concerning the Exchange's provision of suspended services at no charge.

As background, on March 10, 2021, the Exchange filed with the Commission a proposed rule change for immediate effectiveness that amended the colocation services offered by the Exchange to provide Users the option to access the systems and data feeds of various additional third parties.[8] The proposed rule change became operative on April 9, 2021, and five Users subsequently contracted to receive the services that were added in the filing.

On May 7, 2021, the Commission suspended the filing and instituted proceedings to determine whether the proposed rule change should be approved or disapproved.[9] Such action suspended the Exchange's ability to offer access to Third Party Systems from Long Term Stock Exchange, Members Exchange, MIAX Emerald, MIAX PEARL Equities, Morgan Stanley, and TD Ameritrade, and to offer connectivity to Third Party Data Feeds from ICE Data Services—ICE TMC, Members Exchange, MIAX Emerald, and MIAX PEARL Equities (together, the ''Suspended Services'').

On May 12, 2021, the Commission approved for immediate effectiveness the Exchange's filing proposing to provide the Suspended Services to all Users, at no charge, for a period of 14 days (''Transition Period'') through May 24, 2021, to enable current Users to maintain their connectivity while establishing alternate connectivity.[10]

Given that the Transition Period has expired, the Exchange proposes to remove the obsolete text regarding this provision. To that end, the Exchange proposes to delete the following text:

Connectivity to Suspended Third Party Systems and Suspended Third Party Data Feeds

Connectivity to the Third Party Systems and Third Party Data Feeds listed below (''Suspended Services'') is available until May 24, 2021 (''Transition Period''). During the Transition Period, the Exchange will not charge any fees for the Suspended Services. At the conclusion of the Transition Period, any remaining customers of Suspended Services will have their Suspended Services terminated.

services. The number of 1 Gb LCN ports purchased by Users has steadily declined from 4 in 2017, to 2 in 2018, to 1 in 2021, to zero currently. The Exchange understands that this fall-off in demand for the 1 Gb LCN port is due to the fact that market data feeds continue to increase in bandwidth, such that Users prefer to purchase larger port sizes. Indeed, the last remaining User with a 1 Gb LCN port discontinued that port in June 2022 and has switched to a 10 Gb LCN port instead. The Exchange believes that there is no remaining User demand for the 1 Gb LCN port, and accordingly, the Exchange proposes to discontinue the service as obsolete.

Application and Impact of the Proposed Changes

The Exchange does not expect that the proposed changes would have any impact. The proposed changes would not apply differently to distinct types or sizes of market participants. Rather, they would apply to all Users [11] equally. As is currently the case, the purchase of any colocation service is completely voluntary and the Price List is applied uniformly to all Users.

Competitive Environment

The proposed changes are not otherwise intended to address any other issues relating to colocation services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[12] in general, and furthers the objectives of Section 6(b)(5) of the Act,[13] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that updating the names of existing Third Party Services and Third Party Data Feeds and removing obsolete text from the Price List would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Updating the names of the Third Party Services and Third Party Data Feeds at issue will enhance the clarity and transparency of the Price List and reduce potential customer confusion. Removing obsolete references to (i) the GIF and its associated fee, (ii) the note regarding the Hot Hands service, and (iii) the availability of the Suspended Services would make it easier to read, understand, and administer the Price List, enhancing its clarity and transparency and alleviating possible customer confusion.

Similarly, the Exchange believes that discontinuing offering the 1 Gb LCN connection would perfect the mechanisms of a free and open market and a national market system and, in general, protect investors and the public interest. Demand for the 1 Gb LCN connection has declined in recent years and there are currently no Users that subscribe to the service. The Exchange does not expect demand to rebound given Users' overall preference for larger port sizes to accommodate larger market data feeds. Removing references to the fees for this obsolete service from the Price List would make the Price List easier to read, understand, and administer.

The Exchange believes that the proposed rule change does not significantly affect the protection of investors or the public interest. The proposed rule change would update obsolete product names, delete obsolete services, and remove obsolete text from the Price List, in order to enhance transparency and alleviate potential customer confusion.

The Exchange believes that updating the names of existing Third Party Systems and Third Party Data Feeds and removing obsolete text from the Price List would not permit unfair discrimination between customers, issuers, brokers, or dealers. The proposed changes would apply equally to all Users: the names of the existing systems and data feeds at issue would be updated and clarified in the Price List for all Users; the obsolete 1 Gb LCN connection would be removed for all Users; and obsolete text regarding the GIF, the note to the Hot Hands service, and the availability of the Suspended Services would be removed from the Price List as to all Users.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[14] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange believes that the proposed rule change would not place any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues but rather is designed to enhance the clarity and transparency of the Price List and alleviate possible customer confusion that may arise from the inclusion of obsolete services and product names.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [15] and Rule 19b–4(f)(6) thereunder.[16] Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[17]

[11] For purposes of the Exchange's colocation services, a ''User'' means any market participant that requests to receive colocation services directly from the Exchange. *See* Securities Exchange Act Release No. 76008 (September 29, 2015), 80 FR 60190 (October 5, 2015) (SR–NYSE–2015–40). As specified in the Price List, a User that incurs colocation fees for a particular colocation service pursuant thereto would not be subject to colocation fees for the same colocation service charged by the Affiliate SROs.

[12] 15 U.S.C. 78f(b).

[13] 15 U.S.C. 78f(b)(5).

[14] 15 U.S.C. 78f(b)(8).

[15] 15 U.S.C. 78s(b)(3)(A)(iii).

[16] 17 CFR 240.19b–4(f)(6).

[17] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as

Continued

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [18] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2022–30 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2022–30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2022–30 and should be submitted on or before August 19, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–95357; File No. SR–ICC–2022–012]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Filing of Proposed Rule Change Relating to the Clearing Rules

July 25, 2022.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 19, 2022, ICE Clear Credit LLC (''ICE Clear Credit'' or ''ICC'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by ICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the proposed rule change is to implement certain amendments to ICC's Clearing Rules (the ''Rules'') to permit it to take advantage of certain additional settlement finality protections under applicable UK and EU law. The text of the proposed amendments is attached in Exhibit 5 [sic].

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICC included statements concerning the purpose of and basis for the proposed rule change, security-based swap submission, or advance notice and discussed any comments it received on the proposed rule change, security-based swap submission, or advance notice. The text of these statements may be examined at the places specified in Item IV below. ICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

The purpose of the proposed changes is to modify certain provisions of the Rules to permit the clearing house to take advantage of certain protections for default rights and remedies under applicable United Kingdom (''UK'') and European Union (''EU'') Settlement Finality Laws and regulations. The amendments are expected to be principally relevant in the case of an insolvency of an ICC clearing participant (''Participant'') domiciled in the UK or an EU member state. The amendments would rely on certain protections in such Settlement Finality Laws and regulations that provide additional support (on top of existing protections in applicable law) for the enforceability of the clearing house's default rights and remedies under the Rules without interference in such an insolvency.

By way of background, the EU Settlement Finality Directive [3] introduced various insolvency-related protections in relation to ''designated systems'' used by EU participants to transfer financial instruments and payments, and participation in those systems. The Settlement Finality Directive aims to ensure that as a matter of EU member state laws, transfer orders which enter into such systems are finally settled, regardless of whether the sending participant has gone into an insolvency process. Transfer orders for this purpose include instructions to make cash payments (including margin payments) and instructions to transfer securities (including as margin or in physical settlement of a cleared transaction, if applicable). Under the Settlement Finality Directive, transfer orders and related netting arrangements

[3] EU Directive 98/26/EC.

are enforceable, even in the event of insolvency proceedings against a participant, provided that the transfer order was entered into the system before the opening of the insolvency proceeding.[4] Further, under the Settlement Finality Directive, the right of the operator of a designated system to realize and apply collateral security provided by a participant would not be affected by insolvency proceedings against the participant.[5]

''Designated systems'' are defined as formal arrangements between three or more participants with common rules and standard arrangements for clearing or execution of transfer orders between participants which are governed by the law of an EU member state and have been designated as a system and notified to the European Securities and Markets Authority (''ESMA'').[6] Although the Settlement Finality Directive itself does not establish an equivalent regime for systems operated under the laws of a non-EU member state (''third-country systems''), such as United States (''US'') clearing houses, Recital 7 of the Settlement Finality Directive provides that member states may choose to apply the provisions of the Settlement Finality Directive to their domestic institutions which participate directly in third country systems and to collateral security provided in connection with participation in such systems. As a result, in some EU member states it is possible for a third country system such as ICE Clear Credit to receive national designation or be otherwise protected as a designated system for the purposes of that member state's national law.

The UK has implemented similar settlement finality regulations that continue to apply following the withdrawal of the UK from the EU, and which are also potentially applicable to UK institutions that participate in third country systems (such as a US clearing house).[7]

As discussed in further detail herein, ICE Clear Credit is proposing to adopt amendments to its Rules to introduce explicit provisions relating to the settlement finality of transfer orders, in order to take advantage of the protections of Settlement Finality Laws. Specifically, the amendments would address which ''transfer orders'' arise in its system, when they become irrevocable, who is bound by them and when they terminate. ICE Clear Credit believes that the amendments would facilitate obtaining the relevant protections of the Settlement Finality Directive and UK Settlement Finality Regulations, which will principally be relevant in the case of an insolvency of a Participant that is domiciled in an EU member state or in the UK. The amendments would not otherwise affect the clearing house's rights and obligations under the Rules, including default rights and remedies, and would not be expected to be relevant to an insolvency proceeding involving a Participant organized in the US or otherwise outside of the EU or the UK. ICC proposes to move forward with implementation of these changes following Commission approval of the proposed rule change.

ICE Clear Credit would adopt a new Part 10 of the Rules addressing Settlement Finality Laws. Rule 1000 would add a number of related definitions, including definitions for relevant legislation and regulations, such as ''EMIR,'' ''Financial Collateral Directive,'' ''Financial Collateral Regulations,'' ''FSMA,'' ''Settlement Finality Directive,'' ''Settlement Finality Regulations'' and ''UK EMIR.'' The rule would also adopt key definitions relating to the settlement finality provisions, including ''ICE Systems'' (referencing ICE Clear Credit's trade registration, clearing processing and finance systems), ''SFD System'' (referencing the third country system operated by ICE Clear Credit for purposes of the Settlement Finality Laws), ''Payment Transfer Order,'' ''Securities Transfer Order'' and ''Transfer Order'' (representing the types of transfer orders used in the ICE system and covered by the Settlement Finality Laws), ''SFD Participant'' (referencing ICE Clear Credit itself, its Participants organized in the European Economic Area (''EEA'') or in the UK, among certain other relevant persons), ''SFD Custodian'' (referencing a custodian located in the EEA or the UK used by ICE Clear Credit or a Participant for the holding or transfer of Non-Cash Collateral), ''SFD Financial Institution'' (referencing a financial institution located in the EEA or UK used by ICE Clear Credit or a Participant for purpose of the deposit or transfer of cash), ''SFD Security'' (referencing a security as defined in the Settlement Finality Laws), ''Indirect Participant'' (referencing Non-Participant Parties that fall within the definition of indirect participant under the Settlement Finality Laws), and ''Non-Cash Collateral'' (referencing Margin or Collateral in the form of a security).

New Rule 1001 would set out general principles relevant to implementation of the EU and UK settlement finality arrangements. Subsection (a) would provide that ICC is the operator of a third country system for purposes of relevant Settlement Finality Laws, and that Chapter 10 of the Rules would apply to ICE Clear Credit and SFD Participants to the extent that the Settlement Finality Laws are applicable to such persons. Subsection (b) would require SFD Participants to comply with actions taken by ICC pursuant to Chapter 10 and the relevant Settlement Finality Laws, and to acknowledge that the Settlement Finality Laws modify certain otherwise applicable provisions of insolvency laws. Subsection (c) would provide that each SFD Participant is on notice of the provisions of Chapter 10, and by virtue of participating in the SFD System, is deemed to agree to the application of Chapter 10 (including in the event of any conflict with any other agreement or obligation). Subsection (d) would provide an additional acknowledgment that Margin and Collateral transferred to ICC under the Rules fall within certain protections for collateral arrangements under the Settlement Finality Laws.

New Rule 1002 would address the timing and circumstances in which various types of Transfer Orders would arise for purposes of the ICC SFD System, specifically Payment Transfer Orders and Securities Transfer Orders in various circumstances, including for transfer of positions (''Position Transfer Orders''), transfer of non-cash collateral (''Collateral Transfer Orders''), submission of new trades for clearing (''New Transaction Clearing Orders''), backloading trades for clearing (''Backloaded Transaction Clearing Orders, and together with New Transaction Clearing Orders, ''Transaction Clearing Orders''), and physical settlement under cleared CDS contracts (''CDS Physical Settlement Orders''). The rule would also specify the subject matter of each type of Transfer Order (*e.g.,* a payment in respect of a Payment Transfer Order) and the parties in respect of which each type of Transfer Order would apply and have effect (*e.g.,* in the case of a Payment Transfer Order, the affected Participant (if it is an SFD Participant), ICE Clear Credit, and any affected SFD Financial Institution). Rule 1002 would also address the possibility of multiple Transfer Orders existing in respect of the same obligation (which may exist, but would not result in the duplication

[4] Settlement Finality Directive Article 3(1).

[5] Settlement Finality Directive Article 9.

[6] Settlement Finality Directive Article 2(a).

[7] Financial Markets and Insolvency (Settlement Finality) Regulations 1999.

As used herein, the EU Settlement Finality Directive, national implementing legislation and the UK Settlement Finality Regulations are collectively referred to as ''Settlement Finality Laws.''

of any obligation), and the fact that netting or close out of Contracts would not affect the status of Transfer Orders. The rule also states, consistent with the general approach of the Rules, that where a Transfer Order applies to an Indirect Participant, it would not affect the liability of any SFD Participant pursuant to the same Transfer Order.

Rule 1003 would specify the time at which each type of Transfer Order (specifically, Payment Transfer Orders, Position Transfer Orders, Collateral Transfer Orders, Transaction Clearing Orders and CDS Physical Settlement Orders) becomes irrevocable for purposes of the relevant Settlement Finality Laws. Payment Transfer Orders would become irrevocable at the earlier of the time payment is received or at the time the relevant financial institution used by ICC for this purpose sends a SWIFT or other confirmation that payment has been made. Collateral Transfer Orders similarly would become irrevocable at the earlier of the time the transfer is received or a related securities transfer order in a relevant securities transfer system becomes irrevocable. Position Transfer Orders would become irrevocable at the time the position transfer is recorded in the ICC systems, and Transaction Clearing Orders would become irrevocable at the applicable Novation Time under the Rules. CDS Physical Settlement Orders would become irrevocable at the earliest of (1) the time the Matched Delivery Buyer has irrevocably instructed its custodian to transfer the relevant securities to the Matched Delivery Seller, (2) the time the relevant instrument is delivered or assigned, or (3) the time notice is otherwise given under the Rules that the Matched Delivery Pair have settled the relevant Matched Delivery Contracts. Under the Rule, as from the time when the Transfer Order becomes irrevocable, it cannot be revoked or purported to be revoked by any SFD Participant or ICE Clear Credit and will be binding on all SFD Participants.

Rule 1004 would address variations or cancellations of Transfers Orders prior to the time they become irrevocable, in specified circumstances. These circumstances include, for any Transfer Order, cases where the order is affected by manifest or proven error or an error agreed by all affected SFD Participants. Additional grounds for variation or cancellation apply for particular types of Transfer Order, including, in the case of a Payment Transfer Order or Collateral Transfer Order, where the underlying Contract is void or avoided under the Rules or appliable law, or amended as a result of ICC exercising its discretion under the Rules. Transaction Clearing Orders may be subject to variation or cancellation where the underlying trade is not eligible for clearing or otherwise not accepted for clearing, and Backloaded Transaction Clearing Orders may be subject to variation or cancellation if an error or omission is noted to ICC prior to the Novation Time. Similarly, variation or cancellation of a CDS Physical Settlement Order may be made if a NOPS Amendment Notice is validly delivered under the Rules or ICE Clear Credit Procedures. Under Rule 1004, in these circumstances, ICC would be permitted to make appropriate modifications to the relevant Transfer Order, or in the alternative to cancel the relevant Transfer Order. Rule 1004 also would not preclude ICC from taking steps to give rise to a new Transfer Order with opposite effect to an existing Transfer Order or part thereof. Rule 1004 also would provide for notice of any modification or cancellation of a Transfer Order to affected SFD Participants.

Rule 1005 would specify the circumstances under which Transfer Orders are deemed satisfied. Specifically, Payment Transfer Orders are satisfied upon all required payments being received in immediately available funds or full satisfaction of the underlying obligation is otherwise made and recorded in ICC's systems, free of any encumbrances. Position Transfer Orders would be deemed satisfied upon becoming irrevocable (at which time the relevant positions have been transferred under the Rules). Collateral Transfer Orders would be deemed satisfied upon ICC or the Participant, as applicable, receiving the Non-Cash Collateral in its account or upon the definitive record of the assets transferred by the Participant being updated to reflect the successful transfer of the relevant collateral. Transaction Clearing Orders would be deemed satisfied at the time the relevant cleared contracts arise under the Rules. A CDS Physical Settlement Order would be deemed satisfied at the time ICC updates its records to reflect that physical delivery of the relevant security has been completed or the delivery obligations of the parties are otherwise discharged or settled.

Rule 1006 would set out certain acknowledgements of ICC, Participants and Non-Participant Parties with respect to matters relating to Margin or Collateral to the extent they fall to be determined under the laws of an EEA member state or the UK. The amendments would clarify that such arrangements are subject to the EU Financial Collateral Directive or UK Financial Collateral Regulations, as applicable, and would provide that Participants and Non-Participant Parties would not dispute that characterization. The amendments would further provide that arrangements for the provision of cash Margin and Collateral constitute ''title transfer financial collateral arrangements'' and arrangements for the provision of Pledged Items constitute ''security financial collateral arrangements'', in each case for purposes of the EU Financial Collateral Directive or UK Financial Collateral Arrangements, that all such Margin and Collateral constitute ''financial collateral'' for purposes of such laws, and that ICC has possession or control of such Margin and Collateral for purposes of such laws. The amendments would also state that for purposes of UK law, the security arrangements under the Rules constitute a ''market charge'' for purposes of the Companies Act 1989, which provides certain protections for the enforceability of such arrangements in the event of the insolvency of a clearing participant.

ICC also proposes to make certain amendments to Rule 611, which currently addresses the treatment of certain Rules under various insolvency laws and other protections for the enforceability of default remedies in the event of the insolvency of a clearing participant. The amendments would add a new subsection (f), which would provide that specified Rules providing for default rights and remedies would constitute default rules, procedures and similar arrangements as defined for purposes of relevant EU and UK law, including EMIR, UK EMIR, and the Settlement Finality Laws.

(b) Statutory Basis

ICE Clear Credit believes that the proposed amendments are consistent with the requirements of Section 17A of the Act[8] and the regulations thereunder applicable to it, including the standards under Rule 17Ad–22.[9] Section 17A(b)(3)(F) of the Act[10] requires, among other things, that the rules of a clearing agency be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, the safeguarding of securities and funds in the custody or control of the clearing agency or for which it is responsible, and the protection of investors and the public interest.

[8] 15 U.S.C. 78q–1.

[9] 17 CFR 240.17Ad–22.

[10] 15 U.S.C. 78q–1(b)(3)(F).

The amendments are intended to permit the clearing house explicitly to take advantage of certain additional protections for the enforceability of default rights and remedies that may be available under EU and UK law, principally in the context of the insolvency of a Participant domiciled in the EU or the UK. The amendments would not themselves change any of the existing default rights or remedies of ICC. Rather, the amendments adopt explicit provisions relating to settlement finality of transfer orders relating to various clearing activities, most importantly the payment and transfer of Margin and Collateral, and the enforcement of ICC's rights with respect thereto, in order to facilitate potential reliance by the clearing house on settlement finality protections existing under relevant Settlement Finality Laws. The amendments would thus provide additional legal certainty as to the ability of the clearing house to enforce its default rights and remedies (including its rights to use Margin and Collateral provided by Participants under the Rules) in the event of the insolvency of a Participant domiciled in the EU or the UK (on top of existing protections for the enforceability of such rights and remedies on which the clearing house may currently rely). As such, the amendments are, in ICC's view, consistent with the prompt and accurate clearance and settlement of securities transactions and derivative agreements, contracts and transactions, the safeguarding of securities and funds in the custody or control of the clearing agency or for which it is responsible, and the protection of the investors and the public interest, within the meaning of Section 17A(b)(3)(F).[11]

Moreover, the amendments are consistent with relevant provisions of Rule 17Ad–22.[12] In particular, Rule 17Ad–22(e)(1) requires that each covered clearing agency ''establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . provide for a well-founded, clear, transparent and enforceable legal basis for each aspect of its activities in all relevant jurisdictions.'' [13] As discussed above, the amendments would provide an additional legal basis to support the enforceability of the clearing house's default rules in the context of an insolvency of a Participant that is domiciled in an EU member state or in the UK. The amendments would in particular facilitate the clearing house's taking advantage of protections for the enforceability of transfer orders, including in default scenarios, based on the EU Settlement Finality Directive and UK Settlement Finality Regulations. The amendments thus enhance the legal certainty of the framework supporting ICC's activities in those jurisdictions. As a result, ICC believes the amendments are consistent with the requirements of Rule 17Ad–22(e)(1).[14]

Rule 17Ad–22(e)(13) requires that each covered clearing agency ''establish, implement, maintain and enforce written policies and procedures reasonably designed to . . . ensure the covered clearing agency has the authority and operational capacity to take timely action to contain losses and liquidity demands and continue to meet its obligations . . .'' [15] As discussed herein, ICC is not proposing to change the substance of its existing default remedies and procedures under the Rules and the ICE Clear Credit Procedures. The amendments to the Rules are intended to enhance the legal certainty of those existing default remedies and procedures in the context of an insolvency of a clearing participant domiciled in the EU or the UK by facilitating the clearing house's ability to take advantage of protections for transfer orders under applicable Settlement Finality Laws. As such, in ICC view, the amendments will further compliance with the requirements of Rule 17Ad–22(e)(13).[16]

(B) Clearing Agency's Statement on Burden on Competition

ICE Clear Credit does not believe the proposed amendments would have any impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purposes of the Act. The amendments will not change the substantive default rights and remedies under the Rules, and so will not affect the rights or obligations of ICC itself or those of Participants. The changes are intended to enhance the legal certainty of existing clearing house default rights and remedies in the context of the insolvency of a Participant domiciled in the UK or EU, and thereby enhance the overall clearing framework. As a result, ICE Clear Credit does not believe the amendments will impact competition among clearing members or other market participants, adversely affect the ability of market participants to access clearing generally, or adversely affect the cost of clearing. ICE Clear Credit thus does not believe the proposed amendments would have any impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purposes of the Act.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed amendments have not been solicited or received by ICE Clear Credit. ICE Clear Credit will notify the Commission of any comments received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ICC–2022–012 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–ICC–2022–012. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent

[11] 15 U.S.C. 78q–1(b)(3)(F).

[12] 17 CFR 240.17Ad–22.

[13] 17 CFR 240.17Ad–22(e)(1).

[14] 17 CFR 240.17Ad–22(e)(1).

[15] 17 CFR 240.17Ad–22(e)(13).

amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filings will also be available for inspection and copying at the principal office of ICE Clear Credit and on ICE Clear Credit's website at *https://www.theice.com/clear-credit/regulation.*

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ICC–2022–012 and should be submitted on or before August 19, 2022.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

J. Matthew DeLesDernier,

Deputy Secretary.

BILLING CODE 8011–01–P

SMALL BUSINESS ADMINISTRATION

National Women's Business Council; Notice of Public Meeting

AGENCY: Small Business Administration, National Women's Business Council.

ACTION: Notice of open public meeting.

DATES: The public meeting will be held on Wednesday, September 14, 2022, from 12:30 p.m. to 2:30 p.m. EDT.

ADDRESSES: This meeting is virtual and will be held via Zoom, a web conferencing platform. The access link will be provided to attendees upon registration.

FOR FURTHER INFORMATION CONTACT: For more information, please visit the NWBC website at *www.nwbc.gov,* email *info@nwbc.gov* or call 202–941–6001.

The meeting is open to the public; however, advance notice of attendance is requested. To RSVP, please visit the NWBC website at *www.nwbc.gov.* The ''2022 Public Meetings'' section will feature a link to register on Eventbrite.

NWBC strongly encourages that public comments and questions be submitted in advance by September 6th. The Eventbrite registration page will include an opportunity to do so, but individuals may also email *info@nwbc.gov* with subject line—''[Name/Organization] Comment for 09/14/22 Public Meeting.'' NWBC staff will read the first five submitted statements during the final 20 minutes of the program.

During the live event, attendees will be in listen-only mode and may submit additional questions via the Q&A Chat feature. For technical assistance, please visit the Zoom Support Page. All public comments will be included in the meeting record, which will be made available on *www.nwbc.gov* under the ''2022 Public Meetings'' section.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, the National Women's Business Council (NWBC) announces its third public meeting of Fiscal Year 2022. The 1988 Women's Business Ownership Act established NWBC to serve as an independent source of advice and policy recommendations to the President, Congress, and the Administrator of the U.S. Small Business Administration (SBA) on issues of importance to women entrepreneurs.

This meeting will allow the Council to recap its activity and engagement over the course of Fiscal Year 2022. Each of the Council's three subcommittees (Access to Capital & Opportunity, Women in STEM, and Rural Women's Entrepreneurship) will present their policy recommendations to the full body for deliberation and vote.

Dated: July 25, 2022.

Andrienne Johnson,

Committee Management Officer.

BILLING CODE P

SMALL BUSINESS ADMINISTRATION

Investment Capital Advisory Committee

AGENCY: Small Business Administration (SBA).

ACTION: Notice of the establishment of the Investment Capital Advisory Committee.

SUMMARY: The SBA announces the establishment of the Investment Capital Advisory Committee. The Administrator has determined that establishing the Investment Capital Advisory Committee is necessary and in the public interest.

DATES: The Investment Capital Advisory Committee will operate for two years after the filing date of its charter that will meet the 15-days requirements of the **Federal Register** Notice, unless otherwise renewed in accordance with FACA.

FOR FURTHER INFORMATION CONTACT: Investment Capital Advisory Committee Designated Federal Officer, Jennifer Shieh, Director of Ecosystem Development, Office of Investment and Innovation, *ICAC@sba.gov.*

SUPPLEMENTARY INFORMATION: This notice announces the establishment of the Investment Capital Advisory Committee as a Federal Advisory Committee in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. app. 2) to provide information, advice, and recommendations to the Administrator on matters broadly related to facilitating greater access and availability of patient investment capital for small business; promoting greater awareness of SBA investment and innovation division programs and services; cultivating greater public-private engagement, cooperation, and collaboration; developing and/or evolving SBA programs and services to address long-term capital access gaps faced by small businesses and the investment managers that seek to support them. The Committee will only undertake tasks assigned to it by the Administrator. The **Federal Register** Notice will be published 15 days prior to filing the charter with Congress.

This notice is provided in accordance with the Federal Advisory Committee Act.

Dated: July 25, 2022.

Andrienne Johnson,

Committee Management Officer.

BILLING CODE 4710–24–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36631]

Livonia, Avon & Lakeville Railroad Corporation—Acquisition of Control Exemption—Ontario Midland Railroad Corporation

Livonia, Avon & Lakeville Railroad Corporation (LAL), a Class III rail carrier, has filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to acquire control of the Ontario Midland

Railroad Corporation (OMID), a Class III rail carrier.

The verified notice states that LAL will acquire control of OMID by purchasing 55% of OMID stock pursuant to a Stock Acquisition Agreement. An agreement is expected to be executed on or about August 13, 2022. The verified notice states that LAL currently controls two Class III rail carriers, Western New York & Pennsylvania Railroad, LLC (WNYP) and B&H Rail Corporation (B&H) [1] (collectively, LAL Class III Affiliates).

LAL represents that: (1) the rail lines on which OMID will operate will not connect with the rail lines operated by LAL or the LAL Class III Affiliates; (2) the transaction is not part of a series of anticipated transactions that would result in a connection between lines operated or to be operated by OMID, LAL, or the LAL Class III Affiliates; and (3) the transaction does not involve a Class I rail carrier. The proposed transaction is therefore exempt from the prior approval requirements of 49 U.S.C. 11323 pursuant to 49 CFR 1180.2(d) (2).

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. However, 49 U.S.C. 11326(c) does not provide for labor protection for transactions under 49 U.S.C. 11324 and 11325 that involve only Class III rail carriers. Because this transaction involves Class III rail carriers only, the Board, under the statute, may not impose labor protective conditions for this transaction.

The transaction may be consummated on or after August 12, 2022, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than August 5, 2022 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36631, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, one copy of each pleading must be served on LAL's representative, Kevin M. Sheys, Hogan Lovells US LLP, 555 13th Street NW, Washington, DC 20004.

According to LAL, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: July 25, 2022.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Regena Smith-Bernard,

Clearance Clerk.

[FR Doc. 2022–16304 Filed 7–28–22; 8:45 am]

BILLING CODE 4915–01–P

[1] The verified notice states that LAL, B&H, and OMID operate in New York, and WNYP operates in New York and Pennsylvania.

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36626]

OmniTRAX Holdings Combined, Inc., and HGS Railway Holdings, Inc.—Continuance in Control Exemption—Omni River Ridge, LLC d/b/a River Ridge Railroad

AGENCY: Surface Transportation Board.

ACTION: Correction to notice of exemption.

OmniTRAX Holdings Combined, Inc. (OmniTRAX), and HGS Railway Holdings, Inc. (HGS) (collectively, Omni-HGS), both noncarriers, filed a verified notice of exemption under 49 CFR 1180.2(d)(2) to continue in control of Omni River Ridge, LLC d/b/a River Ridge Railroad (RRR), a noncarrier controlled by OmniTRAX, upon RRR's becoming a Class III rail carrier.[1] On July 15, 2022, notice of the exemption was served and published in the **Federal Register** (87 FR 42,537). The exemption is scheduled to become effective on July 29, 2022.

The served notice inadvertently omitted the effective date of the exemption. The notice should have stated that the transaction may be consummated on or after July 29, 2022, the effective date of the exemption (30 days after the verified notice was filed). This notice corrects that error.

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time.

All pleadings, referring to Docket No. FD 36626, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, one copy of each pleading must be served on Omni-HGS's representative, Robert A. Wimbish, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 800, Chicago, IL 60606–3208.

Board decisions and notices are available at *www.stb.gov.*

Decided: July 29, 2022.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Eden Besera,

Clearance Clerk.

[FR Doc. 2022–16313 Filed 7–28–22; 8:45 am]

BILLING CODE 4915–01–P

[1] This transaction is related to a verified notice of exemption filed concurrently in *Omni River Ridge, LLC d/b/a River Ridge Railroad—Operation Exemption—in Clark County, Ind.,* Docket No. FD 36625, in which Omni River Ridge, LLC, seeks to operate approximately 0.943 miles of track in Clark County, Ind.

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36632]

Hood River Railroad LLC—Acquisition and Operation Exemption—Mt. Hood Railroad Company

Hood River Railroad LLC (HRR), a noncarrier, has filed a verified notice of exemption pursuant to 49 CFR 1150.31 to acquire from Mt. Hood Railroad Company (MHR) and operate an approximately 21.14-mile rail line extending between milepost 0.0 at Hood River, Or., (at a point of connection with a line of the Union Pacific Railroad Company), and milepost 21.14 at Parkdale, Or. (the Line), which constitutes MHR's entire rail system.

According to the verified notice, HRR and MHR are corporate affiliates indirectly controlled by L. Scott Webster (Mr. Webster). HRR further states that, upon consummation of the transaction, MHR will cease to be a railroad common carrier, and HRR will become one in MHR's place under the indirect control of Mr. Webster. HRR also states that the proposed transaction would facilitate Mr. Webster's longer-term plans to dissolve MHR after resolving MHR's corporate and tax affairs.

According to HRR, the proposed transaction does not include an interchange commitment. HRR certifies that its projected annual revenue will not exceed $5 million and that the proposed transaction will not result in HRR's becoming a Class I or II rail carrier.

The earliest this transaction may be consummated is August 13, 2022, the effective date of the exemption (30 days after the verified notice was filed).

If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d)

may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than August 5, 2022 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36632, must be filed with the Surface Transportation Board either via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on HRR's representative, Robert A. Wimbish, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 800, Chicago, IL 60606–3208.

According to HRR, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: July 25, 2022.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA–2022–1032]

Agency Information Collection Activities: Requests for Comments; Clearance of a Renewed Approval of Information Collection: Flight Operations Quality Assurance (FOQA) Program

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The collection involves the voluntary submission of information gained through the Flight Operations Quality Assurance (FOQA) Program. FOQA is a voluntary safety program designed to improve aviation safety through the proactive use of flight-recorded data. The information collected will allow operators to use this data to identify and correct deficiencies in all areas of flight operations. DATES: Written comments should be submitted by September 27, 2022.

ADDRESSES: Please send written comments:

By Electronic Docket: www.regulations.gov (Enter docket number into search field).

By mail: Sandra L. Ray, 1187 Thorn Run Road, Suite 200, Coraopolis, PA 15108.

By fax: 412–239–3063.

FOR FURTHER INFORMATION CONTACT: John Lusk by email at: *john.lusk@faa.gov;* phone: 303–342–1211.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120–0660.

Title: Flight Operations Quality Assurance (FOQA) Program.

Form Numbers: None.

Type of Review: Renewal of an information collection.

Background: Flight Operations Quality Assurance (FOQA) is a voluntary safety program designed to improved aviation safety through the proactive use of flight-recorded data. Operators will use this data to identify and correct deficiencies in all areas of flight operations. Properly used, FOQA data can reduce or eliminate safety risks, as well as minimize deviations from regulations. Through access to de-identified aggregate FOQA data, the Federal Aviation Administration (FAA) can identify and analyze national trends and target resources to reduce operational risks in the National Airspace System (NAS), air traffic control (ATC), flight operations and airport operations.

The FAA and the air transportation industry have sought additional means for addressing safety problems and identifying potential safety hazards. Based on the experiences of foreign air carriers, the results of several FAA-sponsored studies, and input received from government/industry safety forums, the FAA concluded that wide implementation of FOQA programs could have significant potential to reduce air carrier accident rates below current levels. The value of FOQA programs is the early identification of adverse safety trends, which, if uncorrected, could lead to accidents. A key element in FOQA is the application of corrective action and follow-up to ensure that unsafe conditions are effectively remediated.

Respondents: 72 Air Carriers (57 with existing programs and 15 with new programs).

Frequency: Once for certificate holders requesting a new program, monthly for certificate holders with an existing program.

Estimated Average Burden per Response: 100 hours for new respondents, 30 hours for annually for existing respondents.

Estimated Total Annual Burden: 100 hours for new respondents, 30 hours annually for each existing respondent.

Issued in Washington, DC, on July 26, 2022.

Sandra L. Ray,

Aviation Safety Inspector, AFS–260.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket Number MARAD–2019–0011]

Deepwater Port License Application: SPOT Terminal Services LLC—Final General Conformity Determination

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of Final General Conformity Determination.

SUMMARY: The Maritime Administration (MARAD) and the U.S. Coast Guard (USCG) announce the availability of the Final General Conformity Determination to ensure that the air emissions associated with the proposed Sea Port Oil Terminal (SPOT) Deepwater Port Project (Project or SPOT Project) conform with the Texas State Implementation Plan (SIP). The SPOT Project proposes to provide United States (U.S.) crude oil loading services on very large crude carriers (VLCCs) and other crude oil carriers for export to the global market. A detailed description of the proposed project and prior federal action is provided under the **SUPPLEMENTARY INFORMATION** section of this notice.

ADDRESSES: The SPOT Deepwater Port License Application, the FEIS, this Final General Conformity Determination, and other associated documents are available for viewing at *https://*

www.regulations.gov under docket number MARAD–2019–0011 (*https://www.regulations.gov/docket/MARAD-2019-0011*).

The public docket for the SPOT Deepwater Port License Application is maintained by the U.S. Department of Transportation, Docket Management Facility, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The Federal Docket Management Facility's telephone number is 202–366–9317 or 202–366–9826; the fax number is 202–493–2251.

FOR FURTHER INFORMATION CONTACT: Mr. Efrain Lopez, MARAD, via telephone at (202) 366–9761 or email at *SPOT_EIS@dot.gov*; and Mr. Matthew Layman, USCG, via telephone at (202) 372–1421 or email at *DeepwaterPorts@uscg.mil.* Include MARAD–2019–0011 in the subject line of the message and provide your comments in the body of the email or as an attachment.

SUPPLEMENTARY INFORMATION:

Prior Federal Action

A Notice of Application that summarized the SPOT Deepwater Port License Application was published in the **Federal Register** on March 4, 2019 (84 FR 7413). A Notice of Intent to Prepare an Environmental Impact Statement (EIS) and Notice of Public Scoping Meeting was published in the **Federal Register** on March 7, 2019 (84 FR 8401). A Notice of Availability of the Draft Environmental Impact Statement (DEIS) and Notice of Public Meeting was published in the **Federal Register** on February 7, 2020 (85 FR 7381). A Notice of Availability of the Draft General Conformity Determination was published in the **Federal Register** on October 8, 2021 (86 FR 56349). A Notice of Availability of the Supplemental Draft Environmental Impact Statement (SDEIS) and Notice of Public Meetings was published in the **Federal Register** on October 29, 2021 (86 FR 60093). A Notice of Availability of the Final Environmental Impact Statement (FEIS) is being published simultaneously with this announcement under a separate notice. It is noted that comments received on the Draft General Conformity are addressed in the following appendices of the SPOT FEIS: Appendix C2—Comments on the Supplemental Draft EIS and Appendix V—Final General Conformity Determination.

Background

On January 31, 2019, MARAD and USCG received an application from SPOT for all Deepwater Ports related Federal authorizations required for a license to own, construct, and operate a deepwater port for the export of oil. The proposed deepwater port would be located in Federal waters approximately 27.2 to 30.8 nautical miles off the coast of Brazoria County, Texas. Texas was designated as the Adjacent Coastal State for the SPOT license application.

The Federal agencies opened a 30-day public comment period for the Draft General Conformity Determination that began on October 8, 2021, and ended on November 7, 2021. The purpose of this Final General Conformity Determination is to ensure that the air emissions associated with the SPOT Project conform with the Texas SIP in accordance with 40 CFR part 93, subpart B. The Final General Conformity Determination is available for public review at the Federal docket website: *https://www.regulations.gov* under docket number MARAD–2019–0011. As aforementioned, a Notice of Availability of the FEIS is being published simultaneously with this announcement.

This review and determination is triggered by air emissions from construction activities proposed by SPOT Terminal, LLC (the Applicant) that would exceed the applicable General Conformity *de minimis* threshold of 50 tons per year of nitrogen oxides or volatile organic compounds set by *Determinations of Attainment by the Attainment Date, Extensions of the Attainment Date, and Reclassification of Several Areas Classified as Moderate for the 2008 Ozone National Ambient Air Quality Standards,* published in the **Federal Register** on August 23, 2019 (84 FR 44238), within the Houston-Galveston-Brazoria (HGB) area. The HGB area includes Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, and Waller counties and extends nine nautical miles offshore over state water.

Summary of the License Application

The proposed SPOT Deepwater Port (DWP) would be located in the U.S. Exclusive Economic Zone in the Gulf of Mexico, in Galveston Area Outer Continental Shelf lease blocks 463 and A–59, approximately 27.2 to 30.8 nautical miles off the coast of Brazoria County, Texas, in water depths of approximately 115 feet. The proposed project's onshore components would be located in both Brazoria and Harris counties.

The overall project would consist of both onshore and offshore marine components. The onshore components would consist of:

- Modifications to the existing Enterprise Crude Houston (ECHO) Terminal, including four electric motor-driven mainline crude oil pumps, four electric motor-driven booster crude oil pumps, and one measurement skid to support the delivery of crude oil to the proposed Oyster Creek Terminal;
- One 50.1-mile, 36-inch-diameter ECHO to Oyster Creek Pipeline;
- One pipeline interconnection from the existing Rancho II 36-inch-diameter pipeline to the ECHO to Oyster Creek Pipeline (Rancho II Junction);
- A new Oyster Creek Terminal on approximately 140 acres of land, including six electric motor-driven mainline crude oil pumps with the capacity to push crude oil to the offshore pipelines at a rate of up to 85,000 bph, four electric motor-driven booster crude oil pumps, seven aboveground storage tanks (each with a capacity of 685,000 barrels [600,000 barrels of working storage]) for a total onshore storage capacity of approximately 4.8 million barrels (4.2 million barrels working storage) of crude oil, metering equipment, two permanent and one portable vapor combustion units, and a firewater system;
- Two collocated 12.2-mile, 36-inch-diameter Oyster Creek to Shore Pipelines; and
- Ancillary facilities for the onshore pipelines, including ten mainline valves, of which six would be along the ECHO to Oyster Creek Pipeline and four along the Oyster Creek to Shore Pipelines, pig launchers for the ECHO to Oyster Creek Pipeline, and pig launchers and receivers for the Oyster Creek to Shore Pipelines.

The offshore and marine components would consist of:

- Two collocated, bi-directional, 46.9-mile, 36-inch-diameter crude oil offshore pipelines for crude oil delivery from the Oyster Creek Terminal to the platform; and
- Nine nautical miles of the above-mentioned forms part of the Final General Conformity Determination.

As stated, the purpose of this notice is to announce the availability of the Final General Conformity Determination to ensure that the SPOT Project conforms with the Texas SIP.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment if submitted on behalf of an association, business, labor union, etc.). For information on DOT's compliance with the Privacy Act, please

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket Number MARAD–2019–0011]

Deepwater Port License Application: SPOT Terminal Services LLC—Final Environmental Impact Review

AGENCY: Maritime Administration, Department of Transportation

ACTION: Notice of availability; notice of final hearing; request for comments.

SUMMARY: The Maritime Administration (MARAD) and the U.S. Coast Guard (USCG) announce the availability of the Final Environmental Impact Statement (FEIS) for the SPOT Terminal Services LLC (SPOT) deepwater port license application for the export of crude oil from the United States to nations abroad. The SPOT deepwater port license application describes a proposed project that would be located approximately 27.2 to 30.8 nautical miles off the coast of Brazoria County, Texas. Publication of this notice begins a 45-day comment period, requests public participation in the final environmental impact review process, provides information on how to participate in the final environmental impact review process, and announces the availability of an informational website and a virtual Final Hearing that will be held via Zoom. Registration information is provided in the *Virtual Final Hearing and Informational website* section of this notice. A Notice of Availability of the Final General Conformity Determination is being published simultaneously with this announcement under a separate notice.

DATES: Comments on the FEIS must be received on or before 45 days from the date of publication of this **Federal Register** Notice. MARAD and USCG will hold one virtual public Final Hearing in connection with the SPOT FEIS. This Final Hearing will be held via Zoom on August 23, 2022, from 6:00 p.m. to 8:00 p.m. Central Daylight Time (CDT). The Final Hearing will end no earlier than 8:00 p.m. CDT, but it may end later than the stated time, depending on the number of persons who wish to comment on the record. Anyone interested in attending the virtual public meeting or speaking during the virtual public meeting must register. Additionally, materials submitted in response to this request for comments on the FEIS must be submitted to the *www.regulations.gov* website or the Federal Docket Management Facility as detailed in the **ADDRESSES** section below by the end of the comment period.

ADDRESSES: You may submit comments identified by DOT Docket Number MARAD–2019–0011 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov,* search MARAD–2019–0011 and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* The Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is U.S. Department of Transportation, MARAD–2019–0011, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590. Due to flexible work schedules in response to Covid 19, call 202–493–0402 to determine facility hours prior to hand delivery.

Note: If you mail or hand-deliver your comments, we recommend that you include your name and a mailing address, an email address, and/or a telephone number on a cover page so that we can contact you if we have questions regarding your submission.

Instructions: All submissions received must include the agency name and specific docket number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, see the section entitled Public Participation.

FOR FURTHER INFORMATION CONTACT: MARAD via email at *SPOT_EIS@dot.gov*; and the USCG via email at *DeepwaterPorts@uscg.mil.* Include MARAD–2019–0011 in the subject line of the message. For written comments and other material submissions, please follow the directions under **ADDRESSES** above, and do not submit written comments or other materials to the email addresses in this section. Improperly submitted comments interfere with MARAD's ability to help others seeking assistance with comment submission or public meeting attendance. Improperly submitted comments may be rejected from consideration.

SUPPLEMENTARY INFORMATION:

Prior Federal Action

A Notice of Application that summarized the SPOT Deepwater Port License Application was published in the **Federal Register** on March 4, 2019 (84 FR 7413). A Notice of Intent to Prepare an Environmental Impact Statement (EIS) and Notice of Public Scoping Meeting was published in the **Federal Register** on March 7, 2019 (84 FR 8401). A Notice of Availability of the Draft Environmental Impact Statement (DEIS) and Notice of Public Meeting was published in the **Federal Register** on February 7, 2020 (85 FR 7381). A Notice of Availability of the Draft General Conformity Determination was published in the **Federal Register** on October 8, 2021 (86 FR 56349). A Notice of Availability of the Supplemental Draft Environmental Impact Statement (SDEIS) and Notice of Public Meeting was published in the **Federal Register** on October 29, 2021 (86 FR 60093).

Request for Comments

We request public comments or other relevant information related to the FEIS for the proposed SPOT deepwater port. These comments will inform MARAD's Record of Decision. We encourage you to review the information on the website and attend the virtual Final Hearing. Also, you may submit comments electronically. It is preferred that comments be submitted electronically. Please see the information in the **ADDRESSES** section above on how to properly submit comments. All comments submitted to the docket via *www.regulations.gov* or delivered to the Federal Docket Management Facility will be posted, without change, to the Federal Docket Management Facility website (*http://www.regulations.gov*) and will include any personal information you provide. Therefore, submitting such information makes it public. You may view docket submissions at the DOT Docket Management Facility or electronically at the *www.regulations.gov* website.

Virtual Final Hearing and Informational Website

You are invited to learn about the proposed SPOT deepwater port via the informational website (*www.SPOTNEPAProcess.com*). You are also invited to attend the virtual Final Hearing and encouraged to provide comments on the proposed action and the environmental impact analysis contained in the FEIS for the proposed SPOT deepwater port. Speakers must register for the virtual Final Hearing via the informational website. Speakers may also register via phone number (888)

731–5089. To register for the final hearing on August 23, please leave your name along with the correct spelling and phone number after the tone. When registering, please indicate if you would like the opportunity to provide a live comment during the meeting or if you are participating to listen only. Speakers will be recognized in the following order during the Final Hearing: elected officials, public agency representatives, and then individuals or groups in the order in which they registered. In order to accommodate all speakers, speaker time may be limited, meeting hours may be extended, or both. Speakers' transcribed remarks will be included in the public docket. You may also submit written material for inclusion in the public docket. Written material must include the author's name. We ask attendees to respect the meeting procedures in order to ensure a constructive information-gathering session. The presiding officer will use his/her discretion to conduct the meeting in an orderly manner.

The Final Hearing will be conducted in English; however, translation services will be provided in Spanish and Vietnamese. Final Hearing attendees who require special assistance, such as translation services or other reasonable accommodation, please notify MARAD and USCG (see **FOR FURTHER INFORMATION CONTACT**) at least five business days in advance. Please include contact information as well as information about specific needs.

Background

On January 31, 2019, MARAD and USCG received a license application from SPOT for a license to own, construct, and operate a deepwater port for the export of crude oil. The proposed deepwater port would be located in the U.S. Exclusive Economic Zone, approximately 27.2 to 30.8 nautical miles off the coast of Brazoria County, Texas. Texas was designated as the Adjacent Coastal State (ACS) for the SPOT license application.

The Federal agencies involved held a public scoping meeting in connection with the evaluation of the SPOT license application. The public scoping meeting was held in Lake Jackson, Texas, on March 20, 2019. The transcript of the scoping meeting is included on the public docket at *https://www.regulations.gov/document/MARAD-2019-0011-0019.* The Federal agencies also held a Draft EIS public comment meeting to receive comments on the Draft EIS. The public comment meeting was held in Lake Jackson, Texas on February 26, 2020. A second 30-day public comment period due to COVID began on May 1, 2020 and ended on May 31, 2020. The transcripts of the DEIS public comment meetings are also included on the public docket at *https://www.regulations.gov/document/MARAD-2019-0011-1192.*

The Federal agencies also held a Supplemental DEIS public comment meeting to receive comments on the SDEIS. The public meeting was held virtually on November 16, 2021. The transcripts of the SDEIS public comment meetings are also included on the public docket at *https://www.regulations.gov/docket/MARAD-2019-0011.* The Federal agencies also opened a 30-day public comment period for the Draft General Conformity Determination that began on October 8, 2021, and ended on November 7, 2021.

The purpose of the FEIS is to analyze the direct, indirect, and cumulative environmental impacts of the proposed action, and to identify and analyze the environmental impacts of a reasonable range of alternatives. The FEIS is currently available for public review and comment at the Federal docket website: *www.regulations.gov* under docket number MARAD–2019–0011. As stated previously, a Notice of Availability of the Final General Conformity Determination is being simultaneously published with this announcement.

Summary of the License Application

SPOT is proposing to own, construct, and operate a deepwater port terminal in the Gulf of Mexico to export domestically produced crude oil. Use of the deepwater port would include the loading of various grades of crude oil at flow rates of up to 85,000 barrels per hour (bph). The SPOT deepwater port would allow for up to two Very Large Crude Carriers (VLCCs) or other crude oil carriers to moor at single point mooring (SPM) buoys and connect with the deepwater port via floating connecting crude oil hoses and a floating vapor recovery hose. The maximum frequency of loading VLCCs or other crude oil carriers would be 2 million barrels per day, 365 days per year.

The overall project would consist of offshore and marine components as well as onshore components, as described below.

The SPOT deepwater port offshore and marine components would consist of the following:

- One fixed offshore platform with eight piles in Galveston Area Outer Continental Shelf lease block 463, approximately 27.2 to 30.8 nautical miles off the coast of Brazoria County, Texas, in a water depth of approximately 115 feet. The fixed offshore platform would be comprised of four decks, including: a sump deck with shut-down valves and open-drain sump; a cellar deck with pig launchers and receivers, generators, and three vapor combustion units; a main deck with a lease automatic custody transfer (LACT) unit, oil displacement prover loop, living quarters, electrical and instrument building, and other ancillary equipment; and a laydown deck with a crane laydown area.
- Two single point mooring buoys (SPMs), each having: two (2) 24-inch inside diameter crude oil underbuoy hoses interconnecting with the crude oil pipeline end manifold (PLEM); two 24-inch inside diameter floating crude oil hoses connecting the moored VLCC or other crude oil carrier for loading to the SPM buoy; one 24-inch inside diameter vapor recovery underbuoy hose interconnecting with the vapor recovery PLEM; and one 24-inch inside diameter floating vapor recovery hose to connect to the moored VLCC or other crude oil carrier for loading. The floating hoses would be approximately 800 feet in length and rated for 300 psig (21-bar). Each floating hose would contain an additional 200 feet of 16-inch ''tail hose'' that is designed to be lifted and robust enough for hanging over the edge railing of the VLCC or other crude oil vessels. The underbuoy hoses would be approximately 160 feet in length and rated for 300 psig (21-bar).
- Four PLEMs would provide the interconnection between the pipelines and the SPM buoys. Each SPM buoy would have two (2) PLEMs—one PLEM for crude oil and one PLEM for vapor recovery. Each crude oil loading PLEM would be supplied with crude oil by two 30-inch outside diameter pipelines, each approximately 0.66 nautical miles in length. Each vapor recovery PLEM would route recovered vapor from the VLCC or other crude oil carrier through the PLEM to the three vapor combustion units located on the platform topside via two 16-inch outside diameter vapor recovery pipelines, each approximately 0.66 nautical miles in length.
- Two co-located 36-inch outside diameter, 40.8-nautical mile-long crude oil pipelines would be constructed from the shoreline crossing in Brazoria County, Texas, to the SPOT deepwater port for crude oil delivery. These pipelines, in conjunction with 12.2 statute miles of new-build onshore pipelines (described below), would connect the onshore crude oil storage facility and pumping station (Oyster Creek Terminal) to the offshore SPOT deepwater port. The crude oil would be metered at the offshore platform.

Pipelines would be bi-directional for the purposes of maintenance, pigging, changing crude oil grades, or evacuating the pipeline with water.

The SPOT deepwater port onshore storage and supply components would consist of the following:

- New equipment and piping at the existing Enterprise Crude Houston (ECHO) Terminal to provide interconnectivity with the crude oil supply network for the SPOT Project. This would include the installation of four booster pumps, one measurement skid, and four crude oil pumps.
- An interconnection between the existing Rancho II pipeline and the proposed ECHO to Oyster Creek pipeline consisting of a physical connection as well as ultrasonic measurement capability for pipeline volumetric balancing purposes.
- The proposed Oyster Creek Terminal located in Brazoria County, Texas, on approximately 140 acres of land consisting of seven aboveground storage tanks, each with a total storage capacity of 685,000 barrels (600,000 barrels working storage capacity), for a total onshore storage capacity of approximately 4.8 million barrels (4.2 million barrels working storage) of crude oil. The Oyster Creek Terminal also would include: Six (6) electric-driven mainline crude oil pumps; four electric-driven booster crude oil pumps (two per pipeline), working in parallel to move crude oil from the storage tanks through the measurement skids; two crude oil pipeline pig launchers/receivers; one crude oil pipeline pig receiver; two measurement skids for measuring incoming crude oil—one skid located at the incoming pipeline from the existing ECHO Terminal, and one skid installed and reserved for a future pipeline connection; two measurement skids for measuring departing crude oil; three vapor combustion units—two permanent and one portable; and ancillary facilities to include electrical substation, office, and warehouse buildings.
- Three onshore crude oil pipelines would be constructed onshore to support the SPOT deepwater port. These would include: one 50.1 statute mile long 36-inch crude oil pipeline from the existing ECHO Terminal to the Oyster Creek Terminal. This pipeline would be located in Harris County and Brazoria County, Texas; two 12.2 statute mile long, co-located 36-inch crude oil export pipelines from the Oyster Creek Terminal to the shore crossing where these would join the above-described subsea pipelines supplying the SPOT deepwater port. These pipelines would be located in Brazoria County, Texas.

As previously stated, the purpose of this notice is to announce that the FEIS is currently available for public review and a 45-day public comment period. Comments can be submitted through the Federal docket website: *www.regulations.gov* under docket number MARAD–2019–0011.

Public Participation Instructions

How long do I have to submit comments?

We are providing a 45-day comment period.

How do I prepare and submit comments?

To ensure that your comments are correctly filed in the Docket, please include the docket number shown at the beginning of this document in your comments.

If you are submitting comments electronically as a PDF (Adobe) File, MARAD and USCG ask that the documents be submitted using the Optical Character Recognition (OCR) process, thus allowing the agencies to search and copy certain portions of your submissions. Comments may be submitted to the docket electronically at *http://www.regulations.gov.* Search using the MARAD docket number in this notice and follow the online instructions for submitting comments.

You may also submit two copies of your comments, including the attachments, to Docket Management at the address given above under **ADDRESSES**.

Please note that pursuant to the Data Quality Act, for substantive data to be relied upon and used by the agency, it must meet the information quality standards set forth in the OMB and DOT Data Quality Act guidelines. Accordingly, we encourage you to consult the guidelines in preparing your comments. OMB's guidelines may be accessed at *https://www.whitehouse.gov/omb/information-regulatory-affairs/information-policy/*. DOT's guidelines may be accessed at *https://www.bts.gov/statistical-policy* and also at *https://www.transportation.gov/dot-information-dissemination-quality-guidelines.*

I provided MARAD and USCG comments on the SPOT FEIS, orally or in writing, in another forum. May I provide comments in response to this notice as well?

Yes, MARAD and USCG encourage any member of the public to submit relevant comments for the docket, including input that has previously been communicated to the agencies.

How can I be sure that my comments were received?

If you wish Docket Management to notify you upon its receipt of your comments, enclose a self-addressed, stamped postcard in the envelope containing your comments. Upon receiving your comments, Docket Management will return the postcard by mail.

Will the agency consider late comments?

MARAD and USCG will consider all substantive comments that Docket Management receives before the close of business on the comment closing date indicated above under **DATES**.

How can I read the comments submitted by other people?

You may read the comments received by Docket Management at the address given above under **ADDRESSES**. The hours of the Docket Management Unit are indicated above in the same location. You may also see the comments on the internet. To read the comments on the internet, go to *http://www.regulations.gov.* Follow the online instructions for accessing the dockets. Please note that even after the comment closing date, MARAD will continue to file relevant information in the Docket as it becomes available. Accordingly, we recommend that you periodically check the Docket for new material.

Privacy Act

Anyone can search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment if submitted on behalf of an association, business, labor union, etc.). For information on DOT's compliance with the Privacy Act, please visit *https://www.transportation.gov/privacy.*

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Multiple Office of Foreign Assets Control Information Collection Requests

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The public is invited to submit comments on these requests.

DATES: Comments should be received on or before August 29, 2022 to be assured of consideration.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained from Melody Braswell by emailing *PRA@treasury.gov,* calling (202) 622–1035, or viewing the entire information collection request at *www.reginfo.gov.*

SUPPLEMENTARY INFORMATION:

Office of Foreign Assets Control (OFAC)

1. Title: OFAC Application for the Release of Blocked Funds.

OMB Number: 1505–0170.

Description: Transactions prohibited pursuant to the Trading With the Enemy Act, *50 U.S.C. 4301–4341,* the International Emergency Economic Powers Act, *50 U.S.C. 1701 et seq.,* and other authorities may be authorized by means of specific licenses issued by OFAC. Such licenses are issued in response to applications submitted by persons whose property and interests in property have been blocked or who wish to engage in transactions that would otherwise be prohibited. The OFAC Application for the Release of Blocked Funds, which provides a standardized method of application for all applicants seeking the unblocking of funds, is available in electronic format on OFAC's website. By obviating the need for applicants to write lengthy letters to OFAC, this form and the electronic portal reduce the overall burden of the application process. Applications to OFAC for the release of blocked funds are strongly encouraged to be made via the electronic licensing portal here: *https://home.treasury.gov/policy-issues/financial-sanctions/ofac-license-application-page.*

Type of Review: Extension without change of a currently approved collection.

Affected Public: Businesses or other for-profits, individuals and households, and non-governmental organizations.

Estimated Number of Respondents: 6,700.

Frequency of Response: 1 per respondent.

Estimated Total Number of Annual Responses: 6,700.

Estimated Time per Response: 30 minutes.

Estimated Total Annual Burden Hours: 3,350 hours.

2. *Title:* Persons Providing Travel and Carrier Services to Cuba.

OMB Number: 1505–0168.

Type of Review: Extension without change of a currently approved collection.

Form Number: Section 515.572 does not specify any particular form of recordkeeping.

Description: Requirements to retain records are codified in § 515.572 of the Cuban Assets Control Regulations, *31 CFR part 515* (the ''Regulations''). Persons subject to U.S. jurisdiction who provide authorized travel or carrier services related to Cuba are required to maintain for at least five years from the date of the transaction a certification from each customer indicating the name and address of each customer and the section of the Regulations (in the case of generally licensed travel), or the specific license number, that authorizes the person to travel to Cuba.

The records covered by this information collection must be provided on request to the U.S. Department of the Treasury, and support OFAC's implementation of its compliance and enforcement programs pursuant to the Regulations.

Type of Review: Extension without change of a currently approved collection.

Affected Public: Businesses or other for-profits, individuals and households, and non-governmental organizations.

Estimated Number of Respondents: 565,000 respondents per year.

Estimated Number of Records per Respondent: 1 per respondent.

Estimated Total Number of Annual Records: 565,000 records.

Estimated Time per Record: 1 minute per record.

Estimated Total Annual Burden Hours: 9,417 hours.

Authority: 44 U.S.C. 3501 *et seq.*

Melody Braswell,

Treasury PRA Clearance Officer.

BILLING CODE 4810–AL–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0515]

Agency Information Collection Activity: Maintenance of Records Under 38 CFR 36.4333

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before August 29, 2022. (Inserted by the Clearance Officer.)

ADDRESSES: Submit written comments on the collection of information through *www.Regulations.gov,* or to Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: VA Desk Officer; 725 17th St. NW, Washington, DC 20503 or sent through electronic mail to *oira_submission@omb.eop.gov.* Please refer to ''OMB Control No. 2900–0515'' in any correspondence.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0515'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 38 CFR 36.4317.

Title: Maintenance of Records Under 38 CFR 36.4333.

OMB Control Number: 2900–0515.

Type of Review: Revision.

Abstract: VA is submitting this revised information collection in advance of implementing new technology and oversight procedures in which VA will collect from lenders certain loan origination information via a computable electronic format. The information collected under § 36.4333 is used by VA to ensure lenders and servicers who participate in VA's Loan Guaranty program follow statutory and regulatory requirements, such as those

relating to credit information, loan processing requirements, underwriting standards, servicing requirements, and other applicable laws, regulations and policies. VA also uses data collected under this authority to provide annual feedback to lenders, through the Lender Scorecard, on certain loan characteristics such as interest rate, fees and charges, audit results, etc., as compared to the national average of all VA lenders.

The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 87 FR 11369 on May 26, 2022, page 32076.

Affected Public: Private Sectors.

Estimated Annual Burden: 14,983 hours.

Estimated Average Burden per Respondent: 0.01 hours.

Frequency of Response: 2.9 times.

Estimated Number of Respondents: 1,385,000.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

[FR Doc. 2022–16282 Filed 7–28–22; 8:45 am]

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0422]

Agency Information Collection Activity: VA Acquisition Regulation (VAAR) Construction Provisions and Clauses

AGENCY: Office of Acquisition and Logistics, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Office of Acquisition and Logistics (OAL), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 27, 2022.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Bogdan Vaga, Office of Acquisition & Logistics, Procurement Policy & Warrant Management Services (003A2A), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *Bogdan.Vaga@va.gov.* Please refer to ''OMB Control No. 2900–0422'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0422'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA. With respect to the following collection of information, OAL invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of OAL's functions, including whether the information will have practical utility; (2) the accuracy of OAL's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: VA Acquisition Regulation (VAAR) Construction Provisions and Clauses.

OMB Control Number: 2900–0422.

Type of Review: Extension of a currently approved collection.

Abstract: This Paperwork Reduction Act (PRA) submission seeks renewal without changes of Office of Management and Budget (OMB) approval No. 2900–0422 for five collections of information for the Department of Veterans Affairs Acquisition Regulation (VAAR) clauses, as follows:

- Clause 852.232–70, Payment Under Fixed-Price Construction Contracts (without NAS–CPM), requires construction contractors, without NAS–CPM, to submit a schedule of costs for work to be performed under the contract.
- Clause 852.232–71, Payment Under Fixed-Price Construction Contracts (including NAS–CPM), requires construction contractors, including NAS–CPM, to submit a schedule of costs for work to be performed under the contract.
- Clause 852.236–72, Performance of Work by the Contractor, requires contractors awarded a construction contract containing Federal Acquisition Regulation (FAR) clause 52.236–1, Performance of Work by the Contractor, to submit a statement designating the branch or branches of contract work to be performed by the contractor's own forces.
- Clause 852.236–80, Subcontracts and Work Coordination, requires construction contractors, on contracts involving complex mechanical-electrical work, to furnish coordination drawings showing the manner in which utility lines will fit into available space and relate to each other and to the existing building elements.
- Clause 852.243–70, Construction Contract Changes-Supplement, requires contractors to submit cost proposals for changes ordered by the contracting officer or for changes proposed by the contractor.

Affected Public: Business or other for-profit.

Estimated Annual Burden: 2,974 hours.

Estimated Average Burden per Respondent: 105 minutes.

Frequency of Response: More than quarterly.

Estimated Number of Respondents: 1,706.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

Notice of Request for Information on the Department of Veterans Affairs Ophthalmology Technician Standard of Practice

AGENCY: Department of Veterans Affairs.

ACTION: Request for information.

SUMMARY: The Department of Veterans Affairs (VA) is requesting information to assist in developing a national standard of practice for VA Ophthalmology

Technicians. VA seeks comments on various topics to help inform VA's development of this national standard of practice.

DATES: Comments must be received on or before September 27, 2022.

ADDRESSES: Comments may be submitted through *www.regulations.gov*. Comments received will be available at *www.regulations.gov* for public viewing, inspection or copies.

FOR FURTHER INFORMATION CONTACT: Ethan Kalett, Office of Regulations, Appeals and Policy (10BRAP), Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, or by phone at 202–461–0500. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Authority

Chapters 73 and 74 of 38 U.S.C. and 38 U.S.C. 303 authorize the Secretary to regulate the professional activities of VA health care professions to make certain that VA's health care system provides safe and effective health care by qualified health care professionals to ensure the well-being of those Veterans who have borne the battle.

On November 12, 2020, VA published an interim final rule confirming that VA health care professionals may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification, or other requirements that unduly interfere with their practice. 38 CFR 17.419; 85 FR 71838. Specifically, this rulemaking confirmed VA's current practice of allowing VA health care professionals to deliver health care services in a State other than the health care professional's State of licensure, registration, certification, or other State requirement, thereby enhancing beneficiaries' access to critical VA health care services. The rulemaking also confirmed VA's authority to establish national standards of practice for health care professionals which would standardize a health care professional's practice in all VA medical facilities.

The rulemaking explained that a national standard of practice describes the tasks and duties that a VA health care professional practicing in the health care profession may perform and may be permitted to undertake. Having a national standard of practice means that individuals from the same VA health care profession may provide the same type of tasks and duties regardless of the VA medical facility where they are located or the State license, registration, certification, or other State requirement they hold. We emphasized in the rulemaking and reiterate that VA will determine, on an individual basis, that a health care professional has the necessary education, training and skills to perform the tasks and duties detailed in the national standard of practice and will only be able to perform such tasks and duties after they have been incorporated into the individual's privileges, scope of practice, or functional statement. The rulemaking explicitly did not create any such national standards and directed that all national standards of practice would be subsequently created via policy.

Need for National Standards of Practice

As the Nation's largest integrated health care system, it is critical that VA develops national standards of practice to ensure beneficiaries receive the same high-quality care regardless of where they enter the system and to ensure that VA health care professionals can efficiently meet the needs of beneficiaries when practicing within the scope of their VA employment. National standards are designed to increase beneficiaries' access to safe and effective health care, thereby improving health outcomes. The importance of this initiative has been underscored by the COVID–19 pandemic. With an increased need for mobility in our workforce, including through VA's Disaster Emergency Medical Personnel System, creating a uniform standard of practice better supports VA health care professionals who already frequently practice across State lines. In addition, the development of national standards of practice aligns with VA's long-term deployment of a new electronic health record (EHR). National standards of practice are critical for optimal EHR implementation to enable the specific roles for each health care profession in EHR to be consistent across the Veterans Health Administration (VHA) and to support increased interoperability between VA and the Department of Defense (DoD). DoD has historically standardized practice for certain health care professionals, and VHA closely partnered with DoD to learn from their experience.

Process To Develop National Standards of Practice

Consistent with 38 CFR 17.419, VA is developing national standards of practice via policy. There will be one overarching national standard of practice directive that will generally describe VHA's policy and have each individual national standard of practice as an appendix to the directive. The directive and all appendices will be accessible on VHA Publications website at: *https://vaww.va.gov/vhapublications/* (internal) and *https://www.va.gov/vhapublications/* (external) once published.

To develop these national standards, VA is using a robust, interactive process that is consistent with the guidance outlined in Executive Order (E.O.) 13132 to preempt State law. The process includes consultation with internal and external stakeholders, including State licensing boards, VA employees, professional associations, Veterans Service Organizations, labor partners and others. For each identified VA occupation, a workgroup comprised of health care professionals conducts State variance research to identify internal best practices that may not be authorized under every State license, certification, or registration, but would enhance the practice and efficiency of the profession throughout the agency. The workgroup may consult with internal stakeholders at any point throughout the process. If a best practice is identified that is not currently authorized by every State, the workgroup determines what education, training and skills are required to perform such task or duty. The workgroup then drafts a proposed VA national standard of practice using the data gathered during the State variance research and incorporates internal stakeholder feedback to date.

The proposed national standard of practice is internally reviewed, to include by an interdisciplinary workgroup consisting of representatives from Quality Management; Field Chief of Staff; Academic Affiliates; Associate Director Patient Care Services; Ethics; Workforce Management and Consulting; Surgery; Credentialing and Privileging; Field Chief Medical Office; and EHR Modernization.

Externally, the proposed national standard of practice is provided to our partners in DoD. In addition, VA labor partners are engaged informally as part of a pre-decisional collaboration. Consistent with E.O. 13132, a letter is sent to each State board and certifying organization that includes the proposed national standard and an opportunity to further discuss the national standard with VA. After the States have received notification, the proposed national standard of practice is published to the **Federal Register** for 60 days to obtain feedback from the public, including professional associations and unions. At the same time, the proposed national standard is published on an internal VA site to obtain feedback from VA employees. Feedback from State boards,

professional associations, unions, VA employees and any other person or organization who informally provides comments via the **Federal Register** will be reviewed. VA will make appropriate revisions in light of the comments, including those that present evidence-based practice and alternatives that help VA meet our mission and goals, and that are better for Veterans or VA health care professionals. We will publish a collective response to all comments at *https://www.va.gov/standardsof practice.*

After the national standard of practice is finalized, approved and published in VHA policy, VA will implement the tasks and duties authorized by that national standard of practice. Any tasks or duties included in the national standard will be incorporated into an individual health care professional's privileges, scope of practice, or functional statement following any training and education necessary for the health care professional to perform those functions. Implementation of the national standard of practice may be phased in across all medical facilities, with limited exemptions for health care professionals as needed.

National Standard for Ophthalmology Technicians

The proposed format for national standards of practice when there is a national certifying body is as follows. The first paragraph is general information about the profession and what the health care professionals can do. The second paragraph references the education, certification, license, registration, or other requirements needed to practice this profession at VA and confirms that this profession follows the standard of practice set by the certifying body. A final statement confirms that as of the date of the workgroup's research into requirements, all individuals in this profession follow the same standard of practice.

We note that proposed standards of practice do not contain an exhaustive list of every task this profession can perform. Rather, it is designed to highlight whether there are any areas of variance in how this profession can practice across States and how this profession will be able to practice within VA notwithstanding their State license, certification, registration, and other requirements.

VA qualification standards require Ophthalmology Technicians to have an active, current, full and unrestricted national certification from the Joint Commission on Allied Health Personnel in Ophthalmology (JCAHPO). VA reviewed whether there are any alternative registrations, certifications, or State requirements that could be required for an Ophthalmology Technician and found that there were none. VA proposes to adopt a standard of practice consistent with the national certification; therefore, VA Ophthalmology Technicians will continue to follow the same standard as set by their national certification. The standard of practice for the national registration can be found here: *https://documents.jcahpo.org/documents/Certification/IJCAHPO_Core_Criteria.pdf.*

Because the practice of Ophthalmology Technicians is not changing, there will be no impact on the practice of this occupation when this national standard of practice is implemented.

Proposed National Standard of Practice for Ophthalmology Technicians

Ophthalmology Technicians are eye health care professionals qualified to assist ophthalmologists in the diagnostic evaluation, management, treatment and education of patients with medical and surgical conditions affecting the visual system. Their duties include, but are not limited to, documenting patient histories, assessing visual and ocular function, performing tests and ophthalmology imaging, administering topical ocular medications (*i.e.,* drops or ointment, including anesthetic, dye, dilation, cycloplegic or antibiotics) and providing patient care.

Ophthalmology Technicians in VA possess the required education and certification from JCAHPO, in accordance with VA qualification standards, as more specifically described in VA Handbook 5005, Staffing, Part II, Appendix G52.

This national standard of practice confirms Ophthalmology Technicians practice in accordance with the Allied Ophthalmology Personnel Certification standards from JCAHPO, which are available at: *https://jcahpo.org/.* As ofAugust 2021, Ophthalmology Technicians in all States follow this national certification.

Request for Information

1. Are there any required trainings for the aforementioned practices that we should consider?

2. Are there any factors that would inhibit or delay the implementation of the aforementioned practices for VA health care professionals in any States?

3. Is there any variance in practice that we have not listed?

4. What should we consider when preempting conflicting State laws, regulations or requirements regarding supervision of individuals working toward obtaining their license or unlicensed personnel?

5. Is there anything else you would like to share with us about this national standard of practice?

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved this document on July 18, 2022, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Luvenia Potts,

Regulation Policy Coordinator, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0863]

Agency Information Collection Activity: VA Acquisition Regulation (VAAR) Clause 852.237–73, Crime Control Act—Requirement for Background Checks

AGENCY: Office of Acquisition and Logistics, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Office of Acquisition and Logistics (OAL), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 27, 2022.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Bogdan Vaga, Office of Acquisition & Logistics, Procurement Policy & Warrant Management Services (003A2A), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC

20420 or email to *Bogdan.Vaga@va.gov.* Please refer to ''OMB Control No. 2900–0863'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0863'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA. With respect to the following collection of information, OAL invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of OAL's functions, including whether the information will have practical utility; (2) the accuracy of OAL's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: VA Acquisition Regulation (VAAR) Construction Provisions and Clauses.

OMB Control Number: 2900–0863.

Type of Review: Extension of a currently approved collection.

Abstract: This Paperwork Reduction Act (PRA) submission seeks renewal without changes of Office of Management and Budget (OMB) approved No.2900–0863, VAAR clause 852.237–73, Crime Control Act—Requirement for Background Checks. Under the Crime Control Act of 1990 (34 U.S.C. 20351), each agency of the Federal Government, and every facility operated by the Federal Government, or operated under contract with the Federal Government, that hires, or contracts for hire, individuals involved with the provision to children under the age of 18 of childcare services shall assure that all existing and newly hired employees undergo a criminal history background check. VAAR clause 852.237–73, Crime Control Act—Requirement for Background Checks, is required in all solicitations, contracts, and orders that involve providing childcare services to children under the age of 18, including social services, health and mental health care, child-(day) care, education (whether or not directly involved in teaching), and rehabilitative programs covered under the statute.

Affected Public: Business or other for-profit.

Estimated Annual Burden: 1,500 hours.

Estimated Average Burden per Respondent: 60 minutes.

Frequency of Response: One per contract employee.

Estimated Number of Respondents: 1,500.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0586]

Agency Information Collection Activity: VA Acquisition Regulation (VAAR) Clause 852.211–72, Technical Industry Standards

AGENCY: Office of Acquisition and Logistics, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Office of Acquisition and Logistics (OAL), Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before September 27, 2022.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Bogdan Vaga, Office of Acquisition & Logistics, Procurement Policy & Warrant Management Services (003A2A), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *Bogdan.Vaga@va.gov.* Please refer to ''OMB Control No. 2900–0586'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0586'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA. With respect to the following collection of information, OAL invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of OAL's functions, including whether the information will have practical utility; (2) the accuracy of OAL's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: Public Law 104–13; 44 U.S.C. 3501–3521.

Title: VA Acquisition Regulation (VAAR) Construction Provisions and Clauses.

OMB Control Number: 2900–0586.

Type of Review: Extension of a currently approved collection.

Abstract: This Paperwork Reduction Act (PRA) submission seeks an extension of Office of Management and Budget (OMB) approval No. 2900–0586 for collection of information for both commercial and non-commercial item, service, and construction solicitations and contracts using VAAR Clause 852.211–72, Technical Industry Standards, as prescribed in CFR Title 48, Federal Acquisition Regulations System, VAAR 811.204–70, Contract clause. VAAR clause 852.211–72, Technical Industry Standards, requires that items offered for sale to VA under the solicitation conform to certain technical industry standards, such as United States Department of Agriculture (USDA) or the USDA Institutional Meat Purchase Specifications (IMPS) and that the contractor furnish evidence to VA

that the items meet that requirement. The evidence is normally in the form of a tag or seal affixed to the item, such as a label on beef product. In most cases, this requires no additional effort on the part of the contractor, as the items come from the factory with the tags already in place, as part of the manufacturer's standard manufacturing operation. Occasionally, for items not already meeting standards or for items not previously tested, a contractor will have to furnish a certificate from an acceptable laboratory certifying that the items furnished have been tested in accordance with, and conform to, the specified standards. Only firms whose products have not previously been tested to ensure the products meet the industry standards required under the solicitation and contract will be required to submit a separate certificate. The information will be used to ensure that the items being purchased meet minimum safety standards and to protect VA employees, VA beneficiaries, and the public.

Affected Public: Business or other for-profit.

Estimated Annual Burden: 559 hours.

Estimated Average Burden per Respondent: 30 minutes.

Frequency of Response: One per contract.

Estimated Number of Respondents: 1,118.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

DEPARTMENT OF VETERANS AFFAIRS

Notice of Request for Information on the Department of Veterans Affairs Kinesiotherapist Standard of Practice

AGENCY: Department of Veterans Affairs

ACTION: Request for Information.

SUMMARY: The Department of Veterans Affairs (VA) is requesting information to assist in developing a national standard of practice for VA Kinesiotherapists. VA seeks comments on various topics to help inform VA's development of this national standard of practice.

DATES: Comments must be received on or before September 27, 2022.

ADDRESSES: Comments may be submitted through *www.regulations.gov.* Comments received will be available at *www.regulations.gov* for public viewing, inspection or copies.

FOR FURTHER INFORMATION CONTACT: Ethan Kalett, Office of Regulations, Appeals and Policy (10BRAP), Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, 202–461–0500. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Authority

38 U.S.C. 73 and 74 and 38 U.S.C. 303 permit the Secretary to further regulate VA's health care professions to make certain that VA's health care system provides safe and effective health care by qualified health care professionals to ensure the well-being of those Veterans who have borne the battle.

On November 12, 2020, VA published an interim final rule to confirm that VA health care professionals may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification or other requirements that unduly interfere with their practice. 38 CFR 17.419; 85 FR 71838. Specifically, this rulemaking confirmed VA's current practice of allowing VA health care professionals to deliver health care services in a state other than the health care professional's state of licensure, registration, certification or other state requirement, thereby enhancing beneficiaries' access to critical VA health care services. The rulemaking also confirmed VA's authority to establish national standards of practice for health care professionals which would standardize a health care professional's practice in all VA medical facilities.

The rulemaking explained that a national standard of practice describes the tasks and duties that a VA health care professional practicing in the health care profession may perform and may be permitted to undertake. Having a national standard of practice means that individuals from the same VA health care profession may provide the same type of tasks and duties regardless of the VA medical facility where they are located or the state license, registration, certification or other state requirement they hold. We emphasized in the rulemaking, and reiterate here, that VA will determine on an individual basis that a health care professional has the necessary education, training and skills to perform the tasks and duties detailed in the national standard of practice and will only be able to perform such tasks and duties after they have been incorporated into the individual's privileges, scope of practice or functional statement. The rulemaking explicitly did not create any such national standards and directed that all national standards of practice would be subsequently created via policy.

Need for National Standards of Practice

As the Nation's largest integrated health care system, it is critical that VA develops national standards of practice to ensure beneficiaries receive the same high-quality care regardless of where they enter the system and to ensure that VA health care professionals can efficiently meet the needs of beneficiaries when practicing within the scope of their VA employment. National standards are designed to increase beneficiaries' access to safe and effective health care, thereby improving health outcomes. the COVID–19 pandemic underscored the importance of this initiative. With an increased need for mobility in our workforce, including through VA's Disaster Emergency Medical Personnel System, creating a uniform standard of practice better supports VA health care professionals who already practice across state lines. In addition, developing national standards of practice aligns with VA's long-term deployment of a new electronic health record (EHR). National standards of practice are critical for optimal EHR implementation to enable the specific roles for each health care profession in EHR to be consistent across Veterans Health Administration (VHA) and to support increased interoperability between VA and the Department of Defense (DoD). DoD has historically standardized practice for certain health care professionals, and VHA closely partnered with DoD to learn from their experience.

Process To Develop National Standards of Practice

Consistent with 38 CFR 17.419, VA is developing national standards of practice via policy. There will be one overarching National Standard of Practice directive with each individual national standard of practice as an appendix to the directive. The directive and all appendices will be accessible on VHA Publications website at: *https://vaww.va.gov/vhapublications/* (internal) and *https://www.va.gov/vhapublications/* (external) once published.

To develop these national standards, VA is using a robust, interactive process that is consistent with our authority under the Supremacy Clause of the United States Constitution and consistent with the guidance outlined in Executive Order (E.O.) 13132 to utilize such authority. The process includes consulting with internal and external

stakeholders, including State licensing boards.

For each identified VA occupation, a workgroup comprised of health care professionals is established to conduct state variance research to identify internal best practices that may not be authorized under every state license, certification or registration, but would enhance the practice and efficiency of the profession throughout the agency. The workgroup may consult with internal stakeholders at any point throughout the process. If a best practice is identified that is not currently authorized by every state, the workgroup determines what education, training and skills are required to perform such task or duty. The workgroup then drafts a proposed VA national standard of practice using the data gathered during the state variance research and incorporates internal stakeholder feedback to date.

The proposed national standard of practice is internally reviewed, to include review by an interdisciplinary workgroup consisting of representatives from Quality Management; Field Chief of Staff; Academic Affiliates; Associate Director Patient Care Services; Ethics; Workforce Management and Consulting; Surgery; Credentialing and Privileging; Field Chief Medical Office; and Electronic Health Record.

Externally, the proposed national standard of practice is provided to our partners in DoD. In addition, unions are engaged informally as part of a pre-decisional collaboration. We note that the opportunity for bargaining exists later in the process and prior to publication of the national standard. Consistent with E.O. 13132, a letter is sent to each State board that includes the proposed national standard and an opportunity to further discuss the national standard with VA. After the states have received notification, the proposed national standard of practice is published to the **Federal Register** for 60 days to obtain feedback from the public, including professional associations and unions. At the same time, the proposed national standard is published on an internal VA site to obtain feedback from VA employees. Feedback from State boards, the **Federal Register**, VA employees and any other person or organization who informally provides comments will be reviewed. VA will make appropriate revisions based on comments, including those that present evidence-based alternatives that help VA meet our mission and goals, and that are better for Veterans or VA health care professionals. We will publish a collective response to all comments at. *https://www.va.gov/standardsofpractice.*

After the national standard of practice is published and effective, any additional tasks or duties included in the national standard will be incorporated into an individual health care professional's privileges, scope of practice or functional statement only if their VA medical facility performs this function for beneficiaries and the health care professional has the necessary education, training and skill to perform the task or duty.

National Standard for Kinesiotherapists

The proposed structure for national standards of practice when there is a national registration body is as follows: the first paragraph is general information about the profession and what the health care professionals can do at a high level; the second paragraph references the education and credential needed to practice this profession at VA and confirms that this profession follows the standard of practice set by the registration body; and a final statement confirms that as of the date of the workgroup's research into requirements, all individuals in this profession follow the same standard of practice.

We note that proposed standards of practice do not contain an exhaustive list of every task this profession can perform. Rather, it is designed to highlight whether there are any areas of variance in how this profession can practice across states and how this profession will be able to practice within VA notwithstanding their state requirements.

VA qualification standards require Kinesiotherapists to be registered with the Council on Professional Standards for Kinesiotherapy (COPSKT). VA reviewed whether there are any alternative registrations, certifications or state requirements that could be required for a Kinesiotherapist and found that there were none. VA proposes to adopt a standard of practice consistent with this national registration; therefore, Kinesiotherapists will continue to follow the same standard as set by their national registration. The standard of practice for the national registration can be found at *https://akta.org/professional-development/scope-of-practice.*

Proposed National Standard of Practice for Kinesiotherapists

The Kinesiotherapist is an allied health professional competent in the administration of scientifically based musculoskeletal, neurological, ergonomic, biomechanical, psychosocial and task-specific functional tests and measures combined with other evidence-based modalities used to physically, physiologically and psychologically improve the human function, movement and well-being of the Veteran. The Kinesiotherapist provides acute, sub-acute or post-acute rehabilitative therapy and wellness interventions focusing on therapeutic exercise, mobility, reconditioning, education and behavior change emphasizing the psychological as well as physical interventions to enhance outcomes for a holistic approach to rehabilitation.

Kinesiotherapists in VA possess the required education and registration with COPSKT, which is a national board for Kinesiotherapist in accordance with VA qualification standards, as more specifically described in VA Handbook 5005, Staffing, Part II, Appendix G21. This national standard of practice confirms Kinesiotherapists practice in accordance with the American Board of Registration for Kinesiotherapists standards from COPSKT, available at: *https://akta.org/.* As of July 2021, Kinesiotherapists in all States follow this national registration.

Request for Information:

1. Are there any required trainings for the aforementioned practices that we should consider?

2. Are there any factors that would inhibit or delay implementing the aforementioned practices for VA health care professionals in any states?

3. Is there any variance in practice that we have not listed?

4. What should we consider when preempting conflicting state laws, regulations or requirements regarding supervision of individuals working toward obtaining their license or unlicensed personnel?

5. Is there anything else you would like to share with us about this national standard of practice?

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved this document on July 11, 2022, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Luvenia Potts,

Regulation Policy Coordinator, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

42 CFR Parts 405, 410, 411, 414, 415, 423, 424, 425, and 455

[CMS–1770–P]

RIN 0938–AU81

Medicare and Medicaid Programs; CY 2023 Payment Policies Under the Physician Fee Schedule and Other Changes to Part B Payment Policies; Medicare Shared Savings Program Requirements; Medicare and Medicaid Provider Enrollment Policies, Including for Skilled Nursing Facilities; Conditions of Payment for Suppliers of Durable Medicaid Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS); and Implementing Requirements for Manufacturers of Certain Single-Dose Container or Single-Use Package Drugs To Provide Refunds With Respect to Discarded Amounts

AGENCY: Centers for Medicare & Medicaid Services (CMS), Health and Human Services (HHS).

ACTION: Proposed rule.

SUMMARY: This major proposed rule addresses: changes to the physician fee schedule (PFS); other changes to Medicare Part B payment policies to ensure that payment systems are updated to reflect changes in medical practice, relative value of services, and changes in the statute; Medicare Shared Savings Program requirements; updates to the Quality Payment Program; Medicare coverage of opioid use disorder services furnished by opioid treatment programs; updates to certain Medicare and Medicaid provider enrollment policies, including for skilled nursing facilities; updates to conditions of payment for DMEPOS suppliers; HCPCS Level II coding and payment for wound care management products; electronic prescribing for controlled substances for a covered Part D drug under a prescription drug plan or an MA–PD plan under the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act (SUPPORT Act); updates to the Medicare Ground Ambulance Data Collection System; and provisions under the Infrastructure Investment and Jobs Act.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, no later than 5 p.m. on September 6, 2022.

ADDRESSES: In commenting, please refer to file code CMS–1770–P.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1770–P, P.O. Box 8016, Baltimore, MD 21244–8016.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services,Department of Health and Human Services, Attention: CMS–1770–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

FOR FURTHER INFORMATION CONTACT:

MedicarePhysicianFeeSchedule@cms.hhs.gov, for any issues not identified below. Please indicate the specific issue in the subject line of the email.

Michael Soracoe, (410) 786–6312, for issues related to practice expense, work RVUs, conversion factor, and PFS specialty-specific impacts.

Kris Corwin, (410) 786–8864, for issues related to the comment solicitation on strategies for updates to practice expense data collection and methodology.

Sarah Leipnik, (410) 786–3933, and Anne Blackfield, (410) 786–8518, for issues related to the comment solicitation on strategies for improving global surgical package valuation.

Larry Chan, (410) 786–6864, for issues related to potentially misvalued services under the PFS.

Kris Corwin, (410) 786–8864, Patrick Sartini, (410) 786–9252, and Larry Chan, (410) 786–6864, for issues related to telehealth services and other services involving communications technology.

Regina Walker-Wren, (410) 786–9160, for issues related to nurse practitioner and clinical nurse specialist certification by the Nurse Portfolio Credentialing Center (NPCC).

Lindsey Baldwin, (410) 786–1694, or *MedicarePhysicianFeeSchedule@cms.hhs.gov,* for issues related to PFS payment for behavioral health services. *MedicarePhysicianFeeSchedule@cms.hhs.gov,* for issues related to PFS payment for evaluation and management services.

Geri Mondowney, (410) 786–1172, Morgan Kitzmiller, (410) 786–1623, Julie Rauch, (410) 786–8932, and Tamika Brock, (312) 886–7904, for issues related to malpractice RVUs and geographic practice cost indices (GPCIs).

MedicarePhysicianFeeSchedule@cms.hhs.gov, for issues related to non-face-to-face nonphysician services/ remote therapeutic monitoring services (RTM).

Zehra Hussain, (214) 767–4463, or *MedicarePhysicianFeeSchedule@cms.hhs.gov,* for issues related to payment of skin substitutes.

Pamela West, (410) 786–2302, for issues related to revisions to regulations to allow audiologists to furnish diagnostic Tests, as appropriate without a physician order.

Emily Forrest, (202) 205–1922, Laura Ashbaugh, (410) 786–1113, and Erick Carrera, (410) 786–8949, for issues related to PFS payment for dental services.

Heidi Oumarou, (410) 786–7942, for issues related to the rebasing and revising of the Medicare Economic Index (MEI).

Laura Kennedy, (410) 786–3377, and Rachel Radzyner, (410) 786–8215, for issues related to requiring manufacturers of certain single-dose container or single-use package drugs payable under Medicare Part B to provide refunds with respect to discarded amounts.

Laura Ashbaugh, (410) 786–1113, and Rasheeda Arthur, (410) 786–3434, for issues related to Clinical Laboratory Fee Schedule.

Lisa Parker, (410) 786–4949, or *FQHC-PPS@cms.hhs.gov,* for issues related to FQHCs.

Michele Franklin, (410) 786–9226, or *RHC@cms.hhs.gov,* for issues related to RHCs.

Daniel Feller, (410) 786–6913, and Elizabeth Truong (410) 786–6005, for issues related to coverage of colorectal cancer screening.

Heather Hostetler, (410) 786–4515, for issues related to removal of selected national coverage determinations.

Lindsey Baldwin, (410) 786–1694, for issues related to Medicare coverage of opioid use disorder treatment services furnished by opioid treatment programs.

Kathleen Johnson, (410) 786–3295, and Sabrina Ahmed, (410) 786–7499, for issues related to the Medicare Shared Savings Program (Shared Savings Program) Quality performance standard and quality reporting requirements.

Sabrina Ahmed, (410) 786–7499, for issues related to the Medicare Shared

Savings Program burden reduction proposal on OHCAs.

Janae James, (410) 786–0801, or Elizabeth November, (410) 786–4518, or *SharedSavingsProgram@cms.hhs.gov,* for issues related to Shared Savings Program beneficiary assignment, and financial methodology.

Naseem Tarmohamed, (410) 786–0814, or *SharedSavingsProgram@cms.hhs.gov,* for inquiries related to Shared Savings Program application, compliance and beneficiary notification requirements.

Rachel Radzyner, (410) 786–8215, and Michelle Cruse, (443) 478–6390, for issues related to vaccine administration services.

Katie Parker, (410) 786–0537, for issues related to medical necessity and documentation requirements for nonemergency, scheduled, repetitive ambulance services.

Frank Whelan, (410) 786–1302, for issues related to Medicare provider enrollment regulation updates (including for skilled nursing facilities), State options for implementing Medicaid provider enrollment affiliation provisions, and conditions of payment for DMEPOS suppliers.

Mei Zhang, (410) 786–7837, and Daniel Standridge, (410) 786–2419, for issues related to requirement for electronic prescribing for controlled substances for a covered Part D drug under a prescription drug plan or an MA–PD plan (section 2003 of the SUPPORT Act).

Amy Gruber, (410) 786–1542, or *AmbulanceDataCollection@cms.hhs.gov,* for issues related to the Medicare Ground Ambulance Data Collection System.

Sundus Ashar, *Sundus.ashar1@cms.hhs.gov,* for issues related to HCPCS Level II Coding for skin substitutes.

Renee O'Neill, (410) 786–8821, or Kati Moore, (410) 786–5471, for inquiries related to Merit-based Incentive Payment System (MIPS).

Richard Jensen, (410) 786–6126, for inquiries related to Alternative Payment Models (APMs).

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

Addenda Available Only Through the internet on the CMS website: The PFS Addenda along with other supporting documents and tables referenced in this proposed rule are available on the CMS website at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/index.html.* Click on the link on the left side of the screen titled, ''PFS Federal Regulations Notices'' for a chronological list of PFS **Federal Register** and other related documents. For the CY 2023 PFS proposed rule, refer to item CMS–1770–P. Readers with questions related to accessing any of the Addenda or other supporting documents referenced in this proposed rule and posted on the CMS website identified above should contact *MedicarePhysicianFeeSchedule@cms.hhs.gov.*

CPT (Current Procedural Terminology) Copyright Notice: Throughout this proposed rule, we use CPT codes and descriptions to refer to a variety of services. Applicable Federal Acquisition Regulations (FAR) and Defense Federal Acquisition Regulations (DFAR) apply.

I. Executive Summary

This major annual rule proposes to revise payment polices under the Medicare PFS and makes other policy changes, including proposals to implement certain provisions of the Protecting Medicare and American Farmers from Sequester Cuts Act (PMAFSCA) (Pub. L. 117–71, December 10, 2021), Infrastructure Investment and Jobs Act (Pub. L. 117–58, November 15, 2021), Consolidated Appropriations Act, 2021 (CAA, 2021) (Pub. L. 116–260, December 27, 2020), Bipartisan Budget Act of 2018 (BBA of 2018) (Pub. L. 115–123, February 9, 2018) and the Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act (the SUPPORT Act) (Pub. L. 115–271, October 24, 2018), related to Medicare Part B payment. In addition, this major proposed rule includes proposals regarding other Medicare payment policies described in sections III. and IV.

B. Summary of the Major Provisions

The statute requires us to establish payments under the PFS, based on national uniform relative value units (RVUs) that account for the relative resources used in furnishing a service. The statute requires that RVUs be established for three categories of resources: work, practice expense (PE), and malpractice (MP) expense. In addition, the statute requires that we establish each year by regulation the payment amounts for physicians' services paid under the PFS, including geographic adjustments to reflect the variations in the costs of furnishing services in different geographic areas.

In this major proposed rule, we are proposing to establish RVUs for CY 2023 for the PFS to ensure that our payment systems are updated to reflect changes in medical practice and the relative value of services, as well as changes in the statute. This proposed rule also includes discussions and provisions regarding several other Medicare Part B payment policies.

Specifically, this proposed rule addresses:

- Determination of PE RVUs (section II.B.)
- Potentially Misvalued Services Under the PFS (section II.C.)
- Payment for Medicare Telehealth Services Under Section 1834(m) of the Act (section II.D.)
- Valuation of Specific Codes (section II.E.)
- Evaluation and Management (E/M) Visits (section II.F.)
- Geographic Practice Cost Indices (GPCI) (section II.G.)
- Determination of Malpractice Relative Value Units (RVUs) (section II.H.)
- Non-Face-to-Face/Remote Therapeutic Monitoring (RTM) Services (section II.I.)
- Payment for Skin Substitutes (section II.J.)
- Proposal to Allow Audiologists to Furnish Certain Diagnostic Tests Without a Physician Order (section II.K.)
- Proposals and Request for Information on Medicare Parts A and B Payment for Dental Services (section II.L.)
- Rebasing and Revising the Medicare Economic Index (MEI) (section II.M.)
- Requiring Manufacturers of Certain Single-dose Container or Single-use Package Drugs to Provide Refunds with Respect to Discarded Amounts (§§ 414.902 and 414.940) (section III.A.)

- Rural Health Clinics (RHCs) and Federally Qualified Health Centers (FQHCs) (section III.B.)
- Clinical Laboratory Fee Schedule: Revised Data Reporting Period and Phase-in of Payment Reductions, and Proposals for Specimen Collection Fees and Travel Allowance for Clinical Diagnostic Laboratory Tests (section III.C.)
- Expansion of Coverage for Colorectal Cancer Screening and Reducing Barriers (section III.D.)
- Removal of Selected National Coverage Determinations (section III.E.)
- Modifications Related to Medicare Coverage for Opioid Use Disorder (OUD) Treatment Services Furnished by Opioid Treatment Programs (OTPs) (section III.F.)
- Medicare Shared Savings Program (section III.G.)
- Medicare Part B Payment for Preventive Vaccine Administration Services (section III.H.)
- Medical Necessity and Documentation Requirements for Nonemergency, Scheduled, Repetitive Ambulance Services (section III.I.)
- Medicare Provider and Supplier Enrollment and Conditions of DMEPOS Payment (section III.J.)
- State Options for Implementing Medicaid Provider Enrollment Affiliation Provision (section III.K.)
- Requirement for Electronic Prescribing for Controlled Substances for a Covered Part D Drug under a Prescription Drug Plan or an MA–PD Plan (section 2003 of the SUPPORT Act) (section III.L.)
- Medicare Ground Ambulance Data Collection System (GADCS) (section III.M.)
- Proposal to Revise HCPCS Level II Coding Procedures for Wound Care Management Products (section III.N.)
- Updates to the Quality Payment Program (section IV.)
- Collection of Information Requirements (section V.)
- Response to Comments (section VI.)
- Regulatory Impact Analysis (section VII.)

3. Summary of Costs and Benefits

We have determined that this proposed rule is economically significant. For a detailed discussion of the economic impacts, see section VII., Regulatory Impact Analysis, of this proposed rule.

B. Determination of PE RVUs

1. Overview

Practice expense (PE) is the portion of the resources used in furnishing a service that reflects the general categories of physician and practitioner expenses, such as office rent and personnel wages, but excluding malpractice (MP) expenses, as specified in section 1848(c)(1)(B) of the Act. As required by section 1848(c)(2)(C)(ii) of the Act, we use a resource-based system for determining PE RVUs for each physicians' service. We develop PE RVUs by considering the direct and indirect practice resources involved in furnishing each service. Direct expense categories include clinical labor, medical supplies, and medical equipment. Indirect expenses include administrative labor, office expense, and all other expenses. The sections that follow provide more detailed information about the methodology for translating the resources involved in furnishing each service into service specific PE RVUs. We refer readers to the CY 2010 Physician Fee Schedule (PFS) final rule with comment period (74 FR 61743 through 61748) for a more detailed explanation of the PE methodology.

2. Practice Expense Methodology

a. Direct Practice Expense

We determine the direct PE for a specific service by adding the costs of the direct resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing that service. The costs of the resources are calculated using the refined direct PE inputs assigned to each CPT code in our PE database, which are generally based on our review of recommendations received from the RUC and those provided in response to public comment periods. For a detailed explanation of the direct PE methodology, including examples, we refer readers to the 5-year review of work RVUs under the PFS and proposed changes to the PE methodology CY 2007 PFS proposed notice (71 FR 37242) and the CY 2007 PFS final rule with comment period (71 FR 69629).

b. Indirect Practice Expense per Hour Data

We use survey data on indirect PEs incurred per hour worked, in developing the indirect portion of the PE RVUs. Prior to CY 2010, we primarily used the PE/HR by specialty that was obtained from the AMA's SMS. The AMA administered a new survey in CY 2007 and CY 2008, the Physician Practice Expense Information Survey (PPIS). The PPIS is a multispecialty, nationally representative, PE survey of both physicians and NPPs paid under the PFS using a survey instrument and methods highly consistent with those used for the SMS and the supplemental surveys. The PPIS gathered information from 3,656 respondents across 51 physician specialty and health care professional groups. We believe the PPIS is the most comprehensive source of PE survey information available. We used the PPIS data to update the PE/HR data for the CY 2010 PFS for almost all of the Medicare recognized specialties that participated in the survey.

When we began using the PPIS data in CY 2010, we did not change the PE RVU methodology itself or the manner in which the PE/HR data are used in that methodology. We only updated the PE/HR data based on the new survey. Furthermore, as we explained in the CY 2010 PFS final rule with comment period (74 FR 61751), because of the magnitude of payment reductions for some specialties resulting from the use of the PPIS data, we transitioned its use over a 4-year period from the previous PE RVUs to the PE RVUs developed using the new PPIS data. As provided in the CY 2010 PFS final rule with comment period (74 FR 61751), the transition to the PPIS data was complete for CY 2013. Therefore, PE RVUs from CY 2013 forward are developed based entirely on the PPIS data, except as noted in this section.

Section 1848(c)(2)(H)(i) of the Act requires us to use the medical oncology supplemental survey data submitted in 2003 for oncology drug administration services. Therefore, the PE/HR for medical oncology, hematology, and hematology/oncology reflects the continued use of these supplemental survey data.

Supplemental survey data on independent labs from the College of American Pathologists were implemented for payments beginning in CY 2005. Supplemental survey data from the National Coalition of Quality Diagnostic Imaging Services (NCQDIS), representing independent diagnostic testing facilities (IDTFs), were blended with supplementary survey data from the American College of Radiology (ACR) and implemented for payments beginning in CY 2007. Neither IDTFs, nor independent labs, participated in the PPIS. Therefore, we continue to use the PE/HR that was developed from their supplemental survey data.

Consistent with our past practice, the previous indirect PE/HR values from the supplemental surveys for these specialties were updated to CY 2006 using the Medicare Economic Index (MEI) to put them on a comparable basis with the PPIS data.

We also do not use the PPIS data for reproductive endocrinology and spine

surgery since these specialties currently are not separately recognized by Medicare, nor do we have a method to blend the PPIS data with Medicare recognized specialty data.

Previously, we established PE/HR values for various specialties without SMS or supplemental survey data by crosswalking them to other similar specialties to estimate a proxy PE/HR. For specialties that were part of the PPIS for which we previously used a crosswalked PE/HR, we instead used the PPIS based PE/HR. We use crosswalks for specialties that did not participate in the PPIS. These crosswalks have been generally established through notice and comment rulemaking and are available in the file titled ''CY 2023 PFS proposed rule PE/HR'' on the CMS website under downloads for the CY 2023 PFS proposed rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html.*

c. Allocation of PE to Services

To establish PE RVUs for specific services, it is necessary to establish the direct and indirect PE associated with each service.

(1) Direct Costs

The relative relationship between the direct cost portions of the PE RVUs for any two services is determined by the relative relationship between the sum of the direct cost resources (that is, the clinical staff, medical supplies, and medical equipment) typically involved with furnishing each of the services. The costs of these resources are calculated from the refined direct PE inputs in our PE database. For example, if one service has a direct cost sum of $400 from our PE database and another service has a direct cost sum of $200, the direct portion of the PE RVUs of the first service would be twice as much as the direct portion of the PE RVUs for the second service.

(2) Indirect Costs

We allocate the indirect costs at the code level based on the direct costs specifically associated with a code and the greater of either the clinical labor costs or the work RVUs. We also incorporate the survey data described earlier in the PE/HR discussion. The general approach to developing the indirect portion of the PE RVUs is as follows:

- For a given service, we use the direct portion of the PE RVUs calculated as previously described and the average percentage that direct costs represent of total costs (based on survey data) across the specialties that furnish the service to determine an initial indirect allocator. That is, the initial indirect allocator is calculated so that the direct costs equal the average percentage of direct costs of those specialties furnishing the service. For example, if the direct portion of the PE RVUs for a given service is 2.00 and direct costs, on average, represent 25 percent of total costs for the specialties that furnish the service, the initial indirect allocator would be calculated so that it equals 75 percent of the total PE RVUs. Thus, in this example, the initial indirect allocator would equal 6.00, resulting in a total PE RVU of 8.00 (2.00 is 25 percent of 8.00 and 6.00 is 75 percent of 8.00).
- Next, we add the greater of the work RVUs or clinical labor portion of the direct portion of the PE RVUs to this initial indirect allocator. In our example, if this service had a work RVU of 4.00 and the clinical labor portion of the direct PE RVU was 1.50, we would add 4.00 (since the 4.00 work RVUs are greater than the 1.50 clinical labor portion) to the initial indirect allocator of 6.00 to get an indirect allocator of 10.00. In the absence of any further use of the survey data, the relative relationship between the indirect cost portions of the PE RVUs for any two services would be determined by the relative relationship between these indirect cost allocators. For example, if one service had an indirect cost allocator of 10.00 and another service had an indirect cost allocator of 5.00, the indirect portion of the PE RVUs of the first service would be twice as great as the indirect portion of the PE RVUs for the second service.
- Then, we incorporate the specialty specific indirect PE/HR data into the calculation. In our example, if, based on the survey data, the average indirect cost of the specialties furnishing the first service with an allocator of 10.00 was half of the average indirect cost of the specialties furnishing the second service with an indirect allocator of 5.00, the indirect portion of the PE RVUs of the first service would be equal to that of the second service.

(3) Facility and Nonfacility Costs

For procedures that can be furnished in a physician's office, as well as in a facility setting, where Medicare makes a separate payment to the facility for its costs in furnishing a service, we establish two PE RVUs: facility and nonfacility. The methodology for calculating PE RVUs is the same for both the facility and nonfacility RVUs, but is applied independently to yield two separate PE RVUs. In calculating the PE RVUs for services furnished in a facility, we do not include resources that would generally not be provided by physicians when furnishing the service. For this reason, the facility PE RVUs are generally lower than the nonfacility PE RVUs.

(4) Services With Technical Components and Professional Components

Diagnostic services are generally comprised of two components: a professional component (PC); and a technical component (TC). The PC and TC may be furnished independently or by different providers, or they may be furnished together as a global service. When services have separately billable PC and TC components, the payment for the global service equals the sum of the payment for the TC and PC. To achieve this, we use a weighted average of the ratio of indirect to direct costs across all the specialties that furnish the global service, TCs, and PCs; that is, we apply the same weighted average indirect percentage factor to allocate indirect expenses to the global service, PCs, and TCs for a service. (The direct PE RVUs for the TC and PC sum to the global.)

(5) PE RVU Methodology

For a more detailed description of the PE RVU methodology, we refer readers to the CY 2010 PFS final rule with comment period (74 FR 61745 through 61746). We also direct readers to the file titled ''Calculation of PE RVUs under Methodology for Selected Codes'' which is available on our website under downloads for the CY 2023 PFS proposed rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html.* This file contains a table that illustrates the calculation of PE RVUs as described in this proposed rule for individual codes.

(a) Setup File

First, we create a setup file for the PE methodology. The setup file contains the direct cost inputs, the utilization for each procedure code at the specialty and facility/nonfacility place of service level, and the specialty specific PE/HR data calculated from the surveys.

(b) Calculate the Direct Cost PE RVUs

Sum the costs of each direct input.

Step 1: Sum the direct costs of the inputs for each service.

Step 2: Calculate the aggregate pool of direct PE costs for the current year. We set the aggregate pool of PE costs equal to the product of the ratio of the current aggregate PE RVUs to current aggregate work RVUs and the projected aggregate work RVUs.

Step 3: Calculate the aggregate pool of direct PE costs for use in ratesetting. This is the product of the aggregate direct costs for all services from Step 1 and the utilization data for that service.

Step 4: Using the results of Step 2 and Step 3, use the CF to calculate a direct PE scaling adjustment to ensure that the aggregate pool of direct PE costs calculated in Step 3 does not vary from the aggregate pool of direct PE costs for the current year. Apply the scaling adjustment to the direct costs for each service (as calculated in Step 1).

Step 5: Convert the results of Step 4 to an RVU scale for each service. To do this, divide the results of Step 4 by the CF. Note that the actual value of the CF used in this calculation does not influence the final direct cost PE RVUs as long as the same CF is used in Step 4 and Step 5. Different CFs would result in different direct PE scaling adjustments, but this has no effect on the final direct cost PE RVUs since changes in the CFs and changes in the associated direct scaling adjustments offset one another.

(c) Create the Indirect Cost PE RVUs

Create indirect allocators.

Step 6: Based on the survey data, calculate direct and indirect PE percentages for each physician specialty.

Step 7: Calculate direct and indirect PE percentages at the service level by taking a weighted average of the results of Step 6 for the specialties that furnish the service. Note that for services with TCs and PCs, the direct and indirect percentages for a given service do not vary by the PC, TC, and global service.

We generally use an average of the 3 most recent years of available Medicare claims data to determine the specialty mix assigned to each code. Codes with low Medicare service volume require special attention since billing or enrollment irregularities for a given year can result in significant changes in specialty mix assignment. We finalized a policy in the CY 2018 PFS final rule (82 FR 52982 through 59283) to use the most recent year of claims data to determine which codes are low volume for the coming year (those that have fewer than 100 allowed services in the Medicare claims data). For codes that fall into this category, instead of assigning specialty mix based on the specialties of the practitioners reporting the services in the claims data, we use the expected specialty that we identify on a list developed based on medical review and input from expert interested parties. We display this list of expected specialty assignments as part of the annual set of data files we make available as part of notice and comment rulemaking and consider recommendations from the RUC and other interested parties on changes to this list on an annual basis. Services for which the specialty is automatically assigned based on previously finalized policies under our established methodology (for example, ''always therapy'' services) are unaffected by the list of expected specialty assignments. We also finalized in the CY 2018 PFS final rule (82 FR 52982 through 52983) a policy to apply these service-level overrides for both PE and MP, rather than one or the other category.

Step 8: Calculate the service level allocators for the indirect PEs based on the percentages calculated in Step 7. The indirect PEs are allocated based on the three components: the direct PE RVUs; the clinical labor PE RVUs; and the work RVUs.

For most services the indirect allocator is: indirect PE percentage * (direct PE RVUs/direct percentage) + work RVUs.

There are two situations where this formula is modified:

- If the service is a global service (that is, a service with global, professional, and technical components), then the indirect PE allocator is: indirect percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs + work RVUs.
- If the clinical labor PE RVUs exceed the work RVUs (and the service is not a global service), then the indirect allocator is: indirect PE percentage (direct PE RVUs/direct percentage) + clinical labor PE RVUs.

(*Note:* For global services, the indirect PE allocator is based on both the work RVUs and the clinical labor PE RVUs. We do this to recognize that, for the PC service, indirect PEs would be allocated using the work RVUs, and for the TC service, indirect PEs would be allocated using the direct PE RVUs and the clinical labor PE RVUs. This also allows the global component RVUs to equal the sum of the PC and TC RVUs.)

For presentation purposes, in the examples in the download file titled ''Calculation of PE RVUs under Methodology for Selected Codes'', the formulas were divided into two parts for each service.

- The first part does not vary by service and is the indirect percentage (direct PE RVUs/direct percentage).
- The second part is either the work RVU, clinical labor PE RVU, or both depending on whether the service is a global service and whether the clinical PE RVUs exceed the work RVUs (as described earlier in this step).

Apply a scaling adjustment to the indirect allocators.

Step 9: Calculate the current aggregate pool of indirect PE RVUs by multiplying the result of step 8 by the average indirect PE percentage from the survey data.

Step 10: Calculate an aggregate pool of indirect PE RVUs for all PFS services by adding the product of the indirect PE allocators for a service from Step 8 and the utilization data for that service.

Step 11: Using the results of Step 9 and Step 10, calculate an indirect PE adjustment so that the aggregate indirect allocation does not exceed the available aggregate indirect PE RVUs and apply it to indirect allocators calculated in Step 8.

Calculate the indirect practice cost index.

Step 12: Using the results of Step 11, calculate aggregate pools of specialty specific adjusted indirect PE allocators for all PFS services for a specialty by adding the product of the adjusted indirect PE allocator for each service and the utilization data for that service.

Step 13: Using the specialty specific indirect PE/HR data, calculate specialty specific aggregate pools of indirect PE for all PFS services for that specialty by adding the product of the indirect PE/HR for the specialty, the work time for the service, and the specialty's utilization for the service across all services furnished by the specialty.

Step 14: Using the results of Step 12 and Step 13, calculate the specialty specific indirect PE scaling factors.

Step 15: Using the results of Step 14, calculate an indirect practice cost index at the specialty level by dividing each specialty specific indirect scaling factor by the average indirect scaling factor for the entire PFS.

Step 16: Calculate the indirect practice cost index at the service level to ensure the capture of all indirect costs. Calculate a weighted average of the practice cost index values for the specialties that furnish the service. (Note: For services with TCs and PCs, we calculate the indirect practice cost index across the global service, PCs, and TCs. Under this method, the indirect practice cost index for a given service (for example, echocardiogram) does not vary by the PC, TC, and global service.)

Step 17: Apply the service level indirect practice cost index calculated in Step 16 to the service level adjusted indirect allocators calculated in Step 11 to get the indirect PE RVUs.

(d) Calculate the Final PE RVUs

Step 18: Add the direct PE RVUs from Step 5 to the indirect PE RVUs from Step 17 and apply the final PE budget

neutrality (BN) adjustment. The final PE BN adjustment is calculated by comparing the sum of steps 5 and 17 to the aggregate work RVUs scaled by the ratio of current aggregate PE and work RVUs. This adjustment ensures that all PE RVUs in the PFS account for the fact that certain specialties are excluded from the calculation of PE RVUs but included in maintaining overall PFS BN. (See ''Specialties excluded from ratesetting calculation'' later in this proposed rule.)

Step 19: Apply the phase-in of significant RVU reductions and its associated adjustment. Section 1848(c)(7) of the Act specifies that for services that are not new or revised codes, if the total RVUs for a service for a year would otherwise be decreased by an estimated 20 percent or more as compared to the total RVUs for the previous year, the applicable adjustments in work, PE, and MP RVUs shall be phased in over a 2-year period. In implementing the phase-in, we consider a 19 percent reduction as the maximum 1-year reduction for any service not described by a new or revised code. This approach limits the year one reduction for the service to the maximum allowed amount (that is, 19 percent), and then phases in the remainder of the reduction. To comply with section 1848(c)(7) of the Act, we adjust the PE RVUs to ensure that the total RVUs for all services that are not new or revised codes decrease by no more than 19 percent, and then apply a relativity adjustment to ensure that the total pool of aggregate PE RVUs remains relative to the pool of work and MP RVUs. For a more detailed description of the methodology for the phase-in of significant RVU changes, we refer readers to the CY 2016 PFS final rule with comment period (80 FR 70927 through 70931).

(e) Setup File Information

- Specialties excluded from ratesetting calculation: For the purposes of calculating the PE and MP RVUs, we exclude certain specialties, such as certain NPPs paid at a percentage of the PFS and low volume specialties, from the calculation. These specialties are included for the purposes of calculating the BN adjustment. They are displayed in Table 1.

BILLING CODE 4120–01–P

TABLE 1: Specialties Excluded from Ratesetting Calculation

Specialty Code	Specialty Description
49	Ambulatory surgical center
50	Nurse practitioner
51	Medical supply company with certified orthotist
52	Medical supply company with certified prosthetist
53	Medical supply company with certified prosthetist-orthotist
54	Medical supply company not included in 51, 52, or 53.
55	Individual certified orthotist
56	Individual certified prosthetist
57	Individual certified prosthetist-orthotist
58	Medical supply company with registered pharmacist
59	Ambulance service supplier, e.g., private ambulance companies, funeral homes, etc.
60	Public health or welfare agencies
61	Voluntary health or charitable agencies
73	Mass immunization roster biller
74	Radiation therapy centers
87	All other suppliers (e.g., drug and department stores)
88	Unknown supplier/provider specialty
89	Certified clinical nurse specialist
96	Optician
97	Physician assistant
A0	Hospital
A1	SNF
A2	Intermediate care nursing facility
A3	Nursing facility, other
A4	HHA
A5	Pharmacy
A6	Medical supply company with respiratory therapist
A7	Department store
A8	Grocery store
B1	Supplier of oxygen and/or oxygen related equipment (eff. 10/2/2007)
B2	Pedorthic personnel
B3	Medical supply company with pedorthic personnel
B4	Rehabilitation Agency
B5	Ocularist
C1	Centralized Flu
C2	Indirect Payment Procedure
C5	Dentistry

BILLING CODE 4120–01–C

- Crosswalk certain low volume physician specialties: Crosswalk the utilization of certain specialties with relatively low PFS utilization to the associated specialties.
- Physical therapy utilization: Crosswalk the utilization associated with all physical therapy services to the specialty of physical therapy.
- Identify professional and technical services not identified under the usual TC and 26 modifiers: Flag the services that are PC and TC services but do not use TC and 26 modifiers (for example, electrocardiograms). This flag associates the PC and TC with the associated global code for use in creating the indirect PE RVUs. For example, the professional service, CPT code 93010 (Electrocardiogram, routine ECG with at least 12 leads; interpretation and report only), is associated with the global service, CPT code 93000 (Electrocardiogram, routine ECG with at least 12 leads; with interpretation and report).
- Payment modifiers: Payment modifiers are accounted for in the creation of the file consistent with current payment policy as implemented in claims processing. For example, services billed with the assistant at surgery modifier are paid 16 percent of the PFS amount for that service; therefore, the utilization file is modified to only account for 16 percent of any service that contains the assistant at surgery modifier. Similarly, for those services to which volume adjustments are made to account for the payment modifiers, time adjustments are applied as well. For time adjustments to surgical services, the intraoperative portion in the work time file is used; where it is not present, the intraoperative percentage from the payment files used by contractors to process Medicare claims is used instead. Where neither is available, we use the payment adjustment ratio to adjust the time

accordingly. Table 2 details the manner in which the modifiers are applied.

TABLE 2: Application of Payment Modifiers to Utilization Files

Modifier	Description	Volume Adjustment	Time Adjustment
80,81,82	Assistant at Surgery	16%	Intraoperative portion
AS	Assistant at Surgery – Physician Assistant	14% (85% * 16%)	Intraoperative portion
50 or LT and RT	Bilateral Surgery	150%	150% of work time
51	Multiple Procedure	50%	Intraoperative portion
52	Reduced Services	50%	50%
53	Discontinued Procedure	50%	50%
54	Intraoperative Care only	Preoperative + Intraoperative Percentages on the payment files used by Medicare contractors to process Medicare claims	Preoperative + Intraoperative portion
55	Postoperative Care only	Postoperative Percentage on the payment files used by Medicare contractors to process Medicare claims	Postoperative portion
62	Co-surgeons	62.5%	50%
66	Team Surgeons	33%	33%
CO, CQ	Physical and Occupational Therapy Assistant Services	88%	88%

We also adjust volume and time that correspond to other payment rules, including special multiple procedure endoscopy rules and multiple procedure payment reductions (MPPRs). We note that section 1848(c)(2)(B)(v) of the Act exempts certain reduced payments for multiple imaging procedures and multiple therapy services from the BN calculation under section 1848(c)(2)(B)(ii)(II) of the Act. These MPPRs are not included in the development of the RVUs.

Beginning in CY 2022, section 1834(v)(1) of the Act required that we apply a 15 percent payment reduction for outpatient occupational therapy services and outpatient physical therapy services that are provided, in whole or in part, by a physical therapist assistant (PTA) or occupational therapy assistant (OTA). Section 1834(v)(2)(A) of the Act required CMS to establish modifiers to identify these services, which we did in the CY 2019 PFS final rule (83 FR 59654 through 59661), creating the CQ and CO payment modifiers for services provided in whole or in part by PTAs and OTAs, respectively. These payment modifiers are required to be used on claims for services with dates of service beginning January 1, 2020, as specified in the CY 2020 PFS final rule (84 FR 62702 through 62708). We applied the 15 percent payment reduction to therapy services provided by PTAs (using the CQ modifier) or OTAs (using the CO modifier), as required by statute. Under sections 1834(k) and 1848 of the Act, payment is made for outpatient therapy services at 80 percent of the lesser of the actual charge or applicable fee schedule amount (the allowed charge). The remaining 20 percent is the beneficiary copayment. For therapy services to which the new discount applies, payment will be made at 85 percent of the 80 percent of allowed charges. Therefore, the volume discount factor for therapy services to which the CQ and CO modifiers apply is: (0.20 + (0.80* 0.85), which equals 88 percent.

For anesthesia services, we do not apply adjustments to volume since we use the average allowed charge when simulating RVUs; therefore, the RVUs as calculated already reflect the payments as adjusted by modifiers, and no volume adjustments are necessary. However, a time adjustment of 33 percent is made only for medical direction of two to four cases since that is the only situation where a single practitioner is involved with multiple beneficiaries concurrently, so that counting each service without regard to the overlap with other services would overstate the amount of time spent by the practitioner furnishing these services.

- Work RVUs: The setup file contains the work RVUs from this proposed rule.

(6) Equipment Cost per Minute

The equipment cost per minute is calculated as:

(1/(minutes per year * usage)) * price * ((interest rate/(1 (1/((1 + interest rate)^ life of equipment)))) + maintenance)

Where:

minutes per year = maximum minutes per year if usage were continuous (that is, usage=1); generally, 150,000 minutes.
usage = variable, see discussion below in this proposed rule.
price = price of the particular piece of equipment.
life of equipment = useful life of the particular piece of equipment.
maintenance = factor for maintenance; 0.05.
interest rate = variable, see discussion below in this final rule.

Usage: We currently use an equipment utilization rate assumption of 50 percent for most equipment, with the exception of expensive diagnostic imaging equipment, for which we use a 90 percent assumption as required by section 1848(b)(4)(C) of the Act.

Useful Life: In the CY 2005 PFS final rule we stated that we updated the useful life for equipment items primarily based on the AHA's ''Estimated Useful Lives of Depreciable Hospital Assets'' guidelines (69 FR 66246). The most recent edition of these guidelines was published in 2018. This reference material provides an estimated useful life for hundreds of different

types of equipment, the vast majority of which fall in the range of 5 to 10 years, and none of which are lower than 2 years in duration. We believe that the updated editions of this reference material remain the most accurate source for estimating the useful life of depreciable medical equipment.

In the CY 2021 PFS final rule, we finalized a proposal to treat equipment life durations of less than 1 year as having a duration of 1 year for the purpose of our equipment price per minute formula. In the rare cases where items are replaced every few months, we noted that we believe it is more accurate to treat these items as disposable supplies with a fractional supply quantity as opposed to equipment items with very short equipment life durations. For a more detailed discussion of the methodology associated with very short equipment life durations, we refer readers to the CY 2021 PFS final rule (85 FR 84482 through 84483).

- *Maintenance:* We finalized the 5 percent factor for annual maintenance in the CY 1998 PFS final rule with comment period (62 FR 33164). As we previously stated in the CY 2016 PFS final rule with comment period (80 FR 70897), we do not believe the annual maintenance factor for all equipment is precisely 5 percent, and we concur that the current rate likely understates the true cost of maintaining some equipment. We also noted that we believe it likely overstates the maintenance costs for other equipment. When we solicited comments regarding sources of data containing equipment maintenance rates, commenters were unable to identify an auditable, robust data source that could be used by CMS on a wide scale. We noted that we did not believe voluntary submissions regarding the maintenance costs of individual equipment items would be an appropriate methodology for determining costs. As a result, in the absence of publicly available datasets regarding equipment maintenance costs or another systematic data collection methodology for determining a different maintenance factor, we did not propose a variable maintenance factor for equipment cost per minute pricing as we did not believe that we have sufficient information at present. We noted that we would continue to investigate potential avenues for determining equipment maintenance costs across a broad range of equipment items.
- *Interest Rate:* In the CY 2013 PFS final rule with comment period (77 FR 68902), we updated the interest rates used in developing an equipment cost per minute calculation (see 77 FR 68902 for a thorough discussion of this issue). The interest rate was based on the Small Business Administration (SBA) maximum interest rates for different categories of loan size (equipment cost) and maturity (useful life). The Interest rates are listed in Table 3.

TABLE 3: SBA Maximum Interest Rates

Price	Useful Life	Interest Rate
<$25K	<7 Years	7.50%
$25K to $50K	<7 Years	6.50%
>$50K	<7 Years	5.50%
<$25K	7+ Years	8.00%
$25K to $50K	7+ Years	7.00%
>$50K	7+ Years	6.00%

We are not proposing any changes to the equipment interest rates for CY 2023.

3. Adjusting RVUs To Match PE Share of the Medicare Economic Index (MEI)

For CY 2023, as explained in detail in section II.M. of this proposed rule, we are proposing to rebase and revise the Medicare Economic Index (MEI) to reflect more current market conditions faced by physicians in furnishing physicians' services. The MEI is an index that measures changes in the market price of the inputs used to furnish physician services. This index measure was authorized by statute and is developed by the CMS Office of the Actuary. We believe that the MEI is the best measure available of the relative weights of the three components in payments under the PFS—work, PE and malpractice. Accordingly, we believe that to assure that the PFS payments reflect the relative resources in each of these components as required by section 1848(c)(3) of the Act, the RVUs used in developing rates should reflect the same weights in each component as the MEI. In the past, we have proposed (and subsequently, finalized) to accomplish this by holding the work RVUs constant and adjusting the PE RVUs, the MP RVUs and the CF to produce the appropriate balance in RVUs among the PFS components and payment rates for individual services. The most recent adjustments to reflect changes in the MEI weights were made for the CY 2014 RVUs, when the MEI was last updated. In the CY 2014 PFS proposed rule (78 FR 43287 through 43288) and final rule (78 FR 74236 through 74237), we detailed the steps necessary to accomplish this result (see steps 3, 10, and 18). The CY 2014 proposed and finalized adjustments were consistent with our longstanding practice to make adjustments to match the RVUs for the PFS components with the MEI cost share weights for the components, including the adjustments described in the CY 1999 PFS final rule (63 FR 58829), CY 2004 PFS final rule (68 FR 63246 and 63247), and CY 2011 PFS final rule (75 FR 73275).

In the past when we have proposed a rebasing and/or revision of the MEI, as we do in section II.M. of this proposed rule, we typically have also proposed to modify steps 3 and 10 to adjust the aggregate pools of PE costs (direct PE in step 3 and indirect PE in step 10) in proportion to the change in the PE share in the rebased and revised MEI cost share weights, as previously described in the CY 2014 PFS final rule (78 FR 74236 and 74237), and to recalibrate the relativity adjustment that we apply in step 18 as described in the CY 2014 PFS final rule. Instead, we are proposing to delay the adjustments to the PE pools in steps 3 and 10 and the recalibration of the relativity adjustment in step 18 until the public has an opportunity to comment on the proposed rebased and revised MEI, as discussed in section II.M. of this proposed rule. Because there are significant proposed methodological and data source changes to the MEI for CY 2023 and significant time has elapsed since the last rebasing and revision of the MEI, we believe it is important to allow public comment and

finalization of the proposed MEI changes based on the review of public comment before we incorporate the updated MEI into PFS ratesetting, and we believe this is consistent with our efforts to balance payment stability and predictability with incorporating new data through more routine updates. We refer readers to the comment solicitation in section II.B. of this proposed rule, where we discuss our ongoing efforts to update data inputs for PE to aid stability, transparency, efficiency, and data adequacy. Similarly, we are delaying the implementation of the proposed rebased and revised MEI for use in the PE geographic practice cost index (GPCI) and soliciting comment on appropriate timing for implementation for potential future rulemaking, discussed in detail in section II.G. and section VII. of this proposed rule.

In light of the proposed delay in using the proposed update to the MEI to make the adjustments to the PE pools in steps 3 and 10 and the relativity adjustment in step 18, we are soliciting comment on when and how to best incorporate the proposed rebased and revised MEI discussed in section II.M. of this proposed rule into PFS ratesetting, and whether it would be appropriate to consider a transition to full implementation for potential future rulemaking. In section VII. of this proposed rule, we present the impacts of implementing the proposed rebased and revised MEI in PFS ratesetting through a 4-year transition and through full immediate implementation, that is, with no transition period. Given the significance of the impacts that result from a full implementation and the interaction with other CY 2023 proposals, we did not consider proposing to fully implement a rebased and revised MEI in PFS ratesetting for CY 2023. We are seeking comment on other implementation strategies for potential future rulemaking that are not outlined in section VII. of this proposed rule.

4. Changes to Direct PE Inputs for Specific Services

This section focuses on specific PE inputs. The direct PE inputs are included in the CY 2023 direct PE input public use files, which are available on the CMS website under downloads for the CY 2023 PFS proposed rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html.*

a. Standardization of Clinical Labor Tasks

As we noted in the CY 2015 PFS final rule with comment period (79 FR 67640 through 67641), we continue to make improvements to the direct PE input database to provide the number of clinical labor minutes assigned for each task for every code in the database instead of only including the number of clinical labor minutes for the preservice, service, and post service periods for each code. In addition to increasing the transparency of the information used to set PE RVUs, this level of detail would allow us to compare clinical labor times for activities associated with services across the PFS, which we believe is important to maintaining the relativity of the direct PE inputs. This information would facilitate the identification of the usual numbers of minutes for clinical labor tasks and the identification of exceptions to the usual values. It would also allow for greater transparency and consistency in the assignment of equipment minutes based on clinical labor times. Finally, we believe that the detailed information can be useful in maintaining standard times for particular clinical labor tasks that can be applied consistently to many codes as they are valued over several years, similar in principle to the use of physician preservice time packages. We believe that setting and maintaining such standards would provide greater consistency among codes that share the same clinical labor tasks and could improve relativity of values among codes. For example, as medical practice and technologies change over time, changes in the standards could be updated simultaneously for all codes with the applicable clinical labor tasks, instead of waiting for individual codes to be reviewed.

In the CY 2016 PFS final rule with comment period (80 FR 70901), we solicited comments on the appropriate standard minutes for the clinical labor tasks associated with services that use digital technology. After consideration of comments received, we finalized standard times for clinical labor tasks associated with digital imaging at 2 minutes for ''Availability of prior images confirmed'', 2 minutes for ''Patient clinical information and questionnaire reviewed by technologist, order from physician confirmed and exam protocoled by radiologist'', 2 minutes for ''Review examination with interpreting MD'', and 1 minute for ''Exam documents scanned into PACS'' and ''Exam completed in RIS system to generate billing process and to populate images into Radiologist work queue.'' In the CY 2017 PFS final rule (81 FR 80184 through 80186), we finalized a policy to establish a range of appropriate standard minutes for the clinical labor activity, ''Technologist QCs images in PACS, checking for all images, reformats, and dose page.'' These standard minutes will be applied to new and revised codes that make use of this clinical labor activity when they are reviewed by us for valuation. We finalized a policy to establish 2 minutes as the standard for the simple case, 3 minutes as the standard for the intermediate case, 4 minutes as the standard for the complex case, and 5 minutes as the standard for the highly complex case. These values were based upon a review of the existing minutes assigned for this clinical labor activity; we determined that 2 minutes is the duration for most services and a small number of codes with more complex forms of digital imaging have higher values. We also finalized standard times for a series of clinical labor tasks associated with pathology services in the CY 2016 PFS final rule with comment period (80 FR 70902). We do not believe these activities would be dependent on number of blocks or batch size, and we believe that the finalized standard values accurately reflect the typical time it takes to perform these clinical labor tasks.

In reviewing the RUC-recommended direct PE inputs for CY 2019, we noticed that the 3 minutes of clinical labor time traditionally assigned to the ''Prepare room, equipment and supplies'' (CA013) clinical labor activity were split into 2 minutes for the ''Prepare room, equipment and supplies'' activity and 1 minute for the ''Confirm order, protocol exam'' (CA014) activity. We proposed to maintain the 3 minutes of clinical labor time for the ''Prepare room, equipment and supplies'' activity and remove the clinical labor time for the ''Confirm order, protocol exam'' activity wherever we observed this pattern in the RUC-recommended direct PE inputs. Commenters explained in response that when the new version of the PE worksheet introduced the activity codes for clinical labor, there was a need to translate old clinical labor tasks into the new activity codes, and that a prior clinical labor task was split into two of the new clinical labor activity codes: CA007 (*Review patient clinical extant information and questionnaire*) in the preservice period, and CA014 (*Confirm order, protocol exam*) in the service period. Commenters stated that the same clinical labor from the old PE worksheet was now divided into the

CA007 and CA014 activity codes, with a standard of 1 minute for each activity. We agreed with commenters that we would finalize the RUC-recommended 2 minutes of clinical labor time for the CA007 activity code and 1 minute for the CA014 activity code in situations where this was the case. However, when reviewing the clinical labor for the reviewed codes affected by this issue, we found that several of the codes did not include this old clinical labor task, and we also noted that several of the reviewed codes that contained the CA014 clinical labor activity code did not contain any clinical labor for the CA007 activity. In these situations, we continue to believe that in these cases, the 3 total minutes of clinical staff time would be more accurately described by the CA013 ''Prepare room, equipment and supplies'' activity code, and we finalized these clinical labor refinements. For additional details, we direct readers to the discussion in the CY 2019 PFS final rule (83 FR 59463 and 59464).

Following the publication of the CY 2020 PFS proposed rule, one commenter expressed concern with the published list of common refinements to equipment time. The commenter stated that these refinements were the formulaic result of the applying refinements to the clinical labor time and did not constitute separate refinements; the commenter requested that CMS no longer include these refinements in the table published each year. In the CY 2020 PFS final rule, we agreed with the commenter that these equipment time refinements did not reflect errors in the equipment recommendations or policy discrepancies with the RUC's equipment time recommendations. However, we believed that it was important to publish the specific equipment times that we were proposing (or finalizing in the case of the final rule) when they differed from the recommended values due to the effect that these changes can have on the direct costs associated with equipment time. Therefore, we finalized the separation of the equipment time refinements associated with changes in clinical labor into a separate table of refinements. For additional details, we direct readers to the discussion in the CY 2020 PFS final rule (84 FR 62584).

Historically, the RUC has submitted a ''PE worksheet'' that details the recommended direct PE inputs for our use in developing PE RVUs. The format of the PE worksheet has varied over time and among the medical specialties developing the recommendations. These variations have made it difficult for both the RUC's development and our review of code values for individual codes. Beginning with its recommendations for CY 2019, the RUC has mandated the use of a new PE worksheet for purposes of their recommendation development process that standardizes the clinical labor tasks and assigns them a clinical labor activity code. We believe the RUC's use of the new PE worksheet in developing and submitting recommendations will help us to simplify and standardize the hundreds of different clinical labor tasks currently listed in our direct PE database. As we did in previous calendar years, to facilitate rulemaking for CY 2023, we are continuing to display two versions of the Labor Task Detail public use file: one version with the old listing of clinical labor tasks, and one with the same tasks crosswalked to the new listing of clinical labor activity codes. These lists are available on the CMS website under downloads for the CY 2023 PFS proposed rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html.*

b. Updates to Prices for Existing Direct PE Inputs

In the CY 2011 PFS final rule with comment period (75 FR 73205), we finalized a process to act on public requests to update equipment and supply price and equipment useful life inputs through annual rulemaking, beginning with the CY 2012 PFS proposed rule. Beginning in CY 2019 and continuing through CY 2022, we conducted a market-based supply and equipment pricing update, using information developed by our contractor, StrategyGen, which updated pricing recommendations for approximately 1300 supplies and 750 equipment items currently used as direct PE inputs. Given the potentially significant changes in payment that would occur, in the CY 2019 PFS final rule we finalized a policy to phase in our use of the new direct PE input pricing over a 4-year period using a 25/75 percent (CY 2019), 50/50 percent (CY 2020), 75/25 percent (CY 2021), and 100/0 percent (CY 2022) split between new and old pricing. We believed that implementing the proposed updated prices with a 4-year phase-in would improve payment accuracy, while maintaining stability and allowing interested parties the opportunity to address potential concerns about changes in payment for particular items. This 4-year transition period to update supply and equipment pricing concluded in CY 2022; for a more detailed discussion, we refer readers to the CY 2019 PFS final rule with comment period (83 FR 59473 through 59480).

For CY 2023, we are proposing to update the price of eight supplies and two equipment items in response to the public submission of invoices following the publication of the CY 2022 PFS final rule. The eight supply and equipment items with proposed updated prices are listed in the valuation of specific codes section of the preamble under Table 15, CY 2023 Invoices Received for Existing Direct PE Inputs.

We are not proposing to update the price of another eight supplies and two equipment items which were the subject of public submission of invoices. Our rationale for not updating these prices is detailed below:

- Acetic acid 5% (SH001): We received an invoice submission for an increase in price from 3 cents per ml to 9.5 cents per ml for the SH001 supply. However, the invoice stated that this price was for an ''Alcian Blue 1% in 3% Acetic Acid pH 2.5'' supply and it is not clear that this represents the same supply as the ''Acetic acid 5%'' described by the SH001 supply item. We also do not believe that the typical price for this supply has increased 200 percent in the 3 years since StrategyGen researched its pricing, especially given that the price for the SH001 supply previously increased from 1.2 cents in CY 2019 to its current price of 3 cents for CY 2022.
- Cytology, lysing soln (CytoLyt) (SL039): We received an invoice submission for an increase in price from 6 cents per ml to 80 cents per ml for the SL039 supply. We do not believe that the typical price for this supply has increased 1200% in the 3 years since StrategyGen researched its pricing, especially given that the price for the SL039 supply previously increased from 3.4 cents in CY 2019 to its current price of 6 cents for CY 2022.
- Fixative (for tissue specimen) (SL068): We received an invoice submission for an increase in price from 1.3 cents per ml to $4.87 for the SL068 supply. We believe that this was the result of confusion on the part of the interested party regarding the unit quantity for the SL068 supply. This item is paid on a per ml basis and not a per unit basis; there was not enough information on the submitted invoice to determine the price for the SL068 supply on a per ml basis.
- Ethanol, 100% (SL189): We received an invoice submission for an increase in price from 0.33 cents per ml to 1.2 cents per ml for the SL189 supply. However, we noted that the invoice was

based on the price for a single gallon of 100% ethanol which is typically sold in much larger quantities than a single gallon. We found that 100% ethanol was readily available for sale online in larger unit sizes and the current price of 0.33 cents per ml (based on the past StrategyGen market research) appears to be accurate based on online bulk pricing. We also found that the submitted invoices for the ethanol, 70% (SL190), ethanol, 95% (SL248), and stain, PAP OG–6 (SL491) supplies were also based on pricing for a single gallon. Each of these supply items was also available for purchase in larger unit quantities which indicated that the current pricing remained typical for these supplies. Therefore, we are not proposing to update the prices for the SL189, SL190, SL248 or SL491 supply, as we do not believe that the higher prices paid for smaller quantities of these supplies would be typical.

- Biohazard specimen transport bag (SM008): We received an invoice submission for an increase in price from 8 cents to 45 cents for the SM008 supply. However, it is not clear that the item described on the invoice is the same item as the SM008 supply. The invoice states only that the price is for ''Supplied Case Red Bags'' which was not enough information to determine if this would be typical for the SM008 supply. We also do not believe that the typical price for this supply has increased 460 percent in the 3 years since StrategyGen researched its pricing, especially given that the price for the SM008 supply previously increased from 3.5 cents in CY 2019 to its current price of 8 cents for CY 2022.
- International Normalized Ratio (INR) analysis and reporting system w-software (EQ312): We did not receive an invoice for this equipment item, only a letter stating that the cost of the EQ312 equipment should be increased from the current price of $19,325 to $1,600,000. We previously finalized a policy in the CY 2011 PFS final rule (75 FR 73205) to update supply and equipment prices through an invoice submission process. We require pricing data indicative of the typical market price of the supply or equipment item in question to update the price. It is not sufficient to state a different price without providing information to support this new valuation. Since we did not receive an invoice to support the higher costs asserted in the letter, we are not proposing a new price for the EQ312 equipment item. Interested parties are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking process, via email at *PE_Price_Input_Update@cms.hhs.gov.* We also note that in order to be considered a direct PE input, an equipment item must be individually allocable to a particular patient for a particular service. Costs associated with the implementation, maintenance, and upgrade of equipment that is not individually allocable to a particular patient for a particular service, or other costs associated with running a practice, would typically be classified as forms of indirect PE under our methodology.

The same interested parties that addressed the pricing of the EQ312 equipment item questioned the assignment of the General Practice specialty crosswalk for indirect PE for home Prothrombin Time (PT)/INR monitoring services. These individuals stated that the predominant code used for PT/INR monitoring (HCPCS code G0249) will be significantly and negatively impacted by the continuing implementation over a 4-year period of changes in the clinical labor rates finalized in the CY 2022 PFS final rule (86 FR 65024). The individuals requested that CMS change the crosswalk for home PT/INR monitoring services to All Physicians or Pathology which would partially offset the reduction that HCPCS code G0249 is facing due to changes in the clinical labor rates.

We note for these interested parties that we finalized a crosswalk to the General Practice specialty for home PT/INR monitoring services (HCPCS codes G0248, G0249, and G0250) in the CY 2021 PFS final rule (85 FR 84477 and 84478). The data submitted by the commenters at the time indicated that the direct-to-indirect cost percentages to furnish home PT/INR monitoring are in the range of 31:69, similar to the ratio associated with the General Practice specialty. We disagree, as we did in response to comments in the CY 2021 PFS final rule, that these home PT/INR monitoring services should be reassigned to a different specialty that is less reflective of the cost structure for these services to offset reductions in payment for the services that result from an unrelated policy proposal (the clinical labor pricing update). We also note that we have not received any new information about PT/INR monitoring services since CY 2021 to indicate that All Physicians or Pathology would be more accurate choices for use in indirect PE allocation but are open to receiving new relevant information that CMS could consider in future rulemaking. As such, we are not proposing to change the assigned specialty for PT/INR services; we direct interested parties to the previous discussion of this topic in the CY 2021 PFS final rule (85 FR 84477 and 84478) and again in the CY 2022 PFS final rule (86 FR 65000). Interested parties are encouraged to submit new information to support the most accurate specialty choice to use in indirect PE allocation for PT/INR monitoring services distinct from what has previously been reviewed during the last two rule cycles.

- Remote musculoskeletal therapy system (EQ402): We received an invoice submission for a price of $1,000 for the EQ402 equipment item. Since this equipment already has a price of $1,000 we are not proposing to make any changes in the pricing; we thank the interested party for their invoice submission confirming the current price.

(1) Invoice Submission

We routinely accept public submission of invoices as part of our process for developing payment rates for new, revised, and potentially misvalued codes. Often these invoices are submitted in conjunction with the RUC-recommended values for the codes. To be included in a given year's proposed rule, we generally need to receive invoices by the same February 10th deadline we noted for consideration of RUC recommendations. However, we will consider invoices submitted as public comments during the comment period following the publication of the PFS proposed rule, and would consider any invoices received after February 10th or outside of the public comment process as part of our established annual process for requests to update supply and equipment prices. Interested parties are encouraged to submit invoices with their public comments or, if outside the notice and comment rulemaking process, via email at *PE_Price_Input_Update@cms.hhs.gov.*

c. Clinical Labor Pricing Update

Section 220(a) of the PAMA provides that the Secretary may collect or obtain information from any eligible professional or any other source on the resources directly or indirectly related to furnishing services for which payment is made under the PFS, and that such information may be used in the determination of relative values for services under the PFS. Such information may include the time involved in furnishing services; the amounts, types and prices of PE inputs; overhead and accounting information for practices of physicians and other suppliers, and any other elements that would improve the valuation of services under the PFS.

Beginning in CY 2019, we updated the supply and equipment prices used for PE as part of a market-based pricing transition; CY 2022 was the final year of this 4-year transition. We initiated a market research contract with StrategyGen to conduct an in-depth and robust market research study to update the supply and equipment pricing for CY 2019, and we finalized a policy in CY 2019 to phase in the new pricing over a period of 4 years. However, we did not propose to update the clinical labor pricing, and the pricing for clinical labor has remained unchanged during this pricing transition. Clinical labor rates were last updated for CY 2002 using Bureau of Labor Statistics (BLS) data and other supplementary sources where BLS data were not available; we refer readers to the full discussion in the CY 2002 PFS final rule for additional details (66 FR 55257 through 55262).

Interested parties raised concerns that the long delay since clinical labor pricing was last updated created a significant disparity between CMS' clinical wage data and the market average for clinical labor. In recent years, a number of interested parties suggested that certain wage rates were inadequate because they did not reflect current labor rate information. Some interested parties also stated that updating the supply and equipment pricing without updating the clinical labor pricing could create distortions in the allocation of direct PE. They argued that since the pool of aggregated direct PE inputs is budget neutral, if these rates are not routinely updated, clinical labor may become undervalued over time relative to equipment and supplies, especially since the supply and equipment prices are in the process of being updated. There was considerable interest among interested parties in updating the clinical labor rates, and when we solicited comment on this topic in past rules, such as in the CY 2019 PFS final rule (83 FR 59480), interested parties supported the idea.

Therefore, we proposed to update the clinical labor pricing for CY 2022, in conjunction with the final year of the supply and equipment pricing update (86 FR 39118 through 39123). We believed it was important to update the clinical labor pricing to maintain relativity with the recent supply and equipment pricing updates. We proposed to use the methodology outlined in the CY 2002 PFS final rule (66 FR 55257), which draws primarily from BLS wage data, to calculate updated clinical labor pricing. As we stated in the CY 2002 PFS final rule, the BLS' reputation for publishing valid estimates that are nationally representative led to the choice to use the BLS data as the main source. We believe that the BLS wage data continues to be the most accurate source to use as a basis for clinical labor pricing and this data will appropriately reflect changes in clinical labor resource inputs for purposes of setting PE RVUs under the PFS. We used the most current BLS survey data (2019) as the main source of wage data for our CY 2022 clinical labor proposal.

We recognized that the BLS survey of wage data does not cover all the staff types contained in our direct PE database. Therefore, we crosswalked or extrapolated the wages for several staff types using supplementary data sources for verification whenever possible. In situations where the price wages of clinical labor types were not referenced in the BLS data, we used the national salary data from the Salary Expert, an online project of the Economic Research Institute that surveys national and local salary ranges and averages for thousands of job titles using mainly government sources. (A detailed explanation of the methodology used by Salary Expert to estimate specific job salaries can be found at *www.salaryexpert.com*). We previously used Salary Expert information as the primary backup source of wage data during the last update of clinical labor pricing in CY 2002. If we did not have direct BLS wage data available for a clinical labor type, we used the wage data from Salary Expert as a reference for pricing, then crosswalked these clinical labor types to a proxy BLS labor category rate that most closely matched the reference wage data, similar to the crosswalks used in our PE/HR allocation. For example, there is no direct BLS wage data for the Mammography Technologist (L043) clinical labor type; we used the wage data from Salary Expert as a reference and identified the BLS wage data for Respiratory Therapists as the best proxy category. We calculated rates for the ''blend'' clinical labor categories by combining the rates for each labor type in the blend and then dividing by the total number of labor types in the blend.

As in the CY 2002 clinical labor pricing update, the proposed cost per minute for each clinical staff type was derived by dividing the average hourly wage rate by 60 to arrive at the per minute cost. In cases where an hourly wage rate was not available for a clinical staff type, the proposed cost per minute for the clinical staff type was derived by dividing the annual salary (converted to 2021 dollars using the Medicare Economic Index) by 2080 (the number of hours in a typical work year) to arrive at the hourly wage rate and then again by 60 to arrive at the per minute cost. We ultimately finalized the use of median BLS wage data, as opposed to mean BLS wage data, in response to comments in the CY 2022 PFS final rule. To account for the employers' cost of providing fringe benefits, such as sick leave, we finalized the use of a benefits multiplier of 1.296 based on a BLS release from June 17, 2021 (USDL–21–1094). As an example of this process, for the Physical Therapy Aide (L023A) clinical labor type, the BLS data reflected a median hourly wage rate of $12.98, which we multiplied by the 1.296 benefits modifier and then divided by 60 minutes to arrive at the finalized per-minute rate of $0.28.

After considering the comments on our CY 2022 proposals, we agreed with commenters that the use of a multi-year transition would help smooth out the changes in payment resulting from the clinical labor pricing update, avoiding potentially disruptive changes in payment for affected interested parties, and promoting payment stability from year-to-year. We believed it would be appropriate to use a 4-year transition, as we have for several other broad-based updates or methodological changes. While we recognized that using a 4-year transition to implement the update means that we will continue to rely in part on outdated data for clinical labor pricing until the change is fully completed in CY 2025, we agreed with the commenters that these significant updates to PE valuation should be implemented in the same way, and for the same reasons, as for other major updates to pricing such as the recent supply and equipment update. Therefore, we finalized the implementation of the clinical labor pricing update over 4 years to transition from current prices to the final updated prices in CY 2025. We finalized the implementation of this pricing transition over 4 years, such that one quarter of the difference between the current price and the fully phased-in price is implemented for CY 2022, one third of the difference between the CY 2022 price and the final price is implemented for CY 2023, and one half of the difference between the CY 2023 price and the final price is implemented for CY 2024, with the new direct PE prices fully implemented for CY 2025. An example of the transition from the current to the fully-implemented new pricing that we finalized in the CY 2022 PFS final rule is provided in Table 4.

BILLING CODE 4120–01–P

TABLE 4: Example of Clinical Labor Pricing Transition

Current Price	$1.00	
Final Price	$2.00	
Year 1 (CY 2022) Price	$1.25	1/4 difference between $1.00 and $2.00
Year 2 (CY 2023) Price	$1.50	1/3 difference between $1.25 and $2.00
Year 3 (CY 2024) Price	$1.75	1/2 difference between $1.50 and $2.00
Final (CY 2025) Price	$2.00	

(1) CY 2023 Clinical Labor Pricing Update Proposals

For CY 2023, we received information from one interested party regarding the pricing of the Histotechnologist (L037B) clinical labor type. The interested party provided data from the 2019 Wage Survey of Medical Laboratories which supported an increase in the per-minute rate from the $0.55 finalized in the CY 2022 PFS final rule to $0.64. This rate of $0.64 for the L037B clinical labor type is a close match to the online salary data that we had for the Histotechnologist and matches the $0.64 rate that we initially proposed for L037B in the CY 2022 PFS proposed rule. Based on the wage data provided by the commenter, we are proposing this $0.64 rate for the L037B clinical labor type for CY 2023; we are also proposing a slight increase in the pricing for the Lab Tech/Histotechnologist (L035A) clinical labor type from $0.55 to $0.60 as it is a blend of the wage rate for the Lab Technician (L033A) and Histotechnologist clinical labor types. We are also proposing the same increase to $0.60 for the Angio Technician (L041A) clinical labor type, as we previously established a policy in the CY 2022 PFS final rule that the pricing for the L041A clinical labor type would match the rate for the L035A clinical labor type (86 FR 65032). The proposed pricing increase for these three clinical labor types is included in Table 5; the CY 2023 pricing for all other clinical labor types would remain unchanged from the pricing finalized in the CY 2022 PFS final rule.

TABLE 5: CY 2023 Clinical Labor Pricing

Labor Code	Labor Description	Source	CY 2021 Rate Per Minute	Final Rate Per Minute	Y2 Phase-In Rate Per Minute	Total % Change
L023A	Physical Therapy Aide	BLS 31-2022	0.23	0.28	0.255	22%

* Updated for CY 2023

BILLING CODE 4120–01–C

As was the case for the market-based supply and equipment pricing update, the clinical labor rates will remain open for public comment over the course of

the 4-year transition period. We updated the pricing of a number of clinical labor types in the CY 2022 PFS final rule in response to information provided by commenters. We welcome additional feedback on clinical labor pricing from commenters in response to this proposed rule, especially any data that will continue to improve the accuracy of our final pricing. For the full discussion of the clinical labor pricing update, we direct readers to the CY 2022 PFS final rule (86 FR 65020 through 65037).

5. Soliciting Public Comment on Strategies for Updates to Practice Expense Data Collection and Methodology

The PE inputs used in setting PFS rates, including both the development of PE RVUs and, historically, the relative shares among work, PE, and malpractice RVUs across the PFS, are central in developing accurate rates and maintaining appropriate relativity among PFS services and overall payment among the professionals and suppliers paid under the PFS. Consequently, the underlying PE data inputs are a consistent point of interest among interested parties. However, unlike other payment systems with cost reporting systems, PFS data inputs are primarily based on exogenous proprietary data that become available as the data are collected. Specifically, we rely on historical survey data (almost all of which is over a decade old), some publicly available data collected for other purposes (for example, Bureau of Labor Statistics (BLS) wage data), recommendations from the American Medical Association and other provider groups, and annual Medicare claims data.

a. History of Updates to PE Inputs

Each year we continue to improve accuracy, predictability, and sustainability of updates to the PE valuation methodology to reduce the risks of possible misvaluation and other unintended outcomes. We have continued to develop policies geared toward providing more consistent updates to the direct PE inputs used in PFS ratesetting, including supply/equipment pricing and clinical labor rates. These efforts to develop these policies should contribute to improved standardization and transparency for all PE inputs used to update the PFS. As we continue our work to improve the information we use in our PE methodology, we are issuing a general comment solicitation to better understand how we might improve the collection of PE data inputs and refine the PE methodology.

In recent years, we have refined specific PE data inputs using a combination of market research and publicly available data (for example, market research on medical supply and equipment items and BLS data to update clinical labor wages) to update the direct PE data inputs used in the PFS ratesetting process. Last year, we implemented a final transition year for supply and equipment pricing updates and started the first year of a 4-year phase-in update to the clinical labor rates. However, the indirect PE data inputs remain tied to legacy information that is well over a decade old. To build on much needed progress, we now believe indirect PE would also benefit from a refresh that implements similar standard and routine updates. We believe that a data refresh, and use of data sources that receive routine refreshes, would reduce the likelihood of unpredictable shifts in payment, especially when such shifts could be driven by the age of data available rather than comprehensive information about changes in actual costs.

b. Data Collection, Analysis and Findings

In light of feedback from interested parties, CMS has prioritized stability and predictability over ongoing updates, and has taken a measured approach to updating PE data inputs. We have worked with interested parties and CMS contractors over a period of years to study the landscape and identify possible strategies to reshape the PE portion of physician payments. The fundamental issues are clear, but thought leaders and subject matter experts have advocated for more than one tenable approach to updating our PE methodology. Thus, we must balance the various interests of the public, and any path forward should allow for ongoing and routine cycles of PE updates.

Of the various PE data inputs, we believe that indirect PE data inputs, which reflect costs such as office rent, IT costs, and other non-clinical expenses, present the opportunity to build consistency, transparency, and predictability into our methodology to update PE data inputs. The primary source for indirect PE information is the Physician Practice Information Survey (PPIS), fielded by the AMA. The survey was most recently conducted in 2007 and 2008 (reflecting 2006 data). The survey respondents were self-employed physicians and selected nonphysician practitioners.

In general, interested parties have expressed the following concerns regarding CMS's approach to indirect PE allocation:

- CMS seems to rely on increasingly out-of-date data sources, and there is a dearth of mechanisms to update empirical inputs.
- The approach exacerbates payment differentials that possibly create inappropriate variation of reimbursement across ambulatory places of service (for example, significantly higher payments for the same service provided in a hospital outpatient department versus a physician office).
- CMS's method of indirect PE allocation may not accurately reflect variation in PE across different types of services, different practice characteristics, or evolving business models.

Beyond these issues, we have also explored other concerns with our indirect PE allocation method in depth in previous rulemaking. For example, refer to our previous comment solicitation and discussion of resource costs for services involving the use of innovative technologies in our CY 2022 PFS proposed rule (86 FR 39125). PE data inputs, and the methodological and evidence-based principles that shape use of such information in the context of reimbursement, are discussed in depth in a RAND Corporation (''RAND'') report prepared for CMS, entitled *Practice Expense Methodology and Data Collection Research and Analysis,* available at *https://www.rand.org/pubs/research_reports/RR2166.html*.[1]

Various interested parties have taken issue with the use of certain costs in our current PE allocation methodology that they do not believe are associated with increased indirect PE. Some interested parties argue that the costs of disposable supplies, especially expensive supplies, and equipment are not relevant to allocating indirect PE; or that similarly, work in the facility setting (for example, work RVUs for surgical procedures) is not relevant to allocating indirect PE, though they agree that work in the office setting may be relevant to allocating indirect PE. [2] However, we do not believe that there is sufficient, if any,

A Literature Review.'' *The International Journal of Health Planning and Management* 33, no. 4 (October 2018): e892–905. *https://doi.org/10.1002/hpm.2565.*

data or peer-reviewed evidence available to definitively show that shifting indirect PE allocations based on the setting of care, or based on specialty, would result in improved allocations of PE that reflect true costs. Further, varying indirect PE allocations based on setting of care or based on specialty might create unintended consequences such as reduced access to care for beneficiaries, or reduced competition and autonomy of small group practices or individual clinicians whose revenue is based in part on services furnished under contract in the facility setting.

We believe it is necessary to establish a roadmap toward more routine PE updates, especially because potentially improper or outdated allocation of PE across services may affect access to certain services, which could exacerbate disparities in care and outcomes. Establishing payments that better reflect current practice costs would mitigate possible unintended consequences, such as labor market distortions due to indirect cost allocations that do not reflect the current evolution of health care practice.[3] Interested parties have reiterated their desire for CMS to move away from the current PE allocation approach and continued to raise concerns with CMS's methodology and the underlying PE data inputs. In response to these and other concerns, we continue to review the methodology we use to establish the PE RVUs and to identify refinements. As part of this effort, we have contracted with RAND to develop and assess potential improvements in the current methodology used to allocate indirect practice costs in determining PE RVUs for a service, model alternative methodologies for determining PE RVUs, and identify and assess alternative data sources that CMS could use to regularly update indirect practice cost estimates.[4]

In this proposed rule, we are signaling our intent to move to a standardized and routine approach to valuation of indirect PE and we welcome feedback from interested parties on what this might entail, given our discussion above. We would propose the new approach to valuation of indirect PE in future rulemaking.

We seek comment on the following topics related to identification of the appropriate instrument, methods, and timing for updating specialty-specific PE data:

- Potential approaches to design, revision, and fielding of a PE survey that foster transparency (for example, transparency in terms of the methods of survey design, the content of the survey instrument, and access to raw results for informing PFS ratesetting); and
- Mechanisms to ensure that data collection and response sampling adequately represent physicians and non-physician practitioners across various practice ownership types, specialties, geographies, and affiliations.

We also seek comment on any alternatives to the above that would result in more predictable results, increased efficiencies, or reduced burdens. For example:

- Use of statistical clustering or other methods that would facilitate a shift away from specialty-specific inputs to inputs that relate to homogenous groups of specialties without a large change in valuation relative to the current PE allocations.
- Avenues by which indirect PE can be moved for facility to non-facility payments, based on data reflecting site of service cost differences.
- Methods to adjust PE to avoid the unintended effects of undervaluing cognitive services due to low indirect PE.
- A standardized mechanism and publicly available means to track and submit structured data and supporting documentation that informs pricing of supplies or equipment.
- Sound methodological approaches to offset circularity distortions, where variable costs are higher than necessary costs for practices with higher revenue.

We also seek comment on the cadence, frequency, and phase-in of adjustments for each major area of prices associated with direct PE inputs (Clinical Labor, Supplies/Equipment). We ask that commenters address the following:

- Whether CMS should stagger updates year-to-year for each update, or establish ''milestone'' years at regular intervals during which all direct PE inputs would be updated in the same year.
- The optimal method of phasing in the aggregate effect of adjustments, such that the impacts of updates gradually ramp up to a full 100 percent over the course of a few years (for example, 25 percent of the aggregate adjustment in Year 1, then 50 percent of the aggregate adjustment in Year 2, etc.).
- How often CMS should repeat the cycle to ensure that direct PE inputs are based on the most up-to-date information, considering the burden of data collection on both respondents and researchers fielding instruments or maintaining datasets that generate data.

c. Changes to Health Care Delivery and Practice Ownership Structures, and Business Relationships Among Clinicians and Health Care Organizations

Market consolidation, and shifts in workforce alignment, as well as an evolution in the type of business entities predominant in health care markets, all suggest significant transformation in the composition and proportions of practice expenses required to furnish care. These evolving conditions collectively highlight the need for a comprehensive update to PE data inputs, and possibly the PE methodology as a whole.[5] Ideally, more comprehensive PE data inputs and a different PE calculation methodology would better account for indirect/overhead costs, current trends in the delivery of health care, the use of machine learning technology, and EHRs, and the cost differentials in independent versus facility-based practices.

We seek comment on current and evolving trends in health care business arrangements, use of technology, or similar topics that might affect or factor into indirect PE calculations. We are interested in learning whether any PE data inputs may be obsolete, unnecessary, or misrepresentative of the actual costs involved in operating a medical practice.

d. Unintended Consequences and Missing Information

We request comment on additional information that we may have not considered or discussed above about updating and maintaining PE data inputs, as well as any unintended impacts (or positive outcomes) that could result from changes to the overall strategy. We are especially interested in public comment on any concerns about beneficiaries' access to care, possible consolidation of group practices, or burden on small group or solo practitioners. We are also interested in public comments on any collateral

program integrity or quality issues that could arise from potential updates. We request that any respondents who provide feedback ensure that the response includes discussion of any possible health equity impacts.

6. Soliciting Public Comment on Strategies for Improving Global Surgical Package Valuation

In preparation for future rulemaking, we are seeking public comment on strategies to improve the accuracy of payment for the global surgical packages (herein referred to as ''global packages') under the PFS. Currently, there are over 4,000 physicians' services paid as global packages under the PFS. Global packages generally include the surgical procedure and any services typically provided during the pre- and postoperative periods (including evaluation and management (E/M) services and hospital discharge services). There are three types of global packages:

- The 0-day global package, which includes the procedure and the preoperative and postoperative physicians' services on the day of the procedure.
- The 10-day global package, which includes services on the day of, and 10 days after, the procedure.
- The 90-day global package, which includes services furnished one day prior to the procedure, and on the day of, and 90 days immediately following the day of the procedure.

More detail about how global packages are billed and what activities are included may be found in Chapter 12, Section 40, of the Medicare Claims Processing Manual (Pub. 100–04).

We have applied the concept of global payment for some procedures since the inception of the PFS on January 1, 1992 (54 FR 59502). However, in the past decade we have engaged with interested parties regarding numerous concerns about the accuracy and validity of the valuation of global packages, with particular attention paid to the E/M visits included in the services. We have made previous requests for public feedback on global packages, including solicitations for information or data that could be used to help support more accurate valuations. We now wish to expand on our conversations with the public, considering the current status of a multi-year data collection and analysis project, as well as ongoing changes we have made to payments for other types of patient care that may impact the global packages.

a. History of Global Valuation Discussion

In the CY 2013 PFS proposed rule (77 FR 44737 through 44738), we discussed two reports released by the HHS Office of the Inspector General in 2005 and 2012 with findings that practitioners were performing fewer E/M postoperative visits than had been included in the valuation for these global packages, suggesting that Medicare was paying for care that was not being delivered. In response to the concerns raised by the OIG reports, we solicited public feedback on methods of obtaining accurate and current data on E/M services furnished as part of a global package. We summarized public comment in the CY 2013 PFS final rule (77 FR 68911 through 68913).

In the CY 2015 PFS proposed rule (79 FR 40341), we delved into barriers to accurate valuation of global packages, especially as compared to other forms of bundled payments made under the inpatient or outpatient prospective payment systems. In addition to the ongoing concerns about whether E/M visits presumed to be furnished in connection with global packages were actually being performed by the physician receiving the global package payment, we noted issues such as:

- E/M services in the global period that occur post-discharge are valued with practice expense values associated with follow-up visits in the physician's office. Many of these follow-up visits may occur in a hospital outpatient department where the physician may not incur many PE costs.
- The direct PE inputs often differ slightly between an E/M service furnished in a global period and a stand-alone E/M service. For example, follow-up visits for certain surgeries may include specialized clinical labor such as an RN rather than a general nurse blend.
- The types of physicians furnishing a specific service dictate the direct and indirect percentages, as well as the indirect practice cost index, in the PE methodology. Most surgical specialties have a lower direct percentage mix, resulting in higher indirect costs that extend to the E/M visits in the global periods.
- Because the E/M visits embedded in the global package are not reported separately and do not appear in claims data, it is difficult to quantify the number and level of E/M services furnished in connection with global packages under the fee-for-service system.
- In some cases we have limited billing of the 10- and 90-day global packages in conjunction with some of the payment policies intended to encourage coordination of care through payments for non-face-to-face services, such as transitional care management and chronic care management, because of presumed overlap between these services.

To address these concerns, we solicited comment and finalized a policy in the CY 2015 PFS final rule (79 FR 67586) intended to, over a period of several years, transition all services with 10-day and 90-day global periods to 0-day global periods. As stated in the CY 2015 PFS final rule, we believed it would be more accurate to value the surgical procedure-day services separately from postop E/M visits, and would avoid potentially duplicative or unwarranted payments. For our full discussion and rationale, refer to 79 FR 67586 through 67591. Implementation of this policy, however, was halted by the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015 (Pub. L.110–14). Section 523(a) of the MACRA amended section 1848(c)(8) of the Act to prohibit the Secretary from implementing the transition policy finalized in the CY 2015 PFS final rule. The amendments to section 1848(c)(8) also require CMS to collect additional data on how best to value global packages and to reassess every 4 years the continued need for this data collection. Section 1848(c)(8) of the Act directs CMS to use the information collected to improve the accuracy of valuation of these services under the PFS starting in CY 2019. (Refer to the CY 2016 PFS final rule at 80 FR 70915 for additional discussion of these requirements.)

In response to the statutory requirements as added by section 523(a) of the MACRA, we engaged in multiple discussions with interested parties about methods of data collection and analysis, including through public comment solicitation in the CY 2016 PFS proposed rule (80 FR 41707) and CY 2017 PFS proposed rule (81 FR 46191), a national listening session, and a town hall meeting. (Materials for the January 20, 2016 listening session are available at *https://www.cms.gov/Outreach-and-Education/Outreach/NPC/Downloads/2016-01-20-MCRA-Presentation.pdf.* The transcript of the town hall meeting held August 25, 2016 is available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Downloads/CY2017-PFS-FR-Townhall.pdf.*) In the CY 2017 PFS final rule (81 FR 80209 through 80213), we finalized a claims-based process to collect data from practitioners on both

the number and level of postoperative visits furnished as part of the 10- and 90-day global packages. We also contracted with RAND to support this data collection and analysis.

b. Data Collection, Analysis, and Findings

In 2019, RAND issued two reports based on its analysis of the data collected through the data collection process we established. The reports examined, using claims-based and survey-based data, the number of postoperative visits furnished during the 10- and 90-day global periods for certain high-volume procedures and the level of visits furnished for certain procedures. (Complete details about the data collected are discussed in the CY 2017 PFS final rule starting at 81 FR 80212, the CY 2020 PFS final rule at 84 FR 62857, and in the reports themselves, available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection-*.) Notably, RAND's analysis found that, according to claims-based data, the reported number of E/M visits matched the expected number (included for purposes of PFS valuation) for only 4 percent of reviewed 10-day global packages and 38 percent of reviewed 90-day global packages. Based on these analyses, RAND released a third report that analyzed the current valuation of global packages based on the difference between the number of postoperative E/M visits observed via the claims-based data collection process and the expected number of such E/M visits. The report modeled how valuation for global packages would change by adjusting the work RVUs, physician time, and direct PE inputs to reflect the observed number of E/M visits. The report provided hypothetical valuations for the global packages based on these adjustments. These three RAND reports were made available to the public and are available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection-*.

The RAND reports were shared with the public, and we received public comment about these reports in the CY 2020 PFS final rule (84 FR 62866). Public commenters raised concerns about the findings in the reports, including questions as to whether the E/M visit data were collected from a true representative sample of practitioners, and various other challenges to the validity of the RAND methodology. Other members of the public, however, were supportive of our overall efforts to collect and analyze the data, and supplied additional data similarly suggesting that the 10- and 90-day global packages are overvalued. In 2021, RAND responded to the CY 2020 public comments that were critical of the methodologies used in the three earlier reports in a separate report entitled, ''Responses to Comments on RAND Global Services Reports,'' which is available at *https://www.rand.org/content/dam/rand/pubs/research_reports/RR4300/RR4314-1/RAND_RR4314-1.pdf/*.

While some interested parties have challenged the methodology or conclusions of the RAND reports, we have not yet received data suggesting that postoperative E/M visits are being performed more frequently than indicated by the data collected and analyzed in the RAND reports. We continue to be concerned that our current valuations of the global packages reflect certain E/M visits that are not typically furnished in the global period, and thus, are not occurring. We also believe that RAND has adequately responded to critiques of its methodologies and findings. However, as part of our ongoing assessment of our data collection process, we continue to welcome any comments from the public on ideas for other sources of data that would help us to assess global package valuation (including the typical number and level of E/M services), as well as our data collection methodology and the RAND report findings.

c. Changes to Health Care Delivery and Payment for E/M Services

Since the inception of the PFS 30 years ago, there have been significant changes in health care, including improvements in medical and information technology, new models of health care delivery and coordination between multiple clinicians furnishing care to a single patient, and an expanding beneficiary population. (For information on Medicare service utilization, beneficiary demographics, provider characteristics, and payment models, please visit the resources at *data.cms.gov*.) We are interested in hearing from the public on whether the postoperative health care landscape has changed in ways that impact the relevance of the global packages.

We believe that changes to health care delivery may impact proper valuation of global services. We are soliciting comment on whether changes to health care delivery, including changes in coordination of care and use of medical technology over the past 3 decades, as well as during the recent PHE, have impacted: the number and level of postoperative E/M visits needed to provide effective follow-up care to patients; the timing of when postoperative care is being provided; and who is providing the follow-up care. We have formed hypotheses that some beneficiaries are not receiving the number of postoperative visits that were contemplated when valuing the global surgical packages or are not receiving any follow-up E/M visits at all during global periods either because the physician who performed the surgical procedure has determined they are unnecessary (perhaps due to improvements in medical technology or evolution in standards of care) or as the result of more comprehensive discharge planning. It has also been suggested by some interested parties that physicians are, in fact, performing the number of postoperative visits that were contemplated when valuing the global surgical packages, but the visits may, for various reasons, be scheduled outside the global period. Others have suggested that physicians are, without formally transferring follow-up care to another clinician, instructing patients to follow up with another physician or NPP (such as the patient's primary care physician or other practitioner), and that the other clinician then furnishes and bills for E/M services furnished for postoperative care (whether the care is performed during or after the global period). We would appreciate comments on these ideas, and on other factors not mentioned here that could affect the ways that postoperative E/M care is provided.

We are also soliciting comment on whether, or how, recent changes in the coding and valuation of separately billable E/M services may have impacted global packages. One change is the expansion of payment for non-face-to-face care management services. Historically, an advantage of global packages was that they compensated physicians for non-face-to-face work related to the patient's transition from the hospital to the community, or management of other health care needs following a procedure or serious illness. Over the years, we have implemented payment for many care management services to better reflect non-face-to-face time spent by physicians and clinical staff on behalf of patients with complex health care needs, including transitional care management services in CY 2013 (77 FR 68978); chronic care management in CY 2015 (78 FR 74414) and CY 2019 (83 FR 58577); complex chronic care management in CY 2017 (81 FR 80244); and principal care management in CY 2020 (84 FR 62962).

We solicit comment on whether global packages, and especially those with 10- and 90-day global periods, continue to serve a purpose when physicians could otherwise bill separately not only for the postoperative E/M visits they furnish, but also for aspects of postoperative care management they furnish for some patients. We also would like to hear generally what, if any, components of preoperative or postoperative care are currently only compensated as part of payment for global packages.

We have also heard from some interested parties who believe that recent changes to the coding and valuation of standalone office and outpatient E/M visits finalized in the CY 2021 PFS final rule have skewed the relativity between these visits and the E/M visits included in the current global package valuations (which were not modified in response to the coding and valuation changes). In the CY 2020 PFS final rule (84 FR 62851 through 84 FR 62854), we finalized new—and generally increased, RVUs for the CPT-revised office and outpatient E/M code set. Some commenters encouraged us to increase the value of the E/M visits included in the global surgical packages commensurate with the increased RVUs for the standalone E/M visits. However, we declined to do so, noting that at the time that it was unclear whether it would be appropriate to treat the E/M visits reflected in global packages as discrete components of the package (in other words, to use a building-block approach to calculating the value of the service, versus valuing the services using the more holistic magnitude estimation, or possibly another approach.) Furthermore, we cited the uncertainty as to whether the E/M services included in valuing the global packages are typically furnished as part of global surgery services, reasoning that if the number and level of E/M services for global packages is not appropriate, adopting increases in the value of E/M services in global surgery codes would exacerbate rather than ameliorate any potential relativity issues. (Refer to the CY 2020 PFS final rule at 84 FR 62856 through 62860 for a complete summary of comments and our responses on the topic of increasing the value of E/M visits included in the global packages.) We welcome additional comments on the perceived misalignment between the E/M visits included in global packages and separately billable E/M services, including thoughts on how this current tension reflects on global payment valuation and the appropriate methodology for determining appropriate values for global packages.

d. Strategies To Address Global Package Valuation

Consistent with the discussion above, we continue to believe that: (1) there is strong evidence suggesting that the current RVUs for global packages are inaccurate; (2) many interested parties agree that the current values for global packages should be reconsidered, whether they believe the values are too low or too high; and (3) it is necessary to take action to improve the valuation of the services currently valued and paid under the PFS as global surgical packages.

We would like to re-engage with the public about whether the global packages are indeed misvalued, and if so, what would be an appropriate approach to valuation. We have previously sought assistance from the public on possible methods of revaluation, such as in the CY 2015 PFS rule (at 79 FR 67586).

As noted in the ''Data Collection, Analysis, and Findings'' section above (section II.B.6.b.), RAND has provided a comprehensive roadmap for a possible revaluation strategy. (See specifically the RAND report, ''Using Claims-Based Estimates of Postoperative Visits to Revalue Procedures with 10- and 90-Day Global Periods,'' available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection-*) We are soliciting additional input on the RAND methodology, including advantages and drawbacks of applying the RAND methodology to revaluation (in addition to previous feedback that was provided by the public in the CY 2020 final rule at 84 FR 62867). We also request input on specific alternatives, including: (1) requesting the RUC to make recommendations on new values; or (2) another method proposed by the public.

We solicit feedback from the public on possible strategies for a revaluation process for global services. We believe that the available information provided in the RAND reports (discussed in section II.B.6.b. of this proposed rule and available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection-*) indicates that there is a mismatch between the value of the global package and work being performed. In particular, it appears that for some services, the number of postoperative visits typically furnished by the billing physician is much lower than what was reflected in the global package value, and thus we believe it may be necessary to revalue those services. (As noted in section II.B.6.b. of this proposed rule, RAND's analysis found that the reported number of E/M visits matched the expected E/M visits for only 4 percent of reviewed 10-day global packages and 38 percent of reviewed 90-day global packages. We refer specifically to the RAND report, ''Claims-Based Reporting of Postoperative Visits for Procedures with 10- or 90-Day; Global Periods—Updated Results Using Calendar Year 2019 Data'' available at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/Global-Surgery-Data-Collection-*). Because there are a large number and volume of services paid as global packages, we must consider the resources needed to revalue even a subset of the global packages, as well as the impacts across the PFS and healthcare delivery system in general if we were to change the values of a significant number of services at one time. We are considering various approaches we could pursue, such as: (1) revaluing all 10- and 90-day global packages at one time (perhaps with staggered implementation dates); (2) revaluing only the 10-day global packages (because these appear to have the lowest rate of postoperative visit performance, per RAND's analysis of claims data); (3) revaluing 10-day global packages and some 90-day global packages (such as those with demonstrated low postoperative visit performance rates as identified in RAND's analysis of these services); or (4) relying on the Potentially Misvalued Code process to identify and revalue misvalued global packages over the course of many years. (We note that regardless of whether we review particular global packages as part of a specific revaluation strategy, the public may always nominate any global packages to be reviewed through the Potentially Misvalued Code process; refer to the description of the Potentially Misvalued Code process in section II.C. of this proposed rule.) We solicit comment on any of the strategies identified in this paragraph, as well as any additional ideas members of the public may have that would address the concerns described above about valuation of global packages. We also welcome comment on ancillary considerations including timing considerations for implementation of any future strategy (such as whether to have staggered effective dates for new valuations and what criteria to use if assigning staggered effective dates.)

We also solicit comment on additional considerations affecting valuation of global services that may not have been thoroughly explored in

previous public comment opportunities. For instance, we are aware that some interested parties are concerned that not enough attention has been paid to the value of preservice work bundled into the global payment, which could affect accurate valuation of 10- and 90-day global packages, as well as the value of the service if it is transitioned to a 0-day global. We solicit additional information about this concern, as well as any other concerns about valuation not otherwise mentioned here.

e. Other Payment Structure Changes, Unintended Consequences, and Missing Information

We solicit public comment on any other aspects of the global payment structure (aside from the valuation of services) that commenters believe are noteworthy. Much of the discussion over the years has focused on whether global surgical packages are properly valued and whether they are needed at all. We encourage commenters to point out ways in which global surgical packages may continue to have a positive impact on health care delivery (such as their potential to support innovation). We also solicit suggestions on other ways that global surgical package payments could be modified (aside from changing their valuation) that could help improve accurate valuation or help address other concerns about the payments (such as the lack of transparency about what care is being provided as part of the package).

We also request comment on additional information that we may not have considered or discussed above about proper valuation of the global packages, as well as any unintended impacts (or positive outcomes) that could result from changes to how we value global services. We are especially interested in public comment on any concerns about beneficiaries' access to care, continuity of care, cost sharing, or program integrity.

C. Potentially Misvalued Services Under the PFS

1. Background

Section 1848(c)(2)(B) of the Act directs the Secretary to conduct a periodic review, not less often than every 5 years, of the relative value units (RVUs) established under the PFS. Section 1848(c)(2)(K) of the Act requires the Secretary to periodically identify potentially misvalued services using certain criteria and to review and make appropriate adjustments to the relative values for those services. Section 1848(c)(2)(L) of the Act also requires the Secretary to develop a process to validate the RVUs of certain potentially misvalued codes under the PFS, using the same criteria used to identify potentially misvalued codes, and to make appropriate adjustments.

As discussed in section II.E. of this proposed rule, Valuation of Specific Codes, each year we develop appropriate adjustments to the RVUs taking into account recommendations provided by the American Medical Association (AMA) Resource-Based Relative Value Scale (RVS) Update Committee (RUC), MedPAC, and other interested parties. For many years, the RUC has provided us with recommendations on the appropriate relative values for new, revised, and potentially misvalued PFS services. We review these recommendations on a code-by-code basis and consider these recommendations in conjunction with analyses of other data, such as claims data, to inform the decision-making process as authorized by statute. We may also consider analyses of work time, work RVUs, or direct PE inputs using other data sources, such as Department of Veteran Affairs (VA), National Surgical Quality Improvement Program (NSQIP), the Society for Thoracic Surgeons (STS), and the Merit-based Incentive Payment System (MIPS) data. In addition to considering the most recently available data, we assess the results of physician surveys and specialty recommendations submitted to us by the RUC for our review. We also consider information provided by other interested parties. We conduct a review to assess the appropriate RVUs in the context of contemporary medical practice. We note that section 1848(c)(2)(A)(ii) of the Act authorizes the use of extrapolation and other techniques to determine the RVUs for physicians' services for which specific data are not available and requires us to take into account the results of consultations with organizations representing physicians who provide the services. In accordance with section 1848(c) of the Act, we determine and make appropriate adjustments to the RVUs.

In its March 2006 Report to the Congress (*http://www.medpac.gov/docs/default-source/reports/Mar06_Ch03.pdf?sfvrsn=0*), MedPAC discussed the importance of appropriately valuing physicians' services, noting that misvalued services can distort the market for physicians' services, as well as for other health care services that physicians order, such as hospital services. In that same report, MedPAC postulated that physicians' services under the PFS can become misvalued over time. MedPAC stated, ''When a new service is added to the physician fee schedule, it may be assigned a relatively high value because of the time, technical skill, and psychological stress that are often required to furnish that service. Over time, the work required for certain services would be expected to decline as physicians become more familiar with the service and more efficient in furnishing it.'' We believe services can also become overvalued when PE costs decline. This can happen when the costs of equipment and supplies fall, or when equipment is used more frequently than is estimated in the PE methodology, reducing its cost per use. Likewise, services can become undervalued when physician work increases or PE costs rise.

As MedPAC noted in its March 2009 Report to Congress (*http://www.medpac.gov/docs/default-source/reports/march-2009-report-to-congress-medicare-payment-policy.pdf*), in the intervening years since MedPAC made the initial recommendations, CMS and the RUC have taken several steps to improve the review process. Also, section 1848(c)(2)(K)(ii) of the Act augments our efforts by directing the Secretary to specifically examine, as determined appropriate, potentially misvalued services in the following categories:

- Codes that have experienced the fastest growth.
- Codes that have experienced substantial changes in PE.
- Codes that describe new technologies or services within an appropriate time-period (such as 3 years) after the relative values are initially established for such codes.
- Codes which are multiple codes that are frequently billed in conjunction with furnishing a single service.
- Codes with low relative values, particularly those that are often billed multiple times for a single treatment.
- Codes that have not been subject to review since implementation of the fee schedule.
- Codes that account for the majority of spending under the PFS.
- Codes for services that have experienced a substantial change in the hospital length of stay or procedure time.
- Codes for which there may be a change in the typical site of service since the code was last valued.
- Codes for which there is a significant difference in payment for the same service between different sites of service.

- Codes for which there may be anomalies in relative values within a family of codes.
- Codes for services where there may be efficiencies when a service is furnished at the same time as other services.
- Codes with high intraservice work per unit of time.
- Codes with high PE RVUs.
- Codes with high cost supplies.
- Codes as determined appropriate by the Secretary.

Section 1848(c)(2)(K)(iii) of the Act also specifies that the Secretary may use existing processes to receive recommendations on the review and appropriate adjustment of potentially misvalued services. In addition, the Secretary may conduct surveys, other data collection activities, studies, or other analyses, as the Secretary determines to be appropriate, to facilitate the review and appropriate adjustment of potentially misvalued services. This section also authorizes the use of analytic contractors to identify and analyze potentially misvalued codes, conduct surveys or collect data, and make recommendations on the review and appropriate adjustment of potentially misvalued services. Additionally, this section provides that the Secretary may coordinate the review and adjustment of any RVU with the periodic review described in section 1848(c)(2)(B) of the Act. Section 1848(c)(2)(K)(iii)(V) of the Act specifies that the Secretary may make appropriate coding revisions (including using existing processes for consideration of coding changes) that may include consolidation of individual services into bundled codes for payment under the PFS.

2. Progress in Identifying and Reviewing Potentially Misvalued Codes

To fulfill our statutory mandate, we have identified and reviewed numerous potentially misvalued codes as specified in section 1848(c)(2)(K)(ii) of the Act, and we intend to continue our work examining potentially misvalued codes in these areas over the upcoming years. As part of our current process, we identify potentially misvalued codes for review, and request recommendations from the RUC and other public commenters on revised work RVUs and direct PE inputs for those codes. The RUC, through its own processes, also identifies potentially misvalued codes for review. Through our public nomination process for potentially misvalued codes established in the CY 2012 PFS final rule with comment period (76 FR 73026, 73058 through 73059), other individuals and groups submit nominations for review of potentially misvalued codes as well. Individuals and groups may submit codes for review under the potentially misvalued codes initiative to CMS in one of two ways. Nominations may be submitted to CMS via email or through postal mail. Email submissions should be sent to the CMS emailbox at *MedicarePhysicianFeeSchedule@cms.hhs.gov,* with the phrase ''Potentially Misvalued Codes'' and the referencing CPT code number(s) and/or the CPT descriptor(s) in the subject line. Physical letters for nominations should be sent via the U.S. Postal Service to the Centers for Medicare & Medicaid Services, Mail Stop: C4–01–26, 7500 Security Blvd., Baltimore, Maryland 21244. Envelopes containing the nomination letters must be labeled ''Attention: Division of Practitioner Services, Potentially Misvalued Codes.'' Nominations for consideration in our next annual rule cycle should be received by our February 10th deadline. Since CY 2009, as a part of the annual potentially misvalued code review and Five-Year Review process, we have reviewed over 1,700 potentially misvalued codes to refine work RVUs and direct PE inputs. We have assigned appropriate work RVUs and direct PE inputs for these services as a result of these reviews. A more detailed discussion of the extensive prior reviews of potentially misvalued codes is included in the CY 2012 PFS final rule with comment period (76 FR 73052 through 73055). In the same CY 2012 PFS final rule with comment period, we finalized our policy to consolidate the review of physician work and PE at the same time, and established a process for the annual public nomination of potentially misvalued services.

In the CY 2013 PFS final rule with comment period (77 FR 68892, 68896 through 68897) we built upon the work we began in CY 2009 to review potentially misvalued codes that have not been reviewed since the implementation of the PFS (so-called ''Harvard-valued codes''). In the CY 2019 PFS proposed rule (73 FR 38589), we requested recommendations from the RUC to aid in our review of Harvard-valued codes that had not yet been reviewed, focusing first on high-volume, low intensity codes. In the fourth Five-Year Review of Work RVUs proposed rule (76 FR 32410, 32419), we requested recommendations from the RUC to aid in our review of Harvard-valued codes with annual utilization of greater than 30,000 services. In the CY 2013 PFS final rule with comment period, we identified specific Harvard-valued services with annual allowed charges that total at least $10,000,000 as potentially misvalued. In addition to the Harvard-valued codes, in the CY 2013 PFS final rule with comment period we finalized for review a list of potentially misvalued codes that have stand-alone PE (codes with physician work and no listed work time and codes with no physician work that have listed work time). We continue each year to consider and finalize a list of potentially misvalued codes that have or will be reviewed and revised as appropriate in future rulemaking.

3. CY 2023 Identification and Review of Potentially Misvalued Services

In the CY 2012 PFS final rule with comment period (76 FR 73058), we finalized a process for the public to nominate potentially misvalued codes. In the CY 2015 PFS final rule with comment period (79 FR 67548, 67606 through 67608), we modified this process whereby the public and interested parties may nominate potentially misvalued codes for review by submitting the code with supporting documentation by February 10th of each year. Supporting documentation for codes nominated for the annual review of potentially misvalued codes may include the following:

- Documentation in peer reviewed medical literature or other reliable data that demonstrate changes in physician work due to one or more of the following: technique, knowledge and technology, patient population, site-of-service, length of hospital stay, and work time.
- An anomalous relationship between the code being proposed for review and other codes.
- Evidence that technology has changed physician work.
- Analysis of other data on time and effort measures, such as operating room logs or national and other representative databases.
- Evidence that incorrect assumptions were made in the previous valuation of the service, such as a misleading vignette, survey, or flawed crosswalk assumptions in a previous evaluation.
- Prices for certain high cost supplies or other direct PE inputs that are used to determine PE RVUs are inaccurate and do not reflect current information.
- Analyses of work time, work RVU, or direct PE inputs using other data sources (for example, VA, NSQIP, the STS National Database, and the MIPS data).
- National surveys of work time and intensity from professional and management societies and

organizations, such as hospital associations.

We evaluate the supporting documentation submitted with the nominated codes and assess whether the nominated codes appear to be potentially misvalued codes appropriate for review under the annual process. In the following year's PFS proposed rule, we publish the list of nominated codes and indicate for each nominated code whether we agree with its inclusion as a potentially misvalued code. The public has the opportunity to comment on these and all other proposed potentially misvalued codes. In each year's final rule, we finalize our list of potentially misvalued codes.

a. Public Nominations

In each proposed rule, we seek nominations from the public and from interested parties of codes that they believe we should consider as potentially misvalued. We received public nominations for potentially misvalued codes by February 10th and we displayed these nominations on our public website, where we include the submitter's name and their associated organization for full transparency. Some submissions are for specific, PE-related inputs for codes, and we refer readers to section II.B. of this rule under Determination of PE RVUs for further discussions on PE-related submissions. We summarize below this year's submissions under the potentially misvalued code initiative.

An interested party nominated the home-based physician visit codes: CPT code 99344 (*Home visit for the evaluation and management of a new patient, which requires these 3 key components: A comprehensive history; A comprehensive examination; and Medical decision making of moderate complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of high severity. Typically, 60 minutes are spent face-to-face with the patient and/or family*), CPT code 99345 (*Home visit for the evaluation and management of a new patient, which requires these 3 key components: A comprehensive history; A comprehensive examination; and Medical decision making of high complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the patient is unstable or has developed a significant new problem requiring immediate physician attention. Typically, 75 minutes are spent face-to-face with the patient and/or family*), CPT code 99349 (*Home visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A detailed interval history; A detailed examination; Medical decision making of moderate complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are moderate to high severity. Typically, 40 minutes are spent face-to-face with the patient and/or family*), and CPT code 99350 (*Home visit for the evaluation and management of an established patient, which requires at least 2 of these 3 key components: A comprehensive interval history; A comprehensive examination; Medical decision making of moderate to high complexity. Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problem(s) and the patient's and/or family's needs. Usually, the presenting problem(s) are of moderate to high severity. The patient may be unstable or may have developed a significant new problem requiring immediate physician attention. Typically, 60 minutes are spent face-to-face with the patient and/or family*) as potentially misvalued.

In their submission, the nominator expressed concern that there is no payment for transportation costs incurred when it is medically necessary for a physician to drive to the home of the patient for a face-to-face in-home E/M Visit, and that they are not compensated for opportunity loss they incur by seeing fewer patients because they spend time commuting to patients' homes, versus seeing more patients that come to their offices. The nominator also argued that Medicare does not compensate physicians for the work and time associated with assessing a patient's home environment, which provides insight into a patient's overall health and living conditions. The nominator collectively called these non-medical factors that can affect a patient's overall health the ''Social Determinants of Health'' (SDoH). The nominator requested that we increase the overall RVUs for CPT codes 99344, 99345, 99349, and 99350, by including the resources associated with: (1) the physician's transportation costs to patients' homes; (2) lost income opportunity for home versus in-office visits; and (3) in-home SDoH assessment work. The nominator estimated that the adjustments to RVUs to reflect transportation costs and opportunity costs would result in Medicare payment that is 67 percent higher than the current Home-based E/M Visits payment rates, and that adjustments to account for the physician's SDoH assessment would add an additional 55 percent increase to the payment rates for Home-based E/M Visits. In total, the nominator suggests that if these resources were taken into account, the payment rates for Home-based E/M CPT codes would increase by what the nominator estimates as a 222 percent increase from their current amounts.

The nominator included references as evidence to support their claim that the home-based E/M CPT codes are potentially misvalued, such as the CMS ''Medicaid Non-Emergency Medical Transportation Booklet for Providers'' (April 2016) [6] [7] and a press release from the Better Medicare Alliance entitled, ''Report Shows Dramatic Increase in Medicare Advantage Activity to Address Social Determinants of Health, But Barriers Remain''.[8]

We note that the nominator did not nominate the entire family of home-based E/M visit codes.

When we establish values for codes or consider whether codes are potentially misvalued under the PFS, we take into account the resources involved in furnishing the specific service as described by the CPT code. As such, historically, we do not take into account: (1) travel costs incurred by the physician or other practitioner; (2) potential opportunity costs to a physician or other practitioner when care is delivered in one setting versus another; or (3) the physician or other practitioner's work and time expended in performing activities that are outside the scope of the specific service as described by the CPT code. These are not considered to be resources involved in furnishing the service, are not included in establishing payment rates under the PFS in accordance with

section 1848 of the Act, and, as such, do not provide justification for potential misvaluation of those payments. That said, in February 2021, the AMA CPT Editorial Panel deleted the family of domiciliary codes, CPT codes 99324 to 99340, and merged the services described by those codes into the existing family of home-based E/M visits, CPT codes 99341 to 99350 (a range of codes that includes CPT codes 99344, 99345, 99349, and 99350). In addition, the AMA RUC has made recommendations regarding the values for these home-based E/M codes in section II.E. of this proposed rule. Since CMS has already received AMA RUC recommendations for these home-based E/M visit codes for this year's proposed rule, we refer readers to the discussion found in section II.E. of this proposed rule, Valuation of Specific Codes, where we seek additional public comments, recommendations, and independent analysis as supporting evidence from all interested parties regarding the valuations for the home-based E/M visits, including CPT codes 99344, 99345, 99349, and 99350. Because we address and are soliciting public comment on the valuation of these codes in section II.E. of this proposed rule, there is no need to consider these home-based E/M visits here as potentially misvalued.

An interested party has nominated the following cataract surgery codes, CPT codes 65820 (*Goniotomy—Incision to improve eye fluid flow*), 66174 (*Transluminal dilation of aqueous outflow canal; without retention of device or stent*), 66982 (*Complex Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification*), 66984 (*Extracapsular cataract removal with insertion of intraocular lens prosthesis (one stage procedure), manual or mechanical technique (e.g., irrigation and aspiration or phacoemulsification)*), 66989 (*Complex Extracapsular cataract removal w/IOL insertion, complex; with insertion of intraocular (e.g., trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more*), and 66991 (*Extracapsular cataract removal w/IOL insertion; with insertion of intraocular (e.g., trabecular meshwork, supraciliary, suprachoroidal) anterior segment aqueous drainage device, without extraocular reservoir, internal approach, one or more*), as well as the following retinal procedure codes, CPT codes 67015 (*Aspiration or release of vitreous, subretinal or choroidal fluid, pars plana approach (posterior sclerotomy)*), 67036 (*Vitrectomy, mechanical, pars plana approach*), 67039 (*Vitrectomy, mechanical, pars plana approach; with focal endolaser photocoagulation),* 67040 (*Vitrectomy, mechanical, pars plana approach; with endolaser panretinal photocoagulation*), 67041 (*Vitrectomy, mechanical, pars plana approach; with removal of preretinal cellular membrane (e.g., macular pucker)*), 67042 (*Vitrectomy, mechanical, pars plana approach; with removal of internal limiting membrane of retina (e.g., for repair of macular hole, diabetic macular edema), includes, if performed, intraocular tamponade (i.e., air, gas or silicone oil)*), 67043 (*Vitrectomy, mechanical, pars plana approach; with removal of subretinal membrane (e.g., choroidal neovascularization), includes, if performed, intraocular tamponade (i.e., air, gas or silicone oil) and laser photocoagulation*), 67108 (*Repair of retinal detachment; with vitrectomy, any method, including, when performed, air or gas tamponade, focal endolaser photocoagulation, cryotherapy, drainage of subretinal fluid, scleral buckling, and/or removal of lens by same technique*), and 67113 (*Repair of complex retinal detachment (e.g., proliferative vitreoretinopathy, stage C–1 or greater, diabetic traction retinal detachment, retinopathy of prematurity, retinal tear of greater than 90 degrees), with vitrectomy and membrane peeling, including, when performed, air, gas, or silicone oil tamponade, cryotherapy, endolaser photocoagulation, drainage of subretinal fluid, scleral buckling, and/or removal of lens*), as potentially misvalued because there is currently no established non-facility payment rate for these global 090-day surgical procedures. These codes are complex surgical eye procedures and they require dedicated spaces, similar to facility-based spaces that are not typically found in an ophthalmologist's office, such as a well-lighted and sterile surgical theater, specific eye surgery equipment and possibly clinical staff and other medical personnel trained to assist in these surgeries and the patient's immediate post-surgery recovery, including anesthesia services. In the past, with concerns for patient safety and given the intricate and delicate nature of these surgeries, we understood that these procedures would only be performed in a well-equipped and fully staffed medical facility. This may still be the case, but this nominator suggests that these cataract and retinal procedures can be properly performed in the non-facility office, safely, effectively, and perhaps more conveniently for patients and physicians; and thus requests that we should establish non-facility RVUs under the PFS to recognize the additional resources that would be expended in the non-facility setting.

The nominator has included a list of practice expense items involved in furnishing these services in the non-facility setting to help us to consider establishing non-facility values for these codes. They include the possible number and types of clinical staff and their work time in minutes, and a list of various equipment and supplies typically needed to furnish the services described by the nominated codes.

The nominator also noted that there is projected backlog for these cataract and retinal services that may have been building up due to the COVID–19 restrictions from the past 2 years. We seek comment on the merits of continuing to value these codes only in the facility setting, as opposed to also establishing non-facility values for these cataract and retinal surgery codes. We also seek comment on any appropriate safety considerations for these codes in the non-facility setting and whether these codes are potentially misvalued. We note that in last year's CY 2022 PFS final rule with comment (86 FR 65096 through 65097), we did review CPT codes 66982, 66984, 66987, 66988, 66989, 66991, and 0671T (Cataract Removal *with* Drainage Device Insertion) and did not establish non-facility values for those services, but we did note a potential rank order anomaly when considering minimally invasive glaucoma surgeries (MIGS) and cataract surgeries together, and suggested that the AMA RUC should consider re-surveying all of these.

An interested party has nominated add-on CPT code 20931 (*Allograft, structural, for spine surgery only (List separately in addition to code for primary procedure)*) as a potentially misvalued service with respect to the physician's labor for spinal surgeries involving the use of biomechanical synthetic cage devices versus the use of structural allograft bone as it relates to a set of CPT codes related to anterior cervical discectomy and fusion (ACDF). Ordinarily, interested parties nominate a primary service code as potentially misvalued, or a primary service code and its related add-on codes, but not an add-on code alone. The valuation of an add-on code is typically developed with reference to some portion of the work (or other resource inputs) involved in furnishing the primary service code. For

example, the AMA CPT 2022 Professional Edition, page 147, states ''Use code 20931 in conjunction with codes 22319, 22532–22533, 22548–22558, 22590–22612, 22630, 22633, 22634, 22800–22812''). The primary spinal surgery codes and the add-on CPT code 20931 have not been recently reconsidered or reviewed by the AMA RUC or CMS, and no new or additional information has been included with this nomination to persuade CMS that CPT code 20931 is individually potentially misvalued. This nomination of an add-on code as potentially misvalued is similar to the nomination we discussed in the CY 2022 PFS proposed rule (86 FR 65044) of CPT code 22551 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2*) and the accompanying add-on codes.

The nominator refers to two different methods of vertebral fusion—one using biomechanical synthetic cage devices, the other using structural allograft bone; and describes a typical vertebral fusion case that uses three units of one of these products. Both of these methods of vertebral fusion are described by CPT code 22551 (includes a 90-day global period), which has a work RVU of 25.00. Both methods of vertebral fusion also involve two units of CPT code 22552 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2, each additional interspace (List separately in addition to code for primary procedure)*), which have a total work RVU of 13.00 (6.50 × 2), and 1 unit of CPT code 22846 (*Anterior instrumentation; 4 to 7 vertebral segments (List separately in addition to code for primary procedure)*), which has a work RVU of 12.40. The vertebral fusion method employing three synthetic cage devices with plate would involve three units of CPT code 22853 (*Insertion of interbody biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)*) for a total work RVU of 12.75 (4.25 × 3), and one unit of CPT code 20930 (*Allograft, morselized, or placement of osteopromotive material, for spine surgery only (List separately in addition to code for primary procedure)*) with a work RVU of 0.00 (because Medicare considers this code to be bundled into codes for other services). The nominator states that the typical vertebral fusion employing three synthetic cage devices with plate would total to 63.15 work RVUs.

In contrast, the nominator asserts that the vertebral fusion method employing structural allograft bones with plate involves the same set of services and codes (that is, one unit of CPT code 22551, two units of CPT code 22552, and one unit of CPT code 22846), but the structural allograft bone method includes CPT code 20931 (*Allograft, structural, for spine surgery only (List separately in addition to code for primary procedure)*), with a work RVU of 1.81, instead of CPT codes 22853 and 20930, for a total work RVU of 52.21. The nominator suggests that this difference in total work RVUs for the two methods of vertebral fusion, 63.15 versus 52.21, is evidence that add-on CPT code 20931 is potentially misvalued; however, we do not agree with this nominator's method of aggregating and comparing sums of work RVUs for groups of services that may be furnished together as being potentially misvalued, nor consider CPT code 20931 as the source of misvaluation within this grouping.

We understand that the nominator believes there should be an equivalent total sum payment for all services involved in vertebral fusion surgeries using either method, and that there should not be a potential incentive for physicians to prefer the method that uses synthetic cage devices because of the higher available payment amount. The nominator asserts that the total sum payment for this kind of spinal surgery using the structural allograft bone method is undervalued as compared to the total sum payment for this kind of spinal surgery using the synthetic cage method.

We note that CPT code 22853, which the commenter associates with the synthetic cage device method of vertebral fusion, is a 45-minute ZZZ-code (indicating an add-on code) with an IWPUT (intra-service work (RVU) per unit of time) of 0.0944, whereas CPT code 20931, which the commenter associates with the allograph method of vertebral fusion, is a 20-minute ZZZ-code with an IWPUT of 0.0905. Given the much longer intra-service time and greater IWPUT for CPT code 22853 than for CPT code 20931, the allograph method of vertebral fusion would be expected to have a lower total sum of work RVUs.

The nominator's description of why and how each vertebral fusion method is potentially misvalued when compared to the other does not present a situation that fits within our process for identifying individual services that are potentially misvalued using certain criteria, as described in the beginning of this section. Our determination that one or more codes are potentially misvalued generally revolves around the specific RVUs assigned to individual codes, or with the inter-code relativity between the RVUs assigned to several individual codes found within a family of codes with hierarchical relationships. CMS generally does not examine the summed differences in total RVUs (as is the case presented here), based on billing patterns for a combination of codes representing differing physician work for different methods of performing a service, and then comparing the total RVUs of each method as evidence of the potential misvaluation of codes. We do not believe that the nominator has provided sufficient evidence to demonstrate that CPT code 20931 itself is misvalued, and therefore, we are not inclined to propose this code as potentially misvalued; however, we seek additional comment and any independent analysis and studies (see the supporting documentation options listed above under ''CY 2023 Identification and Review of Potentially Misvalued Services,'' particularly in regard to any changes in the resources to providing a service) as supporting evidence from commenters in agreement or disagreement with this nomination.

See Table 6 for the listing of nominated potentially misvalued codes.

BILLING CODE 4120–01–P

TABLE 6: Interested Parties' Nominations of CPT Codes as Potentially Misvalued for CY 2023

CPT	CPT Descriptor
Home Visits codes:	
99344	New patient home visit, typically 1 hour
99345	New patient home visit, typically 75 minutes
99349	Established patient home visit, typically 40 minutes
99350	Established patient home visit, typically 1 hour
Cataract Surgery codes:	
65820	Relieve inner eye pressure
66174	Translum dil eye canal
66982	Xcapsl ctrc rmvl cplx wo ecp
66984	Xcapsl ctrc rmvl w/o ecp
66989	Xcpsl ctrc rmvl cplx insj 1+
66991	Xcapsl ctrc rmvl insj 1+
Retinal Procedure codes:	
67015	Release of eye fluid
67036	Removal of inner eye fluid
67039	Laser treatment of retina
67040	Laser treatment of retina
67041	Vit for macular pucker
67042	Vit for macular hole
67043	Vit for membrane dissect
67108	Repair detached retina
67113	Repair retinal detach cplx
Spinal Surgery code:	
20931	Allograft, structural, for spine surgery only (add-on code)

BILLING CODE 4120–01–C

D. Payment for Medicare Telehealth Services Under Section 1834(m) of the Act

As discussed in prior rulemaking, several conditions must be met for Medicare to make payment for telehealth services under the PFS. See further details and full discussion of the scope of Medicare telehealth services in the CY 2018 PFS final rule (82 FR 53006) and CY 2021 PFS final rule (85 FR 84502) and in 42 CFR 410.78 and 414.65.

1. Payment for Medicare Telehealth Services Under Section 1834(m) of the Act

a. Changes to the Medicare Telehealth Services List

In the CY 2003 PFS final rule with comment period (67 FR 79988), we established a regulatory process for adding services to or deleting services from the Medicare Telehealth Services List in accordance with section 1834(m)(4)(F)(ii) of the Act (42 CFR 410.78(f)). This process provides the public with an ongoing opportunity to submit requests for adding services, which are then reviewed by us and assigned to categories established through notice and comment rulemaking. Specifically, we assign any submitted request to add to the Medicare Telehealth Services List to one of the following two categories:

- Category 1: Services that are similar to professional consultations, office visits, and office psychiatry services that are currently on the Medicare Telehealth Services List. In reviewing these requests, we look for similarities between the requested and existing telehealth services for the roles of, and interactions among, the beneficiary, the physician (or other practitioner) at the distant site and, if necessary, the telepresenter, a practitioner who is present with the beneficiary in the originating site. We also look for similarities in the telecommunications system used to deliver the service; for example, the use of interactive audio and video equipment.
- Category 2: Services that are not similar to those on the current Medicare Telehealth Services List. Our review of these requests includes an assessment of whether the service is accurately described by the corresponding code when furnished via telehealth and whether the use of a telecommunications system to furnish the service produces demonstrated clinical benefit to the patient. Submitted evidence should include both a description of relevant clinical studies that demonstrate the service furnished by telehealth to a Medicare beneficiary improves the diagnosis or treatment of an illness or injury or improves the functioning of a malformed body part, including dates and findings, and a list and copies of published peer reviewed articles relevant to the service when furnished via telehealth. Our evidentiary standard of clinical benefit does not include minor or incidental benefits. Some examples of other clinical benefits that we consider include the following:
  - Ability to diagnose a medical condition in a patient population without access to clinically appropriate in-person diagnostic services.
  - Treatment option for a patient population without access to clinically appropriate in-person treatment options.
  - Reduced rate of complications.
  - Decreased rate of subsequent diagnostic or therapeutic interventions (for example, due to reduced rate of recurrence of the disease process).
  - Decreased number of future hospitalizations or physician visits.
  - More rapid beneficial resolution of the disease process treatment.
  - Decreased pain, bleeding, or other quantifiable symptom.
  - Reduced recovery time.

In the CY 2021 PFS final rule (85 FR 84507), we created a third category of criteria for adding services to the Medicare Telehealth Services List on a temporary basis following the end of the PHE for the COVID–19 pandemic: Category 3. This new category describes services that were added to the Medicare Telehealth Services List during the PHE for which there is likely to be clinical benefit when furnished via telehealth, but there is not yet sufficient evidence available to consider the services for permanent addition under the Category 1 or Category 2 criteria. Services added on a temporary, Category 3 basis will ultimately need to meet the criteria under Category 1 or 2 in order to be permanently added to the Medicare Telehealth Services List. To add specific services on a Category 3 basis, we conducted a clinical assessment to identify those services for which we could foresee a reasonable potential likelihood of clinical benefit when furnished via telehealth. We considered the following factors:

++ Whether, outside of the circumstances of the PHE for COVID–19, there are concerns for patient safety if the service is furnished as a telehealth service.

++ Whether, outside of the circumstances of the PHE for COVID–19, there are concerns about whether the provision of the service via telehealth is likely to jeopardize quality of care.

++ Whether all elements of the service could fully and effectively be performed by a remotely located clinician using two-way, audio-video telecommunications technology.

In the CY 2021 PFS final rule (85 FR 84507), we also temporarily added several services to the Medicare Telehealth Services List using the Category 3 criterion described above. We assessed codes that were temporarily available on the list for the duration of the PHE to determine their appropriateness for inclusion on the Medicare Telehealth Services List on a Category 3 basis. We have reassessed the services that are temporarily available via telehealth for the PHE, based on both information provided by interested parties and our own internal review. We have assessed whether or not these services can, outside of the circumstances of the PHE, be furnished using the full scope of service elements via two-way, audio-video communication technology, without jeopardizing patient safety or quality of care, and we now believe that there are additional services that would be appropriate for addition to the Medicare Telehealth Services List on a Category 3 basis that we did not identify in the CY 2021 rulemaking. In this proposed rule, we are proposing to add these additional services to the Medicare Telehealth Services List on a Category 3 basis, as further discussed below.

The Medicare Telehealth Services List, including the additions described later in this section, is available on the CMS website at *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html*.

Beginning in CY 2019, we stated that for CY 2019 and onward, we intend to accept requests through February 10, consistent with the deadline for our receipt of code valuation recommendations from the RUC (83 FR 59491). For CY 2023, requests to add services to the Medicare Telehealth Services List must have been submitted and received by February 10, 2022. Each request to add a service to the Medicare Telehealth Services List must have included any supporting documentation the requester wishes us to consider as we review the request. Because we use the annual PFS rulemaking process as the vehicle to make changes to the Medicare Telehealth Services List, requesters are advised that any information submitted as part of a request is subject to public disclosure for this purpose. For more information on submitting a request in the future to add services to the Medicare Telehealth Services List, including where to submit these requests, see our website at *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/index.html*.

b. Requests To Add Services to the Medicare Telehealth Services List for CY 2023

Under our current policy, we add services to the Medicare Telehealth Services List on a Category 1 basis when we determine that they are similar to services on the existing Medicare Telehealth Services List for the roles of, and interactions among, the beneficiary, physician (or other practitioner) at the distant site and, if necessary, the telepresenter. As we stated in the CY 2012 PFS final rule with comment period (76 FR 73098), we believe that the Category 1 criterion not only streamlines our review process for publicly requested services that fall into this category, but also expedites our ability to identify codes for the Medicare Telehealth Services List that resemble those services already on the Medicare Telehealth Services List. We add services on a Category 2 basis when the service does not fall within Category 1, and based upon our assessment of whether the services are accurately described by the corresponding code when delivered via telehealth and whether the use of a telecommunications system to deliver the service produces demonstrated clinical benefit to the patient. We add services on a temporary Category 3 basis when the services were temporarily included on the Medicare Telehealth Services List during the PHE, and we find that there is likely to be clinical benefit when furnished via telehealth, but there is not yet sufficient evidence available to consider the services for permanent addition under the Category 1 or Category 2 criteria.

We received several requests to permanently add various services to the Medicare Telehealth Services List effective for CY 2023. We found that none of the requests we received by the February 10th submission deadline met our Category 1 or Category 2 criteria for permanent addition to the Medicare Telehealth Services List. We also assessed the appropriateness of adding these services to the Medicare Telehealth Services List on a Category 3 basis instead.

We are not proposing changes to the length of time the services that we temporarily included on a Category 3 basis will remain on the Medicare Telehealth Services List; the services we temporarily included on the Medicare Telehealth Services List on a Category 3 basis will continue to be included through the end of CY 2023. In the event that the PHE extends well into CY 2023, we may consider revising this policy.

We are proposing to add some services to the Medicare Telehealth Services List on a Category 3 basis through the end of 2023, some of which we had not previously added to the Medicare Telehealth List during the PHE, but will be added on a subregulatory basis as provided in § 410.78(f) of our regulations. For some of these services, we have received information from interested parties suggesting potential clinical benefit. For others, we continue to believe there is sufficient evidence of potential clinical benefit to warrant allowing additional time for interested parties to gather data to support their possible inclusion on the Medicare Telehealth Services List on a Category 1 or 2 basis. The Medicare Telehealth Services List requests for CY 2023 are listed in Table 7.

Additionally, the Consolidated Appropriations Act, 2022 (CAA, 2022) (Pub. L. 117–103, March 15, 2022) amended section 1834(m) of the Act to extend a number of flexibilities that are in place during the PHE for COVID–19 for 151 days after the end of the PHE. To align the availability of these services with those flexibilities

extended under the Act, we are proposing to continue to allow certain telehealth services that would otherwise not be available via telehealth after the expiration of the PHE to remain on the Medicare Telehealth Services List for 151 days after the expiration of the PHE.

BILLING CODE 4120–01–P

TABLE 7: Services Requested for Addition to the Medicare Telehealth Services List for CY 2023

HCPCS	Long Descriptor	Basis
	Code Family	
	Lactation classes	
S9443	Lactation classes, non-physician provider, per session	
	Telephone E/M	
99441	Telephone evaluation and management service by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 5-10 minutes of medical discussion	3
99442	Telephone evaluation and management service by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 11-20 minutes of medical discussion	3
99443	Telephone evaluation and management service by a physician or other qualified health care professional who may report evaluation and management services provided to an established patient, parent, or guardian not originating from a related E/M service provided within the previous 7 days nor leading to an E/M service or procedure within the next 24 hours or soonest available appointment; 21-30 minutes of medical discussion	3
	Therapy	
90901	Biofeedback training by any modality	1
97110	Therapeutic procedure, 1 or more areas, each 15 minutes; therapeutic exercises to develop strength and endurance, range of motion and flexibility	1
97112	Therapeutic procedure, 1 or more areas, each 15 minutes; neuromuscular reeducation of movement, balance, coordination, kinesthetic sense, posture, and/or proprioception for sitting and/or standing activities	1
97116	Therapeutic procedure, 1 or more areas, each 15 minutes; gait training (includes stair climbing)	1
97150	Therapeutic procedure(s), group (2 or more individuals)	1
97161	Physical therapy evaluation: low complexity, requiring these components: A history with no personal factors and/or comorbidities that impact the plan of care; An examination of body system(s) using standardized tests and measures addressing 1-2 elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; A clinical presentation with stable and/or uncomplicated characteristics; and Clinical decision making of low complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 20 minutes are spent face-to-face with the patient and/or family.	1
97162	Physical therapy evaluation: moderate complexity, requiring these components: A history of present problem with 1-2 personal factors and/or comorbidities that impact the plan of care; An examination of body systems using standardized tests and measures in addressing a total of 3 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; An evolving clinical presentation with changing characteristics; and Clinical decision making of moderate complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 30 minutes are spent face-to-face with the patient and/or family.	1
97163	Physical therapy evaluation: high complexity, requiring these components: A history of present problem with 3 or more personal factors and/or comorbidities that impact the plan of care; An examination of body systems using standardized tests and measures addressing a total of 4 or more elements from any of the following: body structures and functions, activity limitations, and/or participation restrictions; A clinical presentation with unstable and unpredictable characteristics; and Clinical decision making of	1

HCPCS	Long Descriptor	Basis
	high complexity using standardized patient assessment instrument and/or measurable assessment of functional outcome. Typically, 45 minutes are spent face-to-face with the patient and/or family.	
97164	Re-evaluation of physical therapy established plan of care, requiring these components: An examination including a review of history and use of standardized tests and measures is required; and Revised plan of care using a standardized patient assessment instrument and/or measurable assessment of functional outcome Typically, 20 minutes are spent face-to-face with the patient and/or family.	1
97530	Therapeutic activities, direct (one-on-one) patient contact (use of dynamic activities to improve functional performance), each 15 minutes	1
97535	Self-care/home management training (e.g., activities of daily living (ADL) and compensatory training, meal preparation, safety procedures, and instructions in use of assistive technology devices/adaptive equipment) direct one-on-one contact, each 15 minutes	1
97537	Community/work reintegration training (e.g., shopping, transportation, money management, avocational activities and/or work environment/modification analysis, work task analysis, use of assistive technology device/adaptive equipment), direct one-on-one contact, each 15 minutes	1
97542	Wheelchair management (e.g., assessment, fitting, training), each 15 minutes	1
97750	Physical performance test or measurement (e.g., musculoskeletal, functional capacity), with written report, each 15 minutes	1
97755	Assistive technology assessment (e.g., to restore, augment or compensate for existing function, optimize functional tasks and/or maximize environmental accessibility), direct one-on-one contact, with written report, each 15 minutes	1
97763	Orthotic(s)/prosthetic(s) management and/or training, upper extremity(ies), lower extremity(ies), and/or trunk, subsequent orthotic(s)/prosthetic(s) encounter, each 15 minutes	1
98960	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; individual patient	1
98961	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 2-4 patients	1
98962	Education and training for patient self-management by a qualified, nonphysician health care professional using a standardized curriculum, face-to-face with the patient (could include caregiver/family) each 30 minutes; 5-8 patients	1
Gastrointestinal tract imaging		
91110	Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), esophagus through ileum, with interpretation and report	3
Ambulatory continuous glucose monitoring		
95251	Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; analysis, interpretation and report	N/A
Electronic analysis of implanted neurostimulator pulse generator/transmitter		
95976	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with simple cranial nerve neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional	1
95977	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with complex cranial nerve neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional	1
95970	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain, cranial nerve, spinal cord, peripheral nerve, or sacral nerve, neurostimulator pulse generator/transmitter, without programming	3
95983	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, first 15 minutes face-to-face time with physician or other qualified health care professional	3
95984	Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters,	3

HCPCS	Long Descriptor	Basis
	and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, each additional 15 minutes face-to-face time with physician or other qualified health care professional (List separately in addition to code for primary procedure)	
	Adaptive behavior treatment and Behavior identification assessment	
97151	Behavior identification assessment, administered by a physician or other qualified health care professional, each 15 minutes of the physician's or other qualified health care professional's time face-to-face with patient and/or guardian(s)/caregiver(s) administering assessments and discussing findings and recommendations, and non-face-to-face analyzing past data, scoring/interpreting the assessment, and preparing the report/treatment plan	2
97152	Behavior identification-supporting assessment, administered by one technician under the direction of a physician or other qualified health care professional, face-to-face with the patient, each 15 minutes	2
97153	Adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with one patient, each 15 minutes	2
97154	Group adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with two or more patients, each 15 minutes	2
97155	Adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, which may include simultaneous direction of technician, face-to-face with one patient, each 15 minutes	2
97156	Family adaptive behavior treatment guidance, administered by physician or other qualified health care professional (with or without the patient present), face-to-face with guardian(s)/caregiver(s), each 15 minutes	2
97157	Multiple-family group adaptive behavior treatment guidance, administered by physician or other qualified health care professional (without the patient present), face-to-face with multiple sets of guardians/caregivers, each 15 minutes	2
97158	Group adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, face-to-face with multiple patients, each 15 minutes	2
0362T	Behavior identification supporting assessment, each 15 minutes of technicians' time face-to-face with a patient, requiring the following components: administration by the physician or other qualified health care professional who is on site; with the assistance of two or more technicians; for a patient who exhibits destructive behavior; completion in an environment that is customized to the patient's behavior.	2
0373T	Adaptive behavior treatment with protocol modification, each 15 minutes of technicians' time face-to-face with a patient, requiring the following components: administration by the physician or other qualified health care professional who is on site; with the assistance of two or more technicians; for a patient who exhibits destructive behavior; completion in an environment that is customized to the patient's behavior.	2

BILLING CODE 4120–01–C

We remind interested parties that the criterion for adding services to the Medicare Telehealth Services List under Category 1 is that the requested services are similar to professional consultations, office visits, and/or office psychiatry services that are currently on the Medicare Telehealth Services List, and that the criterion for adding services under Category 2 is that there is evidence of clinical benefit if provided as telehealth. As explained below, we find that none of the requested services listed in Table 7 met the Category 1 or 2 criteria.

We received a request to permanently add CPT code S9443 (*Lactation classes, non-physician provider, per session*) to the Medicare Telehealth Services List. This service has a status code of ''I,'' which means that it is not valid for Medicare billing purposes. We understand that this is a temporary code established by a private payor for private payor use, and thus, it is not valid for nor payable by Medicare. As such, this code is not separately billable under the PFS. We generally do not add services to the Medicare Telehealth Services List unless they are separately billable under the PFS. Outside of the circumstances of the PHE, the Medicare Telehealth Services List only includes services that are covered if they are furnished without the use of telecommunication technology in-person. Because CPT code S9443 is not billable under the PFS when furnished in-person, we do not believe it would be appropriate to allow the service to be billed separately when furnished as a Medicare telehealth service. As noted in the CY 2018 PFS final rule (82 FR 53011), if a service does not describe a service typically furnished in-person, it would not be considered a telehealth service under the applicable provisions of the statute. We are not proposing to add CPT code S9443 to the Medicare Telehealth Services List.

(1) Therapy Services

We received requests to add Therapy Procedures: CPT codes 97110, 97112, 97116, 97150, and 97530; Physical Therapy Evaluations: CPT codes 97161–97164; Therapy Personal Care services: CPT codes 97535, 97537, and 97542; and Therapy Tests and Measurements services: CPT codes 97750, 97755, and 97763, to the Medicare Telehealth Services List on a Category 1 basis.

In the CY 2022 PFS final rule (86 FR 65051), we determined that these services did not meet the Category 1 criteria for addition to the Medicare Telehealth Services List because they involve direct observation and/or physical contact between the practitioner and the patient and, in many instances, are therapeutic in nature, and that they did not meet Category 2 criteria, because we thought

that the request did not provide sufficient detail to determine whether all of the necessary elements of the service could be furnished remotely. We continue to believe this is the case. We still do not have sufficient information to determine whether these services meet the Category 2 criteria. However, we note that some of these codes, including codes 97110, 97112, 97116, 97150, 97530, 97161–97164, 97535, 97542, 97750, and 97755 have been added to the list on a temporary basis for the duration of the PHE.

In assessing the evidence that was supplied by interested parties in support of adding these services to the Medicare Telehealth Services List on a Category 2 basis, we concluded that there was not sufficient information to determine whether all of the necessary elements of these services could be furnished remotely. Information regarding safety, appropriateness, and that indicates that all elements of a given CPT code can be furnished via telehealth is still needed to assess whether these services meet the Category 2 criteria. However, we also believe that the therapy services that are currently on the Medicare Telehealth Services List on a temporary basis for the PHE (including CPT codes 97150, 97530, and 97542), but are not currently included on a Category 3 basis, may continue to be furnished safely via two-way, audio-video communication technology outside of the circumstances of the PHE.

Therefore, we are proposing that CPT codes 97150, 97530, and 97542 (the set of therapy services that are currently on the Medicare Telehealth Services List on a temporary basis for the PHE), should be added to the Medicare Telehealth Services List through the end of CY 2023 on a temporary, Category 3 basis, to allow time to gather additional data that could support their inclusion on the list on a permanent basis. Therefore, we are proposing to add CPT codes 97150, 97530, and 97542 to the Medicare Telehealth Services List on a Category 3 basis. CPT codes 97110, 97112, 97116, 97161–97164, 97535, 97750, and 97755 will continue to be available on the Medicare Telehealth Services List on a Category 3 basis. We anticipate that keeping these services on the Medicare Telehealth Services List on a Category 3 basis, as proposed, through the end of CY 2023 would preserve access to care and promote health equity, and based on information provided by interested parties and internal review, we believe that they may safely be furnished as telehealth outside of the circumstances of the PHE through the end of CY 2023. However, we remind readers that the practitioners who primarily furnish these services, physical therapists, are not, outside the circumstances of the PHE (and the 151 day period following the expiration of the PHE), authorized to furnish Medicare telehealth services. We note that if the PHE and the 151 day period following the expiration of the PHE both end in CY 2023, the pre-PHE rules will take effect, and these services could no longer be furnished by therapists as Medicare telehealth services.

Certain other requested therapy services, namely CPT codes 97537, 97763, 90901, and 98960–98962 are not currently on the Medicare Telehealth Services List; however, we are adding these services to the Medicare Telehealth Services List on a temporary basis during the PHE, in accordance with § 410.78(f). As explained below in section II.D.1.d. of this proposed rule, services included on the Medicare Telehealth Services List on a temporary basis during the PHE that have not been added to the list on a Category 3 basis will remain on the list for 151 days following the end of the PHE. Furthermore, we are proposing to add CPT codes 97537, 97763, 90901, and 98960–98962 to the Medicare Telehealth Services List on a Category 3 basis through the end of CY 2023. Our clinical analyses of these services indicate that they can be furnished in full using two-way, audio and video technology during the circumstances of the PHE, and information provided by requestors indicates that there may be clinical benefit; however, there is not yet sufficient evidence available to consider the services for permanent addition to the Medicare Telehealth Services List under the Category 1 or Category 2 criteria. Including these services on the Medicare Telehealth Services List during the PHE and through CY 2023 would allow additional time for the development of evidence for CMS to consider when evaluating these services for potential permanent addition to the Medicare Telehealth Services List on a Category 1 or 2 basis. We continue to encourage commenters to supply additional information in support of adding these services to the Medicare Telehealth Services List on a permanent basis, including information regarding the safety and appropriateness of furnishing these services via telehealth.

(2) Telephone E/M Services

We have also received requests to temporarily add Telephone E/M visit codes, CPT codes 99441, 99442, and 99443 to the Medicare Telehealth Services List on a Category 3 basis. In the March 31, 2020 interim final rule with comment period (IFC), we established separate payment for audio-only telephone E/M services (85 FR 19264 through 19266) for the duration of the PHE for the COVID–19 pandemic. Although these services were previously considered non-covered under the PFS, in the context of the PHE for COVID–19 and with the goal of reducing exposure risks associated with COVID–19 (especially in situations when two-way, audio and video technology is not available to furnish a Medicare telehealth service), we believed there were circumstances where prolonged, audio-only communication between the practitioner and the patient could be clinically appropriate, yet not fully replace a face-to-face visit. In the May 8, 2020 COVID–19 IFC, we noted that interested parties had informed us that use of audio-only services was more prevalent than we had previously considered, especially because many beneficiaries were not using video-enabled communication technology from their homes. In other words, there were many cases where practitioners who would ordinarily furnish audio-video telehealth or in-person visits to evaluate and manage patients' medical concerns were instead using audio-only interactions to manage more complex care (85 FR 27589 through 27590). While we had previously acknowledged the likelihood that, under the circumstances of the PHE for COVID–19, more time would be spent interacting with the patient via audio-only technology, we stated that the intensity of furnishing an audio-only visit to a beneficiary during the unique circumstances of the PHE for COVID–19 was not accurately captured by the valuation of these services that we established in the March 31, 2020 IFC (85 FR 27590). This would be particularly true to the extent that these audio-only services are serving as a substitute for office/outpatient (O/O) Medicare telehealth visits for beneficiaries not using video-enabled telecommunications technology, which is contrary to the situation we anticipated when establishing separate payment for them in the March 31, 2020 IFC. In the May 8, 2020 COVID–19 IFC, we stated that, given our understanding that these audio-only services were being furnished primarily as a replacement for care that would otherwise be reported as an in-person or telehealth visit using the O/O E/M codes, we established new RVUs for the telephone E/M services based on crosswalks to the most analogous O/O E/M codes, based on the time

requirements for the telephone codes and the times assumed for valuation for purposes of the O/O E/M codes. Specifically, we crosswalked the levels 2–4 O/O E/Ms for established patients, as described by CPT codes 99212, 99213, and 99214, to CPT codes 99441, 99442, and 99443, respectively. Additionally, we stated that, given our understanding that these audio-only services were being furnished as substitutes for O/O E/M services, we recognized that they should be considered as telehealth services, and added them to the Medicare Telehealth Services List for the duration of the PHE for COVID–19 (85 FR 27590).

In the CY 2022 PFS final rule (86 FR 65055), in response to requests that these codes be added to the Medicare Telehealth Services List on a Category 3 basis, we stated that we were finalizing a change to the definition of ''telecommunications system'' to allow telehealth services for the diagnosis, evaluation, and treatment of mental health conditions to be furnished through audio-only technology in certain circumstances after the end of the PHE. For example, the O/O E/M codes are on the Medicare Telehealth Services List permanently and when used to describe care for mental health conditions, will be reportable when furnished via audio-only technology to patients in their homes. Since audio-only telecommunications technology can be used to furnish mental health telehealth services to patients in their homes, the addition of these codes to the Medicare Telehealth Services List is unnecessary for mental health telehealth services. For telehealth services other than mental health care, we stated that we believe that two-way, audio-video communications technology is the appropriate standard that will apply for telehealth services after the PHE ends. Further, we note that section 1834(m)(2)(A) of the Act requires that payment to a distant site physician or practitioner that furnishes Medicare telehealth services to an eligible telehealth individual be equal to the amount that would have been paid under Medicare if such physician or practitioner had furnished the service without a telecommunications system. We believe that the statute requires that telehealth services be so analogous to in-person care such that the telehealth service is essentially a substitute for a face-to-face encounter. However, these audio-only telephone E/M services are inherently non-face-to-face services, since they are furnished exclusively through remote, audio-only communications. Outside the circumstances of the PHE, the telephone E/M services would not be analogous to in-person care; nor would they be a substitute for a face-to-face encounter. Therefore, we do not believe it would be appropriate for these codes to remain on the Medicare Telehealth Services List after the end of the PHE and the 151-day post-PHE extension period. Accordingly, we are not proposing to keep these telephone E/M services on the Medicare Telehealth Services List after that period on a Category 3 basis, because the codes describe services that can only be furnished using audio-only telecommunications technology, and outside of the circumstances of the PHE, they do not describe services that are a substitute for an in-person visit. While we acknowledge that audio-only technology can be used to furnish mental health telehealth services to patients in their homes under certain circumstances after the PHE ends, two-way, audio-video communications technology continues to be the appropriate standard that will apply for Medicare telehealth services after the PHE and the 151-day extension period. As we noted in the CY 2021 PFS final rule (85 FR 84535), we will assign these Telephone E/M visit codes (CPT codes 99441, 99442, and 99443) a ''bundled'' status after the end of the PHE and the 151-day extension period, and we will post the RUC-recommended RVUs for these codes in accordance with our usual practice.

(3) GI Tract Imaging and Continuous Glucose Monitoring

We received requests to add CPT codes describing GI Tract Imaging, CPT code 91110 (*Gastrointestinal tract imaging, intraluminal (e.g., capsule endoscopy), esophagus through ileum, with interpretation and report*) and Ambulatory Continuous Glucose Monitoring, CPT code 95251 (*Ambulatory continuous glucose monitoring of interstitial tissue fluid via a subcutaneous sensor for a minimum of 72 hours; analysis, interpretation and report*), to the Medicare Telehealth Services List on a Category 3 basis. We believe these codes may describe services that are inherently non-face-to-face services, (the patient need not be present in order for the service to be furnished in its entirety), and therefore, they do not describe services that are a substitute for an in-person visit. As stated earlier, we believe that the statute requires that telehealth services be so analogous to in-person care such that the telehealth service is essentially a substitute for a face-to-face encounter. For this and other reasons, we are not proposing to add these services to the Medicare Telehealth Services List on a Category 3 basis; we do not believe these CPT codes describe services that are a substitute for an in-person visit, and we believe that services that are not inherently face-to-face services are not services that can be furnished as Medicare telehealth services. Even so, we are interested in information that would help us to understand whether these services would meet the criteria for inclusion on the Medicare Telehealth Services List either for the PHE, as Category 3 services, or permanently on a Category 1 or 2 basis, given our questions as to whether they are inherently non-face-to-face services, and therefore, may not fit within the scope of services that could be furnished as Medicare telehealth services. Therefore, we are also seeking comment on whether these services would involve an in-person service when furnished without the use of a telecommunications system.

(4) Neurostimulator Pulse Generator/Transmitter

We received requests to add codes describing the electronic analysis of an implanted neurostimulator pulse generator/transmitter to the Medicare Telehealth Services List. These included a request to add CPT codes 95976 (*Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with simple cranial nerve neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional*) and 95977 (*Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with complex cranial nerve neurostimulator pulse generator/transmitter programming by physician or other qualified health care professional*) permanently on a Category 1 basis, as well as a request to add CPT codes 95970 (*Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s],*

interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain, cranial nerve, spinal cord, peripheral nerve, or sacral nerve, neurostimulator pulse generator/transmitter, without programming), 95983 (*Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, first 15 minutes face-to-face time with physician or other qualified health care professional*), and 95984 (*Electronic analysis of implanted neurostimulator pulse generator/transmitter (e.g., contact group[s], interleaving, amplitude, pulse width, frequency [Hz], on/off cycling, burst, magnet mode, dose lockout, patient selectable parameters, responsive neurostimulation, detection algorithms, closed loop parameters, and passive parameters) by physician or other qualified health care professional; with brain neurostimulator pulse generator/transmitter programming, each additional 15 minutes face-to-face time with physician or other qualified health care professional (List separately in addition to code for primary procedure)*) to the Medicare Telehealth Services List on a temporary Category 3 basis.

The request to add CPT codes 95976 and 95977, which are codes that describe analysis of cranial nerve neurostimulation, indicated that the ability to fully furnish this service using two-way, audio-video communication technology was forthcoming, but is currently unavailable. Therefore, we are not proposing to add CPT codes 95976 and 95977 to the Medicare Telehealth Services List, because the full scope of service elements described by these codes cannot currently be furnished via two-way, audio-video communication technology. However, we will consider additional evidence regarding the ability to furnish these services as telehealth services, such as information indicating that current technology has evolved, as it becomes available for future rulemaking. We are also not proposing to add them on a Category 1 basis because they do not describe services that are similar to professional consultations, office visits, and office psychiatry services that are currently on the Medicare Telehealth Services List.

With regard to CPT codes 95970, 95983, and 95984, which describe general brain nerve neurostimulation, we have some concerns about whether the full scope of service elements could be furnished via two-way, audio-video communication technology, particularly since it is unclear whether the connection between the implanted device and the analysis/calibration equipment can be done remotely. Additionally, we are concerned about the immediate safety of the patient if the calibration of the neurostimulator were done incorrectly or if some other problem occurred. However, we did include these services on the Medicare Telehealth Services List on a temporary basis during the PHE, and Medicare claims data suggest that these services are being provided via telehealth. Based on this information, we believe there is some possible clinical benefit for these services when furnished via telehealth; however, there is not yet sufficient evidence available to consider the services for permanent addition to the Medicare Telehealth Services List under the Category 1 or Category 2 criteria. With that said, CPT codes 95970, 95983, and 95984 do meet the criteria for temporary inclusion on the Medicare Telehealth Services List on a Category 3 basis. Therefore, we are proposing to add CPT codes 95970, 95983, and 95984 to the Medicare Telehealth Services List on a Category 3 basis, while soliciting comment on our concerns regarding patient safety and whether these services are appropriate for inclusion on the Medicare Telehealth Services List outside the circumstances of the PHE.

(5) Emotional/Behavior Assessment, Psychological, or Neuropsychological Testing and Evaluation Services

We received requests to add a number of emotional/behavior assessment, psychological, or neuropsychological testing and evaluation services, described by CPT codes 97151 (*Behavior identification assessment, administered by a physician or other qualified health care professional, each 15 minutes of the physician's or other qualified health care professional's time face-to-face with patient and/or guardian(s)/caregiver(s) administering assessments and discussing findings and recommendations, and non-face-to-face analyzing past data, scoring/interpreting the assessment, and preparing the report/treatment plan*), 97152 (*Behavior identification-supporting assessment, administered by one technician under the direction of a physician or other qualified health care professional, face-to-face with the patient, each 15 minutes*), 97153 (*Adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with one patient, each 15 minutes*), 97154 (*Group adaptive behavior treatment by protocol, administered by technician under the direction of a physician or other qualified health care professional, face-to-face with two or more patients, each 15 minutes*), 97155 (*Adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, which may include simultaneous direction of technician, face-to-face with one patient, each 15 minutes*), 97156 (*Family adaptive behavior treatment guidance, administered by physician or other qualified health care professional (with or without the patient present), face-to-face with guardian(s)/caregiver(s), each 15 minutes*), 97157 (*Multiple-family group adaptive behavior treatment guidance, administered by physician or other qualified health care professional (without the patient present), face-to-face with multiple sets of guardians/caregivers, each 15 minutes*), 97158 (*Group adaptive behavior treatment with protocol modification, administered by physician or other qualified health care professional, face-to-face with multiple patients, each 15 minutes*), 0362T (*Behavior identification supporting assessment, each 15 minutes of technicians' time face-to-face with a patient, requiring the following components: administration by the physician or other qualified health care professional who is on site; with the assistance of two or more technicians; for a patient who exhibits destructive behavior; completion in an environment that is customized to the patient's behavior.*), and 0373T (*Adaptive behavior treatment with protocol modification, each 15 minutes of technicians' time face-to-face with a patient, requiring the following components: administration by the physician or other qualified health care professional who is on site; with the assistance of two or more technicians; for a patient who exhibits destructive behavior; completion in an environment that is customized to the patient's behavior.*) to the Medicare Telehealth Services List permanently on a Category 2 basis. These services are currently on

the Medicare Telehealth Services List temporarily for the duration of the PHE. We believe that, for these services, there is likely to be clinical benefit when furnished via telehealth, and therefore, they meet the criteria for temporary inclusion on a Category 3 basis. We did not identify these services during our initial assessment of services that should be temporarily available on the Medicare Telehealth Services List on a Category 3 basis in the CY 2021 rulemaking; however, we are now proposing to include these services on the Medicare Telehealth Services List on a Category 3 basis, in light of information we received from the requestors describing the potential clinical benefit of these services when furnished via telehealth. However, we do have concerns regarding whether, outside the circumstances of the PHE, the full scope of service elements can occur in a manner that does not jeopardize quality of care, whether this patient population could be fully assessed via interactive audio-video technology, and whether these services could be conducted in a way that maintains the safety of the beneficiary. This patient population often includes patients with moderate to severe challenges in oral communication, and they may require close observation of their movements within all of their environmental cues, which include, for instance, smell, sound, and colors around the room. We are concerned that two-way, audio and video communications technology would not fully capture these behavioral nuances. We believe more time may be necessary to develop evidence that could support the decision to add these services to the Medicare Telehealth Services List permanently on a Category 1 or Category 2 basis. We are soliciting comment on our patient safety concerns.

c. Other Services Proposed for Addition to the Medicare Telehealth Services List

As discussed above, there are services that are included on the Medicare Telehealth Services List temporarily during the PHE for which there is likely to be clinical benefit when furnished via telehealth, but there is not yet sufficient evidence available to consider the services for permanent addition to the list under the Category 1 or Category 2 criteria. In addition to the services discussed above that we are proposing for addition to the Medicare Telehealth Services List on a Category 3 basis in response to requests, we are also proposing to add a number of services to the list on a Category 3 basis that are currently included on the Medicare Telehealth Services List temporarily during the PHE. These services would be included on the Medicare Telehealth Services List through 2023 to allow us to evaluate data that may support their permanent addition to the list on a Category 1 or Category 2 basis.

The services we are proposing for inclusion to the Medicare Telehealth Services List on a Category 3 basis include CPT codes 90875 (*Individual psychophysiological therapy incorporating biofeedback training by any modality (face-to-face with the patient), with psychotherapy (e.g., insight oriented, behavior modifying or supportive psychotherapy); 30 minutes*), 92012 (*Ophthalmological services: medical examination and evaluation, with initiation or continuation of diagnostic and treatment program; intermediate, established patient*), 92014 (*Ophthalmological services: medical examination and evaluation, with initiation or continuation of diagnostic and treatment program; comprehensive, established patient, 1 or more visits*), 92507 (*Treatment of speech, language, voice, communication, and/or auditory processing disorder; individual*), 94005 (*Home ventilator management care plan oversight of a patient (patient not present) in home, domiciliary or rest home (e.g., assisted living) requiring review of status, review of laboratories and other studies and revision of orders and respiratory care plan (as appropriate), within a calendar month, 30 minutes or more*), 96105 (*Assessment of aphasia (includes assessment of expressive and receptive speech and language function, language comprehension, speech production ability, reading, spelling, writing, e.g., by Boston Diagnostic Aphasia Examination*) with interpretation and report, per hour), 96110 (*Developmental screening (e.g., developmental milestone survey, speech and language delay screen), with scoring and documentation, per standardized instrument*), 96112 (*Developmental test administration (including assessment of fine and/or gross motor, language, cognitive level, social, memory and/or executive functions by standardized developmental instruments when performed), by physician or other qualified health care professional, with interpretation and report; first hour*), 96113 (*Developmental test administration (including assessment of fine and/or gross motor, language, cognitive level, social, memory and/or executive functions by standardized developmental instruments when performed), by physician or other qualified health care professional, with interpretation and report; each additional 30 minutes (List separately in addition to code for primary procedure)*), 96127 (*Brief emotional/behavioral assessment (e.g., depression inventory, attention-deficit/hyperactivity disorder [ADHD] scale), with scoring and documentation, per standardized instrument),* 96170 (*Health behavior intervention, family (without the patient present), face-to-face; initial 30 minutes*), 96171 (*Health behavior intervention, family (without the patient present), face-to-face; each additional 15 minutes (List separately in addition to code for primary service)*), 97129 (*Therapeutic interventions that focus on cognitive function (e.g., attention, memory, reasoning, executive function, problem solving, and/or pragmatic functioning) and compensatory strategies to manage the performance of an activity (e.g., managing time or schedules, initiating, organizing, and sequencing tasks), direct (one-on-one) patient contact; initial 15 minutes*), 97130 (*Therapeutic interventions that focus on cognitive function (e.g., attention, memory, reasoning, executive function, problem solving, and/or pragmatic functioning) and compensatory strategies to manage the performance of an activity (e.g., managing time or schedules, initiating, organizing, and sequencing tasks), direct (one-on-one) patient contact; each additional 15 minutes (List separately in addition to code for primary procedure)*), and 99473 (*Self-measured blood pressure using a device validated for clinical accuracy; patient education/training and device calibration*). Our analyses of these services indicate that there is some evidence of possible clinical benefit associated with these services when furnished via telehealth. We believe these services can safely be furnished via real-time, audio and visual interactive telecommunications under the circumstances of the PHE, but there is not yet sufficient evidence available to consider the services for permanent addition to the Medicare Telehealth Services List under the Category 1 or Category 2 criteria.

Some audiology testing services are currently temporarily available on the Medicare Telehealth Services List for the duration of the PHE. These are CPT codes 92550 (*Tympanometry and reflex threshold measurements*), 92552 (*Pure tone audiometry (threshold); air only*), 92553 (*Pure tone audiometry (threshold); air and bone*), 92555 (*Speech audiometry threshold;*), 92556 (*Speech audiometry threshold; with speech recognition*), 92557 (*Comprehensive audiometry threshold*

evaluation and speech recognition (92553 and 92556 combined)), 92563 (*Tone decay test*), 92565 (*Stenger test, pure tone*), 92567 (*Tympanometry (impedance testing)*), 92568 (*Acoustic reflex testing, threshold*), 92570 (*Acoustic immittance testing, includes tympanometry (impedance testing), acoustic reflex threshold testing, and acoustic reflex decay testing*), 92587 (*Distortion product evoked otoacoustic emissions; limited evaluation (to confirm the presence or absence of hearing disorder, 3–6 frequencies) or transient evoked otoacoustic emissions, with interpretation and report*), 92588 (*Distortion product evoked otoacoustic emissions; comprehensive diagnostic evaluation (quantitative analysis of outer hair cell function by cochlear mapping, minimum of 12 frequencies), with interpretation and report*), 92601 (*Diagnostic analysis of cochlear implant, patient younger than 7 years of age; with programming*), 92625 (*Assessment of tinnitus (includes pitch, loudness matching, and masking)*), 92626 (*Evaluation of auditory function for surgically implanted device(s) candidacy or postoperative status of a surgically implanted device(s); first hour*), 92627 (*Evaluation of auditory function for surgically implanted device(s) candidacy or postoperative status of a surgically implanted device(s); each additional 15 minutes (List separately in addition to code for primary procedure)*). We have received information that, during the PHE, certain practitioners have developed the capacity to perform these services using remote technology including specialized equipment inside an audiometric soundproof booth. We believe that, in circumstances in which such equipment is available at the originating site, these services can be furnished in a way in which all of the elements of the services are met and that there is likely to be a clinical benefit when these services are furnished via telehealth. Therefore, we are proposing to add these services to the Medicare Telehealth Services List on a Category 3 basis, which would allow these services to be available via telehealth through the end of CY 2023. We are soliciting comments regarding how widespread the availability of this remote technology is, and whether interested parties believe these services can be furnished in a way that does not jeopardize patient safety or quality of care when these services are furnished remotely.

Additionally, as discussed in section II.F. of this proposed rule, we are proposing to create HCPCS codes GXXX1 (*Prolonged hospital inpatient or observation care evaluation and management service(s) beyond the total time for the primary service (when the primary service has been selected using time on the date of the primary service); each additional 15 minutes by the physician or qualified healthcare professional, with or without direct patient contact (list separately in addition to CPT codes 99223, 99233, and 99236 for hospital inpatient or observation care evaluation and management services). (Do not report GXXX1 on the same date of service as other prolonged services for evaluation and management 99358, 99359, 993X0). (Do not report GXXX1 for any time unit less than 15 minutes)*), GXXX2 (*Prolonged nursing facility evaluation and management service(s) beyond the total time for the primary service (when the primary service has been selected using time on the date of the primary service); each additional 15 minutes by the physician or qualified healthcare professional, with or without direct patient contact (list separately in addition to CPT codes 99306, 99310 for nursing facility evaluation and management services). (Do not report GXXX2 on the same date of service as other prolonged services for evaluation and management 99358, 99359, 993X0,). (Do not report GXXX2 for any time unit less than 15 minutes)*), and GXXX3 (*Prolonged home or residence evaluation and management service(s) beyond the total time for the primary service (when the primary service has been selected using time on the date of the primary service); each additional 15 minutes by the physician or qualified healthcare professional, with or without direct patient contact (list separately in addition to CPT codes 99345, 99350 for home or residence evaluation and management services). (Do not report GXXX3 on the same date of service as other prolonged services for evaluation and management 99358, 99359, 99417). (Do not report GXXX3 for any time unit less than 15 minutes)*) to describe prolonged services associated with certain types of E/M services. These codes would be replacing existing codes that describe prolonged services, specifically inpatient prolonged services CPT codes 99356 (*Prolonged service in the inpatient or observation setting, requiring unit/floor time beyond the usual service; first hour (List separately in addition to code for inpatient or observation Evaluation and Management service)*) and 99357 (*Prolonged service in the inpatient or observation setting, requiring unit/floor time beyond the usual service; each additional 30 minutes (List separately in addition to code for prolonged service)*). These services are similar to services currently on the Medicare Telehealth Services List, such as CPT codes 99356 and 99357, which were added to the Medicare Telehealth Services List on a Category 1 basis in the CY 2016 rule (80 FR 71060–71062), as well as O/O prolonged service HCPCS code G2212 (*Prolonged service in the inpatient or observation setting, requiring unit/floor time beyond the usual service; each additional 30 minutes (List separately in addition to code for prolonged service)*), which was added to the Medicare Telehealth Services List on a Category 1 basis in the CY 2021 rule (85 FR 84506). Similarly, we believe that these proposed HCPCS G codes would be sufficiently similar to psychiatric diagnostic procedures or O/O visits currently on the Medicare Telehealth Services List to qualify for inclusion on the list on a Category 1 basis. Therefore, we are proposing to add proposed HCPCS codes GXXX1, GXXX2, and GXXX3 to the Medicare Telehealth Services List on a Category 1 basis.

Table 8 lists the services that we are proposing for addition to the Medicare Telehealth Services List on a Category 3 basis. Table 9 lists the services we are proposing for permanent addition to the Medicare Telehealth Services List on a Category 1 basis.

d. Services Proposed for Removal From the Medicare Telehealth Services List After 151 Days Following the End of the PHE

As we noted in the CY 2022 PFS final rule (86 FR 65054), at the conclusion of the PHE for COVID–19, the associated waivers and interim policies will expire, payment for Medicare telehealth services will once again be limited by the requirements of section 1834(m) of the Act, and we will return to the policies established through our regular notice-and-comment rulemaking process, through which we established Medicare Telehealth Services List. Services that have been added to the Medicare Telehealth Services List on a Category 3 basis will remain on the list through the end of CY 2023. Under our current policy, all other services that were temporarily added to the Medicare Telehealth Services List on an interim basis during the PHE and have not been added to the Medicare Telehealth Services List on a Category 1, 2, or 3 basis will not remain on the list after the end of the PHE (85 FR 84506–84509). As explained in section II.D.1.e. of this proposed rule, Division P, Title III, Subsection A of the Consolidated Appropriations Act, 2022 (CAA, 2022), extends some of the flexibilities implemented during the PHE for COVID–19 for an additional 151 days after the end of the PHE, including Section 301(a) of Division P, Title III, Subtitle A of the CAA, 2022, which specifies that, for services on the Medicare Telehealth Services List as of the date of enactment (March 15, 2022) furnished during 151 days after the end of the PHE, the originating site for the telehealth service can be any site in the United States at which the beneficiary is located when the service is furnished, including the beneficiary's home. To give full effect to this provision, we believe it is necessary to continue to include the services on the Medicare Telehealth Services List through the 151-day period after the end of the PHE that were temporarily added to the list during the PHE but have not since been added on a Category 3 or other basis, and which are currently set to be removed from the list at the end of the PHE. As such, we are proposing to continue to include on the Medicare Telehealth Services List the services that are currently set to be removed from the list when the PHE ends (that is, those not currently added to the list on a Category 1, 2, or 3 basis) for an additional 151 days after the PHE ends. Table 10 lists those services that are temporarily available for the PHE, which we are proposing to retain on the Medicare Telehealth Services List for an additional 151 days following the end of the PHE. The services listed in Table 10 will no longer be available on the Medicare Telehealth Services List on the 152nd day after the end of the PHE. On the 152nd day after the end of the PHE, payment for Medicare telehealth services will once again be limited by the requirements of section 1834(m) of the Act, as aforementioned, and telehealth claims for these codes will be denied. We are proposing to align those services that had been planned to stop being available as Medicare telehealth at the end of the PHE with the 151-day extensions of flexibilities enacted in the CAA, 2022 in order to simplify the process of when flexibilities will end and to minimize possible errors.

BILLING CODE 4120–01–C

e. Implementation of Telehealth Provisions of the Consolidation Appropriations Acts, 2021 and 2022

As discussed in the CY 2021 PFS final rule (85 FR 84506), legislation enacted to address the PHE for COVID–19 provided the Secretary with new authorities under section 1135(b)(8) of the Act, as added by section 102 of the Coronavirus Preparedness and Response Supplemental Appropriations Act, 2020 (Pub. L. 116–123, March 6, 2020) and subsequently amended by section 6010 of the Families First Coronavirus Response Act (Pub. L. 116–127, March 18, 2020) and section 3703 of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) (Pub. L. 116–136, March 27, 2020), to waive or modify Medicare telehealth payment requirements during the PHE for COVID–19. We used these authorities to establish several flexibilities to accommodate changes in the delivery of care during the PHE. Through waiver authority under section 1135(b)(8) of the Act, in response to the PHE for COVID–19, we removed the geographic and site of service originating site restrictions in section 1834(m)(4)(C) of the Act, as well as restrictions in section 1834(m)(4)(E) of the Act on the types of practitioners who may furnish telehealth services, for the duration of the PHE for COVID–19. We also used waiver authority to allow certain telehealth services to be furnished via audio-only communication technology. At the end of the PHE for COVID–19, these waivers and interim policies will expire, and payment for Medicare telehealth services will once again be limited by the requirements of section 1834(m) of the Act.

Section 1834(m)(7) of the Act (as added by section 2001(a) of the SUPPORT for Patients and Communities Act (Pub. L. 115–271, October 24, 2018)), removes the geographic restrictions under section 1834(m)(4)(C)(i) of the Act and authorizes the patient's home as a permissible originating site, for telehealth services furnished for purposes of treatment of a substance use disorder (SUD) or a co-occurring mental health disorder, furnished on or after July 1, 2019, to an individual with a SUD diagnosis. Section 123(a) of Division CC of the Consolidated Appropriations Act, 2021 (CAA, 2021) (Pub. L. 116–260, December 27, 2020) amended section 1834(m)(7)(A) of the Act to broaden the scope of services for which the geographic restrictions under section 1834(m)(4)(C)(i) of the Act do not apply and for which the patient's home is a permissible originating site to include telehealth services furnished for the purpose of diagnosis, evaluation, or treatment of a mental health disorder, effective for services furnished on or after the end of the PHE for COVID–19. Section 123(a) of the CAA, 2021 also added subparagraph (B) to section 1834(m)(7) of the Act to prohibit payment for a telehealth service furnished in the patient's home under paragraph (7), unless the physician or practitioner furnishes an item or service in-person, without the use of telehealth, within 6 months prior to the first time the physician or practitioner furnishes a telehealth service to the beneficiary, and thereafter, at such times as the Secretary determines appropriate. For a full discussion of our implementation of section 123(a) of the CAA, 2021, refer to our CY 2022 PFS final rule (86 FR 64996).

In this proposed rule, we are proposing to implement provisions of section 1834(m) of the Act (including the amendments made by the CAA, 2021) and provisions of the CAA, 2022 that extend certain Medicare telehealth flexibilities adopted during the PHE for 151 days after the end of the PHE.

Sections 301, 302, 303, 304, and 305 of Division P, Title III, Subtitle A of the CAA, 2022 amended section 1834(m) of the Act to generally extend certain PHE-related telehealth policies for services that are on the Medicare Telehealth Services List as of the date of enactment (March 15, 2021). Specifically, section 301(a) of the CAA, 2022 amended section 1834(m)(4)(C) of the Act to add a new clause (iii), which temporarily expands the scope of telehealth originating sites for those services to include any site in the United States where the beneficiary is located at the time of the telehealth service, including an individual's home, for a 151-day period beginning on the first day after the end of the PHE for COVID–19. Section 301(a) also amended section 1834(m)(7)(A) of the Act to apply the expanded scope of telehealth originating site policy to include any location in the United States in new clause (iii) of section 1834(m)(4)(C) of the Act during the 151-day period for telehealth services furnished for the purposes of diagnosis, evaluation, or treatment of a mental health disorder and to individuals with a SUD diagnosis for purposes of treatment of the SUD or a co-occurring mental health disorder for this 151-day post-PHE extension period. In addition to this provision, section 301(b) of the CAA, 2022 amended section 1834(m)(2)(B) of the Act to add a new clause (iii) that allows payment of an originating site facility fee to an originating site with respect to those telehealth services furnished during the 151-day period only if the originating site is one that meets the geographic requirements in section 1834(m)(4)(C)(i) of the Act, and is a setting included on the enumerated list of originating sites under section 1834(m)(4)(C)(ii) of the Act (other than the patient's home).

Section 302 of the CAA, 2022 amended section 1834(m)(4)(E) of the Act to temporarily expand the definition of eligible telehealth practitioners for the 151-day period beginning on the first day after the end of the PHE for COVID–19 to include qualified occupational therapists, qualified physical therapists, qualified speech-language pathologists, and qualified audiologists.

Section 303 of the CAA, 2022 amended section 1834(m)(8) of the Act to temporarily continue payment for telehealth services furnished by FQHCs and RHCs for the 151-day period beginning on the first day after the end of the COVID–19 PHE using the methodology established for telehealth services furnished by FQHCs and RHCs during the PHE, which, in accordance with section 1834(m)(8)(B) of the Act, is based on payment rates that are similar to the national average payment rates for comparable telehealth services under the PFS.

Section 304(a) of the CAA, 2022 amended section 1834(m)(7)(B)(i) of the Act to delay the requirement for an in-person visit with the physician or practitioner within 6 months prior to the initial mental health telehealth service, and again at subsequent intervals as the Secretary determines appropriate. In light of this amendment, the in-person requirements for telehealth services furnished for purposes of diagnosis, evaluation, or treatment of a mental health disorder will again be effective on the 152nd day after the PHE ends. In addition, section 304(b) and (c) of the CAA, 2022 modified sections 1834(y) and 1834(o)(4) of the Act, respectively, to similarly delay in-person visit requirements for mental health visits furnished by Rural Health Clinics and Federally Qualified Health Centers via telecommunications technology. Therefore, we are proposing to revise the regulatory text at § 410.78(b)(3)(xiv) to recognize the delay of the in-person requirements for mental health visits furnished by RHCs and FQHCs through telecommunication technology under Medicare until the 152nd day after the PHE for COVID–19, to conform with the statute. See section II.B.3. of this proposed rule for our proposal to implement similar changes for RHC and FQHC mental health visits.

Finally, section 305 of the CAA, 2022 added a new paragraph (9) to section 1834(m) of the Act to require the Secretary to continue to provide for coverage and payment of telehealth services included on the Medicare Telehealth Services List as of the March 15, 2022, date of enactment that are furnished via an audio-only telecommunications system during the 151-day period beginning on the first day after the end of the PHE for COVID–19. The new paragraph applies only to telehealth services specified on the Medicare Telehealth Services List under section 1834(m)(4)(F)(i) of the Act that are designated to as eligible to be furnished via audio-only technology as of the date of enactment of the CAA, 2022 (that is, March 15, 2022). These are the services for which CMS waived the requirements of section 1834(m)(1) of the Act and the first sentence of § 410.78(a)(3) for use of interactive telecommunications systems to furnish telehealth services, to the extent they require use of video technology, during the PHE. Under this waiver, CMS permitted the audio-only telephone E/M services and certain behavioral health counseling and educational services to be furnished via audio-only equipment during the PHE for COVID–19. CMS is proposing to continue to make payment for services included on the Medicare Telehealth Services List as of March 15, 2022 that are furnished via an audio-only telecommunications system for the 151-day period beginning on the first day after the end of the PHE. We read section 305 of the CAA, 2022 to require that we continue to make payment for services furnished via audio-only telecommunications systems (each described by a HCPCS code, including their successor codes) for the 151-day period after the end of the PHE. These services include certain behavioral health, counseling, and educational services. A list of the services that involve audio-only interaction but are included on the Medicare Telehealth Services List for the duration of the PHE is available at the CMS website, *https://www.cms.gov/Medicare/Medicare-General-Information/Telehealth/Telehealth-Codes.*

Section 309 of Division P, Title III, Subtitle A of the CAA, 2022 authorizes the Secretary to implement the amendments described above made by sections 301 through 305 through program instruction or otherwise. Given that the end date of the PHE is not yet known and could occur before the rulemaking process for the CY 2023 PFS is complete, and that the changes made by these provisions are very specific and concise, we are providing notice that we intend to issue program instructions or other subregulatory guidance to effectuate the changes described above, other than the proposed revisions to § 410.78, in the near future. We believe this approach will serve to ensure a smooth transition after the end of the PHE for COVID–19.

f. Use of Modifiers for Medicare Telehealth Services Following the End of the PHE for COVID–19

Prior to CY 2017, Medicare telehealth services furnished via interactive audio and video telecommunications systems were reported using the GT modifier. In the CY 2017 PFS Final Rule, CMS finalized creation of a new Place of Service (POS) code for Medicare telehealth, POS ''02'' (81 FR 80199–80201). When a physician or practitioner submits a claim for their services, including claims for telehealth services, they include a place of service (POS) code that is used to determine whether a service is paid using the facility or non-facility rate. Under the PFS, there are two payment rates for many physicians' services: the facility rate and the non-facility (or office) rate. The PFS non-facility rate is the single amount paid to a physician or other practitioner for services furnished in their office. The PFS facility rate is the amount generally paid to a professional when a service is furnished in a setting of care, like a hospital, where Medicare is making a separate payment to a facility entity in addition to the payment to the billing physician or practitioner. This separate payment, often referred to as a ''facility fee,'' reflects the facility's costs associated with the service (clinical staff, supplies, and equipment) and is paid in addition to what is paid to the professional under the PFS. POS ''02'' indicates payment at the facility payment rate.

As discussed in the March 31, 2020 IFC, (refer to 85 FR 19230), we stated that, as physician practices suddenly transitioned a potentially significant portion of their services from in-person to telehealth visits in the context of the PHE for the COVID–19 pandemic, the relative resource costs of furnishing these services via telehealth may not significantly differ from the resource costs involved when these services are furnished in-person. Therefore, we instructed physicians and practitioners who bill for Medicare telehealth services to report the POS code that would have been reported had the service been furnished in person. This would allow our systems to make appropriate payment for services furnished via Medicare telehealth, which, if not for the PHE for the COVID–19 pandemic, would have been furnished in-person, at the same rate they would have been paid if the services were furnished in-person. In order to effectuate this change, we finalized on an interim basis (85 FR 19233) the use of the CPT telehealth modifier, modifier ''95'', for the duration of the PHE for COVID–19, which should be applied to claim lines that describe services furnished via telehealth and that the practitioner should report the POS code where the service would have occurred had it not been furnished via telehealth.

We further noted that we are maintaining the facility payment rate for services billed using the general telehealth POS code ''02'', should practitioners choose to maintain their current billing practices for Medicare telehealth during the PHE for the COVID–19 pandemic.

We propose that Medicare telehealth services furnished on or before the 151st day after the end of the PHE, in alignment with the extensions of telehealth-related flexibilities in the CAA, 2022, will continue to be processed for payment as Medicare telehealth claims when accompanied with the modifier ''95''. We further propose that physicians and practitioners can continue to report the place of service code that would have been reported had the service been furnished in-person during the 151-day period after the end of the PHE, as finalized on an interim basis in the March 31 IFC (85 FR 19233). Medicare telehealth services performed with dates of service occurring on or after the 152nd day after the end of the PHE will revert to pre-PHE rules and will no longer require modifier ''95'' to be appended to the claim, but the appropriate place of service (POS) indicator will need to be included on the claim to be processed for payment as Medicare telehealth claims in order to properly identify the place where the service was furnished. For Medicare telehealth services furnished on or after the 152nd day after the end of the PHE, the POS indicators for Medicare telehealth will be:

- POS ''02''—which would be redefined, if finalized, as Telehealth Provided Other than in Patient's Home (*Descriptor: The location where health services and health related services are provided or received, through telecommunication technology. Patient is not located in their home when receiving health services or health related services through telecommunication technology.*); and

• POS ''10''—Telehealth Provided in Patient's Home (*Descriptor: The location where health services and health related services are provided or received through telecommunication technology. Patient is located in their home (which is a location other than a hospital or other facility where the patient receives care in a private residence) when receiving health services or health related services through telecommunication technology.*).

We remind readers that we defined ''home'' in our CY 2022 PFS final rule (86 FR 65059) as: ''both in general and for this purpose, a beneficiary's home can include temporary lodging, such as hotels and homeless shelters. We clarified that for circumstances where the patient, for privacy or other personal reasons, chooses to travel a short distance from the exact home location during a telehealth service, the service is still considered to be furnished 'in the home of an individual' for purposes of section 1834(m)(4)(C)(ii)(X) of the Act.''

Once the flexibilities for the geographic restrictions and the site of service waivers for Medicare telehealth services expire (on the 152nd day after the end of the PHE, per the CAA, 2022), POS ''02'' will once again be required for all Medicare telehealth claims. The exceptions include claims for Medicare telehealth mental health services, clinical assessments for patients with ESRD that are receiving home dialysis, and Medicare telehealth mental health services that are co-occurring with substance use treatment that are furnished with the patient in their home (that is, the originating site is in a private residence and not a hospital or other facility setting), in which case POS ''10'' could be used by the billing practitioner. On or after the 152nd day after the PHE has expired, payment for Medicare telehealth services using either of the Medicare telehealth POS codes will be made at the PFS facility payment rate, in accordance with established policy outside the circumstances of the PHE. We propose to align those telehealth services described as taking place in the beneficiary's home, using POS ''10'' for Medicare telehealth, and those services not provided in a patient's home, using POS ''02'' for Medicare telehealth, to be made at the same facility payment amount. We believe that the facility payment amount best reflects the practice expenses, both direct and indirect, involved in furnishing services via telehealth (please see section II.B. of this proposed rule for further discussion regarding practice expense).

We further propose that, beginning January 1, 2023, a physician or other qualified health care practitioner billing for telehealth services furnished using audio-only communications technology shall append CPT modifier ''93'' (*Synchronous Telemedicine Service Rendered Via Telephone or Other Real-Time Interactive Audio-Only Telecommunications System: Synchronous telemedicine service is defined as a real-time interaction between a physician or other qualified health care professional and a patient who is located away at a distant site from the physician or other qualified health care professional. The totality of the communication of information exchanged between the physician or other qualified health care professional and the patient during the course of the synchronous telemedicine service must be of an amount and nature that is sufficient to meet the key components and/or requirements of the same service when rendered via a face-to-face interaction*) to Medicare telehealth claims (for those services for which the use of audio-only technology is permitted under § 410.78(a)(3)), to identify them as having been furnished using audio-only technology. We note that CMS has instructed RHCs, FQHCs, and OTPs to append Medicare modifier ''FQ'' (*Medicare telehealth service was furnished using audio-only communication technology*) for allowable audio-only services furnished in those settings; however, consistent with our proposal for audio-only services furnished under the PFS, we are also proposing to require RHCs, FQHCs, and OTPs to use modifier 93 when billing for eligible mental health services furnished via audio-only telecommunications technology. We believe that using modifier ''93'', which is a CPT modifier, will simplify billing, as this modifier is used by payers outside of Medicare. Currently, these modifiers can only be applied to Medicare telehealth mental health services and those telehealth services for the treatment of a SUD or a co-occurring mental health disorder when the originating site is the beneficiary's home.

Supervising practitioners continue to be required to append the ''FR'' modifier on any applicable telehealth claim when required to be present through an interactive real-time, audio and video telecommunications link, as reflected in each service's requirement.

2. Other Non-Face-to-Face Services Involving Communications Technology Under the PFS

a. Expiration of PHE Flexibilities for Direct Supervision Requirements

Under Medicare Part B, certain types of services, including diagnostic tests, services incident to physicians' or practitioners' professional services, and other services, are required to be furnished under specific minimum levels of supervision by a physician or practitioner.

For professional services furnished incident to the services of the billing physician or practitioner (see § 410.26) and many diagnostic tests (see § 410.32), direct supervision is required. Additionally, for pulmonary rehabilitation services (see § 410.47) and for cardiac rehabilitation and intensive cardiac rehabilitation services (see § 410.49), statutory requirements for immediate availability and accessibility of a physician are met if the physician meets the requirements for direct supervision for physician office services at § 410.26 and for hospital outpatient services at § 410.27. Outside the circumstances of the PHE, direct supervision requires the immediate availability of the supervising physician or other practitioner, but the professional need not be present in the same room during the service. We have established this ''immediate availability'' requirement to mean in-person, physical, not virtual, availability (please see the April 6, 2020 IFC (85 FR 19245) and the CY 2022 PFS final rule (86 FR 65062)).

Through the March 31, 2020 COVID–19 IFC, we changed the definition of ''direct supervision'' during the PHE for COVID–19 (85 FR 19245 through 19246) as it pertains to supervision of diagnostic tests, physicians' services, and some hospital outpatient services, to allow the supervising professional to be immediately available through virtual presence using real-time audio/video technology, instead of requiring their physical presence. In the CY 2021 PFS final rule (85 FR 84538 through 84540), we finalized continuation of this policy through the later of the end of the calendar year in which the PHE for COVID–19 ends or December 31, 2021. In the March 31, 2020 IFC (85 FR 19246) and in our CY 2022 PFS final rule (see 85 FR 65063), we also noted that the temporary exception to allow immediate availability for direct supervision through virtual presence facilitates the provision of telehealth services by clinical staff of physicians and other practitioners' incident to their own professional services. This is especially

relevant for services such as physical therapy, occupational therapy, and speech language pathology services, since those practitioners can only bill Medicare for telehealth services under Medicare telehealth waivers that are effective only during the PHE for COVID–19 (per the emergency waiver authority established in section 1135(b)(8) of the Act), and for 151 days after the final day of the PHE for COVID–19, as mandated by the CAA, 2022. We note that sections 1834(m)(4)(D) and (E) of the Act specify the types of clinicians who may furnish and bill for Medicare telehealth service. Outside of the PHE and the 151-day period after the PHE ends, such clinicians include only physicians as defined in section 1861(r) of the Act and practitioners described in section 1842(b)(18)(C) of the Act. We remind readers that after December 31 of the year in which the PHE ends, the pre-PHE rules for direct supervision at § 410.32(b)(3)(ii) would apply. As noted in the CY 2022 PFS final rule (86 FR 65062), this means the temporary exception to allow immediate availability for direct supervision through virtual presence facilitates the provision of telehealth services by clinical staff of physicians and other practitioners incident to their own professional services would no longer apply, so telehealth services can no longer be performed by clinical staff incident to a physician's professional service.

While we are not proposing to make the temporary exception to allow immediate availability for direct supervision through virtual presence permanent, as with last year's rulemaking (86 FR 39149–50), we continue to seek information on whether the flexibility to meet the immediate availability requirement for direct supervision through the use of real-time, audio/video technology should potentially be made permanent. We also seek comment regarding the possibility of permanently allowing immediate availability for direct supervision through virtual presence using real-time, audio/video technology for only a subset of services, as we recognize that it may be inappropriate to allow direct supervision without physical presence for some services due to potential concerns over patient safety. As discussed in last year's final rule (86 FR 65063), and based on gaps in the currently available evidence, we are in need of more information as we consider whether to make permanent a temporary exception to our direct supervision policy.

3. Telehealth Originating Site Facility Fee Update

Section 1834(m)(2)(B) of the Act established the initial Medicare telehealth originating site facility fee for telehealth services furnished from October 1, 2001 through December 31, 2002, at $20.00, and specifies that for telehealth services furnished on or after January 1 of each subsequent calendar year, the telehealth originating site facility fee is increased by the percentage increase in the Medicare Economic Index (MEI) as defined in section 1842(i)(3) of the Act. The proposed MEI increase for CY 2023 is 3.7 percent and is based on the most current forecast of the percentage increase of the 2006-based MEI for the second quarter of 2022 (4.1 percent), and the most recent estimate of the historical productivity adjustment for calendar year 2021 (0.4 percent).

Therefore, for CY 2023, the proposed payment amount for HCPCS code Q3014 (*Telehealth originating site facility fee*) is $28.61. The final Medicare telehealth originating site facility fee will be revised for the final rule based on the historical data through the second quarter 2022 and the most recently available total factor productivity data. The Medicare telehealth originating site facility fee and the MEI increase by the applicable time period are shown in Table 11.

BILLING CODE 4120–01–P

TABLE 11: The Medicare Telehealth Originating Site Facility Fee

Time Period	MEI (%)	Facility Fee for Q3014
Oct. 1, 2001 to Dec. 31, 2002	NA	$ 20.00
2003	3.0	$ 20.60
2004	2.9	$ 21.20
2005	3.1	$ 21.86
2006	2.8	$ 22.47
2007	2.1	$ 22.94
2008	1.8	$ 23.35
2009	1.6	$ 23.72
2010	1.2	$ 24.00
2011	0.4	$ 24.10
2012	0.6	$ 24.24
2013	0.8	$ 24.43
2014	0.8	$ 24.63
2015	0.8	$ 24.83
2016	1.1	$ 25.10
2017	1.2	$ 25.40
2018	1.4	$ 25.76
2019	1.5	$ 26.15
2020	1.9	$ 26.65
2021	1.4	$ 27.02
2022	2.1	$ 27.59
2023*	3.7	$ 28.61

* Proposed

BILLING CODE 4120–01–C

E. Valuation of Specific Codes

1. Background: Process for Valuing New, Revised, and Potentially Misvalued Codes

Establishing valuations for newly created and revised CPT codes is a routine part of maintaining the PFS. Since the inception of the PFS, it has also been a priority to revalue services regularly to make sure that the payment rates reflect the changing trends in the practice of medicine and current prices for inputs used in the PE calculations. Initially, this was accomplished primarily through the 5-year review process, which resulted in revised work RVUs for CY 1997, CY 2002, CY 2007, and CY 2012, and revised PE RVUs in CY 2001, CY 2006, and CY 2011, and revised MP RVUs in CY 2010, CY 2015, and CY 2020. Under the 5-year review process, revisions in RVUs were proposed and finalized via rulemaking. In addition to the 5-year reviews, beginning with CY 2009, CMS and the RUC identified a number of potentially misvalued codes each year using various identification screens, as discussed in section II.C. of this proposed rule, Potentially Misvalued Services under the PFS. Historically, when we received RUC recommendations, our process had been to establish interim final RVUs for the potentially misvalued codes, new codes, and any other codes for which there were coding changes in the final rule with comment period for a year. Then, during the 60-day period following the publication of the final rule with comment period, we solicit public comment about those valuations. For services furnished during the calendar year following the publication of interim final rates, we paid for services based upon the interim final values established in the final rule. In the final rule with comment period for the subsequent year, we consider and responded to public comments received on the interim final values, and typically make any appropriate adjustments and finalize those values.

In the CY 2015 PFS final rule with comment period (79 FR 67547), we finalized a new process for establishing values for new, revised and potentially misvalued codes. Under the new process, we include proposed values for these services in the proposed rule, rather than establishing them as interim final in the final rule with comment period. Beginning with the CY 2017 PFS proposed rule (81 FR 46162), the new process was applicable to all codes, except for new codes that describe truly new services. For CY 2017, we proposed new values in the CY 2017 PFS proposed rule for the vast majority of new, revised, and potentially misvalued codes for which we received complete RUC recommendations by February 10, 2016. To complete the transition to this new process, for codes for which we established interim final values in the CY 2016 PFS final rule with comment period (81 FR 80170), we reviewed the comments received during the 60-day public comment period following release of the CY 2016 PFS final rule with comment period (80 FR 70886), and re-proposed values for those codes in the CY 2017 PFS proposed rule.

We considered public comments received during the 60-day public comment period for the proposed rule before establishing final values in the CY 2017 PFS final rule. As part of our established process, we will adopt interim final values only in the case of wholly new services for which there are no predecessor codes or values and for which we do not receive recommendations in time to propose values.

As part of our obligation to establish RVUs for the PFS, we thoroughly review and consider available information including recommendations and supporting information from the RUC, the Health Care Professionals Advisory Committee (HCPAC), public commenters, medical literature,

Medicare claims data, comparative databases, comparison with other codes within the PFS, as well as consultation with other physicians and healthcare professionals within CMS and the Federal Government as part of our process for establishing valuations. Where we concur that the RUC's recommendations, or recommendations from other commenters, are reasonable and appropriate and are consistent with the time and intensity paradigm of physician work, we proposed those values as recommended. Additionally, we continually engage with interested parties, including the RUC, with regard to our approach for accurately valuing codes, and as we prioritize our obligation to value new, revised, and potentially misvalued codes. We continue to welcome feedback from all interested parties regarding valuation of services for consideration through our rulemaking process.

2. Methodology for Establishing Work RVUs

For each code identified in this section, we conduct a review that includes the current work RVU (if any), RUC-recommended work RVU, intensity, time to furnish the preservice, intraservice, and postservice activities, as well as other components of the service that contribute to the value. Our reviews of recommended work RVUs and time inputs generally include, but have not been limited to, a review of information provided by the RUC, the HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, consultation with other physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. In the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329), we discussed a variety of methodologies and approaches used to develop work RVUs, including survey data, building blocks, crosswalks to key reference or similar codes, and magnitude estimation (see the CY 2011 PFS final rule with comment period (75 FR 73328 through 73329) for more information). When referring to a survey, unless otherwise noted, we mean the surveys conducted by specialty societies as part of the formal RUC process.

Components that we use in the building block approach may include preservice, intraservice, or postservice time and post-procedure visits. When referring to a bundled CPT code, the building block components could include the CPT codes that make up the bundled code and the inputs associated with those codes. We use the building block methodology to construct, or deconstruct, the work RVU for a CPT code based on component pieces of the code. Magnitude estimation refers to a methodology for valuing work that determines the appropriate work RVU for a service by gauging the total amount of work for that service relative to the work for a similar service across the PFS without explicitly valuing the components of that work. In addition to these methodologies, we frequently utilize an incremental methodology in which we value a code based upon its incremental difference between another code and another family of codes. Section 1848(c)(1)(A) of the Act specifically defines the work component as the resources that reflect time and intensity in furnishing the service. Also, the published literature on valuing work has recognized the key role of time in overall work. For particular codes, we refine the work RVUs in direct proportion to the changes in the best information regarding the time resources involved in furnishing particular services, either considering the total time or the intraservice time.

Several years ago, to aid in the development of preservice time recommendations for new and revised CPT codes, the RUC created standardized preservice time packages. The packages include preservice evaluation time, preservice positioning time, and preservice scrub, dress and wait time. Currently, there are preservice time packages for services typically furnished in the facility setting (for example, preservice time packages reflecting the different combinations of straightforward or difficult procedure, and straightforward or difficult patient). Currently, there are three preservice time packages for services typically furnished in the nonfacility setting.

We developed several standard building block methodologies to value services appropriately when they have common billing patterns. In cases where a service is typically furnished to a beneficiary on the same day as an E/M service, we believe that there is overlap between the two services in some of the activities furnished during the preservice evaluation and postservice time. Our longstanding adjustments have reflected a broad assumption that at least one-third of the work time in both the preservice evaluation and postservice period is duplicative of work furnished during the E/M visit.

Accordingly, in cases where we believe that the RUC has not adequately accounted for the overlapping activities in the recommended work RVU and/or times, we adjust the work RVU and/or times to account for the overlap. The work RVU for a service is the product of the time involved in furnishing the service multiplied by the intensity of the work. Preservice evaluation time and postservice time both have a long-established intensity of work per unit of time (IWPUT) of 0.0224, which means that 1 minute of preservice evaluation or postservice time equates to 0.0224 of a work RVU.

Therefore, in many cases when we remove 2 minutes of preservice time and 2 minutes of postservice time from a procedure to account for the overlap with the same day E/M service, we also remove a work RVU of 0.09 (4 minutes $\times$ 0.0224 IWPUT) if we do not believe the overlap in time had already been accounted for in the work RVU. The RUC has recognized this valuation policy and, in many cases, now addresses the overlap in time and work when a service is typically furnished on the same day as an E/M service.

The following paragraphs contain a general discussion of our approach to reviewing RUC recommendations and developing proposed values for specific codes. We also include a summary of interested party reactions to our approach when available. We note that many commenters and interested parties have expressed concerns over the years with our reviews of and updates to work RVUs based on changes in the best available information regarding the time resources involved in furnishing individual services. We have been particularly concerned with the RUC's and various specialty societies' objections to our approach given the significance of their recommendations to our process for valuing services and since much of the information we use to update the RVUs is derived from their survey process. We are obligated under the statute to consider both time and intensity in establishing work RVUs for PFS services. As explained in the CY 2016 PFS final rule with comment period (80 FR 70933), we recognize that adjusting work RVUs for changes in time is not always a straightforward process, so we have applied various methodologies to identify several potential work values for individual codes.

We have observed that for many codes reviewed by the RUC, recommended work RVUs have appeared to be incongruous with recommended assumptions regarding the resource costs in time. This has been the case for

a significant portion of codes for which we recently established or proposed work RVUs that are based on refinements to the RUC-recommended values. When we have adjusted work RVUs to account for significant changes in time, we have started by looking at the change in the time in the context of the RUC-recommended work RVU. When the recommended work RVUs do not appear to account for significant changes in time, we have employed the different approaches to identify potential values that reconcile the recommended work RVUs with the recommended time values. Many of these methodologies, such as survey data, building block, crosswalks to key reference or similar codes, and magnitude estimation have long been used in developing work RVUs under the PFS. In addition to these, we sometimes use the relationship between the ''old time'' values and the new time values for particular services to identify alternative work RVUs based on changes in time components.

In so doing, rather than ignoring the RUC-recommended value, we have used the recommended values as a starting reference and then applied one of these several methodologies to account for the reductions in time that we believe were not otherwise reflected in the RUC-recommended value. If we believe that such changes in time are already accounted for in the RUC's recommendation, then we do not make such adjustments. Likewise, we do not arbitrarily apply time ratios to current work RVUs to calculate proposed work RVUs. We use the ratios to identify potential work RVUs and consider these work RVUs as potential options relative to the values developed through other options.

We do not imply that the decrease in time as reflected in survey values should always equate to a one-to-one or linear decrease in newly valued work RVUs. Instead, we believe that, since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, significant decreases in time should be reflected in decreases to work RVUs. If the RUC's recommendation has appeared to disregard or dismiss the changes in time, without a persuasive explanation of why such a change should not be accounted for in the overall work of the service, then we have generally used one of the aforementioned methodologies to identify potential work RVUs, including the methodologies intended to account for the changes in the resources involved in furnishing the procedure.

Several interested parties, including the RUC, have expressed general objections to our use of these methodologies to adjust for reductions in time, suggesting that our adjustments to the RUC-recommended work RVUs are inappropriate. Other interested parties have expressed general concerns with our refinements to RUC-recommended values. In the CY 2017 PFS proposed rule (81 FR 46162), we requested comments regarding potential alternatives to making adjustments that would recognize overall estimates of work in the context of changes in the resource of time for particular services; however, we did not receive any specific potential alternatives. In the CY 2017 PFS final rule (81 FR 80272 through 80277), we responded in detail to several comments that we received regarding our approach to RUC-recommended work times and RVUs. As described earlier in this section, crosswalks to key reference or similar codes are one of the many methodological approaches we have employed to identify potential values that reconcile the RUC-recommend work RVUs with the recommended time values when the RUC-recommended work RVUs did not appear to account for significant changes in time.

3. Methodology for the Direct PE Inputs To Develop PE RVUs

a. Background

On an annual basis, the RUC provides us with recommendations regarding PE inputs for new, revised, and potentially misvalued codes. We review the RUC-recommended direct PE inputs on a code by code basis. Like our review of recommended work RVUs, our review of recommended direct PE inputs generally includes, but is not limited to, a review of information provided by the RUC, HCPAC, and other public commenters, medical literature, and comparative databases, as well as a comparison with other codes within the PFS, and consultation with physicians and health care professionals within CMS and the Federal Government, as well as Medicare claims data. We also assess the methodology and data used to develop the recommendations submitted to us by the RUC and other public commenters and the rationale for the recommendations. When we determine that the RUC's recommendations appropriately estimate the direct PE inputs (clinical labor, disposable supplies, and medical equipment) required for the typical service, are consistent with the principles of relativity, and reflect our payment policies, we use those direct PE inputs to value a service. If not, we refine the recommended PE inputs to better reflect our estimate of the PE resources required for the service. We also confirm whether CPT codes should have facility and/or nonfacility direct PE inputs and refine the inputs accordingly.

Our review and refinement of the RUC-recommended direct PE inputs includes many refinements that are common across codes, as well as refinements that are specific to particular services. Table 14 details our refinements of the RUC's direct PE recommendations at the code-specific level. In section II.B. of this proposed rule, Determination of PE RVUs, we address certain proposed refinements that would be common across codes. We address refinements to particular codes in the portions of section II.B. that focus on particular codes. We note that for each refinement, we indicate the potential impact on direct costs for that service. We note that, on average, in any case where the impact on the direct cost for a particular refinement is $0.35 or less, the refinement has no impact on the PE RVUs. This calculation considers both the impact on the direct portion of the PE RVU, as well as the impact on the indirect allocator for the average service. We also note that many of the refinements listed in Table 13 result in changes under the $0.35 threshold and would be unlikely to result in a change to the RVUs.

We note that the proposed direct PE inputs for CY 2023 are displayed in the CY 2023 direct PE input files, available on the CMS website under the downloads for the CY 2023 PFS proposed rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html.* The inputs displayed there have been used in developing the proposed CY 2023 PE RVUs as displayed in Addendum B.

b. Common Refinements

(1) Changes in Work Time

Some direct PE inputs are directly affected by revisions in work time. Specifically, changes in the intraservice portions of the work time and changes in the number or level of postoperative visits associated with the global periods result in corresponding changes to direct PE inputs. The direct PE input recommendations generally correspond to the work time values associated with services. We believe that inadvertent discrepancies between work time values and direct PE inputs should be refined

or adjusted in the establishment of proposed direct PE inputs to resolve the discrepancies.

(2) Equipment Time

Prior to CY 2010, the RUC did not generally provide CMS with recommendations regarding equipment time inputs. In CY 2010, in the interest of ensuring the greatest possible degree of accuracy in allocating equipment minutes, we requested that the RUC provide equipment times along with the other direct PE recommendations, and we provided the RUC with general guidelines regarding appropriate equipment time inputs. We appreciate the RUC's willingness to provide us with these additional inputs as part of its PE recommendations.

In general, the equipment time inputs correspond to the service period portion of the clinical labor times. We clarified this principle over several years of rulemaking, indicating that we consider equipment time as the time within the intraservice period when a clinician is using the piece of equipment plus any additional time that the piece of equipment is not available for use for another patient due to its use during the designated procedure. For those services for which we allocate cleaning time to portable equipment items, because the portable equipment does not need to be cleaned in the room where the service is furnished, we do not include that cleaning time for the remaining equipment items, as those items and the room are both available for use for other patients during that time. In addition, when a piece of equipment is typically used during follow-up postoperative visits included in the global period for a service, the equipment time will also reflect that use.

We believe that certain highly technical pieces of equipment and equipment rooms are less likely to be used during all of the preservice or postservice tasks performed by clinical labor staff on the day of the procedure (the clinical labor service period) and are typically available for other patients even when one member of the clinical staff may be occupied with a preservice or postservice task related to the procedure. We also noted that we believe these same assumptions will apply to inexpensive equipment items that are used in conjunction with and located in a room with non-portable highly technical equipment items since any items in the room in question will be available if the room is not being occupied by a particular patient. For additional information, we refer readers to our discussion of these issues in the CY 2012 PFS final rule with comment period (76 FR 73182) and the CY 2015 PFS final rule with comment period (79 FR 67639).

(3) Standard Tasks and Minutes for Clinical Labor Tasks

In general, the preservice, intraservice, and postservice clinical labor minutes associated with clinical labor inputs in the direct PE input database reflect the sum of particular tasks described in the information that accompanies the RUC-recommended direct PE inputs, commonly called the ''PE worksheets.'' For most of these described tasks, there is a standardized number of minutes, depending on the type of procedure, its typical setting, its global period, and the other procedures with which it is typically reported. The RUC sometimes recommends a number of minutes either greater than or less than the time typically allotted for certain tasks. In those cases, we review the deviations from the standards and any rationale provided for the deviations. When we do not accept the RUC-recommended exceptions, we refine the proposed direct PE inputs to conform to the standard times for those tasks. In addition, in cases when a service is typically billed with an E/M service, we remove the preservice clinical labor tasks to avoid duplicative inputs and to reflect the resource costs of furnishing the typical service.

We refer readers to section II.B. of this proposed rule, Determination of PE RVUs, for more information regarding the collaborative work of CMS and the RUC in improvements in standardizing clinical labor tasks.

(4) Recommended Items That Are Not Direct PE Inputs

In some cases, the PE worksheets included with the RUC's recommendations include items that are not clinical labor, disposable supplies, or medical equipment or that cannot be allocated to individual services or patients. We addressed these kinds of recommendations in previous rulemaking (78 FR 74242), and we do not use items included in these recommendations as direct PE inputs in the calculation of PE RVUs.

(5) New Supply and Equipment Items

The RUC generally recommends the use of supply and equipment items that already exist in the direct PE input database for new, revised, and potentially misvalued codes. However, some recommendations include supply or equipment items that are not currently in the direct PE input database. In these cases, the RUC has historically recommended that a new item be created and has facilitated our pricing of that item by working with the specialty societies to provide us copies of sales invoices. For CY 2023, we received invoices for several new supply and equipment items. Tables 15 and 16 detail the invoices received for new and existing items in the direct PE database. As discussed in section II.B. of this proposed rule, Determination of Practice Expense Relative Value Units, we encourage interested parties to review the prices associated with these new and existing items to determine whether these prices appear to be accurate. Where prices appear inaccurate, we encourage interested parties to submit invoices or other information to improve the accuracy of pricing for these items in the direct PE database by February 10th of the following year for consideration in future rulemaking, similar to our process for consideration of RUC recommendations.

We remind interested parties that due to the relativity inherent in the development of RVUs, reductions in existing prices for any items in the direct PE database increase the pool of direct PE RVUs available to all other PFS services. Tables 15 and 16 also include the number of invoices received and the number of nonfacility allowed services for procedures that use these equipment items. We provide the nonfacility allowed services so that interested parties will note the impact the particular price might have on PE relativity, as well as to identify items that are used frequently, since we believe that interested parties are more likely to have better pricing information for items used more frequently. A single invoice may not be reflective of typical costs and we encourage interested parties to provide additional invoices so that we might identify and use accurate prices in the development of PE RVUs.

In some cases, we do not use the price listed on the invoice that accompanies the recommendation because we identify publicly available alternative prices or information that suggests a different price is more accurate. In these cases, we include this in the discussion of these codes. In other cases, we cannot adequately price a newly recommended item due to inadequate information. Sometimes, no supporting information regarding the price of the item has been included in the recommendation. In other cases, the supporting information does not demonstrate that the item has been purchased at the listed price (for example, vendor price quotes instead of paid invoices). In cases where the information provided on the item allows us to identify clinically appropriate

proxy items, we might use existing items as proxies for the newly recommended items. In other cases, we include the item in the direct PE input database without any associated price. Although including the item without an associated price means that the item does not contribute to the calculation of the final PE RVU for particular services, it facilitates our ability to incorporate a price once we obtain information and are able to do so.

(6) Service Period Clinical Labor Time in the Facility Setting

Generally speaking, our direct PE inputs do not include clinical labor minutes assigned to the service period because the cost of clinical labor during the service period for a procedure in the facility setting is not considered a resource cost to the practitioner since Medicare makes separate payment to the facility for these costs. We address code-specific refinements to clinical labor in the individual code sections.

(7) Procedures Subject to the Multiple Procedure Payment Reduction (MPPR) and the OPPS Cap

We note that the list of services for the upcoming calendar year that are subject to the MPPR on diagnostic cardiovascular services, diagnostic imaging services, diagnostic ophthalmology services, and therapy services; and the list of procedures that meet the definition of imaging under section 1848(b)(4)(B) of the Act, and therefore, are subject to the OPPS cap; are displayed in the public use files for the PFS proposed and final rules for each year. The public use files for CY 2023 are available on the CMS website under downloads for the CY 2023 PFS proposed rule at *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/PFS-Federal-Regulation-Notices.html.* For more information regarding the history of the MPPR policy, we refer readers to the CY 2014 PFS final rule with comment period (78 FR 74261 through 74263).

Effective January 1, 2007, section 5102(b)(1) of the Deficit Reduction Act of 2005 (Pub. L. 109–171) (DRA) amended section 1848(b)(4) of the Act to require that, for imaging services, if— (i) The technical component (TC) (including the TC portion of a global fee) of the service established for a year under the fee schedule without application of the geographic adjustment factor, exceeds (ii) The Medicare OPD fee schedule amount established under the prospective payment system (PPS) for hospital outpatient (HOPD) services under section 1833(t)(3)(D) of the Act for such service for such year, determined without regard to geographic adjustment under paragraph (t)(2)(D) of such section, the Secretary shall substitute the amount described in clause (ii), adjusted by the geographic adjustment factor [under the PFS], for the fee schedule amount for such TC for such year. As required by the section 1848(b)(4)(A) of the Act, for imaging services furnished on or after January 1, 2007, we cap the TC of the PFS payment amount for the year (prior to geographic adjustment) by the Outpatient Prospective Payment System (OPPS) payment amount for the service (prior to geographic adjustment). We then apply the PFS geographic adjustment to the capped payment amount. Section 1848(b)(4)(B) of the Act defines imaging services as imaging and computer-assisted imaging services, including X-ray, ultrasound (including echocardiography), nuclear medicine (including PET), magnetic resonance imaging (MRI), computed tomography (CT), and fluoroscopy, but excluding diagnostic and screening mammography. For more information regarding the history of the cap on the TC of the PFS payment amount under the DRA (the ''OPPS cap''), we refer readers to the CY 2007 PFS final rule with comment period (71 FR 69659 through 69662).

For CY 2023, we identified new and revised codes to determine which services meet the definition of ''imaging services'' as defined above for purposes of this cap. Beginning for CY 2023, we propose to include the following services on the list of codes to which the OPPS cap applies: CPT codes 0493T (*Contact near-infrared spectroscopy studies of lower extremity wounds (e.g., for oxyhemoglobin measurement)*), 0640T (*Noncontact near-infrared spectroscopy studies of flap or wound (e.g., for measurement of deoxyhemoglobin, oxyhemoglobin, and ratio of tissue oxygenation [StO2]); image acquisition, interpretation and report, each flap or wound*), 0641T (*Noncontact near-infrared spectroscopy studies of flap or wound (e.g., for measurement of deoxyhemoglobin, oxyhemoglobin, and ratio of tissue oxygenation [StO2]); image acquisition only, each flap or wound*), 0642T (*Noncontact near-infrared spectroscopy studies of flap or wound (e.g., for measurement of deoxyhemoglobin, oxyhemoglobin, and ratio of tissue oxygenation [StO2]); interpretation and report only, each flap or wound*), 0651T (*Magnetically controlled capsule endoscopy, esophagus through stomach, including intraprocedural positioning of capsule, with interpretation and report*), 0658T (*Electrical impedance spectroscopy of 1 or more skin lesions for automated melanoma risk score*), 0689T (*Quantitative ultrasound tissue characterization (non-elastographic), including interpretation and report, obtained without diagnostic ultrasound examination of the same anatomy (e.g., organ, gland, tissue, target structure)*), 0690T (*Quantitative ultrasound tissue characterization (non-elastographic), including interpretation and report, obtained with diagnostic ultrasound examination of the same anatomy (e.g., organ, gland, tissue, target structure) (List separately in addition to code for primary procedure)*), 0694T (*3-dimensional volumetric imaging and reconstruction of breast or axillary lymph node tissue, each excised specimen, 3-dimensional automatic specimen reorientation, interpretation and report, real-time intraoperative*), 0700T (*Molecular fluorescent imaging of suspicious nevus; first lesion*), 0701T (*Molecular fluorescent imaging of suspicious nevus; each additional lesion (List separately in addition to code for primary procedure)*), and 76XX0 (*Ultrasound, nerve(s) and accompanying structures throughout their entire anatomic course in one extremity, comprehensive, including real-time cine imaging with image documentation, per extremity*).

4. Valuation of Specific Codes for CY 2023

(1) Anterior Abdominal Hernia Repair (CPT Codes 157X1, 49X01, 49X02, 49X03, 49X04, 49X05, 49X06, 49X07, 49X08, 49X09, 49X10, 49X11, 49X12, 49X13, 49X14, and 49X15)

In April 2021, the RUC reviewed an existing code that describes hernia repair, CPT code 49565 (*Repair recurrent incisional or ventral hernia; reducible*). CPT code 49565 was identified as being performed less than 50 percent of the time in the inpatient setting and being primarily performed in the outpatient setting. Interested parties requested referral to CPT to update the code's descriptor. In response to the disparate site of service and request to update the code's descriptor, CPT created new codes with 000-day global periods to describe this type of service. The codes within this family are differentiated by 3 characteristics: whether the hernia is initial or recurrent, whether it is reducible or strangulated, and the total length of the hernia. CPT also created two new codes that describe parastomal

hernia repair and an add-on code for removal of mesh.

The RUC recommendations differentiate the post-operative periods for the codes within this family by whether there is a same-day discharge, overnight stay with a visit on the same date, or whether the patient is admitted to the hospital. We disagree with many of the RUC-recommended work RVUs for the codes within this family that have a post-operative overnight stay built into their valuation. More specifically, we disagree with the RUC-recommended work RVUs for such codes because the RUC did not completely apply the 23-hour policy calculation (finalized in the CY 2011 PFS final rule (75 FR 73226)) in formulating its recommendations. Additionally, we disagree with the RUC-recommended work RVUs for the CPT codes in this family for which the RUC considered the patient to be admitted during the post-operative period because the RUC did not apply the 23-hour policy when formulating its recommendations.

As we noted in the CY 2011 PFS final rule (75 FR 73226), the work RVUs for services that are typically performed in the outpatient setting and require a hospital stay of less than 24 hours may in some cases involve multiple overnight stays while the patient is still considered to be an outpatient for purposes of Medicare payment. Because such services are typically furnished in the outpatient setting, they should not be valued to include inpatient post-operative E/M visits. The level of discharge day management services included in the valuation of such services should similarly not reflect an inpatient discharge and should therefore be reduced. And finally, as discussed in CY 2011 rulemaking, the intraservice time from the inpatient level E/M postoperative visit should be reallocated to the immediate postservice time of the service. The 23-hour policy calculation, when fully applied to the calculation of a work RVU, is used to reduce the value of discharge day management services, remove the inpatient E/M visits, and reallocate the intraservice time to the immediate post-service period. See the CY 2011 PFS final rule (75 FR 73226) for additional in-depth explanation of the 23-hour policy.

For the codes with an overnight stay and an E/M visit on the same date built into their valuation, we believe the RUC only partially applied the 23-hour policy when it applied the policy to the immediate post service times, but not to the calculation of the work RVUs. Instead, we believe the 23-hour policy should be fully applied to the codes in this family that describe outpatient services for which there is an overnight stay during the post-operative period, regardless of the number of nights that a patient stays in the hospital. The services to which the 23-hour policy is usually applied would typically involve a patient stay in a hospital for less than 24 hours, which often means the patient may stay overnight in the hospital. On occasion, the patient may stay in the hospital longer than a single night; however, in both cases (one night or more than one night), the patient is considered to be a hospital outpatient, not an inpatient, for Medicare purposes. In short, we do not believe that the work that is typically associated with an inpatient service should be included in the work RVUs for the outpatient services to which the 23-hour policy applies.

The RUC recommended a work RVU of 8.0 for CPT code 157X1 (*Implantation of absorbable mesh or other prosthesis for delayed closure of defect(s) (ie, external genitalia, perineum, abdominal wall) due to soft tissue infection or trauma*). CPT code 157X1 was surveyed with having one subsequent hospital visit, CPT code 99232 (*subsequent hospital care/day 25 minutes*) and 25 minutes of immediate post service time. For purposes of calculating the recommended work RVU of 8.0, the RUC considered CPT code 157X1 to describe an inpatient service, while we consider CPT code 157X1 to describe an outpatient service for purposes of Medicare billing. As noted above, we do not believe that work that is typically associated with an inpatient service should be included in the work RVUs for the outpatient services to which the 23-hour policy applies. Therefore, the valuation for this code should not include inpatient work in the post-operative period. See the CY 2022 PFS final rule (86 FR 65090) for further discussion on the 23-hour policy as it relates to outpatient billing. We believe the 23-hour policy should be fully applied to CPT code 157X1, and we disagree with the RUC-recommended work RVU of 8.0.

In accordance with the 23-hour policy valuation methodology we established in the CY 2011 PFS final rule, we are instead proposing a work RVU of 7.05 for CPT code 157X1 and a reallocation of the time associated with the intra-service portion of the inpatient hospital visit to the immediate postservice time of CPT code 157X1.

The steps for the 23-hour policy calculation are as follows:

- Step (1): CPT code 157X1 does not have a hospital discharge day management service; therefore, we will skip this step *.
- Step (2): 8.0 − 1.39 ** = 6.61.
- Step (3): 6.61 + (20 minutes × 0.0224) *** = 7.05 RVUs.

* Value associated with ½ hospital discharge day management service

** Value associated with an inpatient hospital visit, CPT code 99232.

*** Value associated with the reallocated intraservice time multiplied by the postservice intensity of the 23-hour stay code.

The following CPT codes have a post-operative period that is considered an overnight stay with a visit on the same date: CPT codes 49X02 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), initial, including placement of mesh or other prosthesis, when performed, total length of defect(s); less than 3 cm, incarcerated or strangulated*), 49X03 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), initial, including placement of mesh or other prosthesis, when performed, total length of defect(s); 3 cm to 10 cm, reducible*), 49X04 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), initial, including placement of mesh or other prosthesis, when performed, total length of defect(s); 3 cm to 10 cm, incarcerated or strangulated*), 49X05 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), initial, including placement of mesh or other prosthesis, when performed, total length of defect(s); greater than 10 cm, reducible*), 49X08 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), recurrent, including placement of mesh or other prosthesis, when performed, total length of defect(s); less than 3 cm, incarcerated or strangulated*), and 49X09 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), recurrent, including placement of mesh or other prosthesis, when performed, total length of defect(s); 3 cm to 10 cm, reducible*). The RUC recommended a work RVU of 9.0 for CPT code 49X02, 10.80 for CPT code 49X03, 14.0 for CPT code 49X04, 14.88 for CPT code 49X05, 10.79 for CPT code 49X08, and 12.0 for CPT code 49X09. CPT codes 49X02, 49X03, 49X08, and 49X09 were surveyed with

one subsequent inpatient hospital visit at a level of CPT code 99231 (*subsequent hospital care/day 15 minutes*). The RUC applied the 10 minutes of intraservice time from CPT code 99231 to the immediate postservice time of these codes, resulting in a total immediate postservice time of 30 minutes for these codes. CPT codes 49X04 and 49X05 were surveyed with a subsequent inpatient hospital visit at a level of CPT code 99232. The RUC applied the 20 minutes of intraservice time from CPT code 99232 to the immediate postservice time of both codes, resulting in a total immediate postservice time of 40 minutes.

Much like our concerns regarding the RUC-recommended work RVU for CPT code 157X1, we do not believe that the RUC fully applied the 23-hour policy calculation when calculating the work RVUs for these codes and we disagree with the RUC-recommended RVUs. While the RUC removed the 99231 and 99232 inpatient visits included in the post-operative period for these codes, the RUC did not subtract the values of these visits from the work RVUs before making their work RVU recommendations. In the CY 2011 PFS final rule (75 FR 73226), we stated that we do not believe that the post-procedure hospital visits for outpatient services should be at the inpatient level since the typical case is an outpatient who would be ready to be discharged from the hospital in 23 hours or less. However, we agree with the RUC that the intra-service time of the inpatient hospital visit may be included in the valuation for 23-hour stay codes. Therefore, we believe that step 2 of the 23-hour hour policy calculation, which involves deducting the RVUs of the inpatient hospital visits from the starting work RVU value and subsequently reallocating the time associated with the intra-service portion of the inpatient hospital visits to the immediate postservice time of the 23-hour stay code, should be fully applied when calculating the work RVUs for CPT codes 49X02, 49X03, 49X04, 49X05, 49X08, and 49X09.

Using the 23-hour policy calculation described above and in the CY 2011 PFS final rule, we are proposing work RVUs of 8.46 for CPT code 49X02, 10.26 for CPT code 49X03, 13.46 for CPT code 49X04, 13.94 for CPT code 49X05, 10.25 for CPT code 49X08, and 11.46 for CPT code 49X09.

The following CPT codes have a post-operative period that the RUC considers to be admitted to a hospital: CPT code 49X06 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), initial, including placement of mesh or other prosthesis, when performed, total length of defect(s); greater than 10 cm, incarcerated or strangulated*), 49X10 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), recurrent, including placement of mesh or other prosthesis, when performed, total length of defect(s); 3 cm to 10 cm, incarcerated or strangulated*), 49X11 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), recurrent, including placement of mesh or other prosthesis, when performed, total length of defect(s); greater than 10 cm, reducible*), 49X12 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), recurrent, including placement of mesh or other prosthesis, when performed, total length of defect(s); greater than 10 cm, incarcerated or strangulated*), 49X13 (*Repair of parastomal hernia, any approach (ie, open, laparoscopic, robotic), initial or recurrent, including placement of mesh or other prosthesis, when performed; reducible*), and 49X14 (*Repair of parastomal hernia, any approach (ie, open, laparoscopic, robotic), initial or recurrent, including placement of mesh or other prosthesis, when performed; incarcerated or strangulated*). The RUC recommended a work RVU of 18.67 for CPT code 49X06, 15.55 RVUs for CPT code 49X10, 16.03 RVUs for CPT code 49X11, 22.67 RVUs for CPT code 49X12, 13.70 RVUs for CPT code 49X13, and 17.06 RVUs for CPT code 49X14. CPT codes 49X06 and 49X12 were surveyed and recommended with one subsequent inpatient hospital visit at a level of CPT code 99233 (*subsequent hospital care/day 35 minutes*). The RUC recommendations include an immediate postservice time of 25 minutes for CPT code 49X06 and 30 minutes for CPT code 49X12. CPT codes 49X10, 49X11, and 49X14 were surveyed and recommended with one subsequent inpatient hospital visit at a level of CPT code 99232. The RUC recommendations include an immediate postservice time of 25 minutes for 49X10, 28 minutes for CPT code 49X11, and 25 minutes for CPT code 49X14. CPT code 49X13 was surveyed and recommended with one subsequent inpatient hospital visit at a level of CPT code 99231 and an immediate postservice time of 25 minutes.

For purposes of calculating the recommended work RVUs, the RUC considered these CPT codes to describe an admitted inpatient service, while we consider the CPT codes to describe outpatient services for purposes of billing. Therefore, we believe that inpatient work in the post-operative period should not be included in the valuation. We believe the 23-hour policy should be applied to these codes. Using the 23-hour policy calculation described above and in the CY 2011 PFS final rule, we are proposing a work RVU of 18.67 for CPT code 49X06, 15.55 RVUs for CPT code 49X10, 16.03 RVUs for CPT code 49X11, 22.67 RVUs for CPT code 49X12, 13.70 RVUs for CPT code 49X13, and 17.06 RVUs for CPT code 49X14. We are also proposing revised immediate postservice times for the reallocation of the time associated with the intraservice portion of the inpatient hospital visit. We are proposing immediate post service times of 40 minutes for CPT code 49X06, 35 minutes for CPT code 49X10, 38 minutes for CPT code 49X11, 45 minutes for CPT code 49X12, 30 minutes for CPT code 49X13, and 35 minutes for CPT code 49X14.

The following CPT codes have a post-operative period that the RUC considers to be a same day discharge: CPT code 49X01 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian*), *any approach (ie, open, laparoscopic, robotic), initial, including placement of mesh or other prosthesis, when performed, total length of defect(s); less than 3 cm, reducible*) and 49X07 (*Repair of anterior abdominal hernia(s) (ie, epigastric, incisional, ventral, umbilical, spigelian), any approach (ie, open, laparoscopic, robotic), recurrent, including placement of mesh or other prosthesis, when performed, total length of defect(s); less than 3 cm, reducible*). The RUC-recommended a work RVU of 6.27 for CPT code 49X01 and 7.75 for CPT code 49X07. We disagree with the RUC-recommended RVU for CPT code 49X01 because it falls above the median value for codes with similar times. We are proposing a work RVU of 5.96 RVUs based on the intraservice time ratio, which is the ratio of 90 minutes of intraservice time of a current hernia repair code—CPT code 49560 (*Repair initial incisional or ventral hernia; reducible*) and the 45 minutes of intraservice time for CPT code 49X01. The proposed work RVU of 5.96 is also supported by reference CPT code 93453 (*Combined right and left heart catheterization including*

intraprocedural injection(s) for left ventriculography, imaging supervision and interpretation, when performed). CPT code 93453 has a work RVU of 5.99, the same intraservice time as CPT code 49X01(45 minutes), and a slightly higher total time of 113 minutes.

For CPT code 49X07, we disagree with the RUC-recommended work RVU of 7.75, as it is above the median range compared to codes with similar times. We are proposing a work RVU of 7.42 RVUs for CPT code 49X07 based off of the intraservice time ratio of 100 minutes of intraservice time for a current hernia repair code—CPT code 49565 (*Repair recurrent incisional or ventral hernia; reducible*), compared to the 60 minutes of intraservice time for CPT code 49X07. The proposed work RVU of 7.42 is also supported by reference CPT code 52353 (*Cystourethroscopy, with ureteroscopy and/or pyeloscopy; with lithotripsy (ureteral catheterization is included)*). CPT code 52353 has a work RVU of 7.50 with the same intraservice time of 60 minutes and a very similar total time of 133 minutes.

CPT code 49X15 (*Removal of total or near-total non-infected mesh or other prosthesis at the time of initial or recurrent anterior abdominal hernia repair or parastomal hernia repair, any approach (ie, open, laparoscopic, robotic)*) is an add-on code. The RUC recommended a work RVU of 5.0 for CPT code 49X15. The RUC recommendation is higher than the work RVUs for many other CPT add-on codes with similar times. We are proposing a work RVU of 2.61 RVUs for CPT code 49X15, based on the reverse building block methodology. The proposed work RVU of 2.61 is also supported by reference CPT code 15774 (*Grafting of autologous fat harvested by liposuction technique to face, eyelids, mouth, neck, ears, orbits, genitalia, hands, and/or feet; each additional 25 cc injectate, or part thereof (List separately in addition to code for primary procedure)*), which has a work RVU of 2.50 and the same total time of 45 minutes.

We reviewed the RUC-recommended direct PE inputs for all of the codes within this family. We disagree with the RUC's recommendations of 66 total minutes of clinical staff time for CPT codes 49X01 and 49X07, 60 total minutes of clinical staff time for CPT codes 49X02, 49X03, 49X04, 49X05, 49X06, 49X08, 49X09, 49X10, 49X11, 49X12, 49X13, and 49X14, and 20 total minutes of clinical staff time for CPT code 157X1. We note that the RUC recommended 090-day pre-service times for all of these codes despite surveying all of the services as 000-day services. In the CY 2022 PFS final rule (86 FR 65090), we stated we continue to believe that setting and maintaining clinical labor time and valuation standards provides greater consistency among codes that share clinical labor tasks and could improve relativity of values among codes. Therefore, we believe that the standard clinical labor packages that are in accordance with the surveyed global period continue to be the most appropriate for purposes of clinical labor valuation.

The RUC recommendations for CPT codes 49X01 and 49X07, and CPT codes 49X02, 49X03, 49X04, 49X05, 49X06, 49X08, 49X09, 49X10, 49X11, 49X12, 49X13, and 49X14, include the standard for 090-day preservice times for clinical labor activities, which is 60 minutes. For 49X01 and 49X07 in particular, the RUC also recommended an additional 6 minutes in the post service period to conduct patient communications. We disagree with the RUC-recommended 090-day times as these CPT codes were surveyed by the RUC as 000-day services and should have times consistent with 000-day services. Therefore, we are proposing the standard clinical labor times for a 000-day extensive package for a total pre-service clinical staff time of 30 minutes for CPT codes 49X01 through 49X14 with an additional standard 3 minutes of post-service patient communications for 49X01 and 49X07. CPT code 49X15 is an add-on code and does not have RUC-recommended direct PE inputs.

For CPT code 157X1, the RUC recommendation is 20 minutes of clinical staff activities, which is standard for an emergent procedure package. We do not agree that the service described by CPT code 157X1 should be considered an emergent procedure. Therefore, we are proposing the minimal clinical staff package minus pre-service education for CPT code 157X1, for a total of 12 clinical staff time minutes.

(2) Removal of Sutures or Staples (CPT Codes 15851, 158X1, and 158X2)

In October 2021, the CPT Editorial Panel approved the deletion of CPT code 15850 and revised CPT code 15851 (*Removal of sutures or staples requiring anesthesia (ie, general anesthesia, moderate sedation)*), and created two new related CPT add-on codes, 158X1 and 158X2, to describe *Removal of sutures or staples requiring anesthesia (i.e., general anesthesia, moderate sedation).* The RUC reviewed the three codes: 15851, 158X1 and 158X2 at the January 2022 RUC meeting.

After reviewing CPT code 15851, we are proposing the RUC-recommended work RVU of 1.10. CPT code 158X1 (*Removal of sutures OR staples not requiring anesthesia (List separately in addition to E/M code)*), and 1581X2 (*Removal of sutures OR staples not requiring anesthesia (List separately in addition to E/M code),* are valued by the RUC as PE-only codes. The RUC did not recommend any work inputs for these two add-on codes and we are not proposing any work RVU refinements.

We are also proposing the RUC-recommended direct PE inputs for CPT codes 15851, 158X1, and 158X2 without refinement.

(3) Arthrodesis Decompression (CPT Codes 22630, 22632, 22633, 22634, 63052, and 63053)

In October 2020, the CPT Editorial Panel approved the revision of four codes describing arthrodesis and the addition of two new add-on codes, CPT codes 63052 (*Laminectomy, facetectomy, or foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s] [eg, spinal or lateral recess stenosis]), during posterior interbody arthrodesis, lumbar; single vertebral segment (List separately in addition to code for primary procedure)*) and 63053 (*Laminectomy, facetectomy, or foraminotomy (unilateral or bilateral with decompression of spinal cord, cauda equina and/or nerve root[s] [eg, spinal or lateral recess stenosis]), during posterior interbody arthrodesis, lumbar; each additional segment (List separately in addition to code for primary procedure)*), to report laminectomy, facetectomy, or foraminotomy during posterior interbody arthrodesis, lumbar to more appropriately identify the decompression that may be separately reported. In January 2021, the RUC reviewed the survey results for the two new codes and expressed concern that the four base codes had not been surveyed along with the two new add-on codes. The RUC recommended that the entire family be resurveyed and presented for review at its April 2021 meeting. The RUC suggested that until new values could be established, interim values be established for CPT codes 63052 and 63053, which CMS revised for CY 2022 based on the survey data and RUC review available to us at the time of the development of the CY 2022 PFS proposed rule. We have noted in similar circumstances, such as the minimally invasive glaucoma surgery (MIGS) procedures with cataract surgery discussed in the CY 2022 PFS final rule (86 FR 65097), that it is best for entire

code families to be surveyed at the same time. We also noted that we finalized a policy in the CY 2015 PFS final rule (79 FR 67602 through 67609) to make all changes in the work and MP RVUs and the direct PE inputs for new, revised, and potentially misvalued services under the PFS by proposing and then finalizing such changes through notice and comment rulemaking, as opposed to initially finalizing changes on an interim final basis.

For CPT codes 22630 (*Arthrodesis, posterior interbody technique, including laminectomy and/or discectomy to prepare interspace (other than for decompression), single interspace; lumbar*), 22633 (*Arthrodesis, combined posterior or posterolateral technique with posterior interbody technique including laminectomy and/or discectomy sufficient to prepare interspace (other than for decompression), single interspace; lumbar*), 22634 (*Arthrodesis, combined posterior or posterolateral technique with posterior interbody technique including laminectomy and/or discectomy sufficient to prepare interspace (other than for decompression), single interspace; each additional interspace and segment (List separately in addition to code for primary procedure)*), 63052, and 63053, we disagree with the RUC-recommended work RVUs of 22.09, 26.80, 7.96, 5.70, and 5.00, respectively, because these values do not account for the surveyed changes in time, and we are proposing a work RVU of 20.42 for CPT code 22630, a work RVU of 24.83 for CPT code 22633, a work RVU of 7.30 for CPT code 22634, the current work RVU of 4.25 for CPT code 63052 and a work RVU of 3.78 for CPT code 63053. For CPT code 22632 (*Arthrodesis, posterior interbody technique, including laminectomy and/or discectomy to prepare interspace (other than for decompression), single interspace; each additional interspace (List separately in addition to code for primary procedure)*), we agree with the RUC-recommended maintenance of the current work RVU of 5.22, as there were no surveyed changes in time.

We are proposing a work RVU of 20.42 for CPT code 22630 based on the reverse building block methodology to account for the surveyed 8-minute decrease in total time, 10-minute decrease in pre-service time, 30-minute decrease in intraservice time, and 2-minute decrease in immediate post-service time. We believe that since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, it would be inappropriate to maintain the current work RVU given the significant decrease in intraservice time without adequate justification of increased intensity. There are currently three CPT code 99231 (*Subsequent hospital care/day 15 minutes*) and four CPT code 99213 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using time for code selection, 20–29 minutes of total time is spent on the date of the encounter.*) visits bundled in CPT code 22630's 090-day global period and valuation. The RUC recommended that the post-operative period for CPT code 22630 change to include two CPT code 99232 (*subsequent hospital care/day 25 minutes*), one CPT code 99231, one CPT code 99214 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 30–39 minutes of total time is spent on the date of the encounter.*), and two CPT code 99213 visits. The currently bundled post-operative visits total to 6.16 work RVUs, whereas the RUC-recommended changes to the post-operative visits total 6.98 work RVUs, resulting in a 0.82 work RVU increase (if no other changes occurred to CPT code 22630). The proposed work RVU of 20.42 for CPT code 22630 maintains the same IWPUT of 0.067 and maintains the 0.82 work RVU difference between the current and RUC-recommended post-operative period. We believe this proposed work RVU is more accurate than the RUC-recommended work RVU because there was no obvious or explicitly stated rationale in the RUC's recommendations for the change in intensity of intraservice time, and there was a 30-minute decrease in intraservice time for CPT code 22630. We believe that since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, it would be inappropriate to propose the RUC-recommended work RVU for CPT code 22630.

Similarly, we are proposing a work RVU of 24.83 for CPT code 22633, based on the reverse building block methodology, to account for the surveyed 56-minute decrease in total time, 20-minute decrease in intraservice time, and 33-minute decrease in post-operative time. The reverse building block methodology accounts for the time and intensity of post-operative work through long-established and agreed-upon times and intensities for bundled post-operative visits, and accurately adjusts for the changes occurring in the post-operative period. There is currently one post-operative CPT code 99232, two CPT code 99233 (*Subsequent hospital care/day 35 minutes*), and three CPT code 99213 visits bundled in CPT code 22633's valuation. The RUC recommended that the post-operative period for CPT code 22633 change to include two CPT code 99232, one CPT code 99231, one CPT code 99214 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 30–39 minutes of total time is spent on the date of the encounter.*), and two CPT code 99213 visits. The currently bundled post-operative visits total to 8.30 work RVUs, whereas the RUC-recommended changes to the post-operative visits total 6.98 work RVUs, resulting in a 1.32 work RVU decrease (if no other changes occurred to CPT code 22633). Using the reverse building block methodology, the proposed work RVU of 24.83 maintains the same IWPUT of 0.080 and the 1.32 work RVU difference between the current and RUC-recommended post-operative period. We believe this proposed work RVU is more accurate than the RUC-recommended work RVU because there was no obvious or explicitly stated rationale in the RUC's recommendations for the change in intensity of intraservice time, and there was a 20-minute decrease in intraservice time for CPT code 22633. We believe that since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, it would be inappropriate to propose the RUC-recommended work RVU decrease of 0.95, which is only about three-quarters of the established decrease in work RVU of 1.32 and intensity from the changes in the post-operative period alone. We also considered the apparent decrease in intraservice time and the lack of an adequate justification for increased intensity to arrive at our proposed work RVU of 24.83 for CPT code 22633.

We are proposing a work RVU of 7.30 for CPT code 22634 based on a comparison to its base code, CPT code 22633. We used the proposed work RVU of 24.83 for the parent CPT code (22633) as the numerator and the current work

RVU for CPT code 22633 of 27.75 as the denominator, and multiplied that fraction by the current work RVU of 8.16 for CPT code 22634 to arrive at a proportionate proposed work RVU of 7.30 for CPT code 22634 ((24.83/27.75) * 8.16) = 7.30). The proposed work RVU accounts for the decrease in intraservice time and is well bracketed by CPT code 34820 (*Open iliac artery exposure for delivery of endovascular prosthesis or iliac occlusion during endovascular therapy, by abdominal or retroperitoneal incision, unilateral (List separately in addition to code for primary procedure)*), valued at 7.00 work RVUs with an intraservice time of 60 minutes, and CPT code 34833 (*Open iliac artery exposure with creation of conduit for delivery of endovascular prosthesis or for establishment of cardiopulmonary bypass, by abdominal or retroperitoneal incision, unilateral (List separately in addition to code for primary procedure)*), valued at 8.16 work RVUs with an intraservice time of 72 minutes.

CPT codes 63052 and 63053 were new add-on codes to report decompression when performed in conjunction with posterior interbody arthrodesis at the same interspace for CY 2022. The proposed work RVU for CPT code 63052 would maintain the current work RVU, despite a surveyed change in time. In the CY 2022 PFS final rule, we finalized a work RVU of 4.25 for CPT code 63052 for CY 2022 based on a crosswalk to CPT code 22853 (*Insertion of interbody biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to intervertebral disc space in conjunction with interbody arthrodesis, each interspace (List separately in addition to code for primary procedure)*), which has a work RVU of 4.25 and an intraservice time of 45 minutes. Despite a surveyed 5-minute intraservice time increase for CPT code 63052, we believe the crosswalk to CPT code 22853 is still valid, given that only 3 months passed between the two surveys, as it now has the same intraservice time as CPT code 63052, is a spinal procedure, and is an add-on code to the same base codes as CPT code 63052. Commenters on the CY 2022 PFS proposed rule supported the bracket of key reference service CPT code 22552 (*Arthrodesis, anterior interbody, including disc space preparation, discectomy, osteophytectomy and decompression of spinal cord and/or nerve roots; cervical below C2, each additional interspace (List separately in addition to code for primary procedure)*) and MPC CPT code 34812 (*Open femoral artery exposure for delivery of endovascular prosthesis, by groin incision, unilateral (List separately in addition to code for primary procedure)*), and therefore, we noted that the final work RVU of 4.25 for CY 2022 was supported by the commenters (86 FR 65092). CPT code 22552 has a work RVU of 6.50 and an intraservice time of 45 minutes, and commenters noted that CPT code 22552 has a higher intensity as anticipated for a surgical procedure and in comparison with a lumbar procedure. CPT code 34812 has a work RVU of 4.13 and 40 minutes of intraservice time, and commenters noted that this code involves open femoral artery exposure by groin incision and closure of the wound, typically for separately reported delivery of an endovascular prosthesis for an asymptomatic infrarenal abdominal aortic aneurysm. In comparison, exposure and closure for CPT code 63052 are performed as part of the primary arthrodesis code and the intraservice time includes higher intensity bony and soft tissue resection, and therefore, although both codes require the same time, the physician work and intensity of CPT code 63052 is greater than CPT code 34812.

In the CY 2022 PFS final rule, we finalized a work RVU of 3.19 for CPT code 63053 for CY 2022 based on an intraservice time ratio between CPT codes 63052 and 63053 ((30 minutes/40 minutes) * 4.25 = 3.19). We believe this intraservice time ratio between the two CPT codes is still valid, given that only 3 months passed between the two surveys, and therefore, we are proposing a work RVU of 3.78 based on the surveyed time changes for CPT codes 63052 and 63053 ((40 minutes/45 minutes) * 4.25 = 3.78) in order to maintain consistency with previous analysis of time and intensity of these two add-on codes. Due to the lack of an obvious or explicitly stated rationale in the RUC's April recommendations for the change in intensity between the January 2021 and April 2021 surveys, we relied on the changes in surveyed time to calculate the proposed work RVUs for CPT codes 63052 and 63053.

We are proposing the RUC-recommended PE inputs for CPT codes 22630 and 22633.

(4) Total Disc Arthroplasty (CPT Codes 22857 and 228XX)

In September 2021, the CPT Editorial Panel created CPT Category I code 228XX to describe *Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression); second interspace, lumbar (List separately in addition to code for primary procedure)* and replace CPT Category III code 0163T (*Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression), each additional interspace, lumbar (List separately in addition to code for primary procedure)*), which prompted CPT codes 228XX and 22857 (*Total disc arthroplasty (artificial disc), anterior approach, including discectomy to prepare interspace (other than for decompression); single interspace, lumbar*) to be surveyed for the January 2022 RUC meeting. At the January 2022 RUC meeting, the specialty societies indicated, and the RUC agreed, that the survey results for both CPT codes 22857 and 228XX were erroneous and that the codes should be resurveyed for the April 2022 RUC meeting. Therefore, we are proposing to maintain the RUC-recommended work RVU of 27.13 for CPT code 22857 and contractor pricing for CPT code 228XX for CY 2023. We will revisit the valuations of CPT codes 22857 and 228XX in future rulemaking when we have received the April 2022 RUC recommendations, based on our annual review process discussed in the Background section of this proposed rule.

(5) Insertion of Spinal Stability Distractive Device (CPT Codes 22869 and 22870)

For CPT codes 22869 (*Insertion of interlaminar/interspinous process stabilization/distraction device, without open decompression or fusion, including image guidance when performed, lumbar; single level*) and 22870 (*Insertion of interlaminar/interspinous process stabilization/distraction device, without open decompression or fusion, including image guidance when performed, lumbar; second level (List separately in addition to code for primary procedure)*), we are proposing to maintain the current work RVUs of 7.03 and 2.34, respectively. We are proposing the RUC-recommended direct PE inputs for CPT code 22869 without refinement.

(6) Knee Arthroplasty (CPT Codes 27446 and 27447)

CPT codes 27446 (*Arthroplasty, knee, condyle and plateau; medial OR lateral compartment*) and 27447 (*Arthroplasty, knee, condyle and plateau; medial AND lateral compartments with or without patella resurfacing (total knee arthroplasty)*) were reviewed by the RUC in April 2021. We previously reviewed CPT code 27447 in the CY

2021 PFS final rule; (see 85 FR 84609 and 84610 for our previous discussion). The RUC proposed a revised survey instrument to ask about additional pre-operative time and resources spent on pre-optimization patient work. The RUC agreed that the pre-service planning activities are being performed routinely for the typical patient but the inclusion of this work is not reflected in the 090-day global period structure. The RUC indicated that separate planning codes may be developed, or current codes such as the prolonged service codes may be reported for these activities.

We are proposing the RUC-recommended work RVU of 17.13 for CPT code 27446. The survey 25th percentile actually showed an increase in work RVU even though there was a decrease in total time. One post facility visit, CPT code 99232 (*Subsequent hospital care/day 25 minutes*), was removed and replaced with CPT code 99214 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 30–39 minutes of total time is spent on the date of the encounter*) a post-operative visit in the office. Given a decrease in the total time spent and a lower level post-operative visit, it is reasonable that the work RVU went down. There was no change in the global period.

For CPT code 27447, the RUC reaffirmed the same valuation that it recommended for the CY 2021 PFS rulemaking cycle. Since we did not receive any new information regarding this code, we are not proposing to change our previously finalized values (see 85 FR 84609 and 84610 for our previous discussion of this code in the CY 2021 PFS final rule). We are proposing to maintain a work RVU of 19.60 for CPT code 27447, the value that we previously finalized through rulemaking. We are proposing the RUC-recommended direct PE inputs for CPT code 27446 and we are proposing to maintain the direct PE inputs for CPT code 27447.

(7) Endovascular Pulmonary Arterial Revascularization (CPT Codes 338X3, 338X4, 338X5, 338X6, and 338X7)

At the February 2021 meeting of the CPT Editorial Panel, CPT approved a new family of Category I CPT codes to describe percutaneous endovascular repair of pulmonary artery stenosis (PAS) by stent replacement. CPT codes 338X3 through 338X7 were surveyed by the RUC at the October 2021 RUC meeting.

We disagree with the RUC-recommended work RVU of 14.0 for CPT code 338X3 (*Percutaneous pulmonary artery revascularization by stent placement, initial; normal native connections, unilateral*). The RUC recommendation is the survey median and appears to be high compared to codes with similar times. We are proposing the survey 25th percentile work RVU of 11.03 for CPT code 338X3. A work RVU of 11.03 is supported by a bracket of reference CPT codes, including CPT code 61650 and CPT code 61640. CPT code 61650 (*Endovascular intracranial prolonged administration of pharmacologic agent(s) other than for thrombolysis, arterial, including catheter placement, diagnostic angiography, and imaging guidance; initial vascular territory*) has a work RVU of 10.0 and the same intraservice time of 90 minutes and the same total time of 206 minutes. CPT code 61640 (*Balloon dilatation of intracranial vasospasm, percutaneous; initial vessel*) has a work RVU of 12.32 and an intraservice time of 90 minutes and a higher total time of 233 minutes.

There are no direct PE inputs for CPT Code 338X3.

We disagree with the RUC-recommended work RVU of 18.0 for CPT code 338X4 (*Percutaneous pulmonary artery revascularization by stent placement, initial; normal native connections, bilateral*). The RUC recommendation is the survey median and appears to be high compared to codes with similar times. We are proposing the survey 25th percentile work RVU of 14.50. A work RVU of 14.50 is supported by a reference CPT code—CPT code 11005. CPT code 11005 (*Debridement of skin, subcutaneous tissue, muscle and fascia for necrotizing soft tissue infection; abdominal wall, with or without fascial closure*) has a work RVU of 14.24 and the same intraservice time of 120 minutes and nearly the same total time of 235 minutes.

There are no direct PE inputs for CPT Code 338X4.

We disagree with the RUC-recommended work RVU of 17.33 for CPT code 338X5 (*Percutaneous pulmonary artery revascularization by stent placement, initial; abnormal connections, unilateral*). The RUC recommendation is the survey median and appears to be high compared to codes with similar times. We are proposing the survey 25th percentile work RVU of 14.0. A work RVU of 14.0 is supported by a reference CPT code—CPT code 61640. CPT code 61640 (*Balloon dilatation of intracranial vasospasm, percutaneous; initial vessel*) has a work RVU of 12.32 and the same intraservice time of 90 minutes and a higher total time of 233 minutes.

There are no direct PE inputs for CPT Code 338X5.

We disagree with the RUC-recommended work RVU 20.0 for CPT code 338X6 (*percutaneous pulmonary artery revascularization by stent placement, initial; abnormal connections, bilateral*). The RUC recommendation is the survey median and appears to be high compared to codes with similar times. Although we disagree with the RUC-recommended work RVU, we concur that the relative difference in work between CPT codes 338X4 and 338X6 is equivalent to the RUC-recommended interval of 2.0 RVUs. Therefore, we are proposing a work RVU of 16.50 for CPT code 338X6, based on the recommended interval of 2.0 additional RVUs above our proposed work RVU of 14.50 for CPT code 338X4. A work RVU of 16.50 is also supported by a reference code—CPT code 11005. CPT code 11005 (*Debridement of skin, subcutaneous tissue, muscle and fascia for necrotizing soft tissue infection; abdominal wall, with or without fascial closure*) has a work RVU of 14.24 and the same intraservice time of 120 minutes and a higher total time of 265 minutes.

There are no direct PE inputs for CPT Code 338X6.

We disagree with the RUC-recommended RVU of 7.27 for CPT code 338X7 (*Percutaneous pulmonary artery revascularization by stent placement, each additional vessel or separate lesion, normal or abnormal connections (list separately in addition to code for primary procedure) (use 338X7 in conjunction with 338X3, 338X4, 338X5, 338X6)*). The RUC recommendation is the survey median and appears to be high compared to codes with similar times. We are proposing the survey 25th percentile work RVU of 5.53. A work RVU of 5.53 is supported by a reference code—CPT code 57267. CPT code 57267 (*Insertion of mesh or other prosthesis for repair of pelvic floor defect, each site (anterior, posterior compartment), vaginal approach (List separately in addition to code for primary procedure*) has a work RVU of 4.88 and the same time of 45 minutes.

There are no direct PE inputs for CPT code 338X7.

(8) Percutaneous Arteriovenous Fistula Creation (CPT Codes 368X1 and 368X2)

In October 2021, the CPT Editorial Panel created CPT codes 368X1 (*Percutaneous arteriovenous fistula creation, upper extremity, single access of both the peripheral artery and*

peripheral vein, including fistula maturation procedures (e.g., transluminal balloon angioplasty, coil embolization) when performed, including all vascular access, imaging guidance and radiologic supervision and interpretation) and 368X2 (*Percutaneous arteriovenous fistula creation, upper extremity, separate access sites of the peripheral artery and peripheral vein, including fistula maturation procedures (e.g., transluminal balloon angioplasty, coil embolization) when performed, including all vascular access, imaging guidance and radiologic supervision and interpretation*) to describe the creation of an arteriovenous fistula in an upper extremity via a percutaneous approach. Previously, CPT coding did not account for percutaneous arteriovenous access creation, as current the CPT codes only describe an open surgical approach. Given that new technologies have been developed that allow for less invasive approaches that utilize percutaneous image-guided methods to approximate a target artery and vein using magnets or mechanical capture, we created HCPCS codes G2170 (*Percutaneous arteriovenous fistula creation (avf), direct, any site, by tissue approximation using thermal resistance energy, and secondary procedures to redirect blood flow (e.g., transluminal balloon angioplasty, coil embolization) when performed, and includes all imaging and radiologic guidance, supervision and interpretation, when performed*) and G2171 (*Percutaneous arteriovenous fistula creation (avf), direct, any site, using magnetic-guided arterial and venous catheters and radiofrequency energy, including flow-directing procedures (e.g., vascular coil embolization with radiologic supervision and interpretation, when performed) and fistulogram(s), angiography, venography, and/or ultrasound, with radiologic supervision and interpretation, when performed*) in July 2020 that describe two approaches to percutaneous arteriovenous access creation. The RUC intends for CPT codes 368X1 and 368X2, which represent two percutaneous approaches to creating arteriovenous access for End-Stage Renal Disease (ERSD) patients during hemodialysis, to replace HCPCS codes G2170 and G2171, and has requested both G2170 and G2171 be deleted. For CY 2023, the RUC recommended a work RVU of 7.50 for CPT code 368X1, and a work RVU of 9.60 for CPT code 368X2.

We disagree with the RUC-recommended RVUs for CPT codes 368X1 and 368X2. We found that the recommended work RVUs were high when compared to other codes with similar time values. The RUC-recommended RVU of 7.50 for 368X1 is the second highest RVU for codes with 55 to 65 minutes of intraservice time and 94 to 114 minutes of total time, with RVUs ranging from 2.45 to 8.84. Similarly, the RUC-recommended RVU of 9.60 for 368X2 is the third highest RVU for codes with 65 to 85 minutes of intraservice time and 109 to 129 minutes of total time, with RVUs ranging from 4.69 to 10.95. Therefore, we are proposing a work RVU of 7.20 for CPT code 368X1, and a work RVU of 9.30 for CPT code 368X2.

We disagree with the RUC-recommended work RVU of 7.50 for CPT code 368X1 and are proposing an RVU of 7.20 that is based on the intra-service time ratio calculation using the second reference code from the RUC survey, CPT code 36905 (*Percutaneous transluminal mechanical thrombectomy and/or infusion for thrombolysis, dialysis circuit, any method, including all imaging and radiological supervision and interpretation, diagnostic angiography, fluoroscopic guidance, catheter placement(s), and intraprocedural pharmacological thrombolytic injection(s); with transluminal balloon angioplasty, peripheral dialysis segment, including all imaging and radiological supervision and interpretation necessary to perform the angioplasty*). The proposed RVU of 7.20 is based on the intra-service time ratio using the RUC-recommended 60 minutes intra-service time for CPT code 368X1 divided by 75 minutes of intra-service time for CPT code 36905, then multiplying by the RVU of 9.00 for CPT code 36905 ($(60/75) \times 9.00 = 7.20$). We chose to use the second reference code from the RUC survey, CPT code 36905, in this calculation because its intra-service time and total time values were closer to the time values proposed by the RUC for CPT code 368X1. We note that the RUC-recommended RVU of 7.50 is one of the highest values within the range of reference codes we reviewed with the same intra-service time and similar total time. The proposed work RVU of 7.20 is supported by the reference CPT codes we compared to CPT code 368X1 with the same 60 minutes of intra-service time and similar total time as CPT code 368X1; reference CPT code 47541 (*Placement of access through the biliary tree and into small bowel to assist with an endoscopic biliary procedure (e.g., rendezvous procedure), percutaneous, including diagnostic cholangiography when performed, imaging guidance (e.g., ultrasound and/or fluoroscopy), and all associated radiological supervision and interpretation, new access*) has a work RVU of 6.75, and reference CPT code 33991 (*Insertion of ventricular assist device, percutaneous, including radiological supervision and interpretation; left heart, both arterial and venous access, with transseptal puncture*) has a work RVU of 8.84. Again, we believe 7.20 is a more appropriate value overall than 7.50 when compared to the range of codes with the same intra-service time and similar total time.

Although we disagree with the RUC-recommended work RVU of 9.60 for CPT code 368X2, we concur that the relative difference in work between CPT codes 368X1 and 368X2 is equivalent to the RUC-recommended interval of 2.10 RVUs. We believe the use of an incremental difference between these CPT codes is a valid methodology for setting values, especially in valuing services within a family of codes where it is important to maintain an appropriate intra-family relativity. Therefore, we are proposing a work RVU of 9.30 for CPT code 368X2, based on the RUC-recommended interval of 2.10 RVUs above our proposed work RVU of 7.20 for CPT code 368X1.

For the direct PE inputs, we are seeking additional information on two equipment items and four supply items. For two of those four supply items, we are requesting a justification for their inclusion as direct PE inputs. The RUC submitted invoices for two new equipment inputs; one for a Wavelinq EndoAVF generator (EQ403) used for CPT code 368X2, and the other for an Ellipsys EndoAVF generator (EQ404) used for CPT code 368X1. We are seeking comments and requesting information that may inform us why the Wavelinq generator (EQ403) is so much more expensive on its invoice as compared with the Ellipsys generator (EQ404) since the former costs $18,580 and the latter costs $3,000.

In addition, the RUC included supply items SD149 (catheter, balloon inflation device) and SD152 (catheter, balloon, PTA) as direct PE inputs for CPT codes 368X1 and 368X2. We are seeking comments and requesting information that may inform us if supply items SD149 and SD152 are typical, and how often they are used, for CPT codes 368X1 and 368X2. Also, the RUC included supply items SF056 (detachable coil) and SF057 (non-detachable embolization coil) as direct PE inputs for CPT code 368X2 (one each for SF056 and two each for SF057). We are seeking comments and requesting information that may provide us with a

justification for keeping supply items SF056 and SF057 as direct PE inputs for CPT code 368X2. We need to know if both of these supply items are typical and how often they are used for CPT code 368X2. If these supply inputs are not typical for these procedures, we believe that they should be removed from the direct PE inputs.

We are proposing to delete HCPCS codes G2170 and G2171 and replace them with CPT codes 368X1 and 368X2 as recommended by the RUC.

(9) Energy Based Repair of Nasal Valve Collapse (CPT Codes 37X01 and 30468)

In September 2021, the CPT Editorial Panel created CPT code 37X01 (*Repair of nasal valve collapse with low energy, temperature-controlled (i.e., radiofrequency) subcutaneous/submucosal remodeling*) which is currently reported with an unlisted code. For the January 2022 RUC meeting, both CPT code 37X01 and CPT code 30468 (*Repair of nasal valve collapse with subcutaneous/submucosal lateral wall implant(s)*) were reviewed. For CY 2023, the RUC recommended a work RVU of 2.70 for CPT code 37X01, and no change to the current work RVU of 2.80 for CPT code 30468.

The RUC reviewed the specialty society request to affirm the recent RUC valuations for CPT code 30468, which was surveyed and valued by the RUC in January 2020 for CY 2021. The RUC agreed, so for CY 2023, the RUC is not recommending any change to the current work RVU of 2.80 for CPT code 30468. In addition, the PE Subcommittee reviewed the direct practice expense inputs and made modifications to the pre-service clinical staff time to CPT code 30468 in accordance with current standards. There was a previous oversight in valuing the direct PE inputs for CPT code 30468. Therefore, 3 minutes of clinical staff time has been added to CPT code 30468 for clinical activity CA005 (complete pre-procedure phone calls and prescription).

We are proposing to maintain the current work RVU of 2.80 for CPT code 30468 as recommended by the RUC. We are also proposing the RUC-recommended direct PE inputs for CPT code 30468, which now includes clinical activity code CA005, without refinement.

For CPT code 37X01, the RUC recommended a work RVU of 2.70 based on a direct work RVU crosswalk from CPT code 31295 (*Nasal/sinus endoscopy, surgical, with dilation (e.g., balloon dilation); maxillary sinus ostium, transnasal or via canine fossa*). We disagree with the RUC-recommended work RVU of 2.70. Therefore, we are proposing a work RVU of 2.44 for CPT code 37X01, which is the same RVU as CPT code 31297 (*Nasal/sinus endoscopy, surgical, with dilation (e.g., balloon dilation); sphenoid sinus ostium*) and has the same 20 minutes of intra-service time and similar total time. We note that CPT code 31295, which the RUC used as a direct crosswalk for the work RVU for CPT code 37X01, has the same 20 minutes of intra-service time and 56 minutes of total time as CPT code 31297. We believe the RUC should have used CPT code 31297 as the crosswalk for CPT code 37X01. Both CPT codes 31295 and 31297 were reviewed in 2017 and are in the same code family. The proposed work RVU of 2.44 is supported by the reference CPT codes we compared to CPT code 37X01 with the same 20 minutes of intra-service time and similar total time as CPT code 37X01; reference CPT code 31233 (*Nasal/sinus endoscopy, diagnostic; with maxillary sinusoscopy (via inferior meatus or canine fossa puncture)*) with an RVU of 2.18, and CPT code 31295 with an RVU of 2.70. Again, we believe 2.44 is a more appropriate value overall than 2.70 when compared to the range of codes with the same intra-service time and similar total time.

We are proposing the RUC-recommended direct PE inputs for CPT code 37X01 without refinement.

(10) Drug Induced Sleep Endoscopy (DISE) (CPT Code 42975)

In October 2020, the CPT Editorial Panel created CPT code 42975 (*Drug-induced sleep endoscopy, with dynamic evaluation of velum, pharynx, tongue base, and larynx for evaluation of sleep-disordered breathing, flexible, diagnostic*) to report drug induced sleep endoscopy (DISE) flexible, diagnostic. At the January 2021 RUC Meeting, the RUC requested that this service be resurveyed for the April 2021 RUC Meeting using a standard 000-day survey template. For CY 2023, the RUC recommended a work RVU of 1.95 for CPT code 42975.

We disagree with the RUC-recommended work RVU of 1.95 for CPT code 42975 and are proposing a work RVU of 1.58. We believe the RVU should be lower than the RUC recommendation of 1.95 to reflect the decrease in total time from 68 minutes to 50 minutes. The proposed RVU of 1.58 is based on the total time ratio calculation using the RUC-recommended 50 minutes total time for CPT code 42975 divided by the 48 minutes of total time for CPT code 43197 (*Esophagoscopy, flexible, transnasal; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)*), then multiplying by the RVU of 1.52 for CPT code 43197 ((50/48) × 1.52 = 1.58). We found that CPT code 43197 has the same intra-service time and similar total time as CPT code 42975. Also, CPT code 43197 is a similar endoscopic procedure as CPT codes 42975 and 31579 (*Laryngoscopy, flexible or rigid telescopic, with stroboscopy*). We note that CPT code 31579 is the first key reference code in the RUC survey. The proposed work RVU of 1.58 is supported by the reference CPT codes we compared to CPT code 42975 with the same 15 minutes of intra-service time and similar total time as CPT code 42975; reference CPT code 43200 (*Esophagoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)*) with an RVU of 1.42, and CPT code 62272 (*Spinal puncture, therapeutic, for drainage of cerebrospinal fluid (by needle or catheter)*) with an RVU of 1.58. Again, we believe the proposed RVU of 1.58 is a more appropriate value overall than 1.95 when compared to the range of codes with the same intra-service time and similar total time.

We are proposing the RUC-recommended direct PE inputs for CPT code 42975 without refinement.

(11) Endoscopic Bariatric Device Procedures (CPT Codes 43235, 43X21, and 43X22)

In February 2021, the CPT Editorial Panel created CPT codes 43X21 (*Esophagogastroduodenoscopy, flexible, transoral; with deployment of intragastric bariatric balloon*) and 43X22 (*Esophagogastroduodenoscopy, flexible, transoral; with removal of intragastric bariatric balloon(s)*) for endoscopic bariatric device procedures to the esophagogastroduodenoscopy (EGD) code family. CPT code 43235 (*Esophagogastroduodenoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)*) is the base code for the EGD family and was surveyed with the new endoscopic bariatric device procedures, 43X21 and 43X22. All three of these CPT codes were reviewed at the April 2021 RUC meeting. For CY 2023, the RUC recommended an RVU of 3.11 for CPT code 43X21, an RVU of 2.80 for CPT code 43X22, and maintaining the current work RVU of 2.09 for CPT code 43235.

We are proposing the RUC-recommended work RVU of 3.11 for

CPT code 43X21, the RUC-recommended work RVU of 2.80 for CPT code 43X22, and maintaining the current work RVU of 2.09 for CPT code 43235 for this code family.

We are proposing the direct PE inputs for CPT code 43235 without refinement. However, we are proposing refinements to the direct PE inputs for CPT codes 43X21 and 43X22.

For CPT code 43X21, we are proposing refinements to the direct PE inputs for clinical labor activity codes CA001 (*complete pre-service diagnostic and referral forms) and CA011 (provide education/obtain consent*). We are proposing to refine CA001 from 5 minutes to the standard 3 minutes since no explanation was provided to support 5 minutes for this clinical labor activity. We are proposing to refine CA011 from 15 minutes to 10 minutes since it was not clear why this much time for education is needed, and we do not believe that the recommended 15 minutes would be typical for the procedure. Also, when we looked at other procedures with clinical labor activity code CA011 we did not find many procedures with more than 12 minutes for this activity. Therefore, we are proposing to refine the clinical labor activity times for CA001 and CA011 for CPT code 43X21 as described above, and to accept the remaining RUC-recommended direct PE inputs without refinement.

For CPT code 43X22, we are proposing a refinement to the direct PE input for clinical labor activity code CA016 (*prepare, set-up and start IV, initial positioning and monitoring of patient*) from 10 minutes to the standard 2 minutes. In the PE Summary of Recommendations for non-facility direct PE inputs provided by the RUC, the RUC recommended 8 minutes above the standard 2 minutes for CA016 and stated this clinical labor activity was identical to the 10 minutes for positioning the patient as CPT code 43260 (*Endoscopic retrograde cholangiopancreatography (ERCP); diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure)*). However, our study of this code family could not find 10 minutes of non-facility direct PE inputs for clinical labor activity CA016. Also, CPT code 43260 is only performed in a facility and does not have any non-facility clinical labor times. Therefore, we are proposing to refine the clinical labor activity time for CA016 for CPT code 43X22 as described above, and to accept the remaining RUC-recommended direct PE inputs without refinement. This proposed reduction of 8 minutes to the CA016 clinical labor activity also carries over to the equipment times for the suction machine (Gomco) (EQ235), the scope video system (monitor, processor, digital capture, cart, printer, LED light) (ES031), and the multi-channeled flexible digital scope, esophagoscopy gastroscopy duodenoscopy (EGD) (ES087) which we are proposing to reduce by the same 8 minutes.

(12) Delayed Creation Exit Site From Embedded Catheter (CPT Code 49436)

CPT code 49436 (*Delayed creation of exit site from embedded subcutaneous segment of intraperitoneal cannula or catheter*) was finalized as potentially misvalued in the CY 2022 PFS final rule (86 FR 64996) and the code was found to be appropriate to value for the non-facility/office setting. The RUC only reviewed the PE inputs for this service at the January 2022 meeting. The RUC recommended 5 minutes for Clinical Activity Code CA013, line 34 in the non-facility/office setting on the RUC-recommended PE spreadsheet. We disagree with the RUC-recommended time, and are proposing the standard time of 2 minutes, as an adequate rationale was not provided for the additional time in the global space. This proposed reduction of 3 minutes to the CA013 clinical labor activity also carries over to the equipment times, which we are proposing to reduce by the same 3 minutes. Otherwise, we agreed with the RUC-recommended clinical labor times for activity codes CA011 and CA018, and we are proposing the remaining refinements as recommended.

The RUC did not recommend any work inputs for this code and we are not proposing any work RVU refinements.

(13) Percutaneous Nephrolithotomy (CPT Codes 50080, 50081)

In September 2021, the CPT Editorial Panel revised the descriptors to CPT codes 50080 (*Percutaneous nephrolithotomy or pyelolithotomy, lithotripsy stone extraction, antegrade ureteroscopy, antegrade stent placement and nephrostomy tube placement, when performed, including imaging guidance; simple (e.g., stone[s] up to 2 cm in a single location of kidney or renal pelvis, nonbranching stones)*) and 50081 (*Percutaneous nephrolithotomy or pyelolithotomy, lithotripsy stone extraction, antegrade ureteroscopy, antegrade stent placement and nephrostomy tube placement, when performed, including imaging guidance; complex (e.g., stone[s] > 2 cm, branching stones, stones in multiple locations, ureter stones, complicated anatomy)*), that in recent claims data were identified via the site of service anomaly screen, to be performed less than 50 percent of the time in the inpatient setting, but both codes have 090 day global periods, which include post-op inpatient hospital E/M services as a component of their value, typical of major surgery codes. The revised code descriptors also include image guidance and nephrostomy tube placement, which were not present in the old descriptors, and were reported as procedures that were separate from CPT codes 50081 and 50082. These codes have not been reviewed for nearly 30 years.

CPT code 50080 currently has a work RVU of 15.74 with 117 minutes of intra-service time and 359.5 minutes of total time. The RUC recommended a work RVU of 13.50, 90 minutes of intra-service time, and 244 minutes of total time for CPT code 50080, which represents a reduction from the current values. However, the recommended intra-service times dropped by 76.9 percent from the current intra-service time and the RUC recommended work RVU is reduced only by 85.9 percent. Therefore, we disagree with the RUC recommended work RVU and we are proposing a work RVU of 12.11 for CPT code 50080 with the RUC recommended 90 minutes of intra-service time and 244 minutes of total time. We note that our proposed work RVU for CPT code 50080 falls between CPT code 36830 (*Creation of arteriovenous fistula by other than direct arteriovenous anastomosis (separate procedure); nonautogenous graft (e.g., biological collagen, thermoplastic graft)*), with a work RVU of 12.03 and the same intra-service time of 90 minutes, and CPT code 36818 (*Arteriovenous anastomosis, open; by upper arm cephalic vein transposition*), with a work RVU of 12.39 and the same intra-service time of 90 minutes (and both with similar total times to CPT code 50080).

CPT code 50081 currently has a work RVU of 23.50 with 42 minutes of pre-service evaluation time, 0 minutes of pre-service positioning time, 25 minutes of pre-service scrub/dress/wait time, 195 minutes of intra-service time, 27 minutes of immediate post-service time, and 507.5 minutes of total time. The RUC recommended 22.00 work RVUs with 40 minutes of pre-service evaluation time, 3 minutes positioning time, 10 minutes scrub/dress/wait time, 140 minutes of intra-service time, 44 minutes of immediate post-service time, for a sum of 302 minutes of total time. The RUC-recommended intra-service time and total time for CPT code 50081 are less than the current times for this code and we expect the work RVUs to also be less than the current work RVUs.

Though the RUC recommended a work RVU of 22.00 that is less than the current 23.50 work RVU, a substantial reduction in time should be better reflected in the work RVU.

The RUC recommended 13.50 work RVUs for CPT code 50800 and 22.00 for CPT code 50081, with an incremental difference between the two codes of 8.50 work RVUs (22.00 − 13.50 = 8.50). We are proposing a work RVU of 20.61 for CPT code 50081, based on the proposed CPT code 50080's work RVU of 12.11 plus the RUC-recommended incremental difference 8.50 work RVUs between CPT code 50080 and CPT code 50081 (12.11 + 8.50 = 20.61).

We are proposing the direct PE inputs as recommended by the RUC for both codes in the family.

(14) Laparoscopic Simple Prostatectomy (CPT Codes 55821, 55831, 55866, and 558XX)

In October 2021, the CPT Editorial Panel added CPT placeholder code 558XX (*Laparoscopy, surgical prostatectomy, simple subtotal (including control of postoperative bleeding, vasectomy, meatotomy, urethral calibration and/or dilation, and internal urethrotomy), includes robotic assistance, when performed*) and prompted this family of Laparoscopic Simple Prostatectomy codes for survey and review for the January 2022 RUC meeting.

The RUC recommends a work RVU of 15.18 for CPT code 55821 (*Prostatectomy (including control of postoperative bleeding, vasectomy, meatotomy, urethral calibration and/or dilation, and internal urethrotomy); suprapubic, subtotal, 1 or 2 stages*) with 33 minutes of pre-service evaluation time, 3 minutes positioning time, 10 minutes scrub/dress/wait time, 120 minutes of intra-service time, and 25 minutes of immediate post-service time, for a sum of 329 minutes of total time. CPT code 55821 currently has a work RVU value of 15.76 with 102.0 minutes of intra-service time and 399.5 minutes of total time. After reviewing this code and relative similar codes in the PFS, we are proposing the RUC-recommended work RVU of 15.18 with 315 minutes of total time.

The RUC recommends a work RVU of 15.60 for CPT code 55831 (*Prostatectomy (including control of postoperative bleeding, vasectomy, meatotomy, urethral calibration and/or dilation, and internal urethrotomy); retropubic, subtotal*), with 40 minutes of pre-service evaluation time, 3 minutes positioning time, 10 minutes scrub/dress/wait time, 120 minutes of intra-service time, 25 minutes of immediate post-service time, for a sum of 329 minutes of total time. CPT code 55831 currently has a work RVU value of 17.19 with 114.0 minutes of intra-service time and 422.5 minutes of total time. The RUC notes an additional degree of difficulty with this retropubic incision approach (behind the pubis) compared to the suprapubic approach. After reviewing this code and relative similar codes in the PFS, we are proposing the RUC recommended work RVU of 15.60 with 322 minutes of total time.

The RUC recommends a work RVU of 22.46 for CPT code 55866 (*Laparoscopy, surgical prostatectomy, retropubic radical, including nerve sparing, includes robotic assistance, when performed*) with 40 minutes of pre-service evaluation time, 15 minutes positioning time, 12 minutes scrub/dress/wait time, 180 minutes of intra-service time, 50 minutes of immediate post-service time, for a sum of 362 minutes of total time. CPT code 55866 currently has a work RVU value of 26.80 with 180 minutes of intra-service time and 422 minutes of total time. The RUC notes that this procedure removes the entire prostate with robotic assistance, and the complexity of nerve sparing when operating with a cancerous prostate, increases the medical complexity and intensity of this procedure. After reviewing this code and relative similar codes in the PFS, we are proposing the RUC recommended work RVU of 22.46 with 362 minutes of total time to CPT code 55866.

The RUC recommends a work RVU of 19.53 for CPT code 558XX (*Laparoscopy, surgical prostatectomy, simple subtotal (including control of postoperative bleeding, vasectomy, meatotomy, urethral calibration and/or dilation, and internal urethrotomy), includes robotic assistance, when performed*) with 40 minutes of pre-service evaluation time, 8 minutes positioning time, 11 minutes scrub/dress/wait time, 180 minutes of intra-service time, 50 minutes of immediate post-service time, for a sum of 354 minutes of total time. The RUC offers CPT code 42420 (*Excision of parotid tumor or parotid gland; total, with dissection and preservation of facial nerve*) with a work RVU of 19.53, 180 minutes of intra-service time and 383 minutes of total time)) as a crosswalk to CPT code 558XX. After reviewing this code and relative similar codes in the PFS, we are proposing the RUC-recommended work RVU of 19.53 with 354 minutes of total time to CPT code 558XX.

We are proposing the RUC-recommended direct PE inputs for CPT codes 55821, 55831, 55866, and 558XX without refinement.

(15) Lumbar Laminotomy With Decompression (CPT Codes 63020, 63030, and 63035)

In October 2018, CPT code 63030 (*Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc; 1 interspace, lumbar*) was identified by the AMA as having an anomalous site of service when compared to Medicare utilization data. The Medicare data from 2014 through 2017 indicated that CPT code 63030 was performed less than 50 percent of the time in the inpatient setting, yet included inpatient hospital evaluation and management (E/M) services within its global period. In January 2019, the RUC recommended that this code be reviewed in 2 years (January 2021) to determine if previous changes to differentiate percutaneous, endoscopic, and open spine procedures were effective to correct reporting of this service. In December 2020, the Relativity Assessment Workgroup noted that CPT code 63030 continues to be primarily reported in the outpatient setting, but still includes inpatient hospital visits in its valuation. The specialty society indicated that there is still confusion about this code, and therefore, the RUC recommended that CPT code 63030 be referred to the CPT Editorial Panel to revise the descriptor to mitigate the incorrect reporting in the outpatient setting, but the CPT Editorial Panel did not accept the code change application to differentiate inpatient (63030) versus outpatient (630X0) at the September 2021 CPT meeting. Since this is a site of service issue, CPT code 63030 was surveyed with the code family for the January 2022 RUC meeting.

For CPT codes 63020 (*Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc; 1 interspace, cervical*), 63030, and 63035 (*Laminotomy (hemilaminectomy), with decompression of nerve root(s), including partial facetectomy, foraminotomy and/or excision of herniated intervertebral disc; each additional interspace, cervical or lumbar (List separately in addition to code for primary procedure)*), we disagree with the RUC's recommended work RVUs of 15.95, 13.18, and 4.00, respectively, because they do not account for the surveyed changes in time for CPT codes 63020, 63030, and

63035, and the full application of the 23-hour policy to CPT code 63030. We are proposing a work RVU of 14.91 for CPT code 63020, a work RVU of 12.00 for CPT code 63030, and a work RVU of 3.86 for CPT code 63035.

The RUC recommends 40 minutes pre-service evaluation, 20 minutes pre-service positioning, 15 minutes pre-service scrub/dress/wait time, 90 minutes intraservice time, 30 minutes immediate post-service time, and one CPT code 99232 (*subsequent hospital care/day 25 minutes*), one CPT code 99231 (*Subsequent hospital care/day 15 minutes*), one CPT code 99238 (*Hospital discharge day management; 30 minutes or less*), one CPT code 99214 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 30–39 minutes of total time is spent on the date of the encounter.*), and two CPT code 99213 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and low level of medical decision making. When using time for code selection, 20–29 minutes of total time is spent on the date of the encounter.*) visits in the post-operative period. This results in a 15-minute decrease in the pre-service period, a 30-minute decrease in intraservice time, a 5-minute decrease in immediate post-service time, and a 17-minute increase in the post-operative period. The proposed work RVU of 14.91 is based on the total time ratio calculation using the RUC-recommended 379 minutes of total time divided by the current total time of 412 minutes for CPT code 63020, then multiplying by the current work RVU of 16.20 for CPT code 63020 ((379 minutes/412 minutes) * 16.20 = 14.90). We note that this is a direct crosswalk to CPT code 27057 (*Decompression fasciotomy(ies), pelvic (buttock) compartment(s) (e.g., gluteus medius-minimus, gluteus maximus, iliopsoas, and/or tensor fascia lata muscle) with debridement of nonviable muscle, unilateral*), which has a work RVU of 14.91, identical intraservice and immediate post-service time of 90 minutes and 30 minutes, respectively, and only 10 more minutes of total time. We believe this work RVU more adequately accounts for the decrease in total and intraservice time than the RUC recommended work RVU, and we note that we considered the reverse building block methodology, which would result in a work RVU of 14.30, but we felt that it decreased the valuation of CPT code 63020 too much, considering the shift in post-operative work to include a longer, more intense office/outpatient visit (CPT code 99214).

We disagree with the RUC-recommended work RVU for CPT code 63030. More specifically, we disagree with the RUC recommended work RVU for CPT code 63030 because the RUC did not completely apply the 23-hour policy calculation (finalized in the CY 2011 PFS final rule (75 FR 73226)) in formulating its recommendations. Additionally, we disagree with the RUC recommended work RVU for this code for which the RUC considered the patient to be admitted during the post-operative period because the RUC did not fully apply the 23-hour policy when formulating their recommendations. As we noted in the CY 2011 PFS final rule (75 FR 73226), and as we discuss earlier in this section of this proposed rule (''(1) Anterior Abdominal Hernia Repair (CPT codes 157X1, 49X01, 49X02, 49X03, 49X04, 49X05, 49X06, 49X07, 49X08, 49X09, 49X10, 49X11, 49X12, 49X13, 49X14, and 49X15''), the work RVUs for services that are typically performed in the outpatient setting and require a hospital stay of less than 24 hours may in some cases involve multiple overnight stays while the patient is still considered to be an outpatient for purposes of Medicare payment. Because such services are typically furnished in the outpatient setting, they should not be valued to include inpatient post-operative E/M visits. The level of discharge day management services included in the valuation of such services should similarly not reflect an inpatient discharge and should therefore be reduced. And finally, as discussed in CY 2011 rulemaking, the intraservice time from the inpatient level E/M postoperative visit should be reallocated to the immediate postservice time of the service. The 23-hour policy calculation, when fully applied to the calculation of a work RVU, is used to reduce the value of discharge day management services, remove the inpatient E/M visits, and reallocate the intraservice time to the immediate post-service period. We refer readers to the 2011 PFS final rule (75 FR 73226) for an in-depth explanation of the 23-hour policy.

For CPT code 63030, we believe the RUC only partially applied the 23-hour policy when it applied the policy to the immediate post service time, but not to the calculation of the work RVU. Instead, we believe the 23-hour policy should be fully applied to this code that describes outpatient services for which there is an overnight stay during the post-operative period, regardless of the number of nights that a patient stays in the hospital. The services to which the 23-hour policy is usually applied would typically involve a patient stay in a hospital for less than 24 hours, which often means the patient may stay overnight in the hospital. On occasion, the patient may stay in the hospital longer than a single night; however, in both cases (one night or more than one night), the patient is considered to be a hospital outpatient, not an inpatient, for Medicare purposes. In short, we do not believe that the work that is typically associated with an inpatient service should be included in the work RVUs for the outpatient services to which the 23-hour policy applies, especially considering the previously discussed site of service anomaly for CPT code 63030.

In accordance with the 23-hour policy valuation methodology we established in the CY 2011 PFS final rule, we are instead proposing a work RVU of 12.00 for CPT code 63030.The steps are as follows:

- Step (1): 13.18 − 0.64* = 12.54.
- Step (2): 12.54 − 0.76** = 11.78.
- Step (3): 11.78 + (10 minutes × 0.0224)*** = 12.00 RVUs.

*Value associated with ½ hospital discharge day management service

**Value associated with an inpatient hospital visit, CPT code 99231.

***Value associated with the reallocated intraservice time multiplied by the post-service intensity of the 23-hour stay code.

The RUC recommends the maintenance of the current work RVU of 13.18 because there was no change in intraservice time and the 37-minute decrease in total time is largely due to the change in immediate post-service time and post-operative period from the application of the 23-hour policy. We note that the proposed work RVU of 12.00 is higher than the other valuations that we considered, including the total time ratio work RVU of 11.75 ((305 minutes/342 minutes) * 13.18 = 11.75) and the reverse building block work RVU of 11.45. We note that the proposed work RVU of 12.00 is well-bracketed by two 90-minute intraservice timed 090-day CPT codes 28725 (*Arthrodesis; subtalar*), with a work RVU of 11.22, and 58720 (*Salpingo-oophorectomy, complete or partial, unilateral or bilateral (separate procedure)*), with a work RVU of 12.16.

We note that, in the summary of recommendations (SOR) submitted to CMS by the RUC, the specialty societies assert that the surveyed total time would be the same as the current total

time if the 23-hour policy was not fully applied to the immediate post-service time and post-operative period, with only a shift of work from facility to office, but we note that this is not true. The surveyed total time is 339 minutes, but the RUC recommended 40 minutes for the pre-service evaluation time rather than the specialty societies' surveyed 45 minutes. If the RUC had recommended the survey times, with the pre-service evaluation refinement, the reverse building block work RVU would be 12.62, still less than the RUC-recommended work RVU of 13.18, effectively accounting for the shift from facility to office post-operative visits.

For CPT code 63035, we are proposing a work RVU of 3.86 based on the reverse building block methodology to account for the 11-minute increase in intraservice time. We note that this proposed value is between the surveyed 25th percentile value of 3.50 and the RUC-recommended work RVU of 4.00. We note that the proposed work RVU is well-bracketed by two 60-minute add-on CPT codes—CPT code 50706 and 63231. CPT code 50706 (*Balloon dilation, ureteral stricture, including imaging guidance (e.g., ultrasound and/or fluoroscopy) and all associated radiological supervision and interpretation (List separately in addition to code for primary procedure)*), has a work RVU of 3.80, and CPT code 63621 (*Stereotactic radiosurgery (particle beam, gamma ray, or linear accelerator); each additional spinal lesion (List separately in addition to code for primary procedure)*), has a work RVU of 4.00.

For the direct PE inputs, we are proposing to remove the 125 minutes of equipment time for EQ168 (light, exam) for CPT codes 63020 and 63030 because the RUC contested the typicality of its use to assess the wound and remove staples. Because it is a standard piece of equipment in a neurosurgeon and orthopedic exam room, and the RUC questioned its typicality, we are proposing 0 minutes for EQ168 for CPT codes 63020 and 63030.

(16) Somatic Nerve Injections (CPT Codes 64415, 64416, 64417, 64445, 64446, 64447, 64448, 76942, 77002, and 77003)

In May 2021, the CPT Editorial Panel revised the descriptors and billing instructions for CPT codes 64415 (*Injection(s), anesthetic agent(s) and/or steroid; brachial plexus, including imaging guidance, when performed*), 64416 (*Injection(s), anesthetic agent(s) and/or steroid; brachial plexus, continuous infusion by catheter (including catheter placement), including imaging guidance, when performed*), 64417 (*Injection(s), anesthetic agent(s) and/or steroid; axillary nerve, including imaging guidance, when performed*), 64445 (*Injection(s), anesthetic agent(s) and/or steroid; sciatic nerve, including imaging guidance, when performed*), 64446 (*Injection(s), anesthetic agent(s) and/or steroid; sciatic nerve, continuous infusion by catheter (including catheter placement), including imaging guidance, when performed*), 64447 (*Injection(s), anesthetic agent(s); femoral nerve, including imaging guidance, when performed*), 64448 (*Injection(s), anesthetic agent(s) and/or steroid; femoral nerve, continuous infusion by catheter (including catheter placement), including imaging guidance, when performed*), 77002 (*Fluoroscopic guidance for needle placement*), 77003 (*Fluoroscopic guidance and localization of needle or catheter tip for spine or paraspinous diagnostic or therapeutic injection procedures (epidural or subarachnoid)*) and 76942 (*Ultrasonic guidance for needle placement, imaging supervision and interpretation*). These codes were then surveyed by the RUC in October 2021.

We last finalized values for CPT codes 64415, 64416, 64417, 64445, 64446, 64447, and 64448 in the CY 2020 PFS final rule (84 FR 62744 through 62745). In May 2018, the CPT Editorial Panel approved the revision of descriptors and guidelines for codes in the somatic nerve injection family. At its October 2018 meeting, the RUC recommended work RVU and PE inputs for a number of somatic nerve injection codes, including CPT codes 64415, 64416, 64417, 64445, 64446, 64447, and 64448. (Note that in 2018, the codes did not include ''including imaging guidance, when performed'' in their descriptors.) During the October 2018 RUC presentation for this family of services, the specialty societies stated that CPT codes 64415, 64416, 64417, 64446, 66447, and 64448 were reported with the imaging code CPT code 76942 more than 50 percent of the time. In reviewing this family of services in the CY 2020 PFS final rule, our finalized work and PE values for the codes did not consider the simultaneous performance of injection and imaging (84 FR 62744). In May 2021, the CPT Editorial Panel revised the codes to include ''with imaging, when performed'' in the descriptors.

When presenting its CY 2023 valuation recommendations, the RUC pointed out that the current values and times for CPT codes 64415, 64416, 64417, 64445, 64446, 64447, and 6448 reflect only the work and time of the injection. The revised codes, however, include both injection and imaging. In order to make an equitable comparison between the RUC recommendations and the current values, the RUC suggested we compare the RUC recommendations to values that combined the current work and estimated time of the injection codes and the imaging code with which they are being bundled, CPT code 76942. We agreed with this approach and thank the RUC for providing combined work RVUs and estimated combined times, which we considered as part of the RUC's recommendations.

As part of its recommendations, the RUC reaffirmed its prior recommendations for a number of codes that were previously reviewed or reaffirmed in the CY 2020 PFS final rule, including: CPT codes 64400 (*Injection(s), anesthetic agent(s); trigeminal nerve, each branch (i.e., ophthalmic, maxillary, mandibular)*), 64408 (*Injection(s), anesthetic agent(s), and/or steroid; vagus nerve*), 64420 (*Injection(s), anesthetic agent(s) and/or steroid; intercostal nerve, single level*), 64421 (*Injection(s), anesthetic agent(s) and/or steroid; intercostal nerves, each additional level (List separately in addition to code for primary procedure)*), 64425 (*Injection(s), anesthetic agent(s) and/or steroid; ilioinguinal, iliohypogastric nerves*), 64430 (*Injection(s), anesthetic agent(s) and/or steroid; pudendal nerve*), 64435 (*Injection(s), anesthetic agent(s) and/or steroid; paracervical (uterine) nerve*), 64449 (*Injection(s), anesthetic agent(s) and/or steroid; lumbar plexus, posterior approach, continuous infusion by catheter (including catheter placement)), and 64450 (Injection(s), anesthetic agent(s); other peripheral nerve or branch*) (84 FR 62744 through 62745); CPT code 64451 (*Injection(s), anesthetic agent(s) and/or steroid; nerves innervating the sacroiliac joint, with image guidance (ie, fluoroscopy or computed tomography*) (84 FR 62740); and CPT code 64454 (*Injection(s), anesthetic agent(s) and/or steroid; genicular nerve branches including imaging guidance, when performed*) (84 FR 62749). The RUC also reaffirmed its recommendation for CPT code 64455 (*Injection(s), anesthetic agent(s) and/or steroid; plantar common digital nerve(s) (e.g., Morton's neuroma)*), which was reviewed and valued in the CY 2019 PFS final rule (83 FR 58542). The codes the RUC wishes to reaffirm for CY 2023 have not been revised by the CPT Editorial Panel and were not resurveyed by the RUC since their prior valuation. Since we have not received new

information regarding these codes, we acknowledge the RUC's reaffirmation but are not reviewing the values of these codes at this time. We also note that the RUC-reaffirmed values for CPT codes 64435 (work RVU of 0.75), 64450 (work RVU of 0.75), 64451 (work RVU of 1.52), and 64454 (work RVU of 1.52) are the same as the current work RVUs that we finalized in the CY 2020 PFS final rule. The RUC reaffirmed work RVU of 0.94 for CPT code 64405 is the current work RVU, which was finalized in the CY 2019 PFS final rule (83 FR 59542) and reaffirmed in the CY 2020 final rule, and the RUC-reaffirmed work RVU of 1.10 for CPT code 64418 is the current work RVU value finalized in the CY 2018 PFS final rule (82 FR 53054) and reaffirmed in the CY 2020 PFS final rule. The RUC reaffirmed a work RVU of 0.75 for CPT code 64455 which is the current work RVU we finalized in the CY 2019 PFS final rule (83 FR 58542).

For CY 2023, we are proposing the RUC-recommended work RVUs for CPT codes 64417 (work RVU of 1.31), 64447 (work RVU of 1.34), 64448 (work RVU of 1.68), 77002 (work RVU of 0.54), 77003 (work RVU of 0.60), and 76942 (work RVU of 0.67).

For CPT code 64415, we disagree with the RUC-recommended work RVU of 1.50 and are proposing a work RVU of 1.35, based on the intraservice time ratio calculated using the ''combined'' values for CPT code 64415 and the imaging CPT code 76942 provided by the RUC. (The combined work RVU the RUC offered for comparison was 2.02 (the sum of the work RVUs for both codes: CPT code 64415 is 1.35 and CPT code 76942 is 0.67), and an estimated intraservice time of 15 minutes and total time of 43 minutes.) This proposed work RVU of 1.35 for CPT code 64415 is supported by a crosswalk to CPT code 11982 (Removal, non-biodegradable drug delivery implant), which has a work RVU of 1.34, an identical service time, and a total time that is two minutes lower than CPT code 64415. This value is further supported by a bracket of CPT codes: CPT code 64486 and CPT code 33285. CPT code 64486 (Transversus abdominis plane (TAP) block (abdominal plane block, rectus sheath block) unilateral; by injection(s) (includes imaging guidance, when performed)) has a work RVU of 1.27 and identical intraservice and total time values to CPT code 64415, and CPT code 33285 (insertion, subcutaneous cardiac rhythm monitor, including programming) has a work RVU of 1.53, an intraservice time of 10 minutes and a total time of 40 minutes.

We note that when compared to the current time file for CPT code 64415, the RUC-recommended intraservice time decreased from 12 to 10 minutes (16.7 percent reduction) and RUC-recommended total time decreased from 40 to 35 minutes (12.5 percent reduction). However, the RUC-recommended work RVU increased by 0.15 which is an 11.1 percent increase. Although we do not imply that the decrease in time as reflected in survey values must always equate to a one-to-one or linear decrease in the valuation of work RVUs, we believe that since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, significant decreases in time should not be met with significant increases to work RVUs without adequate justification. Additionally, while we do acknowledge that adding imaging does bundle some additional work into the code, we do not believe that the recoding of the services in this family has resulted in a significant increase in their intensity, only a change in the way in which they will be reported, and through the bundling of some of these frequently reported services, it is reasonable to expect that the new coding system will achieve efficiencies via elimination of duplicative assumptions of the resources involved in furnishing particular services. We believe the new coding assigns more accurate work times, and thus, reflects efficiencies in resource costs that existed but were not reflected in the services as they were previously reported. If the addition of imaging guidance had made the new CPT codes significantly more intense to perform, we believe that this would have been reflected in the surveyed work times, which in the case of CPT code 64415 actually decreased from the predecessor code. Thus, we are disinclined to ignore the impact of decreased times on the work RVU. We believe our proposed value of 1.35 appropriately reflects both the additional work and the decrease of time.

We considered proposing a work RVU of 1.27 for CPT code 64415, using CPT code 64486 as a comparison code, since it has the same intraservice and total times as the revised CPT code 64415. However, CPT code 64486, with a work RVU of 1.27, has a lower work RVU than the current work RVU of 64415 (1.35.) We are in general agreement with the RUC that it is important to acknowledge that there is some additional work that comes with adding imaging to this procedure.

For CPT code 64416, we disagree with the RUC-recommended work RVU of 1.80 and are proposing a work RVU of 1.65. While we disagree with the RUC's recommended work RVU, we did agree with the RUC's proposed increment of +0.30 between CPT codes 64415 and 64416. (The RUC recommendation for CPT code 64415 was 1.50, and the recommendation for CPT code 64416 was 1.80.) We found persuasive the RUC's observation that the current increment between CPT codes 64415 and 64416 is unusually small when compared to other sets of related codes in the family. Typically, the codes that add catheter placement in addition to the injection are 0.30–0.36 work RVUs higher than the codes for an injection in the same nerve group or region. Retaining such a narrow interval of 0.15 between CPT codes 64415 and 64416 would create a rank order anomaly within the family in light of adjustments to some of the other codes' work RVUs. Our proposed work RVU of 1.65 for CPT code 64416 is supported by a bracket of CPT codes: CPT code 64448 and CPT code 36573. CPT code 64448 (*Transversus abdominis plane (TAP) block (abdominal plane block, rectus sheath block) bilateral; by injections (includes imaging guidance, when performed)*) has a work RVU of 1.60, 15 minutes intraservice time and 40 minutes total time, and CPT code 36573 (*Insertion of peripherally inserted central venous catheter (PICC), without subcutaneous port or pump, including all imaging guidance, image documentation, and all associated radiological supervision and interpretation required to perform the insertion; age 5 years or older*) has a work RVU of 1.70, 15 minutes intraservice time and 40 minutes total time.

We note that, when compared to the current time file, the RUC-recommended intraservice time for CPT code 64416 decreased from 20 to 15 minutes (25 percent reduction) and the RUC-recommended total time decreased from 49 to 44 minutes (10.2 percent reduction). However, the RUC recommended a 0.32 increase in the work RVU, which is a 21.6 percent increase. We note that the RUC-recommended work RVU of 1.80 would give CPT code 64416 the highest work RVU of the surveyed codes, and would make it among the highest valued codes in the family. We do not believe the RUC-recommended work RVU appropriately accounts for the reductions in the surveyed total time for the procedure, and did not receive specific information explaining why, despite the decrease in time, the value should receive such a significant

increase relative to the other surveyed codes. As stated previously, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased significantly, decreases in time should be reflected in the revised work RVUs. As noted in our discussion of CPT code 64415 above, if the addition of imaging guidance had made the new CPT codes significantly more intense to perform, we believe that this would have been reflected in the surveyed work times, which in the case of CPT code 64416, are now actually lower. We believe our proposed work RVU of 1.65 corrects the increment between CPT code 64415 and 64416, while also acknowledging that, the addition of imaging notwithstanding, the times for CPT code 64416 have noticeably decreased.

For CPT code 64445, we disagree with the RUC-recommended work RVU of 1.39 and are proposing a work RVU of 1.28, based on the intraservice time ratio calculated using the. ''combined'' values for CPT code 64445 and the imaging CPT code 76942 provided by the RUC. (The combined work RVU the RUC offered for comparison was 1.67 (the sum of the work RVUs for both codes: CPT code 64445 is 1.00 and CPT code 76942 is 0.67), and an estimated intraservice time of 13 minutes and total time of 27 minutes.) This proposed value of 1.28 is supported by a comparison to CPT code 64486 (*Transversus abdominis plane (TAP) block (abdominal plane block, rectus sheath block) unilateral; by injection(s) (includes imaging guidance, when performed)*), which has a work RVU of 1.27 and intraservice time of 10 minutes and total time of 35 minutes. The value is also supported by a low bracket of CPT code 58100 (*Endometrial sampling (biopsy) with or without endocervical sampling (biopsy), without cervical dilation, any method (separate procedure)*), with a work RVU of 1.21, identical intraservice time and almost identical total time, and a high bracket of CPT code 11982 (*Removal, non-biodegradable drug delivery implant*), with a work RVU of 1.34, identical intraservice time and a higher total time of 33 minutes.

We note that the RUC-recommended intraservice time and total time for CPT code 64445 are identical to the current intraservice and total times in the time file for CPT code 64445. However, the RUC recommended a 0.39 increase to the work RVU. We do not imply that the lack of change to the intraservice and total times means that the work RVU cannot be increased. We believe that since the two components of work are time and intensity, absent an obvious or explicitly stated rationale for why the relative intensity of a given procedure has increased, the RUC-proposed increase in the work RVU does not seem justified. As noted in our discussion of CPT code 64415 above, if the addition of imaging guidance had made the new CPT codes significantly more intense to perform, we believe that this would have been reflected in the surveyed work times, which in the case of CPT code 64445, are the same as the predecessor code.

We considered proposing a work RVU of 1.10 for CPT code 64445, using CPT code 30901 (*Control nasal hemorrhage, anterior, simple (limited cautery and/or packing) any method*) as a comparison code, with a work RVU of 1.10 and identical intraservice and total times as CPT code 64445. However, we believed this would cause a rank order anomaly within the family. For example, CPT code 64418 (*Injection(s), anesthetic agent(s) and/or steroid; suprascapular nerve*) also has a work RVU of 1.10, but does not include imaging. Again, we generally agree with the RUC that it is important to acknowledge the additional work that comes with adding imaging to this procedure, and to ensure that this additional work is reflected within the relative values of the family, but we are still proposing a work RVU of 1.28 for CPT code 64445.

For CPT code 64446, we disagree with the RUC-recommended work RVU of 1.75 and are proposing a work RVU of 1.64. This recommended work RVU is 0.36 higher than the proposed work RVU for CPT code 64445 (1.28). We note that the current increment between the current values of 64445 and 64446 (1.00 and 1.36, respectively) is 0.36. The RUC recommendations for these codes (1.39 and 1.75) preserved this increment. Since the same imaging activity is being added to both codes, we agree with preserving the relationship between the values of CPT codes 64445 and 64446. Our proposed work RVU of 1.64 for CPT code 64446 is supported by a bracket of CPT codes: CPT code 64448 and 36573. CPT code 64448 (*Transversus abdominis plane (TAP) block (abdominal plane block, rectus sheath block) bilateral; by injections (includes imaging guidance, when performed)*) has a work RVU of 1.60, 15 minutes intraservice time and 40 minutes total time, and CPT code 36573 (*Insertion of peripherally inserted central venous catheter (PICC), without subcutaneous port or pump, including all imaging guidance, image documentation, and all associated radiological supervision and interpretation required to perform the insertion; age 5 years or older*) has a work RVU of 1.70, 15 minutes intraservice time and 40 minutes total time. (We note that this is the same bracket we suggested to support the proposed value for CPT code 64416. As revised, the intraservice and total times for CPT codes 64416 and 64446 are the same.)

We note that, compared to the time file for CPT code 64446, the RUC-recommended intraservice time stayed the same (15 minutes) and the total time increased from 40 to 44 minutes (10 percent increase). The RUC-recommended work RVU for CPT code 64446, is 0.39 higher than the current RVU, a 28.7 percent increase. We believe the RUC-recommended work RVU increase is disproportionate to the change in time. Additionally, we note that the RUC-recommended times result in CPT code 64416 and CPT code 64446 having identical intraservice and total times. We believe it best preserves rank order within the family to assign CPT code 64416 and CPT code 64446 similar work RVUs.

We are proposing the direct PE inputs as recommended by the RUC for all of the codes in the Somatic Nerve Injections family.

(17) Transcutaneous Passive Implant-Temporal Bone (CPT Codes 69714, 69716, 69717, 69719, 69726, 69727, 69XX0, 69XX1, and 69XX2)

In October 2020, the CPT Editorial Panel deleted two codes used for mastoidectomy and replaced them with four new codes for magnetic transcutaneous attachment to external speech processor. The CPT Editorial Panel made additional revisions to differentiate implantation, removal, and replacement of the implants. The RUC submitted interim recommendations to CMS for six codes in this family following the January 2021 RUC meeting, and CMS proposed and finalized the recommended work RVU for all six of these codes in the CY 2022 PFS final rule (86 FR 65099 through 65100). For CY 2023, the CPT Editorial Panel established three additional new codes and the coding structure of the family was changed to describe the different techniques more appropriately for transcutaneous passive implant procedures that vary in time and intensity depending on the indication for the procedure, device chosen, and patient anatomy. The nine codes in the family were surveyed again for the January 2022 RUC meeting and new recommendations were submitted to CMS.

We are proposing the RUC-recommended work RVU for six of the nine codes in the Transcutaneous Passive Implant-Temporal Bone family.

We are proposing a work RVU of 9.03 for CPT code 69716 (*Implantation, osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor within the mastoid and/or resulting in removal of less than 100 mm2 surface area of bone deep to the outer cranial cortex*), a work RVU of 9.97 for CPT code 69XX0 (*Implantation, osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor, outside of the mastoid and resulting in removal of greater than or equal to 100 mm2 surface area of bone deep to the outer cranial cortex*), a work RVU of 9.46 for CPT code 69719 (*Revision/replacement (including removal of existing device), osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor, within the mastoid and/or involving a bony defect less than 100 mm2 surface area of bone deep to the outer cranial cortex*), a work RVU of 10.25 for CPT code 69XX1 (*Revision/replacement (including removal of existing device), osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor, outside the mastoid and involving a bony defect greater than or equal to 100 mm2 surface area of bone deep to the outer cranial cortex*), a work RVU of 7.38 for CPT code 69727 (*Removal, entire osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor, within the mastoid and/or involving a bony defect less than 100 mm2 surface area of bone deep to the outer cranial cortex*), and a work RVU of 8.50 for CPT code 69XX2 (*Removal, entire osseointegrated implant, skull; with magnetic transcutaneous attachment to external speech processor, outside the mastoid and involving a bony defect greater than or equal to 100 mm2 surface area of bone deep to the outer cranial cortex*).

We disagree with the RUC's recommended work RVU for the other three codes in the family for the procedures describing percutaneous attachment to external speech processor. We disagree with the RUC's recommended work RVU of 8.00 for CPT code 69714 (*Implantation, osseointegrated implant, skull; with percutaneous attachment to external speech processor*) and we are instead proposing a work RVU of 6.68 based on a crosswalk to CPT code 38305 (*Drainage of lymph node abscess or lymphadenitis; extensive*). In reviewing CPT code 69714, we noted that the recommended intraservice time is decreasing from 40 minutes to 30 minutes (25 percent reduction), and the recommended total time is decreasing from 182 minutes to 146 minutes (20 percent reduction); however, the RUC-recommended work RVU is only decreasing from 8.69 to 8.00, which is a reduction of just over 8 percent. Although we did not imply that the decrease in time as reflected in survey values must equate to a one-to-one or linear decrease in the valuation of work RVUs, we believe that since the two components of work are time and intensity, significant decreases in time should be appropriately reflected in decreases to work RVUs. In the case of CPT code 69714, we believe that it is more accurate to propose a work RVU of 6.68 based on a crosswalk to CPT code 38305 to account for these decreases in the surveyed work time.

We also disagree with the recommended work RVU of 8.00 because it results in an intensity which is anomalously high in relationship to the rest of the code family. At the recommended work RVU of 8.00, the intensity of CPT code 69714 is increasing by nearly 50 percent as compared with the survey conducted last year, and the resulting intensity of the service would be significantly higher than any of the other codes in the family. We do not agree that this intensity would be typical given that the percutaneous form of implant described by CPT code 69714 should have the lowest intensity of the three types described in this code family. The implantation procedure described by this code should also typically have lower intensity than the revision/replacement procedures elsewhere in the family. We believe that the intensity of CPT code 69714 is more accurately described at our proposed work RVU of 6.68 based on a crosswalk to CPT code 38305. This code shares the same intraservice time of 30 minutes as CPT code 69714 and has a higher total time of 186 minutes; we agree that CPT code 69714 is more intense than CPT code 38305 which is offset by our crosswalk code having an additional office visit in its global period.

We disagree with the RUC's recommended work RVU of 8.48 for CPT code 69717 (*Revision/replacement (including removal of existing device), osseointegrated implant, skull; with percutaneous attachment to external speech processor*) and we are instead proposing a work RVU of 7.91 based on a crosswalk to CPT code 46262 (*Hemorrhoidectomy, internal and external, 2 or more columns/groups; with fistulectomy, including fissurectomy, when performed*). In reviewing CPT code 69717, we noted that although the intraservice time remains essentially unchanged (decreasing from 45 minutes to 44 minutes), the recommended total time is decreasing from 187 minutes to 159 minutes (15 percent reduction). However, the RUC-recommended work RVU is only decreasing from 8.80 to 8.48, which is a reduction of less than 4 percent. Although we did not imply that the decrease in time as reflected in survey values must equate to a one-to-one or linear decrease in the valuation of work RVUs, we believe that since the two components of work are time and intensity, significant decreases in time should be appropriately reflected in decreases to work RVUs. In the case of CPT code 69717, we believe that it is more accurate to propose a work RVU of 7.91 based on a crosswalk to CPT code 46262 to account for these decreases in the surveyed work time.

We also disagree with the recommended work RVU of 8.48 because it results in a higher intensity than the other two revision/replacement codes (CPT codes 69719 and 69XX1) in this family. CPT code 69717 describes the percutaneous form of implant which should have the lowest intensity of the three revision/replacement codes in this family, however at the recommended work RVU of 8.48 it would have the highest intensity of this group. While the intensity at the recommended work RVU for CPT code 69717 is nowhere near the anomalous nature of the intensity at the recommended work RVU for CPT code 69714, we still believe that the intensity would be more typical at the proposed work RVU of 7.91. This proposed valuation restores the relationship between the three revision/replacement codes by placing the intensity of CPT code 69717 slightly lower than CPT codes 69719 and 69XX1. Therefore, we believe that the intensity of CPT code 69717 is more accurately described at our proposed work RVU of 7.91 based on a crosswalk to CPT code 46262. This code has nearly the same intraservice time of 45 minutes as CPT code 69717 and has a higher total time of 179 minutes; we agree that CPT code 69717 is more intense than CPT code 46262 which is offset by our crosswalk code having an additional office visit in its global period.

We disagree with the RUC's recommended work RVU of 7.50 for CPT code 69726 (*Removal, entire osseointegrated implant, skull; with percutaneous attachment to external speech processor*) and we are instead proposing a work RVU of 6.36 based on a crosswalk to CPT code 67912 (*Correction of lagophthalmos, with implantation of upper eyelid lid load*

(e.g., gold weight)). In reviewing CPT code 69726, we noted that the recommended intraservice time is increasing from 30 minutes to 35 minutes (17 percent increase), and the recommended total time is increasing from 148 minutes to 150 minutes (1 percent increase); however, the RUC-recommended work RVU is increasing from 5.93 to 7.50, which is an increase of just over 26 percent. Although we did not imply that the increase in time as reflected in survey values must equate to a one-to-one or linear increase in the valuation of work RVUs, we believe that since the two components of work are time and intensity, modest increases in time should be appropriately reflected in modest increases to work RVUs. In the case of CPT code 69726, we believe that it is more accurate to propose a work RVU of 6.36 based on a crosswalk to CPT code 67912 to account for these increases in the surveyed work time.

We also disagree with the recommended work RVU of 7.50 because it results in an intensity which is anomalously high in relationship to the rest of the code family and creates a rank order anomaly within the work RVUs. CPT code 69726 describes the percutaneous form of the removal procedure which should have the lowest intensity of all nine codes in this family. However, the intensity of CPT code 69726 at the recommended work RVU of 7.50 would be the second-highest in the family, even higher than CPT code 69XX1 which describes the revision/replacement procedure with magnetic transcutaneous attachment resulting in removal of greater than or equal to 100 square mm surface area of bone. We do not agree that this would be typical and we believe that the intensity would be more accurate at our proposed work RVU of 6.36. We also note that the recommended work RVU of 7.50 for CPT code 69726 creates a rank order anomaly within the family as it would be higher than the recommended work RVU of 7.38 for CPT code 69727 which describes a more complex procedure and has higher surveyed work times. We therefore believe that the work and intensity of CPT code 69726 are more accurately described at our proposed work RVU of 6.36 based on a crosswalk to CPT code 67912. This code has nearly the same intraservice time of 40 minutes as CPT code 69726 and has a higher total time of 166 minutes; we agree that CPT code 69726 is more intense than CPT code 69726 which is offset by our crosswalk code having an additional office visit in its global period.

We are proposing the direct PE inputs as recommended by the RUC for all nine codes in the Transcutaneous Passive Implant-Temporal Bone family.

(18) Contrast X-Ray of Knee Joint (CPT Code 73580)

CPT code 73580 (*Radiologic examination, knee, arthrography, radiological supervision and interpretation*) was first identified via the high-volume growth screen in 2008. In 2021, the Relativity Assessment Workgroup (RAW) noted that code 73580 was never surveyed and remains CMS/Other sourced, and recommended that it be surveyed. CPT code 73580 was then surveyed. We are proposing the RUC-recommended work RVU of 0.59. We are also proposing the RUC-recommended direct PE inputs without refinement.

(19) 3D Rendering With Interpretation and Report (CPT Code 76377)

We nominated this code in the CY 2020 PFS final rule as potentially misvalued, stating that we believe it is of the same family as CPT code 76376 (*3D rendering with interpretation and reporting of computed tomography, magnetic resonance imaging, ultrasound, or other tomographic modality with image postprocessing under concurrent supervision; not requiring image postprocessing on an independent workstation*), which was reviewed at the April 2018 RUC meeting. CMS requested that CPT code 76377 also be reviewed to maintain relativity within the code family (84 FR 62625). The specialty societies maintain that these services are more accurately viewed as separate code families. Furthermore, the RUC cites changes in technique and patient population as compelling evidence to maintain a physician work RVU of 0.79 despite a 5-minute recommended reduction in physician total time compared to the current physician time.

We are proposing the RUC recommended work RVU of 0.79 for CPT code 76377; however, we reiterate that we continue to believe that CPT code 76376 and 76377 would be more appropriately viewed as belonging to the same code family and we request that they be surveyed together.

We are proposing the RUC-recommended direct PE inputs without refinement.

(20) Neuromuscular Ultrasound (CPT Codes 76881, 76882, and 76XX0)

Since their creation in 2011, CPT codes 76881 (*Ultrasound, complete joint (ie, joint space and peri-articular soft-tissue structures), real-time with image documentation*) and 76882 (*Ultrasound, limited, joint or other nonvascular extremity structure(s) (e.g., joint space, peri-articular tendon[s], muscle[s], nerve[s], other soft-tissue structure[s], or soft-tissue mass[es]), real-time with image documentation*) have been reviewed numerous times as New Technology/New Services by the Relativity Assessment Workgroup (RAW). In October 2016, the RAW reviewed these codes and agreed with the specialty societies that the dominant specialties providing the complete (CPT code 76881) versus the limited (CPT code 76882) ultrasound of extremity services were different than originally thought, causing variation in the typical practice expense inputs. The RAW recommended referral to the Practice Expense Subcommittee for review of the direct practice expense inputs and the CPT Editorial Panel to clarify the introductory language regarding the reference to one joint in the complete ultrasound. The PE Subcommittee reviewed the direct practice expense inputs for CPT codes 76881 and 76882 and adjusted the clinical staff time at the January 2017 RUC meeting, and the CPT Editorial Panel editorially revised CPT codes 76881 and 76882 to clarify the distinction between complete and limited studies and revised the introductory guidelines to clarify reference to one joint in the complete ultrasound procedure in June 2017. In October 2021, the CPT Editorial Panel approved the addition of CPT code 76XX0 for reporting real-time, complete neuromuscular ultrasound of nerves and accompanying structures throughout their anatomic course, per extremity, and the revision of CPT code 76882 to add focal evaluation. CPT codes 76881 and 76882 were identified as part of the neuromuscular ultrasound code family with CPT code 76XX0 and surveyed for the January 2022 RUC meeting.

For CPT codes 76881, 76882, and 76XX0, we disagree with the RUC-recommended work RVUs of 0.90, 0.69, and 1.21, respectively, as they do not account for the surveyed time changes or appropriate comparisons for the new add-on code, CPT code 76XX0, and are proposing a work RVU of 0.54 for CPT code 76881, a work RVU of 0.59 for CPT code 76882, and a work RVU of 0.99 for CPT code 76XX0.

CPT code 76881 represents a complete evaluation of a specific joint in an extremity. This service requires ultrasound examination of all the following joint elements: joint space (for example, effusion), peri-articular soft-tissue structures that surround the joint (that is, muscles, tendons, other soft-tissue structures), and any identifiable abnormality. In some circumstances, additional evaluations such as dynamic

imaging or stress maneuvers may be performed as part of the complete evaluation. The RUC recommended 5 minutes of pre-service time, 20 minutes of intraservice time, and 5 minutes of post-service time, based on the survey. The RUC discussed the 5-minute increase in intraservice time and determined that the increase relates to the change in the dominant specialty provider since the creation of the code, as previously there was 15 minutes of intraservice time for the radiologist to scan and/or review the sonographer-obtained images. Now, the rheumatologist is performing the scanning and it takes 20 minutes for the typical patient. For rheumatology, physicians typically scan the patients with portable ultrasound devices rather than utilizing sonographers as originally described in the 2010 survey. The RUC noted that this code is reported with an office E/M visit 58.9 percent and a non-facility office E/M visit 66.3 percent of the time; the RUC stated that CPT code 76881 is imaging-specific so the physician work described would not overlap with the E/M service, but we disagree, as the descriptions of pre-service and post-service work directly overlap. The description of pre-service work for CPT code 76881 states ''Review pertinent clinical information. Review any prior applicable imaging studies.'' Pre-service work for CPT code 99214 (*Office or other outpatient visit for the evaluation and management of an established patient, which requires a medically appropriate history and/or examination and moderate level of medical decision making. When using time for code selection, 30–39 minutes of total time is spent on the date of the encounter.*), the most common E/M code reported with CPT code 76811, includes ''Review interval correspondence, referral notes, medical records, and diagnostic data generated since the last visit.'' Post-service work of CPT code 76881 is described as ''Discuss significant findings with the referring physician. Review and sign final report,'' whereas the post-service work for CPT code 99214 includes ''Arrange diagnostic testing and referral if necessary. Document the encounter in the medical record, spending time to further refine the differential diagnosis, workup, or treatment plan as necessary. Coordinate care by discussing the case with other physicians and members of the health care team and write letters of referral if necessary. Perform electronic data capture and reporting to comply with quality payment program and other electronic mandates. Review and analyze interval testing results and refine the differential diagnosis, workup, and treatment plan based on these results. Order additional testing based on these results. Communicate results and plan modifications with patient and/or family.'' We believe there is distinct overlap in pre-service and post-service work between the E/M visit and CPT code 76881, and therefore, we are proposing 0 minutes for the pre-service and post-service time rather than the RUC-recommended 5 minutes of pre-service and post-service time. The proposed work RVU of 0.54 is the reverse building block valuation based on the removal of the 5 minutes of pre-service and post-service time, with a long-standing intensity of 0.0224 (10 minutes * 0.0224 work/minute = 0.224 work RVUs). The proposed work RVU accounts for the 0.224 work RVU decrease as a result of the removal of pre-service and post-service time, and the increase of 5 minutes of intraservice time, while maintaining the same IWPUT of 0.027, as there was no discussed change in intensity. The specialty societies and the RUC asserted that there was an increase of 5 minutes as a result of the intraservice work changing due to a change in dominant specialty providing the service (from radiology to rheumatology), but did not present a change in intensity. We note that the specialty societies used CPT code 76700 (*Ultrasound, abdominal, real time with image documentation; complete*) with a work RVU = 0.81, 11 minutes of intra-service time, and 21 minutes total time, as a reference code because it has identical pre- and post-service time but less intra-service time than the surveyed code and is a clinically similar ultrasound code. We note that this is not an appropriate reference code as it is billed alone 72.8 percent of the time, and therefore, the valuation of CPT code 76700 accounts for pre- and post-service work that would not overlap with an E/M visit like the pre- and post-service work does for CPT code 76881.

CPT code 76882 represents a limited evaluation of a joint or focal evaluation of a structure(s) in an extremity other than a joint (for example, soft-tissue mass, fluid collection, or nerve[s]). This evaluation includes assessment of a specific anatomic structure(s) (for example, joint space only [effusion] or tendon, muscle, and/or other soft-tissue structure[s] that surround the joint) that does not assess all the elements included in CPT code 76881, although it does include all surrounding anatomy and any associated pathology or contralateral comparison as indicated. The RUC discussed the four-minute increase in intraservice time and determined that the increase relates to the change in dominant supplier of this service since the creation of the code, as there is currently 11 minutes of intraservice time that included scanning performed only by the podiatrist, and now the radiologist works with the sonographer to obtain and interpret the images in addition to the physician performing additional scanning as needed. Because radiologists no longer use portable ultrasound devices as originally described in the 2010 survey or in the 2017 PE update, the RUC and specialty societies assert that the physician work (time) has changed due to supervision of the sonographer in addition to the radiologist performing the scanning. The specialty societies and RUC also note that ultrasound technology has evolved immensely since 2010, including proliferation of high-frequency ultrasound probes dedicated to musculoskeletal imaging, as well as producing images with higher fidelity and more detail, whereby the number and quality of images that can be reviewed and the pathology to evaluate have greatly increased since 2010. Therefore, the typical patient requires 15 minutes of intraservice time. While we agree with the RUC that 15 minutes of intraservice time is warranted for CPT code 76882, we note there was no information indicating a change in intensity, and therefore, for CPT code 76882, we are proposing the reverse building block work RVU of 0.59 to account for the 4-minute increase in intraservice time and the maintenance of the current IWPUT of 0.024.

We note that commenters may raise concern about a potential rank order anomaly with the proposed work RVUs of 0.54 and 0.59 for CPT codes 76881 and 76882, respectively, but we note that the IWPUT of each code adequately reflects the increased intensity of intraservice work for the complete ultrasound (CPT code 76881; IWPUT = 0.027) versus the limited/focal ultrasound (CPT code 76882; IWPUT = 0.024), and the lesser work RVU of 0.54 for CPT code 76881 stems from the removal of the overlapping pre- and post-service time with the E/M visits that are typically performed. The RUC noted that consistency of intensity measures is demonstrated across the range of codes ascending from the limited code (CPT code 76881) to the new, most complex code (CPT code 76XX0). By proposing work RVUs that maintain the current IWPUTs, we maintain relativity both among the neuromuscular ultrasound family, as well as the larger family of ultrasound

imaging codes. We also note that the difference between the RUC-recommend IWPUTs and our proposed IWPUTs for CPT codes 76881 and 76882 is the same, where CPT code 76882 has an IWPUT that is 0.003 less than the IWPUT of CPT code 76881.

CPT code 76XX0 will be available for CY 2023 to report real-time, complete neuromuscular ultrasound of nerves and accompanying structures throughout their anatomic course, per extremity. This code will examine a nerve throughout its length, within one extremity, including evaluation of multiple areas for potential nerve compression, measurement of cross-sectional areas, evaluation of echogenicity, vascularity, mobility including dynamic maneuvers when indicated, evaluation for any associated muscular denervation, with comparison to unaffected muscles or nerves within that extremity as needed. CPT code 76XX0 also requires permanently recorded images and cine loop and a written report containing a description of each of the elements evaluated. The RUC recommended 7 minutes of pre-service time, 25 minutes of intra-service time and 7 minutes of post-service time as supported by the survey. The RUC clarified that this service would not typically be reported with an office E/M visit. The RUC arrived at a recommended work RVU of 1.21 by comparing the pre-, intra-, and post-service times to those of CPT code 76881, which CMS is proposing to modify due to overlapping work in the pre- and post-service time with E/M visits. When we compared the proposed times of 0 minutes of pre-service time, 20 minutes of intraservice time, and 0 minutes of post-service time, and a work RVU of 0.54 for CPT code 76881, and the proposed times of 7 minutes of pre-service time, 25 minutes of intraservice time, and 7 minutes of post-service time for CPT code 76XX0, we arrived at a reverse building block work RVU of 0.99.

For the direct PE inputs, we are proposing to remove the 2 minutes of clinical labor time for CA006 (*Confirm availability of prior images/studies*), the 1 minute of clinical labor time for the CA007 (*Review patient clinical extant information and questionnaire*), and the 2 minutes for CA011 (*Provide education/obtain consent*) for CPT code 76881 because these RUC recommendations describe clinical labor activities that overlap with the E/M visit that is typically billed with CPT code 76881. We are proposing the direct PE inputs as recommended by the RUC for CPT codes 76882 and 76XX0.

(21) Immunization Administration (CPT Codes 90460, 90461, 90471, 90472, 90473, and 90474)

Especially in the context of the current PHE for COVID–19, it is evident that consistent beneficiary access to vaccinations is vital to public health. As discussed in the CY 2021 PFS proposed rule (85 CFR 50162), many interested parties raised concerns about the reductions in payment rates for the preventive vaccine administration services that had occurred over the past several years. The codes for immunization administration services include CPT codes 90460, 90471, and 90473, as well as the three Healthcare Common Procedural Coding System (HCPCS) codes that describe the services to administer the Part B preventive vaccinations other than the COVID–19 vaccine: G0008 (influenza), G0009 (pneumococcal), and G0010 (HBV). Until CY 2019, we generally had established payment rates for these immunization administration services based on a direct crosswalk to the PFS payment rate for CPT code 96372 (*Therapeutic, prophylactic, or diagnostic injection (specify substance or drug); subcutaneous or intramuscular*). Because we proposed and finalized reductions in valuation for the crosswalk code for CY 2018, and because the reductions in overall valuation for that code have been subject to the multi-year phase-in of significant reductions in RVUs, the payment rate for these vaccine administration codes has been concurrently reduced. Further, because the reduction in RVUs for the crosswalk code, CPT code 96372, was significant enough to be required to be phased in over several years under section 1848(c)(7) of the Act, the reductions in overall valuation for the vaccine administration codes were likewise subject to reductions over several years. As we noted in Table 21 of the CY 2022 PFS proposed rule (86 FR 39222), the national payment rate for administering these preventive vaccines has declined more than 30 percent since 2015.

We have attempted to address the reduction in payment rates for the Part B preventive vaccine administration HCPCS G-codes in the last three PFS rulemaking cycles. In the CY 2020 PFS final rule, we acknowledged that it is in the public interest to ensure appropriate resource costs are reflected in the valuation of the immunization administration services that are used to deliver these vaccines, and noted that we planned to review the valuations for these services in future rulemaking. For CY 2020, we maintained the CY 2019 national payment amount for immunization administration services described by HCPCS codes G0008, G0009 and G0010 (84 FR 62798).

In the CY 2021 PFS proposed rule, we proposed to crosswalk CPT codes 90460, 90471, and 90473, as well as HCPCS codes G0008, G0009 and G0010 to CPT code 36000 (*Introduction of needle or intracatheter, vein*) (85 FR 50163). In the proposed rule, we noted that CPT code 36000 is a service with a similar clinical vignette, and that the additional clinical labor, supply, and equipment resources associated with furnishing CPT code 36000 were similar to costs associated with these vaccine administration codes. We also noted that this crosswalk would have resulted in a payment rate for vaccine administration services that is approximately the same as the CY 2017 rate that was in place prior to the revaluation of CPT code 96372 (the original crosswalk code). In the CY 2021 PFS final rule, we did not finalize the proposed policy, and instead finalized a policy to maintain the CY 2019 payment amount for CPT codes 90460–90474, as well as HCPCS codes G0008, G0009 and G0010 (85 FR 84628). In the final rule, we also noted that we continued to seek additional information that specifically identifies the resource costs and inputs that should be considered to establish payment for vaccine administration services on a long-term basis.

For the CY 2022 rulemaking cycle, we requested feedback from interested parties that would support the development of an accurate and stable payment rate for administration of the preventive vaccines described in section 1861(s)(10) of the Act (influenza, pneumococcal, HBV, and COVID–19) for physicians, NPPs, mass immunizers and certain other providers and suppliers. We invited commenters to submit their detailed feedback to a series of questions and requests that we believed would assist us in establishing payment rates for these services that could be appropriate for use on a long-term basis; we direct readers to the full discussion of this topic in the CY 2022 PFS final rule (86 FR 65179 through 65193). For CY 2022, we finalized a uniform payment rate of $30 for the administration of an influenza, pneumococcal or HBV vaccine covered under the Medicare Part B preventive vaccine benefit at section 1861(s)(10) of the Act. We explained that since the administration of the preventive vaccines described under section 1861(s)(10) of the Act is not included within the statutory definition of physicians' services, the payment rates we established for these services in the

CY 2022 PFS final rule are independent of the PFS, and will be updated as necessary independently of the valuation of any specific codes under the PFS (86 FR 65186). We discuss the current payment policy for administration of preventive vaccines and our proposals for CY 2023 in section III.H. of this proposed rule.

We note that as we consider payment policies to ensure adequate access to the Part B preventive vaccines, including consideration of resource costs, the RUC surveyed and reviewed CPT codes 90460–90474 at the April 2021 meeting and submitted recommendations to CMS for our consideration in the CY 2023 rulemaking cycle.

We are proposing the RUC-recommended work RVU for all six codes in the Immunization Administration family. We are proposing a work RVU of 0.24 for CPT code 90460 (*Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; first or only component of each vaccine or toxoid administered*), a work RVU of 0.18 for CPT code 90461 (*Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional; each additional vaccine or toxoid component administered*), a work RVU of 0.17 for CPT code 90471 (*Immunization administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); 1 vaccine (single or combination vaccine/toxoid)*), a work RVU of 0.15 for CPT code 90472 (*Immunization administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); each additional vaccine (single or combination vaccine/toxoid)*), a work RVU of 0.17 for CPT code 90473 (*Immunization administration by intranasal or oral route; 1 vaccine (single or combination vaccine/toxoid)*), and a work RVU of 0.15 for CPT code 90474 (*Immunization administration by intranasal or oral route; each additional vaccine (single or combination vaccine/toxoid)*).

For the direct PE inputs, we are proposing to remove 1 minute of clinical labor time for the CA008 (*Perform regulatory mandated quality assurance activity (pre-service)*) activity for CPT codes 90460 and 90471–90474. The RUC recommendations describe these activities as ''Checking historical and current temperatures for vaccine refrigerator; recording temperatures; reporting temperatures; vaccine inventorying; ordering vaccines; completing required Vaccines for Children (VFC) paperwork; receiving vaccines; inspecting/logging vaccines and putting them in the vaccine refrigerator; creating lot numbers in HER.'' Checking refrigerator temperatures, vaccine inventorying, and filling out vaccine paperwork are administrative tasks which are not individually allocable to a particular patient for a particular service. We are removing this 1 minute of clinical labor time as these administrative tasks are forms of indirect PE. We are also refining the equipment times for CPT codes 90460 and 90471–90474 to conform to our established policies for non-highly technical equipment.

In consideration of the information provided in the recommendation for these services, we are proposing the RUC's recommended work RVUs and direct PE inputs (with minor refinements) for these vaccine administration services. However, we continue to seek additional information from commenters that specifically identifies the resource costs and inputs that should be considered to establish payment for these vaccine administration services on a long-term basis, consistent with our policy objectives for ensuring maximum access to immunization services.

(22) Orthoptic Training (CPT Codes 92065 and 920XX)

In October 2019, the RUC identified CPT code 92065 (*Orthoptic and/or pleoptic training, with continuing medical direction and evaluation; performed by a physician or other qualified health care professional*) as needing review because it was Harvard Valued (that is, the value of the code had not been reviewed since the implementation of the Resource-Based Relative Value Scale (RBRVS)) and its utilization surpassed 30,000 in each of several recent years. At its January 2020 meeting, during review of CPT code 92065, the RUC noted that the use of ''and/or'' in the descriptor defined different patient populations and treatment techniques and recommended that the code be reviewed by the CPT Editorial Panel (CPT) in order to create two separate codes. Additionally, based upon review and analysis of survey data, specialty societies decided to submit a new code change application for the February 2021 CPT meeting.

During the February 2021 meeting, CPT noted that the services of CPT code 92065 are delivered in two different ways: directly by the practitioner and by a technician under the supervision of the practitioner. In response to this observation, CPT suggested that two codes be created to identify who furnishes the orthoptic service. Identifying in the code descriptor who furnishes the services would ensure more accurate valuation of both the work and the practice expense associated with the service. The CPT formally revised code 92065 and created new CPT code 920XX to describe orthoptic services furnished under the supervision of a physician or qualified health care professional.

During its April 2021 meeting, the RUC revalued the work associated with the services of CPT code 92065 (*Orthoptic training; performed by a physician or other qualified health care professional*) and valued the PE inputs for new CPT code 920XX (*Orthoptic training; performed by a physician or other qualified health care professional under supervision of a physician or other qualified health care professional*). CPT code 920XX is valued as a PE-only code.

After reviewing CPT code 92065, we are proposing to accept the RUC-recommended work RVU of 0.71. We also are proposing to accept the RUC-recommended direct PE inputs for CPT code 92065. We are proposing to accept the RUC-recommended direct PE inputs for CPT code 920XX as well.

(23) Dark Adaptation Eye Exam (CPT Code 92284)

CPT code 92284 (*Dark adaptation examination with interpretation and report*) was identified in July 2020 as Harvard Valued with a utilization of over 30,000 claims. In January 2021, the RUC recommended that the code be surveyed for the April 2021 RUC meeting. The RUC reviewed the survey results for the procedure and noted that the 25th percentile work value of 0.45 was greater than the code's current value. The RUC recommended a work RVU of 0.14, based on a direct work RVU crosswalk from CPT code 76514 (*Ophthalmic ultrasound, diagnostic; corneal pachymetry, unilateral or bilateral (determination of corneal thickness)*). We disagree with the RUC-recommended work RVU of 0.14 for CPT code 92284. We found that the recommended work RVU did not adequately reflect reductions in physician time, since this diagnostic screening is usually completed during an E/M visit and largely consists of interpreting machine generated results. Instead, we are proposing a work RVU of 0.00 for CPT code 92284, which is comparable to other ophthalmic screening tests; such as 99172 (*Visual function screening, automated or semi-automated bilateral quantitative determination of visual acuity, ocular*

alignment, color vision by pseudoisochromatic plates, and field of vision (may include all or some screening of the determination[s] for contrast sensitivity, vision under glare)) and 99173 (*Screening test of visual acuity, quantitative, bilateral*). Alternatively, we considered using a total-time methodology with a work RVU of 0.03 and a reverse building block methodology with a work RVU of 0.06. We are seeking comments and requesting information that may inform why CPT code 92284 should include additional valuation as this procedure is included in an E/M visit.

For the direct PE inputs, we are proposing to refine the equipment time for the lens set (EQ165) from 24 minutes to 15 minutes and motorized table (EF030) from 24 minutes to 15 minutes. The reduction in time for both equipment types is proposed to match the RUC-recommended 15 minutes in Clinical Activity Code CA021. We are seeking public comment to provide further rationale for the additional 9 minutes recommended.

(24) Anterior Segment Imaging (CPT Code 92287)

For CPT code 99287 (*Anterior segment imaging with interpretation and report; with fluorescein angiography*), we are proposing the RUC-recommended work RVU of 0.40.

We are proposing the RUC-recommended direct PE inputs for CPT code 92287 without refinement.

(25) External Extended ECG Monitoring (CPT Codes 93241, 93242, 93243, 93244, 93245, 93246, 93247, and 93248)

In the CY 2021 PFS proposed rule (85 FR 50164), we proposed to adopt the RUC's work RVU recommendations for CPT codes 93241 (*External electrocardiographic recording for more than 48 hours up to 7 days by continuous rhythm recording and storage; includes recording, scanning analysis with report, review and interpretation*), 93242 (*External electrocardiographic recording for more than 48 hours up to 7 days by continuous rhythm recording and storage; recording (includes connection and initial recording)*), 93243 (*External electrocardiographic recording for more than 48 hours up to 7 days by continuous rhythm recording and storage; scanning analysis with report*), 93244 (*External electrocardiographic recording for more than 48 hours up to 7 days by continuous rhythm recording and storage; review and interpretation*), 93245 (*External electrocardiographic recording for more than 7 days up to 15 days by continuous rhythm recording and storage; includes recording, scanning analysis with report, review and interpretation*), 93246 (*External electrocardiographic recording for more than 7 days up to 15 days by continuous rhythm recording and storage; recording (includes connection and initial recording)*), 93247 (*External electrocardiographic recording for more than 7 days up to 15 days by continuous rhythm recording and storage; scanning analysis with report*), and 93248 (*External electrocardiographic recording for more than 7 days up to 15 days by continuous rhythm recording and storage; review and interpretation*).

We noted that the recommendations for this family of codes contained one new supply item, the ''extended external ECG patch, medical magnetic tape recorder'' (SD339). We did not receive a traditional invoice to establish a price for this supply item. Instead, we received pricing information from two sources: a weighted median of claims data with the cost of the other direct PE inputs removed, and a top-down approach calculating the cost of the supply per service based on summing the total costs of the health care provider and dividing by the total number of tests furnished. The former methodology yielded a supply price of approximately $440 while the latter methodology produced an estimated supply price of $416.85. Interested parties also submitted a series of invoices from the clinical study marketplace with a price of $595, which we rejected as we typically require an invoice representative of commercial market pricing to establish a national price for a new supply or equipment item.

After consideration of the information, we proposed to employ a crosswalk to an existing supply for use as a proxy price until we received pricing information to use for the ''extended external ECG patch, medical magnetic tape recorder'' item. We proposed to use the ''kit, percutaneous neuro test stimulation'' (SA022) supply as our proxy item at a price of $413.24. We believed the kit to be the closest match from a pricing perspective to employ as a proxy until we would be able to arrive at an invoice that is representative of commercial market pricing. We welcomed the submission of invoices or other additional information for use in pricing the ''extended external ECG patch, medical magnetic tape recorder'' supply. In response to our proposal, we received conflicting information from commenters and in the CY 2021 PFS final rule (85 FR 84631), we ultimately finalized contractor pricing for CY 2021 for the four codes that included this supply input (CPT codes 93241, 93243, 93245, and 93247) to allow additional time to receive more pricing information.

We noted that interested parties have continued to engage with CMS and the MACs on payment for this service. We remained concerned that we continued to hear that the supply costs as initially considered in our CY 2021 PFS proposal were much higher than they should be. At the same time, we also heard that the resource costs, as reflected in the contractor-based payments, do not adequately cover the incurred cost for the SD339 supply that is used to furnish these services. In consideration of continued access to these services for Medicare beneficiaries, we once again solicited public comments and information in the CY 2022 PFS proposed rule (86 FR 39179) to support CMS' future rulemaking to establish a uniform national payment that appropriately reflects the PE inputs that are used to furnish these services. During the comment period, we received invoices and additional information for use in pricing the SD339 supply from the commenters.

Based on this information, we finalized an updated price of $200.15 for the extended external ECG patch, medical magnetic tape recorder'' (SD339) supply in the CY 2022 PFS final rule based on the average of the ten invoices we received (86 FR 65125). We believed that the invoice data for this supply item, which ranged from a minimum price of $179.80 to a maximum price of $241.99, suggested that our updated price of $200.15 was more accurate than the suggested crosswalk to the SD214 supply at a price of $325.98. We believed that considering a potential impact to payment for other services under the PFS, a proposal to establish national payment for these services based on this new pricing information should take into account broader feedback from interested parties. Therefore, we did not finalize national pricing at this time and finalized our proposal to maintain contractor pricing for CPT codes 93241, 93243, 93245, and 93247 for CY 2022.

For CY 2023, we received a series of additional invoices for the SD339 supply from two impacted parties. Each of the invoices priced the supply item at either $265.00 or $226.38; we are therefore proposing to average together these prices and establish a proposed price of $245.69 for the SD339 supply. We believe that this represents the most typical price for the supply based on the invoice data that has been provided over the past 2 years. We are also proposing

national pricing for CPT codes 93241, 93243, 93245, and 93247 for CY 2023 now that the SD339 supply has an established price. The proposed CY 2023 RVUs for these CPT codes are displayed in Addendum B on the CMS website under downloads for the CY 2023 PFS proposed rule at *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/PhysicianFeeSched/index.html.*

(26) Cardiac Ablation (CPT Codes 93653, 93654, 93655, 93656, and 93657)

The technologies and clinical practices associated with Cardiac Ablation Services have changed enough over the past decade (since 2011 when they were first developed) that the specialty societies recommended referring theses codes to the CPT Editorial Panel to have the code descriptors for Cardiac Ablation Services updated to create new and more complete descriptors reflecting the fact that many of these services are commonly performed together and should be incorporated and bundled. From the survey results presented to CMS last year, the RUC advisory committee believes that many of the survey respondents may not have realized that the code descriptors had been substantially revised and that they may not have read the updated code descriptors thoroughly enough to understand that services that are separately billed, were now combined into the existing codes (since CPT did not issue new codes for the revised descriptors). Since then, the RUC has re-surveyed these Cardiac Ablation codes in April 2021 for re-review. In the interim, the work RVUs for the newly bundled CPT codes were maintained at their current values until the new recommendations were presented for CY 2023.

The RUC re-surveyed and reviewed CPT code 93653 (*Comprehensive electrophysiologic evaluation with insertion and repositioning of multiple electrode catheters, induction or attempted induction of an arrhythmia with right atrial pacing and recording, and catheter ablation of arrhythmogenic focus, including intracardiac electrophysiologic 3-dimensional mapping, right ventricular pacing and recording, left atrial pacing and recording from coronary sinus or left atrium, and His bundle recording, when performed; treatment of supraventricular tachycardia by ablation of fast or slow atrioventricular pathway, accessory atrioventricular connection, cavo-tricuspid isthmus or other single atrial focus or source of atrial re-entry*), and recommends a work RVU of 15.00 with 31 minutes of pre-service evaluation time, 3 minutes positioning time, 15 minutes scrub/dress/wait time, 120 minutes of intra-service time, 30 minutes of immediate post-service time, for a sum of 199 minutes of total time. CPT code 93653 currently has a work RVU value of 14.75 with 23 minutes of pre-service evaluation time, 1 minutes positioning time, 5 minutes scrub/dress/wait time, 180 minutes of intra-service time, 30 minutes of immediate post-service time, for a sum of 239 minutes of total time. The time and the physician's work of CPT add-on code 93613 (*Intracardiac electrophysiologic 3-dimensional mapping (List separately in addition to code for primary procedure*) with a work RVU of 5.23 and 90 minutes of total time, and CPT add-on code 93621 (*Comprehensive electrophysiologic evaluation including insertion and repositioning of multiple electrode catheters with induction or attempted induction of arrhythmia; with left atrial pacing and recording from coronary sinus or left atrium (List separately in addition to code for primary procedure)*) with a work RVU of 1.50 and 20 minutes of total time are bundled within CPT code 93653. When all three codes are separately considered, they currently sum up to 21.48 work RVUs, much greater than the 15.00 work RVUs that the RUC has recommended. These codes also add up to much more physician total time than the RUC-recommended 199 minutes.

After reviewing this code and relative similar codes in the PFS, we propose a comparator CPT code 37229 (*Revascularization, endovascular, open or percutaneous, tibial, peroneal artery, unilateral, initial vessel; with atherectomy, includes angioplasty within the same vessel, when performed*) with a work RVU of 13.80 and a similar intra-service time of 120 minutes and similar pre-service evaluation, pre-service positioning, pre-service scrub/dress/wait times, and immediate post-service times, for a sum of 188 minutes of total time for a 000 day global period, compared to the RUC-recommended 199 minutes of total time for CPT code 93653. We propose a work RVU of 13.80 for the bundled CPT code 93563.

The RUC re-surveyed and reviewed CPT code 93654 (*Comprehensive electrophysiologic evaluation with insertion and repositioning of multiple electrode catheters, induction or attempted induction of an arrhythmia with right atrial pacing and recording, and catheter ablation of arrhythmogenic focus, including intracardiac electrophysiologic 3-dimensional mapping, right ventricular pacing and recording, left atrial pacing and recording from coronary sinus or left atrium, and His bundle recording, when performed; with treatment of ventricular tachycardia or focus of ventricular ectopy including left ventricular pacing and recording, when performed*), and recommends a work RVU of 18.10 with 40 minutes of pre-service evaluation time, 3 minutes positioning time, 15 minutes scrub/dress/wait time, 200 minutes of intra-service time, 33 minutes of immediate post-service time, for a sum of 291 minutes of total time. CPT code 93654 currently has a work RVU value of 19.75 with 23 minutes of pre-service evaluation time, 1 minutes positioning time, 5 minutes scrub/dress/wait time, 240 minutes of intra-service time, 40 minutes of immediate post-service time, for a sum of 309 minutes of total time. CPT code 93654 is currently and continues to be a bundled code. The RUC recommended intra-service times and total times for CPT code 93654 are less than the current times for this code, and the RUC-recommended work RVUs are also less than the current work RVUs. Though the RUC recommended a work RVU of 18.10, it is still a relatively high value compared to the existing 19.75 value. The RUC recommended a work RVU of 15.00 for CPT code 93653, and 18.10 for CPT code 93654, with a relative increment between them of 3.10 work RVUs. We are proposing to maintain the relative increment RVU difference of 3.10 between CPT code 93653 and CPT code 93654, so because we are proposing a work RVU of 13.80 for CPT code 93653, we are proposing a work RVU of 16.90 (13.80 plus 3.10) for CPT code 93654, with 200 minutes of intra-service time and 291 minutes of total time.

CPT add-on code 93655 (*Intracardiac catheter ablation of a discrete mechanism of arrhythmia which is distinct from the primary ablated mechanism, including repeat diagnostic maneuvers, to treat a spontaneous or induced arrhythmia (List separately in addition to code for primary procedure)*) has a current work RVU of 5.50 with a physician intra-service time of 60 minutes as finalized last year, from a previous value of 7.50 work RVUs with 90 minutes of physician intra-service time. The RUC recommended the re-surveyed intraservice time of 60 minutes and 7.00 work RVUs. The primary change to CPT code 93655 is the reduction of the intraservice time of about 67 percent, which we use as a guide to determine a work RVU. We compare CPT add-on code 22854

(*Insertion of intervertebral biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to vertebral corpectomy(ies) (vertebral body resection, partial or complete) defect, in conjunction with interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure)*), also with 60 minutes of intraservice and total time and a work RVU of 5.50 to CPT add-on code 93655 and we believe that this is a more accurate valuation than the RUC's work RVU comparison to CPT add-on code 93592 (*Percutaneous transcatheter closure of paravalvular leak; each additional occlusion device (List separately in addition to code for primary procedure)*) with a work RVU of 8.00 and an intra-service and total time of 60 minutes, and to CPT add-on code 34820 (*Open iliac artery exposure for delivery of endovascular prosthesis or iliac occlusion during endovascular therapy, by abdominal or retroperitoneal incision, unilateral (List separately in addition to code for primary procedure)*) with a work RVU of 7.00 and an intra-service and total time of 60 minutes. After reviewing this code and relative similar codes in the PFS, we propose to maintain the current work RVU for CPT code 93655 of 5.50 with a physician intra-service time of 60 minutes, as finalized last year (86 FR 65108).

The RUC re-surveyed and reviewed CPT code 93656 (*Comprehensive electrophysiologic evaluation including transseptal catheterizations, insertion and repositioning of multiple electrode catheters with intracardiac catheter ablation of atrial fibrillation by pulmonary vein isolation, including intracardiac electrophysiologic 3-dimensional mapping, intracardiac echocardiography including imaging supervision and interpretation, induction or attempted induction of an arrhythmia including left or right atrial pacing/recording, right ventricular pacing/recording, and His bundle recording, when performed*), *and* recommends a work RVU of 17.00 with 35 minutes of pre-service evaluation time, 3 minutes positioning time, 15 minutes scrub/dress/wait time, 180 minutes of intra-service time, 30 minutes of immediate post-service time, for a sum of 263 minutes of total time. CPT code 93656 currently has a work RVU of 19.77 with 23 minutes of pre-service evaluation time, 1 minute positioning time, 5 minutes scrub/dress/wait time, 240 minutes of intra-service time, 40 minutes of immediate post-service time, for a sum of 309 minutes of total time. CPT code 93656 has bundled within it, the time and the physician's work of CPT add-on code 93613 (*Intracardiac electrophysiologic 3-dimensional mapping (List separately in addition to code for primary procedure*) with a work RVU of 5.23 and 90 minutes of total time and CPT add-on code 93662 (*Intracardiac echocardiography during therapeutic/diagnostic intervention, including imaging supervision and interpretation (List separately in addition to code for primary procedure)*) with a work RVU of 1.44 and 25 minutes of total time. When all three codes are separately considered, they sum up to 26.44 work RVUs, which is much greater than the 17.00 work RVUs that is recommended and has much more physician total time than the RUC recommended 263 total time minutes.

The RUC recommended intra-service times and total times for CPT code 93656 that are less than the current times for this code and we expect the work RVUs to also be less than the current work RVUs. Though the RUC recommended a work RVU of 17.00, it is still a high value compared to the existing 19.77. The RUC recommended the work RVU for CPT code 93653 as 15.00, and for CPT code 93656 as 17.00, with a relative increment between them of 2.00 work RVUs. As a better valuation for CPT code 93656, CMS proposes the proposed CPT code 93653's 13.80 work RVU plus the relative increment RVU difference of 2.00 that the RUC is maintaining between CPT code 93653 and CPT code 93656 (15.00 subtracted from 17.00 equals 2.00). This would value CPT code 93656 at 15.80 (13.80 plus 2.00) work RVUs for 180 minutes of intra-service time and 263 minutes of total time, which we propose for CY 2023.

CPT add-on code 93657 (*Additional linear or focal intracardiac catheter ablation of the left or right atrium for treatment of atrial fibrillation remaining after completion of pulmonary vein isolation (List separately in addition to code for primary procedure)*) has a current work RVU of 5.50 with a physician intra-service time of 60 minutes as finalized last year (86 FR 65108). The previous work RVU was 7.50 with 90 minutes of physician intraservice time. The RUC recommended the re-surveyed intra-service time of 60 minutes and 7.00 work RVUs. The primary change to CPT add-on code 93657 is the reduction of the intra-service time from before the re-survey and the current RUC-recommended time, from 90 minutes to 60 minutes, which is a reduction of about 67 percent, and which we used as a guide to determine an appropriate work RVU. We compare CPT add-on code 22854 (*Insertion of intervertebral biomechanical device(s) (e.g., synthetic cage, mesh) with integral anterior instrumentation for device anchoring (e.g., screws, flanges), when performed, to vertebral corpectomy(ies) (vertebral body resection, partial or complete) defect, in conjunction with interbody arthrodesis, each contiguous defect (List separately in addition to code for primary procedure)*), also with 60 minutes of intra-service and total time, and a work RVU of 5.50, to CPT add-on code 93657, and believe that this is a more accurate comparison for valuation than the RUC's work RVU comparison to CPT add-on code 93592 (*Percutaneous transcatheter closure of paravalvular leak; each additional occlusion device (List separately in addition to code for primary procedure)*) with a work RVU of 8.00 and an intra-service and total time of 60 minutes, and to CPT add-on code 34820 (*Open iliac artery exposure for delivery of endovascular prosthesis or iliac occlusion during endovascular therapy, by abdominal or retroperitoneal incision, unilateral (List separately in addition to code for primary procedure)*) with a work RVU of 7.00 and an intra-service and total time of 60 minutes. After reviewing this code and relative similar codes in the PFS, we are proposing to re-affirm the current work RVU of 5.50 with a physician intraservice time of 60 minutes for CPT add-on code 93657, as finalized last year (86 FR 65108).

The RUC did not recommend, and we are not proposing, direct PE inputs for CPT codes 93653–93657.

(27) Pulmonary Angiography (CPT Codes 93XX0, 93XX1, 93XX2, 93XX3, 93563, 93564, 93565, 93566, 93567, and 93568)

In May 2021, the CPT Editorial Panel revised CPT code 93568 (*Injection procedure during cardiac catheterization including imaging supervision, interpretation, and report; for nonselective pulmonary arterial angiography (List separately in addition to code for primary procedure*) which resulted in the creation of four new related CPT add-on codes. CPT add-on codes 93563 to 93567 were surveyed with the four new codes, as part of the same code family.

The RUC surveyed and reviewed CPT code 93563 (*Injection procedure during cardiac catheterization including imaging supervision, interpretation, and report; for selective coronary angiography during congenital heart*

catheterization (List separately in addition to code for primary procedure)), and recommends a work RVU of 1.11 for 15 minutes of intra-service and total time for this add-on service. The current work RVU is 1.11 for 25 minutes of intra-service and total time, so there is a reduction of 10 minutes in physician time. With the reduction of physician time, it is typical that there would be some reduction in the work RVUs. After reviewing this code and relative similar codes in the PFS, we believe a better comparator add-on code would be CPT code 64494 (*Injection(s), diagnostic or therapeutic agent, paravertebral facet (zygapophyseal) joint (or nerves innervating that joint) with image guidance (fluoroscopy or CT), lumbar or sacral; second level (List separately in addition to code for primary procedure)*), with a work RVU of 1.00 for 15 minutes of intra-service and total time. CPT code 64494 is a good comparator in terms of both the new physician time and due to the proportional work RVU, as compared to CPT code 93563. Therefore, we are proposing a work RVU of 1.00 and 15 minutes of intra-service and total time for add-on CPT code 93563.
