FEDERAL REGISTER

Vol. 88 Wednesday,
No. 85 May 3, 2023

Pages 27655–28380

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 88 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Proclamation 10559 of April 28, 2023

Asian American, Native Hawaiian, and Pacific Islander Heritage Month, 2023

By the President of the United States of America

A Proclamation

During Asian American, Native Hawaiian, and Pacific Islander Heritage Month, our Nation celebrates the diversity of cultures, breadth of achievement, and remarkable contributions of these communities; of brave immigrants who, motivated by the promise of possibilities, picked up their lives and found new homes here; of native peoples who have stewarded these lands since time immemorial; and of community leaders shaping a brighter future for us all. Throughout our history, they have represented the bigger story of who we are as Americans and embodied the truth that our diversity is our strength as a Nation.

Asian Americans, Native Hawaiians, and Pacific Islanders (AA and NHPIs) represent us at every level of government, including Vice President Kamala Harris, the first Vice President of South Asian descent; Ambassador Katherine Tai, the first Asian American United States Trade Representative; and Dr. Arati Prabhakar, who is the first South Asian American to lead the White House Office of Science and Technology Policy. Earlier this year, I was also proud to nominate Julie Su to serve as the Secretary of Labor. From historic Oscar-winning performances in film to achievements across business, culture, sports, and civil rights, AA and NHPIs shape and strengthen the fabric of this Nation. We see their contributions as business owners and caregivers as well as their service in the military and on the frontlines during the COVID–19 pandemic.

Despite the immeasurable ways AA and NHPIs enrich this country, we continue to see persistent racism, harassment, and hate crimes against these communities. Attacks on Asian American women and elders, have left too many families afraid to leave their homes and too many loved ones traumatized. The devastating murder of eight victims in Atlanta, six of whom were women of Asian descent, pierced the soul of this Nation. This year, after the shootings in Monterey Park and Half Moon Bay, both the Vice President and I visited California to honor the victims; grieve with the community; and witness their resilience, heroism, and courage. Hate must have no safe harbor in America, and every person deserves to be treated with dignity and respect. To address the rising tide of anti-Asian violence, I signed the bipartisan COVID–19 Hate Crimes Act into law—which included the Jabara-Heyer No HATE Act, making it easier for Americans to report hate crimes and to help State, local, and Tribal law enforcement agencies better track these hateful acts.

This year I was proud to launch the first-ever National Strategy to Advance Equity, Justice, and Opportunity for Asian American, Native Hawaiian, and Pacific Islander Communities. This plan reflects my Administration's commitment to improving the lives of AA and NHPIs—ensuring that the census collects accurate data so they are properly reflected when new policy is made; advancing safety, inclusion, and belonging for AA and NHPI communities; promoting language access and preservation; advancing AA and NHPI representation in the Federal workforce; and striving toward an equitable COVID–19 recovery. The White House was proud to host celebrations such

as Diwali, Eid al-Fitr, Lunar New Year, Nowruz, and Vesak so we could celebrate with diverse AA and NHPI communities from across the Nation.

We are also creating economic opportunities for AA and NHPI workers and business owners. The Small Business Administration has distributed nearly $16 billion in loans to AA and NHPI entrepreneurs since I took office. I was proud to sign Executive Orders to ensure the Federal workforce reflects the diversity of the American people. Our efforts are paying off. In the Asian American community, unemployment has fallen by more than half since I took office, and as of 2021, entrepreneurship had risen at the fastest rate in over a decade.

As we make progress to advance equity and opportunity, we know our work is far from done. To help more AA and NHPIs see themselves in the story of America, I signed historic legislation bringing us closer to creating the National Museum of Asian Pacific American History and Culture. To honor the traditional practices and ancestral pathways of Pacific Island voyagers, I expanded protections for the Pacific Remote Islands. To help Americans reckon with and learn from more shameful chapters of our history, I signed into law the Amache National Historic Site Act, which establishes a memorial to the 10,000 Japanese Americans who were unjustly incarcerated at Amache during World War II. Facing past wrongs helps us build a more just and equitable future.

This country's fundamental promise holds that every person is created equal and deserves to be treated equally throughout their lives. We have never fully lived up to that ideal, but we have never walked away from it either. This month, we renew our work to put the American Dream within reach of all people, and we celebrate the vibrancy, contributions, and future of AA and NHPI communities across America.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as Asian American, Native Hawaiian, and Pacific Islander Heritage Month. I call upon all Americans to learn more about the history of AA and NHPIs and to observe this month with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10560 of April 28, 2023

Jewish American Heritage Month, 2023

By the President of the United States of America

A Proclamation

This month, we celebrate the enduring heritage of Jewish Americans, whose values, culture, and contributions have shaped our character as a Nation. For generations, the story of the Jewish people—one of resilience, faith, and hope in the face of adversity, prejudice and persecution—has been woven into the fabric of our Nation's story. It has driven us forward in our ongoing march for justice, equality, and freedom as we recommit to upholding the principles of our Nation's founding and realizing the promise of America for all Americans.

For centuries, Jewish refugees fleeing oppression and discrimination abroad have sailed to our shores in search of sanctuary. Early on, they fought for religious freedom, helping define one of the bedrock principles upon which America was built. Union soldiers celebrated Passover in the midst of the Civil War. Jewish suffragists fought to expand freedom and justice. And Jewish faith leaders linked arms with giants of the Civil Rights Movement to demand equal rights for all.

Jewish Americans continue to enrich every part of American life as educators and entrepreneurs, athletes and artists, scientists and entertainers, public officials and activists, labor and community leaders, diplomats and military service members, public health heroes, and more. Last year, I was proud to host the White House's first-ever Jewish New Year reception. During our Hanukkah celebration, I was also proud to unveil the first-ever permanent menorah at the White House—reinforcing the permanency of Jewish culture in America. In my own life, the Jewish community has been a tremendous source of friendship, guidance, and strength through seasons of pain and seasons of joy.

But there is also a dark side to the celebrated history of the Jewish people—a history marked by genocide, pogrom, and persecution—with a through line that continues in the record rise of antisemitism today. We have witnessed violent attacks on synagogues, bricks thrown through windows of Jewish businesses, swastikas defacing cars and cemeteries, Jewish students harassed on college campuses, and Jews wearing religious attire beaten and shot on streets. Antisemitic conspiracy theories are rampant online, and celebrities are spouting antisemitic hate.

These acts are unconscionable and despicable. They carry with them terrifying echoes of the worst chapters in human history. Not only are they a strike against Jews, but they are also a threat to other minority communities and a stain on the soul of our Nation. I decided to run for President after I saw this hatred on display during the rally in Charlottesville, when neo-Nazis marched from the shadows spewing the same antisemitic bile that was heard in Germany in the 1930s. These incidents remind us that hate never truly goes away—it only hides until it is given just a little oxygen. It is our obligation to ensure that hate can have no safe harbor in America and to protect the sacred ideals enshrined in our Constitution: religious freedom, equality, dignity, and respect. That is the promise of America.

I have made clear that I will not remain silent in the face of this antisemitic venom, vitriol, and violence. During my first year in office, I signed the bipartisan COVID–19 Hate Crimes Act to help State and local law enforcement better identify and respond to hate crimes. I appointed Deborah Lipstadt, a historian of the Holocaust, as the first Ambassador-level Special Envoy to Monitor and Combat Antisemitism. And my Administration also secured the largest increase in funding ever for the physical security of nonprofits, including synagogues, Jewish Community Centers, and Jewish day schools.

At my direction, we are also developing the first national strategy to counter antisemitism that outlines comprehensive actions the Federal Government will undertake and that reflects input from over a thousand Jewish community stakeholders, faith and civil rights leaders, State and local officials, and more. This strategy will help combat antisemitism online and offline, including in schools and on campuses; improve security to prevent antisemitic incidents and attacks; and build cross-community solidarity against antisemitism and other forms of hate.

But governance alone cannot root out antisemitism and hate. All Americans—including business and community leaders, educators, students, athletes, entertainers, and influencers—must help confront bigotry in all its forms. We must each do our part to put an end to antisemitism and hatred and create a culture of respect in our workplaces, schools, and homes and across social media.

This Jewish American Heritage Month, let us join hands across faiths, races, and backgrounds to make clear that evil, hate, and antisemitism will not prevail. Let us honor the timeless values, contributions, and culture of Jewish Americans, who carry our Nation forward each and every day. And let us rededicate ourselves to the sacred work of creating a more inclusive tomorrow, protecting the diversity that defines who we are as a Nation, and preserving the dignity of every human being—here at home and around the world.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as Jewish American Heritage Month. I call upon all Americans to learn more about the heritage and contributions of Jewish Americans and to observe this month with appropriate programs, activities, and ceremonies.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10561 of April 28, 2023

National Building Safety Month, 2023

By the President of the United States of America

A Proclamation

Modern building codes help to ensure that our homes, schools, workplaces, and gathering spots are safely constructed and secure, keeping the power on, our country strong, and our lives moving forward. During National Building Safety Month, we recommit to helping every community in America make all of its structures safer, more sustainable, and more resilient for the future.

From planning and design to construction and renovation, many buildings are safer today than they were decades ago. But nearly two-thirds of Americans live in communities that have not yet adopted the latest building codes, which are designed to avoid damages and keep emerging threats like climate change from further devastating communities with increasingly powerful fires, floods, and storms. We need to do more to help everyone prepare for and prevent disasters; to promote building safety; and to support our too-often overlooked engineers, construction workers, and code enforcement inspectors, who do so much every day to keep Americans safe.

My Administration has taken major steps in that direction. Last year, we launched a new National Initiative to Advance Building Codes, designed to help State, local, Tribal, and territorial governments adopt the latest building standards. With our once-in-a-generation infrastructure law, we are rebuilding the Nation's roads, bridges, ports, water systems, and more; we are investing over $50 billion to weatherize American homes and to help protect communities against droughts, heat, and floods; and we are replacing toxic lead pipes in 10 million homes and 400,000 schools or child care centers so every American can turn on the faucet and drink clean water. We are also investing in training workers to meet and enforce new standards.

The Inflation Reduction Act, meanwhile, is America's biggest-ever investment in fighting climate change, providing $1 billion to help States and localities adopt building energy codes that reduce greenhouse gas emissions. It invests another nearly $1 billion to improve energy efficiency and indoor air quality in federally-supported housing and make these properties more resilient to climate impacts. At the same time, the Federal Emergency Management Agency has helped rebuild communities devastated by floods, fires, tornadoes, and hurricanes while incentivizing the use of low-carbon materials when rebuilding. Across the board, we have committed to sending 40 percent of the benefits of certain Federal investments—including investments in clean energy, energy efficiency, affordable housing, and pollution reduction—to disadvantaged communities, which too often have been left out and left behind.

Regularly-updated building codes and tough enforcement are key to safety—but we can each do our part to build a stronger, more resilient America. To keep your homes safe, we urge all Americans to change the batteries in your smoke alarms; to regularly check that your appliances, vents, plumbing, and electrical systems are working; and to keep an eye out for mold and pests that can make loved ones sick. If you live in wildfire country, find time to clear the leaves and debris from around your home. While

there are few things more proudly American than do-it-yourself renovations, make sure your work is in line with local requirements designed to save lives or hire qualified contractors to do it for you. Finally, we urge everyone to support their local code enforcement inspectors and to give them the respect and thanks they deserve for keeping us safe and making all our communities more resilient.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as National Building Safety Month. I encourage citizens, government agencies, businesses, nonprofits, and other interested groups to join in activities that raise awareness about building safety. I also call on all Americans to learn more about how they can contribute to building safety at home, at work, and in their communities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Presidential Documents

Proclamation 10562 of April 28, 2023

National Foster Care Month, 2023

By the President of the United States of America

A Proclamation

The more than 391,000 American children and youth living in foster care deserve to grow up in safe and loving homes devoted to their health, happiness, and advancement. This month, we honor the absolute courage of young people in foster care, who too often endure challenges that no child should ever have to confront, and we give thanks to the dedicated kinship and foster parents who care for them during their times of greatest need. We recognize the biological parents and families of foster children who work hard to overcome difficult circumstances so they can safely reunite with their children. We also rededicate ourselves to supporting the volunteers and professionals who help America's foster youth find temporary and permanent homes.

Despite the selflessness and service of loving foster parents across the country, children in foster care often face an uphill battle in achieving their full potential. Many carry lasting physical and emotional scars from trauma they experienced at a young age, which can increase their risk of mental health issues or lead to substance use disorders. These challenges are magnified for children of color, who are disproportionately represented in the child welfare system: 1 in 9 Black children and 1 in 7 Native American children spend part of their childhood in foster care. Meanwhile, recent estimates suggest 30 percent of youth in foster care identify as LGBTQI+.

To fulfill our Nation's responsibility to our children, we need to prevent the conditions that lead to kids entering foster care in the first place. My Administration has invested hundreds of millions of dollars in community-based child abuse and neglect prevention programs, and we are requesting an increase from the Congress for these programs. We are also proposing a $5 billion expansion of evidence-based foster care prevention services to allow more children to remain safely in their own homes with their own families. Because poverty can trigger interventions that unnecessarily remove children from their families, we are fighting to restore the expanded Child Tax Credit, which in 2021 helped slash child poverty to its lowest rate ever. And as a dangerous wave of cynical State investigations targets families with transgender children, we will keep working to stop politicians from weaponizing child protective services against loving families who simply want to support their kids and help them to be their authentic selves.

For children and youth already in the foster care system, we must continue finding them loving temporary homes and, ultimately, safe and supportive permanent homes. My Administration is working to help States place more children with relatives and other trusted adults instead of in group homes. We are seeking to make it easier for biological parents to safely reunite with their children by providing these families with legal representation to help them navigate the complex child welfare system.

To make adoption and legal guardianship more manageable for families who could otherwise create safe and supportive homes, I have called for the adoption tax credit to be made fully refundable and proposed extending it to legal guardians—including grandparents, aunts, uncles, and other relatives. This would provide more breathing room to the kinship caregivers currently raising nearly one-third of all children in the foster care system, and it would also help reduce racial inequities in our country's child welfare system.

To further increase the number of loving families who can take in foster children, I issued an Executive Order removing barriers and combating biases that make it harder for LGBTQI+ families to foster and adopt. At the same time, we are working with State child welfare agencies to make sure LGBTQI+ youth are placed in supportive environments that see and value them for who they are.

Since coming to office, my Administration has worked hand-in-hand with States to help youth aging out of the foster care system to stay in school, participate in job training programs, pay their bills, and transition to adulthood. I have also expanded the Military Parental Leave Program, which enables service members to spend needed time with their families following a child's birth, adoption, or placement in long-term foster care. My latest Budget calls for $9 billion to provide housing vouchers to all 20,000 youth exiting foster care annually—a key step in helping them secure stable housing during this difficult transition. I have also called for an additional $1 billion to help youth aging out of foster care find a job, enroll in and afford higher education, obtain basic necessities, and access preventative health care.

One of my great privileges during my career in public service has been meeting some of the remarkable young people in foster care and their foster parents. I have seen what good foster care can do. Despite the challenges that no young person should ever have to face, loving foster families can help children become independent, confident, successful members of society and can be a critical resource to children and families in times of need. Ensuring that children who are separated from their families are placed in loving and supportive environments, while ensuring that as many families as possible have the resources they need to remain safely together, is a moral duty we all share and an investment in America's future that will pay dividends for generations to come.

This National Foster Care Month, we express our gratitude to every loving foster parent in America, and we acknowledge every young person navigating the child welfare system, unsure of what the future might hold. You can succeed, and my Administration will do all it can to provide you with the tools and resources you need and the secure, respectable upbringing you deserve to create a meaningful life.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as National Foster Care Month. I call upon all Americans to observe this month by reaching out in their neighborhoods and communities to the children and youth in foster care and their families, to those at risk of entering foster care, and to kin families and other caregivers.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10563 of April 28, 2023

National Mental Health Awareness Month, 2023

By the President of the United States of America

A Proclamation

During National Mental Health Awareness Month, we honor the absolute courage of the tens of millions of Americans living with mental health conditions, and we celebrate the loved ones and mental health professionals who are there for them every day. Treatment works, and there is no shame in seeking it. Together, we will keep fighting to get everyone access to the care they need to live full and happy lives.

As Americans, we have a duty of care to reach out to one another and leave no one behind. But so many of our friends, colleagues, and loved ones are battling mental health challenges, made worse by the isolation and trauma of COVID–19. Two in five adults report anxiety and depression, and two in five teens describe experiencing persistent sadness or hopelessness, exacerbated by social media, bullying, and gun violence. Drug overdose deaths are also near record highs, and suicide is the second leading cause of death among young people. It does not have to be this way.

As President, I released a new national strategy to transform how we understand and address mental health in America—supporting and training more providers, improving access to care, and building healthy environments that promote mental health. This work is a core pillar of the Unity Agenda that I outlined in my first State of the Union Address. Mental health is health; it affects everyone, regardless of race, gender, politics, or income. Promoting it is one of the big things that we can all agree to do together as Americans to make our country stronger.

The United States has long faced a shortage of mental health providers. It takes an average of 11 years to get treatment after the onset of symptoms, and less than half of Americans struggling with mental illness ever receive the care they need. This is especially true in rural and other underserved communities. That is why the American Rescue Plan made our Nation's biggest-ever investment in mental health and substance use programs—recruiting, training, and supporting more providers at the State and local levels, including in our schools. Last year, when we passed the Nation's first major gun safety law in nearly 30 years, it contained measures to further increase the number of school psychologists and counselors available to our kids, to make it easier for schools to use Medicaid to deliver mental health care, and to expand the Certified Community Behavioral Health Clinics that deliver 24/7 care. Additionally, we have invested in training more first responders to address mental health-related issues.

Last year, we also launched 988 as the Nation's new Suicide and Crisis Lifeline so anyone in the midst of a crisis can receive life-saving confidential help right away. We added dedicated counselors trained in supporting LGBTQI+ youth to the 988 lifeline, and for veterans, we made it easier to reach the Veterans Crisis Line by dialing 988 and pressing 1 to reach trained crisis responders. We created a separate Maternal Mental Health Hotline to help mothers navigate mental health issues like postpartum depression, anxiety, and substance use disorders, which affect one in five pregnant and postpartum women. Far too often, these disorders go undiagnosed and untreated, so we have invested in programs that bolster screening and treatment and call specific attention to them during Maternal Mental Health Awareness Week, which we also observe this month. Finally, we have passed historic laws that further require insurers to cover mental health care as they would any other kind of treatment, that lower prescription drug costs, and that expand health coverage generally. I am proud that we have seen historic health insurance coverage gains since I took office.

At the same time, we are fighting to expand access to prevention and treatment for substance use disorders, including opioid use disorder, which have devastated so many families and communities. This includes expanding access to mental health and substance use treatment in jails and prisons and during reentry to support people when they return home. And last year, we passed a law making it easier for doctors to prescribe effective addiction treatment. Anyone suffering should know they are not alone: We believe in recovery, and we celebrate the courage of the 23 million Americans who have come so far down that road.

We are also expanding mental health care for service members and veterans, to better honor our sacred obligation to the troops we send into harm's way and to care for them and their families when they are home. We cannot keep losing 17 veterans a day to the silent scourge of suicide. My Administration is increasing access to mental health care, hiring more mental health professionals, and investing in programs that recruit veterans to help one another get the support they need. And we are working to expand rental assistance and job placement programs to help smooth veterans' return to civilian life. I have also signed laws extending counseling, benefits, and other mental health resources to first responders and their families to help them heal from the trauma that they or their loved ones faced on the job.

There is much more to do. For one, we must finally hold social media companies accountable for the experiments they are running on our children for profit. I have called on the Congress to limit the personal data that tech companies collect, to ban targeted advertising directed at minors, and to require social media platforms to put health and safety first, especially for kids.

We all have a role to play in ending the stigma around mental health issues. It starts by showing compassion, so everyone feels free to ask for help. If you are facing a crisis, dial 988 to reach the National Suicide and Crisis Lifeline. If you are a new or expecting mother, you can call 1–833–9–HELP4MOMS for confidential professional advice. If you are feeling overwhelmed or just need someone to talk to, ask your healthcare provider, contact the Substance Abuse and Mental Health Services Administration's National Helpline at 1–800–662–HELP, or visit www.FindSupport.gov. If someone you know is going through a tough time, reach out and tell them you are there for them. We are all in this together.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as National Mental Health Awareness Month. I call upon citizens, government agencies, private businesses, nonprofit organizations, and other groups to join in activities and take action to strengthen the mental health of our communities and our Nation.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10564 of April 28, 2023

National Physical Fitness and Sports Month, 2023

By the President of the United States of America

A Proclamation

Forty years ago, our Nation observed its first National Physical Fitness and Sports Month to promote the benefits of exercising and leading a healthy lifestyle. Since then, we have learned more about how physical activity can improve mental health, reduce the risk of disease, and foster social connection. This month, we recommit to making fitness accessible in every community and encourage all Americans to adopt healthy habits that strengthen our bodies and minds and increase the prospect of a long and healthy life.

Studies show that regular exercise can have a dramatic impact on our health, lowering the likelihood of heart disease, stroke, type 2 diabetes, and some types of cancer. It also improves memory and sleep, increases our ability to focus, and reduces symptoms of depression and anxiety. This is particularly important for people most affected by diet-related diseases, including communities of color, people living in rural areas and territories, people with disabilities, older adults, LGBTQI+ people, military families, and veterans. For young people, sports can also be a great way to build leadership skills, learn teamwork, forge friendships, and foster mental health.

But too often, obstacles prevent Americans from getting the exercise they need. Less than half of Americans live within a half-mile of a park. Adults who work multiple jobs or take care of family members have less time to pursue an active lifestyle. Low-income families typically have less access to safe streets and playgrounds. Youth sports leagues can be unaffordable, leaving students with few fitness options if their school cuts back on physical education.

No one's health should suffer because exercise opportunities are too expensive or because outdoor spaces are too far away. That is why I released a National Strategy on Hunger, Nutrition, and Health to make America a stronger, healthier Nation. I am also working with the Congress to make outdoor spaces more accessible by increasing the number of parks around our country and expanding opportunities for people to travel to national parks and other public lands. We have partnered with State, local, Tribal, and territorial governments to improve community access to parks and spaces within our communities where people can be physically active. And to encourage a healthy lifestyle for our Nation's kids, my Administration has been working with summer schools and after-school programs to expand physical education opportunities. We've also invested $800 million into communities across the country to help redesign roads and make sidewalks and crosswalks safer for people to walk, bike, and roll. My Administration has also partnered with business, civic, academic, and philanthropic leaders who have committed billions of dollars to take on projects like improving physical education curricula and taking children on trips to national parks.

But we must do more. That is why I launched the White House Challenge to End Hunger and Build Healthy Communities. This initiative encourages all sectors of society to make bold and impactful commitments to offer Americans more opportunities to be physically active in their schools and communities. I also recently announced my upcoming appointments to the

President's Council on Sports, Fitness, and Nutrition, which promotes access to healthy foods and physical activity for all Americans. Those appointees include prominent athletes, anti-hunger and nutrition advocates, health care professionals, and other leaders.

In addition, my Administration continues to support the Centers for Disease Control and Prevention's ''Active People, Healthy Nation'' initiative, which provides local governments, schools, and community organizations with a blueprint to help 27 million Americans become more physically active by 2027. We are also supporting the Department of Health and Human Services' ''Move Your Way'' campaign, which informs Americans about the newest guidance on staying healthy through physical activity.

This month, I encourage all Americans to find ways to be active, whether it is taking a walk or hike, joining a gym, trying a new fitness class, signing up for a local sports team, or registering for a community race. I also call on State, local, Tribal, and territorial governments, as well as business leaders, to make physical activity more accessible to all. When we invest in our health, we foster healthy homes, more productive communities, and a more resilient society for generations to come.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as National Physical Fitness and Sports Month. I call upon the people of the United States to make daily physical activity a priority, to support efforts to increase access to sports opportunities in their communities, and to pursue physical fitness as an essential part of healthy living.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10565 of April 28, 2023

Older Americans Month, 2023

By the President of the United States of America

A Proclamation

On this 60th anniversary of Older Americans Month, we honor our Nation's senior citizens, whose lifetimes of hard work, devotion to family, and commitment to community have laid the foundation for the country we are today. We have a rock-solid responsibility to ensure our Nation's seniors can age with dignity and financial security.

When President John F. Kennedy issued the first proclamation recognizing older Americans, approximately a third of seniors lived in poverty, and close to half were without health insurance. Our Nation rallied together to confront this crisis, passing Medicare to deliver affordable, quality health care to our seniors; strengthening Social Security, the bedrock of American retirement; and ultimately raising so many seniors out of poverty. We extended lifespans and provided critical breathing room to Americans who had worked hard their whole lives. But there is still more work to do to ensure that no senior lies in bed at night wondering how they are going to pay for lifesaving drugs, put food on the table, or support their children and grandchildren.

That is one reason why I signed the Inflation Reduction Act. For those on Medicare, this law caps the cost of insulin at $35 per month and will cap out-of-pocket prescription drug costs at $2,000 per year. That means seniors could save upwards of tens of thousands of dollars on lifesaving drugs—including for cancer, heart disease, Alzheimer's, and more. It also means Americans can get vaccinated for free against shingles, whooping cough, tetanus, and other diseases. And by holding drug companies responsible when they increase prices faster than inflation and finally allowing Medicare to negotiate drug prices, this law is helping bring down prescription drug costs for seniors across our country. Affordable health care is about basic dignity, which is also why I issued an Executive Order calling on the Food and Drug Administration to make hearing aids available over the counter without a prescription. Now, millions of adults with mild-to-moderate hearing loss can save as much as $3,000 per pair by buying hearing aids at a store or online without a prescription.

At the same time, standing by our seniors means honoring our Nation's fundamental promise that when it comes time to retire after working hard and contributing to our economy, Social Security and Medicare will be there for you. I am committed to defending these vital programs—a lifeline for millions of seniors—which is why my newest Budget extends the life of the Medicare Trust Fund by at least 25 years. And I will veto any effort to deny older Americans the benefits they have earned.

We must keep building on this progress. Older Americans should be able to live, work, and participate in their communities with dignity. That's why I recently signed an Executive Order on Increasing Access to High-Quality Care and Supporting Caregivers. I call on the Congress to expand on the investments we have already made to help seniors receive care in their own homes and to support family caregivers—including aging caregivers—and the home care workers who perform selfless work every day. I also call on the Congress to expand access to nutrition counseling for

seniors and others with Medicare coverage, to increase funding for nutrition services for older adults, and to pilot coverage of medically tailored meals in Medicare—actions that are also part of my Administration's National Strategy on Hunger, Nutrition, and Health. We need to improve the quality and safety of nursing homes and protect vulnerable residents and the health care heroes who care for them. And we must keep pushing to end cancer as we know it and win the fight against other deadly diseases that deny us time with those we love most.

Older Americans are the pillars of our community, and we owe it to them to value their wisdom, celebrate their contributions, and champion their well-being. To older Americans across this Nation, we will always support you.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim May 2023 as Older Americans Month. This month and beyond, I call upon all Americans to celebrate older adults for their contributions, support their independence, and recognize their unparalleled value to our Nation.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10566 of April 28, 2023

National Hurricane Preparedness Week, 2023

By the President of the United States of America

A Proclamation

Powerful hurricanes, typhoons, and tropical storms can devastate our communities, threaten the lives of our families, and damage everything we have worked so hard to build. During National Hurricane Preparedness Week, we raise awareness about the hazards posed by hurricanes and share resources to help Americans stay safe and protect their property before these storms make landfall. We also celebrate the remarkable first responders and community members who help rescue, recover, and rebuild in the aftermath of these natural disasters.

During last year's hurricane season, especially in Florida and Puerto Rico, we witnessed the overwhelming damage these storms so often leave in their wake. Families lost their homes. Business owners lost their livelihoods. Survivors were left with unimaginable grief. As the climate crisis intensifies, the impacts of storm surges, flooding, mudslides, and heavy rainfall will only increase, and communities that lack the resources to respond and recover will be hit hardest.

That is one reason why I signed the historic Bipartisan Infrastructure Law, which will keep Americans safer from natural disasters by building stronger roads and bridges, improving levees and floodwalls, and making our power grid more resilient. This law includes over $50 billion to shore up our defenses against flooding and other weather and climate disasters. It provides States with billions of dollars to prepare evacuation routes and improve other at-risk coastal infrastructure. It also invests in community-wide planning to ensure that those most impacted by extreme weather have a voice in preparing for the future.

Our Inflation Reduction Act takes these efforts a step further, making the largest investment in our Nation's history to combat climate change. With historic funding for green manufacturing, clean energy development, and climate-smart agriculture, this law puts us on a path to cut America's greenhouse gas emissions in half by 2030. It gives families tax credits to make their homes more energy efficient, saving money and helping ensure that the power stays on when the grid goes down. And it provides the National Oceanic and Atmospheric Administration with billions of dollars to improve weather forecasting and invest in resilience projects in coastal communities that will help them more easily recover from extreme weather events.

These actions build on our efforts to ensure communities consider climate resilience as they plan for the future—from modernizing building codes so that structures are more protective and less pollutive to harnessing the power of ecosystems like reefs, beaches, and wetlands, which keep us safer during storms.

These bold investments will benefit our communities for years to come. But as we enter another hurricane season, every American can do their part to plan, prepare, and protect their families. Check your insurance policies to ensure they are up to date. Put your important documents in a location where they are easy to find. Know your local evacuation route, and have an emergency kit ready to go. Help increase awareness about the risks among your friends, family, and neighbors. And when storms approach,

pay attention to storm surge and hurricane warnings, and follow the guidance from your local authorities, including guidance about when it is safe to return to affected areas.

As we prepare, we must also remember and honor the courage, kindness, and resilience of our fellow Americans. As President, I have issued dozens of disaster declarations to support the American people wherever they live, and every time, first responders have worked around the clock to save lives and provide food and shelter. Neighbors, community organizations, and faith groups have opened their doors to people in need. Workers have rebuilt homes, schools, and businesses to make them more resilient to future disasters. Scientists have helped communities adapt and remain safe. Families, having often lost everything, have found the strength to move forward. Time and again, in America's most trying moments, we are reminded that we are a great Nation because we are a good people.

This National Hurricane Preparedness Week, let us each recommit to doing our part to help safeguard our families, our communities, and our Nation from these devastating natural disasters.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim April 30 through May 6, 2023, as National Hurricane Preparedness Week. I urge all Americans to help build our climate resilient Nation so that individuals, organizations, and community leaders are empowered to take action to make their communities more resilient to extreme weather and climate change. I call on our Federal, State, Tribal, territorial, and local government agencies to share information that will protect lives and property.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Proclamation 10567 of April 28, 2023

National Small Business Week, 2023

By the President of the United States of America

A Proclamation

From barber shops, beauty salons, and pizza parlors to manufacturing companies and mom-and-pop shops, Americans have applied to form a record 10.5 million small businesses in the past 2 years. This week, we celebrate the backbone of our economy and the glue of our communities: our small businesses, which help make our Nation strong.

Nearly half of all private sector workers in our country are employed by small businesses. These businesses also account for almost half of our Nation's gross domestic product. They create many of the goods and services Americans rely on to sustain their everyday lives. For many families, owning a small business is also the fulfillment of their dreams, their path to a better life, their chance to build a family legacy, and a source of community enrichment. But as so many entrepreneurs know well, success can never be taken for granted.

Success requires access to capital to meet payroll, pay rent, buy inventory, and grow. Small businesses need resilient supply chains so products can get out the door and arrive on time, and they need high-speed Internet to process transactions and connect with customers around the world. They also need the confidence that, when the going gets tough, support is close by.

When companies were shuttering their doors and laying off workers at the height of the COVID–19 pandemic, my Administration delivered a capital infusion of more than $450 billion to the small business sector to keep Main Streets across America operating and employees on the payroll. To create long-term benefits for our economy, I signed the Bipartisan Infrastructure Law, the CHIPS and Science Act, and the Inflation Reduction Act. Together, these new laws are creating billions of dollars in contracting opportunities for America's small businesses and investing hundreds of billions of Federal dollars to rebuild our infrastructure, bring manufacturing back to America, and launch a clean energy revolution right here in the United States.

Our historic investment in semiconductors—the tiny computer chips that power everything from smartphones to cars—will create a manufacturing boom, including for small businesses throughout the semiconductor supply chain. Record funding for clean energy development means small businesses have the opportunity to build electric and other fuel cell vehicles and charging stations. My Administration is committed to investing in America and empowering its small businesses to thrive. I underscored that during my State of the Union Address when I announced new standards that require all construction materials used in these new Federal infrastructure projects to be made in America—ensuring our country's future is built right here at home.

We need to make sure all American small business owners benefit from these investments. That is why I am committed to improving access to capital, contracts, technical expertise, and financial and legal assistance for small business owners from historically underrepresented communities. Through our State Small Business Credit Initiative, States, territories, and Tribal governments are helping small business owners, including socially and economically disadvantaged entrepreneurs, access billions of dollars in loans and investments. The Small Business Administration is revamping its existing loan programs to expand access to small-dollar loans and increase the number of lenders that offer guaranteed loans, both of which can make a major difference for the smallest businesses and minority- and women-owned businesses that may have trouble accessing capital.

One of the first actions taken by my Administration was to make the Minority Business Development Agency a permanent part of the Department of Commerce. In March, I hosted the second annual Women's Small Business Summit at the White House, where I announced the establishment of the largest network of Women's Business Centers ever across America. My Administration has invested nearly $70 million in this network, expanding it to all 50 States for the first time in our history. The centers offer training and mentoring to help women entrepreneurs develop business plans, launch new businesses, and access credit and capital.

Vice President Kamala Harris has convened small business owners and entrepreneurs across our Nation to inform them about the resources, capital, and support we are offering them. Last year she announced the formation of the new Economic Opportunity Coalition, an alliance of private sector companies and nonprofits committing tens of billions of dollars of investments in community financial institutions and small businesses. In April of this year, she and the Deputy Treasury Secretary Wally Adeyemo announced our new $1.73 billion investment in the Community Development Financial Institutions Fund, which provides historically underserved and often low-income communities access to credit, capital, and financial support to grow their businesses.

We are making progress, but I know there is more we can do. I have set a goal to award 15 percent of all Federal contracts to small disadvantaged businesses by 2025, which will bring an estimated additional $100 billion in Federal contracting money to these companies. My new Budget calls for an additional $341 million for the Community Development Financial Institutions Fund, and I am seeking an additional $30 million for the Community Navigators Pilot Program—which we have already supported with $100 million—so that local nonprofits, government agencies, and organizations can help new entrepreneurs navigate the complex paperwork involved in applying for small business loans.

Building an economy from the middle out and bottom up, not the top down, means investing in America's small businesses. It means opening up doors of opportunity for doers, dreamers, and job creators who represent the restless, bold, and optimistic American spirit. When we make these investments and support these innovators, our Main Streets thrive, our families have good-paying jobs, and America's future truly knows no bounds.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim April 30 through May 6, 2023, as National Small Business Week. I call upon all Americans to recognize the contributions of small businesses to the American economy, continue supporting them, and honor the occasion with programs and activities that highlight these important businesses.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Presidential Documents

Proclamation 10568 of April 28, 2023

Law Day, U.S.A., 2023

By the President of the United States of America

A Proclamation

When our Founding Fathers convened to write the Constitution over 235 years ago, they set in motion an experiment that changed the world. America would not be a land of kings but a Nation of laws. Since then, generations of Americans have worked to defend and improve our laws, hold accountable those who break or undermine them, and ensure equal rights and protections for all. On Law Day, we celebrate the rule of law and rededicate ourselves to the pursuit of a more perfect Union.

Our Nation and world are at an inflection point. At home and around the globe, autocrats and dictators threaten the rule of law. Our democracy is under strain, with people's rights, including the sacred right to vote, at risk. We face a choice between moving backward—unravelling so much of the progress our Nation has made—or moving forward toward a future of possibilities and promise.

We must choose to move forward. That is why my Administration is protecting the right to vote—the right from which all others flow, including the power to establish our Nation's laws. Since taking office, I have issued an Executive Order promoting access to voter registration and election information, and signed into law the Electoral Count Reform Act, which establishes clear guidelines for certifying and counting electoral votes to help preserve the will of the people against future attempts to overturn our elections. The Department of Justice has also strengthened its ability to fight unlawful voter suppression in the courts. I continue to call on the Congress to pass the Freedom to Vote Act and the John Lewis Voting Rights Advancement Act to further strengthen our democracy.

Respecting the rule of law also means supporting equal access to justice. My Administration reestablished the Department of Justice's Office for Access to Justice to help ensure that all Americans, regardless of wealth or status, have quality legal aid when they need it and to remove barriers—including language barriers—that prevent people from understanding and navigating the legal system.

We are also working to ensure that hate has no safe harbor in America. I signed the bipartisan COVID–19 Hate Crimes Act into law, making it easier to report hate crimes and helping State, local, and Tribal law enforcement agencies better track these crimes. I secured the largest-ever increase in funding for the physical security of nonprofits, including churches, gurdwaras, mosques, synagogues, temples, and other houses of worship. I convened the first-ever White House Summit on combating hate-fueled violence, bringing together stakeholders from around the country to reaffirm that nobody should fear going to a religious service, wearing a symbol of their faith, or simply being who they are. And I established a new interagency group to counter antisemitism, Islamophobia, and related forms of bias and discrimination within the United States.

The United States is standing up for the rule of law around the world. We will continue to marshal security, humanitarian, and economic support for Ukraine as they defend themselves against Russia's unjust war, which

is also an attack on the bedrock principle of sovereignty. To support democracy worldwide, I cohosted the second Summit for Democracy in March, bringing together government, civil society, and private sector representatives from around the world to promote transparent and accountable governance, democratic resilience, and respect for human rights. We must support free and independent media, fight the corruption that undermines democratic institutions, ensure new technology is used to strengthen democracy, and defend free and fair elections.

The theme of this year's Law Day, ''Cornerstones of Democracy: Civics, Civility, and Collaboration,'' acknowledges that each of us has a role to play in defending democracy and the guardrails that make it possible. It also recognizes that the rule of law depends on us seeing one another not as enemies but as fellow Americans. This great national experiment only works if we respect each other's differences, protect each other's freedoms, and work together to ensure that ''We, the People,'' get to choose our own fate and make our own future.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, in accordance with Public Law 87–20, as amended, do hereby proclaim May 1, 2023, as Law Day, U.S.A. I call upon all Americans to acknowledge the importance of our Nation's legal and judicial systems with appropriate ceremonies and activities and to display the flag of the United States in support of this national observance.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Presidential Documents

Proclamation 10569 of April 28, 2023

Loyalty Day, 2023

By the President of the United States of America

A Proclamation

America was founded on the sacred proposition that we are all created equal; entitled to be treated with dignity and respect; and deserving of equal access to justice, opportunity, and freedom. On Loyalty Day, we rededicate ourselves to delivering that promise of America to all Americans.

We are a Nation that has sought to encourage and inspire loyalty through our actions. We do that by honoring the Constitution, upholding the rule of law, and respecting free and fair elections. As Americans, we are called to unequivocally condemn political violence and hate-motivated attacks; they have no place in our democracy. We must open the doors of opportunity even wider to others because the promise of this country is big enough for everyone to succeed. And we must stand up for truth and resist lies and disinformation that would tear us apart.

Our democracy has endured for generations because Americans have stood together to defend it. That includes brave service members, veterans, and their families, selfless first responders who protect our communities, and hardworking people of all backgrounds who build our Nation and power our prosperity.

''We, the People,'' are the heirs of a big, complicated country unlike any other in the world. Whoever we are and whatever our job, we all have a part to play in sustaining and advancing this great American experiment by being informed citizens, engaged community members, respectful neighbors, and thoughtful patriots.

Today, we remember that America is a covenant requiring constant care and commitment. Let us agree that upholding democracy must never be a partisan issue but rather an American issue. And let us keep the flame of liberty burning in our time as it did for past generations of Americans—through the fight for our independence; the Civil War; the Great Depression; two World Wars; the Civil Rights Movement; and all the sustained struggles of citizens to make America more prosperous, just, and free.

To celebrate our shared American spirit and the sacrifices so many of our fellow citizens have made, the Congress, by Public Law 85–529, as amended, has designated the first day of May each year as Loyalty Day. On this day, let us reaffirm our commitment to the values that bind us together and honor all those who have defended our freedom and ideals.

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, do hereby proclaim May 1, 2023, as Loyalty Day. This Loyalty Day, I call upon the people of the United States to join in this national observance, display the American Flag, and pledge allegiance to our Republic for which it stands.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of April, in the year of our Lord two thousand twenty-three, and of the Independence of the United States of America the two hundred and forty-seventh.

Rules and Regulations

Federal Register
Vol. 88, No. 85
Wednesday, May 3, 2023

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 800

[Doc. No. AMS–FGIS–19–0062]

RIN 0581–AD90

Exceptions to Geographic Boundaries

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule sets forth a process by which applicants for official grain inspection services (applicants) may request a service exception, allowing an official agency (OA) to cross boundary lines and perform services outside of its assigned geographic area. While four exception types are authorized in the United States Grain Standards Act (USGSA or Act), this final rule focuses on two: the inability to provide services in a timely manner and the nonuse of service from the OA assigned to the applicant's geographic area (assigned OA). This final rule establishes a three-tiered system under which applicants can request a one-time, 90-day, or long-term timely service exception due to untimely service issues. This rule provides that nonuse of service exception requests must be preceded by ninety days without service from the assigned OA. This final rule further amends the regulations to provide criteria the Federal Grain Inspection Service (''FGIS'' or ''the Service'') will use to review, validate, and determine whether to grant service exception requests. This final rule also establishes a process that allows an assigned OA to challenge requests for service exceptions. Finally, this rule provides for FGIS review to ensure the validity of requests.

DATES: Effective August 1, 2023.

FOR FURTHER INFORMATION CONTACT: Karla Whalen, Director, Quality Assurance and Compliance Division, Federal Grain Inspection Service, AMS, USDA: telephone: (202) 720–7312, email: *FGISQACD@usda.gov.*

SUPPLEMENTARY INFORMATION: Under the USGSA (7 U.S.C. 71 *et seq.*), each OA that is designated to provide inspection and weighing services in the United States is assigned a specific geographic area where it performs such services for applicants within that geographic area (7 U.S.C. 79(f)(2)(A)). This ensures effective and efficient delivery of official services to applicants within the assigned OA's geographic area and enhances the orderly marketing of grain. The USGSA also provides that applicants may obtain inspection and weighing services from another OA (gaining OA) under certain circumstances. OAs may cross geographic boundaries to provide services to applicants if: (1) the assigned OA is unable to provide inspection services in a timely manner (timely service exception); (2) the applicant has not been receiving official inspection services from the assigned OA (nonuse of service exception); (3) the applicant requests a probe inspection on a barge-lot basis; or (4) the assigned OA agrees in writing with the adjacent OA to waive the current geographic area restriction at the applicant's request (7 U.S.C. 79(f)(2)(B)). The regulations at 7 CFR 800.117 provide further clarification for requesting these exceptions.

Background on the Nonuse of Service Exception

In the past, under a nonuse of service exception, an applicant who had not obtained official inspection or weighing services from the assigned OA for a specified length of time could obtain services from another designated OA. Over time, the procedural variance on whether a request for nonuse of service exceptions was approved or not caused concern for applicants and OAs.

In 2015, Congress eliminated the nonuse of service exception from the USGSA.[1] FGIS subsequently removed that exception provision from the regulations in 2016.[2] As a result, FGIS terminated existing nonuse of service exceptions. However, in 2018, Congress reinstated authority to allow a nonuse of service exception through an amendment to the USGSA in the 2018 Farm Bill.[3] The 2018 Farm Bill directed USDA to allow for restoration of the terminated nonuse of service exceptions, where appropriate. Interested parties were given an opportunity to submit restoration requests to FGIS, as described in a Notice to Trade published on March 5, 2019.[4]

The amended USGSA also provides that the nonuse of service exception may only be terminated if all parties to the exception jointly agree on the termination. This means that the applicant, the assigned OA, the gaining OA, and FGIS must agree to terminate the exception. Such provision ensures all parties are aware of the change and the assigned OA will resume providing service to the applicant.

On April 1, 2020, FGIS published an advanced notice of proposed rulemaking[5] to solicit industry comments on how FGIS should amend its criteria for reviewing, approving, and implementing exceptions to the USGSA's requirements for geographic boundaries. FGIS received responses from six commenters. FGIS sought to incorporate industry feedback from the advanced notice of proposed rulemaking, along with input received during industry meetings, to develop a proposed rule, which was published on August 19, 2021.[6] FGIS requested comment on proposed options for timely service and nonuse of service exceptions. Particularly, FGIS sought input from industry participants, who use, and OAs, who provide, official services and are familiar with grain inspection services under the USGSA. FGIS received comments from four entities. This final rule includes the AMS review and consideration of those comments on this process.

Amended Exception Provisions: Inability To Provide Timely Service

Applicants may request a timely service exception when service is not timely. Service is not timely when the assigned OA cannot provide the requested official services within 6 hours of request or cannot provide the

[5] 85 FR 18155; April 1, 2020.

[6] 86 FR 46606; August 19, 2021.

results and certificate in accordance with 7 CFR 800.160(c). The applicant must submit a request for a timely service exception to FGIS. The applicant may make this request orally or in writing. If the applicant orally requests a timely service exception, the applicant must submit a written request to the Service within two business days after the oral request. The applicant must clearly state and support the identified reason for the requested exception.

Applicants may also request an exception for delays caused by weather events or requests for official services that are not offered by the assigned OA, as they would not be able to offer such services in a timely manner. Thus, for the inability to provide timely service, FGIS intends to grant a timely service exception when: (1) the assigned OA is unable to provide official services to an applicant within 6 hours; (2) or the assigned OA is unable to provide results and certificates in accordance with 7 CFR 800.160(c); or (3) a request for official services not offered by the assigned OA would result in an inability to receive timely service; or (4) a weather event or other short term disruption impacts the ability of an assigned OA to provide timely service; with consideration that granting an exception is in the best interest of the official system.

This final rule implements a tiered application process for requesting exceptions when an assigned OA is unable to provide timely service. The first tier is a one-time, timely service exception. In this instance, a one-time exception to use another official agency (gaining OA) may be allowed for applicants that have a pending service request that meets the timely service exception criteria. The second tier is a 90-day timely service exception due to the assigned OA's inability to provide timely service. If, after the first-tier one-time, timely service exception request is granted, a second instance occurs in which an assigned OA is not able to provide timely service within 180 days of the first instance, the applicant may request a 90-day exception. In this instance, a 90-day exception to use the gaining OA may be allowed. Lastly, the third tier is a long-term timely service exception due to the repeated inability of the assigned OA to provide timely service. If there is another occurrence within 365 days of the applicant's return to the assigned OA after their 90-day timely service exception period has expired, the applicant may request a long-term exception, extending until the termination date of the gaining OA's designation. Along with the required data to support their timely service exception request, the applicants may elect to send any supporting documentation they feel would aid in the agency's determination process. FGIS will then review and verify the accuracy and thoroughness of each package.

If the applicant has an urgent timely service exception request, outside of the Service's customary business hours, an OA from outside the geographic area may provide one-time service. When providing an urgent service, the gaining OA must provide written notification to the Service within two business days after service. Upon returning to official office hours, FGIS will review and verify the circumstances of the urgent request, as well as its consistency with the USGSA and implementing regulations.

For 90-day and long-term timely service exception requests, FGIS will have a determination review period. Once the applicant has provided all required information, FGIS will notify the applicant and begin reviewing the service exception request. FGIS will make every attempt to issue a determination within 15 business days of receipt for 90-day and long-term timely service exceptions, barring a challenge from the assigned OA. To challenge a 90-day or long-term timely exception, the assigned OA must submit the challenge and any supporting documents within 14 calendar days of the date of notification of the exception request. The challenge and supporting documentation must clearly identify the objection to the exception request and support the identified reason for the challenge. While awaiting a final decision on 90-day and long-term timely service exceptions, the applicant may receive service from the potential gaining OA.

FGIS will provide its decision in writing to the assigned OA, the applicant, and the potential gaining OA. The assigned OA may challenge a request for a timely service exception for any reason. To challenge a request for a timely service exception, the assigned OA must object, in writing, and submit the challenge and any supporting documents to FGIS within 14 calendar days.

If an applicant submits a request for a timely service exception that FGIS determines to be false or misleading, FGIS will not grant the exception and may elect to limit the applicant from submitting further requests for a period of up to 180 days. If an urgent request for a timely service exception, outside of customary business hours, was granted on the basis of a false or misleading request, FGIS may deny the applicant from future urgent timely service exceptions for a period of up to 180 days.

The applicant maintains the option of returning to the assigned OA within 60 days of notification of termination of the timely service exception to all parties. The applicant must submit a written notification requesting to terminate the exception to FGIS, the assigned OA and the gaining OA. The exception will be cancelled, and future exception requests must be considered at the beginning of successive-tiered system.

If FGIS determines that the assigned OA's inability to provide a specific service is limited due to weather events or the issue of service availability has been resolved, FGIS, in consultation with all the parties, may terminate the 90-day or long-term exception. If FGIS terminates a timely service exception, the applicant, the assigned OA, and the gaining OA, will be notified in writing, via any written form to include email or autogenerated response, and the applicant will resume service with the assigned OA within 60 days of notification. However, if the existing exception was associated with the assigned OA's inability to provide service in 6 hours or less, or with timely issuance of the results and certificate, FGIS might elect not to terminate the exception. During the duration of exceptions caused by a failure of the assigned OA to supply timely service, this exception period gives assigned OAs an opportunity to improve.

Amended Exception Provisions: Nonuse of Service Exceptions

For nonuse of service exception requests, this rule defines the period of nonuse as 90-days prior to application for a nonuse of service exception. The rule defines areas of inquiry but does not limit factors FGIS will take into consideration when reviewing requests for nonuse of service exceptions. These considerations include: (1) the location of the service need(s); (2) the impact of expanding the applicant/customer base for the gaining OA; (3) the types of services requested by the applicant and offered by the assigned OA; (4) whether the applicant has ever utilized the official system (*i.e.,* a facility that has never used the official system before may not qualify for nonuse of service exception, nor may a facility that is under new ownership by a company with no history of use of the official system); and (5) the impact on the applicant in the event it continues services with the assigned OA.

For a nonuse of service exception request, FGIS intends to grant an exception when: (1) the applicant has

not received service from the assigned OA within the established time period, (2) the applicant submits, to FGIS, its request for a nonuse of service exception, and (3) granting an exception is in the best interest of the official system. FGIS will notify the assigned OA in writing upon receipt of the request for a nonuse of service exception. At the completion of the process, FGIS will issue written notification of the determination on the request to the applicant, the assigned OA, and the gaining OA.

If an applicant submits a request that FGIS determines is false or misleading, FGIS will not grant the nonuse of service exception and may elect to limit the applicant from submitting further requests for a period of up to 180 days.

A nonuse of service exception will remain in place during the period of the gaining OA's designation. At the end of the designation, FGIS will review current information concerning the exception. Unless the applicant, the assigned OA, the gaining OA, and FGIS request to terminate the exception, the FGIS will renew the exception for the gaining OA's new designation period, if applicable. In the event the gaining OA is no longer designated, the exception will automatically terminate, and the applicant will return to the assigned OA. If the applicant transfers ownership of its facility, the exception will automatically terminate, and the new applicant/owner of the facility must request a new nonuse of service exception, if it wishes to receive service from an OA other than the assigned OA for that geographic area. At any point in the designation cycle, if the applicant, the assigned OA, the gaining OA, and FGIS agree to terminate the nonuse of service exception, FGIS will terminate the exception. In this case, the assigned OA must resume service within 60 days of notification.

FGIS recognizes there may be instances where granting an exception may impact the assigned OA. For example, in some cases, the cost of the equipment necessary to provide the requested service is more than the assigned OA would be able to recoup, due to the infrequency of the requests for such a special service. Therefore, as stated in the proposed rule, FGIS is establishing a challenge process for requested nonuse of service exceptions. The timeline for the challenge initiates when FGIS notifies the assigned OA of the requested nonuse of service exception. FGIS will consider factors provided by an assigned OA in such challenge. Requests for a challenge must state and support the identified reason for the challenge. FGIS may request additional documentation to support the challenge.

Comment Summary and Analysis

AMS received a total of four comments on the proposed rule, one from a State department of agriculture OA and three industry associations. While generally supportive, three of the commenters offered suggestions for improving or clarifying processes.

Comment: One commenter expressed support and congratulated FGIS on the overall nature of the proposed rule. The commenter noted that multiple revisions to the OA boundary exception provisions of the USGSA and the FGIS regulations had created uncertainty among both applicants and OAs for some time. The commenter suggested that the proposed rule would accomplish FGIS's goal to create a clear, consistent, and fair framework for considering and granting exceptions for customer needs and offered no concerns or suggestions.

Comment: Comments from two associations recommended additional procedural changes. The commenters urged FGIS to develop a template for submitting exception requests due to an inability to provide timely service and nonuse of service. The commenters stated that the template should outline the necessary information for FGIS to review and process the request, as well as identify the persons at FGIS and the respective OAs that should receive the application. The commenters also suggested that such template should be available online.

Further, the commenters recommended that FGIS and the assigned OA be required to acknowledge receipt of the request and determine, within 12 hours, whether services can be provided by an alternate OA. The commenters noted that although the proposed rule states that an applicant can notify FGIS verbally or in writing to request a service exception, it does not offer an alternative contact in the event the applicant cannot reach a live person. Commenters recommended FGIS provide a secondary contact option. The commenters also recommended that the point of contact at the grain handling facility requesting the service exception should be notified by verbal and written communication regarding the decision on the request.

AMS response: In 2023, FGIS will create a web page with instructions and templates for requesting designation service exceptions due to the inability to provide timely service and nonuse of service. For one-time, timely service exception requests, if the request is made during customary business hours, FGIS will provide its decision that day. FGIS will acknowledge receipt of the request in writing, via any written form to include email or autogenerated response. Notably, the newly designed regulations allow applicants to proceed with one-time urgent timely service exception requests outside of business hours without prior approval from FGIS to avoid a delay in the marketing of grain.

Since urgent timely service exception requests submitted outside of business hours can proceed without prior approval, AMS determined it is not necessary to provide a second point of contact in the regulations. Further, the request template is to be submitted to a group recipient office inbox monitored by multiple staff. FGIS will make every effort to issue its determination for 90-day and long-term timely service exceptions within 15 business days, barring a challenge from the assigned OA. To ensure the applicant's receipt of service is not delayed, it may utilize the potential gaining OA while awaiting a final determination from FGIS.

Regarding exception requests for nonuse of service, AMS has determined not to include a 12-hour response time for such requests because of the 14-day challenge period that has been established for the assigned OA to challenge the exception request and the time required for the FGIS to review the matter. AMS intends to reconcile appropriate FGIS directives in conjunction with the release of this rule. However, AMS has included wording in the regulations that addresses the timeline.

Comment: An association asked AMS to explain, in the final rule or in the FGIS Directive, who within the agency is responsible for reviewing exception applications and whether applications would be reviewed by more than one office.

AMS response: 7 CFR 800.0(b) clarifies that the Federal Grain Inspection Service is referred to in the regulations as the ''Service.'' The Service administers the regulations pertaining to Federal grain inspection, including those established by this final rule. The request template will not further define the FGIS representative responsible for receiving these requests as FGIS organizational structure and staffing responsibilities can change rapidly. This also ensures no undue external pressure is placed on an individual staff member while allowing for AMS executives to be consulted and apprised of individual situations. FGIS may have other offices involved in decision making, as appropriate. FGIS

contact information is available on the FGIS website.

Comment: An association commented that, in some cases, an assigned OA can be delayed in providing timely service due to weather conditions over which it has no control. The commenter recommended that FGIS take this factor into consideration and ''not penalize the OA if there is another request from the same grain handling facility for a different reason.''

AMS response: FGIS acknowledges that some situations requiring timely service exceptions may be temporary and out of the control of the assigned OA. Accordingly, FGIS will consider relevant factors related to the reason(s) for the inability to provide timely service during the decision-making process. As stated in the proposed rule, the long-term exceptions may be cancelled by FGIS, in consultation with the parties, if the issue that caused the lack of timely service has been addressed.

Comment: A commenter recommended that nonuse of service exceptions should be strictly limited to situations where the OA is unable to provide the service requested by the facility in a timely manner. The commenter asserted that allowing the requesting facility to receive a nonuse of service exception for the sake of convenience or other arbitrary or subjective reasons undermines the integrity of the grain inspection system, as well as the purpose behind the designated geographic boundaries. The comment supported adding a challenge process to review newly requested and previously issued nonuse of service exceptions. This commenter provided specific situational details regarding four elevators.

AMS response: FGIS concurs that requests for exceptions should be evidence-based and provide the assigned OA an opportunity to demonstrate the ability to deliver timely service. The process takes this need into account through a variety of factors in the revised evaluation criteria that governs how exception requests will be determined. Regarding the commenter's reference to the four applicants that elected to return to out-of-State service providers, those applicants were allowed to revert back to those service providers based on their previously approved nonuse of service exceptions that were reinstated in accordance with amendments to the USGSA.

Comment: A State department of agriculture comment suggested AMS further clarify the definition of ''period of nonuse as 90 days'' in the proposed rule. The commenter also asked AMS to specify what factor determines the start of the 90-day period. The comment further suggested that 120 days would be a more reasonable period for defining nonuse, explaining that 120 days would give the assigned OAs sufficient time to resolve staffing or equipment deficiencies, which, according to the comment, have become more challenging in the last 18 months.

AMS response: FGIS will require an applicant to demonstrate, through documentation, the last date of official inspection service from the assigned OA. FGIS also believes that a period of 90 days nonuse is reasonable and sufficient for establishing a period of nonuse, prior to submission of a nonuse of service exception request and accounting for review time. As a point of reference, the proposed rule stated that the feedback on the number of days without official service (for nonuse of service exceptions) had a wide range, from 30 to 180 days. As stated in the advanced notice of proposed rulemaking, prior ranges allowed were between 90 to 180 days in length. A period of 90 days is within timeframes used for the nonuse of service exceptions in the past and is a compromise based on timeframes suggested in the public comments. FGIS also considered that during the time it takes FGIS to review the request, the applicant must continue with nonuse of service, so the period of nonuse will extend beyond the applicant's original 90 days of nonuse. Due to the strictly defined timely service exceptions criteria, FGIS believes most applicant issues will be satisfied under that category. Allowing this full nonuse of service time period enables the assigned OA additional time to work out any service difficulty with its customer. Applicant requests that meet the requirements of timely service exceptions, may be handled under the timely service exception tiers.

Executive Orders 12866 and 13563

Executive Orders 12866—Regulatory Planning and Review, and 13563—Improving Regulation and Regulatory Review, direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits of reducing costs, harmonizing rules, and promoting flexibility.

This action has been determined to be not significant for the purposes of Executive Order 12866, as supplemented by Executive Order 13563. The final rule is not expected to create any new material costs for industry.

Baseline

Under the USGSA, the USDA regulates the inspection of barley, canola, corn, flaxseed, mixed grain, oats, rye, sorghum, soybeans, sunflower seed, triticale, and wheat. This rule impacts the 41 OAs that provide USDA-regulated grain certification and the over 5,000 commercial entities they serve. In FY2021, OAs performed 3,150,029 grain inspections of 257.8 million metric tons of grain. Based on current data, FGIS expects fewer than one percent of the entities served by OAs to request and be granted exceptions under the two types of exceptions detailed in this rule.

Official inspection costs represent a very small percentage of the total value of grain shipments. In 2021, FGIS calculated the weighted average costs for inspections for different carriers as follows: $18.68 for a semi-truck capable of carrying 58,000 pounds, $30.75 for a railcar capable of carrying 220,000 pounds, and $316.90 for a barge capable of carrying 3,000,000 pounds of grain. For example, if the price of wheat was $8 for a 60-pound bushel, the cost of the inspection would represent 0.24% of the revenue for a truck load, 0.11% of the revenue for a railcar load, and 0.08% of the revenue for a barge load of wheat.

Need for the Rule

Federally regulated grain inspection is designed to remedy two competing sources of market failure—asymmetric information and market power—while preserving the ability of small producers to access markets. This rule increases the flexibility of the existing inspection program without affecting the program's quality standards or the ability of small sellers to access inspection services. The rule's greater flexibility in allowing producers to obtain inspection services, however, will save costs and provide them greater ability to meet potential market opportunities and inspection challenges.

Many agricultural products, including grain, vary in important quality characteristics due to both farm production decisions and idiosyncratic factors. In the absence of a quality verification process, sellers in a transaction may have more knowledge of a product's quality than buyers, a condition called asymmetric

information. Akerlof (1978) showed asymmetric information can cause economic inefficiencies in which producers forego investments that are less costly to implement than the benefit they provide consumers.[7] Third-party inspection that verifies a product's quality resolves this source of market failure.

Grain inspectors certify the protein content, kernel size, and other quality factors related to product's market value to simplify transactions. Since the outcome of grain inspections directly affects the sale price, biases and inconsistences in inspection methods might potentially redistribute the gains to trade from seller to buyer, or vice versa. Market power might exacerbate biases and inconsistencies if, for instance, large sellers or buyers can influence the outcome of quality inspections in their favor. In addition to fairness concerns, such opportunistic behavior creates economic inefficiencies by reducing the returns on investment in quality improvement and creating costs for downstream producers (*i.e.,* bakers and food processors) expecting products of certain quality.

Domestic grain inspection is an optional service. When information asymmetries are a concern, inspection facilitates simpler, more rapid, and less risky transaction of final product. By allowing producers to recoup the costs of quality improvement, grain inspection also encourages investment in quality improvement.

Under its regulatory authority, the USDA approves grain inspection standards and monitors their uniform application by OAs in a variety of ways, including inspection sample review, fee schedule approvals, and periodic OA audits. To promote a competitive market for grain in which all producers have access to inspection services, FGIS requires that OAs provide inspection services to all producers in an assigned area and regulates marketing fee schedules charged by OAs for these services. FGIS approves rates to cover various labor, laboratory, and travel costs and only approves differential rates across geographic areas if the underlying costs differ across assigned regions. For this reason, FGIS does not expect this rule to impact the price paid by inspection users or the fees received by OAs. Instead, FGIS expects this rule will allow the small fraction of inspection users who need timely service and nonuse of service exceptions greater flexibility in obtaining inspections services to meet immediate business requirements.

Benefits and Costs of the Rule

FGIS assesses the economic benefits of this rule as being three-fold. First, the rule provides clarity to grain inspection applicants (*e.g.,* producers, elevators, merchandisers, etc.), as well as OAs, regarding the terms under which exceptions are granted. Second, the rule increases the options to producers, elevators, merchandisers, etc., who require inspection services to market their grain. FGIS expects that this option will be utilized by fewer than one percent of applicants who need inspections services, quickly, but face service constraints by OAs. Third, the rule may heighten attention to service issues among OAs that have received nonuse of service exception requests. The validation process FGIS will establish and maintain to review all exception requests will ensure all granted requests are in the best interest of the official system and confirm an exception will not undermine the congressional policies in Sec. 2 of the USGSA. OAs may offer additional services, such as a broader range of testing, as a result.

FGIS does not ascribe any direct compliance costs to either OAs or producers as a result of the potential increase for timely service and nonuse of service exceptions under this rule. FGIS does not expect that the inspection fees it approves will change as a result of this rule. To the extent that this rule provides greater flexibility to how applicants can obtain inspection services, it will provide improved services or reduce total costs to producers by, for instance, allowing those needing immediate inspections to get them from an OA other than the one to which they are assigned. Moreover, FGIS does not believe the rule will create significant indirect costs, aside from the minor costs to market participants learning the rule and documenting exception requests.

To the extent that some OAs conduct fewer inspections because applicants in their assigned area have requested more exceptions, other OAs will conduct more inspections. FGIS believes that any business losses to an OA will be small and that any losses will be offset by gains to other OAs. This rearrangement of business activity constitutes a transfer of benefits from one OA to another and has a neutral effect on total costs and benefits of the rule.

To summarize, FGIS believes that the total impact of the rule on the grain inspection industry is not economically significant and that the benefits of this rule exceed its costs, which are negligible.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires agencies to consider the impact of their rules on small entities and to evaluate alternatives that would accomplish the objectives of the rule without unduly burdening small entities when the rules impose a significant economic impact on a substantial number of small entities. This rule has an economic impact on farms selling grain that require inspections (classified under North American Industry Classification System, or NAICS, codes 111110, 111120, 111130, 111140, 111150, 111191, 111160, 111191, and 111199), grain elevators and grain certifiers that conduct post-harvest crop activities (NAICS code 115114) and either require or perform inspections. The Small Business Administration considers grain farms to be small if their sales are less than $1 million and grain elevators and grain certifiers (OAs) to be small if their sales are less than $30 million (13 CFR 121.201).

The AMS Administrator certifies that this rule does not have a significant economic impact on small businesses. This determination is made based on the expectation that any small entities requiring grain inspection, including grain farms and grain elevators, or entities performing grain inspection, including OAs, will see neither a change in prices paid or fees charged nor a loss in access to inspection services or change in territorial boundaries for which they can perform inspections. Further, FGIS believes the new challenge process addresses the concern that some small OAs may lose economic viability when exceptions are granted to applicants under the exceptions to geographic boundary requirement. Finally, AMS does not believe that OAs qualifying as small business will be any more likely to be subject to exception requests than those OAs not qualifying as small businesses.

Executive Order 12988

This rule has been reviewed under Executive Order 12988—Civil Justice Reform. This rule is not intended to have retroactive effect. The USGSA provides in sec. 87g that no State or subdivision thereof may require or impose any requirements or restrictions concerning the inspection, weighing, or description of grain under the Act.

This rule will not preempt any State or local laws, regulations, or policies,

[7] Akerlof, George A. ''The market for ''lemons'': Quality uncertainty and the market mechanism.'' *Uncertainty in economics.* Academic Press, 1978. 235–251.

unless they represent an irreconcilable conflict with this rule. No administrative proceedings would be required before parties could file suit in court challenging the provisions of this rule.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. Executive Order 13175 requires Federal agencies to consult and coordinate with Tribes on a government-to-government basis on: (1) Policies that have Tribal implications, including regulations, legislative comments or proposed legislation; and (2) other policy statements or actions that have substantial direct effects on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

AMS has assessed the impact of this rule on Indian Tribes and determined that this rule will not have Tribal implications that require consultation under Executive Order 13175. AMS hosts a quarterly teleconference with Tribal leaders where matters of mutual interest regarding the marketing of agricultural products are discussed. Information about the proposed changes was shared during the quarterly call on July 22, 2021, and Tribal leaders were informed about the proposed revisions to the regulation and the opportunity to submit comments. AMS received no questions or requests for additional information or outreach. If requested, AMS will provide additional support and information.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this final rule as not a major rule as defined by 5 U.S.C. 804(2).

Paperwork Reduction Act and E-Government Act

In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), there are no information collection and record keeping requirements implications associated with this rule. Should any changes become necessary, they will be submitted to OMB for approval.

USDA is committed to complying with the E-Government Act (44 U.S.C. 3601 *et seq.*) by promoting the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects in 7 CFR Part 800

Administrative practice and procedure, Exports, Grains, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, AMS amends 7 CFR part 800 as follows:

PART 800—GENERAL REGULATIONS

■ 1. The authority citation for part 800 continues to read as follows:

Authority: 7 U.S.C. 71–87k.

■ 2. Amend § 800.117 by:
■ a. Adding paragraph (b) introductory text;
■ b. Revising paragraph (b)(1);
■ c. Redesignating paragraphs (b)(2) and (3) as paragraphs (b)(3) and (4), respectively; and
■ d. Adding a new paragraph (b)(2).

The additions and revisions read as follows:

§ 800.117 Who shall perform original services.

* * * * *

(b) *Exceptions for official agencies to provide service.* Under an exception, an official agency may provide service to an applicant outside of their geographic area. The Service may grant exceptions in instances when: the assigned official agency is unable to provide inspection services in a timely manner; a person requesting inspection services in that geographic area has not been receiving official inspection services from the official agency for that geographic area; a person requesting inspection services in that geographic area requests a probe inspection on a barge-lot basis; or, the assigned official agency for that geographic area agrees in writing with the adjacent official agency to waive the current geographic area restriction at the request of the applicant for service. Excluding requests for probe inspections on a barge-lot basis, applicants requesting an exception must submit requests for a service exception to the Service.

(1) *Timely service.* Service is not timely when an official agency cannot provide the requested official services within 6 hours or cannot provide the results and certificate in accordance with § 800.160(c). Timely service exception requests will also be considered for delays caused by weather events or for official services that the assigned official agency does not offer. The applicant must submit a request for a timely service exception to the Service. The applicant may make this request orally or in writing. If the applicant requests a timely service exception orally, the applicant must submit a written request to the Service within two business days of the request. The applicant must clearly state and support the identified reason for the requested timely service exception. There are three consecutive tiers of timely service exceptions: one-time, 90-day, and long-term. Applicants requesting 90-day or long-term timely service exceptions must progress through each previous tier sequentially. The Service will review timely service exception requests and may contact the applicant, the assigned official agency, or potential gaining official agency with questions during its review.

(i) *One-time.* In the case of an assigned official agency's inability to provide timely service, an applicant may be granted a one-time approval to use another official agency for the associated pending service request, as applicable.

(A) For one-time, timely service exception requests, if the request is made during customary business hours, the Service will provide its decision that day.

(B) If the applicant has an urgent timely service exception request, outside of the Service's customary business hours, an official agency from outside the geographic area may provide one-time service. When providing an urgent service, the gaining official agency must provide written notification to the Service within two business days after service.

(C) Upon returning to official office hours, the Service will review and verify the circumstances of the urgent request, as well as its consistency with the U.S. Grain Standards Act and implementing regulations.

(ii) *90-day.* If there is an occurrence of untimely service within 180 days of the date of the occurrence in paragraph (b)(1)(i) of this section, the applicant may request a 90-day timely service exception. This 90-day window will begin the day the exception is granted.

(iii) *Long-term.* If there is an occurrence of untimely service within 365 days after the applicant's return to service with the assigned official agency, following an exception granted under paragraph (b)(1)(ii) of this section, the applicant may request a long-term timely service exception. When granting this exception, the Service may continue the exception up to the date on which the gaining official agency's designation terminates.

(iv) *Supporting documentation.* The applicant must submit a request for a timely service exception to the Service.

This request may include any associated supporting documentation the applicant feels is warranted. After receipt of the request, the Service will provide the applicant, assigned official agency, and potential gaining official agency an opportunity to submit any additional information in support of the timely service exception request in writing. The Service will request additional information, if needed.

(v) *Review and verification.* Except as provided in paragraph (b)(1)(i) of this section, prior to granting a timely service exception, the Service must review and verify information submitted with the request. When a timely service exception request is received, the Service will issue a written notification to acknowledge the receipt of the request to the applicant, the assigned official agency, and the potential gaining official agency. When possible, the Service should also attempt to make oral contact.

(vi) *Timeline.* Once the applicant's request is received, the Service will notify the applicant and begin the review timeline. The Service will issue a determination within 15 business days for 90-day and long-term timely service exceptions, barring a challenge from the assigned official agency. While awaiting a final decision on 90-day and long-term timely service exceptions, the applicant may receive service from the potential gaining official agency.

(vii) *Notification.* The Service must notify the assigned official agency in writing upon receipt of the request for a timely service exception. At the completion of the request review process, the Service will issue written notification of the determination on the request to the applicant, the assigned official agency, and the gaining official agency. When possible, the Service should also attempt to make oral contact.

(viii) *Challenge.* The assigned official agency may challenge a request for a timely service exception for any reason. To challenge a request for a timely service exception, the assigned official agency must object, in writing, and submit the challenge and any supporting documents to the Service.

(A) Given the urgency of a one-time service request, if the assigned official agency wishes to challenge the request, it must be done in a manner which does not further delay the applicant from receiving the pending service. If the one-time timely service exception has already been granted or used, the assigned official agency may still challenge the Service's determination within 14 calendar days.

(B) To challenge a 90-day or long-term timely service exception, the assigned official agency must submit the challenge and any supporting documents within 14 calendar days of the date of notification of the timely service exception request. The documents must clearly identify the objection and support the identified reason for the challenge.

(ix) *Determination.* In the event the Service determines that the assigned official agency is unable to provide official services in a timely manner, the Service will grant a timely service exception.

(x) *False or misleading requests.* If an applicant submits a request for a timely service exception that the Service determines to be false or misleading, the Service will not grant the exception and may elect to limit the applicant from submitting further requests for a period of up to 180 days. If an urgent request for a timely service exception, outside of customary business hours, was granted on the basis of a false or misleading request, the Service may deny the applicant from future timely service exceptions for a period of up to 180 days.

(xi) *Return to the assigned official agency.* The applicant maintains the option of returning to the assigned official agency within 60 days of notification of termination of the timely service exception to all parties. The applicant must submit a written notification requesting to terminate the timely service exception to the Service, the assigned official agency and the gaining official agency. The timely service exception will be cancelled, and future timely service exception requests must be considered at the beginning of successive-tiered system.

(xii) *Termination.* If the Service determines the assigned official agency's inability to provide a specific service was limited due to weather events or for official services that the assigned official agency does (did) not offer, the cause of which has been resolved, the Service, in consultation with all the parties, may terminate the 90-day or long-term timely service exception. However, if the timely service exception was associated with the official agency's inability to provide service in 6 hours or less, or with its failure to issue the results and certificate in a timely manner, then the Service might elect not to terminate the timely service exception. The Service must notify the applicant, the assigned official agency, and the potential gaining official agency of all timely service exception termination decisions in writing. The assigned official agency must resume service within 60 days of notification.

(2) *Nonuse of service exception.* If an applicant has not received official inspection services from the assigned official agency within the last 90 days, the applicant may request, in writing, a nonuse of service exception. Periods of nonuse resulting from timely service exceptions will not qualify as part of a period of nonuse.

(i) *Supporting documentation.* Along with the request for an exception, the applicant must submit supporting documentation pursuant to paragraph (b)(2)(i)(A) of this section and may submit any additional supporting material the applicant wishes to submit to the Service. After receipt of the request, the Service will provide the applicant, assigned official agency, and potential gaining official agency an opportunity to submit any additional information in writing. The Service will request additional information, if needed.

(A) *Required information.* The applicant's request for a nonuse of service exception must include the following information:

(*1*) The last date of service from the assigned official agency;

(*2*) The reason service has not been received during this time frame; and

(*3*) The identified reason for the request.

(B) *Additional relevant information.* Applicants may submit any additional relevant supporting information. This may include, but is not limited to:

(*1*) The location of the specified service need(s);

(*2*) The types of services requested by the applicant and offered by the assigned official agency;

(*3*) The ability of the assigned official agency to provide the requested service;

(*4*) Whether the applicant's facility has ever used the official system; and

(*5*) The impact on the applicant in the event it continues with the assigned official agency.

(ii) *Review and verification.* The Service will review the request for a nonuse of service exception and supporting documentation, then conduct any necessary analysis to estimate the exception's impact prior to making a determination, as defined in paragraph (b)(2)(vi) of this section. When the Service receives a nonuse of service exception request, the Service will issue a written notification to acknowledge the receipt of the request to the applicant, the assigned official agency, and the potential gaining official agency.

(iii) *Timeline.* The Service will make every attempt to complete the

determination process in a timely manner, during which the applicant must continue with nonuse of service. This time period will include the allotted 14 calendar days in which the assigned official agency may challenge the request. The Service may extend the determination timeline when necessary.

(iv) *Notification.* The Service must notify the assigned official agency in writing upon receipt of the request for a nonuse of service exception. At the completion of the process, the Service will issue written notification of the determination on the request to the applicant, the assigned official agency, and the gaining official agency. When possible, the Service should also attempt to make oral contact.

(v) *Challenge.* The assigned official agency may challenge a request for a nonuse of service exception for any reason. To challenge a nonuse of service exception, the assigned official agency must object in writing and must submit the challenge and any supporting documentation to the Service within 14 calendar days from the date of notification from the Service of receipt of the request for a nonuse of service exception for the applicant. The documents must clearly identify the objection and support the identified reason for the challenge.

(vi) *Determination.* The Service will consider impacts on the applicant, the assigned official agency, and the potential gaining official agency when deciding whether to grant a nonuse of service exception. These impacts may include, but are not limited to, the viability of the assigned official agency given the loss of business. The Service will also consider the impact on the official system and confirm a nonuse of service exception will not undermine the congressional policies in section 2 of the United States Grain Standards Act. The Service will provide its decision, in writing, to the applicant, the assigned official agency, and the potential gaining official agency. If approved, the applicant can receive service from either the originally assigned official agency or the gaining official agency.

(vii) *False or misleading requests.* If an applicant submits a request that the Service determines is false or misleading, the Service will not grant the nonuse of service exception and may elect to limit the applicant from submitting further requests for a period of up to 180 days.

(viii) *Renewal or termination of exception.* The nonuse of service exception is for the period of the gaining official agency's designation. At the end of the designation, the Service will review the nonuse if service exception and verify the information. Unless the applicant, the assigned official agency, the gaining official agency, and the Service all agree to terminate the nonuse of service exception, the Service will renew the nonuse of service exception for the gaining official agency's new designation period. In the event the gaining official agency is no longer designated, the nonuse of service exception will automatically terminate, and the applicant will return to the assigned official agency. If the applicant transfers ownership of its facility, the nonuse of service exception will automatically terminate, and the new applicant/owner of the facility must request a new nonuse of service exception to receive service from an official agency other than the assigned official agency for that geographic area. At any point in the designation cycle, if the applicant, the assigned official agency, the gaining official agency, and FGIS jointly agree to terminate nonuse of service exception in writing, the Service will terminate the exception. In this case, the assigned official agency must resume service within 60 days of notification that the nonuse of service exception has been terminated.

(ix) *Historic exceptions.* All nonuse of service exceptions that were in place as of March 30, 2019, and that are currently active as of the date of effectuation of this rule, are incorporated within the list of active nonuse of service exceptions.

BILLING CODE P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 52

[NRC–2020–0245]

Regulatory Guide: Environmental Qualification of Certain Electric Equipment Important to Safety for Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Final guide; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing Revision 2 to Regulatory Guide (RG) 1.89, ''Environmental Qualification of Certain Electric Equipment Important to Safety for Nuclear Power Plants.'' RG 1.89, Revision 2 provides guidance that the staff of the NRC considers acceptable to meet regulatory requirements for environmental qualification (EQ) of certain electric equipment important to safety.

DATES: Revision 2 to RG 1.89 is available on May 3, 2023.

ADDRESSES: Please refer to Docket ID NRC–2020–0245 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2020–0245. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's Public Document Room (PDR), Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

Revision 2 to RG 1.89 and the regulatory analysis may be found in ADAMS under Accession Nos. ML22272A602 and ML20192A230, respectively.

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.

FOR FURTHER INFORMATION CONTACT: Michael Eudy, Office of Nuclear Regulatory Research, telephone: 301–415–3104; email: *Michael.Eudy@nrc.gov* and Matthew McConnell, Office of Nuclear Reactor Regulation, telephone: 301–415–1597; email:

Matthew.McConnell@nrc.gov. Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Discussion

The NRC is issuing a revision in the NRC's ''Regulatory Guide'' series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

Revision 2 to RG 1.89 was issued with a temporary identification of Draft Regulatory Guide, DG–1361 (ADAMS Accession No. ML20183A423).

The staff revised RG 1.89 to endorse, with clarifications, exceptions, and supplements, International Electrotechnical Commission/Institute of Electrical and Electronic Engineers Standard 60780–323, ''Nuclear Facilities—Electrical Equipment Important to Safety—Qualification,'' Edition 1, 2016–02, as this standard reflects almost 40 years of experience gained in implementing regulatory requirements and industry research and testing related to environmental qualification (EQ). Nuclear plant license renewal provides additional motivation for continuing attention to equipment qualification. This revised guide contains information specific for EQ for both older plants and newer reactors licensed under parts 50 and 52 of title 10 of the *Code of Federal Regulations* (10 CFR).

II. Additional Information

The NRC published notices of the availability of DG–1361 in the **Federal Register** on December 17, 2020 (85 FR 81958) and February 18, 2021 (86 FR 10133) for 60-day public comment periods. The public comment periods closed on February 16, 2021, and April 19, 2021, respectively. Public comments on DG–1361 and the staff responses to the public comments are available under ADAMS under Accession No. ML22272A601.

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the ''Rules'' section of the **Federal Register** to comply with publication requirements under 1 CFR chapter I.

III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801–808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

IV. Backfitting, Forward Fitting, and Issue Finality

Issuance of RG 1.89, Revision 2, does not constitute backfitting as defined in 10 CFR 50.109, ''Backfitting,'' and as described in NRC Management Directive (MD) 8.4, ''Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests''; affect the issue finality of an approval issued under 10 CFR part 52; or constitute forward fitting as defined in MD 8.4 because, as explained in this RG, licensees are not required to comply with the positions set forth in this RG.

V. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at *https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html.* Suggestions will be considered in future updates and enhancements to the ''Regulatory Guide'' series.

Dated: April 28, 2023.

For the Nuclear Regulatory Commission.

Meraj Rahimi,

Chief, Regulatory Guide and Programs Management Branch, Division of Engineering, Office of Nuclear Regulatory Research.

BILLING CODE 7590–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 510, 516, 520, 522, 524, 526, 529, 556, and 558

[Docket No. FDA–2023–N–0002]

New Animal Drugs; Approval of New Animal Drug Applications; Withdrawal of Approval of New Animal Drug Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendments.

SUMMARY: The Food and Drug Administration (FDA or we) is amending the animal drug regulations to reflect application-related actions for new animal drug applications (NADAs), abbreviated new animal drug applications (ANADAs), and conditionally approved new animal drug applications (cNADAs) during January, February, and March 2023. FDA is informing the public of the availability of summaries of the basis of approval and of environmental review documents, where applicable. The animal drug regulations are also being amended to improve their accuracy and readability.

DATES: This rule is effective May 3, 2023.

FOR FURTHER INFORMATION CONTACT: George K. Haibel, Center for Veterinary Medicine (HFV–6), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 240–402–5689, *george.haibel@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Approvals

FDA is amending the animal drug regulations to reflect approval actions for NADAs, ANADAs, and cNADAs during January, February, and March 2023, as listed in table 1. In addition, FDA is informing the public of the availability, where applicable, of documentation of environmental review required under the National Environmental Policy Act (NEPA) and, for actions requiring review of safety or effectiveness data, summaries of the basis of approval (FOI Summaries) under the Freedom of Information Act (FOIA). These public documents may be seen in the office of the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500. Persons with access to the internet may obtain these documents at the CVM FOIA Electronic Reading Room: *https://www.fda.gov/about-fda/center-veterinary-medicine/cvm-foia-electronic-reading-room.* Marketing exclusivity and patent information may be accessed in FDA's publication, Approved Animal Drug Products Online (Green Book) at: *https://www.fda.gov/animal-veterinary/products/approved-animal-drug-products-green-book.*

TABLE 1—ORIGINAL AND SUPPLEMENTAL NADAS, ANADAS, AND CNADAS APPROVED DURING JANUARY, FEBRUARY, AND MARCH 2023 REQUIRING EVIDENCE OF SAFETY AND/OR EFFECTIVENESS

Approval date	File No.	Sponsor	Product name	Effect of the action	Public documents	21 CFR section
January 5, 2023	200–732	Felix Pharmaceuticals Pvt. Ltd., 25–28 North Wall Quay, Dublin 1, Ireland.	Carprofen Tablets (carprofen tablets) Caplets.	Original approval for the relief of pain and inflammation associated with osteoarthritis and for the control of postoperative pain associated with soft tissue and orthopedic surgeries in dogs as a generic copy of NADA 141–053.	FOI Summary	520.304
January 11, 2023	200–611	Akorn Operating Company LLC, 5605 Centerpoint Ct., Suite A, Gurnee, IL 60031.	DETOMISED (detomidine hydrochloride) Injectable Solution.	Original approval as a sedative and analgesic to facilitate minor surgical and diagnostic procedures in horses as a generic copy of NADA 140–862.	FOI Summary	522.536
January 11, 2023	200–738	Aurora Pharmaceutical, Inc., 1196 Highway 3 South, Northfield, MN 55057–3009.	DECTOGARD (doramectin topical solution) Topical Solution.	Original approval for treatment and control of internal and external parasites of cattle as a generic copy of NADA 141–095.	FOI Summary	524.770
January 12, 2023	141–426	Intervet, Inc., 2 Giralda Farms, Madison, NJ 07940.	BRAVECTO (fluralaner) Chewable tablets.	Supplemental approval for the treatment and control of Asian long horned tick infestations for 12 weeks in dogs and puppies.	FOI Summary	520.998
January 12, 2023	200–721	Norbrook Laboratories Ltd., Carnbane Industrial Estate, Newry, County Down, BT35 6QQ, United Kingdom.	MIDAMOX for Cats (imidacloprid and moxidectin) Topical Solution.	Supplemental approval for prevention of heartworm disease and treatment of flea infestations in ferrets as a generic copy of NADA 141–254.	FOI Summary	524.1146
January 12, 2023	200–733	Felix Pharmaceuticals Pvt. Ltd., 25–28 North Wall Quay, Dublin 1, Ireland.	Marbofloxacin Chewable Tablets (marbofloxacin).	Original approval for treatment of infections in dogs and cats associated with bacteria susceptible to marbofloxacin as a generic copy of NADA 141–151.	FOI Summary	520.1310
January 12, 2023	200–734	Do	Praziquantel Tablets (praziquantel).	Original approval for removal or removal and control of certain canine tapeworms as a generic copy of NADA 111–798.	FOI Summary	520.1870
January 13, 2023	200–735	ZyVet Animal Health, Inc., 73 Route 31N, Pennington, NJ 08534.	Dexmedetomidine Hydrochloride (dexmedetomidine hydrochloride) Injectable Solution.	Original approval for use as a sedative, analgesic, and preanesthetic in dogs and cats as a generic copy of NADA 141–267.	FOI Summary	522.558
January 13, 2023	200–736	Do	Marbofloxacin Tablets (marbofloxacin).	Original approval for treatment of infections in dogs and cats associated with bacteria susceptible to marbofloxacin as a generic copy of NADA 141–151.	FOI Summary	520.1310
February 2, 2023	200–737	Do	Enrofloxacin (enrofloxacin) Flavored Antimicrobial Tablets.	Original approval for the management of diseases associated with bacteria susceptible to enrofloxacin in dogs and cats as a generic copy of NADA 140–441.	FOI Summary	520.812
February 2, 2023	200–739	Do	Carprofen (carprofen) Chewable Tablets.	Original approval for the relief of pain and inflammation associated with osteoarthritis and for the control of postoperative pain associated with soft tissue and orthopedic surgeries in dogs as a generic copy of NADA 141–111.	FOI Summary	520.304
February 9, 2023	200–701	Chanelle Pharmaceuticals Manufacturing Ltd., Loughrea, County Galway, Ireland.	PARASEDGE Multi for Cats (imidacloprid and moxidectin) Topical Solution.	Supplemental approval for prevention of heartworm disease and treatment of flea infestations in ferrets as a generic copy of NADA 141–254.	FOI Summary	524.1146

TABLE 1—ORIGINAL AND SUPPLEMENTAL NADAS, ANADAS, AND CNADAS APPROVED DURING JANUARY, FEBRUARY, AND MARCH 2023 REQUIRING EVIDENCE OF SAFETY AND/OR EFFECTIVENESS—Continued

Approval date	File No.	Sponsor	Product name	Effect of the action	Public documents	21 CFR section
February 24, 2023	200–741	Aurora Pharmaceutical, Inc., 1196 Highway 3 South, Northfield, MN 55057–3009.	EPRIGARD (eprinomectin) Topical Solution.	Original approval for treatment and control of internal and external parasites in cattle as a generic copy of NADA 141–079.	FOI Summary	524.814
March 21, 2023	200–743	Provetica LLC, 8735 Rosehill Rd., Suite 300, Lenexa, KS 66215.	MODULIS for Dogs (cyclosporine oral solution) USP MODIFIED.	Original approval for the control of atopic dermatitis in dogs as a generic copy of NADA 141–218.	FOI Summary	520.522
March 21, 2023	200–745	Parnell Technologies Pty. Ltd., Unit 4, 476 Gardeners Rd., Alexandria, New South Wales 2015, Australia.	RESPIRMYCIN 25 (tulathromycin injection) Injectable Solution.	Original approval for the treatment of respiratory disease in swine and calves as a generic copy of NADA 141–349.	FOI Summary	522.2630
March 29, 2023	200–744	Provetica LLC, 8735 Rosehill Rd., Suite 300, Lenexa, KS 66215.	MODULIS for Cats (cyclosporine oral solution) USP MODIFIED.	Original approval for the control of feline allergic dermatitis in cats as a generic copy of NADA 141–329.	FOI Summary	520.522
March 30, 2023	200–746	Norbrook Laboratories Ltd., Carnbane Industrial Estate, Newry, County Down, BT35 6QQ, United Kingdom.	TAURAMOX (moxidectin) Injectable Solution.	Original approval for treatment and control of internal and external parasites in beef and nonlactating dairy cattle as a generic copy of NADA 141–220.	FOI Summary	522.1450
March 31, 2023	200–747	ZyVet Animal Health, Inc., 73 Route 31N, Pennington, NJ 08534.	Maropitant Citrate (maropitant citrate) Tablets.	Original approval for the prevention of acute vomiting and the prevention of vomiting due to motion sickness in dogs as a generic copy of NADA 141–262.	FOI Summary	520.1315

Also, FDA is amending the animal drug regulations to reflect approval of supplemental applications, as listed in table 2, to change the marketing status of dosage form antimicrobial animal drug products from over the counter (OTC) to by veterinary prescription (Rx). These applications were submitted in voluntary compliance with the goals of the FDA Center for Veterinary Medicine's (CVM's) Judicious Use Initiative as identified by guidance for industry #263, ''Recommendations for Sponsors of Medically Important Antimicrobial Drugs Approved for Use in Animals to Voluntarily Bring Under Veterinary Oversight All Products That Continue to be Available Over-the-Counter,'' June 11, 2021 (*https://www.fda.gov/media/130610/download*).

TABLE 2—SUPPLEMENTAL APPLICATIONS APPROVED DURING JANUARY, FEBRUARY, AND MARCH 2023 TO CHANGE THE MARKETING STATUS OF ANTIMICROBIAL ANIMAL DRUG PRODUCTS FROM OTC TO Rx

Approval date	File No.	Sponsor	Product name	21 CFR section
January 3, 2022	200–274	Zoetis Inc., 333 Portage St., Kalamazoo, MI 49007.	LINCOMIX (lincomycin hydrochloride) Injectable Solution.	522.1260

II. Withdrawals of Approval

Elanco US Inc. (Elanco), 2500 Innovation Way, Greenfield, IN 46140 has requested that FDA withdraw approval of conditionally approved NADA 141–527 for BAYTRIL 100–CA1 (enrofloxacin) Injectable Solution. Pursuant to Elanco's request, approval of their application was withdrawn on March 31, 2023. As provided in the regulatory text of this document, the animal drug regulations in 21 CFR 516.812 are removed to reflect this action.

Boehringer Ingelheim Animal Health USA, Inc., 3239 Satellite Blvd., Duluth, GA 30096 has requested that FDA withdraw approval of the 49 applications listed in table 3 because the products are no longer manufactured or marketed. As provided in the regulatory text of this document, the animal drug regulations are amended where appropriate to reflect this action.

TABLE 3—APPLICATIONS FOR WHICH APPROVAL WAS VOLUNTARILY WITHDRAWN BY FDA

File No.	Product name	21 CFR cite
006–623	CAPARSOLATE (arsenamide sodium) Injectable Solution	Not codified
008–422	SELEEN (selenium disulfide) Topical Suspension	524.2101
010–424	NALLINE (nalorphine hydrochloride) Injectable Solution	522.1452

200–361	Acepromazine Maleate Injection	522.23
200–564	Ivermectin Paste 1.87%	520.1192

III. Technical Amendments

FDA is making the following amendments to improve the accuracy of the animal drug regulations.

- 21 CFR 520.48 is amended to reflect the sponsors of products containing altrenogest for use in horses and swine.
- 21 CFR 520.2380 is removed and 21 CFR 558.600 revised to characterize a free-choice block containing thiabendazole as a new animal drug for use in cattle feed.
- 21 CFR 522.1077 is amended to reflect indications for use of gonadorelin in cattle.
- 21 CFR 522.1222 is amended to reflect sponsors of approved applications for use of ketamine in cats and subhuman primates.
- 21 CFR 556.620 is removed because there are no longer any approved products containing sulfabromomethazine for use in food-producing animals.
- 21 CFR 556.730 is revised to reflect the removal of products containing thiabendazole for use in food-producing animals other than cattle.
- 21 CFR 558.311 is amended to reflect approved classes of pasture cattle for use of lasalocid medicated feeds.
- 21 CFR 558.455 is amended to reflect the approved conditions of use of medicated feeds containing oxytetracycline and neomycin in sheep.

IV. Legal Authority

This final rule is issued under section 512(i) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360b(i)), which requires **Federal Register** publication of ''notice[s] . . . effective as a regulation,'' of the conditions of use of approved new animal drugs. This rule sets forth technical amendments to the regulations to codify recent actions on approved new animal drug applications and corrections to improve the accuracy of the regulations, and as such does not impose any burden on regulated entities.

Although denominated a rule pursuant to the FD&C Act, this document does not meet the definition of ''rule'' in 5 U.S.C. 804(3)(A) because it is a ''rule of particular applicability.'' Therefore, it is not subject to the congressional review requirements in 5 U.S.C. 801–808. Likewise, this is not a rule subject to Executive Order 12866, which defines a rule as ''an agency statement of general applicability and future effect, which the agency intends to have the force and effect of law, that is designed to implement, interpret, or prescribe law or policy or to describe the procedure or practice requirements of an agency.''

List of Subjects

21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 516

Administrative practice and procedure, Animal drugs, Confidential business information, Reporting and recordkeeping requirements.

21 CFR Parts 520, 522, 524, 526, and 529

Animal drugs.

21 CFR Part 556

Animal drugs, Dairy products, Foods, Meat and meat products.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR parts 510, 516, 520, 522, 524, 526, 529, 556, and 558 are amended as follows:

PART 510—NEW ANIMAL DRUGS

■ 1. The authority citation for part 510 continues to read as follows:

Authority: 21 U.S.C. 321, 331, 351, 352, 353, 360b, 371, 379e.

■ 2. In § 510.600:

■ a. In paragraph (c)(1), amend the table by adding an entry for ''Provetica LLC''; and

■ b. In paragraph (c)(2), amend the table by adding add an entry for ''086097''.

The additions read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * * * * * *	
Provetica LLC, 8735 Rosehill Rd., Suite 300, Lenexa, KS 66215	086097
* * * * * * *	

(2) * * *

Drug labeler code	Firm name and address
* * * * * * *	
086097	Provetica LLC, 8735 Rosehill Rd., Suite 300, Lenexa, KS 66215.
* * * * * * *	

PART 516—NEW ANIMAL DRUGS FOR MINOR USE AND MINOR SPECIES

■ 3. The authority citation for part 516 continues to read as follows:

Authority: 21 U.S.C. 360ccc–1, 360ccc–2, 371.

§ 516.812 [Removed]

■ 4. Remove § 516.812.

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS

■ 5. The authority citation for part 520 continues to read as follows:

Authority: 21 U.S.C. 360b.

■ 6. In § 520.48, revise paragraph (b) to read as follows:

§ 520.48 Altrenogest.

* * * * *

(b) *Sponsors.* See sponsors in § 510.600(c) of this chapter:

(1) Nos. 000061 and 051072 for use as in paragraph (d) of this section.

(2) No. 061133 for use as in paragraph (d)(1) of this section.

(3) No. 013744 for use as in paragraph (d)(2) of this section.

* * * * *

§§ 520.284, 520.284a, 520.284b, and 520.284c [Removed]

■ 7. Remove §§ 520.284, 520.284a, 520.284b, and 520.284c.

■ 8. In § 520.304, revise paragraphs (b)(1) and (2) to read as follows:

§ 520.304 Carprofen.

* * * * *

(b) * * *

(1) Nos. 017033, 054771, 055529, 062250, and 086101 for use of products described in paragraph (a)(1) and (2) of this section as in paragraph (c) of this section.

(2) Nos. 058198 and 086117 for use of product described in paragraph (a)(2) as in paragraph (c) of this section.

* * * * *

§§ 520.420 [Removed]

■ 9. Remove § 520.420.

■ 10. In § 520.443, amend paragraph (d)(2)(ii) by adding a sentence at the end of the paragraph to read as follows:

§ 520.443 Chlortetracycline tablets and boluses.

* * * * *

(d) * * *

(2) * * *

(ii) * * * Federal law restricts this drug to use by or on the order of a licensed veterinarian.

* * * * *

■ 11. In § 520.522, add paragraph (b)(4) and revise (d)(2)(ii) to read as follows:

§ 520.522 Cyclosporine.

* * * * *

(b) * * *

(4) No. 086097 for use of product described in paragraph (a)(2) as in paragraph (d) of this section.

* * * * *

(d) * * *

(2) * * *

(ii) *Indications for use.* For the control of feline allergic dermatitis as manifested by excoriations (including facial and neck), miliary dermatitis, eosinophilic plaques, and self-induced alopecia in cats at least 6 months of age and at least 3 lbs (1.4 kg) in body weight.

* * * * *

§ 520.812 [Amended]

■ 12. Amend § 520.812 by:

■ a. In paragraph (b)(2), removing ''No. 017033'' and in its place adding ''Nos. 017033 and 086117''; and

■ b. Removing paragraph (b)(4).

■ 13. In § 520.998, revise paragraph (c)(2)(i) to read as follows:

§ 520.998 Fluralaner.

* * * * *

(c) * * *

(2) * * *

(i) *Chewable tablets described in paragraph (a)(1) of this section.* Kills adult fleas; for the treatment and prevention of flea infestations (*Ctenocephalides felis*), and the treatment and control of tick infestations (*Ixodes scapularis* (black-legged tick), *Dermacentor variabilis* (American dog tick), *Rhipicephalus sanguineus* (brown dog tick), and *Haemaphysalis longicornis* (Asian longhorned tick)) for 12 weeks in dogs and puppies 6 months of age and older, and weighing 4.4 lbs or greater; and for the treatment and control of *Amblyomma americanum* (lone star tick) infestations for 8 weeks in dogs and puppies 6 months of age and older, and weighing 4.4 lbs or greater.

* * * * *

■ 14. Amend § 520.1044b by adding a sentence at the end of paragraph (d)(3) to read as follows:

§ 520.1044b [Amended]

* * * * *

(d) * * *

(3) * * * Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 520.1130 [Removed]

■ 15. Remove §§ 520.1130.

§ 520.1195 [Amended]

■ 16. In § 520.1195, in paragraph (b)(1), remove ''000010,''.

■ 17. In § 520.1310, revise paragraphs (a) and (b) to read as follows:

§ 520.1310 Marbofloxacin.

(a) *Specifications.* Each tablet or chewable tablet contains 25, 50, 100, or 200 milligrams (mg) marbofloxacin.

(b) *Sponsors.* See sponsors in § 510.600(c) of this chapter for use as in paragraph (d) of this section:

(1) Nos. 017033, 054771, and 086117 for use of tablets.

(2) No. 086101 for use of chewable tablets.

* * * * *

■ 18. In § 520.1315, revise paragraph (b) to read as follows:

§ 520.1315 Maropitant.

* * * * *

(b) *Sponsors.* See Nos. 054771 and 086117 in § 510.600(c) of this chapter.

* * * * *

§ 520.1696b [Removed]

■ 19. Remove § 520.1696b.

■ 20. In § 520.1696c, revise paragraph (b) to read as follows:

§ 520.1696c Penicillin V tablets.

* * * * *

(b) *Sponsor.* See No. 054771 in § 510.600(c) of this chapter.

* * * * *

§ 520.1870 [Amended]

■ 21. In § 520.1870, in paragraph (b)(2), remove ''No. 069043'' and in its place add ''Nos. 069043 and 086101''.

■ 22. In § 520.2200, revise paragraph (a)(2), remove paragraph (a)(3), revise paragraphs (d)(1)(i) and (d)(2)(i), and remove (d)(3) to read as follows:

§ 520.2200 Sulfachlorpyridazine.

(a) * * *

(2) Each milliliter (mL) of suspension contains 50 milligrams (mg) of sodium sulfachlorpyridazine.

* * * * *

(d) * * *

(1) * * *

(i) *Amount.* Administer 30 to 45 mg sulfachlorpyridazine powder per pound (/lb) of body weight per day in milk or milk replacer in divided doses twice daily for 1 to 5 days.

* * * * *

(2) * * *

(i) *Amount.* Administer 20 to 35 mg/lb body weight per day in divided doses twice daily for 1 to 5 days in drinking water or an oral suspension containing 50 mg per mL.

* * * * *

§§ 520.1696b, 520.2170, 520.2380, 520.2380a, 520.2380b, 520.2380c, 520.2380d and 520.2380e [Removed]

■ 23. Remove §§ 520.1696b, 520.2170, 520.2380, 520.2380a, 520.2380b, 520.2380c, 520.2380d and 520.2380e.

§ 520.2380f [Redesignated]

■ 24. Redesignate § 520.2380f as § 520.2382.

§ 520.2483 [Removed]

■ 25. Remove § 520.2483.

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS

■ 26. The authority citation for part 522 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 522.536 [Amended]

■ 27. In § 522.536, in paragraph (b), remove ''Nos. 015914 and 052483'' and in its place add ''Nos. 015914, 052483, and 059399''.

§ 522.542 [Removed]

■ 28. Remove § 522.542.

§ 522.558 [Amended]

■ 29. In § 522.558, in paragraph (b)(1), remove ''Nos. 017033 and 059399'' and in its place add ''Nos. 017033, 059399, and 086117''.

§ 522.775 [Removed]

■ 30. Remove § 522.775.

■ 31. Amend § 522.820 by adding a sentence at the end of paragraph (d)(3)(iii) to read as follows:

§ 522.820 Erythromycin.

* * * * *

(d) * * *

(3) * * *

(iii) * * * Federal law restricts this drug to use by or on the order of a licensed veterinarian.

■ 32. In § 522.1077, revise paragraphs (b)(2), (d)(1)(iv), and (e)(1)(i) to read as follows:

§ 522.1077 Gonadorelin.

* * * * *

(b) * * *

(2) No. 068504 for use of the 100-µg/mL product described in paragraph (a)(2) as in paragraphs (d)(1)(i) and (iv) of this section.

* * * * *

(d) * * *

(1) * * *

(iv) Dinoprost injection for use as in paragraph (e)(1)(vi) of this section as provided by No. 054771 in § 510.600(c) of this chapter.

* * * * *

(e) * * *

(1) * * *

(i) For the treatment of ovarian follicular cysts in dairy cattle: Administer 86 µg gonadorelin (No. 000061), or 100 µg gonadorelin diacetate tetrahydrate (Nos. 000010 and 061133), or 100 µg gonadorelin (as gonadorelin acetate; No. 068504) by intramuscular or intravenous injection.

* * * * *

§ 522.1150 [Removed]

■ 33. Remove § 522.1150.

■ 34. In § 522.1192, remove and reserve paragraph (a)(1), and revise paragraphs (b)(1) and (2), remove and reserve paragraph (e)(1), and revise paragraph (e)(2)(i) to read as follows:

§ 522.1192 Ivermectin.

* * * * *

(b) * * *

(1) Nos. 000010, 016592, 055529, 058005, and 061133 for use of the product described in paragraph (a)(2) of this section as in paragraphs (e)(2) through (e)(5) of this section; and

(2) No. 000010 for use of the product described in paragraph (a)(3) of this section as in paragraphs (e)(3) and (e)(6) of this section.

* * * * *

(e) * * *

(2) * * *

(i) *Amount.* 200 micrograms per kilogram (µg/kg) of body weight by subcutaneous injection.

* * * * *

§ 522.1222 [Amended]

■ 35. In § 522.1222, revise paragraph (b) by adding, in numeric sequence, ''00010,''.

■ 36. In § 522.1450, revise paragraphs (a), (b), and (e) to read as follows:

§ 522.1450 Moxidectin solution.

(a) *Specifications.* Each milliliter (mL) of solution contains 10 milligrams (mg) moxidectin.

(b) *Sponsors.* See Nos. 055529 and 058198 in § 510.600(c) of this chapter.

* * * * *

(e) *Conditions of use in cattle—(1) Amount.* Administer by subcutaneous injection 1 mL for each 110 pounds (lb) (50 kilograms (kg)) body weight to provide 0.2 mg moxidectin/2.2 lb (0.2 mg/kg) body weight.

(2) *Indications for use.* Beef and nonlactating dairy cattle: For treatment and control of Gastrointestinal roundworms: *Ostertagia ostertagi* (adults, fourth-stage larvae, and inhibited larvae), *Haemonchus placei* (adults), *Trichostrongylus axei* (adults and fourth-stage larvae), *Trichostrongylus colubriformis* (adults and fourth-stage larvae), *Cooperia oncophora* (adults), *Cooperia pectinata* (adults), *Cooperia punctata* (adults and fourth-stage larvae), *Cooperia spatulata* (adults), *Cooperia surnabada* (adults

and fourth-stage larvae), *Nematodirus helvetianus* (adults), *Oesophagostomum radiatum* (adults and fourth-stage larvae), *Trichuris* spp. (adults); Lungworms: *Dictyocaulus viviparus* (adults and fourth-stage larvae); Cattle grubs: *Hypoderma bovis* and *Hypoderma lineatum;* Mites: *Psoroptes ovis* (*Psoroptes communis* var. *bovis*); Lice: *Linognathus vituli* and *Solenopotes capillatus.* For protection from reinfection with *Dictyocaulus viviparus* and *Oesophagostomum radiatum* for 42 days after treatment, with *Haemonchus placei* for 35 days after treatment, and with *Ostertagia ostertagi* and *Trichostrongylus axei* for 14 days after treatment.

(3) *Limitations.* Cattle must not be slaughtered for human consumption within 21 days of treatment. This drug product is not approved for use in female dairy cattle 20 months of age or older, including dry dairy cows. Use in these cattle may cause drug residues in milk and/or in calves born to these cows. A withdrawal period has not been established for preruminating calves. Do not use in calves to be processed for veal.

§ 522.1696b [Amended]

■ 37. In § 522.1696b, amend paragraph (d)(2)(iii)(C), by removing ''For Nos. 054771 and 055529:''.

§ 522.1885 [Removed]

■ 38. Remove § 522.1885.

■ 39. Amend § 522.2120 by adding a sentence at the end of paragraph (d)(1)(ii) to read follows:

§ 522.2120 Spectinomycin hydrochloride.

* * * * *

(d) * * *

(1) * * *

(ii) * * * Federal law restricts this drug to use by or on the order of a licensed veterinarian.

* * * * *

§ 522.2200 [Removed]

■ 40. Remove § 522.2200.

■ 41. In 522.2630, revise paragraph (b)(2) to read as follows:

§ 522.2630 Tulathromycin.

* * * * *

(b) * * *

PART 524—OPHTHALMIC AND TOPICAL DOSAGE FORM NEW ANIMAL DRUGS

■ 42. The authority citation for part 524 continues to read as follows:

Authority: 21 U.S.C. 360b.

■ 43. In § 524.770, revise paragraph (b) to read as follows:

§ 524.770 Doramectin.

* * * * *

(b) *Sponsors.* See Nos. 051072 and 054771 in § 510.600(c) of this chapter.

* * * * *

■ 44. In § 524.814, revise paragraphs (b) and (e)(1) to read as follows:

§ 524.814 Eprinomectin.

* * * * *

(b) *Sponsors.* See Nos. 000010, 051072, and 055529 in § 510.600(c) of this chapter.

* * * * *

(e) * * *

(1) *Amount.* Apply 5 mg (1 mL) per 10 kilograms (kg) of body weight (500 micrograms/kg) topically along backbone from withers to tailhead.

* * * * *

§ 524.1044e [Amended]

■ 45. Amend § 524.1044e by adding a sentence at the end of paragraph (d)(3) to read as follows:

§ 524.1044e Gentamicin spray.

* * * * *

(d) * * *

(3) * * * Federal law restricts this drug to use by or on the order of a licensed veterinarian.

§ 524.1146 [Amended]

■ 46. In § 524.1146, in paragraph (b)(3), remove ''Nos. 051072 and 058198'' and in its place add ''Nos. 051072, 055529, 058198, and 061651''.

§ 524.1484j [Removed]

■ 47. Remove § 524.1484j.

§ 524.2101 [Amended]

■ 48. In § 524.2101, in paragraph (b), remove ''000010, 000061,'' and in its place add ''000061''.

§ 524.2483 [Amended]

■ 49. In § 524.2483, in paragraph (b), remove ''Nos. 000010 and 054925'' and in its place add ''No. 054925''.

PART 526—INTRAMAMMARY DOSAGE FORM NEW ANIMAL DRUGS

■ 50. The authority citation for part 526 continues to read as follows:

Authority: 21 U.S.C. 360b.

■ 51. Amend § 526.1696 by adding a sentence at the end of paragraph (d)(3) and paragraph (e)(3) to read as follows:

§ 526.1696 Penicillin G procaine.

* * * * *

(d) * * *

(3) * * * For No. 042791: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(e)

(3) * * * For No. 042791: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

PART 529—CERTAIN OTHER DOSAGE FORM NEW ANIMAL DRUGS

■ 52. The authority citation for part 529 continues to read as follows:

Authority: 21 U.S.C. 360b.

§ 529.40 [Removed]

■ 53. Remove § 529.40.

PART 556—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

■ 54. The authority citation for part 556 continues to read as follows:

Authority: 21 U.S.C. 342, 360b, 371.

§ 556.620 [Removed]

■ 55. Remove § 556.620.

■ 56. Revise § 556.730 to read as follows:

§ 556.730 Thiabendazole.

(a) [Reserved]

(b) *Tolerances.* The tolerances for thiabendazole are:

(1) *Cattle*—(i) Edible tissues (excluding milk): 0.1 ppm.

(ii) Milk: 0.05 ppm.

(2) [Reserved]

(c) *Related conditions of use.* See § 558.600.

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

■ 57. The authority citation for part 558 continues to read as follows:

Authority: 21 U.S.C. 354, 360b, 360ccc, 360ccc–1, 371.

■ 58. In § 558.311, revise paragraph (e)(3)(iii) to read as follows:

§ 558.311 Lasalocid.

* * * * *

(e) * * *

(3) * * *

Lasalocid amount	Indications for use	Limitations	Sponsor
* *	* *	* * *	*
(iii) Not less than 60 mg or more than 300 mg of lasalocid per head per day.	Pasture cattle (slaughter, stocker, feeder cattle, and beef replacement heifers): For increased rate of weight gain.	Feed continuously at a rate of not less than 60 mg or more than 300 mg of lasalocid per head per day when on pasture. The drug must be contained in at least 1 pound of feed. Daily intakes of lasalocid in excess of 200 mg/head/day have not been shown to be more effective than 200 mg/head/day.	054771
* *	* *	* * *	*

* * * * *

■ 50. In § 558.455, revise paragraph (e)(5) to read as follows:

§ 558.455 Oxytetracycline and neomycin.

* * * * *

(e) * * *

(5) *Sheep.* It is used in feed as follows:

Oxytetracycline and neomycin sulfate amount	Indications for use	Limitations	Sponsors
(i) To provide 10 mg/lb of body weight daily.	Sheep: For treatment of bacterial enteritis caused by *Escherichia coli* and bacterial pneumonia caused by *Pasteurella multocida* susceptible to oxytetracycline; treatment and control of colibacillosis (bacterial enteritis) caused by *E. coli* susceptible to neomycin.	Feed continuously for 7 to 14 days. Treatment should continue 24 to 48 hours beyond remission of clinical signs of disease. Withdraw 5 days before slaughter.	066104 069254

(ii) [Reserved]

■ 59. Revise § 558.600 to read as follows:

§ 558.600 Thiabendazole.

(a) *Specifications.* Mineral protein block containing 3.3 percent thiabendazole.

(b) *Sponsor.* See No. 012286 in § 510.600(c) of this chapter.

(c) *Related tolerances.* See § 556.730 of this chapter.

(d) *Special considerations.* See § 500.25 of this chapter.

(e) *Conditions of use in cattle*—(1) *Amount.* Provide free-choice to cattle on pasture or range accustomed to mineral protein block feeding for 3 days. Cattle should consume at a recommended level of 0.11 pound per 100 pounds of body weight per day. Animals maintained under conditions of constant worm exposure may require retreatment within 2 to 3 weeks.

(2) *Indications for use.* For control of infections of gastrointestinal roundworms (*Trichostrongylus, Haemonchus, Ostertagia,* and *Cooperia*).

(3) *Limitations.* Milk taken from animals during treatment and within 96 hours (8 milkings) after the latest treatment must not be used for food. Do not treat cattle within 3 days of slaughter.

Dated: April 26, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 230427–0115]

RIN 0648–BL89

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Resources of the Gulf of Mexico; Temporary Measures To Reduce Overfishing of Gag

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final temporary rule.

SUMMARY: This final temporary rule implements interim measures to reduce overfishing of gag in Federal waters of the Gulf of Mexico (Gulf). This final temporary rule reduces the 2023 commercial and recreational sector harvest levels for gag and changes the 2023 recreational fishing season for gag in Federal waters of the Gulf. This temporary rule is effective for 180 days, but NMFS may extend the interim measures for a maximum of an additional 186 days. The purpose of this temporary rule is to reduce overfishing of gag while the long-term management measures are developed.

DATES: This final temporary rule is effective from May 3, 2023, until October 30, 2023.

ADDRESSES: An electronic copy of the environmental assessment (EA) supporting these interim measures may be obtained from the Southeast Regional Office website at *https://www.fisheries.noaa.gov/action/interim-action-reduce-overfishing-gag-gulf-mexico.* The EA includes a regulatory impact review and a Regulatory Flexibility Act (RFA) analysis.

FOR FURTHER INFORMATION CONTACT: Dan Luers, NMFS Southeast Regional Office, telephone: 727–824–5305, or email: *daniel.luers@noaa.gov.*

SUPPLEMENTARY INFORMATION: The reef fish fishery in the Gulf is managed under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP) and includes gag and 30 other managed reef fish species. The FMP was prepared by the Gulf of Mexico Fishery Management Council (Council) and is implemented by NMFS through regulations at 50 CFR part 622 under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On February 3, 2023, NMFS published a proposed temporary rule in the **Federal Register** and requested public comment (88 FR 7388). The proposed temporary rule and EA outline the rationale for the actions contained in this final temporary rule, and the EA is available from NMFS (see **ADDRESSES**

section). A summary of the management measures described in the EA and implemented by this temporary rule is provided below.

All weights described in this temporary rule are in gutted weight.

Gulf gag is harvested by the commercial and recreational sectors, with 39 percent of the total annual catch limit (ACL) allocated to the commercial sector and 61 percent allocated to the recreational sector. The gag stock was assessed in 2021 through the Southeast Data, Assessment, and Review (SEDAR) stock assessment process (SEDAR 72), and was determined to be overfished and undergoing overfishing. SEDAR 72 incorporated several modified data inputs from the previous gag stock assessment, including recreational catch and effort data generated by the Marine Recreational Information Program (MRIP) using the Fishing Effort Survey (FES; MRIP–FES). The MRIP–FES fully replaced the MRIP Coastal Household Telephone Survey (CHTS) in 2018. MRIP–FES generally estimates higher recreational effort, and thus higher recreational landings, than MRIP–CHTS. The recreational catch limits in this temporary rule are not directly comparable to the previous recreational catch limits because of the change from MRIP–CHTS to MRIP–FES to estimate recreational landings.

SEDAR 72 also accounted for observations of red tide mortality, since gag is vulnerable to red tide events and was negatively affected by these disturbances in 2005, 2014, 2018, and projected for 2021 directly within the stock assessment model. Lastly, modeling changes were made in SEDAR 72 to better quantify commercial discards by taking into account the potential misidentification between black grouper and gag, which are similar looking species, and to improve size estimates of gag retained by commercial and for-hire fishermen, and private anglers.

In November 2021, the Council's Scientific and Statistical Committee (SSC) reviewed SEDAR 72 and found it to be the best scientific information available for informing fisheries management. On January 26, 2022, NMFS notified the Council that gag was overfished and undergoing overfishing, and that measures to rebuild the stock and end overfishing must be implemented within 2 years, *i.e.,* by January 26, 2024. In response, the Council began work on Amendment 56 to the FMP. However, because the management measures in Amendment 56 are not expected to be effective until the 2024 fishing year, the Council requested that NMFS implement interim measures to reduce overfishing of gag during the 2023 fishing year. Specifically, the Council requested that NMFS implement reduced catch levels for gag using the current sector allocations of the total ACL, and that NMFS move the start of the gag recreational fishing season.

Management Measures Contained in This Final Temporary Rule

During the effectiveness of this temporary rule, the total ACL for gag is 661,901 lb (300,233 kg). This temporary rule also specifies the commercial and recreational sector ACLs and component commercial quotas using the existing sector allocations of the total ACL of 39 percent commercial and 61 percent recreational. The commercial ACL and commercial quota are 258,000 lb (117,027 kg) and 199,000 lb (90,265 kg), respectively. The recreational ACL is 403,759 lb (183,142 kg), and the recreational annual catch target (ACT) is 362,374 lb (164,370 kg).

The reduced catch limits requested by the Council are based on a rebuilding time that is equal to twice the time necessary to rebuild the stock if fishing mortality was reduced to zero, which is one of the rebuilding times considered in Amendment 56.

Although the Council requested a commercial ACL of 258,142 lb (117,091 kg) and commercial quota of 199,157 lb (90,336 kg) for 2023, the analyses conducted by NMFS supporting the implementation of interim measures use a commercial ACL and quota rounded to the nearest thousand pounds, as noted above. NMFS used the rounded numbers because they are consistent with the numerical format of the current gag commercial catch limits and the Council did not consider whether this practice should be continued for the purpose of the interim commercial catch limits. NMFS expects the Council to clearly articulate in Amendment 56 whether the commercial catch limits for gag should continue to be rounded to the nearest thousand pounds.

Because the commercial sector relies on the Individual Fishing Quota program for groupers and tilefishes (GT–IFQ program) that distributes commercial quota to shareholders for the entire fishing year, no change to the commercial fishing season would occur under this temporary rule. Further, the Council did not recommend interim modifications to the commercial sector's IFQ multi-use provision for gag and red grouper. Therefore, the gag and red grouper multi-use allocation will be available as specified in 50 CFR 622.22(a)(5).

In addition to the reduced gag catch limits, the Council requested that NMFS move the start of the gag recreational fishing season for the 2023 fishing year from June 1 to September 1. The Council also requested the season close on November 10, instead of remaining open through December 31, as it has in recent years. Therefore, the 2023 recreational fishing season will be open from September 1 through November 9, unless NMFS projects that the recreational ACL will be reached sooner and closes the recreational sector as required by the accountability measures (AM) specified in 50 CFR 622.41(r)(2).

The reduced recreational catch limits in this temporary rule will result in a shorter recreational season. However, the Council and NMFS expect that the change to the recreational season will mitigate the lower catch limits and will maximize the number of recreational fishing days for gag. If the opening date for the recreational season had remained June 1, 2023, NMFS projected that recreational landings of gag would reach the recreational ACL in only 16 days.

NMFS would implement the current AM of an in-season closure earlier if NMFS projects that recreational landings will meet or exceed the recreational ACL before the November 10 closure date.

The temporary reductions in the allowable harvest of gag will result in reduced allowable harvest for both the commercial and recreational sectors and a reduced recreational fishing season. The reduced harvest levels and shortened recreational fishing season will likely result in short-term adverse socio-economic effects. However, the temporary ACLs, commercial quota, and recreational ACT are expected to minimize future adverse socio-economic effects by potentially decreasing further reductions in the allowable harvest levels required to end overfishing of gag through Amendment 56. The temporary harvest levels in this rule will also provide biological benefits to the gag stock by reducing the past levels of fishing mortality.

Comments and Responses

NMFS received 24 comments during the public comment period on the proposed temporary rule. Most of the comments NMFS received were opposed to the interim measures for gag. NMFS acknowledges the comments in favor of the action in the proposed rule and agrees with them. Some comments were outside the scope of the proposed temporary rule, suggesting NMFS implement alternative management measures or apply restrictions to a specific fishery sector or component,

and those comments are not responded to in this final temporary rule. Comments that were opposed to or requested additional information about the actions contained in the proposed temporary rule are grouped as appropriate and summarized below, along with NMFS' responses.

Comment 1: The catch level reductions for gag are unnecessary because either the stock assessment is inaccurate or there is no shortage of gag in certain areas of the Gulf.

Response: NMFS disagrees that the reduction in the gag catch limits are unnecessary. The best scientific information available supports both the stock assessment results and the decision to reduce the catch limits through this temporary rule. The most recent stock assessment for Gulf gag (SEDAR 72) was completed in 2021 and determined that the stock is undergoing overfishing and is overfished. The assessment included a multi-day data review workshop and several webinars, and was reviewed by the Council's SSC, which concluded that SEDAR 72 was based on the best scientific information available. Although NMFS recognizes that the abundance of gag varies across locations in the Gulf, gag is managed as a single stock in the Gulf, and the stock assessment, which used Gulf-wide data, concluded that the overall abundance has declined precipitously since the previous gag stock assessment was completed in 2016. This conclusion is supported by the inability of both the commercial and recreation sectors to harvest their allotted quotas of gag. In the last 5 years covered by SEDAR 72 (2015–2019), the combined commercial and recreational harvest only exceeded 50 percent of the gag stock ACL once (2016).

Comment 2: The recreational season for gag should be open from October through December because that is when gag move closer to shore.

Response: The Council recommended a recreational season opening on September 1 because public comments from stakeholders supported the longest season possible. The season starting September 1 is scheduled for a maximum of 70 days, closing on November 10, while the alternative start dates considered for the recreational season resulted in shorter season estimates. NMFS estimated that a June 1 start date would last only 16 days; an October 1 start date is estimated to last 55 days; and a November 1 start date is estimated to last 29 days. Thus, even if an October 1 start date for the recreational season was implemented, NMFS projected the season would only last until late November. In addition, shorter seasons are more likely to result in ''derby-like'' fishing, where greater effort and greater numbers of fish are harvested in a shorter period, and fishermen may decide go out in more dangerous conditions.

Comment 3: NMFS should reduce the recreational bag limit from two fish to one fish instead of reducing the season length. Alternatively, NMFS should reduce bag limit to one fish and reduce the recreational season length.

Response: The Council did not consider an action to change the existing bag limit for gag, nor recommend that NMFS reduce the gag two-fish bag limit through this temporary rule. Additional analysis is necessary to determine the combined impacts of reducing the bag limit and shortening the open season. The Council has indicated that it may explore a bag limit reduction in the future, which would provide the opportunity to complete this additional analysis and evaluate whether a reduction in bag limit combined with the change to the open season would achieve the desired reduction in harvest.

Comment 4: Although the commercial quota and recreational ACT are decreased by 79 percent, the recreational season length in number of days is only reduced by 61 percent. The percentage reduction in recreational fishing days should be the same as the reduction in the recreational ACT.

Response: This temporary rule shortens the recreational season for gag from 214 days (June 1 through December 31) to 70 days (September 1 through November 9), which is approximately a 67 percent reduction. In addition, consistent with the current accountability measures, this temporary rule limits recreational harvest to the recreational ACL also set in this rule, not the recreational ACT. The recreational ACL will be reduced from 1,903,000 lb (863,186 kg) to 403,759 lb (183,142 kg). However, as explained above, these catch limits are not directly comparable because of the change from MRIP–CHTS to MRIP–FES to estimate recreational landings. Further, NMFS would not expect the reduction in the ACL to directly correspond to the reduction in the season length because recreational fishing effort and catch rates for gag change during a fishing year, so the time of year when fishing occurs is important in projecting how quickly the catch limit will be reached. This temporary rule will change the start date for the gag recreational season from June 1 to September 1. Because the recreational harvest of gag in total pounds is historically much lower in September and October than in June, NMFS projects that it will take longer to catch the decreased ACL than it would if the season were to open on June 1.

Comment 5: The proposed recreational season of September 1 through November 9 is problematic for three reasons. First, the catch rates of gag in June, July, and August are low and a recreational closure during this time will not have a significant reduction on recreational harvest. Second, gag are commonly caught while targeting red snapper and a closure for gag from June through August, when red snapper harvest is generally at its peak, will most likely cause a significant number of gag discards in deep water. Therefore, the gag season should be open concurrent with the red snapper season to reduce bycatch of gag during that time, and then close the gag season late in the year, such as, an open season from June 1 through September 30. Separating the fishing seasons for gag and red snapper seems more likely to maximize bycatch, not minimize it to the extent practicable as required by National Standard 9. Last, the recreational season of September 1 through November 9 will heavily favor commercial fishermen instead of recreational fishermen due to the less favorable weather conditions at that time of year.

Response: NMFS has determined that the change in the recreational open season implemented through this temporary rule will reduce gag bycatch and bycatch mortality, to the maximum extent practicable, consistent with the requirements of National Standard 9. The Council considered multiple factors in recommending the preferred alternative for the start date of the gag recreational season, including the season length projections, economic concerns, especially associated with the for-hire sector, and the potential changes in bycatch. The Council determined that it is important to provide recreational fishermen and for-hire businesses the longest season possible to harvest the recreational ACL. A season starting September 1 (the longest projected season length of the alternatives considered) is scheduled to be open for 70 days, while a season beginning June 1 (the shortest projected season) is projected to last 16 days. Although gag catch rates, *i.e.,* catch per unit effort, may be lower during June through August, concurrent with most of the Gulf States recreational seasons for red snapper and with the Federal red snapper for-hire season, than in some months later in the year (*e.g.,* November), the total pounds of gag harvested during this season is higher

than any other time in the year due to the higher number of anglers that harvest gag. This is because of the larger number of recreational fishermen targeting reef fish, and also likely due to relatively favorable fishing weather and the open red snapper season. In addition, a June 1 start date would have the greatest adverse economic effects on the for-hire component because during the limited 16-day season fishermen on for-hire vessels would have to take single trips to harvest both red snapper and gag, instead of having a different season to schedule trips for the two species. Thus, a June 1 season is expected to result in a decreased number of trips and decreased revenue for the for-hire component.

With respect to bycatch, opening the recreational season on June 1 would require recreational fishermen to discard all gag caught after the short 16-day season concludes. Although the September 1 opening may result in discards during the few weeks that the season would have been open in early June, it is also expected to eliminate targeted harvest of gag from June 1 through August 31. Many experienced fishermen have explained during public meetings that gag can be avoided when targeting other species, including red snapper. Thus, although there are uncertainties with regard to the extent of bycatch given each of the season opening dates, NMFS expects the September 1 season opening to reduce gag mortality during the peak of the red snapper recreational season, reduce overall gag mortality, and also provide economic and social benefits to the recreational sector.

NMFS does not believe the recreational season in this temporary rule will favor commercial fishermen over recreational fishermen. Because there are separate commercial and recreational catch limits, harvest by the commercial sector will not impact the recreational season. This longer recreational season will provide the greatest flexibility to recreational fishermen to avoid periods of poor weather and harvest gag, compared to the other shorter seasons that the Council considered. Further, in at least some areas, gag move closer to shore in the fall as the water cools, which may allow for safer access by anglers when compared to areas farther offshore where gag occur in the summer. The cooler, shallower water may also reduce release mortality for those gag that are caught but cannot be kept.

Comment 6: The initial regulatory flexibility analysis (IRFA) for the proposed temporary rule is faulty because it does not account for effects on commercial crew members.

Response: Analyses conducted to satisfy the requirements of the RFA only consider the effects of a rule on entities subject to the regulation (*i.e.,* entities to which the rule will directly apply) rather than entities indirectly affected by the regulation. Because the commercial quota for gag is allocated to businesses that possess shares for gag in the GT–IFQ program, crew members on commercial fishing vessels who do not also possess such shares would be indirectly rather than directly affected by the temporary rule. Therefore, consideration of effects on individual crew members is outside the scope of the IRFA analysis.

Comment 7: The temporary rule will adversely affect consumers who purchase gag by raising prices or they will not be able to purchase the fish.

Response: NMFS agrees that the reduction in the commercial quota proposed by this temporary rule would be expected to temporarily increase the ex-vessel price of gag, which would likely be passed on to consumers and result in a decrease in consumer surplus, *i.e.,* economic value to consumers. Specifically, Table 4.1.3.2 in the environmental assessment indicates that the ex-vessel price of gag is expected to increase by $1.44 per lb, which in turn is expected to reduce consumer surplus by $497,585, over the maximum effective period of the temporary rule, 366 days. These economic losses for consumers cannot be avoided because NMFS has determined that the commercial quota reduction in this temporary rule is necessary to reduce overfishing of gag while a rebuilding plan is being developed.

Comment 8: The gag commercial quota reduction will cause extreme hardship to commercial fishermen and their families, their communities, and the seafood supply chain, and could have been avoided or at least mitigated had the Council and NMFS acted sooner. The reduction in the recreational catch limits will cause for-hire vessels to go out of businesses or greatly affect their ability to make a living, and may cause effort to shift to other species.

Response: NMFS recognizes that the temporary rule may cause economic hardships for commercial and recreational for-hire stakeholders and communities reliant on gag. However, not reducing harvest would be expected to result in further declines to the gag population and greater economic hardships in the longer term. Regarding the timeliness of this action, the Council and NMFS use the SEDAR process to assess the abundance and health of populations of several managed stocks. The gag stock has been assessed frequently since 2006, with some assessments indicating the population was overfished and overfishing was occurring, and other assessments indicating the population was healthy. Prior to SEDAR 72, the next most recent stock assessment (SEDAR 33 Update, 2016) indicated the gag population was healthy. Thus, the Council and NMFS did not have sufficient information to support reducing catch levels prior to the Council receiving the results of SEDAR 72 at its September 2021 meeting. Stock assessments take several years to complete, so the data from the stock assessment may be several years old before a final rule can be implemented, and thus a population status may change before the Council and NMFS receive the results.

Comment 9: The temporary rule is unlikely to achieve its purpose due to unconstrained and inaccurate estimates of recreational discards. The temporary rule does not adequately track or account for dead discards of gag by the recreational sector. It is unclear if NMFS' analysis takes into account the potential for increased directed fishing for gag during the new open fishing season, which could increase catch rates beyond what was historically observed during that period of time and thus fail to control overall fishing mortality. The analysis concludes that overall gag mortality is expected to decrease, but the basis for that conclusion is not explained. It does not appear that the temporary rule or the accompanying analysis quantifies the numbers of gag expected to be caught and discarded dead as bycatch by recreational anglers during the closed or open seasons, or the potential for increased directed fishing pressure during the proposed 70-day fishing season. Without those figures, the public has no way to assess the actual impact on ''overall gag mortality.''

Response: The purpose of this temporary rule is to reduce overfishing of gag during the 2023 fishing year while the Council and NMFS work to implement permanent measures to end overfishing and rebuild the stock. As explained in the response to *Comment 5,* NMFS recognizes that shifting the recreational season may change fishing pressure during the fall months and the magnitude of gag discards during the red snapper season. However, NMFS does not agree that it is necessary to quantify expected discards to conclude that the reduction in the commercial and recreational catch limits will

achieve the purpose of reducing overfishing during this interim period. As explained in the environmental assessment supporting this rule, the average total gag commercial and recreational landings between 2017 and 2021 was over 3 million lb (1,360,777 kg). This temporary rule is expected to constrain total harvest in 2023 to 661,901 lb (300,233 kg) and, therefore, regardless of any uncertainty related discard mortality, reduce overfishing compared to the status quo catch limits and recent landings. Further, the Council considered uncertainty in the catch rates when recommending the September 1 to November 10 recreational season. This 70-day season is more conservative than NMFS' current estimate for the season length based on previous years of fishing effort during September through December, which suggests that it would take 80 to 96 days to harvest the revised gag recreational ACL. The shorter 70-day season accounts for changes in effort that may occur due to the new season timeframe, and provide a buffer in case recreational landings are higher than estimated. Also, NMFS will use all available data, including final 2022 recreational data, which are not yet available, to determine whether the season should be reduced further. If the data indicate a recreational closure for gag is necessary to avoid exceeding its recreational ACL prior to November 10, NMFS will close the season.

Comment 10: The voluntary data collection from private recreational anglers that occurs through MRIP–FES is delayed by months after landings occur and before they are available for use by management. NMFS does not explain how it will obtain sufficient information from the recreational sector about what is caught during the proposed open season in time to actually shorten that season.

Response: NMFS will use the best data available to project the duration of the recreational season. The recreational season implemented by this final temporary rule will be a maximum of 70 days and is based on a conservative estimate that is expected to result in landings less than the new recreational ACL for gag. NMFS will continue to run projections that include newly available recreational landings, such as the final 2022 recreational landings of gag, which are not included in the current projection. If the updated projections indicate that recreational landings will reach the recreational ACL before November 10, NMFS will shorten the season.

Future Action

NMFS has determined that this temporary rule is necessary to reduce overfishing of gag. NMFS considered all public comments received within the scope of the proposed temporary rule in the determination of whether to proceed with a final temporary rule and whether any revisions to the final temporary rule were appropriate. This final temporary rule is effective for 180 days after the date of publication in the **Federal Register**, as authorized by section 305(c) of the Magnuson-Stevens Act. The temporary rule could be extended for up to an additional 186 days if NMFS publishes a temporary rule extension in the **Federal Register**, because the public has had an opportunity to comment on the proposed temporary rule, and the Council is actively preparing an FMP amendment to address overfishing on a permanent basis.

Classification

This action is issued pursuant to section 305(c) of the Magnuson-Stevens Act, 16 U.S.C. 1855(c). The NMFS Assistant Administrator has determined that this temporary rule is consistent with the Magnuson-Stevens Act and other applicable law.

This temporary rule has been determined to be not significant for purposes of Executive Order 12866.

The Magnuson-Stevens Act provides the legal basis for this temporary rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting and record-keeping requirements are introduced by this temporary rule. This temporary rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

NMFS prepared a final regulatory flexibility analysis (FRFA) for this temporary rule. The FRFA incorporates the IRFA, a summary of the significant issues raised by the public comments in response to the IRFA, NMFS' responses to those comments, and a summary of the analyses completed to support the action. NMFS' responses to public comments regarding the IRFA and the Executive Order 12866 analysis are in the **SUPPLEMENTARY INFORMATION** section of the preamble under the Comments and Responses heading. A copy of the full analysis is available from NMFS (see **ADDRESSES**). A summary of the FRFA follows.

The objective of this temporary rule is to use the best scientific information available to reduce overfishing of gag while a rebuilding plan is developed, consistent with the authority under the Magnuson-Stevens Act. All monetary estimates in the following analysis are in 2019 dollars.

This temporary rule will revise the stock ACL, sector ACLs, commercial quota, and recreational ACT for gag based on the ''TMin*2'' rebuilding scenario, which is twice the minimum time for the stock to rebuild with zero fishing mortality and is an alternative under consideration in Amendment 56. This temporary rule retains the existing sector allocations of the stock ACL of 39 percent to the commercial sector and 61 percent to the recreational sector, but will reduce the stock ACL, commercial ACL, recreational ACL, commercial quota and recreational ACT to 661,901 lb (300,233 kg), 258,000 lb (117,027 kg), 403,759 lb (183,142 kg), 199,000 lb (90,265 kg), and 362,374 lb (164,370 kg), respectively. The recreational portion of the revised stock ACL, the recreational ACL, and the recreational ACT are based on MRIP–FES data. This temporary rule will also change the recreational season start date from June 1 to September 1, and close the season on November 10 unless NMFS projects the recreational ACL to be met sooner. As a result, this temporary rule is expected to regulate commercial fishing businesses that possess shares of gag in the GT–IFQ program and for-hire fishing businesses that target gag.

The gag commercial quota is allocated annually based on the percentage of gag shares in each IFQ account. For example, if an account possesses 1 percent of the gag shares and the commercial quota is 1 million lb (0.45 million kg), then that account would receive 10,000 lb (4,536 kg) of commercial gag quota. Although it is common for a single IFQ account with gag shares to be held by a single business, some businesses have multiple IFQ accounts with gag shares. As of July 8, 2021, 506 IFQ accounts held gag shares. These accounts and gag shares were owned by 455 businesses. Thus, NMFS assumes this temporary rule would regulate 455 commercial fishing businesses.

A valid charter vessel/headboat permit for Gulf reef fish is required to legally harvest gag on a recreational for-hire fishing trip. NMFS does not possess complete ownership data regarding businesses that hold a charter vessel/headboat permit for Gulf reef fish, and thus potentially harvest gag. Therefore, it is not currently feasible to accurately determine affiliations between vessels and the businesses that own them. As a result, for purposes of this analysis, NMFS assumes each for-hire vessel is independently owned by a single business, which NMFS expects to result in an overestimate of the actual number

of for-hire fishing businesses regulated by this temporary rule.

NMFS also does not have data indicating how many for-hire vessels actually harvest gag in a given year. However, in 2020, there were 1,289 vessels with valid charter vessel/headboat permits for Gulf reef fish. Further, gag is only targeted and almost entirely harvested in waters off the west coast of Florida. Of the 1,289 federally permitted vessels, 803 were homeported in Florida. Of these permitted vessels, 62 are primarily used for commercial fishing rather than for-hire fishing purposes, and thus are not considered for-hire fishing businesses. In addition, 46 of these permitted vessels are considered headboats, which are considered for-hire fishing businesses. However, headboats take a relatively large, diverse set of anglers to harvest a diverse range of species on a trip, and therefore do not typically target a particular species exclusively. Therefore, NMFS assumes that no headboat trips would be canceled, and thus no headboats would be directly affected as a result of this regulatory action. However, charter vessels often target gag. Of the 803 vessels with a valid charter vessel/headboat permit for Gulf reef fish that are homeported in Florida, 695 vessels are charter vessels. A recent study reported that 76 percent of charter vessels with a valid charter vessel/headboat permit in the Gulf were active in 2017, *i.e.,* 24 percent were not fishing. A charter vessel would only be directly affected by this temporary rule if it used to go fishing. Given this information, NMFS' best estimate of the number of charter vessels that are likely to harvest gag in a given year is 528, and thus this temporary rule is estimated to regulate 528 for-hire fishing businesses.

For RFA purposes, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (50 CFR 200.2). A business primarily involved in the commercial fishing industry is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and its combined annual receipts (revenue) are not in excess of $11 million for all of its affiliated operations worldwide. NMFS does not collect revenue data specific to commercial fishing businesses that have IFQ accounts; rather, revenue data are collected for commercial fishing vessels in general. It is not possible to assign revenues earned by commercial fishing vessels back to specific IFQ accounts and the businesses that possess them because quota is often transferred across many IFQ accounts before it is used by the business on a vessel for harvesting purposes, and specific units of quota cannot be tracked. However, from 2016 through 2020, the maximum annual gross revenue earned by a single vessel during this time was about $1.73 million in 2016. The average gross revenue per vessel was about $108,000 in that year. By 2020, the maximum and average gross revenue per vessel had decreased to about $730,000 and $79,700, respectively. Based on this information, all commercial fishing businesses regulated by this temporary rule are determined to be small entities for the purpose of this analysis.

For other industries, the Small Business Administration has established size standards for all major industry sectors in the U.S., including for-hire businesses (North American Industry Classification System code 487210). A business primarily involved in for-hire fishing is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has annual receipts (revenue) not in excess of $12.5 million for all its affiliated operations worldwide. The maximum annual gross revenue for a single headboat in the Gulf was about $1.38 million in 2017. On average, annual gross revenue for headboats in the Gulf is about three times greater than annual gross revenue for charter vessels, reflecting the fact that businesses that own charter vessels are typically smaller than businesses that own headboats. Based on this information, all for-hire fishing businesses regulated by this temporary rule are determined to be small businesses for the purpose of this analysis.

If implemented, NMFS expects this temporary rule to regulate 455 of the 536 businesses with IFQ accounts, or approximately 85 percent of those commercial fishing businesses. Further, NMFS expects this temporary rule would regulate 528 of the 1,227 for-hire fishing businesses with valid charter vessel/headboat permits for Gulf reef fish, or approximately 43 percent of those for-hire fishing businesses. NMFS has determined that, for the purpose of this analysis, all regulated commercial and for-hire fishing businesses are small entities. Based on this information, NMFS expects the temporary rule to affect a substantial number of small entities.

Because revenue and cost data are not collected for the commercial fishing businesses that are expected to be regulated by this temporary rule, direct estimates of their economic profits are not available. However, economic theory suggests that annual allocation (quota) prices should reflect expected annual economic profits, which allows economic profits to be estimated indirectly. Further, the 455 businesses with gag shares also own shares in the other IFQ share categories and thus are expected to earn profits from their ownership of these shares as well, *i.e.,* red snapper, red grouper, shallow-water grouper, deep-water grouper, and tilefish.

However, economic profits will only be realized if the allocated quota is used for harvesting purposes. For example, practically all of the commercial red snapper quota has been used for harvesting in recent years, and so NMFS assumes that all of that quota will be harvested in the foreseeable future. Important management changes have occurred for red grouper, which partly resulted in 96 percent of the commercial quota being harvested in 2021. Thus, this analysis also assumes that all of the red grouper quota will be harvested in the future as well. However, based on 2017–2021 data, only 82 percent of the deep-water grouper quota, 38 percent of the shallow-water grouper quota, and 73 percent of the tilefish quota have been harvested, and that is expected to continue in the foreseeable future. For gag, the quota utilization rate from 2017–2021 was approximately 52 percent. Given these quota utilization rates in combination with average annual allocation prices from 2017–2021 and annual commercial quotas in 2021, the total expected economic profits for businesses with gag shares are estimated to be at least $29.4 million at the present time. This estimate does not account for any economic profits that may accrue to businesses with gag shares that also own commercial fishing vessels that harvest non-IFQ species. Such profits are likely to be small because harvest of IFQ species accounts for around 84 percent of commercial IFQ vessels' annual revenue and economic profits from the harvest of non-IFQ species tend to be smaller than those from IFQ species. Given that there are 455 businesses with gag shares, the average annual expected economic profit per commercial fishing business is at least $64,620.

However, most of these economic profits (82 percent) are the result of owning red snapper shares. Only approximately $502,930 (or 1.7 percent) of their expected economic profits is due to the ownership of gag shares. This temporary rule is only expected to affect economic profits from the ownership of gag shares, specifically because of the action that reduces the gag commercial

ACL from 1.217 million lb (0.552 million kg) to 258,000 lb (117,027 kg) and the gag commercial quota from 939,000 lb (426,000 kg) to 199,000 lb (90,265 kg). Average annual commercial landings of gag from 2017–2021 were 492,401 lb (223,349 kg). Because average annual landings exceed the commercial quota, NMFS assumes all of the commercial quota will be harvested in the future. Further, the expected reduction in annual commercial landings is 293,401 lb (133,084 kg). The reduction in commercial landings is expected to increase the average ex-vessel price of gag from $6.10 per lb to $7.54 per lb, thereby partially offsetting the adverse effects of the expected landings reduction. Thus, the expected reduction in annual ex-vessel revenue for gag is approximately $1.5 million, over the maximum effective period of the temporary rule, 366 days. Given an average annual allocation price of $1.03 per lb for gag from 2017–2021, the expected reduction in commercial landings of gag is expected to reduce economic profits to these commercial fishing businesses by about $302,200, or by approximately $660 per commercial fishing business. Thus, economic profit is expected to be reduced by no more than 1 percent on average per commercial fishing business.

Based on the most recent information available, average annual profit is $27,948 per charter vessel. The action that revises the stock ACL changes the gag recreational ACL from 1.903 million lb (0.86 million kg) in MRIP–CHTS units to 403,759 lb (183,142 kg) in MRIP–FES units. The terms ''MRIP–CHTS units'' and ''MRIP–FES units'' signify that although the current and recreational ACLs are expressed in pounds, they are in different scales and not directly comparable. However, average recreational landings from 2017–2021 were approximately 2.538 million lb (1.151 million kg) in MRIP–FES units. Given that average recreational landings have been considerably greater than the recreational ACL, all of the recreational ACL is expected to be harvested in the future. The recreational ACL reduction would be expected to reduce the recreational season length from 214 days to 16 days, which in turn is expected to reduce the number of trips targeting gag on charter vessels by 26,542 angler trips. Net Cash Flow per Angler Trip (CFpA) is the best available estimate of economic profit per angler trip by charter vessels. CFpA on charter vessels is estimated to be $149 per angler trip. Thus, NMFS expects the estimated reduction in charter vessel economic profits from this action to be $3.955 million. The reduction in charter vessel economic profits is estimated to be $7,490 per vessel, or almost 27 percent on average per for-hire fishing business.

The action that changes the recreational season would increase the number of target trips for gag by charter vessels during this period over the number of target trips in previous years by 2,159 trips, thereby partially mitigating the reduction in target trips due to the recreational ACL reduction. Assuming the CFpA on charter vessels is $149 per angler trip, this action is expected to increase economic profits for charter vessels by $321,733, or by $609 per charter vessel. Thus, economic profits are expected to be increased by around 2.2 percent on average per for-hire fishing business.

Based on the above, the total reduction in economic profits for charter vessels from this temporary rule is expected to be about $3.634 million, or approximately $6,882 per charter vessel. Thus, economic profits are expected to be reduced by approximately 24.6 percent on average per for-hire fishing business.

Three alternatives, including the status quo, were considered for the action to revise the gag stock ACL, commercial ACL, recreational ACL, commercial quota, and recreational ACT of 3.12 million lb (1.415 million kg), 1.217 million lb (0.552 million kg), 1.903 million lb (0.863 million kg), 939,000 lb (426,000 kg), and 1.708 million lb (0.775 million kg) based on MRIP–CHTS data. The action in this temporary rule will revise the same catch levels for gag to 661,901 lb (300,233 kg), 258,000 lb (117,027 kg), 403,759 lb (183,142 kg), 199,000 lb (90,265 kg), and 362,374 lb (164,370 kg), respectively, based on the TMin*2 rebuilding scenario and MRIP–FES data. Similar to the action in this temporary rule, the status quo alternative would have retained the current allocation of the stock ACL of 39 percent to the commercial sector and 61 percent to the recreational sector. But, it also would have maintained current the stock ACL, commercial ACL, recreational ACL, commercial quota, and recreational ACT stated earlier based on MRIP–CHTS data. The status quo alternative was not selected because it would not reduce overfishing of gag while a rebuilding plan is being developed, contrary to the purpose of this temporary rule.

A second alternative would have decreased the allocation percentage of the gag stock ACL to the commercial sector from 39 percent to 20.5 percent and increased the allocation percentage to the recreational sector from 61 percent to 79.5 percent. Further, based on the TMin*2 rebuilding scenario and MRIP–FES data, this alternative would have revised the gag stock ACL, commercial ACL, recreational ACL, commercial quota, and recreational ACT from 3.12 million lb (1.415 million kg), 1.217 million lb (0.552 million kg), 1.903 million lb (0.863 million kg), 939,000 lb (426,000 kg), and 1.708 million lb (0.775 million kg) based on MRIP–CHTS data to 611,578 lb (277,407 kg), 125,000 lb (56,699 kg), 486,204 lb (220,538 kg), 98,000 lb (44,452 kg), and 436,368 lb (197,933 kg). This alternative would have reduced overfishing while a rebuilding plan is being developed. However, because this temporary rule and an extension cannot in combination be in effect for more than 366 days, this alternative was not selected because the Council advised NMFS that it would prefer to address sector allocations for gag on a longer-term basis through an amendment to the FMP.

A third alternative would have decreased the allocation percentage of the gag stock ACL to the commercial sector from 39 percent to 18 percent and increased the allocation percentage to the recreational sector from 61 percent to 82 percent. Further, based on the TMin*2 rebuilding scenario and MRIP–FES data, this alternative would have revised the gag stock ACL, commercial ACL, recreational ACL, commercial quota and recreational ACT from 3.12 million lb (1.42 million kg), 1.217 million lb (0.55 million kg), 1.903 million lb (0.86 million kg), 939,000 lb (426,000 kg), and 1.708 million lb (0.78 million kg) based on MRIP–CHTS data to 605,165 lb (274,745 kg), 109,000 lb (49,486 kg), 496,235 lb (225,291 kg), 84,000 lb (38,136 kg), and 445,370 lb (202,198 kg). Similar to the second alternative, this alternative would have reduced overfishing while a rebuilding plan is being developed. However, because this temporary rule and an extension cannot be in effect for more than 366 days, this alternative was not selected because the Council advised NMFS that it would prefer to address sector allocations for gag on a longer-term basis through an amendment to the FMP.

Three alternatives, including the status quo, were considered for the action to change the recreational start date from June 1 to September 1, and close the season on November 10, unless NMFS projects the recreational ACL will be met sooner. The status quo alternative would have maintained the recreational season start date of June 1, which was expected to result in a recreational season length of only 16

days compared to 70 days under the action in this temporary rule. This alternative was not selected as it would not mitigate the adverse effects from the recreational ACL reduction and thereby would have resulted in greater adverse effects on small for-hire fishing businesses.

The second alternative would have changed the recreational season start date from June 1 to October 1, which would have resulted in a recreational season length of 55 days compared to 70 days under the action in this temporary rule. Although the second alternative would have mitigated some of the adverse effects from the recreational ACL reduction, this alternative was not selected because, given the shorter season length compared to the action, it would not allow for-hire fishing businesses as much flexibility in planning target trips for gag, which is particularly desirable during hurricane season, which occurs from June 1 through November 30 each year. Further, unlike the action in this temporary rule, this alternative does not have a fixed closure date, which would increase the probability of exceeding the recreational ACL relative to the action in this temporary rule.

The third alternative would have changed the recreational season start date from June 1 to November 1, which would have resulted in a recreational season length of 29 days compared to 70 days under the action in this temporary rule. Although the third alternative would have mitigated some of the adverse effects from the recreational ACL reduction, this alternative was not selected because it would not have mitigated those adverse effects as much as the action, thereby causing relatively greater adverse effects on small for-hire fishing businesses. Further, given the shorter season length compared to the action in this temporary rule, it would not allow for-hire fishing businesses as much flexibility in planning target trips for gag, which is particularly desirable during hurricane season. Also, similar to the second alternative, this alternative does not have a fixed closure date, which would increase the probability of exceeding the recreational ACL relative to the action in this temporary rule.

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. As part of this rulemaking process, NMFS prepared a fishery bulletin that also serves as the small entity compliance guide. NMFS will send the fishery bulletin to all interested parties. A copy of this final temporary rule is available from NMFS (*see* **ADDRESSES**), and the small entity compliance guide is available on the NMFS website at *https://www.fisheries.noaa.gov/rules-and-announcements/bulletins.*

There is good cause under authority contained in 5 U.S.C. 553(d)(3) to waive the 30-day delay in effectiveness so that this final temporary rule can be effective by June 1, 2023. On December 13, 2022, NMFS published a temporary rule to withhold a portion of the commercial allocation of gag for the 2023 fishing year in anticipation of the reduction in the commercial quota in this final temporary rule (87 FR 76125). If this final temporary rule is not effective by June 1, 2023, the regulations at 50 CFR 622.22(a)(4) require NMFS to distribute the previously withheld commercial allocation, which would be contrary to the purpose of this rule to reduce overfishing for the 2023 fishing year. In addition, the current recreational fishing season opens on June 1. Therefore, this final temporary rule must be effective by that date to constrain recreational harvest to the reduced recreational catch limit while providing the maximum number of fishing days. NMFS was unable to publish this final temporary rule sooner because NMFS determined that it was important to solicit public comments on the interim measures, which substantially reduce the allowable harvest of gag for the 2023 fishing year, and it took time to complete the analyses supporting the proposed temporary rule and to respond to the comments received.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Gag, Gulf of Mexico.

Dated: April 27, 2023.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 622 as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.34:
■ a. Suspend paragraph (e); and
■ b. Add paragraph (i).
The addition reads as follows:

§ 622.34 Seasonal and area closures designed to protect Gulf reef fish.

* * * * *

(i) *Seasonal closure of the recreational sector for gag.* The recreational harvest of gag in or from the Gulf EEZ is closed from January 1 through August 31 and from November 10 through December 31. During the closure, the bag and possession limits for gag harvested in or from the Gulf EEZ are zero.

■ 3. In § 622.39:
■ a. Suspend paragraph (a)(1)(iii)(B); and
■ b. Add paragraph (a)(1)(iii)(D).
The addition reads as follows:

§ 622.39 Quotas.

* * * * *

(a) * * *
(1) * * *
(iii) * * *

(D) *Gag.* Shallow-water groupers (SWG) have a separate quota for gag, among the other species described in the introductory text of paragraph (a)(1)(iii) of this section, and as specified in this paragraph (a)(1)(iii)(D). This quota is specified in gutted weight, that is, eviscerated but otherwise whole. The commercial quota for gag is 199,000 lb (90,265 kg).

* * * * *

■ 4. In § 622.41:
■ a. Suspend paragraph (d); and
■ b. Add paragraph (r).
The addition reads as follows:

§ 622.41 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

(r) *Gag*—(1) *Commercial sector.* The IFQ program for groupers and tilefishes in the Gulf of Mexico serves as the accountability measure for commercial gag. The commercial ACL in gutted weight is 258,000 lb (117,027 kg).

(2) *Recreational sector.* (i) Without regard to overfished status, if gag recreational landings, as estimated by the SRD, reach or are projected to reach the applicable ACLs specified in paragraph (r)(2)(iv) of this section, the AA will file a notification with the Office of the Federal Register, to close the recreational sector for the remainder of the fishing year. On and after the effective date of such a notification, the bag and possession limits of gag in or from the Gulf EEZ are zero. These bag and possession limits apply in the Gulf

on a vessel for which a valid Federal charter vessel/headboat permit for Gulf reef fish has been issued, without regard to where such species were harvested, *i.e.,* in State or Federal waters.

(ii) Without regard to overfished status, and in addition to the measures specified in paragraph (r)(2)(i) of this section, if gag recreational landings, as estimated by the SRD, exceed the applicable ACLs specified in paragraph (r)(2)(iv) of this section, the AA will file a notification with the Office of the Federal Register to maintain the gag ACT, specified in paragraph (r)(2)(iv) of this section, for that following fishing year at the level of the prior year's ACT, unless the best scientific information available determines that maintaining the prior year's ACT is unnecessary. In addition, the notification will reduce the length of the recreational gag fishing season the following fishing year by the amount necessary to ensure gag recreational landings do not exceed the recreational ACT in the following fishing year.

(iii) If gag are overfished, based on the most recent status of U.S. Fisheries Report to Congress, and gag recreational landings, as estimated by the SRD, exceed the applicable ACL specified in paragraph (r)(2)(iv) of this section, the following measures will apply. In addition to the measures specified in paragraphs (r)(2)(i) and (ii) of this section, the AA will file a notification with the Office of the Federal Register, at or near the beginning of the following fishing year to reduce the ACL for that following year by the amount of the ACL overage in the prior fishing year, and reduce the ACT, as determined in paragraph (r)(2)(ii) of this section, by the amount of the ACL overage in the prior fishing year, unless the best scientific information available determines that a greater, lesser, or no overage adjustment is necessary.

(iv) The recreational ACL in gutted weight is 403,759 lb (183,142 kg). The recreational ACT in gutted weight is 362,374 lb (164,370 kg).

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 230427–0114]

RTID 0648–XC715

Fisheries of the Northeastern United States; Atlantic Spiny Dogfish Fishery; 2023 Specifications

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues final specifications for the 2023 Atlantic spiny dogfish fishery, as recommended by the Mid-Atlantic and New England Fishery Management Councils. This action is necessary to establish allowable harvest levels for the spiny dogfish fishery to prevent overfishing while enabling optimum yield, using the best scientific information available.

DATES: Effective on May 1, 2023.

ADDRESSES: The Mid-Atlantic Fishery Management Council prepared an environmental assessment (EA) for these specifications that describes the action, other considered alternatives, and analyses of the impacts of all alternatives. Copies of the specifications document, including the EA, are available on request from Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, Suite 201, 800 North State Street, Dover, DE 19901. These documents are also accessible via the internet at *https://www.mafmc.org/action-archive.*

FOR FURTHER INFORMATION CONTACT: Cynthia Ferrio, Fishery Policy Analyst, (978) 281–9180.

SUPPLEMENTARY INFORMATION:

Background

The Mid-Atlantic and New England Fishery Management Councils jointly manage the Atlantic Spiny Dogfish Fishery Management Plan (FMP), with the Mid-Atlantic Council acting as the administrative lead. Additionally, the Atlantic States Marine Fisheries Commission manages the spiny dogfish fishery in state waters from Maine to North Carolina through an interstate fishery management plan. The Federal FMP requires the specification of an acceptable biological catch (ABC), annual catch limit (ACL), annual catch target (ACT), total allowable landings (TAL), and a coastwide commercial quota. These limits and other related management measures may be set for up to 5 fishing years at a time, with each fishing year running from May 1 through April 30. This action implements Atlantic spiny dogfish specifications for fishing year 2023, as recommended by the Councils and Commission.

In response to declining trends in stock biomass and productivity shown in a 2022 data update, the Mid-Atlantic Council's Scientific and Statistical Committee (SSC) recommended a 2023 ABC of 7,788 mt, a 55-percent decrease from fishing year 2022. Preliminary indications from the December 2022 Atlantic spiny dogfish research track assessment support the SSC's recommendations. Both the Mid-Atlantic and New England Councils accepted the SSC's recommended ABC, and recommended the subsequent catch limits in accordance with the specifications process, including a coast-wide commercial quota of 5,449 mt; a 59-percent decrease from fishing year 2022. Neither Council recommended any changes to other management measures, such as trip limits.

The proposed rule for this action published in the **Federal Register** on March 9, 2023 (88 FR 14590), and comments were accepted through March 24, 2023. NMFS received 18 comments from the public, and no changes were made to the final rule because of those comments (see Comments and Responses for additional detail). Additional background information regarding the development of these specifications was provided in the proposed rule and is not repeated here.

Final Specifications

This action implements the Councils' recommendations for 2023 Atlantic spiny dogfish specifications (Table 1), which are consistent with the Mid-Atlantic SSC's recommendations and the best available science. These final specifications decrease the ABC by 55 percent from fishing year 2022 and coastwide commercial quota by 59 percent, based on declining trends in stock biomass and productivity. This action makes no changes to the 7,500-lb (3,402-kg) trip limit.

TABLE 1—FINAL SPINY DOGFISH FISHERY SPECIFICATIONS FOR FISHING YEAR 2023

	Million lb	Metric tons
ABC	17.17	7,788
ACL = ACT	17.09	7,751
TAL	12.48	5,663

TABLE 1—FINAL SPINY DOGFISH FISHERY SPECIFICATIONS FOR FISHING YEAR 2023—Continued

	Million lb	Metric tons
Commercial Quota	12.01	5,449

The reduction in commercial quota is not expected to substantially change overall fishing activity, or result in catch overages or revenue losses in the spiny dogfish fishery. In recent years, the spiny dogfish quotas have not constrained landings in the fishery, and even with a 59-percent decrease the 2023 commercial quota will still be higher than the total annual landings in fishing year 2021. There is a 2023 management track stock assessment for Atlantic spiny dogfish that is expected to inform development of the next set of specifications for fishing year 2024.

Comments and Responses

The public comment period for the proposed rule ended on March 24, 2023, and NMFS received 18 comments from the public. No changes were made to the final rule as a result of these comments.

Comment 1: Twelve comments did not support the proposed decrease in 2023 commercial quota. Six of these comments simply opposed this action, and expressed reservations about the data used to determine that the stock is declining, because many fishing vessels regularly encounter high numbers of dogfish. They also mentioned that dogfish should continue to be fished, because they are a predator of more valuable fish. Four of these commenters were also specifically concerned about the effect that the reduction in quota may have on the few remaining processors that accept spiny dogfish, and that the industry itself (and not the stock) is at risk. Two of these comments also mentioned that managers should focus on the potential negative effects of wind farm development, because it could be affecting the dogfish stock more than fishing pressure.

Response: These specifications are based on the best available science, and impacts to industry or from offshore wind were discussed throughout the development of this action and analyzed in the EA for this action. As noted in the proposed rule and this final rule, although these specifications substantially reduce the annual quota, there are no substantial impacts expected to fishing behavior overall as a result of this reduction.

Comment 2: One commenter suggested that fishing behavior is impacted more by weather and market price than by quotas, so we should not compare quotas to annual landings.

Response: NMFS recognizes that there are other factors that may impact fishing behavior more than annual quotas, but is adjusting measures within and in accordance with the FMP, as appropriate, to prevent overfishing of the spiny dogfish stock.

Comment 3: Another commenter recommended reducing trip limits instead of the coastwide quota to better address fishing pressure on the stock.

Response: NMFS is adjusting the quota as described in the FMP specifications process based on the reduced ABC recommended by the Mid-Atlantic SSC to prevent overfishing of the stock. There has also been no substantial impact on fishing effort resulting from the trip limit increase in fishing year 2022.

Comment 4: Three comments were in support of this action as proposed, noting the need to protect the declining stock and acknowledging that the economic impacts of the quota reduction are expected to be minimal due to the comparatively low annual landings in recent years.

Response: NMFS agrees and is implementing the 2023 specifications as proposed.

Comment 5: One comment expressed concern about the overfishing of spiny dogfish, while also opposing this action in its entirety. However, no explanation or rationale was provided for the opposition to this action.

Response: The specifications in this final rule were developed and proposed to prevent overfishing on the spiny dogfish stock. NMFS is unable to respond further to this comment, as no specific reasons were given for the opposition to this action.

Changes From the Proposed Rule

There are no changes from the proposed rule.

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the NMFS Assistant Administrator, Greater Atlantic Region, has determined that these final specifications are necessary for the conservation and management of the Atlantic spiny dogfish fishery, and that they are consistent with the Atlantic Spiny Dogfish FMP, the Magnuson-Stevens Act, and other applicable law.

The need to implement these measures in a timely manner to ensure that these final specifications are in place for the start of the 2023 spiny dogfish fishing year constitutes good cause under the authority contained in 5 U.S.C. 553(d)(3) to waive the 30-day delay in the effective date of this action. The 2023 fishing year begins on May 1, 2023. A delay in the date of effectiveness beyond May 1 would be contrary to the public interest as it could create confusion in the spiny dogfish industry around current quotas, and with state agencies as they prepare their annual management measures. Furthermore, regulated parties do not require any additional time to come into compliance with this rule, and thus, a 30-day delay before the final rule becomes effective does not provide any benefit. Unlike actions that require an adjustment period, spiny dogfish fishing vessels will not have to purchase new equipment or otherwise expend time or money to comply with these management measures. Rather, complying with this final rule simply means adhering to the new catch limits set for the 2023 fishing year. Fishery stakeholders have also been involved in the development of this action and are anticipating this rule. For these reasons, there is good cause not to delay this final rule's effectiveness, consistent with 5 U.S.C. 553(d)(3), and to implement this action on May 1, 2023, for the start of the 2023 fishing year.

This final rule is not subject to review under Executive Order 12866 because the action contains no implementing regulations.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration at the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification, and the initial certification remains unchanged. As a result, a final regulatory flexibility analysis is not required and none was prepared.

This final rule does not duplicate, conflict, or overlap with any existing Federal rules.

This action contains no information collection requirements under the Paperwork Reduction Act of 1995.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 27, 2023.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[FR Doc. 2023–09391 Filed 5–1–23; 8:45 am]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 230224–0053; RTID 0648–XC942]

Fisheries of the Exclusive Economic Zone off Alaska; Pacific Cod by Vessels Using Jig Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting directed fishing for Pacific cod by vessels using jig gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the A season allowance of the 2023 total allowable catch of Pacific cod by vessels using jig gear in the Central Regulatory Area of the GOA.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), April 28, 2023, through 1200 hours, A.l.t., June 10, 2023.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907–586–7241.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The A season allowance of the 2023 Pacific cod total allowable catch (TAC) apportioned to vessels using jig gear in the Central Regulatory Area of the GOA is 67 metric tons (mt) as established by the final 2023 and 2024 harvest specifications for groundfish in the GOA (88 FR 13238, March 2, 2023).

In accordance with § 679.20(d)(1)(i), the Regional Administrator has determined that the A season allowance of the 2023 Pacific cod TAC apportioned to vessels using jig gear in the Central Regulatory Area of the GOA will soon be reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 62 mt and is setting aside the remaining 5 mt as bycatch to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for Pacific cod by vessels using jig gear in the Central Regulatory Area of the GOA.

While this closure is effective, the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion, and would delay the closure of Pacific cod by vessels using jig gear in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of April 27, 2023.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 28, 2023.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

Proposed Rules

Federal Register
Vol. 88, No. 85
Wednesday, May 3, 2023

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

[NRC–2018–0291]

RIN 3150–AK23

American Society of Mechanical Engineers Code Cases and Update Frequency; Extension of Comment Period

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On March 6, 2023, the U.S. Nuclear Regulatory Commission (NRC) solicited comments on proposed amendments to its regulations to incorporate by reference proposed revisions to three regulatory guides, which would approve new, revised, and reaffirmed code cases published by the American Society of Mechanical Engineers. In addition, the rulemaking proposed to extend the time periods required for licensees to update their codes of record. The public comment period was originally scheduled to close on May 5, 2023. The NRC has decided to extend the public comment period by an additional 42 days to June 16, 2023, to allow more time for members of the public to develop and submit their comments.

DATES: The due date of comments requested in the document published on March 6, 2023 (88 FR 13717) is extended. Comments should be filed no later than June 16, 2023. Comments received after this date will be considered, if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods (unless the document published on March 6, 2023, describes a different method for submitting comments on a specific subject); however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2018–0291. Address questions about NRC dockets to Dawn Forder; telephone: 301–415–3407; email: *Dawn.Forder@nrc.gov.* For technical questions contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Email comments to: Rulemaking.Comments@nrc.gov.* If you do not receive an automatic email reply confirming receipt, then contact us at 301–415–1677.
- *Fax comments to:* Secretary, U.S. Nuclear Regulatory Commission at 301–415–1101.
- *Mail comments to:* Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Rulemakings and Adjudications Staff.
- *Hand deliver comments to:* 11555 Rockville Pike, Rockville, Maryland 20852, between 7:30 a.m. and 4:15 p.m. eastern time, Federal workdays; telephone: 301–415–1677.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Soly I. Soto Lugo, Office of Nuclear Material and Safeguards, telephone: 301–415–7528, email: *Soly.Sotolugo@nrc.gov* and Bruce Lin, Office of Nuclear Regulatory Research, telephone: 301–415–2446, email: *Bruce.Lin@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2018–0291 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2018–0291.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2018–0291 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

On March 6, 2023, the NRC solicited comments on proposed amendments to

its regulations to incorporate by reference proposed revisions to three regulatory guides, which would approve new, revised, and reaffirmed code cases published by the American Society of Mechanical Engineers. In addition, the NRC requested comments on its proposal to extend the time periods required for licensees to update their codes of record. The public comment period was originally scheduled to close on May 5, 2023.

On April 19, 2023, the NRC received two public comments (ADAMS Accession Nos. ML23109A141 and ML23109A142) requesting that the comment period for the proposed rule be extended by an additional 1 to 2 months. The requesters expressed that American Society of Mechanical Engineers (ASME) Code Committee meetings are scheduled for May 2023, and that these ASME meetings would be beneficial to allow discussions of the proposed rule before submission of any further public comments.

The NRC seeks to ensure that the public has a reasonable opportunity to provide the NRC with comments on this proposed action. The NRC acknowledges that discussions at the ASME Code Committee meetings may assist in the development of comments. The NRC has decided to extend the public comment period on this document until June 16, 2023, to allow more time for members of the public to submit their comments.

The NRC may post materials related to this document, including public comments, on the Federal rulemaking website at *https://www.regulations.gov* under Docket ID NRC–2018–0291. In addition, the Federal rulemaking website allows members of the public to receive alerts when changes or additions occur in a docket folder. To subscribe: (1) navigate to the docket folder (NRC–2018–0291); (2) click the ''Subscribe'' link; and (3) enter an email address and click on the ''Subscribe'' link.

Dated: April 26, 2023.

For the Nuclear Regulatory Commission.

Andrea D. Veil,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 2023–09218 Filed 5–2–23; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 52

[NRC–2023–0054]

Draft Regulatory Guide: Quality Assurance Program Criteria (Design and Construction)

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft regulatory guide (DG), DG–1403, ''Quality Assurance Program Criteria (Design and Construction).'' This DG is proposed Revision 6 of Regulatory Guide (RG) 1.28 of the same name. The proposed revision endorses Nuclear Energy Institute (NEI) 14–05A, ''Guidelines for the Use of Accreditation in Lieu of Commercial Grade Surveys for Procurement of Laboratory Calibration and Test Services,'' Revision 1, issued November 2020, as an acceptable approach for licensees and suppliers subject to the quality assurance (QA) requirements of NRC regulations. Also in this proposed revision, the NRC staff endorses the Part I and Part II requirements included in NQA–1–2017, NQA–1–2019, and NQA–1–2022 for the implementation of a QA program during the design and construction phases of nuclear power plants and fuel reprocessing plants.

DATES: Submit comments by June 2, 2023. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal rulemaking website:

- *Federal Rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0054. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A06, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Andrea Keim, Office of Nuclear Reactor Regulation, telephone: 301–415–1671; email: *Andrea.Keim@nrc.gov,* or James Steckel, Office of Nuclear Regulatory Research, telephone: 301 415–1026; email: *James.Steckel@nrc.gov.* Both are staff members of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2023–0054 when contacting the NRC about the availability of information regarding this action. You may obtain publicly available information related to this action, by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0054.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2023–0054 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly

disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's ''Regulatory Guide'' series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The DG, entitled, ''Quality Assurance Program Criteria (Design and Construction)'' is temporarily identified by its task number, DG–1403 (ADAMS Accession No. ML22304A054).

This DG is proposed Revision 6 of RG 1.28, ''Quality Assurance Program Criteria (Design and Construction).'' The proposed DG describes methods and procedures that the NRC staff considers acceptable for use in complying with the agency's regulations regarding the QA program criteria for the design and construction phases of nuclear power plants and fuel reprocessing plants. It provides an adequate basis for complying with the requirements of appendix B to part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), subject to certain exceptions and clarifications of NQA–1–2017, NQA–1–2019, and NQA–1–2022 identified in proposed Revision 6 of RG 1.28. DG–1403, endorses, with some clarifications and exceptions, three versions of the American Society of Mechanical Engineers (ASME) NQA–1 standard: NQA–1–2017, NQA–1–2019, and NQA–1–2022. The previous version of RG 1.28 (Revision 5) approved the use of NQA–1b–2011 Addenda to ASME NQA–1–2008, NQA–1–2012, and NQA–1–2015, with certain clarifications and regulatory positions. The staff determined that the NQA–1–2017, NQA–1–2019, and NQA–1–2022 versions provide the most current guidance for QA, and the NRC staff endorses the Part I and Part II requirements included in NQA–1–2017, NQA–1–2019, and NQA–1–2022 for the implementation of a QA program during the design and construction phases of nuclear power plants and fuel reprocessing plants. These Parts provide an adequate basis for complying with the requirements of appendix B to 10 CFR part 50, subject to certain exceptions and clarifications of NQA–1–2017, NQA–1–2019, and NQA–1–2022 identified in DG–1403. This DG also endorses NEI 14–05A, ''Guidelines for the Use of Accreditation in Lieu of Commercial Grade Surveys for Procurement of Laboratory Calibration and Test Services,'' Revision 1, issued November 2020, as an acceptable approach for licensees and suppliers subject to the QA requirements of appendix B to 10 CFR part 50.

The staff is also issuing for public comment a draft regulatory analysis (ADAMS Accession No. ML22304A055). The staff developed a regulatory analysis to assess the value of issuing or revising a regulatory guide as well as alternative courses of action.

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the ''Proposed Rules'' section of the **Federal Register** to comply with publication requirements under 1 CFR chapter I.

III. Backfitting, Forward Fitting, and Issue Finality

DG–1403, if finalized, would revise RG 1.28, and provide NRC staff endorsement of the Part I and Part II requirements. This revision would apply to both production and utilization nuclear facilities. Issuance of DG–1403, if finalized, would not constitute backfitting as defined in 10 CFR 50.109, ''Backfitting,'' and as described in NRC Management Directive (MD) 8.4, ''Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests''; constitute forward fitting as that term is defined and described in MD 8.4; or affect the issue finality of any approval issued under 10 CFR part 52.

IV. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at *https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html.* Suggestions will be considered in future updates and enhancements to the ''Regulatory Guide'' series.

Dated: April 26, 2023.

For the Nuclear Regulatory Commission.

Meraj Rahimi,

Chief, Regulatory Guide and Programs Management Branch, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 2023–09160 Filed 5–2–23; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 50 and 52

[NRC–2023–0089]

Draft Regulatory Guide: Guidelines for Lightning Protection for Production and Utilization Facilities

AGENCY: Nuclear Regulatory Commission

ACTION: Draft guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft regulatory guide (DG), DG–1409, ''Guidelines for Lightning Protection for Production and Utilization Facilities.'' This DG is the proposed Revision 1 of Regulatory Guide (RG) 1.204, ''Guidelines for Lightning Protection of Nuclear Power Plants.'' DG–1409 describes an approach that is acceptable to the staff of the NRC to meet regulatory requirements for adequate lightning protection of safety-related systems, structures, and components (SSCs). This DG endorses, with clarifications, the methods described in Institute of Electrical and Electronics Engineers (IEEE) Standard (Std.) 665–1995, ''IEEE Standard for Generating Station Grounding''; IEEE Std. 666–2007, ''IEEE Design Guide for Electrical Power Service Systems for Generating Stations''; IEEE Std. 1050–2004, ''IEEE Guide for Instrumentation and Control Equipment Grounding in Generating Stations''; and IEEE Std. C62.23–2017, ''IEEE Application Guide for Surge Protection of Electric Generating Plants.''

DATES: Submit comments by June 2, 2023. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic

comment submission through the Federal rulemaking website:

• *Federal rulemaking website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0089. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: James Steckel, telephone: 301–415–1026; email: *James.Steckel@nrc.gov;* and Roy Hardin, telephone: 301–415–2181; email: *Roy.Hardin@nrc.gov.* Both are staff of the Office of Nuclear Regulatory Research at the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2023–0089, when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0089.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* DG–1409, ''Guidelines for Lightning Protection for Production and Utilization Facilities,'' is available in ADAMS under Accession No. ML22208A232.

• *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2023–0089 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's ''Regulatory Guide'' series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The DG, entitled ''Guidelines for Lightning Protection for Production and Utilization Facilities,'' is temporarily identified by its task number, DG–1409.

DG–1409 is proposed Revision 1 of RG 1.204. This proposed revision endorses, with clarifications, the methods described in Institute of Electrical and Electronics Engineers (IEEE) Standard (Std.) 665–1995, ''IEEE Standard for Generating Station Grounding''; IEEE Std. 666–2007, ''IEEE Design Guide for Electrical Power Service Systems for Generating Stations''; IEEE Std. 1050–2004, ''IEEE Guide for Instrumentation and Control Equipment Grounding in Generating Stations''; and IEEE Std. C62.23–2017, ''IEEE Application Guide for Surge Protection of Electric Generating Plants'' as acceptable methods for demonstrating compliance with the applicable NRC regulations for adequate lightning protection of safety-related systems, structures, and components.

The staff is also issuing for public comment a draft regulatory analysis (ADAMS Accession No. ML22208A234). The staff developed a regulatory analysis to assess the value of issuing or revising a regulatory guide as well as alternative courses of action.

As noted in the **Federal Register** on December 9, 2022 (87 FR 75671), this document is being published in the ''Proposed Rules'' section of the **Federal Register** to comply with publication requirements under 1 CFR chapter I.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of DG–1409, if finalized, would not constitute backfitting as that term is defined in section 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Backfitting,'' and as described in NRC Management Directive (MD) 8.4, ''Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests''; affect issue finality of any approval issued under 10 CFR part 52, ''Licenses, Certificates, and Approvals for Nuclear Power Plants''; or constitute forward fitting as defined in MD 8.4, because, as explained in this DG, applicants and licensees would not be required to comply with the positions set forth in this DG.

IV. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC's public website at *https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html.* Suggestions will be considered in future updates and enhancements to the ''Regulatory Guide'' series.

Dated: April 28, 2023.

For the Nuclear Regulatory Commission.

Meraj Rahimi,

Chief, Regulatory Guide and Programs Management Branch, Division of Engineering, Office of Nuclear Regulatory Research.

[FR Doc. 2023–09390 Filed 5–2–23; 8:45 am]

BILLING CODE 7590–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0163; Project Identifier AD–2022–01380–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–02–16, which applies to all The Boeing Company Model 787–8, 787–9, and 787–10 airplanes. AD 2022–02–16 requires revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate limitations prohibiting certain landings and the use of certain minimum equipment list (MEL) items, and to incorporate operating procedures for calculating landing distances, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–02–16, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations section of the existing AFM to incorporate limitations prohibiting certain landings and the use of certain MEL items, and would retain the operating procedures from AD 2022–02–16 for calculating landing distances, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0163; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0163; Project Identifier AD–2022–01380–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 787–8, 787–9, and 787–10 airplanes and issued AD 2022–02–16, Amendment 39–21913 (87 FR 2692, January 19, 2022) (AD 2022–02–16). AD 2022–02–16 was prompted by a determination that, during landings, as a result of 5G C-Band interference, certain airplane systems may not properly transition from AIR to GROUND mode when landing on certain runways, resulting in degraded deceleration performance and longer landing distance than normal due to the effect on thrust reverser deployment, speedbrake deployment, and increased idle thrust. AD 2022–02–16 mandates procedures for operators to account for this longer landing distance, for all runway conditions, when in the presence of 5G C-Band interference as identified by NOTAM. AD 2022–02–16 prohibits operators from dispatching or releasing airplanes to affected airports when certain braking and anti-skid functions on the airplane are inoperable.

It also prohibits operators from dispatching or releasing airplanes to, or landing on, runways with condition codes 1 (ice) and 0 (wet ice, water on top of compacted snow, dry snow, or wet snow over ice). The agency issued AD 2022–02–16 to address degraded deceleration performance and longer landing distance, which could lead to a runway excursion.

Actions Since AD 2022–02–16 Was Issued

Since issuing AD 2022–02–16, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

AD 2022–02–16 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations required by AD 2022–02–16 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice. Because the 5G C-Band Interference operating procedure required by AD 2022–02–16 does not reference NOTAMs, this proposed AD would retain that operating procedure requirement with no change.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the AFM revisions required by AD 2022–02–16 until June 30, 2023. On or before June 30, 2023, this proposed AD would require replacing those AFM revisions with limitations prohibiting the same landings and use of certain MEL items at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the prohibited operations would be allowed at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (k)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations would be approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023. After June 30, 2023, operators with AMOCs approved for AD 2021–23–12 would be required to incorporate the 5G C-Band Interference operating procedure specified in paragraph (h)(2) of this proposed AD. The new AFM limitations, which would be required by paragraph (i) or (j) of this proposed AD, specify that operators must comply with this 5G C-Band Interference operating procedure.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–02–16, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 145 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

[1] This is the number of Boeing Model 787–8, 787–9, and 787–10 airplanes on the FAA's registry as of December 1, 2022.

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained action from AD 2022–02–16).	1 work-hour × $85 per hour[2] = $85	$0	$85	$12,325
New AFM revision (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 12,325

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–02–16, Amendment 39–21913 (87 FR 2692, January 19, 2022), and

■ b. Adding the following new AD:

The Boeing Company Airplanes: Docket No. FAA–2023–0163; Project Identifier AD–2022–01380–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–02–16, Amendment 39–21913 (87 FR 2692, January 19, 2022) (AD 2022–02–16).

(c) Applicability

This AD applies to all The Boeing Company Model 787–8, 787–9, and 787–10 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during landings, as a result of this interference, certain airplane systems may not properly transition from AIR to GROUND mode when landing on certain runways, resulting in a longer landing distance than normal due to the effect on thrust reverser deployment, speedbrake deployment, and increased idle thrust. The FAA is issuing this AD to address degraded deceleration performance and longer landing distance, which could lead to a runway excursion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

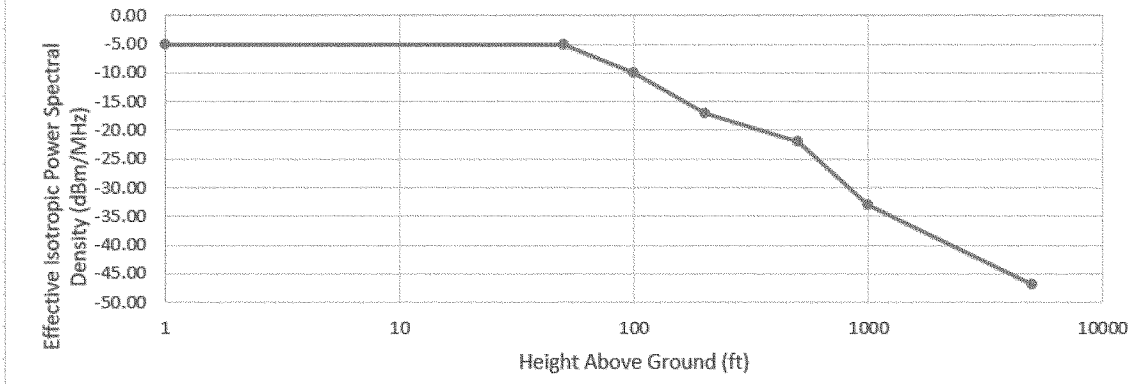
(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

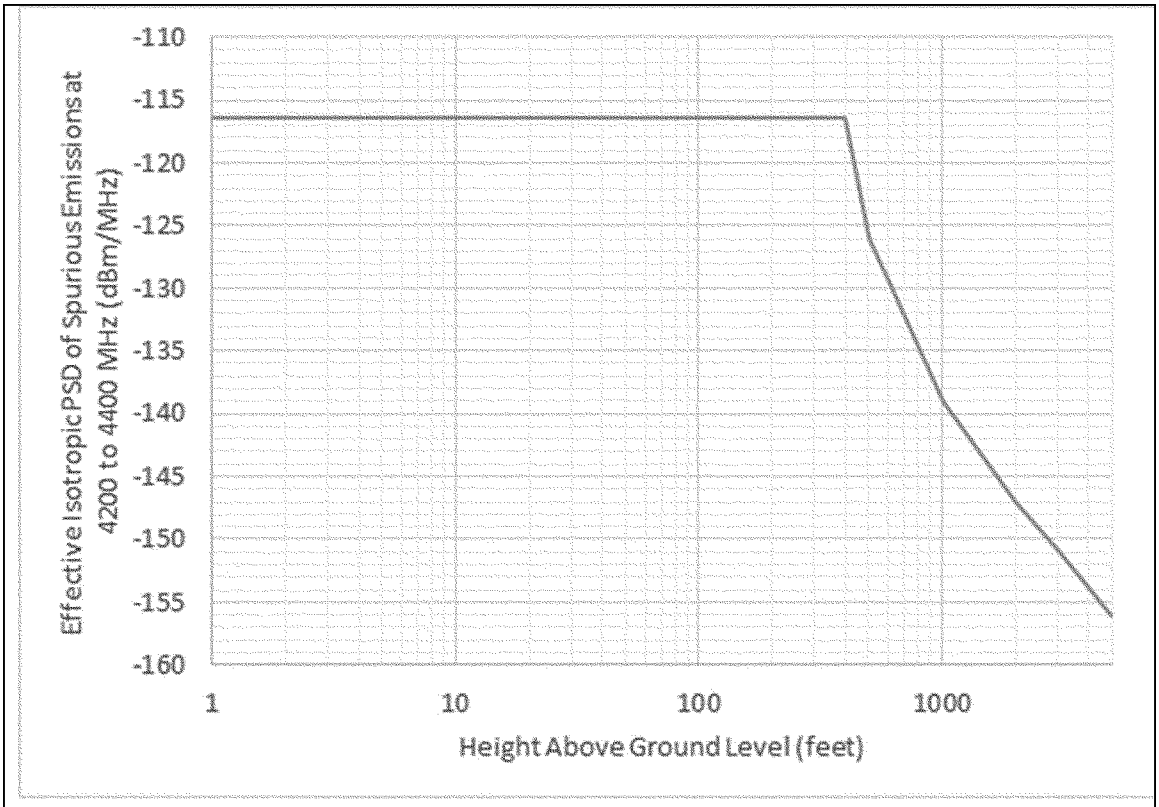
[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 787–8, 787–9, or 787–10 transport category airplane.



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

Figure 3 to paragraph (g)(4)—*Runway Condition Codes*

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(4) Runway condition codes are defined in figure 3 to paragraph (g)(4) of this AD.

Runway Condition Code	Runway Condition Description	Reported Braking Action
6	Dry	Dry
5	Wet (smooth, grooved, or porous friction course (PFC)) or frost 3 mm (0.12 inch) or less of: water, slush, dry snow, or wet snow	Good
4	Compacted snow at or below -15°C (5°F) outside air temperature (OAT)	Good to medium
3	Wet (slippery), dry snow, or wet snow (any depth) over compacted snow Greater than 3 mm (0.12 inch) of: dry snow or wet snow Compacted snow at OAT warmer than -15°C (5°F)	Medium
2	Greater than 3 mm (0.12 inch) of: water or slush	Medium to poor
1	Ice	Poor
0	Wet ice, water on top of compacted snow, dry snow, or wet snow over ice	Nil

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (h) of AD 2022–02–16.

(1) Within 2 days after January 19, 2022 (the effective date of AD 2022–02–16): Revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(1) of this AD into the existing AFM.

Figure 4 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-02-16)

Radio Altimeter 5G C-Band Interference, Landing Distance

The following limitations are required if dispatching or releasing to or landing on runways in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-02 – Antiskid Control Systems
- 32-45-01 – Wheel Brake Systems
- 32-45-01-01 – Wheel Brake Systems, Electric Brake Actuator Systems

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or releasing to or landing on runways with a runway condition code of 1 or 0 is prohibited.

Landing Distance Calculations for Runway Condition Codes 6 through 2

Operators must follow the 5G C-Band Interference Landing Distance Procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after January 19, 2022 (the effective date of AD 2022–02–16): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 5 to paragraph (h)(2) of this AD. This may be done by inserting a

copy of figure 5 to paragraph (h)(2) of this AD into the existing AFM.

Figure 5 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-02-16)

5G C-Band Interference Landing Distance

When dispatching or releasing to or landing on runways with a runway condition code of 6 through 2:

- Dispatch or Release:
  - No additional landing distance calculations are required for runway condition codes 6 and 5.
  - For runway condition codes 4 through 2, use Table 1 through 6, as applicable, to determine the unfactored landing distance, applying all adjustments. Multiply the resulting unfactored landing distance by 1.15 to obtain the minimum required landing distance.

Table 1:

787-10 / TRENT 1000

	Landing Distances and Adjustments (Feet)								
	Reference Distance	Weight Adjustment	Altitude Adjustment	Wind Adjustment per 10 Knots	Slope Adjustment per 1%	Temperature Adjustment per 10°C	Approach Speed Adjustment	Reverse Thrust Adjustment

Reference distance is based on Max Manual Braking, sea level, standard day, no wind or slope, and no reverse thrust.
Reference distance includes a distance from threshold to touchdown associated with flare time of 7 seconds.
Distances are based on HYD PRESS L+R failure distances which conservatively approximate the effects of 5G interference.
Actual (unfactored) distances are shown.
Note: per procedure, Max Manual Braking is not required for normal operations and is to be used only in the event that significant 5G interference effects occur.

- En route:
  - Plan to use Flaps 30 and V_{REF30} (with appropriate wind additives) for landing.
  - For runway condition codes 6 to 2, compute time of arrival (en route) landing distance using Table 1 through 6, as applicable, applying all adjustments. Multiply the resulting unfactored landing distance by 1.15 to obtain the minimum required landing distance at the destination. This approximates a minimum required landing distance resulting from 5G C-Band interference.
  - Determine desired AUTOBRAKE setting by using the normal configuration landing distance information from an approved source. Maximum manual braking may not be required.

- During approach and landing:
  - Monitor radio altimeter for anomalies.
  - Normal use of autothrottles is allowed. Monitor performance of autopilot and autothrottle. If the autopilot or autothrottle is not performing as expected, disconnect both the autopilot and autothrottle and apply manual inputs to ensure proper control of flight path.
  - If the autothrottle does not reduce the thrust to IDLE at 25 feet, manually reduce the thrust to idle, hold the thrust levers in the idle position and disconnect the autothrottle to prevent autothrottle from advancing the thrust levers after touchdown.
    Caution: If the autothrottle advances the thrust levers after landing, the speedbrakes will stow and the autobrake will disarm. It will not be possible to raise the reverse thrust levers to deploy the thrust reversers until the thrust levers are at idle.
  - Manual deployment of the speedbrakes may be required.
  - If the thrust reversers do not deploy, immediately ensure the speedbrakes are extended, apply manual braking and modulate as required for the existing runway conditions.
    Note: In some conditions, maximum manual braking may be required throughout the entire landing roll.

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (i) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Landing Distance

Due to the presence of 5G C-Band wireless broadband interference, when dispatching or releasing to or landing on runways in the contiguous U.S. airspace, the following limitations are required.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-02 – Antiskid Control Systems
- 32-45-01 – Wheel Brake Systems
- 32-45-01-01 – Wheel Brake Systems, Electric Brake Actuator Systems

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or releasing to or landing on runways with a runway condition code of 1 or 0 is prohibited.

Landing Distance Calculations for Runway Condition Codes 6 through 2

Operators must follow the 5G C-Band Interference Landing Distance Procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 7 to paragraph (j) of this AD. This may be done by inserting a copy of figure 7 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 7 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 7 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Landing Distance

Due to the presence of 5G C-Band wireless broadband interference, when dispatching or releasing to or landing on runways in the contiguous U.S. airspace, the following limitations are required unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-02 – Antiskid Control Systems
- 32-45-01 – Wheel Brake Systems
- 32-45-01-01 – Wheel Brake Systems, Electric Brake Actuator Systems

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or releasing to or landing on runways with a runway condition code of 1 or 0 is prohibited.

Landing Distance Calculations for Runway Condition Codes 6 through 2

Operators must follow the 5G C-Band Interference Landing Distance Procedure contained in the Operating Procedures Section of this AFM.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

[Docket No. FAA–2023–0921; Project Identifier AD–2022–01430–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–05–04, which applies to all The Boeing Company Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes, except for Model 737–200 and –200C series airplanes equipped with a certain flight control system. AD 2022–05–04 requires revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for instrument landing system (ILS) approaches, speedbrake deployment, go-arounds, and missed approaches, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–05–04, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations and operating procedures sections of the

existing AFM to incorporate specific operating procedures for ILS approaches, speedbrake deployment, go-arounds, and missed approaches, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0921; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0921; Project Identifier AD–2022–01430–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*. Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes, except for Model 737–200 and –200C series airplanes equipped with a certain flight control system, and issued AD 2022–05–04, Amendment 39–21955 (87 FR 10299, February 24, 2022) (AD 2022–05–04). AD 2022–05–04 was prompted by a determination that, during approach, landings, and go-arounds, as a result of 5G C-Band interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. AD 2022–05–04 requires revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for ILS approaches, speedbrake deployment, go-arounds, and missed approaches, when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2022–05–04 to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Actions Since AD 2022–05–04 Was Issued

Since issuing AD 2022–05–04, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define

performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

2022–05–04 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations and operating procedures required by AD 2022–05–04 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice. Because the 5G C-Band Interference operating procedure required by AD 2022–05–04 references AD 2021–23–12 for certain prohibited ILS approaches, this proposed AD would require operators to replace the procedure with an operating procedure containing the same information, except it would list the specific prohibited ILS approaches.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the AFM revisions required by AD 2022–05–04 until June 30, 2023. On or before June 30, 2023, this proposed AD would require replacing those AFM revisions with limitations requiring the same procedures for dispatch or release to airports, and approach, landing, and go-around on runways, at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the procedures would not be required at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (l)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations would be approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–05–04, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 2,328 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–05–04).	1 work-hour × $85 per hour[2] = $85	$0	$85	$197,880
New AFM revisions (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 197,880

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

[1] This is the number of affected Boeing Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes on the FAA's registry as of December 1, 2022.

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, or –900ER transport category airplane.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–05–04, Amendment 39–21955 (87 FR 10299, February 24, 2022), and

■ b. Adding the following new AD:

The Boeing Company Airplanes: Docket No. FAA–2023–0921; Project Identifier AD–2022–01430–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–05–04, Amendment 39–21955 (87 FR 10299, February 24, 2022) (AD 2022–05–04).

(c) Applicability

This AD applies to all The Boeing Company 737–100, –200, –200C, –300, –400, –500, –600, –700, –700C, –800, –900, and –900ER series airplanes, certificated in any category, except for Model 737–200 and –200C series airplanes equipped with an SP–77 flight control system.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

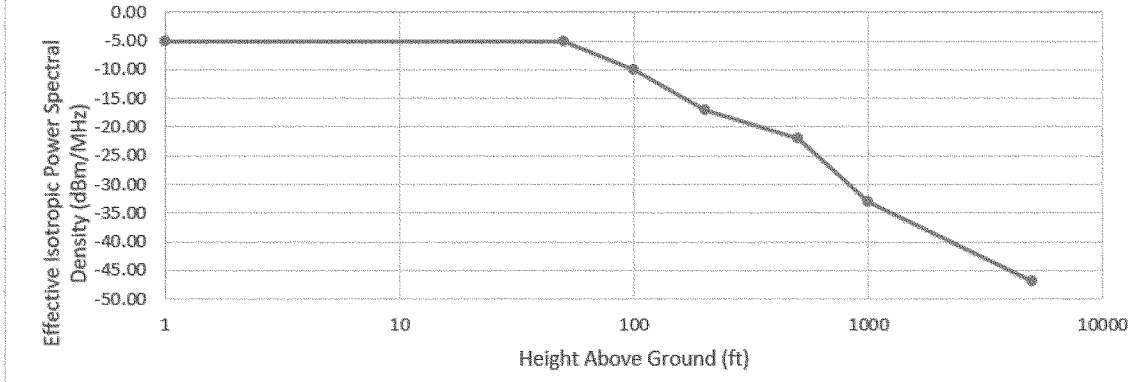
(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

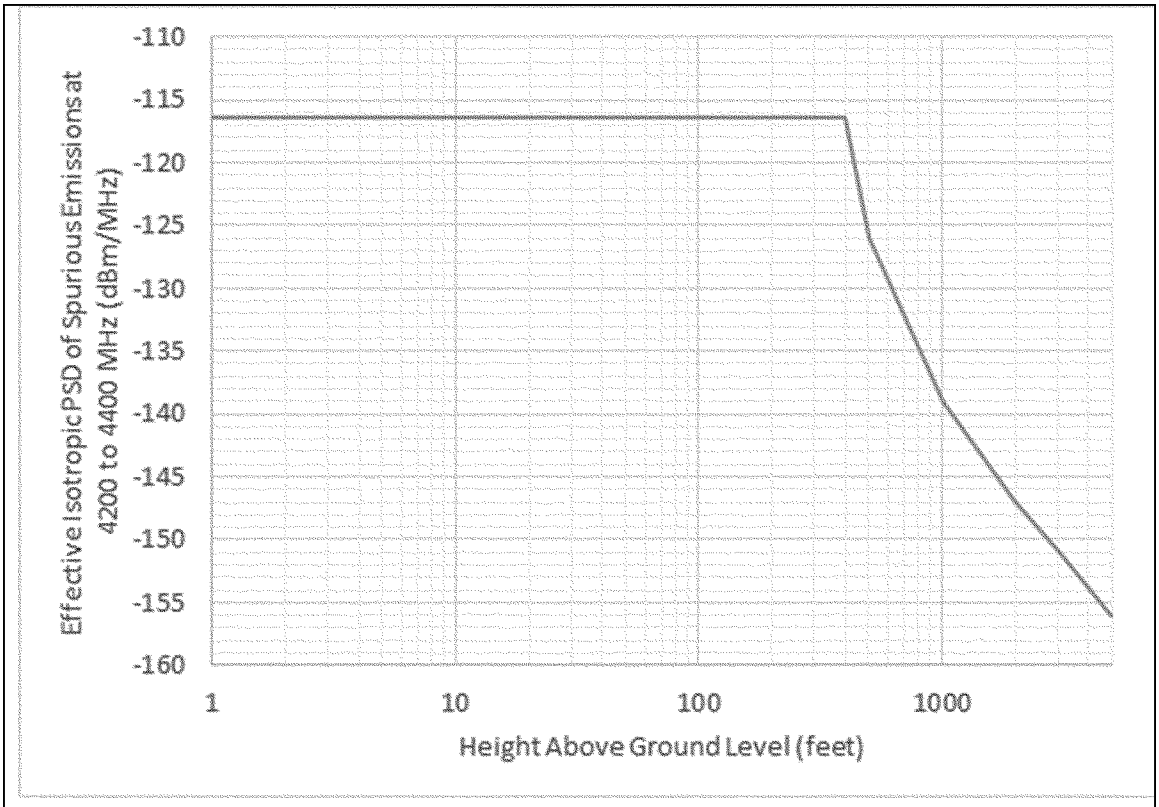
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (g) of AD 2022–05–04.

(1) Within 2 days after February 24, 2022 (the effective date of AD 2022–05–04): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-05-04)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around
The following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Approach, Landing, and Go-Around
Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after February 24, 2022 (the effective date of AD 2022–05–04): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD or figure 5 to paragraph (h)(2) of this AD, as applicable. This may be done by inserting a copy of figure 4 to paragraph (h)(2) or figure 5 to paragraph (h)(2) of this AD, as applicable, into the Operating Procedures Section of the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Operating Procedures Revision for Model 737–100, –200, –200C, –300, –400, and –500 series airplanes*

(Required by AD 2022-05-04)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches
For ILS approaches not prohibited by AD 2021-23-12, during any ILS approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

During Go-Around and Missed Approach
If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

Figure 5 to paragraph (h)(2)—*AFM Operating Procedures Revision for Model 737–600, –700, –700C, –800, –900, and –900ER series airplanes*

(Required by AD 2022-05-04)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches
For ILS approaches not prohibited by AD 2021-23-12, during any ILS (and GLS if installed) approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

Landing
Adjust operational (time of arrival) landing distance for manual speedbrakes. Automatic speedbrake deployment may not occur after touchdown.

During Go-Around and Missed Approach
If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

(i) New Requirement: AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (i) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (i)—*AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around
Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace.

Approach, Landing, and Go-Around
Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Limitations Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 7 to paragraph (j) of this AD. This may be done by inserting a copy of figure 7 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 7 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 7 to paragraph (j)—*AFM Limitations Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around
Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Approach, Landing, and Go-Around
Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(k) New Requirement: AFM Operating Procedures Revision

For all airplanes, do the actions specified in paragraphs (k)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 8 to paragraph (k) of this AD or figure 9 to paragraph (k) of this AD, as applicable. This may be done by inserting a copy of figure 8 to paragraph (k) of this AD or figure 9 to paragraph (k) of this AD, as applicable, into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(2) of this AD.

(2) Before further flight after incorporating the operating procedures specified in figure 8 to paragraph (k) of this AD or figure 9 to paragraph (k) of this AD, remove the AFM revision required by paragraph (h)(2) of this AD.

Figure 8 to paragraph (k)—*AFM Operating Procedures Revision for Model 737–100, –200, –200C, –300, –400, and –500 series airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches
For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, during any ILS approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

During Go-Around and Missed Approach
If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, during any ILS (and GLS if installed) approach with autopilot engaged or flight director ON, execute a go-around for any of the following conditions, unless the runway environment is in sight and a manual, visual landing can be accomplished:

- If the flight directors automatically retract from view, or
- If the pitch guidance indicates FLARE mode prematurely, or
- If the autothrottle retards to IDLE prematurely.

Landing

Adjust operational (time of arrival) landing distance for manual speedbrakes. Automatic speedbrake deployment may not occur after touchdown.

During Go-Around and Missed Approach

If go-around is required, ensure thrust is increased to go-around power. Do not use flight director, autopilot, or autothrottles until reaching a safe altitude. TOGA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(m) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on April 28, 2023.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0922; Project Identifier AD–2022–01431–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–06–16, which applies to all The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes. AD 2022–06–16 requires revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for takeoff, instrument landing system (ILS) approaches, non-precision approaches, and go around and missed approaches, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–06–16, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations section of the existing AFM to incorporate limitations requiring specific operating procedures, and would retain the operating procedures for takeoff, ILS approaches, non-precision approaches, and go around and missed approaches from AD 2022–06–16, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0922; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0922; Project Identifier AD–2022–01431–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes and issued AD 2022–06–16, Amendment 39–21982 (87 FR 14780, March 16, 2022) (AD 2022–06–16). AD 2022–06–16 was prompted by a determination that, during takeoff, approach, landings, and go-arounds, as a result of 5G C-Band interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. AD 2022–06–16 requires revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for takeoff, ILS approaches, non-precision approaches, and go around and missed approaches, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). The agency issued AD 2022–06–16 to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Actions Since AD 2022–06–16 Was Issued

Since issuing AD 2022–06–16, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

AD 2022–06–16 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations required by AD 2022–06–16 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice. Because the 5G C-Band Interference operating procedure required by AD 2022–06–16 does not reference NOTAMs, this proposed AD would retain that operating procedure requirement with no change.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the AFM revisions required by AD 2022–06–16, until June 30, 2023. On or before June 30, 2023, this proposed AD would require replacing those AFM revisions with limitations requiring the same procedures for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the procedures would not be required at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (k)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations would be approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023. After June 30, 2023, operators with AMOCs approved for AD 2021–23–12 would be required to incorporate the 5G C-Band Interference operating procedure specified in paragraph (h)(2) of this proposed AD. The new AFM limitations, which would be required by paragraph (i) or (j) of this proposed AD, specify that operators must comply with this 5G C-Band Interference operating procedure.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–06–16, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 137 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–02–16).	1 work-hour × $85 per hour[2] = $85	$0	$85	$11,645
New AFM revisions (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 11,645

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or

[1] This is the number of Boeing Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes on the FAA's registry as of December 1, 2022.

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, or 747–400F transport category airplane.

on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–06–16, Amendment 39–21982 (87 FR 14780, March 16, 2022), and

■ b. Adding the following new AD:

The Boeing Company Airplanes: Docket No. FAA–2023–0922; Project Identifier AD–2022–01431–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–06–16, Amendment 39–21982 (87 FR 14780, March 16, 2022) (AD 2022–06–16).

(c) Applicability

This AD applies to all The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, and 747–400F series airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that during takeoff, approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

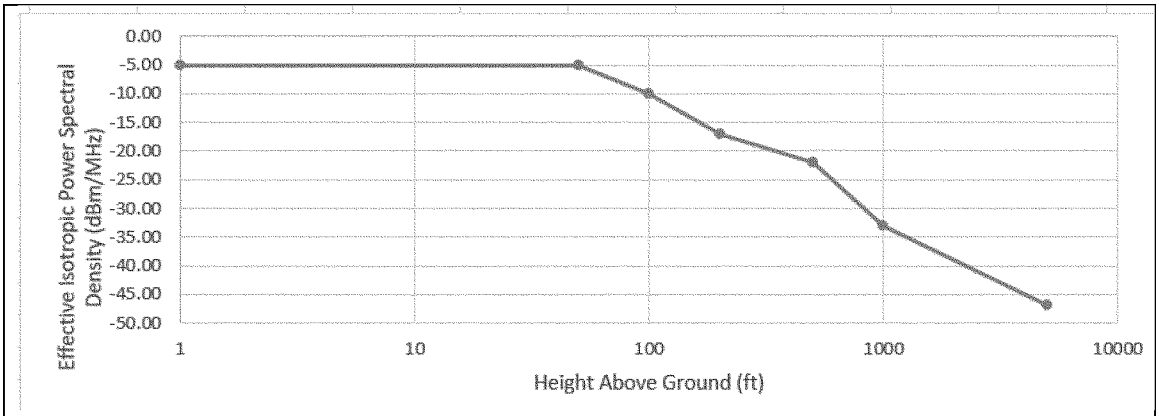
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

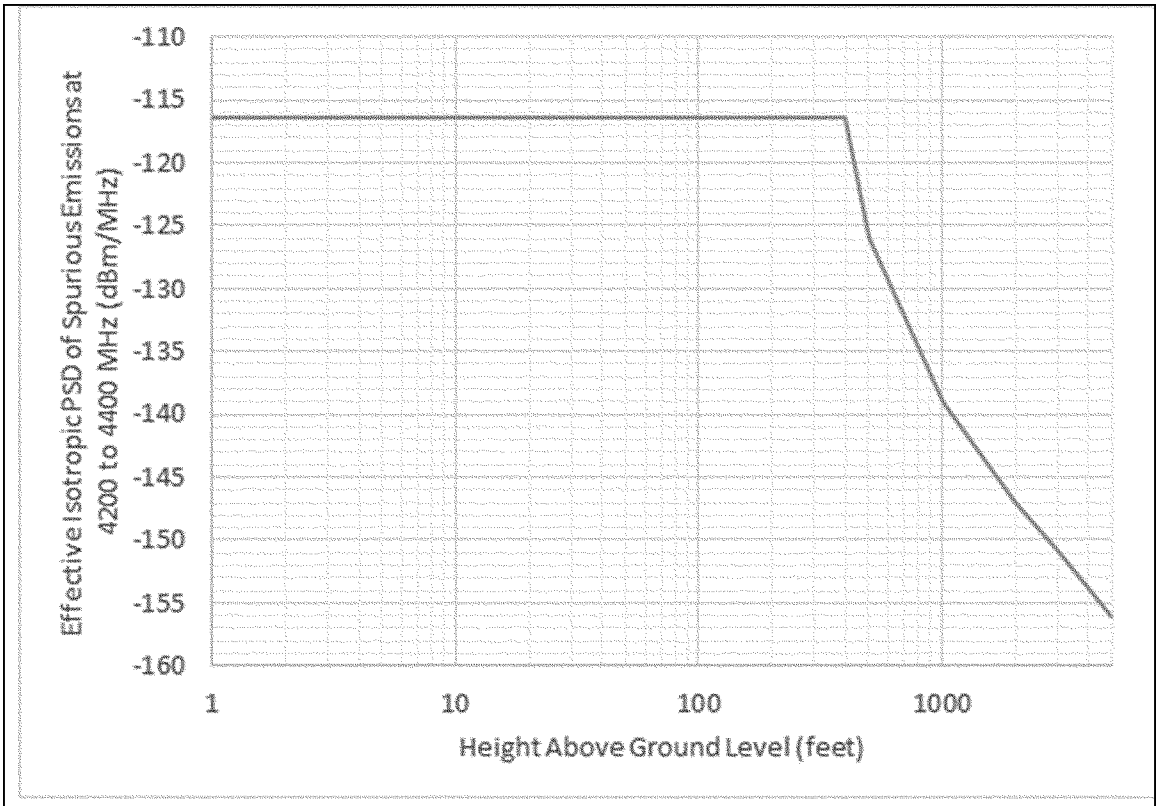
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (h) of AD 2022–02–16.

(1) Within 2 days after March 16, 2022 (the effective date of AD 2022–06–16): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revision*

(Required by AD 2022-06-16)

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

The following limitations are required for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Takeoff, Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around procedure contained in the Operating Procedures section of this AFM.

(2) Within 2 days after March 16, 2022 (the effective date of AD 2022–06–16): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(2) of this AD into the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-06-16)

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

Takeoff

If autopilot does not engage above the minimum altitude, when at a safe altitude, select both flight director switches OFF, then ON, to re-engage. LNAV and VNAV may not engage or engage at an erroneous altitude after departure.

ILS Approaches

For ILS approaches, disconnect the autopilot and autothrottle, and place both flight director switches to OFF prior to glideslope intercept. Do not set RADIO minimums on the EFIS control panel, use BARO minimums only.

Non-Precision Approaches

Autopilot, autothrottles, and flight directors may be used. Do not use autothrottles if the autopilot is disengaged. Prior to descending below MDA, disconnect the autothrottle and disengage the autopilot.

Landing

Do not rely on radio altimeter-based altitude aural callouts during approach. Adjust operational (time of arrival) landing distance for manual speedbrake deployment.

During Go-Around and Missed Approach

If go-around is required, ensure thrust is increased to go-around power.

When the flight director switches are OFF, push either TO/GA switch to display the flight director bars. When able, turn both flight directors to ON.

TO/GA mode may not be available. Autopilot may not be available. Monitor pitch and roll modes for engagement.

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (i) of this AD. This may be done by inserting a copy of figure 5 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 5 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 5 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways, in the contiguous U.S. airspace.

Takeoff, Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around procedure contained in the Operating Procedures section of this AFM.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (j) of this AD. This may be done by inserting a copy of figure 6 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff, approach, landing, and go-around on runways, in the contiguous U.S. airspace unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Takeoff, Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Takeoff, Approach, Landing, and Go-Around procedure contained in the Operating Procedures section of this AFM.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on April 28, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2023–09430 Filed 5–1–23; 4:15 pm]

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0672; Project Identifier AD–2022–01429–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–04–05, which applies to all The Boeing Company Model 757 airplanes and Model 767 airplanes. AD 2022–04–05 requires revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for landing distance calculations, instrument landing system (ILS) approaches, non-precision approaches, speedbrake deployment, and go-around and missed approaches, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–04–05, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for landing distance calculations, ILS approaches, non-precision approaches, speedbrake deployment, and go-around and missed approaches, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to regulations.gov. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2023–0672; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0672; Project Identifier AD–2022–01429–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 757 and Model 767 airplanes and issued AD 2022–04–05, Amendment 39–21947 (87 FR 8152, February 14, 2022) (AD 2022–04–05). AD 2022–04–05 was prompted by a determination that, during approach, landings, and go-arounds, as a result of 5G C-band interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. AD 2022–04–05 requires revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for landing distance calculations, ILS approaches, non-precision approaches, speedbrake deployment, and go-around and missed approaches, when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2022–

02–16 to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Actions Since AD 2022–04–05 Was Issued

Since issuing AD 2022–04–05, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

2022–04–05 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations and operating procedures required by AD 2022–04–05 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice. Because the 5G C-Band Interference operating procedure required by AD 2022–04–05 references AD 2021–23–12 for certain prohibited ILS approaches, this proposed AD would require operators to replace the procedure with an operating procedure containing the same information, except it would list the specific prohibited ILS approaches.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the AFM revisions required by AD 2022–04–05 until June 30, 2023. On or before June 30, 2023, this proposed AD would require replacing those AFM revisions with limitations requiring the same procedures for dispatch or release to airports, and approach, landing, and go-around on runways, at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the procedures would not be required at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (l)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations would be approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–04–05, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 1,108 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

[1] This is the number of Boeing Model 757 and 767 airplanes on the FAA's registry as of 12/1/2022.

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–04–05).	1 work-hour × $85 per hour[2] = $85	$0	$85	$94,180
New AFM revisions (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 94,180

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–04–05, Amendment 39–21947 (87 FR 8152, February 14, 2022), and

■ b. Adding the following new AD:

The Boeing Company Airplanes: Docket No. FAA–2023–0672; Project Identifier AD–2022–01429–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–04–05, Amendment 39–21947 (87 FR 8152, February 14, 2022) (AD 2022–04–05).

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) and (2) of this AD, certificated in any category.

(1) Model 757–200, –200PF, –200CB, and –300 series airplanes.

(2) Model 767–200, –300, –300F, –400ER, and –2C series airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

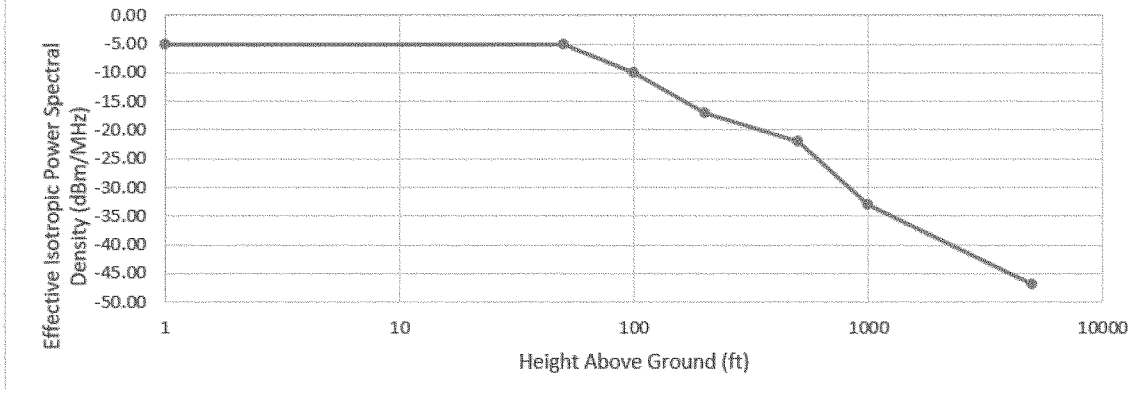
(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

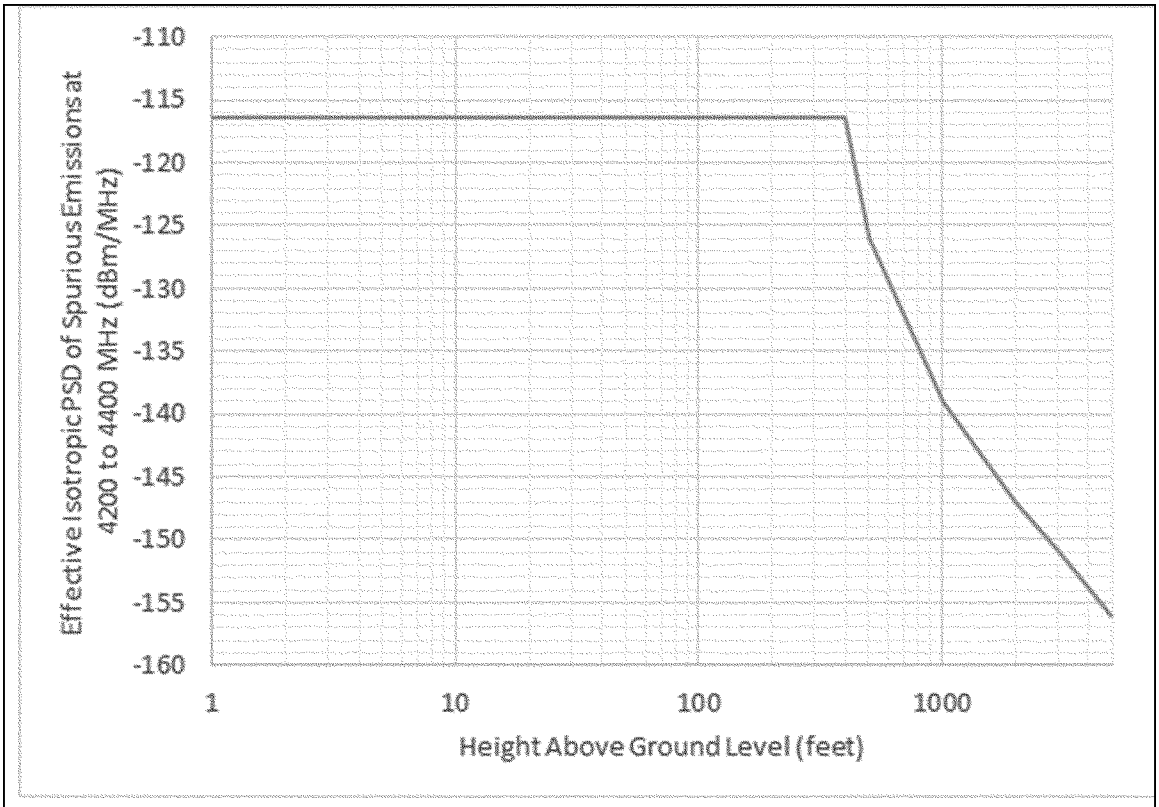
[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 757 or 767 transport category airplane.



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (g) of AD 2022–04–05.

(1) Within 2 days after February 14, 2022 (the effective date of AD 2022–04–05): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-04-05)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

The following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after February 14, 2022 (the effective date of AD 2022–04–05): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(2) of this AD into the Operating Procedures Section of the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-04-05)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Landing Distance Calculations

For airplanes with Yaw Damper Stabilizer Trim module (YSM), adjust the operational (time of arrival) landing distance for manual speedbrake deployment if MAX MANUAL braking is required. When using autobrakes, no correction is needed since the calculations already take into account that manual speedbrake deployment may be needed.

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot and autothrottle, and place both flight director switches to OFF prior to glideslope intercept.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using VNAV or V/S with flight directors, autopilot, and autothrottle to published minimums.

During Landing

For airplanes with Yaw Damper Stabilizer Trim module (YSM), if MAX MANUAL braking is required, manually deploy the speedbrake if it does not deploy automatically.

During Go-Around and Missed Approach

If the flight director is ON, cycle to OFF, then ON, as needed.
If the flight director is OFF, turn ON, as needed.

(i) New Requirement: AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (i) of this AD. This may be done by inserting a copy of figure 5 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 5 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 5 to paragraph (i)—*AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace.

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Limitations Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (j) of this AD. This may be done by inserting a copy of figure 6 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (j)—*AFM Limitations Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and approach, landing, and go-around on runways, in the contiguous U.S. airspace unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Approach, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedure contained in the Operating Procedures Section of this AFM.

(k) New Requirement: AFM Operating Procedures Revision

For all airplanes, do the actions specified in paragraphs (k)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 7 to paragraph (k) of this AD. This may be done by inserting a copy of figure 7 to paragraph (k) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(2) of this AD.

(2) Before further flight after incorporating the operating procedures specified in figure 7 to paragraph (k) of this AD, remove the AFM revision required by paragraph (h)(2) of this AD.

Figure 7 to paragraph (k)—*AFM Operating Procedures Revision*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

Landing Distance Calculations
For airplanes with Yaw Damper Stabilizer Trim module (YSM), adjust the operational (time of arrival) landing distance for manual speedbrake deployment if MAX MANUAL braking is required. When using autobrakes, no correction is needed since the calculations already take into account that manual speedbrake deployment may be needed.

ILS Approaches
For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot and autothrottle, and place both flight director switches to OFF prior to glideslope intercept.

Non-Precision Approaches
Non-precision instrument approaches can be conducted using VNAV or V/S with flight directors, autopilot, and autothrottle to published minimums.

During Landing
For airplanes with Yaw Damper Stabilizer Trim module (YSM), if MAX MANUAL braking is required, manually deploy the speedbrake if it does not deploy automatically.

During Go-Around and Missed Approach
If the flight director is ON, cycle to OFF, then ON, as needed.
If the flight director is OFF, turn ON, as needed.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(m) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

(m) Material Incorporated by Reference

None.

Issued on April 28, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910–13–C

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0923; Project Identifier AD–2022–01432–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–09–18, which applies to all The Boeing Company Model 707, 717, and 727 airplanes; Model DC–8, DC–9, and DC–10 airplanes; Model MD–10 and MD–11 airplanes; Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), and MD–88

airplanes; and Model MD 90–30 airplanes. AD 2022–09–18 requires revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate specific operating procedures for, depending on the airplane model, instrument landing system (ILS) approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, when in the presence of 5G C Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–09–18, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations and operating procedures sections of the AFM to incorporate specific operating procedures for, depending on the airplane model, ILS approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0923; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0923; Project Identifier AD–2022–01432–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 707, 717, and 727 airplanes; Model DC–8, DC–9, and DC–10 airplanes; Model MD–10 and MD–11 airplanes; Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), and MD–88 airplanes; and Model MD–90–30 airplanes, and issued AD 2022–09–18, Amendment 39–22038 (87 FR 31097, May 23, 2022) (AD 2022–09–18). AD 2022–09–18 was prompted by a determination that, during approach, landings, and go-arounds, as a result of 5G C-Band interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. AD 2022–09–18 requires revising the limitations and operating procedures sections of the existing AFM to incorporate specific operating procedures for, depending on the airplane model, ILS approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2022–09–18 to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

Actions Since AD 2022–09–18 Was Issued

Since issuing AD 2022–09–18, the FAA determined that additional

limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

AD 2022–09–18 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations and operating procedures required by AD 2022–09–18 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice. Because the applicable 5G C-Band Interference operating procedures required by AD 2022–09–18 reference AD 2021–23–12 for certain prohibited ILS approaches, this proposed AD would require operators to replace the procedure with an operating procedure containing the same information, except it would list the specific prohibited ILS approaches.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the AFM revisions required by AD 2022–09–18 until June 30, 2023. On or before June 30, 2023, this proposed AD would require replacing those AFM revisions with limitations requiring the same procedures for ILS approaches, non-precision approaches, ground spoiler deployment, and go-around and missed approaches, at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the procedures would not be required at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (m)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations would be approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–09–18, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 476 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

[1] This is the number of Boeing Model 707, 717, and 727 airplanes; Model DC–8, DC–9, and DC–10 airplanes; Model MD 10 and MD–11 airplanes; Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), and MD–88 airplanes; and Model MD 90–30 airplanes on the FAA's registry as of December 1, 2022.

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–09–18).	1 work-hour × $85 per hour[2] = $85	$0	$85	$40,460
New AFM revisions (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 40,460

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–09–18, Amendment 39–22038 (87 FR 31097, May 23, 2022), and

■ b. Adding the following new AD:

The Boeing Company Airplanes: Docket No. FAA–2023–0923; Project Identifier AD–2022–01432–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–09–18, Amendment 39–22038 (87 FR 31097, May 23, 2022) (AD 2022–09–18).

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) through (9) of this AD, certificated in any category.

(1) Model 707–100 Long Body, –200, –100B Long Body, and –100B Short Body series airplanes, and Model 707–300, –300B, –300C, and –400 series airplanes.

(2) Model 717–200 airplanes.

(3) Model 727, 727C, 727–100, 727–100C, 727–200, and 727–200F series airplanes.

(4) Model DC–8–11, DC–8–12, DC–8–21, DC–8–31, DC–8–32, DC–8–33, DC–8–41, DC–8–42, DC–8–43, DC–8–51, DC–8–52, DC–8–53, DC–8–55, DC–8F–54, DC–8F–55, DC–8–61, DC–8–62, DC–8–63, DC–8–61F, DC–8–62F, DC–8–63F, DC–8–71, DC–8–72, DC–8–73, DC–8–71F, DC–8–72F, and DC–8–73F airplanes.

(5) Model DC–9–11, DC–9–12, DC–9–13, DC–9–14, DC–9–15, DC–9–15F, DC–9–21, DC–9–31, DC–9–32, DC–9–32 (VC–9C), DC–9–32F, DC–9–32F (C–9A, C–9B), DC–9–33F, DC–9–34, DC–9–34F, DC–9–41, and DC–9–51 airplanes.

(6) Model DC–10–10, DC–10–10F, DC–10–15, DC–10–30, DC–10–30F (KC–10A and KDC–10), DC–10–40, and DC–10–40F airplanes.

(7) Model MD–10–10F and MD–10–30F airplanes.

(8) Model MD–11 and MD–11F airplanes.

(9) Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that during approach, landings, and go-arounds, as a result of this interference, certain airplane systems may not properly function, resulting in increased flightcrew workload while on approach with the flight director, autothrottle, or autopilot engaged. The FAA is issuing this AD to address 5G C-Band interference that could result in increased flightcrew workload and could lead to reduced ability of the flightcrew to maintain safe flight and landing of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a 707, 717, 727, DC–8, DC–9, DC–10, MD 10, MD–11, DC–9–81, DC–9–82, DC–9–83, DC–9–87, MD–88, or MD–90–30 transport category airplane.

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision-Limitations

This paragraph restates the requirements of paragraph (g) of AD 2022–09–18.

(1) For airplanes identified in paragraphs (c)(1) and (c)(3) through (6) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h)(1) of this AD into the existing AFM.

Figure 3 to paragraph (h)(1)—*AFM Limitations Revision for Model 707, 727, DC–8, DC–9 (except DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87)), and DC–10*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach Procedures

The following limitations are required for ILS approaches on runways in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

ILS Approaches

Operators must use the Radio Altimeter 5G C-Band Interference, ILS Approaches procedure contained in the Operating Procedures Section of this AFM.

(2) For airplanes identified in paragraphs (c)(2), (7), and (8) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(2) of this AD into the Limitations Section of the existing AFM.

Figure 4 to paragraph (h)(2)—*AFM Limitations Revision for Model 717, MD–10, and MD–11*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around Procedures

The following limitations are required for approaches, landings, or go-arounds on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

ILS and Non Precision Approaches, Landing, and Go-Around

Operators must use the Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around procedures contained in the Operating Procedures Section of this AFM.

(3) For airplanes identified in paragraph (c)(9) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (h)(3) of this AD. This may be done by inserting a copy of figure 5 to paragraph (h)(3) of this AD into the Limitations Section of the existing AFM.

Figure 5 to paragraph (h)(3)—*AFM Limitations Revision for Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach Procedures

The following limitations are required for approaches in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

ILS and Non Precision Approaches

Operators must use the Radio Altimeter 5G C-Band Interference, Approaches procedures contained in the Operating Procedures Section of this AFM.

(i) Retained AFM Revision-Operating Procedures

This paragraph restates the requirements of paragraph (h) of AD 2022–09–18.

(1) For airplanes identified in paragraphs (c)(1) and (3) through (6) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Operating Procedures Section of the existing AFM to include the information specified in figure 6 to paragraph (i)(1) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i)(1) of this AD into the Operating Procedures Section of the existing AFM.

Figure 6 to paragraph (i)(1)—*AFM Operating Procedures Revision for Model 707, 727, DC–8, DC–9 (except DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87)), and DC–10*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, ILS Approaches

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

(2) For airplanes identified in paragraph (c)(2) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Operating Procedures Section of the existing AFM to include the information specified in figure 7 to paragraph (i)(2) of this AD. This may be done by inserting a copy of figure 7 to paragraph (i)(2) of this AD into the Operating Procedures Section of the existing AFM.

Figure 7 to paragraph (i)(2)—*AFM Operating Procedures Revision for Model 717*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements as specified in Appendix 3, Auto Ground Spoiler System Inop, of this AFM.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(3) For airplanes identified in paragraph (c)(7) of this AD: Within 2 days after May 23, 2022 (the effective date of AD 2022–09–18), revise the Operating Procedures Section of the existing AFM to include the information specified in figure 8 to paragraph (i)(3) of this AD. This may be done by inserting a copy of figure 8 to paragraph (i)(3) of this AD into the Operating Procedures Section of the existing AFM.

Figure 8 to paragraph (i)(3)—*AFM Operating Procedures Revision for Model MD–10*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements according to the following tables, as applicable.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(4) For airplanes identified in paragraph (c)(8) of this AD: Within 2 days after the effective date of this AD, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 9 to paragraph (i)(4) of this AD. This may be

done by inserting a copy of figure 9 to paragraph (i)(4) of this AD into the Operating Procedures Section of the existing AFM.

Figure 9 to paragraph (i)(4)—*AFM Operating Procedures Revision for Model MD–11*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements according to the following tables, as applicable.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(5) For airplanes identified in paragraph (c)(9) of this AD: Within 2 days after the effective date of this AD, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 10 to paragraph (i)(5) of this AD. This may be done by inserting a copy of figure 10 to paragraph (i)(5) of this AD into the Operating Procedures Section of the existing AFM.

Figure 10 to paragraph (i)(5)—*AFM Operating Procedures Revision for Model DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), DC–9–87 (MD–87), MD–88, and MD–90–30*

(Required by AD 2022-09-18)

Radio Altimeter 5G C-Band Interference, Approaches

ILS Approaches

For ILS approaches not prohibited by AD 2021-23-12, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autopilot, autothrottles, and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

(j) New Requirement: AFM Limitations Revision for Non-Radio Altimeter Tolerant Airplanes

(1) For non-radio altimeter tolerant airplanes identified in paragraphs (c)(1) and (c)(3) through (6) of this AD, do the actions specified in paragraphs (j)(1)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 11 to paragraph (j)(1) of this AD. This may be done by inserting a copy of figure 11 to paragraph (j)(1) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 11 to paragraph (j)(1) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 11 to paragraph (j)(1)—*AFM Limitations Revision for Model 707, 727, DC–8, DC–9 (except DC–9–81 (MD–81), DC–9–82 (MD–82), DC–9–83 (MD–83), and DC–9–87 (MD–87)), and DC–10*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach Procedures

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for ILS approaches on runways in the contiguous U.S. airspace.

ILS Approaches

Operators must use the Radio Altimeter 5G C-Band Interference, ILS Approaches procedure contained in the Operating Procedures Section of this AFM.

(2) For non-radio altimeter tolerant airplanes identified in paragraphs (c)(2), (7), and (8) of this AD, do the actions specified in paragraphs (j)(2)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 12 to paragraph (j)(2) of this AD. This may be done by inserting a copy of figure 12 to paragraph (j)(2) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(2) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 12 to paragraph (j)(2) of this AD, remove the AFM revision required by paragraph (h)(2) of this AD.

During Go-Around and Missed Approach

If go-around is required, initial flight director pitch guidance will provide proper speed and pitch targets, but, under certain 5G interference conditions, the flight director cannot be commanded from the Flight Control Panel (FCP) to provide speed or heading guidance, and may not provide altitude capture guidance. If this guidance is not available, manually comply with missed approach procedures, including altitude constraints.

(4) For airplanes identified in paragraph (c)(8) of this AD, do the actions specified in paragraphs (l)(4)(i) and (ii) of this AD.

(i) On or before June 30, 2023, revise the Operating Procedures Section of the existing AFM to include the information specified in figure 20 to paragraph (l)(4) of this AD. This may be done by inserting a copy of figure 20 to paragraph (l)(4) of this AD into the Operating Procedures Section of the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (i)(4) of this AD.

(ii) Before further flight after incorporating the limitations specified in figure 20 to paragraph (l)(4) of this AD, remove the AFM revision required by paragraph (i)(4) of this AD.

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Approach, Landing, and Go-Around

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autothrottles and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

Landing

For landing, the Auto Ground Spoiler function may require manual extension. If manual extension is required, calculate landing distance requirements according to the following tables, as applicable.

Radio Altimeter 5G C-Band Interference, Approaches

ILS Approaches

For ILS approaches other than SA CAT I, SA CAT II, CAT II, and CAT III, disconnect the autopilot and autothrottles, and place both flight director switches to OFF prior to glideslope intercept.

Note: Possible erroneous radio altimeter indications may affect autopilot, autothrottles, and flight director guidance; manually intervene if necessary.

Non-Precision Approaches

Non-precision instrument approaches can be conducted using LNAV/VNAV with flight directors, autopilot, and autothrottle to published BARO minimums.

(m) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (n) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(n) Related Information

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0671; Project Identifier AD–2022–01428–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–03–20, which applies to all The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes. AD 2022–03–20 requires revising the limitations and operating procedures sections of the existing airplane flight manual (AFM) to incorporate limitations prohibiting the use of certain minimum equipment list (MEL) items, and to incorporate operating procedures for calculating takeoff and landing distances, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–03–20, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations section of the existing AFM to incorporate limitations prohibiting the use of certain MEL items, and would retain the operating procedures from AD 2022–03–20 for calculating takeoff and landing distances, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at *regulations.gov* under Docket No. FAA–2023–0671; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137;

phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0671; Project Identifier AD–2022–01428–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *regulations.gov*, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 737–8, 737–9, and 737–8200 airplanes and issued AD 2022–03–20, Amendment 39–21937 (87 FR 4787, January 31, 2022) (AD 2022–03–20). AD 2022–03–20 was prompted by a determination that as a result of 5G C-Band interference, certain airplane systems may not properly function, resulting in longer than normal landing or rejected takeoff distances, due to the effect on thrust reverser deployment, spoilers, speedbrake deployment, and increased idle thrust, regardless of the approach type or weather. AD 2022–03–20 requires revising the limitations and operating procedures sections of the existing AFM to incorporate limitations prohibiting the use of certain MEL items, and to incorporate operating procedures for calculating takeoff and landing distances, when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2022–03–20 to address degraded deceleration performance, which could lead to a runway excursion.

Actions Since AD 2022–03–20 Was Issued

Since issuing AD 2022–03–20, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

AD 2022–03–20 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations required by AD 2022–03–20 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice. Because the 5G C-Band Interference operating procedure required by AD 2022–03–20 does not reference NOTAMs, this proposed AD would retain that operating procedure requirement with no change.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the requirements of AD 2022–03–20 until June 30, 2023. On or before June 30, 2023, this proposed AD would require

replacing those AFM limitations with limitations prohibiting the same dispatching or releasing to airports, and takeoff or landings on runways, and use of certain MEL items at all airports for non-radio altimeter tolerant airplanes. For radio altimeter tolerant airplanes, the prohibited operations would be allowed at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (k)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023. After June 30, 2023 operators with AMOCs approved for AD 2021–23–12 would be required to incorporate the 5G C-Band Interference operating procedure specified in paragraph (h)(2) of this proposed AD. The new AFM limitations, which would be required by paragraph (i) or (j) of this proposed AD, specify that operators must comply with this 5G C-Band Interference operating procedure.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–03–20, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 276 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained actions from AD 2022–03–20).	1 work-hour[2] × $85 per hour = $85	$0	$85	$23,460
New AFM revisions (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 23,460

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

■ a. Removing Airworthiness Directive (AD) 2022–03–20, Amendment 39–21937 (87 FR 4787, January 31, 2022), and

■ b. Adding the following new AD:

[1] This is the number of Boeing Model 737–8, 737–9, and 737–8200 airplanes on the FAA's registry as of December 1, 2022.

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 737–8, 737–9, or 737–8200 transport category airplane.

The Boeing Company Airplanes: Docket No. FAA–2023–0671; Project Identifier AD–2022–01428–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–03–20, Amendment 39–21937 (87 FR 4787, January 31, 2022) (AD 2022–03–20).

(c) Applicability

This AD applies to all The Boeing Company 737–8, 737–9, and 737–8200 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that, during takeoffs and landings, as a result of this interference, certain airplane systems may not properly function, resulting in longer than normal landing or rejected takeoff distances due to the effect on thrust reverser deployment, spoilers, speedbrake deployment, and increased idle thrust, regardless of the approach type or weather. The FAA is issuing this AD to address degraded deceleration performance, which could lead to a runway excursion.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

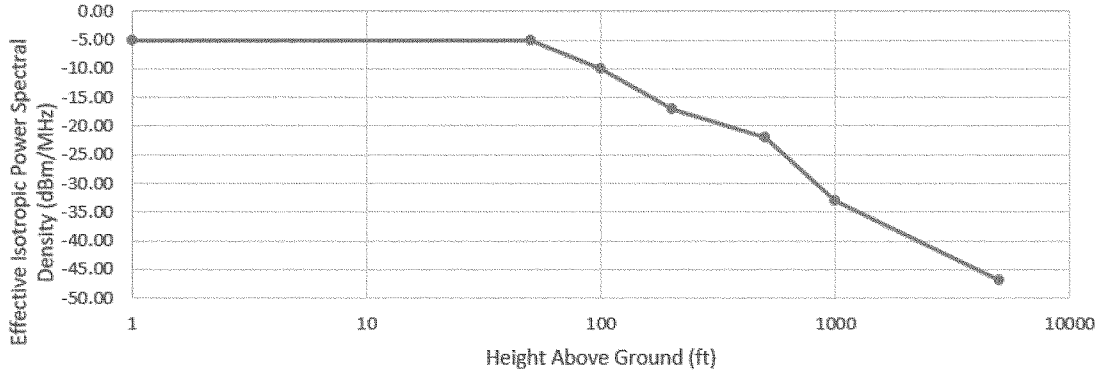
(g) Definitions

(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

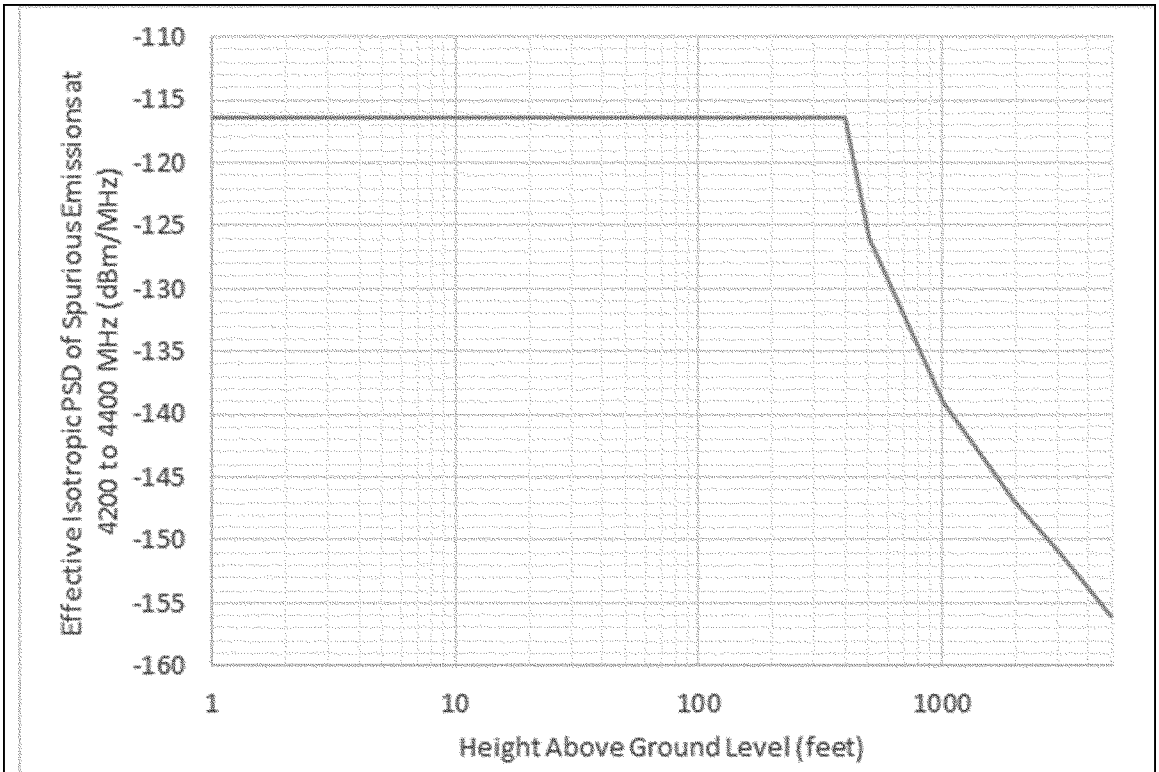
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(4) Runway condition codes are defined in figure 3 to paragraph (g)(4) of this AD.

Figure 3 to paragraph (g)(4)—*Runway Condition Codes*

Runway Condition Code	Runway Condition Description	Reported Braking Action
6	Dry	Dry
5	Wet (smooth, grooved, or porous friction course (PFC)) or frost 3 mm (0.12 inch) or less of: water, slush, dry snow, or wet snow	Good
4	Compacted snow at or below -15°C (5°F) outside air temperature (OAT)	Good to medium
3	Wet (slippery), dry snow, or wet snow (any depth) over compacted snow Greater than 3 mm (0.12 inch) of: dry snow or wet snow Compacted snow at OAT warmer than -15°C (5°F)	Medium
2	Greater than 3 mm (0.12 inch) of: water or slush	Medium to poor
1	Ice	Poor
0	Wet ice, water on top of compacted snow, dry snow, or wet snow over ice	Nil

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (h) of AD 2022–03–20.

(1) Within 2 days after January 31, 2022 (the effective date of AD 2022–03–20): Revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (h)(1) of this AD. This may be done by inserting a copy of figure 4 to paragraph (h)(1) of this AD into the existing AFM.

Figure 4 to paragraph (h)(1)—*AFM Limitations Revisions*

(Required by AD 2022-03-20)

Radio Altimeter 5G C-Band Interference, Takeoff and Landing Performance

The following limitations are required for dispatch or release to airports, and takeoff or landing on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-01 – Antiskid Systems
- 32-42-02 – Alternate Antiskid Valves
- 32-42-03 – Automatic Brake System
- 32-44-01 – Parking Brake Valve

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or release to, or takeoff or landing on, runways with a runway condition code of 1 or 0 is prohibited.

Takeoff and Landing Performance

Operators must use the 5G C-Band Interference Takeoff Performance and Landing Distance Calculations procedure contained in the Operating Procedures Section of this AFM.

(2) Within 2 days after January 31, 2022 (the effective date of AD 2022–03–20): Revise the Operating Procedures Section of the existing AFM to include the information specified in figure 5 to paragraph (h)(2) of this AD. This may be done by inserting a copy of figure 5 to paragraph (h)(2) of this AD into the existing AFM.

Figure 5 to paragraph (h)(2)—*AFM Operating Procedures Revision*

(Required by AD 2022-03-20)

5G C-Band Interference Takeoff Performance and Landing Distance Calculations

Dispatch Guidance – Takeoff Performance

Stopping distance during a rejected takeoff (RTO) can be significantly increased due to the following potential effects on airplane systems:

- Limited spoiler extension
- Higher engine idle
- Thrust reversers may not deploy

For the increased stopping distance during an RTO, refer to the Departure Airport, Takeoff Performance section below.

Dispatch Guidance – Destination or Alternate Airport – Landing Performance

Calculate the required landing distance (select Method A or Method B).

Method A: Use of normal landing performance increased by a predetermined percentage

Use Prior to Descent, Required Landing Distance section below.

Method B: Use of the Non-Normal Configuration Landing Distance table for SPOILERS

Use the SPOILERS Non-Normal Configuration Landing Distance table in the Performance chapter of the AFM, or the applicable table below, for flaps 30 or flaps 40.

- Use the distance for MAX MANUAL braking configurations with the appropriate runway condition at estimated time of arrival.
- Apply all of the appropriate distance adjustments to include the reverse thrust adjustment for no reverse (NO REV).

For runway condition codes 6 and 5, obtain the required landing distance by using the higher of:

- The resulting unfactored distance increased by 15%, or
- The normal dispatch calculations.

For runway condition codes 4 and 3, increase the resulting unfactored distance by 15% to obtain the required landing distance.

For runway condition code 2, increase the resulting unfactored distance by 30% to obtain the required landing distance.

End of Method B

Departure Airport, Takeoff Performance

Select Method 1 or 2 to adjust the accelerate stop distance available (ASDA).

Note: Both methods provide an acceptable margin of safety.

Method 1: Adjust the ASDA by a predetermined value.

Adjust the ASDA by using the following adjustment:

Runway Condition Code	Runway Condition Description	Subtract from ASDA
6	Dry	950 feet
5	Wet skid resistant*	2,600 feet
5, 4, or 3	Wet/dry snow/wet snow/compact snow/slippery	3,700 feet
2	Slush or standing water	4,900 feet

*Provided approval to use wet skid resistant data has been received from the appropriate regulatory authority in accordance with the AFM.

Use the adjusted ASDA and complete the takeoff performance calculations using actual departure runway conditions and actual departure environmental conditions. Do not take credit for use of reverse thrust when calculating takeoff performance.

End of Method 1

Method 2: Adjust the ASDA by a predetermined factor.

Multiply the ASDA by the following factor:

Runway Condition Code	Runway Condition Description	ASDA Factor
6	Dry	0.86
5	Wet skid resistant*	0.76
5, 4, or 3	Wet/dry snow/wet snow/compact snow/slippery	0.71
2	Slush or standing water	0.65

*Provided approval to use wet skid resistant data has been received from the appropriate regulatory authority in accordance with the AFM.

Use the adjusted ASDA and complete the takeoff performance calculations using actual departure runway conditions and actual departure environmental conditions. Do not take credit for use of reverse thrust when calculating takeoff performance.

End of Method 2

Prior to takeoff:

Verify normal radio altimeter indications.

Climb out:

- TO/GA mode may not be available

- Monitor pitch mode engagement
- Monitor roll mode engagement
- Autopilot may not engage

Prior to Descent, Required Landing Distance

Do a time of arrival (en route) landing distance assessment using Method A or B. Use the SPOILERS Non-Normal Configuration Landing Distance table in the Performance chapter of the AFM, or the applicable table below, for flaps 30 or flaps 40.

Method A: Use of normal landing performance and increase by a predetermined percentage.

Use the Normal Configuration Landing Distance table for flaps 30 or flaps 40.

Note: The distances and adjustments shown in the Normal Configuration Landing Distance tables are factored and have been increased 15%.

Select the appropriate runway condition.

Select the distance for the MAX MANUAL braking configuration.

Apply all of the appropriate distance adjustments.

Note: Do not apply adjustments for reverse thrust.

To obtain the required landing distance, increase the resulting factored distance by the percentage below in Table 1 based on the runway condition code or runway braking action.

Table 1

Runway Condition Code	Reported Braking Action	Percentage
6	Dry	23%
5	Good	63%
4	Good to medium	56%
3	Medium	65%
2	Medium to poor	113%

Determine autobrake settings using the Determine Autobrake Settings section below.

End of Method A

Method B: Use of the Non-Normal Configuration Landing Distance table for SPOILERS

Use the SPOILERS Non-Normal Configuration Landing Distance table in the Performance chapter of the AFM, or the applicable table below, for flaps 30 or flaps 40.

Select the appropriate runway condition.

Select the distance for MAX MANUAL braking configuration.

Apply all of the appropriate distance adjustments including the reverse thrust adjustment for no reverse (NO REV).

For runway condition codes 6 to 3, increase the resulting unfactored distance by 15% to obtain the required landing distance.

For runway condition code 2, increase the resulting unfactored distance by 30% to obtain the required landing distance.

Determine autobrake settings using the Determine Autobrake Settings section below.

*For landing distance at or below 8,000 ft pressure altitude, apply the STD adjustment. For altitudes higher than 8,000 ft, first apply the STD adjustment to derive a new reference landing distance for 8,000 ft then apply the HIGH adjustment to this new reference distance.

Reference distance is based on MAX MANUAL braking, sea level, standard day, no wind or slope and maximum reverse thrust.

Reference distance includes a distance from threshold to touchdown associated with a flare time of 7 seconds.

Distances are based on SPOILERS failure distances which conservatively approximates the effects of 5G interference after the Reverse Thrust Adjustment for no Reversers is applied.

Actual (unfactored) distances are shown.

Note: per procedure, MAX MANUAL braking is not required for normal operations.

End of Method B

Determine Autobrake Settings

- Determine desired AUTOBRAKE setting by using the normal configuration landing distance.

  Note: Normal manual or normal autobrakes can be used. The use of maximum brakes is not needed except as stated in the During Landing section below.

During Approach

- Monitor radio altimeters for anomalies.
- Monitor performance of autopilot and autothrottle. If the autopilot or autothrottle is not performing as expected, disconnect both the autopilot and autothrottle and apply manual inputs to ensure proper control of flight path.

At DA(H), MDA(H), or the Missed Approach Point

- If suitable visual reference is established, disengage the autopilot and autothrottle and continue for a normal manual landing.

- If a go-around is needed, do the go-around and the missed approach procedure either in manual or automatic flight.

During Landing

- Radio altitude-based altitude aural callouts during approach may not be available or may be erroneous.
- Manual deployment of the speedbrakes may be needed.
- If the thrust reversers do not deploy, immediately ensure the speedbrakes are extended, apply manual braking, and modulate as needed for the existing runway conditions.

Note: In some conditions, maximum manual braking may be needed throughout the entire landing roll.

During Go-around and Missed Approach

- TO/GA mode may not be available.
- Monitor thrust and verify that thrust increases.
- Monitor pitch mode engagement.
- Monitor roll mode engagement.
- Autopilot may not engage.

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 6 to paragraph (i) of this AD. This may be done by inserting a copy of figure 6 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 6 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 6 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Takeoff and Landing Performance

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff or landing on runways, in the contiguous U.S. airspace.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-01 – Antiskid Systems
- 32-42-02 – Alternate Antiskid Valves
- 32-42-03 – Automatic Brake System
- 32-44-01 – Parking Brake Valve

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or release to, or takeoff or landing on, runways with a runway condition code of 1 or 0 is prohibited.

Takeoff and Landing Performance

Operators must use the 5G C-Band Interference Takeoff Performance and Landing Distance Calculations procedure contained in the Operating Procedures Section of this AFM.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 7 to paragraph (j) of this AD. This may be done by inserting a copy of figure 7 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h)(1) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 7 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h)(1) of this AD.

Figure 7 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Radio Altimeter 5G C-Band Interference, Takeoff and Landing Performance

Due to the presence of 5G C-Band wireless broadband interference, the following limitations are required for dispatch or release to airports, and takeoff or landing on runways, in the contiguous U.S. airspace, unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

Minimum Equipment List (MEL)

Dispatch or release with any of the following MEL items is prohibited:

- 32-42-01 – Antiskid Systems
- 32-42-02 – Alternate Antiskid Valves
- 32-42-03 – Automatic Brake System
- 32-44-01 – Parking Brake Valve

Landing Operations on Runways with Condition Code 1 or 0

Dispatch or release to, or takeoff or landing on, runways with a runway condition code of 1 or 0 is prohibited.

Takeoff and Landing Performance

Operators must use the 5G C-Band Interference Takeoff Performance and Landing Distance Calculations procedure contained in the Operating Procedures Section of this AFM.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (m) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

(l) Related Information

For more information about this AD, contact Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov*.

(m) Material Incorporated by Reference

None.

Issued on April 28, 2023.

Michael Linegang,

Acting Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2023–09434 Filed 5–1–23; 4:15 pm]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2023–0670; Project Identifier AD–2022–01427–T]

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The FAA proposes to supersede Airworthiness Directive (AD) 2022–03–05, which applies to all The Boeing Company Model 747–8F and 747–8 series airplanes and Model 777 airplanes. AD 2022–03–05 requires revising the limitations section of the existing airplane flight manual (AFM) to incorporate limitations prohibiting dispatching or releasing to airports, and approaches or landings on runways, when in the presence of 5G C-Band interference as identified by Notices to Air Missions (NOTAMs). Since the FAA issued AD 2022–03–05, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. This proposed AD would require revising the limitations section of the existing AFM to incorporate limitations prohibiting dispatching or releasing to airports, and approaches or landings on runways, due to the presence of 5G C-Band interference. The FAA is proposing this AD to address the unsafe condition on these products.

DATES: The FAA must receive comments on this proposed AD by May 23, 2023.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

• *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

AD Docket: You may examine the AD docket at regulations.gov under Docket No. FAA–2023–0670; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2023–0670; Project Identifier AD–2022–01427–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend the proposal because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to regulations.gov, including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this proposed AD.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this NPRM contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this NPRM, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this NPRM. Submissions containing CBI should be sent to Brett Portwood, Continued Operational Safety Technical Advisor, COS Program Management Section, Operational Safety Branch, FAA, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 817–222–5390; email: *operationalsafety@faa.gov.* Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Background

The FAA issued AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) (AD 2021–23–12), for all transport and commuter category airplanes equipped with a radio altimeter. AD 2021–23–12 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band). AD 2021–23–12 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting certain operations requiring radio altimeter data when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2021–23–12 because radio altimeter anomalies that are undetected by the automation or pilot, particularly close to the ground (*e.g.,* landing flare), could lead to loss of continued safe flight and landing.

The FAA subsequently identified an additional hazard presented by 5G C-Band interference on The Boeing Company Model 747–8F and 747–8 series airplanes and Model 777 airplanes and issued AD 2022–03–05, Amendment 39–21922 (87 FR 4150, January 27, 2022) (AD 2022–03–05). AD 2022–03–05 was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that this interference may affect multiple airplane systems using radio altimeter data, including the pitch control laws, including those that provide tail strike protection, regardless of the approach type or weather. AD 2022–03–05 requires revising the limitations section of the existing AFM to incorporate limitations prohibiting dispatching or releasing to airports, and approaches or landings on runways, when in the presence of 5G C-Band interference as identified by NOTAMs. The agency issued AD 2022–03–05 to address missing or erroneous radio altimeter data, which, in combination with multiple flight deck effects, could lead to loss of continued safe flight and landing.

Actions Since AD 2022–03–05 Was Issued

Since issuing AD 2022–03–05, the FAA determined that additional limitations are needed due to the continued deployment of new 5G C-Band base stations whose signals are expected to cover most of the contiguous United States at transmission frequencies between 3.7–3.98 GHz. Therefore, the FAA issued an NPRM, Docket No. FAA–2022–1647 (88 FR 1520, January 11, 2023) (the NPRM), proposing to supersede AD 2021–23–12. In the NPRM, the FAA proposed to retain most of the operational prohibitions required by AD 2021–23–12 until June 30, 2023; on or before June 30, 2023, operators would be required to revise their existing AFM to prohibit these operations unless the airplane has a radio altimeter meeting proposed minimum performance levels (a defined power spectral density (PSD) curve as well as a defined aggregate spurious emission level) and is operating at a 5G C-Band mitigated airport (5G CMA). In the NPRM, the FAA also proposed to require all airplanes operating under 14 CFR part 121 to have a radio altimeter meeting the proposed minimum performance standards by February 1, 2024.

Since the NPRM was published, the FAA has determined that a PSD curve is a more appropriate method to define performance than a single fixed emission level. The proposed PSD curve more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels. The FAA plans to issue guidance on how to show compliance with both the fundamental PSD curve and spurious PSD curve, including the data to be submitted, for the FAA to approve the method used.

AD 2022–03–05 relies on the FAA's use of NOTAMs to identify 5G C-band interference at certain airports in the U.S. airspace. As explained in more detail in the NPRM, those NOTAMs are no longer the best means of communicating the location of the 5G C-Band environment. Therefore, this proposed AD would retain the AFM limitations required by AD 2022–03–05 until June 30, 2023. On or before June 30, 2023, this proposed AD would require operators to replace the

limitations with limitations prohibiting the same operations, except the prohibitions would not be tied to NOTAMs but instead would depend on whether the airplane is operated at a 5G CMA as identified by an FAA Domestic Notice.

FAA's Determination

The FAA is issuing this NPRM after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Proposed AD Requirements in This NPRM

This proposed AD would retain the AFM revisions required by AD 2022–03–05 until June 30, 2023. On or before June 30, 2023, this proposed AD would require replacing those AFM limitations prohibiting the same dispatching or releasing to airports, and approaches or landings on runways. For radio altimeter tolerant airplanes, the prohibited operations would be allowed at 5G CMAs as identified in an FAA Domestic Notice. The minimum performance levels in this proposed AD for determining whether an airplane is radio altimeter tolerant are the same minimum performance levels proposed in the NPRM, except the FAA has replaced the proposed fixed emission level with a proposed PSD curve emission threshold that more accurately reflects differences in radio altimeter susceptibility to interfering emissions at different altitude levels.

Paragraph (k)(3) of this proposed AD specifies that AMOCs approved for AD 2021–23–12 providing relief for specific radio altimeter installations would be approved as AMOCs for the requirements specified in paragraph (h) of this proposed AD until June 30, 2023.

Interim Action

The FAA considers that this AD, if adopted as proposed, would be an interim action. Once the Technical Standard Order (TSO) standard for radio altimeters is established, which will follow the existing international technical consensus on the establishment of the minimum operational performance standards (MOPS), the FAA anticipates that the MOPS will be incorporated into the TSO. The FAA also anticipates that aircraft incorporating equipment approved under the new Radio Altimeter TSO will be able to operate in both 5G CMAs and non-5G CMAs with no 5G C-Band-related AFM limitations. Once a new radio altimeter TSO is developed, approved, and available, the FAA might consider additional rulemaking.

Costs of Compliance

The cost information below describes the costs to change the AFM. Although this proposed AD would largely maintain the AFM limitations currently required by AD 2022–03–05, the FAA acknowledges that this proposed AD may also impose costs on some aircraft operators from having to change their conduct to comply with the amended AFM. However, the FAA lacks the data necessary to quantify the costs associated with aircraft operators changing their conduct. The FAA is seeking public comment on these costs so the agency can more fully account for the impact of this regulatory action.

The FAA estimates that this AD, if adopted as proposed, would affect 347 airplanes of U.S. registry.[1] The FAA estimates the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
AFM revision (retained action from AD 2022–03–05).	1 work-hour × $85 per hour[2] = $85	$0	$85	$29,495
New AFM revision (new proposed action)	1 work-hour × $85 per hour = $85	0	85	[3] 29,495

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA has determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Would not affect intrastate aviation in Alaska, and

(3) Would not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by:

[1] This is the number of Boeing Model 747–8F and 747–8 series airplanes and Model 777 airplanes on the FAA's registry as of December 1, 2022.

[2] The labor rate of $85 per hour is the average wage rate for an aviation mechanic.

[3] The estimated cost for this revision would not constitute a significant economic impact (even for small entities) because $85 is a minimal cost compared to the regular costs of maintaining and operating a Model 747–8F, 747–8, or 777 transport category airplane.

■ a. Removing Airworthiness Directive (AD) 2022–03–05, Amendment 39–21922 (87 FR 4150, January 27, 2022), and
■ b. Adding the following new AD:

The Boeing Company Airplanes: Docket No. FAA–2023–0670; Project Identifier AD–2022–01427–T.

(a) Comments Due Date

The FAA must receive comments on this airworthiness directive (AD) by May 23, 2023.

(b) Affected ADs

This AD replaces AD 2022–03–05, Amendment 39–21922 (87 FR 4150, January 27, 2022) (AD 2022–03–05).

(c) Applicability

This AD applies to all The Boeing Company airplanes identified in paragraphs (c)(1) and (2) of this AD, certificated in any category.

(1) Model 747–8F and 747–8 series airplanes.

(2) Model 777–200, –200LR, –300, –300ER, and 777F series airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Unsafe Condition

This AD was prompted by a determination that radio altimeters cannot be relied upon to perform their intended function if they experience interference from wireless broadband operations in the 3.7–3.98 GHz frequency band (5G C-Band), and a determination that this interference may affect other airplane systems using radio altimeter data, including the pitch control laws, including those that provide tail strike protection, regardless of the approach type or weather. The FAA is issuing this AD to address missing or erroneous radio altimeter data, which, in combination with multiple flight deck effects, could lead to loss of continued safe flight and landing.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Definitions

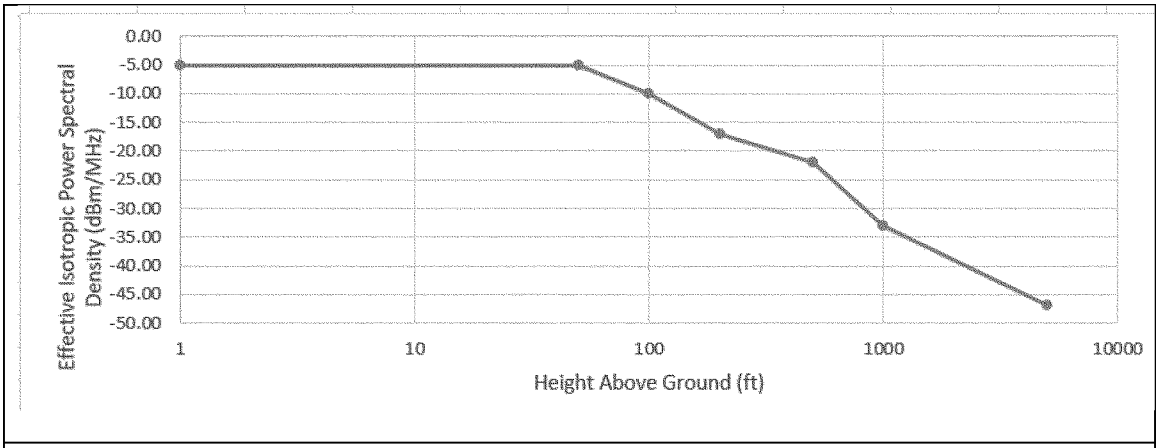
(1) For purposes of this AD, a ''5G C-Band mitigated airport'' (5G CMA) is an airport at which the telecommunications companies have agreed to voluntarily limit their 5G deployment at the request of the FAA, as identified by an FAA Domestic Notice.

(2) For purposes of this AD, a ''radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, demonstrates the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD, using a method approved by the FAA.

(i) Tolerance to radio altimeter interference, for the fundamental emissions (3.7–3.98 GHz), at or above the power spectral density (PSD) curve threshold specified in figure 1 to paragraph (g)(2)(i) of this AD.

BILLING CODE 4910–13–P

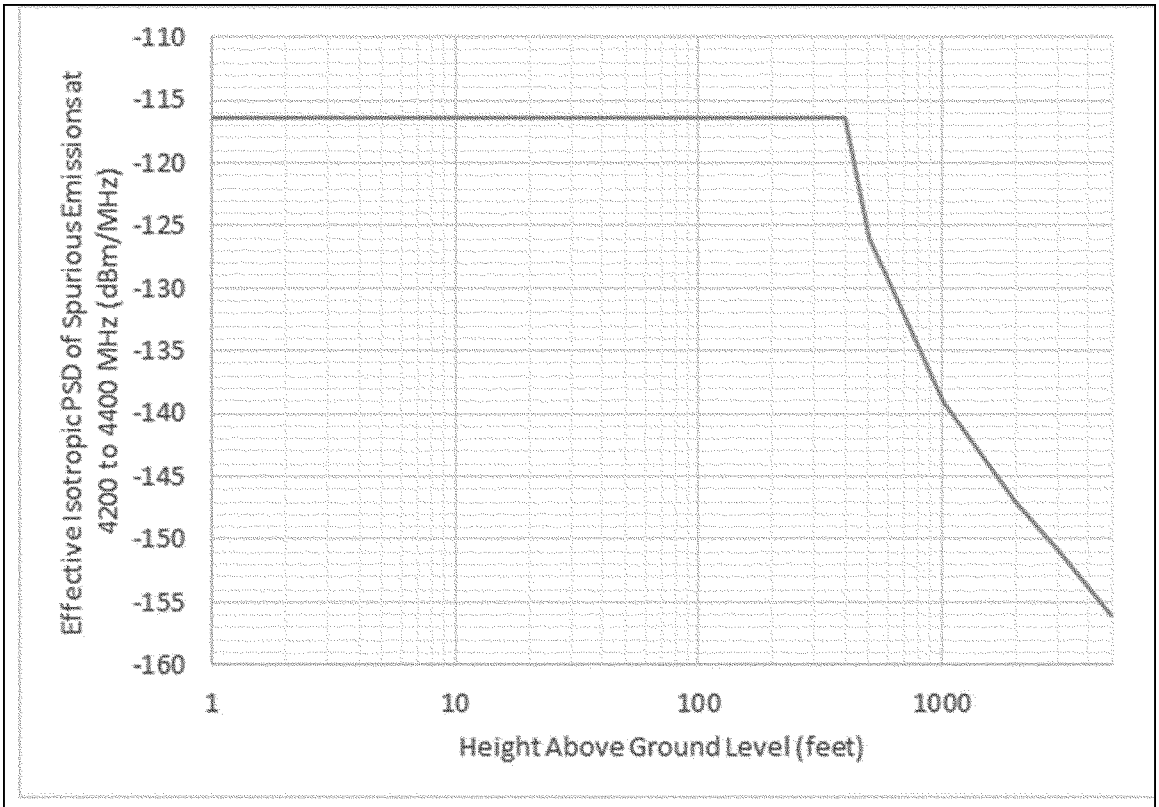
Figure 1 to paragraph (g)(2)(i)—*Fundamental Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Height above ground (ft)	Effective Isotropic PSD (dBm/MHz)
Aircraft on the ground	-5
50	-5
100	-10
200	-17
500	-22
1000	-33
5000	-47

(ii) Tolerance to radio altimeter interference, for the spurious emissions (4.2–4.4 GHz), at or above the PSD curve threshold specified in figure 2 to paragraph (g)(2)(ii) of this AD.

Figure 2 to paragraph (g)(2)(ii)—*Spurious Effective Isotropic PSD at Outside Interface of Aircraft Antenna*



Aircraft Altitude (ft AGL)	Effective Isotropic PSD (dBm/MHz)
1	-116.50
400	-116.50
500	-126.00
1000	-139.00
2000	-147.00
3000	-151.00
5000	-156.00

(3) For purposes of this AD, a ''non-radio altimeter tolerant airplane'' is one for which the radio altimeter, as installed, does not demonstrate the tolerances specified in paragraphs (g)(2)(i) and (ii) of this AD.

(h) Retained Airplane Flight Manual (AFM) Revision

This paragraph restates the requirements of paragraph (g) of AD 2022–03–05. Within 2 days after January 27, 2022 (the effective date of AD 2022–03–05): Revise the Limitations Section of the existing AFM to include the information specified in figure 3 to paragraph (h) of this AD. This may be done by inserting a copy of figure 3 to paragraph (h) of this AD into the existing AFM.

Figure 3 to paragraph (h)—*AFM Limitations Revisions*

(Required by AD 2022-03-05)

Approaches and Landings in the Presence of Radio Altimeter 5G C-Band Interference

Dispatching or releasing to airports, and approaches or landings on runways, in U.S. airspace in the presence of 5G C-Band wireless broadband interference as identified by NOTAM is prohibited (NOTAMs will be issued to state the specific airports or approaches where the radio altimeter is unreliable due to the presence of 5G C-Band wireless broadband interference).

(i) New Requirement: AFM Revision for Non-Radio Altimeter Tolerant Airplanes

For non-radio altimeter tolerant airplanes, do the actions specified in paragraphs (i)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 4 to paragraph (i) of this AD. This may be done by inserting a copy of figure 4 to paragraph (i) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 4 to paragraph (i) of this AD, remove the AFM revision required by paragraph (h) of this AD.

Figure 4 to paragraph (i)—*AFM Revision for Non-Radio Altimeter Tolerant Airplanes*

(Required by AD 20-**-**-**)**

Approaches and Landings in the Presence of Radio Altimeter 5G C-Band Interference

Due to the presence of 5G C-Band wireless broadband interference, dispatching or releasing to airports, and approaches or landings on runways, in the contiguous U.S. airspace is prohibited.

(j) New Requirement: AFM Revision for Radio Altimeter Tolerant Airplanes

For radio altimeter tolerant airplanes, do the actions specified in paragraphs (j)(1) and (2) of this AD.

(1) On or before June 30, 2023, revise the Limitations Section of the existing AFM to include the information specified in figure 5 to paragraph (j) of this AD. This may be done by inserting a copy of figure 5 to paragraph (j) of this AD into the existing AFM. Incorporating the AFM revision required by this paragraph terminates the AFM revision required by paragraph (h) of this AD.

(2) Before further flight after incorporating the limitations specified in figure 5 to paragraph (j) of this AD, remove the AFM revision required by paragraph (h) of this AD.

Figure 5 to paragraph (j)—*AFM Revision for Radio Altimeter Tolerant airplanes*

(Required by AD 20-**-**-**)**

Approaches and Landings in the Presence of Radio Altimeter 5G C-Band Interference

Due to the presence of 5G C-Band wireless broadband interference, dispatching or releasing to airports, and approaches or landings on runways, in the contiguous U.S. airspace is prohibited unless operating at a 5G C-Band mitigated airport as identified in an FAA *Domestic Notice*.

(k) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Operational Safety Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the manager of the Operational Safety Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *AMOC@faa.gov*.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(3) AMOCs approved for AD 2021–23–12, Amendment 39–21810 (86 FR 69984, December 9, 2021) providing relief for specific radio altimeter installations are approved as AMOCs for the requirements specified in paragraph (h) of this AD until June 30, 2023.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1216

[Document Number-23–038; Docket Number-NASA–2022–0005]

RIN 2700–AE56

Procedures for Implementing the National Environmental Policy Act

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Aeronautics and Space Administration (NASA) is proposing to amend and update its regulations for implementing the National Environmental Policy Act of 1969 (NEPA). The proposed amendments would update NASA's regulations to better align with the Agency's current and near future actions, adjust the level of NEPA review and documentation required for certain

actions, and provide more concise descriptions of NASA actions. Additionally, consistent with NASA's requirement to review existing Categorical Exclusions (CatExs) at least every seven years to determine whether modifications, additions, or deletions are appropriate, this proposed rule incorporates updates to NASA's CatExs based on that review.

DATES: Submit comments on or before July 3, 2023.

ADDRESSES: You may send comments, identified by 2700–AE56 to the Federal e-Rulemaking Portal: *https://www.regulations.gov.* Follow the instructions for sending comments. If access to the website is not feasible, NASA welcomes mailed comments to NASA Rulemaking Comments, Environmental Management Division, Suite 2U82, 300 E Street SW, Washington, DC 20546. As the security screening process may delay mail sent through the U.S. Postal Service, NASA encourages electronic submittal. Before including your address, phone number, email address, or other personally identifiable information (PII) in your comment, you should be aware that your entire comment, including your PII, may be made publicly available at any time. While you can request to withhold your PII from public review as part of the overall comment submittal, NASA cannot guarantee the execution of such a request.

FOR FURTHER INFORMATION CONTACT: Tina Norwood, (202) 358–7324, *tina.norwood@nasa.gov.* General information about NASA's NEPA process is available on the NASA NEPA Portal and NEPA Library at *https://www.nasa.gov/emd/nepa.*

SUPPLEMENTARY INFORMATION:

Background

The National Environmental Policy Act, as amended, 42 U.S.C. 4321–4347, requires all Federal agencies to assess the environmental impact of their actions pursuant to 42 U.S.C. 4332(2)(C). The Council on Environmental Quality (CEQ) has issued regulations at 40 CFR parts 1500 through 1508 (CEQ regulations) implementing NEPA that are binding on Federal agencies. On July 16, 2020, CEQ issued a final rule comprehensively updating its regulations implementing NEPA, 85 FR 43304 (July 16, 2020). The CEQ regulations require Federal agencies to develop or revise their procedures for implementing NEPA, as necessary, for consistency with CEQ's regulations or for efficiency (40 CFR 1507.3(b), (c)). However, CEQ has extended the deadline for agencies to propose conforming adjustments to their agency NEPA procedures until September 14, 2023, 86 FR 34154 (June 29, 2021). Moreover, consistent with Executive Orders (E.O.) 13990 of January 20, 2021, Protecting Public Health and the Environment and Restoring Science To Tackle the Climate Crisis, and E.O. 14008 of January 27, 2021, Tackling the Climate Crisis at Home and Abroad, CEQ is conducting a comprehensive review of the 2020 revisions to the CEQ regulations and is taking a phased approach to reconsider the regulations. *See* 86 FR 55757 (Oct. 7, 2021); 87 FR 23453 (Apr. 20, 2022). In this rulemaking, NASA is proposing new and revised CatExs, revising its list of actions normally requiring environmental impact statements or environmental assessments (EA), and making other clarifying non-substantive revisions. NASA will consider whether to propose additional changes to its procedures at the conclusion of CEQ's rulemaking process.

NASA's NEPA regulations are codified in 14 CFR 1216.3 (Procedures for Implementing the National Environmental Policy Act). NASA consulted with CEQ during the development of these proposed updated procedures and prior to their publication in the **Federal Register** (40 CFR 1507.3). These regulations would 1) codify changes to NASA's implementing regulations which reflect lessons learned since NASA last amended its NEPA regulations in 2012 (77 FR 3102 (Jan. 23, 2012)); 2) encourage increased use of programmatic NEPA documents and tiering for routine and repetitive actions for which the environmental impact is well understood; and 3) add several new CatExs for NASA actions that neither individually nor cumulatively have a significant impact on the quality of the human environment.

In addition to NASA's implementing regulations, NASA provides specific instructions pertaining to NEPA program responsibilities internally through NASA Procedural Requirements (NPR) 8580.1, Implementing the National Environmental Policy Act and Executive Order 12114, available at NASA's NEPA website *https://www.nasa.gov/emd/nepa* (under NEPA Process).

Since NASA's last NEPA regulatory revision in 2012, NASA's mission, programs, and strategic goals have evolved with a key focus on leading a new era of human space exploration, performing transformative aeronautics technology research, and continuing to study our planet and the solar system. This proposed rule builds upon decades of NASA's experience and seeks to better align with NASA's evolving technology and mission demands. NASA's NEPA regulations and policy will continue to be available on NASA's Public Portal at *https://www.nasa.gov/emd/nepa/* (under NEPA Process). In addition, NASA NEPA policy (NPR 8580.1) would be updated to reflect the revised updated NASA regulations and posted on the website. Consistent with the coordination requirement of 40 CFR 1507.3, NASA consulted with CEQ throughout the development of this proposed rule.

Introduction

NASA is proposing to amend its regulations for implementing the requirements of NEPA to (1) better align with the Agency's current and near-future actions, (2) adjust the level of NEPA review and documentation required for certain NASA actions that have become routine over the past decade for which NASA has determined they do not have significant environmental effects, (3) provide more concise descriptions of NASA actions and more specific CatExs to ensure appropriate application and tracking by NASA, and 4) ensure consistency with EOs and Presidential Memoranda (*e.g.,* Presidential Memorandum on Launch of Spacecraft Containing Space Nuclear Systems issued August 20, 2019) issued since the last update to NASA's procedures. The proposed amendments are designed to assist decision makers across NASA with a wide array of missions and activities that include space exploration and Earth observation missions, aeronautics research, launch facilities and activities, sounding rocket and balloon campaigns, field campaigns, and facilities construction and maintenance activities.

The proposed amendments would update existing CatExs and add nine new CatExs, amend existing actions normally requiring an EA and add a new action normally requiring an EA, amend existing actions normally requiring an environmental impact statement (EIS), and include other amendments. These changes are described later in this notice.

These proposed amendments to NASA's NEPA procedures incorporate and supplement CEQ's NEPA implementing regulations at 40 CFR parts 1500 through 1508. NASA drafted these procedures to minimize repetition with CEQ regulations and with the understanding that these NASA-specific regulations would be applied in tandem with the CEQ regulations. The terminology used in this Preamble and the proposed amendments include

many words and phrases that are specifically defined in either NEPA or the CEQ regulations found in 40 CFR 1508.1.

Development Process

In 2018, NASA Environmental Management Division (HQ/EMD) formed a working group to review 14 CFR part 1216, subpart 1216.3, including listed CatExs. The members comprising the working group were current NASA professionals with numerous years of NEPA planning and compliance history. Several of the members served on the working group for the 2012 revision of NASA's NEPA regulations. A summary of the working group members' qualifications is available on the NASA NEPA Library website: *https://www.nasa.gov/emd/nepa* (under 2021 NEPA Regulation Update).

In accordance with CEQ's regulations and its 2010 CatEx guidance, ''Establishing, Applying, and Revising Categorical Exclusions under the National Environmental Policy Act,'' the working group reviewed each existing CatEx against NASA's existing policies, procedures, programs, and mission to determine if they were current and appropriate. The working group also reviewed the 2018 CEQ comprehensive list of Federal agencies' CatExs and identified other agencies' CatExs for activities that are similar in nature, scope, and impact on the human environment to those activities conducted by NASA. Based on this benchmarking of other Federal agencies' CatExs and review of their administrative records, the working group recommended NASA add three CatExs to § 1216.304(d). The working group also recommended amending several existing NASA CatExs to clarify and better define the actions and to ensure NASA consistently applies and tracks CatEx use. Concurrently, the working group reviewed NASA's existing extraordinary circumstances to ensure that they adequately account for those situations and settings in which a proposed new or revised CatEx may not be applied, and NASA must prepare an EA or EIS to support Agency action.

In addition to reviewing NASA's CatExs and extraordinary circumstances, the working group reviewed NASA actions normally requiring an EA or EIS to determine if the level of analysis is appropriate and if additional actions should be added. The review considered NASA's current mission and routinely implemented actions, past experiences, and past NEPA reviews (EAs and EISs). The working group recommended adjusting the level of analysis for several actions from EIS to EA and from EA to CatEx because NASA has reviewed the environmental effects of each of the actions and found them not to be significant.

The working group developed a draft proposed rule, then distributed the draft to the NEPA Managers at the ten NASA Centers and component facilities, and to other environmental professionals and stakeholders within NASA, for review and feedback. NASA also consulted with CEQ during the development process to ensure the proposed changes to 14 CFR part 1216, subpart 1216.3, would meet NEPA requirements.

Responsibilities and Implementation Process

NASA proposes to designate the Assistant Administrator, Office of Strategic Infrastructure, within the Mission Support Directorate (MSD), as the NASA Senior Agency Official (SAO). The SAO would be responsible for establishing overall Agency NEPA compliance policy and implementing regulations for NASA, including resolving implementation issues and generally providing oversight of NASA's NEPA program. The proposed updates would incorporate the designation of NASA's SAO and would articulate the SAO's roles and responsibilities.

The NASA Senior Environmental Official (SEO) would be responsible for implementing NASA's NEPA compliance program; including all regulations, policy directives, and procedural requirements; and maintaining up-to-date Agency-wide NEPA program guidance that fully integrates NEPA analysis into Agency planning and decision-making processes. The SEO is the Director, Environmental Management Division, within the Office of Strategic Infrastructure. The NASA NEPA Manager, HQ/EMD would be delegated the responsibility for overseeing the implementation of NEPA by providing guidance and support to the Mission Directorates and NEPA Managers at ten NASA Centers and component facilities that oversee field-level NEPA compliance at their facilities. The responsibility for NEPA compliance resides with the applicable mission's, program's, or project's Responsible Official (decision maker) at NASA who may reside in a Mission Directorate for HQ-led missions/programs or at the Center level for Center-led missions/programs.

Most NASA actions occur at the Center level and the program or project manager (owner of the action requiring NEPA review) coordinates with the respective Center NEPA Manager in completing an environmental checklist for all levels of the NEPA review, reviewing the list of extraordinary circumstances for CatExs, preparing additional NEPA documentation as required, and coordinating with the Responsible Official on planning and decision making. For those actions in which principal responsibility has not been assigned to a Center or Centers (*e.g.,* Agency-wide missions, complex programmatic actions), the NASA NEPA Manager coordinates with the appropriate HQ Mission Directorates and with the Responsible Official for planning and decision making to complete the required NEPA documentation.

For the past 20 years, HQ/EMD has maintained and supplemented the internal NASA Environmental Tracking System (NETS), which contains separate modules for NASA's environmental resource areas (*e.g.,* cultural resources). The HQ and Center NEPA Managers use the NETS NEPA Module as a repository for Center NEPA reviews, EAs, and EISs. The module also auto-populates NASA's NEPA Library public website with EAs and EISs. NETS also includes an annual CatEx reporting feature that allows HQ and Center NEPA Managers to track the application of CatExs on an annual basis. The NETS NEPA Module was upgraded in 2018 to include a multi-Center action component which allows for efficient and consolidated reviews of NASA actions that involve more than one Center. Over the years, the NETS NEPA Module has provided supporting data used in revising NASA's NEPA regulations. Since the last revision of this regulation in 2012, NASA has prepared 35 EAs, four EISs, and, in 2018, applied over 2,400 CatExs.

Projects for which NASA expects to use these NEPA procedures during the upcoming years include airborne science campaigns, construction of facilities projects, International Space Station resupply launches, sample return and other space flight missions, and research field campaigns.

Revised Categorical Exclusions

Section 1216.304 of 14 CFR includes NASA's general provisions for compliance with NEPA through the use of CatExs and identifies actions categorically excluded from EA and EIS review. Within § 1216.304(d), NASA groups similar CatExs under five category headings: Administrative, Operations and Management, Research and Development (R&D), Real and Personal Property, and Aircraft and Airfield Activities. The heading ''Research and Development Activities''

is revised to ''Research, Development, and Science Activities.'' As part of this rulemaking, NASA proposes to amend 16 existing and add nine new categories of actions eligible for categorical exclusion. Many of the changes that NASA is proposing are administrative in nature to clarify application of a particular CatEx. Consistent with CEQ regulations at 40 CFR 1501.4 and 1508.1(d), § 1216.304 of the proposed rule defines ''categorical exclusion'' to mean ''categories of agency actions that normally do not have a significant effect on the human environment.'' The new CatExs reflect NASA's experience with similar factual circumstances, which it has found to have no significant impacts on the ''human environment'' (as that term is broadly defined in CEQ regulations at 40 CFR 1508.1(m)).

The rationale supporting the amended and new CatExs is set forth in NASA's Administrative Record for Updates to the National Aeronautics and Space Administration Categorical Exclusions (administrative record). The administrative record is summarized below and may be accessed in full via the online docket and at *https://www.nasa.gov/emd/nepa*. The CEQ regulations encourage Federal agencies to reduce paperwork and delay when complying with NEPA by using CatExs to define categories of actions that normally do not have a significant effect on the human environment and therefore do not require preparation of an EIS (40 CFR 1500.4(a) and 1500.5(a)). NASA believes that amending current and identifying new CatExs meets this intent. Where CatExs are added, amended, or consolidated, the supporting rationale is explained.

§ 1216.304(a): The proposed edits would incorporate a previously defined acronym, improve grammar, and streamline text. A Record of Environmental Consideration (REC) is required in some cases and text has been added to further clarify that a REC is required to document the application of some NASA CatExs to a proposed action. A REC is a brief document used to describe a proposed action, identify the applicable categorical exclusion, determine whether an extraordinary circumstance exists that may require preparation of an EA or EIS, or explain why further environmental analysis is not required.

§ 1216.304(b): The proposed revisions improve grammar and streamline text.

§ 1216.304(c): This section identifies six extraordinary circumstances that the Agency must consider in determining whether application of the CatEx is appropriate. In considering these extraordinary circumstances, if NASA determines that a significant effect is likely or the effect is unknown, then NASA will prepare an EIS or EA, as appropriate. The update of this section reflects the deletion of one extraordinary circumstance from the original seven and proposed edits to five of the remaining six circumstances to improve grammar and streamline text.

§ 1216.304(d): The proposed edits improve grammar and streamline text. Within the subheadings of this section are the CatEx categories, grouped primarily under activity headings (*i.e.,* (1) Administrative Activities, (2) Operations and Management Activities, (3) Research, Development, and Science Activities, (4) Real and Personal Property Activities, and (5) Aircraft and Airfield Activities). In addition, the proposed edits to § 1216.304(d) include reorganizing and renumbering the paragraph to accommodate new and revised CatExs.

§ 1216.304(d)(1)(ii): The proposed edit incorporates consistent grammar in the section.

§ 1216.304(d)(1)(iv): The proposed edit incorporates consistent grammar in the section.

§ 1216.304(d)(1)(v): The proposed change separates this CatEx into two CatExs with the second becoming a new CatEx in *§ 1216.304(d)(1)(ix).* NASA is making this change to establish a clear distinction between administrative and field activities. The edit retains the text that applies to ''information-gathering exercises'' and updates the sentence to be grammatically correct.

§ 1216.304(d)(1)(vi): The proposed edits incorporate consistent grammar in the section.

§ 1216.304(d)(1)(ix): This proposed new CatEx was previously part of *§ 1216.304(d)(1)(v).* The description was also updated to include monitoring wells as well as temporary equipment into the description of field study examples. The updated text was added to further clarify covered water sampling activities.

§ 1216.304(d)(2)(i): NASA proposed to add examples of routine operations at the end of the CatEx description to further clarify the types of activities addressed with this CatEx.

§ 1216.304(d)(2)(ii): The proposed edits incorporate consistent grammar in the section.

§ 1216.304(d)(2)(iii): The proposed edits incorporate consistent grammar in the section.

§ 1216.304(d)(2)(v): The proposed change clarifies that routine disposal of materials and wastes in accordance with applicable requirements is included in this CatEx. It would also add examples at the end of the CatEx description to further clarify the types of activities addressed with this CatEx.

§ 1216.304(d)(2)(vi): This proposed new CatEx would cover habitat and species management conducted within the boundaries of NASA-controlled properties in accordance with applicable Federal, state, or local requirements. NASA is making this change after reviewing other Federal agency CatExs for similar actions. For example, the U.S. Department of Agriculture, Forest Service's CatExs include similar examples to the proposed new CatEx in 36 CFR 220.6(e)(6)(iv), ''Prescribed burning to reduce natural fuel build-up and improve plant vigor,'' and 36 CFR 220.6(e)(6)(ii), ''Thinning or brush control to improve growth or to reduce fire hazard including the opening of an existing road to a dense timber stand.'' Currently, NASA's habitat and species management is conducted under § 1216.304(d)(2)(i). Establishing a distinct CatEx for these types of activities will permit NASA to specifically track habitat and species management. Based on a review of other agencies' CatExs, NASA has determined that they conduct similar activities, under similar circumstances, and therefore, this proposed new CatEx has been developed to cover these similar habitat and species management activities. The proposed new CatEx would require documentation with a REC.

§ 1216.304(d)(2)(vii): This proposed new CatEx would cover short-term cleanup actions conducted in compliance with the Resource Conservation and Recovery Act or other similar authorities. NASA is making this change after reviewing other Federal agency CatExs for similar actions. NASA is proposing this CatEx based on the Department of Energy's (DOE's) CatEx B6.1 (10 CFR part 1021, appendix B). Examples of actions typically covered under DOE's CatEx that would also be covered by NASA's new proposed CatEx include the following: repair or replacement of leaking containers; perimeter protection if needed to reduce the spread of, or direct contact with, the contamination; segregation of wastes that may react with one another; and installation of fences, warning signs, or other security precautions if humans or animals have access to the release.

§ 1216.304(d)(2)(viii): This proposed new CatEx would cover replacement of existing energy sources with alternative energy sources. NASA is making this change after reviewing other Federal agency CatExs for similar actions. NASA is proposing this CatEx based on the Defense Logistics Agency's (DLA's)

CatEx 37 (DLA Regulation 1000.22, Appendix A). Currently, replacing existing energy sources with alternative energy sources is conducted under *§ 1216.304(d)(2)(i).* Establishing a distinct CatEx for these types of activities will permit NASA to track proactive measures taken as part of sustainability initiatives.

§ 1216.304(d)(2)(ix): This proposed new CatEx would cover routine maintenance, repair, and operation of transportation systems. Currently, these types of activities are conducted under *§ 1216.304(d)(2)(i).* Establishing this distinct CatEx provides clarification between the types of activities covered under each CatEx and creates a more concise description.

§ 1216.304(d)(3): The proposed edit would incorporate the term ''science'' into the heading to clarify applicability.

§ 1216.304(d)(3)(i): NASA proposes to add a sentence with a list of examples at the end of the CatEx to further clarify the types of research, development, testing, and evaluation activities that this CatEx covers.

§ 1216. 304(d)(3)(ii): The proposed change would streamline the description of small quantities of radioactive materials use included in this CatEx. NASA proposes to add a list of examples at the end of the CatEx description to further clarify where radioactive materials may potentially be used.

§ 1216.304(d)(3)(iii): The proposed edits would add examples of laser uses to further clarify the types of activities this CatEx covers.

§ 1216.304(d)(3)(iv): This proposed new CatEx would cover the use of NASA-sponsored payloads as a distinct action separate from the platform on which it is carried. Over the past decade, NASA has launched hundreds of payloads on different platforms. NASA has found the environmental impacts from these activities are not significant. Based on this extensive experience and past analysis, NASA has determined that this type of activity fits the definition of a CatEx under 40 CFR 1501.4 and 1508.1(d), a category of action that normally does not have a significant effect on the human environment.

§ 1216.304(d)(3)(v): This proposed new CatEx category would shift this category of action from ''NASA actions normally requiring an EA'' and would cover the return of samples categorized as an Unrestricted Earth Return (UER). Celestial bodies are classified based on their possibility of containing life as either UER or Restricted Earth Return (RER). The subcategory of solar system bodies identified to have no indigenous life forms (*e.g.,* asteroids, comets, planets, dwarf planets, and planetary moons) are defined as UER by NASA's Planetary Protection Office, within the Office of Safety and Mission Assurance (*https://sma.nasa.gov/sma-disciplines/planetary-protection*). Over the past decades, NASA has been conducting or contributing to UER missions and has found the environmental impacts from these activities not to be significant. Based on this extensive experience and past analysis, NASA has determined that this type of activity fits the definition of a CatEx. RER sample return missions will still be addressed in § 1216.306(b)(2).

§ 1216.304(d)(4)(ii): The proposed edits would incorporate a previously defined acronym, improves grammar, and streamlines text.

§ 1216.304(d)(4)(iii): The proposed edits would streamline text.

§ 1216.304(d)(4)(iv): The proposed edits would incorporate consistent grammar in the section.

§ 1216.304(d)(4)(vi): This proposed new CatEx would cover temporary changes in facility status of real property assets between active and inactive. Inactive status assumes that the asset will be needed in the future and the status change would not pose a significant environmental impact. The proposed CatEx would cover such a temporary status change. Currently, these types of activities are categorically excluded under § 1216.304(d)(2)(i). Establishing this distinct CatEx would improve tracking for NEPA purposes of real property actions.

§ 1216.304(d)(4)(vii): This proposed new CatEx would cover shifting personnel within existing infrastructure at NASA locations. While all actions under the Real and Personal Property Activities include the potential for personnel reductions, realignments, and relocations, they did not specifically identify this aspect in the descriptions. This proposed CatEx would clarify that shifts or reductions in personnel are covered and avoids unnecessary analysis to support previous, repeated conclusions. Based on past experience, such as the examples set forth in the administrative record, NASA has determined that its activities under this proposed CatEx would not result in significant environmental impacts.

§ 1216.304(d)(5)(i): The proposed change would clarify that unmanned aircraft systems are included as aircraft.

§ 1216.304(d)(5)(ii): The proposed change would clarify that unmanned aircraft systems are included as aircraft.

§ 1216.304(e): The proposed edits would incorporate consistent grammar and clarify the Responsible Official's role in determining whether extraordinary circumstances exist that may preclude reliance on a categorical exclusion.

§ 1216.304(f): The proposed edits would delete the previous § 1216.304(f) as unnecessary.

Revisions to NASA Actions Normally Requiring Preparation of an EA

Under paragraph (b), which lists NASA actions normally requiring an EA, NASA is proposing to remove two actions, add one new action, and amend three actions. Where actions normally requiring EAs are removed, added, or amended, the supporting rationale is explained. As noted above, NASA's NEPA procedures incorporate and supplement CEQ's NEPA implementing regulations at 40 CFR parts 1500 through 1508, but do not restate those regulations. NASA relies on the procedural and processing requirements of CEQ's regulations for EAs. To the extent that additional guidance is needed for case-by-case application of a particular requirement, for example selecting the appropriate method of public involvement, NASA will provide specific instructions in NASA NEPA policy (NPR 8580.1). In considering whether a proposed NASA action does, or does not, have significant effects, NASA will consider the effects of connected actions and whether mitigation measures may be implemented which avoid, minimize, or compensate for significant effects caused by a proposed action. If, after consideration of the applicable criteria, NASA determines that a Finding of No Significant Impact (FONSI) cannot be reached, NASA will prepare an EIS using the EA's analysis as a starting point for preparation of the EIS.

§ 1216.305: The proposed edit would align the heading name to be consistent with § 1216.306.

§ 1216.305(a): The proposed edits would incorporate consistent grammar in the section and replace ''The Responsible Official'' with ''NASA'' to be consistent with terminology in § 1216.306.

§ 1216.305(b): The proposed edit would remove ''typical'' from the heading as the term is redundant with ''normally,'' which is the term used in the CEQ regulations and CEQ's 2010 CE guidance.

§ 1216.305(b)(1) (removed): NASA would remove the existing EA category because the launch aspect of the activity is the driver for potential environmental impacts rather than the spacecraft development and space flight projects/programs (*i.e.,* payload systems). Launch environmental impacts are

considered in an EIS under § 1216.306(b)(1) and other Agency launch vehicle NEPA documents. For example, in the *2013 Supplemental Environmental Assessment to the November 2007 Environmental Assessment for the Operation and Launch of the Falcon 1 and Falcon 9 Space Vehicles at Cape Canaveral Air Force Station Florida,* the United States Air Force analyzed potential environmental impacts associated with the operation and launch of a newer version of the Falcon 9 (version 1.1). In addition, a new CatEx, § 1216.304(d)(3)(iv), is proposed to address payload systems.

The proposal would renumber the existing example under paragraph (b)(2) to paragraph (b)(1), incorporate consistent grammar, and streamline the description.

§ 1216.305(b)(2): The proposed edit would expand the description of activities to include some activities previously identified as ''normally requiring an EIS.'' The change would shift the level of environmental analysis associated with major changes of a master plan from an EIS to an EA. This edit clarifies that major changes of a master plan normally do not result in significant environmental impacts. For example, the *2017 Supplemental Environmental Assessment for the NASA Langley Research Center Master Plan, 2016 Programmatic Environmental Assessment for Adoption of JSC's Master Plan, and 2011 Programmatic Environmental Assessment for the NASA Jet Propulsion Laboratory Facility Master Plan Updates* analyzed the potential environmental impacts related to master plan updates and resulted in FONSIs. NASA would tier from a programmatic EA to document the implementation of elements of Center Master Plans that are not adequately addressed in the EA.

Center Master Plans outline NASA's infrastructure plans to support Center operations projected over a 20-year period. An example of a major change would be a proposal for a new facility that was not envisioned in the Center Master Plan. It could also include a new facility that is included in the Center Master Plan that NASA wishes to consider as a new construction site within the Center that could impact natural resources. NASA may determine that the new site would not propose a change in environmental effect, such as construction on a site where a building has recently been demolished. Should NASA determine through EA analysis that a FONSI cannot be reached, NASA will prepare an EIS. This amended EA category also reflects a change in numbering from paragraph (b)(3) to paragraph (b)(2).

§ 1216.305(b)(3): The proposed edit would clarify text associated with the level of analysis to reflect the expectation of no major changes to established land use. This revised EA category also reflects a change in numbering from paragraph (b)(4) to paragraph (b)(3).

§ 1216.305(b)(4): This proposed new EA category would move from ''NASA actions normally requiring an EIS'' to ''NASA actions normally requiring an EA'' for launching a nuclear space system. NASA has prepared one EA (*i.e., 1994 Final Environmental Assessment for the Mars Pathfinder Mission*) and eight EISs over the last three decades for nuclear space system (radioisotope power systems (RPS))-enabled missions listed below:

2014 Final Environmental Impact Statement for the Mars 2020 Mission and 2020 Supplemental Environmental Impact Statement,

2006 Final Environmental Impact Statement for the Mars Science Laboratory Mission,

2005 Final Environmental Impact Statement for the New Horizons Mission,

2002 Final Environmental Impact Statement for the Mars Exploration Rover,

1995 Cassini Final Environmental Impact Statement,

1990 Final Environmental Impact Statement for the Ulysses Mission (Tier 2),

1989 Final Environmental Impact Statement for the Galileo Mission (Tier 2), and

1988 Final (Tier 1) Environmental Impact Statement for the Galileo and Ulysses Missions.

The DOE served as a cooperating agency in the preparation of each EIS because of its technical expertise and jurisdiction by law over the special nuclear material used in the spacecraft. In addition to extensive study of the safety features of the RPS, the DOE conducted radiological consequence analyses for each mission. This analysis has consistently demonstrated the low probabilities of a launch or post-launch mishap that would result in damage to the nuclear material's containment systems that would result in a release into the human environment with associated environmental impacts. None of the safety consequences and environmental analyses prepared over the 30-year span of these EISs conclude a significant environmental effect would be likely.

To date, all NASA nuclear-enabled missions have launched from Kennedy Space Center (KSC) in Cape Canaveral, FL. Prior to the launch of the Mars 2020 mission in August 2020, the NASA–KSC completed consultation with the United States Fish and Wildlife Service (USFWS) under Section 7 of the Endangered Species Act. The USFWS concurred with NASA's determination that the proposed action (Mars 2020 launch) may affect, but is not likely to adversely affect, threatened or endangered species or result in the destruction of designated critical habitat. In its consultation, NASA and USFWS agreed that in the event of a launch mishap, NASA would enter into emergency consultation to assess and remediate potential effects, if any, on listed species located in the affected area. NASA's long history in evaluating the safety, reliability, and potential environmental impacts of the use of nuclear-enabled spacecraft leads the Agency to conclude that the environmental effects of the use of nuclear-enabled spacecraft, even in the highly unlikely event of a launch or post-launch mishap, would not be significant. This conclusion leads the Agency to propose that for future nuclear-enabled missions, the appropriate starting level of its NEPA analysis is an EA, which, as is required by NEPA, would allow for the preparation of an EIS if the environmental effects were assessed to be significant. This change in the starting level of the NEPA analysis does not change NASA's long-standing commitment to conduct a rigorous, risk-informed safety analysis and launch authorization process as detailed in the new Presidential Memorandum signed August 20, 2019, *Launch of Spacecraft Containing Space Nuclear Systems.* Additional information on NASA's RPS-enabled missions is available at *https://www.nasa.gov/emd/nepa/rps.*

§ 1216.305(b)(5) (removed): As previously discussed, NASA is proposing to establish a CatEx at § 1216.304(d)(3)(v) for UER missions. As noted in the description that supports the proposed new CatEx, NASA has been conducting or contributing to UER missions over the past decades and has found the environmental impacts from these activities normally are not significant.

Revisions to NASA Actions Normally Requiring Preparation of an EIS

Under the heading ''NASA actions normally requiring an environmental impact statement (EIS),'' NASA is proposing to amend the headings to reflect categories under § 1216.306(b) that were identified as § 1216.306(c), (d), (e), and (f) (*i.e.,* the activities should

have been under the heading ''NASA actions normally requiring an EIS). In addition, NASA is proposing to remove two (existing *§ 1216.306(c) and (e)*) and amend three EIS categories. The two removed categories have been modified and incorporated into NASA actions normally requiring an EA as discussed in the previous section. As noted above, NASA's NEPA procedures incorporate and supplement CEQ's NEPA implementing regulations at 40 CFR parts 1500 through 1508, but do not restate those regulations. NASA relies on the procedural and processing requirements of CEQ's regulations for NASA EISs. To the extent that additional guidance is needed for case-by-case application of a particular requirement, such as selecting the appropriate method of public involvement as required by 40 CFR 1506.6, NASA will provide specific instructions in the NASA NEPA Policy (NPR 8580.1).

§ 1216.306: The heading title would include the acronym definition.

§ 1216.306(a): The proposed edits would improve grammar and streamline text while also incorporating a cross reference to CEQ's regulation.

§ 1216.306(b): The proposed edit would remove ''typical'' from the heading as the term is redundant with ''normally,'' which is the term used in the CEQ regulations.

§ 1216.306(b)(1): The edit adds ''NASA-developed'' to clarify that an EIS will be prepared when NASA proposes to develop a new space launch system, such as the EIS prepared (*https://www.nasa.gov/directorates/heo/library/nepa/orion_sls.html*) for the new launch vehicle that NASA is currently developing (*https://www.nasa.gov/exploration/systems/sls/indix.html*).

§ 1216.306(b)(2): This proposed revised category of NASA actions normally requiring preparation of an EIS would replace the parenthetical reference to appendix A with the definition from appendix A, remove reference to a subcommittee that is no longer active, and restructure the description to clarify the aspect of NASA activities that would potentially result in environmental impacts necessitating an EIS level of analysis. For example, it is the management of restricted Earth return samples from solar system bodies and not the development of the space flight program for those returned samples that potentially result in environmental impacts. This revision also expands the description to include ground systems that will be needed to process and manage an RER sample such as recovery, transport, and curation. This revised category of actions normally requiring preparation of an EIS also reflects a change in numbering from paragraph (d) to paragraph (b)(2).

§ 1216.306(b)(3): This proposed revised category of NASA actions normally requiring preparation of an EIS would add ''and natural'' to clarify that effects are potentially on the human and natural environment and remove text that is repetitive as it is not necessary to indicate that if an existing EIS covered the scope of the master plan, another EIS would not be required. This revised category of actions normally requiring preparation of an EIS also reflects a change in numbering from paragraph (f) to paragraph (b)(3).

Other Amendments

Additional amendments are proposed in sections of the rule, other than §§ 1216.304, 1216.305, and 1216.306. These proposed edits are described below.

§ 1216.300(b): The proposed edits would streamline text.

§ 1216.302(a): The proposed edit adds the name and responsibilities of the SAO.

§ 1216.302(a)(1): The proposed edits would shift the definition of SEO from § 1216.302(a), incorporate consistent grammar, and streamline the description.

§ 1216.302(a)(2): The proposed edits would shift numbering due to the insert of § 1216.302(a)(1) and streamline the description.

§ 1216.302(a)(3): The proposed edits would shift numbering due to the insert of § 1216.302(a)(1) and streamline the description.

§ 1216.302(b): The proposed edits would simplify and clarify identification of decision makers as the NASA official with authority to commit the Agency to take the proposed action.

§ 1216.302(c): The proposed edits would remove unnecessary text.

§ 1216.303(a): The proposed edits would update text.

§ 1216.303(a)(1): The proposed edits would incorporate consistent grammar.

§ 1216.303(a)(2): The proposed edits would update NASA's policy on NEPA and public involvement.

§ 1216.303(a)(3): The proposed edits would clarify text and incorporate consistent grammar.

§ 1216.303(b): The proposed edits streamline text.

§ 1216.303(c): The proposed edits would incorporate consistent grammar and add ''public health and safety'' and ''security'' as factors to be considered for a NASA proposed action. In addition, a cross reference to CEQ's regulation would be incorporated.

§ 1216.303(d): This proposed new description under the *NEPA process in NASA planning and decision making* identifies when NASA uses a REC. For example, RECs are used to document: application of a specific Categorical Exclusion (CatEx); adoption of a draft or final EIS, EA, or portion thereof; reevaluation of an existing NEPA document; and determination on whether an action fits within an existing NEPA document, including a programmatic NEPA document. Adoption of the proposed new description would avoid unnecessary analysis to support previous, repeated conclusions.

§ 1216.307: The proposed edits would add two paragraphs, § 1216.307(a) and (b), to clarify the conditions for tiering within NASA's process and incorporate consistent grammar. This change is intended to improve NASA efficiency and maximize the use of programmatic documents to streamline NASA's NEPA process.

§ 1216.308: The proposed edits would clarify NASA's process for preparing supplemental NEPA documents. The proposed edits would also incorporate text to be consistent with CEQ regulations. The proposed edits also include incorporation of paragraphs (*§ 1216.308(a) through (d)*) and add text that identifies NASA's process for completion of Supplement Analysis. A Supplement Analysis is a NASA document used to determine whether a new or supplemental EA or EIS should be prepared or to support a decision to prepare a new EA or EIS.

§ 1216.309: The proposed edit would incorporate consistent grammar.

§ 1216.310(a): The proposed edit would incorporate consistent grammar.

§ 1216.311(a): The proposed revisions would incorporate edits for consistency with the CEQ guidance memorandum ''Emergencies and the National Environmental Policy Act Guidance'' (85 FR 60137 (Sept. 14, 2020)), and incorporate consistent grammar. The proposed revision also would remove ''in accordance with the provisions in sections 305 and 307 of this subpart,'' as it duplicates text that refers to completion of NEPA analysis.

§ 1216.311(a)(1): The proposed revisions incorporate edits for consistency with CEQ's updated emergencies guidance, incorporate consistent grammar, and streamline text.

§ 1216.311(a)(2): The proposed revision shifts § 1216.311(b) to the previously reserved § 1216.311(a)(2). The proposed revisions would incorporate edits for consistency with CEQ's updated emergencies guidance, incorporate consistent grammar,

streamline text, and incorporate elevation of oversight of compliance with NEPA in an emergency to the SAO rather than the SEO.

§ 1216.311(b): The proposed revision would reflect a shift in subparagraph numbering and incorporate edits for consistency with CEQ's updated emergencies guidance, incorporate consistent grammar, streamline text, and incorporate elevation of oversight of compliance with NEPA in an emergency to the SAO rather than the SEO.

Appendix A to Subpart 1216.3: The proposed edit removes definitions and incorporates new acronyms.

Regulatory Analysis

A. Executive Order (E.O.) 12866—Regulatory Planning and Review

E.O.s 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This proposed rule has been designated a ''significant regulatory action'' although not economically significant, under section 3(f) of E.O. 12866. Accordingly, the proposed rule has been reviewed by the Office of Management and Budget.

B. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to prepare an initial regulatory flexibility analysis to be published at the time the proposed rule is published. This requirement does not apply if the agency ''certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities'' (5 U.S.C. 603). This proposed rule modifies existing policies and procedural requirements for NASA compliance with NEPA. The proposed rule makes no substantive changes to requirements imposed on applicants for licenses, permits, financial assistance, and similar actions as related to NEPA compliance. Therefore, NASA certifies this proposed rule would not have a ''significant economic impact on a substantial number of small entities.''

C. Review Under the Paperwork Reduction Act

This proposed rule does not contain any information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

D. Environmental Review Under the National Environmental Policy Act

The proposed rule would revise agency procedures and guidance for implementing NEPA. NASA NEPA procedures are procedural guidance to assist in the fulfillment of agency responsibilities under NEPA but are not the agency's final determination of what level of NEPA analysis is required for a particular proposed action. The CEQ sets forth the requirements for establishing agency NEPA procedures in its regulations at 40 CFR 1507.3. The CEQ regulations do not require agencies to conduct NEPA analyses or prepare NEPA documentation when establishing their NEPA procedures. The determination that establishing agency NEPA procedures does not require supporting NEPA analysis and documentation has been upheld in *Heartwood, Inc.* v. *U.S. Forest Service,* 73 F. Supp. 2d 962, 972–73 (S.D. Ill 1999), *aff'd,* 230 F.3d 947, 954–55 (7th Cir. 2000).

E. Review Under Executive Order 13132

NASA has considered this proposed rule under the requirements of E.O. 13132, Federalism. The Agency has concluded that the rule conforms with the federalism principles set out in this E.O. will not impose any compliance costs on the states and will not have substantial direct effects on the states or the relationship between the National Government and the states or on the distribution of power and responsibilities among the various levels of government. Therefore, the Agency has determined that no further assessment of federalism implications is necessary.

F. Review Under the Unfunded Mandates Reform Act

Pursuant to Title II of the Unfunded Mandates Reform Act (UMRA) of 1995 (2 U.S.C. 1531–1538), NASA has assessed the effects of the proposed rule on state, local, and Tribal governments, and the private sector. This proposed rule would not compel the expenditure of $100 million or more by any state, local, or Tribal government, or anyone in the private sector. Therefore, this proposed rule is not subject to the requirements of section 202 and 205 of the UMRA.

G. Expected Impact of the Proposed Rule

NASA does not expect this proposed rule to have any economic impact on the overall economy of the United States; state, local, or Tribal governments or communities; or any private party involved in commercial space launch activities at NASA facilities. Given the most recent data NASA has available, most NASA actions fall within the scope of a CatEx (98 percent categorically excluded, 1.4 percent had an EA/Finding of No Significant Impact, and 0.16 percent had an EIS/Record of Decision). By expanding the list of actions covered by a CatEx, NASA would promote more efficient NEPA compliance without sacrificing the integrity of the environmental impact review process for those actions which may require an EA or EIS.

The proposed updates to several existing NASA CatExs and the addition of nine new CatExs are intended to further streamline NASA NEPA compliance for actions that, individually or cumulatively, do not have a significant impact on the quality of the human environment. The proposed rule does not materially alter the budgetary impact of entitlements, grants, NASA loan programs, or the rights and obligations of recipients thereof. The proposed rule does not raise novel legal or policy issues; rather it promotes consistency with the CEQ's NEPA implementing regulations, thereby providing more regulatory certainty concerning NEPA compliance obligations to both NASA programs and commercial space operators who may propose actions that would occur on NASA jurisdictional facilities. Therefore, this proposed rule is not expected to have any adverse effect, economically or otherwise, on NASA, any other Federal, state, local, or Tribal entity or any private party who may propose an action that would occur at a NASA jurisdictional facility.

List of Subjects in 14 CFR Part 1216

Environmental impact statements, Flood plains, Foreign relations.

For the reasons given in the preamble, NASA proposes to amend 14 CFR part 1216 as follows:

PART 1216—ENVIRONMENTAL QUALITY

■ 1. Add an authority citation for part 1216 to read as follows:

Authority: 51 U.S.C. 20101 *et seq.;* 42 U.S.C. 4321 *et seq.;* 40 CFR parts 1500 through 1508.

Subpart 1216.3—Procedures for Implementing the National Environmental Policy Act (NEPA)

■ 2. The authority citation for subpart 1216.3 is revised to read as follows:

Authority: 42 U.S.C. 2451 *et seq.;* 42 U.S.C. 4321 *et seq.;* 42 U.S.C. 4371 *et seq.;* 42 U.S.C. 7609; E.O. 11514, 35 FR 4247, 3 CFR, 1966–1970, Comp., p. 902, as amended by E.O. 11991, 42 FR 26967, 3 CFR, 1977 Comp., p. 123; E.O. 12114, 44 FR 1957, 3 CFR, 1979 Comp., p. 356; and 40 CFR parts 1500 through 1508.

■ 3. Amend § 1216.300 by revising paragraph (b) to read as follows:

§ 1216.300 Scope.

* * * * *

(b) Through this subpart, NASA adopts the Council on Environmental Quality (CEQ regulations implementing NEPA (40 CFR parts 1500 through 1508) and supplements those regulations with this subpart, for actions proposed by NASA that are subject to NEPA. This subpart and NASA's NEPA policy are available on NASA's Public Portal at *https://www.nasa.gov/emd/nepa.*

■ 4. Revise § 1216.302 to read as follows:

§ 1216.302 Responsibilities.

(a) The NASA Senior Agency Official (SAO), is the Associate Administrator, Mission Support Directorate. The SAO is responsible for overall Agency NEPA compliance, including integration of NEPA into the Agency's planning and decision making and resolving implementation issues.

(1) The NASA Senior Environmental Official (SEO) is the Assistant Administrator, Office of Strategic Infrastructure (OSI). The SEO, in consultation with the SAO, is responsible for development and implementation of NASA NEPA policy requirements and guidance which fully integrate NEPA compliance into Agency planning and decision-making processes. To the extent the CEQ's implementing regulations at 40 CFR parts 1500 through 1508 reserve a specific authority to the SAO, the SAO is the responsible NASA official for resolving matters related to that specific authority.

(2) The NASA Headquarters/Environmental Management Division (HQ/EMD), in consultation with the SEO, is responsible for implementing NEPA functions and guiding NASA's integration of NEPA into the Agency's planning and decision making. HQ/EMD provides oversight of all NASA entities in implementing their assigned responsibilities under NEPA. HQ/EMD, in coordination with the Center Environmental Management Office, is responsible for determining the appropriate level of NEPA documentation and maintaining a publicly accessible internet portal which includes information on the status of environmental impact statements (EISs) and other elements of NASA's NEPA program (*https://www.nasa.gov/emd/nepa*).

(3) Each NASA Center has an environmental management office that directs and implements the NEPA process, such as evaluating proposed actions; developing, reviewing, and approving required documentation; and advising Center-level program and project managers.

(b) The ''Responsible Official'' is the NASA official who will ensure that planning and decision making for each proposed Agency action complies with the regulations in this subpart and with Agency NEPA policy and guidance provided by the SAO, SEO, HQ/EMD, and the Center's environmental management office as applicable.

(c) NASA must comply with this subpart when considering issuance of a permit, lease, easement, or grant to a non-Federal party and may seek such non-Federal party's assistance in obtaining necessary information and completing the NEPA process.

■ 5. Revise § 1216.303 to read as follows:

§ 1216.303 NEPA process in NASA planning and decision making.

(a) NEPA is a procedural statute intended to ensure Federal agencies consider the environmental impacts of their proposed actions in the decision-making process. Full integration of the NEPA process with NASA project and program planning improves Agency decisions and ensures:

(1) Consideration of sustainability, environmental stewardship, and compliance with applicable environmental statutes, regulations, and policies.

(2) NASA's analyses and documentation are prepared using a process that is transparent to the public, including opportunities for receipt and consideration of public comment, when appropriate.

(3) Potential program and project risks and delays are minimized.

(b) In considering whether the effects of a proposed action are significant and determining the appropriate level of NEPA review and documentation (*i.e.,* EIS, environmental assessments (EA), categorical exclusions (CatEx)), NASA shall consider and analyze the potentially affected environment (*i.e.,* affected area [national, regional, or local] and resources located therein) and the degree of the effects of the proposed action (*e.g.,* short- and long-term effects, effects both beneficial and adverse, effects on public health and safety, effects that would violate Federal, state, Tribal, or local law protecting the environment).

(c) NASA shall consider the reasonably foreseeable environmental impacts of a proposed Agency action, along with technical, economic, public health and safety, security, and other factors that are reasonably foreseeable, beginning in the early planning stage of a proposed action. NASA will not take any action that would have an adverse environmental impact or limit the choice of reasonable alternatives prior to completing NEPA review except as provided in 40 CFR 1506.1.

(d) Records of Environmental Consideration (RECs) will be used to document:

(1) Application of specific categorical exclusions to proposed actions;

(2) Adoption of a Federal draft or final NEPA documents;

(3) Reevaluation of an existing NEPA document; and

(4) Determination of whether an action fits within an existing NEPA document, including a programmatic NEPA document.

■ 6. Amend § 1216.304 by:

■ a. Revising paragraphs (a), (b), (c) introductory text, (c)(1), and (c)(3) through (6);

■ b. Removing paragraph (c)(7);

■ c. Revising paragraphs (d) introductory text and (d)(1)(ii) and (iv) through (vi);

■ d. Adding paragraph (d)(1)(ix);

■ e. Revising paragraphs (d)(2)(i) through (iii) and (v);

■ f. Adding paragraphs (d)(2)(vi) through (ix);

■ g. Revising paragraphs (d)(3) and (d)(4)(ii) through (iv);

■ h. Adding paragraphs (d)(4)(vi) and (vii);

■ i. Revising paragraphs (d)(5)(i) and (ii) and (e); and

■ j. Removing paragraph (f).

The revisions and additions read as follows:

§ 1216.304 Categorical exclusions.

(a) Categorical exclusions (CatExs) are categories of Agency actions that normally do not have a significant effect on the human environment and therefore do not require preparation of an EA or EIS. CatExs reduce paperwork, improve Government efficiency, and eliminate delays in initiating and completing proposed actions having no significant environmental impact. For some CatExs, as indicated in paragraph (d) of this section, a REC is required.

(b) Application of CatExs and presence of extraordinary circumstances:

(1) A proposed action may be categorically excluded if the action fits

within the categories listed in paragraph (d) of this section and it does not involve any extraordinary circumstances in which a normally excluded action may have a significant effect.

(2) If an extraordinary circumstance as described in paragraph (c) of this section is present, NASA may nevertheless categorically exclude the proposed action if the action fits within the categories listed in paragraph (d) of this section and NASA determines that implementation of mitigation measures, such as relocation of the proposed action to an alternative site or limiting construction activities to certain seasonal periods of the year to avoid the extraordinary circumstance(s) in question, are sufficient to allow the proposed action to be categorically excluded.

(c) Extraordinary circumstances include situations where the proposed action:

(1) Has a reasonable likelihood of having a significant effect on public health and safety or the human environment.

* * * * *

(3) Is of significantly greater scope or size than is normal for the particular category of action.

(4) Has a reasonable likelihood of having effects that would violate Federal, state, Tribal, or local laws, or other enforceable requirements applicable to environmental protection.

(5) May adversely affect sensitive resources, such as, but not limited to, federally listed threatened or endangered species, their designated critical habitat, wilderness areas, floodplains, wetlands, aquifer recharge areas, coastal zones, wild and scenic rivers, and significant fish or wildlife habitat, unless the impact has been resolved through another environmental review process; *e.g.,* the Clean Water Act (CWA) or the Coastal Zone Management Act (CZMA).

(6) May adversely affect national natural landmarks or cultural or historic resources, including, but not limited to, property listed on or eligible for listing on the National Register of Historic Places, unless the impact has been resolved through another review process; *e.g.,* the National Historic Preservation Act (NHPA).

(d) The following actions normally do not have a significant effect on the human environment and are categorically excluded from the requirement to prepare an EA or EIS:

(1) * * *

(ii) Issuing procedural rules, manuals, directives, and requirements.

* * * * *

(iv) Preparing documents, including design and feasibility studies, analytical supply and demand studies, reports and recommendations, master and strategic plans, and other advisory documents.

(v) Information-gathering exercises, such as inventories, audits, and studies.

(vi) Preparing and disseminating information, including document mailings, publications, classroom materials, conferences, speaking engagements, websites, and other educational/informational activities.

* * * * *

(ix) Field studies, including water sampling, monitoring wells, cultural resources surveys, biological surveys, geologic surveys, modeling or simulations, routine data collection and analysis, and/or temporary equipment.

(2) * * *

(i) Routine maintenance, minor construction or rehabilitation, minor demolition, minor modification, minor repair, and continuing or altered operations at, or of, existing NASA or NASA-funded or -approved facilities and equipment, such as buildings, roads, grounds, utilities, communication systems, and ground support systems (*e.g.,* space tracking and data systems). This includes routine operations such as security, public health and safety, and environmental services.

(ii) Installing or removing equipment, including component parts, at existing Government or private facilities.

(iii) Contributing equipment, software, technical advice, exchanging data, and consulting with other agencies and public and private entities.

* * * * *

(v) Routine packaging, labeling, storage, transportation, and disposal of materials and wastes, in accordance with applicable Federal, state, Tribal, or local laws or requirements. Examples include but are not limited to hazardous, non-hazardous, and other regulated materials and wastes.

(vi) Habitat and species management activities conducted within the boundaries of NASA-controlled properties in accordance with applicable Federal, state, or local requirements. Examples include but are not limited to restoration of unique or critical habitat; thinning or brush control to improve growth of natural habitat, reduce invasive species, or reduce fire hazard; prescribed burning to reduce natural fuel build-up, reduce invasive species, or improve native plant vigor; planting appropriate vegetation that does not include noxious weeds or invasive plants; or wildlife management activities (REC required).

(vii) Small-scale, short-term cleanup actions under the Resource Conservation and Recovery Act or other authorities to reduce risk to human health or the environment from the release or imminent and substantial threat of release of a hazardous substance other than high-level radioactive waste and spent nuclear fuel, including treatment (such as incineration, encapsulation, physical or chemical separation, and compaction), recovery, storage, or disposal of wastes at existing facilities currently handling the type of waste involved in the action.

(viii) Replacement of existing energy sources with alternative or renewable energy sources that comply with existing permit conditions.

(ix) Routine maintenance, repair, and operation of vessels (including unmanned autonomous surface vessels), aircraft (including unmanned aircraft systems), overland/surface transportation vehicles, and other transportation systems as applicable. Examples include but are not limited to transportation or relocation of NASA equipment and hardware by barge, aircraft, or surface transportation system (*e.g.,* tractor trailer or railroad); retrieval of spent solid rocket boosters by vessel; repair or overhaul of vessel, aircraft, or surface transportation systems that do not result in a change in the environmental impacts of their normal operation.

(3) Research, Development, and Science Activities including:

(i) Research, development, testing, and evaluation in compliance with all applicable Federal, state, Tribal, or local laws or requirements and Executive orders. This includes the research, development, testing, and evaluation of scientific instruments proposed for use on spacecraft, aircraft (including unmanned aircraft systems), sounding rockets, balloons, laboratories, watercraft, or other outdoor activities.

(ii) Use of small quantities of radioactive materials used for instrument detectors, calibration, and other purposes. Materials may be associated with the proposed use on spacecraft, aircraft (including unmanned aircraft systems), sounding rockets, balloons, laboratories, watercraft, or other outdoor activities.

(iii) Use of lasers for research and development, scientific instruments and measurements, and distance and ranging, where such use meets all applicable Federal, state, Tribal, or local laws or requirements and Executive orders. This includes lasers associated with spacecraft, aircraft (including unmanned aircraft systems), sounding rockets, balloons, laboratories, watercraft, or other outdoor activities.

(iv) Use of non-space nuclear system payloads on various platforms (*e.g.,* launch vehicle, sounding rocket, scientific balloon, and aircraft) (REC required).

(v) Return of samples from solar system bodies (*e.g.,* asteroids, comets, planets, dwarf planets, and planetary moons) to Earth when categorized as an Unrestricted Earth Return. NASA defines this activity as collecting extraterrestrial materials from solar system bodies, deemed by scientific opinion to have no indigenous life forms, and returning those samples to Earth (REC required).

(4) * * *

(ii) Granting or accepting easements, leases, licenses, rights-of-entry, and permits to use NASA property, or any non-NASA property, for activities that would be categorically excluded in accordance with this section (REC required).

(iii) Transfer or disposal of real property, property rights, or interests if a resulting change in use is a use that would be categorically excluded under this section (REC required).

(iv) Transferring real property administrative control to another Federal agency, including the return of public domain lands to the Department of the Interior (DoI) or other Federal agencies, and reporting of property as excess and surplus to the General Services Administration (GSA) for disposal, when the agency receiving administrative control (or GSA, following receipt of a report of excess) shall complete any necessary NEPA review prior to any change in land use (REC required).

* * * * *

(vi) Change in the facility status of real property assets (*e.g.,* active or inactive).

(vii) Reductions, realignments, or relocation of personnel into existing federally owned or commercially leased space that does not involve a substantial change affecting the supporting infrastructure (*e.g.,* no increase in vehicular traffic beyond the capacity of the supporting road network to accommodate such an increase).

(5) * * *

(i) Periodic aircraft (including unmanned aircraft systems) flight activities, including training and research and development, which are routine and comply with applicable Federal, state, Tribal, or local laws or requirements, and Executive orders.

(ii) Relocation of similar aircraft (including unmanned aircraft systems) not resulting in a substantial increase in total flying hours, number of aircraft operations, operational parameters (*e.g.,* noise), or permanent personnel or logistics support requirements at the receiving installation (REC required).

(e) The Responsible Official shall review the proposed action in its early planning stage and consider the scope of the action, the potentially affected environment, and the degree of the reasonably foreseeable effects of the action to determine whether extraordinary circumstances exist that could result, either individually or cumulatively, in significant environmental impacts. If extraordinary circumstances exist, the Responsible Official must determine whether application of the categorical exclusion to the proposed action is appropriate or whether preparation of an EA or EIS is required.

■ 7. Revise § 1216.305 to read as follows:

§ 1216.305 Actions normally requiring an environmental assessment (EA).

(a) NASA shall prepare an EA, which complies with 40 CFR 1501.5, when a proposed action is not categorically excluded and is not likely to have significant effects or when the significance of the effects is unknown. NASA shall consider the potentially affected environment and degree of the effects of the action when determining whether to prepare an EA.

(b) NASA actions normally requiring an EA include:

(1) Altering the ongoing operations at a NASA Center where the significance of the environmental effect(s) is unknown.

(2) Construction or modifications of facilities that represent a major change to an existing master plan and could result in a change in the environmental effect(s).

(3) Actions that are expected to result in major changes to established land use.

(4) Launching a spacecraft containing a space nuclear system. Space nuclear systems include radioisotope power systems, such as radioisotope thermoelectric generators and radioisotope heater units, and fission systems used for surface power and spacecraft propulsion.

■ 8. Revise § 1216.306 to read as follows:

§ 1216.306 Actions normally requiring an environmental impact statement (EIS).

(a) NASA shall prepare an EIS for actions that are likely to significantly impact the quality of the human environment, including actions for which an EA demonstrates that significant environmental impacts will potentially occur which will not be reduced or eliminated by changes to the proposed action or mitigation of its potentially significant environmental impacts. An EIS shall be prepared and published in accordance with CEQ's implementing regulations (40 CFR part 1502).

(b) NASA actions normally requiring an EIS include:

(1) Development and operation of new NASA-developed launch vehicles or space transportation systems.

(2) Management, including recovery, transport, and curation, of sample returns to Earth from solar system bodies (such as asteroids, comets, planets, dwarf planets, and planetary moons) that would receive a Restricted Earth Return categorization. NASA requires such a mission to include additional measures to ensure any potential indigenous life form would be contained so it could not adversely impact humans or Earth's environment.

(3) Substantial construction projects expected to result in significant effect(s) on the quality of the human and natural environment, when such construction and its effects are not within the scope of an existing master plan.

■ 9. Revise § 1216.307 to read as follows:

§ 1216.307 Programmatic documents and tiering.

(a) For actions that require EAs or EISs, NASA encourages programmatic-level analysis for actions that are similar in nature, broad in scope, or likely to have similar environmental effects. Programmatic NEPA analyses may take place in the form of an EA or EIS.

(b) Tiering from previously prepared EISs or EAs is appropriate when it would eliminate repetitive discussions of the same issues and exclude from consideration issues already decided. Tiering from a programmatic-level NEPA document is appropriate for site- or project-specific actions that are included within the scope of the programmatic-level analysis.

■ 10. Revise § 1216.308 to read as follows:

§ 1216.308 Supplemental EAs and EISs.

(a) In cases where a major Federal action remains to occur, supplemental documentation may be required for previously prepared EAs or EISs under the following circumstances:

(1) If substantial changes are made to the proposed action that are relevant to environmental concerns; or

(2) There are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action and its impacts; or

(3) NASA determines that the purposes of NEPA will be furthered by doing so.

(b) The preparation of a supplemental EA or EIS shall be undertaken using the same procedural requirements set forth in 40 CFR 1501.5 or 40 CFR part 1502, as applicable; however, in the event a supplement to an EIS is required, scoping shall not be required unless, at NASA's discretion and in consideration of the factors and requirements of 40 CFR 1501.9, it is determined to be necessary or would otherwise further the purposes of NEPA.

(c) When it is unclear if an EA or EIS supplement is required, NASA may prepare a Supplement Analysis.

(1) The Supplement Analysis will discuss the circumstances that are pertinent to deciding whether to prepare a supplemental EA or EIS.

(2) The Supplement Analysis will contain sufficient information for NASA to determine whether:

(i) An existing EA or EIS should be supplemented;

(ii) A new EA or EIS should be prepared; or

(iii) No further NEPA documentation is required.

(3) NASA shall make the determination and the related Supplement Analysis available to the public for information.

(d) When applicable, NASA shall incorporate the determination and supporting Supplement Analysis made under paragraph (b) of this section, into the administrative record related to the action that is the subject of the EA or EIS supplement or determination.

■ 11. Revise § 1216.309 to read as follows:

§ 1216.309 Mitigation and monitoring.

When the analysis proceeds to an EA or EIS and mitigation measures are adopted for the purpose of avoiding or reducing the significance of environmental impacts, such mitigation measures will be identified in the EA Finding of No Significant Impact (FONSI) or the EIS Record of Decision (ROD). NASA shall implement mitigation measures (including adaptive management strategies, where appropriate) consistent with applicable FONSIs and/or RODs and shall monitor their implementation and effectiveness. The Responsible Official shall ensure that funding for such mitigation measures is included in the program or project budget.

■ 12. Amend § 1216.310 by revising paragraph (a) to read as follows:

§ 1216.310 Classified actions.

(a) The classified status of a proposed action does not relieve NASA of the requirement to assess, document, and consider the environmental impacts of a proposed action.

* * * * *

■ 13. Revise § 1216.311 to read as follows:

§ 1216.311 Emergency responses.

(a) When the Responsible Official determines that emergency circumstances exist which make it necessary to take immediate response and/or recovery action(s) before preparing a NEPA analysis, then the following provisions apply:

(1) The Responsible Official may undertake immediate emergency response and/or recovery action(s) necessary to protect life, property, or valuable resources. When taking such action(s), the Responsible Official shall, to the extent practicable, mitigate foreseeable adverse environmental impacts.

(2) At the earliest practicable time, the Responsible Official shall notify the SAO of the emergency and any past, ongoing, or future NASA emergency response and/or recovery action(s). The SAO shall determine if NEPA applies and the appropriate level of NEPA analysis to document the emergency. If the emergency response and/or recovery action(s) will reasonably result in significant environmental impacts, the SAO shall consult with the CEQ about alternative arrangements for compliance with NEPA.

(b) If the Responsible Official proposes emergency response and/or recovery actions that will continue beyond those needed to immediately protect life, property, and valuable resources, the Responsible Official shall consult with the SAO to determine the appropriate level of NEPA compliance. If continuation of the emergency actions will reasonably result in significant environmental impacts, the SAO shall consult with the CEQ about alternative arrangements for compliance.

■ 14. Revise appendix A to subpart 1216.3 to read as follows:

Appendix A to Subpart 1216.3 of Part 1216—Acronyms

DEPARTMENT OF COMMERCE

Census Bureau

15 CFR Part 30

[DOCKET NO. 230421–0109]

RIN 0607–AA61

Foreign Trade Regulations (FTR): State Department Directorate of Defense Trade Controls Filing Requirement and Clarifications to Current Requirements

AGENCY: Census Bureau, Commerce Department.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Census Bureau is proposing to amend its regulations to reflect new export reporting requirements related to the State Department, Directorate of Defense Trade Controls (DDTC) Category XXI Determination Number. Specifically, the Census Bureau is proposing to add a conditional data element, DDTC Category XXI Determination Number, when ''21'' is selected in the DDTC USML Category Code field in the Automated Export System (AES) to represent United States Munitions List (USML) Category XXI. In addition to the new export reporting requirement, the proposed rule would make remedial changes to the Foreign Trade Regulations (FTR) to update International Traffic in Arms Regulations (ITAR) references in existing data elements: DDTC Significant Military Equipment Indicator and DDTC Eligible Party Certification Indicator. The proposed rule also makes remedial changes to the FTR that were proposed in the Notice of Proposed Rulemaking published December 15, 2021.

DATES: Written comments must be received on or before July 3, 2023.

ADDRESSES: You may submit comments by any of the following methods:

• *Federal eRulemaking Portal: https://www.regulations.gov.* The identification number for this rulemaking is identified by RIN 0607–AA61; or

• By email directly to *gtmd.ftrnotices@census.gov.* Include RIN 0607–AA61 in the subject line.

All comments received are part of the public record. No comments will be posted to *https://www.regulations.gov* for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Lisa E. Donaldson, Chief, Economic Management Division, Census Bureau by phone (301) 763–7296 or by email *lisa.e.donaldson@census.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Census Bureau is responsible for collecting, compiling, and publishing export trade statistics for the United States under the provisions of title 13, United States Code (U.S.C.), chapter 9, section 301. Additionally, the Census Bureau is responsible for publishing the Foreign Trade Regulations (FTR) that set the export reporting requirements for Electronic Export Information (EEI). The EEI is made up of mandatory, conditional, and optional data elements. The purpose of this rulemaking is to add a conditional data element, Directorate of Defense Trade Controls (DDTC) Category XXI Determination Number, when ''21'' (see Appendix L of the Automated Export System Trade Interface Requirements (AESTIR)) is selected in the DDTC United States Munitions List (USML) Category Code field in the EEI. The FTR defines the DDTC USML Category Code as the USML category of the article being exported (22 CFR part 121).

The Congressional mandate in Public Law 106–113 that amended section 301, of title 13 of the U.S. Code authorized the Secretary of Commerce to require the mandatory electronic filing of export information through the Automated Export System (AES) for items identified in the Commerce Control List (CCL) and the USML. Under the authorities in chapter 9 of title 13, the Secretary of Commerce proposes to collect additional data on the export of items under DDTC USML Category Code ''21'' to identify and validate which commodities DDTC USML Category Code ''21'' was cited for.

The DDTC Category XXI Determination Number is a unique number issued by DDTC in conjunction with a notification that a specific commodity is described in USML Category XXI. Information on valid USML Category XXI determinations and the prospective AES error code may be found in the Frequently Asked Questions section of DDTC's website (*www.pmddtc.state.gov*).

The Census Bureau is seeking public comments from data users, businesses and others to assess this proposed change. Below are considerations when providing feedback to this proposed rule; however, any pertinent feedback not captured by these considerations is welcome.

1. Describe the potential value of adding the DDTC Category XXI Determination Number to the EEI.

2. How long would a company that utilizes or manages proprietary software need to make programming changes to potentially add the DDTC Category XXI Determination Number field to its interface to the AES?

3. Are there business practices that a company would need to implement in order to come into compliance with the reporting of the DDTC Category XXI Determination Number field? If so, how long would a company need to implement new business practices?

The proposed rule also makes remedial changes to the FTR that were proposed in the Notice of Proposed Rulemaking published December 15, 2021 in the **Federal Register**, Volume 86, No. 238 (2021–26874.pdf (*census.gov*), and comments to these changes were favorable.

Finally, the U.S. Department of Homeland Security and the U.S. Department of State concur with the revisions to the FTR as required by 13 U.S.C. 302, and Public Law 107–228, division B, title XIV, section 1404.

Program Requirements

Pursuant to the Foreign Relations Act, Public Law 107–228 and 13 U.S.C. 301 302, the Census Bureau is amending relevant sections of the FTR to revise or clarify export reporting requirements. Therefore, the Census Bureau is proposing to amend 15 CFR part 30 by making the following amendments:

• Revise § 30.2(d)(3) to remove the language, ''(See subpart B of this part for export control requirements for these types of transactions.),'' as the exclusion overrides the export control requirements.

• Revise § 30.6(a)(1)(iii) to clarify that when the Dun and Bradstreet Number (DUNS) is reported as the U.S. Principal Party in Interest (USPPI) Identification Number, the Employer Identification Number (EIN) of the USPPI also is required to be reported in the Automated Export System.

• Revise § 30.6(b)(3) to amend the Foreign Trade Zone (FTZ) identifier to allow for 9-digits. The increased number of digits is required because of the increase in the number of subzones.

• Revise § 30.6(b)(16)(ii) to amend the DDTC Significant Military Equipment (SME) indicator by updating the ITAR references as a result of DDTC relocating certain ITAR provisions to improve the overall structure of the ITAR.

• Revise § 30.6(b)(16)(iii) to amend the DDTC eligible party certification indicator by updating the ITAR references as a result of DDTC relocating certain ITAR provisions to improve the overall structure of the ITAR.

• Revise § 30.6(b)(16)(ix) to add the conditional data element ''DDTC Category XXI Determination Number.'' The ''DDTC Category XXI Determination Number'' will be the unique number issued by DDTC to a member of the regulated community (usually the original equipment manufacturer) in conjunction with a notification that a specific commodity is described in USML Category XXI. This number is required only when citing Category XXI as an export classification and is used to confirm that an authoritative DDTC USML Category XXI determination is being referenced to do so.

• Revise § 30.37(u) to remove and reserve the exemption for technical data. This exemption is covered under § 30.2(d)(3), making the exemption redundant.

• Revise § 30.55 to remove the citation ''19 CFR 103.5'' and add in its place ''19 CFR part 103.''

• Revise § 30.71 to amend the Note to paragraph (b) to address the yearly adjustments for civil penalties as a result of inflation.

• Revise § 30.74 to amend paragraph (c)(5) to remove information that may become outdated and referencing the Census Bureau website to obtain the most current method for submitting a Voluntary Self-Disclosure.

Rulemaking Requirements

Regulatory Flexibility Act

The Chief Council for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy, Small Business Administration that this proposed rule will not have a significant economic impact on a substantial number of small entities.

In the current Foreign Trade Regulations, the Electronic Export Information (EEI) shall be filed through the Automated Export System (AES) for all exports of physical goods. The AES is the electronic system for collecting Shipper's Export Declaration (SED) (or any successor document) information from persons exporting goods from the United States, Puerto Rico, Foreign Trade Zones located in the United States and Puerto Rico, the U.S. Virgin Islands, between the U.S. and Puerto Rico, and to the U.S. Virgin Islands from the United States or Puerto Rico. In the proposed revisions, export shipments with ''21'' in the DDTC USML Category Code field will be required to report the DDTC Category XXI Determination Number.

In calendar year 2022, authorized agents and U.S. Principal Parties in Interest reported the DDTC USML Category Code of ''21'' on 0.6% of EEI records. A large majority of the EEI records involved export shipments of defense articles from branches of the Department of Defense. Based on these statistics, the Census Bureau believes this proposed rule will not create any economic impact on all companies including a substantial number of small entities.

Executive Orders

This proposed rule has been determined to not be significant for purposes of Executive Order 12866. This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 13132.

Paperwork Reduction Act

Notwithstanding any other provisions of law, no person is required to respond to, nor shall a person be subject to, a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act (PRA) unless that collection of information displays a valid Office of Management and Budget (OMB) control number.

This proposed rule covers collections of information subject to the provisions of the PRA, which are cleared by OMB under OMB Control Number 0607–0152—AES Program.

This proposed rule will not impact the current reporting-hour burden requirements as approved under OMB Control Number 0607–0152 under provisions of the PRA. The proposed rule will not require any revisions to the information sought under OMB Control Number 0607–0152. Robert L. Santos, Director, Census Bureau, approved the publication of this notification in the **Federal Register**.

List of Subjects in 15 CFR Part 30

Economic statistics, Exports, Foreign trade, Reporting and recordkeeping requirements.

For the reasons set out in the preamble, the Census Bureau is proposing to amend 15 CFR part 30 as follows:

PART 30—FOREIGN TRADE REGULATIONS

■ 1. The authority citation for 15 CFR part 30 continues to read as follows:

Authority: 5 U.S.C. 301; 13 U.S.C. 301–307; Reorganization plan No. 5 of 1990 (3 CFR 1949–1953 Comp., p.1004); Department of Commerce Organization Order No. 35–2A, July 22, 1987, as amended, and No. 35–2B, December 20, 1996, as amended; Public Law 107–228, 116 Stat. 1350.

■ 2. Amend § 30.2 by revising paragraph (d)(3) to read as follows:

§ 30.2 General requirements for filing Electronic Export Information (EEI).

* * * * *

(d) * * *

(3) Electronic transmissions and intangible transfers.

* * * * *

■ 3. Amend § 30.3 by revising paragraphs (e)(1)(ii) to read as follows:

§ 30.3 Electronic Export Information filer requirements, parties to export transactions, and responsibilities of parties to export transactions.

* * * * *

(e) * * *

(1) * * *

(ii) USPPI's EIN or DUNS.

* * * * *

■ 4. Amend § 30.6 by revising paragraphs (a)(1)(iii), (b)(3), (b)(16)(ii) and (iii), and adding paragraph (b)(16)(ix) to read as follows:

§ 30.6 Electronic Export Information data elements.

* * * * *

(a) * * *

(1) * * *

(iii) *USPPI identification number.* Report the Employer Identification Number (EIN) of the USPPI. If the USPPI has only one EIN, report that EIN. If the USPPI has more than one EIN, report the EIN that the USPPI uses to report employee wages and withholdings, and not the EIN used to report only company earnings or receipts. Use of another company's EIN is prohibited. If a USPPI reports a DUNS, the EIN is also required to be reported. If a foreign entity is in the United States at the time goods are purchased or obtained for export, the foreign entity is the USPPI. In such situations, when the foreign entity does not have an EIN, the authorized agent shall report a border crossing number, passport number, or any number assigned by CBP on behalf of the foreign entity.

* * * * *

(b) * * *

(3) *FTZ identifier.* If goods are removed from a FTZ and not entered for consumption, report the FTZ identifier. This is the unique 9-digit alphanumeric identifier assigned by the Foreign Trade Zone Board that identifies the FTZ, subzone or site from which goods are withdrawn for export.

* * * * *

(16) * * *

(ii) *DDTC Significant Military Equipment (SME) indicator.* A term used to designate articles on the USML (22 CFR part 121) for which special export controls are warranted because of their capacity for substantial military utility or capability. See sections 120.36 and 120.10(c) of the ITAR (22 CFR parts 120 through 130) for a definition of SME and for items designated as SME articles, respectively.

(iii) *DDTC eligible party certification indicator.* Certification by the U.S. exporter that the exporter is an eligible party to participate in defense trade. See 22 CFR 120.16(c). This certification is required only when an exemption is claimed.

* * * * *

(ix) *DDTC Category XXI Determination Number.* The unique number issued by DDTC to a member of the regulated community (usually the original equipment manufacturer) in conjunction with a notification that a specific commodity is described in USML Category XXI. This number is required only when citing USML Category XXI as an export classification and is used to confirm that an authoritative USML Category XXI determination is being referenced to do so.

* * * * *

§ 30.37 [Amended]

■ 5. Amend § 30.37 by removing and reserving paragraph (u).

■ 6. Amend § 30.55 by revising the introductory text to read as follows:

§ 30.55 Confidential information, import entries, and withdrawals.

The contents of the statistical copies of import entries and withdrawals on file with the Census Bureau are treated as confidential and will not be released without authorization by CBP, in accordance with 19 CFR part 103

relating to the copies on file in CBP offices. The importer or import broker must provide the Census Bureau with information or documentation necessary to verify the accuracy or resolve problems regarding the reported import transaction.

* * * * *

■ 7. Amend § 30.71 by revising the note to paragraph (b) to read as follows:

§ 30.71 False or fraudulent reporting on or misuse of the Automated Export System.

* * * * *

Note 1 to paragraph (b): The civil monetary penalties are adjusted for inflation annually based on The Federal Civil Penalties Inflation Adjustment Act of 1990 (Pub. L. 101–410; 28 U.S.C. 2461), as amended by the Debt Collection Improvement Act of 1996 (Pub. L. 104–134) and the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Section 701 of Pub. L. 114–74). In accordance with this Act, as amended, the penalties in title 13, chapter 9, sections 304 and 305(b), United States Code are adjusted and published each year in the **Federal Register** no later than January 15th.

■ 8. Amend § 30.74 by revising paragraph (c)(5) to read as follows:

§ 30.74 Voluntary self-disclosure.

* * * * *

(c) * * *

(5) *Where to make voluntary self-disclosures.* The information constituting a Voluntary Self-Disclosure or any other correspondence pertaining to a Voluntary Self-Disclosure may be submitted to the U.S. Census Bureau, Branch Chief, Trade Regulations Branch by methods permitted by the Census Bureau. See *www.census.gov/trade* for more details.

* * * * *

Dated: April 25, 2023.

Shannon Wink,

Program Analyst, Policy Coordination Office, U.S. Census Bureau.

BILLING CODE 3510–07–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 73

[Docket No. FDA–2023–C–1487]

Filing of Color Additive Petition From Environmental Defense Fund, et al.; Request To Revoke Color Additive Listing for Use of Titanium Dioxide in Food

AGENCY: Food and Drug Administration, HHS.

ACTION: Notification of petition.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing that we have filed a color additive petition, submitted by Environmental Defense Fund, et al., proposing that FDA repeal the color additive regulation providing for the use of titanium dioxide in foods.

DATES: The color additive petition was filed on April 14, 2023. Either electronic or written comments must be submitted by July 3, 2023.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of July 3, 2023. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comment, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper instructions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions)*: Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your objection, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2023–C–1487 for ''Filing of Color Additive Petition from Environmental Defense Fund, et al.; Request To Revoke Color Additive Listing for Use of Titanium Dioxide in Food.'' Received comments, those filed in a timely manner (see **DATES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comment only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80

FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts, and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Paulette M. Gaynor, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240–402–1192.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 721(d)(1) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 379e(d)(1)), we are giving notice that we have filed a color additive petition (CAP 3C0325), submitted by Environmental Defense Fund, Center for Environmental Health, Center for Food Safety, Center for Science in the Public Interest, and Environmental Working Group, c/o Tom Neltner, 1875 Connecticut Ave. NW, Washington, DC 20009. The petition proposes that we repeal the color additive regulation for titanium dioxide in § 73.575 (21 CFR 73.575), which permits the use of titanium dioxide in foods.

II. Request To Repeal Section 73.575

In accordance with the procedure in section 721(d) of the FD&C Act for issuance, amendment, or repeal of regulations, the petition asks us to repeal section 73.575 to no longer provide for the use of titanium dioxide in foods. The petitioners assert that the intended use of this color additive no longer meets the safety standard under 21 CFR 70.3(i), and cite, as evidence, an opinion by the European Food Safety Authority (EFSA) entitled ''Safety assessment of titanium dioxide (E171) as a food additive'' that was published in May 2021 (we are using EFSA's title for this document, rather than the one cited by the petitioners), and other publications.

We invite comments, additional scientific data, and other information related to the issues raised by this petition. If we determine that the available data justify repealing section 73.575 to no longer provide for the safe use of titanium dioxide in foods, we will publish our decision in the **Federal Register** in accordance with 21 CFR 71.20.

The petitioners have claimed that this action is categorically excluded under 21 CFR 25.32(m), which applies to an action to prohibit or otherwise restrict or reduce the use of a substance in food, food packaging, or cosmetics. In addition, the petitioners have stated that, to their knowledge, no extraordinary circumstances exist (see 21 CFR 25.21). If FDA determines a categorical exclusion applies, neither an environmental assessment nor an environmental impact statement is required. If FDA determines a categorical exclusion does not apply, we will request an environmental assessment and make it available for public inspection.

Dated: April 28, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–124064–19]

RIN 1545–BP55

Section 367(d) Rules for Certain Repatriations of Intangible Property

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations that, in certain cases, would terminate the continued application of certain tax provisions arising from a previous transfer of intangible property to a foreign corporation when the intangible property is repatriated to certain United States persons. The proposed regulations would affect certain United States persons that previously transferred intangible property to a foreign corporation.

DATES: Written or electronic comments and requests for a public hearing must be received by July 3, 2023. Requests for a public hearing must be submitted as prescribed in the ''Comments and Requests for a Public Hearing'' section.

ADDRESSES: Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions via the Federal eRulemaking Portal at *https://www.regulations.gov* (indicate IRS and REG–124064–19) by following the online instructions for submitting comments. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (the ''Treasury Department'') and the IRS will publish for public availability any comments submitted electronically or on paper to its public docket.

Send paper submissions to: CC:PA:LPD:PR (REG–124064–19), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

Parry, (202) 317–6936; concerning submissions of comments and requests for a public hearing, Vivian Hayes at (202) 317–6901 (not toll-free numbers) or by sending an email to *publichearings@irs.gov* (preferred).

SUPPLEMENTARY INFORMATION:

Background

I. Sections 367(d) and 6038B

A. Statute

Section 367(d) of the Internal Revenue Code (the ''Code'') provides rules for outbound transfers of intangible property (as defined in section 367(d)(4)) by a United States person (a ''U.S. person'') to a foreign corporation.[1] Section 367(d)(1) provides that, except as provided in regulations, if a U.S. person (a ''U.S. transferor'') transfers any intangible property to a foreign corporation (the ''transferee foreign corporation'') in an exchange described in section 351 or 361, section 367(d) (and not section 367(a)) applies to the transfer. Section 367(d)(2)(A) provides that a U.S. transferor that transfers intangible property subject to section 367(d) is treated as having sold the intangible property in exchange for payments that are contingent upon the productivity, use, or disposition of the intangible property.

Specifically, the U.S. transferor is treated as receiving amounts that reasonably reflect the amounts that would have been received annually in the form of such payments over the useful life of the intangible property (an ''annual inclusion''), or, in the case of a

[1] For purposes of these regulations, a U.S. person is defined in § 1.367(a)–1(d)(1), which defines a U.S. person, in part, by reference to persons described in section 7701(a)(30). Section 7701(a)(30) defines a U.S. person as a citizen or resident of the United States, a domestic partnership, a domestic corporation, and certain estates and trusts.

direct or indirect disposition of the intangible property following the transfer, at the time of the disposition (a ''lump-sum inclusion,'' and each inclusion, a ''section 367(d) inclusion''). *See* section 367(d)(2)(A)(ii)(I) and (II). The amounts taken into account by the U.S. transferor must be commensurate with the income attributable to the transferred intangible property. *See* section 367(d)(2)(A) (flush language). Section 367(d)(2)(B) provides that, for purposes of chapter 1 of subtitle A of the Code, the earnings and profits (''E&P'') of the transferee foreign corporation are reduced by the amount required to be included in the income of the U.S. transferor as a section 367(d) inclusion.

Section 6038B(a)(1)(A) grants the Secretary regulatory authority to require information reporting related to certain outbound transfers of property by a U.S. person to a foreign corporation, including rules related to outbound transfers of intangible property. Section 6038B(c) generally provides rules for failures to furnish the required information.

B. Legislative History

Congress enacted section 367(d) in substantially its present form to address ''specific and unique problems'' that exist with respect to outbound transfers of intangible property. *See* S. Rep. No 169, 98th Cong., 2d Sess., at 360 (1984); H.R. Rept. No. 432, 98th Cong., 2d Sess., at 1315 (1984). Congress generally identified the cause of such problems as follows:

> [T]ransferor U.S. companies hope to reduce their U.S. taxable income by deducting substantial research and experimentation expenses associated with the development of the transferred intangible and, by transferring the intangible to a foreign corporation at the point of profitability, to ensure deferral of U.S. tax on the profits generated by the intangible.

Id.

Congress also explained that, after the initial outbound transfer of intangible property, these problems could arise by reason of certain subsequent direct or indirect dispositions of the intangible property. *See* S. Rept. No 169, 98th Cong., 2d Sess., at 368 (1984) (''[G]ain on a disposition of stock in a [transferee foreign corporation] will be treated as being attributable, in part, to the transferred intangible . . . ; similarly, upon a disposition of the intangible by the [transferee foreign corporation], the U.S. transferor will be treated as receiving a payment [with respect to that intangible]'').

C. Regulations

1. In General

Temporary regulations were published under sections 367(d) and 6038B(a)(1)(A) on May 16, 1986 (51 FR 17936). Proposed regulations were also published under these sections on September 16, 2015 (80 FR 55568), and the related final regulations were published on December 16, 2016 (81 FR 91012) (these final regulations and the temporary regulations, together, the ''section 367(d) regulations'').

Consistent with section 367(d) and its legislative history, the section 367(d) regulations provide rules for determining a U.S. transferor's section 367(d) inclusion and a transferee foreign corporation's required adjustments for its deemed payment to the U.S. transferor. In general, the U.S. transferor takes into account an annual inclusion over the useful life of the intangible property, as determined in accordance with the provisions of section 482 and regulations thereunder. *See* § 1.367(d)–1T(c)(1). For this purpose, the useful life is the entire period during which exploitation of the intangible property is reasonably anticipated to affect the determination of taxable income, as of the time of transfer. *See* § 1.367(d)–1(c)(3)(i).

Additionally, for purposes of chapter 1 of subtitle A of the Code, the transferee foreign corporation reduces its E&P by the amount of the deemed payment to the U.S. transferor, and, for purposes of subpart F of part III of subchapter N of chapter 1 (''subpart F''), the transferee foreign corporation may treat the deemed payment as, in relevant part, an expense properly allocated and apportioned to gross income subject to subpart F in accordance with the provisions of §§ 1.954–1(c) and 1.861–8. *See* § 1.367(d)–1T(c)(2); *see also* § 1.951A–2(c)(2)(ii) (providing similar treatment for purposes of determining tested income or tested loss of a controlled foreign corporation (as defined in section 957, a ''CFC'')).

2. Subsequent Transfer Rules

If the U.S. transferor subsequently transfers the stock of the transferee foreign corporation it received in exchange for the intangible property, or if the transferee foreign corporation subsequently transfers the intangible property it received in exchange for its stock, the section 367(d) regulations provide different rules based on whether the transferee in the subsequent transfer is a U.S. person or a foreign person and whether the transferee is a related person or an unrelated person as to the U.S. transferor. *See* § 1.367(d)–1T(d), (e), and (f); *see also* Notice 2012–39, 2012–31 I.R.B. 95 (describing regulations that would apply in lieu of § 1.367(d)–1T(c), (d), (e), and (g) with respect to certain outbound transfers of intangible property by a domestic corporation to a foreign corporation in an exchange described in section 361(a) or (b)). These subsequent transfer rules treat certain subsequent transfers of the stock of the transferee foreign corporation or the intangible property as a disposition of the intangible property (within the meaning of section 367(d)(2)(A)(ii)(II)) that can accelerate a section 367(d) inclusion, and corresponding adjustments, by reason of the deemed payment. *See,* for example, § 1.367(d)–1T(d).

If the U.S. transferor subsequently transfers stock of the transferee foreign corporation to a related U.S. person (a ''successor U.S. transferor''), the transfer is not treated as a disposition of the intangible property, and the successor U.S. transferor is treated as receiving a right to receive a proportionate share (determined under § 1.367(d)–1T(e)(4)) of the annual inclusion that would otherwise be taken into account by the U.S. transferor under § 1.367(d)–1T(c). Therefore, the successor U.S. transferor is required to take into account that proportionate share of the annual section 367(d) inclusion over the remaining useful life of the intangible property, and the transferee foreign corporation takes into account any adjustments from the successor U.S. transferor's annual section 367(d) inclusion. *See* § 1.367(d)–1T(e)(1) and (2). If the U.S. transferor transfers a portion of the stock of the transferee foreign corporation to one or more successor U.S. transferors and retains a portion of the stock of the transferee foreign corporation, the U.S. transferor continues to take into account the portion of the annual section 367(d) inclusion that is not taken into account by a successor U.S. transferor.[2] *See* § 1.367(d)–1T(c)(1).

Alternatively, if a U.S. transferor subsequently transfers stock of the transferee foreign corporation to an unrelated person (U.S. or foreign), the transfer is treated as an indirect disposition of the transferred intangible property that triggers a lump-sum section 367(d) inclusion. As a result, the U.S. transferor recognizes gain immediately (determined based on the fair market value of the intangible

[2] The section 367(d) regulations apply separately as to each U.S. person treated as a U.S. transferor. Any reference to a ''U.S. transferor'' in the remainder of this Preamble includes a reference to a ''successor U.S. transferor'' unless otherwise noted.

property at the time of the indirect disposition and the U.S. transferor's adjusted basis in the intangible property at the time of the initial section 367(d) transfer), as if the U.S. transferor had sold the intangible property to the unrelated person, and the transferee foreign corporation makes corresponding adjustments. *See* § 1.367(d)–1T(d); *see also* § 1.367(d)–1T(e)(1)(iii) and (e)(2) (providing pro rata rules for cases in which there is a subsequent transfer of stock of the transferee foreign corporation to both an unrelated person(s) and a successor U.S. transferor(s)).

If the transferee foreign corporation subsequently transfers the intangible property to a related person, notwithstanding that such subsequent transfer is a direct disposition of the intangible property, the section 367(d) regulations do not trigger a lump-sum inclusion but rather provide that ''the requirement that the U.S. transferor recognize gain under [§ 1.367(d)–1T(c)(1) or (e)(1)] shall not be affected'' by such transfer. *See* § 1.367(d)–1T(f)(3). The regulation does not distinguish between a related U.S. or foreign person and provides further that ''for purposes of any required adjustments, and of any accounts receivable created under [§ 1.367(d)–1T(g)] the related person that receives the intangible property shall be treated as the transferee foreign corporation.'' *See* § 1.367(d)–1T(f)(3).

Conversely, if the transferee foreign corporation subsequently transfers the intangible property to an unrelated person (U.S. or foreign), the U.S. transferor recognizes gain immediately (in the form of a lump-sum inclusion determined using the U.S. transferor's former adjusted basis in the intangible property immediately before the transfer to the transferee foreign corporation and a partial annual inclusion), and the transferee foreign corporation makes corresponding adjustments. *See* § 1.367(d)–1T(f)(1) and (2).

As described in the preceding paragraphs of this part I.C.2 of the Background, the consequences of a direct or indirect transfer of the intangible property following an initial outbound transfer of that property depend, in relevant part, on whether the transferee in the subsequent transfer is a related or unrelated person. In determining relatedness, the section 367(d) regulations lower certain thresholds that normally apply in determining whether persons are related, to preserve the application of section 367(d) for cases in which a U.S. transferor retains a sufficient nexus to the intangible property after the subsequent transfer. *See* § 1.367(d)–1T(h)(2). Thus, the section 367(d) regulations generally preserve the application of the annual inclusion stream upon a subsequent transfer, but if the transfer sufficiently severs the U.S. transferor's nexus to the intangible property, the transfer is treated as a direct or indirect disposition of the intangible property, as applicable, and the section 367(d) regulations provide that the U.S. transferor has a lump-sum inclusion and a partial annual inclusion.

II. Application of Section 367(d) to Repatriations of Intangible Property

The Treasury Department and the IRS are aware that some taxpayers are evaluating whether to repatriate to the United States intangible property that was previously transferred to a foreign corporation in a transaction subject to section 367(d).

Because, in relevant part, the section 367(d) regulations do not distinguish between subsequent transfers of intangible property made to a related U.S. or foreign person, as described in part I.C.2 of this Background, there is a concern that, in certain cases, the section 367(d) regulations can inappropriately require the U.S. transferor to continue recognizing an annual section 367(d) inclusion even if the subsequent transfer is to a related U.S. person that will recognize the income derived from the intangible property. Specifically, the section 367(d) regulations do not terminate the required annual section 367(d) inclusion even if the intangible property is transferred to a related U.S. person that is subject to U.S. taxation on income earned from the intangible property. As a result, if the section 367(d) inclusion stream continues, the income earned from the intangible property would be subject to excessive U.S. taxation. Because the continued application of section 367(d) in these situations could result in excessive U.S. taxation and may disincentivize certain repatriations of intangible property, the Treasury Department and the IRS are proposing, in certain cases, to terminate the application of section 367(d) if the intangible property is repatriated to certain U.S. persons that are subject to U.S. taxation with respect to the income derived from the intangible property. The term ''repatriation'' is, unless otherwise noted, used in this Preamble to generally denote a subsequent transfer of the intangible property to the U.S. transferor or a U.S. person related to the U.S. transferor.

Where the U.S. transferor is a member of a consolidated group, and the intangible property is repatriated to another member of the same consolidated group (''transferee member''), some taxpayers have asked whether the U.S. transferor's annual inclusions could be redetermined to be excluded from gross income under § 1.1502–13(c)(6)(ii)(A) (the ''Automatic Relief Rule''). For that to occur, the transferee member's corresponding item must be a deduction or loss that is ''permanently and explicitly disallowed'' under another provision of the Code or regulations. *See* § 1.1502–13(c)(6)(ii)(A). However, the U.S. transferor's annual inclusions may not be excluded under the Automatic Relief Rule, because § 1.367(d)–1T(c)(2) does not explicitly disallow the transferee member's deduction for its expense tied to its deemed payment. Rather, in appropriate factual situations, the IRS has ruled that the U.S. transferor's annual inclusions may be excluded from income under the Commissioner's discretionary rule of § 1.1502–13(c)(6)(ii)(D).

To address repatriations of intangible property more generally, and not just those where the related U.S. person is a member of the same consolidated group as the U.S. transferor (and to avoid the need to obtain a ruling in such a case), these proposed regulations provide rules that more broadly apply section 367(d) to the repatriation of intangible property, including the circumstances in which the application of section 367(d) is terminated (these rules, collectively, the ''section 367(d) repatriation rules'').

III. Section 904(d) Foreign Branch Income

Section 904 provides for the application of separate foreign tax credit limitations to certain categories of income under section 904(d). One of those categories is the separate category for foreign branch income under section 904(d)(1)(B). Section 1.904–4(f)(1)(i) provides that foreign branch category income means the gross income of a United States person (as defined in section 7701(a)(30), other than a pass-through entity) that is attributable to foreign branches (as defined in § 1.904–4(f)(3)(vii)) held directly or indirectly through disregarded entities by the United States person.

In general, § 1.904–4(f)(2)(vi)(A) adjusts the attribution of gross income when disregarded payments are made between a foreign branch and a foreign branch owner, or between foreign branches. Disregarded remittances or contributions, however, do not result in the reattribution of gross income. Accordingly, when a disregarded transaction with a foreign branch may

be structured as either a remittance or contribution, on the one hand, or as a sale, exchange, or license, on the other hand, the amount of gross income attributed to a foreign branch could be manipulated. This concern is heightened when the property in question is highly mobile and highly valuable, as is generally true of intangible property (and less frequently true of tangible property).

To address these concerns § 1.904–4(f)(2)(vi)(D) provides that the amount of gross income attributable to a foreign branch (and the amount of gross income attributable to its foreign branch owner) that is not passive category income must be adjusted to reflect all transactions that are disregarded for U.S. tax purposes in which property described in section 367(d)(4) is transferred to or from a foreign branch or between foreign branches, whether or not a disregarded payment is made in connection with the transfer. In determining the amount of gross income that is attributable to a foreign branch that must be adjusted, the principles of sections 367(d) and 482 apply. For example, if a foreign branch owner transfers property described in section 367(d)(4) to a foreign branch, the principles of section 367(d) are applied by treating the foreign branch as a separate foreign corporation to which the property is transferred in exchange for stock of the corporation in a transaction described in section 351. Similarly, if a foreign branch remits property described in section 367(d)(4) to its foreign branch owner, the foreign branch is treated as having sold the transferred property to the foreign branch owner in exchange for annual payments contingent on the productivity or use of the property, the amounts of which are determined under the principles of sections 367(d) and 482.

Explanation of Provisions

I. Section 367(d) Repatriation Rules

A. In General

As described in part II of the Background of this Preamble, § 1.367(d)–1T(f)(3) provides that a subsequent disposition of intangible property by the transferee foreign corporation to a related person does not affect a U.S. transferor's annual inclusion under § 1.367(d)–1T(c) or (e). This provision further provides that the related person that receives the intangible property is treated as the new transferee foreign corporation for purposes of any required adjustments and any accounts receivable created under § 1.367(d)–1T(g). Accordingly, the section 367(d) regulations require the U.S. transferor to recognize annual inclusions even if the income earned from the intangible property is subject to current U.S. taxation in the hands of the U.S. person holding the intangible property. In addition, the deemed (substituted) transferee foreign corporation is not allowed a deduction that could reduce taxable income, even though that deemed transferee foreign corporation is the U.S. transferor or a related U.S. person.

Continuing to apply section 367(d) in such cases could give rise to excessive U.S. taxation and disincentivize taxpayers from repatriating that property. To address these concerns, proposed § 1.367(d)–1(f)(4) generally terminates the application of section 367(d) if the transferee foreign corporation repatriates the intangible property to a ''qualified domestic person'' and certain reporting requirements are satisfied. *See* proposed § 1.367(d)–1(f)(4)(i). *See* part I.C of this Explanation of Provisions for a discussion of the definition of a qualified domestic person and part III of this Explanation of Provisions for a discussion of the reporting requirements.

B. Consequences of Repatriating Intangible Property

1. In General

As noted in part I.A of this Explanation of Provisions, the proposed regulations terminate the continued application of section 367(d) when a transferee foreign corporation repatriates intangible property to a qualified domestic person and the U.S. transferor provides the relevant information described in proposed § 1.6038B–1(d)(2) and, when those requirements are met, the proposed regulations require the U.S. transferor to include in gross income a partial annual inclusion attributable to the part of its taxable year that the transferee foreign corporation held the intangible property, after which the intangible property is no longer subject to section 367(d) (thus, for example, the annual inclusion stream terminates). *See* proposed § 1.367(d)–1(f)(4)(i). The proposed regulations also require the U.S. transferor to recognize gain (which amount may be zero in certain cases) as a result of the repatriation. *See Id.* Additionally, the proposed regulations provide a special rule (discussed in part I.D of this Explanation of Provisions) to determine the qualified domestic person's basis in the repatriated intangible property. The transferee foreign corporation, on the other hand, makes the required adjustments currently described in § 1.367(d)–1T(c)(2), with minor clarifications, for cases in which the section 367(d) repatriation rules apply (that is, the adjustments with respect to the U.S. transferor's partial annual inclusion for the year of the repatriation). *See* part I.E of this Explanation of Provisions for a discussion of the modifications made with respect to the required adjustments described in current § 1.367(d)–1T(c)(2)(ii) and (e)(2)(ii).

The manner in which the repatriation occurs will determine whether the U.S. transferor must recognize gain in connection with the repatriation transaction, with corresponding adjustments being made as to the transferee foreign corporation. For example, the U.S. transferor would not recognize gain in the case of a repatriation occurring by reason of a nonrecognition transaction pursuant to which no gain or loss is recognized as to the transferee foreign corporation. *See* part I.B.2 of this Explanation of Provisions for a discussion of the rules that apply based on the form of the transaction by which the intangible property is repatriated. The proposed regulations, therefore, address the tax consequences under section 367(d) as to the intangible property, but do not otherwise alter the tax treatment of the transaction by which the intangible property is repatriated.

2. Gain Recognition as to the U.S. Transferor

Consistent with section 367(d)(2)(A)(ii)(II), proposed § 1.367(d)–1(f)(4)(i)(A) (the ''gain recognition rule'') requires the U.S. transferor to recognize gain equal to the amount described in proposed § 1.367(d)–1(f)(4)(ii). The gain recognition rule, in conjunction with the rules described in parts I.B.3 (Required adjustments for certain gain recognized) and I.D (Qualified domestic person's adjusted basis in repatriated intangible property) of this Explanation of Provisions, generally ensures that a qualified domestic person does not receive a tax-free increase to the adjusted basis in the repatriated intangible property.

Thus, as noted in part I.B.1 of this Explanation of Provisions, whether the U.S. transferor recognizes gain under the gain recognition rule depends on the form of the repatriation transaction. Specifically, the gain recognition rule focuses on whether the intangible property is transferred basis property (as defined in section 7701(a)(43)) by reason of the repatriation, without regard to the application of section 367(d) and the section 367(d)

regulations. *See* proposed § 1.367(d)–1(f)(4)(ii). The proposed regulations incorporate the definition of transferred basis property for this purpose, as opposed to other approaches for distinguishing the form of the repatriation transaction, to ensure the appropriate application of these proposed rules in all circumstances.[3]

If the intangible property is transferred basis property as described in the preceding paragraph, the amount of gain the U.S. transferor will recognize pursuant to the gain recognition rule is the amount of gain the transferee foreign corporation would recognize, if any, upon the repatriation under general subchapter C rules if its adjusted basis in the intangible property were equal to the U.S. transferor's former adjusted basis in the property. *See* proposed § 1.367(d)–1(f)(4)(ii)(A). This amount may be zero in the case of certain repatriations, for example, a repatriation by a transferee foreign corporation of intangible property to the U.S. transferor in a complete liquidation described in sections 332 and 337, in which case the U.S. transferor will not recognize any gain under the gain recognition rule. Alternatively, if, for example, the repatriation occurs in an exchange described in section 351(b) in which the transferee in the exchange is a qualified domestic person (as defined in proposed § 1.367(d)–1(f)(4)(iii)), the amount of gain determined under this rule may be greater than zero, even though the intangible property is transferred basis property, because the amount of gain is determined by reference to the gain the transferee foreign corporation would recognize upon the transaction if the adjusted basis in the intangible property were equal to the U.S. transferor's former adjusted basis in the intangible property.

If the intangible property is not transferred basis property by reason of the repatriation, the amount of gain a U.S. transferor will recognize pursuant to the gain recognition rule is the excess, if any, of the fair market value of the intangible property on the date of the repatriation over the U.S. transferor's former adjusted basis in the property. *See* proposed § 1.367(d)–1(f)(2)(ii)(B). For example, if the transferee foreign corporation repatriates the intangible property to the U.S. transferor in a distribution described in section 311, the intangible property is not transferred basis property, and therefore the rule described in this paragraph applies to determine the amount of gain recognized by the U.S. transferor under the gain recognition rule.

3. Required Adjustments Related to Certain Gain Recognized

Current § 1.367(d)–1T(f)(2)(i) provides that a transferee foreign corporation's E&P are reduced, in relevant part, by the amount of gain recognized by a U.S. transferor under § 1.367(d)–1T(f)(1). Because a U.S. transferor recognizes gain in these cases in the form of a lump-sum inclusion, the corresponding adjustment to the transferee foreign corporation's E&P is generally intended to reduce the E&P that arises for the transferee foreign corporation by reason of the disposition (and, in so doing, the adjustment prevents potential excessive E&P arising from that disposition). To achieve this goal, § 1.367(d)–1T(f)(2) necessarily implies a preceding increase to the transferee foreign corporation's E&P by reason of the disposition that is then offset by the corresponding reduction. For example, consider a case in which a U.S. transferor contributed intangible property with an adjusted basis of $0 to a wholly owned transferee foreign corporation in an exchange described in section 351(a) that was subject to section 367(d). In a later year, the transferee foreign corporation disposes of the intangible property to an unrelated person when the fair market value of the intangible property is $100x, which causes the U.S. transferor to recognize $100x of gain under § 1.367(d)–1T(f)(1); also, assume the transferee foreign corporation has $50x of other E&P unrelated to the subsequent disposition of the intangible property. Section 1.367(d)–1T(f)(2) does not simply reduce the transferee foreign corporation's E&P by $100x, but rather the corresponding reduction would offset the $100x of E&P that arises as to the transferee foreign corporation by reason of the disposition, thereby preventing potential excessive E&P and leaving the transferee foreign corporation's other E&P unaffected.

Similarly, and in order to prevent excessive E&P and gross income as to the transferee foreign corporation because of the gain recognition rule or § 1.367(d)–1T(f)(1), proposed § 1.367(d)–1(f)(2)(i) provides certain adjustments to the transferee foreign corporation's E&P and gross income that arise by reason of any gain the U.S. transferor recognizes under the gain recognition rule or § 1.367(d)–1T(f)(1). Specifically, for purposes of chapter 1 of the Code—that is, chapter 1 (relating to normal taxes and surtaxes) of subtitle A (relating to income taxes) of the Code—the transferee foreign corporation reduces (but not below zero) the portion of its E&P and gross income arising from the transaction to take into account the gain recognized by the U.S. transferor. *See* proposed § 1.367(d)–1(f)(2)(i). And, as provided currently under the section 367(d) regulations, any gain so recognized can be received by the U.S. transferor without further U.S. tax consequences pursuant to the account receivable mechanism provided in § 1.367(d)–1T(g)(1). *See* proposed § 1.367(d)–1(f)(2)(ii).

Because section 367(d) effectively shifts certain gain a transferee foreign corporation would recognize as to intangible property directly to a U.S. transferor under the gain recognition rule or § 1.367(d)–1T(f)(1) (as applicable), these rules are intended to provide appropriate reductions to offset, as to the transferee foreign corporation, the impact of a U.S. transferor's recognition of gain under section 367(d). In most cases, the proper reduction described in proposed § 1.367(d)–1(f)(2)(i) will equal the amount of gain recognized by the U.S. transferor under the provisions described in the preceding sentence. But the proper reduction may diverge from the amount of gain recognized by the U.S. transferor in certain cases, depending on the position taken with respect to the transferee foreign corporation's basis in the intangible property during the time the intangible property is subject to section 367(d). *See* part I.D of this Explanation of Provisions for additional discussion of this issue.

4. Special Rule for Related Transactions

Proposed § 1.367(d)–1(f)(4)(v) provides a special rule that applies if the intangible property is transferred in two or more related transactions. If this special rule applies, whether and how the proposed regulations apply depends on the ultimate recipient of the intangible property. *See* proposed § 1.367(d)–1(f)(6)(ii)(D) and (E) (*Examples 4* and *5*) for illustrations of this rule.

C. Qualified Domestic Person

Proposed § 1.367(d)–1(f)(4)(iii) defines a qualified domestic person for purposes of the proposed regulations. First, a qualified domestic person includes the U.S. transferor that initially transferred the intangible property subject to section 367(d) that is

[3] For example, if the form of the repatriation transaction were distinguished by reference to whether the repatriation occurred pursuant to a nonrecognition transaction (as described in section 7701(a)(45)), uncertainty could arise in certain cases, such as repatriations that occur pursuant to exchanges involving boot (such as cash). This uncertainty would impact the proposed rules for determining a qualified domestic person's adjusted basis in the repatriated intangible property, which relies on the form of the repatriation as described in this paragraph.

repatriated (an ''initial U.S. transferor'') and a U.S. person treated as the U.S. transferor pursuant to § 1.367(d)1T(e)(1) as applied with certain limitations (a ''qualified successor''). *See* proposed § 1.367(d)–1(f)(4)(iii)(A) and (B). Specifically, these limitations require that a qualified successor must be either an individual or a corporation other than a corporation exempt from tax under section 501(a), a regulated investment company (as defined in section 851(a)), a real estate investment trust (as defined in section 856(a)), a domestic international sales corporation (DISC) (as defined in section 992(a)(1)), or an S corporation (as defined in section 1361(a)) (a domestic corporation meeting these requirements, a ''qualified corporation''). Second, a qualified domestic person also includes a U.S. person that is an individual or a qualified corporation related to the U.S. transferor within the meaning of § 1.367(d)–1T(h). *See* proposed § 1.367(d)–1(f)(4)(iii)(C) and (D).

The proposed regulations define a qualified domestic person in this manner based on the principle that it is generally appropriate to terminate the continued application of section 367(d) only when all the income produced by the intangible property, as well as gain recognized on a disposition of the intangible property, will be subject to current tax in the United States as to the qualified domestic person while that person holds the property. It is also appropriate to terminate the continued application of section 367(d) for a repatriation to an initial U.S. transferor because such a transfer merely restores the circumstances that existed at the time of the original outbound transfer subject to section 367(d).

A qualified domestic person, as noted above, also includes certain U.S. persons (individuals and qualified corporations) related to either the initial U.S. transferor or qualified successor, as applicable. *See* proposed § 1.367(d)–1(f)(4)(iii)(C) and (D). This aspect of the definition of qualified domestic person implements the same principle described in the preceding paragraph; that is, to terminate the continued application of section 367(d), all of the income or gain from the intangible property must be subject to current tax in the United States as to the qualified domestic person after the repatriation or the repatriation must restore the circumstances that existed at the time of the original outbound transfer subject to section 367(d).

In the case of a domestic partnership, § 1.367(d)–1T(h) defines a related person for purposes of the section 367(d) regulations by reference to certain relationships described in section 267 or 707(b)(1). Thus, if a U.S. transferor owns more than 50 percent of the capital or profits interest in a domestic partnership, the U.S. transferor and the domestic partnership are related within the meaning of section 707(b)(1) and, therefore, the U.S. transferor and the domestic partnership are related for purposes of § 1.367(d)–1T(h), even if the domestic partnership has one or more foreign partners. The proposed regulations, however, do not treat the domestic partnership as a qualified domestic person. The Treasury Department and the IRS considered addressing such cases by including rules in the proposed regulations treating a partnership as an aggregate of its partners (an ''aggregate approach''), with the analysis for qualified domestic person status occurring under such an aggregate approach. *See, for example,* §§ 1.367(a)–1T(c)(3)(i) and 1.367(d)–1T(a) for similar rules that apply to certain transfers of intangible property by a partnership to a foreign corporation. The proposed regulations do not adopt an aggregate approach because that approach could allow taxpayers to circumvent the purposes of these proposed regulations and other related regulations following a repatriation to a domestic partnership. This could occur if, for example, partnership allocations are changed after the repatriation or if the transferee foreign corporation (or a related foreign corporation) has liquidation rights to the intangible property following the transfer. Additionally, in the case of a partnership with one or more partners that are qualified domestic persons and one or more partners that are not, an aggregate approach would necessitate rules to measure the extent to which proposed § 1.367(d)–1(f)(4)(i) applies by reason of a repatriation (and, by extension, the extent to which the annual inclusion stream under section 367(d) should continue to apply after the repatriation). To address this concern, the Treasury Department and the IRS also considered including, as part of an aggregate approach in the proposed regulations, rules like those provided in §§ 1.367(a)–3 and 1.367(a)–8 regarding gain recognition agreements to ensure that, to the extent the relief provided in proposed § 1.367(d)–1(f)(4)(i) applies as to a repatriation, a corresponding amount of income from the intangible property would be, and would continue to be, subject to tax in the United States. After consideration, however, the Treasury Department and the IRS are not proposing such an approach, because it would be unworkable due to the compliance and administrative burden.

D. Qualified Domestic Person's Adjusted Basis in Repatriated Intangible Property

Proposed § 1.367(d)–1(f)(4)(iv) provides rules regarding a qualified domestic person's basis in the intangible property it receives in a repatriation. Specifically, the proposed regulations provide that, in the case of repatriation pursuant to which the intangible property qualifies as transferred basis property, a qualified domestic person's adjusted basis in the intangible property will equal, subject to any applicable limitations that may apply under the Code, the lesser of the U.S. transferor's former adjusted basis in the intangible property or the transferee foreign corporation's adjusted basis in that property (immediately before the repatriation), increased by the greater of the amount of gain recognized by the U.S. transferor under the proposed regulations upon the repatriation (if any) or the amount of gain recognized by the transferee foreign corporation upon the repatriation (if any). *See* § 1.367(d)–1(f)(4)(v)(A). The result in most cases will track the result that would occur under generally applicable rules, like section 334(b) or 362, while appropriately accounting for situations in which the gain a U.S. transferor recognizes under the gain recognition rule differs from the gain the transferee foreign corporation recognizes by reason of the repatriation. Alternatively, if the intangible property does not qualify as transferred basis property, a qualified domestic person's adjusted basis in the intangible property will equal the fair market value of the intangible property as of the date of the subsequent disposition. *See* proposed § 1.367(d)–1(f)(4)(iv)(B).

The Treasury Department and the IRS are aware of the uncertainty regarding the treatment of adjusted basis in intangible property subject to section 367(d) while section 367(d) applies, particularly when the U.S. transferor's former adjusted basis is greater than zero. The proposed regulations are intended to address basis consequences solely when intangible property is repatriated in a transaction that eliminates the continued application of section 367(d). In this manner, the effect of proposed § 1.367(d)–1(f)(4)(iv) is prospective insofar as it provides for a qualified domestic person's adjusted basis in the intangible property after the property is no longer subject to section 367(d). Thus, the proposed regulations do not address, nor is any implication intended as to, the appropriate treatment of adjusted basis as to the

transferee foreign corporation in intangible property subject to section 367(d) while section 367(d) applies; instead, the Treasury Department and the IRS will address general basis rules under section 367(d) in future rulemaking. Until such general rules are issued, proposed § 1.367(d)–1(f)(4)(iv) would operate in a manner intended to reach an appropriate result regarding a qualified domestic person's basis in repatriated intangible property. *See* proposed § 1.367(d)–1(f)(6)(ii)(C) (*Example 3*) for an illustration of this rule.

E. Required Adjustments Related to an Annual Section 367(d) Inclusion

As noted in part I.A of this Explanation of Provisions, the transferee foreign corporation makes the required adjustments currently described in § 1.367(d)–1T(c)(2) for cases in which the section 367(d) repatriation rules apply (that is, the adjustments with respect to the U.S. transferor's partial annual inclusion for the year of the repatriation). Current § 1.367(d)–1T(c)(2)(ii) provides that, as to a U.S. transferor's annual inclusion, the transferee foreign corporation may treat that deemed payment as an expense (whether or not paid) properly allocated and apportioned against gross income subject to subpart F, in accordance with §§ 1.954–1(c) and 1.861–8.

The proposed regulations provide that the deemed payment by the transferee foreign corporation is treated as an allowable deduction that must be allocated and apportioned to such corporation's classes of gross income in accordance with §§ 1.882–4(b)(1), 1.954–1(c), and 1.960–1(c) and (d) (as appropriate). *See* proposed § 1.367(d)–1(c)(2)(ii). Proposed § 1.367(d)–1(c)(2)(ii) thus clarifies that the allowable deduction is allocated and apportioned under the provisions cited in the previous sentence potentially to any class (or classes) of gross income (as appropriate) rather than solely to gross income subject to subpart F in all circumstances. The proposed regulations make identical clarifications in proposed § 1.367(d)–1(e)(2)(ii) (required adjustments in the case of a subsequent transfer of stock of the transferee foreign corporation to a successor U.S. transferor). The proposed regulations change the reference to ''expense'' in the current regulations to ''allowable deduction'' for clarity; this modification is not intended to be a substantive change.

F. Multiple U.S. Transferors

As noted in part I.C of the Background section of this Preamble, there may be multiple U.S. transferors with respect to the same intangible property, which may occur, for example, if a U.S. transferor subsequently transfers a portion of its stock in the transferee foreign corporation to a successor U.S. transferor. In these cases, because the section 367(d) regulations apply separately as to each U.S. transferor, the requirements of proposed § 1.367(d)–1(f)(4)(i) also apply separately with respect to each U.S. transferor. That is, to terminate the continued application of section 367(d) with respect to a particular U.S. transferor, the recipient of the transferred intangible property must be a qualified domestic person with respect to that U.S. transferor and the information described in proposed § 1.6038B–1(d)(2)(iv) must be provided.

To illustrate, assume that a transferee foreign corporation (''TFC'') holds intangible property that is subject to section 367(d), and TFC repatriates that intangible property on date X. Also assume that two domestic corporations (''US1'' and ''US2'') are treated as U.S. transferors under the section 367(d) regulations by reason of owning stock of TFC (US1 was the original U.S. transferor and US2 is a successor U.S. transferor by reason of its acquisition of a portion of the stock of TFC from US1). Therefore, if the recipient of the transferred intangible property on date X is a qualified domestic person (for example, a related domestic corporation) with respect to US1, but is an unrelated person with respect to US2, the following occurs: proposed § 1.367(d)–1(f)(4)(i) would apply with respect to US1, if the information described in proposed § 1.6038B–1(d)(2)(iv) is provided, and US2 would recognize gain under § 1.367(d)–1T(f)(1) by reason of the transaction.

G. Other Modifications

The proposed regulations update the references to section 936(h)(3)(B) that appear in the applicable regulations under section 367 with references to section 367(d)(4), which was added as part of the Consolidated Appropriations Act in 2018. *See* Public Law 115–141 and §§ 1.367(a)–1(d)(5) and (6) and 1.367(e)–2(b)(2)(i)(B). The proposed regulations do not update all references to section 936(h)(3)(B) that appear in regulations issued under other sections of the Code, but such an update will be included as part of future rulemaking.

The proposed regulations provide that proposed § 1.367(d)–1(f)(3) would not apply as to a repatriation meeting the requirements of proposed § 1.367(d)–1(f)(4)(i)(B); instead, proposed § 1.367(d)–1(f)(4)(i) applies, and, thereafter, the intangible property is no longer subject to section 367(d). The language in proposed § 1.367(d)–1(f)(3) also reflects minor editorial differences from the language currently in § 1.367(d)–1T(f)(3) that are not intended to be substantive. See proposed § 1.367(d)–1(f)(3).

The proposed regulations fix a longstanding typographical error by replacing the reference to ''section 267(d)'' in current § 1.367(d)–1T(h)(2)(ii) with a reference to ''267(f).''

Finally, the proposed regulations eliminate § 1.951A–2(c)(2)(ii), which provides that deductions taken into account in determining a CFC's tested income and tested loss under section 951A include the amount of a deemed payment under section 367(d)(2)(A). This rule is no longer necessary because the proposed regulations provide that such deemed payments are treated as allowable deductions in accordance with, in relevant part, § 1.951A–2(c)(3). *See* proposed § 1.367(d)–1(c)(2)(ii) and (e)(2)(i).

II. Section 904(d) Foreign Branch Income Rules

As noted in part III of the Background section of this Preamble, the provisions in § 1.904–4(f)(2)(vi)(D) provide that, in relevant part, the principles of section 367(d) apply for determining the amount of gross income that is attributable to a foreign branch that must be adjusted under § 1.904–4(f)(2)(vi)(D). But those provisions do not elaborate on how the principles of section 367(d) apply for that purpose; in particular, there is no mention of how or whether current § 1.367(d)–1T(f) applies in the foreign branch income context.

The Treasury Department and the IRS believe that due to the differing scopes and purposes of section 367(d) and § 1.904–4(f)(2)(vi)(D), the consequences of a subsequent transfer for purposes of determining a U.S. transferor's section 367(d) inclusion do not necessarily inform the appropriate treatment for purposes of the section 904(d) branch income rules. Section 367(d), as a threshold matter, applies only in the case of certain outbound transfers of intangible property by a U.S. person to a foreign corporation, whereas § 1.904–4(f)(2)(vi)(D) applies to outbound transfers by a U.S. foreign branch owner to a foreign branch, inbound transfers by a foreign branch to a U.S. foreign branch owner, as well as transfers between foreign branches with the same U.S. foreign branch owner. If there are multiple transfers of an item of intangible property over time, each transfer must be separately evaluated and could result in differing amounts of

deemed annual payments depending on any interim changes in the value of the intangible property between successive transfers. Accordingly, these proposed regulations provide that each successive transfer to which § 1.904–4(f)(2)(vi)(D) applies is considered independently from any other preceding or subsequent transfers. *See* proposed § 1.904–(f)(2)(vi)(D)(*4*). Therefore, the subsequent transfer rules in the regulations under section 367(d), including the rule for repatriations provided in these proposed regulations, do not apply in the context of determining gross income attributable to the foreign branch income category and each successive transfer is separately subject to the provisions of § 1.904–(f)(2)(vi)(D)(*1*) and will not terminate or otherwise impact the application of § 1.904–(f)(2)(vi)(D)(*1*) to a prior transfer described in that paragraph.

III. Reporting

A. Reporting Requirements for Subsequent Transfers of Intangible Property

As described in part I.A of this Explanation of Provisions, proposed § 1.367(d)–1(f)(4)(i) requires a U.S. transferor to provide the information described in proposed § 1.6038B–1(d)(2)(iv) with respect to the repatriation. In general, §§ 1.6038B–1 and 1.6038B–1T provide information reporting rules that apply with respect to transfers of property to foreign corporations, including transfers of property described in sections 367(a) and (d). *See* § 1.6038B–1(c) and (d). Section 1.6038B–1T(d) provides specific information reporting rules for transfers subject to section 367(d), including rules that apply to subsequent transfers. *See* § 1.6038B–1T(d)(2).

These proposed regulations make two conforming changes to the reporting requirements for subsequent transfers under § 1.6038B–1T(d)(2) (the ''proposed information reporting rules''). The first change provides that, to the extent a qualified domestic person receives intangible property in a subsequent transfer, the subsequent transfer information described in proposed § 1.6038B–1(d)(2)(iv) instead of the subsequent transfer information described in § 1.6038B–1T(d)(2)(iii) must be provided.

The second change adds information reporting requirements for a subsequent transfer of intangible property to a qualified domestic person. *See* proposed § 1.6038B–1(d)(2)(iv). These reporting rules request information that is necessary to ensure that proposed § 1.367(d)–1(f)(4) is appropriately applied to the subsequent transfer.

B. Relief for Certain Failures To Provide Required Information

In general, as a condition for terminating the application of section 367(d) with respect to the transferred intangible property, proposed § 1.367(d)–1(f)(4)(i)(B) requires a U.S. transferor to provide the information described in proposed § 1.6038B–1(d)(2)(iv). If a U.S. transferor fails to provide that information, the repatriation is subject to proposed § 1.367(d)–1(f)(3) such that the section 367(d) regulations, including the requirement to take an annual inclusion into account over the useful life of the intangible property, continue to apply. However, a U.S. transferor is eligible for relief under the proposed regulations if proposed § 1.367(d)–1(f)(4)(i)(B) would have applied to the subsequent transfer of intangible property but for the fact that the required information was not provided and the U.S. transferor, upon becoming aware of the failure, promptly provides the required information and explains its failure to comply. *See* proposed § 1.367(d)–1(f)(5). When it applies, proposed § 1.367(d)–1(f)(5) treats the requirements of proposed § 1.367(d)–1(f)(4)(i)(B) as satisfied as of the date of the transfer of intangible property to the qualified domestic person.

IV. Applicability Dates

The proposed regulations generally apply to subsequent dispositions of intangible property occurring on or after the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**. *See* proposed §§ 1.367(d)–1(j)(2)), 1.904–4(q)(3), and 1.6038B–1(g). Proposed § 1.951A–2(c)(2) applies to taxable years of foreign corporations ending on or after the date of publication of the Treasury decision adopting these rules as final regulations in the **Federal Register**, and to taxable years of United States shareholders in which or with which such taxable years end. *See* proposed § 1.951A–7(e).

Special Analyses

I. Regulatory Planning and Review—Economic Analysis

The Administrator of the Office of Information and Regulatory Affairs (''OIRA''), Office of Management and Budget (''OMB''), has determined that this proposed rule is not a significant regulatory action, as that term is defined in section 3(f) of Executive Order 12866. Therefore, OIRA has not reviewed this proposed rule pursuant to section 6(a)(3)(A) of Executive Order 12866 and the April 11, 2018, Memorandum of Agreement between the Treasury Department and OMB.

II. Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to OMB for review in accordance with the Paperwork Reduction Act under control number 1545–0026. Commenters are strongly encouraged to submit public comments electronically. Written comments and recommendations for the proposed information collection should be sent to *https://www.reginfo.gov/public/do/PRAMain,* with copies to the Internal Revenue Service. Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' then by using the search function. Submit electronic submissions for the proposed information collection to the IRS via email at *omb.unit@irs.gov* (indicate ''REG–124064–19 (1545–0026)'' on the Subject line). Comments on the collection of information should be received by July 3, 2023. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the IRS, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information;

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information in this proposed regulation is in § 1.6038B–1(d)(2)(iv). This information is necessary to ensure that proposed § 1.367(d)–1(f)(4) is appropriately applied to the subsequent transfer.

The collection of information is required to comply with section 367(d). The likely respondents are domestic corporations. Burdens associated with these requirements will be reflected in the burden for Form 926, *Return by a U.S. Transferor of Property to a Foreign Corporation.*

Estimated change in annual reporting burden: 1601 hours.

Estimated increase in annual burden per respondent: 2.4 hours.

Estimated number of respondents: 667.

Estimated frequency of responses: annually.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

III. Regulatory Flexibility Act

When an agency issues a rulemaking proposal, the Regulatory Flexibility Act (5 U.S.C. chapter 6) (''RFA'') requires the agency ''to prepare and make available for public comment an initial regulatory flexibility analysis'' that will ''describe the impact of the proposed rule on small entities.'' *See* 5 U.S.C. 603(a). Section 605 of the RFA provides an exception to this requirement if the agency certifies that the proposed rulemaking will not have a significant economic impact on a substantial number of small entities. A small entity is defined as a small business, small nonprofit organization, or small governmental jurisdiction. *See* 5 U.S.C. 601(3) through (6).

The Treasury Department and the IRS do not have detailed data readily available to assess the exact number of small entities potentially affected by the proposed regulations. Based on the limited data available, it is estimated that there will be less than 700 taxpayers potentially affected by the proposed regulations. But, among those taxpayers, an even smaller portion will likely be affected by the proposed regulations as these rules apply to a specific type of transaction—repatriations of intangible property subject to section 367(d). Moreover, the entities potentially affected by these proposed regulations are generally not small entities, because of the resources and investment necessary to develop intangible property and, once so developed, transfer the intangible property to a foreign corporation. Therefore, the Treasury Department and the IRS certify that the proposed regulations will not have a significant economic impact on a substantial number of small entities. The IRS invites the public to comment on the impact of these regulations on small entities.

IV. Section 7805(f)

Pursuant to section 7805(f), this notice of proposed rulemaking has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

V. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a State, local, or Tribal government, in the aggregate, or by the private sector, of $100 million in 1995 dollars, updated annually for inflation. This rule does not include any Federal mandate that may result in expenditures by State, local, or Tribal governments, or by the private sector in excess of that threshold.

VI. Executive Order 13132: Federalism

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on State and local governments, and is not required by statute, or preempts State law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This proposed rule does not have federalism implications, does not impose substantial direct compliance costs on State and local governments, and does not preempt State law within the meaning of the Executive order.

Comments and Requests for Public Hearing

Before these proposed amendments to the regulations are adopted as final regulations, consideration will be given to comments that are submitted timely to the IRS as prescribed in the Preamble under the **ADDRESSES** section. The Treasury Department and the IRS request comments on all aspects of the proposed regulations.

A public hearing will be scheduled if requested in writing by any person who timely submits electronic or written comments. Requests for a public hearing are encouraged to be made electronically. If a public hearing is scheduled, notice of the date and time for the public hearing will be published in the **Federal Register**. Announcement 2020–4, 2020–17 IRB 1, provides that until further notice, public hearings conducted by the IRS will be held telephonically. Any telephonic hearing will be made accessible to people with disabilities.

Statement of Availability of IRS Documents

IRS Revenue Procedures, Revenue Rulings, and Notices cited in this Preamble are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *https://www.irs.gov.*

Drafting Information

The principal authors of these regulations are Chadwick Rowland and L. Ulysses Chatman, Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, the Treasury Department and the IRS propose to amend 26 CFR part 1 as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 6 U.S.C. 7805 * * *

Section 1.367(d)–1 also issued under 26 U.S.C. 367(d).

* * * * *

§ 1.367(a)–1 [Amended]

■ **Par. 2.** Section 1.367(a)–1 is amended by removing the language ''section 936(h)(3)(B)'' in paragraphs (d)(5) and (6) and adding the language ''section 367(d)(4)'' in its place.

■ **Par. 3.** Section 1.367(d)–1 is amended by:

■ 1. Removing reserved paragraphs (c)(1) through (2).

■ 2. Adding a heading to paragraph (c) and adding paragraphs (c)(1) and (2).

■ 3. Removing reserved paragraphs (c)(4) through (g)(2) (introductory text).

■ 4. Adding paragraphs (c)(4), (d), (e), and (f).

■ 5. Adding a heading to paragraph (g) and adding paragraphs (g)(1) and (g)(2) introductory text.

■ 6. Removing reserved paragraphs (g)(2)(ii) through (g)(2)(iii)(D).

■ 7. Adding paragraph (g)(2)(ii) and reserved paragraphs (g)(2)(iii) introductory text and (g)(2)(iii)(A) through (D).

■ 8. Removing reserved paragraphs (g)(4) through (i).

■ 9. Adding paragraphs (g)(4), (h), and (i).

■ 10. Revising paragraph (j).

The additions and revision read as follows:

§ 1.367(d)–1 Transfers of intangible property to foreign corporations.

* * * * *

(c) *Deemed payments upon transfer of intangible property to foreign corporation*—(1) *In general.* For further guidance, see § 1.367(d)–1T(c)(1).

(2) *Required adjustments.* For further guidance, see § 1.367(d)–1T(c)(2) introductory text and (c)(2)(i).

(i) [Reserved]

(ii) The deemed payment is treated as an allowable deduction (whether or not that amount is paid) of the transferee foreign corporation properly allocated and apportioned to the appropriate classes of gross income in accordance with §§ 1.882–4(b)(1), 1.951A–2(c)(3), 1.954–1(c), 1.960–1(c), and 1.960–1(d), as applicable.

* * * * *

(4) *Blocked income.* For further guidance, see § 1.367(d)–1T(c)(4).

(d) *Subsequent transfer of stock of transferee corporation to unrelated person.* For further guidance, see § 1.367(d)–1T(d).

(e) *Subsequent transfer of stock of transferee foreign corporation to related person*—(1) *Transfer to related U.S. person treated as disposition of intangible property.* For further guidance, see § 1. 367(d)–1T(e)(1).

(2) *Required adjustments.* For further guidance, see § 1.367(d)–1T(e)(2) introductory text and (e)(2)(i).

(i) [Reserved]

(ii) The deemed payment is treated as an allowable deduction (whether or not that amount is paid) of the transferee foreign corporation properly allocated and apportioned to the appropriate classes of gross income in accordance with §§ 1.882–4(b)(1), 1.951A–2(c)(3), 1.954–1(c), 1.960–1(c), and 1.960–1(d), as applicable.

(iii) For further guidance, see § 1.367(d)–1T(e)(2)(iii) through (e)(4).

(iv) [Reserved]

(3) through (4) [Reserved]

(f) *Subsequent disposition of transferred intangible property by transferee foreign corporation—(1) In general.* For further guidance, see § 1.367(d)–1T(f)(1).

(2) *Required adjustments.* If a U.S. transferor is required to recognize gain under paragraph (f)(4)(i)(A) of this section or § 1.367(d)–1T(f)(1), then, in addition to the adjustments described in paragraph (c)(2)(ii) of this section and § 1.367(d)–1T(c)(2) with respect to the deemed payment described in § 1.367(d)–1T(f)(1)(ii)—

(i) For purposes of chapter 1 of the Code, the transferee foreign corporation reduces (but not below zero) the portion of its earnings and profits and gross income arising by reason of the subsequent disposition of the intangible property by the amount of gain recognized by the U.S. transferor under paragraph (f)(4)(i)(A) of this section or § 1.367(d)–1T(f)(1); and

(ii) The U.S. transferor may establish an account receivable from the transferee foreign corporation equal to the amount of gain recognized under paragraph (f)(4)(i)(A) of this section or § 1.367(d)–1T(f)(1) in accordance with § 1.367(d)–1T(g)(1).

(3) Subsequent transfer of intangible property to related person. Except as provided in paragraph (f)(4)(i)(B) of this section, a U.S. person's requirement to recognize income under § 1.367(d)–1T(c) or (e) is not affected by the transferee foreign corporation's subsequent disposition of the transferred intangible property to a related person. For purposes of any required adjustments, and of any accounts receivable created under § 1.367(d)–1T(g)(1), the related person that receives the intangible property is treated as the transferee foreign corporation.

(4) Subsequent transfer of intangible property to qualified domestic person—(i) In general. Except as provided in paragraph (f)(4)(v) of this section, if a U.S. person transfers intangible property subject to section 367(d) and the rules of this section and § 1.367(d)–1T to a foreign corporation in an exchange described in section 351 or 361 and, within the useful life of the intangible property, that transferee foreign corporation subsequently disposes of the intangible property to a qualified domestic person, then—

(A) The U.S. transferor of the intangible property (or any person treated as such pursuant to § 1.367(d)–1T(e)(1)) is required to recognize gain, as applicable, equal to the amount described in paragraph (f)(4)(ii) of this section; and

(B) If the U.S. transferor provides the information described in § 1.6038B–1(d)(2)(iv), then—

(*1*) The U.S. transferor is required to recognize a deemed payment as provided in § 1.367(d)–1T(f)(1)(ii); and

(*2*) The intangible property is no longer subject to section 367(d), this section, and § 1.367(d)–1T after applying paragraphs (f)(4)(i)(A) and (f)(4)(i)(B)(1) of this section.

(ii) *Gain recognition for U.S. transferor.* The amount of gain a U.S. transferor must recognize under paragraph (f)(4)(i)(A) of this section is determined as follows—

(A) If the intangible property is transferred basis property (as defined in section 7701(a)(43)) by reason of the subsequent disposition (determined without regard to section 367(d), this section, and § 1.367(d)–1T), the amount of gain, if any, the transferee foreign corporation would recognize if its adjusted basis in the intangible property were equal to the U.S. transferor's former adjusted basis in the property; or

(B) If the intangible property is not transferred basis property by reason of the subsequent disposition (determined without regard to section 367(d), this section, and § 1.367(d)–1T), the excess, if any, of the fair market value of the intangible property on the date of the subsequent disposition and the U.S. transferor's former adjusted basis in that property.

(iii) *Qualified domestic person.* For purposes of paragraph (f)(4) of this section, a qualified domestic person means—

(A) The U.S. transferor that initially transferred intangible property subject to section 367(d);

(B) A U.S. person treated as a U.S. transferor under § 1.367(d)–1T(e)(1), provided such person is an individual or a corporation other than a corporation exempt from tax under section 501(a), a regulated investment company (as defined in section 851(a)), a real estate investment trust (as defined in section 856(a)), a domestic international sales corporation (DISC) (as defined in section 992(a)(1)), or an S corporation (as defined in section 1361(a));

(C) A U.S. person that is an individual related, within the meaning of paragraph (h)(2)(ii) of this section and § 1.367(d)–1T(h), to the person described in paragraph (f)(4)(iii)(A) or (B) of this section; or

(D) A U.S. person that is a corporation related, within the meaning of paragraph (h)(2)(ii) of this section and § 1.367(d)–1T(h), to the person described in paragraph (f)(4)(iii)(A) or (B) of this section, other than a corporation exempt from tax under section 501(a), a regulated investment company (as defined in section 851(a)), a real estate investment trust (as defined in section 856(a)), a DISC (as defined in section 992(a)(1)), or an S corporation (as defined in section 1361(a)).

(iv) *Qualified domestic person's basis in the intangible property.* The qualified domestic person's adjusted basis in the intangible property is—

(A) In the case of a subsequent disposition of intangible property described in paragraph (f)(4)(ii)(A) of this section, and subject to any applicable limitations that may apply

under the Code, the lesser of the U.S. transferor's former adjusted basis in the intangible property or the transferee foreign corporation's adjusted basis in the intangible property (as determined immediately before the subsequent disposition), in each case increased by the greater of the amount of gain (if any) described in paragraph (f)(4)(ii)(A) of this section and recognized by the U.S. transferor or the amount of gain (if any) recognized by the transferee foreign corporation as to the intangible property by reason of the subsequent disposition; or

(B) In the case of a subsequent disposition of intangible property described in paragraph (f)(4)(ii)(B) of this section, the fair market value of the intangible property (as determined on the date of the subsequent disposition).

(v) *Special rule for related transactions.* If the transferee foreign corporation subsequently disposes of the transferred intangible property to a person that would, absent this paragraph (f)(4)(v), be a qualified domestic person (initial transferee) and, as part of a series of related transactions, the intangible property is subsequently disposed of to any other person, including by reason of multiple dispositions, then the initial transferee is treated as a qualified domestic person only if the ultimate recipient of the intangible property is a qualified domestic person. See paragraphs (f)(6)(ii)(D) and (E) of this section (*Examples 4* and *5*), for illustrations of the application of this paragraph (f)(4)(v).

(5) *Relief for certain failures to comply.* This paragraph (f)(5) provides relief if paragraph (f)(4)(i)(B)(2) of this section would apply but for the U.S. transferor's failure to provide the information required by paragraph (f)(4)(i)(B) of this section (a ''failure to comply''). When a failure to comply occurs, the subsequent disposition of the transferred intangible property is generally subject to paragraphs (f)(3) and (f)(4)(i)(A) of this section, and not paragraph (f)(4)(i)(B)(2) of this section. Nevertheless, a failure to comply is deemed not to have occurred (regardless of whether the U.S. transferor continued to include amounts in gross income under § 1.367(d)–1T(c) or (e) after the subsequent disposition), and the requirements of paragraph (f)(4)(i)(B) of this section are treated as satisfied as of the date of the subsequent disposition if, promptly after the U.S. transferor becomes aware of the failure, the U.S. transferor provides such information and provides a reasonable explanation for its failure to comply to the Director of Field Operations, Cross Border Activities Practice Area of Large Business & International (or any successor to the roles and responsibilities of such position, as appropriate). Additionally, the U.S. transferor must timely file an amended return for the taxable year in which the subsequent disposition occurred (and, if applicable, for each taxable year starting with the taxable year immediately after the taxable year in which the subsequent disposition occurred and ending with the taxable year in which the U.S. transferor seeks relief under this paragraph (f)(5)) that includes the information required by paragraph (f)(4)(i)(B) of this section. If any taxable year of the U.S. transferor is under examination when an amended return is filed, a copy of the amended return (or, if applicable, amended returns) must be provided to the Internal Revenue Service personnel conducting the examination.

(6) *Examples*—(i) *Assumed facts.* For purposes of the examples in paragraph (f)(6)(ii) of this section, and except where otherwise indicated, the following facts are assumed.

(A) USP and USS are domestic corporations that each use a calendar taxable year.

(B) TFC is a foreign corporation whose functional currency is the U.S. dollar.

(C) In year 1, USP transfers intangible property, as defined in section 367(d)(4), with a $0 adjusted basis, to TFC in a section 351 exchange (the ''transferred IP''), and such transfer is subject to section 367(d).

(D) Each annual inclusion (including any amount described in § 1.367(d)–1T(f)(1)(ii)) is taken into account under section 367(d)(2)(A)(ii)(I) and § 1.367(d)–1T(c)(1).

(E) Any subsequent transfer or disposition of stock of TFC or the transferred IP occurs within the useful life of the transferred IP.

(F) All transactions are respected under general principles of tax law.

(ii) *Examples.* The following examples illustrate the application of paragraph (f)(4) of this section and other paragraphs of this section that relate to paragraph (f)(4).

(A) *Example 1: Complete liquidation of transferee foreign corporation into a qualified domestic person*—(*1*) *Facts.* In year 2, USP transfers all the stock of TFC to USS, a related person within the meaning of § 1.367(d)–1T(h) and paragraph (h)(2)(ii) of this section, in a section 351 exchange to which § 1.367(d)–1T(e)(1) applies (the ''year 2 transfer''). In year 3, TFC distributes all its property (including the transferred IP) to USS pursuant to a complete liquidation to which sections 332 and 337 apply (the ''year 3 liquidation''). The all earnings and profits amount determined under § 1.367(b)–2(d) with respect to the stock of TFC held by USS is $0. The information described in § 1.6038B–1(d)(2) is provided by USS for the taxable year in which the year 3 liquidation occurs.

(*2*) *Analysis*—(*i*) *The year 2 transfer.* Because the year 2 transfer involves a transfer of all the stock of TFC by USP (the initial U.S. transferor) to a related U.S. person (USS), under § 1.367(d)–1T(e)(1)(i) USS (a successor U.S. transferor) is treated as receiving the right to receive a proportionate share of the contingent annual payments that USP would have otherwise taken into account under § 1.367(d)–1T(c). As determined under § 1.367(d)–1T(e)(4), USS's proportionate share of such payments is 100 percent. Accordingly, USS will annually include in its gross income the full amount of each of the annual payments that USP would otherwise have taken into account under § 1.367(d)–1T(c) over the useful life of the transferred IP, and USP will not recognize any gain upon the year 2 transfer. See § 1.367(d)–1T(e)(1)(ii) and (iii).

(*ii*) *The year 3 liquidation.* The year 3 liquidation results in a subsequent disposition of the transferred IP to USS. USS, a U.S. person treated as the U.S. transferor pursuant to § 1.367(d)–1T(e)(1), is a qualified domestic person within the meaning of paragraph (f)(4)(iii) of this section. Pursuant to paragraph (f)(4)(i)(A) of this section, USS must recognize the amount of gain described in paragraph (f)(4)(ii) of this section. Because the year 3 liquidation is a complete liquidation to which sections 332 and 337 apply, the intangible property is transferred basis property (as defined in section 7701(a)(43) and determined without regard to section 367(d), this section, and § 1.367(d)–1T), and therefore paragraph (f)(4)(ii)(A) applies to determine the amount of any gain USS must recognize. Because TFC does not recognize gain with respect to the transferred IP (regardless of the adjusted basis in the intangible property) by reason of the year 3 liquidation, the amount of gain described in paragraph (f)(4)(ii)(A) of this section is $0. Accordingly, USS does not recognize gain pursuant to paragraph (f)(4)(i)(A) of this section by reason of the year 3 liquidation. Additionally, because USS provides the information described in § 1.6038B–1(d)(2), paragraph (f)(4)(i)(B) of this section applies to the year 3 liquidation. USS therefore recognizes a deemed payment representing the part of USS's taxable year during which TFC held the transferred IP pursuant to paragraph (f)(4)(i)(B)(*1*) of this section, and the required adjustments described in paragraph (c)(2)(ii) of this section and § 1.367(d)–1T(c)(2)(i) apply as to the deemed payment. Also, because USS does not recognize gain pursuant to paragraph (f)(4)(i)(A) of this section, the required adjustments described in paragraph (f)(2) of this section do not apply. Pursuant to paragraph (f)(4)(i)(B)(*2*) of this section, after taking the deemed payment into account, the transferred IP is no longer subject to section 367(d), this section, and § 1.367(d)–1T. Finally, pursuant to paragraph (f)(4)(iv)(A) of this section, USS's adjusted basis in the

transferred IP is $0, which is equal to USP's former adjusted basis in the transferred IP ($0), increased by the greater of the amount of gain recognized by USS under paragraph (f)(4)(i)(A) of this section ($0) or the amount of gain recognized by TFC upon the year 3 distribution ($0).

(B) *Example 2: Taxable distribution of the transferred intangible property to a qualified domestic person*—(*1*) *Facts.* The facts are the same as in paragraph (f)(6)(ii)(A) of this section (Example 1), except that, instead of in year 3 TFC distributing all its property to USS pursuant to a complete liquidation, in year 3 TFC distributes the transferred IP to USS in a distribution described in section 311(b) when the fair market value of the transferred IP is $100x (the ''year 3 distribution''). TFC's adjusted basis in the transferred IP immediately before the distribution is $0.

(*2*) *Analysis.* The consequence of the year 2 transfer is the same as described in paragraph (f)(6)(ii)(A)(*2*)(*i*) of this section (*Example 1*). Like the consequences described in paragraph (f)(6)(ii)(A)(*2*) of this section (*Example 1*), the year 3 distribution is a subsequent disposition of the transferred IP to USS, a qualified domestic person. Pursuant to paragraph (f)(4)(i)(A) of this section, USS must recognize the amount of gain described in paragraph (f)(4)(ii) of this section. Because the year 3 distribution is described in section 311(b) the intangible property is not transferred basis property (as defined in section 7701(a)(43) and determined without regard to section 367(d), this section, and § 1.367(d)–1T), and therefore USS must recognize $100x gain under paragraph (f)(4)(ii)(B) of this section. The $100x gain amount equals the excess of the fair market value of the transferred IP on the date of the year 3 distribution ($100x) over USP's former adjusted basis in the property ($0). TFC, because of USS's gain recognition under paragraph (f)(4)(i)(A) of this section, reduces (but not below zero) the portion of its earnings and profits and gross income arising by reason of the year 3 distribution by the amount of such gain under paragraph (f)(2)(i) of this section. Specifically, because the year 3 distribution requires USS to recognize $100x of gain, TFC reduces the portion of its earnings and profits and gross income that arise by reason of the year 3 distribution, which is $100x (the excess of the fair market value of the transferred IP ($100x) over TFC's adjusted basis in the transferred IP ($0)), by $100x (the amount of gain USS recognizes pursuant to paragraph (f)(4)(i)(A) of this section). As a result, after taking into account the reduction, TFC has no earnings and profits or gross income that arise by reason of the year 3 distribution. Furthermore, USS may establish an account receivable from TFC equal to $100x under paragraph (f)(2)(ii) of this section. Additionally, and as described in paragraph (f)(6)(ii)(A)(2) of this section (*Example 1*), pursuant to paragraph (f)(4)(i)(B)(*1*) of this section, USS recognizes a deemed payment for the portion of USS's taxable year during which TFC held the transferred IP, and the required adjustments described in paragraph (c)(2)(ii) of this section and § 1.367(d)–1T(c)(2) apply to this deemed payment. After taking these consequences into account, pursuant to paragraph (f)(4)(i)(B)(*2*) of this section, the transferred IP is no longer subject to section 367(d), this section, and § 1.367(d)–1T. Finally, pursuant to paragraph (f)(4)(iv)(B) of this section, USS's adjusted basis in the transferred IP is $100x, which is the fair market value of the transferred IP on the date of the year 3 distribution.

(C) *Example 3: Qualified domestic person's basis in intangible property when intangible property is repatriated in an exchange described in section 351*(*b*)—(*1*) *Facts.* The facts are the same as in paragraph (f)(6)(ii)(A) of this section (*Example 1*), except that the transfer of stock of TFC to USS in year 2 does not occur and instead of the year 3 liquidation, in year 3 TFC transfers the intangible property to USS (a qualified domestic person as defined in paragraph (f)(4)(iii) of this section) in an exchange described in section 351(b) pursuant to which TFC recognizes $50x of gain and USP recognizes $50x of gain under paragraph (f)(4)(i)(A) of this section (the ''year 3 exchange'').

(*2*) *Analysis.* Pursuant to paragraph (f)(4)(iv)(A) of this section, USS's adjusted basis in the intangible property is $50x, which is the amount equal to the lesser of USP's former adjusted basis in the property ($0) or TFC's adjusted basis in the property ($0), increased by the greater of the amount of gain recognized by USP under paragraph (f)(4)(i)(A) of this section ($50x) or the amount of gain recognized by TFC upon the year 3 exchange ($50x).

(D) *Example 4: Repatriation as part of a series of related transactions culminating in transfer to a foreign corporation*—(*1*) *Facts.* The facts are the same as in paragraph (f)(6)(ii)(A)(1) of this section (*Example 1*), except that the year 3 liquidation occurs as part of a series of related transactions pursuant to which USS transfers the transferred IP that it receives from TFC to a related foreign corporation (FC1) in exchange for stock in FC1.

(*2*) *Analysis.* Because the year 3 liquidation occurs as part of a series of related transactions pursuant to which the transferred IP is ultimately contributed to a FC1, a foreign corporation, and because a foreign corporation is not a qualified domestic person pursuant to paragraph (f)(4)(iii) of this section, then, under paragraph (f)(4)(v) of this section, the year 3 liquidation is not treated as a subsequent disposition described in paragraph (f)(4)(i) of this section, but is instead treated as a subsequent disposition described in paragraph (f)(3) of this section.

(E) *Example 5: Repatriation as part of a series of related transactions culminating in transfer to a qualified domestic person*—(*1*) *Facts.* The facts are the same as in paragraph (f)(6)(ii)(B)(1) of this section (*Example 2*), except that the year 3 distribution occurs as part of a series of related transactions pursuant to which USS disposes of the transferred IP that it receives from TFC to USP.

(*2*) *Analysis.* Because the year 3 distribution occurs as part of a series of related transactions pursuant to which the transferred IP is distributed to USP, and because USP is a qualified domestic person pursuant to paragraph (f)(4)(iii) of this section, paragraph (f)(4)(v) of this section does not prevent paragraph (f)(4)(i) of this section from applying to the year 3 distribution. Accordingly, the consequences under section 367(d) of the year 3 distribution are the same as those described in paragraph (f)(6)(ii)(B)(2) of this section (Example 2), and the consequences of the subsequent disposition of the transferred IP by USS to USP are determined after applying paragraph (f)(4) of this section to the transfer of the transferred IP by TFC to USS.

(g) *Special rules*—(1) *Establishment of accounts receivable.* For further guidance, see § 1.367(d)–1T(g)(1).

(2) *Election to treat transfer as sale.* For further guidance, see § 1.367(d)–1T(g)(2) introductory text.

* * * * *

(ii) For further guidance, see § 1.367–1T(g)(2)(ii) through (g)(2)(iii)(D).

(iii) [Reserved]

(A) through (D) [Reserved]

* * * * *

(4) *Coordination with section 482.* For further guidance, see § 1.367(d)–1T(g)(4).

(5) *Determination of fair market value.* For further guidance, see § 1.367(d)–1T(g)(5).

(6) *Anti-abuse rule.* For further guidance, see § 1.367(d)–1T(g)(6).

(h) *Related person.* For further guidance, see § 1.367(d)–1T(h) introductory text and (h)(1).

(1) [Reserved]

(2) For further guidance, see § 1.367(d)–1T(h)(2) introductory text and (h)(2)(i).

(i) [Reserved]

(ii) Section 1563 applies (for purposes of section 267(f)) without regard to section 1563(b)(2).

(i) *Effective date.* For further guidance, see § 1.367(d)–1T(i).

(j) *Applicability dates*—(1) *In general.* This section applies to transfers occurring on or after September 14, 2015, and to transfers occurring before September 14, 2015, resulting from entity classification elections made under § 301.7701–3 of this chapter that are filed on or after September 14, 2015. For transfers occurring before this section is applicable, see § 1.367(d)–1T as contained in 26 CFR part 1 revised as of April 1, 2016.

(2) *Certain subsequent dispositions of intangible property.* Paragraphs (c)(2)(ii), (e)(2)(ii), (f)(2) through (5), and (h)(2)(ii) of this section apply to subsequent dispositions of intangible property occurring on or after [date of publication of final regulations in the **Federal Register**]. For subsequent dispositions of intangible property occurring before

[date of publication of final regulations in the **Federal Register**], see § 1.367(d)–1T (as contained in 26 CFR part 1, revised as of April 1, 2022).

§ 1.367(d)–1T [Amended]

■ **Par. 4.** Section 1.367(d)–1T is amended by:
■ 1. Removing ''; and'' at the end of paragraph (c)(2)(i) and adding a period in its place.
■ 2. Removing and reserving paragraphs (c)(2)(ii), (e)(2)(ii), and (f)(2) and (3).
■ 3. Removing ''; and'' at the end of paragraph (h)(2)(i) and adding a period in its place.
■ 4. Removing and reserving paragraph (h)(2)(ii).

§ 1.367(e)–2 [Amended]

■ **Par. 5.** Section 1.367(e)–2 is amended by removing the language ''section 936(h)(3)(B)'' in the last sentence of paragraph (b)(2)(i)(B) and adding the language ''section 367(d)(4)'' in its place.

■ **Par. 6.** Section 1.904–4 is amended by adding paragraph (f)(2)(vi)(D)(*4*) and revising paragraph (q)(3) to read as follows:

§ 1.904–4 Separate application of section 904 with respect to certain categories of income.

* * * * *

(f) * * *

(2) * * *

(vi) * * *

(D) * * *

(4) *Multiple transfers of intangible property.* If the same intangible property is transferred in a series of transfers described in paragraph (f)(2)(vi)(D)(*1*) of this section, each successive transfer is separately subject to the provisions of paragraph (f)(2)(vi)(D)(*1*) and will not terminate or otherwise affect the application of paragraph (f)(2)(vi)(D)(*1*) to a prior transfer described in paragraph (f)(2)(vi)(D)(*1*).

* * * * *

(q) * * *

(3) Except as provided in the following sentence, paragraph (f) of this section applies to taxable years that begin after December 31, 2019, and end on or after November 2, 2020. Paragraph (f)(vi)(D)(*4*) of this section applies to taxable years that begin on or after [date of publication of final regulations in the **Federal Register**].

■ **Par. 7.** Section 1.951A–2 is amended by revising paragraph (c)(2) to read as follows:

§ 1.951A–2 Tested income and tested loss.

* * * * *

(c) * * *

(2) *Determination of gross income and allowable deductions.* For purposes of determining tested income and tested loss, the gross income and allowable deductions of a controlled foreign corporation for a CFC inclusion year are determined under the rules of § 1.952–2 for determining the subpart F income of the controlled foreign corporation, except, for a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as an insurance company to which subchapter L of chapter 1 of the Code applies, substituting ''the rules of sections 953 and 954(i)'' for ''the principles of §§ 1.953–4 and 1.953–5'' in § 1.952–2(b)(2).

* * * * *

■ **Par. 8.** Section 1.951A–7 is amended by adding paragraph (e) to read as follows:

§ 1.951A–7 Applicability dates.

* * * * *

(e) *Determination of gross income and allowable deductions.* Section 1.951A–2(c)(2) applies to taxable years of foreign corporations ending on or after [date of publication of final regulations in the **Federal Register**], and to taxable years of United States shareholders in which or with which such taxable years end. For taxable years of foreign corporations ending before [date of publication of final regulations in the **Federal Register**], and to taxable years of United States shareholders in which or with which such taxable years end, see § 1.951A–2(c)(2)(i) and (ii) as contained in 26 CFR part 1, revised as of April 1, 2022.

■ **Par. 9.** Section 1.6038B–1 is amended by:
■ 1. Removing reserved paragraphs (d)(1) through (1)(iii).
■ 2. Adding paragraphs (d) heading and (d)(1) introductory text and reserved paragraphs (d)(1)(i) through (iii).
■ 3. Removing reserved paragraphs (d)(1)(viii) through (d)(2).
■ 4. Adding paragraphs (d)(1)(viii), (d)(2), and (g)(8).

The additions read as follows:

§ 1.6038B–1 Reporting of certain transfers to foreign corporations.

* * * * *

(d) *Transfers subject to section 367 (d)*—(1) *Initial transfer.* For further guidance, see § 1.6038B–1T(d)(1) introductory text through (d)(1)(iii).

(i) through (iii) [Reserved]

* * * * *

(viii) *Other intangibles.* For further guidance, see § 1.6038B–1T(d)(1)(viii).

(2) *Subsequent transfers.* For additional, see § 1.6038B–1T(d)(2) introductory text through (d)(2)(ii).

(i) through (ii) [Reserved]

(iii) *Subsequent transfer.* Except for a subsequent transfer described in paragraph (d)(2)(iv) of this section, provide the following information concerning the subsequent transfer:

(A) For further guidance, see § 1.6038B–1T(d)(2)(iii)(A) through (C).

(B) through (C) [Reserved]

(iv) *Subsequent transfer of intangible property to a qualified domestic person.* Provide the following information concerning a subsequent transfer of intangible property described in § 1.367(d)–1(f)(4)(i):

(A) A statement providing that § 1.367(d)–1(f)(4)(i)(B) applies to the subsequent transfer;

(B) A general description of the subsequent transfer and any wider transaction of which it forms a part, including the U.S. transferor's former adjusted basis in the intangible property and the transferee foreign corporation's adjusted basis in the intangible property (as determined immediately before the subsequent transfer), the amount and computation of any gain recognized by the U.S. transferor under § 1.367(d)–1(f)(4)(i)(A), and a description of whether the intangible property was, or is expected to be, subsequently transferred to one or more other persons (as described in § 1.367(d)–1(f)(4)(v));

(C) A description of the intangible property;

(D) A copy of the Form 926 with respect to the original transfer of the intangible property and any attachments identifying the intangible property as within the scope of section 367(d);

(E) The name, address, and taxpayer identification number of the qualified domestic person that receives the intangible property, including a statement describing the relationship between the U.S. transferor and the qualified domestic person, and, if applicable, such information regarding any other persons described in § 1.367(d)–1(f)(4)(v); and

(F) Any other information as may be prescribed by the Commissioner in publications, forms, instructions, or other guidance.

* * * * *

(g) * * *

(8) Paragraphs (d)(2)(iii) introductory text and (d)(2)(iv) of this section apply to transfers occurring on or after [date of publication of final regulations in the **Federal Register**].

■ **Par. 10.** Section 1.6038B–1T is amended by revising paragraph (d)(2)(iii) introductory text to read as follows:

§ 1.6038B–1T Reporting of certain transactions to foreign corporations (temporary).

* * * * *

(d) * * *

(2) * * *

Deputy Commissioner for Services and Enforcement.

[FR Doc. 2023–08843 Filed 5–2–23; 8:45 am]

BILLING CODE 4830–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 236

[Docket ID: DOD–2019–OS–0112]

RIN 0790–AK86

Department of Defense (DoD) Defense Industrial Base (DIB) Cybersecurity (CS) Activities

AGENCY: Office of the DoD Chief Information Officer, Department of Defense (DoD).

ACTION: Proposed rule.

SUMMARY: The DoD is proposing revisions to the eligibility criteria for the voluntary Defense Industrial Base (DIB) Cybersecurity (CS) Program. These revisions will allow a broader community of defense contractors to benefit from bilateral information sharing as when this proposed rule is finalized all defense contractors who are subject to mandatory cyber incident reporting will be able to participate. DoD is also proposing changes to definitions and some technical corrections for readability.

DATES: Comments must be received by June 20, 2023.

ADDRESSES: Please submit comments on this proposed rule, identified by 32 CFR part 236, Docket ID: DOD–2019–OS–0112 and/or by Regulatory Information Number (RIN) 0790–AK86, by any of the following methods:

- *Federal Rulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Department of Defense, Office of the Assistant to the Secretary of Defense for Privacy, Civil Liberties, and Transparency, Regulatory Directorate, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: The general policy for comments is to make these submissions available for public viewing as they are received without change, including any personal identifiers or contact information provided by the commenter.

FOR FURTHER INFORMATION CONTACT:

- Stacy Bostjanick, Chief Defense Industrial Base Cybersecurity, Office: 703–604–3167.
- *DIB CS Program Management Office: OSD.DIBCSIA@mail.mil.*

Instructions: DO NOT submit comments to this email address.

SUPPLEMENTARY INFORMATION:

Background and Authority

The Defense Industrial Base (DIB) means the Department of Defense, Government, and private sector worldwide industrial complex with capabilities to perform research and development, design, produce, and maintain military weapon systems, subsystems, components, or parts to satisfy military requirements. The DIB Cybersecurity Program is a voluntary program to enhance and supplement participants' capabilities to safeguard DoD information that resides on, or transits, DIB unclassified information systems. The program encourages greater threat information sharing to complement mandatory aspects of DoD's DIB cybersecurity activities which are contractually mandated through Defense Federal Acquisition Regulation Supplement (DFARS) 252.204–7012, Safeguarding Covered Defense Information and Cyber Incident Reporting.[1] This program supports and complements DoD-specific authorities at 10 U.S.C. 2224 and the Federal Information Security Management Act (FISMA) (44 U.S.C. 3541 *et seq.*). Cyber threat information sharing activities under this proposed rule also fulfill important elements of DoD's critical infrastructure protection responsibilities, as the sector risk management agency for the DIB (see Presidential Policy Directive 21 (PPD–21),[2] ''Critical Infrastructure Security and Resilience''). Expanding eligibility requirements for the DIB CS Program will augment DoD's information sharing activities with the DIB.

Currently, the DIB CS Program has the following objectives:

- Establish a voluntary, mutually acceptable framework to protect information from unauthorized access.
- Protect the confidentiality of information exchanged to the maximum extent authorized by law.
- Create a trusted environment to maximize network defense and remediation efforts by:

1. Sharing cyber threat information and incident reports.
2. Providing mitigation/remediation strategies and malware analysis.

This program is part of DoD's larger portfolio of work to protect DoD information handled by the DIB by understanding and sharing information, building security partnerships, implementing long-term risk management programs, and maximizing efficient use of resources. It supports two-way information sharing and maintains meaningful relationships and frequent dialogue across the diverse array of eligible defense contractors. For eligible defense contractors, the program maintains a capability for companies to access classified government cyber threat information providing additional context to better understand the cyber threats targeting their networks and information systems.

In May 2012, DoD published an interim final rule establishing the voluntary DIB CS Program and the bilateral information sharing model still used today.[3] The 2012 rule established a voluntary cyber threat information sharing program for cleared defense contractors (CDC) with the ability to safeguard classified information, estimated at 2,650 in 2012. Under the rule cleared defense contractor is defined as a private entity granted clearance by DoD to access, receive, or store classified information for the purpose of bidding for a contract or conducting activities in support of any program of DoD. The 2012 rule stated DoD would maintain a website to facilitate the following aspects of program participation: (1) sharing information regarding eligibility and participation in the program with potential participants, (2) applying to the program online, and (3) executing the necessary agreements with the Government. DoD has established this capability as an online portal referred to as ''DIBNet,'' located at *https://dibnet.dod.mil.* A final rule responding to public comments was published in October 2013.[4] In October 2015, responding to new statutory requirements for cyber incident reporting for DoD contractors,

[3] 77 FR 27615, May 11, 2012 (*https://www.govinfo.gov/content/pkg/FR-2012-05-11/pdf/2012-10651.pdf*).

[4] 78 FR 62430, October 22, 2013 (*https://www.govinfo.gov/content/pkg/FR-2013-10-22/pdf/2013-24256.pdf*).

subcontractors, and those providing operationally critical support, DoD published another interim final rule [5] to expand eligibility to all cleared defense contractors (estimated at 8,500 in 2015 and 12,000 in 2022), subject to program eligibility requirements. The 2015 rule removed the safeguarding requirement to participate in the program. The rule also removed the mandatory program eligibility requirement to have or acquire a Communications Security (COMSEC) account [6] and obtain access to DoD's secure voice and data transmission systems, although participants still have to fulfill these requirements to receive classified cyber threat information electronically. A final rule responding to public comments was published in October 2016.[7]

Discussion of the Proposed Rule

With this rule, the Department proposes to expand eligibility requirements to allow greater program participation and increase the benefits of bilateral information sharing, which helps protect DoD controlled unclassified information from cyberattack, as well as to better align the voluntary DIB CS Program with DoD's mandatory cyber incident reporting requirements. The current eligibility requirements, based on the October 2016 rule, requires a company to be a cleared defense contractor [8] who:

- Has DoD-approved medium assurance certificates; [9]
- Has an existing facility clearance [10] to at least the Secret level;
- Can execute the standardized Framework Agreement [11] provided to interested contractors after the Department has verified the DIB company is eligible.

The program has experienced steady growth, with the annual number of applications tripling since 2016 (80 total applications received in 2016, 266 total applications received in 2022). It has also seen a steady increase in the percentage of defense contractors who are interested in participating but do not meet current eligibility requirements. The percentage of applications received from ineligible defense contractors has risen at an average rate of 5% per year since 2016; 10% of applications received in 2016 were from ineligible defense contractors, while 45% of applicants in 2022 were ineligible. This steady increase in ineligible applicants indicates an increasing desire amongst defense contractors to participate in a cyber threat information sharing program.

In addition, the Department has actively engaged defense associations, universities, and companies in the DIB, as well as participated in many public forums discussing cyber threats and the way forward. The overwhelming feedback was for the Department to facilitate engagement with the broader community of defense contractors beyond just the cleared defense community. In general, smaller defense contractors have fewer resources to devote to cybersecurity, which may provide a vector for adversaries to access information critical to national security. In addition, the Department is working on providing more tailored threat information to support the needs of a broader community of defense contractors with varying cybersecurity capabilities. The gap in eligibility in the current program, feedback from interested but ineligible contractors, a vulnerable DoD supply chain, and a pervasive cyber threat have prompted DoD to propose revising the eligibility requirements of the DIB CS Program to allow participation by non-cleared defense contractors.

The maximum number of defense contractors estimated to be subject to mandatory cyber incident reporting under DFARS clause 252.204–7012 is 80,000. The presence of the clause in a contract does not establish that covered defense information is shared. DoD is working on reporting mechanisms to better assess contractors managing covered defense information. The population of defense contractors in possession of covered defense information and subject to mandatory incident reporting requirements far exceeds the population of defense contractors currently eligible to participate in the voluntary DIB CS Program. With the proposed changes to the eligibility criteria, an estimated additional 68,000 defense contractors will be eligible to participate in the voluntary DIB CS Program. Based on prior participation statistics, it is estimated that about 10% of the eligible contractors (12,000 + 68,000 = 80,000) will actually apply to join the voluntary DIB CS Program ($80{,}000 \times 0.10 = 8{,}000$).

Currently, the DIB CS Program has approximately 1,000 cleared defense contractors participating in the program. Program participants have access to technical exchange meetings, a collaborative web platform (DIBNet-U), and threat products and services through the DoD Cyber Crime Center (DC3). DC3 implements the program's operations by sharing cyber threat information and intelligence with the DIB, and offering a variety of products, tools, services, and events. DC3 serves as the single clearinghouse for unclassified Mandatory Incident Reports (MIRs) and voluntary threat information sharing reports.

Changes to Definitions

In addition to the program eligibility changes described above, DoD is also proposing the following changes.

§ 236.2 Definitions

1. Access to media—This definition is being removed as it is no longer used in the rule text.

3. DIB CS Program participant—This definition has been revised to align with the revised eligibility requirements set forth in this proposed rule.

4. Government furnished information (GFI)—This definition was revised to adopt the convention of referring to the DIB CS Program with a capital 'P'.

Other Proposed Changes

DoD is amending § 236.5 (DoD's DIB CS program) in order to align the program description with the revised eligibility requirements. As a result, references to cleared defense contractors have been replaced with contractors that own or operate a covered contractor information system. Security clearance information is only collected, when applicable, if a company elects to participate in classified information sharing. In addition, the language stating participation is typically three to ten company-designated points of contact (POC) has been removed, to avoid confusion regarding the number of POCs, as some larger companies may wish to nominate a larger number of

[5] 80 FR 59581, October 2, 2015 (*https://www.govinfo.gov/content/pkg/FR-2015-10-02/pdf/2015-24296.pdf*).

[6] The National Security Agency administers COMSEC accounts.

[7] 81 FR 68312, October 4, 2016 (*https://www.govinfo.gov/content/pkg/FR-2016-10-04/pdf/2016-23968.pdf*).

[8] 32 CFR 236.2 defines cleared defense contractor to mean a subset of contractors cleared under the National Industrial Security Program (NISP) who have classified contracts with the DoD.

[9] The DoD has established the External Certification Authority (ECA) program to support the issuance of DoD-approved certificates to industry partners and other external entities and organizations. The ECA program is designed to provide the mechanism for these entities to securely communicate with the DoD and authenticate to DoD Information Systems. [*https://public.cyber.mil/eca/*].

[10] Entities (including companies and academic institutions) engaged in providing goods or services to the U.S. Government involving access to or creation of classified information may be granted a Facility Clearance (FCL). The Defense Counterintelligence and Security Agency (DCSA) processes, issues, and monitors the continued eligibility of entities for an FCL. [*https://www.dcsa.mil/mc/isd/fc/*].

[11] Applicants to the DIB CS Program submit an application from *https://dibnet.dod.mil*. Once a company has been verified, the Framework Agreement is made available for review.

POCs and smaller companies may wish to nominate fewer.

DoD is amending § 236.7 (DoD's DIB CS program requirements) to remove the requirement that a company have an existing active facility clearance (FCL) to at least the Secret level granted under 32 CFR part 117, National Industrial Security Program Operating Manual (NISPOM),[12] to be eligible to participate in the DIB CS Program. In addition, references to cleared defense contractors have been replaced with contractors that own or operate a covered contractor information system.

A foundational element of the activities described in this part is the recognition that the information shared between DoD and DIB CS Program participants pursuant to the DIB CS Program includes extremely sensitive information that requires protection. For additional information regarding the Government's safeguarding of information received from contractors that requires protection, see the Privacy Impact Assessment (PIA) for the DIB Cybersecurity Activities located at: *https://dodcio.defense.gov/Portals/0/Documents/DIB_PIA.pdf.* The PIA provides detailed procedures for handling personally identifiable information (PII), attributional information about the strengths or vulnerabilities of specific covered contractor information systems, information providing a perceived or real competitive advantage on future procurement action, and contractor information marked as proprietary or commercial or financial information. In addition, personnel information is covered by Office of the Secretary of Defense (OSD) System of Records Notice (SORN) DCIO 01 (*https://dpcld.defense.gov/Portals/49/Documents/Privacy/SORNs/OSDJS/DCIO-01.pdf*). No changes to the PIA or SORN are being proposed in conjunction with this proposed rule.

Expected Impact of the Proposed Rule

Costs

DoD believes the cost impact of the proposed changes to this proposed rule is not significant, as the changes primarily expand the availability of the established DIB CS Program to additional defense contractors. The newly eligible population of defense contractors may incur costs to familiarize themselves with the rule and those who elect to participate in the program will incur costs related to program participation. The Government will continue to incur costs related to operating the program. The DIB CS Program conducts outreach activities to defense contractors through press releases, participation in defense-oriented conferences, speaking engagements, and through digital media. The program will leverage pre-established channels to message changes to the program and engage with the eligible population of defense contractors. Based on the program growth experienced that during the last phase of program expansion the program is forecasting annual growth at just over 1% of the eligible population. At a growth rate of 1% per year it will take the program approximately 10 years to achieve the estimated 10% participation rate of the eligible DIB.

Costs to DIB Participants

In order to join the DIB CS Program there is an initial labor burden for a defense contractor to familiarize themselves with the rule and subsequently apply to the program and provide POC information. In total, if it takes each contractor 30 minutes to read and familiarize him/herself with the rule, it will take contractors 4,000 hours to familiarize themselves with the rule (8,000 participants × .5 = 4,000 hours). At an hourly wage of $108.92, the total cost incurred by contractors for rule familiarization will amount to $108,920 dollars ($108.92 × .5 hours = $54.46 × 4,000 hours = $217,840). The hourly labor cost is based on the mean wage estimate from the Bureau of Labor Statistics for an Information Security Analysts, Occupational Employment and Wages, May 2021 and is covered under information collection 0704–0490. This hourly wage is adjusted upward by 100% to account for overhead and benefits, which implies a value of $108.92 per hour.

The estimated annual burden for a company to apply to the program or for a participating company to update POC information is $36.31, with a total annual cost to all participants of $319,498.67 at peak program participation. This calculation is based on 8,000 participants submitting an average of one application per year and 10% of the population (800 participants) submitting an update each year, with 20 minutes of labor per submission, at a cost of $108.92 per hour ($36.31 ($108.92 × ⅓ hours) × 8,800 events = $319,498.67).

There is an estimated annual burden projected at $544.60 for defense contractors voluntarily sharing cyber threat information. This is based on a defense contractor electing to submit an average of five informational reports per year with two hours of labor per voluntary submission, at a cost of $108.92 per hour ($108.92 × 2 hours each = $217.84 × 5 reports = $1,089.20). It is estimated that 1% of the newly eligible population will elect to join the DIB CS Program annually, which currently has approximately 1,000 participants, with program growth plateauing at 10% of the population by Year 9. The table below shows the costs to industry to voluntarily sharing cyber threat information over a 9-year period. If, in the first year of the program expanding there are 980 participants and 800 new participants join the program, there will be a total of 1,780 participants. Assuming each participant responds five times, this totals 8,900 annual responses times $217.84 per response and will equal $1,938,776 in total annual cost to participants, which is covered in information collection 0704–0489.

	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6	Year 7	Year 8	Year 9
DIB CS Participants	1,780	2,580	3,380	4,180	4,980	5,780	6,580	7,380	8,000
Voluntary Reports Received	8,900	12,900	16,900	20,900	24,900	28,900	32,900	36,900	40,000
Annual Cost	$1,938,776	$2,810,136	$3,681,496	$4,552,856	$5,424,216	$6,295,576	$7,166,936	$8,038,296	$8,713,600

In addition, DIB CS Program participants may choose to attend meetings in conjunction with the DIB CS Program. All new participants are invited to attend an orientation session and all existing participants are invited to attend meetings on a quarterly basis. If a defense contractor chooses to send an employee to a day-long meeting each quarter, the defense contractor would incur a cost of $1,742 ($108.92 × 8 hours = $871.36 × 4 meetings = $3,485.44).

[12] *https://www.ecfr.gov/current/title-32/subtitle-A/chapter-I/subchapter-D/part-117.*

Costs to the Government

The DoD has identified general areas of costs related to the operation of this program. First, DoD incurs costs to implement this program operationally by responding to inquiries, processing application submissions and collecting, sharing, and managing POC information for program administration and management purposes. Second, DoD incurs costs to collect, analyze, and disseminate threat information.

DoD responds to an average of 2,000 questions each year and these responses are estimated to take 20 minutes per response. If it takes 20 minutes to respond to each question, it will take 667 hours to respond to questions. At an hourly wage of $51.16,[13] it will cost the DoD $34,107 dollars to respond to questions ($51.16 × (.333 × 2,000) = $34,107). Costs to the government are incurred when a company applies to the DIB CS Program to validate and store POC information and to perform follow-up activities with a company when the information is outdated. The processing time for these activities is estimated to be one hour per company. If 8,000 companies participate in the program and 10% of the companies update information with the program annually the labor cost to the government is expected to be $450,208 = (8,800 × $51.16).

In addition, there is a cost incurred by the DoD to receive cyber threat information submitted by defense contractors to have it analyzed by cyber threat experts at DC3. By year 9 of the expanded program, it is estimated DC3 will receive 40,000 responses per year, based on the estimate that each participating company elects to submit 5 informational reports (8,000 participants × 5 reports). Each product takes approximately two hours to create and incurs an hourly labor cost of $51.16 per hour. This equals $102.32 (2 hours × 51.16) per response. The labor cost to the government is forecasted to be $4,092,800 annually after 9 years of growth. In addition to processing cyber threat information, the DoD incurs operational and maintenance costs for the system receiving and storing cyber threat information. This system costs the DoD $5,100,000 annually to maintain (covered under information collection 0704–0489).

Benefits

This program benefits the Department by increasing awareness and improving assessments of cyber incidents that may affect mission critical capabilities and services. It continues to be an important element of the Department's comprehensive effort to defend DoD information, protect U.S. national interests against cyber-attacks, and support military operations and contingency plans worldwide. Once a defense contractor joins the program, they are encouraged to share information, including cyber threat indicators, that they believe may be of value in alerting the Government and others, as appropriate, of adversary activity to enable the development of mitigation strategies and proactively counter threat actor activity. DC3 develops written products that include analysis of the threat, mitigations, and indicators of adversary activity. Even cyber incidents that are not compromises of covered defense information may be of interest to DoD for situational awareness purposes. This information is disseminated as anonymized threat products that are shared with authorized DoD personnel, other Federal agencies, and company-designated POCs participating in the DIB CS Program. With the revisions to the eligibility criteria, the Department will be able to reduce the impact of cyber threat activity on DIB networks and information systems and, in turn, preserve its technological advantage and protect DoD information and warfighting capabilities. The mitigation of the cyber threat targeting defense contractors reinforces the nation's national security and economic vitality.

For DIB participants, this program provides valuable cyber threat information they cannot obtain from anywhere else and technical assistance through analyst-to-analyst exchanges, mitigation and remediation strategies, and cybersecurity best practices in a collaborative environment. The shared unclassified and classified cyber threat information is used to bolster a company's cybersecurity posture and mitigate the growing cyber threat. The program's tailored support for small, mid-size, and large companies with varying cybersecurity maturity levels is an asset for participants. The program remains a key element of DoD's cybersecurity efforts by providing services to help protect DIB CS Program participants and the sensitive DoD information they handle.

Alternatives

Alternative #1

Maintain status quo with the ongoing voluntary cybersecurity program for cleared defense contractors.

Reason for Not Selecting Alternative #1

This option is not selected as it does not allow DoD to increase bilateral information sharing to bolster DIB cybersecurity and safeguard DoD information transiting on DIB networks. In addition, the population of defense contractors with mandatory reporting requirements would continue to exceed those eligible to participate in the DIB CS Program. Companies that submit mandatory reports but are not eligible for the DIB CS Program would continue to be excluded from receiving cyber threat information and technical assistance.

Alternative #2

DoD posts generic cyber threat information and cybersecurity best practices on a publicly accessible website without directly engaging participating companies.

Reason for Not Selecting Alternative #2

This alternative was not selected as companies already have access to open-source cyber threat information and best practices from multiple sources in the public sector. This alternative does not afford access by defense contractors to government-furnished cyber threat information, specifically tailored for the DIB. In addition, this alternative does not enable defense contractor interaction with DC3.

Alternative #3

Revise eligibility requirements to permit all defense contractors who own or operate a covered contractor information system (approximately 80,000 defense contractors) to participate in the DIB CS Program. Using the 10% estimation used for past program participation, the program is forecasted to grow to approximately 8,000 defense contractors.

Reason for Selecting Alternative #3

The revised eligibility criteria allow DoD to perform outreach to a broader DIB community. Being able to share pertinent cyber threat information with the DIB will increase both the DoD and defense contractors' knowledge of the cyber threat landscape. Giving DoD the ability to have greater visibility over issues affecting unclassified networks will allow DoD to share pertinent alerts and threat information with a larger number of DIB organizations. DoD believes that revising the eligibility criteria to apply to contractors that own or operate covered contractor information systems is an important step in managing DoD's operational risk because it will allow additional companies to begin receiving cyber

[13] This is based upon the 2022 General Schedule (GS) pay scale for a GS–9 Step 5 and is adjusted upward by 100% to adjust for overhead and benefits.

threat information to inform and harden their cybersecurity posture. DIB organizations that do not meet the current eligibility requirements to be in a DoD-sponsored cyber threat information sharing program have expressed interest in this change as noted previously by the growing percentage of ineligible applicants.

Regulatory Compliance Analysis

A. Executive Order 12866, ''Regulatory Planning and Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Executive Order 12866 direct agencies to assess all costs, benefits, and available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This proposed rule has been designated ''significant,'' under Executive Order 12866.

B. Congressional Review Act (5 U.S.C. 801 et seq.)

Pursuant to the Congressional Review Act, this proposed rule has not been designated a major rule, as defined by 5 U.S.C. 804(2). This proposed rule will not have an economic effect above the $100 million threshold defined in 5 U.S.C. 804(2) or spur a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets.

C. Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601)

The Office of the DoD Chief Information Officer certifies that this proposed rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. This proposed rule will have a significant positive impact on small entities that will become eligible to participate in and receive benefits through the DIB CS Program. For DIB participants, this program provides cyber threat information and technical assistance through analyst-to-analyst exchanges, mitigation and remediation strategies, and cybersecurity best practices in a collaborative environment. The shared threat information is used to bolster a company's cybersecurity posture and mitigate the growing cyber threat. The program's tailored support for small, mid-size, and large companies with varying cybersecurity maturity levels is an asset for participants.

Participation in the DIB CS Program is voluntary. Program application and participation costs are described in the cost analysis section of this proposed rule. These costs are voluntarily incurred and associated with the labor and resource costs to complete the required program paperwork, including execution of the Framework Agreement, to submit information to the Government, and to receive information from the Government. The costs associated with applying to the DIB CS Program are associated exclusively with labor costs and estimated to be $18.15 per company. None of the program's offering come at an additional fee to DIB participants and additional costs related to participation are estimated based on the time investment (labor hours) required to obtain the benefits as described in the cost analysis of this preamble. Therefore, the Regulatory Flexibility Act, as amended, does not require us to prepare a regulatory flexibility analysis.

D. Sec. 202, Public Law 104–4, ''Unfunded Mandates Reform Act''

Section 202 of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532) requires agencies to assess anticipated costs and benefits before issuing any rule whose mandates require spending in any one year of $100 million in 1995 dollars, updated annually for inflation. When the Federal Government passes legislation requiring a State, local, or tribal government to perform certain actions or offer certain programs but does not include any funds for the actions or programs in the law, an unfunded mandate results. This proposed rule will not mandate any requirements for State, local, or tribal governments, and will not mandate private sector incurred costs above the $100 million threshold defined in 2 U.S.C. 1532.

E. Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

This proposed rule contains the following information collection requirements under the Paperwork Reduction Act (PRA) of 1995.

- 0704–0489, ''DoD's Defense Industrial Base (DIB) Cybersecurity (CS) Activities Cyber Incident Reporting,''
- 0704–0490, ''DoD's Defense Industrial Base (DIB) Cybersecurity (CS) Points of Contact (POC) Information.''

With the revisions in eligibility criteria, DoD expects the burden associated with both collections to increase as additional defense contractors join the DIB CS Program and additional cyber threat information is reported. DOD is requesting comments on both collections as part of this proposed rule. Additional information regarding these collections of information—including all background materials—can be found at *https://www.reginfo.gov/public/do/PRAMain* by using the search function to enter either the title of the collection or the Office of Management and Budget (OMB) Control Number.

Comments are invited on: (a) whether the proposed collections of information are necessary for the proper performance of the functions of DoD, including whether the information will have practical utility; (b) the accuracy of the estimate of the burden for both information collections; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden on respondents, including the use of automated collection techniques or other forms of information technology. Specific information on both collections is below.

DoD's Defense Industrial Base (DIB) Cybersecurity (CS) Activities Cyber Incident Reporting—OMB Control Number 0704–0489

Title: DoD's Defense Industrial Base (DIB) Cybersecurity (CS) Activities Cyber Incident Reporting.

Type of Request: Revision.

Number of Participants: Number of DoD contractors eligible to participate in the voluntary program is 80,000. DoD estimates that approximately 1% of the newly eligible population will elect to join the program each year with program growth plateauing at approximately 10% of the population by Year 9. Based on this estimate, after the first three years of the program expansion, 2,400 defense contractors will join the existing 980 participating companies resulting in 3,380 defense contractors submitting voluntary cyber threat information reports.

Projected Responses per Participant: Five reports per participant.

Annual Total Responses: 16,900.

Average Burden per Response: Two hours.

Annual Total Burden Hours: 33,800 hours for all voluntary submissions.

Needs and Uses: DoD designated DC3 as the single focal point for receiving all cyber incident reporting affecting the unclassified networks of DoD contractors from industry and other government agencies. DoD collects cyber incident and threat reports using the Defense Industrial Base Network (DIBNet) portal (*https://dibnet.dod.mil*). Cyber threat reports are analyzed by experts at DC3 and they, in turn, develop written products that include analysis of the threat, mitigations, and indicators of adversary activity. These anonymized products are shared with authorized DoD personnel, authorized personnel from other Federal agencies, and authorized POCs from the DIB CS Program.

Affected Public: Business or other for-profit and not-for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

DoD's Defense Industrial Base (DIB) Cybersecurity (CS) Points of Contact (POC) Information—OMB Control Number 0704–0490

Title: DoD's Defense Industrial Base (DIB) Cybersecurity (CS) Activities Points of Contact (POC) Information.

Type of Request: Revision.

Number of Participants: DoD contractors impacted is 80,000. DoD estimates that approximately 1% of the newly eligible population (800 defense contractors) will elect to join the program each year with program growth plateauing at approximately 10% of the population by Year 9. Each year, approximately 10% of participating companies will report changes to company contacts. If 10% of the pre-existing companies (2,580 in year 2) submit updates to the POC information and 800 new companies join, by year 3 this would result in 1,058 annual updates.

Projected Responses per Participant: Initial collection is one per company with updates on a case-by-case basis.

Annual Total Responses: 1,058.

Average Burden per Response: 20 minutes.

Annual Total Burden Hours: 353 hours for all participants.

Needs and Uses: Defense contractors complete a program application and sign the DIB CS Program Framework to initiate participation. The Government will collect business POC information from all DIB CS Program participants on a one-time basis, with updates as necessary, to facilitate communications and the sharing of share unclassified and classified cyber threat information.

Affected Public: Business or other for-profit and not-for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

F. Executive Order 13132, ''Federalism''

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has federalism implications. This proposed rule will not have a substantial effect on State and local governments.

G. Executive Order 13175, ''Consultation and Coordination With Indian Tribal Governments''

Executive Order 13175 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct compliance costs on one or more Indian tribes, preempts tribal law, or effects the distribution of power and responsibilities between the Federal Government and Indian tribes. This proposed rule will not have a substantial effect on Indian tribal governments.

List of Subjects in 32 CFR Part 236

Government contracts, Security measures.

Accordingly, DoD proposes to amend 32 CFR part 236 as follows:

PART 236—DEPARTMENT OF DEFENSE (DoD) DEFENSE INDUSTRIAL BASE (DIB) CYBERSECURITY (CS) ACTIVITIES

■ 1. The authority citation for 32 CFR part 236 continues to read as follows:

Authority: 10 U.S.C. 391, 393, and 2224; 44 U.S.C. 3506 and 3544; 50 U.S.C. 3330.

■ 2. Revise the heading of 32 CFR part 236 to read as set forth above.

§ 236.1 [Amended]

■ 3. Amend § 236.1 by:

■ a. Removing ''eligible DIB participants'' and adding in its place ''eligible DoD contractors''.

■ b. Removing ''DIB CS program'' and adding in its place ''DIB CS Program'' wherever it appears.

■ c. Removing ''DIB CS participants'' and adding in its place ''DIB CS Program participants''.

■ d. Removing ''DIB participants' capabilities'' and adding in its place ''DIB CS Program participants' capabilities''.

§ 236.2 [Amended]

■ 4. Amend § 236.2 by:

■ a. Removing the definition of ''Access to media''.

■ b. In the definition of ''DIB participant'':

■ i. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant''.

■ ii. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.

■ c. Removing ''DIB CS program'' in the definition of ''Government furnished information (GFI)'' and adding in its place ''DIB CS Program''.

§ 236.3 [Amended]

■ 5. Amend § 236.3 by:

■ a. Removing ''program'' and adding in its place ''Program participants'' in paragraph (b)(1).

■ b. Removing ''DIB CS program'' and adding in its place ''DIB CS Program'' in paragraph (c).

■ 6. Amend § 236.4 by:

■ a. Removing ''*http*'' and adding in its place ''*https*'' in paragraphs (b)(2), (c), and (d).

■ b. Removing ''*http://iase.disa.mil/pki/eca/Pages/index.aspx*'' and adding in its place ''*https://public.cyber.mil/eca/*'' in paragraph (e).

■ c. Revising paragraph (f).

■ d. Adding a comma after ''as appropriate'' in the first sentence in paragraph (g).

■ e. Removing ''paragraph (e)'' and adding in its place ''paragraph (i)'' in paragraph (k).

■ f. In paragraph (m)(4):

■ i. Removing ''DIB contractors'' and adding in its place ''defense contractors''.

■ ii. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.

■ g. Revising paragraph (p).

The revisions read as follows:

§ 236.4 Mandatory cyber incident reporting procedures.

* * * * *

(f) *Third-party service provider support.* If the contractor utilizes a third-party service provider (SP) for information system security services, the contractor may authorize the SP to report cyber incidents on behalf of the contractor.

* * * * *

(p) *Freedom of Information Act (FOIA).* Agency records, which may include qualifying information received from non-Federal entities, are subject to request under the Freedom of Information Act (5 U.S.C. 552). The Government will notify the non-Government source or submitter (*e.g.,* contractor or DIB CS Program participant) of the information in

accordance with the procedures in 32 CFR 286.10.

* * * * *

■ 7. Amend § 236.5 by:
■ a. Revising section heading and paragraph (a).
■ b. In paragraph (b):
■ i. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.
■ ii. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant''.
■ c. In paragraph (c):
■ i. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant''.
■ ii. Removing ''individual DIB participants'' and adding in its place ''individual DIB CS Program participants.''
■ d. In paragraph (d):
■ i. Removing ''DoD's DIB CS Program Office'' and adding in its place ''DoD's DIB CS Program Management Office''.
■ ii. Removing ''DoD DIB'' and adding in its place ''DoD–DIB''.
■ iii. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.
■ e. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants'' in paragraph (e).
■ f. Redesignating paragraphs (f) through (n) as paragraphs (g) through (o).
■ g. Adding new paragraph (f).
■ h. In newly redesignated paragraph (g):
■ i. Removing the heading.
■ ii. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants''.
■ i. Revising newly redesignated paragraphs (h) and (i).
■ j. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants'' in newly redesignated paragraph (j) introductory text.
■ k. In newly redesignated paragraph (k):
■ i. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants''.
■ ii. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant''.
■ l. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants'' in newly redesignated paragraph (l).
■ m. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants'' in newly redesignated paragraph (m).
■ n. In newly redesignated paragraph (n):
■ i. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant'' wherever it appears.
■ ii. Removing ''DIB participant's FA'' and adding in its place ''DIB CS Program participant's FA''.
■ o. In newly redesignated paragraph (o):
■ i. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant'' wherever it appears.
■ ii. Removing ''paragraph (m) of this section'' and adding in its place ''paragraph (n) of this section.''

The revisions and addition read as follows:

§ 236.5 DoD's DIB CS Program.

(a) All defense contractors that meet the requirements set forth in § 236.7 are eligible to join the DIB CS Program as a DIB CS Program participant. Defense contractors meeting the additional eligibility requirements in § 236.7 can elect to access and receive classified information electronically.

* * * * *

(f) As participants of the DIB CS Program, defense contractors are encouraged to share cyber threat indicators and information that they believe are valuable in alerting the Government and other DIB CS Program participants to better counter threat actor activity. Cyber activity that is not covered under § 236.4 may be of interest to DIB CS Program participants and DoD.

* * * * *

(h) Prior to receiving GFI, each DIB CS Program participant shall provide the requisite points of contact information, to include U.S. citizenship and security clearance information, as applicable, for the designated personnel within their company in order to facilitate the DoD–DIB interaction in the DIB CS Program. The Government will confirm the accuracy of the information provided as a condition of that point of contact being authorized to act on behalf of the DIB CS Program participant for this program.

(i) GFI will be issued via both unclassified and classified means. DIB CS Program participants handling and safeguarding of classified information shall be in compliance with 32 CFR part 117. The Government shall specify transmission and distribution procedures for all GFI, and shall inform DIB CS Program participants of any revisions to previously specified transmission or procedures.

* * * * *

§ 236.6 [Amended]

■ 8. Amend § 236.6 by:
■ a. Removing ''program'' and adding in its place ''Program'' in the section heading.
■ b. In paragraph (a):
■ i. Removing ''DIB CS program'' and adding in its place ''DIB CS Program'' wherever it appears.
■ ii. Removing ''DIB participants'' and adding in its place ''DIB CS Program participants''.
■ c. In paragraph (b):
■ i. Removing ''DIB CS participants'' and adding in its place ''DIB CS Program participants''.
■ ii. Removing ''*http://www.dhs.gov/enhanced-cybersecurity-services*'' and adding in its place ''*https://www.cisa.gov/enhanced-cybersecurity-services-ecs*''.
■ d. In paragraph (c):
■ i. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.
■ ii. Removing ''obligate the DIB participant'' and adding in its place ''obligate the DIB CS Program participant''.
■ iii. Removing ''taken by the DIB participant'' and adding in its place ''taken by the DIB CS Program participant''.
■ iv. Removing ''taken on the DIB participant's'' and adding in its place ''taken on the DIB CS Program participant's''.
■ e. In paragraph (d):
■ i. Removing ''DIB participant's participation'' and adding in its place ''DIB CS Program participant's participation''.
■ ii. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.
■ iii. Removing ''approval of the DIB participant'' and adding in its place ''approval of the DIB CS Program participant''.
■ f. In paragraph (e):
■ i. Removing ''DIB participant'' and adding in its place ''DIB CS Program participant'' wherever it appears.
■ ii. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.
■ g. Adding ''change of status as a defense contractor,'' after ''Upon termination of the FA,'' in paragraph (f).
■ h. In paragraph (g):
■ i. Removing ''DIB participants' rights'' and adding in its place ''DIB CS Program participants' rights''.
■ ii. Removing ''DIB CS program'' and adding in its place ''DIB CS Program''.
■ iii. Removing ''the requirement for DIB participants'' and adding in its place ''the requirement for DIB CS Program participants''.
■ 9. Revise § 236.7 to read as follows:

§ 236.7 DoD's DIB CS Program requirements.

(a) To participate in the DIB CS Program, a contractor must own or operate a covered contractor information system and shall execute

the standardized FA with the Government (available during the application process), which implements the requirements set forth in §§ 236.5 and 236.6 and this section.

(b) In order for DIB CS Program participants to receive classified cyber threat information electronically, the company must be a cleared defense contractor and must:

(1) Have an existing active facility clearance level (FCL) to at least the Secret level in accordance with 32 CFR part 117;

(2) Have or acquire a Communication Security (COMSEC) account in accordance with 32 CFR part 117, which provides procedures and requirements for COMSEC activities;

(3) Have or acquire approved safeguarding for at least Secret information, and continue to qualify under 32 CFR part 117 for retention of its FCL and approved safeguarding; and

(4) Obtain access to DoD's secure voice and data transmission systems supporting the voluntary DIB CS Program.

Dated: April 25, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2023–09021 Filed 5–2–23; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 147

[Docket Number USCG–2023–0277]

RIN 1625–AA00

Safety Zone; Vineyard Wind 1 Wind Farm Project Area, Outer Continental Shelf, Lease OCS–A 0501, Offshore Massachusetts, Atlantic Ocean

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish 63 temporary 500-meter safety zones around the construction of 62 wind turbine generators (WTGs) and one electrical service platform (ESP) located in the Vineyard Wind 1 Wind Farm (VW1WF) project area within federal waters on the Outer Continental Shelf (OCS), specifically in the northern portion of Bureau of Ocean Energy Management (BOEM) Renewable Energy Lease Area OCS–A 0501, approximately 12 nautical miles (NM) offshore of Martha's Vineyard, Massachusetts and 12 NM offshore Nantucket, Massachusetts. This action is necessary to provide for the safety of life, property, and the environment during the planned construction of each facility's monopile type foundation and subsequent installation of the WTGs turbines and ESP platform from June 15, 2023, to May 31, 2024. When enforced, only attending vessels and those vessels specifically authorized by the First Coast Guard District Commander, or a designated representative, are permitted to enter or remain in the temporary safety zones. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before June 2, 2023.

ADDRESSES: You may submit comments identified by docket number USCG–2023–0277 using the Federal Decision-Making Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Mr. Craig Lapiejko, Waterways Management, at Coast Guard First District, telephone 617–603–8592, email *craig.d.lapiejko@uscg.mil.*

WTG Wind Turbine Generator
VW1WF Vineyard Wind 1 Wind Farm

II. Background, Purpose, and Legal Basis

On March 15, 2023, Vineyard Wind, LLC, an offshore wind farm developer, notified the Coast Guard that they plan to begin construction of facilities in the VW1WF project area within federal waters on the OCS, specifically in the northern portion of BOEM Renewable Energy Lease Area OCS–A 0501, approximately 12 NM offshore Martha's Vineyard, Massachusetts and 12 NM offshore Nantucket, Massachusetts in June 2023.

The extremely complex offshore construction of these OCS facilities presents many unusually hazardous conditions including hydraulic pile driving hammer operations, heavy lift operations, overhead cutting operations, potential falling debris, increased vessel traffic, and stationary barges in close proximity to the facilities and each other.

Based on these circumstances, the First Coast Guard District Commander has determined that establishment of 63 temporary safety zones through rulemaking is warranted to ensure the safety of life, property, and the environment within a 500-meter radius of each of the 63 facilities during their construction.

The Coast Guard is proposing this rule under the authorities provided in 14 U.S.C. 544, 43 U.S.C. 1333, and Department of Homeland Security (DHS) Delegation No. 00170.1, Revision No. 01.3. As an implementing regulation of this authority, 33 CFR part 147 permits the establishment of safety zones for non-mineral energy resource permanent or temporary structures located on the OCS for the purpose of protecting life and property on the facilities, appurtenances and attending vessels, and on the adjacent waters within the safety zone (see 33 CFR 147.10). Accordingly, a safety zone established under 33 CFR part 147 may also include provisions to restrict, prevent, or control certain activities, including access by vessels or persons to maintain safety of life, property, and the environment. If, as we anticipate, we issue a temporary final rule and make it effective less than 30 days after publication in the **Federal Register**, we will explain in that publication, as required by 5 U.S.C. (d)(3), our good cause for doing so.

III. Discussion of Proposed Rule

The District Commander is proposing to establish 63 temporary 500-meter safety zones around the construction of 62 WTGs and one ESP on the OCS from June 15, 2023, through 11:59 p.m. on May 31, 2024.

The construction of these facilities is expected to take place in mixed phases alternating between the installation of several monopile type foundations followed by the installation of the upper structures then repeating this process throughout the project area until all 63 facilities have been completed. The 63 temporary safety zones would be enforced individually as construction progresses from one structure location to the next throughout the entire process for a period lasting approximately 48 hours. The Coast Guard would make

notice of each enforcement period via the Local Notice to Mariners and issue a Broadcast Notice to Mariners via marine channel 16 (VHF–FM) as soon as practicable in response to an emergency or hazardous condition. The Coast Guard is publishing this rulemaking to be effective, and enforceable, through May 31, 2024, to encompass any construction delays due to weather or other unforeseen circumstances. If the project is completed before May 31, 2024, enforcement of the safety zones would be suspended, and notice given via Local Notice to Mariners.

Additional information about the construction process of the VW1WF can be found at *https://www.boem.gov/vineyard-wind.*

The 63 temporary 500-meter safety zones around the construction of 62 WTGs and one ESP are in the VW1WF project area, specifically in the northern portion of BOEM Renewable Energy Lease Area OCS–A 0501, approximately 12 NM offshore of Martha's Vineyard, Massachusetts and 12 NM offshore Nantucket, Massachusetts, within federal waters on the OCS.

The positions of each individual safety zone proposed by this rulemaking will be referred to using a unique alpha-numeric naming convention outlined in the ''Rhode Island and Massachusetts Structure Labeling Plot (West).'' [1]

Aligning with authorities under 33 CFR 147.15, the proposed safety zones would include the area within 500-meters of the center point of the positions provided in the following table expressed in Decimal Degrees (DD) based on North American Datum 1983 (NAD 83).

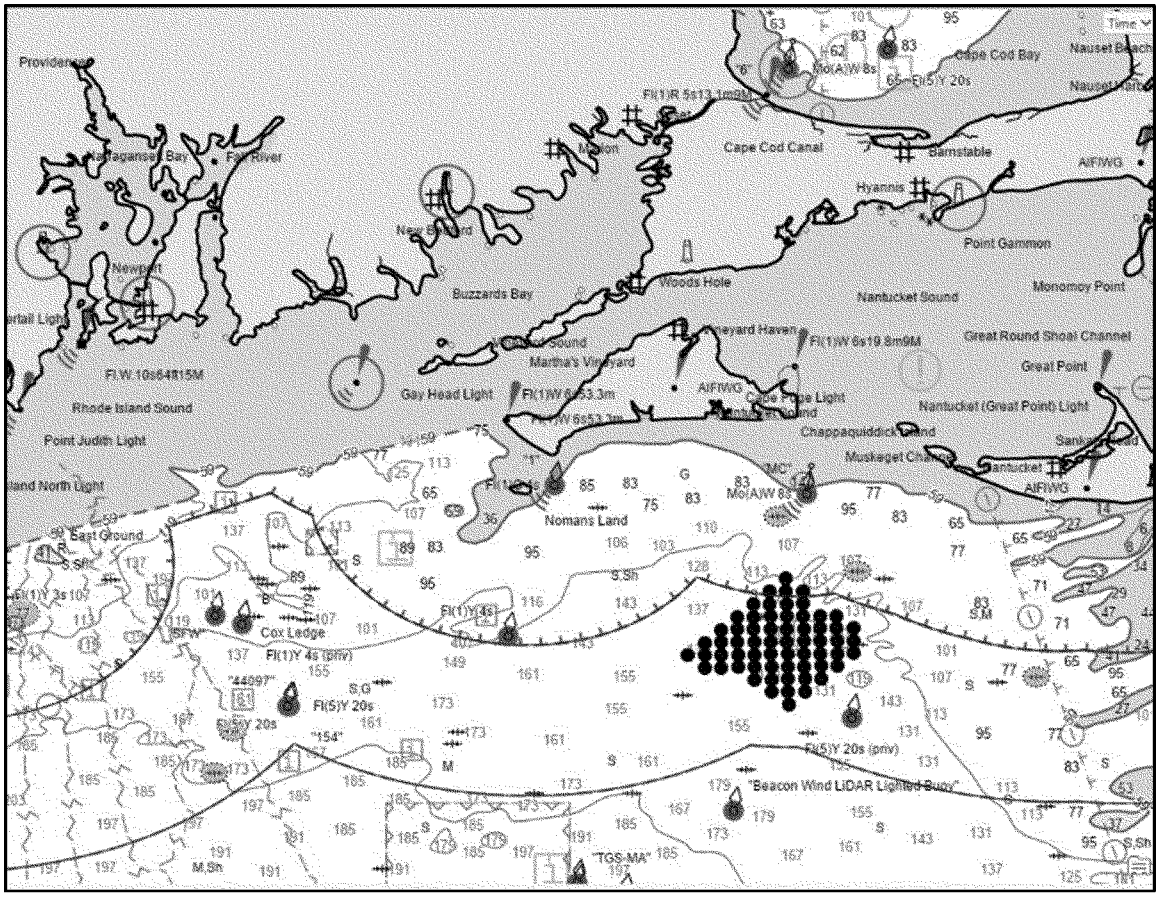
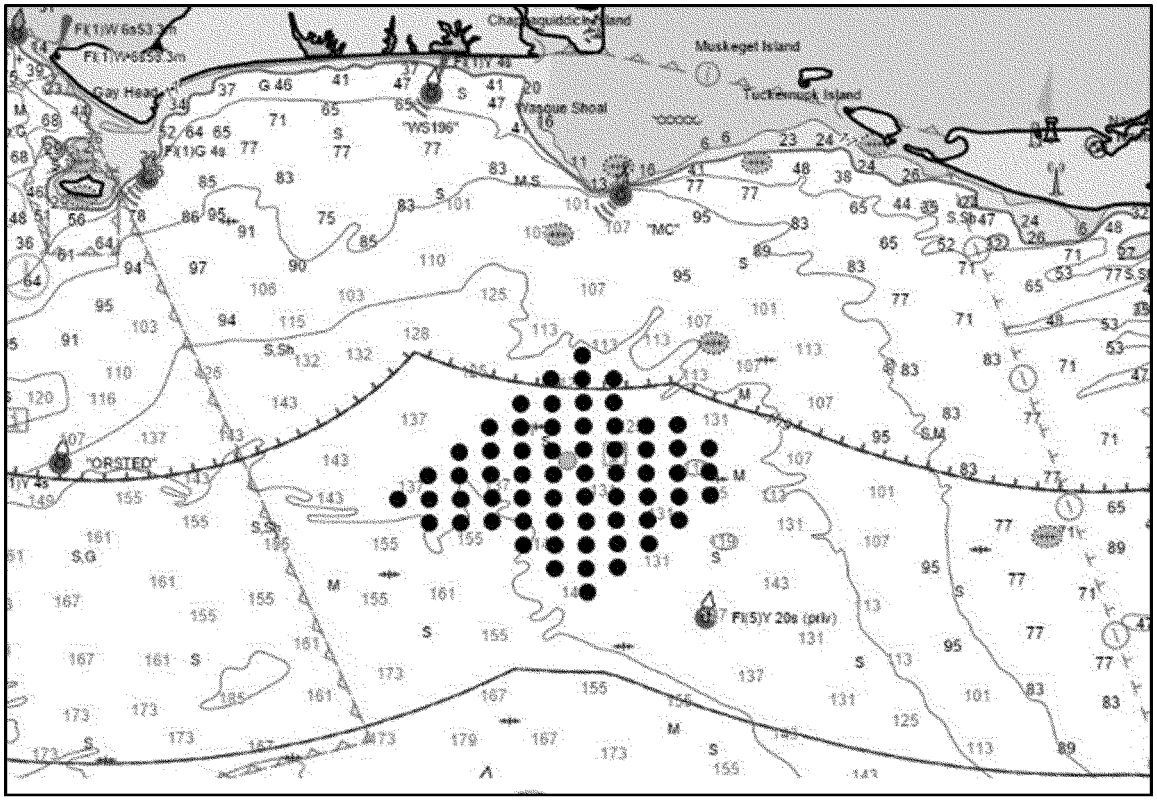
The positions of the 63 proposed safety zones are shown on the following chartlets. For scaling purposes, there is approximately one NM spacing between each position.

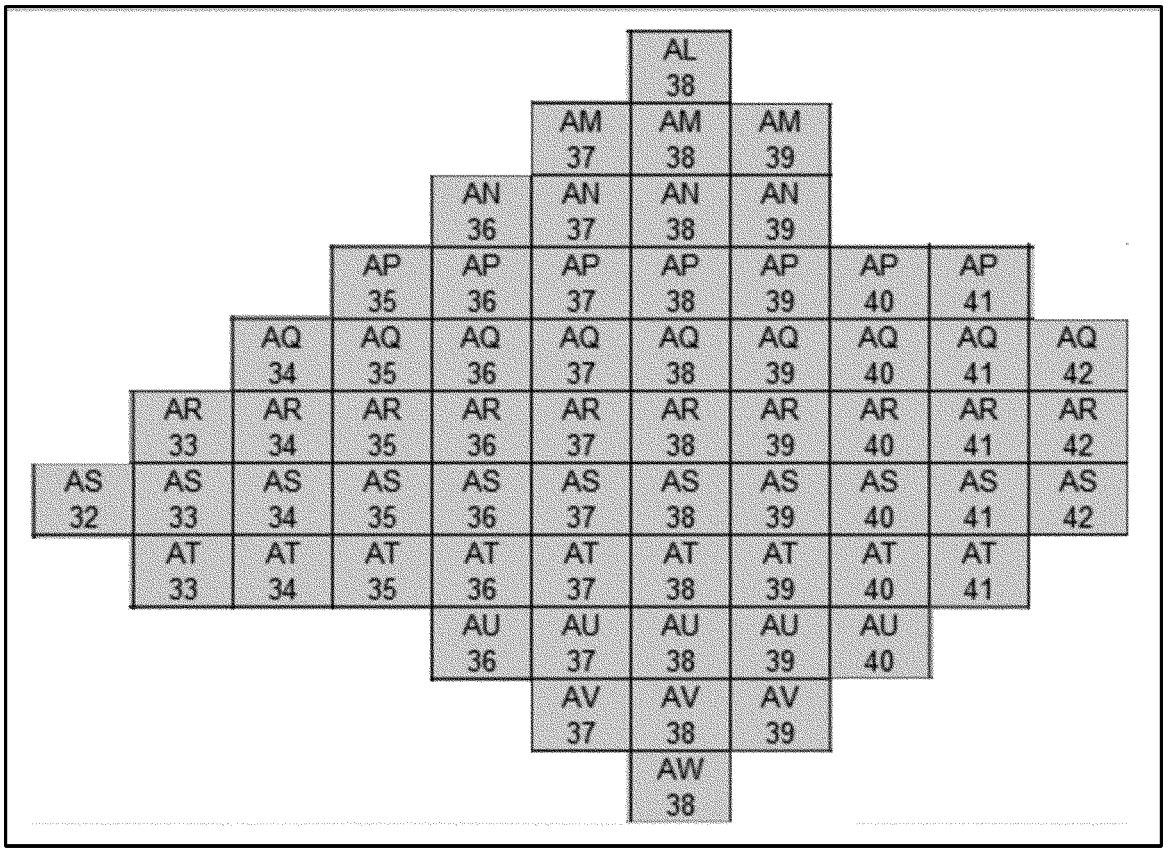
BILLING CODE 9110–04–P



(Small scale chartlet showing the positions of the proposed safety zones.)



(Large scale chartlet showing the positions of the proposed safety zones.)



(Chartlet showing turbine positions using unique alpha-numeric naming convention.)

BILLING CODE 9110–04–C

Navigation in the vicinity of the proposed safety zones consists of large commercial shipping vessels, fishing vessels, cruise ships, tugs with tows, and recreational vessels.

When enforced, no unauthorized vessel or person would be permitted to enter the safety zone without obtaining permission from the First Coast Guard District Commander or a designated representative. Requests for entry into the safety zone would be considered and reviewed on a case-by-case basis. Persons or vessels seeking to enter the safety zone must request authorization from the First Coast Guard District Commander or designated representative via VHF–FM channel 16 or by phone at 617–603–1560 (First Coast Guard District Command Center). If permission is granted, all persons and vessels shall comply with the instructions of the First Coast Guard District Commander or designated representative.

The proposed regulatory text appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. A summary of our analyses based on these statutes and Executive Orders follows.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

Aligning with 33 CFR 147.15, the safety zones established would extend to a maximum distance of 500-meters around the OCS facility measured from its center point. Vessel traffic would be able to safely transit around the proposed safety zones, which would impact a small, designated area in the Atlantic Ocean, without significant impediment to their voyage. This safety zone would provide for the safety of life, property, and the environment during the construction of each structure, in accordance with Coast Guard maritime safety missions.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

This rule may affect owners or operators of vessels intending to transit or anchor in the VW1WF, some of which might be small entities. However, these safety zones would not have a significant economic impact on a substantial number of these entities because they are temporarily enforced, allow for deviation requests, and do not impact vessel transit significantly. Regarding the enforcement period, although these safety zones would be in effect from June 15, 2023, through May 31, 2024, vessels would only be prohibited from the regulated zone during periods of actual construction activity in correspondence to the period of enforcement. We expect the enforcement period at each location to last approximately 48 hours as construction progresses from one structure location to the next throughout the mixed phases. Additionally, vessel traffic could pass safely around each safety zone using an alternate route. Use of an alternate route likely will cause minimal delay for the vessel in reaching their destination depending on other traffic in the area and vessel speed. Vessels would also be able to request deviation from this rule to transit through a safety zone. Such requests would be considered on a case by-case basis and may be authorized by the First Coast Guard District Commander or a designated representative. For these reasons, the Coast Guard expects any impact of this rulemaking establishing a temporary safety zone around these OCS facilities to be minimal and have no significant economic impact on small entities.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves the establishment of a safety zone around an OCS facility to protect life, property, and the marine environment. Normally such actions are categorically excluded from further review under paragraph L60 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A preliminary Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision-Making Portal at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2023–0277 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 147

Continental shelf, Marine safety, Navigation (waters).

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 147 as follows:

PART 147—SAFETY ZONES

■ 1. The authority citation for part 147 continues to read as follows:

Authority: 14 U.S.C. 544; 43 U.S.C. 1333; 33 CFR 1.05–1; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 147.T01–0277 to read as follows:

§ 147.T01–0277 Safety Zones; Vineyard Wind 1 Wind Farm Project Area, Outer Continental Shelf, Lease OCS–A 0501, Offshore Massachusetts, Atlantic Ocean.

(a) *Description.* The area within 500-meters of the center point of the positions provided in the table 1 is a safety zone:

(b) *Definitions.* As used in this section, *designated representative* means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the First Coast Guard District Commander in the enforcement of the safety zones.

(c) *Regulations.* No vessel may enter or remain in the safety zones described in paragraph (a) of this section except for the following:

(1) An attending vessel as defined in 33 CFR 147.20;

(2) A vessel authorized by the First Coast Guard District Commander or a designated representative.

(d) *Request for Permission.* Persons or vessels seeking to enter the safety zone must request authorization from the First Coast Guard District Commander or a designated representative. If permission is granted, all persons and vessels must comply with lawful instructions of the First Coast Guard District Commander or designated representative via VHF–FM channel 16 or by phone at 617–223–1560 (First Coast Guard District Command Center).

(e) *Effective and enforcement periods.* This section will be effective from June 15, 2023, through 11:59 p.m. on May 31, 2024. It will only be enforced during active construction or other instances which may cause a hazard to navigation deemed necessary by the First Coast Guard District Commander. The First Coast Guard District Commander will make notification of the exact dates and times in advance of each enforcement period for the locations above in paragraph (a) of this section to the local maritime community through the Local Notice to Mariners and will issue a Broadcast Notice to Mariners via marine channel 16 (VHF–FM) as soon as practicable in response to an emergency. If the project is completed before May 31, 2024, enforcement of the safety zones will be suspended, and notice given via Local Notice to Mariners. The First Coast Guard District Local Notice to Mariners can be found at: *http://www.navcen.uscg.gov.*

Dated: April 27, 2023.

J.W. Mauger,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

BILLING CODE 9110–04–P

LIBRARY OF CONGRESS

U.S. Copyright Office

37 CFR Parts 222 and 235

[Docket No. 2023–4]

Copyright Claims Board: Agreement-Based Counterclaims

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Notice of proposed rulemaking; request for comments.

SUMMARY: The U.S. Copyright Office is amending its regulations governing

Copyright Claims Board proceedings to address the filing of agreement-based counterclaims and related discovery requirements.

DATES: Written comments must be received no later than 11:59 p.m. Eastern Time on June 20, 2023.

ADDRESSES: For reasons of Government efficiency, the Copyright Office is using the *regulations.gov* system for the submission and posting of public comments in this proceeding. All comments are therefore to be submitted electronically through *regulations.gov.* Specific instructions for submitting comments are available on the Copyright Office's website at *https://www.copyright.gov/rulemaking/agreement-based-counterclaims/.* If electronic submission of comments is not feasible due to lack of access to a computer or the internet, please contact the Copyright Office using the contact information below for special instructions.

FOR FURTHER INFORMATION CONTACT: Rhea Efthimiadis, Assistant to the General Counsel, by email at *meft@copyright.gov* or telephone at 202–707–8350.

SUPPLEMENTARY INFORMATION:

I. Background

The Copyright Alternative in Small-Claims Enforcement (''CASE'') Act of 2020 [1] directed the Copyright Office to establish the Copyright Claims Board (''CCB''), a voluntary forum for parties seeking resolution of certain copyright disputes that have a total monetary value of $30,000 or less. As an alternative forum to Federal district court, the CCB is designed to be accessible to *pro se* individuals and individuals without much knowledge of copyright law.[2] In early 2021, the Office published a notification of inquiry (''NOI'') asking for public comments on the CCB's operations and procedures.[3]

Following the NOI, the Office published multiple notices of proposed rulemaking governing the conduct of proceedings before the CCB, including filing claims and counterclaims, responses to claims and counterclaims, and discovery.[4] After receiving and considering comments submitted by the public, the Office published corresponding final rules.[5] On June 16, 2022, the CCB began receiving claims through its website *dockets.ccb.gov.*

After reviewing its regulations, the Office is proposing to add rules specifically governing agreement-based counterclaims.

II. Proposed Rule and Request for Comments

The CASE Act provides that the CCB may hear only certain types of counterclaims: those that arise ''under section 106 or section 512(f) and out of the same transaction or occurrence that is the subject of a claim of infringement[,] . . . a claim of noninfringement[,] . . . or a claim of misrepresentation'' and those that ''arise[ ] under an agreement pertaining to the same transaction or occurrence that is the subject of a claim of infringement . . . if the agreement could affect the relief awarded to the claimant.'' [6] This last category of counterclaims are referred to here as ''agreement-based counterclaims.''

Asserting and Responding to Agreement-Based Counterclaims

In an earlier rulemaking, ''the Office propose[d] that the information required to assert a counterclaim should closely mirror the information required to assert a claim'' for counterclaims that arise under section 106 or section 512(f).[7] After reviewing the public comments, the Office promulgated final rules requiring that a counterclaim arising under section 106 or section 512(f) include a description of ''[t]he facts leading the counterclaimant to believe the work has been infringed.'' [8] At that time, the Office did not propose separate rules to address agreement-based counterclaims.

After reviewing its regulations, the Office has concluded that such counterclaims should have their own content requirements. Specifically, the Office proposes that agreement-based counterclaims should include the identification of the agreement that the agreement-based counterclaim is based upon, a brief statement describing how the agreement pertains to the same transaction or occurrence that is the subject of the infringement claim against the counterclaimant, and a brief statement describing how the agreement could affect the relief awarded to the claimant.

The Office also believes that regulations are necessary to specify the required contents of a counterclaim respondent's [9] response to an agreement-based counterclaim. A counterclaim respondent should describe in detail its disagreement with the facts in the counterclaim, including any description of defenses to the counterclaim, and an explanation of why the counterclaim respondent believes the counterclaimant's position regarding the agreement lacks merit.

Standard Interrogatories for Agreement-Based Counterclaims

The proposed rule also addresses standard interrogatories for agreement-based counterclaims that supplement the standard interrogatories common to all claim types. The additional standard interrogatories will include: identification and a description of the specific terms or provisions of the agreement, written or oral, that the counterclaimant alleges have been violated; the basis for the counterclaimant's belief that the agreement was both valid and violated; the reasons why the counterclaimant believes the agreement could affect the relief that might be awarded; a description of the counterclaimant's performance under the agreement, as relevant to the counterclaim; and identification of any alleged failure in the counterclaim respondent's performance under the agreement.

In turn, the additional standard interrogatories that an agreement-based counterclaim respondent must answer will address the following: all applicable defenses to the counterclaim and the facts supporting those defenses; any other reasons the counterclaim respondent believes that it did not violate the agreement or that the agreement was not valid; the basis for any belief by the counterclaim respondent that the agreement does not affect the relief that might be awarded; a description of the counterclaim respondent's performance under the agreement, as relevant to the counterclaim; and any inadequacies in performance under the agreement by the counterclaimant.

Standard Requests for the Production of Documents for Agreement-Based Counterclaims

In addition to the standard document requests that all parties must satisfy, the Office proposes that both agreement-

[9] The term ''counterclaim respondent'' refers to a claimant that has received a counterclaim.

based counterclaimants and counterclaim respondents should be subject to several additional requests. These standard document requests for agreement-based counterclaims should include: the agreement at issue and documents related to that agreement, including any amendments or revisions; documents related to the validity of the agreement; and documents related to the parties' performance under the agreement. In addition, with regard to a counterclaimant's damages claim, the Office proposes slightly different document requests for a counterclaimant and a counterclaim respondent. Agreement-based counterclaimants must produce documents relevant to damages arising out of the counterclaim, including documents sufficient to show the damages suffered due to the violation of the agreement in question. In turn, counterclaim respondents must produce documents relevant to damages, including any documents sufficient to show the lack of damages suffered by the counterclaimant from the alleged violation of the agreement.

The Office remains committed to ensuring that ''the discovery regulations strike the right balance between allowing necessary access to information and being too burdensome.'' [10] It previously adjusted the language for infringement-related standard discovery requests after hearing from the public that the initially proposed language may have been unnecessarily burdensome.[11] With respect to the proposed rules for document requests for parties to agreement-based counterclaims, the Office is interested in hearing whether the proposed ''relevant to'' language for damages document requests strikes the right balance. The Office notes that the ''relevant to'' language is not included in damages-related document requests for infringement, declaration of noninfringement, or misrepresentation claims or counterclaims, which are all limited to documents ''sufficient to show'' damages.[12]

List of Subjects in 37 CFR Parts 222 and 225

Claims, Copyright.

Proposed Regulations

For the reasons stated in the preamble, the U.S. Copyright Office amends 37 CFR parts 222 and 225 as follows:

[10] 87 FR 30060, 30060.

[11] *See id.* at 30070–71.

[12] 37 CFR 225.3(b)(6), (c)(4), (d)(4).

PART 222—PROCEEDINGS

■ 1. The authority citation for part 222 continues to read as follows:

Authority: 17 U.S.C. 702, 1510.

■ 2. Amend § 222.9 by redesignating paragraphs (c)(6) through (c)(8) as paragraphs (c)(7) through (c)(9) and adding paragraph (c)(6) to read as follows.

§ 222.9 Counterclaim.

* * * * *

(c) * * *

(6) For a counterclaim arising under an agreement asserted under paragraph (c)(2)(iv) of this section—

(i) A description of the agreement that the counterclaim is based upon;

(ii) A brief statement describing how the agreement pertains to the same transaction or occurrence that is the subject of the infringement claim against the counterclaimant; and

(iii) A brief statement describing how the agreement could affect the relief awarded to the claimant;

* * * * *

■ 3. Amend § 222.10 by redesignating paragraph (b)(6) as paragraph (b)(7) and adding paragraph (b)(6) to read as follows:

§ 222.10 Response to counterclaim.

* * * * *

(b) * * *

(6) For counterclaims arising under an agreement, as set forth in 37 CFR 222.9(c)(2)(iv), a statement describing in detail the dispute regarding the contractual counterclaim, including any defenses as well as an explanation of why the counterclaim respondent believes the counterclaimant's position regarding the agreement lacks merit; and

* * * * *

PART 225—DISCOVERY

■ 4. The authority citation for part 225 continues to read as follows:

Authority: 17 U.S.C. 702, 1510.

■ 5. Amend § 225.2 by redesignating paragraph (f) as paragraph (h) and adding paragraphs (f) and (g) to read as follows:

§ 225.2 Standard interrogatories.

* * * * *

(f) *For a counterclaimant asserting a counterclaim arising under an agreement.* In addition to the information in paragraph (a) of this section, the *standard interrogatories* for a counterclaimant asserting a counterclaim arising under an agreement shall consist of information pertaining to:

(1) Identification and a description of the specific terms or provisions of the agreement the counterclaim respondent is alleged to have violated;

(2) The basis for the counterclaimant's belief that the agreement was valid;

(3) The basis for the counterclaimant's belief that the agreement was violated;

(4) The basis for the counterclaimant's belief that the agreement could affect the relief that might be awarded to the claimant;

(5) A description of the counterclaimant's performance under the agreement, as relevant to the counterclaim;

(6) Identification and a description of any inadequacies in performance under the agreement by the counterclaim respondent; and

(7) If the agreement at issue in the counterclaim is oral, a description of the terms and provisions of the agreement.

(g) *For a counterclaim respondent responding to a counterclaim arising under an agreement.* In addition to the information in paragraph (a) of this section, the *standard interrogatories* for a counterclaim respondent responding to a counterclaim arising under an agreement shall consist of information pertaining to:

(1) All defenses asserted to the counterclaim arising under an agreement and the basis for those assertions. Defenses listed in timely answers and timely updated answers to the *standard interrogatories* shall be considered by the Board and will not require an amendment of the counterclaim response;

(2) The basis for any other reasons the counterclaim respondent believes that it did not violate the agreement or that the agreement was not valid;

(3) The basis for any belief by the counterclaim respondent that the agreement does not affect the relief that might be awarded to the claimant;

(4) A description of the counterclaim respondent's performance under the agreement, as relevant to the counterclaim; and

(5) Identification and a description of any inadequacies in performance under the agreement by the counterclaimant.

* * * * *

■ 6. Amend § 225.3 by redesignating paragraphs (f) and (g) as paragraphs (h) and (i) and adding paragraphs (f) and (g) to read as follows:

§ 225.3 Standard requests for the production of documents.

* * * * *

(f) *For a counterclaimant asserting a counterclaim arising under an agreement.* In addition to the information in paragraph (a) of this

section, the *standard requests for the production of documents* for a party asserting a counterclaim arising under an agreement shall include copies of:

(1) The agreement at issue in the counterclaim arising under an agreement, including any amendments or revisions;

(2) Documents related to the agreement at issue, including any amendments or revisions and documents related to the validity of and the parties' performance under the agreement; and

(3) Documents relevant to damages arising out of the counterclaim, including documents sufficient to show the damages suffered by the counterclaimant related to violation of the agreement in question.

(g) *For a counterclaim respondent responding to a counterclaim arising under an agreement.* In addition to the information in paragraph (a) of this section, the *standard requests for the production of documents* for a counterclaim respondent responding to a counterclaim arising under an agreement shall include copies of:

(1) The agreement at issue in the counterclaim arising under an agreement, including any amendments or revisions;

(2) Documents related to the agreement at issue, including any amendments or revisions and documents related to the validity of and the parties' performance under the agreement; and

(3) Documents relevant to damages, including documents sufficient to show the lack of damages suffered by the counterclaimant related to the counterclaim respondent's alleged violation of the agreement in question.

* * * * *

Dated: April 25, 2023.

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

41 CFR Parts 51–2, 51–3, and 51–5

RIN 3037–AA14

Supporting Competition in the AbilityOne Program; Extension of Comment Period

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On March 13, 2023, the Committee for Purchase from People Who Are Blind or Severely Disabled (Committee), operating as the U.S. AbilityOne Commission (Commission), published a proposed rule, Supporting Competition in the AbilityOne Program, with a 60-day comment period ending on May 11, 2023. The Commission has determined that a 30-day extension of the comment period, until June 12, 2023, is appropriate. The Commission is taking this action in response to requests for an extension to allow interested persons additional time to submit comments.

DATES: The comment period for the proposed rule, Supporting Competition in the AbilityOne Program, published March 13, 2023, at 88 FR 15360, is extended. Electronic comments should be received no later than 11:59 p.m. Eastern Time on June 12, 2023.

ADDRESSES: Interested persons may submit comments by using the following method: internet—Federal eRulemaking Portal. Electronic comments may be submitted through *https://www.regulations.gov.* To locate the proposed rule, use RIN 3037–AA14. Follow the instructions for submitting comments. Please be advised that comments received will be posted without change to *https://www.regulations.gov,* including any personal information provided.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an alternative accessible format.

FOR FURTHER INFORMATION CONTACT: Cassandra Assefa, Regulation and Policy Counsel, by telephone at 202–430–9886 or by email at *cassefa@abilityone.gov.*

SUPPLEMENTARY INFORMATION: On March 13, 2023, the Commission published a proposed rule, Supporting Competition in the AbilityOne Program. The proposed rule would clarify the Commission's authority to consider different pricing methodologies in establishing the Fair Market Price (FMP) for Procurement List (PL) additions and changes to the FMP; better define the parameters for conducting fair and equitable competitive allocations amongst multiple qualified Nonprofit Agencies (NPAs); and clarify the responsibilities and procedures associated with authorizing and deauthorizing NPA.

The Commission has received requests for an extension of the 60-day comment period. The Commission has considered the requests and is extending the comment period for the proposed rule until June 12, 2023. The Commission believes that this extension allows adequate time for interested persons to submit comments.

Michael R. Jurkowski,

Acting Director, Business Operations.

BILLING CODE 6350–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

45 CFR Part 1110

Removal of Freedom of Information Act Regulation Issued by National Foundation on the Arts and the Humanities

AGENCY: National Endowment for the Arts, National Endowment for the Humanities, Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Notice of proposed rulemaking.

SUMMARY: This rulemaking rescinds the National Foundation on the Arts and the Humanities' (the ''Foundation'') regulations implementing the Freedom of Information Act (''FOIA''). These regulations are obsolete because each of the Foundation's constituent agencies—the National Endowment for the Arts (''NEA''), the National Endowment for the Humanities (''NEH''), the Institute of Museum and Library Services (''IMLS''), and the Federal Council on the Arts and the Humanities (''FCAH'')—either have adopted their own, agency-specific regulations, or are not required to implement Freedom of Information Act regulations.

DATES: The public comment period for the proposed rule opens on May 3, 2023. Written comments must be received on or before June 2, 2023.

ADDRESSES: You may submit comments, identified by RIN 3135–AA26, by any of the following methods:

(a) *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments.

(b) *Email: generalcounsel@arts.gov.* Include RIN 3135–AA26 in the subject line of the message.

(c) *Mail:* National Endowment for the Arts, Office of General Counsel, 400 7th Street SW, Second Floor, Washington, DC 20506.

(d) *Hand Delivery/Courier:* National Endowment for the Arts, Office of the General Counsel, 400 7th Street SW, Second Floor, Washington, DC 20506.

Instructions: All submissions received must include the agency name and docket number or Regulatory Information Number (3135–AA26) for this rulemaking.

Docket: For access to the docket to read background documents or comments received, go to 400 7th Street SW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Daniel Fishman, Assistant General Counsel, National Endowment for the Arts, 400 7th St. SW, Washington, DC 20506, Telephone: 202–682–5418.

SUPPLEMENTARY INFORMATION:

1. Background

The Foundation operates under the National Foundation on the Arts and the Humanities Act of 1965, as amended (20 U.S.C. 951 *et seq.*), and consists of the NEA, NEH, IMLS, and FCAH (collectively, the ''Foundation's constituent agencies'').

The Foundation's FOIA regulations located at 45 CFR 1100 are now obsolete. The NEA, NEH, and IMLS have each adopted their own, agency-specific regulations. On February 27, 2019, the NEA promulgated FOIA regulations to 45 CFR Chapter XI, Subchapter B (45 CFR part 1148), which only apply to the NEA, effectively superseding the Foundation's FOIA regulations and rendering them duplicative. NEH and IMLS had previously added NEH- and IMLS-specific FOIA regulations to 45 CFR, Subchapters D and E (45 CFR parts 1171 & 1184), respectively, which replaced the Foundation's FOIA regulations with respect to NEH and IMLS. FCAH relies upon the NEA and NEH for its administration and does not maintain any systems of records of its own; thus, any requests for information or documents would be better directed to the other two constituent agencies of the Foundation to obtain the same information.

Accordingly, the Foundation's constituent agencies propose rescinding the Foundation's regulations located at 45 CFR 1100.

2. Compliance

Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

Executive Order 12866 (E.O. 12866) established a process for review of rules by the Office of Information and Regulatory Affairs, which is within the Office of Management and Budget (OMB). Only ''significant'' proposed and final rules are subject to review under this Executive Order. ''Significant,'' as used in E.O. 12866, means ''economically significant.'' It refers to rules (1) with an impact on the economy of $100 million or more or that adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public safety or health, or State, local or tribal Governments or communities; or that (2) were inconsistent or interfered with an action taken or planned by another agency; (3) materially altered the budgetary impact of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients; or (4) raised novel legal or policy issues.

This proposed rule would not be a significant policy change, and OMB has not reviewed this proposed rule under E.O. 12866. We have made the assessments required by E.O. 12866 and determined that this proposed rulemaking: (1) will not have an effect of $100 million or more on the economy and will not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities; (2) will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) does not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients; and (4) does not raise novel legal or policy issues.

Executive Order 12988: Civil Justice Reform

This proposed rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988. Specifically, this proposed rule is written in clear language designed to help reduce litigation.

Paperwork Reduction Act of 1995 (''PRA'')

This proposed rule does not impose an information collection burden under the PRA. This proposed rule contains no provisions constituting a collection of information under the PRA.

Regulatory Flexibility Act of 1980 (''RFA'')

This proposed rule will not have a significant adverse impact on a substantial number of small entities, including small businesses, small governmental jurisdictions, or certain small not-for-profit organizations.

Unfunded Mandates Reform Act of 1995 (''UMRA'')

This proposed rule does not contain a Federal mandate that will result in the expenditure by State, local, and tribal Governments, in the aggregate, or by the private sector of $100 million or more in any one year.

Executive Order 13132 (Federalism)

This proposed rulemaking does not have federalism implications, as set forth in E.O. 13132. As used in this order, federalism implications mean ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.'' The NEA has determined that this proposed rulemaking will not have federalism implications within the meaning of E.O. 13132.

Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

Under the criteria in E.O. 13175, we have evaluated this proposed rule and determined that it would have no potential effects on Federally recognized Indian Tribes.

Executive Order 12630: Takings

Under the criteria in E.O. 12630, this proposed rule does not have significant takings implications. Therefore, a takings implication assessment is not required.

List of Subjects in 45 CFR Part 1110

Administrative practice and procedure, Archives and records, Freedom of information.

For the reasons stated in the preamble, and under the authority of 5 U.S.C. 552, the NEA, NEH (for itself and on behalf of FCAH, for which NEH provides legal counsel), and IMLS propose to amend 45 CFR Chapter XI Subchapter A as follows:

PART 1100—[Removed]

■ 1. Remove Part 1100.

Valencia Rainey,

Acting General Counsel, National Endowment for the Arts.

Michael P. McDonald,

General Counsel, National Endowment for the Humanities.

Nancy E. Weiss,

General Counsel, Institute of Museum and Library Services.

BILLING CODE 7537–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[WC Docket Nos. 12–375, 23–62; DA 23–355; FR ID [139745]]

Incarcerated People's Communications Services; Implementation of the Martha Wright-Reed Act; Rates for Interstate Inmate Calling Services

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; solicitation of comments.

SUMMARY: The Federal Communications Commission (Commission) seeks comment on the contours and specific requirements of the proposed 2023 Mandatory Data Collection for incarcerated people's communications services. The Commission has drafted proposed instructions, templates, and a certification form for the proposed 2023 Mandatory Data Collection. The Commission seeks comment on all aspects of these documents.

DATES: Comments are due June 2, 2023. Reply comments are due June 20, 2023.

ADDRESSES: You may submit comments, identified by WC Docket Nos. 12–375 and 23–62, by either of the following methods:

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the Electronic Comment Filing System (ECFS): *https://www.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. Currently, the Commission does not accept any hand or messenger delivered filings as a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.

The Commission adopted a new Protective Order in this proceeding which incorporates all materials previously designated by the parties as confidential. Filings that contain confidential information should be appropriately redacted and filed pursuant to the procedure described in that Order.

People with Disabilities: The Commission asks that requests for accommodations be made as soon as possible in order to allow the agency to satisfy such requests whenever possible. Send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530.

FOR FURTHER INFORMATION CONTACT: Ahuva Battams, Pricing Policy Division of the Wireline Competition Bureau, at (202) 418–1565 or via email at *ahuva.battams@fcc.gov.* Please copy *mandatorydatacollection@fcc.gov* on any email correspondence.

SUPPLEMENTARY INFORMATION: This is a summary of a document that the Federal Communications Commission's Wireline Competition Bureau released on April 28, 2023. A full-text version of the document is available at the following internet address: *https://www.fcc.gov/document/proposed-2023-ipcs-mandatory-data-collection-public-notice.*

Synopsis

Introduction and Background

1. By this document, the Wireline Competition Bureau (WCB) and Office of Economics and Analytics (OEA) (collectively, WCB/OEA) seek comment on the contours and specific requirements of the proposed 2023 Mandatory Data Collection for incarcerated people's communications services (IPCS). In issuing this document, they act pursuant to the Federal Communications Commission's (Commission) directive so that it is able to implement the Martha Wright-Reed Just and Reasonable Communications Act of 2022 (Martha Wright-Reed Act or Act). *Incarcerated People's Communications Services; Implementation of the Martha Wright-Reed Act; Rates for Interstate Inmate Calling Services,* Order, 88 FR 19001, March 30, 2023 (*2023 IPCS Order*), and Notice of Proposed Rulemaking, 88 FR 20804, April 7, 2023 (*2023 IPCS Notice*); Martha Wright-Reed Act, Public Law 117–338, 136 Stat. 6156.

2. The Martha Wright-Reed Act directs the Commission to ''promulgate any regulations necessary to implement'' the Act, including its mandate that the Commission establish a ''compensation plan'' ensuring that all rates and charges for IPCS ''are just and reasonable,'' not earlier than 18 months and not later than 24 months after the Act's January 5, 2023 enactment. The Act requires the Commission to consider, as part of its implementation, the costs of ''necessary'' safety and security measures, as well as ''differences in costs'' based on facility size, or ''other characteristics.'' It also allows the Commission to ''use industry-wide average costs of telephone service and advanced communications services and the average costs of service of a communications service provider'' in determining just and reasonable rates.

3. In recent years, the Commission has collected data from providers of calling services for incarcerated people as part of its ongoing efforts to establish just and reasonable rates for those services that reduce the financial burdens imposed on incarcerated people and their loved ones, while ensuring that providers are fairly compensated for their services. In requiring or allowing the Commission to consider certain types of costs, the new Act contemplates that the Commission would undertake an additional data collection. To ensure that it has the data it needs to meet its substantive and procedural responsibilities under the Act, in the *2023 IPCS Order* the Commission delegated authority to WCB/OEA to ''update and restructure'' the Commission's most recent data collection (the Third Mandatory Data Collection) ''as appropriate in light of the requirements of the new statute.'' This delegation requires that WCB/OEA collect ''data on all incarcerated people's communications services from all providers of those services now subject to'' the Commission's ratemaking authority, including, but not limited to, requesting ''more recent data for additional years not covered by the [Third Mandatory Data Collection].'' The Commission directed WCB/OEA to modify the template and instructions of the most recent data collection to the extent appropriate to timely collect such information to cover the additional services and providers now subject to the Commission's authority.

4. In seeking comment on their proposals for the proposed 2023 Mandatory Data Collection, WCB/OEA do not seek additional comment on the questions and other issues previously raised in other relevant Commission notices. Such comment is more appropriately submitted during the comment period specifically established for those notices. Thus, comments in response to this document need not include advocacy regarding issues raised in those notices, including how the Commission should interpret the language of the Martha Wright-Reed Act to ensure that it implements the statute in a manner that fulfills Congress's intent, the extent to which particular types of safety and security measures are necessary to provide IPCS, or the appropriate treatment of site commissions.

Overall Approach

5. Pursuant to their delegated authority, WCB/OEA propose updated

instructions, a template, and a certification form for the proposed 2023 Mandatory Data Collection, as posted on the Commission's website. The template consists of a Word document (Word template) and Excel spreadsheets (Excel template). WCB/OEA seek comment on all aspects of these proposed documents. Do the proposed documents seek all the information the Commission will need to establish a compensation plan ensuring that IPCS rates and charges are just and reasonable and that IPCS providers are fairly compensated, consistent with the Martha Wright-Reed Act? If not, what steps should WCB/OEA take to improve the proposed documents? The Commission's prior data collections have demonstrated that detailed and specific instructions and templates are essential to ensure that providers use comparable procedures to determine and report their costs, revenues, demand units, and other data. WCB/OEA invite comment on whether the proposed instructions and template are sufficiently detailed to accomplish this objective. If not, what additional instructions, inquiries, or fields should be added? Conversely, are there any instructions, inquiries, or fields that could be removed because they are unnecessary?

6. WCB/OEA propose to retain the overall structure of the Third Mandatory Data Collection, while revising and supplementing the definitions, instructions, and template to accommodate the Commission's expanded authority. To a large extent, the specific information they propose to collect, and the related instructions (including those relating to cost allocation), parallel the information collected by, and the instructions for, the Third Mandatory Data Collection. WCB/OEA invite comment on this approach. They ask that any commenter supporting an alternative approach, either with regard to the data collection as a whole or a particular aspect, explain in detail how that alternative approach would enable the Commission to discharge its responsibilities under the Martha Wright-Reed Act and the Communications Act of 1934, as amended (the Communications Act).

7. *Reporting Period.* In the Third Mandatory Data Collection, WCB/OEA required providers to submit data and other information for calendar years 2019, 2020, and 2021. WCB/OEA propose to generally limit the forthcoming data collection to calendar year 2022 data. They invite comment on this proposal. Does it properly balance the need for information, including cost data, on the video and intrastate services that were not previously subject to the Commission's ratemaking authority against the additional burdens providers would encounter in developing that information for years prior to 2022? Should WCB/OEA instead require providers to incorporate information on their video and intrastate IPCS operations into their data collection responses for 2020 and 2021, and to report that information in addition to information for 2022?

8. *Cost Categories.* The Martha Wright-Reed Act expands the Commission's authority under section 276(b)(1)(A) of the Communications Act to include ''advanced communications services,'' as defined in section 3(1)(A), (B), (D), and new (E) of the Communications Act. Those provisions of section 3(1), in turn, define ''advanced communications services'' as including (1) ''interconnected VoIP [Voice over internet Protocol] service,'' (2) ''non-interconnected VoIP service,'' (3) ''interoperable video conferencing service,'' and (4) ''any audio or video communications service used by inmates for the purpose of communicating with individuals outside the correctional institution where the inmate is held, regardless of technology used.'' The Act also extends the Commission's ratemaking authority to intrastate as well as interstate and international IPCS.

9. WCB/OEA propose to require providers to allocate their investments and expenses among audio IPCS, video IPCS, safety and security measures, various types of ancillary services, and other services and products, on both a company-wide and a facility-specific basis for 2022 (the types of ancillary services are automated payment services, live agent service, paper bill/statement service, single-call and related services, third-party financial transaction services, and other ancillary services). WCB/OEA invite comment on this proposal. Should any additional categories be specified for providers to use? Alternatively, would a more limited group of cost categories still allow the Commission to discharge its ratemaking responsibilities?

10. Are separate cost data for audio IPCS and video IPCS services necessary, or sufficient, for the Commission to ensure just and reasonable rates for those services? If not, what alternative approach should be used? What are the challenges of allocating IPCS costs between audio and video services? Do IPCS providers maintain sufficient records to directly assign or directly attribute significant percentages of their costs to audio IPCS and video IPCS? If not, how should providers allocate their IPCS costs between these two categories of services?

11. The proposed instructions and template would not require providers to subdivide their audio IPCS costs or their video IPCS costs into more discrete categories. WCB/OEA seek comment on this approach. What different types of audio and video services do IPCS providers offer to incarcerated people? Do the costs of providing audio IPCS vary depending on whether it is a traditional voice service, an interconnected VoIP service, a non-interconnected VoIP service, or another type of audio service used by incarcerated people to communicate with the non-incarcerated? For example, do providers pay intercarrier compensation charges for some types of IPCS but not for others? Do non-interconnected voice services have their own unique costs? Are the net cost differences among types of video IPCS sufficiently significant and measurable in a meaningful way to justify the additional burden of separate reporting? If separate reporting is justified, how should the proposed instructions and template be revised to capture those cost differences? Similarly, do the costs of providing video IPCS vary depending on the nature of the video service? To the extent there are such variations, how should WCB/OEA revise the instructions and templates to capture them?

12. *Intrastate and International IPCS.* In the Third Mandatory Data Collection, WCB/OEA required providers to report the costs of providing inmate calling services on a total company basis, without separating them into interstate/international and intrastate components. Although companies had the option to allocate their total company costs between interstate/international and intrastate inmate calling services, no provider exercised this option. Accordingly, WCB/OEA propose to follow their previous approach and require companies to report costs for IPCS without separation between these jurisdictions and provide an option for separate reporting for companies that elect to do so. WCB/OEA seek comment on this proposal. Do the costs of either audio IPCS or video IPCS vary significantly depending on whether they are interstate, intrastate, or international? If so, how should WCB/OEA revise the proposed instructions and templates to capture those differences? In the Third Mandatory Data Collection, WCB/OEA required inmate calling services providers to report their payments to carriers for terminating international communications as an operating

expense without jurisdictional separation on both a total-company and a facility-by-facility basis. The proposed instructions and Excel template would continue this approach.

13. The proposed instructions also require providers to separately report expenses related to routing and completing communications to international destinations as operating expenses. Will the proposed instructions yield accurate and usable data sufficient for the Commission to evaluate these expenses? Why or why not? Are there changes WCB/OEA should consider to the proposed instructions in this regard? If so, what are they?

14. *Costs of Providers' Safety and Security Measures.* The Martha Wright-Reed Act specifies that the Commission ''shall consider,'' as part of its ratemaking, ''costs associated with any safety and security measures necessary to provide'' telephone service and advanced communications services in correctional institutions. To facilitate the Commission's consideration of such costs, WCB/OEA propose to require providers to report the costs they incurred to provide safety and security measures during 2022, both in the aggregate and in specific categories. Determining those costs would involve several steps.

15. First, the proposed instructions would require providers to allocate a portion of their total-company investments and expenses to a company-wide ''safety and security measures'' category and to exclude those investments and expenses from all other cost categories. This allocation would be done in accordance with the detailed cost allocation hierarchy set forth in the instructions. The ''safety and security measures'' category thus would encompass all safety and security services and products that the companies provide, regardless of whether they are provided in connection with audio, video, or nonregulated services, or in connection with traditional telephone or advanced communications services. Do commenters agree with this approach? Instead, should providers be required to report their costs of safety and security measures separately for different categories of services? Why or why not? If safety and security costs are not treated as a separate service or as multiple separate services, then how should the Commission organize the data collection to be able to consider the costs of necessary safety and security measures?

16. Second, the proposed instructions would require each provider to allocate their annual total expenses incurred in providing safety and security measures among seven company-level categories using the provider's best estimate of the percentage of those expenses attributable to each category. As set out in the proposed instructions, annual total expenses are the sum of annual operating expenses and annual capital expenses. The seven company-level categories are: (1) expenses related to Communications Assistance for Law Enforcement Act, (2) law enforcement support services, (3) communication security services, (4) communication recording services, (5) communication monitoring services, (6) voice biometrics services, and (7) other safety and security measures. WCB/OEA seek comment on the benefits and burdens of this approach. They invite comment on the categories of safety and security measures in the proposed instructions. How, if at all, should these categories be changed? Are there other examples of specific safety and security measures that should be included in the illustrative lists included in each of the categories? If so, what are these measures and how should they be categorized? Are there other categories of safety and security measures that should be included? If so, which ones? Alternatively, are there categories that should be removed? If so, which ones should be removed and why? Do commenters agree with the proposed approach of requiring providers to allocate annual total expenses on an estimated percentage basis or should WCB/OEA instead require providers to perform a detailed allocation of actual investments and expenses among the seven categories? To the extent commenters argue that a more detailed cost allocation would be more appropriate, commenters should explain and justify in detail the cost allocation method they propose and the benefits and burdens of their approach.

17. Third, after reporting the best estimate of the percentage of the company's annual total expenses of providing safety and security measures for each category, the proposed instructions would direct providers to report for each of those same categories the company's best estimate of the percentage of safety and security expenses attributable to audio IPCS, video IPCS, ancillary services, and other services and products. Would this approach provide reasonably accurate data on the portions of each category of providers' safety and security costs that are attributable to audio IPCS, video IPCS, ancillary services, and other services and products? Why or why not? If not, is there another allocation method WCB/OEA should consider? If so, what do commenters propose and why would it be preferable to the allocation set forth in the proposed instructions?

18. Providers would also report facility-level safety and security costs for each facility. The proposed instructions would require providers to first identify whether they provide safety and security measures at each facility they serve. Providers would do so by indicating ''Yes'' or ''No'' in the appropriate cell on the Excel template for each of the seven identified categories of safety and security measures at each facility. Wherever providers offer a given safety and security measure, the proposed instructions would then require the provider to allocate its company-wide safety and security annual total expenses for that category among the individual facilities at which that service is offered. Providers would then further allocate those amounts at each facility between audio IPCS, video IPCS, ancillary services, and other services and products. WCB/OEA seek comment on this approach. Would it accurately capture the costs of providing the seven identified categories of safety and security measures at each facility? Why or why not? If not, how could the facility-level reporting be changed to identify the safety and security measures providers offer at the facilities they serve and the cost of providing those measures? Will the subsequent allocation between audio IPCS, video IPCS, ancillary services, and other services and products be sufficiently accurate to capture the costs of providing those safety and security measures in connection with these other services? Why or why not? Are there other methods WCB/OEA should consider that would allow the Commission to evaluate the costs of safety and security measures offered in connection with audio IPCS, video IPCS, ancillary services and other services and products, to the extent cost differences exist? If so, what do commenters propose and why?

19. *Costs of Facilities' Safety and Security Measures.* In the *2023 IPCS Notice,* the Commission sought comment on how it could determine the costs associated with necessary safety and security measures ''to the extent resources of the facilities are used to provide these measures.'' Consistent with that request, WCB/OEA propose to require providers to report any verifiable, reliable, and accurate information in their possession about the costs the facilities they serve incur

to provide safety and security measures in connection with the provision of IPCS. To the extent providers have such information for any specific facility, the instructions would direct providers to report the annual total expenses facilities incur using the same seven categories proposed in connection with reporting provider-incurred safety and security costs. WCB/OEA seek comment on the benefits and burdens of this approach. Is there a better approach the Commission could use to obtain the costs facilities incur in providing safety and security measures? The proposed instructions require providers to be able to reproduce, on request, documentation sufficient to explain and justify the accuracy and reliability of any data they report regarding the expenses incurred by facilities for safety and security measures. Do commenters agree with this approach? Will it enable the Commission to evaluate the reliability and accuracy of any data receives? If not, how should providers be required to demonstrate the accuracy and reliability of the data they provide regarding the costs facilities incur to provide safety and security measures? To the extent providers are not able to establish the accuracy and reliability of the data they rely on, how should the Commission accurately account for these expenses?

20. To assist the Commission in obtaining the broadest possible view of the costs that facilities incur, the proposed instructions also ask providers to indicate whether they have any verifiable, reliable, and accurate information on other facility-incurred costs that are not safety and security costs. To the extent providers have such information, the proposed instructions require that providers be able to reproduce, on request, documentation sufficient to fully explain and justify the accuracy and reliability of any data they report regarding the expenses incurred by facilities that are not safety and security costs.

Specific Instructions

21. WCB/OEA seek comment on the proposed instructions and whether they provide sufficient guidance to ensure that providers use uniform methodologies and report the required information in a consistent manner. Are there any changes that would clarify the proposed instructions or increase uniformity across providers' responses, particularly regarding how to report and allocate their costs? If so, what specific changes should be made? Is there alternative or additional language that would minimize ambiguity in any instruction? Commenters should explain the potential benefits and burdens of alternative or additional language they propose.

22. The proposed instructions also address many data requests that are not specifically described below. WCB/OEA seek comment on all aspects of the proposed instructions, including on requests that they do not specifically seek comment on in this document.

23. *Definitions.* The proposed instructions contain new and revised definitions reflecting the Commission's expanded authority over IPCS. WCB/OEA seek comment on these definitions. Are they sufficiently clear? If not, how should they be modified? Are there any undefined terms that should be defined? Are there any terms that should be added to the proposed instructions that would assist filers in furnishing the Commission with the relevant data? If so, what are they and how should they be defined? Should any proposed definitions be removed?

24. *Required Information.* The proposed instructions would provide guidance for the collection of a variety of data on audio IPCS, video IPCS, safety and security measures, various types of ancillary services, and other services and products. WCB/OEA seek detailed comment on whether additional data should be collected or, conversely, whether the data providers are required to submit be reduced. Commenters urging that WCB/OEA should request different data should explain how their proposals would affect the Commission's ability to meet its responsibilities under the Martha Wright-Reed Act and the Communications Act. Would the benefits of requesting different data justify the costs? Why or why not?

25. *Response Granularity.* WCB/OEA propose that all providers submit data both at the company-wide level and for each correctional facility in which the provider offered IPCS during 2022. They seek comment on this approach. WCB/OEA propose this method to fully account in a coherent way for the shared costs providers incur as some of the assets or labor they use to provide IPCS are also used to provide other services, and are used to provide IPCS to multiple facilities. If parties believe that a different level of granularity is appropriate, please explain. Assuming WCB/OEA should require providers to report data on a facility-level basis, how should providers that do not track costs on a facility level be required to respond? Are the cost allocation procedures set forth in the proposed instructions sufficient to enable these providers to allocate costs down to the facility and, if not, what additional procedures should be required? Are there any additional data WCB/OEA should seek that would help ensure that providers allocate costs to facilities in a manner that more accurately reflects how such costs are incurred?

26. *Cost Allocation.* WCB/OEA propose several steps for providers to follow in allocating their costs among various services, as set forth in the proposed instructions. What refinements, if any, should be made to the proposed cost allocation methodology? Is there an alternative methodology that would better ensure that providers allocate their costs in a manner consistent with how they are incurred? If so, what is that methodology and why would it produce more accurate results than the proposed method? Would the benefits of an alternative methodology justify the costs?

27. *Financial Information.* The proposed instructions retain the requirements that providers report financial data in accordance with generally accepted accounting principles (GAAP) and asset values that reflect the results of recent impairment testing. Under GAAP, an asset or asset group is impaired when its carrying amount, that is, the value reflected on the balance sheet, net of depreciation or amortization, exceeds its fair market value. In that case, the value of the impaired asset or asset group is written down and the reduced value is reflected on the balance sheet and a loss is recorded on the income statement. Is this the correct approach? If not, why not? Are other or additional instructions needed to ensure that the carrying value of any provider's assets is not misstated? If so, what other instructions should be adopted?

28. *Site Commissions.* The proposed instructions retain in large part the questions concerning company-wide and facility-level site commission data from the Third Mandatory Data Collection. Are there specific changes WCB/OEA should consider, either to the overall structure or level of disaggregation for site commission data? If so, what changes do commenters suggest and why? As explained in the proposed instructions, WCB/OEA propose new narrative questions in a separate Word template designed to obtain information about interstate, intrastate, and international site commissions, including whether and how the formulas providers use to calculate monetary site commissions differ among interstate, intrastate, and international communications. WCB/OEA also propose a new Word template question seeking information about

whether providers pay site commissions separately on audio and video services and how those site commissions are calculated. WCB/OEA invite comment on these proposed questions and ask commenters to suggest alternative questions that would help the Commission obtain reliable and accurate data and information on site commission payments for interstate, intrastate, and international, as well as for audio and video, communications.

29. *Ancillary Services.* While the proposed instructions retain essentially the same company-wide and facility-level questions about ancillary services that were asked as part of the Third Mandatory Data Collection, WCB/OEA invite comment on potential changes that they should consider. Do commenters suggest that WCB/OEA add or remove questions in these sections? If so, what should be added or removed? Is there a better structure or approach that would yield more accurate, reliable, or useful data? If so, what do commenters propose? Given the Commission's expanded authority under the Martha Wright-Reed Act, WCB/OEA propose new Word template questions that would seek information on how providers assess ancillary service charges on interstate, intrastate, and international communications, in light of the Commission's previous conclusion that ''ancillary service charges generally cannot be practically segregated between the interstate and intrastate jurisdiction.'' WCB/OEA also propose to add Word template questions regarding the ancillary service charges or other charges assessed in connection with video services and whether there are any differences between the types of ancillary service charges assessed in connection with video and audio IPCS. WCB/OEA invite comment on these questions. Are there other questions they should ask that would assist the Commission in evaluating any differences based on either the jurisdiction of the communications service or whether the charges are being assessed in connection with an audio or video service? Are providers currently assessing any other charges in connection with video communications that fall outside of the five ancillary service charges permitted under the Commission's rules? If so, what are they and how should they be addressed in the data collection? Are there particular questions WCB/OEA should ask to help the Commission understand how providers assess ancillary service charges in circumstances where service offerings might be mixed between audio and video services?

Reporting Template

30. WCB/OEA propose to require providers to submit the requisite data using a reporting template, to be filed through the Commission's Electronic Comment Filing System (ECFS). The proposed template consists of a Word document (Appendix A to the instructions) for responses requiring narrative information and Excel spreadsheets (Appendix B to the instructions) for responses that require numeric or other information. WCB/OEA seek comment on proposed modifications in the template seeking data relevant to the Commission's expanded jurisdiction, including modifications to collect data on video IPCS and safety and security measures. WCB/OEA also seek suggestions for improvements they can make to the template. Is there an alternative organization that would reduce any perceived burdens, without compromising the reliability and accuracy of the data WCB/OEA are able to collect? Are there other organizational or substantive improvements they can make to the reporting template? Do any questions require clarification?

Timeframe for Provider Responses to the Data Collection

31. WCB/OEA invite comment on the timeframe for provider responses to the data collection. In the *2023 IPCS Order,* the Commission explained that ''[a]ny new or modified requirements that require approval from the Office of Management and Budget (OMB) under the Paperwork Reduction Act shall be effective on the date specified in a notice published in the **Federal Register** announcing OMB's approval.'' Importantly, the Martha Wright-Reed Act imposes a statutory requirement that the Commission ''promulgate any regulations necessary to implement'' the Act, not earlier than 18 months and not later than 24 months after the Act's January 5, 2023 enactment. As the Commission explained in *the 2023 IPCS Order,* ''[a]ny unnecessary delay in our efforts to collect appropriate information would be inconsistent with, and undermine the Commission's ability to meet the deadlines contained in, the Act.'' Given these constraints, WCB/OEA propose to require providers to file their responses to the data collection within 90 days of the release of the order approving the data collection. Do commenters agree with this timeframe? Would it afford providers sufficient time to prepare and submit their responses while also allowing the Commission to act expeditiously to implement the Martha Wright-Reed Act within the statutory timeframe? Why or why not? Should WCB/OEA instead consider a shorter, or longer, timeframe for providers to respond to the data collection? If so, what timeframe do commenters propose and why?

Digital Equity and Inclusion

32. As part of the Commission's continuing effort to advance communications equity for all, including people of color and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality, WCB/OEA invite comment on any equity-related considerations and benefits that may be associated with the upcoming data collection. Specifically, WCB/OEA seek comment on how their proposals for that collection may promote or inhibit advances in diversity, equity, inclusion, and accessibility. WCB/OEA define the term ''equity'' consistent with Executive Order 13985 as the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment, such as Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders and other persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons; persons with disabilities; persons who live in rural areas; and persons otherwise adversely affected by persistent poverty or inequality. Exec. Order No. 13985, 86 FR 7009, Executive Order on Advancing Racial Equity and Support for Underserved Communities Through the Federal Government (Jan. 20, 2021).

Procedural Matters

33. *Ex Parte Presentations.* This proceeding shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's ex parte rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation

consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda, or other filings in the proceeding, the presenter may provide citations to such data or arguments in the prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with § 1.1206(b) of the Commission's rules. Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

34. *Supplemental Initial Regulatory Flexibility Act Analysis.* As required by the Regulatory Flexibility Act, the Commission has prepared a Supplemental Initial Regulatory Flexibility Analysis (Supplemental IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in this document. The Commission requests written public comments on the Supplemental IRFA. Comments must be identified as responses to the Supplemental IRFA and must be filed by the deadlines for comments provided in this document. The Commission will send a copy of this document, including this Supplemental IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, summaries of this document and the Supplemental IRFA will be published in the **Federal Register**.

35. *Initial Paperwork Reduction Act Analysis.* This document, and the instructions and templates, contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. It will be submitted to OMB for review under section 3507(d) of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the new or modified information collection requirements contained in this proceeding. Contemporaneously with the publication of this Notice in the **Federal Register**, WCB/OEA will publish a notice in the **Federal Register** seeking comment pursuant to the PRA on the information collection requirements for the proposed 2023 Mandatory Data Collection in the *2023 IPCS Notice* and this document. WCB/OEA will consider comments submitted in response to both **Federal Register** notices in finalizing this information collection for submission to OMB. In addition, WCB/OGC note that pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198; *see* 44 U.S.C. 3506(4), they seek comment on how the Commission may further reduce the information collection burden for small business concerns with fewer than 25 employees.

Supplemental Initial Regulatory Flexibility Analysis

36. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), WCB/OEA have prepared this Supplemental IRFA of the possible significant economic impact on small entities by the policies and rules proposed in this document to supplement the Commission's Regulatory Flexibility Analyses completed in the *2023 IPCS Notice* and *2023 IPCS Order.* WCB/OEA request written public comment on this Supplemental IRFA. Comments must be identified as responses to the Supplemental IRFA and must be filed by the deadlines for comments provided in this document. The Commission will send a copy of this document, including this Supplemental IRFA, to the Chief Counsel for Advocacy of the SBA. This present Supplemental IRFA conforms to the RFA.

Need for, and Objectives of, the Proposed Rules

37. In this document, WCB/OEA seek comment on the contours and specific requirements of the proposed 2023 Mandatory Data Collection for IPCS. In issuing this document, WCB/OEA act pursuant to the Commission's directive so that it will be able to implement the Martha Wright-Reed Act. The Commission determined that this data collection would enable it to ''meet both [its] procedural obligations (to consider certain types of data) and [its] substantive responsibilities (to set just and reasonable rates and charges)'' under the Martha Wright-Reed Act and the Communications Act. Likewise, it directed WCB/OEA ''to update and restructure the most recent data collection as appropriate to implement the Martha Wright-Reed Act.''

38. Pursuant to their delegated authority, WCB/OEA have drafted instructions, a template, and a certification form for the proposed 2023 Mandatory Data Collection and are issuing this document to seek comment on all aspects of these proposed documents.

Legal Basis

39. The proposed action is pursuant sections 1, 2, 4(i)–(j), 5(c), 201(b), 218, 220, 225, 255, 276, 403 and 716 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i)–(j), 155(c), 201(b), 218, 220, 225, 255, 276, 403, and 617, and the Martha Wright-Reed Act, Public Law 117–338, 136 Stat. 6156 (2022).

Description and Estimate of the Number of Small Entities to Which the Proposed 2023 Rules Would Apply

40. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed 2023 Mandatory Data Collection. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small-business concern'' under the Small Business Act. A ''small-business concern'' is one which: (1) is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

41. As noted above, an IRFA was incorporated in the *2023 IPCS Notice.* In that analysis, the Commission described in detail the small entities that might be affected. Accordingly, in this document, for the Supplemental IRFA, WCB/OEA hereby incorporate by reference the descriptions and estimates of the number of small entities from the *2023 IPCS Notice's* IRFA.

Description of Project Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

42. This document seeks comment on the specifics of the proposed 2023 Mandatory Data Collection to ensure that the Commission receives the data it needs to meet its substantive and procedural responsibilities under the Act. The proposed 2023 Mandatory Data Collection would require IPCS providers to submit, among other things, data and other information on calls, demand, operations, company and contract information, information about facilities served, revenues, site commission payments, the costs of safety and security measures, video IPCS, and ancillary fees. The proposed 2023 Mandatory Data Collection may require entities, including small entities and IPCS providers of all sizes, currently subject to the Commission's inmate calling services rules to be subject to modified or new reporting or other compliance obligations. This may also be the case for providers newly subject to the Commission's expanded regulatory authority, such as providers

offering only intrastate or certain advanced communications. In addition, WCB/OEA recognize that their actions in this proceeding may affect the reporting, recordkeeping, and other compliance requirements for several groups of small entities. In assessing the cost of compliance for small entities and for providers of incarcerated people's communications services of all sizes, at this time WCB/OEA are not in a position to determine whether the proposed 2023 Mandatory Data Collection will impose any significant costs for compliance in general. WCB/OEA anticipate the information they receive in comments, including any cost and benefit analyses, will help the Commission identify and evaluate relevant compliance matters for small entities, including compliance costs and other burdens that may result from the proposals and inquiries they make in this document.

Steps Taken To Minimize the Significant Economic Impact on Small Entities and Significant Alternatives Considered

43. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rules for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.'' WCB/OEA will consider all of these factors when they receive substantive comment from the public and potentially affected entities.

44. The proposed 2023 Mandatory Data Collection is a one-time request and does not impose a recurring obligation on providers. Because the Commission's *2023 IPCS Order* requires all IPCS providers to comply with the proposed 2023 Mandatory Data Collection, the collection will affect smaller as well as larger IPCS providers. WCB/OEA have taken steps to ensure that the data collection template is competitively neutral and not unduly burdensome for any set of providers. For example, this document proposes to collect data for a single calendar year instead of three calendar years, as in the previous data collection. Additionally, this document asks whether there are ways of minimizing the burden of the data collection on providers while still ensuring that the Commission collects all the data needed to meet its goals.

45. WCB/OEA will consider the economic impact on small entities, as identified in comments filed in response to this document and this Supplemental IRFA, in reaching their final conclusions and finalizing the instructions, the template, and certification form for the proposed 2023 Mandatory Data Collection.

Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

46. None.

Notices

Federal Register
Vol. 88, No. 85
Wednesday, May 3, 2023

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding: whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by June 2, 2023 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Institute of Food and Agriculture

Title: Small Business Innovation Research (SBIR) Program.

OMB Control Number: 0524–0049.

Summary of Collection: The Small Business Innovation Research (SBIR) program at the U.S. Department of Agriculture (USDA) makes competitively awarded grants to qualified small businesses to support high quality, advanced concepts research related to important scientific problems and opportunities in agriculture that could lead to significant public benefit if successful. The objectives of the SBIR Program are to: stimulate technological innovation in the private sector; strengthen the role of small businesses in meeting Federal research and development needs; increase private sector commercialization of innovations derived from USDA-supported research and development efforts; and foster and encourage participation by women-owned and socially and economically disadvantaged small business firms in technological innovation. The USDA SBIR Program is administered by the National Institute of Food and Agriculture (NIFA) of the USDA.

Need and Use of the Information: The USDA SBIR Program Office proposes to contact Phase II awardees to determine their success in achieving commercial application of a market ready technology that was funded under the USDA SBIR Program. The survey would collect information from Phase II companies that received funding during the years of 2016 to 2019. Data from the survey will be used to provide information that currently does not exist. The data will be used internally by the USDA SBIR Office to identify past and current activities of Phase II grantees in the areas of technology development, commercialization success, product development or services, and factors that may have prevented the technology from entering into the marketplace.

Description of Respondents: Business or other for-profit.

Number of Respondents: 121.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 61.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–09–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—The Special Supplemental Nutrition Program for Women, Infants and Children (WIC) Breastfeeding Award of Excellence

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this proposed information collection. This collection is a revision of a currently approved collection for awarding local agencies for excellence in WIC breastfeeding services and support.

DATES: Written comments must be received on or before July 3, 2023.

ADDRESSES: The Food and Nutrition Service, USDA, invites interested persons to submit written comment.

- *Preferred Method:* Federal eRulemaking Portal. Go to *http://www.regulations.gov* and follow the online instructions for submitting comments electronically.
- *Mail:* Send comments to: Kristin Garcia, Director, Food Safety and Nutrition Division, Food and Nutrition Service, U.S. Department of Agriculture, 1320 Braddock Pl., Alexandria, VA 22314.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Valery Soto, Chief, Nutrition Services and Promotion Branch, Food Safety and Nutrition Division, FNS, USDA, 1320 Braddock

Pl., Alexandria, VA 22314. Telephone: (703) 305–2742.

SUPPLEMENTARY INFORMATION: Section 231 of the Healthy, Hunger-Free Kids Act of 2010, Public Law 111–296, requires that the Department of Agriculture (USDA) establish a program to recognize WIC local agencies and clinics that demonstrate exemplary breastfeeding promotion and support activities.

Comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Title: Special Supplemental Nutrition Program for Women, Infants and Children (WIC) Breastfeeding Award of Excellence.

Form Number: Not applicable.

OMB Number: 0584–0591.

Expiration Date: 11/30/2023.

Type of Request: Revision of a currently approved collection.

Abstract: This information collection is mandated by section 231 of the Healthy, Hunger-Free Kids Act of 2010 (HHFKA) (Pub. L. 111–296). Section 231 of the HHFKA, which requires USDA to implement a program to recognize exemplary breastfeeding support practices at WIC local agencies and clinics. The WIC Program provides breastfeeding promotion and support for pregnant and postpartum mothers as a part of its mission to improve the health of the approximately 6 million Americans it serves each month. Breastfeeding is a priority in WIC and WIC mothers are strongly encouraged to breastfeed their infants unless medically contraindicated.

In recognizing exemplary local agencies and clinics, the HHFKA requires the Secretary to consider the following criteria: (1) performance measurements of breastfeeding; (2) the effectiveness of a peer counselor program; (3) the extent to which the agency or clinic has partnered with other entities to build a supportive breastfeeding environment for women participating in WIC; and (4) other criteria the Secretary considers appropriate after consultation with State and local program agencies. The information will be submitted voluntarily by WIC local agencies who will be applying for an award. FNS will use the information collected to evaluate the components of existing breastfeeding programs and support in WIC local agencies and make decisions about awards. This program is expected to provide models and motivate local agencies and clinics to strengthen their breastfeeding promotion and support activities.

A notable improvement from past collection requests is that FNS hosts the application process for local agencies fully online. The State agencies continue to conduct their evaluation on PartnerWeb. FNS plans to explore ways to streamline the evaluation for State agencies to improve their user experience. The total estimated time to complete the application is not expected to change.

Affected Public: State, local and Tribal government: Respondent groups identified include local and State WIC agencies.

Estimated Number of Respondents: The total estimated number of participants is 239: 150 local WIC agencies, 89 State WIC agencies.

WIC Peer Counseling is an FNS initiative that equips WIC programs with an implementation and management model—the ''WIC Breastfeeding Model for Peer Counseling''—to serve as a framework for designing, building, and sustaining peer counseling programs, a requirement for award eligibility. Since the inception of the program in 2015, a total of 728 awards have been given. In fiscal year (FY) 2020, 138 eligible local agencies applied for an award; in FY 2021, 130 eligible local agencies applied for an award; in FY 2022, 127 eligible local agencies applied for an award; and in FY 2023, 143 eligible local agencies applied for awards. FNS estimates the annual submitted applications will range from 130–150 applications submitted annually. For small entities WIC estimates that 7–8% (11 applications) of local agency applications do not come from health departments. The estimated number of respondents for the State agency application verification is derived from the total number of State WIC agencies.

Estimated Number of Responses per Respondent: The estimated number of responses per respondent for the WIC local agency is one, as each eligible WIC local agency can submit one application. The estimated number of responses per respondent for the WIC State agency is 2.0, as each WIC State agency will evaluate approximately 2.0 applications annually. These estimates were derived by dividing the total number of responses for the WIC Local Agency Application or the State Agency Evaluation by the respective number of respondents. Overall, the estimated number of responses per respondent across the entire collection is 1.4, which is derived by dividing the total number of responses (328) by the total estimated number of respondents (239).

Estimated Total Annual Responses: 328.

Estimated Time per Response: FNS estimates the WIC local agency application response is 2.5 hours, and the WIC State agency response is 1.5 hours. Overall, the average estimated time for all of the award participants is 2 hours. The estimated average number of hours per response was derived by dividing the number of estimated total hours (642), by the number of total annual responses by all respondents (328). The time for the WIC local agency is an estimated time for the agency to voluntarily review the instructions, fill out the ''WIC Breastfeeding Award of Excellence'' application, and attach supportive documentation. The time for the State WIC agency is an estimated time for the agency to review the instructions, evaluate the components of the local WIC agencies applications, and make a recommendation for an award.

Estimated Total Annual Burden on Respondents: 642.0 hours.

See the Burden table below for estimated total annual burden for each type of respondent.

Respondent	Estimated number of respondent	Responses annually per respondent	Total annual responses	Estimated avg. number of hours per response *	Estimated total hours
Reporting Burden					
Small Entity Application	11.0	1.0	11.0	2.5	27.5
WIC Local Agency Application	139.0	1.0	139.0	2.5	347.5
WIC State Agency Evaluation	89.0	2.0	178.0	1.5	267.0
Total Reporting Burden	239.0	1.4	328.0	2.0	642.0

* Estimated average # of hours per response includes .5 hours for reviewing instructions.

Tameka Owens,

Assistant Administrator, Food and Nutrition Service.

BILLING CODE 3410–30–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Arizona Advisory Committee

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of virtual briefing.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act (FACA) that a briefing of the Arizona Advisory Committee (Committee) to the Commission will convene via *ZoomGov* on Tuesday, May 23, 2023, from 12:00 p.m.–3:00 p.m. Arizona Time. The purpose of the briefing is to collect testimony from invited panelists regarding racial and/or ethnic disparities in pediatric healthcare in Arizona.

DATES: The briefing will take place on:

- Friday, May 23, 2023, from 12:00 p.m.–3:00 p.m. Arizona Time

ADDRESSES:

Access Information:

Link to Join (Audio/Visual):

https://www.zoomgov.com/j/1612316896?pwd=bkNaOHZIdzhxZDhXSDJNSk5VZEJtdz09.

Telephone (Audio Only) Dial: 1–833–435–1820 (US Toll-free); Meeting ID: 161 231 6896#.

FOR FURTHER INFORMATION CONTACT: Kayla Fajota, DFO, at *kfajota@usccr.gov* or (434) 515–2395.

SUPPLEMENTARY INFORMATION: Committee meetings are available to the public through the videoconference link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email *kfajota@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to make comments during the open period at the end of the meeting. Members of the public may also submit written comments; the comments must be received in the Regional Programs Unit within 30 days following the meeting. Written comments may be mailed to the Western Regional Office, U.S. Commission on Civil Rights, 300 North Los Angeles Street, Suite 2010, Los Angeles, CA 90012 or email Kayla Fajota (DFO) at *kfajota@usccr.gov.*

Records and documents discussed during the meeting will be available for public viewing prior to and after the meetings at *https://www.facadatabase.gov/FACA/FACAPublicViewCommitteeDetails?id=a10t0000001gzl2AAA.*

Please click on the ''Committee Meetings'' tab. Records generated from these meetings may also be inspected and reproduced at the Regional Programs Unit, as they become available, both before and after the meetings. Persons interested in the work of this Committee are directed to the Commission's website, *https://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

Agenda

I. Welcome, Roll Call, and Opening Remarks
II. Panelist Presentations
III. Committee Q & A

BILLING CODE P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Minnesota Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Notice of public meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act, that the Minnesota Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a public meeting via Zoom at 12:30 p.m. CT on Thursday, May 25, 2023, to discuss the Committee's draft project proposal on housing affordability in the state.

DATES: Thursday, May 25, 2023, from 12:30 p.m.–1:30 p.m. Central Time.

ADDRESSES: The meeting will be held via Zoom.

Registration Link (Audio/Visual): https://www.zoomgov.com/j/1612943387.

Join by Phone (Audio Only): (833) 435–1820 USA Toll-Free; Meeting ID: 161 294 3387.

FOR FURTHER INFORMATION CONTACT: David Barreras, Designated Federal Officer, at *dbarreras@usccr.gov* or (202) 656–8937.

SUPPLEMENTARY INFORMATION: This committee meeting is available to the public through the registration link above. Any interested member of the public may listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Per the Federal Advisory Committee Act, public minutes of the meeting will include a list of persons who are present at the

meeting. If joining via phone, callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Closed captioning will be available for individuals who are deaf, hard of hearing, or who have certain cognitive or learning impairments. To request additional accommodations, please email Liliana Schiller, Support Services Specialist, at *lschiller@usccr.gov* at least 10 business days prior to the meeting.

Members of the public are entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to David Barreras at *dbarreras@usccr.gov.* Persons who desire additional information may contact the Regional Programs Coordination Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Coordination Unit Office, as they become available, both before and after the meeting. Records of the meetings will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Minnesota Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Coordination Unit at *lschiller@usccr.gov.*

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–30–2023]

Foreign-Trade Zone (FTZ) 7, Notification of Proposed Production Activity; AbbVie Ltd.; (Pharmaceutical Products); Barceloneta, Puerto Rico

AbbVie Ltd., submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Barceloneta, Puerto Rico within Subzone 7I. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on April 25, 2023.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status material(s)/component(s) and specific finished product(s) described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.* The proposed finished product(s) and material(s)/component(s) would be added to the production authority that the Board previously approved for the operation, as reflected on the Board's website.

The proposed finished product is vraylar (cariprazine) capsules (duty-free).

The proposed foreign-status material is cariprazine hydrochloride active pharmaceutical ingredient (duty rate 6.5%).

Public comment is invited from interested parties. Submissions shall be

addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is June 12, 2023.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact Christopher Wedderburn at *Chris.Wedderburn@trade.gov.*

Dated: April 27, 2023.

Elizabeth Whiteman,

Acting Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–834–811]

Silicon Metal From Kazakhstan: Rescission of Countervailing Duty Administrative Review; 2020–2021

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the countervailing duty (CVD) order on silicon metal from the Republic of Kazakhstan (Kazakhstan) for the period of review (POR) December 3, 2020, through December 31, 2021.

DATES: Applicable May 3, 2023.

FOR FURTHER INFORMATION CONTACT: Genevieve Coen, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3251.

SUPPLEMENTARY INFORMATION:

Background

On April 1, 2022, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the CVD order on silicon metal from Kazakhstan.[1] On June 9, 2022, pursuant to a request from interested parties, Commerce initiated an administrative review with respect to JSC NMC Tau-Ken Samruk and Tau-Ken Temir LLP (collectively, TKT),[2] in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.213(b).[3] On June 22, 2022, we placed on the record U.S. Customs and Border Protection (CBP) data for entries of silicon metal from Kazakhstan during the POR, showing no reviewable POR entries.[4] We sought comments regarding the data and indicated our intent to rescind this review.[5] TKT, the Government of Kazakhstan (GOK), and the petitioners [6] filed comments and rebuttal comments.[7] No parties argued that there are any reviewable POR entries of subject merchandise. For a full discussion of the comments raised by interested parties and our analysis, *see* the Rescission Memorandum.[8]

Rescission of Review

It is Commerce's practice to rescind an administrative review of a CVD order, pursuant to 19 CFR 351.213(d)(3), when there are no reviewable entries of subject merchandise during the POR for which liquidation is suspended.[9] Normally, upon completion of an administrative review, the suspended entries are liquidated at the CVD assessment rate calculated for the review period.[10] Therefore, for an administrative review to be conducted, there must be a reviewable, suspended entry that Commerce can instruct CBP to liquidate at the CVD assessment rate calculated for the review period.[11] Accordingly, in the absence of suspended entries of subject merchandise during the POR for TKT, we are hereby rescinding this administrative review in accordance with 19 CFR 351.213(d)(3).

Notification Regarding Administrative Protective Order

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: April 27, 2023.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[A–570–044]

1,1,1,2-Tetrafluoroethane (R–134a) From the People's Republic of China: Preliminary Results of Antidumping Duty Administrative Review, Partial Rescission, and Preliminary Determination of No Shipments; 2021–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that the sole mandatory respondent under review sold subject merchandise at less than normal value (NV) during the period of review (POR) April 1, 2021, through March 31, 2022. Additionally, Commerce preliminarily finds that one company had no shipments of subject merchandise during the POR and that it is appropriate to rescind this review with

respect to 22 companies because all requests for review of these companies were withdrawn. Interested parties are invited to comment on these preliminary results.

DATES: Applicable May 3, 2023.

FOR FURTHER INFORMATION CONTACT: Patrick Barton, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0012.

SUPPLEMENTARY INFORMATION:

Background

On April 19, 2017, Commerce published in the **Federal Register** the antidumping duty (AD) order on 1,1,1,2-Tetrafluoroethane (R–134a) from the People's Republic of China (China).[1] On June 9, 2022, pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (the Act), Commerce initiated an administrative review of *Order*.[2] The review covers 25 companies, including mandatory respondent Zhejiang Sanmei Chemical Ind. Co., Ltd. (Zhejiang Sanmei).[3]

For events that occurred since the *Initiation Notice* and the analysis behind the preliminary results herein, *see* the Preliminary Decision Memorandum.[4] The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.* A list of topics discussed in the Preliminary Decision Memorandum is included as Appendix I to this notice.

Scope of the Order[5]

The product covered by the *Order* is R–134a from China. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Partial Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of the notice of initiation of the requested review. On September 7, 2022, the American HFC Coalition (the petitioner) timely withdrew its review request for 22 companies listed in the *Initiation Notice.* No other parties requested a review of these companies. Accordingly, pursuant to 19 CFR 351.213(d)(1), Commerce is rescinding the administrative review with respect to the companies listed in Appendix II. Zhejiang Sanmei, T.T. International Co., Ltd. (TTI), and Zhejiang Quhua Fluor-Chemistry Co., Ltd. (Zhejiang Quhua) remain under review.[6]

Preliminary Determination of No Shipments

We preliminarily determine that TTI had no shipments of subject merchandise during the POR. Consistent with our practice in non-market economy (NME) cases, Commerce is not rescinding this review with respect to TTI but, rather, we intend to complete the review and issue appropriate instructions to U.S. Customs and Border Protection (CBP) based on the final results of the review.[7] For further discussion, *see* the Preliminary Decision Memorandum.

Separate Rates

We preliminarily determine that the Zhejiang Sanmei single entity is entitled to separate rate status. Moreover, because Zhejiang Quhua did not submit a separate rate application or certification, we preliminarily find that the company has not established its eligibility for a separate rate.

The China-Wide Entity

Commerce's policy regarding conditional review of the China-wide entity applies to this administrative review.[8] Under this policy, the China-wide entity will not be under review unless a party specifically requests, or Commerce self-initiates, a review of the entity. Because no party requested a review of the China-wide entity, the entity is not under review, and the entity's rate, *i.e.,* 167.02 percent, is not subject to change.[9] Because Zhejiang Quhua did not establish its eligibility for a separate rate in this administrative review, we preliminarily consider Zhejiang Quhua to be part of the China-wide entity.

Methodology

We are conducting this administrative review in accordance with section 751(a)(1)(B) of the Act and 19 CFR 351.213. We calculated export prices for Zhejiang Sanmei in accordance with section 772(a) of the Act. Because China is an NME within the meaning of section 771(18) of the Act, we calculated NV in accordance with section 773(c) of the Act. For a full description of the methodology underlying the preliminary results of this review, *see* the Preliminary Decision Memorandum.

Preliminary Results of Review

We preliminarily determine that the following weighted-average dumping margin exists for the period April 1, 2021, through March 31, 2022:

Exporter	Weighted-average dumping margin (percent)
Zhejiang Sanmei Chemical Ind. Co., Ltd./Jiangsu Sanmei Chemical Ind. Co., Ltd./Fujian Qingliu Dongying Chemical Ind. Co. Ltd	147.08

[1] *See 1,1,1,2-Tetrafluoroethane (R–134a) from the People's Republic of China: Antidumping Duty Order,* 82 FR 18422 (April 19, 2017) (*Order*).

[2] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 87 FR 35165 (June 9, 2022) (*Initiation Notice*).

[3] We have preliminarily determined to treat Zhejiang Sanmei, Jiangsu Sanmei Chemical Ind. Co., Ltd. (Jiangsu Sanmei), and Fujian Qingliu Dongying Chemical Ind. Co., Ltd. (Fujian Qingliu) as a single entity for purposes of this administrative review. For further discussion, *see* Memorandum, ''Decision Memorandum for the Preliminary Results of Antidumping Duty Administrative Review: 1,1,1,2-Tetrafluoroethane (R–134a) from the People's Republic of China; 2021–2022,'' dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

[4] *See* Preliminary Decision Memorandum.

[5] *See Order.*

[6] *See* Preliminary Decision Memorandum; *see also* Petitioner's Letter, ''Partial Withdrawal of Request for Administrative Review of Antidumping Duty Order,'' dated September 7, 2022.

[7] *See Non-Market Economy Antidumping Proceedings: Assessment of Antidumping Duties,* 76 FR 65694, 65694–95 (October 24, 2011) (*NME AD Assessment*).

[8] *See Antidumping Proceedings: Announcement of Change in Department Practice for Respondent Selection in Antidumping Duty Proceedings and Conditional Review of the Nonmarket Economy Entity in NME Antidumping Duty Proceedings,* 78 FR 65963 (November 4, 2013).

[9] *See Order,* 82 FR at 18423.

Disclosure and Public Comment

We intend to disclose to interested parties the calculations performed for these preliminary results in accordance with 19 CFR 351.224(b). Interested parties may submit case briefs no later than 30 days after the date of publication of these preliminary results of review.[10] Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.[11] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this review are encouraged to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities. Executive summaries should be limited to five pages total, including footnotes. Case and rebuttal briefs should be filed using ACCESS[12] and must be served on interested parties.[13] Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.[14]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, filed electronically via Commerce's electric records system, ACCESS. An electronically-filed request must be received successfully in its entirety by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice.[15] Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.[16] Parties should confirm by telephone the date and time of the hearing two days before the scheduled date.

Unless otherwise extended, we intend to issue the final results of this administrative review, which will include the results of our analysis of the issues raised in the case and rebuttal briefs, within 120 days of publication of these preliminary results in the **Federal Register**, pursuant to section 751(a)(3)(A) of the Act and 19 CFR 351.213(h).

Assessment Rates

Upon issuance of the final results, Commerce will determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review, in accordance with 19 CFR 351.212(b)(1). Commerce intends to issue assessment instructions to CBP 35 days after the publication of the final results of this review. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

If the *ad valorem* weighted-average dumping margin for the Zhejiang Sanmei, Jiangsu Sanmei, and Fujian Qingliu single entity is not zero or *de minimis* (*i.e.,* less than 0.50 percent) in the final results of this review, Commerce will calculate importer-specific assessment rates on the basis of the ratio of the total amount of dumping calculated for the importer's examined sales and the total quantity of those sales, in accordance with 19 CFR 351.212(b)(1).[17] We will instruct CBP to assess antidumping duties on all appropriate entries covered by this review when the importer-specific *ad valorem* assessment rate calculated in the final results of this review is not zero or *de minimis.*

In addition, if in the final results we continue to find no shipments of subject merchandise for TTI, any suspended entries of subject merchandise associated with TTI will be liquidated at the China-wide rate.[18]

For the companies for which the administrative review is rescinded, antidumping duties shall be assessed at a rate equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). We intend to issue appropriate assessment instructions to CBP with respect to the companies for which this administrative review is rescinded 35 days after the publication of this notice in the **Federal Register**.

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the final results of this review for all shipments of the subject merchandise from China entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) the cash deposit rate for the Zhejiang Sanmei, Jiangsu Sanmei, and Fujian Qingliu single entity will be that rate established in the final results of this review (except, if the rate is *de minimis,* then a cash deposit rate of zero will be required); (2) for a previously investigated or reviewed exporter of subject merchandise not listed in the final results of review that has a separate rate, the cash deposit rate will continue to be the exporter's existing cash deposit rate; (3) for all Chinese exporters of subject merchandise that have not been found to be entitled to a separate rate, the cash deposit rate will be the rate for the China-wide entity (*i.e.,* 167.02 percent); and (4) for all exporters of subject merchandise that are not located in China and are not eligible for a separate rate, the cash deposit rate will be the rate applicable to the Chinese exporter(s) that supplied that non-Chinese exporter. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

We are issuing and publishing the preliminary results of this review in accordance with sections 751(a)(l) and 777(i)(l) of the Act, and 19 CFR 351.213(d)(4), 19 CFR 351.213(h)(1), and 19 CFR 351.221(b)(4).

Certain Freight Rail Couplers and Parts Thereof From Mexico: Preliminary Affirmative Determination of Sales at Less Than Fair Value Preliminary Negative Determination of Critical Circumstances, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily determines that certain freight rail couplers and parts thereof (freight rail couplers) from Mexico are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation (POI) is July 1, 2021, through June 30, 2022. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable May 3, 2023.

FOR FURTHER INFORMATION CONTACT: Jonathan Hall-Eastman, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1468.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on October 25, 2022.[1] On February 10, 2023, Commerce postponed the preliminary determination of this investigation until April 26, 2023.[2]

For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.[3] A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Scope of the Investigation

The products covered by this investigation are freight rail couplers from Mexico. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,[4] the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.,* scope).[5] Certain interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice.* For a summary of the product coverage comments and rebuttal responses submitted to the record for this preliminary determination, and accompanying discussion and analysis of all comments timely received, *see* the Preliminary Scope Decision Memorandum.[6] Commerce preliminarily modified the scope language as it appeared in the *Initiation Notice. See* the revised scope in Appendix I to this notice. Commerce established a separate briefing schedule for interested parties to address the preliminary scope determination.[7]

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

[7] *Id.* at 3.

Preliminary Negative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily finds that critical circumstances do not exist for ASF–K de Mexico S. de R.L. de C.V. (ASF–K). For a full description of the methodology and results of Commerce's critical circumstances analysis, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for ASF–K, the only individually examined exporter/producer in this investigation. Because the only individually calculated dumping margin is not zero, *de minimis,* or based entirely on facts otherwise available, the estimated weighted-average dumping margin calculated for ASF–K is the margin assigned to all other producers and exporters, pursuant to section 735(c)(5)(A) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
ASF–K de Mexico S. de R.L. de C.V	47.82
All Others	47.82

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) the cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

As provided in section 782(i)(1) of the Act, Commerce intends to verify the information relied upon in making its final determination.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance no later than seven days after the date on which the last verification report is issued in this investigation. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.[8] Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On April 20, 2023, pursuant to 19 CFR 351.210(e), ASF–K requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.[9] In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) the preliminary determination is affirmative; (2) the requesting exporters accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

U.S. International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the U.S. International Trade Commission (ITC) of its preliminary determination. If the

[8] *See Temporary Rule Modifying AD/CVD Service Requirements Due to COVID–19; Extension of Effective Period,* 85 FR 41363 (July 10, 2020).

[9] *See* ASF–K and Amsted Rail Company, Inc.'s Letter, ''Amsted Request for Postponement of Final Determination,'' dated April 20, 2023.

final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: April 26, 2023.

Lisa W. Wang,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The scope of this investigation covers certain freight railcar couplers (also known as ''fits'' or ''assemblies'') and parts thereof. Freight railcar couplers are composed of two main parts, namely knuckles and coupler bodies but may also include other items (*e.g.,* coupler locks, lock lift assemblies, knuckle pins, knuckle throwers, and rotors). The parts of couplers that are covered by the investigation include: (1) E coupler bodies, (2) E/F coupler bodies, (3) F coupler bodies, (4) E knuckles, and (5) F knuckles, as set forth by the Association of American Railroads (AAR). The freight rail coupler parts (*i.e.,* knuckles and coupler bodies) are included within the scope of the investigation when imported separately. Coupler locks, lock lift assemblies, knuckle pins, knuckle throwers, and rotors are covered merchandise when imported in an assembly but are not covered by the scope when imported separately.

Subject freight railcar couplers and parts are included within the scope whether finished or unfinished, whether imported individually or with other subject or nonsubject parts, whether assembled or unassembled, whether mounted or unmounted, or if joined with nonsubject merchandise, such as other nonsubject parts or a completed railcar. Finishing includes, but is not limited to, arc washing, welding, grinding, shot blasting, heat treatment, machining, and assembly of various parts. When a subject coupler or subject parts are mounted on or to other nonsubject merchandise, such as a railcar, only the coupler or subject parts are covered by the scope.

The finished products covered by the scope of this investigation meet or exceed the AAR specifications of M–211, ''Foundry and Product Approval Requirements for the Manufacture of Couplers, Coupler Yokes, Knuckles, Follower Blocks, and Coupler Parts'' and/or AAR M–215 ''Coupling Systems,'' or other equivalent domestic or international standards (including any revisions to the standard(s)).

The country of origin for subject couplers and parts thereof, whether fully assembled, unfinished or finished, or attached to a railcar, is the country where the subject coupler parts were cast or forged. Subject merchandise includes coupler parts as defined above that have been further processed or further assembled, including those coupler parts attached to a railcar in third countries. Further processing includes, but is not limited to, arc washing, welding, grinding, shot blasting, heat treatment, painting, coating, priming, machining, and assembly of various parts. The inclusion, attachment, joining, or assembly of nonsubject parts with subject parts or couplers either in the country of manufacture of the in-scope product or in a third country does not remove the subject parts or couplers from the scope.

The couplers that are the subject of this investigation are currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) statistical reporting number 8607.30.1000. Unfinished subject merchandise may also enter under HTSUS statistical reporting number 7326.90.8688. Subject merchandise attached to finished railcars may also enter under HTSUS statistical reporting numbers 8606.10.0000, 8606.30.0000, 8606.91.0000, 8606.92.0000, 8606.99.0130, 8606.99.0160, or under subheading 9803.00.50. Subject merchandise may also be imported under HTSUS statistical reporting number 7325.99.5000. These HTSUS subheadings are provided for convenience and customs purposes only; the written description of the scope of this investigation is dispositive.

[A–583–867]

Common Alloy Aluminum Sheet From Taiwan: Rescission of Antidumping Duty Administrative Review; 2020–2022

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty order on common alloy aluminum sheet (CAAS) from Taiwan, covering the period of review (POR) October 15, 2020, through March 31, 2022.

DATES: Applicable May 3, 2023.

FOR FURTHER INFORMATION CONTACT: Mark Hoadley, AD/CVD Operations, Office VII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3148.

SUPPLEMENTARY INFORMATION:

Background

On April 1, 2022, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on CAAS from Taiwan, covering the POR.[1] On May 2, 2022, C.S. Aluminium Corporation (CSAC) timely requested that Commerce conduct an administrative review of CSAC.[2] On May 2, 2022, the petitioners [3] also requested that Commerce conduct an administrative review of CSAC.[4] On July 14, 2022, Commerce published in the **Federal Register** a notice of initiation of an administrative review with respect to CSAC in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).[5]

On February 17, 2023, Commerce issued a memorandum stating its intent to rescind the administrative review of the antidumping duty order on CAAS

[1] *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request* Administrative Review and Join Annual Inquiry Service List, 87 FR 19075 (April 1, 2022).

[2] *See* CSAC's Letter, ''Request for Administrative Review,'' dated May 2, 2022.

[3] The petitioners are the: Aluminum Association Common Alloy Aluminum Sheet Trade Enforcement Working group and its individual members, Arconic Corporation; Commonwealth Rolled Products Inc.; Constellium Rolled Products Ravenswood, LLC; JW Aluminum Company; Novelis Corporation; and Texarkana Aluminum Inc. (collectively, the petitioners).

[4] *See* Petitioners' Letter, ''Petitioners' Request for Initiation of First Administrative Review,'' dated May 2, 2022.

[5] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 87 FR 42144 (July 14, 2022) (*Initiation Notice*).

from Taiwan.[6] For a history of events that have occurred since the issuance of the Intent to Rescind Review, *see* the Issues and Decision Memorandum.[7]

Scope of the Order

The products covered by the order are CAAS. For a complete description of the scope of the order, *see* the Issues and Decision Memorandum.

Analysis of Comments Received

Commerce addressed the issue raised in the case and rebuttal briefs in the Issues and Decision Memorandum. This issue is identified in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Rescission of Review

Pursuant to 19 CFR 351.213(d)(3), it is Commerce's practice to rescind an administrative review of an antidumping duty order where it concludes there were no suspended entries of subject merchandise during the POR for an exporter or producer. Normally, upon completion of an administrative review, the suspended entries are liquidated at the antidumping duty assessment rate(s) based on the final results for the review period. Therefore, for an administrative review to be conducted, there must be a suspended entry that Commerce can instruct U.S. Customs and Border Protection to liquidate at the calculated antidumping duty assessment rate for the review period. As explained in detail in the Issues and Decision Memorandum, there were no suspended entries of subject merchandise from CSAC during the POR. Accordingly, in the absence of suspended entries of subject merchandise during the POR, we are rescinding this administrative review in accordance with 19 CFR 351.213(d)(3).

[6] *See* Memorandum, ''Intent to Rescind Review,'' dated February 17, 2023 (Intent to Rescind Review).

[7] *See* Memorandum, ''Issues and Decision Memorandum for the Rescission of the Antidumping Duty Administrative Review: Common Alloy Aluminum Sheet from Taiwan; 2020–2022,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

Cash Deposit Requirements

As Commerce is rescinding this administrative review, cash deposit rates will not change. Accordingly, the current cash deposit requirements shall remain in effect until further notice.

Administrative Protective Order

This notice also serves as a reminder to parties subject to an administrative protective order (APO) of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

Notification to Interested Parties

This notice is published in accordance with section 751 of the Act and 19 CFR 351.213(d)(4).

Dated: April 26, 2023.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

National Oceanic and Atmospheric Administration

[RTID 0648–XC981]

Western Pacific Fishery Management Council (Council); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting.

SUMMARY: The Western Pacific Stock Assessment Review (WPSAR) Steering Committee will convene a public meeting to discuss and approve the 5-year calendar for stock assessments, and to address any other concerns related to the WPSAR process.

DATES: The Steering Committee will meet from 1 p.m. to 3 p.m. on May 15, 2023.

ADDRESSES: The meetings will be held by web conference. Specific information on joining the meeting, connecting to the web conference and providing oral public comments will be posted on the Council website at *www.wpcouncil.org.* For assistance with the web conference connection, contact the Council office at (808) 522–8220.

FOR FURTHER INFORMATION CONTACT: Kitty Simonds; telephone: (808) 522–8220, or email: *kitty.simonds@noaa.gov.*

SUPPLEMENTARY INFORMATION: The WPSAR Steering Committee consists of the Council's Executive Director, the Acting Science Director of the NMFS Pacific Islands Fisheries Science Center, and the Acting Regional Administrator of the NMFS Pacific Islands Regional Office. You may read more about WPSAR at *https://www.pifsc.noaa.gov/peer_reviews/wpsar/index.php.*

The public will have an opportunity to comment during the meeting. The agenda order may change. The meeting will run as late as necessary to complete scheduled business.

Agenda for the WPSAR Steering Committee

- Introductions
- Stock assessments
- Discuss and update stock assessment review schedule
- Discuss and update review levels for stock assessments
- Discuss and nominate additional science products for review by the Center for Independent Experts, if necessary
- Discuss review and potential updates to the WPSAR policy
- Funding of WPSAR when conducted in the Territories
- Other business
- Public comment

Special Accommodations

The meeting is accessible to people with disabilities. Make direct requests for sign language interpretation or other auxiliary aids to Mark Fitchett, (808) 522–8141, or *mark.d.fitchett@noaa.gov,* at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Abstract of Patent Application(s)

The present invention discloses cured composites having improved surfaces and processes of making and methods of using same. Such processes use ultra-short pulse lasers, for example, a femto-second laser to ablate material without the detrimental heat affected zones of other laser processes. Such process can not only increases surface roughness and clean contaminates, but can also selectively remove the matrix material and expose the surface fibers of cured composites. The treated cured composites have improved thermal and electrical pathways that can dissipate unwanted heat and electricity when two or more prepregs and/or cured composites are bonded or cured to form a single article.

Intellectual Property

DATES: Closed to the public Wednesday, May 3, 2023 from 8 a.m. to 4 p.m.

ADDRESSES: The address of the closed meeting is conference room 3A912A at the Pentagon, Washington, DC 20301.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin Doxey, Designated Federal Officer (DFO), (703) 571–0081 (Voice), (703) 697–1860 (Facsimile), *kevin.a.doxey.civ@mail.mil* (Email). Mailing address is Defense Science Board, 3140 Defense Pentagon, Room 3B888A, Washington, DC 20301–3140. Website: *http://www.acq.osd.mil/dsb/.* The most up-to-date changes to the meeting agenda can be found on the website.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of chapter 10 of title 5, United States Code (U.S.C.) (commonly known as the ''Federal Advisory Committee Act (FACA)''); 5 U.S.C. 552b(c) (commonly known as the ''Government in the Sunshine Act''); and sections 102–3.140 and 102–3.150 of title 41, Code of Federal Regulations (CFR).

Due to circumstances beyond the control of the Designated Federal Officer, the Defense Science Board was unable to provide public notification required by 41 CFR 102–3.150(a) concerning its May 3, 2023 meeting. Accordingly, the Advisory Committee Management Officer for the Department of Defense, pursuant to 41 CFR 102–3.150(b), waives the 15-calendar day notification requirement.

Purpose of the Meeting: The mission of the DSB is to provide independent advice and recommendations on matters relating to the DoD's scientific and technical enterprise. The objective of the meeting is to obtain, review, and evaluate classified information related to the DSB's mission. DSB membership will meet with DoD Leadership to discuss classified current and future national security challenges and priorities within the DoD.

Agenda: The meeting will begin on May 3, 2023 at 8 a.m. with opening remarks from Mr. Kevin Doxey, the Designated Federal Officer, and Dr. Eric Evans, DSB Chair. The first briefing will be from Brigadier General Jason T. Hinds, Director of Plans, Programs, and Analyses, U.S. Air Forces in Europe-Air Forces Africa, who will provide classified remarks on current events in Europe. Following break, Vice Admiral Jon Hill, Director, Missile Defense Agency (MDA), will provide classified remarks on MDA's priorities. Following break, the Board will deliberate and vote on the DSB Quick Task Force on National Security Innovation Activities' findings and recommendations. Following break, the Honorable Carlos Del Toro, Secretary of the Navy, will provide classified remarks on the Navy's technical challenges and priorities. Next, the Honorable Susanna V. Blume, Director, Cost Assessment and Program Evaluation (CAPE), will provide classified remarks on CAPE's challenges and priorities. Finally, Dr. Kathleen Hicks, accompanied by Dr. Craig Martell, Chief Digital and Artificial Intelligence Officer, and Ms. Heidi Shyu, Under Secretary of Defense for Research and Engineering, will provide classified remarks on the DoD's technical challenges and priorities. The meeting will adjourn at 4 p.m.

Meeting Accessibility: In accordance with 5 U.S.C. 1009(d) and 41 CFR 102–3.155, the DoD has determined that the DSB meeting will be closed to the public. Specifically, the Under Secretary of Defense for Research and Engineering, in consultation with the DoD Office of the General Counsel, has determined in writing that the meeting will be closed to the public because it will consider matters covered by 5 U.S.C. 552b(c)(1). The determination is based on the consideration that it is expected that discussions throughout will involve classified matters of national security concern. Such classified material is so intertwined with the unclassified material that it cannot reasonably be segregated into separate discussions without defeating the effectiveness and meaning of the overall meetings. To permit the meeting to be open to the public would preclude discussion of such matters and would greatly diminish the ultimate utility of the DSB's findings and recommendations to the Secretary of Defense and to the Under Secretary of Defense for Research and Engineering.

Written Statements: In accordance with 5 U.S.C. 1009(a)(3) and 41 CFR 102–3.105(j) and 102–3.140, interested

persons may submit a written statement for consideration by the DSB at any time regarding its mission or in response to the stated agenda of a planned meeting. Individuals submitting a written statement must submit their statement to the DSB DFO at the email address provided in the **FOR FURTHER INFORMATION CONTACT** section at any point; however, if a written statement is not received at least three calendar days prior to the meeting, which is the subject of this notice, then it may not be provided to or considered by the DSB until a later date.

Dated: April 28, 2023.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2023–09417 Filed 5–2–23; 8:45 am]

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

Applications for New Awards; Mental Health Personnel Technical Assistance Center

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for fiscal year (FY) 2023 for the Mental Health Personnel Technical Assistance Center (MHP TA Center), Assistance Listing Number 84.184U. This notice relates to the approved information collection under OMB control number 1894–0006.

DATES:

Applications Available: May 3, 2023.

Deadline for Notice of Intent to Apply: June 2, 2023.

Deadline for Transmittal of Applications: July 3, 2023.

Deadline for Intergovernmental Review: August 31, 2023.

Pre-Application Webinar Information: The Department will hold a preapplication presentation via webinar for prospective applicants on May 23, 2023, at 1:30 p.m. Eastern time. To register, please visit the program website at: *https://oese.ed.gov/offices/office-of-formula-grants/safe-supportive-schools/.*

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *https://www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs.* Please note that these Common Instructions supersede the version published on December 27, 2021.

FOR FURTHER INFORMATION CONTACT: Carlette Kyser Pegram, U.S. Department of Education, 400 Maryland Avenue SW, Room 3E257, Washington, DC 20202. Telephone: 202–453–6732. Email: *OESE.OSSS@ed.gov.*

If you are deaf, hard of hearing, or have a speech disability and wish to access telecommunications relay services, please dial 7–1–1.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the MHP TA Center is to provide technical assistance to current Department grantees awarded funds under the fiscal years 2022 and 2023 Mental Health Service Professional Demonstration (MHSP) and the School-Based Mental Health Services (SBMH) grant programs and to disseminate resources and information to support State educational agencies (SEAs), local educational agencies (LEAs), institutions of higher education (IHEs), and other stakeholders, more broadly, in the preparation of school-based mental health services providers.

Background: The Department awarded nearly 300 MHSP and SBMH grants with historic funding provided under the Bipartisan Safer Communities Act (BSCA) and the Fiscal Year 2022 Omnibus Appropriations to address the critical need in prekindergarten (PK)–12 schools for school-based mental health services providers, a need exacerbated by the COVID–19 pandemic. Findings from the Department's Institute of Education Sciences April 2022 School Pulse Panel reinforce the challenges schools face in addressing student mental health needs. Specifically, 70 percent of public schools reported that the percentage of students who have sought mental health services increased since the start of the COVID–19 pandemic, and 29 percent of public schools reported that the percentage of staff who have sought mental health services increased since the start of the COVID–19 pandemic (U.S. Department of Education, Institute of Education Sciences, National Center for Education Statistics, School Pulse Panel (April 12–25, 2022)).

To help address the need for additional school-based mental health services providers, the MHSP program provides competitive grants to support and demonstrate innovative partnerships among SEAs, LEAs, and consortia of LEAs and IHEs to train school-based mental health services providers for employment in schools and LEAs, with the goal of increasing the number and diversity of high-quality, trained providers available to address the shortages of school-based mental health services providers in high-need LEAs. The SBMH program provides competitive grants to SEAs, LEAs, and consortia of LEAs to increase the number of credentialed school-based mental health services providers providing mental health services to students in LEAs with demonstrated need. Collectively, both programs aim to significantly increase the ability of schools to address the mental health needs of students and staff and help ensure safer, healthier, more inclusive, and positive school environments.

The MHP TA Center will support MHSP and SBMH grantees in meeting the goals and objectives of their respective grants. The Center will also identify, develop, and disseminate resources to enhance the efforts of IHEs, SEAs, LEAs, and schools to address the social, emotional, and mental health needs of PK–12 students and staff.

Priority: This competition has one absolute priority. We are establishing this priority for the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition, in accordance with section 437(d)(1) of the General Education Provisions Act (GEPA), 20 U.S.C. 1232(d)(1).

Absolute Priority: For FY 2023 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

A project to—

(1) Provide technical assistance to fiscal years 2022 and 2023 MHSP and SBMH grantees (grantees) through a tiered approach that includes universal support to all grantees, targeted support on select topics for subsets of grantees, and intensive support for individual grantees, as directed by the Office of Elementary and Secondary Education;

(2) Support high-quality grantee data through—

(a) Developing a system for collecting, reviewing, and analyzing specific performance data (*e.g.,* common annual performance measures across the MHSP and SBMH grant programs);

(b) Assisting MHSP and SBMH grantees in submitting valid and reliable data in the annual and final performance reports; and

(c) Conducting a review and analysis of the annual and final performance reports, aggregating the data, and preparing a report for the Department describing successes, challenges, exemplars, and noteworthy trends; and

(3) Disseminate best practices in credentialing, recruiting, training and developing, and retaining school-based mental health services providers, including best practices on establishing and sustaining partnerships with IHEs to create and provide innovative high-quality training and credentialing options and maintain a robust pipeline of school-based mental health services providers.

Requirements: We are establishing the following program requirements and application requirements for the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition, in accordance with GEPA.

Program Requirements: The project must—

(a) Include at least one partnership with a Historically Black College and University (HBCU), Tribal College and University (TCU), or other Minority Serving Institution (MSI) in order to address a key focus of the MHSP and SBMH programs, specifically ensuring a pipeline of school-based mental health services providers from diverse backgrounds or from the communities that they serve;

(b) Develop and maintain a 508-compliant website to assist the MHP TA Center to (1) disseminate best practices in credentialing, recruiting, training and developing, and retaining school-based mental health services providers, including mental health service providers from diverse backgrounds or from the communities that they serve; and (2) disseminate free, online open educational resources (OER) that can be used to (i) meet ongoing training and professional development requirements for school-based mental health services providers and other school staff and (ii) provide training alternatives, such as micro-credentials, professional development certificates, and online courses, for new students pursuing a credential to provide mental health services in schools that States may choose to incorporate as part of their credentialing process, including OERs that address school climate (*e.g.,* ensuring inclusive environments for all students; ensuring school and school-related activities where students are free from bullying and harassment; and promoting strong relationships among students, teachers, families, and schools);

(c) Provide technical assistance (such as webinars or virtual meetings) for preparing, collecting, and submitting valid and reliable data to be included in annual and final performance reports; annually review and analyze annual and final reports; and annually prepare a report for the Department aggregating the data from annual and final performance reports and describing successes, challenges, exemplars, and noteworthy trends;

(d) Disseminate information (*e.g.,* instructional videos, toolkits, and briefs), best practices, and evidence-based practices to a variety of education stakeholders, including IHE and SEA and LEA personnel, via multiple mechanisms such as the MHP TA Center website, social media, and other channels, as appropriate, regarding how these entities can work together to increase the number and diversity of school-based mental health services providers and ensure continuity of mental health services as students progress through PK–12 schooling and postsecondary education;

(e) Annually provide forums (such as communities of practice) for grantees to share resources and experiences related to specific areas of MHSP and SBMH grant implementation. Specific areas should include creating culturally and linguistically inclusive and identity-safe environments for all students and other areas to be identified based on input from grantees, the Department, and other stakeholders, obtained through focus groups, for example; and

(f) Develop, identify, and disseminate information regarding evaluation of the implementation and impact of MHSP and SBMH grants, including providing webinars or other convenings focused specifically on conducting such evaluations and using ongoing data yielded from such evaluations to engage in continuous improvement of grant programs.

Application Requirements: In the application, an applicant must—

(a) Explain how the applicant's program design will create high-quality technical assistance for MHSP and SBMH grantees, including by providing a logic model that articulates a tiered approach to providing support to MHSP and SBMH grantees, a cycle of continuous improvement, and a process for program adjustments based on ongoing and emergent grantee needs;

(b) Demonstrate expert knowledge in credentialing, recruiting, training, developing, and retaining school-based mental health services providers;

(c) Demonstrate expert knowledge in—

(1) The statutory and regulatory requirements related to the MHSP and SBMH grant programs;

(2) Best practices in supporting school-based mental health services providers along the continuum from credentialing to retention in high-need schools; and

(3) Evidence-based approaches to supporting student and staff social, emotional, and mental health and well-being;

(d) Describe their experience in providing training, information, and support to IHEs, SEAs, LEAs, schools, and other organizations on evidence-based strategies to support pre- and in-service training that enhance the skills and knowledge of school-based mental health services providers and contribute to creating and maintaining supportive, positive, identity-safe, and inclusive school climates;

(e) Describe their experience providing training and resources to IHEs, LEAs, schools, and school-based mental health services providers regarding evidence-based practices, to ensure access to services for student groups not limited to but including students with disabilities, students experiencing homelessness, LGBTQ+ students, and English learners; and

(f) Describe their expertise in approaches to supporting valid and reliable data, conducting data quality reviews, collecting and analyzing data, and evaluating the effectiveness of programs intended to support student social, emotional, and mental health and well-being.

Definitions: For FY 2023 and any subsequent year in which we make awards from the list of unfunded applications from this competition, the following definitions apply. The definitions of ''demonstrates a rationale,'' ''evidence-based,'' ''experimental study,'' ''logic model'' ''moderate evidence,'' ''project component,'' ''promising evidence,'' ''quasi-experimental design study,'' ''relevant outcome,'' ''strong evidence,'' and ''What Works Clearinghouse Handbooks'' are from 34 CFR 77.1(c). The definitions of ''local educational agency'' and ''State educational agency'' are from section 8101 of the Elementary and Secondary Education Act of 1965, as amended (ESEA). The definition of ''school-based mental health services provider'' is from section 4102(6) of the ESEA.

Demonstrates a rationale means a key project component included in the

project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

Evidence-based means the proposed project component is supported by one or more of strong evidence, moderate evidence, promising evidence, or evidence that demonstrates a rationale.

Experimental study means a study that is designed to compare outcomes between two groups of individuals (such as students) that are otherwise equivalent except for their assignment to either a treatment group receiving a project component or a control group that does not. Randomized controlled trials, regression discontinuity design studies, and single-case design studies are the specific types of experimental studies that, depending on their design and implementation (*e.g.,* sample attrition in randomized controlled trials and regression discontinuity design studies), can meet What Works Clearinghouse (WWC) standards without reservations as described in the WWC Handbooks:

(i) A randomized controlled trial employs random assignment of, for example, students, teachers, classrooms, or schools to receive the project component being evaluated (the treatment group) or not to receive the project component (the control group).

(ii) A regression discontinuity design study assigns the project component being evaluated using a measured variable (*e.g.,* assigning students reading below a cutoff score to tutoring or developmental education classes) and controls for that variable in the analysis of outcomes.

(iii) A single-case design study uses observations of a single case (*e.g.,* a student eligible for a behavioral intervention) over time in the absence and presence of a controlled treatment manipulation to determine whether the outcome is systematically related to the treatment.

Local educational agency (LEA) means:

(a) In General. A public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary schools or secondary schools in a city, county, township, school district, or other political subdivision of a State, or of or for a combination of school districts or counties that is recognized in a State as an administrative agency for its public elementary schools or secondary schools.

(b) Administrative Control and Direction. The term includes any other public institution or agency having administrative control and direction of a public elementary school or secondary school.

(c) Bureau of Indian Education Schools. The term includes an elementary school or secondary school funded by the Bureau of Indian Education but only to the extent that including the school makes the school eligible for programs for which specific eligibility is not provided to the school in another provision of law and the school does not have a student population that is smaller than the student population of the LEA receiving assistance under the ESEA with the smallest student population, except that the school shall not be subject to the jurisdiction of any SEA (as defined in this notice) other than the Bureau of Indian Education.

(d) Educational Service Agencies. The term includes educational service agencies and consortia of those agencies.

(e) State Educational Agency. The term includes the SEA in a State in which the SEA is the sole educational agency for all public schools.

Logic model (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Moderate evidence means that there is evidence of effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations or settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''strong evidence base'' or ''moderate evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''positive effect'' or ''potentially positive effect'' on a relevant outcome based on a ''medium to large'' extent of evidence, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study or quasi-experimental design study reviewed and reported by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks, or otherwise assessed by the Department using version 4.1 of the WWC Handbooks, as appropriate, and that—

(A) Meets WWC standards with or without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks; and

(D) Is based on a sample from more than one site (*e.g.,* State, county, city, school district, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet requirements in paragraphs (iii)(A), (B), and (C) of this definition may together satisfy the requirement in this paragraph (iii)(D).

Project component means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers).

Promising evidence means that there is evidence of the effectiveness of a key project component in improving a relevant outcome, based on a relevant finding from one of the following:

(i) A practice guide prepared by WWC reporting a ''strong evidence base'' or ''moderate evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC reporting a ''positive effect'' or ''potentially positive effect'' on a relevant outcome with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single study assessed by the Department, as appropriate, that—

(A) Is an experimental study, a quasi-experimental design study, or a well-designed and well-implemented correlational study with statistical controls for selection bias (*e.g.,* a study using regression methods to account for differences between a treatment group and a comparison group); and

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome.

Quasi-experimental design study means a study using a design that attempts to approximate an experimental study by identifying a

comparison group that is similar to the treatment group in important respects. This type of study, depending on design and implementation (*e.g.,* establishment of baseline equivalence of the groups being compared), can meet WWC standards with reservations, but cannot meet WWC standards without reservations, as described in the WWC Handbooks.

Relevant outcome means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

School-based mental health services provider means a State-licensed or State-certified school counselor, school psychologist, school social worker, or other State-licensed or certified mental health professional qualified under State law to provide mental health services to children and adolescents.

State educational agency means the agency primarily responsible for the State supervision of public elementary schools and secondary schools.

Strong evidence means that there is evidence of the effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations and settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''strong evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks reporting a ''positive effect'' on a relevant outcome based on a ''medium to large'' extent of evidence, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study reviewed and reported by the WWC using version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks, or otherwise assessed by the Department using version 4.1 of the WWC Handbooks, as appropriate, and that—

(A) Meets WWC standards without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1, 3.0, 4.0, or 4.1 of the WWC Handbooks; and

(D) Is based on a sample from more than one site (*e.g.,* State, county, city, school district, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet requirements in paragraphs (iii)(A), (B), and (C) of this definition may together satisfy the requirement in this paragraph (iii)(D).

What Works Clearinghouse (WWC) Handbooks (WWC Handbooks) means the standards and procedures set forth in the WWC Standards Handbook, Versions 4.0 or 4.1, and WWC Procedures Handbook, Versions 4.0 or 4.1, or in the WWC Procedures and Standards Handbook, Version 3.0 or Version 2.1 (all incorporated by reference, see § 77.2). Study findings eligible for review under WWC standards can meet WWC standards without reservations, meet WWC standards with reservations, or not meet WWC standards. WWC practice guides and intervention reports include findings from systematic reviews of evidence as described in the WWC Handbooks documentation.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (5 U.S.C. 553), the Department generally offers interested parties the opportunity to comment on proposed priorities, requirements, definitions, and selection criteria. Section 437(d)(1) of GEPA, however, allows the Secretary to exempt from rulemaking requirements regulations governing the first grant competition under a new or substantially revised program authority. This is the first grant competition for this program under section 4631(a)(1)(B) of the ESEA, and therefore qualifies for this exemption. In order to ensure timely grant awards, the Secretary has decided to forgo public comment on the priorities and requirements under section 437(d)(1) of GEPA. These priorities and requirements will apply to the FY 2023 grant competition and any subsequent year in which we make awards from the list of unfunded applications from this competition.

Program Authority: Section 4631(a)(1)(B) of the ESEA (20 U.S.C. 7281).

Note: Projects will be awarded and must be operated in a manner consistent with the nondiscrimination requirements contained in Federal civil rights laws.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education only.

II. Award Information

Type of Award: Discretionary grant/cooperative agreement.

Estimated Available Funds: $2,600,000 annually for 48 months, provided that the grantee and the Department may agree to extend an additional 12 months for up to $1,300,000.

Maximum Award: We will not make an award exceeding $2,600,000 for a single budget period of 12 months.

Estimated Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 48 months, provided that the grantee and the Department may agree to extend an additional 12 months for a total of 60 months.

III. Eligibility Information

1. *Eligible Applicants:* Research organizations, institutions, agencies, institutions of higher education, private nonprofit organizations, and for-profit organizations, or partnerships among such entities, in each case with the demonstrated ability or capacity to carry out the activities described.

2. a. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

b. *Indirect Cost Rate Information:* This program uses an unrestricted indirect cost rate. For more information regarding indirect costs, or to obtain a negotiated indirect cost rate, please see *www2.ed.gov/about/offices/list/ocfo/intro.html.*

c. *Administrative Cost Limitation:* This program does not include any program-specific limitation on administrative expenses. All administrative expenses must be reasonable and necessary and conform to Cost Principles described in 2 CFR part 200 subpart E of the Uniform Guidance.

3. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on December 7, 2022 (87 FR 75045), and available at *https://www.federalregister.gov/documents/2022/12/07/2022-26554/common-instructions-for-applicants-to-department-of-education-discretionary-grant-programs,* which contain requirements and information on how to submit an application. Please note that these Common Instructions supersede the version published on December 27, 2021.

2. *Submission of Proprietary Information:* Given the types of projects that may be proposed in applications for the MHP TA Center program, your application may include business information that you consider proprietary. In 34 CFR 5.11, we define ''business information'' and describe the process we use in determining whether any of that information is proprietary and, thus, protected from disclosure under Exemption 4 of the Freedom of Information Act (5 U.S.C. 552,as amended).

Because we plan to make successful applications available to the public, you may wish to request confidentiality of business information.

Consistent with Executive Order 12600, please designate in your application any information that you believe is exempt from disclosure under Exemption 4. In the appropriate appendix section of your application, under ''Other Attachments Form,'' please list the page number or numbers on which we can find this information. For additional information please see 34 CFR 5.11(c).

3. *Intergovernmental Review:* This program is subject to Executive Order 12372 and the regulations in 34 CFR part 79. Information about Intergovernmental Review of Federal Programs under Executive Order 12372 is in the application package for this competition.

4. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

5. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 30 pages and (2) use the following standards:

- A ''page'' is 8.5'' x 11'', on one side only, with 1'' margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the application narrative.
- Use a font that is either 12 point or larger or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet; the budget section, including the narrative budget justification; the assurances and certifications; or the one-page abstract, the resumes, the bibliography, or the letters of support. However, the recommended page limit does apply to all of the application narrative.

6. *Notice of Intent to Apply:* The Department will be able to review grant applications more efficiently if we know the approximate number of applicants that intend to apply. Therefore, we strongly encourage each potential applicant to notify us of their intent to submit an application. To do so, please email the program contact person listed under **FOR FURTHER INFORMATION CONTACT** with the subject line ''Intent to Apply,'' and include the applicant's name and a contact person's name and email address. Applicants that do not submit a notice of intent to apply may still apply for funding; applicants that do submit a notice of intent to apply are not bound to apply or bound by the information provided.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210. The maximum score for all of the selection criteria is 100 points. The maximum score for each criterion is included in parentheses following the title of the specific selection criterion. Each criterion also includes the factors that reviewers will consider in determining the extent to which an applicant meets the criterion.

The selection criteria are as follows:

(a) *Quality of the project design* (up to 25 points).

The Secretary considers the quality of the design of the proposed project. In determining the quality of the design of the proposed project, the Secretary considers the following factors:

(1) The extent to which the design of the proposed project is appropriate to, and will successfully address, the needs of the target population or other identified needs. (up to 8 points)

(2) The extent to which the proposed project demonstrates a rationale (as defined in this notice). (up to 8 points)

(3) The extent to which performance feedback and continuous improvement are integral to the design of the proposed project. (up to 9 points)

(b) *Quality of project services* (up to 30 points).

The Secretary considers the quality of the project services. In determining the quality of the project services of the proposed project, the Secretary considers the following factors:

(1) The extent to which the services to be provided by the proposed project are appropriate to the needs of the intended recipients or beneficiaries of those services. (up to 15 points)

(2) The quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability. (up to 5 points)

(3) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services. (up to 10 points)

(c) *Quality of project personnel* (up to 20 points).

The Secretary considers the quality of the personnel who will carry out the proposed project.

(1) In determining the quality of project personnel, the Secretary considers the extent to which the applicant encourages applications for employment from persons who are members of groups that have been traditionally underrepresented based on race, color, national origin, gender, age, or disability. (up to 10 points)

(2) In addition, the Secretary considers the qualifications, including relevant training and experience, of key project personnel. (up to 10 points)

(d) *Quality of the management plan* (up to 20 points).

The Secretary considers the quality of the management plan for the proposed project. In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(1) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks. (up to 5 points)

(2) The adequacy of procedures for ensuring feedback and continuous

improvement in the operation of the proposed project. (up to 5 points)

(3) The adequacy of mechanisms for ensuring high-quality products and services from the proposed project. (up to 5 points)

(4) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project. (up to 5 points)

(e) *Quality of the project evaluation* (up to 5 points).

The Secretary considers the quality of the evaluation to be conducted of the proposed project. In determining the quality of the evaluation, the Secretary considers the following factors:

(1) The extent to which the methods of evaluation will provide valid and reliable performance data on relevant outcomes. (up to 2 points)

(2) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible. (up to 3 points)

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.206, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 200.208, the Secretary may impose specific conditions and, under 2 CFR 3474.10, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.206(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General.* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with—

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(d) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure

information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

(c) Under 34 CFR 75.250(b), the Secretary may provide a grantee with additional funding for data collection analysis and reporting. In this case the Secretary establishes a data collection period.

5. *Performance Measures:* For the purposes of Department reporting under 34 CFR 75.110, we have established three performance measures for the MHP TA Center program: (1) The percentage of grantees reporting valid and reliable data on their progress as evidenced in annual performance reports; (2) The percentage of MHSP and SBMH grantees who report improvements and progress toward grant goals and objectives as evidenced in annual performance reports; and (3) The extent to which MHSP and SBMH grantees are satisfied with the quality, usefulness, and relevance of technical assistance provided as evidenced by surveys.

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and, if the Secretary has established performance measurement requirements, whether the grantee has made substantial progress in achieving the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register,** in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

James F. Lane,

Principal Deputy Assistant Secretary, Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary, Office of Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

Accrediting Agencies Currently Undergoing Review for the Purpose of Recognition by the U.S. Secretary of Education

AGENCY: Accreditation Group, Office of Postsecondary Education, U.S. Department of Education.

ACTION: Call for written third-party comments.

SUMMARY: This notice provides information to members of the public on submitting written comments for accrediting agencies currently undergoing review for the purpose of recognition by the U.S. Secretary of Education.

FOR FURTHER INFORMATION CONTACT: Herman Bounds, Director, Accreditation Group, Office of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue SW, fifth floor, Washington, DC 20202, telephone: (202) 453–7615, or email: *herman.bounds@ed.gov.*

SUPPLEMENTARY INFORMATION: This request for written third-party comments concerning the performance of accrediting agencies under review by the Secretary of Education is required by 496(n)(1)(A) of the Higher Education Act (HEA) of 1965, as amended, and pertains to the summer 2024 meeting of the National Advisory Committee on Institutional Quality and Integrity (NACIQI). The meeting date and location have not been determined but will be announced in a later **Federal Register** notice. In addition, a later **Federal Register** notice will describe how to register to provide oral comments at the meeting. Note: Written comments about the specific agencies identified below will not be accepted or provided to NACIQI members if those comments are submitted after the deadline provided in this **Federal Register** notice, which is June 5, 2023. Written comments must be submitted to the mailbox identified below. Do not submit written comments directly to Department officials or to NACIQI members.

Agencies Under Review and Evaluation: The Department requests written comments from the public on the following accrediting agencies, which are currently undergoing review and evaluation by the Accreditation Group, and which will be reviewed at the summer 2024 NACIQI meeting.

The agencies are listed by the type of application each agency has submitted. Please note, each agency's current scope of recognition is indicated below. If any agency requested to expand its scope of recognition, identified are both the current scope of recognition and the requested scope of recognition.

Applications for Renewal of Recognition

1. WASC Accrediting Commission for Community and Junior Colleges. Scope of Recognition: The accreditation and pre-accreditation (''Candidate for Accreditation'') of community and other colleges which have as a primary mission the granting of associate degrees, but which may also award certificates and other credentials, not to exceed the bachelor degree level, where the provision of such credentials is within the institution's mission and, if applicable, is authorized by their governmental authorities, and the accreditation of such programs offered via distance education and correspondence education at these colleges. This recognition also extends to the Committee on Substantive Change of the Commission, for decisions on substantive changes, and the Appeals Panel. Geographic Area of Accrediting Activities: Throughout the United States.

2. American Veterinary Medical Association, Council on Education. Scope of Recognition: The accreditation and preaccreditation (''Provisional Accreditation'') in the United States of

programs leading to professional degrees (D.V.M. or V.M.D.) in veterinary medicine. Geographic Area of Accrediting Activities: Throughout the United States.

3. Accrediting Council for Continuing Education and Training. Scope of Recognition: The accreditation throughout the United States of institutions of higher education that offer continuing education and vocational programs that confer certificates or occupational associate degrees, including those programs offered via distance education. Geographic Area of Accrediting Activities: Throughout the United States.

4. Council on Education for Public Health. Scope of Recognition: The accreditation of schools of public health and public health programs outside schools of public health, at the baccalaureate and graduate degree levels, including those offered via distance education. Geographic Area of Accrediting Activities: Throughout the United States.

5. National Association of Schools of Dance, Commission on Accreditation. Scope of Recognition: The accreditation throughout the United States of freestanding institutions that offer dance and dance-related programs (both degree and non-degree-granting), including those offered via distance education. Geographic Area of Accrediting Activities: Throughout the United States.

6. National Association of Schools of Music, Commission on Accreditation. Scope of Recognition: The accreditation throughout the United States of freestanding institutions that offer music and music related programs (both degree and non-degree-granting) including those offered via distance. This recognition also extends to the Commission on Community College Accreditation. Geographic Area of Accrediting Activities: Throughout the United States.

7. National Association of Schools of Theatre, Commission on Accreditation. Scope of Recognition: The accreditation throughout the United States of freestanding institutions that offer theatre and theatre-related programs (both degree and non-degree-granting), including those offered via distance education. Geographic Area of Accrediting Activities: Throughout the United States.

8. Puerto Rico State Agency for the Approval of Public Postsecondary Vocational, Technical Institutions and Programs. Scope of Recognition: State agency for the approval of vocational education.

9. Maryland State Board of Nursing. Scope of Recognition: State agency for the approval of nursing education.

10.New York State Board of Regents (nursing education).

Scope of Recognition: State approval agency for nursing education.

Submission of Written Comments Regarding a Specific Accrediting Agency Under Review

Written comments about the recognition of any of the accrediting agencies listed above must be received by June 5, 2023, in the *ThirdPartyComments@ed.gov* mailbox. Please include in the subject line ''Written Comments: (agency name).'' The electronic mail (email) must include the name(s), title, organization/affiliation, mailing address, email address, and telephone number of the person(s) making the comment. Comments should be submitted as a PDF, Microsoft Word document or in a medium compatible with Microsoft Word that is attached to an email or provided in the body of an email message. Comments about an agency that has submitted a petition for initial recognition, renewal of recognition, or an expansion of scope must relate to the agency's compliance with the Criteria for the recognition of Accrediting Agencies or the Criteria for the recognition of state agencies, which are available at: *https://www2.ed.gov/admins/finaid/accred/index.html.*

Only written materials submitted by the deadline to the email address listed in this notice, and in accordance with these instructions, become part of the official record concerning agencies scheduled for review and are considered by the Department and NACIQI in their deliberations. Written comments about the specific agencies identified in this **Federal Register** notice that are submitted after the deadline will not be considered by the Department or provided to NACIQI for purposes of the current cycle review. However, comments may be provided orally at the summer 2024 NACIQI meeting, which has not yet been scheduled, but which will be announced in a future **Federal Register** notice.

Electronic Access to this Document: The official version of this document is the document published in the **Federal Register**. Free internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site, you can view this document, as well as all other documents of the Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site. You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Authority: 20 U.S.C. 1011c; 20 U.S.C. 1099b.

Annmarie Weisman,

Deputy Assistant Secretary for Policy, Planning and Innovation, Office of Postsecondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP23–163–000]

Texas Eastern Transmission, LP; Notice of Request Under Blanket Authorization and Establishing Intervention and Protest Deadline

Take notice that on April 18, 2023, Texas Eastern Transmission, LP (Texas Eastern), 915 North Eldridge Parkway, Suite 1000, Houston, Texas 77079, filed a prior notice request in accordance with 18 CFR 157.205 and 157.216 of the Federal Energy Regulatory Commission's (Commission) regulations under the Natural Gas Act and Texas Eastern's blanket certificate issued in Docket No. CP82–535–000. Texas Eastern requests authorization to: (1) abandon in-place approximately 5.3 miles of its 12-inch-diameter Line 14–K, (2) abandon by removal the related meter and regulating station 72258, and (3) abandon by removal related ancillary facilities, all located in Pointe Coupee Parish, Louisiana. Texas Eastern states the facilities to be abandoned have not been used to provide service in over a decade.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*www.ferc.gov/*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room. For assistance,

contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TTY, (202) 502–8659.

Any questions concerning this application should be directed to Estela D. Lozano, Director, Regulatory, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas 77251–1642, by phone at (713) 627–4522 or by email to *estela.lozano@enbridge.com.*

Pursuant to section 157.9 of the Commission's Rules of Practice and Procedure,[1] within 90 days of this Notice the Commission staff will either: complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding; or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Public Participation

There are three ways to become involved in the Commission's review of this project: you can file a protest to the project, you can file a motion to intervene in the proceeding, and you can file comments on the project. There is no fee or cost for filing protests, motions to intervene, or comments. The deadline for filing protests, motions to intervene, and comments is 5:00 p.m. Eastern Time on June 26, 2023. How to file protests, motions to intervene, and comments is explained below.

Protests

Pursuant to section 157.205 of the Commission's regulations under the NGA,[2] any person [3] or the Commission's staff may file a protest to the request. If no protest is filed within the time allowed or if a protest is filed and then withdrawn within 30 days after the allowed time for filing a protest, the proposed activity shall be deemed to be authorized effective the day after the time allowed for protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request for authorization will be considered by the Commission.

Protests must comply with the requirements specified in section 157.205(e) of the Commission's regulations,[4] and must be submitted by the protest deadline, which is June 26, 2023. A protest may also serve as a motion to intervene so long as the protestor states it also seeks to be an intervenor.

Interventions

Any person has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [5] and the regulations under the NGA [6] by the intervention deadline for the project, which is June 26, 2023. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/how-intervene.*

All timely, unopposed motions to intervene are automatically granted by operation of Rule 214(c)(1). Motions to intervene that are filed after the intervention deadline are untimely and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations. A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Comments

Any person wishing to comment on the project may do so. The Commission considers all comments received about the project in determining the appropriate action to be taken. To ensure that your comments are timely and properly recorded, please submit your comments on or before June 26, 2023. The filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding.

How To File Protests, Interventions, and Comments

There are two ways to submit protests, motions to intervene, and comments. In both instances, please reference the Project docket number CP23–163–000 in your submission.

(1) You may file your protest, motion to intervene, and comments by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov*) under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select General'' and then select ''Protest'', ''Intervention'', or ''Comment on a Filing''; or [7]

(2) You can file a paper copy of your submission by mailing it to the address below. Your submission must reference the Project docket number CP23–163–000.

To mail via USPS, use the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

To mail via any other courier, use the following address: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission encourages electronic filing of submissions (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Protests and motions to intervene must be served on the applicant either by mail or email (with a link to the document) at: Estela D. Lozano, Director, Regulatory, Texas Eastern Transmission, LP, P.O. Box 1642, Houston, Texas 77251–1642, or by email to *estela.lozano@enbridge.com.* Any subsequent submissions by an

[1] 18 CFR (Code of Federal Regulations) 157.9.

[2] 18 CFR 157.205.

[3] Persons include individuals, organizations, businesses, municipalities, and other entities. 18 CFR 385.102(d).

[4] 18 CFR 157.205(e).

[5] 18 CFR 385.214.

[6] 18 CFR 157.10.

[7] Additionally, you may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project.

intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Dated: April 27, 2023.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas & Oil Pipeline Rate and Refund Report filings:

Filings Instituting Proceedings

Docket Numbers: PR23–48–000.

Applicants: Spire Storage Salt Plains LLC.

Description: § 284.123(g) Rate Filing: Spire Storage Salts Plains SOC—April 2023 to be effective 4/1/2023.

Filed Date: 4/26/23.

Accession Number: 20230426–5169.

Comment Date: 5 p.m. ET 5/17/23.

Protest Date: 5 p.m. ET 6/26/23.

Docket Numbers: RP23–710–000.

Applicants: Northern Border Pipeline Company.

Description: Compliance filing: 2023 Operational Purchases and Sales Report to be effective N/A.

Filed Date: 4/26/23.

Accession Number: 20230426–5173.

Comment Date: 5 p.m. ET 5/8/23.

Docket Numbers: RP23–711–000.

Applicants: Transcontinental Gas Pipe Line Company, LLC.

Description: Compliance filing: Rate Schedule S–2 OFO Flow Through Refund Report April 2023 to be effective N/A.

Filed Date: 4/27/23.

Accession Number: 20230427–5041.

Comment Date: 5 p.m. ET 5/9/23.

Docket Numbers: RP23–712–000.

Applicants: Florida Gas Transmission Company, LLC.

Description: § 4(d) Rate Filing: New Service Agreements—Brotman II to be effective 5/1/2023.

Filed Date: 4/27/23.

Accession Number: 20230427–5085.

Comment Date: 5 p.m. ET 5/9/23.

Docket Numbers: RP23–713–000.

Applicants: Florida Gas Transmission Company, LLC.

Description: § 4(d) Rate Filing: New NRA-Denbury and Update Non-Conforming List to be effective 5/1/2023.

Filed Date: 4/27/23.

Accession Number: 20230427–5086.

Comment Date: 5 p.m. ET 5/9/23.

Docket Numbers: RP23–714–000.

Applicants: Rover Pipeline LLC.

Description: § 4(d) Rate Filing: Housekeeping Filing—Remove Surcharge-Related Language to be effective 5/27/2023.

Filed Date: 4/27/23.

Accession Number: 20230427–5174.

Comment Date: 5 p.m. ET 5/9/23.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: April 27, 2023.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2790–076]

Boott Hydropower, LLC; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Non-capacity Amendment of License.

b. *Project No:* 2790–076.

c. *Date Filed:* April 21, 2023.[1]

d. *Applicant:* Boott Hydropower, LLC (licensee).

e. *Name of Project:* Lowell Hydroelectric Project.

f. *Location:* The project is located on the Merrimack River in the City of Lowell in Middlesex County, Massachusetts.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Kevin Webb, Hydro Licensing Manager, 670 N Commercial Street, Suite 204, Manchester, NH 03101, (978) 935–6039, *kwebb@patriothydro.com* and Jim Gibson, Vice-President, 1304 Buckley Road, Syracuse, NY 13212, (315) 414–2202, *Jim.Gibson@hdrinc.com.*

i. *FERC Contact:* Jeremy Jessup, (202) 502–6779, *Jeremy.Jessup@ferc.gov.*

j. *Deadline for filing comments, motions to intervene, and protests:* May 30, 2023.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier

[1] The April 21, 2023 filing supersedes the May 20, 2022, July 7, 2022, and March 10, 2023 filings.

must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–2790–076. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The licensee proposes to formally designate the project's current operations as run-of-river operations through revising Article 37 of the license. The licensee explains that the request is in support of renewable energy initiatives applicable to the project only if it is designated as operating in a run-of-river mode. Given the operational limits of the project's existing license, which equates to no useable storage capacity within the project's impoundment, the licensee currently operates the project in a run-of-river mode. The licensee is not proposing any changes to project facilities, existing operations, or the existing project boundary.

l. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

Dated: April 27, 2023.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

Docket Numbers: EC23–78–000.

Applicants: Casa Mesa Wind, LLC, Chaves County Solar, LLC, Langdon Renewables, LLC, Live Oak Solar, LLC, New Mexico Wind, LLC, NextEra Energy Montezuma II Wind, LLC, River Bend Solar, LLC, NEP US SellCo, LLC, NEP US SellCo II, LLC, NextEra Energy Partners Acquisitions, LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Casa Mesa Wind, LLC, et al.

Filed Date: 4/25/23.

Accession Number: 20230425–5335.

Comment Date: 5 p.m. ET 5/16/23.

Docket Numbers: EC23–79–000.

Applicants: Newark Energy Center LLC.

Description: Joint Application for Authorization Under Section 203 of the Federal Power Act of Newark Energy Center, LLC, et al.

Filed Date: 4/27/23.

Accession Number: 20230427–5243.

Comment Date: 5 p.m. ET 5/18/23.

Take notice that the Commission received the following exempt wholesale generator filings:

Docket Numbers: EG23–136–000.

Applicants: Elawan Pitts Dudik Solar, LLC.

Description: Elawan Pitts Dudik Solar, LLC. submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 4/26/23.

Accession Number: 20230426–5302.

Comment Date: 5 p.m. ET 5/17/23.

Docket Numbers: EG23–137–000.

Applicants: Holtville BESS, LLC.

Description: Holtville BESS, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 4/26/23.

Accession Number: 20230426–5307.

Comment Date: 5 p.m. ET 5/17/23.

Docket Numbers: EG23–138–000.

Applicants: Elawan Dileo Solar, LLC.

Description: Elawan Dileo Solar, LLC submits Notice of Self-Certification of Exempt Wholesale Generator Status.

Filed Date: 4/26/23.

Accession Number: 20230426–5308.

Comment Date: 5 p.m. ET 5/17/23.

Take notice that the Commission received the following electric rate filings:

Docket Numbers: ER10–1819–036; ER10–1817–027; ER10–1818–034; ER10–1820–039.

Applicants: Northern States Power Company, a Wisconsin corporation, Public Service Company of Colorado, Southwestern Public Service Company, Northern States Power Company, a Minnesota corporation.

Description: Notice of Change in Status of Northern States Power Company, a Minnesota corporation, et al.

Filed Date: 4/26/23.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPP–2022–0223; FRL–10923–01–OCSPP]

Chlorpyrifos; Notice of Intent To Cancel Certain Pesticide Registrations and Amend Registrations To Terminate Certain Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), EPA is issuing a notice of receipt of requests by registrants to voluntarily cancel their registrations of certain products containing the pesticide chlorpyrifos, or to amend their chlorpyrifos registrations to terminate one or more uses. EPA intends to grant these requests at the close of the comment period for this announcement, unless the Agency receives substantive comments within the comment period that would merit its further review, or the registrant withdraws their request. If these requests are granted, any sale, distribution, or use of products listed in this notice will be permitted after the registrations have been cancelled or the uses terminated only if such sale, distribution, or use is consistent with the terms as described in the final order.

DATES: Comments must be received on or before June 2, 2023, whichever occurs later.

ADDRESSES: The docket for this action, identified under docket identification (ID) number EPA–HQ–OPP–2022–0223, is available online at *https://www.regulations.gov.* Additional instructions on visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.* For the latest status information on EPA/DC services and docket access, visit *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Patricia Biggio, Pesticide Re-Evaluation Division (7508M), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 566–0700; email address: *OPPChlorpyrifosInquiries@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action.

B. What should I consider as I prepare my comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through *https://www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When preparing and submitting your comments, see the commenting tips at *https://www.epa.gov/dockets/where-send-comments-epa-dockets.*

II. What action is the Agency taking?

This notice announces receipt by the Agency of requests from registrants to cancel certain pesticide product registrations or terminate certain uses of product registrations. These affected registrations are listed in sequence by registration number in Tables 1 and 2 of this Unit. Table 3 of this Unit includes the names and addresses of record for the registrants of the products listed in Tables 1 and 2 of this Unit, in sequence by EPA company number. This number corresponds to the first part of the EPA registration numbers of the products listed in Tables 1 and 2 of this Unit.

Unless the Agency determines that there are substantive comments that warrant further review of the requests or the registrants withdraw their requests, EPA intends to issue a final order in the **Federal Register** cancelling registrations and terminating uses as requested.

TABLE 1—CHLORPYRIFOS REGISTRATIONS WITH PENDING REQUESTS FOR TERMINATION OF SPECIFIC USES

Registration No.	Company No.	Product name	Uses to be terminated
11678–58	11678	Pyrinex Chlorpyrifos Insecticide.	Food processing plants.

85724	AAKO B.V., c/o Ceres International, LLC, 1087 Heartsease Dr., West Chester, PA 19382.

III. What is the Agency's authority for taking these actions?

Section 6(f)(1) of FIFRA (7 U.S.C. 136d(f)(1)) provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be cancelled or amended to terminate one or more registered uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**.

Section 6(f)(1)(B) of FIFRA (7 U.S.C. 136d(f)(1)(B)) requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, FIFRA section 6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrant requests a waiver of the comment period, or

2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants in Table 3 of Unit II have requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 30-day comment period on the proposed requests.

IV. Procedures for Withdrawal of Request

Registrants who choose to withdraw a request for cancellation or withdraw a request for a use termination should submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the cancellation action.

If the requests for voluntary cancellation and amendments to terminate uses are granted, the Agency intends to publish a final cancellation order in the **Federal Register**. In any order issued in response to these requests for cancellation of product registrations and for amendments to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in Tables 1 and 2 of Unit II.

All chlorpyrifos tolerances expired in the **Federal Register** on February 28, 2022 (87 FR 11222) (FRL–5993–05–OCSPP) and in the **Federal Register** on August 31, 2022 (86 FR 48315) (FRL–5993–04–OCSPP). Therefore, any food or animal feed treated with chlorpyrifos after February 28, 2022, is considered adulterated and cannot be delivered into interstate commerce. Consequently, EPA plans to prohibit existing stocks of chlorpyrifos products identified in Tables 1 and 2 of Unit 2 for food uses. Use of the products identified in Tables 1 and 2 of Unit II are permitted on non-food use sites, as long as such use is consistent with the label. EPA proposes prohibiting all sale and distribution of existing stocks of the chlorpyrifos products identified in Tables 1 and 2 of Unit II, except for export consistent with FIFRA section 17 (*7 U.S.C. 136o*) or for proper disposal in accordance with state regulations. In addition, EPA is working with Control Solutions, Inc. to develop plans for the return of existing stocks of their chlorpyrifos products. EPA will include in the final cancellation order terms allowing for distribution consistent with that return program.

List of Subjects in 40 CFR Part 180

Environmental protection, Pesticide and pests, Cancellation.

Dated: April 28, 2023.

Mary Elissa Reaves,

Director, Pesticide Re-Evaluation Division, Office of Pesticide Programs.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–10926–01–OA]

Public Meeting of the Science Advisory Board CASTNet Review Panel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Science Advisory Board (SAB) Staff Office a public meeting of the Science Advisory Board CASTNet Review Panel. The purpose of the public meeting is to receive briefings from EPA on the CASTNet monitoring network, hear public comments, ask any clarifying questions, and deliberate publicly on charge questions regarding the Panel's review of the network and a report from EPA's Office of Air and Radiation. Additional information, materials, background, meeting agendas, and activities will be posted on SAB's website at: *https://sab.epa.gov.*

DATES:

Public Meetings: The Science Advisory Board CASTNet Review Panel will hold a three-day meeting on the following dates. All times listed are in eastern daylight time (EDT).

1. Wednesday, May 24, 2023, from 12:00 p.m. to 5:00 p.m.
2. Thursday, May 25, 2023, from 8:00 a.m. to 5:00 p.m.
3. Friday, May 26, 2023, from 8:00 a.m. to 12:00 p.m.

Public Comments: See the section titled ''Procedures for Providing Public Input'' under **SUPPLEMENTARY INFORMATION**

ADDRESSES: The public meeting will be held at AC Hotel by Marriott Bethesda Downtown at 4646 Montgomery Ave., Bethesda, MD 20814. Please refer to the SAB website at *https://sab.epa.gov* for details on how to access the meeting, including requesting teleconference or obtaining online simulcasting information.

FOR FURTHER INFORMATION CONTACT: Any member of the public who wants further information concerning this notice may contact Dr. Bryan Bloomer, Designated Federal Officer (DFO), via telephone (202) 564–4222, or email at *bloomer.bryan@epa.gov.* General information about the SAB, as well as any updates concerning the meetings announced in this notice can be found on the SAB website at *https://sab.epa.gov.*

SUPPLEMENTARY INFORMATION:

Background: The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (ERDDAA), codified at 42 U.S.C. 4365, to provide independent scientific and technical advice to the EPA Administrator on the scientific and technical basis for agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. Pursuant to FACA and EPA policy, notice is hereby given that the Science Advisory Board CASTNet Review Panel will hold a public meeting to receive a presentation of review materials, on the charge questions, to receive public comments, and to deliberate upon the charge questions regarding the CASTNet monitoring network.

Availability of Meeting Materials: All meeting materials, including the agenda, will be available on the SAB web page at *https://sab.epa.gov.*

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to the EPA. Members of the public can submit relevant comments pertaining to the committee's charge or meeting materials. Input from the public to the SAB will have the most impact if it provides specific scientific or technical information or analysis for the SAB to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should follow the instruction below to submit comments.

Oral Statements: In general, individuals or groups requesting an oral presentation at an in-person meeting will be limited to five minutes. Each person making an oral statement should consider providing written comments as well as their oral statement so that the points presented orally can be expanded upon in writing. Persons interested in providing oral statements should contact the DFO, in writing (preferably via email) at the contact information noted above by May 19, 2023, to be placed on the list of registered speakers and to have the written comments posted publicly for consideration on the SAB website.

Written Statements: Written statements will be accepted throughout the advisory process; however, for timely consideration by SAB members, statements should be submitted to the DFO by May 19, 2023. Written statements should be supplied to the DFO at the contact information above. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its websites. Members of the public should be aware that their personal contact information, if included in any written comments, may be posted to the SAB website. Copyrighted material will not be posted without explicit permission of the copyright holder and should be indicated as such at the time of submission.

Accessibility: For information on access or services for individuals with disabilities, please contact the DFO, at the contact information noted above, preferably at least ten days prior to the meeting, to give the EPA as much time as possible to process your request.

V. Khanna Johnston,

Deputy Director, Science Advisory Board Staff Office.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXXX; FR ID 139745]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before July 3, 2023. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–XXXX.

Title: Incarcerated People's Communications Services (IPCS) 2023 Mandatory Data Collection, WC Docket Nos. 23–62, 12–375, FCC 23–19.

Form Number(s): FCC Form 2303(a) and FCC Form 2303(b).

Type of Review: New collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 30 respondents; 30 responses.

Estimated Time per Response: 230 hours.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in sections 1, 2, 4(i)–(j), 5(c), 201(b), 218, 220, 225, 255, 276, 403, and 716 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152,154(i)–(j), 155(c), 201(b), 218, 220, 225, 255, 276, 403, and 617, and the Martha Wright-Reed Act, Public Law 117–338, 136 Stat. 6156 (2022).

Total Annual Burden: 6,900 hours.

Total Annual Cost: No cost.

Needs and Uses: On March 17, 2023, the Commission released the *Incarcerated People's Communications Services; Implementation of the Martha Wright-Reed Act; Rates for Interstate Inmate Calling Services,* WC Docket Nos. 23–62, 12–375, Notice of Proposed Rulemaking and Order, FCC 23–19, 88 FR 20804 (Notice of Proposed Rule Making) and 88 FR 19001 (Order), in which it began the process of implementing the Martha Wright-Reed Just and Reasonable Communications Act of 2022, Public Law 117–338, 136 Stat. 6156 (the Act). The Act expands the Commission's statutory authority to encompass ''any audio or video communications service used by inmates . . . regardless of technology used.'' The Act also amends section 2(b) of the Communications Act of 1934, as amended to make clear that the Commission's jurisdiction extends to intrastate as well as interstate and international communications services used by incarcerated people.

The Act directs the Commission to ''promulgate any regulations necessary to implement'' the statutory provisions, including its mandate that the Commission establish a ''compensation plan'' ensuring that all rates and charges for IPCS ''are just and reasonable,'' not earlier than 18 months and not later than 24 months after its January 5, 2023 enactment. The Act also requires the Commission to consider, as part of its implementation, the costs of ''necessary'' safety and security measures, as well as ''differences in costs'' based on facility size, or ''other characteristics.'' It allows the Commission to ''use industry-wide average costs of telephone service and advanced communications services and the average costs of service of a communications service provider'' in determining just and reasonable rates.

To ensure that it has the data needed to meet its substantive and procedural responsibilities under the Act, the Commission delegated to the Wireline Competition Bureau (WCB) and the Office of Economics and Analytics (OEA) (collectively, WCB/OEA) authority to ''update and restructure'' the Commission's latest mandatory data collection, the Third Mandatory Data Collection (OMB Control No. 3060–1300, Inmate Calling Services (ICS) 2022 One-Time Mandatory Data Collection), ''as appropriate in light of the requirements of the new statute.'' This delegation requires WCB/OEA to collect ''data on all incarcerated people's communications services from all providers of those services now subject to'' the Commission's expanded ratemaking authority, including, but not limited to, requesting ''more recent data for additional years not covered by the most recent data collection.''

Pursuant to their delegated authority, WCB/OEA drafted proposed

instructions, a template, and a certification form for the proposed 2023 Mandatory Data Collection. See 2023 IPCS Mandatory Data Collection—Proposed Instructions, available for download at *https://www.fcc.gov/document/2023-ipcs-mandatory-data-collection-proposed-instructions.* Under WCB/OEA's proposals, IPCS providers would be required to submit the required data using a reporting template that would be filed through the Commission's electronic comment filing system. The proposed template consists of a Word document (Appendix A to the instructions) for responses requiring narrative information and Excel spreadsheets (Appendix B to the instructions) for responses that require specific numbers or information. IPCS providers would also be required to submit an audited financial statement or report for 2022, and a signed certification of truthfulness, accuracy, and completeness. The instructions, template, and certification form would simplify compliance with, and reduce the burden of, this data collection. These proposed documents will be submitted to the Office of Management and Budget as FCC Form 2303(a) and FCC Form 2303(b).

On April 28, 2023, WCB/OEA released a Public Notice seeking comment on all aspects of the proposed instructions, template, and certification form. See Proposed 2023 IPCS Mandatory Data Collection Public Notice, available for download at *https://www.fcc.gov/document/proposed-2023-ipcs-mandatory-data-collection-public-notice.* WCB/OEA will consider comments submitted in response to both the Public Notice and this notice in finalizing the proposed data collection prior to submitting the documents to the Office of Management and Budget.

Federal Communications Commission.

Katura Jackson,

Federal Register Liaison Officer.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXXX; FR ID 138387]

Information Collection Requirement Being Submitted to the Office of Management and Budget for Emergency Review and Approval

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The Commission may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before June 2, 2023.

ADDRESSES: Comments should be sent to *http://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Commission invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4), the Commission seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

The Commission is requesting emergency OMB processing of the information collection requirement(s) contained in this notice and has requested OMB approval no later than 37 days after the collection is received at OMB. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of Commission ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the Commission's submission to OMB will be displayed.

OMB Control No.: 3060–xxxx.

Title: Reporting On Foreign Ownership of International Section 214 Authorization Holders.

Form Number: N/A.

Type of Review: New information collection.

Respondents: Business or other for-profit.

Number of Respondents: 1,500 respondents; 1,500 responses.

Estimated Time per Response: 6 hours.

Frequency of Response: One time reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in sections 218, 219, and

403 of the Communications Act of 1934, as amended, 47 U.S.C. 218, 219, and 403.

Total Annual Burden: 4,500 hours.

Annual Cost Burden: $1,350,000.

Needs and Uses: The Federal Communications Commission (Commission) is requesting that the Office of Management and Budget (OMB) to approve OMB Control No. 3060–xxxx—Reporting On Foreign Ownership of International Section 214 Authorization Holders. The Commission established a new one-time information collection in the *Review of International Section 214 Authorizations to Assess Evolving National Security, Law Enforcement, Foreign Policy, and Trade Policy Risks, IB Docket No. 23–119; Amendment of the Schedule of Application Fees Set Forth in Sections 1.1102 through 1.1109 of the Commission's Rules, MD Docket No. 23–134,* Order and Notice of Proposed Rulemaking (*Evolving Risks Order and Notice*), FCC 23–28. Each international section 214 authorization holder is required to identify its 10% or greater direct or indirect foreign interest holders (reportable foreign ownership) as of thirty (30) days prior to the filing deadline. Additionally, the filer will be required to certify as to the accuracy of the information provided. The filer must submit its information based on the categories below.

(1) Reportable Foreign.

(2) Ownership—Foreign Adversary—China (including Hong Kong), Cuba, Iran, North Korea, Russia, Maduro Regime. Where there are interest holders that are entities and individuals that are a government organization or citizen of a ''foreign adversary'' country, an authorization holder must identify its 10% or greater direct or indirect foreign interest holders, including any 10% or greater direct or indirect foreign interest holders outside the foregoing ''foreign adversary'' countries. A ''foreign adversary'' country is defined in the Department of Commerce's rule, 15 CFR 7.4. The authorization holder must:

- identify each interest holder and the foreign country or countries, including countries that are not foreign adversary countries;
- disclose whether any interest holder has dual or more citizenships and identify all countries where citizenship is held; and
- certify to the truth and accuracy of all information.

(3) Reportable Foreign Ownership—No Foreign Adversary. Where there are no interest holders that are entities or individuals that are a government organization or citizen of any foreign country that is a ''foreign adversary'' country defined in the Department of Commerce's rule, 15 CFR 7.4, an authorization holder must identify its 10% or greater direct or indirect foreign interest holders. The authorization holder must:

- identify each interest holder and the foreign country or countries;
- disclose whether any interest holder has dual or more citizenships and identify all the countries where citizenship is held; and
- certify to the truth and accuracy of all information.

(4) No Reportable Foreign Ownership. An authorization holder that has no reportable foreign ownership must certify to the truth and accuracy of this information.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1256; FR ID 138984]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.'' The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before June 2, 2023.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how

it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–1256.

Title: Application for Connect America Fund Phase II and Rural Digital Opportunity Fund Auction Support.

Form Number: FCC Form 683.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities, Not-for-profit institutions, and State, Local or Tribal governments.

Number of Respondents and Responses: 530 respondents and 930 responses.

Estimated Time per Response: 2–12 hours (on average).

Frequency of Response: Annual reporting requirements, on occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection *47 U.S.C. 154, 214, 254* and *303(r)* of the Communications Act of 1934, as amended.

Total Annual Burden: 5,860 hours.

Total Annual Cost: No Cost.

Needs and Uses:

Connect America Fund Phase II Auction

The Commission is requesting the Office of Management and Budget (OMB) approval for this revised information collection. On November 18, 2011, the Commission released the *USF/ICC Transformation Order and Further Notice of Proposed Rulemaking,* WC Docket No. 10–90 et al., FCC 11–161 (*USF/ICC Transformation Order and/or FNPRM*), which comprehensively reformed and modernized the high-cost program within the universal service fund to focus support on networks capable of providing voice and broadband services. Among other things, the Commission created the Connect America Fund (CAF) and concluded that support in price cap areas would be provided through a combination of ''a new forward-looking model of the cost of constructing modern multi-purpose networks'' and a competitive bidding process (CAF Phase II auction or Auction 903). The Commission also sought comment in the accompanying *USF/ICC Transformation FNPRM* on proposed rules governing the CAF Phase II auction, including basic auction design and the application process.

In the CAF Phase II auction, service providers competed to receive support of up to $1.98 billion over 10 years to offer voice and broadband service in unserved high-cost areas. The information collection requirements reported under this collection are the result of several Commission decisions to implement the reform adopted in the *USF/ICC Transformation Order* and move forward with conducting the CAF Phase II auction. In the *April 2014 Connect America Order,* WC Docket No. 10–90 et al., FCC 14–54, the Commission adopted various rules regarding participation in the CAF Phase II auction, the term of support, and the eligible telecommunications carrier (ETC) designation process. In the *Phase II Auction Order,* WC Docket No. 10–90 et al., FCC 16–64, the Commission adopted rules to govern the CAF Phase II auction, including the adoption of a two-stage application process, which includes a pre-auction short-form application to be submitted by parties interested in bidding in the CAF Phase II auction and a post-auction long-form application that must be submitted by winning bidders seeking to become authorized to receive CAF Phase II auction support. The Commission concluded, based on its experience with auctions and consistent with the record, that this two-stage application process balances the need to collect information essential to conducting a successful auction and authorizing CAF Phase II support with administrative efficiency.

On January 30, 2018, the Commission adopted a public notice that established the final procedures for the CAF Phase II auction, including the long-form application disclosure and certification requirements for winning bidders seeking to become authorized to receive CAF Phase II auction support. *See Phase II Auction Procedures Public Notice,* WC Docket No. 17–182 et al., FCC 18–6. The Commission also adopted the *Phase II Auction Order on Reconsideration,* WC Docket No. 10–90 et al., FCC 18–5, which modified the Commission's letter of credit rules to provide some additional relief for CAF Phase II auction support recipients by reducing the costs of maintaining a letter of credit. On January 19, 2023, WCB released a public notice announcing that the Commission had concluded its review of CAF Phase II auction long-form applications. *See WCB Concludes CAF II Application Review, Long-Forms Made Public,* AU Docket No. 17–182 et al., DA 23–49.

The Commission proposes to eliminate the information collection requirements related to the CAF Phase II auction FCC Form 683 now that the Commission's review of CAF Phase II auction long-form applications has concluded. All other information collection requirements remain unchanged.

Rural Digital Opportunity Fund Auction

On February 7, 2020 the Commission released the *Rural Digital Opportunity Fund Order,* WC Docket Nos. 19–126, 10–90, FCC 20–5 which will commit up to $20.4 billion over the next decade to support up to gigabit speed broadband networks in rural America. The funding was allocated through a multi-round, reverse, descending clock auction that favored faster services with lower latency and encouraged intermodal competition in order to ensure that the greatest possible number of Americans will be connected to the best possible networks, all at a competitive cost.

To implement the Rural Digital Opportunity Fund auction (or Auction 904), the Commission adopted new rules for the Rural Digital Opportunity Fund auction, including the adoption of a two-stage application process. Like with the CAF Phase II auction, this process includes a pre-auction short-form application to be submitted by parties interested in bidding in the Rural Digital Opportunity Fund auction (FCC Form 183) and a post-auction long-form application that must be submitted by winning bidders (or their designees) seeking to become authorized to receive Rural Digital Opportunity Fund support (FCC Form 683). The Commission received approval for the short-form application (FCC Form 183) in a separate collection under the OMB control number 3060–1252.

This information collection includes the disclosures and certifications adopted by the Commission that must be made by winning bidders seeking to become authorized for Rural Digital Opportunity Fund support and the requirement that Rural Digital Opportunity Fund support recipients maintain a letter of credit. Any additional revisions or new collections for OMB review that address other reforms adopted in the Order will be submitted at a later date.

The Commission therefore proposes to revise this information collection to maintain these Rural Digital Opportunity Fund requirements.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0920; FR ID 139313]

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before July 3, 2023. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0920.

Title: Form 2100, Schedule 318—Low Power FM Station Construction Permit Application; Report and Order in MM Docket No. 99–25 Creation of Low Power Radio Service; Sections 73.801, 73.807, 73.809, 73.810, 73.816, 73.827, 73.850, 73.865, 73.870, 73.871, 73.872, 73.877, 73.878, 73.318, 73.1030, 73.1207, 73.1212, 73.1300, 73.1350, 73.1610, 73.1620, 73.1750, 73.1943, 73.3525, 73.3550, 73.3598, 11.61(ii).

Form No.: Form 2100, Schedule 318.

Type of Review: Extension of a currently approved collection.

Respondents: Not-for-profit institutions; State, local or Tribal governments.

Number of Respondents and Responses: 24,606 respondents with multiple responses; 31,324 responses.

Estimated Time per Response: .0025–12 hours.

Frequency of Response: Recordkeeping requirement; On occasion reporting requirement; Monthly reporting requirement; Third party disclosure requirement.

Obligation To Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in sections 154(i), 303, 308 and 325(a) of the Communications Act of 1934, as amended.

Total Annual Burden: 52,889 hours.

Total Annual Costs: $1,229,370.

Needs and Uses: Form 2100, Schedule 318, Low Power FM (LPFM) Station Construction Permit Application (Schedule 318), is used to: (1) apply to construct a new Low Power FM (LPFM) broadcast station; (2) make changes to an authorized LPFM broadcast station; (3) amend a pending LPFM construction permit application; or (4) propose mandatory time-sharing.

Schedule 318's Online Notice (third party disclosure) Requirement: 47 CFR 73.3580, as amended in the Commission's 2020 Public Notice Second Report and Order, discussed below, requires local public notice of the filing of all applications to construct a new LPFM broadcast station. Notice is given by an applicant posting notice of the application filing on its station website, its licensee website, its parent entity website, or on a publicly accessible, locally targeted website, for 30 consecutive days beginning within five business days of acceptance of the application for filing. The online notice must link to a copy of the application as filed in the Commission's LMS licensing database. In the 2020 Public Notice Second Report and Order, the Commission also clarified LPFM stations' obligations to provide local public notice, and amended section 73.801 of the rules to indicate that the local public notice rule, 47 CFR 73.3580, applies to the LPFM service.

FCC staff uses the data to determine whether an applicant meets basic statutory and regulatory requirements to become a Commission licensee and to ensure that the public interest would be served by grant of the application. In addition, the information contained within this information collection ensures that (1) the integrity of the FM spectrum is not compromised, (2) unacceptable interference will not be caused to existing radio services, (3) statutory requirements are met, and (4) the stations operate in the public interest.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXXX, OMB 3060–0400; FR ID 138566]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.'' The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before June 2, 2023.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Nicole Ongele at (202) 418–2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–XXXX.

Title: Freedom of Information/Privacy Act Request.

Form Number: N/A.

Type of Review: New information collection.

Respondents: Individuals or Households, Business or other for-profit, and Not-for-profit institutions, Federal Government, State, Local or Tribal Government.

Number of Respondents and Responses: 770 respondents; 770 responses.

Estimated Time per Response: 0.08 hours.

Frequency of Response: On occasion reporting requirement.

Obligation to Respond: Voluntary. The statutory authority for this collection of information is contained in 5 U.S.C 552 and 552a.

Total Annual Burden: 62 hours.

Total Annual Cost: $5,124.00.

Needs and Uses: The online form is used to collect information necessary to process a proper FOIA request relating to a subject matter provided by the requester. Freedom of Information Act, 5 U.S.C. 552, details what makes a proper FOIA request. A proper request must include: (1) a reasonable description of the record and (2) is made in accordance with published agency rules stating time, place, fees (if any) and procedures to be followed.

Respondents can request records at any time. The request must describe each requested record in sufficient detail to enable the FCC staff to locate the record. The online form is used to collect requester's information (address, contact information, etc.) and a detailed description of the records sought. The FOIA requester is asked to provide information that would assist the FCC in locating responsive records (if they exist). This information is essential to the accurate search and retrieval of records responsive to FOIA/PA requests. Additionally, the requester may include information, if applicable, about fee categories, fee waivers, and expedited processing.

This form will enhance the quality, utility, and clarity of the information to be collected; and minimize the burden of the collection of information on those responding.

OMB Control Number: 3060–0400.

Title: Part 61, Tariff Review Plan (TRP).

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 2,747 respondents; 4,148 responses.

Estimated time per response: 0.5–53 hours.

Frequency of Response: One-time, on occasion, annual or biennial reporting requirements, and certification requirement.

Obligation To Respond: Required to obtain or retain benefits. Statutory Authority for this information collection is contained in 47 U.S.C. 201, 202, 203, and 251(b)(5) of the Communications Act of 1934, as amended. See 47 U.S.C. 201, 202 and 203, and 251(b)(5).

Total Annual Burden: 60,576 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission has developed standardized Tariff Review Plans (TRPs) that set forth the summary material that incumbent LECs (ILECs) file to support revisions to the rates in their interstate access service tariffs. The TRPs display basic data on rate development in a consistent manner, thereby facilitating review of the ILEC rate revisions by the Commission and interested parties. The TRPs have served this purpose effectively in past years.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0633; FR ID 139067]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's

burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before July 3, 2023. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0633.

Title: Sections 74.165, 74.432 and 74.832, Filing of Station Licenses.

Form Number: N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities, Not-for-profit institutions and State, local or Tribal Government.

Number of Respondents and Responses: 1,000 respondents and 1,000 responses.

Estimated Hours per Response: 0.083 hours.

Frequency of Response: Recordkeeping requirement.

Obligation to Responds: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in section 154(i) of the Communications Act of 1934, as amended.

Total Annual Burden: 83 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission released a Report and Order, Amendment of Parts 0, 1, 5, 73, and 74 of the Commission's Rules Regarding Posting of Station Licenses and Related Information, MB Docket No. 18–121, FCC 18–174, on December 11, 2018. In this Report and Order, the Commission eliminated rule sections 47 CFR 73.1230, 74.564, 74.664, 74.765 and 74.1265 to remove the posting information requirements from the Commission's rules. This collection is being revised to remove these rule sections from this information collection. Also, the posting information requirements are being removed from Sections 74.432 and 74.832 with this revision to the Office of Management and Budget. The remaining information collection requirements for this collection are as follows:

47 CFR 74.165 requires that the instrument of authorization for an experimental broadcast station be available at the transmitter site.

47 CFR 74.432(j) requires that the license of a remote pickup broadcast/low power auxiliary station shall be retained in the licensee's files and the address shown on the authorization.

47 CFR 74.832(j) (low power auxiliary stations) requires that the license shall be retained in the licensee's files at the address shown on the authorization.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

[OMB No. 3064–0057; –0061; –0087]

Agency Information Collection Activities: Proposed Collection Renewal; Comment Request

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice and request for comment.

SUMMARY: The FDIC, as part of its obligations under the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to take this opportunity to comment on the renewal of the existing information collections described below (OMB Control No. 3064–0057; –0061; –0087).

DATES: Comments must be submitted on or before July 3, 2023.

ADDRESSES: Interested parties are invited to submit written comments to the FDIC by any of the following methods:

- *Agency Website: https://www.fdic.gov/resources/regulations/federal-register-publications/.*
- *Email: comments@fdic.gov.* Include the name and number of the collection in the subject line of the message.
- *Mail:* Manny Cabeza (202–898–3767), Regulatory Counsel, MB–3128, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.
- *Hand Delivery:* Comments may be hand-delivered to the guard station at the rear of the 17th Street NW building (located on F Street NW), on business days between 7:00 a.m. and 5:00 p.m.

All comments should refer to the relevant OMB control number. A copy of the comments may also be submitted to the OMB desk officer for the FDIC: Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Manny Cabeza, Regulatory Counsel, 202–898–3767, *mcabeza@fdic.gov,* MB–3128, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.

SUPPLEMENTARY INFORMATION:

Proposal to renew the following currently approved collection of information:

1. *Title:* Certified Statement for Semiannual Deposit Insurance Assessment.

OMB Number: 3064–0057.

Forms: None.

Affected Public: FDIC-insured depository institutions.

Burden Estimate:

SUMMARY OF ESTIMATED ANNUAL BURDEN

[OMB No. 3064–0057]

Information collection (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
1. Quarterly Certified Statement Invoice for Deposit Insurance Assessment, 12 CFR Part 327 (Mandatory).	Reporting (Quarterly)	4,755	4	00:20	6,340
Total Annual Burden (Hours)	.....	.....	.....	.....	6,340

Source: FDIC.

General Description of Collection: The FDIC collects deposit insurance assessments on a quarterly basis. Each quarterly assessment is based on an insured depository institution's quarterly report of condition for the prior calendar quarter. The FDIC collects the quarterly assessment payments by means of direct debits through the Automated Clearing House network. The information collection consists of the reporting requirement associated with certifying the review by officials of the insured institutions to confirm that the assessment data are accurate and, in cases of inaccuracy, submission of corrected data. There is no change in the substance or methodology of this information collection. The change in burden is due solely to the decrease in the estimated number of respondents by 671 from the estimated 7,011 annual respondents in the currently-approved information collection to the current estimate of 6,340. The decrease in estimated respondents is the result of the drop in the total number of insured depository institutions.

2. *Title:* Summary of Deposits.

OMB Number: 3064–0061.

Forms: None.

Affected Public: FDIC-insured depository institutions.

Burden Estimate:

SUMMARY OF ESTIMATED ANNUAL BURDEN

[OMB No. 3064–0061]

Information collection (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
1. Summary of Deposits (Mandatory)	Recordkeeping (Annual)	3,870	1	3:00	11,610
Total Annual Burden (Hours)	.....	.....	.....	.....	11,610

General Description of Collection: The Summary of Deposits (SOD) is the annual survey of branch office deposits as of June 30 for all FDIC-insured institutions, including insured U.S. branches of foreign banks. All FDIC-insured institutions that operate a main office and one or more branch locations (including limited service drive-thru locations) as of June 30 each year are required to file the SOD Survey. Insured branches of foreign banks are also required to file. All data collected on the SOD submission are available to the public. The survey data provides a basis for measuring the competitive impact of bank mergers and has additional use in research on banking. There is no change in the substance or methodology of this information collection. The change in burden is due solely to the decrease in the estimated number of respondents by 429 from the estimated 4,299 annual respondents in the currently-approved information collection to the current estimate of 3,870.

3. *Title:* Procedures for Monitoring Bank Secrecy Act Compliance.

OMB Number: 3064–0087.

Forms: None.

Affected Public: Insured State Nonmember Banks and Savings Associations..

Burden Estimate:

SUMMARY OF ESTIMATED ANNUAL BURDEN

[OMB No. 3064–0087]

Information collection (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
1. Procedures for monitoring BSA compliance, small institutions (<$500 million in total assets), 12 CFR 326.8(b)(1) and (c) (Mandatory).	Recordkeeping (Annual)	2,013	1	35:00	70,455
2. Procedures for monitoring BSA compliance, medium institutions ($500 million to $10 billion in total assets), 12 CFR 326.8(b)(1) and (c)(Mandatory).	Recordkeeping (Annual)	964	1	250:00	241,000

SUMMARY OF ESTIMATED ANNUAL BURDEN—Continued

[OMB No. 3064–0087]

Information collection (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
3. Procedures for monitoring BSA compliance, large institutions (>$10 billion in total assets), 12 CFR 326.8(b)(1) and (c) (Mandatory).	Recordkeeping (Annual)	61	1	450:00	27,450
Total Annual Burden (Hours)	.....	.....	.....	.....	338,905

Source: FDIC.

General Description of Collection: Respondents must establish and maintain procedures designed to monitor and ensure their compliance with the requirements of the Bank Secrecy Act and the implementing regulations promulgated by the Department of Treasury at 31 CFR chapter X. Respondents must also keep records evidencing that they have provided training for appropriate personnel. There is no change in the method or substance of the collection. The overall increase in burden hours is a result of economic fluctuation. In particular, the total number of respondents has increased while the hours per response remain the same.

Request for Comment: Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC's functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on April 27, 2023.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL MARITIME COMMISSION

[Docket No. 23–02]

Bed Bath & Beyond Inc. Complainant v. Orient Overseas Container Line Limited and OOCL (EUROPE) LIMITED, Respondents; Notice of Filing of Complaint and Assignment

Notice is given that a complaint has been filed with the Federal Maritime Commission (Commission) by Bed Bath & Beyond Inc., hereinafter ''Complainant,'' against Orient Overseas Container Line Limited and OOCL (Europe) Limited (hereinafter ''Respondents.'') Complainant states that it is a corporation existing under the laws of New York with a principal place of business in New Jersey. Complainant identifies Orient Overseas Container Line Limited as an ocean common carrier existing under the laws of Hong Kong with a principal place of business in Hong Kong, as well as a ''controlled carrier'' of the People's Republic of China. Complainant identifies OOCL (Europe) Limited as an ocean common carrier existing under the laws of United Kingdom with a principal place of business in the United Kingdom, as well as a ''controlled carrier'' of the People's Republic of China. Complainant further alleges that both companies act in the United States by and through their agent, OOCL (USA) Inc. (''OOCL (USA)''), a company existing under the laws of the State of New York with its principal place of business located in Utah.

Complainant alleges that Respondent violated 46 U.S.C. 41102(c), 41104(a)(2), and 41104(a)(10), as well as 46 CFR 545.5, regarding its practices and the billing and payment of costs and charges on the shipments of cargo, including demurrage and detention, as well as systematically failing to meet its service commitments to Complainant under Service Contracts, and by coercing Complainant to pay Peak Season Surcharges (PSS) and enter into premium rate contracts. An answer to the complaint is due to be filed with the Commission within twenty-five (25) days after the date of service. The full text of the complaint can be found in the Commission's Electronic Reading Room at *https://www2.fmc.gov/readingroom/proceeding/23-02/*. This proceeding has been assigned to Office of Administrative Law Judges. The initial decision of the presiding officer in this proceeding shall be issued by April 29, 2024, and the final decision of the Commission shall be issued by November 12, 2024.

Served: April 27, 2023.

William Cody,

Secretary.

[FR Doc. 2023–09374 Filed 5–2–23; 8:45 am]

BILLING CODE P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments, relevant information, or documents regarding the agreements to the Secretary by email at *Secretary@fmc.gov,* or by mail, Federal Maritime Commission, 800 North Capitol Street, Washington, DC 20573. Comments will be most helpful to the Commission if received within 12 days of the date this notice appears in the **Federal Register**, and the Commission requests that comments be submitted within 7 days on agreements that request expedited review. Copies of agreements are available through the Commission's website (*www.fmc.gov*) or by contacting the Office of Agreements at (202)–523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 010071–048.

Agreement Name: Cruise Lines International Association.

Parties: Aida Cruises, American Crusine Lines, Inc., Atlas Ocean Voyages; Australian Pacific Touring Pty

Ltd; Azamara Cruises; Carnival Cruise Lines; Celebrity Cruises, Inc.; Costa Cruise Lines; Crystal Cruises; Cunard Line; Disney Cruise Line; Emerald Cruises; Explora SA; Hapag-Lloyd Kreuzfahrten GmbH; Heritage Expeditions; Holland America Line; Marella Cruise; MSC Cruises; NCL Corporation; Oceania Cruises; P&O Cruises; Pearl Seas Cruises; Ponant Yacht Cruises & Expeditions; Princess Cruises; Regent Seves Seas Cruises; Royal Caribbean International; Sea Cloud Cruises GmbH; Seabourn Cruise Line; Seadream Yacht Club, Ltd.; Star Cruises (HK) Limited; Swan Hellenic; Virgin Voyages; and Windstar Cruises.

Filing Party: Marissa Rivera, Cruise Lines International Association.

Synopsis: The amendment updates the membership of the agreement and revises the agreement to divide Global Members between Global Holding Members and Global Operating Members and specifies the difference between them.

Proposed Effective Date: 6/11/2023.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/999.

Dated: April 28, 2023.

BILLING CODE 6730–02–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than May 18, 2023.

A. Federal Reserve Bank of Kansas City (Jeffrey Imgarten, Assistant Vice President) One Memorial Drive, Kansas City, Missouri 64198. Comments can also be electronically to *KCApplicationComments@kc.frb.org:*

1. *Steven R. Niemack, individually, and as trustee of the Steven R. Niemack Revocable Living Trust dated 3–25–2021 and the Steven R. Niemack Family Irrevocable Trust dated 1–31–2011, all of Lawrence, Kansas;* to form the Niemack Family Group, a group acting in concert, to retain voting shares of Maple Hill Bancshares, Inc., and thereby indirectly retain voting shares of Stockgrowers State Bank, both of Maple Hill, Kansas.

Board of Governors of the Federal Reserve System.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

FEDERAL TRADE COMMISSION

Horseracing Integrity and Safety Act: Anti-Doping and Medication Control Rule

AGENCY: Federal Trade Commission.

ACTION: Notice of Horseracing Integrity and Safety Authority (HISA) final rule; delay of effectiveness.

SUMMARY: The Federal Trade Commission modifies the Horseracing Integrity and Safety Authority's Anti-Doping and Medication Control Rule by extending its date of effectiveness until May 22, 2023.

DATES: As of May 3, 2023, the date of effectiveness for the Horseracing Integrity and Safety Authority's Anti-Doping and Medication Control Rule is delayed to May 22, 2023.

FOR FURTHER INFORMATION CONTACT: John H. Seesel (202–326–2702), Attorney, Office of the General Counsel, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

I. Reason for Delay of HISA's Final Rule

The Horseracing Integrity and Safety Act of 2020, 15 U.S.C. 3051–3060 (''Act''), tasks a self-regulatory nonprofit organization, the Horseracing Integrity and Safety Authority (''Authority''), with developing proposed rules on a variety of subjects. *See* 15 U.S.C. 3053(a). Those proposed rules take effect only if approved by the Federal Trade Commission, *see* 15 U.S.C. 3053(b)(2), which must approve the proposed rules if it finds that they are consistent with the Act and with applicable rules approved by the Commission, *see* 15 U.S.C. 3053(c)(2). The Commission, however, may by rule abrogate, add to, or modify the Authority's rules ''as the Commission finds necessary or appropriate to ensure the fair administration of the Authority, to conform the rules of the Authority'' to the Act's requirements or applicable rules approved by the Commission, ''or otherwise in furtherance of the purposes of this Act.'' *Id.* sec. 3053(e).

On March 27, 2023, the Commission issued an Order (''Order'') approving the Authority's proposed Anti-Doping and Medication Control (''ADMC'') Rule. Pursuant to that Order, the ADMC Rule took effect immediately upon the Commission's approval, *i.e.,* on March 27, 2023.[1]

On March 31, 2023, however, the United States District Court for the Northern District of Texas determined that the Commission had violated the Administrative Procedure Act by declaring the ADMC Rule effective immediately upon the issuance of the Commission's Order approving the Rule. Viewing the Commission's March 27 Order as tantamount to an agency's issuance of a substantive rule, the court found that the Commission should have delayed the date of effectiveness for the ADMC Rule for 30 days following approval. The court accordingly enjoined implementation or enforcement of the ADMC Rule until May 1, 2023.[2]

The district court's March 31 order has given rise to substantial uncertainty regarding the criteria and procedures under which anti-doping and medication control protocols will be implemented as the Thoroughbred horseracing industry nears the Triple Crown events of May 6 (Kentucky Derby), May 20 (Preakness Stakes), and June 10 (Belmont Stakes). With the date of effectiveness for the Authority's nationally applicable ADMC Rule

[1] *See* Fed. Trade Comm'n, Order Approving the Anti-Doping and Medication Control Rule Proposed by the Horseracing Integrity & Safety Auth. (Mar. 27, 2023), *https://www.ftc.gov/system/files/ftc_gov/pdf/P222100CommissionOrderAntiDopingMedication.pdf.*

[2] *Nat'l Horsemen's Benevolent & Protective Ass'n et al.* v. *Jerry Black et al.,* No. 5:21–CV–071–H, 2023 WL 2753978 (N.D. Tex. Mar. 31, 2023).

suspended by the district court until May 1, the conduct of anti-doping and medication control will remain under the jurisdiction of the various state racing authorities until that date, with the Authority's jurisdiction resuming only five days before the Kentucky Derby and nineteen days before the Preakness. Because the ADMC Rule governs the treatment of horses weeks before a covered race, some affected parties who are treating horses in a manner consistent with state requirements may find it difficult to come into compliance in the five days between the ADMC Rule's scheduled date of effectiveness and the Kentucky Derby on May 6.[3] Even in the absence of conflicts between the ADMC Rule and applicable state regulations, implementing new testing requirements just days before the start of the Triple Crown creates an appreciable risk of errors, confusion, and inconsistent treatment of similarly situated horses—harms that could frustrate the purposes of the Act.

In light of these policy concerns, the Commission finds it necessary to modify HISA's ADMC Rule, pursuant to the recently revised 15 U.S.C. 3053(e), to ensure the ''fair administration of the Authority'' and otherwise in furtherance of the Act's purposes. Accordingly, pursuant to the authority granted to the Commission by 15 U.S.C. 3053(e), the Commission issues this document delaying the date of effectiveness for the Horseracing Integrity and Safety Authority's Anti-Doping and Medication Control Rule until May 22, 2023.

II. Administrative Procedure Act

As noted above, the Act authorizes the Commission to abrogate, add to, or modify the Authority's rules for specified reasons, including ''to ensure the fair administration of the Authority.'' 15 U.S.C. 3053(e). This provision authorizes Commission rulemaking pursuant to section 553 of Title 5, the Administrative Procedure Act (APA). The APA typically provides for notice-and-comment rulemaking, but under section 553(b)(3)(B) of the APA, general notice and the opportunity for public comment are not required with respect to a rulemaking when an ''agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.'' [4]

Here, the Commission finds, for good cause, that notice and comment is impracticable and unnecessary with respect to the document. Given the short time remaining before commencement of the Triple Crown races, providing advance notice would delay the effect of HISA's final rule until after the Kentucky Derby, defeating the rule's purpose. Obtaining comments after issuance of the rule is unnecessary because the full effect of the Commission's rule—which merely provides for a brief delay in the date of effectiveness for the ADMC Rule—will have occurred prior to the Commission's collection and consideration of any comments.

For these reasons, the Commission finds that there is good cause consistent with the public interest to issue the document without notice and comment.[5] The Commission therefore issues the document without prior notice and comment.

The APA also requires a 30-day delayed effective date, except for ''(1) substantive rules which grant or recognize an exemption or relieve a restriction; (2) interpretative rules and statements of policy; or (3) as otherwise provided by the agency for good cause.'' [6] For the same reasons noted with regard to notice and comment, and because extending the date of effectiveness for the ADMC Rule relieves a restriction, the Commission finds there is good cause for its document to take effect immediately.

III. Paperwork Reduction Act

In accordance with the requirements of the Paperwork Reduction Act (PRA), an agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget control number. This document issued by the Commission—which addresses solely the date of effectiveness for the Authority's ADMC Rule—does not involve any collection of information pursuant to the PRA.

IV. Regulatory Flexibility Act and Congressional Review Act

The Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612, requires that the Commission provide an Initial Regulatory Flexibility Analysis (IRFA) with a proposed rule and a Final Regulatory Flexibility Analysis (FRFA), if any, with a final rule. However, this obligation does not apply when an agency for good cause determines that a rulemaking is not subject to notice and comment. *See, e.g., Or. Trollers Ass'n* v. *Gutierrez,* 452 F.3d 1104, 1123–24 (9th Cir. 2006). The Commission finds that good cause exists for adopting this document without advance public notice or an opportunity for public comment. Because notice and comment are not statutorily required, the requirement to publish an analysis under the RFA does not apply to this document.

Pursuant to the Congressional Review Act (5 U.S.C. 801 through 808), the Office of Information and Regulatory Affairs has said that it would presumptively treat the type of rulemaking that the Commission announces today as not a ''major rule'' (as defined in 5 U.S.C. 804(2)). The Commission occasionally extends a compliance date for a new rule or rule amendment to give entities additional time to prepare for compliance. For example, in 2010, the FTC extended the compliance date for its Energy Labeling Rule (16 CFR part 305) (formerly, Appliance Labeling Rule) to give regulated entities additional time to incorporate new labeling requirements for light bulbs into product packaging. *See* 75 FR 81943 (Dec. 29, 2010); 76 FR 20233 (Apr. 12, 2011). The Office of Management and Budget has previously designated such extensions as ''not major.'' Because such amendments merely defer the expected economic effects of a previously adopted rule, any costs and benefits associated with the compliance date extension should be incremental to those already considered in connection with the promulgation of the underlying rule. For similar reasons, the relief should not result in major cost increases or significant adverse effects on competition, investment, or innovation. In addition, for purposes of this category, presumptively ''not major'' rules would be those in which the compliance date extension is limited to not more than one year, which will further serve to limit the economic impact of such extensions. The three-week extension of the ADMC Rule's date of effectiveness satisfies this criterion.

For the reasons stated above, the Federal Trade Commission extends the date of effectiveness for the Horseracing Integrity and Safety Authority's Anti-Doping and Medication Control Rule to May 22, 2023.

[3] *Compare, e.g.,* ADMC Rule 4222 (prohibiting all intra-articular injections within fourteen days of post time) *with* Kentucky Horse Racing Commission Withdrawal Guidelines: Thoroughbred; Standardbred; Quarter Horse, Appaloosa, and Arabian, KHRC 8–020–2 (04/2020) (prohibiting intra-articular injection of specified substances within fourteen days of post time), *available at https://khrc.ky.gov/Documents/8-020-2-Withdrawal%20Guidelines%20%20Copy.pdf.*

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10174]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by July 3, 2023.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10174 Collection of Prescription Drug Data from MA–PD, PDP and Fallout Plans/Sponsors for Medicare Part D Payments

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Revision of the currently approved collection; *Title of Information Collection:* Collection of Prescription Drug Data from MA–PD, PDP and Fallout Plans/Sponsors for Medicare Part D Payments; *Use:* The PDE data is used in the Payment Reconciliation System to perform the annual Part D payment reconciliation, any PDE data within the Coverage Gap Phase of the Part D benefit is used for invoicing in the CGDP, and the data are part of the report provided to the Secretary of the Treasury for Section 9008.

The information users will be pharmacy benefit managers (PBMs), third party administrators and pharmacies, and the PDPs, MA–PDs, Fallbacks, and other plans that offer coverage of outpatient prescription drugs under the Medicare Part D benefit to Medicare beneficiaries. The statutorily required data is used primarily for payment and is used for claim validation as well as for other legislated functions such as quality monitoring, program integrity and oversight. In addition, the PDE data are used to support operations and program development.

CMS has used PDE data to create summarized dashboards and tools, including the Medicare Part D Drug Spending Dashboard & Data, the Part D Manufacturer Rebate Summary Report, and the Medicare Part D Opioid Prescribing Mapping Tool. The data are also used in the Medicare Trustees Report. Due to the market sensitive nature of PDE data, external uses of the data are subject to significant limitations. However, CMS does analyze the data on a regular basis to determine drug cost and utilization patterns in order to inform programmatic changes and to develop informed policy in the Part D program. *Form Number:* CMS–10174 (OMB control number: 0938–0982); *Frequency:* Monthly; *Affected Public:* Private Sector, Federal Government; *Number of Respondents:* 856; *Total Annual Responses:* 1,499,065,636; *Total Annual Hours:* 62,918. (For policy questions regarding this collection contact Shelly Winston at (443) 934–3621.)

Dated: April 28, 2023.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2023–N–0623]

Antimicrobial Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; establishment of a public docket; request for comments.

SUMMARY: The Food and Drug Administration (FDA) announces a forthcoming public advisory committee meeting of the Antimicrobial Drugs Advisory Committee. The general function of the committee is to provide advice and recommendations to FDA on regulatory issues. The meeting will be open to the public. FDA is establishing a docket for public comment on this document.

DATES: The meeting will be held virtually on June 8, 2023, from 9:30 a.m. to 5 p.m. Eastern Time.

ADDRESSES: Please note that due to the impact of COVID–19, all meeting participants will be joining this advisory committee meeting via an online teleconferencing platform. Answers to commonly asked questions about FDA advisory committee meetings may be accessed at: *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm.*

FDA is establishing a docket for public comment on this meeting. The docket number is FDA–2023–N–0623. Please note that late, untimely filed comments will not be considered. The docket will close on June 7, 2023. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of June 7, 2023. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are received on or before that date.

Comments received on or before May 24, 2023, will be provided to the committee. Comments received after that date will be taken into consideration by FDA. In the event that the meeting is cancelled, FDA will continue to evaluate any relevant applications or information, and consider any comments submitted to the docket, as appropriate.

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2023–N–0623 for ''Antimicrobial Drugs Advisory Committee; Notice of Meeting; Establishment of a Public Docket; Request for Comments.'' Received comments, those filed in a timely manner (see ADDRESSES), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' FDA will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify the information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: She-Chia Jankowski, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993–0002, 240–402–5343, email: *AMDAC@fda.hhs.gov,* or FDA Advisory Committee Information Line, 1–800–741–8138 (301–443–0572 in the Washington, DC area). A notice in the **Federal Register** about last-minute modifications that impact a previously announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check FDA's website at *https://www.fda.gov/AdvisoryCommittees/default.htm* and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before the meeting.

SUPPLEMENTARY INFORMATION:

Agenda: The meeting presentations will be heard, viewed, captioned, and recorded through an online teleconferencing platform. The committee will discuss biologics license application (BLA) 761328, for nirsevimab, a long-acting respiratory syncytial virus (RSV) F protein inhibitor monoclonal antibody for intramuscular use, submitted by AstraZeneca AB. The proposed indication is prevention of RSV lower respiratory tract disease in:

- Neonates and infants born during or entering their first RSV season.
- Children up to 24 months of age who remain vulnerable to severe RSV

disease through their second RSV season.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its website prior to the meeting, the background material will be made publicly available on FDA's website at the time of the advisory committee meeting. Background material and the link to the online teleconference meeting room will be available at *https://www.fda.gov/AdvisoryCommittees/Calendar/default.htm*. Scroll down to the appropriate advisory committee meeting link. The meeting will include slide presentations with audio components to allow the presentation of materials in a manner that most closely resembles an in-person advisory committee meeting.

Procedure: Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. All electronic and written submissions submitted to the Docket (see **ADDRESSES**) on or before May 24, 2023, will be provided to the committee. Oral presentations from the public will be scheduled between approximately 1:30 p.m. and 2:30 p.m. Eastern Time. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before May 16, 2023. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by May 17, 2023.

For press inquiries, please contact the Office of Media Affairs at *fdaoma@fda.hhs.gov* or 301–796–4540.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact She-Chia Jankowski (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our website at *https://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm* for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: April 27, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–1619]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Current Good Manufacturing Practice in Manufacturing, Packaging, Labeling, or Holding Operations for Dietary Supplements

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Submit written comments (including recommendations) on the collection of information by June 2, 2023.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be submitted to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function. The OMB control number for this information collection is 0910–0606. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Amber Sanford, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–8867, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Current Good Manufacturing Practice in Manufacturing, Packaging, Labeling, or Holding Operations for Dietary Supplements—21 CFR Part 111

OMB Control Number 0910–0606—Extension

The Dietary Supplement Health and Education Act (Pub. L. 103–417) added section 402(g) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 342(g)), which provides, in part, that the Secretary of Health and Human Services may, by regulation, prescribe good manufacturing practice for dietary supplements. Section 402(g) of the FD&C Act also stipulates that such regulations will be modeled after Current Good Manufacturing Practice (CGMP) regulations for food and may not impose standards for which there are no current, and generally available, analytical methodology. Section 402(g)(1) of the FD&C Act states that a dietary supplement is adulterated if it has been prepared, packed, or held under conditions that do not meet current good manufacturing practice regulations.

Accordingly, we have issued regulations in part 111 (21 CFR part 111) establishing minimum CGMP requirements pertaining to the manufacturing, packaging, labeling, or holding of dietary supplements to ensure their quality. Included among the requirements is recordkeeping, documenting, planning, control, and improvement processes of a quality control system. Implementation of these processes in a manufacturing operation serves as the backbone to CGMP. The records must show what is being manufactured and whether the controls in place ensure the product's identity, purity, strength, and composition and that limits on contaminants and measures to prevent adulteration are effective. Further, records must show whether and what deviations from control processes occurred, facilitate evaluation and corrective action concerning these deviations (including, where necessary, whether associated batches of product should be recalled from the marketplace), and enable a manufacturer to assure that the corrective action was effective. We believe the regulations in part 111 establish the minimum manufacturing practices necessary to ensure that dietary supplements are manufactured, packaged, labeled, or held in a manner

that will ensure the quality of the dietary supplements during manufacturing, packaging, labeling, or holding operations.

Specifically, the recordkeeping requirements of the regulations in part 111 include establishing written procedures and maintaining records pertaining to: (1) personnel; (2) sanitation; (3) calibration of instruments and controls; (4) calibration, inspection, or checks of automated, mechanical, or electronic equipment; (5) maintaining, cleaning, and sanitizing equipment and utensils and other contact surfaces; (6) water used that may become a component of the dietary supplement; (7) production and process controls; (8) quality control; (9) components, packaging, labels, and product received for packaging and labeling; (10) master manufacturing and batch production; (11) laboratory operations; (12) manufacturing operations; (13) packaging and labeling operations; (14) holding and distributing operations; (15) returned dietary supplements; and (16) product complaints.

Section 111.75(a)(1) (21 CFR 111.75(a)(1)) reflects FDA's determination that manufacturers that test or examine 100 percent of the incoming dietary ingredients for identity can be assured of the identity of the ingredient. However, we recognize that it may be possible for a manufacturer to demonstrate, through various methods and processes in use over time for its particular operation, that a system of less than 100 percent identity testing would result in no material diminution of assurance of the identity of the dietary ingredient as compared to the assurance provided by 100 percent identity testing. Section 111.75(a)(1) provides an opportunity for a manufacturer to make such a showing and reduce the frequency of identity testing of components that are dietary ingredients from 100 percent to some lower frequency. Section 111.75(a)(1) also sets forth the information a manufacturer is required to submit for an exemption from the requirement of 100 percent identity testing when a manufacturer petitions the Agency for such an exemption to 100 percent identity testing under 21 CFR 10.30 and the Agency grants such exemption.

Description of Respondents: Respondents to this collection of information include manufacturers, packagers and repackagers, labelers and re-labelers, holders, distributors, warehousers, exporters, importers, large businesses, and small businesses engaged in the dietary supplement industry. Respondents are from the private sector (for-profit businesses).

In the **Federal Register** of October 14, 2022 (87 FR 62429), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL RECORDKEEPING BURDEN [1]

21 CFR section; activity	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
111.14; records of personnel practices, including documentation of training	15,000	4	60,000	1	60,000
111.23; records of physical plant sanitation practices, including pest control and water quality.	15,000	1	15,000	0.2 (12 minutes)	3,000
111.35; records regarding equipment and utensils, including calibration and sanitation practices.	400	1	400	12.5	5,000
111.95; records of production and process control systems	250	1	250	45	11,250
111.140; records that quality control personnel must make and keep	240	1,163	279,120	1	279,120
111.180; records associated with components, packaging, labels, and product received for packaging and labeling as a dietary supplement.	240	1,163	279,120	1	279,120
111.210; requirements for what the master manufacturing record must include.	240	1	240	2.5	600
111.260; requirements for what the batch production record must include	145	1,408	204,160	1	204,160
111.325; records that quality control personnel must make and keep for laboratory operations.	120	1	120	15	1,800
111.375; records of the written procedures established for manufacturing operations.	260	1	260	2	520
111.430; records of the written procedures for packaging and labeling operations.	50	1	50	12.6	630
111.475; records of product distribution and procedures for holding and distributing operations.	15,000	1	15,000	0.4 (24 minutes)	6,000
111.535; records for returned dietary supplements	110	4	440	13.5	5,940
111.570; records regarding product complaints	240	600	144,000	0.5 (30 minutes)	72,000
Total					929,140

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

TABLE 2—ESTIMATED ANNUAL REPORTING BURDEN [1]

21 CFR section; activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
111.75; petition for exemption from 100% identity testing	1	1	1	8	8

[1] There are no capital costs or operating and maintenance costs associated with this collection of information.

Based on a review of the information collection since our last request for OMB approval, we have made no adjustments to our burden estimate. We base our estimates for the recordkeeping and reporting burdens on our experience with the recordkeeping and petition activities.

Dated: April 28, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–D–2870]

Decentralized Clinical Trials for Drugs, Biological Products, and Devices; Draft Guidance for Industry, Investigators, and Other Stakeholders; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry, investigators, and other stakeholders entitled ''Decentralized Clinical Trials for Drugs, Biological Products, and Devices.'' This draft guidance provides recommendations for sponsors, investigators, and other stakeholders regarding the implementation of decentralized clinical trials (DCTs) for drugs, biological products, and devices. In this draft guidance, a DCT refers to a clinical trial where some or all of the trial-related activities occur at locations other than traditional clinical trial sites.

DATES: Submit either electronic or written comments on the draft guidance by August 1, 2023 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2022–D–2870 for ''Decentralized Clinical Trials for Drugs, Biological Products, and Devices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002; or the Office of Policy, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

FOR FURTHER INFORMATION CONTACT: Ryan Robinson, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 3342, Silver Spring, MD 20993, 240–402–9756; Diane Maloney, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911; Soma Kalb, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. G318, Silver Spring, MD 20993–0002, 301–796–6359; or Paul Kluetz, Oncology Center of Excellence, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 2223, Silver Spring, MD 20993, 301–796–9567.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry, investigators, and other stakeholders entitled ''Decentralized Clinical Trials for Drugs, Biological Products, and Devices.'' This guidance fulfills the requirements set forth in section

3606(a)(1) of the Food and Drug Omnibus Reform Act (FDORA). The content described in section 3606(b) of FDORA is further addressed through this guidance's reference to FDA's draft guidance for industry, investigators, and other stakeholders entitled ''Digital Health Technologies for Remote Data Acquisition in Clinical Investigations'' (December 2021). In this draft guidance, a DCT refers to a clinical trial where some or all of the trial-related activities occur at locations other than traditional clinical trial sites. These trial-related activities may take place at the location of trial participants or in local healthcare facilities that are close to trial participants' locations.

DCTs may involve different levels of decentralization. In fully decentralized clinical trials, all activities take place at locations other than traditional trial sites. In hybrid DCTs, some activities involve in-person visits by trial participants to traditional clinical trial sites, and other visits or activities are conducted at locations other than traditional clinical trial sites. FDA's regulatory requirements are the same for DCTs and traditional site-based clinical trials.

DCTs may include the use of local healthcare providers and local clinical laboratory facilities in the management of trial participants and the use of telehealth and digital health technologies to remotely acquire data. By allowing remote participation and reducing the need to travel for face-to-face visits, DCTs may enhance convenience for study participants, facilitate research on diseases affecting populations with limited mobility, and reduce the burden on caregivers.

The investigator in a DCT is responsible for the conduct of the DCT and oversight of individuals delegated to perform trial-related activities. In a DCT, the investigator still ensures that appropriate informed consent is obtained, the investigational product is appropriately administered in accordance with the protocol, and other required safety and efficacy assessments are done with appropriate documentation. Specific issues related to the feasibility, design, implementation, or analysis of a DCT should be discussed with the relevant FDA review division.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on ''Decentralized Clinical Trials for Drugs, Biological Products, and Devices.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521) is not required for this guidance. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in 21 CFR part 11 have been approved under OMB control number 0910–0303; the collections of information in 21 CFR part 312, including Form FDA 1572, have been approved under OMB control number 0910–0014; the collections of information in 21 CFR part 812 and 812.140 have been approved under OMB control number 0910–0078; and the collections of information in 21 CFR parts 50 and 56 have been approved under OMB control number 0910–0130.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at *https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs, https://www.fda.gov/regulatory-information/search-fda-guidance-documents,* or *https://www.regulations.gov.*

Dated: April 28, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

[FR Doc. 2023–09399 Filed 5–2–23; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2022–P–2060]

Determination That Levitra (Vardenafil Hydrochloride) Oral Tablets, 5 Milligrams, 10 Milligrams, and 20 Milligrams, Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) has determined that Levitra (vardenafil hydrochloride) oral tablets, 5 milligrams (mg), 10 mg, and 20 mg, were not withdrawn from sale for reasons of safety or effectiveness. This determination means that FDA will not begin procedures to withdraw approval of abbreviated new drug applications (ANDAs) that refer to these drug products, and it will allow FDA to continue to approve ANDAs that refer to these products as long as they meet relevant legal and regulatory requirements.

FOR FURTHER INFORMATION CONTACT: Daniel Ritterbeck, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6219, Silver Spring, MD 20993–0002, 301–796–4673, *Daniel.Ritterbeck@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Section 505(j) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(j)) allows the submission of an ANDA to market a generic version of a previously approved drug product. To obtain approval, the ANDA applicant must show, among other things, that the generic drug product: (1) has the same active ingredient(s), dosage form, route of administration, strength, conditions of use, and (with certain exceptions) labeling as the listed drug, which is a version of the drug that was previously approved, and (2) is bioequivalent to the listed drug. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

Section 505(j)(7) of the FD&C Act requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the ''Approved Drug Products With Therapeutic Equivalence Evaluations,'' which is known generally as the ''Orange Book.'' Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug's NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

Levitra (vardenafil hydrochloride) oral tablets, 5 mg, 10 mg and 20 mg, are

the subject of NDA 021400, held by Bayer HealthCare Pharmaceuticals, Inc., and initially approved on August 19, 2003. Levitra is a phosphodiesterase 5 inhibitor indicated for the treatment of erectile dysfunction.

In letters dated September 26, 2019, September 24, 2020, and September 20, 2021, Bayer HealthCare Pharmaceuticals, Inc. notified FDA that Levitra (vardenafil hydrochloride) oral tablets, 5 mg, 10 mg and 20 mg, respectively, were being discontinued, and FDA moved the drug products to the ''Discontinued Drug Product List'' section of the Orange Book.

Respira Therapeutics, Inc. submitted a citizen petition dated August 29, 2022 (Docket No. FDA–2022–P–2060), under 21 CFR 10.30, requesting that the Agency determine whether Levitra (vardenafil hydrochloride) oral tablets, 20 mg, were withdrawn from sale for reasons of safety or effectiveness. Although the citizen petition did not address the 5 mg and 10 mg strengths, those strengths have also been discontinued. On our own initiative, we have also determined whether those strengths were withdrawn for safety or effectiveness reasons.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that Levitra (vardenafil hydrochloride) oral tablets, 5 mg, 10 mg, and 20 mg, were not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that these drug products were withdrawn for reasons of safety or effectiveness. We have carefully reviewed our files for records concerning the withdrawal of Levitra (vardenafil hydrochloride) oral tablets, 5 mg, 10 mg, and 20 mg, from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have reviewed the available evidence and determined that these drug products were not withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list Levitra (vardenafil hydrochloride) oral tablets, 5 mg, 10 mg, and 20 mg, in the ''Discontinued Drug Product List'' section of the Orange Book. The ''Discontinued Drug Product List'' delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. FDA will not begin procedures to withdraw approval of approved ANDAs that refer to these drug products. Additional ANDAs for these drug products may also be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for these drug products should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: April 28, 2023.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection; Public Comment Request; Application and Other Forms Used by the National Health Service Corps Scholarship Program, the NHSC Students to Service Loan Repayment Program, and the Native Hawaiian Health Scholarship Program

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, HRSA submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA's ICR only after the 30-day comment period for this notice has closed.

DATES: Comments on this ICR should be received no later than June 2, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments,'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Samantha Miller, the Acting HRSA Information Collection Clearance Officer, at *paperwork@hrsa.gov* or call 301–594–4394.

SUPPLEMENTARY INFORMATION: *Information Collection Request Title:* Application and Other Forms Used by the National Health Service Corps (NHSC) Scholarship Program (SP), the NHSC Students to Service Loan Repayment Program (S2S LRP), and the Native Hawaiian Health Scholarship Program (NHHSP), OMB No. 0915–0146-Revision.

Abstract: Administered by HRSA's Bureau of Health Workforce, the NHSC SP, NHSC S2S LRP, and the NHHSP provide scholarships or loan repayment to qualified students who are pursuing primary care health professions education and training. In return, students agree to provide primary health care services in underserved communities located in federally designated Health Professional Shortage Areas once they are fully trained and licensed health professionals. Awards are made to applicants who demonstrate the greatest potential for successful completion of their education and training as well as commitment to provide primary health care services to communities of greatest need. The information from program applications, forms, and supporting documentation is used to select the best qualified candidates for these competitive awards, and to monitor program participants' enrollment in school, postgraduate training, and compliance with program requirements.

Although some program forms vary from program to program (see program-specific burden charts below), required forms generally include: a program application, academic and non-academic letters of recommendation, the authorization to release information, and the acceptance/verification of good academic standing report. The NHHSP is not seeking to change or add any forms or documentation.

A 60-day notice published in the **Federal Register** on February 14, 2023, 88 FR 9525–26. There were no public comments.

Need and Proposed Use of the Information: The NHSC SP, S2S LRP, and NHHSP applications, forms, and supporting documentation are used to collect necessary information from applicants and schools that enable HRSA to make selection determinations for the competitive awards and monitor compliance (via training programs and sites) with program requirements.

Likely Respondents: Qualified students who are pursuing education and training in primary care health professions and are interested in working in health professional shortage areas and schools at which such students are enrolled.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

Total Estimated Annualized Burden—Hours

NHSC Scholarship Program Application

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
NHSC Scholarship Program Application	2,575	1	2,575	2.00	5150.00
Letters of Recommendation	2,575	2	5,150	1.00	5150.00
Authorization to Release Information	2,575	1	2,575	.10	257.50
Acceptance/Verification of Good Standing Report	2,575	1	2,575	.25	643.75
Verification of Disadvantaged Background Status	615	1	615	.25	153.75
Total	*2,575		13,490		11,355.00

*Certain documents are submitted by a subset of respondents consistent with program requirements.

NHSC Awardees/Schools/Post Graduate Training Programs/Sites

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Data Collection Worksheet	400	1	400	1.00	400
Post Graduate Training Verification Form	100	1	100	.50	50
Enrollment Verification Form	600	2	1,200	.50	600
Total	*600		1,700		1,050

*Please note that the same group of respondents may complete each form as necessary.

NHSC Students to Service Loan Repayment Program Application

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
NHSC Students to Service Loan Repayment Program Application	284	1	284	2.00	568.00
Letters of Recommendation	284	1	284	2.00	568.00
Authorization to Release Information	284	1	284	.10	28.40
Acceptance/Verification of Good Standing Report	284	1	284	.25	71.00
Verification of Disadvantaged Background Status	84	1	84	.25	21.00
Total	*284		1,220		1,256.40

*Certain documents are submitted by a subset of respondents consistent with program requirements.

Native Hawaiian Health Scholarship Program Application

Form name	Number of respondents	Number of responses per respondent	Total Responses	Average burden per response (in hours)	Total burden hours
Native Hawaiian Health Scholarship Program Application	310	1.00	310	2.00	620.00
Letters of Recommendation	310	2.00	620	.25	155.00
Authorization to Release Information	310	1.00	310	.25	77.50
Acceptance/Verification of Good Standing Report	40	1.00	40	.25	10.00
Scholar Enrollment Verification Form	40	7.50	300	.50	150.00
Change in Program Curriculum Form	40	2.00	80	.25	20.00
NHHSP Graduation Documentation Form	40	1.00	40	.25	10.00
Total	*310		1,700		1,042.50

*Certain documents are submitted by a subset of respondents consistent with program requirements.

Maria G. Button,

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Findings of Research Misconduct

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: Findings of research misconduct have been made against Johnny J. He, Ph.D. (Respondent), who is a Professor, Department of Microbiology and Immunology, Rosalind Franklin University of Medicine and Science (RFUMS). Respondent engaged in research misconduct in research reported in grant applications submitted for U.S. Public Health Service (PHS) funds, specifically U01 DA056010–01 and DP1 DA056160–01 submitted to the National Institute on Drug Abuse (NIDA), National Institutes of Health (NIH), R01 AG078019–01 submitted to the National Institute on Aging (NIA), NIH, and R35 NS127233–01 submitted to the National Institute of Neurological Disorders and Stroke (NINDS), NIH. The administrative actions, including supervision for a period of three (3) years, were implemented beginning on April 17, 2023, and are detailed below.

FOR FURTHER INFORMATION CONTACT: Sheila Garrity, JD, MPH, MBA, Director, Office of Research Integrity, 1101 Wootton Parkway, Suite 240, Rockville, MD 20852, (240) 453–8200.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Office of Research Integrity (ORI) has taken final action in the following case:

Johnny J. He, Ph.D., Rosalind Franklin University of Medicine and Science: Based on the report of an investigation conducted by RFUMS, an admission by Respondent, and analysis conducted by ORI in its oversight review, ORI found that Johnny J. He, Ph.D., Professor, Department of Microbiology and Immunology, RFUMS, engaged in research misconduct in research reported in grant applications submitted for PHS funds, specifically U01 DA056010–01 and DP1 DA056160–01 submitted to NIDA, NIH, R01 AG078019–01 submitted to NIA, NIH, and R35 NS127233–01 submitted to NINDS, NIH.

ORI found that Respondent engaged in research misconduct by intentionally, knowingly, or recklessly falsifying, fabricating, and plagiarizing experimental data and text that described the research from one (1) preprint and four (4) published papers and represented the data and/or ideas as his own under different experimental conditions in four (4) NIH grant applications and in one research record. The falsified, fabricated, and plagiarized research data and text appeared in the following NIH grant applications:

- NIA, NIH, grant R01 AG078019–01, ''iTat mice to model HIV-impaired neurogenesis and accelerated aging,'' submitted on September 7, 2021
- NIDA, NIH, grant U01 DA056010–01, ''Single cell and spatial transcriptomic changes of cocaine use in the iTat HAND model,'' submitted on July 20, 2021
- NIDA, NIH, grant DP1 DA056160–01, ''Targeting epigenetic changes to understand and treat CUD in people living with HAND,'' submitted on August 13, 2021
- NINDS, NIH, grant R35 NS127233–01, ''HIV-associated neurocognitive disorder: from mechanisms to therapeutics,'' submitted on July 13, 2021

Specifically, ORI found that Respondent knowingly, intentionally, or recklessly:

- falsified, fabricated, and plagiarized research data and the text that described the research by:

—using Figures 1A and 1B of *BBB* 2020, representing wild-type and APP23 mice at 6 and 24 months, as the Respondent's own data in Figures 5A and 5B of U01 DA056010–01 and Figures 7A and 7B of R01 AG78019–01, representing wild-type and iTat mice at 6 and 12 months

—using Figures 3c and 3d of *BioRxiv* 2020, representing results in 60 days old *Snap25–IRES2–Cre* mice crossed to *Ai14* mice, as the Respondent's own data in Figure 6 of U01 DA056010–01 and Figure 8 of R01 AG078019–01, representing results in 12-weeks old iTat mice

—using, cropping, and splicing Figures 5g–5i of *BioRxiv* 2020, representing cell type transcription factors networks signature of the regulatory genome in neurons isolated from the brains of *Snap25–IRES2–Cre* mice crossed to *Ai14* mice, as the Respondent's own data in one research record intended for use in preparing figures for incorporation in U01 DA056010–01, representing spatiotemporal atlas of gene regulatory networks and biological pathways in the brain during neurogenesis and aging altered by Tat expression and HIV infection

- fabricated and plagiarized research data and text that described the research by:

—using Figure 3 of *Front Onc* 2021 as the Respondent's own data in Figure 8 of U01 DA056010–01 and Figure 10 of R01 AG078019–01

- plagiarized text by:

—using a paragraph from *Sci Adv* 2019 as the Respondent's own text describing cocaine use disorder in the section titled ''The problem description and a new therapeutic strategy for CUD in people living with HAND'' of DP1 DA056160–01

—using a paragraph from *Clin Trans Med* 2017 as the Respondent's own text describing single cell sequencing in Specific Aim 2 of both U01 DA056010–01 and R01 AG078019–01

Dr. He entered into a Voluntary Settlement Agreement (Agreement) and voluntarily agreed to the following:

(1) Respondent will have his research supervised for a period of three (3) years beginning on April 17, 2023 (the ''Supervision Period''). Prior to the submission of an application for PHS support for a research project on which Respondent's participation is proposed and prior to Respondent's participation in any capacity in PHS-supported research, Respondent will submit a plan for supervision of Respondent's duties to ORI for approval. The supervision plan must be designed to ensure the integrity of Respondent's research. Respondent will not participate in any PHS-supported research until such a supervision plan is approved by ORI. Respondent will comply with the agreed-upon supervision plan.

(2) The requirements for Respondent's supervision plan are as follows:

i. A committee of 2–3 senior faculty members at the institution who are familiar with Respondent's field of research, but not including Respondent's supervisor or collaborators, will provide oversight and guidance for a period of three (3) years from the effective date of the Agreement. The committee will review primary data from Respondent's laboratory on a quarterly basis and submit a report to ORI at six (6)-month intervals setting forth the committee meeting dates and Respondent's compliance with appropriate research standards and confirming the integrity of Respondent's research.

ii. The committee will conduct an advance review of each application for PHS funds, or report, manuscript, or abstract involving PHS-supported research in which Respondent is involved. The review will include a discussion with Respondent of the primary data represented in those documents and will include a certification to ORI that the data presented in the proposed application, report, manuscript, or abstract are supported by the research record.

(3) During the Supervision Period, Respondent will ensure that any institution employing him submits, in conjunction with each application for PHS funds, or report, manuscript, or abstract involving PHS-supported research in which Respondent is involved, a certification to ORI that the data provided by Respondent are based on actual experiments or are otherwise legitimately derived and that the data, procedures, and methodology are accurately reported and not plagiarized in the application, report, manuscript, or abstract.

(4) If no supervision plan is provided to ORI, Respondent will provide certification to ORI at the conclusion of the Supervision Period that his participation was not proposed on a research project for which an application for PHS support was submitted and that he has not participated in any capacity in PHS-supported research.

(5) During the Supervision Period, Respondent will exclude himself voluntarily from serving in any advisory or consultant capacity to PHS including, but not limited to, service on any PHS advisory committee, board, and/or peer review committee.

Dated: April 28, 2023.

Sheila Garrity,

Director, Office of Research Integrity, Office of the Assistant Secretary for Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Community Health Aide Program: Tribal Planning & Implementation

Announcement Type: New.

Funding Announcement Number: HHS–2023–IHS–TPI–0001.

Assistance Listing (Catalog of Federal Domestic Assistance or CFDA) Number: 93.382.

Key Dates

Application Deadline Date: August 1, 2023.

Earliest Anticipated Start Date: September 15, 2023.

I. Funding Opportunity Description

Statutory Authority

The Indian Health Service (IHS) is accepting applications for grants for the Community Health Aide Program (CHAP) Tribal Planning and Implementation (TPI) program. The CHAP is authorized under the Snyder Act, 25 U.S.C. 13; the Transfer Act, 42 U.S.C. 2001(a); and the Indian Health Care Improvement Act, 25 U.S.C. 1616l. The Assistance Listings section of SAM.gov (*https://sam.gov/content/home*) describes this program under 93.382.

Background

The national CHAP will provide a network of health aides trained to support licensed health professionals while providing direct health care, health promotion, and disease prevention services. These providers will work within a referral relationship under the supervision of licensed clinical providers that includes clinics, service units, and hospitals. The program will increase access to direct health services, including inpatient and outpatient visits.

The Alaska CHAP has become a model for efficient and high quality health care delivery in rural Alaska providing approximately 300,000 patient encounters per year and responding to emergencies 24 hours a day, 7 days a week. Specialized providers in dental and behavioral health were later introduced to respond to the needs of patients and address the health disparities in oral health and mental health amongst American Indians and Alaska Natives.

The national CHAP is a workforce model that includes three different provider types that act as extenders of licensed clinical supervisors. The national CHAP currently includes a behavioral health aide, community health aide, and dental health aide. Each of the health aide categories operate in a tiered level practice system. The national CHAP model provides an opportunity for increased access to care through the extension of primary care, dental, and behavioral health clinicians.

In 2010, under the permanent reauthorization of the Indian Health Care Improvement Act (IHCIA), Congress provided the Secretary of Health and Human Services, acting through the IHS, the authority to expand the Alaska CHAP program. In 2016, the IHS initiated Tribal Consultation on expanding the CHAP to the contiguous 48 states. In 2018, the IHS formed the CHAP Tribal Advisory Group (TAG) and began developing the program. In 2020, the IHS announced the national CHAP policy, which formally created the national CHAP.

Purpose

The purpose of the TPI program is to support the planning and implementation for Tribes and Tribal Organizations (T/TO) positioned to begin operating a CHAP or support a growing CHAP in the contiguous 48 states. The program is designed to support the regional flexibility required to implement a CHAP unique to the needs of individual Tribal communities across the country through the identification of feasibility factors. The focus of the program is to:

1. Develop clinical supervisor support for primary care, behavioral health, and dental health clinicians providing both direct and indirect supervision of prospective health aides;

2. Identify area and community-specific health care needs of patients that can be addressed by the health aides;

3. Identify and develop a technology infrastructure plan for the mobility and success of health aides in anticipation of providing services;

4. Develop a training plan to include partners across the T/TO's geographic region to enhance the training opportunities available to prospective health aides to include continuing education and clinical practice;

5. Identify best practices for integrating a CHAP workforce into an existing Tribal health system;

6. Address social determinants of health that impact the recruitment and retention of prospective health aides; and

7. Identify the total cost of full implementation of a CHAP within an existing Tribal health system.

II. Award Information

Funding Instrument—Grant

Estimated Funds Available

The total funding identified for fiscal year (FY) 2023 is approximately $3,000,000. Individual award amounts are anticipated to be between $900,000 and $1,000,000. The funding available for competing and subsequent continuation awards issued under this announcement is subject to the availability of appropriations and budgetary priorities of the Agency. The IHS is under no obligation to make awards that are selected for funding under this announcement.

Anticipated Number of Awards

Approximately three to five awards will be issued under this program announcement. The IHS intends to award no more than one grant per IHS area.

Period of Performance

The period of performance is 2 years.

I. Eligibility Information

1. Eligibility

To be eligible for this funding opportunity, an applicant must be one of the following as defined under 25 U.S.C. 1603:

- A federally recognized Indian Tribe as defined by 25 U.S.C. 1603(14). The term ''Indian Tribe'' means any Indian Tribe, band, nation, or other organized group or community, including any Alaska Native village or group, or regional or village corporation, as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) [43 U.S.C. 1601 *et seq.*], which is recognized as eligible for the special programs and services provided by the United States (U.S.) to Indians because of their status as Indians.
- A Tribal organization as defined by 25 U.S.C. 1603(26). The term ''Tribal organization'' has the meaning given the term in Section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 5304(l)): ''Tribal organization'' means the recognized governing body of any Indian Tribe; any legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body or which is democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities: provided that, in any case where a contract is let or grant made to an organization to perform services benefiting more than one Indian Tribe, the approval of each such Indian Tribe shall be a prerequisite to the letting or making of such contract or grant. Applicant shall submit letters of support and/or Tribal Resolutions from the Tribes to be served.

The Division of Grants Management (DGM) will notify any applicants deemed ineligible.

2. Additional Information on Eligibility

The IHS does not fund concurrent projects. If an applicant is successful under this announcement, any subsequent applications in response to other TPI announcements from the same applicant will not be funded. Applications on behalf of individuals (including sole proprietorships) and foreign organizations are not eligible and will be disqualified from competitive review and funding under this funding opportunity.

Specifically, an applicant may not apply to both this opportunity, TPI, and the CHAP Tribal Assessment and Planning (TAP) opportunity (number HHS–2023–IHS–TAP–0001).

An organization currently carrying out a CHAP in the U.S. in accordance with 25 U.S.C. 1616l through an Indian Self-Determination and Education Assistance Act (ISDEAA) agreement is eligible to apply, but may not utilize the funds to carry out a CHAP.

Note: Please refer to Section IV.2 (Application and Submission Information/ Subsection 2, Content and Form of Application Submission) for additional proof of applicant status documents required, such as Tribal Resolutions, proof of non-profit status, etc.

3. Cost Sharing or Matching

The IHS does not require matching funds or cost sharing for grants or cooperative agreements.

4. Other Requirements

Applications with budget requests that exceed the highest dollar amount outlined under Section II Award Information, Estimated Funds Available, or exceed the period of performance outlined under Section II Award Information, Period of Performance, are considered not responsive and will not be reviewed. The DGM will notify the applicant.

Additional Required Documentation

Tribal Resolution

The DGM must receive an official, signed Tribal Resolution prior to issuing a Notice of Award (NoA) to any T/O selected for funding. An applicant that is proposing a project affecting another Indian Tribe must include resolutions from all affected Tribes to be served. However, if an official signed Tribal Resolution cannot be submitted with the application prior to the application deadline date, a draft Tribal Resolution must be submitted with the application by the deadline date in order for the application to be considered complete and eligible for review. The draft Tribal Resolution is not in lieu of the required signed resolution but is acceptable until a signed resolution is received. If an application without a signed Tribal Resolution is selected for funding, the applicant will be contacted by the Grants Management Specialist (GMS) listed in this funding announcement and given 90 days to submit an official signed Tribal Resolution to the GMS. If the signed Tribal Resolution is not received within 90 days, the award will be forfeited.

Applicants organized with a governing structure other than a Tribal council may submit an equivalent document commensurate with their governing organization.

Proof of Nonprofit Status

Organizations claiming nonprofit status must submit a current copy of the 501(c)(3) Certificate with the application.

IV. Application and Submission Information

Grants.gov uses a Workspace model for accepting applications. The Workspace consists of several online forms and three forms in which to upload documents—Project Narrative, Budget Narrative, and Other Documents. Give your files brief descriptive names. The filenames are key in finding specific documents during the objective review and in processing awards. Upload all requested and optional documents individually, rather than combining them into a single file. Creating a single file creates confusion when trying to find specific documents. Such confusion can contribute to delays in processing awards, and could lead to lower scores during the objective review.

1. Obtaining Application Materials

The application package and detailed instructions for this announcement are available on *https://www.Grants.gov.*

Please direct questions regarding the application process to *DGM@ihs.gov.*

2. Content and Form Application Submission

Mandatory documents for all applicants include:

- Application forms:

1. SF–424, Application for Federal Assistance.

2. SF–424A, Budget Information—Non-Construction Programs.

3. SF–424B, Assurances—Non-Construction Programs.

4. Project Abstract Summary form.

- Project Narrative (not to exceed 15 pages). See Section IV.2.A Project Narrative for instructions.

1. Background information on the organization.

2. Proposed scope of work, objectives, and activities that provide a description of what the applicant plans to accomplish.

- Budget Justification and Narrative (not to exceed 5 pages). See Section IV.2.B Budget Narrative for instructions.
- One-page Timeframe Chart.
- Tribal Resolution(s).
- Letters of Support from organization's Board of Directors (if applicable).
- 501(c)(3) Certificate.
- Biographical sketches for all Key Personnel.
- Contractor/Consultant resumes or qualifications and scope of work.
- Disclosure of Lobbying Activities (SF–LLL), if applicant conducts reportable lobbying.
- Certification Regarding Lobbying (GG-Lobbying Form).
- Copy of current Negotiated Indirect Cost rate (IDC) agreement (required in order to receive IDC).
- Organizational Chart (optional).
- Documentation of current Office of Management and Budget (OMB) Financial Audit (if applicable).

Acceptable forms of documentation include:

1. Email confirmation from Federal Audit Clearinghouse (FAC) that audits were submitted; or

2. Face sheets from audit reports. Applicants can find these on the FAC website at *https://facdissem.census.gov/.*

Public Policy Requirements

All Federal public policies apply to IHS grants and cooperative agreements. Pursuant to 45 CFR 80.3(d), an individual shall not be deemed subjected to discrimination by reason of their exclusion from benefits limited by Federal law to individuals eligible for benefits and services from the IHS. See *https://www.hhs.gov/grants/grants/grants-policies-regulations/index.html.*

Requirements for Project and Budget Narratives

A. *Project Narrative:* This narrative should be a separate document that is no more than 15 pages and must: (1) have consecutively numbered pages; (2) use black font 12 points or larger; (3) be single-spaced; and (4) be formatted to fit standard letter paper (8½ × 11 inches). Do not combine this document with any others.

Be sure to succinctly answer all questions listed under the evaluation criteria (refer to Section V.1, Evaluation Criteria) and place all responses and required information in the correct section noted below or they will not be considered or scored. If the narrative exceeds the page limit, the reviewers will be directed to ignore any content beyond the page limit. The 15-page limit for the project narrative does not include the work plan, standard forms, Tribal Resolutions, budget, budget narratives, and/or other items. Page limits for each section within the project narrative are guidelines, not hard limits.

There are three parts to the project narrative: Part 1—Program Information; Part 2—Program Planning; Part 3—Program Evaluation; and Part 4—Program Report. See below for additional details about what must be included in the narrative.

The page limits below are for each narrative and budget submitted.

Part 1: Program Information (limit—4 pages)

Section 1: Community Profile

Describe the demographics of the community including but not limited to geography, languages, age, and socioeconomic status. The community profile should include data specific to the community that would benefit from the implementation of the CHAP. Include a brief summary of information obtained through use of a Tribal and Assessment Planning Grant if applicable.

Section 2: Health & Infrastructure Needs

Describe the community's current health disparities related to primary, behavioral, and oral health care. The needs section should provide facts and evidence related to infrastructure barriers (*e.g.,* recruitment, retention, and access to facilities). Include a brief summary of information obtained through use of a Tribal and Assessment Planning Grant if applicable.

Section 3: Organizational Capacity

Describe the T/TO's current health program activities, how long it has been operating, and what programs or services are currently being provided. Describe in full the organization's infrastructure and its ability to assess the feasibility of implementing a CHAP and identifying significant barriers that could prohibit the implementation. Include a brief summary of any information obtained through use of a Tribal Assessment and Planning Grant.

Part 2: Program Planning and Evaluation (limit—6 pages)

Section 1: Program Plans

Describe in full the direction the T/TO plans to take in the CHAP TPI. The program plan should identify the plan, including how all aspects of the implementation will be based in Tribal culture and how the program plan will address Tribal infrastructure needs specific to:

- Clinical infrastructure and clinical operations.
- Workforce development including supervision plans for CHAP providers that address community and region specific needs.
- Training infrastructure (including continuing education).
- Technology infrastructure.
- System integration.
- Implementation cost.

Section 2: Program Activities

Describe in full how the applicant will develop a robust clinical infrastructure to support clinical operations specific to CHAP providers. The activities should include how the applicant will correlate the community health needs with the CHAP program needs, including specific cultural elements. Include how the applicant will develop position descriptions, the scope of work of health aides, policy development, and a detailed plan of how to adjust the clinical operations to incorporate CHAP providers. Describe how CHAP providers will be trained, specific to the regional resources, include continuing education training plans. Describe how the CHAP providers will be supervised including staffing plans for CHAP provider supervision. List the available technology and detail how the current technology infrastructure will be utilized to support the CHAP providers, including aiding in provider mobility or how it will be built specific to the needs of the CHAP program, both at the provider and the clinic level. Detail how the CHAP program will be integrated with the current system to provide maximization of provider and program to improve community health, including cultural components the program is uniquely positioned or

designed to address. Provide a detailed plan of how the award funds will be used by the applicant to implement the CHAP program, specific to the above implementation components.

Section 3: Staffing Plan

Describe key staff tasked with carrying out the program activities carried out in Section 2. Applicants are highly encouraged to partner with other key stakeholders within the T/TO's region for a robust understanding of the needs and implications of implementing a CHAP into their respective communities.

Section 4: Timeline

Describe a timeline not to exceed 2 years for the completion of the program plan, activities, and evaluation plan. Provide a timeline chart depicting a realistic timeline that details all major activities, milestones, and applicable staffing plans. The timeline should include the projected progress report due at the midpoint of the project period. The timeline chart should not exceed one page.

Part 3: Program Evaluation

Section 1: Evaluation Plan

Please identify and describe significant program activities and achievements associated with the delivery of quality health services. Provide a plan to provide a comparison of the actual accomplishments to the goals established for the project period, or if applicable, provide justification for the lack of progress. The evaluation plan should address major categories related to (See Logic Model in Appendix):

- Clinical infrastructure and clinical operations. Describe how clinical infrastructure and operations have changed to incorporate and integrate the CHAP program. Include any data on referrals to CHAP providers, number of clinic providers making referrals to CHAP providers and demonstrated increases in health promotion and disease prevention efforts.
- Workforce development including supervision plans for CHAP providers that address community and region specific needs. Include data on outreach and recruiting activities, number of CHAP applications received, supervisors trained for each provider type.
- Training infrastructure (including continuing education). Describe where the training for each CHAP discipline will be provided and whether it will be delivered in person, virtually or hybrid. Summarize how oversight will be maintained to assure a high-quality training is achieved. Detail how each aspiring or advancing CHAP provider will be supported and supervised throughout any hands-on training. Include data on each item if available.
- Technology infrastructure. Describe what technology will be used and how it supports the CHAP program. Detail any changes made to existing technology infrastructure to incorporate CHAP providers. Include how CHAP provider charting will be integrated into electronic health records. List specific technology purchased or transferred to the CHAP program to support CHAP providers. Include information on network accessibility, specifically any barriers to accessibility and how this can be overcome.
- System integration. Describe in detail what barriers to integration have been overcome and how. List patient outreach and education, trainings provided to clinic staff, trainings specific to providers on how CHAP providers will integrate and extend licensed providers to achieve best practices and health benefits. Describe specific populations where CHAP may be focused such as prenatal, child vaccination, dental sealant placement, substance abuse screening, hospital discharge follow up, etc., and how the CHAP providers integrate their visits with existing clinic systems. Include any data that supports system integration changes.
- Implementation cost. Provide details on budgeted items, explaining any overages and what happened that created overages. Explain how any excess funds were re-allocated to fully utilize all grant funds.

Part 4: Program Report (limit—5 pages)

Section 1: Describe your organization's significant program activities and accomplishments over the past 5 years associated with the goals of this announcement. Please identify and describe significant program activities and achievements associated with the planning and implementation of the CHAP program. Provide a comparison of the actual accomplishments to the goals established for the project period, or if applicable, provide justification for the lack of progress.

B. Budget Narrative (limit—5 pages)

Provide a budget narrative that explains the amounts requested for each line item of the budget from the SF–424A (Budget Information for Non-Construction Programs) for the first year of the project. The applicant can submit with the budget narrative a more detailed spreadsheet than is provided by the SF–424A (the spreadsheet will not be considered part of the budget narrative). The budget narrative should specifically describe how each item would support the achievement of proposed objectives. Be very careful about showing how each item in the ''Other'' category is justified. Do NOT use the budget narrative to expand the project narrative.

3. Submission Dates and Times

Applications must be submitted through *Grants.gov* by 11:59 p.m. Eastern Time on the Application Deadline Date. Any application received after the application deadline will not be accepted for review. *Grants.gov* will notify the applicant via email if the application is rejected.

If technical challenges arise and assistance is required with the application process, contact *Grants.gov* Customer Support (see contact information at *https://www.Grants.gov*). If problems persist, contact Mr. Paul Gettys, Deputy Director, DGM, by email at *DGM@ihs.gov.* Please be sure to contact Mr. Gettys at least 10 days prior to the application deadline. Please do not contact the DGM until you have received a *Grants.gov* tracking number. In the event you are not able to obtain a tracking number, call the DGM as soon as possible.

The IHS will not acknowledge receipt of applications.

4. Intergovernmental Review

Executive Order 12372 requiring intergovernmental review is not applicable to this program.

5. Funding Restrictions

- Pre-award costs are allowable up to 90 days before the start date of the award provided the costs are otherwise allowable if awarded. Pre-award costs are incurred at the risk of the applicant.
- The available funds are inclusive of direct and indirect costs.
- Only one grant may be awarded per applicant.

6. Electronic Submission Requirements

All applications must be submitted via *Grants.gov*. Please use the *https://www.Grants.gov* website to submit an application. Find the application by selecting the ''Search Grants'' link on the homepage. Follow the instructions for submitting an application under the Package tab. No other method of application submission is acceptable.

If you cannot submit an application through *Grants.gov*, you must request a waiver prior to the application due date. You must submit your waiver request by email to *DGM@ihs.gov.* Your waiver request must include clear justification for the need to deviate from the required

application submission process. The IHS will not accept any applications submitted through any means outside of *Grants.gov* without an approved waiver.

If the DGM approves your waiver request, you will receive a confirmation of approval email containing submission instructions. You must include a copy of the written approval with the application submitted to the DGM. Applications that do not include a copy of the waiver approval from the DGM will not be reviewed. The Grants Management Officer of the DGM will notify the applicant via email of this decision. Applications submitted under waiver must be received by the DGM no later than 5:00 p.m. Eastern Time on the Application Deadline Date. Late applications will not be accepted for processing. Applicants that do not register for both the System for Award Management (SAM) and *Grants.gov* and/or fail to request timely assistance with technical issues will not be considered for a waiver to submit an application via alternative method.

Please be aware of the following:

- Please search for the application package in *https://www.Grants.gov* by entering the Assistance Listing number or the Funding Opportunity Number. Both numbers are located in the header of this announcement.
- If you experience technical challenges while submitting your application, please contact *Grants.gov* Customer Support (see contact information at *https://www.Grants.gov*).
- Upon contacting *Grants.gov*, obtain a tracking number as proof of contact. The tracking number is helpful if there are technical issues that cannot be resolved and a waiver from the agency must be obtained.
- Applicants are strongly encouraged not to wait until the deadline date to begin the application process through *Grants.gov* as the registration process for SAM and *Grants.gov* could take up to 20 working days.
- Please follow the instructions on *Grants.gov* to include additional documentation that may be requested by this funding announcement.
- Applicants must comply with any page limits described in this funding announcement.
- After submitting the application, you will receive an automatic acknowledgment from *Grants.gov* that contains a *Grants.gov* tracking number. The IHS will not notify you that the application has been received.

System for Award Management

Organizations that are not registered with the System for Award Management (SAM) must access the SAM online registration through the SAM home page at *https://sam.gov.* Organizations based in the U.S. will also need to provide an Employer Identification Number from the Internal Revenue Service that may take an additional 2–5 weeks to become active. Please see *SAM.gov* for details on the registration process and timeline. Registration with the SAM is free of charge but can take several weeks to process. Applicants may register online at *https://sam.gov.*

Unique Entity Identifier

Your *SAM.gov* registration now includes a Unique Entity Identifier (UEI), generated by *SAM.gov*, which replaces the DUNS number obtained from Dun and Bradstreet. *SAM.gov* registration no longer requires a DUNS number.

Check your organization's *SAM.gov* registration as soon as you decide to apply for this program. If your *SAM.gov* registration is expired, you will not be able to submit an application. It can take several weeks to renew it or resolve any issues with your registration, so do not wait.

Check your *Grants.gov* registration. Registration and role assignments in *Grants.gov* are self-serve functions. One user for your organization will have the authority to approve role assignments, and these must be approved for active users in order to ensure someone in your organization has the necessary access to submit an application.

The Federal Funding Accountability and Transparency Act of 2006, as amended (''Transparency Act''), requires all HHS awardees to report information on sub-awards. Accordingly, all IHS awardees must notify potential first-tier sub-awardees that no entity may receive a first-tier sub-award unless the entity has provided its UEI number to the prime awardee organization. This requirement ensures the use of a universal identifier to enhance the quality of information available to the public pursuant to the Transparency Act.

Additional information on implementing the Transparency Act, including the specific requirements for SAM, are available on the DGM Grants Management, Policy Topics web page at *https://www.ihs.gov/dgm/policytopics/.*

V. Application Review Information

Possible points assigned to each section are noted in parentheses. The project narrative and budget narrative should include only the first year of activities. The project narrative should be written in a manner that is clear to outside reviewers unfamiliar with prior related activities of the applicant. It should be well organized, succinct, and contain all information necessary for reviewers to fully understand the project. Attachments requested in the criteria do not count toward the page limit for the narratives. Points will be assigned to each evaluation criteria adding up to a total of 100 possible points. Points are assigned as follows:

1. Evaluation Criteria

A. Introduction and Need for Assistance (10 points)

Identify the proposed project and plans to fully implement a CHAP within their community. The needs should clearly identify the existing health system and how the CHAP will be integrated to meet the health needs of the community in the fields of behavioral, oral, and primary health care.

B. Project Objective(s), Work Plan, and Approach (30 points)

The work plan should be comprised of two key parts: Program Information and Program Plan. Provide information related to three key sections: community profile; health and infrastructure; and organizational capacity. The Program Information part should demonstrate a robust community profile that highlights the existing health system, demographical data of community members and user population, and a detailed description of the T/TO carrying out the proposed activity. An acceptable Program Plan expecting to receive full points should include details of the applicants plan to address the program objective. The Program Plan should address at a minimum key activities related to clinical supervisor support, scope of work, technology infrastructure, training infrastructure, integration best practices, and auxiliary support to health aides that address social determinants.

C. Program Evaluation (30 points)

The program evaluation should be comprised of two key sections: evaluation plan and outcome report. The evaluation plan should address major categories related to clinical supervisor support, enhanced scope of work, technology infrastructure, training infrastructure, integration best practices, auxiliary support, and full implementation costs (See Sample Logic Model in Appendix). The evaluation plan should identify how the T/TO plans to fully integrate CHAP. The evaluation should include total implementation costs based on the implementation plan and program plan identified including any significant

implementation barriers. List measurable and attainable goals with explicit timelines that detail expectation of findings. The Outcome Report should describe in full the findings of the program plan, evaluation, determination on stage of readiness for implementation and implementation activities. The outcome report should organize the findings into at least five of the six categories:

1. Clinical infrastructure and clinical operations.
2. Workforce development including supervision plans for CHAP providers that address community and region specific needs.
3. Training infrastructure (including continuing education).
4. Technology infrastructure.
5. System integration.
6. Implementation cost.

Applicants are encouraged to identify additional categories above these six and may choose to develop subcategories that best fit the program plan.

D. Organizational Capabilities, Key Personnel, and Qualifications (10 points)

Provide a detailed biographical sketch of each member of key personnel assigned to carry out the objectives of the program plan. The sketches should detail the qualifications and expertise of identified staff.

E. Categorical Budget and Budget Justification (20 points)

Provide a detailed budget of each expenditure directly related to the identified program activities.

Additional documents can be uploaded as Other Attachments in *Grants.gov*. These can include:

- Work plan, logic model, and/or timeline for proposed objectives.
- Position descriptions for key staff.
- Resumes of key staff that reflect current duties.
- Consultant or contractor proposed scope of work and letter of commitment (if applicable).
- Current Indirect Cost Rate Agreement.
- Organizational chart.
- Map of area identifying project location(s).
- Additional documents to support narrative (*i.e.* data tables, key news articles, etc.).

2. Review and Selection

Each application will be prescreened for eligibility and completeness as outlined in this funding announcement. Applications that meet the eligibility criteria shall be reviewed for merit by the Review Committee (RC) based on the evaluation criteria. Incomplete applications and applications that are not responsive to the administrative thresholds (budget limit, period of performance limit) will not be referred to the RC and will not be funded. The DGM will notify the applicant of this determination.

Applicants must address all program requirements and provide all required documentation.

3. Notifications of Disposition

All applicants will receive an Executive Summary Statement from the IHS Office of Clinical and Preventive Services within 30 days of the conclusion of the RC outlining the strengths and weaknesses of their application. The summary statement will be sent to the Authorizing Official identified on the face page (SF–424) of the application.

A. Award Notices for Funded Applications

The NoA is the authorizing document for which funds are dispersed to the approved entities and reflects the amount of Federal funds awarded, the purpose of the award, the terms and conditions of the award, the effective date of the award, the budget period, and period of performance. Each entity approved for funding must have a user account in GrantSolutions in order to retrieve the NoA. Please see the Agency Contacts list in Section VII for the systems contact information.

B. Approved but Unfunded Applications

Approved applications not funded due to lack of available funds will be held for 1 year. If funding becomes available during the course of the year, the application may be reconsidered.

Note: Any correspondence other than the official NoA executed by an IHS grants management official announcing to the project director that an award has been made to their organization is not an authorization to implement their program on behalf of the IHS.

VI. Award Administration Information

1. Administrative Requirements

Awards issued under this announcement are subject to, and are administered in accordance with, the following regulations and policies:

A. The criteria as outlined in this program announcement.

B. *Administrative Regulations for Grants:*

- Uniform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards currently in effect or implemented during the period of award, other Department regulations and policies in effect at the time of award, and applicable statutory provisions. At the time of publication, this includes 45 CFR part 75, at *https://www.govinfo.gov/content/pkg/CFR-2021-title45-vol1/pdf/CFR-2021-title45-vol1-part75.pdf.*
- Please review all HHS regulatory provisions for Termination at 45 CFR 75.372, at the time of this publication located at *https://www.govinfo.gov/content/pkg/CFR-2021-title45-vol1/pdf/CFR-2021-title45-vol1-sec75-372.pdf.*

C. *Grants Policy:*

- HHS Grants Policy Statement, Revised January 2007, at *https://www.hhs.gov/sites/default/files/grants/grants/policies-regulations/hhsgps107.pdf.*

D. *Cost Principles:*

- Uniform Administrative Requirements for HHS Awards, ''Cost Principles,'' at 45 CFR part 75 subpart E, at the time of this publication located at *https://www.govinfo.gov/content/pkg/CFR-2021-title45-vol1/pdf/CFR-2021-title45-vol1-part75-subpartE.pdf.*

E. *Audit Requirements:*

- Uniform Administrative Requirements for HHS Awards, ''Audit Requirements,'' at 45 CFR part 75 subpart F, at the time of this publication located at *https://www.govinfo.gov/content/pkg/CFR-2021-title45-vol1/pdf/CFR-2021-title45-vol1-part75-subpartF.pdf.*

F. As of August 13, 2020, 2 CFR part 200 was updated to include a prohibition on certain telecommunications and video surveillance services or equipment. This prohibition is described in 2 CFR part 200.216. This will also be described in the terms and conditions of every IHS grant and cooperative agreement awarded on or after August 13, 2020.

2. Indirect Costs

This section applies to all recipients that request reimbursement of IDC in their application budget. In accordance with HHS Grants Policy Statement, Part II–27, the IHS requires applicants to obtain a current IDC rate agreement and submit it to the DGM prior to the DGM issuing an award. The rate agreement must be prepared in accordance with the applicable cost principles and guidance as provided by the cognizant agency or office. A current rate covers the applicable award activities under the current award's budget period. If the current rate agreement is not on file with the DGM at the time of award, the IDC portion of the budget will be restricted. The restrictions remain in

place until the current rate agreement is provided to the DGM.

Per 2 CFR 200.414(f) Indirect (F&A) costs,

> any non-Federal entity (NFE) [*i.e.,* applicant] that does not have a current negotiated rate, . . . may elect to charge a de minimis rate of 10 percent of modified total direct costs which may be used indefinitely. As described in Section 200.403, costs must be consistently charged as either indirect or direct costs, but may not be double charged or inconsistently charged as both. If chosen, this methodology once elected must be used consistently for all Federal awards until such time as the NFE chooses to negotiate for a rate, which the NFE may apply to do at any time.

Electing to charge a de minimis rate of 10 percent can be used by applicants that have received an approved negotiated indirect cost rate from HHS or another cognizant Federal agency. Applicants awaiting approval of their indirect cost proposal may request the 10 percent de minimis rate. When the applicant chooses this method, costs included in the indirect cost pool must not be charged as direct costs to the award.

Available funds are inclusive of direct and appropriate indirect costs. Approved indirect funds are awarded as part of the award amount, and no additional funds will be provided.

Generally, IDC rates for IHS recipients are negotiated with the Division of Cost Allocation at *https://rates.psc.gov/* or the Department of the Interior (Interior Business Center) at *https://ibc.doi.gov/ICS/tribal.* For questions regarding the indirect cost policy, please write to *DGM@ihs.gov.*

3. Reporting Requirements

The recipient must submit required reports consistent with the applicable deadlines. Failure to submit required reports within the time allowed may result in suspension or termination of an active award, withholding of additional awards for the project, or other enforcement actions such as withholding of payments or converting to the reimbursement method of payment. Continued failure to submit required reports may result in the imposition of special award provisions and/or the non-funding or non-award of other eligible projects or activities. This requirement applies whether the delinquency is attributable to the failure of the recipient organization or the individual responsible for preparation of the reports. Per DGM policy, all reports must be submitted electronically by attaching them as a ''Grant Note'' in GrantSolutions. Personnel responsible for submitting reports will be required to obtain a login and password for GrantSolutions. Please use the form under the Recipient User section of *https://www.grantsolutions.gov/home/getting-started-request-a-user-account/.* Download the Recipient User Account Request Form, fill it out completely, and submit it as described on the web page and in the form.

The reporting requirements for this program are noted below.

A. Progress Reports

Program progress reports are required annually. The progress reports are due within 90 days after the budget period ends (specific dates will be listed in the NoA Terms and Conditions). These reports must include a brief comparison of actual accomplishments to the goals established for the period, a summary of progress to date or, if applicable, provide sound justification for the lack of progress, and other pertinent information as required. A final report must be submitted within 120 days of expiration of the period of performance.

B. Financial Reports

Federal Financial Reports are due 90 days after the end of each budget period, and a final report is due 120 days after the end of the period of performance. Recipients are responsible and accountable for reporting accurate information on all required reports: the Progress Reports and the Federal Financial Report.

Failure to submit timely reports may result in adverse award actions blocking access to funds.

C. Data Collection and Reporting

At the conclusion of the program period, the outcome report should detail how the T/TO plans to completely integrate CHAP into their Tribal health system and list major barriers that could potentially impact full integration. The Outcome Report should describe in full the findings of the program plan and evaluation, and plans for implementation. The outcome report should organize the findings of the key categories:

1. Clinical Supervisor Support.
2. Scope of Practice.
3. Technology Infrastructure.
4. Training Plan.
5. System Integration.
6. Auxiliary Support to Address Social Determinants.

Based on the findings and measureable outcomes of the categories, the applicant should explicitly identify the implementation plan and projected cost associated with full implementation.

D. Federal Sub-Award Reporting System (FSRS)

This award may be subject to the Transparency Act sub-award and executive compensation reporting requirements of 2 CFR part 170.

The Transparency Act requires the OMB to establish a single searchable database, accessible to the public, with information on financial assistance awards made by Federal agencies. The Transparency Act also includes a requirement for recipients of Federal awards to report information about first-tier sub-awards and executive compensation under Federal assistance awards.

The IHS has implemented a Term of Award into all IHS Standard Terms and Conditions, NoAs, and funding announcements regarding the FSRS reporting requirement. This IHS Term of Award is applicable to all IHS grant and cooperative agreements issued on or after October 1, 2010, with a $25,000 sub-award obligation threshold met for any specific reporting period.

For the full IHS award term implementing this requirement and additional award applicability information, visit the DGM Grants Management website at *https://www.ihs.gov/dgm/policytopics/.*

E. Non-Discrimination Legal Requirements for Awardees of Federal Financial Assistance (FFA)

The recipient must administer the project in compliance with Federal civil rights laws, where applicable, that prohibit discrimination on the basis of race, color, national origin, disability, age, and comply with applicable conscience protections. The recipient must comply with applicable laws that prohibit discrimination on the basis of sex, which includes discrimination on the basis of gender identity, sexual orientation, and pregnancy. Compliance with these laws requires taking reasonable steps to provide meaningful access to persons with limited English proficiency and providing programs that are accessible to and usable by persons with disabilities. The HHS Office for Civil Rights provides guidance on complying with civil rights laws enforced by HHS. See *https://www.hhs.gov/civil-rights/for-providers/provider-obligations/index.html* and *https://www.hhs.gov/civil-rights/for-individuals/nondiscrimination/index.html.*

- Recipients of FFA must ensure that their programs are accessible to persons with limited English proficiency. For guidance on meeting your legal obligation to take reasonable steps to

ensure meaningful access to your programs or activities by limited English proficiency individuals, see *https://www.hhs.gov/civil-rights/for-individuals/special-topics/limited-english-proficiency/fact-sheet-guidance/index.html* and *https://www.lep.gov.*

- For information on your specific legal obligations for serving qualified individuals with disabilities, including reasonable modifications and making services accessible to them, see *https://www.hhs.gov/civil-rights/for-individuals/disability/index.html.*
- HHS funded health and education programs must be administered in an environment free of sexual harassment. See *https://www.hhs.gov/civil-rights/for-individuals/sex-discrimination/index.html.*
- For guidance on administering your program in compliance with applicable Federal religious nondiscrimination laws and applicable Federal conscience protection and associated anti-discrimination laws, see *https://www.hhs.gov/conscience/conscience-protections/index.html* and *https://www.hhs.gov/conscience/religious-freedom/index.html.*
- Pursuant to 45 CFR 80.3(d), an individual shall not be deemed subjected to discrimination by reason of their exclusion from benefits limited by Federal law to individuals eligible for benefits and services from the IHS.

F. Federal Awardee Performance and Integrity Information System (FAPIIS)

The IHS is required to review and consider any information about the applicant that is in the FAPIIS at *https://www.fapiis.gov/fapiis/#/home* before making any award in excess of the simplified acquisition threshold (currently $250,000) over the period of performance. An applicant may review and comment on any information about itself that a Federal awarding agency previously entered. The IHS will consider any comments by the applicant, in addition to other information in FAPIIS, in making a judgment about the applicant's integrity, business ethics, and record of performance under Federal awards when completing the review of risk posed by applicants, as described in 45 CFR 75.205.

As required by 45 CFR part 75 Appendix XII of the Uniform Guidance, NFEs are required to disclose in FAPIIS any information about criminal, civil, and administrative proceedings, and/or affirm that there is no new information to provide. This applies to NFEs that receive Federal awards (currently active grants, cooperative agreements, and procurement contracts) greater than $10 million for any period of time during the period of performance of an award/project.

Mandatory Disclosure Requirements

As required by 2 CFR part 200 of the Uniform Guidance, and the HHS implementing regulations at 45 CFR part 75, the IHS must require an NFE or an applicant for a Federal award to disclose, in a timely manner, in writing to the IHS or pass-through entity all violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. All applicants and recipients must disclose in writing, in a timely manner, to the IHS and to the HHS Office of Inspector General all information related to violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. 45 CFR 75.113.

Disclosures must be sent in writing to:

U.S. Department of Health and Human Services, Indian Health Service, Division of Grants Management, ATTN: Marsha Brookins, Director, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857, (Include ''Mandatory Grant Disclosures'' in subject line), Office: (301) 443–5204, Fax: (301) 594–0899, Email: *DGM@ihs.gov*.

and

U.S. Department of Health and Human Services, Office of Inspector General, ATTN: Mandatory Grant Disclosures, Intake Coordinator, 330 Independence Avenue SW, Cohen Building, Room 5527, Washington, DC 20201, URL: *https://oig.hhs.gov/fraud/report-fraud/*, (Include ''Mandatory Grant Disclosures'' in subject line,), Fax: (202) 205–0604 (Include ''Mandatory Grant Disclosures'' in subject line) or Email: *MandatoryGranteeDisclosures@oig.hhs.gov*.

Failure to make required disclosures can result in any of the remedies described in 45 CFR 75.371. Remedies for noncompliance, including suspension or debarment (see 2 CFR part 180 and 2 CFR part 376).

VII. Agency Contacts

1. Questions on the programmatic issues may be directed to: Donna E. Enfield, Public Health Advisor, Office of Clinical and Preventive Services, 5600 Fishers Lane, Mail Stop: 08N34A, Rockville, MD 20857, Phone: (301) 526–6966, Fax: (301) 594–6213, Email: *IHSCHAP@ihs.gov*.

2. Questions on grants management and fiscal matters may be directed to: Indian Health Service, Division of Grants Management, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857, Email: *DGM@ihs.gov*.

3. For technical assistance with *Grants.gov*, please contact the *Grants.gov* help desk at (800) 518–4726, or by email at *support@grants.gov.*

4. For technical assistance with GrantSolutions, please contact the GrantSolutions help desk at (866) 577–0771, or by email at *help@grantsolutions.gov.*

VIII. Other Information

The Public Health Service strongly encourages all grant, cooperative agreement, and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of the facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the HHS mission to protect and advance the physical and mental health of the American people.

Roselyn Tso,

Director, Indian Health Service.

BILLING CODE 4165–16–P

Appendix

SAMPLE CHAP Tribal Planning and Implementation (TPI) Grant LOGIC MODEL			
Category	Assess	Solution for Implementation	Data
Clinical Supervisor Support	- CHAP integration will require two additional clinicians at the largest health care facility - Supervisory functions will account for 25 percent of the clinical staff job functions requiring a restructure	- Develop a Memorandum of Understanding (MOU) to share licensed clinicians across the facilities where 1 day a week clinicians serve as clinical supervisors - Reassess the clinic workload to evenly distribute the clinical supervision load amongst licensed staff - Develop training for licensed clinician on supervising paraprofessionals	- Number of clinics with eligible clinicians for supervision duties - Quantify the number of staff working within a care team in primary care, behavioral health, and dental health - Number of trainings by workforce on care team
Scope of Practice	- Instances of suicide ideation are 4x times higher in the community requiring additional training such as QPR for providers	- Partner with the local IHS facility and the Area office to recommend an additional 30 hours of training in suicide prevention	- Number of appropriate suicide prevention models that are culturally appropriate - Number of hours for training requirements above National Standards and Procedures

Technology Infrastructure	- Aim to station a behavioral health aide at the local school and a community health aide at the local community center, but there is a lack of internet or mobile technology for field notes	- Develop an MOU with non-clinical sites for space specific to providing health services. - Purchase tablets for the clinic to assign to health aides so they may enter field notes regardless of where they see patients.	- Number of non-clinical sites appropriate to station a behavioral, community, and dental health aide - Number of applicable level of health BHA, CHA, and DHA for each identified site - Projected costs for tablets for health aides - Projected cost for mobile internet for health aides
Training Infrastructure	- Tribe currently operates a training facility that needs to have an updated curriculum to align with the standards and procedures for training - The closest training facility for EMS is over 200 miles away - Tribe operates virtual continuing education that can be used for health aides with additional resources	- Develop an updated training curriculum and partnership plan to secure instructors to enhance the Tribe's current training facility. - Plan and indicate total costs to develop a local EMS training program through partnership with other Area Tribes to share across the region - Expand the topics for continuing education to make health aides eligible for CEs.	- Number of traditional practices appropriate (as determined by the Tribe) for primary care, behavioral health, and dental health to be including in training - Number of current training courses in comparison to the standards and procedures identified by either the Alaska CHAP Standards and Procedures or the National Standards and Procedures - Number of current on demand courses available for CEs

System Integration	- The existing care team is not aware of how to divide responsibilities in standards of care with the integration of CHAP	- Clearly plan and delineate duties with the integration of health aides - Reassess job duties for care team based on newly hired health aides predicated on scope of work - Develop on demand training for entire care team on the role of health aides to specify duties/limitations	- List of all the duties by care team members compared to duties for a health aide - Number of duties that overlap across the team that can be reassigned -
Support to Address SDOH	- Students graduating high school have expressed interest in studying oral health but there are no dental training options local to the community. - The local Tribal College that offers a mental health training associates degree has seen a decline in enrollment due to costs associated with textbooks, lack of childcare, and transportation support	- Begin planning to recruit local students into the field by clearly communicating time commitment for training, salary potential, and benefits - Develop stipends for childcare - Partner with the transportation system to provide discounted tickets using identified route to get from town to training	- Number of graduating students eligible for training - Number of potential training sites for partnership - Number of potential childcare sites for partnership for students - Cost to develop a distance delivered training program -

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Submission for OMB Review; 30-Day Comment Request; Early Career Reviewer Program Online Application and Vetting System—Center for Scientific Review (CSR)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

DATES: Comments regarding this information collection are best assured of having their full effect if received within 30 days of the date of this publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Dr. Hope Cummings, Project Clearance Liaison, Center for Scientific Review, NIH, Room 907–M, 6701 Rockledge Drive, Bethesda, Maryland 20892 or call non-toll-free number (301) 402–4706 or Email your request, including your address to: *hope.cummings@nih.gov.* Formal requests for additional plans and instruments must be requested in writing.

SUPPLEMENTARY INFORMATION: This proposed information collection was previously published in the **Federal Register** on February 14, 2023, pages 9528–9529 (88 FR 30) and allowed 60 days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The Center for Scientific Review (CSR), National Institutes of Health, may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below.

Proposed Collection Title: Early Career Reviewer Program Online Application and Vetting System—0925–0695, REVISION—expiration date 06/30/2023, Center for Scientific Review (CSR), National Institutes of Health (NIH).

Need and Use of Information Collection: The Center for Scientific Review (CSR) is the portal for NIH grant applications and their review for scientific merit. Our mission is to see that all NIH grant applications receive fair, independent, expert, and timely reviews—free from inappropriate influences—so NIH can fund the most promising research. To accomplish this goal, Scientific Review Officers (SRO) form study sections consisting of scientists who have the technical and scientific expertise to evaluate the merit of grant applications. Study section members are generally scientists who have established independent programs of research as demonstrated by their publications and their grant award experiences.

The CSR Early Career Reviewer program was developed to identify and train qualified scientists who are early in their scientific careers and who have not had prior CSR review experience. The goals of the program are to expose these early career scientists to the peer review experience so that they become more competitive as applicants as well as to enrich the existing pool of NIH reviewers. Currently, the online application software, the Early Career Reviewer Application and Vetting System, is accessed online by applicants to the Early Career Reviewer Program who provide information such as their name, contact information, a description of their areas of expertise, their study section preferences, and their professional Curriculum Vitae. This Information Collection Request (ICR) is to revise the Early Career Reviewer Application and Vetting System by removing several optional socio-demographic questions.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 555.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hour
Research scientists	1,332	1	25/60	555
Total		1,332		555

Hope M. Cummings,

Project Clearance Liaison, Center for Scientific Review (CSR), National Institutes of Health.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel; Center for Scientific Review Special Emphasis Panel.

Date: May 26, 2023.

Time: 10:00 a.m. to 2:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Mark P. Rubert, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5218, MSC 7852, Bethesda, MD 20892, 301–806–6596, *rubertm@csr.nih.gov*.

Name of Committee: Risk, Prevention and Health Behavior Integrated Review Group; Biobehavioral Medicine and Health Outcomes Study Section.

Date: June 5–6, 2023.

Time: 9:30 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Mark A. Vosvick, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3110, Bethesda, MD 20892, (301) 402–4128 *mark.vosvick@nih.gov*.

Name of Committee: Biology of Development and Aging Integrated Review Group; Mechanisms of Cancer Therapeutics A Study Section.

Date: June 12–13, 2023.

Time: 9:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Careen K. Tang-Toth, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6214, MSC 7804, Bethesda, MD 20892, (301) 435–3504, *tothct@csr.nih.gov*.

Name of Committee: Surgical Sciences, Biomedical Imaging and Bioengineering Integrated Review Group; Surgery, Anesthesiology and Trauma Study Section.

Date: June 14–15, 2023.

Time: 8:00 a.m. to 6:00 p.m.

Agenda: To review and evaluate grant applications.

Place: Hyatt Regency, Bethesda, One Metro Center, 7400 Wisconsin Avenue Bethesda, MD 20814.

Contact Person: Weihua Luo, MD, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5114, MSC 7854, Bethesda, MD 20892, (301) 435–1170, *luow@csr.nih.gov*.

Name of Committee: Cardiovascular and Respiratory Sciences Integrated Review Group; Therapeutic Development and Preclinical Studies Study Section.

Date: June 14–15, 2023.

Time: 9:00 a.m. to 8:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Richard D. Schneiderman, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4138, Bethesda, MD 20817, 301–402–3995, *richard.schneiderman@nih.gov*.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Fiscal Year (FY) 2023 Notice of Supplemental Funding Opportunity

AGENCY: Substance Abuse and Mental Health Services Administration, Department of Health and Human Services (HHS).

ACTION: Notice of intent to award supplemental funding.

SUMMARY: This notice is to inform the public the Substance Abuse and Mental Health Services Administration (SAMHSA) is supporting a supplement in scope of the original award for the one grant recipient funded in fiscal year (FY) 2018 under the Clinical Support System for Serious Mental Illness (CSS–SMI) Notice of Funding Opportunity (NOFO) SM–18–020. The grant recipient may receive up to $2,846,283. The grant recipient's project period will be extended by 12 months until July 8, 2024. The supplemental funding will be used to maintain a national center that provides technical assistance to providers, programs, and communities across the nation to address evidence-based treatment and recovery support programs for individuals living with serious mental illness (SMI).

FOR FURTHER INFORMATION CONTACT: Kimberly E. Reynolds, MPA, MEd, Public Health Advisor and Project Officer, Substance Abuse and Mental Health Services Administration, 5600 Fishers Lane, Rockville, MD 20857, telephone (240) 276–2825; email: *Kimberly.Reynolds@samhsa.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Funding Opportunity Title: FY 2018 Clinical Support System for Serious Mental Illness Cooperative Agreement SM–18–020.

Assistance Listing: 93.243.

Authority: Section 520A of the Public Health Service Act as amended.

Justification: Eligibility for this supplemental funding is limited to the American Psychiatric Association which was funded in FY 2018 under NOFO SM–18–020. The American Psychiatric Association is uniquely qualified and has the required special expertise to address the implementation and provision of evidence-based treatment and recovery support programs for individuals living with SMI.

This is not a formal request for application. Assistance will only be provided to the sole CSS–SMI grant recipient funded in FY2018 under the Clinical Support System for Serious Mental Illness (CSS–SMI) SM–18–020 based on the receipt of a satisfactory application and associated budget that is approved by a review group.

Dated: April 27, 2023.

Ann Ferrero,

Public Health Analyst.

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2023–0246]

Area Maritime Security Advisory Committee (AMSC), Eastern Great Lakes, Northwest Pennsylvania Sub-Committee Vacancy

AGENCY: Coast Guard, DHS.

ACTION: Notice of availability of committee vacancy; solicitation for membership.

SUMMARY: The Coast Guard requests individuals interested in serving on the Area Maritime Security Committee, Eastern Great Lakes, Northwest Pennsylvania Region sub-committee submit their applications for membership to the U.S. Coast Guard Captain of the Port, Buffalo. The Committee assists the Captain of the Port as the Federal Maritime Security Coordinator, Buffalo, in developing, reviewing, and updating the Area Maritime Security Plan for their area of responsibility.

DATES: Requests for membership should reach the Captain of the Port, Buffalo, by 22 May 2023.

ADDRESSES: Applications for membership should be submitted to the Captain of the Port at the following address: Captain of the Port, Buffalo, Attention: LCDR Katherine Peet, 1 Fuhrmann Boulevard, Buffalo, NY 14203–3189.

FOR FURTHER INFORMATION CONTACT: For questions about submitting an application, or about the AMSC in general, contact Mr. John Kelly, Northwest Pennsylvania Region Sub-Committee Executive Coordinator, at 716–843–9574 or *John.K.Kelly@uscg.mil.*

SUPPLEMENTARY INFORMATION:

Basis and Purpose

Section 102 of the Maritime Transportation Security Act (MTSA) of 2002 (Pub. L. 107–295) added section 70112 to Title 46 of the U.S. Code and authorized the Secretary of the Department in which the Coast Guard is operating to establish Area Maritime Security Advisory Committees (ASMC) for any port area of the United States. (See 33 U.S.C. 1226; 46 U.S.C.; 33 CFR 1.05–1, 6.01; Department of Homeland Security Delegation No. 0170.1). The MTSA includes a provision exempting these AMSCs from the Federal Advisory Committee Act (FACA), Public Law 92–436, 86 Stat. 470 (5 U.S.C. App. 2). The AMSCs shall assist the Federal Maritime Security Coordinator (FMSC) in the development, review, update, and exercising of the Area Maritime Security Plan (AMSP) for their area of responsibility. Such matters may include, but are not limited to, the following:

(1) Identifying critical port infrastructure and operations; Identifying risks (threats, vulnerabilities, and consequences).

(2) Determining mitigation strategies and implementation methods.

(3) Developing strategies to facilitate the recovery of the Maritime Transportation System after a Transportation Security Incident.

(4) Developing and describing the process to continually evaluate overall port security by considering consequences and vulnerabilities, how they may change over time, and what additional mitigation strategies can be applied; and

(5) Providing advice to and assisting the Federal Maritime Security Coordinator in developing and maintaining the Area Maritime Security Plan.

AMSC Membership

Members of the AMSC should have at least five years of experience related to maritime or port security operations. We are seeking to fill one (1) Sub-Committee vacancies with this solicitation, an Executive Board member to serve as Vice-Chairperson; the position will serve concurrently as a member of the Eastern Great Lakes AMSC when so convened by the FMSC.

Applicants may be required to pass an appropriate security background check prior to appointment to the committee. Applicants must register with and remain active as a Coast Guard Homeport user if appointed. Member's term of office will be for five years; however, a member is eligible to serve

additional terms of office. Members will not receive any salary or other compensation for their service on an AMSC. In accordance with 33 CFR 103, members may be selected from Federal, Territorial, or Tribal governments; State government and political subdivisions of the State; local public safety, crisis management, and emergency response agencies; law enforcement and security organizations; maritime industry, including labor; other port stakeholders having a special competence in maritime security; and port stakeholders affected by security practices and policies.

The Department of Homeland Security does not discriminate in selection of committee members on the basis of race, color, religion, sex, national origin, political affiliation, sexual orientation, gender identity, marital status, disability, and genetic information, age, membership in an employee organization, or any other non-merit factor. The Department of Homeland Security strives to achieve a widely diverse candidate pool for all of its recruitment actions.

Request for Applications

Those seeking membership are not required to submit formal applications to the local Captain of the Port, however, because we do have an obligation to ensure that a specific number of members have the prerequisite maritime security experience, we encourage the submission of resumes highlighting experience in the maritime and security industries.

Dated: April 17, 2023.

Mark I. Kuperman,

Captain, U.S. Coast Guard, Captain of the Port & Federal Maritime Security Coordinator, Buffalo.

BILLING CODE 9110–15–P

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[XXXD5198NI DS61100000 DNINR0000.000000 DX61104]

Notice To Reopen the Call for Nominations to the Exxon Valdez Oil Spill Public Advisory Committee

AGENCY: Office of the Secretary, Interior.

ACTION: Notice to reopen a call for nominations.

SUMMARY: A request for nominations was published by the Department of the Interior in the **Federal Register** on January 26, 2023, for specific positions on the *Exxon Valdez* Oil Spill Public Advisory Committee (Committee). The nomination period ended on March 13, 2023. This notice reopens the nomination period until June 20, 2023.

DATES: The nomination period for the notice published on January 26, 2023, at 88 FR 5035, is reopened. Nominations for the vacant positions are due by June 20, 2023.

ADDRESSES: Send nomination packages by hard copy or via email to Shiway Wang, Executive Director, *Exxon Valdez* Oil Spill Trustee Council, 4230 University Drive, Suite 220, Anchorage, Alaska, 99508–4650, or at *shiway.wang@alaska.gov.* Also please copy Joy Maglaqui, Executive Assistant, on any email correspondence at *joy.maglaqui@alaska.gov.*

FOR FURTHER INFORMATION CONTACT: Grace Cochon, Department of the Interior, Office of Environmental Policy and Compliance, telephone number: (907) 786–3620; email: *grace_cochon@ios.doi.gov.*

SUPPLEMENTARY INFORMATION: The Committee was created pursuant to Paragraph V.A.4 of the Memorandum of Agreement and Consent Decree entered into by the United States of America and the State of Alaska on August 27, 1991, and approved by the United States District Court for the District of Alaska in settlement of *United States of America* v. *State of Alaska,* Civil Action No. A91–081 CV. The Committee advises the *Exxon Valdez* Oil Spill Trustee Council on matters relating to decisions on injury assessment, restoration activities, or other use of natural resource damage recoveries obtained by the government due to the T/V *Exxon Valdez* oil spill of March 1989. The Trustee Council consists of representatives of the U.S. Department of the Interior, U.S. Department of Agriculture, National Oceanic and Atmospheric Administration, Alaska Department of Fish and Game, Alaska Department of Environmental Conservation, and Alaska Department of Law.

The Committee consists of 10 members to reflect balanced representation from each of the following principal interests: aquaculture/mariculture, commercial tourism, conservation/environmental, recreation, subsistence use, commercial fishing, native landownership, sport hunting/fishing, science/technology, and public-at-large.

We are soliciting nominations for three positions that represent sport hunting/fishing, conservation/environmental, and science/technology interests. The Committee members will be selected and appointed by the Secretary of the Interior to serve a four-year term.

Nomination Process: Nominations for membership may be submitted by any source. Nominations should include a résumé providing an adequate description of the nominee's qualifications, including information that would enable the Department of the Interior to evaluate the nominee's ability to meet Committee membership requirements and to contact a potential member.

Authority: 5 U.S.C. 10.

Lisa M. Fox,

Regional Environmental Officer, Office of Environmental Policy and Compliance.

BILLING CODE 4334–63–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–689 and 731–TA–1618 (Preliminary)]

Non-Refillable Steel Cylinders From India; Institution of Anti-Dumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation nos. 701–TA–689 and 731–TA–1618 (Preliminary) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of non-refillable steel cylinders from India, provided for in heading 7311.00.00 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Government of India. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by June 9, 2023. The Commission's views must be transmitted to Commerce within five business days thereafter, or by June 20, 2023.

DATES: April 27, 2023.

FOR FURTHER INFORMATION CONTACT: Peter Stebbins (205–2039), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to petitions filed on April 27, 2023, by Worthington Industries, Columbus, Ohio.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on May 18, 2023. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before May 16, 2023. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and virtual witness attendance, if relevant, will be available on the Commission's Public Calendar. A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before May 23, 2023, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than noon on May 17, 2023. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: April 28, 2023.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–686–688 and 731–TA–1612–1617 (Preliminary)]

Brass Rod From Brazil, India, Israel, Mexico, South Africa, and South Korea; Institution of Antidumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701–TA–686–688 and 731–TA–1612–1617 (Preliminary) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with

material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of brass rod from Brazil, India, Israel, Mexico, South Africa, and South Korea, provided for in statistical reporting numbers 7407.21.1500, 7407.21.3000, 7407.21.7000, and 7407.21.9000 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Government of India, Israel, and South Korea. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by June 12, 2023. The Commission's views must be transmitted to Commerce within five business days thereafter, or by June 20, 2023.

DATES: April 27, 2023.

FOR FURTHER INFORMATION CONTACT: Julie Duffy ((202) 708–2579), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to a petition filed on April 27, 2023, by the American Brass Rod Fair Trade Coalition, Washington, District of Columbia; Mueller Brass Co., Port Huron, Michigan, and Wieland Chase LLC, Montpelier, Ohio.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—The Office of Investigations will hold a staff conference in connection with the preliminary phase of these investigations beginning at 9:30 a.m. on May 18, 2023. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before May 16, 2023. Please provide an email address for each conference participant in the email. Information on conference procedures, format, and virtual witness attendance, if relevant, will be available on the Commission's Public Calendar. A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before May 23, 2023, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than noon on May 17, 2023. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) by the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Issued: April 28, 2023.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 731–TA–1607–1611 (Preliminary)]

Boltless Steel Shelving Units Prepackaged for Sale From India, Malaysia, Taiwan, Thailand, and Vietnam; Revised Schedule for the Subject Investigations

AGENCY: International Trade Commission.

ACTION: Notice.

DATES: April 28, 2023.

FOR FURTHER INFORMATION CONTACT: Jordan Harriman (202–205–2610), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION: On April 26, 2023, the Commission established a schedule for the conduct of the preliminary phase of the subject investigations, which included an in-person staff conference. The Commission will now hold its staff conference via video conference beginning 9:30 a.m. on May 16, 2023. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before Friday, May 12, 2023. Please provide an email address for each conference participant in the email. Information on conference procedures will be provided separately and guidance on joining the video conference will be available on the Commission's Daily Calendar.

For further information concerning this proceeding, see the Commission's notice cited above and the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.21 of the Commission's rules.

By order of the Commission.

Issued: April 28, 2023.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Federal Bureau of Investigation

Notice of Charter Reestablishment

In accordance with the provisions of the Federal Advisory Committee Act, Title 5, United States Code, section 10, and Title 41, Code of Federal Regulations, section 102–3.65, with the concurrence of the Attorney General, I have determined that the reestablishment of the Criminal Justice Information Services (CJIS) Advisory Policy Board (APB) is in the public interest. In connection with the performance of duties imposed upon the FBI by law, I hereby give notice of the reestablishment of the APB Charter.

The APB provides me with general policy recommendations with respect to the philosophy, concept, and operational principles of the various criminal justice information systems managed by the FBI's CJIS Division.

The APB includes representatives from state and local criminal justice agencies; tribal law enforcement representatives; members of the judicial, prosecutorial, and correctional sectors of the criminal justice community, as well as one individual representing a national security agency; a representative of the National Crime Prevention and Privacy Compact Council; a representative of federal agencies participating in the CJIS Division Systems; and representatives of criminal justice professional associations (*i.e.,* the American Probation and Parole Association; American Society of Crime Laboratory Directors; International Association of Chiefs of Police; National District Attorneys Association; National Sheriffs Association; Major Cities Chiefs Association; Major County Sheriffs' of America; and a representative from a national professional association representing the courts or court administrators nominated by the Conference of Chief Justices). The Attorney General has granted me the authority to appoint all members to the APB.

The APB functions solely as an advisory body in compliance with the provisions of the Federal Advisory Committee Act. The Charter has been filed in accordance with the provisions of the Act.

Dated: April 20, 2023.

Christopher A. Wray,

Director.

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On April 27, 2023, the Department of Justice lodged a proposed First Material Modification to the Consent Decree entered by the United States District Court for the Western District of Texas on September 28, 2016, in the lawsuit entitled *United States, et. al* v. *Tesoro Refining & Marketing Company, LLC et al.,* Civ. A. No: SA–16–cv–00722. The Consent Decree resolved the United States and several states' claims under the Clean Air Act, 42 U.S.C. 7413, alleged in the Complaint at six petroleum refineries in six states. This First Material Modification only addresses the Martinez, California Refinery which is owned and operated by Defendant Tesoro Refining & Marketing Company, LLC. The proposed modification requires Tesoro to pay a penalty of $27.5 million dollars for violations of the Consent Decree and Clean Air Act, implement various injunctive relief to assure compliance with specified emissions standards whether it engages in petroleum refining or renewable fuel production at the facility, and retire emissions credits to mitigate the harm from its violations.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *Tesoro Refining & Marketing Company, LLC,* D.J. Ref. No 90–5–2–1–09512/1. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Consent Decree may be examined

and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $71.75 (25 cents per page reproduction cost) payable to the United States Treasury.

Susan M. Akers,

Deputy Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

NATIONAL SCIENCE FOUNDATION

Astronomy and Astrophysics Advisory Committee; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Astronomy and Astrophysics Advisory Committee (#13883) (Virtual).

Date and Time: June 1, 2023; 9:30 a.m.–3:30 p.m.

Place: National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314 (Zoom Videoconference).

Attendance information for the meeting will be forthcoming on the advisory committee's website: *https://www.nsf.gov/mps/ast/aaac.jsp.*

Type of Meeting: Open.

Contact Person: Dr. Carrie Black, Program Director, Division of Astronomical Sciences, Suite W 9188, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314; Telephone: 703–292–2426.

Purpose of Meeting: To provide advice and recommendations to the National Science Foundation (NSF), the National Aeronautics and Space Administration (NASA) and the U.S. Department of Energy (DOE) on issues within the field of astronomy and astrophysics that are of mutual interest and concern to the agencies. To prepare the annual report.

Agenda: To provide updates on Agency activities.

Dated: April 28, 2023.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–498 and 50–499; NRC–2023–0095]

STP Nuclear Operating Company; South Texas Project, Units 1 and 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has issued an exemption in response to an April 13, 2023, request, as supplemented (replaced in its entirety) by letter dated April 17, 2023, from STP Nuclear Operating Company that requested a one-time exemption that would allow for the reporting of Radiation Exposure Information and Reporting System data from South Texas Project, Units 1 and 2 (STP) to be extended from the required date of April 30, 2023, until August 31, 2023.

DATES: The exemption was issued on April 27, 2023.

ADDRESSES: Please refer to Docket ID NRC–2023–0095 when contacting the NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2023–0095. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *PDR.Resource@nrc.gov.* The request for the exemption was submitted by letter dated April 13, 2023, as supplemented (replaced in its entirety) by letter dated April 17, 2023, and are available in ADAMS under Accession Nos. ML23103A432 and ML23107A251, respectively.
- *NRC's PDR:* You may examine and purchase copies of public documents, by appointment, at the NRC's PDR, Room P1 B35, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852. To make an appointment to visit the PDR, please send an email to *PDR.Resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Dennis Galvin, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–6256; email: *Dennis.Galvin@nrc.gov.*

SUPPLEMENTARY INFORMATION: The text of the exemption is attached.

Dated: April 28, 2023.

For the Nuclear Regulatory Commission.

Thomas J. Wengert,

Senior Project Manager, Plant Licensing Branch IV, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

Docket Nos. 50–498 and 50–499

South Texas Project Nuclear Operating Company South Texas Project, Units 1 and 2

Exemption

I. Background

STP Nuclear Operating Company (STPNOC, the licensee) is the holder of Renewed Facility Operating License Nos. NPF–76 and NPF–80, which authorize operation of South Texas Project, Units 1 and 2 (STP), respectively. The licenses provide, among other things, that the facility is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect. The facility consists of two pressurized-water reactors located in Matagorda County, Texas.

II. Request/Action

By application dated April 13, 2023 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML23103A432), as supplemented (replaced in its entirety) on April 17, 2023 (ML23107A251), STPNOC requested an exemption from the reporting requirement in Title 10 of the *Code of Federal Regulations* (10 CFR) 20.2206(c). Specifically, the licensee's requested one-time exemption would allow for the reporting of Radiation Exposure Information and Reporting System (REIRS) data from STP to be extended from the required

date of April 30, 2023, until August 31, 2023. The licensee requested the exemption because its vendor that is processing the 2022 STPNOC dosimetry has not yet provided the data necessary for submittal of an annual report of the results of individual monitoring in accordance with 10 CFR 20.2206(c) and the licensee does not have confidence that the vendor will provide the data by April 30, 2023.

The regulation in 10 CFR 20.2206, ''Reports of individual monitoring,'' requires the annual submittal to the NRC of a report of the results of radiation dose monitoring conducted by licensees under the provisions of 10 CFR 20.1502, ''Conditions requiring individual monitoring of external and internal occupational dose,'' covering the preceding year; the report is to be submitted on or before April 30 of each year. The regulations in 10 CFR 20.1502 provide the conditions that require individual monitoring of external and internal occupational radiation doses. The regulations in 10 CFR 20.2106, ''Records of individual monitoring results,'' require, in part, that each licensee maintain records of radiation doses received by all individuals for whom radiation dose monitoring was required by 10 CFR 20.1502, and records of doses received during planned special exposures, accidents, and emergency conditions.

III. Discussion

Pursuant to 10 CFR 20.2301 ''Applications for exemptions,'' the Commission may, upon application by a licensee or upon its own initiative, grant exemptions from the requirements of 10 CFR part 20, ''Standards for Protection Against Radiation,'' if it determines that the exemptions are authorized by law and would not result in undue hazard to life or property.

A. The Exemption Is Authorized by Law

There are no provisions in the Atomic Energy Act of 1954, as amended (or in any other Federal statute) that impose a requirement for submitting reports of the results of required radiation dose monitoring by April 30 of each year to the NRC; rather, this requirement appears in 10 CFR part 20, which also allows the NRC to issue exemptions from those requirements. Therefore, the NRC staff concludes that there is no statutory or regulatory prohibition on the issuance of the requested exemption and the NRC is authorized to grant the exemption by law, upon finding that the exemption is otherwise acceptable.

B. The Exemption Presents no Undue Hazard to Life or Property

In determining that granting the exemption would not result in undue hazard to life,[1] the NRC staff conducted a risk-informed assessment of the impact of the exemption on the purpose of the NRC's standards for protection against radiation, as stated in 10 CFR 20.1001(b). Specifically, the regulation in 10 CFR 20.1001(b) states, in part:

> It is the purpose of the regulations in this part to control the receipt, possession, use, transfer, and disposal of licensed material by any licensee in such a manner that the total dose to an individual (including doses resulting from licensed and unlicensed radioactive material and from radiation sources other than background radiation) does not exceed the standards for protection against radiation prescribed in the regulations in this part.

This risk-informed assessment considered the impact of the exemption on reports of exposure information to individuals and the NRC.

Reports to Individuals

The regulation in 10 CFR 19.13, ''Notifications and reports to individuals,'' provides requirements for notifications and reports of radiation dose data to individuals. For example, 10 CFR 19.13(b) requires licensees to make records maintained under the provisions of 10 CFR 20.2106 available to workers and to provide an annual report to each individual monitored under the provisions of 10 CFR 20.1502 if the individual's occupational dose exceeds a total effective dose equivalent (TEDE) of 100 millirem (mrem) (1 millisievert (mSv)), or 100 mrem (1 mSv) to any individual organ or tissue, or upon request of the individual.

As stated in 10 CFR 20.1001, the ultimate purpose of the requirements in 10 CFR part 20 are to ensure that doses to individuals do not exceed the NRC's radiation protection standards. The monitoring, recording, and reporting of radiation dose data for occupationally exposed individuals as required by 10 CFR part 20 is essential in ensuring that radiation protection standards are not exceeded for any individual worker, because it allows licensees to track doses and, if necessary, take action before applicable limits are exceeded. The recording of this information is also necessary to ensure that workers who transition from one employer to another are adequately protected in that the total annual dose to workers from all employers is kept within applicable limits.

In its exemption request, the licensee described three methods of obtaining personnel radiation dose data. First, doses from radiation exposures can be estimated using information collected from electronic dosimeters that are issued to workers. Second, the dose data can be determined by conducting exposure investigations. Lastly, data from individually issued thermoluminescent dosimeters (TLDs) can be obtained from the licensee's contracted dosimetry service provider. The first and second methods are currently available to the licensee; however, the licensee prefers to submit TLD-based data in part to remain consistent with previous years' reports. This is consistent with long-standing industry practice that passive dosimetry, like TLDs, are used as dosimetry of legal record. However, the licensee states that the TLD-based data has not yet been provided to the licensee by its contracted dosimetry service provider and the licensee does not have confidence that it will obtain the data in time to meet the April 30 reporting deadline.

The licensee states that it is awaiting TLD-based data for over 800 personnel. Conducting exposure investigations and reconciling electronic dosimeter data to establish a final record of doses for this magnitude of individuals is a resource intensive activity that would impose an undue burden on the licensee to achieve before April 30. Nor does there appear to be any safety benefit in assembling those data before the contractor provides the dosimetry results. In this regard, the licensee reviewed the electronic dosimeter data and determined that no individual's annual dose reached regulatory limits, and no irregularities are expected between the electronic dosimeter data and the final record data that is to be submitted.

The NRC staff expects that the reports required per 10 CFR 19.13(b)(1) will be provided by the licensee to the applicable individuals, after the licensee establishes its final record of doses, which is expected on or before August 31, 2023. However, because the licensee maintains electronic dosimeter data and can perform exposure investigations, it is able to satisfy the purpose of 10 CFR part 20, to ensure that the annual doses to individuals do not exceed the NRC's radiation protection standards. Additionally, the licensee is able to meet its obligations per 10 CFR 19.13, to provide exposure information to individuals upon request.

[1] The NRC staff determined that the exemption as requested and evaluated by the NRC does not impact property.

Reports to the NRC

The regulation in 10 CFR 20.2206(a) provides a list of categories of NRC licensees that are required to provide reports of individual radiation dose monitoring to the NRC. The regulation in 10 CFR 20.2206(b) states that licensees who fit a category listed in 10 CFR 20.2206(a), such as STPNOC, shall submit to the NRC reports of the results of individual radiation dose monitoring carried out by the licensee during the prior year for individuals for whom monitoring was required by 10 CFR 20.1502. Additionally, the regulation in 10 CFR 20.2206(c) requires that these reports, covering the preceding year, be submitted on or before April 30 each year. The NRC collects radiation dose data to support decision-making in its oversight of radiation protection performance of its licensees. The preface to NUREG–0713, Volume 42, ''Occupational Radiation Exposure at Commercial Nuclear Power Reactors and Other Facilities 2020,'' dated September 2022 (ML22276A269), states that the NRC uses these data, in combination with other information, to provide facts regarding routine occupational exposures to radiation and radioactive material that occur in connection with certain NRC-licensed activities, for use in making decisions that impact public health and safety. The Preface to NUREG–0713 provides examples of how the NRC uses these data, including:

1. The evaluation of trends, both favorable and unfavorable, from the viewpoint of the effectiveness of overall NRC/licensee radiation protection and as low as is reasonably achievable (ALARA) efforts by licensees.

2. The evaluation of the radiological risk associated with certain categories of NRC-licensed activities and the comparative analysis of radiation protection performance by country, reactor type, civilian/military, facility, and industry.

3. Use of the data in the NRC Reactor Oversight Process for inspection planning and in the Significance Determination Process.

4. Use of the data in making evidence-based decisions regarding the radiation exposure to transient individuals.

5. Use of the data to establish priorities for the use of NRC health physics resources: research, standards development, regulatory program development, and inspections conducted at NRC-licensed facilities.

6. Use of the data in answering Congressional and administrative inquiries as well as responding to questions raised by the public.

7. Use of the data to provide radiation exposure histories to individuals who were exposed to radiation at NRC-licensed facilities.

8. Use of the data in conducting epidemiologic studies.

As may be seen in the above description, the NRC's use of radiation dose data for occupationally exposed individuals serves various long-term initiatives that necessarily depend on data spanning multiple years in broad categories of licensees. Therefore, while the continued collection of this data is essential to the NRC's mission as it pertains to radiation protection, a licensee's delay by several months in reporting the data for its facility would have minimal impact on the NRC's ability to ensure adequate protection of public health and safety, and would not impact individual worker safety since the data pertaining to each worker would be readily available at the facility despite the requested delay in reporting to the NRC. Therefore, the NRC staff concludes that granting the exemption would not result in undue hazard to life or property.

C. Environmental Considerations

The NRC staff determined that the exemption discussed herein meets the eligibility criteria for the categorical exclusion set forth in 10 CFR 51.22(c)(25), and there are no extraordinary circumstances present that would preclude reliance on this exclusion. The NRC staff determined, per 10 CFR 51.22(c)(25)(vi)(B), that the requirements from which the exemption is sought involve reporting requirements.

The NRC staff also determined that approval of this one-time exemption involves no significant hazards consideration because it does not authorize any physical changes to the facility or any of its safety systems and does not involve modifications that could alter the manner in which facility structures, systems, and components are operated and maintained.

There is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite because this exemption does not affect the types, characteristics, or quantities of effluents discharged to the environment. There is no significant increase in individual or cumulative public or occupational radiation exposure because this exemption does not affect limits on the release of any radioactive material, or the limits provided in 10 CFR part 20 for radiation exposure to workers or members of the public. There is no significant construction impact because this exemption does not involve any physical changes to the facility. There is no significant increase in the potential for or consequences from radiological accidents because the exemption does not alter any of the assumptions or limits in the licensee's safety analysis. In addition, the NRC staff determined that there would be no significant impacts to biota, water resources, historic properties, cultural resources, or socioeconomic conditions in the region. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the approval of the requested exemption.

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 20.2301, the exemption is authorized by law, and will not present an undue hazard to life and property. Therefore, the Commission hereby grants STPNOC a one-time exemption from 10 CFR 20.2206 to delay the reporting of its REIRS data as required on April 30, 2023, until August 31, 2023.

Dated at Rockville, Maryland, this 27th day of April 2023.

For the Nuclear Regulatory Commission.

Gregory F. Suber,

Deputy Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: 3206–0138, Reinstatement of Disability Annuity Previously Terminated Because of Restoration to Earning Capacity, RI 30–9

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: Retirement Services, Office of Personnel Management (OPM) offers the general public and other federal agencies the opportunity to comment on an existing information collection request (ICR), without change, Reinstatement of Disability Annuity Previously Terminated Because of Restoration to Earning Capacity, RI 30–9.

DATES: Comments are encouraged and will be accepted until July 3, 2023.

ADDRESSES: You may submit comments, identified by docket number and/or

Regulatory Information Number (RIN) and title, by the following method:

—*Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR, with applicable supporting documentation, may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 3316–L, Washington, DC 20415, Attention: Cyrus S. Benson, or sent via electronic mail to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910 or via telephone at (202) 936–0401.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection (OMB No. 3206–0138). The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

RI 30–9, Reinstatement of Disability Annuity Previously Terminated Because of Restoration to Earning Capacity, informs former annuitants of their right to request reconsideration. It also specifies the conditions to be met and the documentation that must be submitted with a request for reinstatement.

Analysis

Agency: Retirement Operations, Retirement Services, Office of Personnel Management.

Title: Reinstatement of Disability Annuity Previously Terminated Because of Restoration to Earning Capacity (RI 30–9).

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: 3206–0121, Application for Deferred Retirement (for Persons Separated On or After October 1, 1956), OPM 1496A

AGENCY: Office of Personnel Management.

ACTION: 30-Day notice and request for comments.

SUMMARY: Retirement Services, Office of Personnel Management (OPM) offers the general public and other federal agencies the opportunity to comment on a revised information collection request (ICR) with minor edits, Application for Deferred Retirement (for persons separated on or after October 1, 1956), OPM 1496A. The revisions include (1) Revised instructions for hearing impaired users to utilize the Federal Relay Service by dialing 711 or their local communications provider to reach a Communications Assistant (2) Included instructions to attach Internal Revenue Service (IRS) Form W–4P (version 2022 or later). (3) Updated Retirement Information Office hours of operation.

DATES: Comments are encouraged and will be accepted until June 2, 2023.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *http://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''*Currently under Review—Open for Public Comments*'' or by using the search function or fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: A copy of this information collection, with applicable supporting documentation, may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 3316–L, Washington, DC 20415, Attention: Cyrus S. Benson, or sent via electronic mail to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910 or via telephone at (202) 936–0401.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 OPM is soliciting comments for this collection. The information collection (OMB No. 3206–0121) was previously published in the **Federal Register** on February 6, 2023 at 88 FR 7766, allowing for a 60-day public comment period. No comments were received.

The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

OPM Form 1496A is used by eligible former Federal employees to apply for a deferred Civil Service annuity.

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: 3206–0143, Request to Disability Annuitant for Information on Physical Condition and Employment, RI 30–1

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: Retirement Services, Office of Personnel Management (OPM) offers the general public and other federal agencies the opportunity to comment on an existing information collection request (ICR), without change, Request to Disability Annuitant for Information on Physical Condition and Employment, RI 30–1.

DATES: Comments are encouraged and will be accepted until July 3, 2023.

ADDRESSES: You may submit comments, identified by docket number and/or Regulatory Information Number (RIN) and title, by the following method:

—*Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR with applicable supporting documentation, may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 3316–L, Washington, DC 20415, Attention: Cyrus S. Benson, or sent via electronic mail to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910 or via telephone at (202) 936–0401.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection (OMB No. 3206–0143). The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

RI 30–1, Request to Disability Annuitant for Information on Physical Condition and Employment, is used by persons who are not yet age 60 and who are receiving a disability annuity and are subject to inquiry regarding their medical condition as OPM deems reasonably necessary.

BILLING CODE 6325–38–P

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: OMB Control No. 3206–NEW

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: The Office of Personnel Management (OPM) offers the general public and other Federal agencies the opportunity to comment on a new information collection request (ICR) 3206–NEW, *USA Hire Assessment Satisfaction Survey, Form USAH–1.*

DATES: Comments are encouraged and will be accepted until July 3, 2023. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection by one of the following means:

Federal Rulemaking Portal: http://www.regulations.gov. All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this information collection request, with applicable supporting documentation, may be obtained by contacting Jeffrey Cain at *jeffrey.cain@opm.gov* or 202–936–2863. Please put ''3206_New'' in the subject line of the email.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995, (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection. ICR 3206–NEW *Assessment Satisfaction Survey, Form USAH–1* is the Federal Government's centralized source for USA Hire online assessment process feedback and reflects the minimal critical elements collected across the Federal Government to begin an application for information collection under the authority of sections 1104,1302, 3301, 3304, 3320, 3361, 3393, and 3394 of Title 5, United States Code. This is a new information collection request for OPM's USA Hire Program. USA Hire seeks to use the ''USA Hire Assessment Satisfaction Survey'' to collect feedback on the USA Hire online assessment process.

This effort will help enable USA Hire to continually implement improvements to the assessment process for applicants and agency stakeholders. As this is a new collection, we invite comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Analysis

Agency: HR Solutions/Federal Staffing Center, Office of Personnel Management.

Title: USA Hire Assessment Satisfaction Survey.

OMB Number: 3206–NEW.

Frequency: Annually.

Affected Public: Individuals.

Number of Respondents: 200,000.

OFFICE OF PERSONNEL MANAGEMENT

Submission for Review: Initial Certification of Full-Time School Attendance, RI 25–41, 3206–0099

AGENCY: Office of Personnel Management.

ACTION: 60-Day notice and request for comments.

SUMMARY: Retirement Services, Office of Personnel Management (OPM) offers the general public and other federal agencies the opportunity to comment on an expiring information collection, without change, RI 25–41, Initial Certification of Full-Time School Attendance.

DATES: Comments are encouraged and will be accepted until July 3, 2023.

ADDRESSES: You may submit comments, identified by docket number and title, via the Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the instructions for submitting comments. All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR with applicable supporting documentation, may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 3316–AC, Washington, DC 20415, Attention: Cyrus S. Benson, or sent via email to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910 or reached via telephone at (202) 936–0401.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction

Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection (OMB No. 3206–0099). The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

RI 25–41, Initial Certification of Full-Time School Attendance is used to determine whether a child is unmarried and a full-time student in a recognized school. OPM must determine this in order to pay survivor annuity benefits to children who are age 18 or older under 5 U.S.C Sections 8341(A)(4) and 8441 (4)(C).

—*Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: A copy of this ICR with applicable supporting documentation, may be obtained by contacting the Retirement Services Publications Team, Office of Personnel Management, 1900 E Street NW, Room 3316–L, Washington, DC 20415, Attention: Cyrus S. Benson, or sent via electronic mail to *Cyrus.Benson@opm.gov* or faxed to (202) 606–0910 or via telephone at (202) 936–0401.

SUPPLEMENTARY INFORMATION: As required by the Paperwork Reduction Act of 1995 (Pub. L. 104–13, 44 U.S.C. chapter 35) as amended by the Clinger-Cohen Act (Pub. L. 104–106), OPM is soliciting comments for this collection (OMB No. 3206–0228). The Office of Management and Budget is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Standard Form 3112, CSRS/FERS Documentation in Support of Disability Retirement Application, collects information from applicants for disability retirement so that OPM can determine whether to approve a disability retirement under 5 U.S.C. 8337 and 8455. The applicant will only complete Standard Forms 3112A and 3112C. Standard Forms 3112B, 3112D, and 3112E will be completed by the immediate supervisor and the employing agency of the applicant.

Analysis

Agency: Retirement Operations, Retirement Services, Office of Personnel Management.

Title: CSRS/FERS Documentation in Support of Disability Retirement.

OMB Number: 3206–0228.

Frequency: On occasion.

Affected Public: Individuals or Households.

Number of Respondents: 13,450 [1,350 (SF 3112A) and 12,100 (SF 3112C)].

Estimated Time per Respondent: 30 minutes (SF 3112A) and 60 minutes (SF 3112C).

Total Burden Hours: 12,775 hours [675 hours (SF 3112A) and 12,100 hours (SF 3112C)].

Office of Personnel Management.

Stephen Hickman,

Federal Register Liaison.

BILLING CODE 6325–38–P

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Request for Information; Automated Worker Surveillance and Management

AGENCY: Office of Science and Technology Policy (OSTP).

ACTION: Notice of request for information (RFI).

SUMMARY: Employers are increasingly using automated systems to monitor, manage, and evaluate their workers. These systems may allow employers to manage supply chains, improve health and safety, or make other informed business decisions. At the same time, applications of surveillance and monitoring systems can also pose risks to workers, including to their health and safety, equal employment opportunities, privacy, ability to meet critical needs, access to workplace accommodations, and exercise of workplace and labor rights, including their rights to form or join a labor union. The White House Office of Science and Technology Policy (OSTP) seeks comments from the public to better understand automated surveillance and management of workers, including its prevalence, purposes, deployment, and impacts, as well as opportunities for Federal agencies to work with employers, workers, and other stakeholders to ensure that these systems do not undermine workers' rights, opportunities, access, health, or safety.

DATES: Interested persons and organizations are invited to submit comments on or before 5 p.m. ET, June 15, 2023.

ADDRESSES: Comments must be submitted via the Federal eRulemaking Portal at *regulations.gov.* However, if you require an accommodation or cannot otherwise submit your comments via *regulations.gov,* please contact the program contact person listed under **FOR FURTHER INFORMATION CONTACT**. OSTP will not accept comments by fax, or comments submitted after the comment period closes. To ensure that OSTP does not receive duplicate copies, please submit your comments only once. Additionally, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to *www.regulations.gov* to submit your comments electronically. Information on how to use *Regulations.gov,* including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''FAQ'' (*https://www.regulations.gov/faq*).

Privacy Note: OSTP's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available. OSTP requests that no proprietary information, copyrighted information, or personally identifiable information be submitted in response to this RFI.

Instructions: Response to this RFI is voluntary. Respondents may answer as many or as few questions as they wish. Responses containing references, studies, research, and other empirical data that are not widely published should include copies of or electronic links to the referenced materials. Any information obtained from this RFI is intended to be used by the government on a non-attribution basis for planning and strategy development. OSTP will not respond to individual submissions. A response to this RFI will not be viewed as a binding commitment to develop or pursue the project or ideas discussed. This RFI is not accepting applications for financial assistance or financial incentives. All comments, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Proprietary information or sensitive personal information, such as account numbers or Social Security numbers, or names of other individuals, should not be included in the body of your response. Respondents interested in submitting anonymous comments should use the option on *www.regulations.gov/.*

FOR FURTHER INFORMATION CONTACT: Alan Mislove, Assistant Director for Data and Democracy, *workersurveillance@ostp.eop.gov,* 202–456–4444.

SUPPLEMENTARY INFORMATION:

Background: Employers are increasingly using automated systems to monitor, manage, and evaluate their workers—both on and off the job. According to a 2022 investigation by the *New York Times,* eight of the ten largest private U.S. employers track the productivity metrics of individual workers.[1] Use of automated surveillance and management systems has increased with the spread of remote work during the pandemic, and now often extends to workers' homes.[2] Private-sector research suggests that the percentage of large employers using automated tools to track their workforce may have doubled since the beginning of the pandemic to some 60%.[3]

Automated worker surveillance and management systems may track workers' location, pace or quality of work, communications (*e.g.,* text, chats, emails, social media), interactions with other workers or customers, and computer activity. Such surveillance can be accomplished through a variety of techniques, ranging from software on workers' computers to dedicated electronic devices that workers wear or carry on their person. The market for these technologies and systems has greatly expanded in recent years, and a number of vendors are now developing products to help employers electronically monitor and manage their workers in a variety of contexts.

Examples of applications of automated surveillance and management of workers that have been reported in the press include:

- Warehouse workers who are tracked by whether they are actively moving products
- Grocery store cashiers who are monitored on the speed of their transactions with customers
- Office workers whose keystrokes, chats, emails, and other communications are collected and monitored
- Lawyers whose computer cameras track whether their eyes are actively focused on the screen
- Call center workers whose calls are monitored by a computer that judges the emotional state of customers
- Copywriters whose computers automatically take screenshots of their activity to track which applications they are using
- Home healthcare workers whose locations are monitored by an app that verifies patient visits
- Nurses whose time on task and location are tracked through radio frequency identification (RFID) tags in identification badges
- Delivery or rideshare drivers whose vehicles track their location, speed, and driving behavior
- Long-haul truckers whose eye movements are monitored and locations tracked
- Fast food workers whose pace of work in preparing meals is tracked and reported
- Teachers whose lessons delivered remotely online are recorded and analyzed electronically

These systems may allow employers to more closely monitor worker performance; protect public health and safety; make decisions about promotion, discipline, or termination; or manage work assignments, schedules, and supply chains. At the same time, applications of automated surveillance and management systems can also pose risks to workers and even violate labor and employment laws.[4] Emerging research suggests that certain applications of these systems may undermine the quality of work; workers' rights to a safe and healthy workplace; compensation for time worked; labor market competition; and workers' ability to organize and work collectively with their coworkers to improve working conditions, including through labor unions. Certain applications of these systems—when paired with decisions about working conditions, promotion, discipline, or termination—may also treat otherwise similar workers differently on the basis of their race, ethnicity, gender, religion, age, national origin, health or disability, or other protected status. Some systems may also violate antitrust and privacy laws, for instance, if employers use technologies to artificially reduce wages.

Automated worker surveillance and management can also cause and exacerbate disabilities and interfere with legal protections for those with disabilities. Automated worker surveillance and management systems can potentially put workers at risk for physical injury and mental health distress that can cause or exacerbate anxiety, depression, cognitive disability, and trauma responses; interfere with legally-protected workplace accommodations that enable individuals with disabilities to participate in the workforce; and reveal workers' otherwise-undisclosed disabilities to employers.

In 2022, the White House Office of Science and Technology Policy released the *Blueprint for an AI Bill of Rights* (''Blueprint''), which stated that individuals ''should be free from unchecked surveillance.'' [5] The Blueprint noted that continuous surveillance can pose harms to workers, using the example of electronic monitoring intended to stymie workers'

[1] *https://www.yahoo.com/video/bosses-giving-return-office-fight-191121126.html.*

[2] *https://www.shrm.org/hr-today/news/all-things-work/pages/monitoring-remote-workers.aspx.*

[3] *https://www.gartner.com/en/articles/the-right-way-to-monitor-your-employee-productivity.*

[4] See for instance, *https://laborcenter.berkeley.edu/wp-content/uploads/2021/11/Data-and-Algorithms-at-Work.pdf, https://cdt.org/insights/report-warning-bossware-may-be-hazardous-to-your-health/,* and *https://equitablegrowth.org/research-paper/workplace-surveillance-is-becoming-the-new-normal-for-u-s-workers/.*

[5] *https://www.whitehouse.gov/ostp/ai-bill-of-rights/data-privacy-2/.*

efforts to organize a labor union. Consistent with the Blueprint, the Office of Science and Technology Policy seeks to further study the use of automated surveillance and management systems in the workplace, including their prevalence, impacts, and deployment, as well as opportunities for Federal agencies to work together with employers and workers to ensure that these systems do not undermine workers' rights or their safety.

This focus on automated surveillance and management in the workplace is also consistent with the Administration's commitment to ensuring that all workers have access to high-quality, well-paying jobs, including jobs with opportunities to organize and bargain collectively with their employers through labor unions, as articulated in the Executive Order 14025 (*Worker Organizing and Empowerment*) [6] and through a competitive market for their labor, as articulated in Executive Order 14036 (*Promoting Competition in the American Economy*).[7] This initiative advances the Biden-Harris Administration's historic commitment to racial equity and support for underserved communities, by investigating whether automated surveillance and management systems ''contribute to unjustified different treatment or impacts,'' as articulated in Executive Order 14091 (*Further Advancing Racial Equity and Support for Underserved Communities Through the Federal Government*) as well as the Administration's call for robust protections for Americans' privacy.

Request for Comment: This request for information seeks input from the public on the prevalence, uses and purposes, and deployment of automated worker surveillance and management systems, including impacts of these systems on workers' legal rights and lives. It includes workers' physical and mental health; privacy, dignity, and autonomy; and ability to exercise workplace rights, including rights to collective action, pay, reasonable accommodation, health, and safety, and freedom from retaliation, discrimination, and harassment. It also seeks input on how employers may share data collected through these surveillance applications and how worker surveillance may contribute to unfair competition between firms.

This RFI focuses on automated surveillance and management by employers that may track workers' locations, pace of work, performance or output, compliance with policy or regulations, or social media activity; their emails, texts, chats, phone calls, and other communications; or other similar measures. Such surveillance may take place during or outside of work hours, and on or off the worksite. This request for information also covers workers in traditional employment relationships (*i.e.,* W–2 employment) as well as other employment relationships, such as independent contractors and gig economy workers.

OSTP is particularly interested in hearing from:

- Workers who have experienced automated surveillance and management (including workers of color, low-paid workers, immigrant workers, and workers with disabilities);
- Worker organizations (including worker advocacy groups, worker centers, labor unions, and workplace legal services providers);
- Civil rights and privacy organizations;
- Employers (including for-profit, non-profit, and government employers) that are using automated surveillance and management systems or considering using such systems;
- Platforms, crowdsourcing websites, transportation network companies, ride-hailing services, and other entities that match workers with opportunities to generate income;
- Trade and business associations representing employers;
- Developers and vendors developing or selling automated surveillance or management systems;
- Researchers (including researchers using both qualitative and quantitative methods to understand the use, prevalence, benefits and risks, and impacts of automated surveillance and management systems on individuals and society); and
- State, Tribal, local, and territorial governments.

To assist commenters in developing responses, OSTP has crafted the questions below that commenters may answer. Respondents may provide information for one or more of the topics below, as desired. *However, OSTP welcomes members of the public to submit any personal experiences, data, information, and research relating to the use and impact of automated worker surveillance and management systems. Please do not to include personally identifying information in the body of your response.*

1. If you are a *worker or organization representing workers (such as a worker center, union, or legal services provider),* please tell us about your experiences with automated worker surveillance and management systems or the experiences of the workers you interact with, including:

a. The type of work you do (*e.g.,* describe the relevant job, employer, and industry);

b. Whether you are a member of a labor union;

c. The type of automated surveillance or management you have experienced, including the location of the monitoring technology (such as an app you had to use or download; a device you had to use, carry, or wear; or a camera that monitors you);

d. Whether the automated surveillance or management was used during a labor organizing drive;

e. Whether and when your employer informed you about their use of automated worker surveillance and management systems;

f. Whether you (or, if relevant, your representative, like a labor union) have any input or control over how, where, and over what automated surveillance occurs;

g. Whether you know how the data generated by surveillance is used for management or other purposes (including purposes related to employment or labor market competition);

h. Whether you (or, if relevant, your representative, like a labor union) have any visibility into the data collected on you or how it is used, including whether data on you collected by surveillance can be shared with other companies, trade groups, or third parties;

i. How the use of automated surveillance and management systems has changed how you do your job or how your employer treated you at your job;

j. Whether your employer has used information from an automated surveillance and management system in support of any discipline against you—and if so, what the action was, how and when you were informed, and what information was provided to you or your representative (such as a labor union);

k. How automated surveillance and management has affected you—whether positively or negatively—including any economic, safety, physical, mental, and emotional impacts;

l. How automated surveillance and management systems have affected your workplace rights, including rights around collective action, labor

[6] *https://www.whitehouse.gov/briefing-room/presidential-actions/2021/04/26/executive-order-on-worker-organizing-and-empowerment/.*

[7] *https://www.whitehouse.gov/briefing-room/presidential-actions/2021/07/09/executive-order-on-promoting-competition-in-the-american-economy/.*

organizing, collective bargaining, pay, reasonable accommodations, health and safety, discrimination, and harassment—or your expectation of retaliation when exercising these rights;

m. How these systems have impacted your non-working hours, personal time, or the privacy of other members of your household;

n. If you are disabled or have a health condition, how automated surveillance and management systems have impacted or may impact your use of reasonable accommodations; such as assistive technology or accessibility features of software or breaks, or affected your ability to keep information about your condition private from your employer, supervisor, or coworkers;

o. If you are disabled or have a health condition, how automated surveillance and management systems have affected performance reviews or other management activities, or concerns about how these systems may affect performance reviews or how your management treats you; and

p. Whether you work for an employer that receives Federal funds (for instance, as a Federal contractor).

2. If you are an employer or organization representing employers, please tell us about your experiences implementing or using automated worker surveillance and management systems, including:

a. The type of business you are in, or represent, including your industry and roughly how many workers you employ;

b. Whether any of your employees are represented by a labor union;

c. The types of automated worker surveillance and management systems your business has implemented or is considering implementing;

d. The purposes for which your business decided to implement automated worker surveillance and management systems, such as safety and health, productivity, competition, liability or insurance, compliance, or resource and worker management;

e. How your business decided to use specific automated worker surveillance and management systems, including decisions not to use particular products or types of systems, to limit their scope, and relevant training;

f. In what ways your business uses the information collected through automated surveillance and management systems, such as for management, human resources, and business operations, including whether the information is sold or shared with other businesses or otherwise influenced by other businesses' activities;

g. Any steps your business has taken to solicit or incorporate worker input into how automated worker surveillance and management systems are adopted, implemented, and used; whether workers may opt out of such systems (and any consequences for doing so); and how generated data is used or shared with other parties;

h. Any involvement of third parties (such as vendors) in collecting or maintaining information on workers and any control retained by the employer;

i. Any steps you have taken to ensure that the use or sharing of automated worker surveillance and management systems does not infringe on workers' rights;

j. How you decide the categories of workers for whom you deploy automated worker surveillance and management systems (*e.g.,* managerial versus non-managerial workers);

k. Any policies or protocols adopted to govern the use of automated worker surveillance and management systems or the data they produce; and Whether your organization receives Federal funds.

3. If you are a technology developer or vendor, please tell us about your experience developing or distributing automated worker surveillance and management systems, including:

a. The purposes for which employers adopt your products and how they deploy these products;

b. How the impact, performance, and efficacy of your products is audited and validated by you, employers, and workers;

c. How you and the users of your products manage data collection, storage, and maintenance, including access to data by third parties;

d. Whether you provide guidance to employers on your products and their appropriate use, including guidance on notifying workers about the use of technology, and offering opportunities for workers to consent to or opt out of data collection;

e. Whether you engage with employers to help them implement your products in ways that protect workers' rights, health, and safety—or otherwise take steps to help protect workers who will engage with your products; and

f. Any steps you have taken to ensure that the use of automated worker surveillance and management systems does not infringe on workers' rights.

4. Data and research-related questions we are interested in include:

a. What data and evidence exist on the prevalence of automated worker surveillance and management systems across different industries, occupations, and regions, including changes over time?

b. What data and evidence exist on the impact of automated worker surveillance and management systems on workers, including workers' pay, benefits, and employment, physical and mental health, and ability to exercise workplace rights?

c. What data and evidence exist on the impact of automated worker surveillance and management systems on labor rights, including workers' abilities to form and join unions and bargain collectively with their employers?

d. What data and evidence exist on how the impact of automated worker surveillance and management systems differs across groups of workers, including based on characteristics such as race, national origin, sex, age, disability, religion, or health status?

e. What data or evidence exists on whether automated worker surveillance and management systems are being used for discriminatory purposes or resulting in discrimination?

f. What data and evidence exist on whether automated workers surveillance and management systems impact employers' ability to recruit and retain workers?

g. What data or evidence exists on how the provision of reasonable accommodations is accounted for in the design and operation of automated worker surveillance and management systems?

h. What data and evidence exist on why employers decide to adopt automated worker surveillance and management systems?

i. Are there any existing or new systems that aggregate worker surveillance data across multiple employers?

j. What are new or emergent automated worker surveillance and management systems—or new and emergent uses of existing technologies—that Federal agencies should be tracking?

k. Where might further research, including by the Federal government, be helpful in understanding the prevalence and impact of automated worker surveillance and management systems?

5. Last, we are especially interested in the following questions about policies, practices, or standards that could protect workers:

a. What guidelines, standards, or best practices might inform the design of automated worker surveillance and management systems to protect workers' rights?

b. Are there policy approaches to regulating automated worker

surveillance and management systems from State, Tribal, territorial, or local governments or other countries that Federal agencies could learn from?

c. What policies or actions should Federal agencies consider to protect workers' rights and wellbeing as automated worker surveillance and management systems are developed and deployed, including through regulations, enforcement, contracting, and grantmaking?

Dated: April 28, 2023.

Stacy Murphy,

Deputy Chief Operations Officer/Security Officer.

BILLING CODE 3270–F1–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34902]

Deregistration Under Section 8(f) of the Investment Company Act of 1940

AGENCY: Securities and Exchange Commission (''Commission'' or ''SEC'')

ACTION: Notice of applications for deregistration under section 8(f) of the Investment Company Act of 1940.

The following is a notice of applications for deregistration under section 8(f) of the Investment Company Act of 1940 for the month of April 2023. A copy of each application may be obtained via the Commission's website by searching for the applicable file number listed below, or for an applicant using the Company name search field, on the SEC's EDGAR system. The SEC's EDGAR system may be searched at *https://www.sec.gov/edgar/searchedgar/legacy/companysearch.html.* You may also call the SEC's Public Reference Room at (202) 551–8090. An order granting each application will be issued unless the SEC orders a hearing. Interested persons may request a hearing on any application by emailing the SEC's Secretary at *Secretarys-Office@sec.gov* and serving the relevant applicant with a copy of the request by email, if an email address is listed for the relevant applicant below, or personally or by mail, if a physical address is listed for the relevant applicant below. Hearing requests should be received by the SEC by 5:30 p.m. on May 23, 2023, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to Rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary at *Secretarys-Office@sec.gov.*

ADDRESSES: The Commission: *Secretarys-Office@sec.gov.*

FOR FURTHER INFORMATION CONTACT: Shawn Davis, Assistant Director, at (202) 551–6413 or Chief Counsel's Office at (202) 551–6821; SEC, Division of Investment Management, Chief Counsel's Office, 100 F Street NE, Washington, DC 20549–8010.

CornerCap Group of Funds/VA/ [File No. 811–04581]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to CornerCap Small-Cap Value Fund, a series of Managed Portfolio Series, and on November 18, 2022 made a final distribution to its shareholders based on net asset value. Expenses of $37,989.57 incurred in connection with the reorganization were paid by the applicant's investment adviser.

Filing Dates: The application was filed on February 7, 2023, and amended on April 13, 2023.

Applicant's Address: 1355 Peachtree Street, North East Suite 1700, Atlanta, Georgia 30309.

FS Series Trust [File No. 811–23216]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to The Advisors' Inner Circle Fund III, and on April 11, 2022 made a final distribution to its shareholders based on net asset value. Expenses of $527,498 incurred in connection with the reorganization were paid by the applicant's investment adviser and the acquiring fund.

Filing Date: The application was filed on April 10, 2023.

Applicant's Address: 201 Rouse Boulevard, Philadelphia, Pennsylvania 19112.

IndexIQ Trust [File No. 811–22185]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. On August 7, 2018, applicant made a liquidating distribution to its shareholders based on net asset value. Expenses of $2,500.00 incurred in connection with the liquidation were paid by the applicant's investment adviser.

Filing Date: The application was filed on April 5, 2023.

Applicant's Address: 51 Madison Avenue, New York, New York 10010.

ML of New York Variable Annuity Separate Account C [File No. 811–21119]

Summary: Applicant, a unit investment trust, seeks an order declaring that it has ceased to be an investment company. No expenses were incurred in connection with the liquidation.

Filing Date: The application was filed on March 21, 2023.

Applicant's Address: 4333 Edgewood Road Northeast, Cedar Rapids, Indiana 52499.

SunAmerica Income Funds [File No. 811–04708]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to Touchstone Strategic Trust and Touchstone Funds Group Trust, and on July 16, 2021 made a final distribution to its shareholders based on net asset value. Expenses of $7,150,960 incurred in connection with the reorganization were paid by the applicant's investment adviser.

Filing Date: The application was filed on November 23, 2022.

Applicant's Address: Harborside 5, 185 Hudson Street, Suite 3300, Jersey City, New Jersey 07311.

SunAmerica Senior Floating Rate Fund Inc [File No. 811–08727]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to the Touchstone Credit Opportunities Fund, a series of Touchstone Funds Group Trust, and on July 16, 2021 made a final distribution to its shareholders based on net asset value. Expenses of $7,150,960 incurred in connection with the reorganization were paid by the applicant's investment adviser.

Filing Date: The application was filed on November 23, 2022.

Applicant's Address: Harborside 5, 185 Hudson Street, Suite 3300, Jersey City, New Jersey 07311.

Torray Fund [File No. 811–06096]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to Torray Fund, a series of The RBB Fund Trust, and on December 9, 2022 made a final distribution to its shareholders based on net asset value. Expenses of $170,354.55 incurred in connection with the reorganization were paid by the applicant's investment adviser.

Filing Dates: The application was filed on March 6, 2023, and amended on April 17, 2023.

Applicant's Address: 7501 Wisconsin Avenue, Suite 750W, Bethesda, Maryland 20814.

VALIC Company II [File No. 811–08789]

Summary: Applicant seeks an order declaring that it has ceased to be an investment company. The applicant has transferred its assets to VALIC Company I, and on April 19, 2021 and May 24, 2021 made a final distribution to its shareholders based on net asset value. Expenses of $5,298,100 incurred in connection with the reorganization were paid by the applicant's investment adviser and the acquiring fund's investment adviser, and/or their affiliates.

Filing Date: The application was filed on August 16, 2022.

Applicant's Address: 2919 Allen Parkway, Houston, Texas 77019.

Zazove Convertible Securities Fund, Inc. [File No. 811–09189]

Summary: Applicant, a closed-end investment company, seeks an order declaring that it has ceased to be an investment company. Applicant currently has 76 beneficial owners, is not presently making an offering of securities and does not propose to make any offering of securities. Applicant will continue to operate as a private investment fund in reliance on section 3(c)(1) of the Act.

Filing Dates: The application was filed on November 30, 2022, and amended on March 30, 2023.

Applicant's Address: 520 Lake Cook Road, Suite 178, Deerfield, Illinois 60015.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Dated: April 28, 2023.

Sherry R. Haywood,

Assistant Secretary.

[FR Doc. 2023–09402 Filed 5–2–23; 8:45 am]

BILLING CODE P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–97394; File No. SR–NYSEAMER–2023–17]

Self-Regulatory Organizations; NYSE American LLC; Notice of Designation of a Longer Period for Commission Action on Proposed New Rule 980NYP and Conforming Amendments to Rule 935NY

April 27, 2023.

On February 28, 2023, NYSE American LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to adopt Rule 980NYP (Electronic Complex Order Trading) to reflect the implementation of the Exchange's PILLAR trading technology on its options market and to make conforming amendments to Rule 935NY (Order Exposure Requirements). The proposed rule change was published for comment in the **Federal Register** on March 17, 2023.[3]

Section 19(b)(2) of the Act [4] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is May 1, 2023.

The Commission is extending this 45-day time period. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates June 15, 2023, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSEAMER–2023–17).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–97392; File No. SR–CboeBZX–2023–026]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

April 27, 2023.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 17, 2023, Cboe BZX Exchange, Inc. (''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'' or ''BZX Equities'') proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the

[6] 17 CFR 200.30–3(a)(31).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule applicable to its equities trading platform (''BZX Equities'') as follows: (1) modify Step-Up Tier 1; and (2) modify the Non-Displayed Step-Up Tier. The Exchange proposes to implement the proposed changes to its fee schedule on April 3, 2023.[3]

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues that do not have similar self-regulatory responsibilities under the Exchange Act, to which market participants may direct their order flow. Based on publicly available information,[4] no single registered equities exchange has more than 17% of the market share. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. The Exchange in particular operates a ''Maker-Taker'' model whereby it pays credits to Members that add liquidity and assesses fees to those that remove liquidity. The Exchange's fee schedule sets forth the standard rebates and rates applied per share for orders that provide and remove liquidity, respectively. Currently, for orders in securities priced at or above $1.00, the Exchange provides a standard rebate of $0.00160 per share for orders that add liquidity and assesses a fee of $0.0030 per share for orders that remove liquidity.[5] For orders in securities priced below $1.00, the Exchange does not provide a rebate or assess a fee for orders that add liquidity and assesses a fee of 0.30% of total dollar value for orders that remove liquidity.[6] Additionally, in response to the competitive environment, the Exchange also offers tiered pricing which provides Members opportunities to qualify for higher rebates or reduced fees where certain volume criteria and thresholds are met. Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

Step-Up Tiers

Pursuant to footnote 2 of the Fee Schedule, the Exchange currently offers Step Up Tiers (tiers 1 through 4) that provide Members an opportunity to receive an enhanced rebate from the standard rebate for liquidity adding orders that yield fee codes B,[7] V,[8] and Y[9] where they increase their relative liquidity each month over a predetermined baseline. The Exchange now proposes to modify the criteria of Step-Up Tier 1. The current criteria for Step-Up Tier 1 is as follows:

• Tier 1 offers an enhanced rebate of $0.0031 per share for qualifying orders (*i.e.,* orders yielding fee codes B, V, or Y) where 1) Member has a Step-Up ADAV[10] from January 2023 ≥10,000,000 or Member has a Step-Up Add TCV[11] from January 2023 ≥0.10%; and 2) Member has an ADV[12] ≥0.60% of the TCV.

The Exchange proposes to modify the criteria for Step-Up Tier 1 to the following:

• Proposed Tier 1 would offer an enhanced rebate of $0.0031 per share for qualifying orders (*i.e.,* orders yielding fee codes B, V, or Y) where (1) Member has a Step-Up Add TCV from January 2023 ≥0.09%; and (2) Member has an ADV ≥0.60% of the TCV; and (3) Member adds an ADV ≥5,000,000 for Non-Displayed orders[13] that yield fee codes HB,[14] HI,[15] HV,[16] or HY.[17]

Also pursuant to footnote 2 of the Fee Schedule, the Exchange currently offers a Non-Displayed Step-Up Tier, which provides Members an opportunity to receive an enhanced rebate from the standard rebate[18] for liquidity adding non-displayed orders that yield fee codes HB, HV, and HY and meet certain required volume-based criteria. The criteria for the Non-Displayed Step-Up Tier is as follows:

• The Non-Displayed Step-Up Tier offers an enhanced rebate of $0.0025 per share for qualifying orders (*i.e.,* orders yielding fee codes HB, HV, or HY) where (1) Member has a Step-Up ADAV from January 2023 ≥10,000,000 or Member has a Step-Up Add TCV from January 2023 ≥0.10%; and (2) Member has an ADV ≥0.60% of the TCV.

The Exchange proposes to modify the criteria of the Non-Displayed Step-Up Tier to the following:

• The Non-Displayed Step-Up Tier offers an enhanced rebate of $0.0025 per share for qualifying orders (*i.e.,* orders yielding fee codes HB, HV, or HY) where (1) Member has a Step-Up Add TCV from January 2023 ≥0.09%; and (2) Member has an ADV ≥0.60% of the TCV; and (3) Member adds an ADV ≥5,000,000 for Non-Displayed Orders that yield fee codes HB, HI, HV, or HY.

The Exchange notes that the Step-Up Tiers in general are designed to provide Members with additional opportunities to receive enhanced rebates by increasing their order flow to the Exchange, which further contributes to a deeper, more liquid market and provides even more execution opportunities for active market participants. The proposed modifications to the criteria of Step-Up Tier 1 and the Non-Displayed Step-Up Tier are designed to increase the Members' provision of liquidity to the Exchange, which increases execution opportunities and provides for overall enhanced price discovery and price improvement opportunities on the Exchange. Increased overall order flow benefits all Members by contributing

[3] The Exchange initially filed the proposed fee changes on April 3, 2023 (SR–CboeBZX–2023–022). On April 17, 2023, the Exchange withdrew that filing and submitted SR–CboeBZX–2023–025. On April 17, 2023, the Exchange withdrew SR–CboeBZX–2023–025 and submitted this proposal.

[4] *See* Cboe Global Markets, U.S. Equities Market Volume Summary, Month-to-Date (March 24, 2023), available at *https://www.cboe.com//equities/market_statistics/*.

[5] *See* BZX Equities Fee Schedule, Standard Rates.

[6] *Id.*

[7] Orders yielding Fee Code ''B'' are displayed orders adding liquidity to BZX (Tape B).

[8] Orders yielding Fee Code ''V'' are displayed orders adding liquidity to BZX (Tape A).

[9] Orders yielding Fee Code ''Y'' are displayed orders adding liquidity to BZX (Tape C).

[10] ''Step-Up ADAV'' means ADAV in the relevant baseline month subtracted from current ADAV. ADAV means average daily added volume calculated as the number of shares added per day. ADAV is calculated on a monthly basis.

[11] ''Step-Up Add TCV'' means ADAV as a percentage of TCV in the relevant baseline month subtracted from current ADAV as a percentage of TCV. TCV means total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.

[12] ''ADV'' means average daily volume calculated as the number of shares added or removed, combined, per day. ADV is calculated on a monthly basis.

[13] *See* Exchange Rule 11.9(c)(11).

[14] Orders yielding Fee Code ''HB'' are non-displayed orders adding liquidity to BZX (Tape B).

[15] Orders yielding Fee Code ''HI'' are non-displayed orders that receive price improvement while adding liquidity to BZX .

[16] Orders yielding Fee Code ''HV'' are non-displayed orders adding liquidity to BZX (Tape A).

[17] Orders yielding Fee Code ''HY'' are non-displayed orders adding liquidity to BZX (Tape C).

[18] Currently, the Exchange provides a standard rebate of $0.00100 per share for liquidity adding non-displayed orders that yield fee codes HB, HV, or HY.

towards a robust and well-balanced market ecosystem.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of section 6(b) of the Act.[19] Specifically, the Exchange believes the proposed rule change is consistent with the section 6(b)(5) [20] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the section 6(b)(5) [21] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers as well as section 6(b)(4) [22] as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

As described above, the Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange believes that its proposed modifications to Step-Up Tier 1 and the Non-Displayed Step-Up Tier reflects a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members. The Exchange believes the proposed modifications to Step-Up Tier 1 and the Non-Displayed Step-Up Tier are reasonable as they serve to incentivize Members to increase their liquidity-adding, displayed volume (Step-Up Tier 1) and liquidity-adding, non-displayed volume (Non-Displayed Step-Up Tier), which benefit all market participants by incentivizing continuous liquidity and thus, deeper, more liquid markets as well as increased execution opportunities. Particularly, the proposed incentives to provide displayed liquidity are designed to incentivize continuous displayed liquidity, which signals other market participants to take the additional execution opportunities provided by such liquidity, while the proposed incentives to provide non-displayed liquidity will further contribute to a deeper, more liquid market and provide even more execution opportunities for active market participants at improved prices. This overall increase in activity deepens the Exchange's liquidity pool, offers additional cost savings, supports the quality of price discovery, promotes market transparency, and improves market quality for all investors.

In particular, the Exchange believes the proposed modifications to Step-Up Tier 1 and the Non-Displayed Step-Up Tier represent an equitable allocation of rebates and are not unfairly discriminatory because all Members are eligible for those tiers and would have the opportunity to meet a tier's criteria and would receive the proposed rebate if such criteria is met. Further, the proposed rebates are commensurate with the proposed criteria. That is, the rebates reasonably reflect the difficulty in achieving the applicable criteria as proposed. Without having a view of activity on other markets and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would definitely result in any Members qualifying for the proposed tier. While the Exchange has no way of predicting with certainty how the proposed tiers will impact Member activity, the Exchange anticipates that at least one Member will be able to satisfy the criteria proposed under Step-Up Tier 1 and the Non-Displayed Step-Up Tier. The Exchange also notes that proposed tier/rebate will not adversely impact any Member's ability to qualify for other reduced fee or enhanced rebate tiers. Should a Member not meet the proposed criteria under the modified tier, the Member will merely not receive that corresponding enhanced rebate.

Additionally, the Exchange notes that relative volume-based incentives and discounts have been widely adopted by exchanges,[23] including the Exchange,[24] and are reasonable, equitable and non-discriminatory because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to (i) the value to an exchange's market quality and (ii) associated higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns. Competing equity exchanges offer similar tiered pricing structures, including schedules of rebates and fees that apply based upon members achieving certain volume and/or growth thresholds, as well as assess similar fees or rebates for similar types of orders, to that of the Exchange.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional order flow to a public exchange, thereby promoting market depth, execution incentives and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed changes further the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [25]

The Exchange believes the proposed rule changes do not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the proposed tier changes apply to all Members equally in that all Members continue to be eligible for Step-Up Tier 1 and the Non-Displayed Step-Up Tier, have a reasonable opportunity to meet the tiers' criteria and will receive the corresponding additional rebates if such criteria are met. Additionally, the proposed tier changes are designed to attract additional order flow to the Exchange. The Exchange believes that the proposed tier criteria would incentivize market participants to direct liquidity adding displayed and non-displayed order flow to the Exchange, bringing with it additional execution opportunities for market participants and improved price transparency. Greater overall order flow, trading opportunities, and pricing transparency benefits all market participants on the Exchange by enhancing market quality and continuing to encourage Members to send orders, thereby contributing

[25] Securities Exchange Act Release No. 51808, 70 FR 37495, 37498–99 (June 29, 2005) (S7–10–04) (Final Rule).

towards a robust and well-balanced market ecosystem.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market. Members have numerous alternative venues that they may participate on and direct their order flow, including 15 other equities exchanges and off exchange venues and alternative trading systems. Additionally, the Exchange represents a small percentage of the overall market. Based on publicly available information, no single equities exchange has more than 17% [26] of the market share. Therefore, no exchange possesses significant pricing power in the execution of order flow. Indeed, participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [27] The fact that this market is competitive has also long been recognized by the courts. In NetCoalition v. Securities and Exchange Commission, the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[28] Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act [29] and paragraph (f) of Rule 19b–4 [30] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CboeBZX–2023–026 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeBZX–2023–026. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–CboeBZX–2023–026, and should be submitted on or before May 24, 2023.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

Sherry R. Haywood,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–97393; File No. SR–CboeEDGX–2023–030

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule

April 27, 2023.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 17, 2023, Cboe EDGX Exchange, Inc. (''Exchange'' or ''EDGX'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. (the ''Exchange'' or ''EDGX'') proposes to amend its Fee Schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/options/regulation/rule_filings/edgx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fee Schedule applicable to its equities trading platform (''EDGX Equities'') as follows: (1) by modifying and introducing certain Growth Tiers; (2) by modifying the criteria of Non-Displayed Step-Up Volume Tier 1; (3) by modifying and introducing certain Remove Volume Tiers; (4) by modifying the criteria of Retail Growth Tier 3; and (5) by modifying the rates associated with certain fee codes. The Exchange proposes to implement these changes effective April 3, 2023.[3]

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues that do not have similar self-regulatory responsibilities under the Securities Exchange Act of 1934 (the ''Act''), to which market participants may direct their order flow. Based on publicly available information,[4] no single registered equities exchange has more than 17% of the market share. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. The Exchange in particular operates a ''Maker-Taker'' model whereby it pays rebates to members that add liquidity and assesses fees to those that remove liquidity. The Exchange's Fee Schedule sets forth the standard rebates and rates applied per share for orders that provide and remove liquidity, respectively. Currently, for orders in securities priced at or above $1.00, the Exchange provides a standard rebate of $0.00160 per share for orders that add liquidity and assesses a fee of $0.0030 per share for orders that remove liquidity.[5] For orders in securities priced below $1.00, the Exchange provides a standard rebate of $0.00009 per share for orders that add liquidity and assesses a fee of 0.30% of the total dollar value for orders that remove liquidity.[6] Additionally, in response to the competitive environment, the Exchange also offers tiered pricing which provides Members opportunities to qualify for higher rebates or reduced fees where certain volume criteria and thresholds are met. Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

Growth Tiers

Under footnote 1 of the Fee Schedule, the Exchange currently offers various Add/Remove Volume Tiers. In particular, the Exchange offers two Growth Tiers that each provide an enhanced rebate for Members' qualifying orders yielding fee codes B,[7] V,[8] Y,[9] 3,[10] and 4,[11] where a Member reaches certain add volume-based criteria, including ''growing'' its volume over a certain baseline month. First, the Exchange is proposing to introduce new Growth Tier 1 to provide Members an additional manner in which they could receive an enhanced rebate if certain criteria is met. The proposed criteria for proposed Growth Tier 1 is as follows:

- Growth Tier 1 provides a rebate of $0.0020 per share for securities priced above $1.00 to qualifying orders (*i.e.,* orders yielding fee B, V, Y, 3, or 4) where Member adds a Step-Up ADAV[12] from January 2023 ≥0.10% of the TCV[13] or Member adds a Step-Up ADAV from January 2023 ≥10,000,000.

Proposed Growth Tier 1 will provide a lower rebate than other existing Growth Tiers, but this lower rebate is commensurate with the difficulty of meeting the less stringent criteria associated with proposed Growth Tier 1.

Second, the Exchange proposes to renumber current Growth Tiers 1 and 2 and modify the criteria of proposed Growth Tier 3 (current Growth Tier 2). Currently, Growth Tier 2 (proposed Growth Tier 3) reads as follows:

- Growth Tier 2 provides a rebate of $0.0034 per share to qualifying orders (*i.e.,* orders yielding fee codes B, V, Y, 3, or 4) where (1) Member adds a Step-Up ADAV from October 2022 ≥0.15% of the TCV or Member adds a Step-Up ADAV from October 2022 ≥15,000,000; and (2) Member has a total remove ADV[14] ≥0.45% of TCV or Member has a total remove ADV ≥45,000,000; and (3) Member adds a Retail Step-Up ADV[15]

[3] The Exchange initially filed the proposed fee changes on April 3, 2023 (SR–CboeEDGX–2023–024). On April 17, 2023, the Exchange withdrew that filing and submitted SR–CboeEDGX–2023–029. On April 17, 2023, the Exchange withdrew SR–CboeEDGX–2023–029 and submitted this proposal.

[4] *See* Cboe Global Markets, U.S. Equities Market Volume Summary, Month-to-Date (March 24, 2023), available at *https://www.cboe.com/us/equities/_statistics/.*

[5] *See* EDGX Equities Fee Schedule, Standard Rates.

[6] *Id.*

[7] Fee code B is appended to orders adding liquidity to EDGX in Tape B securities.

[8] Fee code V is appended to orders adding liquidity to EDGX in Tape A securities.

[9] Fee code Y is appended to orders adding liquidity to EDGX in Tape C securities.

[10] Fee code 3 is appended to orders adding liquidity to EDGX in the pre and post market in Tapes A or C securities.

[11] Fee code 4 is appended to orders adding liquidity to EDGX in the pre and post market in Tape B securities.

[12] ''Step-Up ADAV'' means ADAV in the relevant baseline month subtracted from current ADAV. ADAV means average daily added volume calculated as the number of shares added per day. ADAV is calculated on a monthly basis.

[13] ''TCV'' means total consolidated volume calculated as the volume reported by all exchanges and trade reporting facilities to a consolidated transaction reporting plan for the month for which the fees apply.

[14] ''ADV'' means average daily volume calculated as the number of shares added to, removed from, or routed by, the Exchange, or any combination or subset thereof, per day. ADV is calculated on a monthly basis.

[15] ''Step-Up ADV'' means ADV in the relevant baseline month subtracted from current day ADV.

(*i.e.,* yielding fee codes ZA [16] or ZO [17]) from August 2022 ≥0.10% of TCV.

Now, the Exchange proposes to remove the third prong of criteria. The proposed criteria for current Growth Tier 2 (proposed Growth Tier 3) is as follows:

• Proposed Growth Tier 3 provides a rebate of $0.0034 per share to qualifying orders (*i.e.,* orders yielding fee codes B, V, Y, 3, or 4) where (1) Member adds a Step-Up ADAV from October 2022 ≥0.15% of the TCV or Member adds a Step-Up ADAV from October 2022 ≥15,000,000; and (2) Member has a total remove ADV ≥0.45% of TCV or Member has a total remove ADV ≥45,000,000.

The proposed modification to proposed Growth Tier 3 removes a criteria designed to encourage Members to grow their volume in retail orders on the Exchange. By removing a criteria while keeping the enhanced rebate the same, the proposed criteria slightly decreases the difficulty required for Members to meet the applicable tier threshold. By introducing proposed Growth Tier 1 and decreasing the difficulty required under proposed Growth Tier 3, Members are still incentivized to grow their volume on the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange.

Non-Displayed Add Volume Tiers

In addition to the Growth Tiers offered under footnote 1, the Exchange also offers Non-Displayed Add Volume Tiers that each provide an enhanced rebate for Members' qualifying orders yielding fee codes DM,[18] HA,[19] MM,[20] and RP,[21] where a Member reaches certain volume-based criteria offered in each tier. The Exchange now proposes to amend the criteria of current Non-Displayed Step-Up Volume Tier 1. Currently, the criteria for Non-Displayed Step-Up Volume Tier 1 is as follows:

• Non-Displayed Step-Up Volume Tier 1 provides a rebate of $0.0026 per share to qualifying orders (*i.e.,* orders yielding fee code DM, HA, MM, or RP) where (1) Members adds a Step-Up ADAV from October 2022 ≥0.15% of the TCV or Member adds a Step-Up ADAV from October 2022 ≥15,000,000; and (2) Member has a total remove ADV ≥0.45% of TCV or Member has a total remove ADV ≥45,000,000; and (3) Member adds a Retail Step-Up ADV (*i.e.,* yielding fee codes ZA or ZO) from August 2022 ≥0.10% of TCV.

Now, the Exchange proposes to remove the third prong of criteria. The proposed criteria for Non-Displayed Step-Up Volume Tier 1 is as follows:

• Non-Displayed Step-Up Volume Tier 1 provides a rebate of $0.0026 per share to qualifying orders (*i.e.,* orders yielding fee code DM, HA, MM, or RP) where (1) Members adds a Step-Up ADAV from October 2022 ≥0.15% of the TCV or Member adds a Step-Up ADAV from October 2022 ≥15,000,000; and (2) Member has a total remove ADV ≥0.45% of TCV or Member has a total remove ADV ≥45,000,000.

The proposed modification to Non-Displayed Step-Up Volume Tier 1 is intended to remove criteria designed to incentivize Members to add non-displayed retail volume on the Exchange. By removing a criteria while keeping the enhanced rebate the same, the proposed criteria slightly decreases the difficulty required for Members to meet the applicable tier threshold while continuing to encourage Members to add non-displayed liquidity to the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange.

Remove Volume Tiers

In addition to the Growth Tiers and Non-Displayed Add Volume Tiers offered under footnote 1, the Exchange also offers two Remove Volume Tiers that each assess a reduced fee for Members' qualifying orders yielding fee codes BB,[22] N,[23] and W [24] where a Member reaches certain add or remove volume-based criteria. The Exchange first proposes to amend the criteria in Remove Volume Tiers 1 and 2. Currently, the criteria for these tiers is as follows:

• Remove Volume Tier 1 provides a reduced fee of $0.00275 per share for securities priced above $1.00 or 0.28% of the total dollar value in securities priced below $1.00 to qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where (1) Member adds a Step-Up ADAV from June 2021 ≥0.10% of the TCV or Member adds a Step-Up ADAV from June 2021 ≥8,000,000; and (2) Member has a total remove ADV ≥0.60% of the TCV or Member has a total remove ADV ≥45,000,000.

• Remove Volume Tier 2 assesses a reduced fee of $0.00275 per share for securities priced above $1.00 or 0.28% of the total dollar value in securities priced below $1.00 to qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where (1) Member has an ADAV ≥0.25% TCV with displayed orders that yield fee codes B, V, or Y; or (2) Member adds Retail Order ADV (*i.e.,* yielding fee codes ZA or ZO) ≥0.45% of the TCV.

Now, the Exchange proposes to replace the existing criteria with a single prong of criteria for each tier and slightly increase the reduced fee assessed by Remove Volume Tier 1. The proposed criteria is as follows:

• Remove Volume Tier 1 assesses a reduced fee of $0.00285 per share for securities priced above $1.00 or 0.28% of the total dollar value in securities priced below $1.00 to qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where Member has an ADAV ≥0.25% TCV with displayed orders that yield fee codes B, V, or Y.

• Remove Volume Tier 2 assesses a reduced fee of $0.00275 per share for securities priced above $1.00 or 0.28% of the total dollar value in securities priced below $1.00 to qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where Member adds Retail Order ADV (*i.e.,* yielding fee codes ZA or ZO) ≥0.45% of the TCV.

The proposed change to Remove Volume Tier 1 will provide a slightly lower reduced fee in exchange for less difficult criteria that continues to encourage Members to strive to meet the criteria by removing liquidity on the Exchange. Similarly, the proposed change to Remove Volume Tier 2 will assess the current reduced fee while lessening the difficulty of meeting the criteria in Remove Volume Tier 2.

Second, the Exchange proposes to introduce Remove Volume Tier 3. The proposed criteria in proposed Remove Volume Tier 3 is as follows:

• Proposed Remove Volume Tier 3 assesses a reduced fee of $0.00275 per share in securities priced above $1.00 or 0.28% of the total dollar value in securities priced below $1.00 for qualifying orders (*i.e.,* orders yielding fee codes BB, N, or W) where (1) Member adds a Step-Up ADAV from June 2021 ≥0.10% of the TCV or Member adds a Step-Up ADAV from June 2021 ≥8,000,000; and (2) Member has a total remove ADV ≥0.60% of the TCV or Members has a total remove ADV ≥45,000,000; and (3) Member adds

[16] Fee code ZA is appended to Retail Orders that add liquidity.

[17] Fee code ZO is appended to Retail orders that adds liquidity during the pre- and post-market.

[18] Fee code DM is appended to orders that add liquidity using MidPoint Discretionary Order within discretionary range.

[19] Fee code HA is appended to non-displayed orders that add liquidity.

[20] Fee code MM is appended to non-displayed orders that add liquidity using Mid-Point Peg.

[21] Fee code RP is appended to non-displayed orders that add liquidity using Supplemental Peg.

[22] Fee code BB is appended to orders that remove liquidity from EDGX in Tape B securities.

[23] Fee code N is appended to orders that remove liquidity from EDGX in Tape C securities.

[24] Fee code W is appended to orders that remove liquidity from EDGX in Tape A securities.

Retail Order ADV (*i.e.,* yielding fee codes ZA or ZO) ≥0.10% of the TCV.

The addition of proposed Remove Volume Tier 3 is designed to provide Members an alternative opportunity to earn a reduced fee where Members achieve certain add or remove volume-based criteria. The Exchange believes assessing an identical fee as Remove Volume Tier 2 albeit using slightly more difficult criteria will encourage Members to strive to meet the criteria by removing liquidity on the Exchange. The proposed changes to the Remove Volume Tiers are designed to incentivize Members to provide additional volume to the Exchange. An increase in remove liquidity on the Exchange signals an overall increase in activity from other market participants, contributes to a deeper, more liquid market, and provides additional execution opportunities for active market participants, which benefits the entire market system.

Retail Growth Tiers

Pursuant to footnote 2 of the Fee Schedule, the Exchange offers Retail Volume Tiers which provide Retail Member Organizations (''RMOs'') [25] an opportunity to receive an enhanced rebate from the standard rebate for Retail Orders [26] that add liquidity (*i.e.,* yielding fee code ZA or ZO). Currently, the Retail Volume Tiers offer three Retail Growth Tiers, where a Member is eligible for an enhanced rebate for qualifying orders (*i.e.,* yielding fee code ZA or ZO) meeting certain add volume-based criteria, including ''growing'' its volume over a certain baseline month. The Exchange now proposes to amend the criteria of Retail Growth Tier 3. Currently, the criteria for Retail Growth Tier 3 is as follows:

• Retail Growth Tier 3 provides a rebate of $0.0037 per share to qualifying orders (*i.e.,* orders yielding fee code ZA or ZO) where (1) Member adds a Step-Up ADAV from October 2022 ≥0.15% of the TCV or Member adds a Step-Up ADAV from October 2022 ≥15,000,000; (2) Member has a total remove ADV ≥0.45% of TCV or Member has a total remove ADV ≥45,000,000; and (3) Members adds a Retail Step-Up ADV (*i.e.,* yielding fee code ZA or ZO) from August 2022 ≥0.10% of TCV.

Now, the Exchange proposes to delete the third prong of criteria. The proposed criteria for Retail Growth Tier 3 is as follows:

• Retail Growth Tier 3 provides a rebate of $0.0037 per share to qualifying orders (*i.e.,* orders yielding fee code ZA or ZO) where (1) Member adds a Step-Up ADAV from October 2022 ≥0.15% of the TCV or Member adds a Step-Up ADAV from October 2022 ≥15,000,000; and (2) Member has a total remove ADV ≥0.45% of TCV or Member has a total remove ADV ≥45,000,000.

The proposed modification to Retail Growth Tier 3 removes a criteria designed to encourage RMOs to grow their volume in retail orders on the Exchange. By removing a criteria while keeping the enhanced rebate the same, the proposed criteria slightly decreases the difficulty required for Members to meet the applicable tier threshold while continuing to encourage RMOs to grow their volume in retail orders.

Furthermore, the Growth Tiers, Non-Displayed Add Volume Tiers, Remove Volume Tiers, and Retail Volume Tiers are intended to provide Members an opportunity to receive an enhanced rebate or reduced fee by increasing their order flow to the Exchange, which further contributes to a deeper, more liquid market and provides even more execution opportunities for active market participants. Incentivizing an increase in liquidity adding or removing volume, through enhanced rebate or reduced fee opportunities, encourages liquidity adding Members on the Exchange to contribute to a deeper, more liquid market, and liquidity executing Members on the Exchange to increase transactions and take execution opportunities provided by such increased liquidity, together providing for overall enhanced price discovery and price improvement opportunities on the Exchange. As such, increased overall order flow benefits all Members by contributing towards a robust and well-balanced market ecosystem.

Fee Code Changes

The Exchange currently offers fee code DX, which is appended to Midpoint Discretionary Orders (''MDOs'') [27] using the Quote Depletion Protection (''QDP'') [28] order instruction that remove liquidity from the Exchange. QDP is designed to provide enhanced protections to MDOs by tracking significant executions that constitute the best bid or offer on the EDGX Book [29] and enabling Users [30] to avoid potentially unfavorable executions by preventing MDOs entered with the optional QDP instruction from exercising discretion to trade at more aggressive prices when QDP has been triggered.[31] Currently, orders appended with fee code DX are be assessed a fee of $0.00060 per share in securities at or above $1.00 and 0.30% of dollar value for securities priced below $1.00. The Exchange proposes to increase the fee to $0.0010 per share in securities at or above $1.00. There is no proposed change in the fee assessed to securities priced below $1.00.

The Exchange also offers various fee codes for orders routed away from the Exchange. The Exchange is proposing to modify the routing fees associated with fee codes RZ,[32] I,[33] BY,[34] AA,[35] AY,[36] RR,[37] and RY [38] to match the base add or remove rate for the associated market center to which the order is routed. The rebates for fee codes RZ, I, AA, and RR will be revised to $0.0016 per share in securities priced above $1.00.[39] The rebates for fee codes BY and AY will be revised to $0.0002 per share in securities priced above $1.00.[40] The fee for fee code RY will be revised to $0.0020 per share in securities priced above $1.00.[41] There are no changes to the fees or rebates associated with securities priced below $1.00.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of

[25] *See* EDGX Rule 11.21(a)(1). A ''Retail Member Organization'' or ''RMO'' is a Member (or a division thereof) that has been approved by the Exchange under this Rule to submit Retail Orders.

[26] *See* EDGX Rule 11.21(a)(2). A ''Retail Order'' is an agency or riskless principal order that meets the criteria of FINRA Rule 5320.03 that originates from a natural person and is submitted to the Exchange by a Retail Member Organization, provided that no change is made to the terms of the order with respect to price or side of market and the order does not originate from a trading algorithm or any other computerized methodology.

[27] *See* Exchange Rule 11.8(g).

[28] *See* Exchange Rule 11.8(g)(10).

[29] *See* Exchange Rule 1.5(d).

[30] *See* Exchange Rule 1.5(ee).

[31] *See* Securities Exchange Act Release No. 89007 (June 4, 2020), 85 FR 35454 (June 10, 2020) (SR–CboeEDGX–2020–010) (''Notice of Filing of Amendment No. 1 and Order Granting Accelerated Approval of a Proposed Rule Change, as Modified by Amendment No. 1, to Amend the Rule Relating to MidPoint Discretionary Orders to Allow Optional Offset or Quote Depletion Protection Instructions'').

[32] Fee code RZ is appended to orders routed to BZX that add liquidity.

[33] Fee code I is appended to orders routed to EDGA using the ROUC routing strategy.

[34] Fee code BY is appended to orders routed to BYX using Destination Specific (''DIRC'') or ROUC routing strategy.

[35] Fee code AA is appended to orders routed to EDGA using the ALLB routing strategy.

[36] Fee code AY is appended to orders routed to BYX using the ALLB routing strategy.

[37] Fee code RR is appended to orders routed to EDGA using the DIRC routing strategy.

[38] Fee code RY is appended to orders routed to BYX that add liquidity.

[40] *See* BYX Equities Fee Schedule, Standard Rates.

[41] *Id.*

section 6(b) of the Act.[42] Specifically, the Exchange believes the proposed rule change is consistent with the section 6(b)(5)[43] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the section 6(b)(5)[44] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers as well as section 6(b)(4)[45] as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities.

As described above, the Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The Exchange believes that its proposal to: (1) introduce a new Growth Tier and modify current Growth Tiers 1 and 2; (2) modify Non-Displayed Step-Up Volume Tier 1; (3) introduce a new Remove Volume Tier and modify current Remove Volume Tiers 1 and 2; and (4) modify Retail Growth Tier 3 reflects a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members. Additionally, the Exchange notes that relative volume-based incentives and discounts have been widely adopted by exchanges,[46] including the Exchange,[47] and are reasonable, equitable and non-discriminatory because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to (i) the value to an exchange's market quality and (ii) associated higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns. Competing equity exchanges offer similar tiered pricing structures, including schedules of rebates and fees that apply based upon members achieving certain volume and/or growth thresholds, as well as assess similar fees or rebates for similar types of orders, to that of the Exchange.

In particular, the Exchange believes its proposal to: (1) introduce a new Growth Tier and modify current Growth Tiers 1 and 2; (2) modify Non-Displayed Step-Up Volume Tier 1; (3) introduce a new Remove Volume Tier and modify current Remove Volume Tiers 1 and 2; and (4) modify Retail Growth Tier 3 is reasonable because the revised tiers will be available to all Members and provide all Members with an additional opportunity to receive an enhanced rebate or a reduced fee. The Exchange further believes the proposed modifications to its Growth Tiers, Non-Displayed Step-Up Volume Tier 1, Remove Volume Tiers, and Retail Growth Tier 3 will provide a reasonable means to encourage liquidity adding displayed orders, liquidity adding non-displayed orders, and retail orders, respectively, in Members' order flow to the Exchange and to incentivize Members to continue to provide liquidity adding volume to the Exchange by offering them an additional opportunity to receive an enhanced rebate or reduced fee on qualifying orders. An overall increase in activity would deepen the Exchange's liquidity pool, offers additional cost savings, support the quality of price discovery, promote market transparency and improve market quality, for all investors.

The Exchange believes that the proposed changes to its Growth Tiers, Non-Displayed Step-Up Volume Tier 1, Remove Volume Tiers, and Retail Growth Tier 3 are reasonable as they do not represent a significant departure from the criteria currently offered in the Fee Schedule. Further, the Exchange believes its proposed changes to the routing fee codes and to fee code DX are reasonable as these changes do not represent a significant departure from the Exchange's general pricing structure. The Exchange notes that the proposed changes to fee code DX are a modest increase over existing prices and yet the proposed fee is lower than other similar fees to remove volume on the Exchange.[48] Indeed, the proposed changes to fee codes RZ, I, BY, AA, AY, RR, and RY are intended to match the base add or remove rates on the Exchange's affiliates.[49] The Exchange also believes that the proposal represents an equitable allocation of fees and rebates and is not unfairly discriminatory because all Members will be eligible for the proposed new tiers and have the opportunity to meet the tiers' criteria and receive the corresponding enhanced rebate if such criteria is met. Without having a view of activity on other markets and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would definitely result in any Members qualifying the new proposed tiers. While the Exchange has no way of predicting with certainty how the proposed changes will impact Member activity, based on the prior months volume, the Exchange anticipates that at least one Member will be able to satisfy proposed Growth Tier 1, at least two Members will be able to satisfy proposed Growth Tier 3, at least two Members will be able to satisfy proposed Non-Displayed Step-Up Volume Tier 1, at least two Members will be able to satisfy proposed Remove Volume Tier 1, at least two Members will be able to satisfy proposed Remove Volume Tier 2, at least one Member will be able to satisfy proposed Remove Volume Tier 3, and at least two Members will be able to satisfy proposed Retail Growth Tier 3. The Exchange also notes that proposed changes will not adversely impact any Member's ability to qualify for enhanced rebates offered under other tiers. Should a Member not meet the proposed new criteria, the Member will merely not receive that corresponding enhanced rebate.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional order flow to a public exchange, thereby promoting market depth, execution incentives and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed changes further the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.''

[43] 15 U.S.C. 78f(b)(5).

[44] *Id.*

[45] 15 U.S.C. 78f(b)(4)

[46] *See e.g.,* BZX Equities Fee Schedule, Footnote 1, Add/Remove Volume Tiers.

[47] *See e.g.,* EDGX Equities Fee Schedule, Footnote 1, Add/Remove Volume Tiers.

[48] *See,* Cboe EDGX Equities Fee Schedule, Fee Codes and Associated Fees.

[49] *Supra* notes 38–39.

The Exchange believes the proposed rule changes do not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the proposed changes to the Exchange's Growth Tiers, Non-Displayed Step-Up Volume Tier 1, Remove Volume Tiers, and Retail Growth Tier 3 will apply to all Members equally in that all Members are eligible for each of the Tiers, have a reasonable opportunity to meet the Tiers' criteria and will receive the enhanced rebate on their qualifying orders if such criteria is met. The Exchange does not believe the proposed changes burdens competition, but rather, enhances competition as it is intended to increase the competitiveness of EDGX by amending an existing pricing incentive and adopting pricing incentives in order to attract order flow and incentivize participants to increase their participation on the Exchange, providing for additional execution opportunities for market participants and improved price transparency. Greater overall order flow, trading opportunities, and pricing transparency benefits all market participants on the Exchange by enhancing market quality and continuing to encourage Members to send orders, thereby contributing towards a robust and well-balanced market ecosystem.

The Exchange does not believe the proposal to revise the applicable fee or rebate associated with the Exchange's routing fee codes or fee code DX does not impose a burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed fee associated with fee code DX would apply to all Members equally in that all Members would be subject to the same flat fee for the execution of an MDO with a QDP instruction that removes liquidity from the Exchange. Both MDO and the associated QDP instruction are available to all Members on an equal and non-discriminatory basis. As a result, any Member can decide to use (or not use) the QDP instruction based on the benefits provided by that instruction in potentially avoiding unfavorable executions, and the associated charge that the Exchange proposes to amend. In addition, the fees and rebates associated with routing orders away from the Exchange similarly apply to all Members on an equal and non-discriminatory basis and Members can choose to use (or not use) the Exchange's routing functionality as part of their decision to submit order flow to the Exchange.

Next, the Exchange believes the proposed rule changes does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market. Members have numerous alternative venues that they may participate on and direct their order flow, including other equities exchanges, off-exchange venues, and alternative trading systems. Additionally, the Exchange represents a small percentage of the overall market. Based on publicly available information, no single equities exchange has more than 17% of the market share.[50] Therefore, no exchange possesses significant pricing power in the execution of order flow. Indeed, participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [51] The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission*, the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .''.[52] Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)(A) of the Act [53] and paragraph (f) of Rule 19b–4 [54] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CboeEDGX–2023–030 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeEDGX–2023–030. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent

BILLING CODE 4710–05–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36693]

BNSF Railway Company—Trackage Rights Exemption—Montana Rail Link, Inc.

BNSF Railway Company (BNSF) has filed a verified notice of exemption under 49 CFR 1180.2(d)(7), for acquisition of local and overhead trackage rights over approximately 65.7 miles of non-contiguous rail line owned by Montana Rail Link, Inc. (MRL), as follows: (1) from milepost 0.00 at Sappington, Mont., to milepost 9.84 at Harrison, Mont.; (2) from milepost 0.00 at East Helena, Mont., to milepost 4.86 at Montana City, Mont.; and (3) from milepost 0.00 at Logan, Mont., to milepost 51.00 at Spire Rock, Mont. (the Branch Lines).

BNSF and MRL have entered into a written trackage rights agreement [1] that grants BNSF exclusive local and overhead trackage rights over the Branch Lines. This agreement is related to a recent Board decision in which MRL obtained authority to discontinue service over approximately 656.47 miles of rail line and to discontinue trackage rights service over approximately 66.47 miles of rail line in Montana, Idaho, and Washington, thereby allowing BNSF to resume operations along this corridor.[2] According to the verified notice, MRL has agreed to grant BNSF trackage rights over the Branch Lines in order to facilitate that restored BNSF service. While MRL will continue to own the Branch Lines, BNSF states that it has agreed with MRL that BNSF will fulfill any and all common carrier obligations and responsibilities relating to the Branch Lines in connection with BNSF's trackage rights operations.

The transaction may be consummated on or after May 17, 2023, the effective date of the exemption.

As a condition to this exemption, any employees affected by the acquisition of the trackage rights will be protected by the conditions imposed in *Norfolk & Western Railway—Trackage Rights—Burlington Northern, Inc.,* 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Railway—Lease & Operate—California Western Railroad,* 360 I.C.C. 653 (1980).

If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than May 10, 2023 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36693, must be filed with the Surface Transportation Board via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on BNSF's representative, Peter W. Denton, Steptoe & Johnson LLP, 1330 Connecticut Ave. NW, Washington, DC 20036.

According to BNSF, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: April 27, 2023.

[55] 17 CFR 200.30–3(a)(12).

[1] A redacted version of the trackage rights agreement between BNSF and MRL was filed with the verified notice. An unredacted version of the agreement was submitted to the Board under seal concurrently with a motion for protective order, which is addressed in a separate decision.

[2] *Mont. Rail Link, Inc.—Discontinuance of Service Exemption—in Yellowstone, Stillwater, Sweet Grass, Park, Gallatin, Broadwater, Jefferson, Lewis & Clark, Powell, Deer Lodge, Granite, Missoula, Lake, Mineral, & Sanders Cntys., Mont.; Bonner & Kootenai Cntyss, Idaho; & Spokane Cnty., Wash.,* AB 575 (Sub-No. 2X) (STB served Mar. 8, 2023).

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Brendetta Jones,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2023–0011]

Agency Information Collection Activities: Request for Comments for a New Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for a new information collection, which is summarized below under **SUPPLEMENTARY INFORMATION**. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by July 3, 2023.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 2023–0011 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov.*

Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–00012.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Dan Parker, Senior Program Analyst at *danial.parker@dot.gov,* Federal Highway Administration, Department of Transportation, 1200 New Jersey Ave. SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Federal Share Flexibility Pilot Program.

Background: This is a request for Office of Management and Budget (OMB) emergency clearance for a new information collection request (ICR) to enable the Department of Transportation (DOT) Federal Highway Administration (FHWA) to implement the Federal Share Flexibility Pilot Program (FSFPP). The FSFPP was authorized in the Bipartisan Infrastructure Law (BIL), enacted as the Infrastructure Investment and Jobs Act (Act) (Pub. L. 117–58) on November 15, 2021. This historic Act is a once-in-a-generation opportunity to support transformational investments in our Nation's transportation infrastructure that will create good jobs, modernize our infrastructure, improve safety, tackle the climate crisis, and invest in communities that have too often been left behind. The Act includes the FSFPP to improve the safety, efficiency, and reliability of the movement of people and freight by replacing, rehabilitating, preserving, and protecting bridges in the National Bridge Inventory (NBI).

The FSFPP is critical to enabling State Department of Transportation (State DOT) agencies participating in the pilot added flexibility in the management and reimbursement of FHWA funded programs. The statutory requirements of the FSFPP are found under section 11107 of the BIL and codified at 23 U.S.C. 120(l). This new provision under Title 23 requires the establishment of a FSFPP not later than 180 days after the date of enactment of the BIL. Under the pilot, up to 10 State DOTs may be selected to participate. Selected State DOTs in the pilot are allowed to determine the Federal share on an individual project that is more than 0 percent and up to 100 percent as long as the average annual Federal share of all participating projects does not exceed the average of the maximum Federal share of those projects if those projects were not carried out under the pilot program.

Respondents: States, units of local government, and an Indian Tribe as defined in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 5304).

Expected Number of Respondents: 50.

Frequency: One-time application, to be followed by project agreement execution, reimbursement of funds, reporting, and project closeout.

Estimated Average Burden Hours per Response: 16.

Estimated Total Annual Burden Hours: 800.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of thecollected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; 23 U.S.C. 134 and 135; and 23 CFR chapter 1, subchapter E, part 450.

Dated: April 27, 2023.

Michael Howell,

FHWA Information Collection Officer.

[FR Doc. 2023–09313 Filed 5–2–23; 8:45 am]

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[FMCSA Docket No. FMCSA–2023–0030]

Qualification of Drivers; Exemption Applications; Epilepsy and Seizure Disorders

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of final disposition.

SUMMARY: FMCSA announces its decision to exempt 11 individuals from the requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) that interstate commercial motor vehicle (CMV) drivers have ''no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause loss of consciousness or any loss of ability to control a CMV.'' The exemptions enable these individuals who have had one or more seizures and are taking anti-seizure medication to operate CMVs in interstate commerce.

DATES: The exemptions were applicable on April 26, 2023. The exemptions expire on April 26, 2025.

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, FMCSA, DOT, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001, (202) 366–4001, *fmcsamedical@dot.gov.* Office hours are from 8:30 a.m. to 5 p.m. ET Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Dockets Operations, (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation

A. Viewing Comments

To view comments go to *www.regulations.gov.* Insert the docket number, (FMCSA–2023–0030) in the keyword box and click ''Search.'' Next, sort the results by ''Posted (Newer-Older),'' choose the first notice listed, and click ''Browse Comments.'' If you do not have access to the internet, you may view the docket online by visiting Dockets Operations in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

B. Privacy Act

In accordance with 49 U.S.C. 31315(b)(6), DOT solicits comments from the public on the exemption requests. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov.* As described in the system of records notice DOT/ALL 14 (Federal Docket Management System), which can be reviewed at *https://www.transportation.gov/individuals/privacy/privacy-act-system-records-notices,* the comments are searchable by the name of the submitter.

II. Background

On March 22, 2023, FMCSA published a notice announcing receipt of applications from 11 individuals requesting an exemption from the epilepsy and seizure disorders prohibition in 49 CFR 391.41(b)(8) and requested comments from the public (88 FR 17287). The public comment period ended on April 21, 2023, and no comments were received.

FMCSA has evaluated the eligibility of these applicants and determined that granting exemptions to these individuals would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved by complying with § 391.41(b)(8).

The physical qualification standard for drivers regarding epilepsy found in § 391.41(b)(8) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of epilepsy or any other condition which is likely to cause the loss of consciousness or any loss of ability to control a CMV.

In addition to the regulations, FMCSA has published advisory criteria [1] to assist medical examiners (MEs) in determining whether drivers with certain medical conditions are qualified to operate a CMV in interstate commerce.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

IV. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315(b), FMCSA may grant an exemption from the FMCSRs for no longer than a 5-year period if it finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption. The statutes allow the Agency to renew exemptions at the end of the 5-year period. However, FMCSA grants medical exemptions from the FMCSRs for a 2-year period to align with the maximum duration of a driver's medical certification.

The Agency's decision regarding these exemption applications is based on the 2007 recommendations of the Agency's Medical Expert Panel. The Agency conducted an individualized assessment of each applicant's medical information, including the root cause of the respective seizure(s) and medical information about the applicant's seizure history, the length of time that has elapsed since the individual's last seizure, the stability of each individual's treatment regimen and the duration of time on or off of anti-seizure medication. In addition, the Agency reviewed the treating clinician's medical opinion related to the ability of the driver to safely operate a CMV with a history of seizure and each applicant's driving record found in the commercial driver's license Information System for commercial driver's license (CDL) holders, and interstate and intrastate inspections recorded in the Motor Carrier Management Information System. For non-CDL holders, the Agency reviewed the driving records from the State Driver's Licensing Agency. A summary of each applicant's seizure history was discussed in the March 22, 2023, **Federal Register** notice (88 FR 17287) and will not be repeated in this notice.

These 11 applicants have been seizure-free over a range of 31 years while taking anti-seizure medication and maintained a stable medication treatment regimen for the last 2 years. In each case, the applicant's treating physician verified his or her seizure history and supports the ability to drive commercially.

The Agency acknowledges the potential consequences of a driver experiencing a seizure while operating a CMV. However, the Agency believes the drivers granted this exemption have demonstrated that they are unlikely to have a seizure and their medical condition does not pose a risk to public safety.

Consequently, FMCSA finds further that in each case exempting these applicants from the epilepsy and seizure disorder prohibition in § 391.41(b)(8) would likely achieve a level of safety equal to that existing without the exemption, consistent with the applicable standard in 49 U.S.C. 31315(b)(1).

V. Conditions and Requirements

The terms and conditions of the exemption are provided to the applicants in the exemption document and include the following: (1) each driver must remain seizure-free and maintain a stable treatment during the 2-year exemption period; (2) each driver must submit annual reports from their treating physicians attesting to the stability of treatment and that the driver has remained seizure-free; (3) each driver must undergo an annual medical examination by a certified ME, as defined by § 390.5T; and (4) each driver must provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy of his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the exemption when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

VI. Preemption

During the period the exemption is in effect, no State shall enforce any law or regulation that conflicts with this exemption with respect to a person operating under the exemption.

VII. Conclusion

Based upon its evaluation of the 11 exemption applications, FMCSA exempts the following drivers from the epilepsy and seizure disorder prohibition in § 391.41(b)(8), subject to the requirements cited above:

Keith Dohrmann (MN)
Wallace Ferguson (CO)
Derek Jazdzewski (WI)

[1] These criteria may be found in APPENDIX A TO PART 391—MEDICAL ADVISORY CRITERIA, section H. Epilepsy: § 391.41(b)(8), paragraphs 3, 4, and 5, which is available on the internet at *https://www.gpo.gov/fdsys/pkg/CFR-2015-title49-vol5/pdf/CFR-2015-title49-vol5-part391-appA.pdf.*

Charles E. Johnson (KS)
Michael Littleton (CO)
Robert Newhand (NY)
Kristopher Pettitt (CA)
Taylor Ramey (TX)
Herbert Spike (CT)
Scott Stone (WY)
Andrew Toler (VA)

In accordance with 49 U.S.C. 31315(b), each exemption will be valid for 2 years from the effective date unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) the person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained prior to being granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136, 49 U.S.C. chapter 313, or the FMCSRs.

Larry W. Minor,

Associate Administrator for Policy.

Federal Railroad Administration

[Docket No. FRA–2022–0004]

Equivalent Protective Arrangements for Railroad Employees; Withdrawal of Notice of Final Guidance

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice; withdrawal.

SUMMARY: On November 28, 2022, the Federal Railroad Administration (FRA) published a notice in the **Federal Register** announcing the availability of final guidance issued by FRA in connection with statutorily required protective arrangements for employees impacted by certain projects financed by the Federal government. This document withdraws that notice, FR Doc. 2022–25882. The final guidance issued by FRA remains in effect.

DATES: As of May 3, 2023, FR Doc. 2202–25882, published on November 28, 2022, is withdrawn.

FOR FURTHER INFORMATION CONTACT: For further information, please contact Kevin MacWhorter, Attorney-Adviser, Development Law Office, at telephone: (202) 641–8727, email: *Kevin.MacWhorter@dot.gov.*

SUPPLEMENTARY INFORMATION: FR Doc. 2202–25882, published on November 28, 2022, (87 FR 73064), is withdrawn by this notice.

Issued in Washington, DC.

Allison Ishihara Fultz,

Chief Counsel.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2023–0019]

Agency Information Collection Activities; Notice and Request for Comment; State Data Transfer for Vehicle Crash Information

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for comments on a request for modification of a currently approved information collection.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for a modification of a currently approved information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB approval on State Data Transfer for Vehicle Crash Information collection.

DATES: Comments must be submitted on or before July 3, 2023.

ADDRESSES: You may submit comments identified by the Docket No. NHTSA–2021–0039 through any of the following methods:

- *Electronic Submissions:* Go to the Federal eRulemaking Portal at *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail or Hand Delivery:* Docket Management, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays. To be sure someone is there to help you, please call (202) 366–9322 before coming.

Instructions: All submissions must include the agency name and docket number for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78) or you may visit *https://www.transportation.gov/privacy.*

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* or the street address listed above. Follow the online instructions for accessing the dockets via internet.

FOR FURTHER INFORMATION CONTACT: For additional information or access to background documents, contact Liza Lemaster-Sandbank, Office of State Data Reporting System Division, (NSA–0130), (202) 366–4257, National Highway Traffic Safety Administration, W53–306, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.,*), before an agency submits a proposed collection of information to OMB for approval, it must first publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulation (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) how to enhance the quality, utility, and clarity of the information to be collected; and (d) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated,

electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.* permitting electronic submission of responses. In compliance with these requirements, NHTSA asks for public comments on the following proposed collection of information for which the agency is seeking approval from OMB.

Title: State Data Transfer (SDT) for Vehicle Crash Information.

OMB Control Number: 2127–0753.

Form Number(s): None.

Type of Request: Modification a currently approved information collection.

Type of Review Requested: Regular.

Requested Expiration Date of Approval: 3 years from date of approval.

Summary of the Collection of Information: The State Data Transfer (SDT) program is a voluntary collection of motor vehicle crash data. State agencies collect this information about motor vehicle crashes on Police Accident Reports (PARs) [1] for their own needs. In general, a PAR includes information about the vehicles and individuals involved in a crash, injuries or fatalities resulting from a crash, roadway information, environmental information, information to reconstruct the crash scenes, etc. The SDT is a process through which participating States transfer their PAR data to NHTSA. SDT has two components that NHTSA's National Center for Statistics and Analysis (NCSA) calls protocols:

1. The *State Data System (SDS)* protocol obtains PAR crash data from States that submit data on an annual basis to NCSA. The data is submitted via electronic media, such as encrypted CD–ROM/DVD, or through secured mail or a secure file transfer protocol (SFTP). Files submitted through the SDS protocol are referred to as ''annual crash files.''

2. The *Electronic Data Transfer (EDT)* protocol obtains PAR crash data, crash reports, and crash images from participating State crash systems through an electronic data transfer. Generally, this transfer occurs on a nightly basis following State data quality control checks and acceptance from each State's centralized database. The information is transmitted using Extensible Markup Language (XML) or JavaScript Object Notation (JSON) files through a web service using Hypertext Transfer Protocol Secure (HTTPS) protocol between a State's crash data system and NHTSA. NHTSA started using this EDT protocol in 2015. The data NHTSA receives is in the States' format, which is not standardized. NHTSA does not currently provide regular funding to the States to participate in EDT.

On November 15, 2021, President Biden signed the Infrastructure Investment and Jobs Act (IIJA or the Bipartisan Infrastructure Law), Public Law 117–58. Section 24108 (d) authorizes the Secretary of Transportation to establish the State Electronic Data Collection (SEDC) program to provide grants to States to establish, upgrade, and standardize their centralized statewide crash data repositories to enable electronic data collection, intrastate data sharing, and electronic data transfer to NHTSA. The objective is to increase the accuracy, timeliness, and accessibility of the data, including data related to fatalities involving vulnerable road users. Through SEDC, NHTSA will award grants to States to modernize or establish a centralized statewide crash data repository to enable full electronic data transfer to NHTSA, increase their alignment to the Model Minimum Uniform Crash Criteria (MMUCC) Sixth Edition data, and transmit the data in a standardized format to NHTSA. This information collection request is to modify NHTSA's existing information collection for SDT to account for changes resulting from the new grant program. The new grant program will not only increase the number of States using the EDT protocol, but it will also request data standardization and increased alignment with the MMUCC. States awarded the SEDC grant will be referred to as SEDC States; States that continue to electronically transmit their crash data to NHTSA through the EDT protocol without SEDC grant funds will be referred to as non-SEDC States.

The SDT process allows States to submit all their PAR data to NHTSA. NCSA uses this data to develop a census of the participating State's crashes. The dataset helps NCSA identify existing and emerging highway safety trends and assess the effectiveness of motor vehicle safety standards and new and emerging technologies on vehicle and highway safety programs. NHTSA also uses the dataset to support NHTSA's Corporate Average Fuel Economy (CAFE) program. Specifically, NHTSA uses the data to analyze the effects vehicle mass has on fatalities in cost benefit analyses for CAFE rulemakings.

Description of the Need for the Information and Proposed Use of the Information: NHTSA utilizes the SDT data to identify existing and emerging highway safety trends, assess the effectiveness of motor vehicle safety standards, and study the impact of new and emerging technologies on vehicles and highway safety programs. For example, NHTSA combines data from the SDT with information about the type of advanced driver assistance systems (ADAS) on crash-involved vehicles to estimate the effectiveness of ADAS technologies such as lane keeping support, automatic emergency braking, and blind spot detection.

NHTSA also uses the SDT data to automatically pre-populate the motor vehicle crash data it collects for several other NHTSA data collection programs. The following are brief descriptions of these data collection programs:

- FARS (OMB Control No. 2127–0006) is a nationwide census of fatalities caused by motor vehicle traffic crashes. In addition to PAR data, FARS includes detailed information regarding the location of the crash, the vehicles, and the people involved. FARS cases can also include toxicology report data, medical records, medical examiner reports, etc.[2]
- CRSS (OMB Control No. 2127–0714) is a nationally representative sample of police-reported crashes involving all types of motor vehicles, pedestrians, and cyclists, ranging from property-damage-only crashes to those that result in fatalities. CRSS data elements are a subset of the data elements on each State's PAR.[3]
- Investigation-based Crash Data Studies (OMB Control Number 2127–0706) includes CISS, SCI and Special Studies. CISS is a nationally representative sample of minor, serious, and fatal crashes involving at least one passenger vehicle—cars, light trucks, sport utility vehicles, and vans—towed from the scene. CISS collects data at both the crash level through scene analysis and the vehicle level through vehicle damage assessment together with injury coding. Data collected through CISS expands upon the information that is collected in a PAR.[4]

The SCI Program provides NHTSA with the most in-depth crash data collected by the agency. The data collected ranges from basic information contained in routine police and insurance crash reports, to comprehensive data from special reports

[1] Police Accident Reports (PARs) are also known as Police Crash Reports (PCRs) in some jurisdictions.

[2] Additional details about FARS and how the agency collects this information are available in the supporting statements for the ICR with OMB Control No. 2127–0006.

[3] Additional details about CRSS and how the agency collects this information are available in the supporting statements for the ICR with OMB Control No. 2127–0714.

[4] Additional details about CISS and how the agency collects this information are available in the supporting statements for the ICR with OMB Control No. 2127–0706.

produced by professional crash investigation teams. Hundreds of data elements relevant to the vehicle, occupants, injury mechanisms, roadway, and safety systems are collected for each of the over 100 crashes designated for study annually.

• The Non-Traffic Surveillance (NTS) is a data collection effort for collecting information about non-traffic crashes and non-crash incidents. The NTS data provide counts and details regarding fatalities and injuries that occur in non-traffic crashes and in non-crash incidents. The NTS non-traffic crash data are obtained through NHTSA's data collection efforts for the Crash Report Sampling System (CRSS), the Crash Investigation Sampling System (CISS), and the Fatality Analysis Reporting System (FARS). NTS also includes data outside of NHTSA's own data collections. NTS' non-crash injury data is based upon emergency department records from a special study conducted by the Consumer Product Safety Commission's National Electronic Injury Surveillance System (NEISS) All Injury Program. NTS non-crash fatality data is derived from death certificate information from the Centers for Disease Control's National Vital Statistics System.

• CIREN combines crash data collection with professional multidisciplinary analysis of medical and engineering evidence to determine injury causation in every crash investigation conducted. The mission of the CIREN is to improve the prevention, treatment, and rehabilitation of motor vehicle crash injuries to reduce deaths, disabilities, and human and economic costs.

Before EDT, the transfer of motor vehicle crash data from a State's crash data system to NHTSA's FARS, CRSS and CISS required individuals to manually enter all State vehicle crash data into each of the crash data systems operated by NHTSA. The SDT program's EDT protocol enabled NHTSA to automate the transfer of State motor vehicle crash data into NHTSA's data collection systems and automate some of the data coding processes in FARS, CRSS and CISS. Through the SEDC program, participating States will build and modernize their centralized statewide crash data repositories and increase their alignment to the MMUCC Sixth Edition; NHTSA will receive more standardized and timely data and increase the usability of the data.

NHTSA's SDT program will reduce the burden of manual data entry and result in more accurate and timely data to help save lives, prevent injuries, and reduce economic costs due to motor vehicle crashes.

In addition, the SDT data are made available to other DOT agencies, such as the Federal Highway Administration and the Federal Motor Carrier Safety Administration, to support their mission to save lives on our national roadways. The SDT data received through SEDC grant will be made available to public as required in BIL.

Affected Public: This voluntary information collection involves State agencies that collect crash data. Specifically, the collection involves State governments, the District of Columbia government, U.S. Territory governments and the Secretary of the Interior, acting on behalf of an Indian Tribe. For purposes of this collection, we refer to the respondents generically as ''States.''

Estimated Number of Respondents: 43.

There are currently 39 States participating in the SDT: 31 States participating using the SDS protocol, and 20 States participating using the EDT protocol. There are 15 States providing data using both protocols.

NHTSA expects that in the next three (3) years, these thirty-nine (39) States will continue to submit their data using either SDS or EDT protocol. NHTSA also expects that, in the next three years, ten (10) out of the twenty (20) existing EDT States will apply and be awarded SEDC grants and start sending more MMUCC-aligned data to NHTSA; three (3) SDS States, that are not EDT States, will apply and be awarded SEDC grants and begin sending MMUCC-aligned data to NHTSA; and two (2) new States, neither SDS nor EDT participating States, will apply and be awarded SEDC grants and begin collecting and transmitting standardized data to NHTSA. Therefore, NHTSA estimates the total number of States participating in the SDT will increase by four (4), to a total of forty-three (43), which is the existing thirty-nine (39) SDT States plus the four (4) new SEDC States in the next three (3) years.

Frequency: The frequency of this information collection varies State-by-State, potentially from daily to annually, as agreed upon by NHTSA and the individual States. State participating in the SDS protocol typically send a file to NHTSA once a year with all the crashes occurring during a calendar year. States send these files when it has completed its quality control process. For the EDT States, the data is usually transferred every night with the crash cases that have completed the quality control process since the last nightly transfer.

Estimated Total Annual Burden Hours: 312,663 hours.

As mentioned above, this information collection request is being updated to incorporate the burden hour and cost estimates for the new SEDC program under the EDT protocol. Due to the different requirements for SDS States, EDT non-SEDC States and EDT SEDC States, the annual burden for these three types of data transmissions are described separately below.

SDS Protocol

SDS information is obtained annually from States and is submitted in a more traditional method via electronic media through secured mail or a Secure File Transfer Protocol (SFTP). NHTSA assumes a participating State already has a centralized statewide crash data repository. Currently, thirty-one (31) States are voluntarily submitting their annual crash database to NHTSA, with five (5) States sending electronic media and twenty-six (26) states uploading the database to an SFTP site. Since NHTSA accepts the States' centralized statewide crash data repository without changes, NHTSA estimates that it will require eight (8) hours for a State Database Administrator to save a copy of the State's annual crash database onto a SFTP site or electronic media. We estimate an additional four (4) hours will be required for an administrative assistant to package and send the electronic media to NHTSA. Therefore, the burden hours for thirty-one (31) SDS States to save a copy of the State's annual crash database onto a SFTP site or electronic media is 248 hours (8 hours × 31 States). An additional burden for the five (5) SDS States to package and send the electronic media to NHTSA is 20 hours (4 hours × 5 States).

To estimate the labor cost associated with submitting the SDS information, NHTSA looked at wage estimates for the type of personnel involved with copying, packaging and sending the data. NHTSA estimates the total labor costs associated with copying the database by looking at the average wage for Database and Network Administrators and Architects. The Bureau of Labor Statistics (BLS) estimates that the average hourly wage for Database and Network Administrators and Architects (Standard Occupational Classification #15–1240, May 2021) is $49.25 [5] The Bureau of Labor Statistics estimates that State and local government workers'

[5] *See* May 2021 National Occupational Employment and Wage Estimates United States, available at *https://www.bls.gov/oes/current/oes_nat.htm* (accessed March 13, 2023).

wages represent 61.9% of total labor compensation costs.[6] Therefore, NHTSA estimates the hourly labor costs for copying the database to be $79.56 ($49.25 ÷ 61.9%) for Database and Network Administrator and Architects. The cost associated with the eight (8) hours of Database and Network Administrator labor is estimated to be $636.48 ($79.56 × 8 hours) per respondent.

For the 5 States sending electronic media, NHTSA estimates the total labor costs for packing and sending the database by looking at the average wage for Secretaries and Administrative Assistants. The BLS estimates that the average hourly wage for Secretaries and Administrative Assistants (Standard Occupational Classification #43–6014, May 2021) is $21.76.[7] By using the same estimate that wages represent 61.9% of the total compensation cost of labor, NHTSA estimates the total labor hour for packing and sending the database on electronic media to be $35.15($21.76 ÷ 61.9%). Therefore, the cost associated with the four (4) hours to send the electronic media is estimated to be $140.60 ($35.15 × 4 hours) per respondent.

Combining these copying, packing, and sending burden estimates for SDS, NHTSA estimates that the total burden hours associated with this collection will be 268 (248 + 20) hours and total labor cost associated with the collection will be $19,731 ($638.48 × 31 States) for copying, and $703 ($140.60 × 5 States) for packing and sending, for a total of $20,434 ($19,731 + $703) for the SDS protocol.

States Using the EDT Protocol

Due to the different requirements including data standardization and alignment to MMUCC for SEDC and non-SEDC State, the cost estimates for these two groups under EDT protocol will be different as described below.

Non-SEDC States Using EDT Protocol

The non-SEDC States using the EDT protocol burden hour estimate is based on the level of effort reported by the States that have fully implemented EDT. NHTSA estimates that in the next three years, there will not be any new States joining the twenty (20) States already participating in the SDT program using the EDT protocol. Any new State will participate in EDT by applying for the SEDC grant and meeting SEDC requirements. In addition, NHTSA estimates that over the next three years, starting in year two (10) existing EDT States will begin participating in the new SEDC grant program and will start sending data aligned to MMUCC. NHTSA estimates that in year one, year two and year three, the number of non-SEDC EDT states will be 20, 15 and 10, respectively. Therefore, NHTSA estimates that there will be, on average, fifteen (15) non-SEDC EDT protocol States in each of the next three years. Since these fifteen (15) non-SEDC States are already using the EDT protocol, the cost and burden estimates for these States only account for annual maintenance effort. The estimates assume a participating State already has a centralized statewide crash data repository. The hourly burden for maintenance on States associated with non-SEDC EDT is estimated at five (5) hours per year, based upon currently participating States' experiences. This time is generally used to troubleshoot any connection issues or refine mapping protocols for any data elements that have changed.

NHTSA estimates the cost for IT personnel burden hours using the Bureau of Labor Statistics' mean wage estimate for Software and Web Developers, Programmers, and Testers (Standard Occupational Classification #15–1250, May 2021) of $54.68.[8] The Bureau of Labor Statistics estimates that for State and local government workers, wages represent 61.9% of total compensation.[9] Therefore, the total hourly cost associated with the IT burden hours is estimated to be $88.34 ($54.68 ÷ 61.9%) per hour.

Per the loaded labor rates for State IT staff outlined above, five (5) hours of work translates to an estimated total annual maintenance burden of $441.70 ($88.34 × 5 hours) per State respondent maintaining participation in the EDT program. NHTSA estimates that there will be, on average, 15 States participating in non-SEDC EDT program in each of the next three years. The total annual responses are 5,475 (15 EDT States × 365 nightly responses). Therefore, the annual maintenance cost for the States is a total of $6,626 ($441.70 × 15 States) per year. The number of total burden hours for the 15 States is 75 hours (5 × 15 States).

SEDC States Using EDT Protocol

NHTSA published a Request for Information (RFI) [10] from May 2, 2022, to July 15, 2022, to assist the agency with the development and implementation of a new discretionary grant program to increase the number of States, U.S. territories, and Indian tribes electronically transferring their motor vehicle crash data to the NHTSA. Sixteen (16) States and Territories responded to the RFI with cost information for updating their centralized statewide crash data repositories and aligning to previous versions of MMUCC. NHTSA used that information to inform NHTSA's burden estimates and estimates the burden as follows.

The cost and burden estimates for the EDT protocol are divided into two efforts: a one-time implementation effort, and an annual maintenance effort. To increase their alignment with the new MMUCC, the States will need to either develop a new electronic Police Accident Report (PAR) and build a centralized statewide crash data repository if they don't already have one or update the existing PAR and centralized statewide crash data repository to increase their alignment to the new MMUCC. In addition, States will need to electronically transfer their data in a standardized format to NHTSA. NHTSA predicts the States will need to take the following specific actions:

- Manually entering PAR data if there are legacy paper PARs to be input into the new and/or updated centralized statewide crash data repository.
- Developing a new PAR to increase alignment with the updated MMUCC.
- Adopting the new State PAR by law enforcement agencies.
- Setting up information technology infrastructure for the electronic centralized statewide crash data repository.
- Identifying and implementing the system changes to align with the updated MMUCC.
- Developing a user guide, data dictionary and training materials for the new and/or updated data collection system.
- Developing and implementing database and data warehouse for the data collection.
- Developing and implementing data transfer protocols for collecting data

[9] Employer Costs for Employee Compensation by ownership (Sept. 2022), available at *https://www.bls.gov/news.release/ecec.t01.htm* (accessed March 13, 2023).

[10] Please see detailed information at this website: *https://www.regulations.gov/docket/NHTSA-2022-0030.*

from law enforcement agencies to centralized statewide crash data repository.

- Developing and implementing edit and validation rules for quality assurance for the data collection.
- Developing and implementing data transfer protocols for sharing data among States and sending data to NHTSA.
- Integrating the reporting from other vendors if some law enforcement agencies within a state use other vendor's software.
- Creating data analytics and dashboard for data monitoring and reporting.

NHTSA estimates the labor categories in the rows of table 1 are required for the implementation of tasks above. Based on the information received from the RFI, NHTSA estimates the labor hours for implementation and maintenance for each labor category as in the column ''Implementation Total Hours'' and ''Maintenance Total Hours'' in table 1. Labor category ''Data Entry and Information Processing Workers'' is needed when the States transition from a manual/paper system to an electronic system. Once the transition is complete, this labor category is no longer necessary and therefore is not included in the maintenance burden estimates.

NHTSA uses the Bureau of Labor Statistics' mean hourly wage estimate for each Labor Category in the column labeled '''Labor Rate w/o Fringe and Benefit'' [11] in table 1. The Bureau of Labor Statistics estimates that for State and local government workers, wages represent 61.9% of total compensation.[12] Therefore, the total hourly rate with fringe and benefit associated with the burden hours is calculated as below as shown in column ''Labor Rate with Fringe Benefit'' in table 1.

Labor Rate with Fringe Benefit = Labor Rate w/o Fringe Benefit ÷ Fringe Benefit Rate

The total cost for implementation and maintenance in table 1 are calculated as follows:

Implementation Total Cost = Implementation Total Hours × Labor Rate with Fringe Benefit

Maintenance Total Cost = Maintenance Total Hours × Labor Rate with Fringe Benefit

TABLE 1—BURDEN ESTIMATES FOR SECD EDT STATES USING EDT PROTOCOL

Labor category	Labor series	Implementation total hours (hrs)	Maintenance total hours (hrs)	Implementation labor rate w/o fringe and benefit ($/hr)	Overhead rate (%)	Maintenance labor rate with fringe and benefit ($/hr)	Implementation total labor cost (per state) ($)	Maintenance total labor cost (per state) ($)
Program Manager	11–3021	1,888	832	$78.33	61.90	126.54	238,908	105,281
Computer System Analyst	15–1211	5,080	160	49.14	61.90	79.39	403,301	12,702
Web and Digital Interface Designer	15–1255	1,760	416	49.50	61.90	79.97	140,747	33,268
Software Developer	15–1252	10,240	1,280	58.17	61.90	93.97	962,253	120,282
Web Developers	15–1254	5,920	1,280	39.09	61.90	63.15	373,848	80,832
Software Quality Assurance Analysts and Testers	15–1252	7,040	1,280	46.97	61.90	75.88	534,195	97,126
Database Architects	15–1243	3,520	960	58.58	61.90	94.64	333,133	90,854
Information Security Analysts	15–1212	1,384	80	54.46	61.90	87.98	121,764	7,038
Data Entry and Information Processing Workers	43–9020	4,192	.....	18.70	61.90	30.21	126,640	.....
Total	.....	41,024	6,288	.....	.....	.....	3,234,789	547,384

Thus, total labor cost for SEDC EDT implementation cost per State are estimated to be $3,234,789 with burden hours to be 41,024. The total annual maintenance burden cost per year per State is estimated to be $547,384 with burden hour as 6,288.

NHTSA anticipates that during the first year of the grant, States will be in the development and implementation phase, where data transmission is not expected. Beginning with year two (2), and into year three (3), it is estimated that approximately ten (10) States per year will start transmitting data to NHTSA using the EDT protocol. Therefore, the average of number of State to transmit data to NHTSA for the three (3) years is 7 ((10 + 10) ÷ 3 = 6.77, rounded to the nearest integer). In this case during year three (3), there will be ten (10) states in maintenance phase. These are the ten (10) States which start transmission data to NHTSA during year two (2). The average number of states in maintenance phase is 4 (10 ÷ 3 = 3.33, then round 3.33 up to the nearest integer which is 4).

As NHTSA estimated that there will be average 7 new SEDC EDT States each year, the total implementation cost per year will be $22,643,526 (7 × $3,234,789) with burden hours as 287,168 hours (7 × 41,024 hours); the average annual maintenance cost will be $2,189,536 (4 × $547,384) with burden hours as 25,152 hours (4 × 6,288 hours). The total SEDC EDT labor costs are $24,833,062 ($22,643,526 for implementation and $2,189,536 for annual maintenance). This estimate includes total labor costs to the State respondents, but States may choose to have contractors incur some or all of these labor cost. The total annual responses for SEDC EDT States are 4,015 (11 EDT States × 365 nightly responses).

Summary for SDT Burden Estimates

The total estimated burden for SDT is 312,663 hours (268 hours for SDS + 15 hours for non-SEDC EDT + (287,168 hours + 25,152 hours) for SEDC EDT) and total estimated labor cost is

[11] *See* May 2021 National Occupational Employment and Wage Estimates United States, available at *https://www.bls.gov/oes/current/oes_nat.htm#00-0000.*

[12] *See* table 1. Employer Costs for Employee Compensation by ownership (Sept. 2022), available at *https://www.bls.gov/news.release/ecec.t01.htm* (accessed Feb. 24, 2023).

$24,860,121 ($20,434 for SDS + $6,626 for non-SEDC EDT + ($22,643,526 + $2,1289,536) for SEDC EDT).

A summary of the burden estimates for SDT is provided in table 2.

TABLE 2—SUMMARY FOR ESTIMATED SDT BURDEN

	Number of states	Burden hours	Labor cost ($)
SDS Copying	31	248	19,731
SDS Packing and Sending	5	20	703
Non-SEDC EDT Maintenance	15	75	4,270
SEDC EDT Implementation	7	287,168	22,643,526
SEDC EDT Maintenance	4	25,152	2,189,536
Total	.....	312,663	24,860,121

Estimated Total Annual Burden Cost: $25,000,000.

The SEDC grant, in compliance with BIL, requires a twenty (20) percent match from participating State respondents. NHTSA estimates about half of the program cost for the SEDC grants will be labor costs. NHTSA estimates the total annual burden cost for the SEDC program (beyond the labor costs discussed in question 12) will be about $25,000,000 to respondents. Since the Grant respondents only have to provide at least 20 percent of the total cost, the respondents will have to fund about $5,000,000 annually.

NHTSA does not expect respondents to incur any additional costs for the SDS or non-SEDC States using EDT Protocol (beyond labor costs as discussed in question 12) as a result of this information collection.

Public Comments Invited: You are asked to comment on any aspects of this information collection, including (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (b) the accuracy of the Department's estimate of the burden of the proposed information collection; (c) whether the States will use contractor(s) to help implement the SEDC grant or manage the implementation in-house with the State's own IT department; (d) ways to enhance the quality, utility and clarity of the information to be collected; and (e) ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; 49 CFR 1.49; and DOT Order 1351.29.

Chou-Lin Chen,

Associate Administrator, National Center for Statistics and Analysis.

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Notice of OFAC Sanctions Action

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List (SDN List) based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of these persons are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

DATES: See **SUPPLEMENTARY INFORMATION** section for applicable date(s).

FOR FURTHER INFORMATION CONTACT: OFAC: Andrea Gacki, Director, tel.: 202–622–2490; Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Licensing, tel.: 202–622–2480; Assistant Director for Regulatory Affairs, tel.: 202–622–4855; or the Assistant Director for Enforcement, Compliance & Analysis, tel.: 202–622–2490.

SUPPLEMENTARY INFORMATION:

Electronic Availability

The SDN List and additional information concerning OFAC sanctions programs are available on OFAC's website (*https://www.treasury.gov/ofac*).

Notice of OFAC Action(s)

On April 27, 2023, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following persons are blocked under the relevant sanctions authority listed below.

BILLING CODE 4810–AL–P

Individuals

1. BAZGHANDI, Rouhollah (a.k.a. BAZGHANDI, Ruhollah), Iran; DOB 07 Mar 1981; nationality Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Gender Male; Passport D10008106 (Iran) expires 24 May 2026; IRGC Intelligence Organization Counterintelligence Official (individual) [IRGC] [IFSR] [HOSTAGES-EO14078] (Linked To: ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION).

   Designated pursuant to section 6(a)(i)(B) of Executive Order 14078, "Bolstering Efforts to Bring Hostages and Wrongfully Detained United States Nationals Home" (E.O. 14078), for being owned, controlled, or directed by, or to have acted or purported to act for or on behalf of, directly or indirectly, the ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION, a person whose property and interests in property are blocked pursuant to E.O. 14078.

2. KAZEMI, Mohammad (Arabic: محمد كاظمی), Tehran, Iran; DOB 11 Jul 1961; nationality Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Gender Male; Brigadier General (individual) [IRGC] [IFSR] [IRAN-HR] [HOSTAGES-EO14078] (Linked To: ISLAMIC REVOLUTIONARY GUARD CORPS; Linked To: ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION).

   Designated pursuant to section 6(a)(i)(B) of E.O. 14078 for being owned, controlled, or directed by, or to have acted or purported to act for or on behalf of, directly or indirectly, the ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION, a person whose property and interests in property are blocked pursuant to E.O. 14078.

3. MOHAGHEGHI, Mohammad Hassan, Iran; DOB 23 Jun 1963; nationality Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Gender Male; Passport D10008116 (Iran) expires 24 May 2026; IRGC Intelligence Organization Co-Deputy Chief Brigadier General (individual) [IRGC] [IFSR] [HOSTAGES-EO14078] (Linked To: ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION).

   Designated pursuant to section 6(a)(i)(B) of E.O. 14078 for being owned, controlled, or directed by, or to have acted or purported to act for or on behalf of, directly or indirectly, the ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION, a person whose property and interests in property are blocked pursuant to E.O. 14078.

4. SAYYARI, Mohammad Mehdi (a.k.a. SAYYARI, Mehdi; a.k.a. SIARI, Mehdi), Iran; DOB 12 Jul 1959; nationality Iran; Additional Sanctions Information - Subject to Secondary Sanctions; Gender Male; IRGC Intelligence Organization Co-Deputy Chief (individual) [IRGC] [IFSR] [HOSTAGES-EO14078] (Linked To: ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION).

   Designated pursuant to section 6(a)(i)(B) of E.O. 14078 for being owned, controlled, or directed by, or to have acted or purported to act for or on behalf of, directly or indirectly, the ISLAMIC REVOLUTIONARY GUARD CORPS INTELLIGENCE ORGANIZATION, a person whose property and interests in property are blocked pursuant to E.O. 14078.

Dated: April 27, 2023.

BILLING CODE 4810–AL–C

UNIFIED CARRIER REGISTRATION PLAN

Sunshine Act Meetings

TIME AND DATE: May 4, 2023, 12:00 p.m. to 3:00 p.m., Eastern time.

PLACE: This meeting will be accessible via conference call and via Zoom Meeting and Screenshare. Any interested person may call (i) 1–929–205–6099 (US Toll) or 1–669–900–6833 (US Toll), Meeting ID: 999 3560 1878, to listen and participate in this meeting. The website to participate via Zoom Meeting and Screenshare is *https://kellen.zoom.us/meeting/register/tJ0kdOyurjoiHdwhVQv-o_aW5gTcnk36fbRE.*

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED: The Unified Carrier Registration Plan Audit Subcommittee (the ''Subcommittee'') will continue its work in developing and implementing the Unified Carrier Registration Plan and Agreement. The subject matter of this meeting will include:

Proposed Agenda

I. Call to Order—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will welcome attendees, call the meeting to order, call roll for the Audit Subcommittee, confirm whether a quorum is present, and facilitate self-introductions.

II. Verification of Publication of Meeting Notice—UCR Executive Director

The UCR Executive Director will verify the publication of the meeting notice on the UCR website and distribution to the UCR contact list via email followed by the subsequent publication of the notice in the **Federal Register**.

III. Review and Approval of Subcommittee Agenda and Setting of Ground Rules—UCR Audit Subcommittee Chair

For Discussion and Possible Subcommittee Action

The agenda will be reviewed, and the Subcommittee will consider adoption.

Ground Rules

Subcommittee action only to be taken in designated areas on the agenda.

IV. Review and Approval of Subcommittee Minutes From the February 9, 2023 Meeting—UCR Audit Subcommittee Chair

For Discussion and Possible Subcommittee Action

Draft minutes from the February 9, 2023 Subcommittee meeting via teleconference will be reviewed. The Subcommittee will consider action to approve.

V. Discuss Options To Replace the Retreat Audit Program With a Program That Relies on Roadside Inspection Data—UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, DSL Transportation Services, Inc., and Seikosoft

The UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, DSL Transportation Services, Inc., and Seikosoft will lead a discussion on options to replace the Retreat Audit Program currently utilized by the States with a roadside inspection data driven audit for non-IRP plated commercial motor vehicles and the motor carriers operating this type of registered equipment.

VI. Update on Monthly Question and Answer Session for State Auditors—UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair, and UCR Executive Director

The UCR Audit Subcommittee Chair, UCR Audit Subcommittee Vice-Chair and UCR Executive Director will provide a summary of the May 3, 2023, UCR State Auditor Question and Answer session and lead a discussion of the value of the 60-minute virtual question and answer sessions.

VII. Review States' Audit Compliance Snapshot for Registration Rates Audit Percentages for Years 2022 and 2023—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will review audit compliance rates for the states for registration years 2022 and 2023 and related compliance percentages for FARs, retreat audits, and registration compliance percentages.

VIII. General Review and Discussion of Audit Program—UCR Audit Subcommittee Chair and UCR Audit Subcommittee Vice-Chair

The UCR Audit Subcommittee Chair and UCR Audit Subcommittee Vice-Chair will lead discussion on auditing performance standards and direction of the program.

IX. Other Business—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will call for any other items Subcommittee members would like to discuss.

X. Adjournment—UCR Audit Subcommittee Chair

The UCR Audit Subcommittee Chair will adjourn the meeting.

The agenda will be available no later than 5:00 p.m. Eastern time, April 28, 2023 at: *https://plan.ucr.gov.*

CONTACT PERSON FOR MORE INFORMATION: Elizabeth Leaman, Chair, Unified Carrier Registration Plan Board of Directors, (617) 305–3783, *eleaman@board.ucr.gov.*

Alex B. Leath,

Chief Legal Officer, Unified Carrier Registration Plan.

[FR Doc. 2023–09331 Filed 4–28–23; 11:15 am]

BILLING CODE 4910–YL–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–XXXX]

Agency Information Collection Activity Under OMB Review: Native American Direct Loan (NADL) Processing Requirements

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration (VBA), Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Refer to ''OMB Control No. 2900–XXXX.''

SUPPLEMENTARY INFORMATION:

Authority: 38 U.S.C. 3761–3765.

Title: Native American Direct Loan (NADL) Processing Requirements.

OMB Control Number: 2900–XXXX.

Type of Review: New collection.

Abstract: The information collected in this package assists Native American Veterans in obtaining the VA home loan benefit to purchase, construct, or improve dwellings on trust lands, or to refinance their existing Native American Direct Loans (NADL) to a lower interest rate.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 88 FR 12448 on February 27, 2023, pages 12448 and 12449.

Affected Public: Individuals or Households.

Estimated Annual Burden: 1,721.00.

Estimated Average Burden per Respondent: 28.04 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 737.

By direction of the Secretary.

Dorothy Glasgow,

VA PRA Clearance Officer, (Alt.) Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

[OMB Control No. 2900–XXXX]

Agency Information Collection Activity: CFM Stakeholder Feedback Survey

AGENCY: Office of Construction and Facilities Management, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Office of Construction and Facilities Management, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a currently approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 3, 2023.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Sandra Martin, Office of Construction and Facilities Management, 003C6A, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *sandra.martin2@va.gov.* Please refer to ''OMB Control No. 2900–XXXX'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20006, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–XXXX'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to Section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, CFM invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of CFM's functions, including whether the information will have practical utility; (2) the accuracy of CFM's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 44 U.S.C. 3501–21.

Title: CFM Stakeholder Feedback Survey.

OMB Control Number: 2900–XXXX.

Type of Review: New collection.

Abstract: The Office of Construction & Facilities Management (CFM) Stakeholder Feedback Survey collects information for all of CFM's lines of business: major construction, major leases, facility condition assessments, and engineering studies. Respondents are members of project teams, and the information is related to how well the teams are performing. The purpose of the Stakeholder Feedback Survey Program is to improve project team performance across the four lines of business covered by the survey.

Respondents include federal employees in the Department of Veteran Affairs throughout CFM, Veterans Health Administration, and National Cemetery Administration, as well as U.S. Army Corps of Engineers construction management teams. The survey also collects information from members of private contractors associated with the projects described above (*e.g.,* architecture/engineering, construction, developers/lessors). Respondents provide feedback on the performance of the technical sub-teams with whom they have worked on a particular project.

The survey uses a set of ten questions to collect the information on team performance, plus two open-ended questions that address what is going well and concerns. The survey is delivered via email with a link to an online collection instrument. Advance notice and reminder emails are used to encourage participation.

The survey is administered by a federal contracting team (Blue Water Thinking and Booz Allen Hamilton). Raw data is seen and handled only by members of this team. Summary results are provided to CFM via a dashboard designed as part of the contract to design and administer the survey.

Affected Public: Members of private contracting firms associated with the projects described above (*e.g.,* architecture/engineering, construction, developers/lessors) are asked to complete the survey.

Estimated Annual Burden: 77 hours.

Estimated Average Burden per Respondent: 8 minutes.

Frequency of Response: Team members of Major Construction and Major Leasing projects are asked to complete the survey twice a year for the duration of the project. Team members of all other types of projects are asked to complete the survey once a year.

Estimated Number of Respondents: 578.

By direction of the Secretary.

Dorothy Glasgow,

VA PRA Clearance Officer, (Alt.) Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

Medicaid Program; Ensuring Access to Medicaid Services

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Proposed rule.

SUMMARY: This proposed rule takes a comprehensive approach to improving access to care, quality and health outcomes, and better addressing health equity issues in the Medicaid program across fee-for-service (FFS), managed care delivery systems, and in home and community-based services (HCBS) programs. These proposed improvements seek to increase transparency and accountability, standardize data and monitoring, and create opportunities for States to promote active beneficiary engagement in their Medicaid programs, with the goal of improving access to care.

DATES: To be assured consideration, comments must be received at one of the addresses provided below, by July 3, 2023.

ADDRESSES: In commenting, please refer to file code CMS–2442–P.

Comments, including mass comment submissions, must be submitted in one of the following three ways (please choose only one of the ways listed):

1. *Electronically.* You may submit electronic comments on this regulation to *http://www.regulations.gov.* Follow the ''Submit a comment'' instructions.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–2442–P, P.O. Box 8016, Baltimore, MD 21244–1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–2442–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT:

Karen LLanos, (410) 786–9071, for Medical Care Advisory Committee.

Jennifer Bowdoin, (410) 786–8551, for Home and Community-Based Services.

Jeremy Silanskis, (410) 786–1592, for Fee-for-Service Payment.

SUPPLEMENTARY INFORMATION:

Inspection of Public Comments: All comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all comments received before the close of the comment period on the following website as soon as possible after they have been received: *http://www.regulations.gov.* Follow the search instructions on that website to view public comments. CMS will not post on *Regulations.gov* public comments that make threats to individuals or institutions or suggest that the individual will take actions to harm the individual. CMS continues to encourage individuals not to submit duplicative comments. We will post acceptable comments from multiple unique commenters even if the content is identical or nearly identical to other comments.

I. Background

A. Overview

Title XIX of the Social Security Act (the Act) established the Medicaid program as a joint Federal and State program to provide medical assistance to eligible individuals, including many with low incomes. Under the Medicaid program, each State that chooses to participate in the program and receive Federal financial participation (FFP) for program expenditures, establishes eligibility standards, benefits packages, and payment rates, and undertakes program administration in accordance with Federal statutory and regulatory requirements. The provisions of each State's Medicaid program are described in the Medicaid ''State plan'' and, as applicable, related authorities, such as demonstration projects and waivers of State plan requirements. Among other responsibilities, CMS approves State plans, State plan amendments (SPAs), demonstration projects authorized under section 1115 of the Act, and waivers authorized under section 1915 of the Act; and reviews expenditures for compliance with Federal Medicaid law, including the requirements of section 1902(a)(30)(A) of the Act relating to efficiency, economy, quality of care, and access to ensure that all applicable Federal requirements are met.

As of December 2022, the Medicaid program provides essential health care coverage to more than 85 million [1] individuals, and, in 2021, accounted for 17 percent of national health expenditures.[2] The program covers a broad array of health benefits and services critical to underserved populations,[3] including low-income adults, children, parents, pregnant individuals, older adults, and people with disabilities. For example, Medicaid pays for approximately 41 percent of all births in the U.S.[4] and is the largest payer of long-term services and supports (LTSS),[5] the largest, single payer of services to treat substance use disorders,[6] and services to prevent and treat the Human Immunodeficiency Virus.[7]

On January 28, 2021, the President signed Executive Order (E.O.) 14009,[8] ''Strengthening Medicaid and the Affordable Care Act'' which established the policy objective to protect and strengthen Medicaid and the Affordable Care Act and to make high-quality health care accessible and affordable for every American and directed executive departments and agencies to review existing regulations, orders, guidance documents, and policies to determine whether such agency actions are inconsistent with this policy. On April

[8] Executive Order 14009: *https://www.federalregister.gov/documents/2021/02/02/2021-02252/strengthening-medicaid-and-the-affordable-care-act.*

5, 2022, E.O. 14070,[9] ''Continuing To Strengthen Americans' Access to Affordable, Quality Health Coverage,'' directed Federal agencies with responsibilities related to Americans' access to health coverage to review agency actions to identify ways to continue to expand the availability of affordable health coverage, to improve the quality of coverage, to strengthen benefits, and to help more Americans enroll in quality health coverage. This proposed rule aims to fulfill E.O.s 14009 and 14070 by helping States to strengthen Medicaid and improve access to and quality of care provided.

Ensuring that beneficiaries can access covered services is necessary to the basic operation of the Medicaid program. Depending on the State and its Medicaid program structure, beneficiaries access their health care services using a variety of care delivery systems (for example, FFS, fully-capitated managed care, partially capitated managed care, etc.), including through demonstrations and waiver programs. In 2020, 70 percent of Medicaid beneficiaries were enrolled in comprehensive managed care plans; [10] the remaining individuals received all of their care or some services that have been carved out of managed care through FFS.

Current access regulations are neither comprehensive nor consistent across delivery systems or coverage authority (for example, State plan and demonstration authority). For example, regulations at 42 CFR 447.203 and 447.204 relating to access to care, service payment rates, and Medicaid provider participation in rate setting apply only to Medicaid FFS delivery systems and focus on ensuring that payment rates are consistent with the statutory requirements in section 1902(a)(30)(A) of the Act. The regulations do not apply to services delivered under managed care. These regulations are also largely procedural in nature and rely heavily on States to form an analysis and reach conclusions on the sufficiency of their own payment rates.

With a program as large and complex as Medicaid, access regulations need to be multi-factorial to promote consistent access to health care for all beneficiaries across all types of care delivery systems in accordance with statutory requirements. Strategies to enhance access to health care services should reflect how people move through and interact with the health care system. We view the continuum of health care access across three dimensions of a person-centered framework: (1) enrollment in coverage; (2) maintenance of coverage; and (3) access to services and supports. Within each of these dimensions, accompanying regulatory, monitoring, and/or compliance actions may be needed to ensure access to health care is achieved and maintained.

In the spring of 2022, we released a request for information (RFI) [11] to collect feedback on a broad range of questions that examined topics such as: challenges with eligibility and enrollment; ways we can use data available to measure, monitor, and support improvement efforts related to access to services; strategies we can implement to support equitable and timely access to providers and services; and opportunities to use existing and new access standards to help ensure that Medicaid and CHIP payments are sufficient to enlist enough providers.

Some of the most common feedback we received through the RFI related to ways that we can promote health equity through cultural competency. Commenters shared the importance that cultural competency plays in how beneficiaries access health care and in the quality of health services received by beneficiaries. The RFI respondents shared examples of actions that we could take, including collecting and analyzing health outcomes data by sociodemographic categories; establishing minimum standards for how States serve communities in ways that address cultural competency and language preferences; and reducing barriers to enrollment and retention for racial and ethnic minority groups.

In addition to the topic of cultural competency, commenters also commonly shared that they viewed reimbursement rates as a key driver of provider participation in Medicaid and CHIP programs. Further, commenters noted that aligning payment approaches and setting minimum standards for payment regulations and compliance across Medicaid and CHIP delivery systems, services, and benefits could help ensure that beneficiaries' access to services is as similar as possible across beneficiary groups, delivery systems, and programs.

As mentioned previously in this proposed rule, the first dimension of access focuses on ensuring that eligible people are able to enroll in the Medicaid program. Access to Medicaid enrollment requires that a potential beneficiary know if they are or may be eligible for Medicaid, be aware of Medicaid coverage options, and be able to easily apply for and enroll in coverage. The second dimension of access in this continuum relates to maintaining coverage once the beneficiary is enrolled in the Medicaid program initially. Maintaining coverage requires that eligible beneficiaries are able to stay enrolled in the program without interruption, or that they know how to and can smoothly transition to other health coverage, such as CHIP, Exchange coverage, or Medicare, when they are no longer eligible for Medicaid coverage but have become eligible for other health coverage programs. In September 2022, we published a proposed rule, *Streamlining the Medicaid, Children's Health Insurance Program, and Basic Health Program Application, Eligibility, Determination, Enrollment, and Renewal Processes* (87 FR 54760; hereinafter the ''Streamlining Eligibility & Enrollment proposed rule'') to simplify the processes for eligible individuals to enroll and retain eligibility in Medicaid, CHIP, and the Basic Health Program (BHP).

The third dimension, which is the focus of this proposed rule, is access to services and supports. This rule is focused on addressing additional critical elements of access: (1) potential access, which refers to a beneficiary's access to providers and services, whether or not the providers or services are used; (2) beneficiary utilization, which refers to beneficiaries' actual use of the providers and services available to them; and (3) beneficiaries' perceptions and experiences with the care they did or were not able to receive. These terms and definitions build upon previous efforts to examine how best to monitor access.[12]

We are engaging in an array of regulatory activities, including three rulemakings that are currently underway (more specifically, the Streamlining Eligibility & Enrollment proposed rule, a proposed rule, entitled

Medicaid and Children's Health Insurance Program (CHIP) Managed Care Access, Finance, and Quality, on managed care including matters of access, and this proposed rule on access). Additionally, we are taking non-regulatory activities to improve beneficiary access to care (for example, best practices toolkits and technical assistance to States) to improve access to health care services across Medicaid delivery systems.

As noted earlier, we issued the Streamlining Eligibility & Enrollment proposed rule to address the first two dimensions of access to health care: (1) enrollment in coverage and (2) maintenance of coverage. Through that proposed rule, we sought to streamline Medicaid, CHIP and BHP eligibility and enrollment processes, reduce administrative burden on States and applicants/enrollees toward a more seamless eligibility and enrollment process, and increase the enrollment and retention of eligible individuals.

The managed care proposed rule seeks to improve access to care and quality outcomes for Medicaid and CHIP beneficiaries enrolled in managed care by: creating standards for timely access to care and States' monitoring and enforcement efforts; reducing burden for some State directed payments and certain quality reporting requirements; adding new standards that would apply when States use in lieu of services and settings (ILOSs) to promote effective utilization, and specifying the scope and nature of ILOS; specifying medical loss ratio (MLR) requirements, and establishing a quality rating system for Medicaid and CHIP managed care plans.

Through the managed care proposed rule and this proposed rule (Ensuring Access to Medicaid Services), we propose additional requirements to address the third dimension of the health care access continuum: access to services. The proposed requirements outlined later in this section focus on improving access to services in Medicaid by utilizing tools such as FFS rate transparency, standardized reporting for HCBS, and improving the process for interested parties, especially Medicaid beneficiaries, to provide feedback to State Medicaid agencies and for Medicaid agencies to respond to the feedback (also known as a feedback loop).

Through a combination of these three proposed rules, we seek to address a range of access-related challenges that impact how beneficiaries are served by Medicaid across all of its delivery systems. FFP would be available for expenditures that might be necessary to implement the activities States would need to undertake to comply with the provisions of the proposed rules, if finalized.

Finally, we also believe it is important to acknowledge the role of health equity within this proposed rule. Medicaid plays a disproportionately large role in covering health care for people of color in this country.[13] Consistent with E.O. 13985 on Advancing Racial Equity and Support for Underserved Communities Through the Federal Government (January 20, 2021),[14] which calls for advancing equity for underserved populations, we are working to ensure our programs consistently provide high-quality care to all beneficiaries, and thus advance health equity, consistent with the goals and objectives we have outlined in the CMS Framework for Health Equity 2022–2032 [15] and the HHS Equity Action Plan.[16] That effort includes increasing our understanding of the needs of those we serve to ensure that all individuals have access to equitable care and coverage.

We recognize that each State faces a unique set of challenges related to the resumption of its normal program acvitities after the end of the COVID–19 public health emergency (PHE). More specifically, the expiration of the continuous enrollment condition authorized by the Families First Coronavirus Response Act (FFCRA) presents the single largest health coverage transition event since the first open enrollment period of the Affordable Care Act. As a condition of receiving a temporary 6.2 percentage point Federal Medical Assistance Percentage (FMAP) increase under the FFCRA, States have been required to maintain enrollment of nearly all Medicaid enrollees. This continuous enrollment condition expired on March 31, 2023, and States now have 12 months to initiate and 14 months to complete renewals for all individuals enrolled in Medicaid, CHIP and the Basic Health Program. Additionally, many other temporary authorities adopted by States during the COVID–19 PHE will expire at the end of the PHE, and States will be returning to regular operations across their programs. The resumption of normal Medicaid operations is generally referred to as ''unwinding'' and the 12-month period for States to initiate all outstanding eligibility actions that were delayed because of the FFCRA continuous enrollment condition is called the ''unwinding period.'' CMS considered States' unwinding responsibilities when proposing the effective dates for the proposals in this rule, but, as noted below, we seek State feedback on whether our proposals strike the correct balance.

As we contemplate the timing of a final rule, we are considering adopting an effective date of 60 days following publication of the final rule and separate compliance dates for various provisions, which we note where relevant in our discussion of specific proposals in this proposed rule. We seek comment on whether an effective date of 60 days following publication would be appropriate when combined with later dates for compliance for some provisions. We also seek comment on the timeframe that would be most achievable and appropriate for compliance with each proposed provision and whether the compliance date should vary by provision.

B. Medical Care Advisory Committees (MCAC)

We obtained feedback during various public engagement activities conducted with States and other interested parties, which supports research findings that the beneficiary perspective and lived Medicaid experience [17] should be considered when making policy decisions related to Medicaid programs.[18] [19] A 2022 report from the

HHS Assistant Secretary of Planning and Evaluation (ASPE) noted that including people with lived experience in the policy-making process can lead to a deeper understanding of the conditions affecting certain populations, facilitate identification of possible solutions, and avoid unintended consequences of potential policy or program changes that could negatively impact the people the program aims to serve.[20] We have concluded that beneficiary perspectives need to be central to operating a high-quality health coverage program that consistently meets the needs of all its beneficiaries.

However, effective community engagement is not as simple as planning a meeting and requesting feedback. To create opportunities that facilitate true engagement, it is important to understand and honor strengths and assets that exist within communities; recognize and solicit the inclusion of diverse voices; dedicate resources to ensuring that engagement is done in culturally meaningful ways; ensure timelines, planning processes, and resources that support equitable participation; and follow up with communities to let them know how their input was utilized. Ensuring optimal health outcomes for all beneficiaries served by a program through the design, implementation, and operationalization of policies and programs requires intentional and continuous effort to engage people who have historically been excluded from the process.

Section 1902(a)(4) of the Act is a longstanding statutory provision that, as implemented in part in regulations currently codified at 42 CFR 431.12,[21] requires States to have a Medical Care Advisory Committee (MCAC) in place to advise the State Medicaid agency about health and medical care services. Under section 1903(a)(7) of the Act, expenditures made by the State agency to operate the MCAC are eligible for Federal administrative match.

The current MCAC regulations at § 431.12 require States to establish such a committee, and describe high-level requirements related to the composition of the committee, the scope of topics to be discussed, and the support the Committee can receive from the State in its administration. Due to the lack of specificity in the current regulations, these regulations have not been consistently implemented across States. For example, there is no mention of how States should approach meeting periodicity or meeting structure in ways that are conducive to including a variety of Medicaid interested parties. There is also no mention in the regulations about how States can build accountability through transparency with their interested parties by publicly sharing meeting dates, membership lists, and the outcomes of these meetings. The regulations also limit the MCAC discussions to topics about health and medical care services—which in turn limits the benefits of using the MCAC as a vehicle that can provide States with varied ideas, suggestions, and experiences on a range of issues (medical and non-medical) related to the effective administration of the Medicaid program.

As such, we have determined the requirements governing MCACs need to be more robust to ensure all States are using these committees optimally to realize a more effective and efficient Medicaid program that is informed by the experiences of beneficiaries, their caretakers, and other interested parties. The current regulations have been in place without change for over 40 years.[22] Over the last four decades, we have learned that the current MCAC requirements are insufficient in ensuring that the beneficiary perspective is meaningfully represented on the MCAC. Recent research regarding soliciting input from individuals with lived experience, including our recent discussions with States about their MCAC, provide a unique opportunity to re-examine the purpose of this committee and update the policies to reflect four decades of program experience.

In 2022, we gathered feedback from various public engagement activities conducted with States, other interested parties, and directly from a subset of State Medicaid agencies that described a wide variation in how States are operating MCACs today. The feedback suggested that some MCACs operate simply to meet the broad Federal requirements. As discussed previously in this section, we have discovered that our current regulations do not further the statutory goal of meaningfully engaging Medicaid beneficiaries and other low-income people in matters related to the operation of the Medicaid program. Meaningful engagement can help develop relationships and establish trust between the communities served and the Medicaid agency to ensure States receive important information concerning how to best provide health coverage to their beneficiary populations. The current MCAC regulations establish the importance of broad feedback from interested parties, but they lack the specificity that can ensure States use MCACs in ways that facilitate that feedback.

The current regulation requires that MCACs must include Medicaid beneficiaries as committee members. However, the regulations do not mention or account for the reality that other interested parties can stifle beneficiary contribution in a group setting. For example, when there are a small number of beneficiary representatives in large committees with providers, health plans, and professional advocates, it can be uncomfortable and intimidating for beneficiaries to share their perspective and experience. Based on these reasons, several States already use beneficiary-only groups that feed into larger MCACs.

Improvements to the MCACs are critical to ensuring a robust and accurate understanding of beneficiaries' challenges to health care access. The current regulations value State Medicaid agencies having a way to get feedback from interested parties on issues related to the Medicaid program. However, the current regulations lack specificity related to how MCACs can be used to benefit the Medicaid program more expressly by more fully promoting the beneficiary voice. MCACs need to provide a forum for beneficiaries and people with lived experience with the Medicaid program to share their experiences and challenges with accessing health care, and to assist States in understanding and better addressing those challenges. These committees also represent unique opportunities for States to include representation by members that reflect the demographics of their Medicaid program to ensure that the program is best serving the needs of all beneficiaries, but not all States are utilizing that opportunity.

The proposed rule seeks to strike a balance that reflects how States currently use advisory committees (such as MCACs or standalone beneficiary groups). We know that some States approach these committees as a way to meet a Federal requirement while other States are using them in much more innovative ways. As a middle ground, the proposed rule seeks to: (1) address the gaps in the current regulations described previously in this section; and (2) establish requirements to implement

[20] Syreeta Skelton-Wilson et al., ''Methods and Emerging Strategies to Engage People with Lived Experience,'' Office of the Assistant Secretary for Planning and Evaluation (ASPE), U.S. Department of Health and Human Services, January 4, 2022, *https://aspe.hhs.gov/reports/lived-experience-brief*.

[21] The regulatory provision was originally established in 36 FR 3793 at 3870.

[22] 43 FR 45091 at 45189.

more effective advisory committees. States would select members in a way that reflects a wide range of Medicaid interested parties (covering a diverse set of populations and interests relevant to the Medicaid program), place a special emphasis on the inclusion of the beneficiary perspective, and create a meeting environment where each voice is empowered to participate equally.

The changes we propose in this rule are rooted in best practices learned from experience and from current State examples of community engagement that support getting the type of feedback and experiences from beneficiaries, their caretakers, providers, and other interested parties that can then be used to positively impact care delivered through the Medicaid program.

Accordingly, the proposed rule includes changes that, if finalized, would support the implementation of the principles of bi-directional feedback, transparency, and accountability. We propose changes to the features of the new committee that could most effectively ensure member engagement, including the staff and logistical support that is required for beneficiaries and individuals representing beneficiaries to meaningfully participate in these committees. We also propose changes to expand the scope of topics to be addressed by the committee, address committee membership composition, prescribe the features of administration of the committee, establish requirements of an annual report, and underscore the importance of beneficiary engagement through the addition of a related beneficiary-only group.

C. Home and Community-Based Services (HCBS)

While Medicaid programs are required to provide medically necessary nursing facility services for most eligible individuals age 21 or older, coverage for home and community-based services (HCBS) is a State option.[23] As a result of this ''institutional bias,'' Medicaid reimbursement for LTSS was primarily spent on institutional care, historically, with very little spending for HCBS.[24] However, over the past several decades, States have used several Medicaid authorities,[25] as well as CMS-funded grant programs,[26] to develop a broad range of HCBS to provide alternatives to institutionalization for eligible Medicaid beneficiaries and to advance person-centered care. Consistent with many beneficiaries' preferences for where they would like to receive their care, HCBS have become a critical component of the Medicaid program and are part of a larger framework of progress toward community integration of older adults and people with disabilities that spans efforts across the Federal government. In fact, total Medicaid HCBS expenditures surpassed the long-standing benchmark of 50 percent of LTSS expenditures in FY 2013 and has remained higher than 50 percent since then, reaching 55.4 percent in FY 2017 and 58.6 percent in FY 2019.[27] A total of 30 States spent at least 50 percent of Medicaid LTSS expenditures on HCBS in FY 2019.

Furthermore, HCBS play an important role in States' efforts to achieve compliance with the Americans with Disabilities Act (ADA) of 1990, section 504 of the Rehabilitation Act of 1973 (section 504),[28] section 1557 of the Affordable Care Act, and the Supreme Court's decision in *Olmstead* v. *L.C.,*[29] in which the Court held that unjustified segregation of persons with disabilities is a form of unlawful discrimination under the ADA [30] and States must ensure that persons with disabilities are served in the most integrated setting appropriate to their needs.[31] Section 9817 of the American Rescue Plan Act of 2021 (ARP) (Pub. L. 117–2) recently provided a historic investment in Medicaid HCBS by providing qualifying States with a temporary 10 percentage point increase to the FMAP for certain Medicaid expenditures for HCBS that States must use to implement or supplement the implementation of one or more activities to enhance, expand, or strengthen HCBS under the Medicaid program.[32]

Medicaid coverage of HCBS varies by State and can include a combination of medical and non-medical services, such as case management, homemaker, personal care, adult day health, habilitation (both day and residential), and respite care services. HCBS programs serve a variety of targeted population groups, such as older adults, and children and adults with intellectual or developmental disabilities, physical disabilities, mental health/substance use disorders, and complex medical needs. HCBS programs provide opportunities for Medicaid beneficiaries to receive services in their own homes and communities rather than in institutions.

CMS and States have worked for decades to support the increased availability and provision of high-quality HCBS for Medicaid beneficiaries. While there are quality and reporting requirements for Medicaid HCBS, the requirements vary across authorities and are often inadequate to provide the necessary information for ensuring that HCBS are provided in a high-quality manner that best protects the health and welfare of beneficiaries. Consequently, quality measurement and reporting expectations are not consistent across and within services, but instead vary depending on the authorities under which States are delivering services. Additionally, States have flexibility to determine the quality measures they use in their HCBS programs. While we support State flexibility, a lack of

standardization has resulted in thousands of metrics and measures currently in use across States, with different metrics and measures often used for different HCBS programs within the same State. As a result, CMS and States are limited in the ability to compare HCBS quality and outcomes within and across States or to compare the performance of HCBS programs for different populations.

In addition, although there are differences in rates of disability among demographic groups, there are very limited data currently available to assess disparities in HCBS access, utilization, quality, and outcomes. Few States have the data infrastructure to systematically or routinely report data that could be used to assess whether disparities exist in HCBS programs. This lack of available data also prevents CMS and States from implementing interventions to make improvements in HCBS programs designed to consistently meet the needs of all beneficiaries.

Compounding these concerns have been notable and high-profile instances of abuse and neglect in recent years, which have been shown to result from poor quality care and inadequate oversight of HCBS in Medicaid. For example, a 2018 report, ''Ensuring Beneficiary Health and Safety in Group Homes Through State Implementation of Comprehensive Compliance Oversight,'' [33] (''Joint Report''), which was jointly developed by the US Department of Health and Human Services' Administration for Community Living (ACL), Office for Civil Rights (OCR), and the Office of Inspector General (OIG), found systemic problems with health and safety policies and procedures being followed in group homes and that failure to comply with these policies and procedures left beneficiaries in group homes at risk of serious harm. In addition, while existing regulations provide safeguards for all Medicaid beneficiaries in the event of a denial of Medicaid eligibility or an adverse benefit determination by the State Medicaid agency and, where applicable, by the beneficiary's managed care plan, there are no safeguards related to other issues that HCBS beneficiaries may experience, such as the failure of a provider to comply with the HCBS settings requirements or difficulty accessing the services in the person-centered service plan unless the individual is receiving those services through a Medicaid managed care arrangement.

Finally, through our regular interactions with State Medicaid agencies, provider groups, and beneficiary advocates, we observed that all these interested parties routinely cite a shortage of direct care workers and high rates of turnover in direct care workers among the greatest challenges in ensuring access to high-quality, cost-effective HCBS for people with disabilities and older adults. Some States have also indicated that a lack of direct care workers is preventing them from transitioning individuals from institutions to home and community-based settings. While workforce shortages have existed for years, they have been exacerbated by the COVID–19 pandemic, which has resulted in higher rates of direct care worker turnover (for instance, due to higher rates of worker-reported stress), an inability of some direct care workers to return to their positions prior to the pandemic (for instance, due to difficulty accessing child care or concerns about contracting COVID–19 for people with higher risk of severe illness), workforce shortages across the health care sector, and wage increases in types of retail and other jobs that tend to draw from the same pool of workers.[34] [35] [36]

To address the list of challenges outlined in this section, we are proposing new Federal requirements in this proposed rule to improve access to care, quality of care, and health and quality of life outcomes; promote health equity for people receiving Medicaid-covered HCBS; and ensure that there are safeguards in place for beneficiaries who receive HCBS through FFS delivery systems. We seek comment on other areas for rulemaking consideration. The proposed requirements are also intended to promote public transparency related to the administration of Medicaid HCBS programs.

D. Fee-for-Service (FFS) Payment

Section 1902(a)(30)(A) of the Act requires States to ''assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area.'' Regulations at § 447.203 require States to develop and submit to CMS an access monitoring review plan (AMRP) for a core set of services. Currently, the regulations rely on available State data to support a determination that the State's payment rates are sufficient to ensure access to care in Medicaid FFS that is at least as great for beneficiaries as is generally available to the general population in the geographic area, as required under section 1902(a)(30)(A) of the Act.

In the May 6, 2011, **Federal Register**, we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services'' proposed rule (76 FR 26341; hereinafter ''2011 proposed rule''), which outlined a data-driven process for States with Medicaid services paid through a State plan under FFS to follow in order to document their compliance with section 1902(a)(30)(A) of the Act. We finalized the 2011 proposed rule in the November 2, 2015, **Federal Register** when we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services'' final rule with comment period (80 FR 67576; hereinafter ''2015 final rule with comment period''). Among other requirements, the 2015 final rule with comment period required States to develop and submit to CMS an AMRP for certain Medicaid services that is updated at least every 3 years. Additionally, the rule required that when States submit a SPA to reduce or restructure provider payment rates, they must consider the data collected through the AMRP and undertake a public process that solicits input on the potential impact of the proposed reduction or restructuring of Medicaid FFS payment rates on beneficiary access to care. We published the ''Medicaid Program; Deadline for Access Monitoring Review Plan Submissions'' final rule in the April 12, 2016 **Federal Register** (81 FR 21479; hereinafter ''2016 final rule'') with a revised deadline for States' AMRPs to be submitted to us.

Following enactment, numerous States have expressed concern regarding the administrative burden associated with the 2015 final rule with comment period requirements, especially those

States with high rates of beneficiary enrollment in managed care. In an attempt to address some of the States' concerns regarding unnecessary administrative burden, we issued a State Medicaid Director letter (SMDL) on November 16, 2017 (SMDL #17–004), which clarified the circumstances in which provider payment reductions or restructurings would likely not result in diminished access to care, and therefore, would not require additional analysis and monitoring procedures described in the 2015 final rule with comment period.[37] Subsequently, in the March 23, 2018 **Federal Register**, we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services-Exemptions for States With High Managed Care Penetration Rates and Rate Reduction Threshold'' proposed rule (83 FR 12696; hereinafter ''2018 proposed rule''), which would have exempted States from requirements to analyze certain data or monitor access when the vast majority of their covered beneficiaries receive services through managed care plans. That proposed rule, if it had been finalized, would have provided similar flexibility to all States when they make nominal rate reductions or restructurings to FFS payment rates. Based on the responses received during the public comment period, we decided not to finalize the proposed exemptions.

In the July 15, 2019 **Federal Register**, we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services-Rescission'' proposed rule (84 FR 33722; hereinafter ''2019 proposed rule'') to rescind the regulatory access requirements at §§ 447.203(b) and 447.204, and concurrently issued a CMCS Informational Bulletin [38] stating the agency's intention to establish a new access strategy. Based on the responses we received during the public comment period, we decided not to finalize the 2019 proposed rule, and instead continue our efforts and commitment to develop a data-driven strategy to understand access to care in the Medicaid program.

States have continued to question whether the AMRP process is the most effective or accurate reflection of access to care in a State's Medicaid program, and requested we provide additional clarity on the data necessary to support compliance with section 1902(a)(30)(A) of the Act. In reviewing the information that States presented through the AMRPs, we also have questioned whether the data and analysis consistently address the primary access-related question posed by section 1902(a)(30)(A) of the Act—namely, whether rates are sufficient to ensure access to care at least as great as that enjoyed by the general population in geographic areas. The unstandardized nature of the AMRPs, which largely defer to States to determine appropriate data measures to review and monitor when documenting access to care, have made it difficult to assess whether any single State's analysis demonstrates compliance with section 1902(a)(30)(A) of the Act.

While the AMRPs were intended to be a useful guide to States in the overall process to monitor beneficiary access, they are generally limited to access in FFS delivery systems and focus on targeted payment rate changes rather than the availability of care more generally or population health outcomes (which may be indicative of the population's ability to access care). Moreover, the AMRP processes are largely procedural in nature and not targeted to specific services for which access may be of particular concern, requiring States to engage in triennial reviews of access to care for certain broad categories of Medicaid services—primary care services, physician specialist services, behavioral health services, pre and post-natal obstetric services, and home health services. Although the 2016 final rule reasonably discussed that the selected service categories intended to be indicators for available access in the overall Medicaid FFS system, the categories do not easily translate to the services authorized under section 1905(a) of the Act, granting States deference as to how broadly or narrowly to apply the AMRP analysis to services within their programs. For example, the category ''primary care services'' could encompass several of the Medicaid service categories described within section 1905(a) of the Act and, without clear guidance on which section 1905(a) services categories, qualified providers, or procedures we intended States to include within the AMRP analyses. States were left to make their own interpretations in analyzing access to care under the 2016 final rule.

Similarly, a number of the AMRP data elements, both required and suggested within the 2016 final rule, may be overly broad, subject to interpretation, or difficult to obtain. Specifically, under the 2016 final rule provisions, States are required to review: the extent to which beneficiary needs are fully met; the availability of care through enrolled providers to beneficiaries in each geographic area, by provider type and site of service; changes in beneficiary utilization of covered services in each geographic area; the characteristics of the beneficiary population (including considerations for care, service and payment variations for pediatric and adult populations and for individuals with disabilities); and actual or estimated levels of provider payment available from other payers, including other public and private payers, by provider type and site of service. Though service utilization and provider participation are relatively easy measures to source and track using existing Medicaid program data, an analysis of whether beneficiary needs are fully met is at least somewhat subjective and could require States to engage in a survey process to complete. Additionally, while most Medicaid services have some level of equivalent payment data that can be compared to other available public payer data, such as Medicare, private pay information may be proprietary and difficult to obtain. Therefore, many States struggled to meet the regulatory requirement comparing Medicaid program rates to private payer rates because of their inability to obtain private payer data.

Due to these issues, States produced varied AMRPs through the triennial process that were, as a whole, difficult to interpret or to use in assessing compliance with section 1902(a)(30)(A) of the Act. In isolation, a State's specific AMRP most often presented data that could be meaningful as a benchmark against changes within a State's Medicaid program, but did not present a case for Medicaid access consistent with the general population in geographic areas. Frequently, the data and information within the AMRPs were presented without a formal determination or attestation from the State that the information presented established compliance with section 1902(a)(30)(A) of the Act. Because the States' AMRPs generally varied to such a great degree, there was also little to glean in making State-to-State comparisons of performance on access measures, even for States with geographic and demographic similarities.

Based on results of the triennial AMRPs, we were uncertain of how to make use of the information presented within them other than to make them publicly available. We published the

[37] State Medicaid Director Letter #17–0004 Re: Medicaid Access to Care Implementation Guidance. Accessed at *https://www.medicaid.gov/federal-policy-guidance/downloads/smd17004.pdf* (November 2017).

[38] CMCS Informational Bulletin: Comprehensive Strategy for Monitoring Access in Medicaid, Accessed at *https://www.medicaid.gov/federal-policy-guidance/downloads/CIB071119.pdf* (July 2019).

AMRPs on *Medicaid.gov* but had little engagement with States on the content or results of the AMRPs since much of the information within the plans could not meaningfully answer whether access in Medicaid programs satisfied the requirements of section 1902(a)(30)(A) of the Act. Additionally, we received little feedback from providers, beneficiaries, or advocates on whether or how interested parties made use of the triennial AMRPs. However, portions of the 2016 final rule related to public awareness and feedback on changes to Medicaid payment rates and the analysis that we received from individual States proposing to make rate changes was of great benefit in determining approvals of State payment change proposals. Specifically, the portion of the AMRP process where States update their plans to describe data and measures to serve as a baseline against which they monitor after reducing or restructuring Medicaid payments allows States to document consistency with section 1902(a)(30)(A) of the Act at the time of SPA submission, usually as an assessment of how closely rates align with Medicare rates, and to understand the impact of reductions through data monitoring after SPA approval.

Under this proposed rule, we are proposing to balance elimination of unnecessary Federal and State administrative burden with robust implementation of the Federal and State shared obligation to ensure that Medicaid payment rates are set at levels sufficient to ensure access to care for beneficiaries consistent with section 1902(a)(30)(A) of the Act. The provisions of this proposed rule, as discussed in more detail later, would better achieve this balance through improved transparency of Medicaid FFS payment rates, through publication of a comparative payment rate analysis to Medicare and payment rate disclosures, and through a more targeted and defined approach to evaluating data and information when States propose to reduce or restructure their Medicaid payment rates. Payment rate transparency is a critical component of assessing compliance with section 1902(a)(30)(A) of the Act. In addition, payment rate transparency helps to ensure that interested parties have basic information available to them to understand Medicaid payment levels and the associated effects of payment rates on access to care so that they may raise concerns to State Medicaid agencies via the various forms of public processes discussed within this proposed rule. Along with improved payment rate transparency and disclosures as well as comparative payment rate analyses, we are proposing a more efficient process for States to undertake when submitting rate reduction or restructuring SPAs to CMS for review. As we move toward aligning our Medicaid access to care strategy across FFS and managed care delivery systems, we will consider additional rulemaking to help ensure that Medicaid payment rate information is appropriately transparent and rates are fully consistent with broad access to care across delivery systems, so that interested parties have a more complete understanding of Medicaid payment rate levels and resulting access to care for beneficiaries.

II. Provisions of the Proposed Regulations

A. Medicaid Advisory Committee and Beneficiary Advisory Group (§ 431.12)

Current § 431.12 requires States to have a MCAC to advise the State Medicaid agency about health and medical care services. The current regulations are intended to ensure that State Medicaid agencies have a way to receive feedback from interested parties on issues related to the Medicaid program. However, the current regulations lack specificity related to how these committees can be used to ensure the proper and efficient administration of the Medicaid program more expressly by more fully promoting beneficiary perspectives.

Under the authority of section 1902(a)(4) of the Act, section 1902(a)(19) of the Act, and our general rulemaking authority in section 1102 of the Act, we propose to update § 431.12 to replace the current MCAC requirements with a committee framework designed to ensure the proper and efficient administration of the Medicaid program and to better ensure that care and services under the Medicaid program will be provided in a manner consistent with the best interests of the beneficiaries. If finalized, States would be required to establish and operate the newly named Medicaid Advisory Committee (MAC) and a Beneficiary Advisory Group (BAG). The MAC and its corresponding BAG would serve as vehicles for bi-directional feedback between interested parties and the State on matters related to the effective administration of the Medicaid program. With this proposal, FFP, or Federal match, for Medicaid administrative activities would remain available to States for expenditures related to MAC and BAG activities in the same manner as the former MCAC.

We propose to amend the title and paragraph (a) of § 431.12 to update the name of the existing MCAC to the MAC, and to add the requirement for States to establish and operate a dedicated advisory group comprised of Medicaid beneficiaries, the BAG. Our goal is that the committee and its corresponding advisory group would advise the State not only on issues related to health and medical services, as the MCAC did, but also on matters related to policy development and to the effective administration of the Medicaid program consistent with the language of section1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan. While the Medicaid program covers medical services, the program is increasingly also covering services designed to address beneficiaries' social determinants of health and their health-related social needs more generally. Therefore, having a discussion with the MAC about topics that are not directly related to covered services may be necessary to ensure that beneficiaries are able to meaningfully access these services. Expanding the scope of the current committee is necessary to align the actions of the committee with the expanding scope of the Medicaid program, consistent with section 1902(a)(4)(B) of the Act, because the MAC creates a formalized way for interested parties and beneficiary representatives to provide feedback to the State about issues related to the Medicaid program and the services it covers and to help ensure that the program operates efficiently and as it was designed to operate.

Every State will vary in the types of topics that would benefit from the interested parties' feedback, so discretion on which topics will be discussed with the MAC will be left to the State. Depending on the priorities of the State in a given year, States may find it helpful to bring to the MAC issues related to, for example, grievances, consumer experience survey ratings, design of a new program, or other like topics. Proposed mandates for these entities are described later in this section under proposed paragraph (g). We further propose conforming updates to paragraph (b) regarding the State plan requirements, to reflect the proposed MAC and BAG and the expanded mandate proposed in this proposed rule. The interested parties advisory group, proposed and described in the FFS sections of this proposed rule, to advise States on rate setting for certain HCBS

is not related to the MAC or BAG outlined here. We note in that section that a State would be able utilize its MAC and BAG to provide recommendations for payment rates, thereby satisfying the requirements of that proposal. However, the MAC and BAG requirements proposed here, if finalized, are wholly separate from the interested parties advisory group, regardless of whether that proposal is finalized as well.

We propose to update paragraph (c) of § 431.12 regarding appointment of committee members to specify that the members of the MAC and BAG must be appointed by the agency director or higher State authority on a rotating, continuous basis. Under our proposals, committee and advisory group members would serve a specific amount of time, the length of which will be determined by each State and noted in its bylaws. After a committee or advisory group member term has been completed, the State will appoint a new member, thus ensuring that MAC and BAG memberships rotate continuously. We propose the State be required to make public its process and bylaws for recruitment and appointment of members of the MAC and BAG and post the list of both sets of members on the State's website. Under our proposal, the website page where this information is located must be easily accessible by the public. These updates align with how advisory committees similar to the MAC and BAG are run, and the changes are designed to provide additional details to support States' operation of the MAC and BAG. Further, these updates facilitate transparency, improving the current regulations, which do not mention nor promote transparency of information related the MCAC with the public. We believe that transparency of information can lead to enhanced accountability on the part of the State to making its MAC and BAG as effective as possible.

Advisory committees and groups can be most effective when they represent a wide range of perspectives and experiences. The current MAC regulations only provide high level descriptions of types of members that should be selected. Since we know that each State environment is different, in the proposed rule, we continue to provide the State with discretion on how large the MAC and BAG should be, but we outline in more detail the types of categories of members that can best reflect the needs of a Medicaid program. We believe that diversely populated MACs and BAGs can provide States with access to a broad range of perspectives, and importantly, beneficiaries' perspective, which can positively impact the administration of the Medicaid program.

We encourage States to take into consideration, as part of their member selection process, the demographics of the Medicaid population in their State. Keeping diverse representation in mind as a goal for the MAC membership can be a way for States to acknowledge that specific populations and those receiving critically important services be appropriately represented on the MAC. For example, in making the MAC appointments, the State may want to balance the representation of the MAC according to geographic areas of the State and the demographics of the Medicaid program of the State. The State may want to consider geographical diversity (for example, urban, rural, tribal) when making its membership selections. The State could also consider demographic representation of its membership by including members representing or serving Medicaid beneficiaries the following categories: (1) children's health care; (2) behavioral health services; (3) preventive care and reproductive health services; (4) health or service issues pertaining specifically to people over age 65; and (5) health or service issues pertaining specifically to people with disabilities. By offering these considerations, we seek to support States in their efforts to eliminate differences in health care access and outcomes experienced by diverse populations enrolled in Medicaid. Our aim is to support several of the priorities for operationalizing health equity across CMS programs as outlined in the CMS Framework for Health Equity (2022–2032) and the HHS Equity Action Plan which is consistent with E.O. 13985 which calls for advancing equity for underserved populations.

As we considered effective ways to better integrate the beneficiary perspective into decisions related the Medicaid program, we also recognized that a diverse and representative set of interested parties should be reflected in the composition of each State's MAC. We propose to amend paragraph (d) of § 431.12 regarding committee membership to account for both membership and composition, and to require the MAC membership include members from the BAG, described later in this section, who are currently or have been Medicaid beneficiaries, and individuals with direct experience supporting Medicaid beneficiaries (for example, family members or caregivers [39] of those enrolled in Medicaid); as well as advocacy groups; providers or administrators of Medicaid services; representatives of managed care plans or State health plan associations representing such managed care plans; and representatives from other State agencies that serve Medicaid beneficiaries. This proposal is consistent with the language of section 1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan. The change we propose would support States to set up MACs that align with section 1902(a)(4)(B) of the Act since they would now have to select the membership composition to reflect the community members who represent the interests of Medicaid beneficiaries. The State also benefits from having a way to hear how the Medicaid program can be responsive to its beneficiaries' and the Medicaid community's needs.

Specifically, in paragraph (d)(1) of § 431.12, we propose that at least 25 percent of the MAC must be individuals with lived Medicaid beneficiary experience from the BAG. This means that the BAG would be comprised of people who: (1) are currently or have been Medicaid beneficiaries and (2) individuals with direct experience supporting Medicaid beneficiaries (family members or caregivers of those enrolled in Medicaid). We selected 25 percent as a threshold to reflect the importance of including the beneficiary perspective in the administration of the Medicaid program and to ensure that the beneficiary perspective has equitable representation in the feedback provided by the MAC. We did not select a higher percentage because we acknowledge that States will benefit from a MAC that includes representation from a diverse set of interested parties who work in areas related to Medicaid but are not beneficiaries, their family members or their caregivers. We seek comment on the 25 percent requirement.

As noted earlier, representation from the remaining committee members would be left to the States' discretion. Rather than prescribing specific percentages for each category, we only propose to require representation from each category as part of the MAC. The specific percentage of each of category (other than the BAG members) relative to the whole committee can be determined by each State. This approach would provide States with flexibility to determine how to best represent the unique landscape of each State's Medicaid program. We seek comment on what should be the minimum percentage requirement that MAC members be current/past Medicaid

[39] Caregivers can be paid or unpaid.

beneficiaries or individuals with direct experience supporting Medicaid beneficiaries (such as family members or caregivers of those enrolled in Medicaid).

States need to know how to deliver care to its beneficiaries. In addition to hearing directly from beneficiaries, the State can gain insights into how to effectively administer its program, from other groups of the Medicaid community. Categorically, we propose in paragraph (d)(2) that the rest of the MAC must include representation from each category: (1) members of State or local consumer advocacy groups or other community-based organizations that represent the interests of, or provide direct service, to Medicaid beneficiaries; (2) clinical providers or administrators who are familiar with the health and social needs of Medicaid beneficiaries and with the resources available and required for their care; (3) representatives from participating Medicaid managed care plans or the State health plan association representing such plans, as applicable; and (4) representatives from other State agencies serving Medicaid beneficiaries, as ex-officio members.

States are determining which types of providers to include under the clinical providers or administrators category, we recommend they consider a wide range of providers or administrators that are experienced with the Medicaid program including, but not limited to: (1) primary care providers (internal or family medicine physicians or nurse practitioners or physician assistants that practice primary care); (2) behavioral health providers (that is, mental health and substance use disorder providers); (3) reproductive health service providers, including maternal health providers; (4) pediatric providers; (5) dental and oral health providers; (6) community health, rural health clinic or Federally Qualified Health Center (FQHC) administrators; (7) individuals providing long-term care services and supports; and (8) direct care workers [40] who can be individuals with direct experience supporting Medicaid beneficiaries (such as family members or caregivers). Direct care workers also include community health workers who assist Medicaid beneficiaries in navigating access to needed services and care managers, care coordinators, or service coordinators who assist Medicaid beneficiaries with complex care needs.

We have also identified health plans as an important contributor to the MAC, but we acknowledge that not all States that have managed care delivery systems. We know many Medicaid health plans administer similar committees and thus allow for States to tailor health plan representation based on its managed care market. For example, States can fulfil this category with only one or with multiple plans operating in the State. In addition, we also give States the flexibility to meet the health plan representation requirements with either participating Medicaid managed care plans or the State health plan association representing such plans, as applicable.

The proposed language in paragraph (d)(2)(D) broadens the type of representatives from other State agencies that are required to be on the committee from the similar MCAC requirement. The current MCAC regulation requires membership by ''the director of the public welfare department or the public health department, whichever does not head the Medicaid agency.'' By expanding the definition of external agency representation to be broader than the welfare or public health department, we would give States more flexibility in representing the Medicaid program's interests based on States' unique circumstances and organizational structure. States can work with sister State agencies to determine who should participate in the MAC (for example, foster care agency, mental health agency, department of public health). We also propose that these representatives be part of the committee as ex-officio members, not as full members of the MAC. While we believe it will be essential to have these State-interested parties present for program coordination and information-sharing, we believe the formal representation of the MAC should be comprised of beneficiaries, advocates, community organizations, and providers that serve Medicaid beneficiaries.

We propose to replace paragraph (e) of § 431.12; in paragraph (e) to require that States create a BAG, a dedicated beneficiary advisory group that will meet separately from the MAC. Currently, the requirements governing MCACs require the presence of beneficiaries in committee membership but do little to ensure their contributions are considered or their voices heard. For example, current paragraph (e) describes committee participation and requires the committee ''[further] the participation of beneficiary members in the agency program.'' This requirement provides little guidance toward this goal and creates an environment where a beneficiary may not feel comfortable participating despite the opportunity being afforded in its technical sense. We believe adding the creation of the BAG will result in providing the State with increased access to the beneficiary perspective. This proposal directly addresses and provides the mechanism (the BAG) through which States can meet the language of section 1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan.

As such, the creation of a separate beneficiary-only advisory group aligns with what we learned from multiple interviews with State Medicaid agencies and other Medicaid interested parties (for example, Medicaid researchers, former Medicaid officials) conducted over the course of 2022 on the effective operation of the existing MCACs. Interested parties described the importance of having a comfortable, supportive, and trusting environment that facilitates beneficiaries' ability to speak freely on matters most important to them. It is equally important that the BAG have a subset of its members that also sit on the State's MAC to ensure that the beneficiary perspective and experience are heard directly. We noted earlier that some States may already have highly effective BAG-type groups operating as part of their Medicaid program. These groups may represent specific constituencies such as children with complex medical needs or older adults or may be participants in a specific waiver. In these instances, States may utilize these groups to satisfy the proposed requirements of this rule, provided the BAG-type group membership includes the MAC members described in paragraph (d)(1). Those States must appoint members from the BAG-type group to serve on the MAC to facilitate this crossover.

Specifically, at paragraph (e)(1), we propose that the MAC members described in proposed paragraph (d)(1) must also be members of the BAG. This proposed requirement would facilitate the bi-directional communication essential to effective beneficiary

[40] CMS defines direct care workers as: a registered nurse, licensed practical nurse, nurse practitioner, or clinical nurse specialist who provides nursing services to Medicaid-eligible individuals receiving home and community-based services; (2) A licensed or certified nursing assistant who provides such services under the supervision of a registered nurse, licensed practical nurse, nurse practitioner, or clinical nurse specialist; (3) A direct support professional; (4) A personal care attendant; (5) A home health aide; or (6) Other individuals who are paid to provide services to address activities of daily living or instrumental activities of daily living, behavioral supports, employment supports, or other services to promote community integration directly to Medicaid-eligible individuals receiving home and community-based services.

engagement and allow for meaningful representation of diverse voices across the MAC and BAG. In paragraph (e)(2), we propose that the BAG meetings occur in advance of each MAC meeting to ensure BAG member preparation for each MAC discussion. BAG meetings would also be subject to requirements we propose in paragraph (f)(5), described later in this section, that the BAG meetings must occur virtually, in-person, or through a hybrid option to maximize member attendance. We plan to expound on best practices for engaging beneficiary participation in committees like the MAC in future guidance.

We propose at subsection (f) an administrative framework for the MAC and BAG to ensure transparency and a meaningful feedback loop to the public and among the members of the committee and group. Interested parties' feedback and recent reports [41] [42] published on meaningful beneficiary engagement illuminate the need for more transparent and standardized processes across States to drive participation from key interested parties and to facilitate the opportunity for participation from a diverse set of members and the community. Further, we believe that in order for the State to comply with the language of section 1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan, it needs to be responsive to the needs of its beneficiaries. To be responsive to the needs of its beneficiaries, the State needs to be able to gather feedback from a variety of people that touch the Medicaid program, and the MAC and BAG will serve as the vehicle through which States can obtain this feedback.

Specifically, in paragraph (f)(1), we propose to require State agencies to develop and post publicly on their website bylaws for governance of the MAC and BAG, current lists of MAC and BAG memberships, and past meeting minutes for both the committee and group. In paragraph (f)(2), we propose to require State agencies to develop and post publicly a process for MAC and BAG member recruitment and appointment, and for selection of MAC and BAG leadership. In paragraph (f)(3), we propose to require State agencies to develop, publicly post, and implement a regular meeting schedule for the MAC and BAG. The requirement specifies the MAC and BAG must each meet at least once per quarter and hold off-cycle meetings as needed. In paragraph (f)(4), we propose that, at least two MAC meetings per year must be opened to the public. For the MAC meetings that are open to the public, the meeting agenda must include a dedicated time for public comment to be heard by the MAC. Further, the State must also adequately notify the public of the date, location, and time of these type (public) of MAC meetings at least 30 calendar days in advance. None of the BAG meetings are not required to be open to the public, unless the State's BAG members decide otherwise. The same requirements would apply to States whose BAG meetings were determined, by its membership, to be open to the public. We seek comment on this approach.

In paragraph (f)(5), we propose to require that States offer in-person and virtual attendance options to maximize member participation at MAC and BAG meetings. We acknowledge that interested parties may face a range of technological and internet accessibility limitations, and that at a minimum, States will need to provide a telephone dial-in option for MAC and BAG meetings. While we understand that in-person interaction can sometimes assist in building trusted relationships, we also recognize that accommodations for members and the public to participate virtually is important, particularly since the beginning of the COVID–19 pandemic. We invite comment on ways to best strike this balance. We address technical and logistical challenges in paragraph (f)(5) and address effective communication and language access and meeting accessibility in subsequent paragraphs.

With respect to in-person meetings, we propose in paragraph (f)(6) to require that States ensure meeting times and locations for MAC and BAG meetings are selected to maximize participant attendance, which may vary by meeting. For example, States may determine, by consulting with its MAC and BAG members that holding meetings in various locations throughout the State may result in better attendance. In addition, they may ask the committee and group members about which times and weekdays may be more favorable than others and hold meetings at those times accordingly. States must also use the publicly posted meeting minutes, which lists attendance by members, as a way to gauge which meeting times and locations garner maximum participate attendance. Finally, in paragraph (f)(7), we propose to require State agencies to facilitate participation of beneficiaries by ensuring that meetings are accessible to people with disabilities, that reasonable modifications are provided when necessary to ensure access and enable meaningful participation, that communication with individuals with disabilities is as effective as with others, that reasonable steps are taken to provide meaningful access to individuals with Limited English Proficiency, and that meetings comply with the requirements at § 435.905(b) and applicable regulations implementing the ADA, section 504 of the Rehabilitation Act, and section 1557 of the Affordable Care Act at 28 CFR part 35 and 45 CFR parts 84 and 92.

We propose to revise paragraph (g) to detail an expansion of the topics on which the MAC and BAG should provide feedback to the Medicaid agency from the prior MCAC requirements. In researching other States' MACs, we know that some already use the MACs to get feedback from interested parties, including beneficiaries, on a variety of topics relating to the effective and efficient administration of the Medicaid program. The changes we propose aim to strike a balance that reflects some States' current practices without putting strict limitations on specific topics for discussion to all States. Broadening the scope of the topics that the MAC and BAG discuss will benefit the State by giving greater insight into how it is currently delivering care for its beneficiaries and thereby assist in identifying ways to improve the way the Medicaid program is administered.

The State will use this engagement with the MAC and BAG to ensure that the beneficiary and interested parties' voices are considered and to allow the opportunity to adjust course based on the feedback provided by the committee and group members. Topics of discussion are to be based on State need and determined in collaboration with the MAC to address matters related to policy development and matters related to the effective administration of the Medicaid program. These topics could include new policy or program developments; changes to services; coordination of care and quality of

services; eligibility, enrollment, and renewal processes; the review of communications to beneficiaries by the State Medicaid agency and Medicaid managed care plans; the provision of culturally and linguistically appropriate services, health equity, disparities, and biases in the Medicaid program; and other issues that impact the provision or outcomes of health and medical care services in the Medicaid program as identified by the MAC, the BAG, or the State.

We propose new paragraph (h) to expand on existing State responsibilities for managing the MAC and BAG regarding staff assistance, participation, and financial support. We understand from States and other interested parties, that many States already provide staffing and financial support to their MACs in ways that meet or going beyond what we propose through our updated requirements. We believe that expanding upon the current standards regarding State responsibility for planning and executing the functions of the MAC and BAG will ensure consistent and ongoing standards to further beneficiaries' and interested parties' engagement. For example, we know that when any kind of interested parties group meets, all members of that group need to fully understand the topics being discussed in order to meaningfully engage in that discussion. This is particularly relevant when the topics of discussion are complex or based in specific terminology as Medicaid related issues often can be.

We believe that when States provide their MACs and BAGs with additional staffing support that can explain, provide background materials, and meet with the members in preparation for the larger discussions, the members have a greater chance to provide more meaningful feedback and ensure that members are adequately prepared to engage in these discussions. The proposed changes to the requirements seek to create environments that support meaningful engagement by the members of these groups whose feedback can then be used by States to support the efficient administration of their Medicaid program. We anticipate providing additional guidance on model practices, recruitment strategies, and ways to facilitate beneficiary participation, and we invite comments on effective strategies to ensure meaningful interested parties' engagement that in turn can facilitate full beneficiary participation.

Under the current MCAC regulations in § 431.12(f), each State is required to provide the committee with staff assistance from the agency, independent technical assistance as needed to enable it to make effective recommendations, and financial arrangements, if necessary, to make possible the participation of beneficiary members. The changes we propose include adding requirements regarding recruitment, meeting scheduling, recordkeeping, and support for beneficiary members. The overlap with the current regulation would mean much of the work to implement our proposals, if finalized, would already be occurring.

The proposed requirement for beneficiary support, including financial support, is similar to current requirements, such as using dedicated staff to support beneficiary attendance at both the MAC and BAG meetings and providing financial assistance to facilitate meeting attendance by beneficiary members, as needed. Staff may support beneficiary attendance through outreach to the Medicaid beneficiary MAC and BAG members throughout the membership period to provide information and answer questions; identify barriers and supports needed to facilitate attendance at MAC and BAG meetings; and facilitate access to those supports. We are not proposing changes to existing financial support requirements. However, we are proposing an additional requirement that at least one member of the State agency's executive staff attend all MAC and BAG meetings to provide an opportunity for beneficiaries and representatives of the State's leadership to interact directly.

In the spirit of transparency and to ensure compliance with the updated regulations, we propose new paragraph (i) to require that the MAC, with support from the State and in accordance with the requirements proposed at this section, submit an annual report to the State. The BAG perspective and feedback will be embedded in the report, since the Group is represented on the MAC. The State, in turn, would be required to review the report and include responses to recommendations in the report. Prior to finalizing the report, the State must allow the MAC to perform a final review. Once the MAC completes its final review, the State must publish it by posting it on its website. The proposed requirements of this section seek to both ensure transparency while also facilitating a feedback loop and view into the impact of the committee and group's recommendations. We invite comment on additional ways to ensure that the State can create a feedback loop with the MAC and BAG.

Finally, we propose no changes to, and thus maintain, the current regulatory language on FFP from current paragraph (g) to support committee and group administration, to appear in new paragraph (j) with conforming edits for new committee and group names.

This requirement, if finalized, would be effective 60 days after the effective date of the final rule, which would provide States with 1 year to implement these requirements. We seek comment on whether 1 year is too much or not enough time for States to implement the updates in this regulation in an effective manner. We understand that States may need to modify their current MCACs to reflect the updated requirements and may also need to create the BAG and recruit members to participate, if they do not already have a similar entity already in place.

B. Home and Community-Based Services (HCBS)

We are proposing both to amend and add new Federal HCBS requirements to improve access to care, quality of care, and beneficiary health and quality of life outcomes, while consistently meeting the needs of all beneficiaries receiving Medicaid-covered HCBS. This preamble discusses our proposed changes in the context of current law.

We have previously received questions from States with demonstration projects under section 1115 of the Act that include HCBS about the applicability of other HCBS regulatory requirements. As a result, we are identifying that, consistent with the applicability of other HCBS regulatory requirements to such demonstration projects, the proposed requirements for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services included in this proposed rule, if finalized, would apply to such services included in approved section 1115 demonstration projects, unless we explicitly waive one or more of the requirements as part of the approval of the demonstration project. We are not proposing to apply the requirements for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services in this proposed rule to the Program of All-Inclusive Care of the Elderly (PACE) authorized under sections 1894 and 1934 of the Act, as the existing requirements for PACE either already address or exceed the requirements outlined in this proposed rule, or are substantially different from those for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services.

1. Person-Centered Service Plans (42 CFR 441.301(c), 441.450(c), 441.540(c), and 441.725(c))

Section 1915(c)(1) of the Act requires that services provided through section 1915(c) waiver programs be provided under a written plan of care (hereinafter referred to as ''person-centered service plans'' or ''service plans''). Existing Federal regulations at § 441.301(c) address the person-centered planning process and include a requirement at § 441.301(c)(3) that the person-centered service plan be reviewed and revised, upon reassessment of functional need, at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual.

In 2014, we released guidance for section 1915(c) waiver programs [43] (hereinafter the ''2014 guidance'') that included expectations for State reporting of State-developed performance measures to demonstrate compliance with section 1915(c) of the Act and the implementing regulations in part 441, subpart G, through six assurances, including assurances related to person-centered service plans. The 2014 guidance indicated that States should conduct systemic remediation and implement a Quality Improvement Project when they score below an 86 percent threshold on any of their performance measures. The six assurances identified in the 2014 guidance were the following:

1. *Level of Care:* The State demonstrates that it implements the processes and instrument(s) specified in its approved waiver for evaluating/reevaluating an applicant's/waiver participant's level of care consistent with care provided in a hospital, nursing facility, or Intermediate Care Facility for Individuals with Intellectual Disabilities;

2. *Service Plan:* The State demonstrates it has designed and implemented an effective system for reviewing the adequacy of service plans for waiver participants;

3. *Qualified Providers:* The State demonstrates that it has designed and implemented an adequate system for assuring that all waiver services are provided by qualified providers;

4. *Health and Welfare:* The State demonstrates it has designed and implemented an effective system for assuring waiver participant health and welfare;

5. *Financial Accountability:* The State demonstrates that it has designed and implemented an adequate system for insuring financial accountability of the waiver program; and

6. *Administrative Authority:* The Medicaid Agency retains ultimate administrative authority and responsibility for the operation of the waiver program by exercising oversight of the performance of waiver functions by other State and local/regional non-State agencies (if appropriate) and contracted entities.[44]

We are proposing a different approach for States to demonstrate that they meet the statutory requirements in section 1915(c) of the Act and the regulatory requirements in part 441, subpart G, including the requirements regarding assurances around service plans. The proposed approach is based on feedback CMS obtained during various public engagement activities conducted with States and other interested parties over the past several years about the reporting discussed in the 2014 guidance, as well as feedback received through the RFI [45] discussed earlier about the need to standardize reporting and set minimum standards for HCBS. Accordingly, the proposed HCBS requirements in this rulemaking are intended to establish a new strategy for oversight, monitoring, quality assurance, and quality improvement for section 1915(c) waiver programs. The proposed approach focuses on priority areas that have been identified by States, oversight entities, consumer advocacy organizations, and other interested parties. The priority areas are person-centered planning, health and welfare, access, beneficiary protections, and quality improvement. As part of this approach, we propose to establish new minimum performance requirements and new reporting requirements for section 1915(c) waiver programs that are intended to supersede and fully replace the reporting requirements and the 86 percent performance level threshold for performance measures described in the 2014 guidance. Further, to ensure consistency and alignment across HCBS authorities, we propose to apply the proposed requirements for section 1915(c) waiver programs to section 1915(i), (j), and (k) State plan services as appropriate.

Under section 1902(a)(19) of the Act, States must provide safeguards to assure that eligibility for Medicaid-covered care and services will be determined and provided in a manner that is consistent with simplicity of administration and that is in the best interest of Medicaid beneficiaries. While the needs of some individuals who receive HCBS may be relatively stable over some time periods, individuals who receive HCBS experience changes in their functional needs and individual circumstances, such as the availability of natural supports or a desire to choose a different provider, that necessitate revisions to the person-centered service plan to remain as independent as possible or to prevent adverse outcomes. The requirements to reassess functional need and to update the person-centered service plan based on the results of the reassessment, when circumstances or needs change significantly, or at the request of the individual are important safeguards that are in the best interest of beneficiaries because they ensure that an individual's section 1915(c) waiver program services change to meet the beneficiary's needs most appropriately as those needs change. Section 2402(a) of the Affordable Care Act (Pub. L. 111–148 and Pub. L. 111–152) requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide support and coordination to facilitate the participant's full engagement in community-life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[46] In particular, section 2402(a)(1) of the Affordable Care Act requires States to allocate resources for services in a manner that is responsive to the changing needs and choices of beneficiaries receiving HCBS and to provide strategies for beneficiaries receiving such services to maximize their independence, while section 2402(a)(2) of the Affordable Care Act requires States to provide beneficiaries who need HCBS with the support and coordination needed to design a plan based on individual preferences and

personal goals that support their full engagement in community life.

Effective State implementation of the person-centered planning process is integral to ensuring compliance with section 2402 of the Affordable Care Act. This is because this process is how States identify and document the service needs and choices of people receiving HCBS, plan for delivering individualized services that promote independence and self-direction, effectively coordinate services and supports necessary for community living, and ensure that the services and supports that people receive are responsive to their changing needs and choices. Each component of the person-centered planning process, including the functional assessment, developing and implementing the person-centered service plan, and periodically reassessing and updating of the service plan, are essential to ensuring States' compliance with sections 2402(a)(1) and (2) of the Affordable Care Act.

Since the release of the 2014 guidance, we have received feedback from States, the OIG, ACL, and OCR, and other interested parties on how crucial person-centered planning is in the delivery of care and the significance of the person-centered service plan for the assurance of health and welfare for section 1915(c) waiver program participants. The importance of the person-centered planning process to the assurance of health and welfare is supported by the existing regulatory requirements for section 1915(c) waivers, which indicate, at § 441.301(c)(2)(vi), that person-centered service plans must ''reflect risk factors and measures in place to minimize them, including individualized back-up plans and strategies when needed'' and, at § 441.301(c)(2)(xiii)(H), that person-centered service plans must ''include an assurance that interventions and supports will cause no harm to the individual.'' As such, if States fail to conduct the required reassessment and updating of the person-centered service plan, they could increase the risk of harm for beneficiaries by not identifying risk factors and measures to minimize them and by not taking the steps necessary to assure that interventions and supports will not cause harm.

To ensure a more consistent application of person-centered service plan requirements across States and to protect the health and welfare of section 1915(c) waiver participants, we propose under our authority at sections 1915(c)(1) and 1902(a)(19) of the Act and section 2402(a)(1) and (2) of the Affordable Care Act, to codify a minimum performance level to demonstrate that States meet the requirements at § 441.301(c)(3). Specifically, at new § 441.301(c)(3)(ii)(A), we propose to require that States demonstrate that a reassessment of functional need was conducted at least annually for at least 90 percent of individuals continuously enrolled in the waiver for at least 365 days. We also propose, at new § 441.301(c)(3)(ii)(B), to require that States demonstrate that they reviewed the person-centered service plan and revised the plan as appropriate based on the results of the required reassessment of functional need at least every 12 months for at least 90 percent of individuals continuously enrolled in the waiver for at least 365 days.

We considered whether to propose to codify the minimum 86 percent performance level that was outlined in the 2014 guidance, instead of the minimum 90 percent performance level we are now proposing. The minimum 86 percent performance level was intended to provide States with a reasonable threshold for demonstrating compliance with the requirements at § 441.301(c)(3). However, since we released the 2014 guidance, we have heard from many interested parties that a minimum 86 percent performance level may not be sufficient to demonstrate that a State is meeting these requirements. The key concern expressed is that this performance level provides States with more latitude than is necessary to account for unexpected delays in the timeframe for conducting reassessments and updating service plans, as States should assume that some delays are likely and account for them as part of their reassessment and service planning processes. Further, media and anecdotal reports indicate that re-assessment and care planning processes are often delayed without valid reasons, which suggests that beneficiaries may be at risk for preventable harm due to unnecessary delays in person-centered planning processes and that we should establish a more stringent threshold for States to demonstrate compliance with the requirements at § 441.301(c)(3). In response to the feedback we have received since 2014, we are proposing a slight increase to the minimum performance level outlined in the 2014 guidance. This proposed minimum performance level is intended to strengthen person-centered planning requirements based on feedback we have received, while also recognizing that there may be legitimate reasons why assessment and care planning processes occasionally are not completed timely in all instances.

We also considered whether to propose allowing good cause exceptions to the minimum performance level in the event of a natural disaster, public health emergency, or other event that would negatively impact a State's ability to achieve a minimum 90 percent performance level. In the end, we decided not to propose good cause exceptions because the minimum 90 percent performance level is intended to account for various scenarios that might impact a State's ability to achieve these minimum performance levels. Further, there are existing disaster authorities that States could utilize to request a waiver of these requirements in the event of a public health emergency or a disaster. We invite comment on these proposals.

At § 441.301(c)(3), we are also proposing to move the sentence beginning with ''The person-centered service plan must be reviewed . . .'' to a new paragraph at § 441.301(c)(3)(i) and to reposition the regulatory text under the proposed title, *Requirement.* In addition, we are proposing to revise the regulatory text at the renumbered paragraph, which currently says, ''The person-centered service plan must be reviewed, and revised upon reassessment of functional need as required by § 441.365(e), at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual'' to read, ''The State must ensure that the person-centered service plan is reviewed, and revised, as appropriate, based upon the reassessment of functional need as required by § 441.365(e), at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual.'' We are proposing this revision to the regulatory text so that it is clearer that the State is the required actor under § 441.301(c)(3). We are also proposing this revision to the regulatory text so that it is clear that changes to the person-centered service plan are not required if the reassessment does not indicate a need for changes. With this proposed revision to the regulatory text, a State could, for instance, meet the requirement that the person-centered service plan was reviewed and revised as appropriate based on the results of the required reassessment of functional need by documenting that there were no changes in functional needs or the individual's circumstances upon reassessment that necessitated changes to the service plan.

Section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on an FFS basis or by a managed care entity to its enrollees. The requirement for ''consistent administration'' should require consistency between these two modes of service delivery. Accordingly, we are proposing to specify that a State must ensure compliance with the requirements in § 441.301(c)(3), with respect to HCBS delivered under both FFS and managed care delivery systems. To ensure consistency in person-centered service plan requirements between FFS and managed care delivery systems, we propose to add the requirements at § 441.301(c)(3) to 42 CFR 438.208(c).

We also propose updates to existing language describing the person-centered planning process specific to section 1915(c) waivers. Current language describes the role of an individual's authorized representative as if every waiver participant will require an authorized representative, which is not the case and has been a source of confusion for States and providers. We propose to remove extraneous language from the regulation text at § 441.301(c)(1) to now read: ''The individual, or if applicable, the individual and the individual's authorized representative, will lead the person-centered planning process. When the term 'individual' is used throughout this section, it includes the individual's authorized representative if applicable. In addition, the person-centered planning process: . . .'' This proposed language brings the section 1915(c) waiver regulatory text in line with person-centered planning process language in both the section 1915(j) and (k) State plan options.

We recognize that many States may need time to implement these proposed requirements, including time to amend provider agreements or managed care contracts, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these requirements. As a result, we are proposing at § 441.301(c)(3)(iii) to make the performance levels under § 441.301(c)(3)(ii) effective 3 years after the effective date of § 441.301(c)(3) (in other words, 3 years after the effective date of the final rule) in FFS delivery systems. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act that include HCBS in the managed care organization's (MCO), prepaid inpatient health plan's (PIHP), or prepaid ambulatory health plan's (PAHP) contract, we are proposing to provide States until the first managed care plan contract rating period that begins on or after 3 years after the effective date of the final rule to implement these requirements. This time period is based on feedback from States and other interested parties that it could take 2 to 3 years to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of the proposals outlined in this section. We also considered this proposed timeframe based on all of the HCBS proposals outlined in this proposed rule as whole. We invite comments on whether this timeframe is sufficient, whether we should require a shorter timeframe (2 years) or longer timeframe (4 years) to implement these provisions, and if an alternate timeframe is recommended, the rationale for that alternate timeframe. As noted previously, the proposed requirements at § 441.301(c)(3), in combination with new proposed reporting requirements at § 441.311(b)(3) and other proposed requirements identified throughout this proposed rule, are intended to supersede and fully replace the reporting requirements and the required minimum 86 percent performance level for performance measures described in the 2014 guidance. We expect that States may implement some of the requirements proposed in this proposed rule in advance of the effective date. We will work with States to phase-out the requirements in the 2014 guidance as they implement the future requirements that become part of the final rule to reduce unnecessary burden and to avoid duplicative or conflicting reporting requirements.

As discussed earlier in this section of the preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act for States to achieve a more consistent administration of policies and procedures across HCBS programs and because HCBS State plan options have similar person-centered planning and service plan requirements, we are proposing to incorporate these new requirements within the applicable HCBS regulatory sections. Specifically, we propose to apply the proposed requirements at § 441.301(c)(3) to section 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.450(c), 441.540(c), and 441.725(c), respectively. Consistent with our proposal for section 1915(c) waivers, we propose these requirements under section 1902(a)(19) of the Act, which authorizes safeguards necessary to assure that eligibility for care and services under the Medicaid program will be determined, and such care and services will be provided, in a manner consistent with the best interest of beneficiaries. We believe the same reasons for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities and are also responsive to feedback we have received from States and interested parties over the years requesting consistency of requirements across HCBS authorities. We request comment on the application of these provisions to section 1915(i), (j), and (k) authorities.

Finally, we considered whether to also apply these proposed requirements to section 1905(a) ''medical assistance'' State plan personal care, home health, and case management services. However, we are not proposing that these requirements apply to any section 1905(a) State plan services at this time, based on State feedback that States do not have the same data collection and reporting capabilities for these services as they do for other HCBS at section 1915(c), (i), (j), and (k), and because the person-centered planning and service plan requirements for section 1905(a) services are substantially different from those for section 1915(c), (i), (j), and (k) services. Specifically, there are requirements for a ''comprehensive assessment and periodic reassessment of individual needs'' and ''development (and periodic revision) of a specific care plan based on the information collected through the assessment'' under § 440.169(d) for the provision of case management services. There are also requirements for a ''plan of treatment'' (or, at the option of the State, a ''service plan'') under § 440.167 for the provision of personal care services. However, §§ 440.169(d) and 440.167 do not include specific timeframes that could be used to establish minimum

performance thresholds that would be similar to those proposed for section 1915(c) waivers. A face-to-face encounter within the 90 days before or within the 30 days after the start of the services is required at § 440.70(f)(1) for the initiation of home health services, and a written plan of care that the ordering practitioner reviews every 60 days for services is required under § 440.70(a)(2) for the provision of home health services. However, the proposed minimum thresholds for section 1915(c) waiver services would be incompatible with the required timeframes under § 440.70(a)(2) and (f)(1). Person-centered planning and service plan requirements are not required by Medicaid for other section 1905(a) services, although we recommend that States implement person-centered planning process for all HCBS. We note that the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authorities. However, the small overall percentage includes large numbers of people with mental health needs who receive case management. We request comment on whether we should establish similar person-centered planning and service plan requirements for section 1905(a) State plan personal care, home health, and case management services.

2. Grievance System (§§ 441.301(c)(7), 441.464(d)(2)(v), 441.555(b)(2)(iv), and 441.745(a)(1)(iii))

As discussed earlier in section II.B.1., of this preamble, section 2402(a) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid HCBS, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide support and coordination to assist with a community-supported life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[47] Among other things, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires development and monitoring of an HCBS complaint system. Further, section 1902(a)(19) of the Act requires States to provide safeguards to assure that eligibility for Medicaid-covered care and services will be determined and provided in a manner that is consistent with simplicity of administration and the best interest of Medicaid beneficiaries.

Federal regulations at 42 CFR part 431, subpart E require States to provide Medicaid applicants and beneficiaries with an opportunity for a fair hearing before the State Medicaid agency in certain circumstances, including for a termination, suspension, or reduction of Medicaid eligibility, or for a termination, suspension, or reduction in benefits or services. These fair hearing rights apply to all Medicaid applicants and beneficiaries, including those receiving HCBS regardless of the delivery system. Under 42 CFR part 438, subpart F, Medicaid managed care plans must have in place: an appeal system that allows a Medicaid managed care enrollee to request an appeal, which is a review by the Medicaid managed care plan of an adverse benefit determination issued by the plan; and a grievance system, which allows a Medicaid managed care enrollee to file an expression of dissatisfaction with the plan about any matter other than an adverse benefit determination. Note that if a Medicaid managed care enrollee exhausts the Medicaid managed care plan's appeals process, the enrollee may request a fair hearing before the State Medicaid agency. Medicaid managed care enrollees cannot request a fair hearing for grievances because grievances are not generally related to the direct provision of services. Section 1902(a)(3) of the Act provides for the opportunity for a State fair hearing when a ''claim for medical assistance under the plan is denied or is not acted upon with reasonable promptness.'' This structure creates a disparity for FFS HCBS beneficiaries, as it does not provide for a venue to raise concerns about issues that HCBS beneficiaries may experience which are not subject to the fair hearing process, such as the failure of a provider to comply with the HCBS settings requirements at § 441.301(c)(4) (note that these are issues for which a managed care enrollee could file a grievance with their plan).

Under our authority at section 1902(a)(19) of the Act and section 2402(a)(3)(B)(ii) of the Affordable Care Act, we propose to require at new § 441.301(c)(7) that States establish grievance procedures for Medicaid beneficiaries receiving section 1915(c) waiver program services through an FFS delivery system. Specifically, we propose at § 441.301(c)(7) that States must establish a procedure under which a beneficiary can file a grievance related to the State's or a provider's compliance with the person-centered planning and service plan requirements at §§ 441.301(c)(1) through (3) and the HCBS settings requirements at §§ 441.301(c)(4) through (6). This proposal is based on feedback obtained during various public engagement activities conducted with interested parties over the past several years about the need for beneficiary grievance processes in section 1915(c) waiver programs related to these requirements. However, to avoid duplication with the grievance requirements at part 438, subpart F, we are not proposing to apply this requirement to establish a grievance procedure to managed care delivery systems. We note, though, that the proposals in this section are similar to requirements for managed care grievance requirements found at part 438, subpart F, with any differences reflecting changes appropriate for FFS systems. The proposed requirements included at § 441.301(c)(7) in this proposed rule are focused specifically on grievance systems and do not establish new fair hearing system requirements, as appeals of adverse eligibility and/or benefit or service determinations are addressed by existing fair hearing requirements at 42 CFR part 431, subpart E. We welcome comments on any additional changes we should consider in this section.

As discussed earlier in this section of the preamble, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires development and monitoring of an HCBS complaint system. In addition, section 2402(a)(3)(A) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid HCBS, develop HCBS systems that achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS. As such, we believe the requirement for States to establish grievance procedures for Medicaid beneficiaries receiving section 1915(c) waiver program services through a FFS delivery system are necessary to comply with the HCBS complaint system requirements at section 2402(a)(3)(B)(ii) and to ensure consistency in the administration of HCBS between managed care and FFS delivery systems. Further, in the absence of a grievance system requirement for FFS HCBS programs, States may not have established processes and systems for people receiving section 1915(c) waiver program services through FFS delivery

[47] Section 2402(a) of the Affordable Care Act—Guidance for Implementing Standards for Person-Centered Planning and Self-Direction in Home and Community-Based Services Programs. Accessed at *https://acl.gov/sites/default/files/news%202016-10/2402-a-Guidance.pdf.*

systems to express dissatisfaction with or voice concerns related to States' compliance with the person-centered planning and service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6), as such concerns are not subject to the existing fair hearing process at 42 CFR part 431 subpart E. As a result, we believe the proposal for a grievance system for FFS HCBS programs is necessary to assure that care and services will be provided in a manner that is in the best interests of the beneficiaries, as required by section 1902(a)(19) of the Act.

We have specifically focused this requirement on States' and providers' compliance with the person-centered planning and service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6) because of the critical role that person-centered planning and the service plan play in appropriate care delivery for people receiving HCBS. Additionally, we have focused the grievance system requirements on the HCBS settings requirements because of the importance of the HCBS settings requirements to ensuring that HCBS beneficiaries have full access to the benefits of community living and are able to receive services in the most integrated setting appropriate to their needs. Beneficiary advocates and other interested parties have also indicated to us that these are especially important areas for which to ensure that grievance processes are in place for all Medicaid beneficiaries receiving HCBS. Further, focusing the grievance systems requirements on the person-centered planning and service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6) helps to ensure that the proposed grievance requirements do not duplicate or conflict with existing fair hearing requirements at part 431, subpart E, as HCBS settings requirements and person-centered planning requirements are outside the scope of the fair hearing requirements.

At § 441.301(c)(7)(ii)(A), we propose to define ''grievance'' as an expression of dissatisfaction or complaint related to the State's or a provider's compliance with the person-centered planning and service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6), regardless of whether the beneficiary requests that remedial action be taken to address the area of dissatisfaction or complaint. At § 441.301(a)(7)(ii)(B), we also propose to define ''grievance system'' as the processes the State implements to handle grievances, as well as the processes to collect and track information about them. To ensure consistency in the administration of HCBS between managed care and FFS delivery systems, we based these definitions on the definitions at part 438, subpart F.

At § 441.301(c)(7)(iii)(A) through (C), we propose new general requirements for States' grievance procedures. Specifically, at § 441.301(c)(7)(iii)(A), we propose to require that a beneficiary or authorized representative be permitted to file a grievance. Under the proposal, another individual or entity may file a grievance on a beneficiary's behalf, so long as the beneficiary or authorized representative provides written consent. Our proposal would not permit a provider to file a grievance that would violate conflict of interest guidelines, which States are required to have in place under § 441.540(a)(5). At § 441.301(c)(7)(iii)(A), we also propose to specify that all references to beneficiary in the regulatory text of this section includes the beneficiary's representative, if applicable.

At § 441.301(c)(7)(iii)(B)(1) through (7), we propose to require States to:

- Have written policies and procedures for their grievance processes that at a minimum meet the requirements of this proposed section and serve as the basis for the State's grievance process;
- Provide beneficiaries with reasonable assistance in completing the forms and procedural steps related to grievances and to ensure that the grievance system is consistent with the availability and accessibility requirements at § 435.905(b);
- Ensure that punitive action is not threatened or taken against an individual filing a grievance;
- Accept grievances, requests for expedited resolution of grievances, and requests for extensions of timeframes from beneficiaries;
- Provide beneficiaries with notices and other information related to the grievance system, including information on their rights under the grievance system and on how to file grievance, and ensure that such information is accessible for individuals with disabilities and individuals who are limited English proficient in accordance with § 435.905(b);
- Review grievance resolutions with which beneficiaries are dissatisfied; and
- Provide information on the grievance system to providers and subcontractors approved to deliver services under section 1915(c) of the Act.

At § 441.301(c)(7)(iii)(C)(1) through (5), we propose to require that the processes for handling grievances must:

- Allow beneficiaries to file a grievance either orally or in writing;
- Acknowledge receipt of each grievance;
- Ensure that decisions on grievances are not made by anyone previously involved in review or decision-making related to the problem or issue for which the beneficiary has filed a grievance or a subordinate of such an individual, are made by individuals with appropriate expertise, and are made by individuals who consider all of the information submitted by the beneficiary related to the grievance;
- Provide beneficiaries with a reasonable opportunity, face-to-face (including through the use of audio or video technology) and in writing, to present evidence and testimony and make legal and factual arguments related to their grievance;
- Provide beneficiaries, free of charge and in advance of resolution timeframes, with their own case files and any new or additional evidence used or generated by the State related to the grievance; and
- Provide beneficiaries, free of charge, with language services, including written translation and interpreter services in accordance with 435.905(b), to support their participation in grievance processes and their use of the grievance system.

At § 441.301(c)(7)(iv)(A), we propose to require that the beneficiary be able to file a grievance at any time. At § 441.301(c)(7)(iv)(B), we propose to require that beneficiaries be permitted to request expedited resolution of a grievance, whenever there is a substantial risk that resolution within standard timeframes will adversely affect the beneficiary's health, safety, or welfare, such as if, for example, a beneficiary cannot access personal care services authorized in the person-centered service plan.

At § 441.301(c)(7)(v), we propose resolution and notification requirements for grievances. Specifically, at § 441.301(c)(7)(v)(A), we propose to require that States resolve and provide notice of resolution related to each grievance as quickly as the beneficiary's health, safety, and welfare requires and within State-established timeframes that do not exceed the standard and expedited timeframes proposed in § 441.301(c)(7)(v)(B). At § 441.301(c)(7)(v)(B)(1), we propose to require that standard resolution of a grievance and notice to affected parties must occur within 90 calendar days of receipt of the grievance. At

§ 441.301(c)(7)(v)(B)(2), we propose to require that expedited resolution of a grievance and notice must occur within 14 calendar days of receipt of the grievance.

At § 441.301(c)(7)(v)(C), we propose that States be permitted to extend the timeframes for the standard resolution and expedited resolution of grievances by up to 14 calendar days if the beneficiary requests the extension, or the State documents that there is need for additional information and how the delay is in the beneficiary's interest. At § 441.301(c)(7)(v)(D), we propose to require that States make reasonable efforts to give the beneficiary prompt oral notice of the delay, give the beneficiary written notice, within 2 calendar days of determining a need for a delay but no later than the timeframes in paragraph (c)(7)(v)(B), of the reason for the decision to extend the timeframe, and resolve the grievance as expeditiously as the beneficiary's health condition requires and no later than the date the extension expires, if the State extends the timeframe for a standard resolution or an expedited resolution.

We note that the proposed requirements at § 441.301(c)(7)(iv)(B) that beneficiaries be permitted to request expedited resolution of a grievance and at § 441.301(c)(7)(v)(B)(2) related to the timeframe for expedited resolution of a grievance and notice differ from the current grievance system requirements for Medicaid managed care plans at part 438, subpart F, which do not include specific requirements for an expedited resolution of a grievance. We invite comment on whether part 438, subpart F should be amended to include the proposed requirements at § 441.301(c)(7)(iv)(B) and at § 441.301(c)(7)(v)(B)(*2*).

Proposed § 441.301(c)(7)(vi) describes proposed requirements related to the notice of resolution for beneficiaries. Specifically, at § 441.301(c)(7)(vi)(A), we propose to require that States establish a method for written notice to beneficiaries and that the method meet the availability and accessibility requirements at § 435.905(b). At § 441.301(c)(7)(vi)(B), we propose to require that States make reasonable efforts to provide oral notice of resolution for expedited resolutions.

Proposed § 441.301(c)(7)(vii) lists proposed recordkeeping requirements related to grievances. Specifically, at § 441.301(c)(7)(vii)(A), we propose to require that States maintain records of grievances and review the information as part of their ongoing monitoring procedures. At § 441.301(c)(7)(vii)(B)(*1*) through (*6*), we propose to require that the record of each grievance must contain the following information at a minimum: a general description of the reason for the grievance, the date received, the date of each review or review meeting (if applicable), resolution and date of the resolution of the grievance (if applicable), and the name of the beneficiary for whom the grievance was filed. Further, at § 441.301(c)(7)(vii)(C), we propose to require that grievance records be accurately maintained and in a manner that would be available upon our request.

We recognize that many States may need time to implement these requirements, including to amend provider agreements, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these requirements. However, we also recognize that the absence of a grievance system in FFS HCBS systems poses a substantial risk of harm to beneficiaries. As a result, we are proposing at § 441.301(c)(7)(viii) that the requirement at § 441.301(c)(7) be effective 2 years after the effective date of the final rule. A 2-year time period after the effective date of the final rule for States to implement these requirements reflects our attempt to balance two competing challenges: (1) the fact that there is a gap in existing regulations for FFS HCBS grievance processes related to important HCBS beneficiary protection issues involving person-centered planning and HCBS settings requirements; and (2) feedback from States and other interested parties that it could take 1 to 2 years to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of the proposals outlined in this section. We also considered all of the HCBS proposals outlined in this proposed rule as whole. We invite comments on overall burden for States to meet the requirements of this section, whether this timeframe is sufficient, whether we should require a shorter timeframe (1 year to 18 months) or longer timeframe (3 to 4 years) to implement these provisions, and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act for States to achieve a more consistent administration of policies and procedures across HCBS programs and because HCBS State plan options also must comply with the HCBS Settings Rule and with similar person-centered planning and service plan requirements, we are proposing to incorporate these grievance requirements within the applicable regulatory sections. Specifically, we propose to apply these proposed requirements in § 441.301(c)(7) to sections 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.464(d)(2)(v), 441.555(b)(2)(iv), and 441.745(a)(1)(iii), respectively.

Consistent with our proposal for section 1915(c) waivers, we propose to apply the proposed grievance requirements in § 441.301(c)(7) to sections 1915(j), (k), and (i) State plan services based on our authority under section 1902(a)(19) of the Act to assure that there are safeguards for beneficiaries and our authority at section 2402(a)(3)(B)(ii) of the Affordable Care Act to require a complaint system for beneficiaries. We believe the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable to these other HCBS authorities. We request comment on the application of the grievance system provisions to section 1915(i), (j), and (k) authorities. We note that in the language added to § 441.464(d)(2)(v), we identify that the proposed grievance requirements apply when self-directed personal assistance services authorized under section 1915(j) include services under a section 1915(c) waiver program. As described later in this section of this proposed rule, we have not proposed to apply these requirements to section 1905(a) services; section 1905(a) personal care services are the other service authorized under section 1915(j) authorities to be self-directed.

We considered whether to also apply the proposed requirements to section 1905(a) ''medical assistance'' State plan personal care, home health, and case management services. However, we are not proposing that these requirements apply to any section 1905(a) State plan services because section 1905(a) services are not required to comply with HCBS settings requirements and because the person-centered planning and service plan requirements for most section 1905(a) services are substantially different from those for section 1915(c), (i), (j), and (k) services. Further, the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authorities. We request comment on whether we should establish grievance requirements for section 1905(a) State plan personal care, home health, and case management services.

3. Incident Management System (§§ 441.302(a)(6), 441.464(e), 441.570(e), and 441.745(a)(1)(v))

Section 1902(a)(19) of the Act requires States to provide safeguards as may be necessary to assure that eligibility for care and services will be determined, and that ''such care and services will be provided,'' in a manner consistent with simplicity of administration and ''the best interests of the recipients.'' Section 1915(c)(2)(A) of the Act and current Federal regulations at § 441.302(a) require that States have in place necessary safeguards to protect the health and welfare of individuals receiving section 1915(c) waiver program services. Further, as discussed previously in section II.B.1. of this preamble, section 2402(a) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide support and coordination to assist with a community-supported life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[48] Among other things, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires development and oversight of a system to qualify and monitor providers.

As noted earlier in section II.B.1. of this preamble we released guidance for section 1915(c) waiver programs in 2014 which noted that States should report on State-developed performance measures to demonstrate that they meet six assurances, including a Health and Welfare assurance for States to demonstrate that they have designed and implemented an effective system for assuring waiver participant health and welfare. Specifically, the 2014 guidance highlighted, related to the Health and Welfare assurance, the following:

- The State demonstrates on an ongoing basis that it identifies, addresses, and seeks to prevent instances of abuse, neglect, exploitation, and unexplained death;
- The State demonstrates that an incident management system is in place that effectively resolves incidents and prevents further similar incidents to the extent possible;
- The State policies and procedures for the use or prohibition of restrictive interventions (including restraints and seclusion) are followed;
- The State establishes overall health care standards and monitors those standards based on the responsibility of the service provider as stated in the approved waiver.

Consistent with the expectations for other performance measures, the 2014 guidance noted that States should conduct systemic remediation and implement a Quality Improvement Project when they score below 86 percent on any of their Health and Welfare performance measures.

Despite States implementing these statutory and regulatory requirements to protect the health and welfare of individuals receiving section 1915(c) waiver program services, and States' adherence to related subregulatory guidance, there have been notable and high-profile instances of abuse and neglect in recent years that highlight the risks associated with poor quality care and with inadequate oversight of HCBS in Medicaid. For example, a 2018 report, ''Ensuring Beneficiary Health and Safety in Group Homes Through State Implementation of Comprehensive Compliance Oversight,'' [49] (referred to as the Joint Report, developed by ACL, OCR, and the OIG), found systemic problems with health and safety policies and procedures being followed in group homes and that failure to comply with these policies and procedures left beneficiaries in group homes at risk of serious harm.

In addition, in 2016 and 2017, OIG released several reports on their review of States' compliance with Federal and State requirements regarding critical incident reporting and monitoring.[50] [51] [52] OIG found that several States did not comply with Federal waiver and State requirements for reporting and monitoring critical incidents involving individuals receiving HCBS through waivers. In particular, they reported that:

- Critical incidents were not reported correctly;
- Adequate training to identify appropriate action steps for reported critical incidents or reports of abuse or neglect was not provided to State staff;
- Appropriate data sets to trend and track critical incidents were not accessible to State staff; and
- Critical incidents were not clearly defined, making it difficult to identify potential abuse or neglect.

In 2016, we conducted three State audits based at least in part on concerns regarding health and welfare and media coverage on abuse, neglect, or exploitation issues.[53] We found that these three States had not been meeting their section 1915(c) waiver assurances, similar to findings reported by the OIG. In two cases, for the incidents of concern, tracking and trending of critical incidents were not present. Further, in at least two of the States, staffing at appropriate levels was identified as an issue.

In January 2018, the United States Government Accountability Office (GAO) released a report on a study of 48 States that covered assisted living services.[54] The GAO found large

inconsistencies between States in their definition of a critical incident and their system's ability to report, track, and collect information on critical incidents that have occurred. States also varied in their oversight methods as well as the type of information they were reviewing as part of this oversight. The GAO recommended that requiring States to report information on incidents (such as the type and severity of incidents and the number of incidents) would strengthen the effectiveness of State and Federal oversight.

In July 2019, we issued a survey to States that operate section 1915(c) waivers, requesting information on their approach to administering incident management systems. The goal of the survey was to obtain a comprehensive understanding of how States organize their incident management system to best respond to, resolve, monitor, and prevent critical incidents in their waiver programs. The survey found that:

- Definitions of critical incidents vary across States and, in some cases, within States for different HCBS programs or populations;
- Some States do not use standardized forms for reporting incidents, thereby impeding the consistent collection of information on critical incidents;
- Some States do not have electronic incident management systems, and, among those that do, many use systems with outdated electronic platforms that are not linked with other State systems, leading to the systems operating in silos and the need to consolidate information across disparate systems; and
- Many States cited the lack of communication within and across State agencies, including with investigative agencies, as a barrier to incident resolution.

Additionally, during various public engagement activities conducted with interested parties over the past several years, we have heard that ensuring access to HCBS requires that we must first ensure health and safety systems are in place across all States, a theme underscored by the Joint Report.

Based on these findings and reports, under the authorities at sections 1902(a)(19) and 1915(c)(2)(A) of the Act and section 2402(a)(3)(B)(ii) of the Affordable Care Act, we propose a new requirement at § 441.302(a)(6) to require that States provide an assurance that they operate and maintain an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents. This proposal is intended to ensure standardized requirements for States regarding incidents that harm or place a beneficiary at risk of harm and is based on our experience working with States as part of the section 1915(c) waiver program and informed by the incident management survey described previously in this section of the proposed rule. In the absence of an incident management system, people receiving section 1915(c) waiver program services are at risk of preventable or intentional harm. As such, we believe that such a system to identify and address incidents of abuse, neglect, exploitation, or other harm during the course of service delivery is in the best interest of and necessary for protecting the health and welfare of individuals receiving section 1915(c) waiver program services.

At § 441.302(a)(6)(i)(A) through (G), we propose new requirements for States' incident management systems. Specifically, at § 441.302(a)(6)(i)(A), we propose to establish a minimum standard definition of a critical incident to include, at a minimum, verbal, physical, sexual, psychological, or emotional abuse; neglect; exploitation including financial exploitation; misuse or unauthorized use of restrictive interventions or seclusion; a medication error resulting in a telephone call to or a consultation with a poison control center, an emergency department visit, an urgent care visit, a hospitalization, or death; or an unexplained or unanticipated death, including but not limited to a death caused by abuse or neglect. Currently, there is no standardized Federal definition for the type of events or instances that States should consider a critical incident that must be reported by a provider to the State and considered for an investigation by the State to assess whether the incident was the result of abuse, neglect, or exploitation, and whether it could have been prevented. The proposed definition at § 441.302(a)(6)(i)(A) is based on internal analyses of data and information obtained through a CMS survey of States' incident management systems, commonalities across definitions, and common gaps in States' definitions of critical incidents (for instance, that many States do not consider sexual assault to be a critical incident). We request comment on whether there are specific types of events or instances of serious harm to section 1915(c) waiver participants, such as identity theft or fraud, that would not be captured by the proposed definition and that should be included, and whether the inclusion of any specific types of events or instances of harm in the proposed definition would lead to the overidentification of critical incidents.

At § 441.302(a)(6)(i)(B), we propose to require that States have electronic critical incident systems that, at a minimum, enable electronic collection, tracking (including of the status and resolution of investigations), and trending of data on critical incidents. We request comment on the burden associated with requiring States to have electronic critical incident systems and whether there is specific functionality, such as unique identifiers, that should be required or encouraged for such systems. Although we are not proposing to require States to do so, States are also encouraged to advance the interoperable exchange of HCBS data and support quality improvement activities by adopting standards in 45 CFR, part 170 and other relevant standards identified in the Interoperability Standards Advisory (ISA).[55] We also remind States that enhanced FFP is available at a 90 percent FMAP for the design, development, or installation of improvements of mechanized claims processing and information retrieval systems, in accordance with applicable Federal requirements.[56] Enhanced FFP at a 75 percent FMAP is also available for operations of such systems, in accordance with applicable Federal requirements.[57] However, we note that receipt of these enhanced funds is conditioned upon States meeting a series of standards and conditions to ensure investments are efficient and effective.[58]

At § 441.302(a)(6)(i)(C), we propose to require States to require providers to report to States any critical incidents that occur during the delivery of section 1915(c) waiver program services as specified in a waiver participant's person-centered service plan, or any critical incidents that are a result of the

oversight of beneficiary health and welfare is needed.'' January 2018. Accessed at *https://www.gao.gov/assets/690/689302.pdf.*

failure to deliver authorized services. Based on the findings of the Joint Report, as well as the OIG and GAO reports cited earlier, settings in which residential habilitation and day habilitation services are provided, and services provided in a beneficiary's private home by a provider should be of particular focus. We believe that such a requirement will help to specify provider expectations for reporting critical incidents and to ensure that harm that occurs because of the failure to deliver services will be appropriately identified as a critical incident.

At § 441.302(a)(6)(i)(D), we propose to require that States use claims data, Medicaid Fraud Control Unit data, and data from other State agencies such as Adult Protective Services or Child Protective Services to the extent permissible under applicable State law to identify critical incidents that are unreported by providers and occur during the delivery of section 1915(c) waiver program services, or as a result of the failure to deliver authorized services. We believe that such data can play an important role in identifying serious instances of harm to waiver program participants, which may be unreported by a provider, such as a death that occurs as a result of choking of an individual with a developmental disability residing in a group home, or a burn that occurs because a provider failed to appropriately supervise someone with dementia and that results in an emergency department visit. We request comment on whether States should be required to use these data sources to identify unreported critical instances, and whether there are other specific data sources that States should be required to use to identify unreported critical incidents.

At § 441.302(a)(6)(i)(E), we propose to require that States share information, consistent with the regulations in 42 CFR part 431, subpart F, on the status and resolution of investigations. We expect this data sharing could be accomplished through the use of information sharing agreements, with other entities in the State responsible for investigating critical incidents, if the State refers critical incidents to other entities for investigation. We also propose, at § 441.302(a)(6)(i)(F), to require States to separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation within State-specified timeframes. These proposed requirements are intended to ensure that the failure to effectively share information between State agencies or other entities in the State responsible for investigating incidents does not impede a State's ability to effectively identify, report, triage, investigate, resolve, track, and trend critical incidents, particularly where there could be evidence of serious harm or a pattern of harm to a section 1915(c) waiver program participant for which a provider is responsible.

As noted in section II.B.1. of this proposed rule, in 2014, we released guidance for section 1915(c) waiver programs in which we indicated that States should report on State-developed performance measures across several domains, including to demonstrate that the State designed and implemented an effective system for assuring waiver participant health and welfare. Specifically, the 2014 guidance noted that States should demonstrate: on an ongoing basis that they identify, address, and seek to prevent instances of abuse, neglect, exploitation, and unexplained death; that an incident management system is in place that effectively resolves those incidents and prevents further similar incidents to the extent possible; State policies and procedures for the use or prohibition of restrictive interventions (including restraints and seclusion) are followed; and overall health care standards are established and monitored. The 2014 guidance also indicated that States should conduct systemic remediation and implement a Quality Improvement Project when they score below 86 percent on any of their performance measures.

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. Under our authority at section 1902(a)(6) of the Act, we propose to modernize the health and welfare reporting by requiring all States to report on the same Federally prescribed quality measures as opposed to the State-developed measures, which naturally vary State by State. Specifically, at new § 441.302(a)(6)(i)(G), we propose to require that States meet the reporting requirements at § 441.311(b)(1) related to the performance of their incident management systems. We discuss these reporting requirements in our discussion of proposed § 441.311(b)(1). Further, under our authority at sections 1915(c)(2)(A) and 1902(a)(19) of the Act, we propose to codify a minimum performance level to demonstrate that States meet the requirements at § 441.302(a)(6). Specifically, at new § 441.302(a)(6)(ii)(A) through (C), we propose to require that States demonstrate that an investigation was initiated, within State-specified timeframes, for no less than 90 percent of critical incidents; an investigation was completed and the resolution of the investigation was determined, within State-specified timeframes, for no less than 90 percent of critical incidents; and corrective action was completed, within State-specified timeframes, for no less than 90 percent of critical incidents that require corrective action.

While we expect States to meet State-specified timeframes for initiating investigations, completing investigations and determining resolution, and completing corrective action plans for all critical incidents, we are proposing to establish a minimum 90 percent performance level in each of these areas in recognition of the various scenarios that may impact a State's ability to meet these timeframes for each critical incident (for example, some critical incidents may require more complex investigations than others, an illness may delay the interview of an important witness to the incident).

We considered whether to codify the minimum 86 percent performance level that was established in the 2014 guidance, instead of the minimum 90 percent performance level we have proposed. The minimum 86 percent performance level was intended to provide States with a reasonable threshold for demonstrating compliance with the requirements at § 441.302(a)(6). However, we have conducted extensive oversight and received significant feedback from external parties since we released the 2014 guidance. Our findings from the oversight and feedback have led us to conclude that the minimum 86 percent performance level may not be sufficient to demonstrate a State is meeting these requirements because it provides States with more latitude than is necessary to account for unexpected delays in the timeframes for investigating and addressing critical incidents. Further, findings from our 2016 audits and 2019 survey, feedback from States, OIG, ACL, OCR, and other interested parties, and media and anecdotal reports document the harm that beneficiaries can experience when States fail to investigate and address critical incidents and indicate that we should establish a more stringent threshold for States to demonstrate compliance with the requirements at § 441.302(a)(6). As a result, we are proposing an increase to the minimum performance level in the 2014 guidance. This proposed minimum performance level is intended to

strengthen health and welfare reporting requirements based on feedback and evidence we have received, while also recognizing that there may be legitimate reasons for delays in investigating and addressing critical incidents.

We also considered whether to propose allowing good cause exceptions to the minimum performance level in the event of a natural disaster, public health emergency, or other event that would negatively impact a State's ability to achieve a minimum 90 percent performance level. In the end, we are not proposing good cause exceptions because the minimum 90 percent performance level is intended to account for various scenarios that might impact a State's ability to achieve these performance levels. Further, as noted earlier with the person-centered service plan requirements in section II.B.1. of this preamble, there are existing disaster authorities that States could utilize to request a waiver of these requirements in the event of a public health emergency or a disaster.

At § 441.302(a)(6)(iii), we propose to apply these requirements to services delivered under FFS or managed care delivery systems. As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on a FFS basis or by a managed care entity to its enrollees. The requirement for ''consistent administration'' should require consistency between these two modes of service delivery. We accordingly are proposing to identify that a State must ensure compliance with the requirements in § 441.302(a)(6) with respect to HCBS delivered both under FFS and managed care delivery systems.

As noted throughout the HCBS proposals in this rule, we recognize that many States may need time to implement these requirements, including to amend provider agreements or managed care contracts, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these requirements. As a result, we are proposing at § 441.302(a)(6)(iii) to provide States with 3 years to implement these requirements in FFS delivery systems following effective date of the final rule. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and that include HCBS in the MCO's, PIHP's, or PAHP's contract, we are proposing to provide States until the first managed care plan contract rating period that begins on or after 3 years after the effective date of the final rule to implement these requirements. This time period is based on feedback from States and other interested parties that it could take 2 to 3 years to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of the proposals outlined in this section. We also considered all of the HCBS proposals outlined in proposed rule as whole. We invite comments on whether this timeframe is sufficient, whether we should require a shorter timeframe (2 years) or longer timeframe (4 years) to implement these provisions, and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

Again, the proposed requirements at §§ 441.302(a)(6)(iii) and 441.311(b)(1), in combination with other proposed requirements identified throughout this proposed rule, are intended to supersede and fully replace the reporting expectations and the minimum 86 percent performance level for State's performance measures described in the 2014 guidance. We expect that States may implement some of the requirements proposed in this proposed rule in advance of the effective date. To reduce unnecessary burden and to avoid duplicative or conflicting reporting requirements, we will work with States to phase-out the 2014 guidance as they implement these proposed requirements should a final rule be adopted.

Additionally, as discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act for States to achieve a more consistent administration of policies and procedures across HCBS programs and because of the importance of assuring health and welfare for other HCBS State plan options, we are proposing to incorporate these incident management requirements within the applicable regulatory sections. Specifically, we propose to apply the proposed requirements § 441.302(a)(6) to section 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.570(e), 441.464(e), and 441.745(a)(1)(v), respectively. Consistent with our proposal for section 1915(c) waivers, we propose these requirements based on our authority under section 1902(a)(19) of the Act to assure that there are safeguards for beneficiaries. We believe the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities. We request comment on the application of these provisions across section 1915(i), (j), and (k) authorities. To accommodate the addition of new language at § 441.464(e) and (f) (discussed later in section II.B.5. of this proposed rule), we are proposing to renumber existing § 441.464(e) as § 441.464(g) and existing § 441.464(f) as § 441.464(h).

Finally, we considered whether to also apply the proposed incident management system and critical incident reporting and performance threshold requirements to section 1905(a) ''medical assistance'' State plan personal care, home health, and case management services. However, we are not proposing that these requirements apply to any section 1905(a) State plan services based on State feedback that they do not have the same data collection and reporting capabilities in place for section 1905(a) services as they do for section 1915(c), (i), (j), and (k) services. Further, the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authorities. We request comment on whether we should establish similar health and welfare requirements for section 1905(a) State plan personal care, home health, and case management services.

4. Reporting (§ 441.302(h))

Proposed § 441.311, described in section II.B.7. of this proposed rule, establishes a new *Reporting Requirements* section. As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires HHS to promulgate regulations to ensure that States develop HCBS systems that are designed to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs.

In addition to supporting States with achieving a more consistent administration of policies and procedures across HCBS programs in accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act, we believe that standardizing reporting across HCBS authorities will streamline and simplify reporting for providers, improve States' and CMS's ability to assess HCBS quality and performance, and better enable States to improve the quality of HCBS programs through the availability of comparative data. Further, section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports.

To avoid duplicative or conflicting reporting requirements at § 441.302(h), we propose to amend § 441.302(h) by removing the following language: ''annually''; ''The information must be consistent with a data collection plan designed by CMS and must address the waiver's impact on -''; and by removing paragraphs (1) and (2) under § 441.302(h). Further, we propose to add '', including the data and information as required in § 441.311'' at the end of the new amended text, ''Assurance that the agency will provide CMS with information on the waiver's impact.'' By making these changes, we are consolidating reporting expectations in one new section at proposed § 441.311, described in section II.B.7. of this proposed rule, under our authority at section 1902(a)(6) of the Act and section 2402(a)(3)(A) of the Affordable Care Act. As noted earlier in section II.B.1. of this proposed rule, this reporting will supersede existing reporting for section 1915(c) waivers and standardize reporting across section 1915 HCBS authorities.

5. HCBS Payment Adequacy (§§ 441.302(k), 441.464(f), 441.570(f), 441.745(a)(1)(vi))

Section 1902(a)(30)(A) of the Act requires State Medicaid programs to ensure that payments to providers are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available to beneficiaries at least to the extent as to the general population in the same geographic area. Access to most HCBS generally requires hands-on and in-person services to be delivered by direct care workers. Direct care workers are referred to by various names, such as direct support professionals, personal care attendants, and home health aides, within and across States. They perform a variety of roles, including nursing services, assistance with activities of daily living (such as mobility, personal hygiene, eating) and instrumental activities of daily living (such as cooking, grocery shopping, managing finances), behavioral supports, employment supports, and other services to promote community integration for older adults and people with disabilities. We discuss the definition of direct care workers in more detail below in the context of our proposed definition of direct care workers.

Direct care workers typically earn low wages and receive limited benefits,[59] [60] [61] contributing to a shortage of direct care workers and high rates of turnover in this workforce, which can limit access to and impact the quality of HCBS. Workforce shortages can also reduce the cost-effectiveness of services for State Medicaid agencies that take into account the actual cost of delivering services when determining Medicaid payment rates, such as by increasing the reliance on overtime and temporary staff, which have higher hourly costs than non-overtime wages paid to permanent staff. Further, an insufficient supply of HCBS providers can prevent individuals from transitioning from institutions to home and community-based settings and from receiving HCBS that can prevent institutionalization. HCBS is, on average, less costly than institutional services,[62] [63] and most older adults and people with disabilities strongly prefer to live in the community. Accordingly, limits on the availability of HCBS lessen the ability for State Medicaid programs to deliver LTSS in a cost-effective, beneficiary friendly manner.

Shortages of direct care workers and high rates of turnover also reduce the quality of HCBS. For instance, workforce shortages can prevent individuals from receiving needed services and, in turn, lead to poorer outcomes for people who need HCBS. Insufficient staffing can also make it difficult for providers to achieve quality standards.[64] High rates of turnover can reduce quality of care,[65] including through the loss of experienced and qualified workers and by reducing continuity of care people receiving HCBS,[66] which is associated with the reduced likelihood of improvement in function among people receiving home health aide services.[67]

While workforce shortages have existed for years, the COVID–19 pandemic has exacerbated the problem, leading to higher rates of direct care worker turnover (for instance, due to higher rates of worker-reported stress), an inability of some direct care workers to return to their positions prior to the pandemic (for instance, due to difficulty accessing child care or concerns about contracting COVID–19 for people with higher risk of severe illness), workforce shortages across the health care sector, and wage increases in retail and other jobs that tend to draw from the same pool of workers as some HCBS.[68] [69] [70]

[61] We recognize that there are workforce shortages that may impact access to other Medicaid-covered services aside from HCBS. We are focusing in this proposed rule on addressing workforce shortages in HCBS and continue to assess the feasibility and potential impact of other actions to address workforce shortages in other parts of the health care sector.

[69] Campbell, S., A. Del Rio Drake, R. Espinoza, K. Scales. 2021. Caring for the future: The power and potential of America's direct care workforce. Bronx, NY: PHI *http://phinational.org/wp-content/uploads/2021/01/Caring-for-the-Future-2021-PHI.pdf.*

Further, demand for direct care workers is expected to continue rising due to the growing needs of the aging population, the changing ability of aging caregivers to provide supports, a broader societal shift away from institutional services and towards services that are integrated in the community, and a decline in the number of younger workers available to provide services.[71] [72] [73] As discussed previously in section II.B.1. of this proposed rule, section 2402(a) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide coordination for and support each person's full engagement in community life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[74] In particular, section 2402(a)(1) of the Affordable Care Act requires States to allocate resources for services in a manner that is responsive to the changing needs and choices of beneficiaries receiving HCBS, while section 2402(a)(3)(B)(iii) of the Affordable Care Act requires States to oversee and monitor HCBS system functions to assure a sufficient number of qualified direct care workers to provide self-directed personal assistance services. To comply with sections 2402(a)(1) and 2402(a)(3)(B)(iii) of the Affordable Care Act, States must have a sufficient direct care workforce to be able to deliver services that are responsive to the changing needs and choices of beneficiaries, and, specifically, a sufficient number of qualified direct care workers to provide self-directed personal assistance services.

Consistent with section 1902(a)(30)(A) of the Act and sections 2402(a)(1) and 2402(a)(3)(B)(iii) of the Affordable Care Act, we propose to require that State Medicaid agencies demonstrate that payment rates for certain HCBS authorized under section 1915(c) of the Act are sufficient to ensure a sufficient direct care workforce (defined and explained later in this section of the proposed rule) to meet the needs of beneficiaries and provide access to services in accordance with the amount, duration, and scope specified in the person-centered service plan, as required under § 441.301(c)(2). We believe that this proposal supports the economy, efficiency, and quality of HCBS authorized under section 1915(c) of the Act, by ensuring that a sufficient portion of State FFS and managed care payments for HCBS go directly to compensation of the direct care workforce. While many States have already voluntarily established such minimums for payments authorized under section 1915(c) of the Act,[75] we believe a Federal standard would support ongoing access to, and quality and efficiency of, HCBS.

This proposal is designed to affect the inextricable link between sufficient payments being received by the direct care workforce and access to and, ultimately, the quality of HCBS received by Medicaid beneficiaries. We believe that this proposal would not only benefit direct care workers but also individuals receiving Medicaid HCBS because supporting and stabilizing the direct care workforce will result in better qualified employees, lower turnover, and a higher quality of care. The direct care workforce must be able to attract and retain qualified workers in order for beneficiaries to access providers of the services they have been assessed to need and for the direct care workforce to be comprised of workers with the training, expertise, and experience to meet the diverse and often complex HCBS needs of individuals with disabilities and older adults. Without access to a sufficient pool of direct care providers, individuals are forced to forgo having their needs met or addressed by workers without sufficient training, expertise, or experience to meet their unique needs, both of which could lead to worsening health and quality of life outcomes, loss of independence, and institutionalization.[76] [77] [78] [79] Further, we believe that ensuring adherence to a Federal standard of the percentage of Medicaid payments going to direct care workers is a concrete step in recruitment and retention efforts to stabilize this workforce by enhancing salary competitiveness in the labor market. In the absence of such requirements, we are unable to support and stabilize the direct care workforce because we are unable to ensure that the payments are used primarily and substantially to pay for care and services provided by direct care workers. Therefore, at § 441.302(k)(3)(i), we propose to require that at least 80 percent of all Medicaid payments, including but not limited to base payments and supplemental payments, with respect to the following services be spent on compensation to direct care workers: homemaker services, home health aide services, and personal care services.[80]

This proposal is based on feedback from States that have implemented similar requirements for payments for certain HCBS under section 9817 of the ARP [81] or other State-led initiatives.

[80] We note that section 2402(a) of the Affordable Care Act applies broadly to all HCBS programs and services funded by HHS. Further, section 2402(a) does not include limits on the scope of services, HCBS authorities, or other factors related to its use of the term HCBS. Therefore, we believe that there is no indication that personal care, homemaker, and home health aide services would fall outside the scope of section 2402(a).

[81] Information on State activities to expand, enhance, or strengthen HCBS under ARP section

Continued

These States have reported to us through various public engagement activities that similar requirements have had their intended effect of ensuring that a sufficient portion of the payment for Medicaid HCBS goes to compensation for the direct care workforce. These States have also indicated an 80 percent threshold is an appropriate threshold that takes into account the expected portion of payments that are necessary for provider administrative and other costs, aside from direct care worker compensation, although our research indicates that some States have successfully implemented other thresholds, ranging from a low of around 75 percent [82] to a high of 90 percent. We have also focused this requirement on homemaker services, home health aide services, and personal care services because they are services for which we expect that the vast majority of payment should be comprised of compensation for direct care workers. These are services that would most commonly be conducted in individuals' homes and general community settings. As such, there should be low facility or other indirect costs associated with the services. We request comment on the following options for the minimum percentage of payments that must be spent on compensation to direct care workers for homemaker services, home health aide services, and personal care services: (1) 75 percent; (2) 85 percent; and (3) 90 percent. If an alternate minimum percentage is recommended, we request that commenters provide the rationale for that minimum percentage.

We considered whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to other services, such as adult day health, habilitation, day treatment or other partial hospitalization services, psychosocial rehabilitation services, and clinic services for individuals with chronic mental illness. However, these services may have facility or other indirect costs for which we do not have adequate information to determine a minimum percent of the payment that should be spent on compensation for the direct care workforce. We request comment on whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to other services listed at § 440.180(b). In particular, in recognition of the importance of services provided to individuals with intellectual or developmental disabilities, we request comment on whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to residential habilitation services, day habilitation services, and home-based habilitation services.

We also request comment on the following options for the minimum percentage of payments that must be spent on compensation to direct care workers for each specific service that this provision should apply if this provision should apply to other services at § 440.180(b): (1) 65 percent; (2) 70 percent; (3) 75 percent; and (4) 80 percent. Specifically, we request that commenters respond separately on the minimum percentage of payments for services delivered in a non-residential community-based facility, day center, senior center, or other dedicated physical space, which would be expected to have higher other indirect costs and facility costs built into the Medicaid payment rate than other HCBS. If an alternate minimum percentage is recommended, we request that commenters provide the rationale for that minimum percentage.

We further clarify that we are requesting comment on a different range of options for the other services at § 440.180(b) than for the services at § 440.180(b)(2) through (4) because we expect that some of the other services at § 440.180(b), such as adult day health and day habilitation services, may have higher other indirect costs and facility costs than the services at § 440.180(b)(2) through (4). We also request that commenters respond separately on the minimum percentage of payments for facility-based residential services and other facility-based round-the-clock services that have other indirect costs and facility costs that would be paid for at least in part by room and board payments that Medicaid does not cover. If a minimum percentage is recommended for any services, we request that commenters provide the rationale for that minimum percentage.

At § 441.302(k)(1)(i), we propose to define compensation to include salary, wages, and other remuneration as defined by the Fair Labor Standards Act and implementing regulations (29 U.S.C. 201 *et seq.,* 29 CFR parts 531 and 778), and benefits (such as health and dental benefits, sick leave, and tuition reimbursement). In addition, we propose to define compensation to include the employer share of payroll taxes for direct care workers delivering services under section 1915(c) waivers. We considered whether to include training or other costs in our proposed definition of compensation. However, we determined that a definition that more directly assesses the financial benefits to workers would better ensure that a sufficient portion of the payment for services went to direct care workers, as it is unclear that the cost of training and other workforce activities is an appropriate way to quantify the benefit of those activities for workers. We request comment on whether the definition of compensation should include other specific financial and non-financial forms of compensation for direct care workers.

At § 441.302(k)(1)(ii), we propose to define direct care workers to include workers who provide nursing services, assist with activities of daily living (such as mobility, personal hygiene, eating) or instrumental activities of daily living (such as cooking, grocery shopping, managing finances), and provide behavioral supports, employment supports, or other services to promote community integration. Specifically, we propose to define direct care workers to include nurses (registered nurses, licensed practical nurses, nurse practitioners, or clinical nurse specialists) who provide nursing services to Medicaid-eligible individuals receiving HCBS, licensed or certified nursing assistants, direct support professionals, personal care attendants, home health aides, and other individuals who are paid to directly provide services to Medicaid beneficiaries receiving HCBS to address activities of daily living or instrumental activities of daily living, behavioral supports, employment supports, or other services to promote community integration. We further identify that our definition of direct care worker is intended to exclude nurses in supervisory or administrative roles who are not directly providing nursing services to people receiving HCBS.

Our definition of direct care worker is intended to broadly define such workers to ensure that the definition appropriately captures the diversity of roles and titles that direct care workers may have. We included workers with professional degrees, such as nurses, in our proposed definition because of the

9817 can be found on *Medicaid.gov* at *https://www.medicaid.gov/medicaid/home-community-based-services/guidance/strengthening-and-investing-home-and-community-based-services-for-medicaid-beneficiaries-american-rescue-plan-act-of-2021-section-9817/index.html.*

[82] Minnesota has established a minimum threshold of 72.5 percent, while Illinois has implemented a minimum threshold of 77 percent, for similar requirements for HCBS as we are proposing. See *https://www.revisor.mn.gov/statutes/cite/256B.85/pdf* and *https://casetext.com/regulation/illinois-administrative-code/title-89-social-services/part-240-community-care-program/subpart-t-financial-reporting/section-2402040-minimum-direct-service-worker-costs-for-in-home-service,* respectively, for more information.

important roles that direct care workers with professional degrees play in the care and services of people receiving HCBS, and because excluding workers with professional degrees may increase the complexity of reporting, and may unfairly punish States, managed care plans, and providers that disproportionately rely on workers with professional degrees in the delivery of HCBS. We also propose to define direct care workers to include: individuals employed by a Medicaid provider, State agency, or third party; contracted with a Medicaid provider, State agency, or third party; or delivering services under a self-directed service model. This proposed definition is in recognition of the varied service delivery models and employment relationships that can exist in HCBS waivers. We request comment on whether there are other specific types of direct care workers that should be included in the definition, and whether any of the types of workers listed should be excluded from the definition of direct care worker.

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. At § 441.302(k)(2), under our authority at section 1902(a)(6) of the Act, we propose to require that States demonstrate that they meet the minimum performance level at § 441.302(k)(3)(i) through new Federal reporting requirements at § 441.311(e). We discuss these reporting requirements in our discussion of proposed § 441.311(e).

At § 441.302(k)(4), we propose to apply these requirements to services delivered under FFS or managed care delivery systems. As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on a FFS basis or by a managed care entity to its enrollees. The requirement for ''consistent administration'' should require consistency between these two modes of service delivery. We accordingly are proposing to specify that a State must ensure compliance with the requirements in § 441.302(k) with respect to HCBS delivered both under FFS and managed care delivery systems.

Similarly, because workforce shortages exist under other HCBS authorities, which include many of the same types of services to address activities of daily living or instrumental activities of daily living as under section 1915(c) waiver authority, we are proposing to incorporate these requirements within the applicable regulatory sections. Specifically, we propose to apply the proposed requirements at § 441.302(k) to section 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi), respectively. Consistent with our proposal for section 1915(c) waivers, we propose these requirements based on our authority under section 1902(a)(30)(A) of the Act to ensure payments to HCBS providers are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available to beneficiaries at least to the extent as to the general population in the same geographic area. We believe the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities. We request comment on the application of payment adequacy provisions across section 1915(i), (j), and (k) authorities. As noted earlier in section II.B.4. of this proposed rule, to accommodate the addition of new language at §§ 441.464(e) and 441.464(f), we are proposing to renumber existing § 441.464(e) as § 441.464(g) and existing § 441.464(f) as § 441.464(h). We request comment on whether we should exempt, from these requirements, services delivered using any self-directed service delivery model under any Medicaid authority.

We considered whether to also apply these proposed payment adequacy requirements to section 1905(a) ''medical assistance'' State plan personal care and home health services. However, we are not proposing that these requirements apply to any 1905(a) State plan services based on State feedback that they do not have the same data collection and reporting capabilities in place for section 1905(a) services as they do for section 1915(c), (i), (j), waiver programs and section 1915(i), (j), and (k) services. Further, the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authorities. We request comment on whether we should apply these requirements to section 1905(a) State plan personal care and home health services.

As noted throughout the HCBS provisions in this preamble, we recognize that many States may need time to implement these requirements, including to amend provider agreements or managed care contracts, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these proposed payment adequacy requirements. We expect that these activities will take longer than similar activities for other HCBS provisions in this proposed rule. Further, we expect that it will take a substantial amount of time for managed care plans and providers to establish the necessary systems, data collection tools, and processes necessary to collect the required information to report to States. As a result, we are proposing at § 441.302(k)(4), to provide States with 4 years to implement these requirements in FFS delivery systems following effective date of the final rule. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and that include HCBS in the MCO's, PIHP's, or PAHP's contract, we are proposing to provide States until the first managed care plan contract rating period that begins on or after 4 years after the effective date of the final rule to implement these requirements. Similar to our rationale in other sections, this proposed timeline reflects feedback from States and other interested parties that it could take 3 to 4 years for States to complete any necessary work to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of the proposals outlined in this section. We also considered the overall burden of the proposed rule as whole in proposing the effective date for the payment adequacy provision. We invite comments on the overall burden associated with implementing this section, whether this timeframe is sufficient, whether we should require a shorter timeframe (such as 3 years) or longer timeframe (such as 5 years) to implement the payment adequacy provisions and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

6. Supporting Documentation Required (§ 441.303(f)(6))

As described in section II.B.7 of this proposed rule, discussing newly proposed reporting requirements, States vary in whether they maintain waiting lists for section 1915(c) waivers, and if a waiting list is maintained, how individuals may join the waiting list. Section 1915(c) of the Act authorizes States to set enrollment limits or caps on the number of individuals served in a waiver, and many States maintain waiting lists of individuals interested in receiving waiver services once a spot becomes available. While some States require individuals to first be determined eligible for waiver services to join the waiting list, other States permit individuals to join a waiting list after an expression of interest in receiving waiver services. This can overestimate the number of people who need Medicaid-covered HCBS because the waiting lists may include individuals who are not eligible for services. According to the Kaiser Family Foundation, over half of people on HCBS waiting lists live in States that do not screen people on waiting lists for eligibility.[83]

We have not previously required States to submit any information on the existence or composition of waiting lists, which has led to gaps in information on the accessibility of HCBS within and across States. Further, feedback obtained during various public engagement activities conducted with States and other interested parties over the past several years about reporting requirements for HCBS, as well as feedback received through the RFI[84] discussed earlier, indicate that there is a need to improve public transparency and processes related to States' HCBS waiting lists. In addition, we have found, over the past several years in particular, that some States are operating waiting lists for their section 1915(c) waiver programs even though they are serving fewer people than their CMS-approved enrollment limit or cap, and States are expected to enroll individuals up to their CMS-approved enrollment limit or cap before imposing a waiting list. However, because we do not routinely collect information on States' use of waiting lists and the number of people on waiting lists, we are unable to determine the extent to which States are operating such ''unauthorized'' waiting lists or to work with States to address these ''unauthorized'' waiting lists.

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. Based on the authority found at section 1902(a)(6) of the Act, we now propose to require information from States on waiting lists to improve public transparency and processes related to States' HCBS waiting lists and ensure that we are able to adequately oversee and monitor States' use of waiting lists in their section 1915(c) waiver programs. To address new proposed requirements at § 441.311(d)(1), described in the next section of the preamble, on State reporting on waiting lists, we propose to amend § 441.303(f)(6) by adding the following sentence to the end of the existing regulatory text: If the State has a limit on the size of the waiver program and maintains a list of individuals who are waiting to enroll in the waiver program, the State must meet the reporting requirements at § 441.311(d)(1).''

7. Reporting Requirements (§§ 441.311, 441.474(c), 441.580(i), and 441.745(a)(1)(vii))

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. As discussed in section II.B.1. of this proposed rule, in 2014, we released guidance for section 1915(c) waiver programs in which we requested States to report on State-developed performance measures across several domains, as part of an overarching HCBS waiver quality strategy. The 2014 guidance established an expectation that States conduct systemic remediation and implement a Quality Improvement Project when they score below 86 percent on any of their performance measures. Under our authority at section 1902(a)(6) of the Act, we are proposing requirements at § 441.311, in combination with other proposed requirements identified throughout this proposed rule, to supersede and fully replace the reporting metrics and the minimum 86 percent performance level expectations for States' performance measures described in the 2014 guidance. We describe the basis and scope of this section in paragraph (a).

The reporting requirements proposed in this proposed rule represent consolidated feedback from States, consumer advocates, managed care plans, providers, and other HCBS interested parties on improving and enhancing section 1915(c) waiver performance to integrate nationally standardized quality measures into the reporting requirements, address gaps in existing reporting requirements related to access and the direct service workforce, strengthen health and welfare and person-centered planning reporting requirements, and eliminate annual performance measure reporting requirements that provide limited useful data for assessing State compliance with statutory and regulatory requirements. We believe that the proposed reporting requirements will allow us to better assess State compliance with the statutory and regulatory requirements for section 1915(c) waiver programs. As indicated at the end of this preamble section, we propose that the following reporting requirements also apply to State plan options authorized under section 1915(i), (j) and (k) of the Act, as well as to both FFS and managed care delivery systems.

a. Compliance Reporting

(1) Incident Management System Assessment

As noted earlier in section II.B.3. of this preamble, there have been notable and high-profile instances of abuse and neglect in recent years that highlight the risks associated with poor quality care and with inadequate oversight of HCBS in Medicaid, despite State efforts to implement statutory and regulatory requirements to protect the health and welfare of individuals receiving section 1915(c) waiver program services, and State adoption of related subregulatory guidance, requirements, and adopting subregulatory guidance. In addition, a July 2019 survey of States that operate section 1915(c) waivers found that:

- Definitions of critical incidents vary across States and, in some cases, within States for different HCBS programs or populations;
- Some States do not use standardized forms for reporting incidents, thereby impeding the consistent collection of information on critical incidents;
- Some States do not have electronic incident management systems, and, among those that do, many use systems

[83] Burns, A., M. O'Malley Watts, M. Ammula. A Look at Waiting lists for Home and Community-Based Services from 2016 to 2021. Kaiser Family Foundation. *https://www.kff.org/47f8e6f/.*

[84] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

with outdated electronic platforms that are not linked with other State systems, leading to the systems operating in silos and the need to consolidate information across disparate systems; and

• Many States cited the lack of communication within and across State agencies, including with investigative agencies, as a barrier to incident resolution.

Based on these findings and reports, as well as feedback obtained during various public engagement activities conducted with interested parties over the past several years to standardize and strengthen health and welfare reporting requirements, we are proposing new requirements for States' incident management systems at § 441.302(a)(6), as discussed in section II.B.3. of this preamble. We believe that these proposed reporting requirements will allow us to better assess State compliance with the requirements at § 441.302(a)(6).

Relying on our authority at section 1902(a)(6) of the Act, at § 441.311(b), we propose to establish new compliance reporting requirements. Specifically, at § 441.311(b)(1)(i), we propose to require that States report every 24 months on the results of an incident management system assessment to demonstrate that they meet the requirements at § 441.302(a)(6) that the State operate and maintain an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents, including that:

• The State define critical incidents to meet the proposed minimum standard definition at § 441.302(a)(6)(i)(A);

• The State have an electronic critical incident system that, at a minimum, enables electronic collection, tracking (including of the status and resolution of investigations), and trending of data on critical incidents as proposed at § 441.302(a)(6)(i)(B);

• The State require that providers report any critical incidents that occur during the delivery of section 1915(c) waiver program services as specified in a waiver participant's person-centered service plan, or are a result of the failure to deliver authorized services, as proposed at § 441.302(a)(6)(i)(C);

• The State use claims data, Medicaid Fraud Control Unit data, and data from other State agencies such as Adult Protective Services or Child Protective Services to the extent permissible under applicable State law to identify critical incidents that are unreported by providers and occur during the delivery of section 1915(c) waiver program services, or as a result of the failure to deliver authorized services, as proposed at § 441.302(a)(6)(i)(D);

• The State share information on reported incidents, the status and resolution of investigations, such as through the use of information sharing agreements, with other entities in the State responsible for investigating critical incidents, if the State refers critical incidents to other entities for investigation, as proposed at § 441.302(a)(6)(i)(E); and

• The State separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation within State-specified timeframes as proposed at § 441.302(a)(6)(i)(F).

Given the risk of preventable and intentional harm to beneficiaries when effective incident management systems are not in place, documented instances of abuse and neglect among people receiving HCBS, and identified shortcomings and weaknesses of States' incident management systems discussed earlier, we believe the requirement for States to report every other year on the results of an incident management system assessment is in the best interest of and necessary for protecting the health and welfare of individuals receiving section 1915(c) waiver program services. In the absence of such a reporting requirement, we are unable to determine whether States have effective systems in place to identify and address incidents of abuse, neglect, exploitation, or other harm during the course of service delivery; ensure that States are protecting the health and welfare of individuals receiving section 1915(c) waiver program services; and safeguard people receiving section 1915(c) waiver program services from preventable or intentional harm.

In proposing an every other year timeframe for reporting, we were attempting to take into account the likely frequency of State changes to policies, procedures, and information systems, while also balancing State reporting burden and the potential risk to beneficiaries if States have incident management systems that are not compliant with the proposed requirements at § 441.302(a)(6). We believe every other year timeframe for reporting is sufficient to detect substantial changes to policies, procedures, and information systems and ensure that we have accurate information on States' incident management systems. We also propose, at § 441.311(b)(1)(ii), to allow States to reduce the frequency of reporting to up to once every 60 months for States with incident management systems that are determined to meet the requirements at proposed § 441.302(a)(6). We expect to provide States with technical assistance on how to meet the requirements at proposed § 441.302(a)(6). We invite comments on whether the timeframe for States to report on the results of the incident management system assessment is sufficient or if we should require reporting more frequently (every year) or less frequently (every 3 years). We also invite comment on whether we should require reporting more frequently (every 3 years or every 4 years) for States that are determined to have an incident management system that meets the requirements at § 441.302(a)(6). If an alternate timeframe is recommended, we request that commenters provide the rationale for that alternate timeframe.

(2) Critical Incidents

As discussed earlier in section II.B.4. of this proposed rule, at § 441.302(a)(6)(i)(A), we propose to require States to define critical incidents at a minimum as verbal, physical, sexual, psychological, or emotional abuse; neglect; exploitation including financial exploitation; misuse or unauthorized use of restrictive interventions or seclusion; a medication error resulting in a telephone call to or a consultation with a poison control center, an emergency department visit, an urgent care visit, a hospitalization, or death; or an unexplained or unanticipated death, including but not limited to a death caused by abuse or neglect.

Based on the same rationale as discussed previously in section II.B.7.a.(1) of this preamble related to the proposed incident management system assessment proposed reporting requirement, at § 441.311(b)(2), relying on our authority under section 1902(a)(6) of the Act, we propose to require that States report annually on the number and percent of critical incidents for which an investigation was initiated within State-specified timeframes; number and percent of critical incidents that are investigated and for which the State determines the resolution within State-specified timeframes; and number and percent of critical incidents requiring corrective action, as determined by the State, for which the required corrective action has been completed within State-specified timeframes. We intend to use the information generated from the proposed reporting requirements at § 441.311(b)(2)(ii) through (iv) to determine if States meet the requirements at § 441.302(a)(6)(ii). Given the risk of harm to beneficiaries when effective incident management

systems are not in place, documented instances of abuse and neglect among people receiving HCBS, and identified shortcomings and weaknesses of States' incident management systems discussed earlier, we believe the proposed requirement at § 441.311(b)(2) for States to report annually on critical incidents is in the best interest of and necessary for protecting the health and welfare of individuals receiving section 1915(c) waiver program services. We invite comments on the timeframe for States to report on the critical incidents, whether we should require reporting less frequently (every 2 years), and if an alternate timeframe is recommended, the rationale for the alternate timeframe.

(3) Person-Centered Planning

Under the authority of section 1902(a)(6) of the Act, we propose at § 441.311(b)(3) to require that States report annually to demonstrate that they meet the requirements at § 441.301(c)(3)(ii). Specifically, at § 441.311(b)(3)(i), we propose to require that States report on the percent of beneficiaries continuously enrolled for at least 365 days for whom a reassessment of functional need was completed within the past 12 months. At § 441.311(b)(3)(ii), we propose to require that States report on the percent of beneficiaries continuously enrolled for at least 365 days who had a service plan updated as a result of a re-assessment of functional need within the past 12 months. These proposed requirements are based on feedback obtained during various interested parties' engagement activities conducted with States and other interested parties over the past several years about the reporting discussed in the 2014 guidance. As discussed in section II.B.7. of this preamble, this feedback has indicated that we should strengthen person-centered planning reporting requirements, and eliminate annual performance measure reporting requirements that provide limited useful data for assessing State compliance with statutory and regulatory requirements. These proposed requirements are also based on feedback received through the RFI[85] discussed earlier about the need to standardize reporting and set minimum standards for HCBS.

As discussed in section II.B.1. of this preamble, we are proposing a revision to the regulatory text so that it is clear that changes to the person-centered service plan are not required if the re-assessment does not indicate a need for changes. As such, for the purpose of the reporting requirement at § 441.311(b)(3)(ii), beneficiaries will be considered to have had a service plan updated as a result of the re-assessment if it is documented that the required re-assessment did not indicate a need for changes.

For both of the metrics at § 441.301(c)(3), we propose to allow States to report on a statistically valid random sample of beneficiaries, rather than for all individuals continuously enrolled in the waiver program for at least 365 days. We invite comments on whether there are other specific compliance metrics related to person-centered planning that we should require States to report, either in place of or in addition to the metrics we proposed. We also invite comments on the timeframe for States to report on the person-centered planning, whether we should require reporting less frequently (every 2 years), and if an alternate timeframe is recommended, the rationale for the alternate timeframe.

(4) Type, Amount, and Cost of Services

As discussed previously in section II.B.4. of this preamble, we propose to amend § 441.302(h) to avoid duplicative or conflicting reporting requirements with the new *Reporting Requirements* section at proposed § 441.311. In particular, at § 441.302(h), we propose to remove paragraphs (1) and (2). At § 441.311(b)(4), we propose to add the language previously at § 441.302(h)(1). In doing so, we are proposing to retain the current requirement that States report on the type, amount, and cost of services and to include the reporting requirement in the new consolidated reporting section at § 441.311.

b. Reporting on the Home and Community-Based Services (HCBS) Quality Measure Set

At § 441.311(c), relying on our authority under section 1902(a)(6) of the Act, we propose to require that States report every other year on the HCBS Quality Measure Set, which is described later in section II.B.8. of the preamble. Specifically, we propose, at § 441.311(c)(1)(i), to require that States report every other year, according to the format and schedule prescribed by the Secretary through the process for developing and updating the HCBS Quality Measure Set described later in section II.B.8. of the preamble, on measures identified in the HCBS Quality Measure Set as mandatory measures for States to report or are identified as measures for which the Secretary will report on behalf of States, and, at § 441.311(c)(1)(ii), to allow States to report on measures in the HCBS Quality Measure Set that are not identified as mandatory, as described later in this section of this proposed rule. We are proposing every other year for State reporting in recognition of the fact that the current, voluntary HCBS Quality Measure Set is heavily comprised of survey-based measures, which are more burdensome, including for beneficiaries who would be the respondents for the surveys, and costlier to implement than other types of quality measures. Further, we believe that requiring reporting every other year, rather than annually, would better allow States to use the data that they report for quality improvement purposes, as it would provide States with sufficient time to implement interventions that would result in meaningful improvement in performance scores from one reporting period to another. We are also proposing this frequency in recognition of the overall burden of the proposed requirements.

As discussed earlier in section II.B.1. of this preamble, section 1902(a)(19) of the Act requires States to provide safeguards to assure that eligibility for Medicaid-covered care and services will be determined and provided in a manner that is consistent with simplification, simplicity of administration, and in the best interest of Medicaid beneficiaries. Because the delivery of high quality services is in the best interest of Medicaid beneficiaries, we propose at § 441.311(c)(1)(iii), under our authority at section 1902(a)(19) of the Act, to require States to establish performance targets, subject to our review and approval, for each of the measures in the HCBS Quality Measure Set that are identified as mandatory for States to report or are identified as measures for which we will report on behalf of States, as well as to describe the quality improvement strategies that they will pursue to achieve the performance targets for those measures.[86] We welcome comments on whether there should be a threshold of compliance that would exempt the State from developing improvement strategies, and if so, what that threshold should be.

At § 441.311(c)(1)(iv), we propose to allow States to establish State performance targets for other measures in the HCBS Quality Measure Set that are not identified as mandatory for States to report or as measures for which

[85] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

[86] We note that compliance with CMS regulations and reporting requirements does not imply that a State has complied with the integration mandate of Title II of the ADA, as interpreted by the Supreme Court in the Olmstead Decision.

the Secretary will report on behalf of States as well as to describe the quality improvement strategies that they will pursue to achieve the performance targets for those targets.

At § 441.311(c)(2), we propose to report, on behalf of the States, on a subset of measures in the HCBS Quality Measure Set that are identified as measures for which we will report on behalf of States. Further, at § 441.311(c)(3), we propose to allow, but not require, States to report on measures that are not yet required but will be, and on populations for whom reporting is not yet required but will be phased-in in the future.

We invite comments on whether the timeframe for States to report on the measures in HCBS Quality Measure Set is sufficient, whether we should require reporting more frequently (every year) or less frequently (every 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe. We welcome comments on any additional changes we should consider in this section.

c. Access Reporting

As noted earlier in section II.B.6. of this preamble, feedback obtained during various public engagement activities conducted with States and other interested parties over the past several years about reporting requirements for HCBS, as well as feedback received through the RFI[87] discussed earlier, indicate that there is a need to improve public transparency and processes related to States' HCBS waiting lists and for standardized reporting on HCBS access, including timeliness of HCBS and the comparability to services received to eligibility for services.

At § 441.311(d)(1)(i), relying on our authority under section 1902(a)(6) of the Act, we propose to require that States provide a description annually on how they maintain the list of individuals who are waiting to enroll in a section 1915(c) waiver program, if they have a limit on the size of the waiver program and maintain a list of individuals who are waiting to enroll in the waiver program, as described in § 441.303(f)(6). We further propose to require that this description must include, but be not limited to, information on whether the State screens individuals on the waiting list for eligibility for the waiver program, whether the State periodically re-screens individuals on the waiver list for eligibility, and the frequency of re-screening if applicable. We also propose to require States to report, at § 441.311(d)(1)(ii), the number of people on the waiting list, if applicable, and, at § 441.311(d)(1)(iii), the average amount of time that individuals newly enrolled in the waiver program in the past 12 months were on the waiting list, if applicable. We invite comments on whether there are other specific metrics or reporting requirements related to waiting lists that we should require States to report, either in place of or in addition to the requirements we proposed. We also invite comments on the timeframe for States to report on their waiting lists, whether we should require reporting less frequently (every 2 or 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

At § 441.311(d)(2)(i), based on our authority under section 1902(a)(6) of the Act, we propose to require States report annually on the average amount of time from when homemaker services, home health aide services, or personal care services, as listed in § 440.180(b)(2) through (4), are initially approved to when services began, for individuals newly approved to begin receiving services within the past 12 months. We propose to focus on these specific services for this reporting requirement because of feedback from States, consumer advocates, managed care plans, providers, and other HCBS interested parties that timely access to these services is especially challenging and because the failure of States to ensure timely access to these services poses substantial risk to the health, safety, and quality of care of individuals residing independently and in other community-based residences. Having States report this information will assist us in our oversight of State HCBS programs by helping us target our technical assistance and monitoring efforts. We request comment on whether this requirement should apply to additional services authorized under section 1915(c) of the Act.

For this metric, we propose to allow States to report on a statistically valid random sample of individuals newly approved to begin receiving these services within the past 12 months, rather than for all individuals newly approved to begin receiving these services within the past 12 months. We invite comments on the timeframe for States to report on this metric, whether we should require reporting less frequently (every 2 or 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe. We also invite comments on whether there are other specific metrics related to the amount of time that it takes for eligible individuals to begin receiving homemaker services, home health aide services, or personal care services that we should require States to report, either in place of or in addition to the metric we proposed.

At § 441.311(d)(2)(ii), also based on our authority under section 1902(a)(6) of the Act, we propose to require States to report annually on the percent of authorized hours for homemaker services, home health aide services, or personal care services, as listed in § 440.180(b)(2) through (4), that are provided within the past 12 months. For this metric, we further propose to allow States to report on a statistically valid random sample of individuals authorized to receive these services within the past 12 months, rather than all individuals authorized to receive these services within the past 12 months. We invite comments on the timeframe for States to report on this metric, whether we should require reporting less frequently (every 2 or 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe. We also invite comments on whether there are other specific metrics related to individuals' use of authorized homemaker services, home health aide services, or personal care services that we should require States to report, either in place of or in addition to the metric we proposed. We further request comment on whether this requirement should apply to additional services authorized under section 1915(c) of the Act.

d. Payment Adequacy

At § 441.311(e), we propose new reporting requirements for section 1915(c) waivers, under our authority at section 1902(a)(6) of the Act, for States to demonstrate that they meet the proposed *HCBS Payment Adequacy* requirements at § 441.302(k). Specifically, we propose that States report annually on the percent of payments for homemaker, home health aide, and personal care services, as listed at § 440.180(b)(2) through (4), that are spent on compensation for direct care workers. As discussed in section II.B.5. of this preamble, we have focused this requirement on homemaker services, home health aide services, and personal care services because they are services for which we expect that the vast majority of payment should be comprised of compensation for direct care workers and for which there would be low facility or other indirect costs. These are services that would most commonly be conducted in individuals' homes and general community settings.

[87] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see: *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

As such, there should be low facility or other indirect costs associated with the services.

We considered whether the proposed reporting requirements at § 441.311(e) related to the percent of payments going to the direct care workforce should apply to other services, such as adult day health, habilitation, day treatment or other partial hospitalization services, psychosocial rehabilitation services and clinic services for individuals with chronic mental illness. As discussed in section II.B.5. of this preamble, these services may have facility or other indirect costs for which we do not have adequate information to determine a minimum percent of the payment that should be spent on compensation for the direct care workforce and, as a result, we are not proposing to apply *HCBS Payment Adequacy* requirements at § 441.302(k) to services other than homemaker, home health aide, and personal care services, as listed at § 440.180(b)(2) through (4). However, we are requesting comment on whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to other services listed at § 440.180(b). In particular, we are requesting comment on whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to residential habilitation services, day habilitation services, and home-based habilitation services. As a result, we are also requesting comment whether States should be required to report annually on the percent of payments for other services listed at § 440.180(b) that are spent on compensation for direct care workers and, in particular, on the percent of payments for residential habilitation services, day habilitation services, and home-based habilitation services that are spent on compensation for direct care workers.

We further propose that States separately report for each service subject to the reporting requirement and, within each service, separately report on payments for services that are self-directed. We considered whether other reporting requirements such as a State assurance or attestation or an alternative frequency of reporting could be used to determine State compliance with the requirement at § 441.302(k) and decided that the proposed requirement would be most effective to demonstrate State compliance. We request comment on whether we should allow States to provide an assurance or attestation, subject to audit, that they meet the requirement in place of reporting on the percent of payments, and whether we should reduce the frequency of reporting to every other year.

The intent of this proposed requirement is for States to report in the aggregate for each service across all of their services across all programs as opposed to separately report for each waiver or HCBS program. As an alternative, we considered whether to require reporting at the delivery system, HCBS waiver program, or population level. However, we are not proposing to require additional levels of reporting because we expect that it would increase reporting burden for States without providing us with additional information necessary for determining whether States meet the requirements at § 441.302(k). We request comment on whether we should require States to report on the percent of payments for certain HCBS that are spent on compensation for direct care workers at the delivery system, HCBS waiver program, or population level. In addition, we considered whether to require States to report on median hourly wage and on compensation by category, including salary, wages, and other remuneration; benefits; and payroll taxes. We believe that such information would be valuable for better monitoring workforce compensation and its impact on workforce shortages and turnover and access to services for Medicaid beneficiaries. While such information should be readily accessible for providers, we have not proposed requiring these types of reporting, as collecting and aggregating such information would increase State burden. We request comment on whether we should require States to report on median hourly wage and on compensation by category. We considered whether to allow States, at their option, to exclude, from their reporting to CMS but not from the proposed requirement at § 441.302(k) related to the percent of payments that are spent on compensation for direct care workers, payments to providers of agency-directed services that have low Medicaid revenues or serve a small number of Medicaid beneficiaries, based on Medicaid revenues for the service, number of direct care workers serving Medicaid beneficiaries, or the number of Medicaid beneficiaries receiving the service. We considered this option as a way to reduce State, managed care plan, and provider data collection and reporting burden based on the experience of States that have implemented similar reporting requirements. However, we are concerned that such an option could discourage providers from serving Medicaid beneficiaries or increasing the number of Medicaid beneficiaries or amount of Medicaid revenues. We request comment on whether we should allow States the option to exclude, from their reporting to CMS, payments to providers of agency directed services that have low Medicaid revenues or serve a small number of Medicaid beneficiaries, based on Medicaid revenues for the service, number of direct care workers serving Medicaid beneficiaries, or the number of Medicaid beneficiaries receiving the service.

We also request comment on whether we should establish a specific limit on this exclusion and, if so, the specific limit we should establish, such as to limit the exclusion to providers in the lowest 5th, 10th, 15th, or 20th percentile of providers in terms Medicaid revenues for the service, number of Medicaid beneficiaries served, or number of direct care workers serving Medicaid beneficiaries.

We also considered whether to allow States to exclude payments for self-directed services from this reporting requirement, based on feedback obtained during various interested parties' engagement activities conducted with States and other interested parties over the past several years related to HCBS workforce shortages that indicate that compensation for direct care workers in self-directed models tends to be higher and may comprise a higher percentage of the payments for services than other HCBS, and that administrative costs account for a small percentage of the cost of self-directed services. However, we have decided that payments for self-directed services by States should be included in these reporting requirements. This decision not to exclude them was based on the importance of ensuring a sufficient direct care workforce for self-directed services, the experience of States that have applied similar requirements to report on the percent of payments for to self-directed services that are spent on compensation for direct care workers, and the lack of conclusive data indicating that compensation for direct care workers meets or exceeds the proposed 80 percent threshold. We request comment on whether we should allow States to exclude payments for self-directed services from these reporting requirements.

e. Effective Date

We recognize that many States may need time to implement these reporting requirements, including to amend provider agreements or managed care contracts, make State regulatory or

policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these requirements. As a result, we are proposing at § 441.311(f)(1) to provide States with 3 years to implement the compliance reporting requirements at § 441.311(b), the HCBS Quality Measure Set reporting requirements at § 441.311(c), and the access reporting requirements at § 441.311(d) in FFS delivery systems following the effective date of the final rule. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and that include HCBS in the MCO's, PIHP's, or PAHP's contract, we are proposing to provide States until the first managed care plan contract rating period that begins on or after 3 years after the effective date of the final rule to implement these requirements. This time period is based on feedback from States and other interested parties that it could take 2 to 3 years to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of these proposed reporting requirements. We also have considered all of the HCBS proposals outlined in this proposed rule as whole. We invite comments on whether this timeframe is sufficient, whether we should require a shorter timeframe (2 years) or longer timeframe (4 years) to implement these provisions, and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

In addition, we are proposing at § 441.311(f)(2) to provide States with 4 years to implement the payment adequacy reporting requirements at § 441.311(e) in FFS delivery systems following the effective date of the final rule. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and that include HCBS in the MCO's, PIHP's, or PAHP's contract, we are proposing to provide States until the first managed care plan contract rating period that begins on or after 4 years after the effective date of the final rule to implement these requirements. This time period is intended to align with the effective date for the HCBS payment adequacy requirements at § 441.302(k), which are discussed in section II.B.5. of this preamble. It is also based on feedback from States and other interested parties that it could take 3 to 4 years to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of these reporting requirements. We also have considered all of the HCBS proposals outlined in this proposed rule as whole. We invite comments on whether this timeframe is sufficient, whether we should require a shorter timeframe (3 years) or longer timeframe (5 years) to implement these provisions, and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

At § 441.311(f), we propose to apply all of the reporting requirements described in § 441.311 to services delivered under FFS and managed care delivery systems. As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs, and as noted in the Medicaid context this would include consistent administration between FFS and managed care programs. We accordingly are proposing to specify that a State must ensure compliance with the requirements in § 441.302(a)(6) with respect to HCBS delivered both under FFS and managed care delivery systems.

As discussed earlier in section II.B.1. of this preamble, the proposed requirements at § 441.311, in combination with other proposed requirements identified throughout this proposed rule, are intended to supersede and fully replace the reporting expectations and the minimum 86 percent performance level for State's performance measures described in the 2014 guidance, also discussed earlier in section II.B.1. of this preamble. We expect that States may implement some of the requirements proposed in this proposed rule in advance of any effective date. If the rule is finalized, we will work with States to phase out the 2014 guidance as they implement the requirements in the future final rule to reduce unnecessary burden and to avoid duplicative or conflicting reporting requirements.

In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act for States to achieve a more consistent administration of policies and procedures across HCBS programs, and because these reporting requirements are relevant to other HCBS authorities, we are proposing to incorporate these requirements within the applicable regulatory sections for other HCBS authorities. Specifically, we propose to apply the requirements at § 441.311 to section 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.474(c), 441.580(i), and 441.745(a)(1)(vii), respectively. Consistent with our proposal for section 1915(c) waivers, we propose these requirements based on our authority under section 1902(a)(6) of the Act, which requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. We believe the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities. We request comment on the application of these provisions across section 1915(i), (j), and (k) authorities. To accommodate the addition of new language at § 441.580(i), we are proposing to renumber existing § 441.580(i) as § 441.580(j).

We considered whether to also apply these reporting requirements to section 1905(a) ''medical assistance'' State plan personal care, home health, and case management services. However, we are not proposing that these requirements apply to any section 1905(a) State plan services based on State feedback that they do not have the same data collection and reporting capabilities in place for section 1905(a) services as they do for sections 1915(c), (i), (j), and (k) services and because the person-centered planning, service plan, and waiting list requirements that comprise a significant portion of these reporting requirements have little to no relevance for section 1905(a) services, in comparison to section 1915(c), (i), (j), and (k) services. Further, the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authority. We request comment on whether we should establish similar reporting requirements for section 1905(a) ''medical assistance'' State plan personal care, home health, and case management services.

We expect that, should we finalize these reporting requirements, we will establish new processes and forms for States to meet the reporting requirements, provide additional technical information on how States can meet the reporting requirements including related to sampling requirements (where States are

permitted to report on a sample of beneficiaries rather than on all individuals who meet the inclusion criteria for the reporting requirement), and amend existing templates and establish new templates under the Paperwork Reduction Act.

8. Home and Community-Based Services (HCBS) Quality Measure Set (§§ 441.312, 441.474(c), 441.585(d), and 441.745(b)(1)(v)

On July 21, 2022, we issued State Medicaid Director Letter # 22–003 [88] to release the first official version of the HCBS Quality Measure Set. The HCBS Quality Measure Set is a set of nationally standardized quality measures for Medicaid-covered HCBS. It is intended to promote more common and consistent use within and across States of nationally standardized quality measures in HCBS programs, create opportunities for CMS and States to have comparative quality data on HCBS programs, drive improvement in quality of care and outcomes for people receiving HCBS, and support States' efforts to promote equity in their HCBS programs. It is also intended to reduce some of the burden that States and other interested parties may experience in identifying and using HCBS quality measures. By providing States and other interested parties with a set of nationally standardized measures to assess HCBS quality and outcomes and by facilitating access to information on those measures, we believe that we can reduce the time and resources that States and other interested parties expend on identifying, assessing, and implementing measures for use in HCBS programs.

Section 1102(a) of the Act provides the Secretary of HHS with authority to make and publish rules and regulations that are necessary for the efficient administration of the Medicaid program. Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. Under our authority at sections 1102(a) and 1902(a)(6) of the Act, we are proposing to add a new section, at § 441.312, *Home and Community-Based Services Quality Measure Set,* to require use of the measure set in 1915(c) waiver programs and promote public transparency related to the administration of Medicaid-covered HCBS. We describe the basis and scope of this section in proposed paragraph (a).

We believe that quality is a critical component of efficiency, and as such, having a standardized set of measures that is used to assess the quality of Medicaid HCBS programs supports the efficient operation of the Medicaid program. Further, we believe that this proposal is necessary for the efficient administration of Medicaid-covered HCBS authorized under section 1915(c) of the Act, consistent with section 1902(a)(4) of the Act, as it would establish a process through which we would regularly update and maintain the required set of measures at § 441.311(c) in consultation with States and other interested parties (as described later in this section of the preamble). This process would ensure that the priorities of interested parties are reflected in the selection of the measures included in the HCBS Quality Measure Set. This process would also ensure that the required set of HCBS quality measures is updated to address gaps in the HCBS Quality Measure Set as new measures are developed and to remove measures that are less relevant or add less value than other available measures, and that it meets scientific and other standards for quality measures. Due to the constantly evolving field of HCBS quality measurement, we believe that the failure to establish such a process would result in ongoing reporting by States of measures that do not reflect the priorities of interested parties, measures that offer limited value compared to other measures, and measures that do not meet strong scientific and other standards. It would also result in a lack of reporting on key measurement priority areas, which could be addressed by updating the HCBS Quality Measure Set as new measures are developed. The failure to establish such a process would lead to inefficiency in States' HCBS quality measurement activities through the continued reporting on an outdated set of measures. In other words, we believe that such a process is necessary for the efficient administration of Medicaid-covered HCBS by ensuring that quality measure reporting requirements are focused on the most valuable, useful, and scientifically supported areas of quality measurement, and that quality measures with limited value are removed timely from quality measure reporting requirements.

We propose a definition at § 441.312(b)(1) for ''Attribution rules,'' to mean the process States use to assign beneficiaries to a specific health care program or delivery system for the purpose of calculating the measures on the ''HCBS Quality Measure Set'' as described in proposed § 441.312(d)(6), and at § 441.312(b)(2) for ''Home and Community-Based Services Quality Measure Set'' to mean the Home and Community-Based Measures for Medicaid established and updated at least every other year by the Secretary through a process that allows for public input and comments, including through the **Federal Register**.

At § 441.312(c), we describe the general process that the Secretary will follow to update and maintain the HCBS Quality Measure Set. Specifically, at § 441.312(c)(1), we propose that the Secretary will identify and update at least every other year, through a process that allows for public input and comment, the quality measures to be included in the HCBS Quality Measure Set. At § 441.312(c)(2), we propose that the Secretary will solicit comment at least every other year with States and other interested parties, which are identified later in this section of the preamble, to:

- Establish priorities for the development and advancement of the HCBS Quality Measure Set.
- Identify newly developed or other measures which should be added including to address gaps in the measures included in the HCBS Quality Measure Set.
- Identify measures which should be removed as they no longer strengthen the HCBS Quality Measure Set.
- Ensure that all measures included in the HCBS Quality Measure Set are evidence-based, are meaningful for States, and are feasible for State-level and program-level reporting as appropriate.

The proposed frequency for updating the quality measures included in the HCBS Quality Measure Set is aligned with the proposed frequency at § 441.311(c)(1)(i) for States' reporting of the measures in the HCBS Quality Measure Set. We have based other aspects of the process that the Secretary will follow to update and maintain the HCBS Quality Measure Set in part on the proposed processes for the Secretary to update and maintain the Child, Adult, and Health Home Core Sets as described in the Medicaid Program and CHIP; Mandatory Medicaid and

[88] CMS State Medicaid Director Letter. SMD# 22–003 Home and Community-Based Services Quality Measure Set. July 2022. Accessed at *https://www.medicaid.gov/federal-policy-guidance/downloads/smd22003.pdf.*

Children's Health Insurance Program (CHIP) Core Set Reporting proposed rule (87 FR 51303); (hereinafter the ''Mandatory Medicaid and CHIP Core Set Reporting proposed rule''). We believe that such alignment in processes will ensure consistency and promote efficiency for both CMS and States across Medicaid quality measurement and reporting activities.

At § 441.312(c)(3), we propose that the Secretary will, in consultation with States and other interested parties (as described later in this section of preamble), develop and update the measures in the HCBS Quality Measure Set, at least every other year, through a process that allows for public input and comment. We invite comments on whether the timeframes for updating the measures in the HCBS Quality Measure Set and conducting the process for developing and updating the HCBS Quality Measure Set is sufficient, whether we should conduct these activities more frequently (every year) or less frequently (every 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

At § 441.312(d), we describe the proposed process for developing and updating the HCBS Quality Measure Set. Specifically, we propose that the Secretary will address the following through the proposed process:

- Identify all measures in the HCBS Quality Measure Set, including newly added measures, measures that have been removed, mandatory measures, measures that the Secretary will report on States' behalf, measures that States can elect to have the Secretary report on their behalf, as well as the measures that the Secretary will provide States with additional time to report and the amount of additional time.
- Inform States how to collect and calculate data on the measures.
- Provide a standardized format and reporting schedule for reporting the measures.
- Provide procedures that States must follow in reporting the measure data.
- Identify specific populations for which States must report the measures, including people enrolled in a specific delivery system type, people who are dually eligible for Medicare and Medicaid, older adults, people with physical disabilities, people with intellectual or developmental disabilities, people who have serious mental illness, and people who have other health conditions; and provide attribution rules for determining how States must report on measures for beneficiaries who are included in more than one population.
- Identify the subset of measures that must be stratified by race, ethnicity, Tribal status, sex, age, rural/urban status, disability, language, or such other factors as may be specified by the Secretary.
- Describe how to establish State performance targets for each of the measures.

We anticipate that, for State reporting on the measures in the HCBS Quality Measure Set, as outlined in § 441.311, the technical information on attribution rules described at proposed § 441.312(d)(6), would call for inclusion in quality reporting based on a beneficiary's continuous enrollment in the Medicaid waiver. This would ensure the State has enough time to furnish services during the measurement period. In the technical information, we anticipate we would set attribution rules to address transitions in Medicaid eligibility, enrollment in Medicare, or transitions between different delivery systems or managed care plans, within a reporting year, for example, based on the length of time beneficiaries was enrolled in each. We invite comment on other considerations we should address in the attribution rules or other topics we should address in the technical information.

At § 441.312(e), we propose, in the process for developing and updating the Home and Community-Based Services Quality Measure Set described at proposed § 441.312(d), that the Secretary consider the complexity of State reporting and allow for the phase-in over a specified period of time of mandatory State reporting for some measures and of reporting for certain populations, such as older adults or people with intellectual and disabilities. At § 441.312(f), we propose that, in specifying the measures and the factors by which States must report stratified measures, the Secretary will consider whether such stratified sampling can be accomplished based on valid statistical methods, without risking a violation of beneficiary privacy, and, for measures obtained from surveys, whether the original survey instrument collects the variables or factors necessary to stratify the measures. This proposed stratification of data for the measures contained in the HCBS Quality Measure Set is consistent with our statutory authority under section 1902(a)(6) of the Act, which requires States to report information ''in such form and containing such information'' as the Secretary requires.

Stratified sampling is a method of sampling from a population, in which the sampling can be partitioned into sub-populations, such as by race, ethnicity, sex, age, rural/urban status, disability, language, or such other factors. Stratified data would enable us and States to identify the health and quality of life outcomes of underserved populations and potential differences in outcomes based on race, ethnicity, sex, age, rural/urban status, disability, language, or such factors on measures contained in the HCBS Quality Measure Set. Measuring health disparities, reporting these results, and driving improvements in quality are cornerstones of the CMS approach to advancing health equity. Advancing equity for underserved populations through data reporting and stratification aligns with E.O. 13985.[89] In line with the policy objective of E.O. 13985, CMS defines health equity as ''the attainment of the highest level of health for all people, where everyone has a fair and just opportunity to attain their optimal health regardless of race, ethnicity, disability, sexual orientation, gender identity, socioeconomic status, geography, preferred language, or other factors that affect access to care and health outcomes.'' [90] We are working to advance health equity by designing, implementing, and operationalizing policies and programs that support health for all the people served by our programs, eliminating avoidable differences in health and quality of life outcomes experienced by people who are disadvantaged or underserved, and providing the care and support that all individuals need to thrive.

We considered giving States the flexibility to choose which measures they would stratify and by what factors. However, as discussed in the Mandatory Medicaid and CHIP Core Set Reporting rule (87 FR 51313), consistent measurement of differences in health and quality of life outcomes between different groups of beneficiaries is essential to identifying areas for intervention and evaluation of those interventions.[91] This consistency could

[87] Exec. Order No. 13985 (2021), Accessed at *https://www.whitehouse.gov/briefing-room/presidential-actions/2021/01/20/executive-order-advancing-racial-equity-and-support-for-underserved-communities-through-the-federal-government/*.

[90] CMS definition of health equity. Accessed at *https://www.cms.gov/pillar/health-equity*.

[91] Schlotthauer AE, Badler A, Cook SC, Perez DJ, Chin MH. Evaluating Interventions to Reduce Health Care Disparities: An RWJF Program. Health Aff (Millwood). 2008;27(2):568–573.

not be achieved if each State made its own decisions about which data it would stratify and by what factors.[92] [93]

We recognize that States may be constrained in their ability to stratify measures in the HCBS Quality Measure Set and that data stratification would require additional State resources. There are several challenges to stratification of measure reporting. First, the validity of stratification is threatened when the demographic data are incomplete. Complete demographic information is often unavailable to us and to States due to several factors, including the fact that Medicaid applicants and beneficiaries are not required to provide race and ethnicity data. Second, when States with smaller populations and less diversity stratify data, it may be possible to identify individual data, raising privacy concerns. Therefore, if the sample sizes are too small, the data would be suppressed, in accordance with the CMS Cell Size Suppression Policy and the data suppression policies for associated measure stewards and therefore not publicly reported to avoid a potential violation of privacy.[94]

We also may face constraints in stratifying measures for which we are able to report on behalf of States, as our ability to stratify will be dependent on whether the original dataset or survey instrument: (1) collects the demographic information or other variables needed and (2) has a large enough sample size. The Transformed Medicaid Statistical Information System (T–MSIS), for example, currently has the capability to stratify some HCBS Quality Measure Set measures by sex and urban/rural status, but not by race, ethnicity, or disability status. This is because applicants provide information on sex and urban/rural address, which is reported to T–MSIS by States, whereas applicants are not required to provide information on their race and ethnicity or disability status, and often do not do so. However, we have developed the capacity to impute race and ethnicity using a version of the Bayesian Improved Surname Geocoding (BISG) method [95] that includes Medicaid-specific enhancements to optimize accuracy, and are able to stratify by race and ethnicity, urban/rural status, and sex.

The method proposed for this project utilizes State-submitted race/ethnicity data when it is complete and accurate as based on the Medicaid DQ Atlas assessment for a given year.[96] When State-submitted data is missing or inaccurate, imputed results are used to ensure statistical accuracy. Because imputations are only used when self-reported data is missing or States have systematic errors in reporting race and/or ethnicity, millions of self-reported datapoints are preserved and model accuracy is improved. This also reflects that, as the quality of State-submitted data improves, the imputations will be used less frequently. We will release detailed documentation about the methodology used to develop the imputations prior to the release of these results. While complete demographic information for beneficiaries would always be preferable to using imputed model values, reliable techniques to impute values is a substitute to enable identification and analysis of health disparities.

With these challenges in mind, we propose that stratification by States in reporting of HCBS Quality Measure Set data would be implemented through a phased-in approach in which the Secretary would specify which measures and by which factors States must stratify reported measures. In proposed § 441.312(f), States would be required to provide stratified data for 25 percent of the measures in the HCBS Quality Measure Set for which the Secretary has specified that reporting should be stratified by 3 years after the effective date of these regulations, 50 percent of such measures by 5 years after the effective date of these regulations, and 100 percent of measures by 7 years after the effective date of these regulations. We note that the percentages listed here align with the proposed phase-in of equity reporting in the Mandatory Medicaid and CHIP Core Set Reporting proposed rule, although the proposed deadlines for each compliance level would be longer here (87 FR 51314). However, the timeframe associated with each percentage is different from what was proposed in that rule. Specifically, that proposed rule would require States to provide stratified data for 25 percent of measures within 2 years after the effective date of the final rule, 50 percent of measures within 3 years after the effective date of the final rule, and 100 percent of measures within 5 years after the effective date of the final rule.

We propose a slower phase-in for stratification for the measures in the HCBS Quality Measure Set because the HCBS Quality Measure Set was only first released for voluntary use by States in July 2022, while Child, Adult, and Health Home Core Sets voluntary reporting has been in place for a number of years. Further, a substantial portion of the measures included in the HCBS Quality Measure Set, particularly compared to the Child, Adult, and Health Home Core Sets, are derived from beneficiary experience of care surveys, which are costlier to implement than other types of measures. In addition, the slower phase-in is also intended to take into consideration the overall burden of the reporting requirements in this proposed rule.

We have determined that this proposed phased-in approach to data stratification would be reasonable and minimally burdensome, and thus consistent with E.O. 13985 on Advancing Racial Equity and Support for Underserved Communities Through the Federal Government (January 20, 2021),[97] because we are balancing the importance of being able to identify differences in outcomes between populations under these measures with the potential operational challenges that States may face in implementing these proposed requirements.

We recognize that States may need to make enhancements to their data and information systems or incur other costs in implementing the HCBS Quality Measure Set. We remind States that enhanced FFP is available at a 90 percent match rate for the design, development, or installation of improvements of mechanized claims

processing and information retrieval systems, in accordance with applicable Federal requirements.[98] Enhanced FFP at a 75 percent match rate is also available for operations of such systems, in accordance with applicable Federal requirements.[99] Receipt of these enhanced funds is conditioned upon States meeting a series of standards and conditions to ensure investments are efficient and effective.[100] States are also encouraged to advance the interoperable exchange of HCBS data and support quality improvement activities by adopting standards in 45 CFR part 170 and other relevant standards identified in the ISA.[101]

We solicit comments on the proposed schedule for phasing in reporting of HCBS Quality Measure Set data. We also seek comment on whether we should phase-in reporting on all of the measures in the HCBS Quality Measure Set.

At § 441.312(g), we propose the list of interested parties with whom the Secretary must consult to specify and update the quality measures established in the HCBS Quality Measure Set. The proposed list of interested parties includes: State Medicaid Agencies and agencies that administer Medicaid-covered HCBS; health care and HCBS professionals who specialize in the care and treatment of older adults, children and adults with disabilities, and individuals with complex medical needs; health care and HCBS professionals, providers, and direct care workers who provide services to older adults, children and adults with disabilities and complex medical and behavioral health care needs who live in urban and rural areas or who are members of groups at increased risk for poor outcomes; HCBS providers; direct care workers and organizations representing direct care workers; consumers and national organizations representing consumers; organizations and individuals with expertise in HCBS quality measurement; voluntary consensus standards setting organizations and other organizations involved in the advancement of evidence-based measures of health care; measure development experts; and other interested parties the Secretary may determine appropriate.

Because these quality measurement requirements are relevant to other HCBS authorities, we are proposing to incorporate these requirements within the applicable regulatory sections for other HCBS authorities. Specifically, we propose to apply the proposed requirements at § 441.312 to section 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.474(c), 441.585(d), and 441.745(b)(1)(v), respectively. Consistent with our proposal for section 1915(c) waivers, we propose these requirements based on our authority under section 1902(a)(6) of the Act, which requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. We believe the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities. We request comment on the application of these provisions across sections 1915(i), (j), and (k) authorities.

9. Website Transparency (§§ 441.313, 441.486, 441.595, and 441.750)

Section 1102(a) of the Act provides the Secretary of HHS with authority to make and publish rules and regulations that are necessary for the efficient administration of the Medicaid program. Under our authority at section 1102(a) of the Act, we are proposing to add a new section, at § 441.313, titled *Website transparency,* to promote public transparency related to the administration of Medicaid-covered HCBS. As noted earlier in section II.B.8. of this preamble, we believe that quality is a critical component of efficiency, as payments for services that are low quality do not produce their desired effects and, as such, are more wasteful than payments for services that are high quality. However, feedback from interested parties during various public engagement activities over the past several years have indicated that it is difficult to find information on HCBS access, quality, and outcomes in many States. As a result, it is not possible for beneficiaries, consumer advocates, oversight entities, or other interested parties to hold States accountable for ensuring that services are accessible and high quality for people who need Medicaid HCBS. As a result, we believe that the proposal described immediately below supports the efficient administration of Medicaid-covered HCBS authorized under section 1915(c) of the Act by promoting public transparency and accountability of the quality and performance of Medicaid HCBS systems, as the availability of such information will improve the ability of interested parties to hold States accountable for the quality and performance of their HCBS systems.

Specifically, at § 441.313(a), we propose to require States to operate a website that meets the availability and accessibility requirements at § 435.905(b) of this chapter and that provides the results of the reporting requirements under newly proposed § 441.311 (specifically, incident management, critical incident, person centered planning, and service provision compliance data; data on the HCBS Quality Measure Set; access data; and payment adequacy data). We request comment on whether the requirements at § 435.905(b) are sufficient to ensure the availability and the accessibility of the information for people receiving HCBS and other HCBS interested parties and for specific requirements to ensure the availability and accessibility of the information.

At § 441.313(a)(1), we propose to require that the data and information that States are required to report under § 441.311 be provided on one web page, either directly or by linking to the web pages of the managed care organization, prepaid ambulatory health plan, prepaid inpatient health plan, or primary care case management entity that is authorized to provide services. We request comment on whether States should be permitted to link to web pages of these managed care entities and whether we should limit the number of separate web pages that a State could link to, in place of directly reporting the information on its own web page.

At § 441.313(a)(2), we propose to require that the web page include clear and easy to understand labels on documents and links. We request comment on whether these requirements are sufficient to ensure the accessibility of the information for people receiving HCBS and other HCBS interested parties and for specific requirements to ensure the accessibility of the information.

At § 441.313(a)(3), we propose to require that States verify the accurate function of the website and the timeliness of the information and links

[98] See section 1903(a)(3)(A)(i) of the Act and § 433.15(b)(3), 80 FR 75817 through 75843; *https://www.medicaid.gov/state-resourcecenter/faq-medicaid-and-chip-affordable-care-act-implementation/downloads/affordable-care-act-faq-enhancedfunding-for-medicaid.pdf; https://www.medicaid.gov/federal-policy-guidance/downloads/SMD16004.pdf.*

[99] See section 1903(a)(3)(B) and § 433.15(b)(4).

[100] See § 433.112 (b, 80 FR 75841; *https://www.ecfr.gov/current/title-42/chapter-IV/subchapter-C/part-433/subpart-C.*

[101] Relevant standards adopted by HHS and identified in the ISA include the USCDI (*https://www.healthit.gov/isa/united-states-core-data-interoperability-uscdi*), eLTSS (*https://www.healthit.gov/isa/documenting-care-plans-person-centered-services), and Functional Assessment Standardized Items (https://www.healthit.gov/isa/representing-patient-functional-status-andor-disability*).

at least quarterly. We request comment on whether this timeframe is sufficient or if we should require a shorter timeframe (monthly) or a longer timeframe (semi-annually or annually).

At § 441.313(a)(4), we propose to require that States include prominent language on the website explaining that assistance in accessing the required information on the website is available at no cost and include information on the availability of oral interpretation in all languages and written translation available in each non-English language, how to request auxiliary aids and services, and a toll-free and TTY/TDY telephone number.

We are also proposing at § 441.313(b) that CMS must report on its CMS website the information reported by States to us under § 441.311. For example, we envision that we will update CMS's website to provide HCBS comparative information reported by States that can be compared to HCBS information shared by other States. We also envision using data from State reporting in future iterations of the CMS Medicaid and CHIP Scorecard.[102]

We are proposing at § 441.313(c), to provide States with 3 years to implement these requirements in FFS delivery systems following effective date of the final rule. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or section 1115(a) of the Act and that include HCBS in the MCO's, PIHP's, or PAHP's contract, we are proposing to provide States until the first managed care plan contract rating period that begins on or after 3 years after the effective date of the final rule to implement these requirements. This time period is based primarily on the effective date for State reporting at § 441.311. We also have considered all of the HCBS proposals outlined in the proposed rule as whole. We invite comments on whether this timeframe is sufficient, whether we should require a longer timeframe (4 years) to implement these provisions, and if a longer timeframe is recommended, the rationale for that longer timeframe.

As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on a FFS basis or by a managed care entity to its enrollees. The requirement for ''consistent administration'' should require consistency between these two modes of service delivery. We accordingly are proposing to specify that a State must ensure compliance with the requirements in § 441.313, with respect to HCBS delivered both under FFS and managed care delivery systems.

Similarly, because we are proposing to apply the reporting requirements at § 441.311 to other HCBS State plan options, we are proposing to incorporate these website transparency requirements within the applicable regulatory sections. Specifically, we propose to apply the proposed requirements of § 441.313 to section 1915(j), (k), and (i) State plan services by cross-referencing at §§ 441.486, 441.595, and 441.750, respectively. Consistent with our proposal for section 1915(c) waivers, we propose these requirements based on our authority under section 1102(a) of the Act to make and publish rules and regulations that are necessary for the efficient administration of the Medicaid program. We believe the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities. We request comment on the application of these provisions across section 1915(i), (j), and (k) authorities.

10. Applicability of Proposed Requirements to Managed Care Delivery Systems

As discussed earlier in sections II.B.1., II.B.4., II.B.5., II.B.7., and II.J. of this rule, we are proposing to apply the requirements at §§ 441.301(c)(3), 441.302(a)(6), 441.302(k), 441.311, and 441.313 to both FFS and managed care delivery systems. Although the proposed provisions at §§ 441.301(c)(3), 441.302(a)(6) and (k), 441.311, and 441.313 would apply to LTSS programs that use a managed care delivery system to deliver services authorized under section 1915(c) waivers and section 1915(i), (j), and (k) State plan authorities, we believe incorporating a reference in 42 CFR part 438 would be helpful to States and managed care plans. Therefore, we propose to add a cross reference to the requirements in proposed § 438.72 to be explicit that States that include HCBS in their MCO, PIHP, or PAHP contracts would have to comply with the requirements at §§ 441.301(c)(1) through (3), 441.302(a)(6) and (k), 441.311, and 441.313. We believe this would make the obligations of States that implement LTSS programs through a managed care delivery system clear, consistent, and easy to locate. While we believe the list proposed in § 438.72 would help States easily identify the provisions related to LTSS, we identify that a provision specified in any other section of 42 CFR part 438 or any other Federal regulation but omitted from § 438.72, is still in full force and effect. We also note that § 438.208(c)(3)(ii) currently includes a cross-reference to § 441.301(c)(1) and (2). We are not proposing any changes to the regulatory language at § 441.301(c)(1) or (2) or to § 438.208(c)(3)(ii) through this rule. We have included § 441.301(c)(1) and (2) in the proposed regulatory language at § 438.72 so that it is clear that the requirements at § 441.301(c)(1) and (2) continue to apply when States include HCBS in their MCO, PIHP, or PAHP contracts.

C. Documentation of Access to Care and Service Payment Rates (§ 447.203)

Section 1902(a)(30)(A) of the Act requires that State plans ''assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area.'' Through the proposed provisions in § 447.203, we seek to establish an updated process through which States would be required to document, and we would ensure, compliance with the requirements of section 1902(a)(30)(A) of the Act.

In the 2015 final rule with comment period, we codified a process that requires States to complete and make public AMRPs that analyze and inform determinations of the sufficiency of access to care (which may vary by geographic location in the State) and are used to inform State policies affecting access to Medicaid services, including provider payment rates. The AMRP must specify data elements that support the State's analysis of whether beneficiaries have sufficient access to care, based on data, trends, and factors that measure beneficiary needs, availability of care through enrolled providers, and utilization of services. States are required to update their AMRPs at regular intervals and whenever the State proposes to reduce FFS provider payment rates or restructure them in circumstances when the changes could result in diminished access. Specifically, the current AMRP process at § 447.203 requires States to consider the extent to which beneficiary needs are fully met; the availability of

[102] CMS's Medicaid and CHIP Scorecard. Accessed at *https://www.medicaid.gov/state-overviews/scorecard/index.html.*

care through enrolled providers to beneficiaries in each geographic area, by provider type and site of service; changes in beneficiary utilization of covered services in each geographic area; the characteristics of the beneficiary population (including considerations for care, service and payment variations for pediatric and adult populations and for individuals with disabilities); and actual or estimated levels of provider payment available from other payers, including other public and private payers, by provider type and site of service. The analysis further requires consideration of beneficiary and provider input, and an analysis of the percentage comparison of Medicaid payment rates to other public and private health insurer payment rates within geographic areas of the State, for each of the services reviewed, by the provider types and sites of service. While the current regulations do include broad requirements for what an acceptable analysis methodology must include, States retain discretion in establishing their processes, including but not limited to the specification of data sources and analytical methodologies to be used. The result is a large analytical burden on States without a standardization that would allow us and other interested parties to compare data between States to understand whether the Federal access standards are successfully achieving robust access consistent with section 1902(a)(30)(A) of the Act for beneficiaries nationwide.

Through AMRPs, we aimed to create a transparent and data-driven process through which to ensure State compliance with section 1902(a)(30)(A) of the Act. Following publication of the 2011 proposed rule and as discussed in both the 2015 final rule with comment period and the 2016 final rule, as we worked with States to implement the AMRP requirements, many States expressed numerous concerns about the rule.[103] [104] [105] States were concerned about the administrative burden of completing the AMRPs and questioned whether the AMRP process is the most effective way to establish that access to care in a State's Medicaid program meets statutory requirements. States with high managed care enrollment penetration were also concerned about the AMRP process because the remaining FFS populations in their State often reside in long-term care facilities or require only specialized care that is carved out from managed care, but long-term care and specialized care services were not required to be analyzed under the AMRP process. We have also heard concerns from other interested parties, including medical associations and non-profit organizations, that the 2015 final rule with comment period afforded States too much discretion in developing access measures which could lead to ineffective monitoring and enforcement as well as challenges comparing access across States. One commenter was concerned that States had too much discretion in ''. . . setting standards and access measures . . .'' and ''. . .whether they have met their chosen standards'' as this process relies on self-regulation rather than ''an independent, objective third party as the primary arbiter of a State's compliance . . .'' [106] Another commenter stated that ''CMS should designate a limited and standardized set of data measures that would be collected rather than leaving the decision of which data measures to use to State discretion'' as this would ''enable the development of key, valid, and uniform measures; more effective monitoring and enforcement; and will ensure comparability of objective measures across the States.'' [107] At the time of publication of the 2011 proposed rule and 2015 final rule with comment period, we believed that a uniform approach to meeting the statutory requirement under section 1902(a)(30)(A) of the Act, including setting standardized access to care data measures, could prove difficult given then-current limitations on data, local variations in service delivery, beneficiary needs, and provider practice roles.[108] [109]

Separately, the Supreme Court, in *Armstrong* v. *Exceptional Child Center, Inc.,* 135 S. Ct. 1378 (2015), ruled that Medicaid providers and beneficiaries do not have a private right of action to challenge Medicaid payment rates in Federal courts. This decision means provider and beneficiary legal challenges are unavailable in Federal court to supplement our oversight as a means of ensuring compliance with section 1902(a)(30)(A) of the Act. The Armstrong decision also underscored HHS' and CMS' unique responsibility for resolving issues concerning the interpretation and implementation of section 1902(a)(30)(A) of the Act. By concluding that the responsible Federal administrative agency is better suited than Federal courts to make determinations regarding the sufficiency of Medicaid payment rates, the Supreme Court's Armstrong decision placed added importance on CMS' administrative review of SPAs proposing to reduce or restructure FFS payment rates. Accordingly, the 2015 final rule with comment period was an effort to establish a more robust oversight and enforcement strategy with respect to section 1902(a)(30)(A) of the Act.

In consideration of State agencies' and other interested parties' feedback on the AMRP process, as well as CMS' obligation to ensure continued compliance with section 1902(a)(30)(A) of the Act, we propose to update the requirements in § 447.203. We propose to rescind and replace the AMRP requirements currently in § 447.203(b)(1) through (8) with a streamlined and standardized process, described in proposed § 447.203(b) and (c). This proposed change is informed by a center-wide review of our policy and processes regarding access to care for all facets of the Medicaid program. The 2015 final rule with comment period acknowledged our need to better understand FFS rate actions and their potential impact on State programs, and the requirements we finalized require a considerable amount of data from States. To ensure States were meeting the statutory requirement under section 1902(a)(30)(A) of the Act, the AMRP process was originally intended to establish a transparent data-driven process for States to measure the current status of access to services within the State and utilize this process for monitoring access when proposing rate reductions and restructurings.[110] As the rule took effect and as we reviewed State's AMRPs, we found that some rate reductions and restructurings had much smaller impacts than others. The 2017 SMDL reflected the experience that certain payment rate changes would not likely result in diminished access to care and do not require the substantial review of access data that generally is required under the 2015 final rule with comment period. Since publication of the 2019 CMCS Informational Bulletin stating the agency's intention to establish a new access strategy, we have developed this proposal for a new process that considers the lessons learned under the AMRP process, and emphasizes transparency and data

analysis, with specific proposed requirements varying depending on the State's current payment levels relative to Medicare, the magnitude of the proposed rate reduction or restructuring, and any access to care concerns raised to State Medicaid agency by interested parties. With these proposed provisions, we aim to balance Federal and State administrative burden with our shared obligation to ensure compliance with section 1902(a)(30)(A) of the Act (and our obligation to oversee State compliance with the same).

1. Fully Fee-For-Service States

We are seeking comment on whether additional access standards for States with a fully FFS delivery system may be appropriate. Because the timeliness standards of the proposed Medicaid and Children's Health Insurance Program Managed Care Access, Finance, and Quality proposed rule (Managed Care proposed rule) at § 438.68 would not apply to any care delivery in such States, we are considering whether a narrow application of timeliness standards to fully FFS States that closely mirrors the proposed appointment wait time standards, secret shopper survey requirements, and publication requirements (as applied to outpatient mental health and substance use disorder, adult and pediatric; primary care, adult and pediatric; obstetrics and gynecology; and an additional type of service determined by the State) in that rule might be appropriate. Given that timeliness standards would apply directly to States, we also seek comment on a potentially appropriate method for CMS to collect data demonstrating that States meet the established standards at least 90 percent of the time.

2. Payment Rate Transparency (§ 447.203(b))

We propose to rescind § 447.203(b) in its entirety and replace it with new requirements to ensure FFS Medicaid payment rate adequacy, including a new process to promote payment rate transparency. This new proposed process would require States to publish their FFS Medicaid payment rates in a clearly accessible, public location on the State's website, as described later in this section. Then, for certain services, States would be required to conduct a comparative payment rate analysis between the States' Medicaid payment rates and Medicare rates, or provide a payment rate disclosure for certain HCBS that would permit CMS to develop and publish HCBS payment benchmark data.

In paragraph (b)(1), we propose to require the State agency to publish all Medicaid FFS payment rates on a website developed and maintained by the single State agency that is accessible to the general public. We propose that published Medicaid FFS payment rates would include fee schedule payment rates made to providers delivering Medicaid services to Medicaid beneficiaries through a FFS delivery system. We also propose to require that the website be easily reached from a hyperlink easily reached from a hyperlink on the State Medicaid agency's website.

Within this payment rate publication, we propose that FFS Medicaid payment rates must be organized in such a way that a member of the public can readily determine the amount that Medicaid would pay for the service and, in the case of a bundled or similar payment methodology, identify each constituent service included within the rate and how much of the bundled payment is allocated to each constituent service under the State's methodology. We also propose that, if the rates vary, the State must separately identify the Medicaid FFS payment rates by population (pediatric and adult), provider type, and geographical location, as applicable.

Longstanding legal requirements to provide effective communication with individuals with disabilities and the obligation to take reasonable steps to provide meaningful access to individuals with limited English proficiency also apply to the State's website containing Medicaid FFS payment rate information. Under Title II of the Americans with Disabilities Act of 1990, section 504 of the Rehabilitation Act, section 1557 of the Affordable Care Act, and implementing regulations, qualified individuals with disabilities may not be excluded from participation in, or denied the benefits of any programs or activities of the covered entity, or otherwise be subjected to discrimination by any covered entity, on the basis of disability, and programs must be accessible to people with disabilities.[111] Individuals with disabilities are entitled to communication that is as effective as communication for people without disabilities, including through the provision of auxiliary aids and services.[112] Section 1557 of the Affordable Care Act requires recipients of Federal financial assistance, including State Medicaid programs, to take reasonable steps to provide meaningful access to their programs or activities for individuals with limited English proficiency, and requires the provision of interpreting services and translations when it is a reasonable step to provide meaningful access.[113]

We propose that for States that pay varying Medicaid FFS payment rates by population (pediatric and adult), provider type, and geographical location, as applicable, those States would need to separately identify their Medicaid FFS payment rates in the payment rate transparency publication by each grouping or multiple groupings, when applicable to a State's program. In the event rates vary according to these factors, as later discussed in this proposed rule, our intent is that a member of the public be readily able to determine the payment amount that would be made, accounting for all relevant circumstances. For example, a State that varies their Medicaid FFS payment rates by population may pay for a service identified by code 99202 when provided to a child at a rate of $110.00 and when provided to an adult at a rate of $80.00. Because the Medicaid FFS payment rates vary based on population, both of these Medicaid FFS payment rates would need to be included separately as Medicaid FFS payment rates for 99202 in the State's payment rate transparency publication. As another example, a State that varies their Medicaid FFS payment rates by provider type may pay for 99202 when delivered by a physician at a rate of $50.00, and when delivered by a nurse practitioner or physician assistant at a rate of $45.00.

We are aware that some State plans include language that non-physician practitioners (NPPs), such as a nurse practitioner or physician assistant, are paid a percentage of the State's fee schedule rate. Because the Medicaid FFS payment rates vary by provider type, both of the Medicaid FFS payment rates in both situations (fee schedule rates of $50.00 and $45.00) would need to be separately identified as Medicaid FFS payment rates for 99202 in the State's payment rate transparency publication, regardless of whether the State has individually specified each amount certain in its approved payment schedule or has State plan language specifying the nurse practitioner or physician assistant rate as a percentage of the physician rate. Additionally, for

[111] 29 U.S.C. 794; 42 U.S.C. 18116(a); 42 U.S.C. 12132; 28 CFR. 35.130(a); 45 CFR 84.4(a); 45 CFR 92.2(b).

[112] 28 CFR 35.160; 45 CFR 92.102; *see also* 45 CFR 84.52(d).

[113] 45 CFR 92.101; *see also https://www.hhs.gov/civil-rights/for-providers/laws-regulations-guidance/guidance-federal-financial-assistance-title-vi/index.html.*

example, a State that varies their Medicaid FFS payment rates by geographical location may pay for 99202 delivered in a rural area at a rate of $70, in an urban or non-rural area as a rate of $60, and in a major metropolitan area as a rate of $50. We are also aware that States may vary their Medicaid FFS payment rates by geographical location by zip code, by metropolitan or micropolitan areas, or other geographical location breakdowns determined by the State. Because the Medicaid FFS payment rates vary based on geographical location, all Medicaid FFS payment rates based on geographical location would need to be included separately as Medicaid FFS payment rates for 99202 in the State's payment rate transparency publication.

For a State that varies its Medicaid FFS payment rates by any combination of these groupings, then the payment rate transparency publication would be required to reflect these multiple groupings. For example, the State would be required to separately identify the rate for a physician billing 99202 provided to a child in a rural area, the rate for a nurse practitioner billing 99202 provided to a child in a rural area, the rate for a physician billing 99202 provided to an adult in a rural area, the rate for a nurse practitioner billing 99202 provided to an adult in a rural area, the rate for a physician billing 99202 provided to a child in an urban area, the rate for a nurse practitioner billing 99202 provided to a child in an urban area, and so on. This information would be required to be presented clearly so that a member of the public can readily determine the payment rate for a service that would be paid for each grouping or combination of groupings (population (pediatric and adult), provider type, and geographical location), as applicable. We acknowledge that States may also pay a single Statewide rate regardless of population (pediatric and adult), provider type, and geographical location, and as such would only need to list the single Statewide rate in their payment rate transparency publication.

We acknowledge that there may be additional burden associated with our proposal that the payment rate transparency publication include a payment rate breakdown by population (pediatric and adult), provider type, and geographical location, as applicable, when States' Medicaid FFS payment rates vary based on these groupings. Despite the additional burden, we believe that the additional level of granularity in the payment rate transparency publication is important for ensuring compliance with section 1902(a)(30)(A) of the Act, given State Medicaid programs rely on multiple provider types to deliver similar services to Medicaid beneficiaries of all ages, across multiple Medicaid benefit categories, throughout each area of each State.

We further propose that Medicaid FFS payment rates published under the proposed payment rate transparency requirement would only include fee schedule payment rates made to providers delivering Medicaid services to Medicaid beneficiaries through a FFS delivery system. To ensure maximum transparency in the case of a bundled fee schedule payment rate or rate determined by a similar payment methodology where a single payment rate is used to pay for multiple services, we propose that the State must identify each constituent service included in the bundled fee schedule payment rate or rate determined by a similar payment methodology. We also propose that the State must identify how much of the bundled fee schedule payment rate or rate determined by a similar payment methodology is allocated to each constituent service under the State's payment methodology. For example, if a State's fee schedule lists a bundled fee schedule rate that pays for day treatment under the rehabilitation benefit and the following services are included in the day treatment bundle: community based psychiatric rehabilitation and support services, individual therapy, and group therapy, then the State would need to identify services community based psychiatric rehabilitation and support services, individual therapy, and group therapy separately and each portion of the bundled fee schedule payment rate for day treatment that is allocated to community based psychiatric rehabilitation and support services, individual therapy, and group therapy. Proposing to require States identify the portion of the bundled fee is allocable to each constituent service included in the bundled fee schedule payment rate would add an additional level of granularity to the payment rate transparency publication that continues to enable a member of the public to readily be able to determine the payment amount that would be made for a service, accounting for all relevant circumstances, including the payment rates for each constituent service within a bundle and as a standalone service. We also propose to require that the website be easily reached from a hyperlink to ensure transparency of payment rate information is available to beneficiaries, providers, CMS, and other interested parties.

We propose the initial publication of Medicaid FFS payment rates would occur no later than January 1, 2026, and include approved Medicaid FFS payment rates in effect as of that date, January 1, 2026. We propose this timeframe to provide States with at least 2 years from the possible effective date of the final rule, if this proposal is finalized, to comply with the payment rate transparency requirement. The proposed timeframe would initially set a consistent baseline for all States to first publish their payment rate transparency information and then set a clear schedule for States to update their payment rates based on the cadence of the individual States' payment rate changes.

The same initial publication due date for all States to publish their payment rates as of January 1, 2026, would promote comparability between States' payment rate transparency publications. Once States would begin making updates to their payment rate transparency publication, there would be a clear distinction between State payment rates that have recently updated their payment rates and State payment rates that have long maintained the same payment rates. For example, two States initially publish their payment rates for 99202 at $50; however, one State annually increases their payment rate by 5 percent over the next 2 years and would update their payment rate transparency publication in 2027 with a payment rate of $52.50, then in 2028 with a payment rate of $55.13, while the other States' payment rate for the same service remains at $50 in 2027 and 2028. The transparency of a State's recent payment rates including the date the payment rates were last updated on the State Medicaid agency's website, as discussed later, as well as the ability to compare payment rates between States on accessible and easily reachable State-maintained websites, highlights how the proposed payment rate transparency would help to ensure that Medicaid payment rate information is available to beneficiaries, providers, CMS, and other interested parties for the purposes of assessing access to care issues to better ensure compliance with section 1902(a)(30)(A) of the Act.

We also propose that the initial publication include approved Medicaid FFS payment rates in effect as of January 1, 2026. We propose this language to narrow the scope of the publication to CMS-approved payment rates and methodologies, thereby excluding any rate changes for which a SPA or similar amendment request is

pending CMS review or approval. SPAs are submitted throughout the year, can include retroactive effective dates, and are subject to a CMS review period that varies in duration.[114] [115]

As discussed later in this proposed rule regarding paragraph (b)(2) and(b)(3), States are encouraged to use the proposed payment rate transparency publication as a source of Medicaid payment rate data for compliance with the paragraph (b)(3)(i)(B) proposed comparative payment rate analysis and paragraph (b)(3)(ii)(B) proposed payment rate disclosure requirements. However, we note that the comparative payment rate analysis and payment rate disclosure requirements impose a one-year lag on the date when rates are effective. We include a more in-depth discussion of the timeframes for publication of the comparative payment rate analysis and payment rate disclosure in paragraph (b)(4) later in this proposed rule, where we note that the 1-year shift in timeframe is necessitated by the timing of when Medicare publishes their payment rates in November and the rates taking effect on January 1, leaving insufficient time for CMS to publish the code list for States to use for the comparative payment rate analysis and for States develop and publish their comparative payment rate analysis and payment rate disclosure by January 1. We note that the ongoing payment transparency publication requirements will allow the public to view readily available, current Medicaid payment rates at all times, even if slightly older Medicaid payment rate information must be used for comparative payment rate analyses due to the cadence of Medicare payment rate changes as well as the payment rate disclosure. We are cognizant that the payment rate disclosure does not depend on the availability of Medicare payment rates, however, we are proposing to provide States with the same amount of time to comply with both of the proposed comparative payment rate analysis and payment rate disclosure requirements.

If this proposal is finalized at a time that does not allow for States to have a period of at least 2 years between the effective date of the final rule and the proposed January 1, 2026, due date for the initial publication of Medicaid FFS payment rates, then we would propose an alternative date of July 1, 2026, for the initial publication of Medicaid FFS payment rates and for the initial publication to include approved Medicaid FFS payment rates as of that date, July 1, 2026. This shift would allow more time for States to comply with the payment rate transparency requirements. We acknowledge that the date of the initial payment rate transparency publication is subject to change based on the final rule publication schedule and effective date, if this rule is finalized. If further adjustment is necessary beyond the July 1, 2026, timeframe to allow adequate time for States to comply with the payment rate transparency requirements, then we would adjust date of the initial payment rate transparency publication in 6-month intervals, as appropriate, to allow for approximately 2 years between the effective date of the final rule and the initial required payment rate transparency publication.

We propose to require the that the single State agency include the date the payment rates were last updated on the State Medicaid agency's website. We also propose to require that the single State agency ensure that Medicaid FFS payment rates are kept current where any necessary updates to the State fee schedules made no later than 1 month following the date of CMS approval of the SPA, section 1915(c) HCBS waiver, or similar amendment revising the provider payment rate or methodology. Finally, in paragraph (b)(1), we propose that, in the event of a payment rate change that occurs in accordance with a previously approved rate methodology, the State would be required to update its payment rate transparency publication no later than 1 month after the effective date of the most recent update to the payment rate. This provision is intended to capture Medicaid FFS payment rate changes that occur because of previously approved SPAs containing payment rate methodologies. For example, if a State sets their Medicaid payment rates for Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS) at a percentage of the most recent Medicare fee schedule rate, then the State's payment rate would change when Medicare adopts a new fee schedule rate through the quarterly publications of the Medicare DMEPOS fee schedule, unless otherwise specified in the approved State plan methodology that the State implements a specific quarterly publication, for example, the most recent April Medicare DMEPOS fee schedule. Therefore, the State's Medicaid FFS payment rate automatically updates when Medicare publishes a new fee schedule, without the submission of a SPA because the State's methodology pays a percentage of the most recent State plan specified Medicare fee schedule rate. In this example, the State would need to update its Medicaid FFS payment rates in the payment rate transparency publication no later than 1 month after the effective date of the most recent update to the Medicare fee schedule payment rate made applicable under the approved State plan payment methodology.

While there is no current Federal requirement for States to consistently publish their rates in a publicly accessible manner, we are aware that most States already publish at least some of their payments through FFS rate schedules on State agency websites. Currently, rate information may not be easily obtained from each State's website in its current publication form, making it difficult to understand the amounts that States pay providers for items and services furnished to Medicaid beneficiaries and to compare Medicaid payment rates to other health care payer rates or across States. However, through this proposal we seek to ensure all States do so in a format that is publicly accessible and where all Medicaid FFS payment rates can be easily located and understood. The new transparency requirements under this proposed rule would help to ensure that interested parties have access to updated payment rate schedules and could conduct analyses that would provide insights into how State Medicaid payment rates compare to, for example, Medicare payment rates and other State Medicaid payment rates. The proposal intends to help ensure that payments are transparent and clearly understandable to beneficiaries, providers, CMS, and other interested parties. We are seeking public comment on the proposed requirement for States to publish their Medicaid FFS payment rates for all services, the proposed structure for Medicaid FFS payment rate transparency publication on the State's website, and the timing of the publication of and updates to the State's Medicaid FFS payment rates for the

[114] In accordance with 42 CFR 430.20, an approved SPA can be effective no earlier than the first day of the calendar quarter in which an approvable amendment is submitted. For example, a SPA submitted on September 30th can be retroactively effective to July 1st.

[115] In accordance with 42 CFR 430.16, a SPA will be considered approved unless CMS, within 90 days after submission, requests additional information or disapproves the SPA. When additional information is requested by CMS and the State has respond to the request, CMS will then have another 90 days to either approve, disapprove, and request the State withdraw the SPA or the State's response to the request for additional information. This review period includes two 90-day review periods plus additional time when CMS has requested additional information which can result is a wide variety of approval timeframes.

proposed payment rate transparency requirements in § 447.203(b)(1).

In paragraph (b)(2), we propose to require States to develop and publish a comparative payment rate analysis of Medicaid payment rates for certain specified services, and a payment rate disclosure for certain HCBS. In paragraph (b)(2) we specify the categories of services that States would be required to include in a comparative payment rate analysis and payment rate disclosure of Medicaid payment rates. Specifically, we are proposing that for each of the categories of services in paragraphs (b)(2)(i) through (iii), each State agency would be required to develop and publish a comparative payment rate analysis of Medicaid payment rates as specified in proposed § 447.203(b)(3). We also propose that for each of the categories of services in paragraph (b)(2)(iv), each State agency would be required to develop and publish a payment rate disclosure of Medicaid payment rates as specified in proposed § 447.203(b)(3). We propose for both the comparative payment rate analysis and payment rate disclosure that, if the rates vary, the State must separately identify the payment rates by population (pediatric and adult), provider type, and geographical location, as applicable. The categories of services listed in paragraph (b)(2) include: primary care services; obstetrical and gynecological services; outpatient behavioral health services; and personal care, home health aide, and homemaker services, as specified in § 440.180(b)(2) through (4), provided by individual providers and providers employed by an agency.

In paragraph (b)(2), we propose to require States separately identify the payment rates in the comparative payment rate analysis and payment rate disclosure, if the rates vary, by population (pediatric and adult), provider type, and geographical location, as applicable. These proposed breakdowns of the Medicaid payment rates, similar to how we propose payment rates would be broken down in the payment rate transparency disclosures under proposed § 447.203(b)(1), would apply to all proposed categories of services listed in paragraph (b)(2): primary care services, obstetrical and gynecological services, outpatient behavioral health services, and personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency.

We acknowledge that not all States pay varied payment rates by population (pediatric and adult), provider type, and geographical location, which is why we have included language ''if the rates vary'' and ''as applicable'' in the proposed regulatory text. This language is included in the proposed regulatory text to ensure the comparative payment rate analysis and payment rate disclosure captures all Medicaid payment rates, including when States pay varied payment rates by population (pediatric and adult), provider type, and geographical location. We also included proposed regulatory text for the payment rate disclosure that ensures the average hourly payment rates for *COM007*personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency are separately identified for payments made to individual providers and to providers employed by an agency, if the rates vary, as later discussed in connection with proposed § 447.203(b)(3)(ii). For States that do not pay varied payment rates by population (pediatric and adult), provider type, and geographical location and pay a single Statewide payment rate for a single service, then the comparative payment rate analysis and payment rate disclosure would only need to include the State's single Statewide payment rate.

We propose to include a breakdown of Medicaid payment rates by population (pediatric and adult), provider type, and geographical location, as applicable, on the Medicaid side of the comparative payment rate analysis in paragraph (b)(2) to align with the proposed payment rate transparency provision, to account for State Medicaid programs that pay variable Medicaid payment rates by population (pediatric and adult), provider type, and geographical location, and to help ensure the State's comparative payment rate analyses accurately align with Medicare. Following the initial year that the provisions proposed in this rule would be in effect, these proposed provisions would align with and build on the payment rate transparency requirements described in § 447.203(b)(1), because States could source the codes and their corresponding Medicaid payment rates that the State already would publish to meet the payment rate transparency requirements.

These proposed provisions are also intended to help ensure that the State's comparative payment rate analysis contains the highest level of granularity in each proposed aspect by considering and accounting for any variation in Medicaid payment rates by population (pediatric and adult), provider type, and geographical location, as currently required in the AMRP process under current § 447.203(b)(1)(iv) and (v), and (b)(3). Additionally, Medicare varies payment rates for certain NPPs (nurse practitioners, physician assistants, and clinical nurse specialists) by paying them 85 percent of the full Medicare physician fee schedule amount and varies their payment rates by geographical location through calculated adjustments to the pricing amounts to reflect the variation in practice costs from one geographical location to another; therefore, the comparative payment rate analysis accounting for these payment rate variations is crucial to ensuring the Medicaid FFS payment rates accurately align with FFS Medicare Physician Fee Schedule (PFS) rates.[116] As discussed later in this proposed rule, Medicare payment variations for provider type and geographical location would be directly compared with State Medicaid payment rates that also apply the same payment variations, in addition to payment variation by population (pediatric and adult) which is unique to Medicaid, yet an important payment variation to take into consideration when striving for transparency of Medicaid payment rates. For States that do not pay varied payment rates by population (pediatric and adult), provider type, or geographical location and pay a single Statewide payment rate for a single service, Medicare payment variations for provider type and geographical location would be considered by calculating a Statewide average of Medicare PFS rates which is later discussed in this proposed rule.

Similar to the payment rate transparency publication, we acknowledge that there may be additional burden associated with our proposal that the payment rate transparency publication and the comparative payment rate analysis include a payment rate breakdown by population (pediatric and adult), provider type, and geographical location, as applicable, when States' payment rates vary based on these groupings. However, we believe that any approach to requiring a comparative payment rate analysis would involve some level of burden that is greater for States that choose to employ these payment rate differentials, since any comparison methodology would need to take account—through a separate comparison, weighted average, or other mathematically reasonable approach—of all rates paid under the Medicaid program for a given service. In all

[116] *https://www.medpac.gov/wp-content/uploads/2021/11/MedPAC_Payment_Basics_22_Physician_FINAL_SEC.pdf.*

events, we believe this proposal would create an additional level granularity in the analysis that is important for ensuring compliance with section 1902(a)(30)(A) of the Act. Multiple types of providers, for example, physicians, physician assistants, and nurse practitioners, are delivering similar services to Medicaid beneficiaries of all ages, across multiple Medicaid benefit categories, throughout each State. Section 1902(a)(30)(A) states ''. . . that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area,'' and we believe that having sufficient access to a variety of provider types is important to ensuring access for Medicaid beneficiaries meets this statutory standard. For example, a targeted payment rate reduction to nurse practitioners, who are often paid less than 100 percent of the State's physician fee schedule rate, could have a negative impact on access to care for services provided by nurse practitioners, but this reduction would not directly impact physicians or their willingness to participate in Medicaid and furnish services to beneficiaries. By proposing that the comparative payment rate analysis include a breakdown by provider type, where States distinguish payment rates for a service by provider type, the analysis would capture this payment rate variation among providers of the same services and provide us with a granular level of information to aid in determining if access to care is sufficient, particularly in cases where beneficiaries depend to a large extent on the particular provider type(s) that would be affected by the proposed rate change for the covered service(s).

We identified payment rate variation by population (pediatric and adult), provider type, and geographical location as the most commonly applied adjustments to payment rates that overlap between FFS Medicaid and Medicare and could be readily broken down into separately identified payment rates for comparison in the comparative payment rate analysis. For transparency purposes and to help to ensure the comparative payment rate analysis is conducted at a granular level of analysis, we believe it is important for the State to separately identify their rates, if the rates vary, by population (pediatric and adult), provider type, and geographical location, as applicable. We are seeking public comments on the proposal to require the comparative payment rate analysis includes, if the rates vary, separate identification of payment rates by population (pediatric and adult), provider type, and geographical location, as applicable, in the comparative payment rate analysis in proposed § 447.203(b)(2).

We acknowledge that States may apply additional payment adjustments or factors, for example, the Consumer Price Index, Medicare Economic Index, or State-determined inflationary factors or budget neutrality factors, to their Medicaid payment rates other than population (pediatric and adult), provider type, and geographical location identified in this proposed rule. We would expect any other additional payment adjustments and factors to already be included in the State's published Medicaid fee schedule rate or calculable from the State plan because § 430.10 requires the State plan to be a ''comprehensive written statement . . . contain[ing] all information necessary for CMS to determine whether the plan can be approved to serve as a basis for . . . FFP . . .'' Therefore, for States paying for services with a fee schedule payment rate, the Medicaid fee schedule is the sole source of information for providers to locate their final payment rate for Medicaid services provide to Medicaid beneficiaries under a FFS delivery system. For States with a rate-setting methodology where the approved State plan describes how rates are set based upon a fee schedule (for example, payment for NPPs are set a percentage of a certain published Medicaid fee schedule), the Medicaid fee schedule would again be the source of information for providers to identify the relevant starting payment rate and apply the rate-setting methodology described in the State plan to ascertain their Medicaid payment.[117] We are also seeking public comment on any additional types of payment adjustments or factors States make to their Medicaid payment rates as listed on their State fee schedules that should be identified in the comparative payment rate analysis that we have not already discussed in § 447.203(b)(i)(B) of this proposed rule, and how the inclusion of any such additional adjustments or factors should be considered in the development of the Medicare PFS rate to compare Medicaid payment rates to, as later described in § 447.203(b)(3)(i)(C), of this proposed rule.

In paragraphs (b)(2)(i) through (iv), we propose that primary care services, obstetrical and gynecological services, and outpatient behavioral health services would be subject to a comparative payment rate analysis of Medicaid payment rates and personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency would be subject to a payment rate disclosure of Medicaid payment rates. We begin with a discussion about the importance of primary care services, obstetrical and gynecological services, and outpatient behavioral health services as proposed in § 447.203(b)(2)(i) through (iii), and the reason for their inclusion in this proposed requirement. Then, we will discuss the importance and justification for including personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency as proposed in § 447.203(b)(2)(iv).

In § 447.203(b)(2)(i) through (iii), we propose to require primary care services, obstetrical and gynecological services, and outpatient behavioral health services be included in the comparative payment rate analysis, because we believe that these categories of services are critical preventive, routine, and acute medical services in and of themselves, and that they often serve as gateways to access to other needed medical services, including specialist services, laboratory and x-ray services, prescription drugs, and other mandatory and optional Medicaid benefits that States cover. Including these categories of services in the comparative payment rate analysis would require States to closely examine their Medicaid FFS payment rates to comply with section 1902(a)(30)(A) of the Act. As described in the recent key findings from public comments on the February 2022 RFI that we published, payment rates are a key driver of provider participation in the Medicaid program.[118] By proposing that States compare their Medicaid payment rates for primary care services, obstetrical and gynecological services, and outpatient behavioral health services to Medicare payment rates, States would be required to analyze if and how their payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and

[118] Summary of Public Comments in response to the CMS 2022 Request for Information: Access to Coverage and Care in Medicaid & CHIP. December 2022. For the report, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-report.pdf.*

services are available to the general population in the geographic area.

As discussed later in this section, we believe that Medicare payment rates for these services are likely to serve as a reliable benchmark for a level of payment sufficient to enlist providers to furnish the relevant services to a beneficiary because Medicare delivers services through a FFS delivery system across all geographical regions of the US and historically, the vast majority of physicians accept new Medicare patients, with extremely low rates of physicians opting out of the Medicare program, suggesting that Medicare's payment rates are generally consistent with a high level of physician willingness to accept new Medicare patients.[119] Additionally, Medicare payment rates are publicly published in an accessible and consistent format by CMS making Medicare payment rates an available and reliable comparison point for States, rather than private payer data which typically is considered proprietary information and not generally available to the public. Therefore, the proposed requirement that States develop and publish a comparative payment rate analysis would enable States, CMS, and other interested parties to closely examine the relationship between State Medicaid FFS payment rates and those paid by Medicare. This analysis would continually help States to ensure that their Medicaid payment rates are set at a level that is likely sufficient to meet the statutory access standard under 1902(a)(30)(A) of the Act that payments by enlisting enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area. We believe that the comparative payment rate analysis would provide States, CMS, and other interested parties with clear and concise information for identifying when there is a potential access to care issue, such as Medicaid payment rates not keeping pace with changes in corresponding Medicare rates and decreases in claims volume and beneficiary utilization of services. As discussed later in this section, numerous studies have found a relationship between Medicaid payment rates and provider participation in the Medicaid program and, given the statutory standard of ensuring access for Medicaid beneficiaries, a comparison of Medicaid payment rates to other payer rates, particularly Medicare payment rates as justified later in this rule, is an important barometer of whether State payment rates and policies are sufficient for meeting the statutory access standard under section 1902(a)(30)(A) of the Act.

We propose to focus on these particular services because they are critical medical services and of great importance to overall beneficiary health. Beginning with primary care, these services provide access to preventative services and facilitate the development of crucial doctor-patient relationships. Primary care providers often deliver preventative health care services, including immunizations, screenings for common chronic and infectious diseases and cancers, clinical and behavioral interventions to manage chronic disease and reduce associated risks, and counseling to support healthy living and self-management of chronic diseases; Medicaid coverage of preventative health care services promotes disease prevention which is critical to helping people live longer, healthier lives.[120] Accessing primary care services can often result in beneficiaries receiving referrals or recommendations to schedule an appointment with physician specialists, such as gastroenterologists or neurologists, that they would not be able to obtain without the referral or recommendation by the primary care physician. Additionally, primary care physicians provide beneficiaries with orders for laboratory and x-ray services as well as prescriptions for necessary medications that a beneficiary would not be able to access without the primary care physician. Research over the last century has shown that the impact of the doctor-patient relationship on patient's health care experience, health outcomes, and health care costs exists [121] and more recent studies have shown that the quality of the physician-patient relationship is positively associated with functional health among patients.[122] Another study found that higher primary care payment rates reduced mental illness and substance use disorders among non-elderly adult Medicaid enrollees, suggesting that positive spillover from increasing primary care rates also positively impacted behavioral health outcomes.[123] Lastly, research has shown that a reduction in barriers to accessing primary care services has been associated with helping reduce health disparities and the risk of poor health outcomes. [124] [125] These examples illustrate how crucial access to primary care services is for overall beneficiary health and to enable access to other medical services. We are seeking public comment on primary care services as one of the proposed categories of services subject to the comparative payment rate analysis requirements in proposed § 447.203(b)(2)(i).

Similar to primary care services, both obstetrical and gynecological services and outpatient behavioral health services provide access to preventative and screening services unique to each respective field. A well-woman visit to an obstetrician–gynecologist often provides access to screenings for cervical and breast cancer; screenings for Rh(D) incompatibility, syphilis infection, and hepatitis B virus infection in pregnant persons; monitoring for healthy weight and weight gain in pregnancy; immunization against the human papillomavirus infection; and perinatal depression screenings among other recommended preventive services.[126] [127] Behavioral health care

[119] Physicians and practitioners who do not wish to enroll in the Medicare program may ''opt-out'' of Medicare. This means that neither the physician, nor the beneficiary submits the bill to Medicare for services rendered. Instead, the beneficiary pays the physician out-of-pocket and neither party is reimbursed by Medicare. A private contract is signed between the physician and the beneficiary that states, that neither one can receive payment from Medicare for the services that were performed. [126] Rh(D) incompatibility is a preventable pregnancy compilation where a woman who is Rh negative is carrying a fetus that is Rh positive (Rh factor is a protein that can be found on the surface of red blood cells). When the blood of an Rh-positive fetus gets into the bloodstream of an Rh-negative woman, her body will recognize that the Rh-positive blood is not hers. Her body will try to destroy it by making anti-Rh antibodies. These antibodies can cross the placenta and attack the fetus's blood cells. This can lead to serious health problems, even death, for a fetus or a newborn. Prevention of Rh(D) incompatibility screening for Rh negative early in pregnancy (or before pregnancy) and, if needed, giving you a medication to prevent antibodies from forming.

Continued

promotes mental health, resilience, and wellbeing; the treatment of mental and substance use disorders; and the support of those who experience and/or are in recovery from these conditions, along with their families and communities. Outpatient behavioral health services can overlap with preventative primary care and obstetrical and gynecological services, for example screening for depression in adults and perinatal depression screenings, but also provide unique preventative and screening services such as screenings for unhealthy alcohol use in adolescents and adults, anxiety in children and adolescents, and eating disorders in adolescents and adults, among other recommended preventive services.[128]

The U.S. is simultaneously experiencing a maternal health crisis and mental health crisis, putting providers of obstetrical and gynecological and outpatient behavioral health services, respectively, at the forefront.[129] [130] According to MACPAC, ''Medicaid plays a key role in providing maternity-related services for pregnant women, paying for slightly less than half of all births nationally in 2018.'' [131] Given Medicaid's significant role in maternal health during a time when maternal mortality rates in the United States continue to worsen and the racial disparities among mothers continues to widen,[132] [133] accessing obstetrical and gynecological care, including care before, during, and after pregnancy is crucial to positive maternal and infant outcomes.[134] We are seeking public comment on obstetrical and gynecological services as one of the proposed categories of services subject to the comparative payment rate analysis requirements in proposed § 447.203(b)(2)(ii).

Improving access to behavioral health services is a critical, national issue facing all payors, particularly for Medicaid which plays a crucial role in mental health care access as the single largest payer of services and has a growing role in payment for substance use disorder services, in part due to Medicaid expansion and various efforts by Congress to improve access to mental health and substance use disorder services.[135] [136] Several studies have found an association between reducing the uninsured rate through increased Medicaid enrollment and improved and expanded access to critically needed behavioral health services.[137] Numerous studies have found positive outcomes associated with Medicaid expansion: increases in the insured rate and access to care and medications for adults with depression, increases in coverage rates and a greater likelihood of being diagnosed with a mental health condition as well as the use of prescription medications for a mental health condition for college students from disadvantaged backgrounds,[138] and a decrease in delayed or forgone necessary care in a nationally representative sample of non-elderly adults with serious psychological distress.[139] While individuals who are covered by Medicaid have better access to behavioral health services compared to people who are uninsured, some coverage gaps remain in access to behavioral health care for many people, including those with Medicaid.

Some of the barriers to accessing behavioral health treatment in Medicaid reflect larger system-wide access problems: overall shortage of behavioral health providers in the United States and relatively small number of psychiatrists who accept any form of insurance or participate in health coverage programs.[140] Particularly for outpatient behavioral health services for Medicaid beneficiaries, one reason physicians are unwilling to accept Medicaid patients is because of low Medicaid payment rates.[141] One study found evidence of low Medicaid payment rates by examining outpatient Medicaid claims data from 2014 in 11 States with a primary behavioral health diagnosis and an evaluation and management (E/M) procedure code of 99213 (Established patient office visit, 20–29 minutes) or 99214 (Established patient office visit, 30–39 minutes) and found that psychiatrists in nine States were paid less, on average, than primary care physicians.[142] These pieces of research and data about the importance of outpatient behavioral health services and the existing challenges beneficiaries face in trying to access outpatient behavioral health services underscore how crucial access to outpatient behavioral health services is, and that adequate Medicaid payment rates for these services is likely to be an important driver of access for beneficiaries. We are seeking public comment on outpatient behavioral health services as one of the proposed categories of services subject to the comparative payment rate analysis requirements in proposed § 447.203(b)(2)(iii).

In § 447.203(b)(2)(iv), we propose to require personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency in the payment rate disclosure requirements proposed in § 447.203(b)(3)(ii). We are cognizant that many HCBS providers nationwide are facing workforce shortages and high staff turnover that have been exacerbated by the COVID–19 pandemic, and these issues and related difficulty accessing HCBS can lead to higher rates of costly, institutional stays for beneficiaries.[143] As with any covered service, the supply of HCBS providers has a direct and immediate impact on beneficiaries' ability to access high quality HCBS, therefore, we included special considerations for LTSS, specifically HCBS, through two proposed provisions in § 447.203. The first provision in proposed paragraph

(b)(2)(iv) would require States to include personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency to be included in the payment rate disclosure in proposed paragraph (b)(3)(ii). The second provision in paragraph (b)(6), discussed in the next section, would require States to establish an interested parties' advisory committee to advise and consult on rates paid to certain HCBS providers. This provision is intended to help contextualize lived experience of direct care workers and beneficiaries who receive the services they deliver by providing direct care workers, beneficiaries and their authorized representatives, and other interested parties with the ability to make to recommendations to the Medicaid agency regarding the sufficiency of Medicaid payment rates for these specified services to help ensure sufficient provider participation so that these HCBS are accessible to beneficiaries consistent with section 1902(a)(30)(A) of the Act.

The proposed payment rate disclosure would require States to publish the average hourly payment rates made to individual providers and to providers employed by an agency, separately, if the rates vary, for each category of services specified in paragraph (b)(2)(iv) of this section. No comparison to Medicare payment rates would be required in recognition that Medicare generally does not cover and pay for these services, and when these services are covered and paid for by Medicare, the services are very limited and provided on a short-term basis, rather than long-term basis as with Medicaid HCBS. While Medicare covers part-time or intermittent home health aide services (only if a Medicare beneficiary is also getting other skilled services like nursing and/or therapy at the same time) under Medicare Part A (Hospital Insurance) or Medicare Part B (Medical Insurance), Medicare does not cover personal care or homemaker services.[144]

We propose to require these services be subject to a payment rate disclosure because this proposed rule aims to standardize data and monitoring across service delivery systems with the goal of improving access to care. To remain consistent with the proposed HCBS provisions at § 441.311(d)(2) and (e), where we propose to require annual State reporting on access and payment adequacy metrics for homemaker, home health aide, and personal care services, we are proposing to include these services, provided by individual providers and providers employed by an agency in the FFS payment rate disclosure proposed in § 447.203(b)(2). As described earlier in the HCBS provisions of this rule, these specific services were chosen because we expect them to be most commonly conducted in individuals' homes and general community settings and, therefore, constitute the vast majority of FFS payments for direct care workers delivering services under FFS. We acknowledge that the proposed analyses required of States in the HCBS provisions at § 441.311(d)(2) and (e) and in the FFS provisions at § 447.203(b)(2) are different, although, unique to assessing access in each program and delivery system. We are proposing to include personal care, home health aide, and homemaker services for consistency with HCBS access and payment adequacy provisions in this proposed rule, and also to include these services in the proposed provisions of § 447.203(b)(2) to require States to conduct and publish a payment rate disclosure. We believe the latter proposal is important because the payment rate disclosure of personal care, home health aide, and homemaker services would provide CMS with sufficient information, including average hourly payment rates, claims volume, and number of Medicaid enrolled beneficiaries who received a service as specified in proposed § 447.203(b)(3)(ii), from States for ensuring compliance with section 1902(a)(30)(A) of the Act, which requires that payments be consistent with efficiency, economy, and quality of care and sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area. Additionally, this proposal to include personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency is supported by the statutory mandate at section 2402(a) of the Affordable Care Act. Among other things, section 2402(a) of the Affordable Care Act directs the Secretary to promulgate regulations ensuring that all States develop service systems that ensure that there is an adequate number of qualified direct care workers to provide self-directed services. We are seeking public comment on personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency as the proposed categories of services subject to the payment rate disclosure requirements in proposed § 447.203(b)(2)(iv).

After discussing our proposed categories of services for the comparative payment rate analysis and payment rate disclosure requirements, we discuss the similarities and differences between the proposed rule and services currently included in the existing AMRP requirements. While this proposed rule would eliminate the triennial AMRP process, there are some similarities between the service categories for which we are proposing to require a comparative payment rate analysis or payment rate disclosure in § 447.203(b)(2) and those subject to the current AMRP requirements under § 447.203(b)(5)(ii). Specifically, § 447.203(b)(5)(ii)(A) currently requires the State agency to use data collected through the AMRP to provide a separate analysis for each provider type and site of service for primary care services (including those provided by a physician, FQHC, clinic, or dental care). We are proposing the comparative payment rate analysis include primary care services, without any parenthetical description. We believe this is appropriate because the proposed rule includes a comparative payment rate analysis that is at the Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) code level, as applicable, the specifics for which are discussed later in this section. This approach requires States to perform less sub-categorization of the data analysis, and as discussed later the analysis, would exclude FQHCs and clinics.

The current AMRP process also includes in § 447.203(b)(5)(ii)(C) behavioral health services (including mental health and substance use disorder); however, this proposed rule specifies that the comparative payment rate analysis only would include outpatient behavioral health services to narrow the scope of the analysis by excluding inpatient behavioral health services (including inpatient behavioral health services furnished in psychiatric residential treatment facilities, institutions for mental diseases, and psychiatric hospitals). While we acknowledge that behavioral health services encompass a broad range of services provided in a wide variety of settings, from outpatient screenings in a physician's office to inpatient hospital treatment, we are proposing to narrow the scope of behavioral health services to just outpatient services to focus the comparative payment rate analysis on ambulatory care provided by practitioners in an office-based setting without duplicating existing

[144] *https://www.medicare.gov/coverage/home-health-services.*

requirements, or analysis that must be completed to satisfy existing requirements, for upper payment limits (UPL) and the supplemental payment reporting requirements under section 1903(bb) of the Act, as established by Division CC, Title II, Section 202 (section 202) of the Consolidated Appropriations Act, 2021 (CAA) (Public Law 116–260).

The proposed categories of services in this rule are delivered as ambulatory care where the patient does not need to be hospitalized to receive the service being delivered. Particularly for behavioral health services, we propose to narrow the scope to outpatient behavioral health services to maintain consistency within the categories of service included in the proposed comparative payment rate analysis and payment rate disclosure all being classified as ambulatory care. Additionally, as discussed further in this section of the proposed rule, we proposed that the comparative payment rate analysis would be conducted on a CPT/HCPCS code level, focusing on E/M codes. By narrowing the comparative payment rate analysis to E/M CPT/HCPCS codes, we are proposing States' analyses includes a broad range of core services which would cover a variety of commonly provided services that fall into the categories of service proposed in paragraphs (b)(2)(i) through (iii). To balance State administrative burden with our oversight of State compliance with the access requirement in section 1902(a)(30)(A) of the Act, we are also proposing to limit the services to those delivered primarily by physicians and NPPs in an office-based setting for primary care, obstetrical and gynecological, and outpatient behavioral health services. By excluding facility-based services, particularly inpatient behavioral health services, we intend to ensure the same E/M CPT/HCPCS code-level methodology could be used for all categories of services included in the proposed comparative payment rate analysis, including the use of E/M CPT/HCPCS codes used for outpatient behavioral health services. Rather than fee schedule rates, States often pay for inpatient behavioral health services using prospective payment rate methodologies, such as Diagnosis Related Groups (DRGs), or interim payment methodologies that are reconciled to actual cost.[145] These methodologies pay for a variety of services delivered by multiple providers that a patient receives during an inpatient hospital stay, rather than a single ambulatory service billed by a single provider using a single CPT/HCPCS code. Variations in these payment methodologies and what is included in the rate could complicate the proposed comparison to FFS Medicare rates for the services identified in paragraphs (b)(2)(i) through (iii) and could frustrate comparisons between States and sometimes even within a single State. Therefore, we do not believe the E/M CPT/HCPCS code level methodology proposed for the comparative payment rate analysis would be feasible for inpatient behavioral health services or other inpatient and facility-based services in general.

While we considered including inpatient behavioral health services as one of the proposed categories of services in the comparative payment rate analysis, we ultimately did not because we already collect and review Medicaid and Medicare payment rate data for inpatient behavioral health services through annual upper payment limits demonstrations (UPL) and supplemental payment reporting requirements under section 1903(bb) of the Act. SMDL 13–003 discusses the annual submission of State UPL demonstrations for inpatient hospital services, among other services, including a complete data set of payments to Medicaid providers and a reasonable estimate of what Medicare would have paid for the same services.[146] [147] UPL requirements go beyond the proposed requirements in this rule by requiring States to annually submit the following data for all inpatient hospital services, depending on the State's UPL methodology, on a provider level basis: Medicaid charges, Medicaid base payments, Medicaid supplemental payments, Medicaid discharges, Medicaid case mix index, Medicaid inflation factors, other adjustments to Medicaid payments, Medicaid days, Medicare costs, Medicare payments, Medicare discharges, Medicare case mix index, Medicare days, UPL inflation factors, Medicaid provider tax cost, and other adjustments to the UPL amount. If we proposed inpatient behavioral health services as one of the categories of services subject to the comparative payment rate analysis, then this proposed rule would require States to biennially submit the following data for only inpatient behavioral health services on a CPT/HCPCS code level basis: Medicaid base payment rates for select E/M CPT/HCPCS codes (accounting for rate variation based on population (pediatric and adult), provider type, and geographical location, as applicable), the corresponding Medicare payment rates, Medicaid base payment rate as a percentage of Medicare payment rate, and the number of Medicaid-paid claims. While the UPL requires aggregated total payment and cost data at the provider level and the comparative payment rate analysis would require more granular base payment data at the CPT/HCPCS code level, the UPL overall requires aggregate Medicaid provider payment data for both base and supplemental payments as well as more detailed data for calculating what Medicare would have paid as the upper payment amount. Therefore, proposing to require States include Medicaid and Medicare payment rate data for inpatient behavioral health services in the comparative payment rate analysis would be duplicative of existing UPL requirements that are inclusive of and more comprehensive than the payment information proposed in the comparative payment rate analysis.

Additionally, section 1903(bb) of the Act requires us to establish a Medicaid supplemental payment reporting system that collects detailed information on State Medicaid supplemental payments, including total quarterly supplemental payment expenditures per provider; information on base payments made to providers that have received a supplemental payment; and narrative information describing the methodology used to calculate a provider's payment, criteria used to determine which providers qualifies to receive a payment, and explanation describing how the supplemental payments comply with section 1902(a)(30)(A) of the Act. Section 1903(bb)(1)(C) of the Act requires us to make State-reported supplemental payment information publicly available. For States making or wishing to make supplemental payments, including for inpatient behavioral health services, States must report supplemental payment information to us and we must make that information public and, therefore, transparent. Though this proposed rule seeks to increase transparency, with the

[147] If a State's payment methodology describes payment at no more than 100 percent of the Medicare rate for the period covered by the UPL, then the State does not need to submit a demonstration. See FAQ ID: 92201. *https://www.medicaid.gov/faq/index.html?search_api_fulltext=ID%3A92201&sort_by=field_faq_date&sort_order=DESC.*

proposed provisions under § 447.203(b)(1) through (5) focusing on transparency of FFS Medicaid base payment rates, including inpatient behavioral health services as a category of service in § 447.203(b)(2) subject to the comparative payment rate analysis would be duplicative of the existing upper payment limit and supplemental payment reporting requirements, which capture and make transparent base and supplemental payment information for inpatient behavioral health services. However, we are seeking public comment regarding our decision not to include inpatient behavioral health services as one of the categories of services subject to the comparative payment rate analysis requirements in proposed § 447.203(b)(2) in the final rule, should we finalize the comparative payment rate analysis proposal.

The AMRP process also currently includes in § 447.203(b)(5)(ii)(D) pre- and post-natal obstetric services including labor and delivery; we are proposing to include these services in the comparative payment rate analysis requirements under proposed § 447.203(b)(2)(ii), but intend to broaden the scope of this category of services to include both obstetrical and gynecological services. This expanded proposed provision would capture a wider array of services, both obstetrical and gynecological services, for States and CMS to assess and ensure access to care in Medicaid FFS is at least as great for beneficiaries as is generally available to the general population in the geographic area, as required by with section 1902(a)(30)(A) of the Act. Lastly, similar to current § 447.203(b)(5)(ii)(E), which specifies that Home health services are included in the AMRP process, we are proposing to include personal care, home health aide, and homemaker services, provided by individual providers and providers employed by an agency. This refined proposed provision would help ensure a more standardized effort to monitor access across Medicaid delivery systems, including for Medicaid-covered LTSS. We believe this proposal also addresses public comments received in response to the February 2022 RFI.[148] Many commenters highlighted the workforce crisis among direct care workers and the impact on HCBS. Specifically, commenters indicated that direct care workers receive low payment rates, and for agency-employed direct care workers, home health agencies often cite low Medicaid payment as a barrier to raising wages for workers. Commenters suggested that States should be collecting and reporting to CMS the average of direct care worker wages while emphasizing the importance of data transparency and timeliness. We are responding to these public comments through this proposed rule by proposing to require States to transparently publish a payment rate disclosure that collects and reports the average hourly rate paid to individual providers and providers employed by an agency for services provided by certain direct care workers (personal care, home health aide, and homemaker services).

In public comments that we received during the public comment period for the 2015 final rule with comment period, many commenters requested that we require States to publish access to care analyses for pediatric services, including pediatric primary care, behavioral health, and dental care. At the time, we responded that pediatric services did not need to be specified in the required service categories because States were already required through § 447.203(b)(1)(iv) to consider the characteristics of the beneficiary population, ''including . . . payment variations for pediatric and adult populations,'' within the AMRPs.[149] Although we are proposing to eliminate the AMRP requirements, our proposed rule continues to include special considerations for pediatric populations that are addressed in the discussion of proposed paragraph (b)(2).

We are proposing to eliminate the following from the current AMRP process without replacement in the proposed comparative payment rate analysis requirement, § 447.203(b)(5)(ii)(F): Any additional types of services for which a review is required under current § 447.203(b)(6); § 447.203(b)(5)(ii)(G): Additional types of services for which the State or CMS has received a significantly higher than usual volume of beneficiary, provider or other interested party access complaints for a geographic area, including complaints received through the mechanisms for beneficiary input consistent with current § 447.203(b)(7); and § 447.203(b)(5)(ii)(H): Additional types of services selected by the State.

We propose to eliminate § 447.203(b)(5)(ii)(F) and (G) without a direct replacement because the proposed State Analysis Procedures for Rate Reduction or Restructuring described in § 447.203(c) are inclusive of and more refined than the current AMRP requirements for additional types of services for which a review is required under current § 447.203(b)(6). Specifically, as discussed later in this section, we are proposing in § 447.203(c)(1) that States seeking to reduce provider payment rates or restructure provider payments would be required to provide written assurance and relevant supporting documentation that three conditions are met to qualify for a streamlined SPA review process, including that required public processes yielded no significant access to care concerns for beneficiaries, providers, or other interested parties, or if such processes did yield concerns, that the State can reasonably respond to or mitigate them, as appropriate. If the State is unable to meet all three of the proposed conditions for streamlined SPA review, including the absence of or ability to appropriately address any access concern raised through public processes, then the State would be required to submit additional information to support that its SPA is consistent with the access requirement in section 1902(a)(30)(A) of the Act, as proposed in § 447.203(c)(2). We are proposing to modify this aspect of the current AMRP process, because our implementation experience since the 2017 SMDL has shown that States typically have been able to work directly with the public (including beneficiaries and beneficiary advocacy groups, and providers) to resolve access concerns, which emphasizes that public feedback continues to be a valuable source of knowledge regarding access in Medicaid. We believe this experience demonstrates that public processes that occur before the submission of a payment SPA to CMS often resolve initial access concerns, and where concerns persist, they will be addressed through the SPA submission and our review process, as provided in proposed § 447.203(c). Rather than services affected by proposed provider rate reductions or restructurings (current § 447.203(b)(5)(ii)(F)) and services for which the State or CMS received significantly higher than usual volume of complaints (current § 447.203(b)(5)(ii)(G)) being addressed through an AMRP, these services subject to rate reductions or restructurings and services where a high volume of complaints have been expressed would now be addressed by the State analysis procedures in proposed § 447.203(c). We believe this approach would ensure public feedback is fully considered in the context of a payment SPA, without the need to specifically require a

[149] 80 CFR 67576 at 67592.

comparative payment rate analysis for the service(s) subject to payment rate reduction or restructuring under proposed § 447.203(b)(2).

Lastly, we propose to eliminate current § 447.203(b)(5)(ii)(H), requiring the AMRP include analysis regarding ''Additional types of services selected by the State,'' without a direct replacement because our implementation experience has shown that the majority of States did not select additional types of service to include in their AMRPs beyond the required services § 447.203(b)(5)(ii)(A) through (G). When assessing which services to include in this proposed rule, we determined that the absence of an open-ended type of service option, similar to § 447.203(b)(5)(ii)(H) is unlikely to affect the quality of the analysis proposed in this rule and therefore, we are not including it in the proposed set of services required for the comparative payment rate analysis. These shifts in policy were informed by our implementation experience and our consideration of State concerns about the burden and value of the AMRP process.

In paragraph (b)(3), we propose that the State agency would be required to develop and publish, consistent with the publication requirements described in paragraph (b)(1) of this section for payment rate transparency data, a comparative payment rate analysis and payment rate disclosure. This comparative payment rate analysis is divided into two sections based on the categories of services and the organization of each analysis or disclosure. Paragraph (b)(3)(i) describes the comparative payment rate analysis for the categories of service described in paragraphs (b)(2)(i) through (iii): primary care services, obstetrical and gynecological services, and outpatient behavioral health services. Paragraph (b)(3)(ii) describes the payment rate disclosure for the categories of service described in paragraphs (b)(2)(iv): personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency.

Specifically, in paragraph (b)(3)(i), we propose that for the categories of service described in paragraphs (b)(2)(i) through (iii), the State's analysis would compare the State's Medicaid FFS payment rates to the most recently published Medicare payment rates effective for the same time period for the E/M CPT/HCPCS codes applicable to the category of service. The proposed comparative payment rate analysis of FFS Medicaid payment rates to FFS Medicare payment rates would be conducted on a code-by-code basis at the CPT/HCPCS code level using the most current set of codes published by us. It is intended to provide an understanding of how Medicaid payment rates compare to the payment rates established and updated under the FFS Medicare program.

We would expect to publish the E/M CPT/HCPCS codes to be used for the comparative payment rate analysis in subregulatory guidance along with the final rule, if this proposal is finalized. We propose that we would identify E/M CPT/HCPCS codes to be included in the comparative payment rate analysis based on the following criteria: the code is effective for the same time period of the comparative payment rate analysis; the code is classified as an E/M CPT/HCPCS code by the American Medical Association (AMA) CPT Editorial Panel; the code is included on the Berenson-Eggers Type of Service (BETOS) code list effective for the same time period as the comparative payment rate analysis and falls into the E/M family grouping and families and subfamilies for primary care services, obstetrics and gynecological services, and outpatient behavioral services; and the code has an A (Active), N (Non-Covered), R (Restricted), or T (Injections) code status on the Medicare PFS with a Medicare established relative value unit (RVU) and payment amount for the same time period of the comparative payment rate analysis.[150] [151] [152]

The CMS published list of E/M CPT/HCPCS codes subject to the comparative payment rate analysis would classify each E/M CPT/HCPCS code into a corresponding category of service as described in proposed § 447.203(b)(2)(i) through (iii). As previously discussed, by narrowing the comparative payment rate analysis to CMS-specified E/M CPT/HCPCS codes, we are proposing States' analyses include a broad range of core services which would cover a variety of commonly provided services that fall into the categories of service proposed in paragraphs (b)(2)(i) through (iii), while also limiting the services to those delivered primarily by physicians and NPPs in an office-based setting. Based on the categories of services specified in proposed § 447.203(b)(2)(i) through (iii), we expect the selected E/M CPT/HCPCS codes to fall under mandatory Medicaid benefit categories, and therefore, we expect that all States would cover and pay for the selected E/M CPT/HCPCS codes. To clarify, we did not narrow the list of E/M CPT/HCPCS codes to those with an A (Active), N (Non-Covered), R (Restricted), or T code status on the Medicare PFS with a Medicare established relative value unit (RVU) and payment amount on the basis of Medicare coverage of a particular code. We are cognizant that codes with N (Non-Covered), R (Restricted), or T code statuses have limited or no Medicare coverage, however, Medicare may establish RVUs and payment amounts for these codes. Therefore, when Medicare does establish RVUs and payment amounts for codes with N (Non-Covered), R (Restricted), or T (Injections) code statuses on the Medicare PFS, we are proposing to include these codes in the comparative payment rate analysis in order to ensure the analysis includes a comprehensive set of codes, for example pediatric services, including well child visits (for example, 99381 through 99384), that are commonly provided services that fall into the categories of service proposed in paragraphs (b)(2)(i) through (iii) and delivered primarily by physicians and NPPs in an office-based setting, as previously described.

As discussed later in this rule, we propose that the comparative payment rate analysis would be updated no less than every 2 years. Therefore, prior to the start of the calendar year in which States would be required to update their comparative payment rate analysis, we would intend to publish an updated list of E/M CPT/HCPCS codes for States to use for their comparative payment rate analysis updates through subregulatory guidance. The updated list of E/M CPT/HCPCS codes would incorporate changes made by to the AMA CPT Editorial Panel (such as additions, removals, or amendments to a code definition where there is a change in the set of codes classified as an E/M CPT/HCPCS code billable for primary care services, obstetrics and gynecological services, or outpatient behavioral services) and changes to the Medicare PFS based on the most recent Medicare PFS final rule (such as changes in code status or creation of Medicare-specific codes).[153]

We intend to publish the initial and subsequent updates of the list of E/M CPT/HCPCS codes subject to the comparative payment rate analysis in a timely manner that allows States approximately one full calendar year between the publication of the CMS-

published list of E/M CPT/HCPCS codes and the due date of the comparative payment rate analysis, if this proposal is finalized. We are aware that Medicare may issue a correction to the Medicare PFS after the final rule is in effect, and this correction may impact our published list of E/M CPT/HCPCS codes. In this instance, for codes included on our published list of E/M CPT/HCPCS codes that are affected by a correction to the most recent Medicaid PFS final rule, we may add or remove an E/M CPT/HCPCS code from the published list, as appropriate, depending on the change to the Medicare PFS. Alternatively, depending on the nature of the change, we would expect States to accurately identify which code(s) are used in the Medicaid program during the relevant period that best correspond to the CMS-identified E/M CPT/HCPCS code(s) affected by the Medicare PFS correction. We would expect States to rely on the CMS published list of E/M CPT/HCPCS codes subject to the comparative payment rate analysis for complying with the proposed requirements in paragraphs (b)(2) through (4).

We acknowledge that there are limitations to relying on E/M CPT/HCPCS codes to select payment rates for comparative payment rate analysis to aid States, CMS, and other interested parties in assessing if payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area. Providers across the country and within each State deliver a variety of services to patients, including individuals with public and private sources of coverage, and then bill them under a narrow subset of CPT/HCPCS codes that fit into the E/M classification as determined by the AMA CPT Editorial Panel. The actual services delivered can require a wide array of time, skills, and experience of the provider which must be represented by a single five digit code for billing to receive payment for the services delivered. While there are general principles that guide providers in billing the most representative E/M CPT/HCPCS code for the service they delivered, two providers might perform substantially similar activities when delivering services and yet bill different E/M CPT/HCPCS codes for those activities, or bill the same E/M CPT/HCPCS code for furnishing two very different services. The E/M CPT/HCPCS code itself is not a tool for capturing the exact service that was delivered, but medical documentation helps support the billing of a particular E/M CPT/HCPCS code.

Although they do not encompass all Medicaid services covered and paid for in the Medicaid program which are subject to the requirements in section 1902(a)(30)(A) of the Act, E/M CPT/HCPCS codes are some of the most commonly billed codes and including them in the comparative payment rate analysis would allow us to uniformly compare Medicaid payment rates for these codes to Medicare PFS rates. As such, to balance administrative burden on States and our enforcement responsibilities, we are proposing to use E/M CPT/HCPCS codes in the comparative payment rate analysis to define the parameters of our analysis to how much Medicaid and the FFS Medicare program would pay for services that can be classified into a particular E/M CPT/HCPCS code. We are seeking public comment on the proposed comparative payment rate analysis requirement in § 447.203(b)(3)(i), including the proposed requirement to conduct the analysis at the CPT/HCPCS code level, the proposed criteria that we would apply in selecting E/M CPT/HCPCS codes for inclusion in the required analysis, and the proposed requirement for States to compare Medicaid payment rates for the selected E/M CPT/HCPCS codes to the most recently published Medicare non-facility payment rate as listed on the Medicare PFS effective for the same time period which is discussed in more detail later in this rule when describing the proposed provisions of § 447.203(b)(3)(i)(C).

In paragraph (b)(3)(i), we further propose that the State's comparative payment rate analysis would be required to meet the following requirements: (A) the analysis must be organized by category of service as described in § 447.203(b)(2)(i) through (iii); (B) the analysis must clearly identify the Medicaid base payment rates for each E/M CPT/HCPCS code identified by us under the applicable category of service, including, if the rates vary, separate identification of the payment rates by population (pediatric and adult), provider type, and geographical location, as applicable; (C) the analysis must clearly identify the Medicare PFS non-facility payment rates effective for the same time period for the same set of E/M CPT/HCPCS codes, and for the same geographical location as the Medicaid base payment rates, that correspond to the Medicaid payment rates identified under paragraph (b)(3)(i)(B); (D) the analysis must specify the Medicaid payment rate identified under paragraph (b)(3)(i)(B) as a percentage of the Medicare payment rate identified under paragraph (b)(3)(i)(C) for each of the services for which the Medicaid payment rate is published under paragraph (b)(3)(i)(B); and (E) the analysis must specify the number of Medicaid-paid claims within a calendar year for each of the services for which the Medicaid payment rate is published under paragraph (b)(3)(i)(B). We are seeking public comment on the proposed requirements and content of the items in proposed § 447.203(b)(3)(i)(A) through (E).

In paragraph (b)(3)(i)(A), we propose to require States to organize their comparative payment rate analysis by the service categories described in paragraphs (b)(2)(i) through (iii) of this section. This proposed requirement is included to ensure the analysis breaks out the payment rates for primary care services, obstetrical and gynecological services, and outpatient behavioral health services separately for individual analyses of the payment rates for each CMS-selected E/M CPT/HCPCS code, grouped by category of service. We are seeking public comment on the proposed requirement for States to break out their payment rates at the CPT/HCPCS code level for primary care services, obstetrical and gynecological services, and outpatient behavioral health services, separately, in the comparative payment rate analysis as specified in proposed § 447.203(b)(3)(i)(A).

In paragraph (b)(3)(i)(B), after organizing the analysis by § 447.203(b)(2)(i) through (iii) categories of service and CMS-specified E/M CPT/HCPCS code, we propose to require States to clearly identify the Medicaid base payment rate for each code, including, if the rates vary, separate identification of the payment rates by population (pediatric and adult), provider type, and geographical location, as applicable. We propose that the Medicaid base payment rate in the comparative payment rate analysis would only include the State's Medicaid fee schedule rate, that is, the State's Medicaid base rate for each E/M CPT/HCPCS code. By specifying the services included in the comparative payment rate analysis by E/M CPT/HCPCS code, we expect the Medicaid base payment rate in the comparative payment rate analysis would only include the State's Medicaid fee schedule rate for that particular E/M CPT/HCPCS code as published on the State's Medicaid fee schedule effective for the same time period covered by the comparative payment rate analysis. As an example,

the State's Medicaid fee schedule rate as published on the Medicaid fee schedule effective for the time period of the comparative payment rate analysis for 99202 is listed as $50.00. This rate would be the Medicaid base payment rate in the State's comparative payment rate analysis for comparison to the Medicare non-facility rate which is discussed later in this section.

Medicaid base payment rates are typically determined through one of three methods: the resource-based relative value scale (RBRVS), a percentage of Medicare's fee, or a State-developed fee schedule using local factors.[154] The RBRVS system, initially developed for the Medicare program, assigns a relative value to every physician procedure based on the complexity of the procedure, practice expense, and malpractice expense. States may also adopt the Medicare fee schedule rate, which is also based on RBRVS, but select a fixed percentage of the Medicare amount to pay for Medicaid services. States can develop their own PFSs, typically determined based on market value or an internal process, and often do this in situations where there is no Medicare or private payer equivalent or when an alternate payment methodology is necessary for programmatic reasons. States often adjust their payment rates based on provider type, geography, site of services, patient age, and in-State or out-of-State provider status. Additionally, Medicaid base payment rates can be paid to physicians in a variety of settings, including clinics, community health centers, and private offices.

We acknowledge that only including Medicaid base payments in the analysis does not necessarily represent all of a provider's revenues that may be related to furnishing services to Medicaid beneficiaries, and that other revenues not included in the proposed comparative analysis may be relevant to a provider's willingness to participate in Medicaid (such as beneficiary cost sharing payments, disproportionate share hospital payments for qualifying hospitals, supplemental payments, etc.). Public comments we received on the 2011 proposed rule and responded to in the 2015 final rule with comment period regarding the AMRPs expressed differing views regarding which provider ''revenues'' should be included within comparisons of Medicaid to Medicare payment rates. One commenter ''noted that the preamble of the 2011 proposed rule refers to 'payments' and 'rates' interchangeably but that courts have defined payments to include all Medicaid provider revenues rather than only Medicaid FFS rates.'' The commenter stated that if the final rule consider[ed] all Medicaid revenues received by providers, States may be challenged to make any change to the Medicaid program that might reduce provider revenues.'' [155] This proposed rule narrows the Medicaid base payment rates to the amount listed on the State's fee schedule in order for the comparative payment rate analysis to accurately and analogously compare Medicaid fee schedule rates to Medicare fee schedule rates as listed on the Medicare PFS.

We believe this proposal represents the best way to create a consistent metric across States against which to evaluate access. To be specific, we are not proposing to include supplemental payments in the comparative payment rate analysis. Requiring supplemental payment data be collected and included under this rule would be duplicative of existing requirements. State supplemental payment and DSH payment data are already subject to our review in various forms, such as through DSH audits for DSH payments, and through annual upper payment limits demonstrations, and through supplemental payment reporting under section 1903(bb) of the Act.[156] [157] As such, we do not see a need to add additional reporting requirements concerning supplemental payments as part of the proposals in this rulemaking to allow us the opportunity to review the data. Also, supplemental payments are often made for specific Medicaid-covered services and targeted to a subset of Medicaid-participating providers; not all Medicaid-participating providers, and not all providers of a given Medicaid-covered service, may receive supplemental payments in a State. Therefore, including supplemental payments in the comparative payment rate analysis would create additional burden for States without then also providing an accurate benchmark of how payments may affect beneficiary access due to the potentially varied and uneven distribution of supplemental payments. Accordingly, we are proposing to require that States conduct the comparative payment rate analysis for only Medicaid base payment rates for selected E/M CPT/HCPCS codes. For each proposed category of service listed in paragraphs (b)(2)(i) through (iii), this would result in a transparent and parallel comparison of Medicaid base payment rates that all Medicaid-participating providers of the service would receive to the payment rates that Medicare would pay for the same E/M CPT/HCPCS codes.

Additionally, in paragraph (b)(3)(i)(B), we propose that, if the States' payment rates vary, the Medicaid base payment rates must include a breakdown by payment rates paid to providers delivering services to pediatric and adult populations, by provider type, and geographical location, as applicable, to capture this potential variation in the State's payment rates. This proposed provision to breakdown the Medicaid payment rate is first stated in proposed paragraph (b)(2) and carried through in proposed paragraph (b)(3)(i)(B) to provide clarity to States about how the Medicaid payment rate should be reported in the comparative payment rate analysis.

In paragraph (b)(3)(i)(C), we propose to require States' comparative payment rate analysis clearly identify the Medicare non-facility payment rates effective for the same time period for the same set of E/M CPT/HCPCS codes, and for the same geographical location, that correspond to the Medicaid payment rates identified under paragraph (b)(3)(i)(B), including, separate identification of the payment rates by provider type. We are not proposing to establish a threshold percentage of Medicare non-facility payment rates that States would be required to meet when setting their Medicaid payment rates. Rather, we are proposing to use Medicare non-facility payment rates as listed on the Medicare PFS as a benchmark to which States would compare their Medicaid payment rates to inform their and our assessment of whether the State's payment rates are compliant with section 1902(a)(30)(A) of the Act. Benchmarking against FFS Medicare, another of the nation's large public health coverage programs, serves as an important data point in determining whether payment rates are likely to be sufficient to ensure access for Medicaid beneficiaries at least as great as for the general population in the geographic area, and whether any identified access concerns may be related to payment sufficiency. Similar to Medicaid, Medicare provides health coverage for a significant number of

Available at *https://www.medicaid.gov/federal-policy-guidance/downloads/smd21006.pdf.*

Americans across the country. In December 2022, total Medicaid enrollment was at 85.2 million individuals [158] while total Medicare enrollment was at 65.4 million individuals.[159] [160] Both the Medicare and Medicaid programs cover and pay for services provided to beneficiaries residing in every State and territory of the United States. As previously described, Medicare non-facility payment rates as listed on the Medicare PFS for covered, non-covered, and limited coverage services generally are determined on a national level as well as adjusted to reflect the variation in practice costs from one geographical location to another. Medicare also ensures that their payment rate data are publicly available in a format that can be analyzed. The accessibility and consistency of the Medicare non-facility payment rates as listed on the Medicare PFS, compared to negotiated private health insurance payment rates that typically are considered proprietary information and, therefore, not generally available to the public, makes Medicare non-facility payment rates as listed on the Medicare PFS an available and reliable comparison point for States to use in the comparative payment rate analysis.

Additionally, Medicare is widely accepted nationwide according to recent findings from the National Electronic Health Records Survey. In 2019, 95 percent of physicians accepting new patients overall, and 89 percent of office-based physicians, were accepting new Medicare patients, and the percentage of office-based physicians accepting new Medicare patients has remained stable since 2011 when the value was 88 percent, with modest fluctuations in the years in between.[161] In regards to physician specialties that align with the proposed categories of services in this rule, 81 percent of general practice/family medicine physicians and 81 percent of physicians specializing in internal medicine were accepting new Medicare patients, 93 percent of physicians specializing obstetrics and gynecology were accepting new Medicare patients, and 60 percent of psychiatrists were accepting new Medicare patients in 2019. Although the percentage of psychiatrists who accept Medicare is lower than other types physicians providing services included in the comparative payment rate analysis, this circumstance is not unique to Medicare amongst payers. For example, 60 percent of psychiatrists were also accepting new privately insured patients in 2019. Therefore, the decreased rate of acceptance by psychiatrists relative to certain other physician specialists does not make Medicare an inappropriate benchmark when evaluated against other options for comparison.[162]

Historically, Medicare has low rates of physicians formally opting out of the Medicare program with 1 percent of physicians consistently opting out between 2013 and 2019 and of that 1 percent of physicians opting out of Medicare, 42 percent were psychiatrists.[163] This information suggests that Medicare's payment rates generally are consistent with a high level of physician willingness to accept new Medicare patients, with the vast majority of physicians willing to accept Medicare's payment rates. For the reasons previously described, we are proposing to use Medicare non-facility payment rates as listed on the Medicare PFS as a national benchmark for States to compare their Medicaid payment rates in the comparative payment rate analysis because we believe that the Medicare payment rates for these services are likely to serve as a reliable benchmark for a level of payment sufficient to enlist providers to furnish the relevant services to an individual. We are seeking public comment on the proposed used of Medicare non-facility payment rates as listed on the Medicare PFS as a benchmark for States to compare their Medicaid payment rates to in the comparative payment rate analysis requirements in proposed § 447.203(b)(3)(i) to help assess if Medicaid payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area.

Specifically, in paragraph (b)(3)(i)(C), we propose to require States to compare their Medicaid payment rates to the Medicare non-facility payment rates effective for the same time period as the same set of E/M CPT/HCPCS codes paid under Medicaid as specified under paragraph (b)(3)(i)(B) of this section, including, separate identification of the payment rates by provider type. We propose to require States to compare their payment rates to the corresponding Medicare PFS non-facility rates because we are seeking a payment analysis that compares Medicaid payment rates to Medicare payment rates at comparable location of service delivery (that is, in a non-clinic, non-hospital, ambulatory setting such as a physician's office). States often pay physicians operating in an office based on their Medicaid fee schedule whereas they may pay physicians operating in hospitals or clinics using an encounter rate. The Medicaid fee schedule rate typically reflects payment for an individual service that was rendered, for example, an office visit that is billed as a single CPT/HCPCS code. An encounter rate often reflects reimbursement for total facility specific costs divided by the number of encounters to calculate a per visit or per encounter rate that is paid to the facility for all services received during an encounter, regardless of which specific services are provided during a particular encounter. For example, the same encounter rate may be paid for a beneficiary who has an office visit with a physician, a dental examination and cleaning from a dentist, and laboratory tests and for a beneficiary who receives an office visit with a physician and x-rays. Encounter rates are typically paid to facilities, such as hospitals, FQHCs, RHCs, or clinics, many of which function as safety net providers that offer a wide variety of medical services. Within the Medicaid program, encounter rates can vary

[158] *https://www.medicaid.gov/medicaid/national-medicaid-chip-program-information/downloads/December-2022-medicaid-chip-enrollment-trend-snapshot.pdf.*

[159] Total Medicare enrollment equals the Tot_Benes variable in the Medicare Monthly Enrollment Data for December (Month) 2022 (Year) at the national level (Bene_Geo_Lvl). Tot_Benes is a count of all Medicare beneficiaries, including beneficiaries with Original Medicare and beneficiaries with Medicare Advantage and Other Health Plans. We utilized the count of all Medicare beneficiaries because Original Medicare, Medicare Advantage, and other Health Plans offer fee-for-service payments to providers. See the Medicare Monthly Enrollment Data Dictionary for more information about the variables in the Medicare Monthly Enrollment Data: *https://data.cms.gov/sites/default/files/2023-02/1ec24f76-9964-4d00-9e9a-78bd556b7223/Medicare%20Monthly%20Enrollment_Data_Dictionary%2020230131_508.pdf.*

[163] Physicians and practitioners who do not wish to enroll in the Medicare program may ''opt-out'' of Medicare. This means that neither the physician, nor the beneficiary submits the bill to Medicare for services rendered. Instead, the beneficiary pays the physician out-of-pocket and neither party is reimbursed by Medicare. A private contract is signed between the physician and the beneficiary that states, that neither one can receive payment from Medicare for the services that were performed. See 2022 opt-out affidavit data published by the Centers for Medicare & Medicaid services: *https://data.cms.gov/provider-characteristics/medicare-provider-supplier-enrollment/opt-out-affidavits.*

widely in the rate itself and services paid for through the encounter rate. Proposing States demonstrate the economy and efficiency of their encounter rates would be an entirely different exercise to the fee schedule rate comparison proposed in this rule because encounter rates are often based on costs unique to the provider, and States often require providers to submit cost reports to States for review to support payment of the encounter rate. Comparing cost between the Medicaid and Medicare program would require a different methodology, policies, and oversight than what is proposed in this rule due to the differences within and between each program. While the Medicare program has a broad, national policy for calculating encounter rates for providers, including prospective payment systems for hospitals, FQHCs, and other types of facilities, Medicare calculates these encounter rates differently than States may calculate analogous rates in Medicaid. Therefore, proposing States disaggregate each of their encounter rates and services covered in each encounter rate to compare to Medicare's encounter rates would be challenging for States.

From that logic, we likewise determined that the Medicare non-facility payment rates as listed on the Medicare PFS rate afforded the best point of comparison because it is the most accurate and most analogous comparison of a service-based access analysis using Medicare non-facility payment rates as listed on the Medicare PFS as a benchmark to compare Medicaid fee schedule rates on a CPT/HCPCS code level basis, as opposed to an encounter rate which could include any number of services or specialties. The Medicare non-facility payment rate as listed on the Medicare PFS is described as ''. . . the fee schedule amount when a physician performs a procedure in a non-facility setting such as the office'' and ''[g]enerally, Medicare gives higher payments to physicians and other health care professionals for procedures performed in their offices [compared to those performed elsewhere] because they must supply clinical staff, supplies, and equipment.'' [164] As such, we believe the Medicaid fee schedule best represents the payment intended to pay physicians and non-physician practitioners for delivery of individual services in an office (non-facility) setting, and the Medicare non-facility payment rate as listed on the Medicare PFS represents the best equivalent to that amount and consideration.

For the purposes of the comparative payment rate analysis, we would expect States to source the Medicare non-facility payment rate from the published Medicare fee schedule amounts on the Medicare PFS through one or both of the following sources: the Physician Fee Schedule Look-Up Tool [165] on *cms.gov* or Excel file downloads of the Medicare PFS Relative Value Files [166] for the relevant calendar year from *cms.gov.* We encourage States to begin sourcing Medicare non-facility payment rates from the Physician Fee Schedule Look-Up Tool and utilize the Physician Fee Schedule Guide for instructions on using the Look-Up Tool. When codes are not available in the Look-Up Tool, we would direct States to the Excel file downloads of the Medicare PFS Relative Value Files where States can find necessary information for calculating Medicare non-facility payment rates.

As described in the Medicare Claims Processing Manual, most physician services are paid according to the Medicare PFS and the fee schedule amounts for a particular procedure code (including HCPCS, CPT, and CDT) are computed using a resource-based formula made up of three components of a procedure's RVU: physician work, practice expense, and malpractice as well as geographical differences in each locality area of the country.[167] The resource-based formula also includes adjustments to reflect the variation in practice costs from one geographical location to another. Medicare establishes a geographic practice cost index (GPCI) for every Medicare payment locality for each of the three components of a procedure's RVU for physician work, practice expense, and malpractice and applies the GPCIs in the calculation of a fee schedule payment amount by multiplying the RVU for each component times the GPCI for that component.[168]

Medicare also includes adjustments to the fee schedule amounts, for example, based on site of service (non-facility versus facility setting), where the rate, facility or non-facility, that a physician service is paid under the PFS is determined by the place of service (POS) code that is used to identify the setting where the beneficiary received the face-to-face encounter with the billing practitioner. We are proposing States use the Medicare non-facility payment rate as listed on the Medicare PFS in the comparative payment rate analysis. For codes that are not available in the Look-Up Tool, we would direct States to the Excel file downloads of the Medicare PFS Relative Value Files which include the RVUs, GPCI, and the ''National Physician Fee Schedule Relative Value File Calendar Year 2023'' file which contains the associated relative value units (RVUs), a fee schedule status indicator, and various payment policy indicators needed for payment adjustment (*i.e.,* payment of assistant at surgery, team surgery, bilateral surgery, etc.). We expect States to utilize the formula for the Non-Facility Pricing Amount in ''National Physician Fee Schedule Relative Value File Calendar Year 2023'' file to calculate the ''Non-Facility Price'' using the RVUs, GPCIs, and conversion factors for codes not available in the Look-Up Tool. For codes available in the Look-Up Tool, we expect States to specifically use the Medicare payment rates listed under the ''Non-Facility Price'' header as described on the Medicare PFS. The Non-Facility Price is the established Medicare payment rate as listed on the Medicare PFS which includes the amount that Medicare pays for the claim and any applicable co-insurance and deductible amounts owed by the patient.

Medicaid fee-schedule rates should be representative of the total computable payment amount a provider would expect to receive as payment-in-full for the provision of Medicaid services to individual beneficiaries. 42 CFR 447.15 defines payment-in-full as ''the amounts paid by the agency plus any deductible, coinsurance or copayment required by the plan to be paid by the individual.'' Therefore, the State's Medicaid base payment rate used for comparison should be inclusive of total base payment from the Medicaid agency plus any applicable coinsurance and deductibles to the extent that a beneficiary is expected to be liable for those payments. If a State Medicaid fee schedule does not include these additional beneficiary cost-sharing payment amounts, then the Medicaid fee schedule amounts would need to be modified to align with the inclusion of expected beneficiary cost sharing in Medicare's non-facility payment rates as listed on the Medicare PFS.[169]

[169] *According to the Medicare Physician Fee Schedule Guide, for most codes, Medicare pays*

In paragraph (b)(3)(i)(C), we propose that the Medicare non-facility payment rates must be effective for the same time period for the same set of E/M CPT/HCPCS codes that correspond to the Medicaid base payment rates identified under paragraph (b)(3)(i)(B) of this section. We included this language to ensure the comparative payment rate analysis is as accurate and analogous as possible by proposing that the Medicaid and Medicare payment rates that are effective during the same time period for the same set of E/M CPT/HCPCS codes. As later described in this rule, in paragraph (b)(4), we propose the initial comparative payment rate analysis and payment rate disclosure of its Medicaid payment rates would be a retroactive analysis of payment rates that are in effect as of January 1, 2025, with the analysis and disclosure published no later than January 1, 2026. For example, the first comparative payment rate analysis a State develops and publishes would compare Medicaid base payment rates in effect as of January 1, 2025, to the Medicare non-facility payment rates effective January 1, 2025, to ensure the Medicare non-facility payment rates are effective for the same time period for the same set of E/M CPT/HCPCS codes that correspond to the Medicaid base payment rates identified under paragraph (b)(3)(i)(B) of this section.

Additionally, in paragraph (b)(3)(i)(C), we propose that the Medicare non-facility payment rates as listed on the Medicare PFS used for the comparison must be for the same geographical location as the Medicaid base payment rates. For States that pay Medicaid payment rates based on geographical location (for example, payment rates that vary by rural or non-rural location, by zip code, or by metropolitan statistical area), we propose that States comparative payment rate analysis would need to utilize the Medicare non-facility payment rates as listed on the Medicare PFS for the same geographical location as the Medicaid base payment rates to achieve an equivalent comparison. We would expect States to review Medicare's published listing of the current PFS locality structure organized by State, locality area, and when applicable, counties assigned to each locality area and identify the comparable Medicare locality area for the same geographical area as the Medicaid base payment rates.[170]

We recognize that States that make Medicaid payment based on geographical location may not use the same locality areas as Medicare. For example, a State may use its own State-determined geographical designations, resulting in 5 geographical areas in the State for purposes of Medicaid payment while Medicare recognizes 3 locality areas for the State based on Metropolitan Statistical Area (MSA) delineations determined by the US Office of Management and Budget (OMB) and are the result of the application of published standards to Census Bureau data.[171] In this instance, we would expect the State to determine an appropriate method to accomplish the comparative payment rate analysis that aligns the geographic area covered by each payer's rate as closely as reasonably feasible. For example, if the State identifies two geographic areas for Medicaid payment purposes that are contained almost entirely within one Medicare geographic area, then the State reasonably could determine to use the same Medicare non-facility payment rate as listed on the Medicare PFS in the comparative payment rate analysis for each Medicaid geographic area. As another example, if the State defined a single geographic area for Medicaid payment purposes that contained two Medicare geographic areas, then the State might determine a reasonable method to weight the two Medicare payment rates applicable within the Medicaid geographic area, and then compare the Medicaid payment rate for the Medicaid-defined geographic area to this weighted average of Medicare payment rates. Alternatively, as discussed in the next paragraph, the State could determine to use the unweighted arithmetic mean of the two Medicare payment rates applicable within the Medicaid-defined geographic area. We are seeking public comment on the proposed use of Medicare non-facility payment rates as listed on the Medicare PFS as a benchmark for States to compare their Medicaid payment rates to in the comparative payment rate analysis requirements in proposed § 447.203(b)(3)(i) to help assess if Medicaid payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area.

We are aware that States may not determine their payment rates by geographical location. For States that do not pay Medicaid payment rates based on geographical location, we propose that States compare their Medicaid payment rates (separately identified by population, pediatric and adult, and provider type, as applicable) to the Statewide average of Medicare non-facility payment rates as listed on the Medicare PFS for a particular CPT/HCPCS code. The Statewide average of the Medicare non-facility payment rates as listed on the Medicare PFS for a particular CPT/HCPCS code would be calculated as a simple average or arithmetic mean where all Medicare non-facility payment rates as listed on the Medicare PFS for a particular CPT/HCPCS code for a particular State would be summed and divided by the number of all Medicare non-facility payment rates as listed on the Medicare PFS for a particular CPT/HCPCS code for a particular State. This calculated Statewide average of the Medicare non-facility payment rates as listed on the Medicare PFS would be calculated for each CPT/HCPCS code subject to the comparative payment rate analysis using the Non-Facility Price for each locality in the State rates as listed on the Medicare PFS. As previously mentioned, Medicare has published a listing of the current PFS locality structure organized by State, locality area, and when applicable, counties assigned to each locality area and we would expect States to utilize this listing to identify the Medicare locality areas in their State. For example, the Specific Medicare Administrative Contractor (MAC) for Maryland is 12302 and there are two Specific Locality codes, 1230201 for BALTIMORE/SURR. CNTYS and 1230299 for REST OF STATE. When using the Medicare Physician Fee Schedule Look Up Tool to identify the Medicare Non-Facility Price(s) for CY 2023 for 99202 in the Specific MAC locality code for Maryland (12302 MARYLAND), the following search results are populated: Medicare Non-Facility Price of $77.82 for BALTIMORE/SURR. CNTYS and $74.31 for REST OF STATE.[172] These two Medicare Non-Facility Price(s) would be averaged to obtain a calculated Statewide average for Maryland of $76.07.

For States that do not determine their payment rates by geographical location, we propose that States would use the Statewide average of the Medicare Non-Facility Price(s) as listed on the PFS, as previously described, because it ensures consistency across all States' comparative payment rate analysis,

80% of the amount listed and the beneficiary is responsible for 20 percent.

aligns with the geographic area requirement of section 1902(a)(30)(A) of the Act, and ensures the Medicare non-facility payment rates as listed on the Medicare PFS that States use in their comparative payment rate analysis accurately reflect how Medicare pays for services. This proposal ensures that all States' comparative payment rate analyses consistently incorporate Medicare geographical payment rate adjustments as proposed in paragraph (b)(3)(i)(C). As previously discussed, we propose that States that do pay varying rates by geographical location would need to identify the comparable Medicare locality area for the same geographical area as their Medicaid base payment rates. However, for States that do not pay varying rates by geographical location, at the operational level, the State is effectively paying a Statewide Medicaid payment rate, regardless of geographical location, that cannot be matched to a Medicare non-facility payment rate in a comparable Medicare locality area for the same geographical area as the Medicaid base payment rates. Therefore, in order consistently apply the proposed provision that the Medicare non-facility payment rate must be for the same geographical location as the Medicaid base payment rates, States that do not pay varying rates by geographical location would be required to calculate a Statewide average of the Medicare non-facility payment rate to compare the State's Statewide Medicaid payment rate.

Additionally, we propose that States that do not determine their payment rates by geographical location should use the Statewide average of the Medicare non-facility payment rates as listed on the Medicare PFS to align the implementing regulatory text with the statute's geographic area requirement in section 1902(a)(30)(A) of the Act. Section 1902(a)(30)(A) of the Act requires that Medicaid payments are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area. Therefore, the proposed provisions of this rule, which are implementing section 1902(a)(30)(A) of the Act, must include a method of ensuring we have sufficient information for determining sufficiency of access to care as compared to the general population in the geographic area. As we have proposed to use Medicare non-facility payment rates as a benchmark for comparing Medicaid base payment rates, we believe that utilizing a Statewide average of Medicare non-facility payment rates as listed on the Medicare PFS for States that do not pay varying rates by geographical location would align the geographic area requirement of section 1902(a)(30)(A) of the Act, treating the entire State (throughout which the Medicaid base payment rate applies uniformly) as the relevant geographic area.

We considered requiring States weight the Statewide average of the Medicare non-facility payment rates by the proportion of the Medicare beneficiary population covered by each rate, but we did not propose this due to the additional administrative burden this would create for States complying with the proposed comparative payment rate analysis as well as limited availability of Medicare beneficiary and claims data necessary to weight the Statewide average of the Medicare non-facility payment rates as described above. As proposed, States that do not determine their payment rates by geographical location would be required to consider Medicare's geographically determined payment rates by Statewide average of the Medicare non-facility payment rates. We believe that proposing an additional step to weight the Statewide average by the proportion of the Medicare beneficiary population covered by each rate would create would not result in a practical version of the Medicare non-facility payment rate for purposes of the comparative payment rate analysis. Additionally, proposing only States that do not determine their payment rates by geographical location would result in additional administrative burden that is not imposed on States who do determine their payment rates by geographical location. Additionally, in order to accurately weight the Statewide average of the Medicare non-facility payment rates by the proportion of the Medicare beneficiary population covered by each rate, States would likely require Medicare-paid claims data for each code subject to the comparative payment rate analysis, broken down by each of the comparable Medicare locality areas for the same geographical area as the Medicaid base payment rates that are included in the Statewide average of Medicare non-facility payment rates. While total Medicare beneficiary enrollment data broke down by State and county level is publicly available on *data.cms.gov,* Medicare-paid claims data broken down by the Medicare locality areas used in the Medicare PFS and by code level is not published by CMS and would be inaccessible for the State to utilize in weighting the Statewide average of the Medicare non-facility payment rates by the proportion of the Medicare beneficiary population covered by each rate. As proposed, we believe that States that do not determine their payment rates by geographical location calculating simple Statewide average of the Medicare non-facility rates in their State ensures consistency across all States' comparative payment rate analysis, aligns with the geographic area requirement of section 1902(a)(30)(A) of the Act, and ensures the Medicare non facility payment rates as listed on the Medicare PFS that States use in their comparative payment rate analysis accurately reflect how Medicare pays for services. We are seeking public comment regarding our decision not to propose requiring States that do not pay varying Medicaid rates by geographical location weight the Statewide average of the Medicare non-facility payment rates by the distribution of Medicare beneficiaries in the State.

Furthermore, in paragraph (b)(3)(i)(C), we propose that the Medicare non-facility payment rate must separately identify the payment rates by provider type. We previously discussed that some States and Medicare pay a percentage less than 100 percent of their fee schedule payment rates to NPPs, including, for example, nurse practitioners, physician assistants, and clinical nurse specialists. To ensure a State's comparative payment rate analysis is as accurate as possible when comparing their Medicaid payment rates to Medicare, we are proposing that States include a breakdown of Medicare's non-facility payment rates by provider type. The proposed breakdown of Medicare's payment rates by provider type would be required for all States, regardless of whether or how the State's Medicaid payment rates vary by provider type, because it ensures the comparative payment rate analysis accurately reflects this existing Medicare payment policy on the Medicare side of the analysis. Therefore, every comparative payment rate analysis would include the following Medicare non-facility payment rates for the same set of E/M CPT/HCPCS codes paid under Medicaid as described in § 447.203(b)(3)(i)(B): the non-facility payment rate as listed on Medicare PFS rate as the Medicare payment rate for physicians and the non-facility payment rate as listed on Medicare PFS rate multiplied by 0.85 as the Medicare payment rate for NPPs.

As previously mentioned in this proposed rule, Medicare pays nurse practitioners, physician assistants, and clinical nurse specialists at 85 percent of the Medicare PFS rate. Medicare

implements a payment policy where the fee schedule amounts, including the Medicare non facility payment rates, as listed on the Medicare PFS are reduced to 85 percent when billed by NPPs, including nurse practitioners, physician assistants, and clinical nurse specialists, whereas physicians are paid 100 percent of the fee schedule amounts as listed on the Medicare PFS.[173] As proposed, States' comparative payment rate analysis would need to match their Medicaid payment rates for each provider type to the corresponding Medicare non-facility payment rates for each provider type, regardless of the State paying varying or the same payment rates to their providers for the same service. As an example of a State that pays varying rates based on provider type, if a State's Medicaid fee schedule lists a rate of $100.00 when a physician delivers and bills for 99202, then the $100.00 Medicaid base payment rate would be compared to 100 percent of the Medicare non-facility payment rate as listed on the Medicare PFS. If the same State's Medicaid fee schedule lists a rate of $75 when a nurse practitioner delivers and bills for 99202 (or the State's current approved State plan language states that a nurse practitioner is paid 75 percent of the State's Medicaid fee schedule rate), then the $75 Medicaid base payment rate would be compared to the Medicare non-facility payment rate as listed on the Medicare PFS multiplied by 0.85. Both Medicare non-facility payments rates would need to account for any applicable geographical variation, including the Non-Facility Price as listed on the Medicare PFS for each relevant locality area or the calculated Statewide average of the Non-Facility Price as listed on the Medicare PFS for all relevant areas of a State, as previously discussed in this section, for an accurate comparison to the corresponding Medicaid payment rate. Alternatively, if a State pays the same $80 Medicaid base payment rate for the service when delivered by physicians and by nurse practitioners, then the $80 would be listed separately for physicians and nurse practitioners as the Medicaid base payment rate and compared to the Medicare non-facility payment rate as listed on the Medicare PFS for physicians and the Medicare non-facility payment rate as listed on the Medicare PFS multiplied by 0.85 for nurse practitioners.

This granular level of comparison provides States with the opportunity to benchmark their Medicaid payment rates against Medicare as part of the State's and our process for ensuring compliance with section 1902(a)(30)(A) of the Act. For example, a State's comparative payment rate analysis may show that the State's Medicaid base payment rate for physicians is 80 percent of the Medicare non-facility payment rate and their Medicaid base payment rate for nurse practitioners is 71 percent of the Medicare non-facility payment rate for NPPs, because the State pays a reduced rate to nurse practitioners. Although Medicare also pays a reduced rate to nurse practitioners, the reduced rate the State pays to nurse practitioners compared to Medicare's reduced rate is still a lower percentage than the physician rate. However, another State's comparative payment rate analysis may show that the State's Medicaid base payment rate for physicians is 95 percent of the Medicare non-facility payment rate and their Medicaid base payment rate for nurse practitioners is 110 percent of the Medicare non-facility payment rate because the State pays all providers the same Medicaid base payment rate while Medicare pays a reduced rate of 85 percent of the Medicare non-facility payment rate as listed on the Medicare PFS when the service is furnished by an NPP. By conducting this level of analysis through the comparative payment rate analysis, States would be able to pinpoint where there may be existing or potential future access to care concerns rooted in payment rates. We are seeking public comment on the proposed requirement for States to compare their Medicaid payment rates to the Medicare non-facility payment rate as listed on the Medicare PFS, effective for the same time period for the same set of E/M CPT/HCPCS codes, and for the same geographical location as the Medicaid base payment rates, that correspond to the Medicaid base payment rates identified under paragraph (b)(3)(i)(B) of this section, including, separate identification of the payment rates by provider type, as proposed in § 447.203(b)(3)(i)(C).

In paragraph (b)(3)(i)(D), we propose to require States specify the Medicaid base payment rate identified under proposed § 447.203(b)(3)(i)(B) as a percentage of the Medicare non-facility payment rate identified under proposed § 447.203(b)(3)(i)(C) for each of the services for which the Medicaid base payment rate is published under proposed § 447.203(b)(3)(i)(B). For each E/M CPT/HCPCS code that we select, we propose that States would calculate each Medicaid base payment rate as specified in paragraph (b)(3)(i)(B) as a percentage of the corresponding Medicare non-facility payment rate specified in paragraph (b)(3)(i)(C). Both rates would be required to be effective for the same time period of the comparative payment rate analysis. As previous components of the proposed comparative payment rate analysis have considered variance in payment rates based on population the service is delivered to (adult or pediatric), provider type, and geographical location to extract the most granular and accurate Medicaid and Medicare payment rate data, we propose that States would calculate the Medicaid base payment rate as a percentage of the Medicare non-facility payment rate in the comparative payment rate analysis to obtain an informative metric that can be used in the State's and our assessment of whether the State's payment rates are compliant with section 1902(a)(30)(A) of the Act. As previously discussed, benchmarking against Medicare serves as an important data point in determining whether payment rates are likely to be sufficient to ensure access for Medicaid beneficiaries at least as great as for the general population in the geographic area, and whether any identified access concerns may be related to payment sufficiency. We propose that States would calculate their Medicaid payment rates as a percentage of the Medicare non-facility payment rate because it is a common, simple, and informative statistic that can provide us with a gauge of how Medicaid payment rates compare to Medicare non-facility payment rates in the same geographic area. Initially and over time, States, CMS, and other interested parties would be able to compare the State's Medicaid payment rates as a percentage of Medicare's non-facility payment rates to identify how the percentage changes over time, in view of changes that may take place to the Medicaid and/or the Medicare payment rate. Being able to track and analyze the change in percentage over time would help States and CMS identify possible access concerns that may be related to payment insufficiency.

The organization and content of the comparative payment rate analysis, including the expression of the Medicaid base payment rate as a percentage of the Medicare payment rate, can provide us with a great deal of information about access in the State. For example, we would be able to identify when and how the Medicaid base payment rate as a percentage of the Medicare non-facility payment rate for E/M CPT/HCPCS codes for primary care

[173] *https://www.cms.gov/files/document/physician-fee-schedule-guide.pdf.*

services may decrease over time if Medicare adjusts its rates and a State does not, and use this information to more closely examine for possible access concerns. This type of analysis would provide us with actionable information to help ensure consistency with section 1902(a)(30)(A) of the Act by using Medicare non-facility payment rates paid across the same geographical areas of the State as a point of comparison for payment rate sufficiency as a critical element of beneficiary access to care. When explaining the rationale for proposing to use Medicare non-facility payment rates for comparison earlier in this rule, we emphasized the ability to demonstrate to States that certain Medicaid payment rates have not kept pace with changes to Medicare non-facility payment rates and how the comparative payment rate analysis would help them identify areas where they also might want to consider rate increases that address market changes. We are seeking public comment on the proposed requirement for States to calculate their Medicaid payment rates as a percentage of the Medicare non-facility payment rate for each of the services for which the Medicaid base payment rate is published under proposed paragraph (b)(3)(i)(B), as described in proposed § 447.203(b)(3)(i)(D). We are also seeking public comment on any challenges States might encounter when comparing their Medicaid payment rates to Medicare non-facility payment rates under proposed § 447.203(b)(3)(i)(D), particularly for any of the proposed categories of service in paragraphs (b)(2)(i) through (iii), as well as suggestions for an alternative comparative analysis that might be more helpful, or less burdensome and equally helpful, for States, CMS, and other interested parties to assess whether a State's Medicaid payment rates are consistent with the access standard in section 1902(a)(30)(A) of the Act.

We are aware that provider payment rates are an important factor influencing beneficiary access; as expressly indicated in section 1902(a)(30)(A) of the Act, insufficient provider payment rates are not likely to enlist enough providers willing to serve Medicaid beneficiaries to ensure broad access to care; however, there may be situations where access issues are principally due to other causes. For example, even if Medicaid payment rates are generally consistent with amounts paid by Medicare (and those amounts have been sufficient to ensure broad access to services for Medicare beneficiaries), Medicaid beneficiaries may have difficulty scheduling behavioral health care appointments because the overall number of behavioral health providers within a State is not sufficient to meet the demands of the general population. Therefore, a State's rates may be consistent with the requirements of section 1902(a)(30)(A) of the Act even when access concerns exist, and States and CMS may need to examine other strategies to improve access to care beyond payment rate increases. By contrast, comparing a State's Medicaid behavioral health payment rates to Medicare may demonstrate that the State's rates fall far below Medicare non-facility payment rates, which would likely impede beneficiaries from accessing needed care when the demand already exceeds the supply of providers within a State. In that case, States may need to evaluate budget priorities and take steps to ensure behavioral health rates are consistent with section 1902(a)(30)(A) of the Act.

Lastly, in paragraph (b)(3)(i)(E), we propose to require States to specify in their comparative payment rate analyses the number of Medicaid-paid claims and the number of Medicaid enrolled beneficiaries who received a service within a calendar year for each of the services for which the Medicaid base payment rate is published under paragraph (b)(3)(i)(B). The previous components of the comparative payment rate analysis focus on the State's payment rate for the E/M CPT/HCPCS code and comparing the Medicaid base payment rate to the Medicare non-facility payment rate for the same code (separately, for each Medicaid base payment rate by population (adult or pediatric), provider type, and geographic area, as applicable). This component examines the Medicaid-paid claims volume of each E/M CPT/HCPCS code included in the comparative payment rate analysis relative to the number of Medicaid enrolled beneficiaries receiving each service within a calendar year. We propose to limit the claims volume data to Medicaid-paid claims, and the number of beneficiaries would be limited to Medicaid-enrolled beneficiaries who received a service in the calendar year of the comparative payment rate analysis, where the service would fall into the list of CMS-identified E/M CPT/HCPCS code(s). In other words, a beneficiary would be counted in the comparative payment rate analysis for a particular calendar year when the beneficiary received a service that is included in one of the categories of services described in paragraphs (b)(2)(i) through (iii) for which the State has a Medicaid-based payment rate (the number of Medicaid-enrolled beneficiaries who received a service). A claim would be counted in the comparative payment rate analysis for a particular calendar year when that beneficiary had a claim submitted on their behalf by a provider who billed one of the codes from the list of CMS-identified E/M CPT/HCPCS code(s) to the State and the State paid the claim (number of Medicaid-paid claims). With this proposal, we are seeking to ensure the comparative payment rate analysis reflects actual services received by beneficiaries and paid for by the State, or realized access.[174]

We considered but did not propose States identify the number of unique Medicaid-paid claims and the number of unique Medicaid-enrolled beneficiaries who received a service within a calendar year for each of the services for which the Medicaid base payment rate is published pursuant to paragraph (b)(3)(i)(B). We considered this detail in order to identify the unique, or deduplicated, number of beneficiaries who received a service that falls into one of the categories of services described in in paragraph (b)(2)(i) through (iii) in a calendar year. For example, if a beneficiary has 6 visits to their primary care provider in a calendar year and the provider bills 6 claims with 99202 for the same beneficiary, then the beneficiary and claims for 99202 would only be counted as one claim and one beneficiary. Therefore, we chose not to propose this aspect because we intend for the comparative payment rate analysis to capture the total amount of actual services received by beneficiaries and paid for by the State. We are seeking public comment regarding our decision not to propose States identify the number of unique Medicaid-paid claims and the number of unique Medicaid enrolled beneficiaries who received a service within a calendar year for each of the services for which the Medicaid base payment rate is published pursuant to paragraph (b)(3)(i)(B) in comparative payment rate analysis as proposed § 447.203(b)(3)(i)(E).

We also considered but did not propose States identify the total Medicaid-enrolled population who could potentially receive a service within a calendar year for each of the services for which the Medicaid base

[174] Andersen, R.M., and P.L. Davidson. 2007. Improving access to care in America: Individual and contextual indicators. payment rate is published pursuant to paragraph (b)(3)(i)(B), in addition to the proposing States identify the number of Medicaid-enrolled beneficiaries who received a service. This additional data element in the comparative payment rate analysis would reflect the number of Medicaid-enrolled beneficiaries who could have received a service, or potential access, in comparison to the number of Medicaid-enrolled beneficiaries who actually received a service. We did not propose this aspect because this could result in additional administrative burden on the State, as we already collect and publish similar data through Medicaid and CHIP Enrollment Trends Snapshots published on *Medicaid.gov.* We are also seeking public comment regarding our decision not to propose States identify the total Medicaid-enrolled population who could receive a service within a calendar year for each of the services for each of the services for each of the services for which the Medicaid base payment rate is published pursuant to paragraph (b)(3)(i)(B) in the comparative payment rate analysis as proposed § 447.203(b)(3)(i)(E).

We propose to include beneficiary and claims information in the comparative payment rate analysis to contextualize the payment rates in the analysis, and to be able to identify longitudinal changes in Medicaid service volume in the context of the Medicaid beneficiary population receiving services, since utilization changes could be an indication of an access to care issue. For example, a decrease in the number of Medicaid-paid claims for primary care services furnished to Medicaid beneficiaries in an area (when the number of Medicaid-enrolled beneficiaries who received primary care services in the area is constant or increasing) could be an indication of an access to care issue. Without additional context provided by the number of Medicaid enrolled beneficiaries who received a service, changes in claims volume could be attributed to a variety of changes in the beneficiary population, such as a temporary loss of coverage when enrollees disenroll and then re-enroll within a short period of time.

Further, if the Medicaid base payment rate for the services with decreasing Medicaid service volume has failed to keep pace with the corresponding Medicare non-facility payment rate over the period of decrease in utilization (as reflected in changes in the Medicaid base payment rate expressed as a percentage of the Medicare non-facility payment rate as required under proposed § 447.203(b)(3)(i)(D)), then we would be concerned and would further scrutinize whether any access to care issue might be caused by insufficient Medicaid payment rates for the relevant services. With each biennial publication of the State's comparative payment rate analysis, as proposed in § 447.203(b)(4), discussed later in this section, States and CMS would be able to compare the number of paid claims in the context of the number of Medicaid enrolled beneficiaries receiving services within a calendar year for the services subject to the comparative payment rate analysis with previous years' comparative payment rate analyses. Collecting and comparing the number of paid claims data in the context of the number of Medicaid enrolled beneficiaries receiving services alongside Medicaid base payment rate data may reveal trends where an increase in the Medicaid base payment rate is correlated with an increase in service volume and utilization, or vice versa with a decrease in the Medicaid base payment rate is correlated with a decrease in service volume and utilization. As claims utilization and number of Medicaid enrolled beneficiaries receiving services are only correlating trends, we acknowledge that there may be other contextualizing factors outside of the comparative payment rate analysis that affect changes in service volume and utilization and we would (and would expect States and other interested parties to) take such additional factors into account in analyzing and ascribing significance to changes in service volume and utilization. We are seeking public comment on the proposed requirement for States to include the number of Medicaid-paid claims and the number of Medicaid enrolled beneficiaries who received a service within a calendar year for which the Medicaid base payment rate is published under proposed paragraph (b)(3)(i)(B), as specified in proposed § 447.203(b)(3)(i)(E).

We believe the comparative payment rate analysis proposed in paragraph (b)(3) is needed to best enable us to ensure State compliance with the requirement in section 1902(a)(30)(A) of the Act that payments are sufficient to enlist enough providers so that care and services are available to Medicaid beneficiaries at least to the extent they are available to the general population in the geographic area. As demonstrated by the findings of Sloan, et al.,[175] which have since been supported and expanded upon by numerous researchers, multiple studies examining the relationship between Medicaid payment and physician participation,[176] [177] at the State level,[178] and among specific provider types,[179] [180] have found a direct, positive association between Medicaid payment rates and provider participation in the Medicaid program. While multiple factors may influence provider enrollment (such as administrative burden), section 1902(a)(30)(A) of the Act specifically concerns the sufficiency of provider payment rates. Given this statutory requirement, a comparison of Medicaid payment rates to other payer rates is an important barometer of whether State payment policies are likely to support the statutory standard of ensuring access for Medicaid beneficiaries such that covered care and services are available to them at least to the extent that the same care and services are available to the general population in the geographic area.

The AMRP requirements currently address this standard under section 1902(a)(30)(A) of the Act by requiring States to compare Medicaid payment rates to the payment rates of other

public and private payers in current § 447.203(b)(1)(v) and (b)(3). While we are proposing to eliminate the AMRP requirements with this proposed rule, we believe that our proposal to require States to compare their Medicaid payment rates for services under specified E/M CPT/HCPCS codes against Medicare non-facility payment rates for the same codes, as described in § 447.203(b)(3), would well position States and CMS to continue to meet the statutory access requirement. Some studies examining the relationship between provider payments and various access measures have quantified the relationship between the Medicaid-Medicare payment ratio and access measures. Two studies observed that increases in the Medicaid-Medicare payment ratio is associated with higher physician acceptance rates of new Medicaid patients and with an increased probability of a beneficiary having an office-based physician as the patient's usual source of care.[181] [182] These studies led us to conclude that Medicare non-facility payment rates are likely to be a sufficient benchmark for evaluating access to care, particularly ambulatory physician services, based on provider payment rates.

By comparing FFS Medicaid payment rates to corresponding FFS Medicare non-facility payment rates, where Medicare is a public payer with large populations of beneficiaries and participating providers whose payment rates are readily available, we aim to establish a uniform benchmarking approach that allows for more meaningful oversight and transparency and reduces the burden on States and CMS relative to the current AMRP requirements that do not impose specific methodological standards for comparing payment rates and that contemplate the availability of private payer rate information that has proven difficult for States to obtain due to its often proprietary nature. This aspect of the proposal specifically responds to States' expressed concerns that the AMRP requirement to include ''actual or estimated levels of provider payment available from other payers, including other public and private payers'' was challenging to accomplish based on the general unavailability of this information, as discussed elsewhere in this proposed rule.

Following the 2011 proposed rule, and as addressed by us through public comment response in the 2015 final rule with comment period, States expressed concerns that private payer payment rates were proprietary information and not available to them and that large private plans did not exist within some States so there were no private payer rates to compare to, therefore, the State would need to rely on State employee health plans or non-profit insurer rates.[183] States also expressed that other payer data, including public and private payers, in general may be unsound for comparisons because of a lack of transparency about the payment data States would have compared their Medicaid payment rates to. Since 2016, we have learned a great deal from our implementation experience of the AMRP process. We have learned that very few States were able to include even limited private payer data in their AMRPs. States that were able include private payer data were only able to do so because the State had existing Statewide all payer claiming or rate-setting systems, which gave them access to private payer data in their State, or the State previously based their State plan payment rates off of information about other payers (such as the American Dental Association's Survey of Dental Fees) that gave them access to private payer data.[184] Based on our implementation experience and concerns from States about the current requirement in § 447.203(b)(1)(v) to obtain private payer data, we are proposing to require States only compare their Medicaid payment rates to Medicare's, for which payment data are readily and publicly available.

Next, in paragraph (b)(3)(ii), we propose that for each category of services described in proposed paragraph (b)(2)(iv), the State agency would be required to publish a payment rate disclosure that expresses the State's payment rates as the average hourly payment rates, separately identified for payments made to individual providers and to providers employed by an agency, if the rates differ. The payment rate disclosure would be required to meet specified requirements. The reason for including this proposal builds on our justification for including personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency in this proposed rule, which is to remain consistent with the proposed HCBS provisions at § 441.311(d)(2) and (e) and take specific action regarding direct care workers per Section 2402(a) of the Affordable Care Act. HCBS and direct care workers that deliver these services are unique to Medicaid and often not covered by other payers, which is why we are proposing a different analysis of payment rates for providers of these services that does not involve a comparison to Medicare. As previously stated, Medicare covers part-time or intermittent home health aide services (only if a Medicare beneficiary is also getting other skilled services like nursing and/or therapy at the same time) under Medicare Part A (Hospital Insurance) or Medicare Part B (Medical Insurance); however, Medicare does not cover personal care or homemaker services. Therefore, comparing personal care and homemaker services to Medicare, as we proposed in paragraph (b)(3)(i) for other specified categories of services, would not be feasible for States, and a comparison of Medicaid home health aide average hourly payment rates to analogous rates for Medicare would be of limited utility given the differences in circumstances when Medicaid and Medicare may pay for such services.

As previously discussed, private payer data are often considered proprietary and not available to States, thereby eliminating private payers as feasible point of comparison. Even if private payer payment rate data were more readily available, like Medicare, many private payers do not cover HCBS as HCBS is unique to the Medicaid program, leaving Medicaid as the largest or the only payer for personal care, home health aide, and homemaker services. Given Medicaid's status as the most important payer for HCBS, we believe that scrutiny of Medicaid HCBS payment rates themselves, rather than a comparison to other payer rates that frequently do not exist, is most important in ascertaining whether such Medicaid payment rates are sufficient to enlist adequate providers so that the specified services are available to Medicaid beneficiaries at least to the same extent as to the general population in the geographic area. We acknowledge that individuals without insurance may self-pay for medical services provided in their home or community; however, similar to private payer data, self-pay data is unlikely to be available to States. Because HCBS coverage is unique to Medicaid, Medicaid beneficiaries are generally the only individuals in a given geographic area with access to HCBS. Through the proposed payment rate disclosure, Medicaid payments rates

[184] *https://www.medicaid.gov/sites/default/files/2019-12/co-amrp-2016.pdf, https://www.medicaid.gov/sites/default/files/2019-12/md-amrp-16.pdf, https://www.medicaid.gov/sites/default/files/2019-12/sd-amrp-16.pdf.*

would be transparent and comparable among States and would assist States to analyze if and how their payment rates are compliant with section 1902(a)(30)(A) of the Act.

As noted previously in this section, we propose to require States to express their rates separately as the average hourly payments made to individual providers and providers employed by an agency, if the rates differ, as applicable for each category of service specified in proposed § 447.203(b)(2)(iv). We believe expressing the data in this manner would best account for variations in types and levels of payment that may occur in different settings and employment arrangements. Individual providers are often self-employed or contract directly with the State to deliver services as a Medicaid provider while providers employed by an agency are employed by the agency which works directly with the Medicaid agency to provide Medicaid services. These differences in employment arrangements often include differences in the hourly rate a provider would receive for services delivered, for example, providers employed by an agency typically receive benefits, such as health insurance, and the cost of those benefits are factored into the hourly rate that the State pays for the services delivered by providers employed by an agency (even though the employed provider does not retain the entire amount as direct monetary compensation). However, these benefits are not always available for individual providers who may need to separately purchase a marketplace health plan or be able to opt into the State-employee health plan, for example. Therefore, the provider employed by an agency potentially could receive a higher hourly rate because benefits are factored into the hourly rate they receive for delivering services, whereas the individual provider might be paid a rate that does not reflect employment benefits.

With States expressing their payment rates separately as the average hourly payment rate made to individual and agency employed providers for personal care, home health aide, and homemaker services, States, CMS, and other interested parties would be able to compare payment rates among State Medicaid programs. Such comparisons may be particularly relevant for States in close geographical proximity to each other or that otherwise may compete to attract providers of the services specified in proposed paragraph (b)(2)(iv) or where such providers may experience similar costs or other incentives to provide such services. For example, from reviewing all States' payment rate analyses for personal care, home health aide, and homemaker services, we would be able to learn that two neighboring States have similar hourly rates for providers of these services, but a third neighboring State has much lower hourly rates than both of its neighbors. This information could highlight a potential access issue, since providers in the third State might have an economic incentive to move to one of the two neighboring States where they could receive higher payments for furnishing the same services. Such movement could result in beneficiaries in the third State having difficulty accessing covered services, compared to the general population in the tri-State geographic area.

Additionally in paragraph (b)(3)(ii), we propose that the State's payment rate disclosure must meet the following requirements: (A) the State must organize the payment rate disclosure by category of service as specified in proposed paragraph (b)(2)(iv); (B) the disclosure must identify the average hourly payment rates, including, if the rates vary, separate identification of the average hourly payment rates for payments made to individual providers and to providers employed by an agency by population (pediatric and adult), provider type, and geographical location, as applicable; and (C) the disclosure must identify the number of Medicaid-paid claims and the number of Medicaid enrolled beneficiaries who received a service within a calendar year for each of the services for which the Medicaid base payment rate is published under proposed paragraph (b)(3)(ii)(B). We are seeking public comment on the proposed requirements and content of the items in proposed § 447.203(b)(3)(ii)(A) through (C).

In paragraph (b)(3)(ii)(A), we propose to require States to organize their payment rate disclosures by each of the categories of services specified in proposed paragraph (b)(2)(iv), that is, to break out the payment rates for personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency, separately for individual analyses of the payment rates for each category of service and type of employment structure. We are seeking public comment on the proposed requirement for States to break out their payment rates for personal care, home health aide, and homemaker services separately for individual analyses of the payment rates for each category of service in the comparative payment rate analysis, as described in proposed § 447.203(b)(3)(ii)(A).

In paragraph (b)(3)(ii)(B), we propose to require States identify in their disclosure the Medicaid average hourly payment rates by applicable category of service, including, if the rates vary, separate identification of the average hourly payment rates for payments made to individual providers and to providers employed by an agency, as well as by population (pediatric and adult), provider type, and geographical location, as applicable. Given that direct care workers deliver unique services in Medicaid that are often not covered by other payers, we are proposing to require a payment rate disclosure, instead of comparative payment rate analysis. To be clear, we are not proposing to require a State's payment rate disclosure for personal care, home health aide, and homemaker services be broken down and organized by E/M CPT/HCPCS codes, nor are we proposing States compare their Medicaid payment rates to Medicare for these services.

We propose to require States calculate their Medicaid average hourly payment rates made to providers of personal care, home health aide, and homemaker services, separately, for each of these categories of services, by provider employment structures (individual providers and agency employed providers). For each of the categories of services in paragraph (b)(3)(ii)(A), one Medicaid average hourly payment rate would be calculated as a simple average or arithmetic mean where all payment rates would be adjusted to an hourly figure, summed, then divided by the number of all hourly payment rates. As an example, the State's Medicaid average hourly payment rate for personal care providers may be $10.50 while the average hourly payment rate for a home health aide is $15.00. A more granular analysis may show that within personal care providers receiving a payment rate of $10.50, an individual personal care provider is paid an average hourly payment rate of $9.00, while a personal care provider employed by an agency is paid an average hourly payment rate of $12.00 for the same type of service. Similarly for home health aides, a more granular analysis may show that within home health aides receiving a payment rate of $15.00, an individual home health aide is paid an average hourly payment rate of $13.00, while a home health aide employed by an agency is paid an average hourly payment rate of $17.00.

We understand that States may set payment rates for personal care, home health aide, and homemaker services based on a particular unit of time for delivering the service, and that time

may not be in hourly increments. For example, different States might pay for personal care services using 15-minute increments, on an hourly basis, through a daily rate, or based on a 24-hour period. By proposing to require States to represent their rates as an hourly payment rate, we would be able to standardize the unit (hourly) and payment rate for comparison across States, rather than comparing to Medicare. To the extent a State pays for personal care, home health aide, or homemaker services on an hourly basis, the State would simply use that hourly rate in its Medicaid average hourly payment rate calculation of each respective category of service. However, if for example a State pays for personal care, home health aide, or homemaker services on a daily basis, we would expect the State to divide that rate by the number of hours covered by the rate.

Additionally, and similar to proposed paragraph (b)(3)(i)(E), we propose in paragraph (b)(3)(ii)(B), that, if the States' Medicaid average hourly payment rates vary, the rates must separately identify the average hourly payment rates for payments made to individual providers and to providers employed by an agency, by population (pediatric and adult), provider type, and geographical location, as applicable. We include this proposed provision with the intent of ensuring the payment rate disclosure contains the highest level of granularity in each element. As previously discussed, States may pay providers different payment rates for billing the same service based on the population being served, provider type, and geographical location of where the service is delivered. We are seeking public comments on the proposed requirement for States to calculate the Medicaid average hourly payment rate made separately to individual providers and to agency employed providers, which accounts for variation in payment rates by population (pediatric and adult), provider type, and geographical location, as applicable, in the payment rate disclosure as discussed in this section about proposed § 447.203(b)(3)(ii)(B).

In paragraph (b)(3)(ii)(C), we propose to require that the State disclosure must identify the number of Medicaid-paid claims and the number of Medicaid enrolled beneficiaries who received a service within a calendar year for each of the services for which the Medicaid payment rate is published under proposed paragraph (b)(3)(ii)(B), so that States, CMS, and other interested parties would be able to contextualize the previously described payment rate information with information about the volume of paid claims and number of beneficiaries receiving personal care, home health aide, and homemaker services.

We propose that the number of Medicaid-paid claims and number of Medicaid enrolled beneficiaries who received a service be reported under the same breakdown as paragraph (b)(3)(ii), where the State provides the number of paid claims and number of beneficiaries receiving services from individual providers versus agency-employed providers of personal care, home health aide services, and homemaker services. As with the comparative payment rate analysis, we are proposing the claims volume data would be limited to Medicaid-paid claims and the number of beneficiaries would be limited to Medicaid enrolled beneficiaries who received a service in the calendar year of the payment rate disclosure, where the services would fall into the categories of service for which the average hourly payment rates are published pursuant to paragraph (b)(3)(ii)(B). In other words, beneficiary would be counted in the payment rate disclosure for a particular calendar year when the beneficiary received a service that is included in one of the categories of services described in paragraph (b)(2)(iv) that the State has calculated average hourly payment rates for (the number of Medicaid enrolled beneficiaries who received a service). A claim would be counted when that beneficiary had a claim submitted on their behalf by a provider who billed for one of the categories of services described in paragraph (b)(2)(iv) and the State paid the claim (number of Medicaid-paid claims). We are seeking to ensure the payment rate disclosure reflects actual services received by beneficiaries and paid for by the State, or realized access.[185]

Similar to the comparative payment rate analysis, we considered but did not propose States identify the number of unique Medicaid-paid claims and the number of unique Medicaid enrolled beneficiaries who received a service within a calendar year for each of the services for which the average hourly payment rates are published pursuant to paragraph (b)(3)(ii)(B). We also considered but did not propose States identify the total Medicaid enrolled population who could receive a service within a calendar year for each of the services for which the average hourly payment rates are published pursuant to paragraph (b)(3)(ii)(B) in addition to the proposing States identify the number of Medicaid enrolled beneficiaries who received a service. As discussed in the comparative payment rate discussion, we are requesting public comment on our decision not to require these levels of detail for the payment rate disclosure. Also similar to the comparative payment rate analysis requirement under proposed paragraph (b)(3)(i)(E), this disclosure element would help States, CMS, and other interested parties identify longitudinal changes in Medicaid service volume and beneficiary utilization changes that may be an indication of an access to care issue. Again, with each biennial publication of the State's comparative payment rate analysis and payment rate disclosure, States and CMS would be able to compare the number of Medicaid-paid claims and number of Medicaid enrolled beneficiaries who received a service within a calendar year for services subject to the payment rate disclosure with previous years' disclosures. Collecting and comparing data on the number of paid claims and number of Medicaid enrolled beneficiaries alongside Medicaid average hourly payment rate data may reveal trends, such as where a provider type that previously delivered a low volume of services to beneficiaries has increased their volume of services delivered after receiving an increase in their payment rate.

We acknowledge that one limitation of using the average hourly payment rate is that the statistic is sensitive to highs and lows so one provider receiving an increase in their average hourly payment rate would bring up the average overall while other providers may not see an improvement. As these are only correlating trends, we also acknowledge that there may be other contextualizing factors outside of the payment rate disclosure that may affect changes in service volume and utilization. We are seeking public comments on the proposed requirement for States to include the number of Medicaid-paid claims and number of Medicaid enrolled beneficiaries who received a service within a calendar year for which the Medicaid payment rate is published under paragraph (b)(3)(ii)(B), as specified in proposed § 447.203(b)(3)(ii)(C).

Additionally, in recognition of the importance of services provided to individuals with intellectual or developmental disabilities and in an effort to remain consistent with the proposed HCBS provisions at

[185] Andersen, R.M., and P.L. Davidson. 2007. Improving access to care in America: Individual and contextual indicators. In Changing the U.S. health care system: Key issues in health services policy and management, 3rd edition, Andersen, R.M., T.H. Rice, and G.F. Kominski, eds. San Francisco, CA: John Wiley & Sons.

§ 441.302(k)(3)(i), we are seeking public comment on whether we should propose a similar provision that would require at least 80 percent of all Medicaid FFS payments with respect to personal care, home health aide, and homemaker services provided by individual providers and providers employed by an agency must be spent on compensation for direct care workers.

In paragraph (b)(4), we propose to require the State agency to publish the initial comparative payment rate analysis and payment rate disclosure of its Medicaid payments in effect as of January 1, 2025, as required under § 447.203(b)(2) and (b)(3), by no later than January 1, 2026. Thereafter, the State agency would be required to update the comparative payment rate analysis and payment rate disclosure no less than every 2 years, by no later than January 1 of the second year following the most recent update. The comparative payment rate analysis and payment rate disclosure would be required to be published consistent with the publication requirements described in proposed § 447.203(b)(1) for payment rate transparency data.

As previously discussed in this proposed rule, we propose that the Medicaid payment rates included in the initial comparative payment rate analysis and payment rate disclosure would be those in effect as of January 1, 2025. Specifically, for the comparative payment rate analysis, we propose States would conduct a retrospective analysis to ensure CMS can publish the list of E/M CPT/HCPCS codes for the comparative payment rate analysis and States have timely access to all information required to complete comparative payment rate analysis. As described in paragraph (b)(3)(i)(C), we propose States would compare their Medicaid payment rates to the Medicare non-facility payment rates effective for the same time period for the same set of E/M CPT/HCPCS codes, therefore, the Medicare non-facility payment rates as published on the Medicare PFS for the same time period as the State's Medicaid payment rates would need to be available to States in a timely manner for their analysis and disclosure to be conducted and published as described in paragraph (b)(4). Medicare publishes its annual PFS final rule in November of each year and the Medicare non-facility payment rates as listed on the Medicare PFS are effective the following January 1. For example, the 2025 Medicare PFS final rule would be published in November 2024 and the Medicare non-facility payment rates as listed on the Medicare PFS would be effective January 1, 2025, so States would compare their Medicaid payment rates effective as of January 1, 2025, to the Medicare PFS payment rates effective January 1, 2025 when submitting the initial comparative payment rate analysis that is due on January 1, 2026.

Also previously discussed in this proposed rule, we intend to publish the initial and subsequent updates to the list of E/M CPT/HCPCS codes subject to the comparative payment rate analysis in a timely manner that allows States approximately one full calendar year between the publication of the CMS-published list of E/M CPT/HCPCS codes and the due date of the comparative payment rate analysis. Because the list of E/M CPT/HCPCS codes is derived from the relevant calendar year's Medicare PFS, the Medicare non-facility payment rates the State would need to include in their comparative payment rate analysis would also be available to States. We expect approximately one full calendar year of the CMS-published list of E/M CPT/HCPCS codes and Medicare non-facility payment rates as listed on the Medicare PFS being available to States would provide the States with sufficient time to develop and publish their comparative payment rate analyses as described in paragraph (b)(4). We considered proposing the same due date and effective time period for Medicaid and Medicare payment rates where the initial publication of the comparative payment rate analysis would be due January 1, 2026, and would contain payment rates effective January 1, 2026; however, we believe a two month time period between Medicare publishing its PFS payment rates in November and the PFS payment rates taking effect on January 1 would be an insufficient amount of time for CMS to publish the list of E/M CPT/HCPCS codes subject to the comparative payment rate analysis and for States to develop and publish their comparative payment rate analyses by January 1. While the proposed payment rate disclosure would not require a comparison to Medicare, we are proposing to use the same due date and effective period of Medicaid payment rates for both the proposed comparative payment rate analysis and payment rate disclosure to maintain consistency.

We expect the proposed initial publication timeframe to provide sufficient time for States to gather necessary data, perform, and publish the first required comparative payment rate analysis and payment rate disclosure. We determined this timeframe was sufficient based on implementation experience from the AMRP process, where we initially proposed a 6-month timeframe between the January 4, 2016 effective date of the 2015 final rule with comment period in the **Federal Register**, and the due date of the first AMRP, July 1, 2016. At the time, we believed that this timeframe would be sufficient for States to conduct their first review for service categories newly subject to ongoing AMRP requirements; however, after receiving several public comments from States on the 2015 final rule with comment period that State agency staff may have difficulty developing and submitting the initial AMRPs within the July 1, 2016 timeframe, we modified the policy as finalized in the 2016 final rule.[186] Specifically, we revised the deadline for submission of the initial AMRP until October 1, 2016 and we made a conforming change to the deadline for submission in subsequent review periods at § 447.203(b)(5)(i) to October 1.[187] We also found that, despite this additional time, some State were still late in submitting their first AMRP to us. Therefore, we believe that proposing an initial publication date of January 1, 2026, thereby providing States with approximately 2 years between the effective date of the final rule, if this proposal is finalized, and the due date of the first comparative payment rate analysis and payment rate disclosure, would be sufficient. In alignment with the proposed payment rate transparency requirements, if this rule is finalized at a time that does not allow for States to have a period of 2 years from the effective date of the final rule and the proposed January 1, 2026 date to publish the initial comparative payment rate analysis and payment rate disclosure, then we would propose an alternative date of July 1, 2026 for the initial comparative payment rate analysis and payment rate disclosure and for the initial comparative payment rate analysis and payment rate disclosure to include Medicaid payment rates approved as of July 1, 2025 to allow more time for States to comply with the initial comparative payment rate analysis and payment rate disclosure requirements. We acknowledge that the date of the initial comparative payment rate analysis and payment rate disclosure publication is subject to change based on the final rule publication schedule and effective date, if this rule is finalized. If further adjustment is necessary beyond the July 1, 2026 timeframe to allow more time for States to comply with the payment rate transparency requirements, then we would adjust date of the initial payment

rate transparency publication in 6-month intervals, as appropriate.

Also, in § 447.203(b)(4), we propose to require the State agency to update the comparative payment rate analysis and payment rate disclosure no less than every 2 years, by no later than January 1 of the second year following the most recent update. We propose that the comparative payment rate analysis and payment rate disclosure would be required to be published consistent with the publication requirements described in proposed paragraph (b)(1) for payment rate transparency data. After publication of the 2011 proposed rule, and as we worked with States to implement the current AMRP requirements after publication of the 2015 final rule with comment period, many States expressed concerns that the current requirements of § 447.203, specifically those in current § 447.203(b)(6) that impose additional analysis and monitoring requirements in the case of provider rate reductions or restructurings that could result in diminished access, are overly burdensome. As described in the 2018 and 2019 proposed rules, ''a number of States expressed concern regarding the administrative burden associated with the requirements of § 447.203, particularly those States with a very high beneficiary enrollment in comprehensive, risk-based managed care and a limited number of beneficiaries receiving care through a FFS delivery system.'' [188] [189]

Additionally, from our implementation experience, we learned that the triennial due date for updated AMRPs required by current § 447.203(b)(5)(ii) was too infrequent for States or CMS to identify and act on access concerns identified by the AMRPs. For example, one State timely submitted its initial ongoing AMRP on October 1, 2016, consistent with the requirements in § 447.203(b)(1) through (5), and timely submitted its first AMRP update (the next ongoing AMRP) 3 years later, on October 1, 2019. The 2016 AMRP included data about beneficiary utilization and Medicaid-participating providers accepting new Medicaid patients from 2014 to 2015 (the most recent data available at the time the State was developing the AMRP), while the 2019 AMRP update included similar data for 2016 to 2017 (the most recent data then available). The 2019 AMRP showed that the number of Medicaid-participating providers accepting new Medicaid patients significantly dropped in 2016, and the State received a considerable number of public comments during the 30-day public comment period for the 2019 AMRP update prior to submission to us per the requirements in § 447.203(b) and (b)(2). This data lag between a drop in Medicaid-participating providers accepting new Medicaid patients in 2016 and CMS receiving the next AMRP update with information about related concerns in 2019 illustrates how the infrequency of the triennial due date for the AMRP updates could allow a potential access concern to develop without notice by the State or CMS in between the due dates of the ongoing AMRP updates. Although § 447.203(b)(7) currently requires States to have ongoing mechanisms for beneficiary and provider input on access to care, and States are expected to promptly respond to concerns expressed through these mechanisms that cite specific access problems, beneficiaries and providers themselves may not be aware of even widespread access issues if such issues are not noticed before published data reveal them.

We also learned from our AMRP implementation experience that the timing of the ongoing AMRP submissions required by current § 447.203(b)(5)(ii) and access reviews associated with rate reduction or restructuring SPA submissions required by § 447.203(b)(6) have led to confusion about the due date and scope of routine, ongoing AMRP updates and SPA-connected access review submissions, particularly when States were required to submit access reviews within the 3-year period between AMRP updates when proposing a rate reduction or restructuring SPA, per the requirements in current § 447.203(b)(6). For example, one State timely submitted its initial ongoing AMRP on October 1, 2016, consistent with the requirements in § 447.203(b)(1) through (5), then the State submitted a SPA that proposed to reduce provider payment rates for physical therapy services with an effective date of July 1, 2018, along with an access review for the affected service completed within the prior 12 months, consistent with the requirements in § 447.203(b)(6). The State's access review submission consisted of its 2016 AMRP submission, updated with data from the 12 months prior to this SPA submission, with the addition of physical therapy services for which the SPA proposed to reduce rates. Because the State submitted an updated version of its 2016 AMRP in 2018 in support of the SPA submission, the State was confused whether its next AMRP update submission was due in 2019 (3 years from 2016), or in 2021 (3 years from 2018). Based on the infrequency of a triennial due date for AMRP updates and the numerous instances of similar State confusion during the implementation process for the AMRPs, we identified that the triennial timeframe was insufficient for the proposed comparative payment rate analysis and payment rate disclosure. As we considered a new timeframe for updates to the comparative payment rate analysis and payment rate disclosure to propose in this rulemaking, we initially considered proposing to require annual updates. However, we believe annual updates would add unnecessary administrative burden as annual updates would be too frequent because many States do not update their Medicaid fee schedule rates for the codes subject to the comparative payment rate analysis and payment rate disclosure on an annual basis.

As proposed, the payment rates for the categories of services subject to the proposed comparative payment rate analysis and payment rate disclosure are for office-based visits and, in our experience, the Medicaid payment rates generally do not change much over time due to the nature of an office visit.[190] Office visits primarily include vitals being taken and the time a patient meets with a physician or NPP; therefore, States would likely have a considerable amount of historical payment data for supporting the current payment rates for such services. Given the relatively stable nature of payment rates for office visits, we aim to help ensure the impact of the comparative payment rate analysis is maximized for ensuring compliance with section 1902(a)(30)(A) of the Act while minimizing unnecessary burden on States by holding all States to a proposed update frequency of 2 years to capture all Medicaid (and corresponding Medicare) payment rate changes.

As this proposed rule strives to reduce the amount of administrative burden from AMRPs on States while also fulfilling our oversight responsibilities, we believe updating the comparative payment rate analysis and

[190] We acknowledge that Medicaid primary care payment increase, a provision in the Patient Protection and Affordable Care Act (ACA, Pub. L. 111–148, as amended), temporarily raised Medicaid physician fees for evaluation and management services (Current Procedural Terminology codes 99201–99499) and vaccine administration services and counseling related to children's vaccines (Current Procedural Terminology codes 90460, 90461, and 90471–90474). This provision expired on December 31, 2014. *https://www.macpac.gov/wp-content/uploads/2015/03/An-Update-on-the-Medicaid-Primary-Care-Payment-Increase.pdf.*

payment rate disclosure no less than every 2 years achieves an appropriate balance between administrative burden and our oversight responsibilities with regard to section 1902(a)(30)(A) of the Act. We intend for the comparative payment rate analysis and payment rate disclosure States develop and publish to be time-sensitive and useful sources of information and analysis to help ensure compliance with section 1902(a)(30)(A) of the Act. If this proposal is finalized, both the comparative payment rate analysis and payment rate disclosure would provide the State, CMS, and other interested parties with cross-sectional data of Medicaid payment rates at various points in time. This data could be used to track Medicaid payment rates over time as a raw dollar amount and as a percentage of Medicare non-facility payment rates as listed on the Medicare PFS as well as changes in the number of Medicaid-paid claims volume and number of Medicaid enrolled beneficiaries who received a service over time. The availability of this data could be used to inform State policy changes, to compare payment rates across States, or be used for research on Medicaid payment rates and policies. While we believe the comparative payment rate analysis and payment rate disclosure would provide useful and actionable information to States, we do not want to overburden States with annual updates to the comparative payment rate analysis and payment rate disclosure. As we are proposing to replace the triennial AMRP process with less administratively burdensome processes (payment rate transparency publication, comparative payment rate analysis, payment rate disclosure, and State analysis procedures for rate reductions and restructurings) for ensuring compliance with section 1902(a)(30)(A) of the Act, we believe annual updates to the comparative payment rate analysis and payment rate disclosure would negate at least a portion of the decrease in administrative burden from eliminating the AMRP process.

With careful consideration, we believe that our proposal to require updates to the comparative payment rate analysis and payment rate disclosure to occur no less than every 2 years is reasonable. We expect the proposed biennial publication requirement for the comparative payment rate analysis and payment rate disclosure after the initial publication date would be feasible for State agencies, provide a straightforward timeline for updates, limit unnecessary State burden, help ensure public payment rate transparency, and enable us to conduct required oversight. We are seeking public comment on the proposed timeframe for the initial publication and biennial update requirements for the comparative payment rate analysis and payment rate disclosure as proposed in § 447.203(b)(4).

Lastly, we also propose in paragraph (b)(4) to require States to publish the comparative payment rate analysis and payment rate disclosure consistent with the publication requirements described in proposed paragraph (b)(1) for payment rate transparency data. Paragraph (b)(1) would require the website developed and maintained by the single State Agency to be accessible to the general public. We are proposing States utilize the same website developed and maintained by the single State Agency to publish their Medicaid FFS payment rates and their comparative payment rate analysis and payment rate disclosure. We are seeking public comment on the proposed required location for States to publish their comparative payment rate analysis and payment rate disclosure proposed in § 447.203(b)(4).
